**ARCH 523 Design Technology IV (3)** Kate Simonen, Rob Pena Integration of structure, environmental systems, spatial organization and architectural form is the focus of this course. Lectures and workshops develop an understanding of structural material, element and system performance, architectural and mechanical systems for delivering fresh air, illumination, and thermal comfort, and an ability to integrate systems for efficient and elegant design. Offered: A.

**ARCH 524 Design Technology V (3)** Focuses on computational simulation tools and techniques to evaluate the performance of an environmental system’s design or design alternatives, starting at earliest conceptual design phases to help architects make informed design decisions. Prerequisite: ARCH 523. Offered: W.

**ARCH 525 Life Cycle Assessment and Architecture (3)** Explores use of life cycle assessment data and methods within design and construction practices to understand and reduce the environmental impact of buildings.

**ARCH 526 Topics in High Performance Buildings (3)** Addresses key dimensions to the design of high performance buildings including: energy efficiency; health and comfort; structures and materials; economic performance; and renewable energy systems. Includes faculty-led discussions and presentations by experts in the field. Students explore and refine research topics in high performance buildings.

**ARCH 527 Introduction to Digital Design and Fabrication (3)** Offers an introduction to digital design and manufacturing technologies, with an emphasis on developing appropriate strategies for their use in design and architecture. Students learn to use digital design software and digitally enhanced fabrication tools to support their design strategies. Offered: AW.

**ARCH 528 Digital Design for Fabrication and Construction (3)** Explores the rapid integration of fabrication, construction, and performance criteria early in the architectural design process, through the
use of powerful digital tools. Students test advanced digital tools in architectural production and develop awareness and skills in integrated digital design, analysis, and prototyping. Offered: W.

ARCH 529 Advanced Digital Projects (3) Advanced topics for students who have completed one or more design computing courses and wish to develop a project further. Prerequisite: either ARCH 527 or ARCH 528.

ARCH 531 Active Control Systems for Building Operation (3) NW Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431. Instructors: Heerwagen Offered: WSp.

ARCH 532 Construction Materials and Assemblies II (3) Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and steel frame, commercial exterior envelope, and interior partitioning building construction systems. Prerequisite: either ARCH 332 or CM 313. Offered: A.

ARCH 533 Advanced Environmental Systems (3) Focuses on computational simulation tools and techniques to evaluate the performance of a design or design alternatives, starting at earliest conceptual design phases to help architects make informed design decisions. Topics include solar, lighting, thermal, and acoustical analysis techniques and their applications. Offered: WSp.

ARCH 534 Green Technology (3) Heerwagen Examination and application of various resource-conserving building technologies, particularly within the context of the LEED Rating System. Principles and practices associated with the inclusion of these technologies in buildings.

ARCH 535 Daylighting Design Seminar (3) Focuses on theoretical and applied daylighting principles in conjunction with physical and digital analytical tools. Includes field assessment of constructed buildings and individual projects involving research and design for lighting and daylighting.

ARCH 536 Designing with Living Systems (3) Investigates an integrated approach to urban agriculture and building systems; looks at cyclical ecosystems intrinsically interconnected with buildings, urban infrastructure, and the constructed environment; establishes a thorough understanding of these productive, living systems, which are indispensable for architects and landscape architects in their pursuit of more sustainable design practices.

ARCH 537 Traditional Building Methods: New Adaptations (3) Explores recent developments in traditional building techniques, a resurgence of interest in handmade buildings, and the use of local materials in building construction. Also examines why these materials and methods are becoming critical to communities around the world, and how they can be optimized to meet twenty-first century requirements.

ARCH 538 Building Reuse Seminar: Investigating the Value of Existing Buildings (3) Investigates the repurposing of buildings as a resource and energy conservation strategy and as an alternative to demolition of existing buildings; discusses case study strategies for sustainable retrofits. Students critically observe, record, and analyze structures and discuss building reuse design in the context of sustainable environments.

ARCH 541 Visions of the Japanese House (3) Explores the origins, derivations, and permutations of the "Japanese House." Outlines underlying principles and paradigms of Japanese domesticity through history and traces its evolution trough aspects ranging from the house's expression in media to its constructional materiality.

ARCH 550 History and Theory of Architecture I (3) First half of a two course sequence that introduces architectural history and theory in coordination with design studio and design technology courses. This
course explores geographically and chronologically diverse cultures and their built works in terms of social, technological, and environmental factors while linking aspects of human making and meaning. Offered: A.

ARCH 551 History and Theory of Architecture II (3) L. Iarocci Second half of a two course sequence that introduces architectural history and theory in coordination with design studio and design technology courses. Starting from the Age of Discovery and continuing to the present day, this course intends to gain a deeper understanding of architecture as a product and producer of the environment, society and technology. Prerequisite: ARCH 550 Offered: W.

ARCH 556 The Arts and Crafts Movement and Its Legacies (3) Ochsner Historical development of the arts and crafts movement focusing primarily on its influence on American architecture from 1870 to the present.

ARCH 557 History and Theory of Historic Preservation (3) Jeffrey Karl Ochsner National and international historic preservation, primarily from the late nineteenth century to the present. Fosters a critical understanding of preservation through consideration of texts from preservation, architecture, landscape architecture, anthropology, planning, and other fields. Offered: Sp.

ARCH 558 Seminar in Twentieth-Century Architecture (3/5) Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in art history, architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

ARCH 559 American Utilitarian Architecture (3) Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

ARCH 560 Seminar on Architectural Theories (3) Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

ARCH 561 Urban Design Theory (3) Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

ARCH 562 Contemporary Architectural Theory (3) The course is structured as an advanced introduction to contemporary architectural theory, engaging topics that will prepare students for the challenges of today’s global built environment. The intention is to foster a critical understanding of design practice through examining areas of contemporary theoretical focus in architecture and the built environment. It also prepares students for the subsequent Research Methods class. Offered: A.

ARCH 563 Seminar in Architecture and Cultural Theory (3) Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research.

ARCH 564 Environmental Design and Well-Being (3) Analyzes how environmental design can promote well-being in natural systems and human life worlds. Explores current knowledge about climate change and organism-environment dynamics, theories of health and complexity, ideological barriers and the power of images, new materials, and “high-tech”/”low-tech” alternatives for ecological design and planning.

ARCH 567 Qualitative Research Methods (3) Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grassroots empowerment, post-structuralism, and self organization. Offered: jointly with URBDP 519.

ARCH 570 Design Development (3) Miller Lectures and case studies emphasizing the design development phase of architectural practice. Concurrent with ARCH 501.
ARCH 571 Professional Practice (3-4) Introduces the business and ethics of architectural design and building construction, while helping students explore their professional identities and make intentional choices about their career paths. Compares fundamentals of architectural practice against historical evolution of the field and speculation about its future.

ARCH 573 Sustainable Design Case Studies: Methodologies in Seattle's Professional Design Firms (3) Heather Burpee Studies sustainable design methodologies in Seattle professional design firms. Office visits and interviews of architecture and engineering practitioners highlight how high performance ideas and sustainable practices are implemented across various professional settings. Offered: Sp.

ARCH 574 Design and Construction Law (3) Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington State law. Offered: jointly with CM 500; A.

ARCH 578 Case Studies in Contemporary Architectural Practice (3) Presentations and discussions by local architectural firms examining the issues that influence building design and project delivery in contemporary architectural practice. Focuses on understanding the issues as opportunities rather than impediments to good design. Class visits a different architectural firm each week for an in-depth review of current projects.

ARCH 579 Technical Issues in Preservation Design (3) Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

ARCH 581 Advanced Rendering (3) Provides an in-depth discussion and hands-on experience with technical and qualitative features of computer rendering. Students learn to generate digital images that can mimic the physical world and predict the final appearance of a design.

ARCH 582 Computational Lighting Design (3) Addresses the recent developments in lighting simulation, visualization, and per-pixel measurement techniques. Provides an understanding of the theoretical aspects of computer applications in lighting design; and the practical knowledge of tools that enhance the integration of the lighting analysis into architectural design processes.

ARCH 587 Theory of Design Computing (3) Examines the relationship between theory of design and computational tools for practice. Explores how the emergence of computers as a mainstream tool in design has already changed architectural practice. Discusses how, as with other technologies that revolutionized the practice of architecture, information technologies carry hidden implications about design process and products. Offered: A.

ARCH 588 Research Practice (3) Provides the opportunity for a guided preliminary exploration and refinement of a research topic, prior to thesis proposal. Weekly seminar meetings focus on student work with regular presentations and discussions. Offered: W.

ARCH 590 Urban and Preservation Issues in Design (3) Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American urban contexts, including examples of recent projects presented by practicing professionals. Concurrent with ARCH 500.

ARCH 591 Architecture and Landscape (3) Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on Western concepts of nature. A taxonomy of place as nature is developed. Explores ways in which the architect can design places that landscape taxonomy. Concurrent with ARCH 502.

ARCH 592 Research Methods (3) Louisa M Iarocci, Mehlika Inanici Role and practice of research methods in architecture related to themes of product, process, and performance. Explores the idea of research as a practice unique to architecture in order to discover how innovative approaches and/or outcomes emerge from generating, reinterpreting, and/or rediscovering information
from a critical and creative perspective. Prerequisite: ARCH 562. Offered: ASp.

ARCH 593 Architectural Research Seminar I (3, max. 6) The first of two seminars structured to directly support the research studios. Investigation of a research area integrated into the research studio’s design work. Focus on research methods, analysis, interpretation, and representation of research findings. Tied to a section of Architectural Research Studio I. Prerequisite: ARCH 592. Credit/no-credit only. Offered: W.

ARCH 594 Architectural Research Seminar II (3, max. 6) The second of two seminars structured to directly support the research studios. Investigation of a research area integrated into the research studio’s design work. Focus on research methods, analysis, interpretation, and representation of research findings. Tied to a section of Architectural Research Studio II. Prerequisite: ARCH 592. Credit/no-credit only. Offered: Sp.

ARCH 595 Thesis Research and Preparation (4) Develops skills for conducting master’s thesis research, including writing a major portion of the thesis document. Engages students as a community of peers sharing ideas and resources for completing thesis work. Required for admission to the master’s thesis design studio. Credit/no-credit only. Offered: Sp.

ARCH 596 Fieldwork in Professional Practice (*, max. 9) On-location study under the supervision of a practicing professional involved in an aspect of environmental design.

ARCH 597 Research Practicum (5) Johnson, McLaren Provides a mentored research opportunity where students apply their research and writing skills and knowledge of methods and theory to an advanced research topic. Offered: Sp.

ARCH 598 Special Topics for Graduate Students (1-6, max. 18) Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter and published in the course syllabus.

ARCH 599 Independent Thesis Research and Preparation (3/4) Participants identify a master’s thesis research area, articulate a specific question within the research area, find relevant literature and prepare an annotated bibliography, establish a research method and timetable, pursue preparatory research and analysis for the thesis project, and write, present, and defend a thesis proposal. Credit/no-credit only. Offered: AWSp.

ARCH 600 Independent Study or Research (*-)

ARCH 700 Master’s Thesis (*-)

BUILT ENVIRONMENT

B E 200 Introduction to Built Environments (3) VLPA/I&S Introduction to critical issues related to the planning, design, construction, and use of our built environments and the roles of the various disciplines contained within the College of Built Environments. Offered: A.

B E 210 A Global History of the Built Environment I (5) VLPA/I&S V. PRAKASH This course critically examines built environments over time using a global perspective beginning with First Societies through 1st millennium CE. The global perspective encourages thinking about history in a transnational and transgeographical manner. The course is broadly structured around the concept of “time cuts” that allow for comparisons across regions and cultural formations. Prerequisite: There are no prerequisites; recommended: None are required. Offered: W.

B E 211 A Global History of the Built Environments II (5) VLPA/I&S V. PRAKASH This course critically examines built environments over time using a global perspective beginning 1st millennium CE to the present. The global perspective encourages thinking about history in a transnational and transgeographical manner. The course is broadly structured around the concept of “time cuts” that allow for comparisons and connections across regions and cultural formations. Prerequisite: There are no prerequisites; recommended: None are required. Offered: Sp.

B E 220 Cities, Health, and Well-being (3) I&S This course analyzes the ways urban built environments bear on physical and mental health and well-being (material-economic resources, security, social relations, open choices). It focuses on how the practices and knowledge of built environment
professions and disciplines interact with public health, engineering, and the sciences to understand and change cities. Offered: W.

**B E 230 Living with Disasters: Design for Resilience (5)** NW/I&S D. Abramson Studies types of environmental hazards (e.g., earthquakes, flooding, climate change) and the ways people can build more resilient communities. Pre-major introduction to BE disciplines: architecture, landscape architecture, urban planning, construction management. Students apply concepts in a Seattle-based scenario project. Offered: Sp.

**B E 405 Built Environments Studio (6, max. 18)** An intense learning experience in which students are assigned to interdisciplinary, collaborative teams to develop specific approaches to addressing complex issues related to built environments. Focus and format vary with the interdisciplinary team of instructors.

**B E 498 Special Projects (1-12, max. 12)**

**B E 505 Built Environments Studio (6, max. 18)** Provides an intense learning experience in which students are assigned to interdisciplinary, collaborative teams to develop specific approaches to addressing complex issues related to built environments. Focus and format vary with the interdisciplinary team of instructors.

**B E 550 Colloquium-Practicum on Research-Practice and Teaching-Learning (1, max. 6)** A synthetic and interdisciplinary forum for the presentation and peer critique of faculty and student research and practice projects, and a venue for pedagogical issues and skills for effective teaching and learning.

**B E 551 The Contemporary Built Environment (3)** Covers major or landmark cases of complex built environment projects, emphasizing the multiple dimensions involved and their interconnections.

**B E 552 Theories of Knowledge and the Built Environment (3)** Systematic examination of alternative epistemological frameworks applicable to studying the built environment; examinations of their differences and similarities and of the possibility of a comprehensive, pluralistic approach.

**B E 553 Ethics in Practice, Research, and Teaching (3)** Preparation for ethical challenges facing professional practice, research, and teaching in the built environment. Coverage of general and professional ethics, and examination of principles and rules and application through case studies.

**B E 597 Directed Readings (*, max. 30)** Intensive reading in the literature of the built environment, directed by members of doctoral Supervisory Committee. Credit/no-credit only. Offered: AWSpS.

**B E 598 Special Topics (1-6, max. 15)** Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

**B E 600 Independent Study or Research (*)** Offered: AWSpS.

**B E 800 Doctoral Dissertation (*)** Offered: AWSpS.

**CONSTRUCTION MANAGEMENT**

**CM 250 Construction and Culture (5) I&S A. HOLM** Evolution of modern building construction with emphasis on the relationship between the projects built over time and the people who built them. Focuses on the development of building technology, equipment, and materials used by Western civilizations. Offered: W.

**CM 260 Digital Tools (3) W. Bender** Use construction and design related software to perform project administration. Students will be able to apply Excel to organize construction costs, Revit to visualize construction in 3-D, Computer Aided Design to draw construction plans, SketchUp to visualize construction activities, and Bluebeam for plan reading and collaboration. Offered: AWSp.

**CM 301 Construction Communications (3)** Applies business writing to the construction industry. Focuses on planning, writing, and editing documents most critical to a construction manager’s professional success. Offered: AW.

**CM 310 Introduction to the Construction Industry (3) G. MIGLIACCIO** Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types,
procurement methods, industry standards, contract documents, and career opportunities. Offered: A.

**CM 311 Construction Documents (2)** Introduction to construction plans and specifications with emphasis on reading and interpreting them. Focuses on architectural/engineering drawings and associated specifications used in building construction. Offered: A.

**CM 312 Construction Accounting (3)** Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Offered: A.

**CM 313 Construction Methods and Materials I (4)** Introduction to basic building materials, with emphasis on techniques for assembly and utilization in residential and light construction, including materials such as concrete, brick, and wood. Offered: AS.

**CM 320 Construction Contract Documents (3)** Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural/engineering drawings and specifications in the construction process. Offered: S.

**CM 321 Mechanical Systems in Buildings (3)** Introduction to building heating, cooling, plumbing, and fire protection systems including aspects of design, construction, estimating, and problem solving. Offered: W.

**CM 322 Electrical Systems in Buildings (3)** Introduction to electrical construction including electrical distribution from generation to consumption, terminology, equipment and applications, electrical contract documents and estimating, and electrical project management theory and practice. Offered: W.

**CM 323 Construction Methods and Materials II (5)** Analysis of building methods for structural, non-structural, and design and use of temporary structures including method selection, sequencing, and coordination of specialty trades in commercial and industrial construction. Offered: W.

**CM 330 Construction Estimating Lab (1)** Apply software to perform material take off and apply cost when estimating construction projects.

**CM 331 Construction Estimating I (3)** Introduction to the principles and techniques of estimating construction costs, with emphasis on quantity take-off and pricing elements of work. Offered: Sp.

**CM 332 Construction Equipment Management (3)** G. MIGLIACCIO Study of the basic principles, practices, and techniques used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific construction tasks, and estimating equipment production. Offered: Sp.

**CM 333 Construction Safety (3)** K. LIN Explanation of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized. Offered: A.

**CM 334 Construction Surveying (2)** D. JACOBSON Introduction to construction surveying including layout of construction features, distance and elevation measurement, and use and care of surveying equipment. Offered: Sp.

**CM 335 Sustainable Construction (3)** K. NEMATI Studies issues associated with planning and constructing sustainable projects including development of LEED documentation and evaluation of financial, social, and environmental impacts of construction operations. Offered: Sp.

**CM 340 Sustainable Building Design and Construction Practices (3)** Examines sustainable standards for design and construction of commercial and institutional buildings focusing on environmental, economic, and social benefits of sustainable buildings. Offered: W.

**CM 404 Integrated Design/Build Studio (6)** C. DOSSICK Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program
requirements specified in case studies. Offered: jointly with ARCH 404; W.

CM 410 Construction Estimating II (4) Principles and techniques for estimating commercial construction projects including a mock bid day exercise on a commercial construction project. Prerequisite: CM 331; CM 332. Offered: A.

CM 411 Project Planning and Control (4) A. Abdel Aziz Introduction to the basic principles, techniques, and practices used as tools by contractors to plan, schedule, and control costs on building construction projects. Prerequisite: CM 331. Offered: A.

CM 412 Construction Practice (2) J. SHAIMAN Introduction to the challenges of managing a construction organization. Focuses on ethical behavior, organizational behavior, human resources management, marketing, financial management, and risk management. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 413 Competitive Business Presentations (1) C. DOSSICK Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

CM 414 Virtual Construction (3) C. DOSSICK Examines the use of building information models for managing the construction process and facilitating collaboration among project participants. Offered: A.

CM 415 Heavy Construction Practices (3) J. SCHAUFELBERGER Introduction to heavy construction with emphasis on highway and bridge construction. Topics include: contract analysis, work breakdown, equipment selection, unit-price cost estimating, site logistics planning, and project scheduling. Prerequisite: CM 332. Offered: A.

CM 416 Residential Project Development (3) Studies the financial, technical, and managerial activities as well as the environmental impact regulations and studies associated with the development of residential projects, including the business and construction practices and marketing strategies needed for a successful project. Offered: A.

CM 417 Residential Project Management (3) J. SHAIMAN Introduction to the organization, management, control and administrative functions on residential construction projects. A residential case study will be utilized to provide hands on learning opportunities. Introduction to Cost control, Value Engineering, and Site Logistics. Prerequisite: CM 410; CM 411. Offered: W.

CM 420 Temporary Structures (3) S. DANIALI Study of temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems. Prerequisite: ARCH 321. Offered: Sp.

CM 421 Project Management I (3) Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Prerequisite: CM 410; CM 411. Offered: W.

CM 422 Computer Applications in Construction (2) A. ABDEL AZIZ Introduction to the use of automated programs for planning, scheduling, and controlling construction projects. Focuses on the use of Primavera Project Planner software. Prerequisite: CM 411. Offered: W.

CM 423 Construction Law (3) A. TRAMOUNTANAS Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasizes Washington state law. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 425 Concrete Technology (3) K. NEMATI Introduction to the properties and behavior of concrete. Focuses on uses of concrete as a building material and new techniques for concrete construction. Offered: W.

CM 426 Preconstruction Techniques (3) C. Dossick Studies the preconstruction phase of a building construction project by focusing on conceptual cost
estimating, schedule analysis, and constructability reviews during the development of the design for the project. Offered: W.

CM 428 Heavy Construction Techniques (3) K. NEMATI Studies the materials, methods, and techniques used in site work, highway, utility, and other heavy construction projects. Addresses concrete as a construction material, foundations, rigid and flexible pavements, bridges, dams, and tunnels. Offered: A.

CM 429 Construction Superintendent (3) T. CHAMBERS Study of the role and responsibilities of the Project Superintendent, analytical and technical skill sets used in managing field operations. Special emphasis on logistics, work flow planning, productivity tracking and development and management of a project schedule's critical path. Prerequisite: Offered: W.

CM 430 Building Code and Environmental Regulations (3) Introduction to the permit process, life-safety requirements, and environmental regulations for designs and construction of buildings as established by the national and local jurisdictions. Prerequisite: ARCH 322. Offered: Sp.

CM 431 Project Management II (5) Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Prerequisite: CM 417 or CM 421. Offered: Sp.

CM 432 Soils and Foundations (3) S. DANIALI Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Prerequisite: CM 323. Offered: W.

CM 433 Construction Labor Relations (2) E. KOMMERS Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: W.

CM 434 Lean Project Planning (3) Y. KIM Studies lean construction principles and examines how those principles can be applied in a construction context to improve project quality and shorten duration while reducing cost. Offered: Sp.

CM 449 Construction Plan Reading and Estimating (3) Bill Bender Reading and interpreting a complete set of working drawings for residential and commercial construction projects. Principles and techniques of estimating construction, with emphasis on quantity take-off. Offered: A.

CM 450 Construction Project Management (5) A. ABDEL AZIZ Examines management of construction projects focusing on construction contracting, cost estimating, project scheduling, and resource management. Offered: S.

CM 481 Facility Life Cycle 1: Planning (3) Introduction to facility management. First in sequence of three built around the principle of the facility life cycle. Defines key terms. Examines topics such as ethics, business context, budgets, cost analysis, and strategic planning. Students work in online teams to develop a course-final project.

CM 482 Facility Life Cycle 2: Design and Construction (5) Second in sequence of three built around the principle of the facility life cycle. Covers design basics, cost estimates, building materials, project management, and construction administration. Students establish a mentor relationship with a professional facility manager and interview three guest speakers, experts in their fields. Offered: A.

CM 483 Facility Life Cycle 3: Relocation and Operational Issues (4) Final in sequence of three built around the principle of the facility life cycle. Provides an overview of issues related to facility operations and maintenance, including occupancy and start up, inventory and staff management, relocation, disaster planning, emergency preparedness, and security. Offered: W.

CM 498 Special Topics (1-10, max. 20)

CM 499 Undergraduate Research (*, max. 12) Individual or small-group studies. Students may select topics with approval of faculty sponsor and department.
CM 500 Design and Construction Law (3) Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington State law. Offered: jointly with ARCH 574; A.

CM 510 Advanced Construction Techniques (3) K. NEMATI Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

CM 512 Preconstruction Facilitation (3) C. Dossick Studies the preconstruction phase of a building construction project by facilitating the work of a multi-disciplinary team focusing on developing the conceptual design for a construction project. Offered: W.

CM 515 Virtual Construction Management (3) Carrie Sturts Dossick Examination of innovative techniques for planning and managing construction projects including use of time-phased, three-dimensional Building Information Models; sustainable construction techniques; and web-based project management tools. Offered: Sp.

CM 518 Lean Construction (3) Y. KIM Examines the application of lean production management concepts to the management of construction projects. Offered: Sp.

CM 520 Construction Procurement Systems (3) Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

CM 525 Cost Analysis and Management (3) Y. KIM Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

CM 527 Management of Scope and Risks for Construction Projects (3) G. MIGLIACCIO This course introduces students to the process of evaluating scope definition and risks in a project’s life cycle. Using industry literature and reviewing case studies, students will learn project scoping and risk management best practices and apply them to a team project. Offered: W.

CM 528 Advanced Cost Management in Construction (3) Y. KIM Studies the three primary aspects of project cost control: overhead cost control, direct construction cost control, and life-cycle cost analysis. Addresses techniques in activity-based costing, earned value analysis, and life-cycle cost analysis. Offered: Sp.

CM 530 Project Economics and Risk Analysis (3) A. ABDEL AZIZ Studies the process for delivery of public-private infrastructure projects and risk analysis techniques used in economic/financial project studies. Focuses on understanding public-private project delivery systems, feasibility studies, project financial and economic modeling, and quantitative risk analysis techniques. Offered: Sp.

CM 535 Research Methods in Construction (3) K. LIN Examination of research methods used in construction studies. Includes an overview of the research process, planning of a successful research endeavor, literature review, qualitative and quantitative research, ethics in research and publishing, and various research methodologies. Offered: W.

CM 545 Real Estate Development (3) A. HOLM A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: S.

CM 550 Residential Project Development (3) Study of the financial, technical, and management activities and environmental impact regulations and
studies associated with the development of residential projects, including business and construction practices and marketing strategies for continued profitable operation of a residential construction firm. Offered: S.

**CM 555 Construction Firm Management (3)**
Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management, insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

**CM 560 Design-Build Project Management (3)**
Examines the design-build process used for the delivery of construction projects. Involves analysis of project owner requirements and development of a written proposal for design and construction. Offered: Sp.

**CM 565 Managing International Projects (3) K. LIN**
Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: S.

**CM 570 Facilities Management (3)**
Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: Sp.

**CM 575 Leadership in Construction (3) A. HOLM**
Studies leadership principles applicable to the construction industry. Addresses both organizational leadership and leadership of construction processes. Offered: A.

**CM 580 Temporary Structures (3) K. NEMATI**
Study of materials, methods, and techniques associated with temporary structures used in various construction operations, such as concrete formwork, scaffolding, underpinning, cofferdams, slurry trenches, earth-retaining structures, and dewatering systems. Offered: Sp.

**CM 582 Heavy Construction Estimating (3) A. ABDEL AZIZ**
Study of the principles used in developing cost estimates for heavy construction projects. Includes interpretation of contact documents, quantity take-off, pricing, and preparation of unit-price bid documents. Emphasizes developing cost estimates for highway projects. Offered: S.

**CM 584 Marine Construction (3) S. DANIALI**
Study of the materials, methods and techniques associated with construction of projects in marine environments, including the impact of site conditions on the selection of appropriate construction techniques. Emphasizes equipment and crew selection, productivity and cost estimation, and construction sequencing. Offered: A.

**CM 586 Utility Systems Construction (3) W. BENDER**
Study of the materials, methods, and techniques associated with construction of major utility systems, such as water, sewer, communications, electrical or natural gas. Includes construction of central utility plants as well as major distribution and collection systems. Offered: Sp.

**CM 588 Construction Operations and Productivity (3)**
Study of heavy construction operations with emphasis on productivity enhancement focusing on an integrated approach to planning, modeling, analysis, and design of construction operations, and the use of simulation models and other analytical tools. Offered: W.

**CM 590 Research Methods in Construction Engineering (2) J. SCHAUFELBERGER**
Study of the academic research process. Includes development of a research proposal, review of relevant literature, selection of research methodology, collection of data, data analysis, and preparation of research report. Offered: W.

**CM 598 Special Topics (1-6, max. 6)**
Systematic study and offering of specialized subject matter. Offered: AWSpS.

**CM 600 Independent Study or Research (*-*)**
An in-depth independent investigation of some facet of construction management. Offered: AWSpS.
**CM 700 Master’s Thesis (–) **Offered: AWSpS.

**LANDSCAPE ARCHITECTURE**

**L ARCH 200 Landscape Architecture Field Trips (2)**
I&S/VLPA Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors.

**L ARCH 212 Designing the Future (5)** VLPA/I&S I. Robertson Ecological/environmental instability and resulting social/cultural disruptions make the world in which spatial designers work increasingly uncertain. Lectures and guest speakers explore diverse ways in which design may create more sustainable futures. Course activities, including in-class design exercises, internet research, group discussions, take home projects, etc. encourage synthetic/integrative thinking. Offered: A.

**L ARCH 300 Introductory Landscape Architecture Design Studio (6)** VLPA Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

**L ARCH 310 Landscape Architecture Field Sketching (2)** Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

**L ARCH 311 Introduction to Design Graphics (2)**
Introduction to communication techniques for various phases of the design process. Many techniques are introduced and their suitability and appropriateness for different purposes explored.

**L ARCH 322 Introduction to Planting Design (3)**
VLPA Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

**L ARCH 323 Topics in Planting Design I (1)**
Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Identifies and describes native and ornamental trees and shrubs on the UW campus and vicinity. Utilizes tree canopy layers, shrub masses, and ground plane layers as space forms in studio project designs. Concurrent with L ARCH 301.

**L ARCH 324 Topics in Planting Design II (1)**
Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Utilizes trees, shrubs, and herbaceous plants as space forms in urban contexts. Utilizes plant characteristics of color, texture, and form in studio project design. Considers design principles of unity/diversity, complexity/simplicity, and pattern in studio project design. Concurrent with L ARCH 302.

**L ARCH 325 Topics in Planting Design III (1)**
Explores planting design topics that relate specifically to site, program, and design issues addressed in concurrent studio projects. Considers trees, shrubs, and herbaceous plants of natural and ecosystems human-made plant communities. Considers plant community dynamics and changes over time. Concurrent with L ARCH 303.

**L ARCH 341 Site Design and Planning (3)**
VLPA Introduces urban ecological design issues for good site-planning processes, principles, and methods. Linked with L ARCH 301. Addresses planning for people, natural systems in place-making, design for movement with carried land uses. Includes readings, discussions, presentations, campus walks, case studies, graphic and written assignments.

**L ARCH 352 History of Landscape Architecture (5)**
VLPA/I&S Survey of the development of landscape architecture as an art form from Mesopotamia to the present. Relationships to physical landscape, climate, culture, religion, and other arts. Open to non-majors. Offered: A.

**L ARCH 353 History of Modern Landscape Architecture (5)**
VLPA/I&S Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in
relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to non-majors. Offered: W.

L ARCH 361 The Human Experience of Place (3) I&S/VLPA, DIV Interdisciplinary approaches to exploring the reciprocal relationship between people and the landscapes of everyday life. Through readings, discussion, in-class activities and mini-projects, students study place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Open to non-majors.

L ARCH 362 Design of Cities (3) VLPA/I&S Introduction to the discourses and debates in the contemporary design of cities. Provides an overview of design theories and examples of historic and contemporary work. Includes discussion of the contesting urban processes: visions and paradigms of city; discourses of nature and the city; contemporary urban changes; public and community process; and everyday place making.

L ARCH 363 Ecological Design and Planning (3) NW Introduction to landscape ecological theory applied to urban environments. Comparison of different vocabularies used to describe landscape structure and function, from the fields of landscape design, urban design, and biology. Discussion of design theories that have sought to re-center landscape planning and design around the goal of achieving ecological sustainability.

L ARCH 401 Design Foundations Studio (6) Introduces site planning and design process, principles, and skills through experiential learning. Examines and applies landscape elements used to design, including plants. Activities foster skill in design process, shaping landscape form and space, creativity, communication, group dynamics, and organization. Includes required fieldtrips. Majors only. Offered: A.

L ARCH 402 Urban Sites Studio (6) Explores application of design ideas and principles to urban sites. Applies theory and research informing the design of human environments and lessons from urban and ecological design precedents to the design of urban places. Includes design across scales to detailed site design studies, including planting design. Majors only. Offered: W.

L ARCH 403 Ecological Systems Studio (6) Project design studies related to ecological systems. Emphasizes the innovative use of ecological processes and patterns in design development to improve designed landscape's performance. Both biophysical and social criteria are used to define performance. Introduces computer-mapping applications. Majors only. Offered: Sp.

L ARCH 404 Advanced Studio I (1-6, max. 12) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar, and collaborative. The projects for each studio are distinct, however they all advance student's skills in design thinking, critical assessment, analysis, collaboration, and communication.

L ARCH 405 Advanced Studio II (1-6, max. 12) Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARCH 406 Individual Design Studio (6) Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

L ARCH 407 Advanced Studio III (1-6, max. 18) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar and collaborative. Each studio is geared toward advancing student's skills in design thinking, critical assessment, analysis, collaboration and communication.

L ARCH 411 Landscape Representation I (3) Introduces fundamental graphic and representation conventions, hand-drawing techniques, and media used in landscape architecture and environmental design. Emphasizes drawing and media skills that support design ability development. Includes lectures, demonstrations, display of examples,
drawing from slides, and in-class workshops. Credit/no-credit only.

L ARCH 412 Landscape Representation II (1-3, max. 6) Development of advanced skills of visual representation to communicate students' visions for urban ecological design including techniques used during the design process and for presentation.

L ARCH 423 Plant Identification & Management (3) Plants and the soil in which they grow are the living materials that form the foundational palette from which landscape architects work to design and manage landscapes. Learn to identify plants, their ecology and understand their maintenance requirements. Provides students with the opportunity to gain insight into the field of botany, biological complexity of plants and their structural contributions to urban ecology.

L ARCH 424 Planting Design Seminar (3) Introduces and investigates the ecological and social functions behind planting design. Introduces conceptual methods to planting design using various 'lenses'. Discusses the relationship between planting plan graphics and their actual three-dimensional applications. Focuses on combining plants into a cohesive, artistic, and ecologically responsible design that responds appropriately to site conditions.

L ARCH 425 Advanced Planting Design Studio (1-6, max. 6) Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and aesthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

L ARCH 431 Landform Grading and Drainage (3) Introduces the concepts and methods behind grading and drainage and how they are used as design and problem-solving tools. Covers the relationship between grading and drainage plan graphics and their actual three-dimensional applications. Presents basic design principles. Considers the ecological and artistic approaches to grading and drainage. Majors only.

L ARCH 432 Materials, Craft, and Construction (3) Materials and material assemblies in landscape architecture. Material fundamentals, design, detailing and construction techniques. Site-based material analysis and hands-on fabrication.

L ARCH 433 Design Implementation (3) Provides an understanding of essential considerations of design implementation and construction documentation in landscape architecture. Emphasizes the landscape architect's skill in preparing drawings and specifications and their role during bidding and construction. Includes production of a construction drawing set.

L ARCH 434 Urban Soils and Hydrology (3) Develops basic understanding and skills related to soil properties and their specification for use in horticulture and hydrological performance, and knowledge and skills needed by landscape architects to implement design solutions that manipulate urban hydrological conditions. Majors only. Prerequisite: L ARCH 331.

L ARCH 440 Digital Media I in Landscape (1-3, max. 3) Introduces digital applications and methodologies useful in landscape architects' interpretive, iterative design, production, and presentation processes. Focuses on skills in 2D CAD, 3D visualization, graphic representation, and the integration of manual and digital techniques.

L ARCH 441 Digital Media II in Landscape (3) Explores Computer Aided Design as a powerful tool in landscape design, analysis, and visualization. Consists of four core units: 2D CAD drafting; digital terrain modeling; 3D solids and surface modeling; and visualization. Prerequisite: L ARCH 440.

L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

L ARCH 451 History of Environmental Design on the West Coast (3) VLPA Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.
L ARCH 454 History of Urban Landscapes and Environments (5) Explores the history and historiography of urban landscapes and the design of cities with an emphasis on North America in the context of the broader study of cities in China, Japan, and in the Western world from the pre-classical through twentieth centuries in Europe. Offered: S.

L ARCH 463 Urban Recreational Design (3) VLPA/I&S Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 470 Landscape Architecture Tutorial (2, max. 6) Various aspects of project organization, programming, scheduling of workloads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

L ARCH 473 Professional Practice (3) Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARCH 474 Design Build Studio I (1-6, max. 6) Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation. Offered: W.

L ARCH 475 Design Build Studio II (1-6, max. 6) Winterbottom Students design and construct a community based project, synthesizing prior course instruction by going through the design process from concept to schematic design, creating construction documents, and implementing what they have designed. Offered: Sp.

L ARCH 476 Internship (1-6, max. 9) Working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no-credit only.

L ARCH 477 Landscape Architecture Consultancy Studio (3-6, max. 6) Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects.

L ARCH 481 Planning Urban Green Infrastructure Networks for Healthy Cities (5) Explores the planning of green infrastructures to maximize ecosystems services and support more compact and livable communities. Credit/no-credit only.

L ARCH 482 Designing High Performance Landscapes (5) Looks at ways to design 'high performance landscapes' that integrate ecological realities and urban infrastructural needs while expressing an aesthetic of performance. From site analysis to final design, provides hands-on experience in creating green infrastructure assets in the urban environment. Credit/no-credit only.

L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30) Studies conducted under faculty supervision in various locations outside the United States.

L ARCH 498 Special Projects (1-10, max. 30) Special projects as arranged. Open to nonmajors.

L ARCH 499 Undergraduate Research (1-9, max. 9) Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

L ARCH 501 Advanced Studio IV (1-6, max. 18) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar, and collaborative. Each studio is geared toward advancing student's skills in design thinking, critical assessment, analysis, collaboration and communication. Credit/no-credit only.

L ARCH 503 Advanced Studio VI (1-6, max. 18) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar, and collaborative. Each studio is geared toward advancing student's skills in design thinking, critical assessment, analysis, collaboration, and communication. Credit/no-credit only.
L ARCH 504 Advanced Studio VII (1-6, max. 18) The advanced studio series employ a design as research approach to examine contemporary issues in landscape architecture that are culturally diverse, multi-scalar, and collaborative. Each studio is geared toward advancing student's skills in design thinking, critical assessment, analysis, collaboration, and communication. Credit/no-credit only.

L ARCH 505 Landscape Planning Studio (1-6, max. 6) Yocom Examines the theory and techniques of landscape planning across a wide range of spatial scales and contexts in the design process. Explores the application of planning techniques and technologies by a specific design or planning project. Offered: A.

L ARCH 506 Landscape Visual Resources (1-6, max. 6) Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

L ARCH 507 Art and Landscape Studio (1-6, max. 6) Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

L ARCH 511 Visual Learning (3) Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts.

L ARCH 523 Landscape Technology (1-6, max. 6) Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

L ARCH 552 History of Landscape Architecture (5) Surveys the development of landscape architecture as an art form and a practice across diverse cultures and places in the context of developing historiographical approaches and frameworks.

L ARCH 553 History of Modern Landscape Architecture (5) Focuses on building an historic and critical overview of modernism and modernist designs in the practice and discipline of landscape architecture. Focuses on critical readings of historical narratives to explore the emergence of theory in practice.

L ARCH 561 The Human Experience of Place (3) Manzo Uses interdisciplinary approaches to explore the reciprocal relationship between people and the landscapes of everyday life. Studies place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Offered: A.

L ARCH 562 Landscape Art (2) Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer's perception and experience; examples of public and private support.

L ARCH 563 Ecological Design and Planning (3) Yocom Explores the contemporary theory supporting the practice of ecological design and planning. Examines the potential relationships between ecological theory and design applications, particularly in urban environments. Topics are supported by a diverse collection of examples and case studies. Offered: Sp.

L ARCH 564 Sustainable Urban Landscapes (2) Rottle Introduces contemporary literature on urban sustainability and provides a forum for discussion about theories, applications, and practices towards the planning and design of sustainable and ecological urban environments. Offered: A.

L ARCH 570 Landscape Architecture Theory and Scholarship (3) Covers the nature of scholarship and theory building in landscape architecture. Investigates scholarship related to the design process, design critique, research, and practice. Includes consideration of capstone project topics. Offered: W.

L ARCH 571 Landscape Architecture Research Methods (3) Introduction to and exploration of selected research methods employed in landscape
architecture research. Emphasizes how to apply research methods to a research question or problem. Includes exploration of data analysis and interpretation of research results.

**L ARCH 572 Research Methods in Landscape Architecture (3)** Introduction to and exploration of selected research methods employed in landscape architecture research. Emphasizes how to apply research methods to a research question or problem. Includes exploration of data analysis and interpretation of research results.

**L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12)** Advanced topics in landscape architecture with focus on unpublished areas of research.

**L ARCH 598 Special Topics (1-6, max. 30)** Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

**L ARCH 600 Independent Study or Research (*/-)**

**L ARCH 601 Internship (1-6, max. 9)**

**L ARCH 700 Master’s Thesis (*/-)**

**L ARCH 701 Thesis Studio (1-6, max. 12)** Studio designed to support students’ independent thesis research and design process by providing a structured framework for regular meetings, studio reviews, peer/committee/guest critiques, and process reflections. Credit/no-credit only.

**L ARCH 702 Capstone Project Studio (1-6, max. 12)** Way Capstone group project studio. Credit/no-credit only.

**L ARCH 703 Group Project (1-6, max. 12)** Credit/no-credit only. Offered: AWSp.

**REAL ESTATE**

**R E 250 Introduction to Real Estate (3)** *Matthew Disston* Introduction to the real estate profession focusing on the participants and processes as well as real estate decision making by buyers and sellers. Offered: AWSp.

**R E 361 Property Transactions (3) I&S** Introduction to real estate transactions, standard contractual documents, the role of title insurance, and the closing process. Prerequisite: R E 250. Offered: Sp.

**R E 363 Real Estate Development Process (3) I&S Matthew Disston** Real estate development sits at the heart of the built environment, interacting with urban planners, landscape architects, architects, financiers, construction managers and end users. An understanding of the key decision making that underpins development is a vital part in understanding what is developed, where and when. Prerequisite: R E 250. Offered: W.

**R E 400 Accounting for Real Estate (3)** Basics of real estate taxation, accounting, and profitability measures. Prerequisite: R E 250. Offered: W.

**R E 401 Housing Markets and Policy (3/5, max. 8) I&S** Aims to provide students with the tools to assess housing problems. Studies housing markets in a dynamic context, with emphasis placed on demand and supply drivers. Examines the justifications for and the basis of public sector involvement in the housing market and describe and evaluate the main policy mechanisms used such as regulation of private renting or the provision of affordable housing. Offered: A.

**R E 411 Real Estate Valuation and Appraisal (3) I&S** Every property is unique, therefore the appraisal of real estate presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. General models for valuing commercial property, industrial property, and land will be introduced. The role of appraisals and different concepts of value will be examined. Prerequisite: R E 250. Offered: A5p.

**R E 413 Real Estate Finance and Investment (4) QSR** Introductory class to real estate finance. Considers the financing of developments, investment in commercial properties as well as the residential mortgage market. Considers how real estate differs from other assets and how to analyze the attractiveness of investment opportunities. Prerequisite: R E 250. Offered: AW.
RE 416 Real Estate Economics and Market Analysis (4) Introduces students to basic elements of real estate markets studies for different uses. Includes basic steps regardless of real estate use, followed by analysis of data sources, public policy issues affecting cities and their economy, and resources available to analyze different market patterns. Prerequisite: R E 250. Offered: W.

RE 431 Real Estate Portfolio Management (3) QSR Focuses on the development and implementation of active and passive portfolio management strategies for institutional quality real estate investment portfolios. Modern portfolio theory and other tools are used to establish real estate allocation in a mixed-asset context, and to manage real estate portfolios among investment and financial structures spanning private/public, equity/debt, property type and geographic/economic regions. Prerequisite: R E 250; recommended: R E 465 or general finance course. Offered: ASp.

RE 459 Risk and Reward in Sustainable Development (3) I&S Focuses on the intersection of green, high performing buildings and the law. Students learn to identify and understand the risks and challenges presented by high performing buildings, and analyze frameworks and strategies to manage and overcome these challenges. Prerequisite: R E 250. Offered: Sp.

RE 464 Affordable Housing (4) I&S, DIV Rebecca J. Walter Introduction to the field of affordable housing. Addresses issues inherent in planning, finance, design, construction, and management of affordable housing in the United States. Examines the role of federal, state, local, non-profit, and private sector agencies and participants. Prerequisite: R E 250. Offered: W.

RE 465 Introduction to Real Estate Finance (3) QSR Introductory class to real estate finance. Considers the financing of developments, investment in commercial properties as well as the residential mortgage market. Considers how real estate differs from other assets and how to analyze the attractiveness of investment opportunities. Offered: AW.

RE 466 Advanced Housing Studies (4) I&S, DIV Gregg Colburn Advanced survey of housing. Students select a housing-related topic that serves as the basis of a quarter-long project. Also, students read key texts and articles on a range of housing-related topics and participate in seminar discussions on these readings. Prerequisite: R E 250; R E 401; and R E 464. Offered: W.

RE 480 Professional Development Seminar (2, max. 4) Prepares students to become real estate professionals by exposing them to a range of career options and accompanying them in developing their professional project as they apply for internships and jobs. Offered: AWSp.

RE 490 Independent Study (1-3, max. 3) Arranged between the student and a real estate faculty member of their choosing with a mutually agreed real estate topic. Prerequisite: R E 250. Offered: AWSp.

RE 497 Real Estate Data Modeling (4) I&S Covers a variety of different issues that arise when analyzing and modeling land, residential, and commercial real estate markets. Uses GIS and teaches students how to collect, clean, use, manage, and model a variety of data sets to make real-world decisions. Suitability and exploratory spatial data analyses will be covered in the course. Prerequisite: R E 250 and R E 416. Offered: ASp.

RE 506 Quantitative Methods in Real Estate (4) Provides an overview of different data collection methods, basic statistical techniques and their appropriate application based on the size and type of various real estate and socioeconomic dataset. Students determine the appropriate method based on specific objectives and critically assess their findings. No previous knowledge of statistics is required, and all applications will be on Excel and open source software. Offered: A.

RE 507 Accounting for Real Estate (3) Provides an overview of basic accounting concepts and emphasizes tax and accounting methodologies in relation to the development and management of real estate assets. Topics include: understanding balance sheets; income statements; annual reports; GAAP accounting and standards; and federal and real estate property taxation. Offered: A.

RE 508 Financial Modeling for Real Estate I - Excel (2) Gregg Colburn Introduces students to commercial real estate modeling, use of Excel and
handheld financial calculators. Allows students to gain mastery and confidence in setting up and using pro-formas and models to analyze real estate investment, asset management, and development. Offered: A.

**R E 509 Financial Modeling for Real Estate II (2)** C. Tu Introduces students to commercial real estate modeling, using advanced and sophisticated software utilized by real estate professionals. The students gain mastery and confidence in setting up and using pro-formas and models to analyze real estate investment, asset management, and development. Offered: W.

**R E 510 Introduction to Real Estate (3)** S. DERMSJ Provides a basic overview of the participants, processes, workings of different components of the real estate industry (including a variety of uses spanning from residential, office, retail and industrial to specialized) as well as the quantitative components of the real estate decision-making. Additionally, students are introduced to an overview of construction management, sustainability, corporate services, property law and ethics. Offered: jointly with URBDP 552; A.

**R E 511 Real Estate Valuation and Appraisal (3)** Timothy E Overland Every property is unique, therefore the appraisal of real estate presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. General models for valuing commercial property, industrial property, and land will be introduced. The role of appraisals and different concepts of value will be examined. Offered: jointly with URBDP 555; A.

**R E 512 Leadership in the Built Environment (3)** Focuses on leadership principles applicable to the real estate and the built environment and helps students conduct self-assessments to understand their strengths and ways they can apply them. Addresses both organizational leadership and leadership of construction processes. Offered: A.

**R E 513 Real Estate Finance and Investment (4)** Simon A W Stevenson Introduces students to basic real estate finance and institutional analysis allowing them to quantify the financial implications of real estate decisions. Topics include: basic time value of money, financial leverage, discounted cash flow analysis (properties and institutional portfolios), assessment of various real estate investment classes and distribution of proceeds to investors. Prerequisite: R E 552/URBDP 552. Offered: jointly with URBDP 554; W.

**R E 514 Negotiations and Conflict Resolution in the Built Environment (3)** P. McCabe Overview of negotiation theories, approaches and tactics. Application of deal making procedures for various aspects of real estate decision making processes and audiences (e.g. government, community groups, real estate organizations and partners). Analysis of conflict resolution techniques, mediation, arbitration, etc. Offered: W.

**R E 515 Real Estate Law (3)** J. Fandel, S. Osborne Focuses on the legal principles and issues essential to understanding the workings of the real estate industry, including the fundamentals of real estate transactions and development projects. Offered: jointly with URBDP 557; W.

**R E 516 Real Estate Economics and Market Analysis (4)** Arthur Acolin Introduces students to real estate market studies for different uses. Covers five areas: basic economic concepts critical in the understanding of real estate markets; urban economy; land rent theory; locational analysis and decision making; and market analysis. Offered: jointly with URBDP 516; Sp.

**R E 517 Real Estate Asset Management (3)** P. Stone Focuses on the fundamentals and structure of asset management from a value improvement perspective. Students are educated on the proactive manner asset managers need to respond to changing tenant needs and competitive market condition, while focusing on the asset appreciation throughout the ownership cycle (acquisition, leasing and disposition). Offered: jointly with URBDP 551; Sp.

**R E 518 Best Practices in Sustainable Real Estate (3)** S. DERMSJ Analyzes, at a macro level, the importance of sustainability in urban areas introducing best practices for various environmentally friendly and financially feasible interventions in the US and abroad. At a micro level focuses on adoption of environment5ally friendly improvements at building level with various pay-
back periods but long-lasting economic benefits. Offered: W.

R E 519 Real Estate Data Analytics and Visualization (3) Covers techniques for visualizing data, creating data structures, and implementing performance metrics. Provides an overview of ways datasets can be visualized across various software. Prerequisite: R E 506, URBDP 520, or a basic R software course. Offered: A.

R E 530 Corporate Real Estate (3) Kelli E Leith Emphasizes the understanding of ways real estate footprint can be a factor in attaining the vision/mission of a corporation. Analyzes principles of corporate real estate, key activities and internal relationships, customer motivation, drivers, client based strategic approaches as well as the industry evaluation process including reporting and client deliverables. Offered: A.

R E 531 Real Estate Portfolio Management (3) Focuses on the development and implementation of active and passive portfolio management strategies for institutional quality real estate investment portfolios. Modern portfolio theory and other tools are used to establish real estate allocation in a mixed-asset context; and to manage real estate portfolios among investment and financial structures spanning private/public, equity/debt, property type and geographic/economic regions. Offered: A.

R E 532 Real Estate Project Management (3) S. DERMISI Focuses on the on real estate and construction project management. Topics include: types of project managers, sources of conflicts, organizational structures, delivery methods, construction scheduling, SWOT analysis, ways to mitigate threats to their project. Includes hands on exercises and an introduction of MS Project software. Offered: A.

R E 540 Advanced Real Estate Finance and Investments (3) Arthur Acolin Covers both private and public forms of investment, along with debt and equity positions. Introduces students to real estate investments and the risk/reward trade-offs associated with various deal structures and relationships with financial institutions. Also covers real estate indices and tools to assess transaction risks. Offered: Sp.

R E 541 Real Estate Capital Markets (3) S. Stevenson Analyses capital flows (global and national) and emerging capital market trends that affect the industry. Pays special attention to securitized real estate, including Real Estate Investment Trusts, and Commercial Mortgage-Backed Securities. Offered: jointly with URBDP 579; A.

R E 542 Private - Public Project Finance (3) H. Oliver Explores creative ways of project financing through public and private partnerships in the form of incentives (e.g. TIF, LIHTC, Brownfield development incentives, etc.) currently offered by different government levels throughout the USA. Prepares to identify the incentives for a project and structure a deal package based on a project's parameters. Offered: A.

R E 550 Real Estate Development (4) H. Oliver Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: R E 552/URBDP 552. Offered: jointly with URBDP 578.

R E 551 Real Estate Development Studio ([2-5]-, max. 5) The Real Estate Development studio is a required for the MSRE option in RE Development. The focus of the course has been traditionally on competitions. The course will continue to focus in commercial real estate competitions (NAIOP) and projects in the autumn quarter, however a focus on affordable housing will be the emphasis while pursuing the Bank of America's affordable Housing Challenge in the winter and spring quarter. Offered: jointly with URBDP 513; AWSp.

R E 552 Real Estate Careers and Professional Development (3) Prepares students for future careers in real estate. Helps students understand their core competencies, areas of real estate they could utilize them, and how to prepare and present themselves to future employers. Students practice effective communication tools to apply in real estate companies of various scales, and professional and cultural backgrounds. Offered: W.

R E 553 Urban Land Economics (4) Introduces urban economics, land markets, and locational decision making; and examines urban spatial structure and the economic, political, social, technological, and
historical forces that shape land values and uses. Uses applied spatial analytical tools including geographic information systems and geodemographic software. Offered: jointly with URBDP 553; A.

**R E 556 Real Estate Investment (4)** Focuses on direct real estate investment based on the productive capacity of the total property, debt, and equity components and their impact on the cash returns in the form of positive returns to the property, tax savings potential, alternative leverage effects, and the gains at sale. Offered: jointly with URBDP 556; W.

**R E 558 Real Estate Market Analysis (4)** Prepares students to conduct and interpret market studies to cover a range of real estate decisions. Exposes students to the market analysis process and various tools and techniques that can be used to analyze and forecast supply, demand, and rental rates. Offered: jointly with URBDP 558; W.

**R E 559 Risk and Reward in Sustainable Development (3)** Focuses on the intersection of green, high performing buildings and the law. Students learn to identify and understand the risks and challenges presented by high-performing buildings, and analyze frameworks and strategies to manage and overcome these challenges. Offered: jointly with LAW E 534; Sp.

**R E 560 Real Estate Feasibility (4)** Applies critical thinking needed to understand the drivers of value of the major property types which covers the "user in search of a site" and "investor in search of involvement" feasibility questions. Applies a combination of qualitative and quantitative analysis to target markets. Offered: jointly with URBDP 568; Sp.

**R E 563 Housing Markets and Policy (3/5, max. 8)** *Arthur Acolin* Provides students with the tools to understand housing markets, the policies in place to support housing production and remaining frictions. Emphasizes the link between housing finance systems and housing market outcomes with a focus on the US mortgage system and products. Incorporates international components to analyze factors that underlay differences and similarities in housing markets in selected countries.

**R E 564 Affordable Housing (4)** *Rebecca J. Walter* Introduction to the field of affordable housing. Addresses issues inherent in planning, finance, design, construction, and management of affordable housing in the United States. Examines the role of federal, state, local, non-profit, and private sector agencies and participants. Offered: W.

**R E 565 Advanced Housing Studies (4)** *Gregg Colburn* Advanced survey of housing. Students select a housing-related topic that serves as the basis of a quarter-long project. Also, students read key texts and articles on a range of housing-related topics and participate in seminar discussions on these readings. Offered: W.

**R E 566 Real Estate Market Evolution and Disruption (3)** Provides an overview of how the use of technology in real estate is disrupting the traditional way of doing business. Students explore how property technology, from Artificial Intelligence (AI) to the Internet of Things (IoT), are affecting real estate. Also covers how real estate decision making is changing based on the shared economy, financial technology, blockchain and real estate asset tokenization. Offered: A.

**R E 569 Real Estate Portfolio Management (5)** Students develop formal portfolio management strategies that draw on their in-depth understanding of real estate fundamentals, strategic planning and portfolio theory. Working in teams, students prepare cutting-edge portfolio strategies including the policies and procedures for implementation and portfolio management. Offered: jointly with URBDP 559; Sp.

**R E 570 Real Estate Project Finance (3)** Introduces financing real property projects developed by public, community, and private entities with a primary emphasis on interim (acquisition/development/construction) and take-out lending for new real estate projects. Offered: jointly with URBDP 577; Sp.

**R E 590 Real Estate Forum I (1)** Provides an opportunity for students to learn about the interdisciplinary nature of real estate from industry leaders. Discusses current issues and opportunities
in the industry as well as what it takes to develop a sustainable career path. Offered: jointly with URBDP 590; A.

RE 597 Real Estate Data Modeling (4) Rebecca J. Walter Covers a variety of different issues that arise when analyzing and modeling land, residential, and commercial real estate markets. Uses GIS and teaches students how to collect, clean, use, manage, and model a variety of data sets to make real-world decisions. Suitability and exploratory spatial data analyses will be covered in the course. Offered: AWSp.

RE 598 Real Estate Special Topics (1-4, max. 12) A. Hurd Systematic study of specialized subject matter. Prerequisite: permission of instructor. Offered: AWSp.

RE 600 Independent Study or Research (1-3, max. 3) Arranged between the student and a real estate faculty member of their choosing with a mutually agreed real estate topic. Offered: AWSp.

URBAN DESIGN AND PLANNING
COMMUNITY, ENVIRONMENT, AND PLANNING

CEP 200 Introduction to Community and Environmental Planning (5) I&S Campbell Introduction to central themes of major. Opportunities to engage in community action and planning process, while developing ecological literacy. Lectures, discussions, and critical writing exercises combine to increase knowledge and interest in these fields. Emphasis on developing community of learners in and out of classroom setting. Offered: AW.

CEP 300 CEP Retreat (1, max. 4) Focuses on planning analysis assessment and development of the major. Opportunities for community building and all-major policy deliberation and decisions. Workshops for skill building in consensus, facilitation, and for major-specific activities such as developing individual study plans and study abroad experiences. Prerequisite: Majors only. Credit/no-credit only. Offered: ASp.

CEP 301 The Idea of Community (5) I&S Campbell Theories of community and communal rights and responsibilities. Experience building a learning community within major. Explores struggles for community in every sector of life. Offered: A.

CEP 302 Environmental Response (5) I&S/NW Miller Explores issues of environmental crisis and societal responses. Readings and reflective analysis from broad selection of authoritative sources to develop grounded perspective in ecological literacy and consciousness. Concurrently, experiential education in challenges and practical responses to building sustainable society through participation in community-based environmental effort. Offered: W.

CEP 303 Social Structures and Processes (5) I&S Abramson, Born, Curry Investigates use of formal and informal social structures and processes within context of community and environment. Looks at patterns and institutions of social organization and relationships among different sectors. Issues of interrelatedness, citizenship, knowledge, and communication. Offered: Sp.

CEP 400 Governance Practicum (1, max. 6) Campbell Emphasizes personal and collective leadership, democratic decision making, and learning through direct action and reflection. Explores and develops students’ personal skills as doers and leaders, while also learning how to form and function as effective groups. Credit/no-credit only. Offered: AWSp.

CEP 446 Internship (5, max. 10) Ryan Connects core and individual courses with field work. Group and individual readings develop understanding of how students’ internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no-credit only. Offered: AWSp.

CEP 460 Planning in Context (5) I&S D. ABRAMSON, B. BORN, M. CURRY, J. STERRETT Examines theory against backdrop of practice for broad historical understanding of social, political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Offered: A.
CEP 461 Ethics and Identity (5) VLPA/I&S Purcell
Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Offered: W.

CEP 462 Community and Environment (5) I&S Campbell, Ryan Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical definitions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Offered: Sp.

CEP 470 Tools for Sustainable Cities (4) Examines specific tools used for planning sustainable cities, including hands-on learning, speakers, case studies, and site tours to enrich students' knowledge and experience. Prerequisite: CEP 200 or URBDP 300. Instructors: Sterrett Offered: SpS.

CEP 473 Digital Design Practicum (5) I&S/VLPA Uses digital technologies for mapping, drafting, modeling, and communication. Includes real-world case study projects that focus on urban design and planning issues.

CEP 490 Senior Project Prep Seminar I: Research and Project Scoping (1-3) Supports the conceptualization and planning of senior project/capstone work. Focuses on selecting a project, beginning a literature review, finding a mentor, and developing a plan. Credit/no-credit only.

CEP 491 Senior Project Prep Seminar II: Methods and Actualization (1-3) Focuses on implementing the senior project/capstone, including revisions and updates as seen fit. Credit/no-credit only.

CEP 498 Special Topics (1-9, max. 15) I&S Systematic study of specialized subject matter.

CEP 499 Undergraduate Independent Study or Research (1-5, max. 10) Individual reading, research, fieldwork, other special project approved and supervised by faculty adviser most appropriate for the project proposed. Credit/no-credit only. Offered: AWSpS.

INFRASTRUCTURE PLANNING AND MANAGEMENT

IPM 500 Strategic Planning and Policy Analysis (3) Provides a suite of analytic and group process tools for harnessing the energy and potential of an organization to implement selected policies. Provides a framework for examining vexing societal issues, developing alternative policies to address them, and analyzing their effects and costs.

IPM 501 Comprehensive Emergency Management (3) Freitag Covers the principles and practices of risk reduction, presenting disasters as realized risk and benefits as realized opportunities. Provides the ability to use emergency management approaches and tools, along with insights into intergovernmental programs and relationship and their broader social context. Offered: S.

IPM 502 Introduction to Infrastructure Systems (3) Introduces infrastructures; systems thinking; the history, basic concepts, legal frameworks, politics, processes, and techniques used in infrastructure systems courses; and climate change as emerging yet lasting phenomenon. Includes overview of IPM online learning environment.

IPM 503 Infrastructure Finance (3) Covers how to pay for infrastructure, including planning, budgeting, and public/private partnerships. Examines the relationships between infrastructure finance, urban form, and sustainability; local government finance, budget accountability, and equity issues; and infrastructure investments in changing economic climates, forms of finance available for infrastructure, collective decision-making, and alternative forms of project delivery. Offered: S.

IPM 504 Applied Geo Spatial Analysis (3) Provides the theoretical and practical skills needed to use a Geographic Information System (GIS) for analyzing spatial phenomena on the urban and regional scale. Focuses on principles and methods of spatial analysis
and their application to strategic planning, risk management, and hazard mitigation.

IPM 505 Climate Change and Infrastructure (3) Sterrett Takes an in-depth look at climate change and examines each of the six major infrastructure systems in relationship to climate change phenomena. Includes climate change causes and effects; global, national, state, and local mitigation and adaptation strategies; and mitigation and adaptation strategies for infrastructure systems. Offered: Sp.

IPM 506 Energy Systems (3) Markos, Swayne Explores energy systems as infrastructure critical to the national and global economies; provides an overview of energy resources, production, and delivery. Examines elements of energy infrastructure, how energy systems function, global energy consumption and environmental considerations, and the history and influence of energy sector regulation and adaptation to changing markets. Offered: A.

IPM 508 Risk Assessment and Business Continuity (3) Provides an introduction into how organizations ensure they will survive disasters. Covers the concepts and tools organizations use to survive, and applies them to government and private systems, including energy, water, food, transportation, public health, and communications.

IPM 509 Communications and Cyber Infrastructure Systems (3) Endicott-Popovsky Explores communications and cyber infrastructure systems, including a variety of systems that are interconnected through public networks. Provides insight into how natural and human-made stresses on infrastructure are amplified and exacerbated by the presence of networks that increase the interdependence of infrastructure. Offered: S.

IPM 510 Water Systems (3) Roderick Water and water supply as a system element. Water and especially freshwater, as an essential and limited resource. Looks at aging water infrastructure; user conflicts; changes in water distribution tied to climate changes; intergovernmental policy, programs, and relationship; management strategies and tools; and their effect on water and water supply. Offered: W.

IPM 511 Food Systems (3) Born Food systems as a part of infrastructure. Why they matter for planners and policy makers; current production models; global trade and localization responses, policy approaches to hunger alleviation and food access; emerging concerns around food and climate change; land use issues, food justice, and governmental responses to food system concerns. Offered: W.

IPM 512 Public Health Systems (3) Survey of issues surrounding private and public health-care systems in relation to emergency health-care services. Includes health-care cultures, critical communication, government funding, emergency preparedness, and psychological recovery from major traumatic events.

IPM 513 Capstone A: Research Design (3) Whittington First of two culminating courses to support students in the development of a capstone project that demonstrates the combination of skills and knowledge accrued in the MIPM program. Students select a topic, develop a research design, and begin conducting the research for their project. Offered: Sp.

IPM 514 Transportation Systems (3) Explores transportation systems that move both people and freight on land, water, and in the air and that are critical to keeping the economy of the United States functioning as infrastructure that will be notably impacted by global climate change. Discusses the relationship between the public and private sectors.

IPM 515 Capstone B: Implementation (3) Second of two culminating courses to support students in the development of a capstone project that demonstrates the combination of skills and knowledge accrued in the MIPM program. Students complete their research and the project, and present to faculty and peers. Prerequisite: IPM 513. Instructors: Whittington Offered: S.

IPM 516 Community Resilience (3) Himanshu Grover, Robert Freitag Applies a resilience lens to stressed communities. Students apply resilience concepts to real world communities and infrastructures impacted by real events, and gain practice in supporting policies, programs, and projects that enhance overall resilience. Offered: Sp.
IPM 517 Specialized Planning Laboratory (6) Studio and field projects related to a specialized planning problem associated with floodplain management. Offered: S.

IPM 518 Legal and Administrative Framework for Planning (3) Reviews political, legal, and administrative institutions closely related to the floodplain planning process. Examines issues related to devolution of authority and public representation and participation. Covers the legal basis for planning and associated regulation relevant to floodplain management. Offered: S.

IPM 520 Floodplain Management Seminar I (2) Focuses on floodplain management issues, providing context for those new to the field and offering experienced practitioners an opportunity to engage professional experts on emerging concerns. Addresses opportunities to use social media in managing floodplains as well as fundamental science/tools relevant to the field. Offered: S.

IPM 521 Floodplain Management Seminar II (2) Focuses on current floodplain management issues and examines the application of new approaches to the field. Offers experienced practitioners an opportunity to engage professional experts while also relating leadership and conflict resolution skills to the application of floodplain management approaches. Prerequisite: IPM 520. Offered: S.

IPM 522 Geomorphology in Floodplain Management and Landscape Design (3) Covers geologic and geomorphological processes of rivers, floodplains, and coastal areas in context of landscape planning. Lectures, laboratory exercises, and field trips emphasize understanding fundamental physical landscape process and its application to landscape planning with an emphasis on management of flood-prone areas. Offered: S.

IPM 523 Ecological Processes in Coastal and Floodplain Management (2) Examines hydrologic, biologic, and ecological concepts of rivers, floodplains, and coastal areas in the context of floodplain management and landscape planning. Lectures, laboratory exercises, and field trips emphasize understanding fundamental processes and methods and their application to planning and management. Offered: S.

IPM 528 Floodplain Management and Planning for River Population (3) Focuses on the systematic study of floodplain management processes and strategies for near river communities. Offered: S.

IPM 598 Special Topics (1-6, max. 12) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs. Prerequisite: permission of instructor. Offered: AWSpS.

IPM 600 Independent Study or Research (*) Directed Study. Topics determined according to program needs. Offered: AWSpS.

URBAN PLANNING

URBDP 200 Introduction to Urbanization: Planning and Designing Alternative Urban Futures (5) I&S Introduces how cities work and explores alternative ways of planning and designing urban futures. Explores the economic, cultural, political, and social aspects of cities and how we might change them for the better. Also examines numerous case studies from the Global North and South.

URBDP 300 Introduction to Urban Planning (5) I&S Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners.

URBDP 301 Database Management Fundamentals (3) Introduces the tasks and roles that contribute to the management of the design and security of database systems in an organizational context. Students gain a basic understanding of database management systems and administrative practices, as well as hands-on database experience. Credit/no-credit only.

URBDP 370 Reading the City (5) VLPA/I&S Comprehending cities as reflection of individual reader and social/cultural context. Skills for analyzing everyday, visible evidence of the city. Topics include self-identity with place, city, image and perception, visual design analysis; and place as
representation of culture. Extensive writing, multiple texts, collaborative work in groups and fieldwork.

**URBDP 404 Introduction to Geographic Information Systems (3)** Provides students with introductory practical knowledge of Geographical Information Systems and Science for current and future coursework in urban planning.

**URBDP 405 The Urban Form (3)** VLPA Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

**URBDP 422 Urban and Regional Geospatial Analysis (5)** Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: either GEOG 317, GEOG 360, GEOG 461, GEOG 462, GEOG 465, FISH 452, or OCEAN 452. Offered: W.

**URBDP 423 Introduction to Urban Design (3)** VLPA/I&S Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning. Offered: Sp.

**URBDP 424 Site Planning: Issues and Techniques (3)** Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: Sp.

**URBDP 446 Practical Experience (4, max. 8)** Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

**URBDP 450 Introduction to Land Use, Growth Management, and Environmental Planning (3)** Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington’s Growth Management Act) and examines their environmental impact and social welfare implications. Analyzes best-practice techniques of growth management.

**URBDP 451 Housing (3) I&S** Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

**URBDP 455 Housing (3)** I&S Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

**URBDP 457 Housing in Developing Countries (3)** Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

**URBDP 466 Infrastructure and Community Facilities (4)** Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste, and transportation. Covers their relationship to comprehensive plans, project permitting, and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

**URBDP 467 Urban Planning Uses of Remote Sensing (3)** Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

**URBDP 480 Planning as a Profession (1)** Provides students interested in the planning profession an opportunity to understand the different pathways and career choices within the profession. Introduces students to guest professionals in various planning careers and highlight key issues, skills used, and tips to entering the field. Focuses on professional practice rather than analytical methods or theory. Credit/no-credit only.
URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S
Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

URBDP 498 Special Topics (1-9, max. 15) Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

URBDP 499 Special Projects (1-12, max. 12)
Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed.

URBDP 500 Survey of Urban Planning (4) Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

URBDP 501 Comprehensive Planning and Implementation (4) Reviews the comprehensive planning process as a part of managing metropolitan growth. Examines federal/state statutes affecting local government comprehensive plans. Includes local government land use regulations and reviews development process. Concentrates on tools to shape land use and development patterns and their effectiveness in creating outcomes specified in comprehensive plans. Offered: W.

URBDP 502 Tools for Sustainable Cities (4) Examines specific tools used for planning sustainable cities, including hands-on learning, speakers, case studies, and site tours to enrich students' knowledge and experience. Prerequisite: CEP 200 or URBDP 300. Offered: W.

URBDP 503 Communication and Analysis (3) Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

URBDP 504 Introduction to Geographic Information Systems (3) Provides students with introductory practical knowledge of Geographical Information Systems and Science for current and future coursework in urban planning.

URBDP 505 The Urban Form (3) Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 506 Planning Studio Prep (3) Introduces plan-making process, provides time for background research, issue identification, public involvement, and preliminary analysis.

URBDP 507 General Urban Planning Laboratory (5) Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

URBDP 508 Specialized Planning Laboratory (5, max. 10) Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

URBDP 509 Resources for Urban Planning (1) Provides an opportunity for students to explore and discuss issues of professional practice with practicing planners in an informal context. Questions posed by the participants usually emphasize practical aspects of working as planners. Credit/no-credit only.

URBDP 510 Theories and Methodologies of Planning I (4) Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate
URBDP 512 Research Seminar (3) Planning, designing, and undertaking applied research in an urban setting. Framing, critically assessing, managing, and presenting research used in urban planning and design. Conceptual modeling of causal relationships, choice among experimental and quasi-experimental designs, and ethical and political implications of research undertakings. Exercises leading to a complete research design.

URBDP 513 Real Estate Development Studio ([2-5], max. 5) The Real Estate Development studio is a required for the MSRE option in RE Development. The focus of the course has been traditionally on competitions. The course will continue to focus in commercial real estate competitions (NAIOP) and projects in the autumn quarter, however a focus on affordable housing will be the emphasis while pursuing the Bank of America's affordable Housing Challenge in the winter and spring quarter. Offered: jointly with R E 551; AWSp.

URBDP 514 Race and Social Justice Seminar (1) This course will explore concepts of race, racism, class, social justice, and make explicit their connections between design and planning. It does so to build student understanding about how, and the degree to which, these disciplines have historically addressed these topics, and where they stand currently. This exploration will include progress made, challenges, and overt actions that have and may continue to work in racist and unjust ways. Credit/no-credit only. Offered: AWSp.

URBDP 516 Real Estate Economics and Market Analysis (4) Arthur Acolin Introduces students to real estate market studies for different uses. Covers five areas: basic economic concepts critical in the understanding of real estate markets; urban economy; land rent theory; locational analysis and decision making; and market analysis. Offered: jointly with R E 516; Sp.

URBDP 518 Qualitative Methods for Urban Design and Planning (3) Surveys use of qualitative methods in urban design and planning practice and research, especially in relationship to places and people. Students develop methodological and analytical skills useful in research and in professional practice.

URBDP 519 Qualitative Research Methods (3) Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization. Offered: jointly with ARCH 567.

URBDP 520 Quantitative Methods in Urban Design and Planning (5) Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: coursework in arithmetic and basic algebra.

URBDP 522 Urban and Regional Geospatial Analysis (5) Provides theoretical and practical skills for analyzing spatial patterns and phenomena in metropolitan areas. Students explore the functionality of GIS as an effective tool for analyzing and modeling complex spatial relationships within urban environments. Emphasis is given to data integration and modeling through both raster and vector systems.

URBDP 523 Introduction to Urban Design (3) I&S/VLPA Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 524 Site Planning: Issues and Techniques (3) Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: W.

URBDP 525 Evaluation in Urban Planning (3) Methods and techniques for a priori assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or
goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

**URBDP 526 Floodplain Management and Planning for Coastal and River Communities (3)** R. FREITAG
Focuses on ways to live with and cope with flooding. Examines coastal and riverine floodplain services, values and assets within the context of ecosystem services; determine risks and opportunities associated with flooding and floodplains; advance identified strategies and explore benefits and adverse impacts resulting from these strategies; and gain a better appreciation for coastal and riverine floodplains. Offered: A.

**URBDP 532 Current Topics in Transportation Planning and Policy (4)** Provides an opportunity to advance the student's knowledge by examining selected topics in depth and gaining critical insights about the interconnectivity of various planning and policy approaches. Gives a broad exposure to urban transportation problems and introduces different ideas and practices aimed at addressing these problems, along with important concepts and analytical frameworks. Offered: W.

**URBDP 536 Health Impact Assessment (2)** Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with ENV H 536.

**URBDP 538 Public Health and the Built Environment (2)** Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with ENV H 538.

**URBDP 547 Professional Project (1-9, max. 9)** Credit/no-credit only.

**URBDP 549 Hazard Mitigation Planning (3)**
A survey of the field of planning for managing risks of natural hazards-earthquakes, floods, coastal/meteorological hazards, and human-caused technological hazards/terrorism. Covers pre-event mitigation through building and land-use controls; disaster preparedness; post-event response, recovery, and mitigation of future hazards. Emphasizes hazard mitigation as a long-term strategy for achieving sustainability of communities.

**URBDP 550 Land Use, Growth Management and Environmental Planning (3)** Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington's Growth Management Act) and examines their environmental and social welfare implications. Analyzes best practice techniques of growth management. Offered: A.

**URBDP 551 Real Estate Asset Management (3)** P. Stone Focuses on the fundamentals and structure of asset management from a value improvement perspective. Students are educated on the proactive manner asset managers need to respond to changing tenant needs and competitive market condition, while focusing on the asset appreciation throughout the ownership cycle (acquisition, leasing and disposition). Offered: jointly with R E 517; Sp.

**URBDP 552 Introduction to Real Estate (3)** S. DERMISI Provides a basic overview of the participants, processes, workings of different components of the real estate industry (including a variety of uses spanning from residential, office, retail and industrial to specialized) as well as the quantitative components of the real estate decision-making. Additionally, students are introduced to an overview of construction management, sustainability, corporate services, property law and ethics. Offered: jointly with R E 510; A.

**URBDP 553 Urban Land Economics (4)** Introduces urban economics, land markets, and locational decision making; and examines urban spatial structure and the economic, political, social, technological, and historical forces that shape land values and uses. Uses applied spatial analytical tools including geographic information systems and geodemographic software. Offered: jointly with R E 553; A.
URBDP 554 Real Estate Finance and Investment (4)
Simon A W Stevenson Introduces students to basic real estate finance and institutional analysis allowing them to quantify the financial implications of real estate decisions. Topics include: basic time value of money, financial leverage, discounted cash flow analysis (properties and institutional portfolios), assessment of various real estate investment classes and distribution of proceeds to investors. Prerequisite: R E 552/URBDP 552. Offered: jointly with R E 513; W.

URBDP 555 Real Estate Valuation and Appraisal (3)
Timothy E Overland Every property is unique, therefore the appraisal of real estate presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. General models for valuing commercial property, industrial property, and land will be introduced. The role of appraisals and different concepts of value will be examined. Offered: jointly with R E 511; A.

URBDP 556 Real Estate Investment (4) Focuses on direct real estate investment based on the productive capacity of the total property, debt, and equity components and their impact on the cash returns in the form of positive returns to the property, tax savings potential, alternative leverage effects, and the gains at sale. Offered: jointly with R E 551; W.

URBDP 557 Real Estate Law (3) J. Fandel, S. Osborne Focuses on the legal principles and issues essential to understanding the workings of the real estate industry, including the fundamentals of real estate transactions and development projects. Offered: jointly with R E 515; W.

URBDP 558 Real Estate Market Analysis (4) Prepares students to conduct and interpret market studies to cover a range of real estate decisions. Exposes students to the market analysis process and various tools and techniques that can be used to analyze and forecast supply, demand, and rental rates. Offered: jointly with R E 558; W.

URBDP 559 Real Estate Portfolio Management (5) Students develop formal portfolio management strategies that draw on their in-depth understanding of real estate fundamentals, strategic planning and portfolio theory. Working in teams, students prepare cutting-edge portfolio strategies including the policies and procedures for implementation and portfolio management. Offered: jointly with R E 569; Sp.

URBDP 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4) Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PUBPOL 560.

URBDP 561 Urban Economics and Public Policy (4) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and growth management, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: successful completion of an introductory microeconomics course or permission of the instructor. Offered: jointly with PUBPOL 561.

URBDP 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, etc.

URBDP 564 Planning History, Theory, and Ethics (3) Examines major historical landmarks since the Civil War (urban, suburban, and rural, physical and social-economic); theoretical alternatives (rationalism, pluralism-advocacy, critical theory, bio-regionalism, dissipative models); and ethical issues (such as distributive justice and principles of professional conduct).

URBDP 565 American Urban History (3) Intensive lecture/seminar designed to provide students the opportunity for immersion in historical scholarship
that addresses social, economic, political, technological, and cultural forces that have shaped the development of American cities.

**URBDP 566 Infrastructure and Community Facilities (4)**
Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste, and transportation. Covers their relationship to comprehensive plans, project permitting, and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

**URBDP 567 Democracy, Citizenship, and Participation in the City (3)**
Graduate seminar on democracy in cities. Focuses on contemporary ideas, debates, and initiatives.

**URBDP 568 Real Estate Feasibility (4)**
Applies critical thinking needed to understand the drivers of value of the major property types which covers the "user in search of a site" and "investor in search of involvement' feasibility questions. Applies a combination of qualitative and quantitative analysis to target markets. Offered: jointly with R E 560; Sp.

**URBDP 573 Digital Design (4)**
Uses digital technologies for mapping, drafting, modeling, and communication. Includes real-world case study projects that focus on urban design and planning issues.

**URBDP 576 Pedestrian Travel, Land Use, and Urban Form (3)**
Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with CET 586.

**URBDP 577 Real Estate Project Finance (3)**
Introduces financing real property projects developed by public, community, and private entities with a primary emphasis on interim (acquisition/development/construction) and take-out lending for new real estate projects. Offered: jointly with R E 570; Sp.

**URBDP 578 Real Estate Development (4)**
H. Oliver
Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: R E 552/URBDP 552. Offered: jointly with R E 550.

**URBDP 579 Real Estate Capital Markets (3)**
S. Stevenson
Analyses capital flows (global and national) and emerging capital market trends that affect the industry. Pays special attention to securitized real estate, including Real Estate Investment Trusts, and Commercial Mortgage-Backed Securities. Offered: jointly with R E 541; A.

**URBDP 580 Legal and Administrative Framework for Planning (3)**
Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

**URBDP 585 Introduction to Historic Preservation Planning (3)**
Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience.

**URBDP 586 Implementation in Preservation Planning (4)**
Practical experience in identifying, documenting, evaluating and developing strategies for protection of historic resources, building on introductory theories, methods, and practices. Develops skills critical to preservation planning via research, fieldwork, and writing. Prerequisite: introductory course in preservation.

**URBDP 587 Preservation and the Vernacular Environment (3)**
Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States.

**URBDP 590 Real Estate Forum I (1)**
Provides an opportunity for students to learn about the interdisciplinary nature of real estate from industry leaders. Discusses current issues and opportunities in the industry as well as what it takes to develop a sustainable career path. Offered: jointly with R E 590; A.
URBDP 591 Doctoral Seminar I (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

URBDP 592 Doctoral Seminar II (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

URBDP 593 Doctoral Seminar III (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

URBDP 596 Community Resilience (3) Robert Freitag, Himanshu Grover Introduction to resilience thinking. Students apply resilience concepts to real world communities and infrastructures impacted by real events, and gain practice in supporting policies, programs, and projects that enhance overall resilience. Offered: Sp.

URBDP 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 600 Independent Study or Research (*)

URBDP 700 Master’s Thesis (*)

URBDP 800 Doctoral Dissertation (*)
FOSTER SCHOOL OF BUSINESS

ACCOUNTING

ACCTG 199 Accounting for Problem Solving (2, max. 4) Supplementary lectures, discussions, and problem-solving sessions in introductory accounting. Enrollment priority to EOP students and others by permission. Credit may not be applied to fulfill specific program requirements. Corequisite: ACCTG 215. Credit/no-credit only.

ACCTG 219 Essentials of Accounting (4) Provides an introduction to basic accounting principles and procedures; use of accounting information to make decisions from the perspective of both external investors and internal managers. Cannot be taken for credit if ACCTG 225 has been completed for credit.

ACCTG 225 Fundamentals of Managerial Accounting (5) Analyses and evaluation of accounting information as part of the managerial process of planning, decision making, and control. Concentrates on information useful to enterprise managers. Prerequisite: ACCTG 215; ECON 200; may not be repeated.

ACCTG 275 Accounting and Finance Essentials (3) QSR Explores the economic foundations of accounting systems. Discusses the short-term and long-term implications of using accounting information to evaluate performance, create budgets, and analyze financial statements. Not open for credit to students pursuing a business degree.

ACCTG 301 Intermediate Accounting I (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: minimum grade of 2.0 in ACCTG 225; may not be repeated.

ACCTG 302 Intermediate Accounting II (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: a minimum grade of 2.0 in ACCTG 301; may not be repeated.

ACCTG 303 Intermediate Accounting III (4) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: minimum grade of 2.0 in ACCTG 302; may not be repeated.

ACCTG 311 Cost Accounting (4) Introduction to the theory of cost accounting; job order, process, and standard cost systems; overhead accounting; problems in accumulation and allocation of costs; decision making with cost data. Prerequisite: minimum grade of 2.0 in ACCTG 225; may not be repeated.

ACCTG 320 Accounting Systems and Analytics (4) Focuses on the analytical mindset and analytical skillset to help students use accounting systems to transform raw accounting data into business insight. Prerequisite: a minimum grade of 2.0 in ACCTG 225; may not be repeated. Offered: AW.

ACCTG 321 Tax Effects of Business Decisions (4) Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: minimum grade of 2.0 in ACCTG 301; may not be repeated.

ACCTG 411 Auditing Standards and Principles (4) Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: minimum grade of 2.0 in ACCTG 303; 2.0 in ACCTG 320; may not be repeated.

ACCTG 440 Accounting and Financial Management Decisions (4) Business financial planning with an
emphasis of the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, and related topics. Prerequisite: minimum grade of 2.0 in ACCTG 303; 2.0 in ACCTG 311; 2.0 in ACCTG 321; may not be repeated.

ACCTG 450 Business Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: minimum grade of 2.0 in ACCTG 321; may not be repeated. Offered: WSp.

ACCTG 471 Forensics and Ethical Decision Making in Accounting (4) Provides a comprehensive introduction to the concepts and techniques of forensic accounting and ethical decision making in accounting. Prerequisite: ACCTG 225; MGMT 200; either QMETH 201, IND E 315, MATH 390/STAT 390, Q SCI 381, PSYCH 315, PSYCH 318, SOC/STAT/CS&SS 221, STAT 220, or STAT 311.

ACCTG 480 Accounting for Not-for-Profit Organizations (4) Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: minimum grade of 2.0 in ACCTG 302; may not be repeated.

ACCTG 485 Advanced Financial Accounting (4) Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: minimum grade of 2.0 in ACCTG 303; may not be repeated.

ACCTG 490 Special Topics in Accounting (1-6, max. 12) Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Accounting Internship (1-4, max. 8) One quarter's internship with a certified public accounting firm, industrial organization, or government agency. Prerequisite: ACCTG 301. Credit/no-credit only.

ACCTG 499 Undergraduate Research (1-6, max. 9) Arranged and supervised by individual members of the faculty.

ACCTG 500 Financial Accounting (4) Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

ACCTG 501 Managerial Accounting (4) Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

ACCTG 502 Financial Reporting and Analysis (4) Provides students with an understanding of the numbers side of business. Students will learn how to use financial information in real-life management situations to impact business decisions. Offered: A.

ACCTG 503 Introduction to Accounting for Managers (4) Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

ACCTG 505 Intensive Analysis of Accounting Principles and Practices (26) Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits do not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

ACCTG 506 Intensive Analysis of Accounting Principles and Practices I (8) First of an intensive three-course program. Emphasizes the practical application of accounting concepts in a business setting. Credits do not count toward MBA degree. Prerequisite: ACCTG 215; ACCTG 225 or equivalent, or permission of instructor. Offered: A.
ACCTG 507 Intensive Analysis of Accounting Principles and Practices II (10) Second of an intensive three-course program. Covers the third part of financial accounting, accrual-based financial statements, and cost accounting for decision-making. Credits do not count toward MBA degree. Prerequisite: ACCTG 506. Offered: W.

ACCTG 508 Intensive Analysis of Accounting Principles and Practices III (8)

ACCTG 510 Introduction to Financial Statement Analysis (4) Extension of the core financial accounting material, focusing on the use of financial statements to assess the financial position and prospects of companies. Examines the critical financial reporting issues that influence interpretation of financial statements. Prerequisite: either BA 500, ACCTG 500, or permission of instructor.

ACCTG 511 Advanced Financial Statement Analysis (4) Covers accounting issues related to firm valuation and use of financial statement information to assess the risks and rewards of various firm strategies. Prerequisite: ACCTG 510 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4) Importance of tax considerations in making business decisions. Covers regulatory and economic impacts of the U. S. tax system. Prerequisite: either BA 500, ACCTG 500, or permission of instructor.

ACCTG 515 Problems in Managerial and Cost Accounting (4) Extension of the core management accounting material. Uses cases and discussion to analyze costing techniques, use of accounting data in planning and evaluation of managerial performance, and use of accounting data in short-run and long-run decisions. Prerequisite: either BA 502, ACCTG 501, or permission of instructor.

ACCTG 520 Accounting, Audit and Assurance Regulation (4) Examines important regulatory issues in accounting, auditing, and assurance. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 522 Data Analytics for Professional Accountants (4) Application of data analytics concepts and techniques for professional accountants, with real-world applications in audit, assurance, and advisory settings. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 523 Advanced Financial Statement Analysis (4) Advanced traditional and data-driven analysis of financial statements from a user perspective with real-world applications for professional accountants. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 524 Individual Taxation (4) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

ACCTG 525 Business and International Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. International dimensions of business taxation introduced. Prerequisite: ACCTG 524.

ACCTG 526 Advanced Accounting Codification Research (4) Advanced research and application of the codification for complex accounting issues for public companies including tax, consolidation, and recent / or announced accounting standard changes. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 527 Communications in Professional Accounting (4) Development of communications skills for professional accountants, including effective written and oral skills with a focus on real-world settings in audit, assurance, and advisory services. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.
ACCTG 528 Advanced Cases in Accounting Advisory (4)
Project-based learning involving real-world applications of contemporary problems in accounting advisory settings using innovative analytical tools and data-driven research techniques. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 529 Business Ethics and Law for Accountants (4)
Explores basic legal and ethical principles underlying the practice of accounting. Special attention devoted to identifying legal and ethical issues as they arise in commercial and professional accounting contexts. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

ACCTG 530 Tax Issues in Property Ownership (4)
Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 531 Timing and Periods of Taxation (3)
Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 532 Data Analytics for Tax Accountants (2)
Introduction to data analytics concepts and techniques for tax accountants. Emphasis on data visualization.

ACCTG 533 Procedural and Policy Issues (4)
Analysis of the procedures of federal taxation: assessment, collection, and refund claims. Detailed exploration of the rules governing the statute of limitations and the mitigation thereof. An introduction to tax policy considerations is given. Tax penalties are explored. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (4)
Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (4)
A continuation of ACCTG 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

ACCTG 536 Tax Provisions (3)
Examines the components of corporate income tax provisions. Topics include the current and deferred provision, balance sheet and income statement impacts, rate reconciliations, and audit documentation and standards. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

ACCTG 537 Income Taxation of Conduits I (3)
Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of "bottom line" income and separately stated items, changes to owners' tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 538 Income Taxation of Conduits II (3)
A continuation of ACCTG 537. Study of complex issues in partnership and S corporation tax. Substantial portion involves resolving case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 537 or permission of instructor.

ACCTG 539 Tax Research and Decision Making (4)
Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional
accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 540 Ethics and Communications for Taxation Professionals (4)** Focuses on ethics and internal communications in accounting settings. Evaluation of the ethics of difficult tax questions and practice communicating explanations and recommendations to colleagues and managers.

**ACCTG 541 Communications for Taxation Professionals II (4)** Introduction to the communications forms and to practices of professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants' reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

**ACCTG 542 Communications for Taxation Professionals III (4)** Development of oral and written skills associated with the tax accountant's role as a client advocate. Develop communication production related to the various stages of a tax case. Prerequisite: ACCTG 541.

**ACCTG 543 Income Taxation of Trusts and Estates (3)** Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 545 State and Local Tax Issues (4)** Focuses on state and local tax issues such as multi-state tax treaties, sales taxes, nexus, taxes on gross receipts, and apportionment. Prerequisite: Undergraduate accounting concentration or equivalent.

**ACCTG 547 Estate and Gift Taxation (3)** Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

**ACCTG 548 Speaker Forum-Tax (3)** Covers topics such as state and local taxation, international taxation, interperiod tax allocation, qualified and nonqualified stock options, the R&D credit, and IRS audit issues presented by practicing professionals in the industry.

**ACCTG 549 International Tax Issues (4)** Covers international tax concepts including the foreign tax credit, international tax ownership structures, permanent establishments, income sourcing rules, and international tax treaties.

**ACCTG 564 Governmental Accounting (4)** Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

**ACCTG 566 Issues in International Accounting (4)** Insights into the conceptual, managerial, professional, and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

**ACCTG 575 Internship (14)** Professional internship in graduate accounting program. Cannot be taken for credit if ACCTG 577 is taken for credit. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

**ACCTG 576 Experiential Learning Project (2)** Written communication describing experiences learned in the MPAcc internship or MPAcc Independent research project. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.

**ACCTG 577 Independent Research Project (2-8)** Independent research on a topic of contemporary interest to the accounting profession. Cannot be taken for credit if ACCTG 575 is taken for credit. Prerequisite: Enrollment in MPAcc program or by permission of the MPAcc Program Office.
ACCTG 579 Special Topics in Accounting (2/4, max. 12) Accounting topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

ACCTG 580 Doctoral Seminar: Introduction to Accounting Research (4) Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

ACCTG 581 Doctoral Seminar in Managerial Accounting (4) Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 582 PhD Research Seminar: Introduction to Selected Research Topics (4) Introduces first-year and second-year accounting PhD students to the research areas and methodologies of the current account faculty. Research areas include financial, managerial, audit, and tax. Research methodologies include analytical, archival, experiments, and surveys.

ACCTG 596 Doctoral Seminar in Financial Accounting Research (4) Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 597 Doctoral Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and ACCTG 581 or equivalent or permission of graduate office.

ACCTG 599 Doctoral Seminar in Accounting (1, max. 12) Study and research in advanced topics of accounting. Generally concerned with unpublished areas of research as well as research methodology and philosophy. Conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

ACCTG 600 Independent Study or Research (*-)

ADMINISTRATION

ADMIN 510 Fundamentals of Business Administration ([1-15], max. 15) Includes materials basic to study and application of business theories and practice; accounting; business economies and financial control; and business strategy; commercial law; human resources and negotiations; marketing; operations management. Faculty team-teaching approach. Not open to master of business administration majors. Credit/no-credit only.

ADMIN 511 Fundamentals of Business Administration (4) Develops student's ability to think as practicing executive; providing practice in analyzing, evaluating, and modifying organizations' strategies in light of changing conditions for profit and non-profits. Develops marketing skills in understanding targeted customer's needs and the specific marketing steps to create demand. Not open to MBA students. Credit/no-credit only.

ADMIN 512 Fundamentals of Business Administration - People Management, Leadership, and Teams (4) Introduces theories and practices relating to the management of people and teams, organizational behavior, human resources and leadership. Helps distinguish management factors that create a sustaining culture that attracts, motivates and retains the right people for the right jobs. Not open to MBA students. Credit/no-credit only. Offered: W.

ADMIN 513 Fundamentals of Business Administration: Accounting and Finance (4) Introduces financial and managerial accounting and finance. Topics include financial statements, capital structure decisions, cost of debt and equity, ratio analysis, classifying costs, breakeven analysis, budgeting, and capital budgeting. The goal is to understand eternal reports and to use financial information internally for decision-making. Not open to MBA students. Credit/no-credit only. Offered: Sp.
ADMIN 514 Fundamentals of Business Administration: Business Plan Practicum I (2)
Students develop a business plan on a team based on their interests. Applies the information from the ADMIN 511 and ADMIN 512 to the development of the plan. Prerequisite: ADMIN 511; ADMIN 512, which may be taken concurrently. Credit/no-credit only. Offered: W.

ADMIN 515 Fundamentals of Business Administration: Business Plan Practicum II (1)
Students complete the business plan on a team that was developed in ADMIN 514. Applies the information from ADMIN 511, ADMIN 512, and ADMIN 513 to the development of the plan. Prerequisite: ADMIN 514. Credit/no-credit only. Offered: Sp.

BUSINESS ADMINISTRATION

B A 110 International Baccalaureate (IB) Business Management (4-6) Course awarded based on International Baccalaureate (IB) score. Consult the Admissions Exams for Credit website for more information.

B A 300 Foreign Study-Business Administration (1-5, max. 15) For participants in approved foreign-study programs where equivalent UW business administration courses are not available.

B A 390 Business Honors Seminar (2-5, max. 5) Special topics in business. Required for Honors students in Business Administration.

B A 391 Learning Leadership in Theory and Practice (2-4) Explores leadership techniques and principle using readings, case, lectures, and large group discussions designed to increase knowledge of leadership theory and practice as well as develop leadership potential. Uses small group sessions incorporating experiential exercises, self-reflection, and leadership conversations. Credit/no-credit only. Offered: jointly with GEN ST 301.

B A 490 Special Topics in Business (1-6, max. 12)

B A 495 Business Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of business concepts learned in the classroom. Prerequisite: ACCTG 225. Credit/no-credit only. Offered: AWSpS.

B A 500 Business Administration I (16) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 501 Business Administration II (14) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 502 Business Administration III (8) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the Foster School of Business.

B A 505 Global Business Fundamentals (16) An intensive overview of the fundamental core business topics: financial accounting, managerial accounting, business economics, statistics, management, macroeconomics, finance, marketing, operations management, quantitative methods, and strategy. Prerequisite: permission. Offered: S.

B A 541 Environmental Management I (4) Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 542 Environmental Management II (4) Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and
organizational behavior. Must be taken concurrently with B A 544. Prerequisite: B A 541 or permission of instructor.

B A 543 Environmental Management III (4) Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive responses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with B A 544. Prerequisite: B A 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3) Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in B A 541, B A 542, B A 543, which are to be taken concurrently.

B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3) Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, invited to share their perspectives with seminar participants. Topics change each quarter.

B A 560 Cooperative Education in Business (1) Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to credits required for graduation. Credit/no-credit only. Offered: S.

B A 571 Research Reports (4-) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor's approval of preliminary research topic outline.

B A 572 Research Reports (-4) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

B A 578 Strategic Management Practicum (2/4, max. 8) Students apply skills learned in the MBA classroom to real world challenges and opportunities facing contemporary enterprises. Under faculty oversight, students partner with host firms on applied learning, consulting-style projects that offer additional development opportunities not available in traditional classrooms. Credit/no-credit only.

B A 580 Problems in Microeconomics (4) Study of microeconomic intuition, directed toward Business School Ph.D. students, showing the interconnections between formal, mathematical analysis and the unstructured economic questions posed by the world. Emphasis on setting up problems and examining the intuition behind the analysis of them. Many applications to specific business issues.

B A 599 Teaching Effectiveness Seminar (2, max. 4) Prepares doctoral students to serve as a teaching assistant and course instructor. Discusses how to design a syllabus, present material, grade, handle difficult classroom situations, and other activities associated with undergraduate and graduate education. Builds long-term skills for a lifetime of teaching as part of an academic career. Credit/no-credit only.

B A 700 Master’s Thesis (*-)

B A 800 Doctoral Dissertation (*-)

BUS ADMIN RESEARCH METHODS

BA RM 580 Applied Econometrics I (4) Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 395 or STAT 481, or permission of instructor.

BA RM 590 Behavioral Research Methods - Theory and Design (4) Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. The development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: coursework in statistics or permission of instructor.

BA RM 591 Behavioral Research Methods - Approaches and Applications (4) Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. Primarily concerned with developing alternative approaches to research problems and with discussing specific applications. Builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: coursework in statistics or permission of instructor.

BUSINESS ANALYTICS

BUS AN 500 Finance and Accounting (3) Provides a broad introduction to the use of financial information to make decisions within an organization. Covers topics that are most useful to managers who are (or will be) in business analytics roles. Offered: A.

BUS AN 501 Negotiations (2) Provides a broad array of negotiation skills that are needed for business analytics solutions to be accepted and implemented. Allows participants the opportunity to develop these skills experientially and to understand negotiations in useful analytic frameworks. Offered: W.

BUS AN 502 Leadership and Professional Development (2) Leadership in the role of a business analytics professional. Possible approaches to accelerate leadership development, and proven behaviors of effective leaders. Utilizing contemporary leadership models as the organizing framework, reviews practical tools to assess students’ leadership skills and develops a plan for students’ leadership development. Offered: S.

BUS AN 503 Competitive Strategy (2) Focus on students’ ability to think as practicing executives. Provides practice in analyzing, evaluating, and modifying organizations’ strategies in light of changing macro-economic conditions. Emphasis on interplay between competitive strategy and business analytics concepts. Offered: S.

BUS AN 504 Marketing Fundamentals (3) Provides a broad introduction to marketing decisions within an organization. Marketing as an organizational philosophy and set of guiding principles for interfacing with customers, competitors, collaborators, and the environment. Covers topics most useful to managers who are (or will be) in business analytics roles. Offered: A.

BUS AN 505 Marketing Strategy and Channel Management (2) Covers analysis and decision-making in management of exchange processes with customers. Analysis of market forces; choice of marketing strategy, objectives, and marketing mix variables. Offered: A.

BUS AN 506 Operations and Supply Chain Management (3) Provides a broad introduction to Operations Management (OM), the design and management of the processes that transform inputs into finished goods or services. The objective of this course is to provide students with a solid foundation in the models and principles that are necessary to generate improvement ideas. Offered: W.

BUS AN 507 Spreadsheet Modeling for Business Enterprise (2) Implementing spreadsheets as the initial step in modeling data. Typical spreadsheet modeling problems. Equips students with tools necessary to start business analytics projects. Offered: S.

BUS AN 510 Probability and Statistics (3) Uses of statistical tools to present, analyze, and interpret data. Emphasis on applications of statistical tools and their uses for organizational decision-making. Offered: S.

BUS AN 511 Programming Essentials (2) Software and programming skills. Using software such as R,
Python, and others to manage and prepare data and implement models to analyze data. Offered: S.

**BUS AN 512 Data Management and Visualization (2)** SQL and the basic elements of data management and visualization. Offered: S.

**BUS AN 513 Customer Analytics (3)** Focuses on the firm's interaction with its customers and how data can be used to improve these interactions. Targeting and personalization are the core concepts of modern customer-centric marketing. Provides students with the tools and methods that will allow leveraging data to help shape customer relationship. Offered: A.

**BUS AN 514 Analytics for Firm Decisions (3)** How firms can use data analytics to optimize marketing mix decisions or the 4 Ps - Product Design, Pricing, Promotion and Advertising, and Placement. Developing statistical models for descriptive, causal, and predictive models for large-scale data. Offered: W.

**BUS AN 515 Digital Marketing (3)** Quantitative methods. Introduces some core concepts of digital marketing, and use of a quantitative approach to develop optimal marketing strategies. Provides a solid analytical foundation to evaluate digital opportunities, marketing strategies, and online business models. Offered: Sp.

**BUS AN 516 Operations Research Data Analytics (3)** Business analytics - problem and techniques. Techniques applicable to functional areas of business, such as operations, marketing, accounting, finance, etc. Offered: W.

**BUS AN 517 Machine Learning Methods and AI (3)** Introduces a theoretical and practical understanding of core artificial intelligence and machine learning concepts and techniques; and provide hands-on experience in applying these techniques to practical real-world business problems. Topics include inductive learning, knowledge representation, reinforcement learning, recommendation systems, artificial neural networks, and natural language processing. Offered: Sp.

**BUS AN 550 Business Analytics Leaders Series (1-3, max. 3)** Provides students the opportunity to complement their in-class learning experience with seminars given by business analytics leaders. Credit/no-credit only. Offered: AWS.

**BUS AN 579 Special Topics in Business Analytics (1-3, max. 6)** Topics vary.

**BUS AN 599 Business Analytics Practicum (2/3)** Provides the program capstone experience. Students complement their in-class learning experience by working on a project. Offered: Sp.

**BUS AN 600 Independent Study or Research (2/3, max. 6)** Study or research under the supervision of individual faculty members. Prerequisite: permission of the MSBA program office and faculty advisor. Offered: AWSpS.

**BUSINESS COMMUNICATION**

**B CMU 301 Strategic Business Communication (4)** Strategic approach to communications as a management tool. Analysis of the psychology, semantics, planning, and principles of effective business writing, presenting, and interpersonal and team communication. Practical applications include written and oral messages, inform and persuade, individual and team presentations, and tools and processes to increase collaboration among members of a team. Prerequisite: Cannot be taken for credit if credit earned in B CMU 302.

**B CMU 410 Business Reports and Other Specialized Communications (4)** Covers internal and external, written and oral business reporting. Considers communications strategies within the context of rapidly changing technologies. Students learn to apply primary and secondary research to quarter-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: B CMU 301 or B CMU 302.

**B CMU 490 Special Topics in Business Communications (1-6, max. 12)** Students and faculty focus on current topics of concern. Prerequisite: either B CMU 301 or B CMU 302.

**B CMU 499 Research in Business Communications (1-6, max. 9)**
B CMU 509 Finding your Voice (2) Develop a leadership communication style by discovering core values and learning how to translate those values into effective messages. Students give speeches as well as critique speeches of classmates, produce written evaluation of speeches given in class and receive instructor feedback. Prerequisite: B A 501.

B CMU 510 Business Communications for Managers (4) Develops understanding of communication theories, describes strategies for planning managerial communications, and builds skills in oral and written reporting and persuading. Looks at how new technologies are changing the way people in business communicate, and the implications those changes have for organizations. Prerequisite: B A 501.

B CMU 579 Special Topics in Business Communication (2/4, max. 12) Business and managerial communication topics of current interest to faculty and students.

B CMU 600 Independent Study or Research (*) Offered: AWSp.

BUSINESS ECONOMICS

B ECON 300 Managerial Economics (4) Analysis of economic factors affecting decisions made by business firms. Demand and cost analysis, and alternative policies from the firm’s point of view. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 127, MATH 134, or Q SCI 291; either IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390; may not be repeated.

B ECON 301 Intermediate Macroeconomics (4) Analysis of economy with attention to the business cycle, output of goods and services (GNP), inflation, unemployment, and government’s fiscal and monetary policies. How the economy affects individuals and firms and how to deal effectively with the economic environment. Prerequisite: ECON 201; may not be repeated.

B ECON 420 Financial Markets (4) Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 300 or ECON 300; may not be repeated.

B ECON 426 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think global - act local." Prerequisite: either B ECON 300 or ECON 300.

B ECON 427 International Finance (4) Asset choice and institutional operations in international finance, foreign exchange problems, the impact of international financial problems and operations on business, short- and long-term international financing. Prerequisite: either B ECON 300 or ECON 300; may not be repeated.

B ECON 490 Special Topics in Business Economics (1-6, max. 12) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B ECON 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business economics.

B ECON 500 Introduction to Business Economics (4) Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

B ECON 501 Analysis of Global Economic Conditions (4) Analysis of real and monetary factors affecting national and international economics, supply and demand for money, interest rates and stabilization problems and policies, in relation to government policy effects on business and individual affairs. Focuses on global macroeconomic issues. Prerequisite: MBA core microeconomics.

B ECON 510 Microeconomics for Managers (4) Alexis Leon In this course, students gain an understanding of how markets work, and learn optimal (profit-maximizing) strategies for managers. Offered: W.
**B ECON 520 Financial Markets (4)** Analysis of the structures and functions of financial markets and institutions; the behavior of interest rates through time; the cross-sectional structure of interest rates; and the roles of the Federal Reserve and Treasury in financial markets. Prerequisite: MBA Core Finance.

**B ECON 526 Competing in the Global Economy (4)** Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally - act locally." Offered: WSp.

**B ECON 527 International Finance (4)** Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: MBA core finance.

**B ECON 560 Student Investment Fund (1-2, max. 8)** Student directed course that requires students to analyze companies and to select stocks to manage a portfolio of public domestic equity under the guidance of the faculty advisor and the UW Investment Office.

**B ECON 579 Special Topics in Business Economics (2/4, max. 12)** Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

**B ECON 600 Independent Study or Research (*)**

**ENTREPRENEURSHIP AND INNOVATION**

**ENTRE 370 Introduction to Entrepreneurship (4)** Introduction to entrepreneurial practices with an emphasis on learning how to find business ideas, how to evaluate their potential, and how to recognize the barriers to success. Exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. Prerequisite: either ACCTG 219 or ACCTG 225; ECON 200.

**ENTRE 372 Grand Challenges for Entrepreneurship (4)** Explores big problems and opportunities facing society ranging from healthcare, education, big data, and poverty. Examines how solutions to these challenges can be researched, validated, and implemented using entrepreneurial skills such as creativity, business models, pivoting, and execution.

**ENTRE 422 Innovation Strategy (4)** Focuses on starting a hardware or software company. Includes guest entrepreneurs, lawyers, and financiers discussing market identification and analysis; planning the business; financing; and typical operating and administrative problems.

**ENTRE 432 Software Entrepreneurship (4)** Explores the opportunities and challenges of launching a software company. Issues include an overview of the industry, trends and emerging opportunities, funding, technology transfer, industry challenges, and cutting-edge software practices.

**ENTRE 440 Business Plan Practicum (2)** Enables students interested in new venture creation to explore their entrepreneurial aptitude, formulate their ideas, validate the opportunity, develop a business plan, and demonstrate the depth of their knowledge by preparing an executive summary and competing in the UW Business Plan Competition. Credit/no-credit only.

**ENTRE 443 Environmental Innovation Practicum (2)** Focuses on developing innovative solutions to real-world environmental problems and creating new business opportunities. Speakers include experts from the clean-tech community, environmental start-ups, the public sector, as well as corporate environmental strategists. Themes include water, energy, green building, and transportation. Includes the opportunity to participate in the UW Environmental Innovation Challenge.

**ENTRE 445 Health Innovation Challenge Practicum (2)** Explores the biggest challenges in the health field, domestic and global, and how various actors are creating solutions for them through innovation. Students form cross-disciplinary teams around project concepts chosen by the class and present the team's solutions to classmates and a panel of experts.

**ENTRE 455 Entrepreneurial Marketing (4)** Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to
identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated. Offered: jointly with MKTG 455.

ENTRE 457 Entrepreneurial Finance (4) Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: jointly with FIN 457.

ENTRE 459 Venture Investing (4) Analyzes and makes recommendations on investment opportunities through learning the fundamentals of venture investing and performing due diligence on real companies. Explores the venture investing process from the entrepreneur’s and the investor’s point of view. Students present their recommendations to the Investment Committee of the W Fund. Offered: jointly with FIN 459.

ENTRE 472 Creating a Company I (4-) Two-course sequence with ENTRE 473. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 370.

ENTRE 473 Creating a Company II (-4) Two-course sequence with ENTRE 472. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 472.

ENTRE 490 Special Topics in Entrepreneurship (1-6, max. 12)

ENTRE 499 Undergraduate Research (1-6, max. 9) Independent research in selected areas of entrepreneurship; new venture strategy and investment; market analysis and financial forecasts; and corporate issues under faculty supervision. Prerequisite: ENTRE 370.

ENTRE 509 Foundations of Entrepreneurship (2) Evaluation of new market opportunities and starting a new venture; focuses on identifying and evaluating new venture opportunities, developing and evaluating market strategies, evaluating test market performance, and evaluating business plans. Emphasizes the interplay between marketing, manufacturing, finance, accounting, and team management. Prerequisite: Permission of Foster School of Business. Offered: W.

ENTRE 510 Entrepreneurial Strategy (4) Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Draws heavily on the principles of microeconomics and strategy. Prerequisite: B A 500; B A 502.

ENTRE 521 Corporate Entrepreneurship (4) Focuses on entrepreneurial activities in large, established corporation. Introduces the theory and best practices on the process of converting new ideas to commercial products and new businesses. Prerequisite: B A 500; B A 501; B A 502.

ENTRE 522 Innovation Strategy (4) Explores how firms tap into external sources of innovation, focusing on user communities, universities, and entrepreneurial ventures. Demonstrates how open, collaborative, community-based models of innovation create successful business options. Offered: jointly with MGMT 522.

ENTRE 530 Entrepreneurial Decision Making (4) Provides an overview of the major decisions entrepreneurs face when creating a business. Covers the startup lifecycle from idea generation and opportunity recognition to entry strategy, growth, and exit. Prerequisite: B POL 509; B A 501. Instructors: Song Offered: W.

ENTRE 531 Developing Business Models for Emerging Technologies (4) Focuses on the commercialization of emerging technologies. Topics include conducting feasibility assessments of intellectual property landscape, evaluating business opportunities, analyzing competition, developing business models and strategies, constructing a professional quality business plan, and presenting business plan, transforming a new technology into a market-ready technology-based business. Offered: W.
ENTRE 532 Software Entrepreneurship (4) A case- and project-based course, focusing on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

ENTRE 535 Business Models in Global Health (4) Explores many of the models used to tackle these issues in global health, using public-private partnership, corporate, and entrepreneurial cases. Examines and debates the efficacy of efforts in combating the biggest killers: non-communicable diseases (NCDs) such as AIDS, malaria, and Tuberculosis. Includes the economics of eradication efforts, funding architecture, issues around neglected diseases, and pricing models for the developing world.

ENTRE 540 Business Plan Practicum (2, max. 4) Gives student entrepreneurs the opportunity to network with the founders/CEOs of companies, explore their entrepreneurial aptitude, and work through the details of their own start-ups. Provides structure, tools, and resources to start of company, and compete in the UW Business Plan Competition. Credit/no-credit only.

ENTRE 541 Technology Commercialization Practicum (4) Provides the experience of researching and creating a commercialization plan for a promising technology. Designed to apply the skills and perspectives of students in cross-disciplinary teams so they learn how to work effectively with peers in assessing complex and potentially ambiguous situations. Offered: S.

ENTRE 542 Venture Capital Investment Practicum (2) Provides overview and teaches the mechanics of the venture capital industry and culminates in intramural venture capital competition. Students assume the role of investors in a venture capital firm and real entrepreneurs pitch to them for investment dollars. Teams defend their allocation decisions before a judging panel of venture capitalists. Credit/no-credit only. Offered: A.

ENTRE 543 Environmental Innovation Practicum (2) Focuses on developing innovation solutions to real-world environmental problems and creating new business opportunities. Speakers include experts from the clean-tech community, environmental start-ups, the public sector, as well as corporate environmental strategists. Themes include water, energy, green building, and transportation. Students have the opportunity to participate in the UW Environmental Innovation Challenge. Offered: A.

ENTRE 545 Health Innovation Challenge Practicum (2) Explores the biggest challenges in the health field, domestic and global, and how various actors are creating solutions for them through innovation. Students form cross-disciplinary teams around project concepts chosen by the class and present the team's solutions to classmates and a panel of experts.

ENTRE 555 Entrepreneurial Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap or guerilla early-stage companies. Covers how to target market segments, position products, estimate demand, set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: BA 501, MKGT 501 or equivalent. Offered: jointly with MKTG 555.

ENTRE 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with FIN 557.

ENTRE 560 Accounting Fundamentals for Entrepreneurs (2) Familiarizes prospective entrepreneurs with the fundamentals of financial and managerial accounting. Covers the principles of accounting decision-making from the perspective of both external investors and internal managers.

ENTRE 561 Essentials of Finance for Entrepreneurs (3) Studies the essentials of finance, how individuals make consumption and savings decisions, and how firms make investment and financing decisions, necessary for entrepreneurs to develop a competitive advantage over their peers. Offered: A.

ENTRE 562 Legal Essentials for Entrepreneurs (1) Provides an overview of critical and fundamental aspects of United States contract law, types of
business structures, and intellectual property law that are essential for entrepreneurs to make informed business decisions.

**ENTRE 563 Opportunity Recognition and Validation (2-4)** Covers the range, scope, and complexity of issues involved in entrepreneurial startups. Explores how entrepreneurs conceive, adapt, and execute strategies to create new enterprises.

**ENTRE 564 Competitive Strategy (2-4)** Introduces different aspects of the strategic decision-making process. Pays particular attention to the context within which the decision maker operates; the pressures of performance; and both the personal and professional limitations of the individual executive as they try to manage effectively. Also highlights the interplay between competitive strategy and entrepreneurship related topics.

**ENTRE 565 Entrepreneurial Marketing I (2)** Focuses on marketing strategy. Assesses market opportunities by analyzing customers, competitors, collaborators, context, and the strengths and weaknesses of a company. Examines how to design focus marketing strategies to maximize a company’s chance of winning in these markets, and better evaluate different potential growth trajectories. First in a two-course entrepreneurial marketing sequence.

**ENTRE 566 Entrepreneurial Marketing II (2)** Focuses on the decisions that entrepreneurs make and the tools that they use to implement an effective marketing strategy. Covers how to communicate and defend marketing recommendations as well as critically examine and build upon the recommendations of others. Second in a two-course entrepreneurial marketing sequence.

**ENTRE 567 Entrepreneurial Strategy and Decision Making (4)** Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Provides an overview of the major decisions entrepreneurs face when creating a business. Covers the startup lifecycle from idea generation and opportunity recognition to entry strategy, growth, and exit.

**ENTRE 568 Digital Media Marketing (1-2)** Examines the principles and tools related to internet marketing, mobile marketing, and social media. Compares marketing communications in the new media landscape compared to traditional marketing communications. Analyzes business models in new media landscape such as the value proposition and the revenue model of a firm. Covers new media marketing tactics. Offered: W.

**ENTRE 569 Strategies for Funding Ventures (4)** Provides an in-depth view of the fundraising process including the elements of deal making and working with investors, and sensitizes prospective entrepreneurs to the strategic and people issues around venture finance.

**ENTRE 570 Persuasion: Pitching, Public Relations, and Public Speaking (2)** Examines the role verbal communication, influence, and persuasion play in shaping an entrepreneur’s success in starting, growing, managing, leading, and exiting a venture. Follows the progression of different forms of pitching that an entrepreneur needs to be able to deliver.

**ENTRE 571 Essentials of Sales for Entrepreneurs (2)** Introduces the principles and concepts of selling and its strategic role in new ventures. Promotes an understanding of how products or services are used to create value for a customer and how that information is used by entrepreneurs to decide to enter a market and how to remain competitive in the market.

**ENTRE 575 Entrepreneurial Leadership Seminar (1, max. 4)** Covers common issues associated with leading and coordinating people in entrepreneurial ventures. Topics vary by quarter and include individual level of leadership, managing projects, managing teams, and scaling ventures. Credit/no-credit only.

**ENTRE 579 Special Topics in Entrepreneurship (2-4, max. 12)** Topics vary. Offered only when faculty members are available and there is sufficient student interest.

**ENTRE 581 Theoretical Foundations of Entrepreneurship (4)** Focuses on theoretical overview, entrepreneurs, environment and organizational founding, entrepreneurship's links
with other disciplines, venture capital and venture capitalists, new venture strategy and performance, growth processes and challenges, and entrepreneurial networks and alliances. Offered: A.

ENTRE 582 Technology, Innovation, and Entrepreneurship (4) Explores issues of how a knowledge-based economy competes and performs using technological innovations and entrepreneurship. Explores research on capabilities of broader entities; processes of learning at the firm, industry, technology, economy-level; development of know-how as evolutionary process; and explorations by firms, sectors and economies exploring new technologies and techniques. Offered: W.

ENTRE 590 New Venture Research Practicum (4) Exposes students to new venture creation phenomena. Teaches how to think about and understand empirical research methods such as case studies, participant-observation, and other field methods while contributing to on-going cumulative data collection process.

ENTRE 595 Venture Planning and Execution Independent Study (1-3, max. 10) Independent study focused on venture planning and execution of an entrepreneurial venture of the students' design. Credit/no-credit only.

ENTRE 600 Independent Study or Research (*-)

FINANCE

FIN 205 Personal Financial Literacy (3) Provides basic framework for making rational financial decisions impacting personal life with goal of maximizing financial value of those decisions. Integrates theory with real world applications in the analysis of financial decisions, and evaluates costs and benefits of those decisions.

FIN 350 Business Finance (4) Evaluating and funding projects within the firm. Time value of money, inflation, capital budgeting; risk and return in the financial markets, stocks, bonds, portfolios and diversifiable risk, market efficiency and the balance between debt and equity to fund the firm. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 134, or Q SCI 291; either IND E 315, MATH 390, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390.

FIN 423 Banking and the Financial System (4) Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 425 Introduction to Real Estate Finance and Investment (4) T. Seslen Introduction to valuing, financing, and investing in real estate with emphasis on those topics that distinguish real estate from other investments, including valuation techniques, lease structures, loan options, equity partnerships, risk management, and taxation. Prerequisite: FIN 350.

FIN 428 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities. Financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: FIN 350; either one 400-level FIN course, B ECON 301 or ECON 301.

FIN 435 Introduction to Real Estate Capital Markets (4) Tracey Seslen Examines who the real estate capital providers are, how that capital is priced, and why the markets operate as they do. Provides a toolbox for sound decision-making, either as an investor seeking funding or as a note-holder in the secondary market. Prerequisite: FIN 350.

FIN 445 Real Estate Development and Feasibility Analysis (4) Tracey Seslen Teams of students will create a development proposal for an underutilized parcel of land in an economically challenged neighborhood of Seattle. Learning modules include development finance, market analysis, principles of land use and entitlements, site planning and architecture, construction and project budgeting, and the nuances of different property types, including affordable housing. Prerequisite: FIN 425, which may be taken concurrently.

FIN 450 Problems in Corporate Finance (4) Case problems in corporate financial management.
Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 453 Financial Theory and Analysis (4)** Business financial strategic planning. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporating modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

**FIN 454 Business Valuation, Investment, and Financing (4)** Key issues in financial management using both analytical and case study illustrations. Valuation of public and private companies; cost of capital estimation; investment complications, such as taxes, inflation, risk, project interdependencies, and financing-investment interactions; leasing; mergers; spin-offs and carve-outs. Prerequisite: FIN 350; either B. ECON 300 or ECON 300.

**FIN 455 Entrepreneurial Finance (4)** Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B. ECON 300 or ECON 300. Offered: jointly with ENTRE 457.

**FIN 456 Mergers and Acquisitions (4)** Advanced finance topics focusing on providing the necessary training to value, structure, and close acquisitions. Additional topics include antitrust issues, the legal environment governing mergers, and antitakeover defense. Prerequisite: FIN 350; and either B ECON 300 or ECON 300.

**FIN 457 Venture Investing (4)** Analyzes and makes recommendations on investment opportunities through learning the fundamentals of venture investing and performing due diligence on real companies. Explores the venture investing process from the entrepreneur’s and the investor’s point of view. Students present their recommendations to the Investment Committee of the W Fund. Offered: jointly with ENTRE 459.

**FIN 460 Investments (4)** Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate-of-return aspects of particular securities portfolios, and total wealth. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

**FIN 461 Financial Futures and Options Markets (4)** Introduction to financial futures and options markets. Institutional aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

**FIN 462 Management of Financial Risk (4)** Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards swaps, and option contracts. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 463 Asset Management (4)** Review of asset management industry and participants. Exploration of end investor’s objectives, preferences and biases as basis for allocating client assets across an entire portfolio. Development of an investment strategy while addressing problems in implementing that strategy from a practitioner’s perspective. Prerequisite: FIN 350; and either FIN 460, FIN 461, or FIN 462; recommended: FIN 460.

**FIN 464 Alternative Investments: Hedge Funds and Private Equity (4)** Examination of the market for alternative investments including the investment strategies employed by hedge funds and private equity firms, the risk-return tradeoffs of those strategies, and the legal and economic environments in which alternative investment firms operate. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

**FIN 465 Fixed Income Securities (4)** Examination of the main concepts and participants in the fixed income markets, with an emphasis on the risks and other instrument-specific factors that differentiate fixed income securities, as well as the tools and techniques for pricing and managing the risk of fixed income securities. Prerequisite: FIN 350; and either B ECON 300 or ECON 300.
FIN 490 Special Topics in Finance (1-6, max. 12) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

FIN 495 Finance Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of finance concepts learned in classroom. Prerequisite: FIN 350. Credit/no-credit only.

FIN 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business finance, money and banking, or investments, with permission of instructor.

FIN 502 Business Finance (4) Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

FIN 505 Corporate Finance (4) L. Young This course elucidates the theory of corporate finance, and explores how it's applied in the financial decision making of a firm. The study of these decisions will involve understanding how capital markets function and learning to use and evaluate performance of a company, business, or department based on financial models. Offered: Sp.

FIN 528 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: B A 502 or FIN 509.

FIN 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B ECON 520 or permission of graduate office.

FIN 550 Advanced Business Finance (4) Systematic coverage of key theoretical issues in financial management. Application of quantitative analysis to financial problems of the firm that are important in practice, including issues related to financing and investment. Prerequisite: MBA Core Finance.

FIN 551 Problems in Business Finance (4) Uses case studies to examine a broad range of financial management topics, including forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Credit allowed for only one of FIN 551 and FIN 552. Prerequisite: B A 502.

FIN 552 Problems in Corporate Planning and Financing (4) Uses case studies to examine business financing. Topics include financial statement analysis, financial planning and forecasting, banking relationships, and financing sources, including the use of derivative securities, venture capital, and private equity. Credit allowed for only one of FIN 551 and FIN 552. Prerequisite: either B A 501 or FIN 502.

FIN 553 Problems in Capital Investment Planning (4) Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment decisions, and financial restructurings. Prerequisite: either B A 501 or FIN 502.

FIN 555 Financing Decisions, Payout Policy, and Corporate Control (4) Analysis of business financing methods, payout policy, management compensation, ownership structure, and the distribution of control rights. Covers the major issues critical to structuring contracts within the corporation. Prerequisite: MBA Core Finance.

FIN 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture
capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with ENTRE 557.

**FIN 558 Mergers and Acquisitions (2/4)** Advanced finance topics focusing on providing the necessary training to value, structure, and close acquisitions. Additional topics include antitrust issues, the legal environment governing mergers, and antitakeover defense. Prerequisite: either BA 500, FIN 502, or FIN 505.

**FIN 560 Investments (4)** Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: MBA Core Finance.

**FIN 561 Financial Futures and Options Markets (4)** Overview of futures markets and options markets. Analysis of pricing of futures contracts and options; comparison of futures, forward, and options contracts; risk management with hedging; alternative investment strategies; and review of empirical evidence. Prerequisite: MBA Core Finance.

**FIN 562 Management of Financial Risk (4)** Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards, swaps, and option contracts. Prerequisite: MBA Core Finance.

**FIN 563 Real Options (2)** Short overview of option pricing theory, followed by applications of option analysis in evaluating complex investment projects by business firms. Prerequisite: BA 502.

**FIN 566 Alternative Investments: Hedge Funds and Private Equity (4)** Examination of the market for alternative investments including the investment strategies employed by hedge funds and private equity firms, the risk-return tradeoffs of those strategies, and the legal and economic environments in which alternative investment firms operate.

**FIN 579 Special Topics in Finance (2/4, max. 12)** Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

**FIN 580 Doctoral Seminar in Financial Economics (4)** Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

**FIN 590 Doctoral Seminar in Capital Market Theory (4)** Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

**FIN 591 Doctoral Seminar in Corporate Finance (4)** Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

**FIN 592 Doctoral Seminar in Financial Research (4)** Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm’s dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

**FIN 599 Doctoral Seminar in Finance (1, max. 12)** Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

**FIN 600 Independent Study or Research (*)**

**INFORMATION SYSTEMS**

**IS 300 Introduction to Information Systems (5)** Fundamentals of information systems, what they are, how they affect organizations. Technical and
organizational foundations of information systems, building information systems, managing information system resources. Laboratory emphasizes using computer to analyze, coordinate, solve organizational decision-making problems.

Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH 125, MATH 134, MATH 135, or Q SCI 291; either ECON 311, IND E 315, QMETH 201, Q SCI 291, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390; may not be repeated. Offered: AWSpS.

I S 310 Fundamentals of Business Information Technologies (4) Exposure to fundamental programming and scripting concepts, conceptual data modeling, database management, and XML. Applying data types and control structures. Continues the concepts of I S 300 of entity-relationship diagrams and record structure diagrams. Database management component includes relational databases, basic SQL, data architecture issues. Prerequisite: I S 300. Offered: AWSp.

I S 320 Fundamentals of Application Programming (4) Fundamental programming concepts including data types, control structures, modularization, and structure programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequisite: I S 300, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 410 Networks and Cybersecurity (4) Technology and applications of business data communication networks and cybersecurity. Topics include network architecture, communication protocols, cloud computing, Internet of Things, cryptography, cyberattack, prevention techniques, and network economics. Prerequisite: I S 300, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 445 Database Management (4) Examines the business need for database processing. Discusses database design, development, and administration. Students practice real-world database design and implementation using SQL. Discusses issues related to transaction management, data warehouse, etc. Prerequisite: I S 320, which may be taken concurrently; may not be repeated. Offered: AWSp.

I S 451 Business Data Analytics (4) Yong Tan
Introduction to business data analytics concepts and techniques, including association rules, classification, cluster analysis, decision trees, logistic regression, text mining, and web analytics. Real-world applications in information systems, supply chain management, and others. Prerequisite: I S 300, OPMGT301. Offered: AWSp.

I S 460 Systems Analysis and Design (4) Analysis and design of business information systems. Concentrates on the analysis phase of systems development. Covers systems development life cycle, feasibility studies, analysis of user requirements, and development of logical system models. Prerequisite: I S 410; I S 445; both of which may be taken concurrently; may not be repeated. Offered: WSp.

I S 461 Systems Implementation (4) Develops business information systems integrating knowledge gained in previous 400-level I S courses. Topics include software project management, system/database design, GUI, software testing, systems implementation/support/maintenance, user training, integrating web, and business environments. Prerequisite: I S 445; I S 460; may not be repeated.

I S 490 Selected Topics in Information Systems (1-6, max. 12) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: I S 320.

I S 495 Practical Experience in Information Systems (1-4, max. 8) Undergraduate substantive I S internship and mentorship. Internships can be repeated up to two quarters for maximum of 4 credits; grades based on weekly status reports, paper, demonstration of knowledge. Mentorship program (maximum 1 credit/quarter) allows student to be matched with I S executive; grade based on status reports, other participatory events. Offered: AWSpS.
I S 499 Undergraduate Research (1-6, max. 12)
Selected problems in information systems and computer applications.

I S 504 Computer-Based Information Systems for Management (3)
Introduction to information systems and computer technology. Covers concepts of information use in decision making. Use of decision-support problem-solving tools (e.g., spreadsheet, database software). Management's responsibility in defining, developing, using information systems is focal point.

I S 530 Management of Information Systems Resources (4)
Topics include general control problem in organizations; performance evaluation of data processing managers; technology and cost trends; software cost estimation; capacity planning; short term utilization; queuing and associated externalities; issues in centralization and decentralization of the information system facilities. Prerequisite: B A 501 or I S 504 or equivalent.

I S 545 Database Systems and Applications (4)
Logical data models, relational database systems, structured query language (SQL), conceptual modeling, database design, Web-connected databases, transaction management, distributed and heterogeneous systems, data warehousing, data mining, database administration issues. Focuses on the use/management of business data in areas such as finance. Prerequisite: B A 502 or I S 504.

I S 560 Information Systems Development (4)
Offers comprehensive look at information systems development. Covers user requirements analysis, logical and physical system models, system implementation and maintenance, project valuation and management. Additional topics include object-oriented approach, systems development in online environments, and financial information systems. Prerequisite: B A 501 or permission of instructor.

I S 570 Business Data Communications and Networking (4)
Networking basics, Internet/web-based services, client-server architecture, fundamentals of transmission, networking protocols, physical layer, data-link layer, local-area networks, backbone networks, internetworking devices, metropolitan and wide-area networks, wireless networking, network security, network analysis and management. Combines technical, operational, and management issues in data communications. Prerequisite: B A 502 or I S 504.

I S 579 Selected Topics in Information Systems (2/4, max. 12)
Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501 or I S 504 or permission of instructor.

I S 580 Advanced Research Topics in Information Systems I (4, max. 12)
Overview of research problems and techniques in information systems. Focuses on application of microeconomic theories, mathematical, statistical, and operations research methods. Extensive reading and discussion in current and emerging research topics. Prerequisite: doctoral student or permission of instructor.

I S 581 Advanced Research Topics in Information Systems II (4, max. 12)
Advanced topics of current interest of faculty in heterogeneous database, temporal database, data warehousing, data uncertainty, active and deductive database systems, database design, and formal database languages. Prerequisite: doctoral student or permission of instructor.

I S 582 Advanced Research Topics in Information Systems III (4, max. 12)
Potential topics include information systems design, software engineering, decision support and expert systems, empirical methods, optimal control theory. Prerequisite: I S 580 or doctoral student or permission of instructor.

I S 599 Doctoral Seminar (1, max. 12)
Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

I S 600 Independent Study or Research (*-)

M.S. INFORMATION SYSTEMS

MSIS 501 Information Technology and Organizational Strategy (3)
Discusses the role of
information technology (IT) in the development and execution of business strategy that takes into account competitors, customers, and firm competencies (including IT capabilities). Examines the impact of IT on two sets of strategic issues for a company - where to compete and how to compete. Helps students develop tools to use IT in aiding strategy. Offered: SpS.

**MSIS 502 Business Data Analysis (2)** Covers statistical techniques for managerial decision making. Includes hypotheses testing, regression, and analysis of variance. Offered: SpS.

**MSIS 503 Operations and Business Process Management (3)** Presents a framework to understand organizational processes, offers tools to improve these processes. Covers process improvement methodologies such as reengineering, TQM, six-sigma, simulation, and collaboration. Focuses on discussing application and implementations of improvement programs in a wide variety of settings, including operations processes related to inventory and scheduling, service, and quality assurance. Offered: SpS.

**MSIS 504 Business Decision Models (2)** Covers formulating and modeling business decision problems. Includes risk analysis, simulation, linear programming, and extensions. Offered: SpS.

**MSIS 510 Introduction to Data Mining and Analytics (3)** Covers managerial decision-making and business intelligence. Topics include naive Bayesian classifier, decision trees, rule covering, and other classification techniques, as well as issues related to data cleaning, design, testing, and validation. Special attention given to embedded intelligence in modern business processes and applications. Offered: AS.

**MSIS 511 Digital Transformation of Organizations (2)** Studies the impact of digital technologies within an organization, an industry, and an economy. Discusses system architecture that enables business process and provides foundation for management and use of information systems within organizations. Covers issues related to workflow process changes, efficiency and effectiveness, innovation, convergence, competitive advantage, and sustainability. Offered: A.

**MSIS 512 Information Security and Assurance in a Networked World (3)** Explores technical and managerial aspects of information security and assurance within a networked environment. Includes inspection and protection of information assets, detection of and reaction to internal and external threats, determining the levels of protection needed, and design of a consistent and reasonable information security architecture along with an implementable process. Offered: AS.

**MSIS 521 Information Technology and Marketing in the New Economy (3)** Explores issues related to marketing models based on social networking/computing, such as concepts and applications of search engine optimization (SEO), viral marketing, web analytics, user generated content, the wisdom of crowds, and prediction markets. Students work in teams on real-world projects to develop marketing strategies for maximizing online traffic to business sites. Offered: AS.

**MSIS 522 Advanced Business Data Mining (2)** Covers managerial decision-making and business intelligence. Topics include association rule mining and regression. Special attention given to embedded intelligence in modern business processes and applications. Offered: AW.

**MSIS 523 Cyber Security Policy, Management, and Compliance (3)** Covers the overall framework of information technology (IT) compliance, both generic and industry-specific. Includes intellectual property rights, privacy, copyright protection, trade secrets, and other legal issues relevant to IT. Offered: AW.

**MSIS 524 Managing Information Technology Projects (3)** Explores issues related to analyzing and managing complex information technology (IT) projects in a globalized and networked world. Topics include life-cycle models, use case point estimation, function point analysis, COCOMO, scheduling and budgeting, project risk analysis, monitoring and control, contract design, outsourcing, and capability maturity model (CMM). Students manage real-world information technology project in a simulated environment. Offered: AW.

**MSIS 526 Enterprise Systems and Integration (3)**
Provides an overall understanding of the complex
role of information systems in transforming organizational processes and integrating them as part of an enterprise system. Topics include the concept of process-enabling information technologies and enterprise resource planning systems that support organizational manufacturing, customer service, and human resource management. Offered: SpS.

**MSIS 541 Advanced and Unstructured Data Mining (2)** Advanced topics in data mining, focusing on unstructured data, web mining, and text mining. Students learn and apply unstructured data mining tools on real-world unstructured data. Offered: WSp.

**MSIS 542 Advanced Development Frameworks (2)** Introduces object-oriented principles and key web-based system development tools. Topics include object-oriented modeling, object-oriented programming languages, and advanced user interface design. Students use object analysis and design, modern programming languages, and advanced database technology to develop business applications. Offered: WSp.

**MSIS 543 Advanced Database Systems and Data Warehouses (3)** Extends and enhances understanding of enterprise databases to design, implement, and support business intelligence (BI) solutions. Topics include DBMS extensions for data warehousing, data warehouse and data mart design, loading and extracting data, performance tuning, and cloud-based BI application design. Emphasizes agile techniques to efficiently produce optimal solutions that meet business requirements and increase competitive advantage. Offered: WSp.

**MSIS 544 Managing Information Technology Resources (2)** Covers issues related to managing operations of the information (IT) department in an organization. Topics include IT budgeting, systems implementation/support/maintenance, user training, hardware replacement strategies, performance evaluation, technology cost estimation and trend forecasting, capacity planning, website utilization and traffic load balancing, and coordination with other functional departments. Offered: WSp.

**MSIS 545 Technology Entrepreneurship (2)** Examines the issues involved in creating an organizational environment that recognizes, nurtures, and grows technology-related entrepreneurial activities, the practice of selecting and monitoring ventures, and the capital process within a firm. Offered: WSp.

**MSIS 546 Information Systems Economics (2)** Examines basic concepts of economics as it pertains to information technology and systems. Includes the value of information, cost-benefit analysis, economies of scale, network effects, pricing of digital goods, information uncertainty in electronic markets, risk-return trade-offs, and other related topics. Offered: WSp.

**MSIS 547 Managing in the Era of Cloud Computing (2)** W. DEY Covers cloud computing; risks and benefits of information technology (IT) infrastructure; service and deployment models; virtualization and organizational impact; and cloud security. Offered: W.

**MSIS 549 Machine Learning and Artificial Intelligence for Business Applications (2)** Covers machine learning, deep learning, and artificial intelligence algorithms for business applications. Students will learn the theory of deep learning and gain practical experience from building neural networks to solve big data problems in business.

**MSIS 550 MSIS Leadership Series (1-, max. 5)** Provides the capstone learning experience. Includes seminars by information technology leaders. Seminar topics and speakers chosen based on the progression of other courses in the program. Credit/no-credit only. Offered: AWSpS.

**MSIS 551 Security Analytics (2)** Covers the process of and tools for data collection, aggregation, and analysis in security monitoring and threat detection. Students will learn common security attacks, the deployment of Security Information and Event Management (SIEM) to identify anomalies and threat, and the process of incident responses.

**MSIS 600 Independent Study or Research (*, max. 5)** Study or research under the supervision of individual faculty members. Prerequisite: permission of instructor.
MSIS 601 Internship (*, max. 5) Graduate internship under the supervision of individual faculty members. Prerequisite: permission of instructor.

INTERNATIONAL BUSINESS

I BUS 300 Introduction to Global Business (4) Prepares students to understand the most important aspects of the international political economy. Emphasis on the important relationships among nations and business and economic institutions that influence students' performances as managers, consumers, and citizens. Prerequisite: ECON 200.

I BUS 330 Global Business Strategy in Emerging Markets (4) Explores challenges and opportunities involved in doing business in emerging and developing markets. Topics include: analysis of foreign economic, cultural and political environments; market entry decisions; competitive strategies; management of risks; roles of technology, trade policy, macroeconomic and exchange rates. Prerequisite: I BUS 300 or JSIS 222; may not be repeated.

I BUS 340 Global Business Strategy in Developed Markets (4) Addresses strategic approaches to challenges and opportunities in developed markets, especially those in Europe and Asia. Topics include: analysis of competition; leveraging competitiveness advantages; analysis of political and regulatory environment; responses to technological change. Prerequisite: I BUS 300 or JSIS 222; may not be repeated.

I BUS 440 Business in Asia (4) Major aspects of the Asian business environment and how Asian enterprises are managed. Problems and opportunities of foreign corporations in Asia. Prerequisite: I BUS 300; may not be repeated.

I BUS 461 Science, Technology, and Innovation in East Asia: Japan, South Korea, Taiwan, and China (5) I&S Anchordoguy Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia's rise in world of technology and explores conditions for its successful continuation. Offered: jointly with JSIS A 472.

I BUS 462 Japanese Business and Technology (5) I&S Anchordoguy Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with JSIS A 478.

I BUS 490 Special Topics in International Business (1-6, max. 12) Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

I BUS 491 CISB Track Seminar (1, max. 9) Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages. Credit/no-credit only.

I BUS 495 International Business Internship (1-4, max. 8) An internship with a company, not-for-profit organization, or government agency in an international business capacity. Prerequisite: I BUS 300. Credit/no-credit only.

I BUS 496 Global Business Consulting (4) Offers students opportunity to apply principles, concepts and skills learned previously to a real-life business situation. Projects illustrate issues and choices facing managers operating in a global business environment, such as identification of target markets, choice of market entry strategy, building and managing a global supply chain, importing and exporting processes; working with global partners; and local laws and regulations. Prerequisite: I BUS 300 or JSIS 222; may not be repeated.

I BUS 499 Undergraduate Research (1-6, max. 9) Prerequisite: I BUS 300.

I BUS 520 International Trade Policy (4) Examines issues important to trade policy. Topics include trade policy basics, tariffs and non-tariff barriers, safeguards, voluntary restraints, dumping, subsidies and strategic trade theory, agricultural trade, developing country rules, regionalism, and services. Prerequisite: B A 500 or course in international economics, trade, or international finance, or permission of graduate office.
I BUS 530 International Business in Less Developed Countries (4) Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 540 International Business in Industrialized Countries (4) Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments relations, economic integration, national policies, and supranational organizations' impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 545 Cases in Sustainability (4) Stearns Examines components of corporate sustainability-financial, social, and environmental - in cases and articles format. Tackles rigorous global cases using triple bottom line framework. All topics are augmented by executive experts. Students research and critique strategic and executional and intent actions of companies as they face twenty-first century challenges and shareholder demands.

I BUS 550 International Business Consulting (4) Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

I BUS 560 Multinational Business Management (4) Managerial responses to problems of international business organizations and operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 561 Science, Technology, and Innovation in East Asia: Japan, South Korea, Taiwan, and China (5) Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores conditions for its successful continuation. Offered: jointly with JSIS A 581.

I BUS 562 Japanese Business and Technology (5) Anchordoguy Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with JSIS A 578.

I BUS 570 International Study Tour (2) Educational international study tour. Includes pre-tour and post-tour activities. Prerequisite: B A 502 and permission of Foster School of Business.

I BUS 572 Cross-Cultural Conversations on Contemporary Issues (1, max. 4) Creates opportunities for students from across the globe to share information and perspectives on contemporary issues important to international business. In weekly, facilitated, small-group conversations, students improve their ability to formulate and express ideas and opinions, and practice persuasion and facilitation skills. Credit/no-credit only.

I BUS 575 Business Studies Abroad (*, max. 24) Research and study of foreign business problems in the country or countries where the firms are located. Limited to students who have the approval of their major adviser and a faculty member who has agreed to direct their work in accordance with a definite program of studies. Credit/no-credit only.

I BUS 579 Seminar: Special Topics in International Business (2/4, max. 12) Application of international business principles to the analysis of a specific issue in trade or resource transfer, or to the business conditions in a particular country. Japan and other Pacific Rim countries are frequent topics. Prerequisite: B A 500 or permission of instructor.
I BUS 600 Independent Study or Research (*-)

MANAGEMENT

MGMT 200 Introduction to Law (5) I&S Legal institutions and processes; law as a system of social thought and behavior and a frame of order within which rival claims are resolved and compromised; legal reasoning; law as a process of protecting and facilitating voluntary arrangements in a business society.

MGMT 275 Management Essentials (3) I&S McPherson Explores management and leadership through understanding individuals, teams, and organizations. Discusses relevant concepts and applications of strategic planning, problem solving, conflict management, negotiation, change management, and control systems. Also covers current issues regarding ethical behavior, social responsibility, and diversity. Not open for credit to students pursuing a business degree.

MGMT 300 Leadership and Organizational Behavior (4) Focuses on how managers become effective leaders. Examines basic principles of managing people, making use of theories that transcend the workplace, including the psychology of individual and group behavior. Emphasizes leadership, strategic thinking, team building, and performance.

MGMT 311 Introduction to Strategic Human Resources Management (4) Introduces core human resources management concepts that form the foundation for advanced human resources coursework. Surveys major human resources topics including selection, compensation, performance management/appraisal, and employee governance. Develop skills to design and build human resources management systems that align with organizational strategies and goals.

MGMT 312 Career Development Workshop (2) Develops career goals in business administration and guides students toward the academic training that achieves their goals. Emphasizes development of the personal skills necessary to market oneself in a competitive marketplace and present oneself to potential employers.

MGMT 320 Business, Government, and Society (4) Political, social, and legal environment of business. Critical managerial issues from historical, theoretical, ethical perspectives; their impact on organization. Corporate political power, boards of directors, capitalism, industrial policy, business ethics and social responsibility, alternative corporate roles in society.

MGMT 401 Leadership Development (4) Develops student’s unique and effective leadership style/model and provides a framework/plan for leadership development. Covers relevant leadership models and helps create a toolbox of leadership techniques to foster individual development. Topics include: effectively engaging others to enhance motivation and performance, understanding what constitutes an individual model for leading others, providing feedback to develop others, etc.

MGMT 402 Negotiations (4) Develops effective negotiators across a variety of contexts including salary negotiations, price discounts, interpersonal norms, and contracts using experiential exercises and analytic frameworks.

MGMT 403 Developing High Performing Individuals, Teams, and Organizations (4) Introduces evidence-based models for enhancing motivation and performance in organizations. Covers various strategies and methods to facilitate high performing individuals, teams, and organizations. Topics include how to design an effective goal setting program and plan for individuals and teams; designing work and jobs that optimizes individual and team motivation; and issues of current interest.

MGMT 404 Organization Development and Change (4) Using a systems framework and contemporary methods, explores strategies for executing common change initiatives in organizations. Topics may include talent development initiatives, employee engagement interventions, compensation changes, and leadership development, as well as contemporary shifts towards using different types of communication technology initiatives or appreciate inquiry.

MGMT 407 Managing a Global Workforce (4) I&S, DIV Explores cross-cultural management issues to enhance cultural intelligence and develop a global mindset with the intent to apply theoretical and
analytical tools to management decisions within a global workforce. Recommended: MGMT 300.

MGMT 411 Recruiting, Hiring, and Retaining Talent (4) Addresses strategies to identify, attract, select, and retain employees who contribute to having a competitive advantage in one’s team or organization, to help achieve tactical and strategic organizational goals. Explores workforce forecasting, employee sourcing, legal issues, recruiting, and selection. Helps develop critical thinking and analytical skills to evaluate the effectiveness of an organization’s selection and evaluation systems. Prerequisite: MGMT 311.

MGMT 412 Performance Management and Compensation (4) Explores major compensation tools (e.g., salary, incentives, and benefits) to solicit desirable employee behaviors, which lead to organization success. Covers how to design a pay and reward system that is both internally fair and externally competitive. Prerequisite: MGMT 311.

MGMT 430 Strategic Management (4) Develops strategic thinking skills for balancing opportunities and risks of business competition to generate superior value for stakeholders. Performs in-depth analyses of industries and competitors, predicts competitive behavior, and explores how firms develop and sustain competitive advantage over time. Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or MGMT 300.

MGMT 440 Business Consulting (4) Integrates knowledge and tools from the undergraduate business core curriculum with a focus on consulting. Students learn theoretical frameworks and develop proficiencies in a wide range of skills. Students gain practical experiences working in teams and assisting local organizations to solving immediate business issues.

MGMT 445 Multicultural Marketing and Business Development (4) DIV Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301. Offered: jointly with MKTG 445.

MGMT 490 Special Topics in Management (1-6, max. 12) Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings.

MGMT 495 Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of management concepts learned in classroom. Prerequisite: MGMT 300. Credit/no-credit only. Offered: AWSpS.

MGMT 499 Undergraduate Research (1-6, max. 9) Independent research in selected areas of human resource management, organizational behavior, and business strategy under faculty supervision. Prerequisite: MGMT 300; MGMT 320.

MGMT 500 Management and Leadership (4) Behavioral aspects of management with emphasis on leadership, motivation, and decision making. May include communication, conflict management, group dynamics, and organizational change.

MGMT 501 Leading Teams and Organizations (4) Offers a practical framework and empirically validated models and methods that can be used in innovative ways to enhance human capital and its impact, including of course your own capital. Offered: A.

MGMT 502 Business Strategy (4) Policy decisions and strategic leadership from the general management point of view. Determination of corporate product-service objectives, development of a network of internal operating policies and methods to achieve objectives at a cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

MGMT 504 Ethical Leadership (2/4) Examines the ethical aspects of conducting business. Topics include ethical decision-making, the ethical aspects of leadership and culture, stakeholder management, corporate social responsibility, sustainability, and corporate governance. Prerequisite: first-year MBA required courses.

MGMT 509 Global Strategy (2) Develops a broad overview of many of the issues that global managers
MGMT 510 Developing Leadership Skills (0-2, max. 2) Assessment, instruction, and coaching to develop leadership abilities. Emphasizes team building and collaboration, written, oral, and interpersonal communication, and applied leadership activities.

MGMT 511 Leadership and Coaching Practicum (2, max. 4) Gives Leadership Fellows a venue to analyze and assess their coaching activities with first-year MBA student teams, receive feedback from the instructor and their fellow coaches, discuss readings on leadership, coaching, collaboration, and communication, and hear guest speakers on related topics. Credit/no-credit only.

MGMT 520 Designing a Corporate Strategy (4) Addresses the broad question: what business(es) should we compete in? Focuses on decisions related to an appropriate level of diversification and the means by which that diversification is implemented. Includes the following issues: mergers and acquisitions, strategic alliances, joint ventures, LBOs, and spin-offs.

MGMT 521 Strategic Management of Technology and Innovation (4) Examines how innovative firms often experience rapid and disruptive levels of growth and change and how without effective management of new technologies, the boom can quickly turn to bust. Investigates the micro-economic drivers of competition in technology industries, explores how technological change affects competition, and examines the implications for competitive strategy.

MGMT 522 Innovation Strategy (4) Explores how firms tap into external sources of innovation, focusing on user communities, universities, and entrepreneurial ventures. Demonstrates how open, collaborative, community-based models of innovation create successful business options. Offered: jointly with ENTRE 522.

MGMT 530 Global Strategy (2) H Kevin Steensma Provides a broad overview of many of the issues that managers face including globalization trends, government-multinational firm relations, country risk, entry modes, cross-border collaborative challenges, and various strategies and organizational structures. Offered: W.

MGMT 531 Leading Organizational Change (2) Hybrid MBA Program elective course that focuses on how to lead effective organizational change.

MGMT 533 Dynamics of Negotiations (2) Introduces various theories and processes of negotiation. Discusses research-based negotiation principles from the fields of psychology, social psychology, sociology, industrial-organizational psychology, and organizational behavior. Helps develop the necessary skills to discover optional solutions to problems faced in negotiations and the best means to implement those solutions.

MGMT 540 Competitive Strategy (4) Develops a T-shaped strategic mindset through development of analytical and diagnostic skills, based on mastery of frameworks and analogical thinking skills that can be applied across a wide set of industry domains.

MGMT 545 Leading and Managing High-Performance Organizations (4) Focuses on the nature and function of effective leadership in high-performance systems. Includes visionary and transformational leadership, decision-making and empowerment, power and influence in organizations desiring flexibility and innovation, and leading organizational change. Places emphasis on leadership of emerging forms of organization such as learning organizations, virtual organizations, and networks.

MGMT 546 High Involvement Employees (4) Focuses on two domains: (1) how managers can lead and motivate their people; and (2) how actual organizations, particularly high technology and entrepreneurial firms, employ these strategies. Specific topics include commitment, involvement, enthusiasm, effort, participation, citizenship, and performance. Student teams investigate how local companies utilize these ideas.

MGMT 547 Successful Negotiations (2) Focuses on a broad array of conflict resolution skills needed for effective management in a constantly changing business environment. Examines methods of conflict
resolution - bargaining, distributive and integrative negotiation, mediation, and arbitration. Applies these tools to managerial challenges such as employment contracts, buyer-seller agreements, and mediated and arbitrated agreements.

MGMT 548 Dealmaking in High Velocity Ventures (2) Focuses on negotiations in ventures that lack conventional customers, suppliers, employees, joint-venture partners, strategic allies, and money. Analyzes negotiations with early potential customers and essential suppliers, sources of funding (e.g., "angels" and venture capitalists), critical partners and/or strategic allies (including established firms), and key employees.

MGMT 549 Dealmaking in the Global Arena (2) For students who expect to engage in significant international business negotiations. Includes deal-structuring skills needed in a range of cross-border transactions and relationships. Individual segments develop broad analytical themes, cross-cultural dimensions, and distinctive national approaches to corporate governance and their impact on negotiating strategy. Prerequisite: MGMT 547.

MGMT 550 CEO and Board Governance (4) Prepares students both to be effective board members and to work productively with board members as executives. Focuses on board effectiveness in creating value in oversight and strategic leadership within organizations regardless of size and form of business.

MGMT 555 Nonprofit Board Fellows Leadership Seminar ([1-2]-, max. 4) Assists students participating in the Board Fellows Program to maximize their service to their assigned organizations by examining the fundamental responsibilities of board members and the challenges faced by board members; ways boards shape the organization's strategic direction; ways board members can strengthen their organizations' financial management and stability; and the strengths and limitations of various board governance structures.

MGMT 579 Special Topics in Management (2/4, max. 12) In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management, organizational behavior, and strategic management. Offered on an ad hoc basis. Content announced before scheduled offering.

MGMT 580 Psychological Foundations of Organizational Behavior (4) Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

MGMT 581 Social Processes in Organizations (4) Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

MGMT 582 Contemporary Organizational Behavior Research (4) Facilitates understanding of empirical foundations of theory development and testing in contemporary organizational behavior research. Focuses on assessing ways in which the empirical tradition has evolved in organizational behavior with special attention paid to emerging research areas and research methodologies.

MGMT 583 Special Topics in Organizational Behavior Research I (4) Focuses on the psychological, social psychological, and sociological factors that shape organizations and their members. Covers concepts such as cognition, emotions, identity, communication, group dynamics, team development, organizational culture, global culture, behavioral ethics, etc.

MGMT 584 Special Topics in Organizational Behavior Research II (4) Focuses on the psychological, social psychological, and sociological factors that shape organizations and their members. Covers concepts such as cognition, emotions, identity, communication, group dynamics, team development, organizational culture, global culture, behavioral ethics, etc. in more depth.

MGMT 590 Economic Foundations of Strategic Management (4) Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource
dependence, population ecology, and neo-Austrian economics.

MGMT 591 Sociological Foundations of Strategic Management (4) Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

MGMT 592 Contemporary Strategic Management Research (4) Facilitates understanding of empirical foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

MGMT 593 Special Topics in Strategic Management I (4)

MGMT 594 Special Topics in Strategic Management II (4) Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, governmental regulation, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

MGMT 599 Doctoral Seminar in Management (1, max. 12) Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

MGMT 600 Independent Study or Research (*)

MARKETING

MKTG 301 Marketing Concepts (4) Tools, factors, and concepts used by management in planning, establishing policies, and solving marketing problems. Marketing concepts, consumer demand and behavior, location analysis, marketing, functions, institutions, channels, prices, and public policy. Prerequisite: ECON 200.

MKTG 335 Principles of Selling (4) Focuses on selling from salesperson's perspective, role of persuasion in professional selling and other organizational settings. In addition to coursework in such areas as consumer behavior, negotiation, and communication, students practice sales skills in role plays, presentations, and other exercises requiring practical application of selling theory. Prerequisite: MKTG 301.

MKTG 370 Retailing (4) Profit planning and business control; buying, stock control, pricing, promotion; store location, layout, organization, policies, systems; coordination of store activities. Prerequisite: MKTG 301; may not be repeated.

MKTG 411 Business to Business Marketing (4) Covers the integrated marketing approach that enables a supplier firm to understand, create, and deliver value to other businesses, governments, and institutional customers. Case-based and project-oriented approach to studying marketing management in the business-to-business market that brings the fundamental concepts to life with practical example. Prerequisite: MKTG 301. Instructors: Caldieraro

MKTG 415 Pricing Strategy and Value Management (4) Examines theoretical and applied perspectives in pricing strategy and tactics. Explores how firms optimally create, communicate, and capture value to achieve organizational objectives. Provides students with a rigorous foundation for pricing decisions and profitable customer solutions. Prerequisite: MKTG 301.

MKTG 430 Sales Force Management (4) Focuses on the role of the sales manager within the organization. Includes distribution planning, sales
organization, management of the sales force, methods of sales, cost and financial analysis, and performance analysis. Prerequisite: MKTG 301; may not be repeated.

**MKTG 445 Multicultural Marketing and Business Development (4) DIV** Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301. Offered: jointly with MGMT 445.

**MKTG 450 Consumer Behavior (4)** Theory and practice pertinent to marketing decisions; utilization of theories from behavioral sciences in marking research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; may not be repeated.

**MKTG 452 Consumer Marketing and Brand Strategy (4)** Presents a consumer psychology inspired framework for cultivating and maximizing brand equity. Specific emphasis on brand positioning, visual identity design, brand association creation, and brand portfolio management. Greater attention to consumer-facing brands, but B2B brands will also be discussed. Prerequisite: MKTG 301. Instructors: Forehand

**MKTG 454 Strategic Product Management (4)** Focuses on best practices in new product development including customer-centric innovation, market identification, prototype development, value proposition communication, testing tactics and launch strategy. Prerequisite: MKTG 301; may not be repeated.

**MKTG 455 Entrepreneurial Marketing (4)** Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated. Offered: jointly with ENTRE 455.

**MKTG 456 Advertising (4)** Management of the advertising function and its integration with other forms of promotion. Planning the program, determining the most effective approach, evaluation of media and budget, advertising research, advertising institutions, economic and social aspects. Prerequisite: MKTG 301; may not be repeated.

**MKTG 460 Consumer Insights (4)** Examines marketing research process; steps of research design, questionnaire construction, sampling, data analysis, evaluation/presentation of findings, online research, and web surveys. Class project provides practical application. May not be repeated. Prerequisite: MKTG 301; either ECON 311, QMETH 201, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 301, or STAT 390.

**MKTG 462 Customer Analytics (4)** Focuses on how to use existing customer data to develop marketing strategies that improve customer response. The featured analytics translate customer data into inferred customer needs that can guide marketing decisions on pricing, advertising, and product recommendations. Prerequisite: MKTG 301.

**MKTG 464 Analytics for Marketing Decisions (4)** Focuses on how firms can use real large scale databases and analytics to improve and automate firm-level marketing decisions. Consists of five modules - product design analytics, analytics for large-scale field experiments, advertising analytics, digital analytics, and mobile analytics. Prerequisite: MKTG 301.

**MKTG 466 Digital Marketing Analytics (4)** Amin Sayedi Provides a quantitative analysis of the digital marketing landscape on topics such as online advertising, social media, growth strategies and search engine optimization. Explores data-driven methods to evaluate digital opportunities, marketing strategies, and online business models. Prerequisite: MKTG 301.

**MKTG 470 International Marketing (4)** Focuses on assessing international marketing opportunities, formulating and implementing international marketing strategies. Examines how to use marketing analyses and deductive decision modeling
in assessing international marketing opportunities. Uses marketing tools and concepts in the planning, preparation, and presentation and discussion of cases and class project. Prerequisite: MKTG 301; may not be repeated.

**MKTG 485 Strategic Market Management (4)**
Strategically analyzes important marketing issues by combining basic models of marketing with powerful spreadsheet analysis. Case discussions and projects provide valuable application exercises. Prerequisite: MKTG 301.

**MKTG 490 Special Topics and Issues in Marketing (1-6, max. 12)**
Contemporary topics and issues in marketing: marketing in nonprofit organizations, marketing of services, marketing in the public sector, and marketing in an economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course content reflects contemporary developments and the current interests of instructors and students. Prerequisite: MKTG 301.

**MKTG 495 Marketing Internship (1-4, max. 8)**
An internship with a company, not for profit organization, or government agency in a marketing capacity. Prerequisite: MKTG 301. Credit/no-credit only.

**MKTG 496 Marketing Practicum (4)**
Offers opportunities to apply principles, concepts, and skills learned previously to actual business situations. Participation in class part-time and in an internship with a business employer part-time. Prerequisite: MKTG 301. Instructors: Rhodes

**MKTG 499 Undergraduate Research (1-6, max. 9)**
Prerequisite: MKTG 301.

**MKTG 501 Marketing Management (4)**
Analysis and management of customer satisfaction in goods and services markets by profit and nonprofit organizations. Buyer behavior, market segmentation and product positioning, product policy, pricing, distribution, sales force and advertising management, and market research in the contexts of strategy development, decision making, implementation, and control.

**MKTG 505 Marketing Strategy (4)**
Focuses on the role of analytical marketing tools and competitive dynamics in strategy formation. Accentuates the integrative nature of marketing strategy through development of a strategic marketing plan and use of simulation software. Prerequisite: MBA core marketing.

**MKTG 511 Business-to-Business Marketing (4)**
Integrated approach to product marketing management in the business-to-business marketplace. Analysis of core competencies, competitive environment, positioning and segmentation strategies, cost structure, and customer satisfaction. Case-based and project-oriented approach to studying marketing management in the business-to-business market. Prerequisite: MBA core marketing or permission of instructor.

**MKTG 515 Strategic Pricing and Value Management (4)**
Examines theoretical and applied perspectives in pricing strategy and tactics. Explores how firms optimally create, communicate, and capture value to achieve organizational objectives. Provides students with a rigorous foundation for pricing decisions and profitable customer solutions. Prerequisite: B A 500 or MKTG 501.

**MKTG 518 Strategic Marketing Management (4)**
Dan Turner
Designed to enable students to become better marketing decision makers, i.e., one who can recommend specific marketing actions that have a higher probability of achieving organizational goals by using a decision process that consumes fewer organizational resources. Offered: W.

**MKTG 520 Marketing Channels (4)**
Channels of distribution decisions for goods and services in profit and nonprofit organizations. Considers methods of optimizing the number, quality of institutions and activities employed in dealing with exchange, and space and time aspects of channel management. Relates management of marketing channels to marketing mix, organizational objectives. Prerequisite: MBA core marketing.

**MKTG 530 Managing the Sales System (4)**
Examines the revenue generation function of a firm from a system-wide perspective. Topics include strategic and tactical considerations related to customer acquisition and retention, end-to-end sales and support operations, strategic partnerships, and continuous performance monitoring. Emphasis on
case studies and team projects. Prerequisite: MBA core marketing.

**MKTG 531 Product Management (2)** J. Shulman
Provides framework to be successful in the development and launching of new products. Covers customer-centric innovation, market identification, prototype development, value proposition communication, testing tactics and launch strategy.

**MKTG 550 Managing Customer Relationships through Direct Marketing (4)**
Management of customer relationships through the lens of direct marketing. Topics include direct marketing creative activity, strategy, and execution; media and segmentation; direct marketing budgeting and financials; targeting, database, and predictive modeling; catalogue marketing; relationship marketing; business-to-business complex sales; privacy. Prerequisite: MBA core marketing.

**MKTG 552 Consumer Marketing and Brand Strategy (4)** M. Forehand
Presents a consumer psychology inspired framework for cultivating and maximizing brand equity. Specific emphasis on brand positioning, visual identity design, brand association creation, and brand portfolio management. Greater attention to consumer-facing brands, but B2B brands will also be discussed. Prerequisite: B A 500 or MKTG 501.

**MKTG 554 Strategic Product Management (4)** A. Borah
Focuses on best practices in new product development including customer-centric innovation, market identification, prototype development, value proposition communication, testing tactics and launch strategy. Prerequisite: B A 500 or MKTG 501.

**MKTG 555 Entrepeneurial Marketing (4)**
Examines the skills and tools entrepreneurs need for bootstrap or guerilla early-stage companies. Covers how to target market segments, position products, estimate demand, set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: B A 501, MKGT 501 or equivalent. Offered: jointly with ENTRE 555.

**MKTG 556 Advertising and Promotion Management (4)**
Management of advertising and promotional activities and their integration with other elements of the marketing mix. Topics include: understanding the communication process, analyzing markets, working with suppliers, establishing objectives, determining budgets, selecting media, measuring and evaluating effectiveness, using publicity and promotions. Legal, social, and economic consequences are considered. Prerequisite: MBA core marketing.

**MKTG 560 Consumer Insights (4)** Ann Schlosser
Methods and applications of marketing research to solve marketing problems. Deals with: problem definition, research design, questionnaire construction, sampling, and data analysis using SPSS. Introduces promising new developments in online research, web surveys, and data analysis. Class research project provides practical application. Prerequisite: MBA core marketing.

**MKTG 562 Customer Analytics (4)** O. Rutz
Focuses on how to use existing customer data to develop marketing strategies that improve customer response. The featured analytics translate customer data into inferred customer needs that can guide marketing decisions on pricing, advertising, and product recommendations. Prerequisite: B A 500 or MKTG 501.

**MKTG 564 Analytics for Marketing Decisions (4)** H. Yoganarasimhan
Focuses on how firms can use real large scale databases and analytics to improve and automate firm-level marketing decisions. Consists of four key modules - Product design analytics, Pricing analytics, Promotion and advertising analytics, Placement analytics (with focus on digital and mobile channels). Prerequisite: B A 500 or MKTG 501.

**MKTG 566 Digital Marketing Analytics (4)** Amin Sayedi, Scott A. Fasser
Provides a quantitative analytics of the digital marketing landscape on topics such as online advertising, social media, growth strategies and search engine optimization. Explores data-driven methods to evaluate digital opportunities, marketing strategies, and online business models. Prerequisite: B A 500 or MKTG 501.

**MKTG 570 International Marketing (4)**
Analysis of the marketing strategies and tactics of multinational corporations. Choice of entry strategies for foreign markets, analyzing international competition at home and abroad, and developing global marketing strategies. Prerequisite: MBA core marketing.
MKTG 575 Marketing High-Technology Products (4) Management of the marketing requirements of high-technology products. Examines how markets for high-tech products involve shortened product life cycles, demand for continual product updates, perceived risk of adoption by customers, requirements for intensive customer service and relationships, and growing reliance on business partners. Prerequisite: MBA core marketing.

MKTG 579 Special Topics in Marketing (2/4, max. 12) Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: MBA core marketing.

MKTG 581 Doctoral Seminar in Consumer Behavior (4) Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4) Survey of methods useful for empirical evaluation of multivariate marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis; cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

MKTG 583 Doctoral Seminar in Marketing Strategy (4) Study of factors influencing business performance and role of marketing in achieving competitive advantage. Analysis of prevailing, and emerging, theories underlying strategic thinking and competitive process. Examination of empirical research regarding measurement, level, and persistence of business success and implications of findings for theory and strategy development. Prerequisite: BA RM 580.

MKTG 584 Doctoral Seminar in Research Issues in Marketing (2/4, max. 12) Examination of research problems and issues in marketing. Specific topics vary depending on the interest of faculty and students.

MKTG 591 Doctoral Seminar in Consumer Behavior Research Topics (4) Investigates research topics of current interest in consumer behavior. Considers the processes used by consumers to acquire and evaluate marketing information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets, and examines ways the principles in social perception influence consumers’ individual responses to marketing-related activities.

MKTG 593 Doctoral Seminar in Marketing Models (4) Focuses on modeling research efforts in various areas of marketing. Discussion of mathematical and statistical modeling approaches which contribute to scientific development in the marketing area and ways in which modeling is used to characterize and summarize the nature of general marketing situations in complex environments.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12) Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research (*) OPERATIONS MANAGEMENT

OPMGT 301 Principles of Operations Management (4) Examines problems encountered in planning, operating, and controlling production of goods and services. Topics include: waiting-line management, quality assurance, production systems, project management, and inventory management. Computer and quantitative models used in formulating managerial problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH125, MATH 134, or Q SCI 291; either ECON 311, IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 301, STAT 221/SOC 221/CS&SS 221, STAT 311, or STAT 390.

OPMGT 402 Introduction to Logistics (4) Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes
study of real companies' logistics problems. 
Prerequisite: OPMGT 301.

**OPMGT 443 Inventory and Supply Chain Management (4)** Examines modeling and analysis of global supply chains in order to improve service and decrease cost. Covers tools and methods for managing inventory of items with different demand and supply characteristics. Topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, Materials Requirements Planning; and supplier management. Prerequisite: OPMGT 301.

**OPMGT 450 Introduction to Project Management (4)** Focuses on management principles, methods, and tools to effectively plan and implement complex projects. Includes project selection, preparation, planning, and monitoring. Covers classical techniques and new methodologies; spreadsheet-based tools; and probabilistic project simulation from strategic, tactical, and operational perspectives. Prerequisite: OPMGT 301.

**OPMGT 490 Special Topics in Operations Management (1-6, max. 12)** Operations management topics of current concern to faculty and students. Potential topics: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

**OPMGT 495 Operations Management Internship (1-4, max. 8)** Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of analysis techniques and management concepts learned in classroom. Prerequisite: OPMGT 301. Credit/no-credit only.

**OPMGT 499 Undergraduate Research (1-6, max. 9)**

**OPMGT 502 Introduction to Operations Management (3)** Managerial decision making in operations problems, including application of quantitative analysis and use of computers. Production of goods or services in any type of organization. Inventory management, scheduling, facility location, management of service systems, and quality assurance. Prerequisite: QMETH 500.

**OPMGT 520 Operations Management (4) H. Mamani** In this course, important concepts and the state of the art analytical techniques essential for managing the operations of any organization, especially hi-tech companies, are covered. In particular, topics such as process management, capacity and waiting lines management and inventory and supply chain management are introduced. Offered: Sp.

**OPMGT 550 Project Management (4)** Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

**OPMGT 560 Supply Chain Management (4)** This course focuses on efficient integration of suppliers, factories, warehouses and stores so that merchandise is produced and distributed in the right quantities, to the right locations and at the right time. The course objectives are to develop modeling skills and provide concepts applicable to the design, planning of supply chains. Offered: W.

**OPMGT 565 Business Analytics-Tools for Big Data (2/4)** Hamed Mamani, Michael R Wagner Introduces data analytic techniques via quantitative tools and sophisticated software (R and Tableau). These techniques are drawn from machine learning, data mining, and optimization. Note that this is not a technical or theoretical course. Offered: ASp.

**OPMGT 570 Operations Strategy (4)** Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, products, processes, and customer services. Facilities, capacity, process/work-force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

**OPMGT 579 Special Topics in Operations Management (2/4, max. 12)** Major topics in operations management and systems analysis. Emphasis on research and, where appropriate,
application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: BA 502, OPGMT 502, or equivalent.

OPMGT 581 Advanced Research Topics in Operations Management I (4) Overview of research problems and techniques in operations management. Focuses on emerging and ongoing research relating to current issues in the field, including readings and discussions of literature dealing with subjects of special interest to participants. Prerequisite: doctoral student or permission of instructor. Instructors: Wagner Offered: A.

OPMGT 582 Advanced Research Topics in Operations Management II (4) Overview of research problems and techniques in operations management. Focuses on emerging and ongoing research (beyond those discussed in OPGMT 581) relating to current issues in the field, including readings and discussions of literature dealing with subjects of special interest to participants. Prerequisite: doctoral student or permission of instructor. Instructors: Moinzadeh Offered: W.

OPMGT 583 Advanced Research Topics in Operations Management III (4) Examine interdisciplinary research in operations and supply chain management. Focuses on one specific application area of interest each quarter including: healthcare, sustainability, marketing, game theory, economics, etc. Prerequisite: doctoral student or permission of instructor. Instructors: Mamani Offered: Sp.

OPMGT 584 Fundamentals of Operations Management Research (4) Surveys basic areas that form the foundations for much of the research in operations management today. Topic areas include facility location, scheduling, project management, and supply chain management. Prerequisite: QMETH 580. Instructors: Klastorin Offered: W.

OPMGT 587 Advanced Topics in Inventory Management (4) Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 592 and course in probability theory and in stochastic processes.

OPMGT 590 Stochastic Models for Research in Business Management (4) F. IRAVANI Covers the foundation and applications of stochastic models used in business and management research. Prerequisite: doctoral student or permission of instructor. Offered: A.

OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12) Study and research in advanced topics of operations management. Concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

OPMGT 600 Independent Study or Research (*-)

QUANTITATIVE METHODS

QMETH 201 Introduction to Statistical Methods (4) NW, QSR Survey of principles of data analysis and their applications for management problems. Elementary techniques of classification, summarization, and visual display of data. Applications of probability models for inference and decision making are illustrated through examples. Prerequisite: either MATH 112, MATH 124, MATH 125, MATH 134, or MATH 145.

QMETH 450 Spreadsheet Models for Managerial Decision Making (4) Formulation and solution of business problems using operations research techniques in a spreadsheet environment. Techniques of linear and integer programming, decision analysis, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisite: IS 300.

QMETH 490 Special Problems in Quantitative Analysis (1-6, max. 12) Specialized quantitative techniques useful for solving business problems. Topics from operation research, statistics, computer methods. Emphasis on application. Prerequisite: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

QMETH 499 Undergraduate Research (1-6, max. 9) Research in selected problems in business statistics,
operations research, decision theory, and computer applications.

QMETH 500 Statistical Data Analysis for Management (4) Statistical models, techniques, and tools for aiding management decisions. Use of spreadsheets in basic business problems. Probability distributions, random sampling and standard errors, hypothesis testing, multiple regression, ANOVA, chi-square tests. Prerequisite: preparation in elementary calculus and successful completion of University-administered proficiency exam.

QMETH 501 Decision Support Models (2) Introduction to computer-based modeling techniques for management decision making. Linear programming, decision analysis, and simulation. Formulation and interpretation. Prerequisite: QMETH 500, B A 500, or equivalent.

QMETH 503 Practical Methods for Data Analysis (4) Basic exploratory data analysis with business examples. Data summaries, multivariate data, time series, multiway tables. Techniques include graphical display, transformation, outlier identification, cluster analysis, smoothing, regression, robustness. Departmental credit allowed for only one of 403 and 503. Prerequisite: B A 500 or QMETH 500 or equivalent or permission of instructor. Offered: jointly with STAT 503.

QMETH 505 Decision Modeling (2) I. Sirichakwal Introduces students to the concepts and methods of management science, which applies to mathematical modeling and analysis to management problems. Offered: Sp.

QMETH 510 Data Analysis (2) Covers statistics and probability relevant to the collection, analysis, and interpretation of data, and deals with uncertainty in the decision-making process. Offered: A.

QMETH 520 Managerial Applications of Regression Models (4) Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: QMETH 500 or B A 500.

QMETH 528 Survey Sampling Applications (4) Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: QMETH 500 or B A 500 or equivalent or permission of instructor.

QMETH 530 Forecasting Models in Business (4) Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting illustrations using real data. Prerequisite: QMETH 500 or B A 500.

QMETH 551 Modeling with Spreadsheets (4) Advanced formulation and modeling of business problems in a spreadsheet environment. Techniques of linear, integer, and nonlinear programming, multi-objective goal programming, and simulation. Applications from finance, marketing, and operations. Prerequisite: B A 502 or QMETH 501 or equivalent.

QMETH 579 Special Topics in Quantitative Methods (2-4, max. 12) Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and the application of statistical techniques.

QMETH 580 Mathematical Programming (4) Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisite: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 592 Stochastic Models: Queuing and Simulation (4) Application of stochastic processes to business problems. Focuses on development and application of queuing theory and discrete event
simulation. Prerequisite: OPMGT 590 or permission of instructor.

QMETH 599 Doctoral Seminar in Operations Research (1, max. 12) Study and research in advanced topics of operations research. Concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status. Credit/no-credit only.

QMETH 600 Independent Study or Research (*-)

SUPPLY CHAIN MANAGEMENT

SCM 500 Finance and Accounting for Supply Chain Management (3) Covers concepts and tools needed to understand, apply, and explain finance and accounting information for managerial decisions and performance evaluation. Offered: S.

SCM 501 Probability and Statistics (3) Covers statistical tools, techniques, and models for aiding management decisions. Use of spreadsheets in basic business problems. Frequency and probability distributions, random sampling and standard errors, testing hypotheses, ANOVA, multiple regression models, and logistic regression models. Offered: S.

SCM 502 Negotiations for Supply Chain Management (2) Develops negotiation techniques and skills applicable to solving supply chain problems. Offered: S.

SCM 503 Leadership for Supply Chain Managers (2) Assesses and develops written and oral communication, interpersonal and leadership skills needed to succeed in the cross-functional and cross-cultural team environment common in a global supply chain environment. Offered: S.

SCM 504 Building Effective Teams (0.5-2, max. 4) Tools to establish strong, shared commitment to a compelling team purpose; bring about collective buy-in to concrete performance objectives; promote team-member adherence to a set of suitable work rules and roles; and foster interpersonal trust and respect crucial to mutual team-member support and extraordinary team performance. Credit/no-credit only. Offered: AWSpS.

SCM 510 Marketing Strategy and Channel Management (3) Covers analysis and decision-making in management of exchange processes with customers. Analysis of market forces and choice of marketing strategy, objectives, and marketing mix variables. Offered: A.

SCM 511 Strategic Sourcing and Procurement (2) Discusses strategic sourcing and procurement in supply chains. Covers topics such as total cost of ownership, outsourcing, E-Sourcing/auctions, spend analytics, supply contracts and supplier scorecard. Offered: A.

SCM 512 Spreadsheet Modeling for Business Enterprise (2) M. HILLIER Introduces formulation and modeling of business problems in a spreadsheet environment. Includes linear programming, integer programming, sensitivity analysis, decision analysis, and Monte Carlo simulation. Prerequisite: SCM 501 or equivalent. Offered: A.

SCM 513 Operations Management and Process Analysis (2) Introduces operations management, which focuses on efficient operations and on time delivery of goods and services. Covers topics such as process management and analysis, process flow charting, bottleneck identification, flow balancing, push vs. pull systems, theory of constraints, queue psychology and queue layout and queue analysis. Prerequisite: SCM 501. Offered: A.

SCM 520 Forecasting, Inventory Management, and Supply Chain Analytics (3) Introduces forecasting methods, deterministic and stochastic inventory models, lot-sizing and MRP, JIT, design for logistics, bull-whip effect and other contemporary topics in supply chain. Prerequisite: SCM 511; SFM 512; SCM 513. Offered: W.

SCM 521 Managing Supply Chain Projects (3) Examines the management of complex projects. Specific topics include project teams, project selection, scheduling and budgeting, risk management, and monitoring and control. Also discusses PM software products, and relationships between these products and the requirements of managing risky projects in today's economic environment. Offered: W.

SCM 522 Lean Management, Total Quality, and Six Sigma (2) Describes the basic principles, tools, and
methods of Lean and Six Sigma. Discusses their implementation in variety of settings and shows how to apply them in real supply chains. Topics include seven wastes, value stream mapping, DMAIC, and reengineering. Offered: W.

SCM 523 Competitive Strategy (2) Develops student's ability to think as practicing executives; and provides practice in analyzing, evaluating, and modifying organizations' strategies in light of changing macro-economic conditions. Emphasizes highlighting the interplay between competitive strategy and supply chain management concepts. Offered: W.

SCM 530 Managing and Mining Big Data (3) Explores issues related to managing and mining business big data. Topics include data storage, visualization, clustering analysis, supervised learning techniques, text and web mining, and mining networked data. Real-world applications in supply chain management. Offered: Sp.

SCM 531 Enterprise Systems and Integration (2) Provides an overall understanding of the complex role of information systems in transforming organizational processes and integrating them as part of an enterprise system. Topics include the concept of process-enabling information technologies and enterprise resource planning systems that support chain management processes. Offered: Sp.

SCM 532 Global Supply Chain Logistics (3) Examines the designing and managing complex global supply chains. Specific topics include global SC design, logistics and sourcing, supply chain inventory models, postponement, supply integration, and contracts. Discusses the interrelation between supply chain management and product design. Offered: Sp.

SCM 533 Special Topics in Supply Chain Management (1-3, max. 6) Reviews current topics and emerging trends in supply chain management. Offered: Sp.

SCM 599 Supply Chain Leaders Series and Practicum (1-2, max. 5) Provides the capstone learning experience. Includes seminars given by supply chain leaders, a final quarter student report and student presentations. Provides students the opportunity to complement their in-class learning experience with related practical experience by working on a project. Credit/no-credit only. Offered: AWSpS.
SCHOOL OF DENTISTRY

DENTAL CLERKSHIP

DENTCL 603 Patient Advocacy - Third Year (1-, max. 3) Teaches third year dental students the practice of comprehensive patient care. Students required to monitor the care of 30 to 50 patients and make recommendations with regard to treatment sequence and recall strategies. Offered: AWSpS.

DENTCL 605 Foundations of Interprofessional Education ([0/1]-) IPE prepares students to collaborate with other health professions in interprofessional patient care practice (IPP), to improve patient care and health outcomes. Students will experience co-learning, working in teams with faculty and students from other health professions, to understand the roles of members of the healthcare team, and have clinical experiences that involve working with other healthcare professional students and practitioners. Credit/no-credit only. Offered: AWSp.

DENTCL 607 Ethics and Jurisprudence ([0-1]-, max. 1) The ADA Ethical Code and state laws governing the practice of dentistry. Students evaluate both ethical dilemmas systematically through online didactic and small group learning and the ethical and legal aspects of case-based scenarios and real-life examples. Offered: AWSpS.

DENTCL 609 Practice Management 3 ([0-1]-, max. 1) Application of business and leadership concepts, regulatory requirements, and information technologies for dentistry. Involves working with staff as leader of a dental practice and assessing financial aspects of dental practitioners. Provides 'hands on' experience. Includes interactive class sessions concurrent with patient care experiences. Credit/no-credit only. Offered: ASp.

DENTCL 631 Prosthodontics Clerkship 1 (2) Builds on preclinical training. Enables student dentists to understand the prosthodontic needs of patients and design and deliver prosthodontic treatment. Offered: S.

DENTCL 632 Periodontics Clerkship 1 (2) Treating patients, including diagnosis, treatment planning, and periodontal therapy of minimal-moderate difficulty level. Determination of when to refer to a periodontal specialist. Offered: S.

DENTCL 633 Endodontics Clerkship (8) Prepares dental students to provide endodontic therapy within the scope of general dentistry. In the seminar component, students expand their didactic knowledge in preparation for clinical experiences. In the clinical component, student treat patients, including diagnosis, treatment planning, and endodontic therapy of minimal-moderate difficulty level. Offered: AWSpS.

DENTCL 634 Operative Dentistry Clerkship 1 (2) Diagnosing and treating conditions of human dentition, with emphasis on preventive therapies for caries, using patient assessment and treatment planning to ensure preventive and restorative procedures are appropriate for a patient’s comprehensive care. Offered: S.

DENTCL 635 Oral Diagnosis and Treatment Planning Clerkship 1 (2) Patient examination and development of comprehensive, multi-disciplinary, person-centered treatment plans, considering patients' desires, expectations, and financial limitations. Offered: S.

DENTCL 636 Oral Medicine Clerkship 1 (2) Provides clinical experience and develops competency in the diagnosis and management of acute and chronic orofacial pain, diseases of the oral mucosa, salivary dysfunction, oral manifestations of systemic diseases, dental management of patients with developmental or other disabilities, and taking interpretation of radiographs. Offered: S.

DENTCL 637 Oral and Maxillofacial Surgery Clerkship (8) Introduces students to the specialty of oral and maxillofacial surgery. An equally important goal is to supply students with the knowledge base and clinical skills necessary to practice general dentistry in our communities. Offered: AWSpS.

DENTCL 638 Pediatric Dentistry and Orthodontic Clerkship (8) Didactic and clinical educational experiences in comprehensive care of pediatric
dental patients in the areas of prevention, diagnosis, treatment planning, and restorative dentistry. In addition, recognition, analysis and treatment planning of malocclusions as well as introduction to limited tooth movement. Offered: AWSpS.

DENTCL 641 Prosthodontics Clerkship 2 (2) Builds on preclinical training. Enables student dentists to understand the prosthodontic needs of patients and design and deliver prosthodontic treatment. Offered: A.

DENTCL 642 Periodontics Clerkship 2 (2) Treating patients, including diagnosis, treatment planning, and periodontal therapy of minimal-moderate difficulty level. Determination of when to refer to a periodontal specialist. Offered: A.

DENTCL 644 Operative Dentistry Clerkship 2 (2) Diagnosing and treating conditions of human dentition, with emphasis on preventive therapies for caries, using patient assessment and treatment planning to ensure preventive and restorative procedures are appropriate for a patient's comprehensive care. Offered: A.

DENTCL 645 Oral Diagnosis and Treatment Planning Clerkship 2 (2) Patient examination and development of comprehensive, multi-disciplinary, person-centered treatment plans, considering patients' desires, expectations, and financial limitations. Offered: A.

DENTCL 646 Oral Medicine Clerkship 2 (2) Provides clinical experience and develops competency in the diagnosis and management of acute and chronic orofacial pain, diseases of the oral mucosa, salivary dysfunction, oral manifestations of systemic diseases, dental management of patients with developmental or other disabilities, and taking interpretation of radiographs. Offered: A.

DENTCL 651 Prosthodontics Clerkship 3 (2) Builds on preclinical training. Enables student dentists to understand the prosthodontic needs of patients and design and deliver prosthodontic treatment. Offered: W.

DENTCL 652 Periodontics Clerkship 3 (2) Treating patients, including diagnosis, treatment planning, and periodontal therapy of minimal-moderate difficulty level. Determination of when to refer to a periodontal specialist. Offered: W.

DENTCL 654 Operative Dentistry Clerkship 3 (2) Diagnosing and treating conditions of human dentition, with emphasis on preventive therapies for caries, using patient assessment and treatment planning to ensure preventive and restorative procedures are appropriate for a patient's comprehensive care. Offered: W.

DENTCL 655 Oral Diagnosis and Treatment Planning Clerkship 3 (2) Patient examination and development of comprehensive, multi-disciplinary, person-centered treatment plans, considering patients' desires, expectations, and financial limitations. Offered: W.

DENTCL 656 Oral Medicine Clerkship 3 (2) Provides clinical experience and develops competency in the diagnosis and management of acute and chronic orofacial pain, diseases of the oral mucosa, salivary dysfunction, oral manifestations of systemic diseases, dental management of patients with developmental or other disabilities, and taking interpretation of radiographs. Offered: W.

DENTCL 661 Prosthodontics Clerkship 4 (2) Builds on preclinical training. Enables student dentists to understand the prosthodontic needs of patients and design and deliver prosthodontic treatment. Offered: Sp.

DENTCL 662 Periodontics Clerkship 4 (2) Treating patients, including diagnosis, treatment planning, and periodontal therapy of minimal-moderate difficulty level. Determination of when to refer to a periodontal specialist. Offered: Sp.

DENTCL 664 Operative Dentistry Clerkship 4 (2) Diagnosing and treating conditions of human dentition, with emphasis on preventive therapies for caries, using patient assessment and treatment planning to ensure preventive and restorative procedures are appropriate for a patient's comprehensive care. Offered: Sp.

DENTCL 665 Oral Diagnosis and Treatment Planning Clerkship 4 (2) Patient examination and development of comprehensive, multi-disciplinary, person-centered treatment plans, considering
patients' desires, expectations, and financial limitations. Offered: Sp.

DENTCL 666 Oral Medicine Clerkship 4 (2) Provides clinical experience and develops competency in the diagnosis and management of acute and chronic orofacial pain, diseases of the oral mucosa, salivary dysfunction, oral manifestations of systemic diseases, dental management of patients with developmental or other disabilities, and taking interpretation of radiographs. Offered: Sp.

DENTAL ELECTIVE

DENTEL 510 Careers in Dentistry (1) Provides students with knowledge in a wide array of topics relating to a successful career in dentistry. Seminars featuring experienced dentists and experts from different fields will inform students regarding the business side of dentistry and will serve as resources as students face challenges in the dental field. Credit/no-credit only. Offered: AWSp.

DENTEL 512 Ethics Journal Club (1) This course will expose students to the impact of recent developments in biomedical research, which they discuss in an interactive journal club atmosphere. It is open to 1st, 2nd, 3rd, 4th year Predoctoral students and Graduate students in the UW School of Dentistry. Credit/no-credit only. Offered: AWSp.

DENTEL 513 Ethics Publication Review (1) Students will develop, write, and submit a peer reviewed journal submission. Prerequisite: DENTEL 512 Ethics Journal Club or Advance Permission of the Course Director Credit/no-credit only. Offered: AWSp.

DENTEL 520 Global Oral Health (1, max. 6) Provides an overview of global health inequalities and the burden of oral disease worldwide. Students will be introduced to international health care systems and the social, political, cultural, behavioral and economic factors influencing them. The course will use case studies with interactive student participation to analyze the impact of oral health on the public health system at a country level. Credit/no-credit only. Offered: WSp.

DENTEL 530 Research Methods Seminar (1) Provides terminology and concepts related to different aspects of dental research. Credit/no-credit only. Offered: Sp.

DENTEL 602 Advanced Dentistry in Interprofessional Practice (1) Dental students deepen their understanding of the roles of members of the healthcare team, by communicating and collaborating with other healthcare professional students and practitioners in the provision of patient care and education. Credit/no-credit only. Offered: WSp.

DENTAL FOUNDATIONS

DENTFN 500 Early Clinical Immersion (3) Provides introduction to clinical dentistry and each of the predoctoral curriculum threads. Students participate in classroom lectures with multidisciplinary faculty. Also includes small group activities, large group activities and offsite experiences. Credit/no-credit only. Offered: S.

DENTFN 501 Head and Neck Anatomy for Dental Students (3) An overview of Head and Neck Anatomy geared toward dental students. Through lectures and hands-on dissection, students learn the gross anatomical structures of the oro-facial complex and their interrelationship the organization of the nervous system, (vasculature, lymphatics etc.), of the rest of the body. Credit/no-credit only. Offered: S.

DENTFN 510 Molecular and Cellular Basis of Disease - Foundations (6) Teaches the principles of cell and molecular biology, physiology, biochemistry and genetics. Aspects include the organization of the genome, properties of macromolecules, and cytoarchitecture. Students gain an understanding of intracellular communication, cell-cell interactions, properties of differentiated cells, and the diversity of their physiological properties and functions. Offered: A.

DENTFN 511 Invaders and Defenders - Foundations (5) Covers and integrates the immune system, microbial biology, infectious diseases (including treatment), inflammation and repair, and skin and connective tissue. Topics include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, the basis of immunologic diagnostics. Offered: A.
DENTFN 512 Foundations of Dental Medicine (2)
Familiarizes students with the elements of patient interviewing, including developing a problem-focused, medical, social, and dental history. Covers how to physically assess the dental patient. Teaches how to apply principles of cultural competence and ethics throughout this process. Offered: A.

DENTFN 513 Oral Microbiology (2)
Applies basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Covers principles of clinical asepsis and diagnosis of caries and periodontal diseases. Offered: A.

DENTFN 520 Cardiac, Pulmonary, and Renal Diseases - Foundations (8)
Covers the structure, function, and diseases of the cardiac, pulmonary, and renal systems, with special emphasis on the management of these diseases in the practice of dental medicine and surgery. Offered: W.

DENTFN 521 Introduction to Dental Public Health (2)
Students analyze a real-world public health case, and develop feasible solutions. Each small group present their solutions at the end of the course. Credit/no-credit only. Offered: W.

DENTFN 522 Foundations of Dental Medicine (2)
Students increase expertise with patient interviewing and developing a problem-focused medical, social, and dental history. Improves student skills in physical assessment, including diagnostic tests. Covers how to develop a differential diagnosis. Students learn and apply principles of cultural competence and ethics throughout this process. Offered: W.

DENTFN 523 Oral Histology and Embryology I (3)
Examines the development of orofacial and neck structures; tooth/pulp histology, development, eruption and exfoliation; innervation of teeth and oral structures; craniofacial and dental anomalies; cranioskeletal development; temporomandibular joint; masticatory muscle structure/function; oral mucosa and epithelial differentiation; periodontium and epithelial attachment; specialized mucosa; gustation; and salivary gland structure and physiology. Offered: W.

DENTFN 530 Blood and Cancer - Foundations (3)
Provides an overview of hematology and oncology. Students learn the biology of bone marrow and blood, with an introduction to the field of cancer medicine. Specific cancer subtypes are discussed, providing illustrative examples of the impact of molecular biology and environmental risk factors in the development/treatment of malignancy. Offered: Sp.

DENTFN 531 Energetics and Homeostasis - Foundations (5)
Covers energy metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology, and endocrinology. Topics include physiology and pathology of digestion and hepatic function; principles and practice of clinical nutrition; endocrine integration of metabolism; and endocrine pathophysiology. Also covers relevant anatomy, histology, and pharmacology of the endocrine and GI systems. Offered: Sp.

DENTFN 533 Oral Histology and Embryology 2 (3)
Examines the development of orofacial and neck structures; tooth/pulp histology, development, eruption and exfoliation; innervation of teeth and oral structures; craniofacial and dental anomalies; cranioskeletal development; temporomandibular joint; masticatory muscle structure/function; oral mucosa and epithelial differentiation; periodontium and epithelial attachment; specialized mucosa; gustation; and salivary gland structure and physiology. Offered: Sp.

DENTFN 560 Mind, Brain, and Behavior - Foundations (7)
Covers the macro- and microscopic structure and function of the human nervous and musculoskeletal systems in terms of students’ contribution to observable behavior, ranging from reflexes through cognitive and social behavior. Offered: A.

DENTFN 561 Lifecycle - Foundations (4)
Covers the physiology, anatomy/imaging, and pathology of the human lifecycle from conception to death and gives the dental student the necessary medical background to facilitate dental treatment of patients experiencing these diseases and disorders. Offered: A.

DENTFN 562 Foundations of Dental Medicine 3 (2)
Reviews the medical, legal, social, and historical contexts affecting the oral and overall health of
people with disabilities, patients in all stages of life, and patients from diverse backgrounds. Discusses communication techniques, delivery of care, and health promotion for diverse populations. Offered: A.

**DENTAL GENERAL PRACTICE**

**DENTGP 650 Advanced Topics in General Dentistry (3)** Faculty members from multiple departments participate with senior dental students in this course, which includes clinical practice management; ethics and jurisprudence; and coordinated multidisciplinary care; incorporating diagnosis and treatment planning; medical and surgical management; restorative dentistry; prosthodontics; implant dentistry; periodontics; endodontics; and orthodontics. Offered: A.

**DENTGP 652 Comprehensive General Dentistry 1 (7)** Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: S.

**DENTGP 653 Treatments of Patients with Special Needs 1 (2)** K. ESPINOZA Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: A.

**DENTGP 654 Dental Urgent and Emergent Care 1 (2)** Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: S.

**DENTGP 655 Service Learning Rotation (6) P. HOWELL** Students practice clinical dentistry for 4 weeks at a designate rural and/or underserved community health center. The student further develops an understanding of cultural competence by analyzing and reflecting on the social and cultural factors that contribute to the oral health needs of these diverse populations. Offered: AWSpS.

**DENTGP 660 Advanced Topics in General Dentistry 2 (3)** Includes clinical practice management; ethics and jurisprudence; and coordinated multidisciplinary care. Incorporates diagnosis and treatment planning; medical and surgical management; restorative dentistry; prosthodontics; implant dentistry; periodontics; endodontics; and orthodontics. Offered: A.

**DENTGP 662 Comprehensive General Dentistry 2 (7)** Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: A.

**DENTGP 663 Treatments of Patients with Special Needs 2 (2)** K. ESPINOZA Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: A.

**DENTGP 664 Dental Urgent and Emergent Care 2 (2)** Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: A.

**DENTGP 670 Advanced Topics in General Dentistry 3 (3)** Faculty members from multiple departments will participate with senior dental students in this active learning course, which will inch clinical practice management, ethics and jurisprudence, and coordinated multidisciplinary care, incorporating diagnosis and treatment planning, medical and surgical management, restorative dentistry, prosthodontics, implant dentistry, periodontics, endodontics, and orthodontics. Online content emphasized. Offered: W.
DENTGP 672 Comprehensive General Dentistry 3 (7)
Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: W.

DENTGP 673 Treatments of Patients with Special Needs 3 (2)
Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: W.

DENTGP 674 Dental Urgent and Emergent Care 3 (2)
Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: W.

DENTGP 676 RIDE Comprehensive General Dentistry 3 (13)
Students work in a clinical setting, serving a diverse population in rural and/or underserved areas. The RIDE Regional Director and Clinical Site Preceptors (UW affiliate faculty) supervise senior dental students in: practice management, ethics and jurisprudence, evidence-based multidisciplinary care, dx and tx planning, medical & surgical management, restorative, prosthodontic, and implant dentistry, periodontics, endodontics, and orthodontics. Offered: W.

DENTGP 680 Advanced Topics in General Dentistry 4 (3)
Faculty members from multiple departments will participate with senior dental students in this active learning course, which will inch clinical practice management, ethics and jurisprudence, and coordinated multidisciplinary care, incorporating diagnosis and treatment planning, medical and surgical management, restorative dentistry, prosthodontics, implant dentistry, periodontics, endodontics, and orthodontics. Online content emphasized. Offered: Sp.

DENTGP 682 Comprehensive General Dentistry 4 (7)
Immersion in group practice atmosphere that simulates general dental practice. Students will provide comprehensive dental care to patients of all ages and stages of life in the UWSOD general practice clinic and the Center for Pediatric Dentistry. Offered: Sp.

DENTGP 683 Treatments of Patients with Special Needs 4 (2)
Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: Sp.

DENTGP 684 Dental Urgent and Emergent Care 4 (2)
Advanced instruction and clinical practice in the diagnosis and management of patients requiring urgent and emergent dental care as well as patients needing assessment and care in the discipline of oral medicine. Includes clinical rotations in oral maxillofacial radiology and oral medicine specialty clinics. Offered: Sp.

DENTGP 685 4th Year Clinical Competencies (1)
In part 2 of this course, students will demonstrate competency as defined by UWSOD and CODA (Standards 2.9, 2.14, 2.16, 2.17, 2.18, 2.19, 2.20, 2.21, 2.22, 2.23 A through O, and 2.24). Students will also demonstrate global competency to practice dentistry. Offered: Sp.

DENTGP 686 RIDE Comprehensive General Dentistry 4 (-13)
Students work in a clinical setting, serving a diverse population in rural and/or underserved areas. The RIDE Regional Director and Clinical Site Preceptors (UW affiliate faculty) supervise senior dental students in: practice management, ethics and jurisprudence, evidence-based multidisciplinary care, dx and tx planning, medical & surgical management, restorative, prosthodontic, and implant dentistry, periodontics, endodontics, and orthodontics. Offered: Sp.

DENTAL HYGIENE

D HYG 500 Dental Hygiene Program Seminar (1-3, max. 15) Credit/no-credit only.
D HYG 501 Dental Hygiene Capstone I ([2-8]-, max. 8)

D HYG 502 Dental Hygiene Capstone II (-[2-8]-, max. 8)

D HYG 503 Dental Hygiene Capstone III (-[2-8], max. 8)

D HYG 594 Principles of Teaching for Oral Health Professionals (3) Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Prerequisite: graduate program admission.

D HYG 595 Internship (*, max. 12) Clinical and/or didactic teaching experience or program administration. Teaching and administration responsibilities assigned according to student's previous experience, education needs, and interest. Seminar required. Prerequisite: D HYG 494 or D HYG 594 and permission of instructor. Offered: AWSpS.

DENTAL PRE-CLINICAL

DENTPC 510 Dental Anatomy (3) Includes lecture and laboratory content on the morphology and nomenclature of individual teeth of the adult dentition; introduction to tooth histology and function; and the influence of tooth anatomy on clinical dental procedures. Offered: A.

DENTPC 511 Introduction to Periodontics (2) Explores the clinical, histopathologic, and radiographic features of periodontal diseases, principles of preventive periodontics and initial examination of the periodontium. Topics include normal structure, classification and epidemiology of periodontal diseases, etiologic factors, host response, and pathogenic lesions and periodontal disease. Offered: A.

DENTPC 520 Dental Occlusion (3) Topics include: fabrication of master case models; articulator use and function; contacts in MIP and CO, temporomandibular joint function; mandibular excursive movements; mandibular envelopes of movement; and how anatomical determinants influence occlusal function in all anatomical planes. Offered: W.

DENTPC 523 Dental Materials Science 1 (1) Explores basic concepts of dental materials science, specifically the physical, mechanical, chemical and biological properties, as well as clinical applications of the dental materials commonly used in the fabrication and placement of direct and indirect restorations. Offered: W.

DENTPC 530 Introduction to Operative Dentistry (2) Students become familiar with and obtain expertise in applied dental materials, elementary concepts of tooth restoration, understanding of etiology and preventive aspects of caries, understanding of caries management by risk assessment. Student learn and develop the surgical skills for the restoration of one surface pathologic lesions. Offered: Sp.

DENTPC 531 Introduction to Evidence-Based Dentistry (1) Evidence-based dental decision-making considers patient needs and desires, clinician strengths and weaknesses, and up-to-date research evidence. Students learn about why evidence-based patient care is safer and more effective. They learn how to evaluation scientific evidence on oral health, and apply it in clinical decision making. Offered: Sp.

DENTPC 532 Oral and Maxillofacial Radiology Theory 1 (2) This course prepares students for all courses where radiographs are needed for diagnosis, treatment planning or follow-up. Recognizing normal and aberrant anatomy on intraoral and extraoral radiographs will be covered as well as radiation protection. This will prepare the student for part 2 of the Radiology series (DENTPC 552) on radiographic pathology. Offered: Sp.

DENTPC 533 Dental Materials Science 2 (1) Explores basic concepts of dental materials science, specifically the physical, mechanical, chemical and biological properties, as well as clinical applications of the dental materials commonly used in the fabrication and placement of direct and indirect restorations. Offered: Sp.

DENTPC 534 Introduction to Oral Pathology (3) This is the first course in a three-part series designed to introduce students to oral diseases bridging the field of dentistry to medicine. This course covers oral soft tissue diseases, etiology, pathogenesis, clinical signs and symptoms, histology, laboratory findings (when applicable), and prognosis. Offered: Sp.
DENTPC 535 Removable Partial Denture Design (2) Develops proficiency in basic principles of the designs of removable partial dentures. Offered: Sp.

DENTPC 550 Operative Dentistry 2 (5) Students obtain proficiency in applied dental materials, advanced concepts of tooth restoration, understanding of etiology and preventive aspect of caries, understanding of caries management by risk assessment. Students learn and develop the surgical skills for the restoration of multi-surface pathologic lesions. Emphasizes ergonomics and ethics. Offered: S.

DENTPC 551 Immediate Dentures (3) Covers the basic principles of immediate denture and the procedures for the fabrication of an immediate denture. Topics include treatment planning; record maintenance; and laboratory steps for the fabrication of the ICD; surgical procedures; and post insertion care and complications. Offered: S.

DENTPC 552 Oral and Maxillofacial Radiology Theory 2 (1) This course covers dental anomalies and pathology of bone and how they present on radiographs of the head and neck region. The students will be taught how to interpret radiographs and how to formulate a differential diagnosis based on the characteristics of the radiographic appearance. Offered: S.

DENTPC 553 Local Anesthesia (3) Covers the pharmacology, anatomy, techniques and clinical practice of local anesthesia. The safe and effective administration of local anesthesia is integral to general dentistry and most specialties. Offered: Sp.

DENTPC 554 Oral Pathology 1 (2) This course covers common diseases of jaw bones. Each disease will be discussed to include: etiology and pathogenesis, clinical signs and symptoms, histological features, laboratory findings (when applicable), pitfalls in diagnosis and prognosis. Offered: S.

DENTPC 560 Operative Dentistry 3 (3) Students become familiar with very small amalgam and composite class 2 slot restorations and learn the replacement of large cusp fractures, utilizing pins, slots, grooves, potholes, and endo posts for retention. Also teaches Class 2 intracoronal cast restorations and the restoration of teeth with Class 4 lesions. Offered: A.

DENTPC 561 Fixed Prosthodontics I (2) Students gain knowledge in the principles of fixed prosthodontics for the restoration of damaged tooth surfaces with metal and/or aesthetic veneer single tooth restorations as well as become familiar with the material science and use of the various dental materials used in this discipline. Offered: A.

DENTPC 562 Complete Dentures I (3) Deals with the basic principles of conventional complete denture fabrication, as well as the diagnosis and treatment of a completely edentulous patient. Offered: A.

DENTPC 565 Conversations on Dental Practice (1) Provides the specific core content within each of the approximately 30 filaments within the practice management thread. Credit/no-credit only. Offered: AWSp.

DENTPC 570 Operative Dentistry 4 (2) Explores applied dental materials, advanced concepts of tooth restoration, understanding of etiology and preventive aspects of caries, understanding of caries management by risk assessment. Students learn and develop the surgical skills for the restoration of multi-surface pathologic lesions. Offered: W.

DENTPC 571 Fixed Prosthodontics 2 (4) Explores the planning, restoration and replacement of missing teeth with fixed prostheses, planning and designing for the restoration of endodontically treated teeth as well as become familiar with the material science and use of the various dental materials used in this discipline. Offered: W.

DENTPC 572 Complete Dentures 2 (2) Second of two courses dealing with the basic principles of conventional complete denture fabrication, as well as the diagnosis and treatment of a completely edentulous patient. The instructional material will be presented prior to each laboratory session. Affiliate instructors will supervise the laboratory application of the lecture instruction. Offered: W.

DENTPC 573 Orthodontics 1: Growth and Development of the Face and Dentition (2) Explores principles of facial growth, occlusal development, and diagnosis of the different types of malocclusion. The overall goal is for the student to gain knowledge and skills necessary for the analysis and treatment of malocclusion. Offered: W.
DENTPC 574 Oral Pathology 2 (4) Taught in a clinical-pathological conference (CPC) format, with cases directly building on and supplementing the lecture material covered in DENTPC 534 and DENTPC 554. Each class will start with a short lecture/review of the specific topic, followed by an in-depth discussion of ten clinical cases. Students participate in formulating a differential diagnosis, rendering a final diagnosis based on histology, and offering treatment and prognosis. Offered: W.

DENTPC 575 Removable Partial Denture Technique (2) Prepares the pre-doctoral dental students to evaluate, design, prepare, fabricate and provide maintenance for a removable partial denture, when treating partially edentulous patients during their clinical training. Offered: W.

DENTPC 576 Clinical Oral Radiology (2) Intraoral radiographic techniques (periapical, bitewing, occlusal and oblique occlusal radiography). Includes a virtual reality module (QBION) to practice periapical radiography skills. Students perform a quality assessment and a radiographic interpretation report on panoramic radiographs. Offered: W.

DENTPC 577 Periodontics 2: Prevention/Periodontics (2) Introduction to prevention in dentistry. Topics covered include examination of the dentition and periodontium, dental disease indices, scaling and root planning instruments and instrumentation, sharpening, and oral hygiene chemotherapeutics. Students prepare for providing patient care in the next course, DENTPC 587-Periodontics 3. Offered: W.

DENTPC 581 Fixed Prosthodontics 3 (2) Explores indications, materials selection, fabrication of esthetic veneer restorations for fixed prostheses and the science of color application to esthetic restorations. The rationale is learned for resin-bonded ultraconservative fixed prostheses and resin or ceramic veneered prostheses. The student will plan and wax an anterior esthetics case. Offered: Sp.

DENTPC 582 Implant Dentistry (2) Explores the basic science of osseointegration, and be able to manage the restorative phase of the partially and completely edentulous patient. Students will learn to use implant components, computer software for the planning and placement of the implants and to restore a single tooth implant in the laboratory. Offered: Sp.

DENTPC 583 Orthodontics 2 (2) Explores the development of the occlusion, diagnosis of different types of malocclusion, and basic principles of biomechanics during orthodontic treatment. The goal is for the student to be able to analyze malocclusions and make appropriate treatment decisions. Offered: Sp.

DENTPC 584 Introduction to Endodontics (4) This introductory course in Endodontics includes both didactic and laboratory components. The didactic component covers the biology, pathology, diagnosis, and treatment of pulpal and periapical pathosis. The preclinical laboratory component covers endodontic treatment techniques using extracted and artificial teeth. The course prepares students for the third-year Endodontic Clerkship. Offered: Sp.

DENTPC 585 Removable Partial Denture Technique (4) Describes those procedures that a dentist must perform to fabricate a removable partial denture. The projects will prepare the pre-doctoral students to evaluate, design, prepare, fabricate, and provide maintenance for the prosthesis when treating partially edentulous patients during their clinical training. Offered: Sp.

DENTPC 586 Introduction to Pediatric Dentistry (2) Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, space maintenance and traumatic dental injuries in the primary and permanent dentitions. Offered: Sp.

DENTPC 587 Periodontics 3: Prevention/Periodontics II (2) This course is the clinical application of topics covered the prior quarter. Students will see patients for preventive maintenance appointments and will apply knowledge in caries detection and treatment planning, identification of periodontal predisposing factors, dentinal hypersensitivity, and advanced
instrumentation. Students will provide patient care in the weekly clinical sessions. Offered: Sp.

DENTAL PUBLIC HEALTH SCIENCES

DPHS 449 P-Directed Studies in Dental Public Health Sciences (\*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no-credit only. Offered: AWSpS.

DENTAL SELECTIVE

DENTSL 550 Rural/Underserved Opportunities Program Community Rotations (6) Students gain an early clinical patient care experience with oversight from School of Dentistry affiliate faculty at calibrated community health clinics in Washington and Montana. They work with dentists and dental hygienists, along with dental assistants and staff who perform the support functions necessary to operating a dental clinic. Offered: S.

DENTSL 552 Patient Care Experience Selective (6) Exposes students to an early clinical patient care experience working side-by-side with advanced dental students, and along with staff who perform the support functions necessary to operating a dental practice. Credit/no-credit only. Offered: S.

DENTSL 651 Directed Studies in General Dentistry 1 (2) Additional summer quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice for the student who wishes or requires an individualized augmentation to the 4th year curriculum. Offered: S.

DENTSL 655 Peer Mentor Interdisciplinary - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Interdisciplinary courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

DENTSL 661 Directed Studies in General Dentistry 2 (2) Provides additional autumn quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice to the student who wishes or requires an individualized augmentation to the 4th year curriculum. Credit/no-credit only. Offered: A.

DENTSL 662 Advanced Implant Dentistry 2 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: A.

DENTSL 665 Dental Photography - Selective (1) Provides students with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and intraoral views), casts, instruments, x-rays, charts, and objects. Credit/no-credit only. Offered: AS.

DENTSL 671 Directed Studies in General Dentistry 3 (2) Provides additional winter quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice to the student who wishes or requires an individualized augmentation to the 4th year curriculum. Credit/no-credit only. Offered: W.

DENTSL 672 Advanced Implant Dentistry 3 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: W.

DENTSL 681 Directed Studies in General Dentistry 4 (2) Provides additional spring quarter study and/or clinic time, instruction, and/or mentoring in the practice and/or theory of general dental practice for the student who wishes or requires an individualized augmentation to the 4th year curriculum. Offered: Sp.

DENTSL 682 Advanced Implant Dentistry 4 (1) Offers opportunities for predoctoral students to gain additional knowledge to manage more advanced and complex implant cases. Includes treatment planning and managing the surgical and restorative part of the treatment under supervision of faculty from the three departments. Credit/no-credit only. Offered: Sp.
DENTISTRY

DENT 550 P-Special Studies in Dentistry (*, max. 12)
Offered by the various departments from which students may elect study in areas of special interest to them. Includes subject matter applicable to all phases of dentistry. Credit/no-credit only. Offered: AWSpS.

DENT 563 Elements of Conscious Sedation (1-2)
Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no-credit only. Offered: A.

DENT 565 Dental Photography and Imaging (2)
Provides postdoctoral students with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and intraoral views), casts, instruments, x-rays, charts, and objects. Offered: S.

DENT 568 Internal Medicine for Dentistry ([1-3], max. 6)
Review of major organ systems, including normal anatomy and physiology, common pathophysologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no-credit only. Offered: S.

DENT 663 Treatments of Patients with Special Needs 2 (2) K. ESPINOZA
Exposes students to the assessment process and treatment strategies for successful management of patients with developmental and acquired disabilities, medically complex patients, geriatric patients, and anxious, fearful, or phobic patients in a variety of treatment settings, including clinical, hospital, and extramural (nursing home or senior center). Credit/no-credit only. Offered: A.

DENT 690 P-Extended Clinical Dentistry (1)
Educational experiences in clinical dentistry. Available to students who have successfully completed the University of Washington Doctor of Dental Surgery curriculum and seek additional supervised experience in the delivery of oral health care services within three quarters of graduation and prior to licensure. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

DENT 700 Master's Thesis (*-)
Offered: AWSpS.

ENDODONTICS

ENDO 550 P-Directed Studies in Endodontics (*, max. 6)
See DPHS 449 for course description. Credit/no-credit only.

ENDO 560 Advanced Endodontic Diagnosis and Treatment (2)
Current concepts are presented and discussed relating to the diagnosis and treatment of pulpal and periapical pathosis. Criteria for evaluation of success or failure of root canal therapy are presented.

ENDO 561 Anatomical Basis for Clinical Endodontics (2)
Root canal anatomy of significance in clinical endodontics is discussed in a seminar format. Offered: S.

ENDO 562 Anatomical Bases for Surgical Endodontics (2)
Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship between periodontal and pulpal pathosis, including differential diagnosis and appropriate treatment planning.

ENDO 563 Radiographic Interpretation (2)
Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

ENDO 566 Advanced Radiographic Interpretation (2)
Various aspects of radiographic interpretation of particular relevance to endodontics, including malignant lesions, benign tumors, various diseases other than tumors, soft-tissue calcifications, and radiographic technique.

ENDO 568 Endodontic Practice Management (1)
Essential elements for establishing and managing a
successful specialty practice in Endodontics.
Prerequisite: ENDO 562.

ENDO 580 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: S.

ENDO 581 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: A.

ENDO 582 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: W.

ENDO 583 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: Sp.

ENDO 584 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: S.

ENDO 585 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: A.

ENDO 586 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: W.

ENDO 587 Endodontic Seminar (2) Ongoing weekly seminar devoted to review of endodontic and related literature and discussion of research methods. Offered: Sp.

ENDO 590 Treatment Planning Seminar (2, max. 16) Weekly seminar to discuss controversial treatment problems, difficult diagnostic cases, and presentation of endodontic treatment cases. Offered: AWSpS.

ENDO 593 Clinical Practice Teaching (1, max. 3) Closely supervised experience in teaching clinical endodontics to the undergraduate dental student. Offered: SpS.

ENDO 594 Current Endodontic Literature (1) A review and critical evaluation of the current literature relative to endodontics. Credit/no-credit only. Offered: AWSpS.

ENDO 595 Endodontic Surgery (2) Reviews biological and technical aspects of endodontic surgery with emphasis on both the classic and current scientific surgical literature. Lectures and topic seminar discussion along with surgical case presentations.

ENDO 597 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching.

ENDO 598 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching.

ENDO 600 Independent Study or Research (*) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

ENDO 651 Honors Endodontics - Classical Literature Seminar - Selective (3) This course is one quarter within a series of seminars (ENDO 580, 581, 582, 583, 584, 585, 586, and 587) The literature covered in these seminars review endodontic topics at the graduate level for students in the Advanced Program in Endodontics. In Honors Endodontics, fourth year predoctoral students are given the opportunity to join graduate students and participate in these seminars. Offered: AWSpS.

ENDO 655 Peer Mentor Endodontics - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Interdisciplinary courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

ENDO 658 Endodontic Emergency Rotation (1) Clinical experience in managing and treating patients in pain. Credit/no-credit only. Offered: AWSpS.
ENDO 659 P-Endodontics Extended Learning (*, max. 4) Supplemental work in endodontics to correct an area of student deficiency. Credit/no-credit only.

ENDO 660 Clinical Endodontics (4, max. 32) Clinical diagnosis and treatment of pulpal pathosis and related sequelae. Offered: AWSpS.

ENDO 671 Endodontic Treatment - Selective (1) Several of the different products and techniques available for performing root canal therapy will be introduced to students. The selective is similar to an endodontic continuing education course. Students will use extracted teeth to gain introductory level practical experience with various instrumentation and obturation systems available on the market. Credit/no-credit only. Offered: W.

ORAL BIOLOGY

ORALB 550 P-Directed Studies in Oral Biology (*, max. 12) Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

ORALB 574 Clinical Stomatology (3) Y. RAWAL Diseases of the oral cavity and jaw are presented as the practitioner encounters them - detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: jointly with O S 574; Sp.

ORAL HEALTH SCIENCES

OHS 201 Planning a Career in Dentistry for the Future (2) S. Coldwell Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides exposure to dentistry as a career and prerequisite materials in oral anatomy, epidemiology, and other basic sciences subjects. Open to all second-, third, and fourth-year undergraduate students. Offered: Sp.

OHS 449 Undergraduate Research Topics in Oral Biology (*, max. 30) Individual research on topics selected in collaboration with a faculty member. Offered: AWSpS.

OHS 550 P-Directed Studies in Dental Public Health Sciences (*, max. 17) Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no-credit only. Offered: AWSpS.

OHS 561 Oral Tissue Development, Structure, and Function (3, max. 6) Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosa and periodontal tissues, salivary gland function, and olfaction and gustation. Prerequisite: permission of instructor. Instructors: Popowics Offered: WSp.

OHS 562 Supervised Teaching in Oral Health Sciences (1-5, max. 10) Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and design of courses given by the Department of Oral Health Sciences. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: AWSpS.

OHS 568 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Instructors: Spiekerman Offered: jointly with BIOST 510; S.

OHS 569 Advanced Oral Microbiology (2) Darveau Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: W, even years.

OHS 571 Clinical Epidemiology and Study Design in Dentistry (2) Hujoel An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of
dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Offered: S.

OHS 575 Oral Health Sciences Seminar (1-3, max. 30) Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Instructors: Presland Offered: A W Sp.

OHS 578 Research Techniques in Oral Health Sciences (2-4, max. 15) Introduction to biochemical, analytical, or morphological techniques employed in biochemical cytology or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: A W Sp.

OHS 579 Molecular Biology (2) Applications of molecular biology and recombinant DNA methodologies to oral health science topics of interest in dental sciences. Prerequisite: BIOC 405 or BIOC 406 or equivalent, and permission of instructor. Instructors: Presland Offered: S.

OHS 580 Introduction to Molecular Biology Laboratory (4) Includes laboratory experiences involving use of restriction enzymes, cloning of DNA into plasmid vectors and plasmid DNA isolation, RNA isolation from cells and tissues, PCR, DNA sequence analysis, and web-based DNA, and protein sequence analysis. Prerequisite: either BIOC 405, BIOC 406, or permission of instructor. Instructors: Presland Offered: A, even years.

OHS 581 Secretory Process in Exocrine Glands (1-3, max. 3) Jeffrey Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

OHS 584 Craniofacial Research Seminar (1) C. McKinney This survey course presents a framework for basic and clinical craniofacial research and an overview of the translation spectrum of craniofacial research from basic science and clinical research to product development. Recommended: A background in the conduct of biomedical research would be helpful. Credit/no-credit only. Offered: S.

OHS 591 Advanced Topics in Oral Biology I - Teeth and Bones (1-2, max. 2) Herring Covers aspects of biology basic to the dental sciences. Focuses on developmental biology of the craniofacial region, structure and function of teeth, bone, and the periodontium, and dental/oral sensation and pain. Offered: jointly with ORTHO 591; A.

OHS 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: A W Sp.

OHS 650 P-Community Dentistry Clinical Electives (*, max. 12) Credit/no-credit only.

ORAL MEDICINE

ORALM 404 Considerations in Care of the Patient with a Disability (*, max. 6) Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: A W Sp.

ORALM 460 Clinical Management of Patients with Disabilities (*, max. 10) Participation in chair/bedside dental treatment of a broad range of disabled populations, including homebound and institutionalized patients. Offered: A W Sp.

ORALM 565 Oral Medicine Clinical Conference (*, max. 16) Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: A W Sp.
ORALM 570 Oral Medicine and Therapy (2-, max. 6)
Lecture directed toward the presentation and
discussion of oral diseases and oral manifestations of
systemic disease. Primarily the clinical
manifestations' relationship to generalized disease
processes and patient management with in-depth
discussions of therapy. Offered: AWSpS.

ORALM 576 Oral Medicine Literature Review (1)
Seminar analyzes the recent literature concerning
the area of oral medicine, diagnosis, and therapy for
oral disease. Offered: AWSpS.

ORALM 580 Current Concepts in Oral Radiology (2)
Lecture/seminar covering current concepts in oral
radiology including technical factors, radiation risks,
observer characteristics and variation, radiographic
localization, interpretation, and overview of current
extraoral techniques. Offered: AWSpS.

ORALM 581 Advanced Seminars in Oral Radiology
(2, max. 8) Explores aspects of oral and maxillofacial
radiology and related fields. Offered: AWSpS.

ORALM 600 Independent Study or Research (*-)
Credit/no-credit only. Offered: AWSpS.

ORALM 601 Oral Medicine Research Seminar (1,
max. 10) Presentation and discussion of current
research problems by graduate students, faculty,
and investigators from other departments in the
university. Prerequisite: permission of instructor.
Credit/no-credit only. Offered: AWSpS.

ORALM 650 P-Oral Medicine Clinical Elective (1-6,
max. 6) Opportunities for students to work in
various clinical activities at local hospitals or other
sites outside the school. Prerequisite: permission of
instructor. Credit/no-credit only. Offered: AWSpS.

ORALM 651 Health and Homelessness - Elective (1-,
max. 12) Addresses oral and systemic health issues
in the homeless in Seattle. Service based learning
and includes presentations, readings, reflections,
health education, and dental care delivery with the
goal of preparing dental students to work in an
interprofessional environment with other healthcare
providers. Credit/no-credit only. Offered: AWSp.

ORALM 652 Health Issues in the Homeless and
Underserved-Selective (1) Students learn about the
causes and challenges of homelessness and lack of
access to care and how it affects systemic and oral
health. The course includes a minimum of 12 clinical
service learning hours in the community (clinical
opportunities are provided) as well as online

ORALM 653 Advanced Cone Beam CT Imaging and
Interpretation - Selective (1) Explores CBCT:
plan/follow-up implant placement (with or without
surgical guide), assess pathology, assess dento-
alveol trauma and explore anatomical variations, in
combination with: radiation protection, choice of
field of view, resolution, exposure parameters,
patient positioning, and interpretation of the
acquired images. Offered: AWSpS.

ORALM 654 DECOD Advanced Clinical - Selective (1)
Students will engage in clinical activities in special
care dentistry, treating patients with developmental
and/or acquired disabilities in the DECOD Clinic.
Offered: AWSpS.

ORALM 655 Peer Mentor - ORALM - Selective (1)
This course allows 4th year dental students to
mentor 3rd year dental students during their clinical
experiences in Dental Education in the Care of
Persons with Disabilities (DECOD). Offered: AWSpS.

ORALM 656 Clinical Oral Medicine Rotation at SCCA
- Selective (1) Through clinical experiences, this
course provides an overview of medical oncology.
Students learn the basic of medical oncology,
especially hematopoietic stem cell transplantation.
Students will be given the opportunity to participate
in the examination and the direction of care in the
Oral Medicine Service at the Seattle Cancer Care
Alliance. Credit/no-credit only. Offered: AWSpS.

ORALM 657 Botulinum Toxin Therapies in Dentistry
(1) Focus on both aesthetic and therapeutic
procedures that the dentist uses to treat patients.
Administration of BTX-A will be demonstrated for
and performed by dental students or graduate
students for both treatment of orofacial pain and
movement disorders as well as facial aesthetics,
including the oral, glabellar, forehead and lateral
canthal regions. Credit/no-credit only. Offered: WS.

ORALM 660 Rotations in Medical Disciplines (1-4,
max. 24) Clinic, oriented to the hospital practice of
oral medicine, deals with examination and
nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no-credit only. Offered: AWSpS.

ORALM 664 Dental Care of the Disabled II (*, max. 10) Practicum in chair/bedside delivery of dental care to different disabled populations. Includes rotations to institutions, long-term care facilities, and homebound service, using mobile equipment. Prerequisite: ORALM 564 and permission of instructor. Offered: AWSpS.

ORALM 665 Clinical Oral Medicine (*, max. 33) Clinic involving the diagnostic evaluation of patients with difficult and unusual oral diseases. The student diagnoses and treats the patient. Types of therapy include medications and chemical agents, functional physical therapy, and counseling. Offered: AWSpS.

ORALM 670 Clinical Oral Medicine Teaching (1-4, max. 16) Clinic designed to give the student experience and instruction in the teaching of clinical oral diagnosis. Treatment of emergency dental problems as well as routine and special diagnostic procedures is emphasized. Offered: AWSpS.

ORAL SURGERY

O S 550 P-Directed Studies in Oral Surgery (*, max. 16) See DPHS 449 for course description. Credit/no-credit only.

O S 574 Clinical Stomatology (3) Y. RAWAL Diseases of the oral cavity and jaw are presented as the practitioner encounters them - detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: jointly with ORALB 574; Sp.

O S 654 Clinical Oral Surgery - Selective (1) This course provides students with 40 extra hours of surgical experience above and beyond that which is required for entry into General Practice Dental Clinic. Credit/no-credit only. Offered: AWSpS.

O S 655 Peer Mentor Oral and Maxillofacial Surgery - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Oral Surgery courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

O S 656 Internal Medicine for Dentistry - Selective (2) Intensive review of major human medical diseases including common pathophysiology of diseases, medical interventions including detailed reviews of pharmacologic agents and current therapeutic procedures. Modifications necessary for dental treatment and medical emergency management are also detailed. Diseases of the respiratory, cardiovascular, and endocrine will be emphasized. Credit/no-credit only. Offered: AS.

O S 656 Internal Medicine for Dentistry - Selective (1) Theory, techniques for rendering moderate and IV moderate sedation. Airway management, pharmacology, physiology, pharmacokinetics of common sedative agents, their usual applications, special considerations, emergency prevention, recognition and management. Emphasis on monitoring, proper record keeping, legal issues. Prerequisite: O S 656 Credit/no-credit only. Offered: A.

O S 661 Elements of Moderate Sedation - Selective (1) This course covers the most important fifty oral diseases focusing on the detection of oral diseases in their early stages. It will cover common diseases, uncommon but important diseases, and, most importantly, problem cases that can be avoided by careful examination and interpretation of the clinical data. Credit/no-credit only. Offered: AS.

O S 662 Intravenous Sedation - Selective (1-2, max. 4) Students will attend clinic and under the supervision of Oral and Maxillofacial Surgery faculty or residents complete preoperative/sedation checklists, start and stabilize intravenous catheters, administer sedative medications, monitor patients during and following sedation, complete recovery evaluation of patients, and discharge patients to the care of their escorts. Prerequisite: Successful completion of O S 656 and O S 661. Offered: WSp.
PEDO 550 P-Directed Studies in Pediatric Dentistry (*, max. 6) See DPHS 449 for course description. Credit/no-credit only. Offered: S.

PEDO 560 Fundamentals of Pediatric Dentistry (1) Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control. Offered: S.

PEDO 570 Pediatric Dentistry Seminar I (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 571 Pediatric Dentistry Seminar II (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 572 Pediatric Dentistry Seminar III (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 573 Pediatric Dentistry Seminar IV (2) Principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.

PEDO 574 Pediatric Dentistry Seminar V (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 577 Pediatric Dentistry Seminar VIII (2) Principles and theory of child development and behavior management for pediatric patient. Sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

**PEDO 580 Developmental Disabilities Seminar (1)**
Multidisciplinary approach to managing children with developmental disabilities. Offered: S.

**PEDO 581 Developmental Disabilities Seminar (1)**
Multidisciplinary approach to managing children with developmental disabilities. Offered: A.

**PEDO 582 Developmental Disabilities Seminar (1)**
Multidisciplinary approach to managing children with developmental disabilities. Offered: W.

**PEDO 583 Developmental Disabilities Seminar (1)**

**PEDO 584 Pediatric Dentistry Seminar (2)**
In-depth knowledge and understanding of the topics related to, and supportive of, the clinical practice of pediatric dentistry.

**PEDO 600 Independent Study or Research (*)**
Prerequisite: permission of instructor. Offered: AW.

**PEDO 650 P-Pediatric Dentistry Extramurals (1-6, max. 6)**
Clinical extramurals in the field of children’s dentistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

**PEDO 652 Pediatric Dentistry Off-Site Clinical Rotation (3)**
2-week clinical rotation at the Sea Mar White Center Dental Clinic, during which students treat pediatric patients under supervision by a calibrated pediatric dentist. Participants will increase the number and diversity of pediatric dental procedures performed, practice four-handed dentistry in a pediatric community health setting, and be exposed to a diverse population of underserved pediatric patients. Credit/no-credit only. Offered: AWSpS.

**PEDO 660 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

**PEDO 661 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

**PEDO 662 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

**PEDO 663 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

**PEDO 664 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

**PEDO 665 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

**PEDO 666 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

**PEDO 667 P-Clinical Pediatric Dentistry (1-3, max. 3)**
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

**PEDO 668 Clinical Clerkship in Pediatric Dentistry: Yakima Valley (*) (max. 5)**
Comprehensive dental care for economically-disadvantaged children in a rural community health center. Offered: AWSpS.

**PEDO 669 Supervised Clinical Teaching (1-3, max. 4)**
Graduate pediatric dental students provide clinical instruction for predoctoral dental students by supervising clinical sessions. Offered: AWSpS.

**PEDO 670 Hospital Pediatric Dentistry (1-3, max. 3)**
Diagnosis, management, and treatment of patients with disabilities in Seattle Children’s Hospital Dental Clinic. Offered: S.
PEDO 671 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: A.

PEDO 672 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: W.

PEDO 673 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: Sp.

PEDO 674 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: S.

PEDO 675 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: A.

PEDO 676 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: W.

PEDO 677 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Seattle Children's Hospital Dental Clinic. Offered: Sp.

PEDO 679 Care of the Disabled Pediatric Patient (1) Clinical experiences in the management of disabled patients. Offered: S.

PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 699 Pediatric Orthodontic Clinic (1-4, max. 4) Clinical orthodontic care for pediatric patients. Offered: AWSpS.

PERIODONTICS

PERIO 449 Directed Studies in Periodontics (*) See DPHS 449 for course description. Credit/no-credit only.

PERIO 550 P-Directed Studies in Periodontics (*, max. 6) See DPHS 449 for course description. Credit/no-credit only.

PERIO 561 Periodontal Case Management (2-, max. 8) Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: AWSp.

PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Credit/no-credit only. Offered: S.

PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: A.

PERIO 575 Immunologic Aspects of Oral Diseases (2) Acquaints students with basic concepts of immunology and immunopathology. Topics include
elements of innate and acquired immunity, genetic bases of antibody structure and function, immunopathologic mechanisms, transplantation immunology, immunologic manifestations in mucocutaneous oral lesions, caries and periodontal disease, principles of vaccination, and critical evaluation of the dental stem cells potential for oral tissue engineering. Offered: A.

PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: AWSpS.

PERIO 578 Implant Literature Review (1) Verardi Reviews several topics related to dental implantology such as: history of dental implants, osseointegration, properties of materials, bone healing, bone augmentation procedures, success rates, pathogenesis of implant failures, and aesthetics in implantology. Discusses the relationship between surgical and restorative treatment phases. Credit/no-credit only. Offered: AWSp.

PERIO 580 Foundations in Implant Dentistry (1) London, Raigrodski Details the core surgical and prosthetic considerations in dental implant patient care. Topics include case planning, anatomy, radiography, surgery, componentry, occlusion, and applications for implant dentistry. Offered: S.

PERIO 582 Periodontic Treatment Planning Seminar (1-, max. 12) Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Offered: AWSpS.

PERIO 585 Periodontal Therapy Seminar (1-, max. 12) Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease. Offered: AWSpS.

PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 9) Helps to develop in-depth knowledge and analytical skills in estimating prognosis, assessing comprehensive treatment plans, evaluating long-term treatment outcomes, and evidence-based clinical decision making. Offered: AWSp.

PERIO 592 Prescription Surgery (1-, max. 3) Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and simulates an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.

PERIO 600 Independent Study or Research (*) Prerequisite: permission of Graduate Program Adviser.

PERIO 651 Surgical Periodontics - Selective (2) This course gives students a greater exposure to comprehensive periodontal diagnosis and treatment planning with an evidence-based rationale, increased exposure to periodontal surgical procedures, and an overview of the specialty as a whole. Pre-approval from the Periodontics Department is required for this course. Credit/no-credit only. Offered: AWSpS.

PERIO 655 Peer Mentor Periodontics - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various pre-clinical Periodontics courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

PERIO 659 P-Periodontics Extended Learning (*, max. 4) Supplemental work in periodontics to correct an area of student deficiency. Credit/no-credit only.
PERIO 660 Clinical Periodontics ([2-6]-, max. 60) Clinical experience in diagnosis and treatment of periodontal disease.

PERIO 661 Advanced Root Preparation (1) Daubert Advanced skill development in the use of the periodontal probe, gracey curettes, files and instrument sharpening. Includes laboratory sessions on dentoforms leading up to treatment of initial therapy patients. Offered: S.

PERIO 662 Stomatology Clinic (1, max. 4) The diagnosis and treatment of oral and perioral lesions including history taking, biopsies, hematological laboratory tests and chemotherapy. Periodontal therapy in medically compromised patients in the hospital setting. Microscopic review of biopsy specimens. Offered: AWSpS.

PERIO 663 Pre-Prosthodontics Clinical Periodontics (*) Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson. Credit/no-credit only.

PERIO 665 Clinical Practice Teaching (*, max. 9) Supervised experience in teaching clinical periodontics to undergraduate dental students.

PERIO 685 Hospital Periodontics (1) Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.

PROSTHODONTICS

PROS 560 Complete and Immediate Dentures (2) Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: S.

PROS 563 Maxillofacial Prosthetics I (1) Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

PROS 564 Maxillofacial Prosthetics II (1) Introductory lecture series focusing on the prosthodontic rehabilitation of patients with loss and compromise of facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities. Offered: A.

PROS 572 Special Topics Related to Prosthodontics (1, max. 2) Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiology, temporomandibular/myofascial joint dysfunction. Offered: S.

PROS 600 Independent Study or Research (*) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

PROS 651 Intra-Oral Maxillofacial Prosthodontics - Selective (1) This course's focus is oral rehabilitation of oral compromise resulting from congenital anomalies/head and neck syndromes, oral cancer, or trauma. The student is presented with material on oral compromise resulting from radiotherapy, chemotherapy. Implant supported or retained prostheses along with surgical innovations related to micro-vascular graft reconstructions are also presented. Credit/no-credit only. Offered: S.

RESTORATIVE DENTISTRY

RES D 550 P-Directed Studies in Restorative Dentistry (*, max. 6) See DPHS 449 for course description. Credit/no-credit only. Offered: AWSpS.

RES D 570 Review of Literature Seminar (1, max. 6) Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching, and treatment. Offered: AWsp.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8) Continuous weekly seminar to discuss controversial treatment problems and difficult
diagnostic cases selected for graduate students. Offered: AWSp.

RES D 582 Prosthodontics Current Literature Review (1, max. 8) This course satisfies the educational requirement for the resident to have an in-depth knowledge of current literature. Graduate Prosthodontics students will be assigned one article per week from a list of peer-reviewed journals. Each student will present a short (less than 10 min) discussion of the paper along with a written abstract. Offered: AWSpS.

RES D 585 Advanced Dental Materials Science (2) Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2) Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases. Offered: A.

RES D 589 Review of Literature in Occlusion (2) Seminar to review pertinent literature in occlusion. Offered: S.

RES D 590 Fundamentals of Fixed Prosthodontics (2-, max. 4) Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several articulators. Offered: A.

RES D 600 Independent Study or Research (*) Prerequisite: permission of Graduate Program Adviser. Offered: AWSpS.

RES D 620 P-Comprehensive Treatment Planning in Restorative Dentistry (3) Orientation to restorative clinical operations, administrative procedures associated with patient management, and formulation of treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of dental disease. Offered: S.

RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12) Elective offering in clinical areas related to discipline. Credit/no-credit only. Offered: AWSpS.

RES D 653 Clinical Magnification - Selective (1) Faculty and affiliate members from the Department of Restorative Dentistry and Endodontics will participate with senior dental students in this active learning course, which will include didactic and clinical experiences in the provision of oral health care using high level magnification. Offered: AWSpS.

RES D 655 Peer Mentor Restorative Dentistry - Selective (1, max. 12) Senior dental students participate as Peer Mentors for 1st and 2nd year dental students in various per-clinical Restorative Dentistry courses. This experience builds upon, enhances and refines the students in Peer Mentoring. Credit/no-credit only. Offered: AWSpS.

RES D 660 Oral Rehabilitation ([1-6], max. 32) Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry. Offered: AWSpS.

RES D 662 Introduction to CAD/CAM in Restorative Dentistry (1, max. 4) Provides a systematic approach to learn about incorporating digital impression systems and CAD/CAM technology. Discuss ideal tooth preparation for all CAD/CAM restorations, digital impression, virtually design, sintering and staining technique, and selecting the proper ceramic materials and luting agents. Discuss the benefits and drawbacks of these digital technologies and how digital dentistry can be brought into our future practice. Credit/no-credit only. Offered: AW.

RES D 663 Advanced Operative Dentistry through Conservative Cast Gold - Selective (1) This course builds upon, enhances and refines the students Operative Dentistry skill sets via the design, preparation and seating of indirect, conservative cast gold restorations. Credit/no-credit only. Offered: AW.
RES D 664 Lasers in Restorative Dentistry (1)
Provides an overview of lasers, especially in the discipline of Restorative Dentistry, including: applications of laser devices for dental purposes, effects of laser irradiation on healthy tooth tissues, the effect of lasers on carious structures, vital pulp therapy, and the application of laser-initiated reversible cement. Credit/no-credit only. Offered: A.

RES D 665 Advanced Clinical Geriatric Dentistry - Selective (1)
Provides students with additional clinical experience in comprehensive dental treatment of medically compromised and dentally complex geriatric patients. Prerequisite: one geriatrics rotation in either DENTGP 653, DENTGP 663, or DENTGP 673. Credit/no-credit only. Offered: AWSp.

RES D 672 Direct Gold Restorations - Selective (2)
Lectures cover historical information and the technical requirements for commonly used direct gold restorations. Emphasis on the special requirements in cavity detail and insertion methods for successful accomplishment of direct gold restorations. Students will gain experience in the Class 1, Class 5, and Class 6 restorations. Additionally, didactic information will be presented in the Class 6, Class 2, and Class 3 restorations. Credit/no-credit only. Offered: W.
COLLEGE OF EDUCATION

CURRICULUM AND INSTRUCTION

EDC&I 351 Teaching as a Profession (5) I&S, DIV K. Zeichner Helps students assess the profession of teaching. Explores what becoming a teacher means, assesses the organizational structure of teaching as a career and profession, examines social attitudes about education and the work of teachers, and thinks about teaching as social justice work.

EDC&I 352 Teaching to Change the World (5) I&S, DIV F. Barajas Examines how value structures and political decisions affect systems of education. Considers particular inequalities based on race, class, and gender. Encourages students to see the course as both an academic exercise, and a vantage point for considering their own past and possible future experiences in education.

EDC&I 353 Teaching in the Elementary School (3) Emphasizes selected teaching modes; lesson planning; classroom management procedures; grouping to accommodate pupils with special needs; utilization of learning resources; evaluation of teaching. Attention also given to school culture.

EDC&I 359 Second-Language Learning in Schools and Communities (5) DIV A. Varghese What are the major theories of how languages are learned? How do people, especially children and adolescents, learn a second or third language? What are the major factors (individual, social, racial, cultural, political) affecting this process? Course explores how answers to these assist teachers and community educators. Offered: W.

EDC&I 424 Multiethnic Curriculum and Instruction (3) I&S, DIV Primarily for preservice and in-service teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school's role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

EDC&I 438 Improvement of Teaching: Latin (5) VLPA Offered: jointly with LATIN 475.

EDC&I 453 Immigration and Schooling (5) I&S, DIV A broad framework for understanding the historical, political, legal, policy, and cultural dimensions of schooling for immigrant students in the United States. A general introduction to the issues experienced by culturally and linguistically diverse students.

EDC&I 458 Content Area ESL Instruction (3) Exposes students and engages them in how to support their English Language Learners in their content areas through sheltered instruction, specifically through the framework, Sheltered Instruction Observation Protocol (SIOP). Focuses specifically on the academic language needs of these students.

EDC&I 459 Workshop in Instructional Improvement: Literacy (1-6, max. 18) Study of special topics in literacy with a focus on practical, classroom topics, and application.

EDC&I 460 Early Literacy Instruction (3) Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

EDC&I 461 Materials for Teaching Reading: Children's and Young Adults' Literature (3) Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.

EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3) I&S Research-based practices for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: W.

EDC&I 464 Educating Native-American Youth (3) Assists students in understanding the North American Indian child from cultural, socioeconomic, and psychological points of view. Provides
opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and learning aids relevant to the educational situation of the Indian child.

**EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3)** Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

**EDC&I 468 Workshop in Instructional Improvement: Social Studies (1-6, max. 15)** Individual or group study projects on the improvement of instruction in social studies.

**EDC&I 469 Teaching African American Students and Culture (3)** Examination of sociocultural and pedagogical factors that influence African American students’ learning styles, opportunities, and outcomes; exploration of ways to reform teaching techniques to better accommodate cultural styles and experiences to improve the educational achievement of African American students. Offered: A.

**EDC&I 471 Science Education: Secondary School Programs and Practices (3)** Survey of the status and potential role of science in education; trends and their implications for the teaching of both biological and physical sciences in the junior and senior high schools; representative curricula and related teaching procedures; the psychology of concept formation and problem solving; and organization of science programs.

**EDC&I 472 Environmental Education for Teachers (3)** Status, selected problems, and role of environmental education in program of elementary, middle, and junior high schools. Opportunity to examine and receive instruction in use of existing environmental education instructional materials. Instruction is in the spirit of inquiry/discovery.

**EDC&I 473 Workshop in Instructional Improvement: Science (1-6, max. 20)** Individual or group study projects on the improvement of instruction in science.

**EDC&I 474 Multi-Ethnic Studies: Methods, Content, and Materials (3)** Designed to help preservice and in-service teachers identify content and materials and devise methods for implementing ethnic studies programs and for incorporating ethnic content into regular K-12 social studies, language arts, and humanities curricula. Special attention is given to teaching about American Indians, Mexican Americans, African Americans, Asian Americans, Puerto Rican Americans, and white ethnic groups.

**EDC&I 478 Special Topics in Mathematics for Teachers (2-9, max. 9)** Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with MATH 497.

**EDC&I 479 Workshop in Instructional Improvement: Mathematics (1-6, max. 20)** Individual or group study projects for the improvement of instruction in mathematics.

**EDC&I 480 Culturally Responsive STEM Teaching (4)** Culturally responsive teaching supports students' and teachers' multiple cultures, the culture of math and science, and the culture of school. Tied to these cultures are ways of thinking that are important for learning both in and outside of school. The challenge for teachers is recognizing mainstream culture while recognizing, respecting, and using students’ identities and backgrounds as meaningful sources for optimal learning environments. Offered: A.

**EDC&I 482 Educational Technology in Schooling (3)** Introduction to the application of technologies (computers, telecommunications, interactive video) in schools. Designed primarily for pre- and in-service teachers, but of interest to anyone involved in technology in education.

**EDC&I 485 Workshop in Instructional Improvement: Educational Communication and Technology (2-6, max. 20)** Individual or group study projects on the improvement of instruction through use of educational communication and technology.

**EDC&I 488 Educational Technology and Learning in Alternative Settings (3)** How educational technology can be used to encourage learning in nonschool environments, such as museums, radio and television broadcasts, parks and recreation centers,
and distance education programs. Students investigate one of these areas and prepare a project.

**EDC&I 494 Workshop in Improvement of Curriculum (1-6, max. 20)** Stresses the application of procedures for curriculum development, maintenance, and evaluation. Opportunities furnished to develop and perfect strategies for program development with occasions given to utilize the strategies in master plan and materials preparation for simulated or real school situations. Specific focus of workshop is determined by instructor or by arrangement with district.

**EDC&I 495 Workshop in Improvement of Teaching: Selected Topics, Issues, or Problems (1-6, max. 20)** Individual or group projects to help teachers adapt instruction to selected topics, issues, or problems and to identify the approaches and instructional resources that provide the soundest learning experiences.

**EDC&I 496 Workshop in Instructional Improvement (2-6, max. 20)** Individual or group study projects on the improvement of instruction with attention to designing instructional plans.

**EDC&I 499 Undergraduate Research (*) Students** developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

**EDC&I 500 Field Study (1-10, max. 20)** Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Curriculum and Instruction in the College of Education.

**EDC&I 503 Foundations of Curriculum and Instruction (4)** Explores the core concepts and questions of curriculum and instruction: Which knowledge is of most worth? How can it best be taught and learned?

**EDC&I 505 Seminar in Curriculum and Instruction (1-5, max. 20)** Seminar on advanced topics in curriculum and instruction. Critical examination of current research and practice. Content varies.

**EDC&I 506 Special Topics in Research Methods (1-6, max. 20)** Features a special topic in research design and execution such as a particular method of data collection, data analysis, data interpretation, honing a conceptual framework, or reviewing a literature.

**EDC&I 507 Methods for Teaching Culturally and Linguistically Diverse Exceptional Learners (3)** Focuses on understanding and enacting instructional methods for teaching culturally and linguistically diverse exceptional learners. Prepares educators to teach students who are commonly known as English learners (Els) with exceptional learning/behavior needs and how to integrate intervention, instruction, and service within general and special education classrooms. Offered: A.

**EDC&I 508 Integrating the Arts in Teaching and Learning (2)** Identify basic elements, principles, related concepts, and vocabulary of the creative arts. Islandwood students will be introduced to various media, lesson planning, and ways of integrating the arts into planning academic and multicultural curricula for K-8 classrooms. Serves as a foundation for integrating arts across the curriculum. Offered: W.

**EDC&I 509 Advanced Instructional Strategies (3)** Provides opportunities for action research among graduate instructors seeking to apply and refine their practice across a wide variety of educational settings. Students are refining their behavior management; assessment of prior knowledge and new learning; and engagement of students in their learning activities. Recommended: Two quarters of IslandWood’s Education for Environment and Community program Offered: Sp.

**EDC&I 510 Collaborative Projects in Educational Leadership (4) J. Haskin** Challenges IslandWood graduate students to develop their leadership potential, either in educational organization leadership or in curriculum and teaching leadership. Emphasis in both strands is placed on collaborative skills and working for social and environmental justice. One strand emphasizes educational leadership and integrated curriculum design. The other emphasizes leadership within a nonprofit educational organization. Recommended: Seven months in IslandWood’s Education for Environment and Community graduate certificate program. Offered: Sp.
EDC&E 517 Early Literacy Development and Instruction (3) Roxanne F. Hudson Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, spelling, and writing. The focus of this class is on typical and atypical development of literacy and instructional methods appropriate to preschool and early elementary. Offered: A.

EDC&E 518 Critical Theories and Approaches in Educational Research (3) Explore range of ideas and tensions in critical theories in educational research and how they have been applied. Examine the work of theorists such as Bourdieu, Hall and theories such as Critical Race Theory and their applications in current educational studies.

EDC&E 519 Second Language Teacher Education and Identity (3) Focus on understanding the landscape of second language teacher education and identity. Chart the research and practice around the professional lives of their teachers and connect it to the academic and social experiences of bilingual/multilingual children and adults in the United States and globally.

EDC&E 520 Current Models in Early Childhood Education (3)

EDC&E 521 Problems and Issues in Early Childhood Education (3)

EDC&E 522 Practicum in the Training of Early Childhood Instruction Personnel (3)

EDC&E 523 Conceptions of Race, Equity, and Social Justice in Mathematics Education (4) Explores the most current theories shaping the teaching, learning, and schooling of mathematics education. Issues examined include race, equity, social justice, language, class, gender, culture, and power and their intersections with mathematics education.

EDC&E 524 Seminar in Teacher Education (3, max. 6) Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or in-service issues.

EDC&E 525 Teacher Learning and School Change (3-4) Synthetic study of how researchers understand what enables teachers and schools to transform themselves. Examines how the fields of teacher learning and school change can inform each other in order to enrich research and development in professional and school learning.

EDC&E 526 Inside Teacher Communities (3-4) Examines different perspectives on professional communities, the roles of communities in teachers’ learning, the challenges these communities face, and the possible ramifications of professional communities for students. Participants explore practical tools for studying, engaging in, and building professional learning communities in schools.

EDC&E 527 Pedagogies of Professional Education (3) Investigates the theories of learning, models of teaching, and contextual features that impact the design and enactment of a variety of pedagogies used in various professional education programs. Considers what particular pedagogies demand on the part of the professional educator.

EDC&E 528 Foundations of Language, Literacy, and Culture (4) Explores the nature of literacy by examining language acquisition and its impact on literacy; historical theories and research on reading and writing processes; and how recognition and appreciation of cultural variation has changed literacy instruction and curricula over the past decades. Draws on seminal historical and current research. Offered: A.

EDC&E 529 Reading and Writing Connections: Theories and Practices for Instruction (3) Explores the reciprocity of the reading and writing relationship. Considers the connections to language development for young children and English language Learners (ELLS), as well as how reading and writing develop for older students.

EDC&E 530 Approaches to Literacy Instruction (4) Dixie Massey Designed to aid experienced teachers who possess background in the teaching of literacy, and presents a variety of approaches and actual analysis of approaches. Offered: A.

EDC&E 531 Seminar: Critical Review of Literacy Materials (4) Students formulate and apply criteria for assessing materials, with emphasis on linguistic,
cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisite: teaching experience and one basic course in the teaching of reading.

EDC&I 532 Seminar in Literacy Research (4, max. 12) Focuses on understanding scholarly research including various research methodologies (e.g. descriptive, correlational, experimental, quasi-experimental, qualitative) and the research questions they are designed to address. Prerequisite: permission of instructor.

EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6) Students design and conduct original research studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

EDC&I 534 Reading Comprehension Instruction K-12 (4) Dixie Massey Focuses on research-based comprehension strategy instruction and text-based discussion of different types in K-12 classrooms. Examines various comprehension models, strategies for instruction, and assessments of comprehension. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults. Offered: W.

EDC&I 535 Doctoral Seminar in Literacy Research (1-2, max. 18) H. HEBARD, R. HUDSON, D. MCCUTCHEN, S. VALENCIA Discusses a literary topic of interest. Instruction and discussion focus on close reading of research from a variety of theoretical and research traditions. Prerequisite: EDC&I 534. Offered: AWSp.

EDC&I 536 Writing Instruction: Research, Theory, and Practice (4) H. HEBARD Provides a foundation in writing instruction theory, research, and practice that is relevant for teachers, specialists, curriculum developers, and researchers in literacy. Offered: WSpS.

EDC&I 537 Classroom Discourse (4) H. HEBARD Introduction to theoretical and empirical works on the study of classroom discourse. Exploration of the ways in which classroom discourse can support or constrain opportunities to learn. Offered: A.

EDC&I 538 Discourse in the Mathematics Classroom (4) Examines ways of looking at discourse in mathematics classrooms as it relates to teaching practice and student learning. Includes reading both seminal and cutting-edge works in the study of discourse in the mathematics classroom, looking at multiple school contexts and across grade levels.

EDC&I 539 Students' Mathematical Thinking, Curriculum, and Pedagogy (4) Examines ways of understanding the development of students' mathematical thinking. Intensive study of classroom videos, mathematical curricula, and fieldwork enable students to study the relationship among students' mathematical thinking, curriculum, and pedagogy.

EDC&I 540 Immigrant Schooling (3) Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 542 Approaches to Assessing Second Language Students in K-12 Schools (3) Examines the multiple ways of assessing linguistically diverse students in K-12 schools, including standardized and alternative assessments of these students. Prerequisite: a course in ESL methods.

EDC&I 544 Immigration and Education: Immigrant Student Perspectives (3) Examines the multitude of factors that shape the immigrant student experience in U.S. schools. Takes an interdisciplinary perspective drawing on research from sociology, anthropology, and education, to understand teaching and learning from the perspective of immigrant students. Prerequisite: EDC&I 540 or equivalent.

EDC&I 545 Multilingual Socialization and Development (3) Explores the research base examining second language acquisition, in and out of school contexts. Focuses on the home language practices of linguistically diverse students with the purpose of understanding how these processes influence school learning.

EDC&I 547 Sociolinguistics (3) The study of language in its social context and the study of social life through language. Explores issues in the field of sociolinguistics and sharpens tools to explore
educational issues related to linguistic and cultural diversity.

EDC&I 548 Methods in Teaching English as a Second Language (4) Prepares teachers to teach English as a second language to students who are acquiring English in K-12 settings. Emphasizes the scaffolding of the development of the four language domains; listening, speaking, reading, and writing. Prerequisite: EDC&I 540 and EDC&I 545 or permission of instructor.

EDC&I 549 Practicum in Teaching English Learners in Context (3) Provides experiences in the field observing and working with an experienced ELL-endorsed teacher. Consists of observation; planning, teaching, and reflecting on at least two weeks worth of ELL-focused instruction lessons; and continued development of the methodological competencies needed to teach ELL students through seminar sessions at the practicum site.

EDC&I 550 Educational Technology Research (3) Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

EDC&I 551 Introduction to Instructional Design (3) An experimental course in analyzing, designing, developing, and formatively evaluating instructional products using the Instructional Systems Design (ISD) Mode. Also, discussion of how to successfully implement an instructional product/program within an organization using change management principles. Business and industry training focus.

EDC&I 552 Coaching and Mentoring Adult Learners (3) Sylvia Bagley Provides a foundation in coaching, mentoring, and other forms of peer-driven professional development in educational settings, grounded within research on adult professional learning and socio-cultural theories.

EDC&I 553 Collecting, Interpreting and Using Data for School Improvement (3) Sylvia Bagley Examines current trends in data use for school improvement. Explores the role of data in supporting and constraining equity in schools; current research on how teachers interact with data; essentials of data literacy; opportunities for teacher learning through data use; and organizational structures found to support or constrain data use in schools. Recommended: Designed for current and emerging teacher leaders who have previous classroom teaching experience or other instructionally-related experience in schools or school districts. Also appropriate for graduate students who are studying teacher learning. Offered: Sp.

EDC&I 554 Bilingual Teaching Methods and Assessment (3) Examines methods and materials in primary language instruction and assessment. Candidates will learn methods for supporting language and content development in students' home language. The course uses a target language as a medium of instruction and support in biliteracy development and language instruction in content areas.

EDC&I 556 Elementary School Curriculum (4) Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school curriculum analyzed.

EDC&I 558 Secondary School Curriculum (4) Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3) Intensive study of basic principles and procedures utilized in development of curricula. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

EDC&I 560 Social Studies Education Programs and Practices (3) Stresses powerful instructional strategies, materials, and a selection of content in social studies education. For experienced teachers and non-social studies students in the Teacher Education Program.

EDC&I 561 Instruction for Under-Achieving Readers (2-10, max. 20) Covers instructional techniques addressing the comprehension, decoding, vocabulary, and fluency needs for under-achieving readers as well as strategies for assessing students' reading abilities and planning for instruction.
EDC&I 562 Literacy in the Content Areas (4) H. HEBARD Study of reading, writing, listening, and speaking in content area instruction. Offered: WS.

EDC&I 563 Topics in Adolescent Literacies (4, max. 8) H. HEBARD Provides an introduction to several important topics in adolescent literacies. Topics covered may change from year to year.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 20) Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 568 Youth Multiliteracies: Multimodality, Culture, and Identity (4) H. HEBARD Focuses on the role of multimodal literacies in the lives of diverse youth. Considers the implications of a rapidly changing communication landscape for teaching and learning literacies in schools.

EDC&I 569 Educating Ethnic Minority Youths (4) Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African American, American Indian, Mexican American, Puerto Rican American, and Asian American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3) Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

EDC&I 571 Ambitious Learning by Design in Science Classrooms (4) Explores the frontiers of research in science learning environments that are both rigorous and equitable. Allows individuals to wrestle with the current problems of teaching and learning, including how to design opportunities for all students to participate in the discourses and practice of science. Prerequisite: EDC&I 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1-5, max. 6) Discussion of topics and problems of current interest and importance in science education.

EDC&I 573 School Reform and Multicultural Education (3) Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3) Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission or instructor.

EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3) Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals.

EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3) Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals.

EDC&I 577 Current Issues in Mathematics Education (1, max. 20) Discussion of problems and issues of current interest and importance in mathematics education.

EDC&I 578 Multicultural Education Across Nations: Policy and Curriculum Issues (3) J. BANKS Acquaints students with concepts, theories, research, and practices in multicultural education, diversity, and citizenship education in nations around the world.
Emphasis on how nations educate students for citizenship and balance unity and diversity. Completion of a major paper that examines diversity and citizenship within a nation outside of the United States. Offered: W.

EDC&I 579 Culturally Sustainin g Pedagogies: Teaching and Learning for Justice in a Changing World (3) Django Paris Culturally sustaining pedagogy (CSP) offers a vision of school that seeks to perpetuate and foster linguistic, literate, and cultural pluralism as part of schooling for positive social transformation and revitalization. Reclaiming and reimagining schooling as a site to sustain Indigenous, Black, Latinx, Asian and Pacific Islander communities, including the ways these identities/memberships intersect multiple other identities.

EDC&I 580 Technology in Context (3) Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies from multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511.

EDC&I 581 Cognitive Systems Design (3) Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students' knowledge of technology, learning and research in collaborative settings. Prerequisite: EDPSY 501 or permission of Instructor.

EDC&I 582 Design Experimentation and Implementation in Context (3) Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on engaging in empirical study of the designed system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDPSY 501 and a quarter of qualitative methods, or permission of Instructor.

EDC&I 585 Technology and the Culture of Education (3) Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology's long-term influence on thought and values.

EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3) Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersion, control, structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: either EDC&I 583 or permission of instructor.

EDC&I 590 Seminar in Elementary Education (3) Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: elementary-school teaching experience, EDC&I 556.

EDC&I 591 Seminar in Curriculum Research (3) Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

EDC&I 592 Seminar in Secondary Education (3) Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

EDC&I 593 Seminar in Curriculum: Theory and Practice (3) Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related to curricular practices and innovations. Prerequisite: EDC&I 559.

EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3) Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues as they affect curricular activity. Prerequisite: EDC&I 559.
EDC&I 595 Seminar in Analysis of Teaching (3)
Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDC&I 596 Seminar in Strategies of Instruction (3)
Various instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDC&I 597 Curriculum Evaluation Seminar (3, max. 6) Focuses on the evaluators' roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

EDC&I 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDC&I 600 Independent Study or Research (*) Prerequisite: permission of instructor.

EDC&I 601 Internship ([1-10]-, max. 20) Prerequisite: permission based on approval of proposal submitted during quarter preceding the internship. Credit/no-credit only.

EARLY CARE AND EDUCATION

ECE 201 Introduction to Early Care and Education (2) I&S Explores current and historical themes, research, and programs in the field of early care and education, offering students the opportunity to explore their own professional identities. Co-requisite: ECE 220.

ECE 220 Equity in Early Care and Education (3) Drawing upon the history of multicultural education, social justice education, culturally responsive and sustaining pedagogies, critical perspectives in early childhood education, and anti-bias education, this course supports professionals serving young children and families to develop skills needed to engage in equitable practices. Offered: A.

ECE 307 Early Childhood Curriculum I: From Observation and Assessment to Planning (10) Fosters the knowledge and skills needed to promote learning and development for young children through creating curriculum, including child observation, assessment, and planning. Helps transfer learning to early care and education settings and situations. First in a two-quarter series.

ECE 308 Early Childhood Curriculum II: Engaging Interactions and Individualizing (10) Fosters the knowledge and skills needed to promote learning and development for young children through creating and implementing curriculum, including engagements and individualizing for all learners. Helps students apply learning to early care and education settings and situations. Second in a two-quarter series. Prerequisite: ECE 307. Offered: Sp.

ECE 401 Introduction to Research in Early Care and Education (5) I&S, QSR Focuses on the kinds of knowledge, ways of knowing, and modes of inquiry relevant to early care and education. Through identifying and reviewing substantive research in their areas of interest, students locate ideas for inquiry within the research literature in early care and education. Offered: A.

ECE 402 Social Policy in Early Care and Education (5) I&S Seeks to deepen understanding of contemporary
social issues and problems that impact families and young children. Discusses legislation and other policies from a local, national, and global perspective. Explores the complex web of social, private, and governmental organization that impact families and young children. Offered: W.

**ECE 419 Family and Community Engagement (5) I&S** Focuses on the key role that family and community contexts play in supporting development, as well as the key role early childhood programs can play in promoting family engagement. Participants examine interdisciplinary principles on how best to support a developing child's primary relationships through family engagement, and responsiveness to differences between families. Offered: S.

**ECE 450 Professional Development for Early Childhood Educators (2)** Helps identify individual strengths, set professional goals, and practice necessary professional skills, such as job-searching, networking, and developing oral and written proficiency. Offered: A.

**ECE 456 Senior Project (10)** Synthesizes and demonstrates learning across the ECE major. Brings together research, theory, and hands-on practice in service learning in order to highlight overall degree competencies and promote development of a professional portfolio. Prerequisite: ECE 450. Offered: Sp.

**EARLY CHILDHOOD AND FAMILY STUDIES**

**ECFS 200 Introduction to Early Childhood and Family Studies (3) I&S** Explores current practices, programs, and research in the field of early childhood and family studies. Topics include: child development, early childhood education, parenting and family support, mental health, poverty, and other risk factors. Offered: AW.

**ECFS 201 Introduction to Online Learning (2)** Introduction to the use of a variety of technologies necessary for completion of the ECFS online undergraduate degree, including video technologies, peer collaboration, and portfolio development. Prerequisite: ECFS 200.

**ECFS 301 Early Childhood Curriculum (5) I&S** Focuses on developmental foundations and theoretical and researched-based models of early childhood curriculum. Studies approaches to designing, organizing, and implementing early learning programs. Studies curricular content for supporting children's learning and development in physical development; social and emotional development; approaches to learning; cognition; and language and early literacy. Offered: W.

**ECFS 303 Service Learning and Research I (1-6, max. 6)** Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Prerequisite: ECFS 200. Offered: AWSp.

**ECFS 304 Service Learning and Research II (1-6, max. 6)** Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. Ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit/no-credit only. Offered: WSp.

**ECFS 305 Service Learning and Research III (1-6, max. 6)** Provides students with opportunities in community-based early childhood or family support settings. Includes a field experience and a once-a-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit/no-credit only.

**ECFS 310 Early Childhood Education Lecture Series: Influential Scholars in the Field (2-5)** Lecture series featuring scholars in early childhood education presenting a variety of approaches to bridging research and practice as they underscore the importance of early learning across curriculum domains and in various contexts. Helps students interpret the conclusions and recommendations of scholarly contexts.

**ECFS 311 Teaching from the Inside Out: Being a Resilient Educator (3) I&S** Equips students with skills and strategies to optimize their effectiveness as
early childhood educators. Students learn how to be as healthy as possible; possess the confidence to manage stressful situations; connect effectively with others; and focus on the positive aspects of life.

**ECFS 312 Positive Behavioral Support in Early Childhood (3-5) Joseph**
Adresses the significance of social and emotional development in the early years. Discusses the adoption of models and evidence-based practice strategies that focus on promoting social-emotional development, providing support for children’s appropriate behavior and preventing challenging behavior. Examines how adult resiliency and wellness relates to improved early care and teaching. Offered: AWSp.

**ECFS 315 Parenting and Child Development: Influences of Poverty, Immigration, and Culture in the Earliest Years of Life (5) DIV**
Examines how complex social systems, including income inequalities, race/ethnicity, and immigration status contribute to parenting practices and family investment in child development, with a focus on young children from birth through age 8. Offered: W.

**ECFS 320 Childhood in Cultural Context: Theory and Practice (5) I&S, DIV**
Focuses on preparing students to work and form reciprocal and meaningful relationships with children and families from diverse cultural backgrounds in the US and abroad by increasing understanding of how environmental factors can impact child development across cultures and increasing cultural responsiveness, including its application in evidence-based practices. Recommended: None Offered: A.

**ECFS 321 Engaging Interactions and Environments (3) I&S**
Increases participants’ knowledge about the importance of high quality early childhood education, and the specific types of environments and interactions that support the development of children's social-emotional, cognitive, and early academic skills. Offered: AWSp.

**ECFS 330 Creative Thinking and Expression in Early Childhood Development and Learning (3) VLPA L. Dietrich**
We examine the critical role of creativity and creative expression in the social, emotional, and cognitive development of young children, discuss processes that encourage creative thinking, and consider the cultural context in which children learn and develop. Issues of equity regarding access to the arts are considered as we explore ways to engage young children in creative thinking and as creators and consumers of the creative arts. Offered: Sp.

**ECFS 399 Current Issues and Trends in Early Childhood and Family Studies (3-5, max. 10) I&S**
Explores current theory, research, policy, and practice in early childhood and family studies. Offered: AWSpS.

**ECFS 400 Child Observation and Assessment (5) I&S**
Focuses on observation and methods used to study and understand young children in the context of families and society. Develops skills to understand children's behavior in learning environments. Examines approaches to and purposes for assessment and documentation of children's development and learning. Explores approaches to assessing early learning environments. Offered: A.

**ECFS 401 Understanding Early Childhood and Family Studies Research (5) I&S, QSR**
Focuses on the kinds of knowledge, ways of knowing, and modes of inquiry relevant to early childhood and family studies. Through identifying and reviewing substantive research in their areas of interest, students locate ideas for inquiry within the research literature in early childhood and family studies. Prerequisite: EDPSY 302 and ECFS 303. Offered: A.

**ECFS 402 Social Policy and Young Children and Families (5) I&S**
Seeks to deepen understanding of contemporary social issues and problems that impact families and young children. Discusses legislation and other policies form a local, national, and global perspective. Explores the complex web of social, private, and governmental organization that impact families and young children. Prerequisite: ECFS 401. Offered: W.

**ECFS 403 Senior Capstone (2)**
Students in the Core pathway complete and present a senior project during the final quarter in the major. Provides advanced opportunity to synthesize research and policy perspectives about a topic of relevance to the field of early childhood education and present findings to a panel of peers and colleagues. Prerequisite: ECFS 401. Offered: WSp.

**ECFS 410 Laying the Foundation for Reading: Supporting Language and Literacy Development in Preschool (5) VLPA**
Increases knowledge about
language and literacy developments between ages 3 to 5 and the ways in which these developments are critical precursors to the emergence of and success with formal reading skills, and to build participants' use of evidence-based language and literacy practices within the preschool classroom.

ECFS 411 Fostering the Development of Young Children's Mathematics and Science Knowledge and Skills (5) I&S/NW Increases knowledge about cognitive developments between ages 3 to 5 and ways in which these developments are critical precursors to emergence and success with later content and skills in mathematics and science. Learn to design and implement effective instructional practices and interactions with children that support their learning and development.

ECFS 412 Learning with Digital Media in Early Childhood (3) Addresses how young children learn basic literacy and mathematics skills, and develop an interest in science from engaging with digital media. Examines how teachers of young children need to be prepared in instructional practices that can enhance learning from media in a developmentally appropriate way.

ECFS 419 Family and Community Influences on the Young Child (5) I&S, DIV Develops an understanding of families of young children from different socio-cultural backgrounds, child socialization and development in family and community contexts (immigrant, refugee, indigenous, special-needs and vulnerable children), parenting across cultures, family processes, family systems theories, socio-cultural theories, and family-child collaborative partnerships using family and community strengths and resources. Prerequisite: EDSPE 304 or EDSPE 404 Offered: ASp.

ECFS 454 Senior Project I (2) First of a three-quarter sequence leading to the completion and presentation of the senior project during spring quarter. Provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs and research settings. Includes a weekly seminar to reflect on and expand on applied experiences. Prerequisite: ECFS 454. Offered: W.

ECFS 456 Senior Project II (2) Second of a three-quarter sequence leading to the completion and presentation of the senior project during the final quarter in the major. Provides advanced opportunities to integrate theory and practice in community-based learning and research experience continues during the quarter. Prerequisite: ECFS 454 and ECFS 455. Offered: WSp.

ECFS 480 Individualizing Teaching and Learning (5) I&S Introduction to effective practices that support the development of young children. Focuses on evidence-based, individualized instructional methods and strategies used in teaching and facilitation the development of young children in response to both their strengths and needs. Offered: AWSp.

ECFS 495 Advanced Seminar in Early Childhood and Family Studies (3, max. 9) Addresses current topics and critical issues in the field of early childhood and family studies in an advanced seminar format. Offered: AWSp.

ECFS 499 Undergraduate Research (*) Students conducting this research produce a report or a paper setting forth the results of their investigation which should be regarded as a basic part of the independent study plan. Credit/no-credit only. Offered: AWSpS.

EDUCATION

EDUC 170 Mathematics for Elementary School Teachers (5) NW Covers basic concepts of numbers and operations. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Offered: AWSpS.

EDUC 171 Math for Upper Elementary and Middle Grades Teachers (5) NW Covers concepts of numbers and operations, measurement, geometry,
and statistics and probability typically taught in the upper elementary and middle grades. Emphasizes problem solving, modeling, communication of mathematical ideas, and analysis of sources of difficulty in learning these concepts.

EDUC 200 Special Topics in Education, Learning, and Society (3-5, max. 15) I&S C. DAVIS, J. WILLIAMSON-LOTT Critical examination of current research and practice in education, learning, and society. Offered: AWSpS.

EDUC 205 Selected Readings - An Introduction to Education in the United States (3-5, max. 15) I&S C. DAVIS, J. WILLIAMSON-LOTT Introduction to the United States education system, including the theoretical concepts of learning and historical framework that guide practice, policy, and teacher preparation. Explores issues and questions pertaining to United States schools through directed readings, dialogue, individual projects, and group projects. Offered: AWSpS.

EDUC 210 Current Issues in Education (5, max. 15) I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs. Issues vary by term and faculty. Offered: AWSp.

EDUC 211 Political Philosophy of Education (5) I&S Discusses education as an instrument essential to the production of good lives for individuals as well as social structures capable of facilitating such lives. The driving assumption is that contemporary societies are alarmingly incapable of promoting happiness, and much of the discussion is dedicated to the role education might play in the social change needed to foster good lives for all. Offered: AWSp.

EDUC 215 Resilience and Wellness in College and Beyond (5) I&S James J. Mazza Students will learn skills to enhance their wellbeing in college and in their life in general. Particular focus will be given to skills that help people withstand common difficulties in life. Skills will include but will not be limited to mindfulness, emotion regulation, distress tolerance, and interpersonal effectiveness skills. Students will also learn about research underlying stress, resilience, and related skill areas. Offered: AWSp.

EDUC 221 Education and the Playfield (3) I&S Examines the intersection of education and sport from early childhood to college experiences. Explores educational themes related to physical development, sport's influence on individual and community development, access to physical activities, equity and inclusion within the sports environment, and the role of sports in social change.

EDUC 225 Introduction to Language, Education and Society (5) Phillip L. Markley Introduces core issues involved in language usage in education and how it plays an important role in not only education but our lives in general. Provides a broad view of language in education. Discussions and topics explore the role of language, usage and structure, variations, how children learn and influences from policy. Examines myths about languages and language in education. Recommended: LING 200. Offered: A.

EDUC 231 Developing Youth through Sport and Physical Activity (5) Exploration of the influence of sport and physical activity to positively impact the lives of young people. The concept of 'Sports-Based Youth Development' will be introduced and how educators and leaders can proactively utilize athletics and activities to effectively build social-emotional and bio-physical skills in participants.

EDUC 251 Seeking Educational Equity and Diversity (5) I&S, DIV Jondou Chen Introduces the need for and challenges in establishing educational equity and diversity. Discussions explore theories, historical trends, and ongoing debates. Readings draw from academic and popular sources, and class sessions include use of multimedia resources and experiential activities. Offered: AWSpS.

EDUC 260 The Dream Project: Introduction to Mentoring Strategies (1, max. 8) I&S Introduces equity, access and social mobility, in relation to educational access and post-secondary planning. Frames communication techniques and identity
reflection in the context of building skills for mentoring youth from diverse backgrounds. Students will learn about post-secondary planning basics including topics such as the financial aid process, editing personal statements, and writing resumes. Corequisite: EDUC 369. Credit/no-credit only. Offered: AWSp.

EDUC 280 Introduction to Education, Communities, and Organizations: Re-envisioning Education (3)
Introduction to the disciplinary fields that constitute the Education, Communities, and Organizations (ECO) major: Human development, learning theory, equity studies, organizational studies, and community engagement. Provides an overview of the ECO major, including core courses, learning objectives, faculty, and community partners. Offered: AWSpS.

EDUC 299 Education, Learning, and Society Colloquium (1)
Provides a common learning experience where students learn from researchers and practicing educators about current pedagogical projects and theories. Fosters self-reflexive projects to build understanding of learning pathways. Credit/no-credit only. Offered: AWSp.

EDUC 300 Special Topics in Education, Learning, and Society (1-5, max. 20)
Critical examination of current research and practice in education, learning, and society.

EDUC 301 Introductory Practice in Community Service Activity (1-10, max. 10)
Observation and participation in a variety of activities in a K-12 classroom. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 303 BI Leadership Academy II (1-2, max. 6)
Second year leadership seminar for Brotherhood Initiative students. This course will serve as a critical examination of leadership theory and practice for civically engaged student leaders. Offered: AWSp.

EDUC 305 The Purpose of Public Schools in a Democracy (5)
Explores issues and questions pertaining to public schools in a democratic society through directed readings, dialogue, individual and group projects designed to engage students with a series of crucial issues in public schools. Offered: AWSp.

EDUC 310 Current Issues in Education (5, max. 20)
I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs. Offered: AWSp.

EDUC 315 Issues and Trends of Educational Theory, Research, and Practice (3-5, max. 15)
C. Davis, J. Williamson-Lott Examines issues and trends in the past and present that have influenced or may have the potential to influence the field of education. Research, discussion, and reading assignments enable students to analyze and understand topics such as charter schools, accountability, privatization, national standards, and other topics. Offered: AWSpS.

EDUC 340 Culturally Sustaining Pedagogies: Teaching and Learning for Justice in a Changing World (3)
Django Paris Culturally sustaining pedagogy (CSP) offers a vision of school that seeks to perpetuate and foster linguistic, literate, and cultural pluralism as part of schooling for positive social transformation and revitalization. Reclaiming and reimagining schooling as a site to sustain Indigenous, Black, Latinx, Asian and Pacific Islander communities, including the ways these identities/memberships intersect multiple other identities. Offered: W.

EDUC 351 Wellness and Education Achievement in Men of Color (5)
J. LOTT Provides an overview of various factors that shape the lives of men of color along the educational pipeline. Includes discussions on the tensions, contradictions, and possibilities. Offered: AWSp.

EDUC 360 The Dream Project: Mentoring and Education Policy (1, max. 8)
I&S Discusses social justice topics in relation to mentoring high school students in the US public education system. Expands upon mentoring skills gained in EDUC 260 through focusing on other systems of oppression and guest speakers. Includes diverse perspectives from educators, community partners, and relevant research. Supports students' mentorship on college readiness and other postsecondary pathways. Corequisite: EDUC 369. Prerequisite: EDUC 260 Credit/no-credit only. Offered: AWSp.
EDUC 361 The Dream Project: Special Topics (1, max. 8) I&S Taylor, Twitchell Provides discussion and exploration of a single topic related to social mobility and access to higher education. Designed for students who have already completed EDUC or EDUC 360 who wish to examine a topic more closely. Corequisite: EDUC 369. Credit/no-credit only. Offered: AWSpS.

EDUC 369 The Dream Project: High School Visits - Field Experience (1, max. 8) Involves weekly travel to local high schools, mentoring students from diverse backgrounds on college readiness and other postsecondary pathways. Corequisite: either EDUC 260 or EDUC 360. Credit/no-credit only. Offered: AWSpS.

EDUC 370 Learning Within and Across Settings (5) Examines learning of disciplinary knowledge and practices, with attention to relations between the kinds of learning that happen within and across settings (outside of schools).

EDUC 375 Digital Media Literacy (3) VLPA Jennifer Gawronski Examines the role that media plays in our lives and communities and how digital technologies have impacted the media we consume, share, and create. Develops a personal framework for media literacy while also exploring how media literacy is taken up in a variety of learning settings. Offered: Sp.

EDUC 401 Practicum in Community Service Activity (1-18, max. 20) I&S Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Maximum of 20 credits from EDUC 401, EDUC 411, and EDUC 421 may apply towards graduation. Offered: AWSp.

EDUC 402 Practicum in Classroom Teaching and Management: Primary (1-18, max. 20) Tutoring and teaching experiences in a primary school setting (grades K-3). Placements made according to participant’s interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 403 Practicum in Classroom Teaching and Management: Intermediate (1-18, max. 20) Tutoring and teaching experiences in an intermediate school setting (grades 4-8). Placements made according to participant’s interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 404 Practicum in Classroom Teaching and Management: Secondary (1-18, max. 20) Tutoring and teaching experiences in a secondary school setting (grades 6-12). Placements made according to participant’s interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 411 Practicum in Community Service Activity (1-18, max. 20) VLPA Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Maximum of 20 credits from EDUC 401, EDUC 411, and EDUC 421 may apply towards graduation.

EDUC 421 Practicum in Community Service Activity (1-18, max. 20) VLPA/I&S Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required.

EDUC 451 The Role of Sport in Social Justice and Change (5) Examination of diversity themes (race, class, gender, sexuality and physical ability) together with historical sport events through a social justice framework. The role and influence of sport in our society will be examined, with a focus on influences of power, institutions, and systems. Offered: W.

EDUC 472 Individuals, Groups, Organizations, and Institutions (5) I&S Examination of current research and practice in the field of individual, group, and organizational theory, with special focus on application to educational and community-based organizations.

EDUC 473 Community Based Research and Practice (5) Focuses on understanding the principles and practices required for effective and equitable
community-based research and practices in education. Prerequisite: EDUC 251.

EDUC 481 Community-Based Capstone I (5) Prepares students for intensive community-based internship in EDUC 482 through creation of literature review and capstone project proposal. Prerequisite: EDUC 251; EDUC 370; EDUC 472; and EDUC 473.

EDUC 482 Community-Based Capstone II (5) Intensive community-based internship experience, including the completion of a substantial product that contribute to the organization’s mission and current initiatives. Prerequisite: EDUC 481. Offered: W.

EDUC 483 Community-Based Capstone III (5) Culminating seminar to present community-based project, situate community work within course of study and prepare for graduate study and/or job market. Prerequisite: EDUC 482.

EDUC 482 Community-Based Capstone II (5) Intensive community-based internship experience, including the completion of a substantial product that contribute to the organization’s mission and current initiatives. Prerequisite: EDUC 481. Offered: W.

EDUC 483 Community-Based Capstone III (5) Culminating seminar to present community-based project, situate community work within course of study and prepare for graduate study and/or job market. Prerequisite: EDUC 482.

EDUC 502 Advanced Practicum in Classroom Teaching and Management (1-18, max. 20) In-depth classroom practicum experiences to certificated teachers working on additional endorsements. Arrangements must be made prior to enrolling with an adviser in the Teacher Education Office. Offered: AWSpS.

EDUC 700 Master’s Thesis (*) Prerequisite: permission of faculty adviser and Graduate Program Coordinator. Offered: AWSpS.

EDUC 750 Capstone Experience (2-10, max. 30) Provides advanced opportunities to integrate theory and practice through a capstone learning and research experience. Prerequisite: permission of faculty adviser and Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

EDUC 800 Doctoral Dissertation (*) Prerequisite: permission of Supervisory Committee Chairperson and Graduate Program Coordinator. Offered: AWSpS.

EDUC 801 Practice Doctorate Project/Capstone (*) Prerequisite: permission of Supervisory Committee Chairperson and Graduate Program Coordinator. Offered: AWSpS.

EDUCATIONAL LEADERSHIP AND POLICY STUDIES

EDLPS 302 Introduction to Education Policy: Research, Theory, and Practice (5) M. Sun Introduces students to basic research, theory, and practice about educational policy and its influence on student educational outcomes, as well as longer-term outcomes such as future earnings. Discusses the ways in which educational inequalities seen in settings from early-childhood through university contribute to broad social and economic inequality. No prior knowledge or experience is required. Offered: Sp.

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with LAW 444.

EDLPS 458 Education in the Forming of American Society (5) I&S Beadie Covers the development of American education in cultural context; history of schools and non-school learning from colonial period to the twentieth-century; apprenticeship and learning societies; community and market-based schooling; liberal learning and the rise of the university; and schools as agencies of economic and political integration and mediators of culture and social status. Offered: jointly with HSTAA 458.

EDLPS 479 Crucial Issues in Education (3) Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 10) Study of such topics as planning, development, supervision, organization,
EDLPS 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6) First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the Danforth Principal/Program Administrator Preparation Program.)

EDLPS 502 Leadership Core ([3-6]-, max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

EDLPS 503 Leadership Core ([3-6]-, max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

EDLPS 504 Leadership Core ([3-6], max. 6) Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (1-, max. 3) Designed for students in the Danforth Educational Leadership Program. Introduces students to applied educational research concepts; how to conduct inquiry project(s) within schools, with a focus on equity; and to write a research paper around the inquiry project. Prerequisite: admission to Danforth Principal/Program Administrator Program.

EDLPS 506 Intercollegiate Athletic Leadership: Foundations of Leadership (3) S. LOPEZ Focuses on theoretical frameworks and research used to explore athletic leadership within higher education and issues driving athletic department policies and practices. Students develop skills and strategies for leadership and decision-making that enhance student-athlete opportunities and enrich the role of athletics within the educational experience. Offered: S.

EDLPS 507 Intercollegiate Athletic Leadership: Coaching Philosophy and Pedagogy (3) S. LOPEZ Helps athletics coaches develop skills and strategies for decision-making that enhance student-athlete opportunities and enriches the role of athletics within the educational experience. In addition to examining coaching philosophy and mission, students learn and practice basic instructional techniques and coaching pedagogy. Offered: S.

EDLPS 508 Intercollegiate Athletic Leadership: Development and Fundraising in Higher Education (3) Covers the importance of a comprehensive development plan for the university and intercollegiate athletic department, along with the basic components of development including research, solicitation, stewardship, annual campaigns, and major gifts. Also explores marketing, promotions, sponsorships and communications departments. Offered: S.

EDLPS 509 Intercollegiate Athletic Leadership: Leadership and Management Capstone (2) Explores the breadth of athletic management through leadership lens. Explores organization mission and
culture, while examining their own leadership styles and practices. Participation in case studies, leadership training, crisis management exercises, and other activities designed to analyze and respond to real-world situations. Offered: S.

**EDLPS 510 School Finance (3)** Margaret L Plecki
Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

**EDLPS 511 School-Community Relations (3)**
Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

**EDLPS 512 Intercollegiate Athletic Leadership: Events and Facilities Planning and Management (3)** H. OLSON
Athletic departments must plan and manage a variety of events including team practices, competitions, alumni activities, hosted tournaments, and outreach activities. Engages students in understanding the planning process and operations around event production, facilities management, staffing, scheduling, and other event services. Also examines capital planning. Offered: A.

**EDLPS 513 Intercollegiate Athletic Leadership: Marketing and Communications in Intercollegiate Athletics (3)** GREGG GREENE
Participants learn the inner workings of a sports organization, gaining broad insight into the areas such as: media relations, public relations, sales, recruiting, branding, sponsorship, ticket sales, event promotions, the use of social media. Students strategize and practice communication an effective message delivery through a variety of mediums. Offered: A.

**EDLPS 514 Intercollegiate Athletic Leadership: Informing Policy and Decision-Making with Data (3)** J. HOFFMAN
Focuses on methods of assessment and evaluation with a focus on strategic planning and decision-making, accountability systems and assessment-driven decision-making. Students learn to use practical statistical skills, with an emphasis on the use and interpretation of data to guide decision-making. Offered: W.

**EDLPS 515 Intercollegiate Athletic Leadership: Ethical Leadership in Collegiate Athletics (3)**
Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

**EDLPS 516 Special Education and the Law (3)** Brown
Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDSPE 504.

**EDLPS 517 Intercollegiate Athletic Leadership: Physical Training and Preparation (3)** Athletics coaches work to develop a student-centered training program that maximizes athlete performance and wellness. Students explore leadership, policy, and program planning and implementation based on human development theory and current issues with sport performance. Offered: A.

**EDLPS 519 Special Topics in Educational Leadership ([0-10]-, max. 20)**
Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary.

**EDLPS 520 Education as a Moral Endeavor (3)** J. WILLIAMSON-LOTT
An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions.

**EDLPS 521 Philosophy of Education (3)** D. KERDEMAN
Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

**EDLPS 522 Social Science, Social Justice, and Qualitative Research (3)** D. KERDEMAN
Intensive
study of the writings of selected contemporary philosophers of education. Offered: WS.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) D. KERDEMAN Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives. Offered: WS.

EDLPS 525 Educational Inquiry (3) D. KERDEMAN General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Prerequisite: doctoral status in education. Credit/no-credit only. Offered: A.

EDLPS 526 Educational Inquiry (3) D. KERDEMAN General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Prerequisite: doctoral status in education. Credit/no-credit only. Offered: W.

EDLPS 528 Current Issues in Graduate Education (3) M. NERAD Examines recurrent forces impacting U.S. graduate education including but not limited to research funding, intra-institutional pressure, student unions, and accountability. Analyzes the current literature from different perspectives: historical, psychological, sociological, economic, and educational to illuminate the complexities of graduate education.

EDLPS 530 History of Education (3) N. BEADIE Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

EDLPS 531 History of American Higher Education (3) Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 535 Historical Inquiry in Education Research (3, max. 6) N. BEADIE Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

EDLPS 536 Historical Problems in the Transfer of Culture (4) N. BEADIE Provides an analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Pays special attention to issues of cultural conflict, cultural change, and curricula as representations of culture. Examines problems of evidence and interpretation in exemplary historical works.

EDLPS 537 Perennial Debates in the History of Education (3) J. WILLIAMSON-LOTT Analysis of the historical underpinnings of debates about educational issues.

EDLPS 538 Education for Liberation (3) J. WILLIAMSON-LOTT Analyses of the different educational histories of American ethnic, social, gender, and religious groups and how they relate their own definitions of "education for liberation."

EDLPS 539 History of Urban Education (4) Beadie Examines the complex ways that race, class, real estate interests, the quest for social mobility, and a range of government policies have interacted to structure the social and spatial distribution of educational opportunity in cities historically. Includes a comparative historical analysis of urban case studies, including Seattle.
EDLPS 540 Sociology of Education (3) Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

EDLPS 542 Seminar in Educational Sociology (3) Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

EDLPS 544 Comparative Education: Introduction to Concepts and Methods (3) Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomethodological tools of interview construction, cross-cultural observation strategies, documentary analysis. Education policy and practice is primary focus; useful for comparing other public policy issues internationally.

EDLPS 545 Knowledge and Data in Relation to Action ([0/3]-, max. 3) Introduces Leadership for Learning (L4L) students to systematic inquiry - to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. Prerequisite: admission to the Leadership Learning program.

EDLPS 546 Leadership Inquiry I: The Design of Research on Local Problems of Practice ([0/3]-, max. 3) Examines evaluation design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice. Prerequisite: admission to the Leadership Learning program.

EDLPS 547 Inquiry and Data-Informed Leadership I ([0/3]-, max. 9) Deepens students' understanding of a cycle of inquiry approach to strengthen their leadership, with a particular emphasis on working with evidence from a systemic, equity, and excellence stance. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 548 Inquiry and Data-Informed Leadership II ([0/3]-, max. 9) Strengthens students' engagement with and application of cycle of inquiry approach to their leadership practice. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 549 Special Topics in Educational Studies (1-6, max. 20) Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary.

EDLPS 550 The Dynamics of Educational Organizations (4) Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations.

EDLPS 551 Organizational Theory and Educational Change (4) Introduces students to the interdisciplinary research literature on organizations and its applicability to the research and practice of educational organizations. Engages students in understanding and critiquing organizational research and using it to develop conceptual frameworks to guide educational research and practice.

EDLPS 552 Organizational Change in Education (3) Change and innovation in educational organizations. Theoretical approaches include sociopsychological, rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).

EDLPS 553 Human Resources in Educational Organizations (3) Analysis of factors involved in human resource problems related to operation of educational organizations. Motivation, perception, communication, role analysis, and dynamics of groups are studied through use of cases and seminal literature.

EDLPS 554 Professional Growth Planning I (5) Supports students' professional growth and development, as simultaneously builds a
professional culture and network among cohort members to maximize student success in the program. Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only. Offered: S.

EDLPS 555 Professional Growth Planning II (5) Supports students' professional growth and development, and scaffolds the internship and capstone portfolio processes within a professional culture and network that maximized student success in the program. Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only.

EDLPS 556 Leadership for Equitable Systems I (2-6, max. 9) Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include resource allocation and an introduction to policy design and implementation. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 557 Leadership for Equitable Systems II (2-5, max. 9) Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include governance, collaborative decision-making, and the design and redesign of organizations. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 558 Introduction to Qualitative Research Methods in Education (3) A. ELFERS Provides a basic overview of qualitative research methods. Covers the purpose, design, and conduct of qualitative research.

EDLPS 560 Educational Policy Studies and Practice (3) M. Sun An introduction to key policies, reforms, and issues in education, with a central focus on policy actors, instruments, and actions in promoting excellence and equity in education. We discuss theoretical frameworks and analytical models to examine research studies and practice in U.S. schools and beyond. Offered: A.

EDLPS 561 Education Policies and Leadership in Political Context (3) Systematic consideration of the structure and function of educational policies and problems of research in political context.

EDLPS 562 American School Law (3) Examination of persistent legal issues, including an analysis of how these issues are manifest in public policy debates.

EDLPS 563 Education, The Workforce, and Public Policy (4) Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, and among the various levels of the education system, underutilized workers, race and gender issues, and the role of education and training in economic development. Offered: jointly with PUBPOL 571.

EDLPS 564 Seminar in Economics of Education (3) M. Plecki Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Race, Equity, and Leading Educational Change (3) An introduction to key leadership theories, research, and practice, with a central focus on issues of race, class, power and privilege in addressing educational inequities. Applies a leadership lens to examine research and problems of practice in organizational transformation in U.S. schools and educational organizations.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3) Examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3) Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

EDLPS 568 Policy Evaluation in Education (3) Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of
the uses of policy evaluation information in shaping organization-decision making is also included.

EDLPS 569 Issues in P-12 School Reform (3-5, max. 20) Copland, Knapp Offers rigorous ways to explore the meaning and action implications of contemporary reform movements in the P-12 public school system. Examines a different topic each quarter concerning reform at school, district, state, or federal levels through readings, discussion, projects, and analytical writing assignments. Offered: AWSp.

EDLPS 571 Instructional Leadership I ([0/3]-, max. 9) Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 572 Instructional Leadership II ([2-5]-, max. 9) Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems with emphasis on bringing instructional leadership to scale at the district level. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

EDLPS 573 Professional Learning and Instructional Renewal (2-4, max. 4) Investigates professional learning and how to support it, based on cognitive research, sociocultural theory, and scholarship on teacher education (preservice and inservice). Offers system-level leaders ways to address the quality of teaching and learning in classrooms. Prerequisite: admission to the Leadership Learning program.

EDLPS 574 Mixed Methods in Educational Research (3) M. Pleckli Introduces the principles of mixed methods research design, whereby qualitative and quantitative components inform each other in sampling, data collection, and data analysis. Explores design issues and solutions primarily in the context of education policy research. Offered: W.

EDLPS 575 Education Policy Implementation (4) M. Honig Analyzes influences on implementation outcomes. Focuses on how skilled use of theoretical frameworks can help reveal relationships between policy and practice and evidence-based decisions that may improve implementation. Credit/no-credit only. Offered: Sp.

EDLPS 579 Special Topics in Organizational and Policy Analysis ([0-6]-, max. 20) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary.

EDLPS 580 The American College and University (4) Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 581 Principles and Practices of Adult and Continuing Education (3) History and development of adult and continuing education in the United States: component parts of the field; issues, theory, and research; program planning for adults; professionalization of the field.

EDLPS 582 Seminar in the History and the Organization of Higher Education (3) Advanced seminar in the history and organization of higher education.

EDLPS 583 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3) Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

EDLPS 585 Resource Allocation in Higher Education (3) After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).
EDLPS 586 Navigating the P-20 Pipeline (3) J. MYERS TWITCHELL Introduction to programs, policies, and challenges related to supporting students as they transition from K-12 schools to institutions of higher education. Exploration of localized/region-based efforts to decrease the post-secondary opportunity gap, including funding models, collaborations and networks, and data and measurement strategies to increase rates of post-secondary attainment. Offered: A.

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9) Theory and practice of instruction and learning in higher education.

EDLPS 588 Leadership and Management in Higher Education (4) J. LOTT Introduction to enduring and emerging philosophical and theoretical perspectives on leading and managing in college and university settings. Provides tools to be more explicit with the ways in which leaders and managers go about their work in higher education. Offered: W.

EDLPS 589 The Community College (3) Intensive study of the community college-its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 590 Student Populations and Experiences in Higher Education (3-4) Examines foundational literature on students in United States higher education. Focuses on student diversity, similarities and differences in their experiences, and the role of societal values, campus climate and structure, family, work, and peers on student access, engagement, well-being, and success. Offered: Sp.

EDLPS 591 Higher Education and Public Policy (3) Covers public policy processes affecting higher education. Issues examined vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

EDLPS 592 Higher Education Equity, Reform, and Policy (3) Develops the critical and analytical lens that students apply to public policy issues as they directly relate to higher education in the United States.

EDLPS 593 Assessment and Evaluation in Higher Education (3) Covers the key components of evaluation design and implementation, particularly what researchers and practitioners define as good assessment and evaluation approaches. Develops competencies in planning assessment and evaluation strategies using these approaches.

EDLPS 594 Globalization and Internationalization of Higher Education (4) M. NERAD Impact of globalization on higher education and strategies used by higher-ed institutions to achieve internationalization. Conceptual frameworks linking higher education institutions to economic competitiveness in the global economy. Critically analyzes recent local (UW, community colleges), national, and international initiatives and activities to achieve internationalization of the institutions and global awareness of students, faculty, staff. Offered: AS.

EDLPS 596 Secondary Data Analysis (3-5) Joe L. Lott II. Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: basic understanding of educational statistics.

EDLPS 597 Advanced Secondary Data Analysis (3) J. LOTT Applied methods. Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: EDLPS 596.

EDLPS 598 Special Topics in Higher Education (1-6, max. 20) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges, and universities. Topics vary.

EDLPS 599 Independent Studies in Education (1-10, max. 20) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the
College of Education. Prerequisite: permission of instructor.

**EDLPS 600 Independent Study or Research (*/-)**

Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor. Credit/no-credit only.

**EDLPS 601 Internship ([1-4]-, max. 20)** Name of faculty member responsible for supervising the student should be indicated on program of studies. Prerequisite: permission of Supervisory Committee Chairperson or Graduate Program Adviser. Credit/no-credit only.

**EDUCATIONAL PSYCHOLOGY**

**EDPSY 302 Child Development and Learning (5) I&S**

Uses readings, discussions, naturalistic observations, and "virtual" children to understand the different ways children develop - physically, cognitively, social-emotionally, in language and literacy, and in approaches to learning - during early childhood, the interplay between each of these domains and the environmental context, and the theories about the developmental mechanisms underlying these changes.

**EDPSY 305 Applied Child Development and Learning (5) I&S**

Examination of the latest research on brain development in early childhood and the application of this knowledge in the creation of learning environments that promote physical, language, cognitive, social, and emotional development. The roles of family, classroom, and community provide context to build relationships that support each child's development.

**EDPSY 380 Adult Learning and Development (5) I&S C. GLASS HASTINGS**

Examination of current research and practice in the field of adult education, learning, and development. Offered: AWSpS.

**EDPSY 404 Adolescent Development (5) J. LOTT**

Students use readings, discussion, and interview data to understand adolescent development. Discusses multiple domains of development, as well as the contextually situated nature of adolescence. Highlights implications for educators, policy makers, and others who serve the needs of adolescents throughout the course. Offered: W.

**EDPSY 405 Adolescents and Media: Challenges in the 21st Century Classroom (3) I&S**

Encourages students to consider classrooms of the future while reflecting on their own classroom experiences. Examines adolescents' informal use of media today, some of the ways media can affect young people, and the implications of these effects in a classroom setting.

**EDPSY 406 Learning and Teaching in our Changing World: Insights from Experience and Research (5) I&S**

Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline.

**EDPSY 420 Bullying, Revenge, and Belonging: Cultural Perspectives on Social Power (4) I&S, DIV**

Examines theories and research on bullying, revenge, and bystander behavior with a particular focus on cultural norms. Identifies the institutional, social, emotional, and ethical characteristics and processes that support exploitive relationships, revenge and their inclusive alternatives. Practical interventions are presented and evaluated.

**EDPSY 425 Bullies, Victims, and Bystanders: Social Power In (4) I&S**

**EDPSY 431 Strategies for Classroom Research and Evaluation (5)**

Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/no-credit only.

**EDPSY 447 Principles of Guidance (3)**

Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists with emphasis on the role of the classroom teacher in school guidance programs. Designed for teachers, administrators, and prospective teachers.

**EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6)**

Special studies for counselors, teachers, administrators, and others concerned with student
personnel and psychological services in schools and colleges. Focuses on special topics that have either local or contemporary significance.

**EDPSY 471 Educational Neuropsychology (5)**  
NW Berninger Covers brain systems underlying normal development and academic learning: sensory and motor, language, cognitive, social emotional, and executive-functions for self-regulation alone and interaction with the physical and social worlds in and out of school.

**EDPSY 472 Teaching Reading, Writing, and Math with Brain in Mind (5)** I&S Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other -regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains) . Prerequisite: EDPSY 471. Instructors: Berninger Offered: Sp.

**EDPSY 490 Basic Educational Statistics (3)** NW, QSR Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSpS.

**EDPSY 491 Intermediate Educational Statistics (3)** QSR Covers intermediate-level concepts in analysis of variance and regression methods. Emphasizes understanding appropriate use of methods, conducting analyses using software, and correctly interpreting statistical results. Includes SPSS/PASW software instruction. Prerequisite: EDPSY 490. Instructors: Abbott, Sanders Offered: W.

**EDPSY 495 Introduction to Educational Measurement (3)** QSR Practical understanding of test reliability, validity, and derived scores as they apply to external educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale assessment. Prerequisite: EDPSY 490. Offered: Sp.

**EDPSY 499 Undergraduate Research (**)** Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

**EDPSY 500 Field Study I: Academic Consultation (1-3, max. 6)** K. MISSALL Includes study and practice in methods of Tier II academic consultation within an MTSS framework. Prepares students to effectively work with other professionals to better meet the social-emotional and behavioral needs of students and improve the learning environment for students identified as behaviorally and academically 'at-risk'. Prerequisite: EDPSY 554. Offered: WSp.

**EDPSY 501 Human Learning and Educational Practice (3)** Systematic examination of current research about human learning in educational settings, including the study of behavioral, information processing, social construction, and the developmental perspectives on learning. Offered: AWSpS.

**EDPSY 502 Developmental Foundations of Early Learning (3)** Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

**EDPSY 503 Culture Learning and Development (4)** M. BANG Explores influential contemporary research and theory they view culture as foundational to learning and development. Considers these issues in a range of settings (classrooms, informal environments, families, early childhood to adult learners, etc.) and within specific domains (e.g. science, literacy, mathematics. Prerequisite: EDPSY 501 and graduate status in education or psychology. Credit/no-credit only. Offered: A.

**EDPSY 504 Intercollegiate Athletic Leadership: Athlete and Team Wellness (3)** Polo DeCano Explores the responsibility of athletics coaches to develop a team culture oriented toward the welfare of student-athletes. Discusses how psychological and physiological factors affect athlete performance and overall wellness. Explores strategies for team motivation, group cohesion, and resiliency. Offered: Sp.

**EDPSY 505 Field Study II: Tier III Interventions (1-2, max. 3)** Individual study of an educational problem in the field under the direction of a faculty member.
Prerequisite: EDPSY 557 Credit/no-credit only. Offered: AWSp.

**EDPSY 506 Instructional Theory (3)** Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

**EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5)** Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with teachers regarding educational interventions. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Instructors: Cook Offered: A.

**EDPSY 508 Advanced Practicum in Supervision and School Mental Health (2-6, max. 20)** S. KING Advanced practicum in providing in counseling, consultation, and behavioral interventions in schools while also supervising field study students in providing basic interventions. Offered: A.

**EDPSY 509 Educational Issues in Human Development (5)** Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology.

**EDPSY 510 Cognition in the Context of the School Curriculum (3)** Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Instructors: Bell, McCutchen

**EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6)** Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

**EDPSY 512 Classroom Assessment Strategies (3)** Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics. Prerequisite: EDPSY 490 or equivalent.

**EDPSY 513 Instrument Development (3)** Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies; ethics in test administration and interpretation. Intended for doctoral or master’s students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

**EDPSY 514 History of Educational Technology (3)** Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

**EDPSY 515 Current Issues in Technology and Education (3)** Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology.

**EDPSY 516 Survey of Educational Technology Research (2-, max. 4)** Critically examines active research projects in educational technology. Critiques of research practice.

**EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3)** Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic teaching. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDC&I 460, EDC&I 462, other reading courses, or permission of instructor. Instructors: Valencia

**EDPSY 519 Vulnerable Children and Families in Comparative Perspective: Psychosocial Development Processes (3)** Jegatheesan Research
and theory examining the effects of disability, poverty, trauma, and immigration and its impact on child development across cultures, effective interventions in educational and non-educational settings, and the consequences of critical issues in the context of psycho-social and development processes in different cultural and international contexts. Offered: Sp.

**EDPSY 520 Psychology of Reading (3)** Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development, and meaning in reading, psychology of reading interests, and skills. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

**EDPSY 521 Psychology of Writing (3)** Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

**EDPSY 522 Teaching Reading, Writing, and Math with Brain in Mind (5)** Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other-regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains). Prerequisite: EDPSY 471, EDPSY 577, or permission of instructor. Instructors: Berninger Offered: Sp.

**EDPSY 523 Foundations of Ethnographic Research (3)** Jegatheesan Exploration of the main components of ethnographic endeavor. Students conduct ethnographic research including field entry, observing, listening, data analysis, and writing; typical issues and quandaries encountered in carrying fieldwork in a variety of settings, ethical issues, comprehension, intrusion, and access, experience and empathy, and power dynamics, and predicament.

**EDPSY 524 Problem Solving and Critical Thinking in Education (3)** Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

**EDPSY 525 Creativity and Education (3)** Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: EDPSY 501 or equivalent.

**EDPSY 526 Seminar on Metacognition (3)** Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor. Instructors: Nolan

**EDPSY 527 Transfer of Teaching (3)** Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Prerequisite: EDPSY 501 and graduate status in education or psychology. Instructors: Bell, Shouse Credit/no-credit only.

**EDPSY 528 Achievement Motivation in Education (3)** Critical review of current research and major theories of achievement motivation in schools and other educational settings. Emphasis on the relationship of theories to the contexts and practice of education. Prerequisite: EDPSY 501 or permission of instructor. Instructors: Nolan Offered: WS.

**EDPSY 529 Developmental Psychopathology and the DSM (2)** W. LAU Provides an opportunity for advanced doctoral students to learn the basics of using the Diagnostic and Statistical Manual for Mental Disorders (DSM) for assessment and diagnosis in clinical practice; and learn about childhood disorders across the lifespan. Offered: A.

**EDPSY 530 Vygotsky’s Socio-Cultural Approach to Mind (5)** Critical reading and discussion of the work
of L.S. Vygotsky as well as contemporary psychologists and educators who have investigated cognition in social context. Discusses the implications of these approaches for the design of learning environments. Prerequisite: EDPSY 501. Instructors: Herrenkohl Credit/no-credit only. Offered: W.

EDPSY 531 Socialization of School-Age Children (3) Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are reviewed on the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent.

EDPSY 532 Adolescence and Youth (3) Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3) Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 591 or equivalents.

EDPSY 534 School Problems of Adolescence (3) Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3) N. Hertzog Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

EDPSY 536 Immigrant and Indigenous Children: Social Context of Learning (3) Jegatheesan Focuses on the broad context of family, school, and society of immigrant and indigenous young children in the United States. Introduces the complex interplay of socio-cultural and psychological factors that impact these children's learning. Offered: WS.

EDPSY 537 Teaching and Learning Science with Indigenous Students (3) Megan Bang Provides an overview of the opportunities and challenges in teaching science to Indigenous learners. Students develop relevant pedagogical frameworks to approach problems of practice and develop high-leverage instructional practices for Indigenous students. Focused on Indigenous students however is relevant to other under-achieving populations. Offered: Sp.

EDPSY 538 Multiple Regression (3) Quantitative methods for students in the social, behavioral, and health sciences. Focuses on understanding, estimating, interpreting, and reporting results for univariate multiple regression models for metrical and categorical outcomes, from a frequentist perspective. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 540 School Psychological Assessment (5) Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests. Prerequisite: admission to School Psychology program. Instructors: Jones Offered: A.

EDPSY 544 Counseling (4) J. Mazzu Competency-based skills training for beginning counseling and school psychology students. Covers attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: admission to School Psychology program. Offered: W.

EDPSY 545 Prepracticum (3) Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.
EDPSY 546 Counseling Practicum (3-5, max. 20) J. MAZZA Supervised practice in counseling. Prerequisite: admission to School Psychology program; EDPSY 544. Offered: Sp.

EDPSY 548 Educational Implications of Personality Theory (5) J. MAZZA Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisite: admission to the School Psychology program. Offered: A.

EDPSY 549 Seminar in Consultation Methods (3) Theory and practice of process consultation in educational settings. Field practice in teams with clients. Prerequisite: admission to the School Psychology program. Instructors: Cook Offered: W.

EDPSY 550 Family Counseling (3) Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: graduate standing in school psychology or permission of instructor. Instructors: Jones Offered: W.

EDPSY 551 Group and Behavioral Intervention (3) Introduction to competency-based skills for beginning school psychology students. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: admission to School Psychology program. Instructors: Cook Offered: Sp.

EDPSY 552 Multicultural Issues in School Counseling and School Psychology (3) Examination of multicultural issues as they relate to the delivery of services provided by school counselors and school psychologists. Theoretical and applied aspects emphasized and case study format utilized. Prerequisite: admission to School Psychology program. Offered: Sp.

EDPSY 553 School Psychology Services with Special Populations (3) Examines current issues in working with youth in special populations, as well as intervention strategies to help these students within the mainstream school environment. Prerequisite: admission to School Psychology program.

EDPSY 554 Introduction to Multi-Tiered Systems of Support (3) K. MISSALL Teaches the Multi-Tiered Systems of Support framework and provides instruction on how to conduct assessment, consultation, and evaluation intervention program effectiveness using both a direct service delivery as well as an indirect model (consultation). Offered: A.

EDPSY 556 Applied Social Psychology: Implications for Education (3) Provides students with the knowledge and understanding of how social psychology is applied within school settings and how it can be used to help develop effective strategies for psychological services. Prerequisite: admission to School Psychology program. Instructors: Cunningham, Mazza Credit/no-credit only. Offered: W.

EDPSY 557 Tier III Interventions for School Psychologists (3) Provides school psychology students with a multitier framework in working with challenging students in schools. Provides explicit instruction on functional behavioral assessment, including content and training in how to work with youth who are at-risk or have engaged in self-harming and/or suicidal behavior. Prerequisite: admission to School Psychology program. Instructors: Cook, Mazza Offered: Sp.

EDPSY 558 Generalizability Theory (3) M. Li Focuses on various designs and applications used with the Generalizability theory framework to estimate the amount of score variation associated with a measurement procedure, approach the reliability and validity issues, and optimize the measurement procedure. Prerequisite: EDPSY 490; EDPSY 592; EDPSY 593 or equivalent; recommended: Introduction to educational statistics and measurement so that students are familiar with the basic concepts and procedures that we will continue working on in this course. Offered: W, odd years.

EDPSY 559 Validity Theory (3) M. Li Introduces students to different perspectives and theories of test validity and to the process of accumulating validity evidence for measures used in educational field. As an advanced measurement course, we will address the argument-based validation approach proposed by Kane, and analyze important technical
and philosophical aspects of test validity and validation. Prerequisite: EDPSY 490 and EDPSY 592; recommended: Understand the concepts of reliability and validity as well as the statistical procedures used to evaluate different types of validity claims under the classical test theory framework. Offered: W, even years.

EDPSY 560 Advanced Practicum in Personality Assessment (3) Designed for doctoral-level school psychologists to learn advanced personality assessment for diagnosis of emotional and behavior disorders. Prerequisite: admission to School Psychology program; EDPSY 540; EDPSY 564. Open to doctoral students only. Instructors: Jones

EDPSY 562 Group Counseling in Schools (3) Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: EDPSY 561 or permission of instructor. Offered: W.

EDPSY 564 Practicum in School Psychology (1-6, max. 20) Practicum in assessment and consultation, emphasizing diagnosis of behavior and learning disabilities, and focusing on techniques acquired in EDPSY 507 and EDPSY 540. Prerequisite: admission to School Psychology program; EDPSY 507; EDPSY 540. Instructors: Jones, Lau Offered: W.

EDPSY 565 Advanced Practicum in Clinical Practice for Children and Adolescents with Psychopathology (4, max. 24) J. Jones Designed for doctoral level school psychologists to learn advanced skills in clinical practice for working with children and adolescents with a range of childhood psychopathologies, under the supervision of a licensed psychologist. Prerequisite: EDPSY 544 and EDPSY 546, or equivalent and advanced graduate standing in the school psychology program. Offered: AWSp.

EDPSY 566 Case Study Seminar (1-6, max. 20) Integrating theoretical concepts with practice/service issues. Cases selected for discussion represent a wide range of problems found in schools. Activities include group supervision and peer review. Prerequisite: graduate standing in school psychology. Instructors: Grady Offered: AWSp.

EDPSY 567 Applied Quasi-experimental Research in Education and other Social Sciences (3) M. SUN Introduces research designs and statistical models that are often applied to large-scale longitudinal data. These models include, but not limited to, instrumental variables, difference-indifferences, propensity score matching, regression discontinuity, and fixed-effect estimates. Offered: A.

EDPSY 568 Seminar in Professional Issues and Ethics (3) Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, continuing education, publishing, and presenting research papers. Prerequisite: graduate standing in College of Education or permission of instructor. Instructors: Provenzano Credit/no-credit only. Offered: W.

EDPSY 569 Learning and the Interaction Order (3) K. TAYLOR Covers research methods course for students using video and/or audio recordings as data in studies of learning and teaching. Students learn how to make evidence-based inferences about people’s learning or teaching as captured by video/audio recordings by content logging, selecting, transcribing, and analyzing moments of interaction. Offered: S.

EDPSY 570 Introduction to School Psychology (2, max. 20) J. MAZZA Current issues in professional psychology practice and research. Prerequisite: admission to School Psychology program. Offered: A.

EDPSY 571 Educating Individuals with Biologically Based Disabilities (5) Reviews the history of neural science and its interdisciplinary roots, brain imaging methods and web resources, basic terminology and concepts for microscopic and larger neurological structures, functions, organizing principles and chemical bases, with focus on application to diagnosing and teaching students with developmental, learning, psychiatric, neurological, and medical disorders. Prerequisite: graduate standing in school psychology or inst Offered: W.

EDPSY 572 Social-Emotional Assessment (3) Techniques in social-emotional assessment of school-aged children. Diagnostic systems presented in conjunction with assessment techniques. Emphasis on an integrative method for understanding social emotional assessment batteries
and reliability and validity of their test score interpretation. Prerequisite: admission to School Psychology program. Instructors: Cunningham Offered: A.

**EDPSY 573 Psychological Assessment of Preschool Children (5)** Students learn to give and interpret tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Prerequisite: graduate standing in school psychology and permission of instructor. Instructors: Olson Offered: Sp.

**EDPSY 575 Structural Equation Modeling (3)** Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: EDPSY 594 or equivalent. Instructors: Abbott Offered: WS.

**EDPSY 576 Hierarchical Linear Models (3)** Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: EDPSY 593 or equivalent. Instructors: Abbott Offered: WS.

**EDPSY 577 Neuropsychology of Learning and Behavior Problems (5)** Brings together our understanding of neuropsychology and specific behavioral and learning problems to provide a foundation for practitioners to consider neuropsychological contributors to problems observed in clinical and educational settings. Credit/no-credit only. Offered: Sp.

**EDPSY 578 Educational Applications of Neuropsychology: Assessment and Intervention (5)** Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders for which school psychologists can provide assessment and consultation. Prerequisite: EDPSY 540 or equivalent course in individual testing, and EDSPY 577 or permission of the instructor. Instructors: Berninger

**EDPSY 579 Advanced Practicum in Neuropsychological Assessment and Neurodevelopmental Intervention (2, max. 12)** R. Bernier, E. Olson Provides advanced clinical training in neuropsychological assessment and evidence-based interventions for children with neurodevelopmental and/or mental health disorders. Training includes supervised administration of neuropsychological assessments and delivery of interventions with individuals and/or groups in clinic settings that provide services to children with suspected neurocognitive disabilities. Offered: AWSp.

**EDPSY 580 Seminar: The Emergence of Educational Psychology (3)** Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to the later twentieth century.

**EDPSY 581 Seminar in Educational Psychology (1-5, max. 20)** Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Offered: AWSpS.

**EDPSY 582 Seminar in Development and Socialization (3, max. 15)** Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis placed upon empirical research and its theoretical underpinnings in such areas as cognitive development, moral development and education, self-concept development, and related concerns. Prerequisite: graduate standing in College of Education or instructor permission. Instructors: Herrenkohl, Jegatheesan, Nolen, Kazemi

**EDPSY 583 Seminar in Learning and Thinking (3, max. 15)** Seminar in the psychology of learning language and language learning. Each seminar is offered with predesignated emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics. Prerequisite: graduate standing in College of Education or instructor permission.

**EDPSY 584 Seminar in Quantitative Methods (3, max. 15)** Seminar on such topics as measurement techniques, research design, psychometrics, and statistics. Prerequisite: EDPSY 490 and instructor permission. Instructors: Li, Taylor

**EDPSY 585 History, Systems, and Contemporary Issues in School Psychology (3)** Covers the history, systems, and research relating to the contemporary issues relevant to research and practice of school
psychology. Meets APA and Washington state requirements for course in history and systems of psychology. Prerequisite: admission to School Psychology program. Instructors: Jones, Mazza Credit/no-credit only. Offered: Sp.

EDPSY 586 Qualitative Methods of Educational Research I (4) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics, and permission of instructor. Offered: A.

EDPSY 587 Qualitative Methods of Educational Research III (5)

EDPSY 588 Survey Research Methodology and Theory (3) Survey research, research, theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 589 Scholarly Writing in Education and Psychology (3) Introduction to the demands and expectations for technical writing in education and psychology, including aspects of the culture of scholarship. Designed for competent writers. Does not address basic grammar and composition. Prerequisite: doctoral standing, and permission of instructor. Credit/no-credit only.

EDPSY 590 Computer Utilization in Educational Research (3) Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solutions by computer. Using an interactive system, editors, and program packages. Prerequisite: EDPSY 490.

EDPSY 591 Methods of Educational Research (3) Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis, and interpretation. Prerequisite: EDPSY 490. Offered: WSp.

EDPSY 592 Advanced Educational Measurements (3) Theory of measurement; an examination of assumptions involved in test theory, errors of measurement, factors affecting reliability and validity, and item analysis and standards for educational and psychological tests. Prerequisite: EDPSY 490. Instructors: Li Offered: Sp.

EDPSY 593 Experimental Design and Analysis (5) Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 595 Item Response Theory Models of Testing (3) In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

EDPSY 596 Program Evaluation (3) Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluators. Prerequisite: EDPSY 593, EDPSY 594, EDC&I 597, or permission of instructor. Instructors: Mazza

EDPSY 597 Technical Requirements of Large Scale Tests (3) Theoretical and practical understanding of the quantitative aspects of large-scale tests, including: scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 595.

EDPSY 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Offered: AWSpS.

EDPSY 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

EDPSY 601 Internship (3-10, max. 30) Offered: AWSpS.

SPECIAL EDUCATION

EDSPE 304 Exceptional Children (3) I&S, DIV Covers the knowledge of the field of special education including laws, practices, procedures, and controversies. Focuses on information about
children with disabilities studied from the point of view of education. Offered: WSp.

**EDSPE 415 Foundations in Reading and Dyslexia (3)** I&S, DIV Roxanne F. Hudson Provides an overview of theoretical foundations of reading and the characteristics, causes, and treatments of dyslexia. Addresses information about the history of dyslexia, perspectives of people with dyslexia, educational policies and laws related to dyslexia, and educational and technological supports for success in reading and writing text. Recommended: either EDSPE 304, or familiarity with children with disabilities from an educational perspective; and either EDPSY 302, or familiarity with the different ways children develop. Offered: A.

**EDSPE 422 (dis) Ability, Education, and the Arts (5)** VLPA, DIV Cultural perspectives on disability and education, as interpreted through arts-based inquiry.

**EDSPE 427 Introduction to Applied Behavior Analysis (5)** I&S/NW I. SCHWARTZ Presents an introduction to the science of behavior known as applied behavior analysis. Focuses on basic behavioral principles (e.g., reinforcement), defining behaviors, measuring behaviors, effective strategies to teach new skills, and the ethics involved in behavior change programs. Offered: WSp.

**EDSPE 435 Introduction to Autism Spectrum Disorders (5)** I&S, DIV Provides an overview of the characteristics, causes, treatments, and controversies about autism spectrum disorder (ASD). Addresses information about the history of the disorder, assessment strategies, and types of interventions. Offered: Sp.

**EDSPE 460 Early Literary Instruction (3)** Covers the theory and educational practices in early literacy including emergent literacy development, risk factors for poor literacy outcomes, methods to promote language needed for literacy, phonemic awareness, word identification. Emphasizes instructional strategies useful in childcare settings, preschools, early intervention, and programs for students with developmental disabilities.

**EDSPE 499 Undergraduate Research (*)** Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

**EDSPE 500 Practicum ([1-6]-, max. 20)** Practicum in the field under the direction of a faculty member. Prerequisite: enrollment in a special education program, approved plan of study, and permission of the instructor. Offered: AWSpS.

**EDSPE 501 Foundations in Special Education (3)** Comprehensive review of the field of special education, including historical perspectives, current best practices, legal issues, and current controversies. Offered: A.

**EDSPE 502 Collaboration: Working with Parents and Professionals (3)** Provides students with knowledge and skills for working collaboratively with other professionals, family members, and paraeducators. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships.

**EDSPE 503 Classroom Management for Elementary School Educators ([1-3]-, max. 8)** Examines how to set up effective classrooms to facilitate learning and the development of social behaviors. Focuses on strategies for effectively managing whole group (classroom) and individual behavior of students in the context of public schools. Offered: AWSpS.

**EDSPE 504 Special Education and the Law (3)** Brown Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDLPS 516.

**EDSPE 505 Curriculum Development of Students with Moderate to Severe Disabilities (4)** Addresses issues and practices in the development of appropriate curriculum, accessing the general
education curriculum, and meaningful assessment for students with moderate to severe disabilities in educational settings. Topics include: assessing general education curriculum, inclusion, and development of Individualized Educational Plans (IEPs), assessment using environmental strategies, and identifying students' needs for assistive technology.

EDSPE 507 Instructional Methods for Students with Moderate to Severe Disabilities (4) Davis Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors.

EDSPE 510 Behavioral Measurement and Management in the Classroom (3) Response measurement in the classroom; use of data analysis for instructional decisions and behavior management for children with disabilities.

EDSPE 511 Methods of Applied Behavior Analysis Research (3) Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: EDSPE 571 or equivalent preparation.

EDSPE 513 Principles of Assessment (3) Focuses on the principles, administration, and interpretation of a variety of assessments. Includes opportunities to choose appropriate assessments; administer formal and informal assessments accurately; and interpret assessment results to inform instructional decisions. Offered: A.

EDSPE 514 Fundamentals of Reading and Writing for Students with Disabilities (4) R. HUDSON Emphasis on fundamentals of reading and writing processes, assessment, and instruction for students with disabilities. Helps students apply what is learned to their work with students with disabilities in classrooms. Prerequisite: EDC&I 460. Offered: W.

EDSPE 515 Problems and Issues in Special Education (3, max. 9) Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices.

EDSPE 517 Practicum in Research Design and Analysis in Special Education (1-4, max. 24) Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDSPE 591 or equivalent and permission of instructor. Offered: AWSp5.

EDSPE 518 Seminar in Special Education Research (1-4, max. 20) Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of a viable dissertation proposal. Credit/no-credit only. Offered: AWSp.

EDSPE 519 Strategies for Supporting Learners with Extensive Support Needs (3) Provides knowledge and skills necessary to manage extensive support needs for learners with moderate to severe cognitive, physical, or multiple disabilities. Emphasis on various strategies to develop, adapt, implement, and monitor student needs as they relate to communication, daily living, medical management, and positioning and handling. Offered: W.

EDSPE 520 Seminar in Applied Special Education (1-12, max. 20) Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: AWSp.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with severe disabilities.
EDSPE 523 Fundamentals of Math for Children with Disabilities (3) Provides educators with basic elementary math content and techniques for teaching elementary students with disabilities in inclusive settings. Offered: Sp.

EDSPE 524 Functional Behavioral Assessment (3) Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior.

EDSPE 525 Autism and Other Social, Communication, and Developmental Disabilities (3) Focuses on the identification, etiology, education, and outcomes of individuals with Autism Spectrum Disorder and related social, communication, and developmental disorders. Offered: SpS, even years.

EDSPE 526 Techniques for Instructing Social Behaviors for Elementary Students with Mild Disabilities (3) Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: Sp.

EDSPE 528 Inquiry and Methods in Writing Instruction (3) Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: Sp.

EDSPE 529 Ethics and Professionalism in Applied Behavior Analysis (3) Examines ethical issues and responsibilities regarding service provision to people with disabilities. Prepares behavior analysts to be ethical and professional practitioners. Prerequisite: enrolled in the ABA program, or permission of the instructor. Offered: S.

EDSPE 530 Advanced Readings in Applied Behavior Analysis (1, max. 20) Schwartz Provides opportunities to read and discuss core texts from applied behavior analysis (ABA). Covers the conceptual underpinnings of ABA and discusses examples of application of the principles. Offered: A/Sp.

EDSPE 531 Planning Comprehensive Behavioral Interventions (3) Gives special educators the knowledge and skills they need to develop comprehensive behavior plans to address challenging behavior in children with disabilities in their classrooms. Offered: W.

EDSPE 532 A Tiered Approach to Inclusive Education (3) Prepares educators to work in inclusive educational environments. Explores evidence based instructional strategies, discusses ways to use behavior analytic strategies to promote inclusion, and explores strategies to collaborate with general education teachers. Students also learn how to write high-quality Individualized Education Plans.

EDSPE 533 Concepts and Principles in Applied Behavior Analysis - A (3) Teaches students to act and think as behavior analysts. Explores basic principles, procedures, and terminology of applied behavior analysis. Prerequisite: students must be enrolled in the ABA program or have permission of the instructor. Offered: A.

EDSPE 534 Concepts and Principles in Applied Behavior Analysis - B (3) Trains students to act and think as behavior analysts. Explores basic principles and procedures of applied behavior analysis. Prerequisite: students must be enrolled in the ABA program or have permission of the instructor. Offered: W.

EDSPE 535 History and Philosophy of Applied Behavior Analysis (3) Theory and philosophy of applied behavior analysis, including historical perspectives. How radical behaviorism serves as the philosophy of behavior analysis. Also, how applied behavior analysis serves as the applied science of behavior analysis. Prerequisite: either enrollment in
EDSPE 536 Assessment in Applied Behavior Analysis A (3)
Addresses concepts of behavioral assessment in the classroom and applied settings. Topics include the rationale for using different types of indirect and direct assessment methods, understanding assessment application and interpretation, and current barriers and recommendations for striving toward culturally responsive assessments. Students learn to conduct behavioral assessments and analyze assessment results in order to create a treatment plan. Prerequisite: either enrollment in the ABA program, or permission of instructor. Offered: A.

EDSPE 537 Assessment in Applied Behavior Analysis B (3)
Provides an overview of functional behavior assessment (FBA) of behaviors targeted for decrease using applied behavior analysis. Emphasis is placed on identifying the function(s) of behavior and the implementation of FBA procedures in applied settings. Provides graduate students with the practical skills needed to assess challenging behavior in order to support all learners in school, community, clinic and home settings. Prerequisite: either enrollment in the ABA program, or permission of instructor. Offered: W.

EDSPE 539 Ethics and Professionalism in Applied Behavior Analysis A (3)
Examines ethical issues and responsibilities regarding service provision to people with disabilities. Prepares behavior analysts to be ethical and professional practitioners. First in a two-quarter sequence. Offered: Sp.

EDSPE 540 Fieldwork Seminar (1-2, max. 16)
Provides an opportunity for self-evaluation and reflection on practice as well as assist students with working with children with disabilities and their families in the field. Linked to a required fieldwork experience in a special education setting. Offered: AWSp.

EDSPE 541 Education of Children with Behavior Disorders (3)
Introductory course covering characteristics of and educational practices for children with emotional/behavioral disabilities. Reviews theory, definitional issues, models, assessment, and instructional methods for educating children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: A.

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3)
In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities.

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9)
Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12)
In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

EDSPE 549 Ethics and Professionalism in Applied Behavior Analysis B (3)
Examines ethical issues and responsibilities regarding service provision to people with disabilities. Prepares behavior analysts to be ethical and professional practitioners. Second in a two-quarter sequence. Prerequisite: enrolled in the ABA program, or permission of the instructor. Offered: W.

EDSPE 552 Evidence-Based Instructional Strategies in Applied Behavior Analysis (3)
Explores a wide variety of behavior change procedures to increase behaviors. Students will utilize behavior analytic concepts to increase behaviors for individuals with disabilities across a wide variety of settings, populations, and target behaviors. Students will also write comprehensive instructional programs across the four stages of learning and make data-based decisions to support behavior change. Prerequisite: students must be enrolled in the ABA program or have permission of the instructor. Offered: A.

EDSPE 553 Supervision in Applied Behavior Analysis (3)
Provide students with an overview of supervision within the field of Applied Behavior Analysis.
Through readings, discussions, assignments and role plays, students will learn the critical components and importance of high quality behavior analytic supervision. In addition, students will have the opportunity create evidence based supervision plans and practice providing positive and constructive feedback. Offered: Sp.

EDSPE 554 Behavior Analysts in the Schools (3)
Applied behavior analysts work in a number of settings, including public schools. There is a special set of knowledge and skills that behavior analysts must acquire to improve their ability to work collaboratively in schools. Issues around school law, policy, school culture, instruction, school based behavioral assessment and the most effective strategies to collaborate with professionals in public schools will be addressed. Recommended: prior knowledge about ABA. Offered: W.

EDSPE 560 Early Learning in Home, School, and Community (3)
Successful early childhood education (birth to age 8) depends upon partnerships with children's families and communities. This course delves deeply into formal and informal learning environments (e.g., home, child care, after school programs) to understand environmental influences on children's development, learning, and well-being and practices and policies that better support family and community engagement and children's positive outcomes. Offered: W.

EDSPE 561 Educational Assessment of Young Children with Special Needs (3)
Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework.

EDSPE 562 Curriculum and Assessment for Young Children with Disabilities (3)
Examines recommended practices and meaningful curricula for young children with disabilities. Covers theoretical models an approaches to curricula for preschoolers with disabilities. Includes discussion of definitional issues, theoretical frameworks, curriculum models, and application of recommended instructional and assessment practices within an early childhood educational framework. Offered: W.

EDSPE 563 Collaborating with Families and Educational Teams (4)
Meeker Explores issues, theories, models, research, and recommended practices related to family-professional partnerships and collaborative teaming in education. Explores the dynamics of interactions with families and other team members including roles and responsibilities, decision-making, communication, and collaboration. Focuses on families and teaming in special education. Prerequisite: students must be enrolled in the ABA program or have permission of the instructor. Offered: AW.

EDSPE 564 Infants and Toddlers with Disabilities and Other Special needs (3)
Sandall Examines early intervention policies, programs, and practices for infants and toddlers with disabilities and other special needs. Topics include theoretical, philosophical, and learning and research base for early intervention. Offered: W.

EDSPE 565 Approaches to Early Childhood Education (3, max. 9)
Provides an overview of basic early childhood content in math, science, social studies, physical education, and the arts. Includes active exploration and demonstration of ways to adapt and embed these concepts into thematic units and early childhood classroom routines. Offered: Sp.

EDSPE 566 Current Research in Early Childhood Special Education (2, max. 6)
Explores theory, research, and practice in early intervention with infants, toddlers, and their families. Topics include typical and atypical development, assessment, curriculum, and intervention strategies.

EDSPE 571 Measurement in Applied Behavior Analysis (3)
Addresses concepts of behavioral measurement and data-based decision making in applied settings. Students learn how to choose behaviors for measurement, write observable and measurable behavior objectives, design discontinuous and continuous measurement systems, graph practical data using an AB design, visually analyze data using proposed decision-making rules, and make data-based decisions about interventions. Prerequisite: enrolled in the ABA program or permission of instructor. Offered: A.

EDSPE 599 Independent Studies in Education (*)
Independent studies or readings of specialized aspects of education. Registration must be
accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 600 Independent Study or Research (*)
Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 601 Internship (1-10, max. 20) Prerequisite: graduate standing and permission based on prearrangement of internship placement and approval by adviser. Offered: AWSpS.

TEACHER EDUCATION PROGRAM

EDTEP 501 Community-Based Field Experience (1-10, max. 15) Field experience and group discussions accompanying the first quarter of study in an Elementary Teacher Education Program. Field experience in community based organizations or school settings. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 502 Second Quarter Field Experience - Elementary (2-10, max. 15) Field experience accompanying the second quarter of study in an Elementary Teacher Education Program. Observe school-year opening full-time in late August through September; field experiences during the quarter in supervised school placements. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 503 Third Quarter Field Experience - Elementary (2-6, max. 12) Field experience and use of reflective process in small group discussions accompanying third quarter of study in an Elementary Teacher Education Program. Field experiences during the quarter in supervised school placements. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 505 Capstone Project: Tools for Reflection - Elementary ([1-3], max. 3) Group discussions fostering integration of coursework, field experience, and teaching experiences through documentation and reflection on first year teaching experiences. Using certification standards for teachers, students illustrate their learning through multiple forms of evidence. Final capstone project is presented to an audience. Prerequisite: elementary TEP student. Credit/no-credit only.

EDTEP 511 School and Society (3) Exploration of issues regarding schooling and society, such as matters of value and value tension in American schools. Consideration of social values such as equality, opportunity, pluralism, and community; historical and contemporary evidence of values in schooling; and how values can conflict in policy and practice. Prerequisite: elementary TEP student.

EDTEP 515 Instructional Practice and Performance I (4) Focuses on supporting teacher candidates to plan for, enact, and reflect on productive learning experiences for K-12 students where discussion is a central component and learning experience. First in a three-course series.

EDTEP 516 Instructional Practice and Performance II (4) Supports candidates to plan for, enact, and reflect on a variety of assessment opportunities presented to K-12 students. Candidates analyze K-12 students’ learning through investigation of a variety of assessment data points as evidence. Second in a three-course series.

EDTEP 517 Instructional Practice and Performance III (4) Supports teacher candidates to plan for, enact, and reflect on productive learning experiences for K-12 students where engaging in rigorous content instruction is a central component and learning experience. Third in a three-course series.

EDTEP 521 Teaching and Learning in Numeracy I (4) Focus on mathematics from the perspective of the learner and on the meaning of understanding a mathematics concept. Examination of cultural aspects of the development of these concepts. Prerequisite: elementary TEP student.

EDTEP 522 Teaching and Learning in Numeracy II (3) Focus on pedagogy of mathematics. In conjunction with field experience, students extend understanding of mathematics and successfully integrate mathematics as a tool for learning science and art. Prerequisite: elementary TEP student.

EDTEP 523 Teaching and Learning in Science (3) Science teaching in a manner consistent with how young children learn science concepts and skills. Opportunities are provided for work on science
activities similar to those used with elementary school children and to experience many of the problems and successes of preadolescents. Prerequisite: elementary TEP student.

EDTEP 524 Physical Education and Health in the Schools (2) Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/no-credit only.

EDTEP 531 Teaching and Learning in Literacy I (3) Investigation of the multiple natures of literacy development. Students study the impact of culture and family on literacy development by reading and discussing a variety of texts while also experiencing the development of their own learning through literature study, the writing process, and oral presentations. Prerequisite: elementary TEP student.

EDTEP 532 Teaching and Learning in Literacy II (4) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 533 Teaching and Learning in Literacy III (3) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 534 Differentiated Instruction (1-4, max. 20) Introduction to the concepts and practice of differentiated instruction for children with diverse developmental, linguistic, and cultural characteristics. Prerequisite: elementary TEP student.

EDTEP 551 Multicultural Teaching (3) Concepts, theories, and strategies that constitute major dimensions of multicultural education. Focus on racial and ethnic groups, social class, and gender. Dimensions of multicultural education examined include content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: TEP student.

EDTEP 552 Assessment in Elementary Education ([1-2], max. 3) Emphasis on methods of assessment that reinforce understanding of the various disciplines. Includes performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: elementary TEP student.

EDTEP 555 Understanding Indigenous Perspectives: Implications for Teaching and Learning (1) M. Bang, D. Stevens Provides participants a pedagogical approach in working with Native learners, families, and communities. It's designed to enhance and engage students in understanding contemporary Native American history emphasizing local Pacific Northwest tribes and fulfilling HB 5433. Content focuses on incorporating Native knowledge and building beneficial relationships in curriculum development. Credit/no-credit only. Offered: WS.

EDTEP 560 Teaching for Learning in Secondary School (3) Studies human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. First in a two-course sequence. Prerequisite: secondary TEP student.

EDTEP 561 Teaching and Learning for Secondary Schools II (2) Study of human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. Second of a two-course sequence. Prerequisite: secondary TEP student.
EDTEP 562 Adolescent Development and Education I (2) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Examines psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools. First in a two-course sequence. Prerequisite: secondary TEP student.

EDTEP 563 Adolescent Development and Education II (2) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Examines psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools. Second in a two-course sequence. Prerequisite: secondary TEP student.

EDTEP 564 Working in Schools (1-2, max. 20) Explores the organizational, personal, and interpersonal aspects of working as a teacher in schools. Preparation for membership and leadership in a professional learning community and for continuing professional growth. Prerequisite: TEP student Credit/no-credit only.

EDTEP 566 Creating Classrooms for All Students (2-4, max. 4) Provides middle and high school teachers with an understanding of how to organize their classrooms so as to encourage and teach civility and be familiar with the needs of special education students.

EDTEP 571 Topics and Tensions in School and Society (4) Exploration of issues of value and value tension in American schools. Consideration of social values of equality, opportunity, pluralism, and community, historical and contemporary evidence of values in schooling, and how values can conflict in policy and practice. Prerequisite: secondary TEP student.

EDTEP 573 Assessment in Secondary Education (4) Strong emphasis on methods of assessment that reinforce understanding of the various disciplines, including performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: secondary TEP student.

EDTEP 575 Working with English Language Learners and Literacy Across the Curriculum (4) Prepares pre-service secondary teachers to meet the needs of culturally and linguistically diverse students in the mainstream secondary classroom. Emphasis on second language acquisition, critical literacy issues, and integration of language and literacy into academic content areas for adolescent learners.

EDTEP 580 Teaching English and Language Arts in Secondary School I (5-) Teaching of English and language arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 581 Teaching English and Language Arts in Secondary School II (3-) Teaching of English and language arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 582 Teaching Mathematics in the Secondary School I (5-) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 583 Teaching Mathematics in the Secondary School II (3-) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 584 Teaching Social Studies in the Secondary School I (5-) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 585 Teaching Social Studies in the Secondary School II (3-) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 586 Teaching Science in the Secondary School I (5-) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 587 Teaching Science in the Secondary School II (3-) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.
EDTEP 588 Teaching World Languages I (5-)
Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills - reading, writing, speaking, listening - and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 589 Teaching World Languages II (-3)
Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills - reading, writing, speaking, listening - and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 591 First Quarter Field Experience - Secondary (2-5, max. 10)
Field experience accompanying the first quarter of study in the Secondary Teacher Education Program. Observe and assist weekly during the quarter in supervised school placements. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 592 Second Quarter Field Experience - Secondary (2-5, max. 10)
Field experience accompanying the second quarter of study in the Secondary Teacher Education Program. Supervised placements in summer school program. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 593 Third Quarter Field Experience - Secondary (2-5, max. 10)
Field experience accompanying third quarter of study in Secondary Teacher Education Program. Four weeks full-time plus daily part-time in supervised school placements. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 595 Capstone Project: Tool for Reflection - Secondary (1-3), max. 3
Group discussions fostering integration of coursework, field experience, and teaching experiences through documentation and reflection on student teaching experiences. Using certification standards for teachers, students illustrate their learning through multiple forms of evidence. Final capstone project is presented to an audience. Prerequisite: secondary TEP student. Credit/no-credit only.

EDTEP 600 Independent Study or Research (*-)
Registration must be accompanied by a study prospectus endorsed by a Director of Teacher Education and the faculty adviser for the work proposed. Credit/no-credit only.

EDTEP 601 Fourth Quarter Field Experience (2-10, max. 15)
Field experience during the fourth quarter of study in a Teacher Education Program. Full-time student teaching in supervised school placements. Prerequisite: TEP student. Credit/no-credit only.
COLLEGE OF ENGINEERING

AERONAUTICS AND ASTRONAUTICS

AERONAUTICS AND ASTRONAUTICS

A A 101 Air and Space Vehicles (5) NW

A A 198 Special Topics in Aeronautics and Astronautics (1-5, max. 10) NW Knowlen Introduces the field of Aeronautics and Astronautics. Topics include aircraft flight, rocket propulsion, space travel, and contemporary space missions. May include hands-on activities. For non-majors.

A A 210 Engineering Statics (4) NW Applies vector analysis to equilibrium of rigid body systems and subsystems. Includes force and moment resultants, free body diagrams, internal forces, and friction. Analyzes basic structural and machine systems and components. Prerequisite: minimum grade of 2.0 in either MATH 126 or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: AWS.

A A 260 Thermodynamics (4) NW Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: minimum grade of 2.0 in either CHEM 140, CHEM 142, CHEM 144, or CHEM 145; minimum grade of 2.0 in either MATH 126, MATH 129, or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: SpS.

A A 299 Undergraduate Research (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. Credit/no-credit only. Offered: AWSpS.

A A 301 Compressible Aerodynamics (4) Covers aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields; incompressible flow about bodies. Thin airfoil theory; finite wing theory. Prerequisite: PHYS 123; A A 311; and either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

A A 311 Atmospheric Flight Mechanics (4) Applied aerodynamics, aircraft flight "envelope," minimum and maximum speeds, climb and glide performance. Range and endurance, take-off and landing performance, using both jet and propeller power plants. Longitudinal and dynamic stability and control, wing downwash, stabilizer and elevator effectiveness, power effects. Lateral and directional stability and control. Prerequisite: M E 230; and A A 260. Offered: A.

A A 320 Aerospace Instrumentation (3) Hands-on laboratory experience for understanding the design and function of electronic circuits and instrumentation utilized in aerospace engineering. Topics include Ohm’s law, Kirchhoff’s laws, DC and AC circuits, passive and active components, op-amps and comparators, sensors, signal conditioning, electromechanical systems and actuators, digital systems, and data acquisition. Prerequisite: PHYS 123. Offered: A.
A A 321 Aerospace Laboratory I (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures, vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Prerequisite: A A 311; and A A 320 Offered: W.

A A 322 Aerospace Laboratory II (3) Design and conduct of experimental inquiry in the field of aeronautics and astronautics. Student groups propose, design, build, and conduct laboratory experiments in one of the following broad topic areas: aerodynamics, structures, propulsion, or energetics. Results are presented in written and oral reports. Prerequisite: minimum grade of 1.7 in A A 321. Offered: Sp.

A A 331 Aerospace Structures I (4) Analysis and design of aerospace structures. Reviews concepts of stress, strain, and equations of elasticity. Plane stress and plane strain. Application to aerospace structural elements including general bending and torsion of rods and beams, and open and closed thin-walled structures and box beams. Prerequisite: CEE 220. Offered: W.

A A 395 Undergraduate Seminar (1, max. 4) Lectures and discussions on topics of current interest in aviation and space technology by guest speakers. Topics vary. Credit/no-credit only. Offered: A.

A A 402 Viscous Fluid Mechanics (3) Introduction to fluid mechanics, dimensional analysis, effects of gravity on pressure, kinematics, conservation of mass and momentum, control-volume method, conservation of energy, vorticity and viscosity, viscous effects, Navier-Stokes solutions, and boundary layers. Prerequisite: MATH 324; A A 301. Offered: A.

A A 405 Introduction to Aerospace Plasmas (3) Development of introductory electromagnetic theory including Lorentz force and Maxwell’s equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth’s outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

A A 406 Electric Propulsion (3) Core concepts in the field of electric space propulsion, including plasma formation via strong electric fields, characterization using electric probes, and performance measurements. Includes required lab sections. Co-requisite: A A 405. Offered: A.

A A 410 Aircraft Design I (4-) Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 322; A A 332; A A 447; and A A 460 Offered: W.

A A 419 Aerospace Heat Transfer (3) Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to atmospheric and space flight. Prerequisite: PHYS 123; MATH 307. Offered: W.

A A 420 Spacecraft and Space Systems Design I (4-) Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering. Mission design and analysis, space vehicle propulsion, flight mechanics, atmospheric entry, aerobraking, configuration, structural design, power systems, thermal management, systems integration. Oral presentations and report writing. Design topics vary. Prerequisite: A A 322; A A 332; A A 447; and A A 460 Offered: W.
A A 421 Spacecraft and Space System Design II (4)
A continuation of A A 420. Course content varies from year to year and is dependent on the design topic chosen for A A 420. Prerequisite: A A 420. Offered: Sp.

A A 447 Control in Aerospace Systems (4)
Overview of feedback control. Dynamic models for control systems design including ODE, transfer function, and state-space. Linearization of nonlinear models. Analysis of stability, controllability, observability, time/frequency domain techniques. Frequency of response design techniques. Design of control systems via case studies. Prerequisite: a minimum grade of 1.7 in A A 312; and MATH 308. Offered: Sp.

A A 448 Control Systems Sensors and Actuators (3)
Overview of feedback control. Study of control systems components and formulation of their mathematical models. Discussion and analysis of amplifiers, DC servomotors, magnetic-actuators, accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, and force transducers. Experimental determination of component models and model parameters. Includes hands-on laboratory component. Prerequisite: A A 447. Offered: A.

A A 449 Special Topics in Controls (3-5)
Topics of current interest in controls. Offered: Sp.

A A 460 Propulsion (4)
Study of the aero- and thermodynamics of jet and rocket engines. Air-breathing engines as propulsion systems. Turbojets, turbofans, turboprops, ramjets. Aerodynamics of gas-turbine engine components. Rocket vehicle performance. Introduction to space propulsion. Prerequisite: a minimum grade of 1.7 in A A 301; and a minimum grade of 1.7 in A A 302. Offered: A.

A A 461 Air Breathing Propulsion (3)
Examines gas turbine engine design methodology. Covers aerodynamics or gas dynamics of air breathing engine components: inlets, compressors, turbines, and nozzles. Studies the on-design and off-design performance of gas turbine engines. Includes combustion, emissions, noise, and advanced air breathing propulsion systems. Prerequisite: A A 460. Offered: W.

A A 462 Rocket Propulsion (3)
Covers the physical and performance characteristics of chemical rocket propulsion systems. Includes rocket equations, mass ratios, staging, flight performance, nozzle theory and design, combustion thermochemistry, propellant categories, fuels, oxidizers, monopropellants, rocket system components and materials and rocket design principles. Prerequisite: A A 260. Offered: W.

A A 470 Systems Engineering (4)
Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with IND E 470; Sp.

A A 490 Space Law and Policy (5)
I&S Saadia M. Pekkanen
Law and policy foundations of outer space activities. Essential origins, sources, and role of space law, as well as key institutions, forums, and forces shaping the contemporary governance of space activities. Provides a thorough grounding in U.N. treaties, principles, resolutions, regulations, and private international and national space laws and policies. Offered: jointly with ESS 488/JSIS B 444.

A A 498 Special Topics (1-5, max. 15)
Topics of current interest in the Department of Aeronautics and Astronautics.

A A 499 Undergraduate Research (1-5, max. 10)
Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. A maximum of 6 credits may be applied toward senior technical electives. Offered: AWSpS.

A A 501 Advanced Gas Dynamics (3)
Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: Sp, odd years.

A A 503 Continuum Mechanics (3)
Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/liquid materials. Offered: jointly with M E 503; A.
A A 504 Compressible Fluid Mechanics (3) Reviews the fundamentals with application to external and internal flows; supersonic flow, 1D and Quasi-1D, steady and unsteady flow, oblique shocks and expansion waves, linearized flow, 2D flow, method of characteristics; and transonic and hypersonic flow. Offered: A.

A A 506 Vortex-Dominated Flows (3) Examines the vorticity equation, baroclinic torque, solenoidality, Biot-Savart’s formula, diffusion of vorticity, Burger vortex, system of vortices, Kelvin-Helmholtz instability, effects of density, shear, and surface tension on instability, swirling flows, and other special topics. Offered: Sp, even years.

A A 507 Incompressible Fluid Mechanics (3) Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with M E 507; W.

A A 508 Turbulence (3) The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A/M E 507 or permission of instructor. Offered: Sp, odd years.

A A 516 Stability and Control of Flight Vehicles (3) Static and dynamic stability and control of flight vehicles in the atmosphere. Determination of stability derivatives. Effects of stability derivatives on flight characteristics. Flight dynamic model. Responses to control inputs and external disturbances. Handling qualities. Control system components, sensor characteristics. Stability augmentation systems. Prerequisite: A A 440 or permission of instructor. Offered: W.

A A 523 Special Topics in Fluid Physics (3) Offered: AWSp.

A A 524 Aeroacoustics (3) Reviews the fundamental concepts of acoustics which include sound measurements, reflection, resonance, transmission, radiation, scattering, diffraction, ray acoustics, wave guide, turbo-machinery noise, sound suppression, jet noise, and airframe noise and acoustic problems in rockets and other propulsion systems. Offered: A, odd years.

A A 525 Advanced Airbreathing Propulsion (3) Reviews the fundamental concepts of advanced airbreathing engines including advanced gas turbines, ramjets, scramjets and variants, detonations engines, flow with chemical energy release, shock dynamics, Chapman-Jouguet, ZND model, and multi-cellular and spinning detonation. Offered: A, even years.

A A 527 Space Power Systems (3) Explores the theoretical background and technology of power systems for satellites, space science missions, and planetary and lunar outposts. Focuses on photovoltaic, solar-thermal, and nuclear systems, as well as chemical systems for storage. Addresses thermal management. Offered: A, even years.

A A 528 Spacecraft Dynamics and Control (3) Examines spacecraft dynamics and control. Includes basic orbital mechanics - the restricted three body problem, Hill's theory, perturbation theory, orbit determination, rigid body kinematics and dynamics, attitude control, and spacecraft formation flying. Prerequisite: MATH 307; MATH 308. Offered: W, odd years.

A A 529 Space Propulsion (3) Nucleonics, and heat transfer of nuclear-heated rockets. Electrothermal, electromagnetic, and electrostatic thrusters. Power/propulsion systems. Prerequisite: permission. Offered: Sp, odd years.

A A 531 Quasibrittle Fracture Mechanics and Scaling (3) Foundations of linear elastic and
nonlinear fracture mechanics and cohesive modeling. Effects of damage in the Fracture Process Zone with emphasis on the scaling of structural strength. Finite Element simulations for scaling of quasibrittle structures. Prerequisite: A A 530 or permission of instructor. Offered: Sp, odd years.

A A 532 Mechanics of Composite Materials (3)
Analysis and design of composite materials for aerospace structures. Micromechanics. Anisotropic elasticity. Laminated plate theory. Thermo-viscoelastic behavior and fracture of composites. Prerequisite: coursework in mechanics of materials or permission of instructor. Offered: A.

A A 535 Advanced Composite Structural Analysis (3)
Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with M E 500; Sp, odd years.

A A 538 Introduction to Structural Optimization (3)
Includes the formulation of engineering design problems as optimization problems, gradient based numerical optimization methods, design oriented structural analysis, structural sensitivity analysis, approximation concepts, and introduction to multidisciplinary design optimization. Prerequisite: coursework in structural analysis; finite elements; and computer programming; or permission of instructor. Offered: A, odd years.

A A 540 Finite Element Analysis I (3)
Formulation of the finite element method using variational and weighted residual methods. Element types and interpolation functions. Application to elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

A A 541 Finite Element Analysis II (3)
Advanced concepts of the finite element method. Hybrid and boundary element methods. Nonlinear, eigenvalue, and time-dependent problems. Prerequisite: A A 540 or permission of instructor. Offered: Sp, even years.

A A 543 Computational Fluid Dynamics of Compressible Flows (3)
Examines numerical discretization of the inviscid compressible equations of fluid dynamics; finite-difference and finite-volume methods; time integration, iterative methods, and explicit and implicit algorithms; consistency, stability, error analysis, and properties of numerical schemes, grid generation; and applications to the numerical solution of model equations and the 2D Euler equations. Offered: W.

A A 544 Computational Fluid Dynamics of Incompressible Flows (3)
Examines numerical discretization of the incompressible Navier-Stokes equation; projection method, introduction to turbulence; Reynolds Averaged Navier-Stokes equations; algebraic, one-equation, and two-equation turbulence models; large-eddy simulation; direct numerical simulation; and applications to the numerical solution of laminar and turbulent flows in simple geometries. Offered: Sp, even years.

A A 545 Computational Methods for Plasmas (3)
Develops the governing equations for plasma models - particle, kinetics, and MHD. Applies the governing equation to plasma dynamics through the PIC method and integration of fluid evaluation equations. Examines numerical solution to equilibrium configurations, and linear stability by energy principle and variational method. Prerequisite: A A 405 or A A 557. Offered: Sp, odd years.

A A 546 Advanced Topics in Control System Theory (3)
Topics of current interest for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor.

A A 547 Linear Systems Theory (4)
Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Cannot be taken for credit if credit received for EE P 547. Prerequisite: E E 510/A A 510/CHEM E 510/M E 510. Offered: jointly with E E 547.

A A 548 Linear Multivariable Control (3)
Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer
design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 548/M E 548.

**A A 549 Estimation and System Identification (3)**

**A A 550 Nonlinear Optimal Control (3)**
Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with E E 550/M E 550.

**A A 554 Aeroelasticity (3)**
Static and dynamic aeroelasticity, unsteady aerodynamics, aeroservoelastic modeling, and active control. Offered: A, even years.

**A A 556 Space and Laboratory Plasma Physics (3)**
Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with ESS 576; Sp, odd years.

**A A 557 Physics of Fusion Plasmas (3)**
Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description. Collisional processes including physical and velocity space diffusion. Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or GPHYS 505. Offered: W, odd years.

**A A 558 Plasma Theory (3)**
Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, ESS 576, or GPHYS 537. Offered: Sp, even years.

**A A 559 Plasma Science Seminar (1, max. 30)**
Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no-credit only. Offered: AWSp.

**A A 560 Plasma Diagnostics (3)**
Discusses plasma measurement methods including material probes and optical methods. Covers techniques for making measurement in a high electrical noise environment. Presents methods for measuring electron and ion temperatures, density, impurities, magnetic fields, fluctuations, and neutrals. Prerequisite: A A 405 or equivalent. Offered: W, odd years.

**A A 564 Kinetic Theory/Radiative Transfer (3)**
Boltzmann and Collisionless Boltzmann (Vlasov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Plank) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integral equation of radiative transfer. Prerequisite: A A 501 or permission of instructor. Offered: Sp, even years.

**A A 565 Fusion Reactor Fundamentals (3)**
Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermonuclear concepts. Engineering problems; blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: Sp, even years.

**A A 578 Convex Optimization (4)**
Prerequisite: A A 510, CHEM E 510, E E 510, or M E 510. Offered: jointly with CSE 578/E E 578/M E 578; W.

A A 580 Geometric Methods for Non-Linear Control Systems (3) Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with E E 580/M E 580; Sp, even years.

A A 590 Space Law and Policy (5) Saadia M. Pekkanen Law and policy foundations of outer space activities. Essential origins, sources, and role of space law, as well as key institutions, forums, and forces shaping the contemporary governance of space activities. Provides a thorough grounding in U.N. treaties, principles, resolutions, regulations, and private international and national space laws and policies. Offered: jointly with ESS 584/JSIS B 544; Sp.

A A 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with CHEM E 591/E E 591/M E 591.

A A 593 Feedforward Control (3) Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with E E 593/M E 593; Sp, even years.

A A 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 594/M E 594; Sp, odd years.

A A 595 Global Integrated Systems Engineering (4/5)-, max. 9 Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with IND E 595; AW.

A A 596 Global Integrated Systems Engineering Project (3) Project-based systems design course.
Prerequisite: A A/INDE 595. Offered: jointly with INDE 596; Sp.

**A A 597 Networked Dynamics Systems (3)** Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 597/M E 597.

**A A 598 Special Topics in Aeronautics and Astronautics (1-5, max. 30)** Introduction of special topics in the field of aeronautics and astronautics. Topics introduced by regular and guest speakers and includes a variety of information that is of current interest in aeronautics and astronautics. Offered: AWSp.

**A A 599 Special Projects (1-5, max. 30)** Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

**A A 600 Independent Study or Research (*-)** Offered: AWSpS.

**A A 700 Master’s Thesis (**-)** Offered: AWSpS.

**A A 800 Doctoral Dissertation (**-)** Offered: AWSpS.

**AEROSPACE ENGINEERING**

**A E 501 Analytical Methods for Aerospace Engineering (4)** Applications of analytical and mathematical methods for aerospace engineering, including: ordinary differential equations, partial differential equations, linear algebra, vector calculus, integral theorems, complex analysis, optimization, and probability. Prerequisite: permission of instructor. Offered: A.

**A E 510 Linear Systems Theory (4)** Covers theoretic methods for state-space linear systems including linearization of nonlinear systems, time-varying and time-invariant linear systems, discrete time and continuous time representations, canonical state space representations, linear system stability, time evolution of systems, controllability, and observability. Prerequisite: A E 501. Offered: W.

**A E 511 Classical Control Theory (4)** Covers theoretic methods for linear systems in the frequency domain including nonlinear and linear systems; linearization of nonlinear systems; stability, controllability, and observability of linear systems; linear system representations in frequency and time domains; dynamic system response in time and frequency domain; and frequency domain control design. Prerequisite: A E 501. Offered: Sp, odd years.

**A E 512 Dynamics, Stability, and Control of Vehicles (4)** Covers stability derivatives; effects of stability derivatives on flight characteristics; dynamics of rigid bodies in air, space and underwater applications; responses to control inputs and external disturbances; handing qualities; control system components; sensor characteristics; stability augmentation systems; guidance and navigation; human factors; effects of limited communication; and multivehicle systems. Prerequisite: A E 501. Offered: Sp, even years.

**A E 513 Multivariable Control (4)** An introduction to control of systems with multiple inputs and multiple outputs. Topics to be addressed include: successive single loop design comparison; Lyapunov stability theory; full state feedback controller design; linear quadratic regulator (LQR) and linear quadratic Gaussian (LQG) methods (development, incorporation of noise, design, analysis) ; separation principle; stability robustness; introduction to H-infinity control. Prerequisite: A E 510 Offered: A, odd years.

**A E 514 Estimation Theory (4)** Development of computational tools for estimation and filtering of state variables from sensor measurements. Methods are presented for both linear and nonlinear systems. Topics include discrete and continuous system structures for both linear and nonlinear dynamical systems with notice; rigid body dynamics; least squares; Bayesian estimation; Kalman filtering; extended Kalman filtering; unscented Kalman filtering; particle filtering; smoothing. Prerequisite: A E 510 Offered: A, even years.

**A E 519 Special Topics in Aerospace Engineering: Controls (4, max. 8)** Current research and advanced
special topics in the area of aerospace engineering - controls. Prerequisite: A E 501.

**A E 522 Rocket Propulsion (4)** Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets; and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: W, even years.

**A E 523 Aircraft Noise (4)** Covers noise characterization; federal aircraft noise regulation; interrelationship between the engine types and noise; aircraft noise generation, propagation, and radiation; noise measurements; and methods for noise reduction. Prerequisite: A E 520. Offered: A, even years.

**A E 529 Special Topics in Aerospace Engineering: Fluids (4, max. 8)** Current research and advanced topics in the area of aerospace engineering - fluids. Prerequisite: A E 501.

**A E 541 Finite Element Analysis (4)** Covers theory and application of the finite element methods; element types, stiffness matrix and solution procedures; and solution of elasticity, thermal conduction, and other practical problems in aerospace engineering. Prerequisite: A E 540. Offered: W, odd years.

**A E 542 Fatigue and Fracture in Aerospace Structures (4)** Covers theory of failure for metallic aerospace structures; fatigue properties, fatigue load spectrum, fatigue crack propagation, fracture mechanics, damage tolerance, fretting and corrosion fatigue, design applications, and case studies. Prerequisite: A E 540. Offered: A, even years.

**A E 544 Additive Manufacturing (4)** Introduction to Additive manufacturing (AM), development of AM technology, generalized AM process chain, designing for AM vat photopolymerization process, powder bed fusion, extrusion-based systems, sheet lamination process, composite laminates, automatics tape laying, designing laminated composites. Project-based examination of model parameters and designing and building an aerospace structure. Prerequisite: A E 540. Offered: W, even years.

**A E 549 Special Topics in Aerospace Engineering: Structures (4, max. 8)** Current research and advanced special topics in the area of aerospace engineering - structures. Prerequisite: A E 501.

**A E 550 Mechanics of Composite Materials (4)** Covers the analysis and design of advanced composite materials for aerospace structures including material properties, micromechanics, anisotropic elasticity, theory of laminated plates, bending and buckling, and fracture of composites. Prerequisite: A E 501. Offered: W.

**A E 551 Aerospace Composite Design I (4)** Introduction to advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling
analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550. Offered: A, even years.

**A E 552 Aerospace Composite Design II (4)**
Introduction to concepts of certification by analysis supported by test evidence in aircraft structures, emphasizing regulatory agency requirements and industry approaches. Subjects include allowable approach, bolted and bonded joints, damage resistance and tolerance, specialized test methods, and inspection techniques. Prerequisite: A E 550. Offered: Sp, odd years.

**A E 553 Advanced Composite Structural Analysis (4)**
Covers advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550. Offered: A, odd years.

**A E 554 Manufacture of Aerospace Composites (4)**
Fundamentals of composite materials manufacturing and processing, emphasizing modern aviation industry practices. Discussions of auto and out-of-the-autoclave processing of carbon fiber composites, test methods, tooling, secondary processing, commercial processes, and several other topics related to manufacturing of composites. Emphasis on aircraft structures, but applicable to all high-performance lightweight structures. Prerequisite: A E 550. Offered: Sp, even years.

**A E 559 Special Topics in Aerospace Engineering: Composites (4, max. 8)**
Current research and advanced special topics in the area of aerospace engineering - composites. Prerequisite: A E 501

**A E 598 Aerospace Engineering Colloquium (1, max. 30)**
 Covers the latest research in aerospace engineering. Includes current trends in professional aerospace engineering (e.g., manufacturing, systems, etc.) and professional development for aerospace engineers (e.g., project management, job searches, etc.). Lectures and discussions led by guest speakers. Credit/no-credit only. Offered: AWSp.
aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: A.

CHEM E 340 Transport Processes II (4) Heat transfer, basic principles, and applications. Conduction, convection, and radiation. Prerequisite: CHEM E 330. Offered: W.

CHEM E 341 Energy and Environment (3) NW Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/M E 341; A.

CHEM E 355 Biological Frameworks for Engineers (3) For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: either CHEM 142 or CHEM 145; PHYS 123; either MATH 307 or AMATH 351. Instructors: Shen Offered: W.

CHEM E 375 Chemical Engineering Computer Skills (2) Pfaendtner Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibrium, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Offered: W.

CHEM E 436 Chemical Engineering Laboratory I (3) Lectures on statistics, experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on teaming, experimental planning, procedures, report writing, and oral presentations. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; HCDE 231. Offered: ASp.

CHEM E 437 Chemical Engineering Laboratory II (3) Continuation of CHEM E 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.

CHEM E 440 Energy Materials, Devices, and Systems (3) David S. Ginger Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: either PHYS 431, E E 421, MSE 311, MSE 312, MSE 313, MSE 351, MSE 352, CHEM E 456, CHEM 455, or CHEM 475, any of which may be taken concurrently. Offered: jointly with CHEM 466/MSE 466; A.

CHEM E 442 Renewable Energy (4) NW P. MALTE Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with M E 442; W.

CHEM E 445 Fuel Cell Engineering (3) Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330. Instructors: Stuve

CHEM E 455 Surface and Colloid Science Laboratory (3) Berg, Pozzo Laboratory techniques, equipment,

CHEM E 457 Principles of Molecular Engineering (3)
Covers the basic aspects of statistical mechanics, focusing primarily on the canonical ensemble. Develops and applies a set of tools to regular liquid solutions, phase formation, spinodal decomposition, adsorption, polymer thermodynamics, chemical kinetics, and physical kinetics. Prerequisite: CHEM E 310; CHEM E 325; CHEM 455. Instructors: Hillhouse. Offered: Sp.

CHEM E 458 Surface Analysis (3) D. Castner

CHEM E 460 Polymer chemistry Laboratory (3) C. DEFOREST
Laboratory techniques, equipment, and underlying fundamentals in polymer chemistry, synthesis, and design. Quantitative understanding of polymerization reaction engineering will be developed through careful examination of kinetics and structure-property relationships. Selection of laboratory polymerization and characterization techniques, as well as recent innovations in polymer research, will be highlighted. Prerequisite: CHEM 238. Offered: Sp.

CHEM E 461 Electrochemical Engineering (3) Schwartz
Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts.

CHEM E 465 Reactor Design (4)
Application of chemical kinetics and transport phenomena to the design of chemical reactors; characterization of batch and continuous-flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 467 Biochemical Engineering (3) F. BANEYX
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with BIOEN 467; W.

CHEM E 480 Process Dynamics and Control (4)
Dynamics of process units and systems; instrumentation and control system design and analysis. Includes weekly laboratory. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

CHEM E 481 Process Optimization (3) Holt
Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: A.

CHEM E 482 Advanced Topics in Process Control (3)
Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480. Instructors: Holt, Ricker

CHEM E 484 Electronic and Optoelectronic Polymers (3)
Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe. Offered: A.

CHEM E 485 Process Design I (4)
Applied economics in chemical engineering design and operations;
measures of profitability; capital and operating cost estimates; introduction to design and design strategies. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.

CHEM E 486 Process Design II (5) Comprehensive design of a specific process or product, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

CHEM E 490 Engineering Materials for Biomedical Applications (3) J. Bryers Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with BIOEN 490; A.

CHEM E 491 Controlled-Release Systems (3) S. PUN Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with BIOEN 491; W.

CHEM E 493 Advanced Surface Analysis (3) Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with BIOEN 493; W.

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]-, max. 12) Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

CHEM E 498 Special Topics in Chemical Engineering (1-4, max. 12) Topics of current interest in the field. Subject matter changes from quarter to quarter.

CHEM E 499 Undergraduate Research ([1-6]-, max. 12) Independent research projects in chemical engineering. Offered: AWSpS.

CHEM E 511 Biomaterials Seminar (1, max. 18) D. CASTNER, L. GAMBLE Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with BIOEN 511.

CHEM E 512 Methods of Engineering Analysis (3) Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 308, MATH 307 or AMATH 351, MATH 324, or permission of instructor. Offered: A.

CHEM E 514 Advanced Chemical Engineering Laboratory (3) Q. YU Instrumentation and laboratory techniques for chemical, biological, clean energy, and nano technologies. Experiments include surface modification, this film formation, nanoparticle synthesis, micro/nanoscale fabrication, protein adsorption, microorganism identification, and photovoltaic device fabrication/evaluation using advanced instrumentation. Offered: W.

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) Baneyx, Berg, Jiang Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques. Offered: A.
CHEM E 523 Seminar in Chemical Engineering (0-1, max. 30) Topics of current interest in chemical engineering. Credit/no-credit only. Offered: AWSp.

CHEM E 525 Chemical Engineering Thermodynamics (4) Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

CHEM E 531 Momentum, Heat, and Mass Transfer II (3) Continuation of CHEM E 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530.

CHEM E 534 Physiological Processes in Engineering Nanomedicine (3) Elizabeth Nance Provides an understanding of the physiological principles that influence the use of nanoscale systems in the human body. Prerequisite: either CHEM E 330, or related fluid mechanics course; and introductory biology course. ; recommended: BIOEN 490/CHEME 490; NME 221; NME 321; and NME 421. Offered: Sp.

CHEM E 535 Nanomaterials Chemistry and Engineering (3) V. Holmberg Rigorous overview of fundamental chemical and physical concepts important to nanomaterials science and engineering. Focus on luminescent, plasmonic, magnetic nanomaterials. Students will learn basic concepts prevalent in the nanomaterials literature, and develop rigorous mathematical understanding of fundamental principles that govern many of the advanced materials that are currently under development in the field. Prerequisite: CHEM 455, MATH 307, CHEM E 326; recommended: Classical physics, quantum mechanics, thermodynamics, and ordinary and partial differential equations. Offered: jointly with CHEM 587; Sp.

CHEM E 540 Energy Materials, Devices, and Systems (3) D. Ginger Jr Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation. Offered: jointly with CHEM 566/MSE 566; A.

CHEM E 545 Data Science Methods for Clean Energy Research (3) Jim Pfaendtner Survey of modern data science methods taught in the context of materials for clean energy (e.g., batteries and solar energy). Covers data visualization, statistics, machine learning and data management. Instruction, homework and term project are implemented using Python. Offered: jointly with CHEM 545/MSE 545; W.

CHEM E 546 Software Engineering for Molecular Data Scientists (3) Jim Pfaendtner Introduces basic principles of scientific software development in the Python in the context of Molecular Data Science. The course covers command line tools, Python from the perspective of molecular data science methods, software development and collaboration principles, e.g. version control. Grades are based on homework and group projects. Offered: jointly with CHEM 546/MSE 546; W.

CHEM E 547 Data Science Capstone Project (3) David A. C. Beck Involves teams of graduate students from molecular, materials or clean energy focused disciplines working on Data Science oriented research and engineering projects solicited from internal and external partners. Employ modern team-based software engineering principles and cutting edge Data Science methods, including but not limited to machine learning, statistics, visualization and data management. Prerequisite: CHEM E 545 and CHEM E 546; recommended: prior exposure to data science fundamentals and software development. Offered: jointly with CHEM 547/MSE 547; Sp.

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) Overney Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation. Offered: W.
CHEM E 556 Colloidal Systems (3) Berg, Pozzo
Examines the unique properties and application of colloidal materials, i.e., dispersions of micro- or nano-sized particles in various media are described. Explores their inherent instability, and their kinetic, phoretic, electric, optical, and rheological properties. Offered: W.

CHEM E 558 Surface Analysis (3) D. Castner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectrosopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592.

CHEM E 560 Reactions at Solid Surfaces (3)
Fundamental studies of adsorption and reactions on metallic and non-metallic surfaces with emphasis on heterogeneous catalysis and electrochemistry, including fuel cells. Topics include gas phase and liquid phase surface reactions, analyzed both experimentally and computationally. Prerequisite: undergraduate level course in kinetics or catalysis. Instructors: Stuve

CHEM E 565 Kinetics and Catalysis (3) Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Instructors: Stuve

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9) Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering master's program, or permission of instructor.

CHEM E 584 Electronic and Optoelectronic Polymers (3) Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe
Offered: A.

CHEM E 588 Research in Applied Microbiology (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with MICROM 588; AWSpS.

CHEM E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with BIOEN 590.

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/E E 591/M E 591.

CHEM E 593 Advanced Surface Analysis (3) D. CASTNER Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with BIOEN 593; W.

CHEM E 599 Current Topics in Chemical Engineering (1-5, max. 12) Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

CHEM E 600 Independent Study or Research (*) Offered: AWSpS.

CHEM E 700 Master's Thesis (*) Offered: AWSpS.
CHEM E 800 Doctoral Dissertation (*) Offered: AWSpS.

NANOSCIENCE AND MOLECULAR ENGINEERING

NME 220 Introduction to Molecular and Nanoscale Principles (4) NW Introduction to theories and concepts of molecular and nanoscale systems to raise awareness of technological and societal transformations anticipated through progress in nanotechnology. Prerequisite: either CHEM 142, CHEM 144, or CHEM 145; either MATH 126 or MATH 136; PHYS 121.

NME 221 Nanoscience and Molecular Engineering Seminar I (1) Introduces nanoscience and molecular engineering, and offers the opportunity of a first intellectual and interdisciplinary forum with interactions with members of research groups in the field. First in a series of three. Prerequisite: NME 220, which may be taken concurrently. Instructors: Overney Credit/no-credit only.

NME 321 Nanoscience and Molecular Engineering Seminar II (1) Overney Demonstrates how to tackle research challenges, put results into the framework of the open literature, and present and interpret data. Discusses contemporary societal and ethical aspects in nanoscience and molecular engineering. Second in a series of three. Credit/no-credit only.

NME 421 Nanoscience and Molecular Engineering Seminar III (1) Provides students with the opportunity to present their research results obtained during undergraduate research studies. Assessing the work of their peers and receiving feedback on their work, students further refine their ability in conducting and presenting research. Third in a series of three. Prerequisite: NME 321. Instructors: Overney Credit/no-credit only.

NME 498 Special Topics in Nanoscience and Molecular Engineering (1-4, max. 12) Overney Topics of current interest in the field.

CIVIL AND ENVIRONMENTAL ENGINEERING

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 101 Amazing Infrastructure, its Impacts and the Roles of Civil and Environmental Engineers (1) This seminar course will cover an overview of world infrastructure and the roles civil and environmental engineers perform in planning, design and construction. Offered: A.

CEE 102 Civil and Environmental Engineering and Careers--Companies and Agencies (1) This seminar course will cover an overview of companies and agencies that employ civil and environmental engineers including specific examples of roles. A different type of company or agency will be covered each week. Offered: W.

CEE 103 Engineering for Natural and Human Caused Disasters (1) This seminar course will cover natural and human caused disasters: why they occur and how they can be prevented or mitigated. The role of prevention or mitigation played by civil and environmental engineers will be featured. Offered: Sp.

CEE 220 Introduction to Mechanics of Materials (4) NW Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships among loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: minimum grade of 2.0 in A A 210. Offered: AWSp.

CEE 250 Environmental Processes and flows (3) NW Introduces the concepts of environmental materials and energy balance within the context of Pacific Northwest case studies, in particular nutrient loading, eutrophication, hypoxia/fish kills, water treatment, and global climate change and its regional impacts on water resources and hydrologic cycles. Prerequisite: either MATH 120, or MATH 124. Instructors: Brett Offered: Sp.

CEE 291 Introduction to AutoCAD for Civil Engineers (2) NW Provides an introduction to engineering
drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in 2D and 3D drafting in AutoCAD. Introduces reading plan sets and creating portions of plan sets applied to civil and environmental engineering fields. Prerequisite: MATH 124 or MATH 112. Offered: AWSp.

CEE 297 Foreign Study (3-5, max. 15) For participants in approved foreign-study programs. May not be used to satisfy upper-division major requirements.

CEE 298 Special Topics in Civil and Environmental Engineering (1-5, max. 10) Explores special topics in civil and environmental engineering.

CEE 299 Independent Project (1-5, max. 10) Research on special topics under supervision of a faculty member. May not be used to satisfy upper-division major requirements. Offered: AWSpS.

CEE 307 Construction Engineering (5) Introduces construction engineering including construction methods, engineering economics, contracts, project delivery methods, plan and specifications, scheduling, estimating, productivity, environmental regulations, safety and green construction. Uses scheduling and estimating software tools and emphasizes communication engineering information. Offered: AW.

CEE 317 GeoSurveying (5) Measurement and digital mapping techniques; integration of surveying methods and techniques, monitoring of structures; spatial data collection and integration with surveying data; adjustment of measurements, concepts of error; surveying control; coordinate systems, transformation; highway vertical curves; Earthwork, leveling and datum consideration, photogrammetry, GPS, GIS, remote sensing, cadastral and construction surveys, digital mapping. Prerequisite: either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: A.

CEE 327 Transportation Engineering (5) Studies vehicular transportation fundamentals including vehicle dynamics, geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, freight logistics, and management of transportation systems. Includes a review of relevant vehicle operating characteristics. Prerequisite: PHYS 121; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.

CEE 337 Construction Materials (5) General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, aggregates, portland cement concrete, bituminous materials, asphalt concrete, wood. Laboratory testing, instrumentation, and investigation into macro-behavior. Sustainability issues including recycling, energy requirements, and greenhouse gas production associated with the materials. Prerequisite: CEE 220. Offered: A.

CEE 348 Hydrology and Environmental Fluid Mechanics (4) A. HORNER-DEVINE, E. ISTANBULLUOGLU, J. LUNDQUIST Introduction to the physical processes that govern transport and mixing in the environment. The course uses fluid mechanical principles to understand flow in the atmosphere, river basins, groundwater, lakes and estuaries with implications for the movement of water, contaminant and other tracers through the environment. Prerequisite: CEE 347 and PHYS 123. Offered: Sp.

CEE 349 Case Studies in Environmental Engineering (3) Case studies are used to introduce fundamental environmental engineering concepts with a focus on engineering approaches that consider the interconnectedness of human and environmental systems. Prerequisite: CHEM 162. Offered: A.

CEE 350 Mass and Energy Balances in Environmental Engineering (4) Introduces concepts of mass balance, energy balance, and mass transport, and movement of water, chemicals, and energy through natural and engineered environmental systems, with application to water treatment, global elemental cycles, the earth's
energy balance. Credit cannot be applied toward graduation for both CEE 350 and CHEM E 310. 
Prerequisite: CHEM 162; PHYS 122; and either AMATH 351 or MATH 307.

CEE 352 Introduction to Microbial Principles in Environmental Engineering (5)
Introduction to microbiological processes occurring within natural and engineered systems. Fundamentals of microbial classifications/processes and their impacts on ecological and human health, and roles in engineered applications and global cycling of such elements as carbon, oxygen, and nitrogen.
Prerequisite: BIOL 180

CEE 354 Introduction to Chemical Principles in Environmental Engineering (5)
Introduction to chemical processes occurring within soil, water, and air in natural and engineered environmental systems. Includes identification of inorganic and organic chemicals; fundamental thermodynamics and kinetics of chemical processes; examination of chemical processes in environmental and engineered systems; and impacts of chemicals and chemical processes on ecological and human health.
Prerequisite: CHEM 162

CEE 356 Quantitative and Conceptual Tools for Sustainability (4)
Conceptual and quantitative tools are introduced that incorporate sustainability principles into environmental engineering. It uses a systems analysis perspective to address critical issues in environmental engineering. Topics include life cycle analysis and long-term system mass balances that facilitate decision making and process optimization at generational time scales. Offered: Sp.

CEE 357 Environmental Engineering (5)
Describes water and air resources, parameters that characterize their quality, and how their use alters their properties. Elements of hydrology. Mass and energy balances as applied to environmental systems. Global environmental change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operation. Groundwater contamination and treatment. Prerequisite: CHEM 142, CHEM 143, or CHEM 145. Offered: WSp.

CEE 367 Geotechnical Engineering (5)
Fundamental engineering properties of soil and rock; depositional processes and physical characteristics, hydro-conductive properties and advective flow; volume change characteristics including short- and long-term deformation; shear strength properties; and applications of basic concepts to practical problems such as foundation design and slope stability.

CEE 377 Introduction to Structural Design (5)
Berman, Eberhard, Reed, Roeder. Introduces the concepts, approaches, procedures, and codes for the structural design. Characterization of structural loads. Structural systems and system behavior. Analysis of statically determinate structures and introduction to analysis of statically indeterminate structures including approximate methods.
Introduction to the behavior and design of fundamental structural member. Prerequisite CEE 220. Offered: AW.

CEE 378 Structural Analysis (5)
Fundamental analysis and modeling of civil structural systems. Equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving real structures; introduction to finite element analysis of 2D continua. Prerequisite: CEE 377. Offered: Sp.

CEE 401 Pavement Design for Roads (1)
Pavement design and construction to include both low and high-volume roads; both gravel and bituminous-surfaced pavements. Pavements as a critical element for infrastructure projects. Aids student ability to participate in a variety of road projects, including design and construction. Offered: AWSp.

CEE 402 Energy Infrastructure (1)
Energy infrastructure, focusing largely on balance of plant topics. Includes elements of site selection, design, and construction. Electrical production facilities and transmission. Emphasis on renewable energy facilities. Aids student ability to participate in a variety of projects involving energy infrastructure. Offered: AWSp.

CEE 404 Infrastructure Construction (4)
S. Muench
Basic concepts of large transportation infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LCCA), construction cost,
logistics, productivity and, where applicable, traffic impacts. Term project is designed around a large-scale I-5 pavement reconstruction project involving construction, traffic, and the interaction between the two. Involves presentations on local transportation infrastructure projects. Prerequisite: CEE 307. Offered: W.

**CEE 405 Traffic Simulation (3)** In-depth discussion of microscopic traffic simulation models. Will provide engineering and planning students the information on how to develop and operate traffic simulation models and evaluate and present results from simulation models. Hands-on course projects and labs will be used for this course. Prerequisite: CEE 327.

**CEE 408 Sustainable Roadway Design and Construction (3) Steve Muench** The holistic concept of sustainability and how it applies to roadway infrastructure. Provides context and methods for applying sustainability ideas to roads and quantifying them in a meaningful way. Includes (1) introduction to sustainability, (2) roadway sustainability best practices, (3) current industry practice, and (4) sustainability assessment using the Greenroads Rating System and related tools. Prerequisite: CEE 307 and CEE 327.

**CEE 409 Engineering Rome: Study Abroad (5) Muench** Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

**CEE 410 Traffic Engineering Fundamentals (3)** General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 327. Offered: W.

**CEE 412 Transportation Data Management and Visualization (3) Yinhai Wang** Modern concepts, theories, and tools for management, visualization, and analysis of transportation data. Applications of software tools to large data sets, such as highway sensor data, real-time traffic and mobility service data, spatial data, probe vehicle and mobile device data. Addresses information retrieval, storage, knowledge discovery, data exchange, online sharing, visualization, communication, system optimization, and decision support. Prerequisite: CEE 327. Offered: W.

**CEE 416 Urban Transportation Planning and Design (3)** Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 327. Offered: A.

**CEE 420 Engineering with Developing Communities (3)** Introduces key technologies, theories, and challenges of infrastructure design for development. Covers technologies for energy, water, sanitation, and disaster response in low-resource contexts. Explores development theory and cross-cultural communication as they pertain to global infrastructure design.

**CEE 421 Pavement Design and Construction (4)** Structural design and construction processes associated with bituminous and concrete pavements. Covers theory, practice, and software tools for structural thickness design and layered elastic analysis; as well as construction methods, materials, and logistics. Includes small group case-study work on actual paving projects and state-of-the-art mobile project inspection software use. Prerequisite: CEE 337. Offered: Sp.

**CEE 422 Energy and Transportation (3)** Introduces climate change; vehicles, energy requirements and pollution; transportation fuels; energy and power plant terminology; traditional fossil fuel, nuclear, and renewable energy plants; permitting power plants and projects. Prerequisite: CEE 327. Offered: Sp.

**CEE 424 GIS for Civil Engineers (3)** GIS in civil engineering applications. Geographic and spatial data types and acquiring considerations. Data models and structures. Projections and transformations. Attribute-based operation, spatial
operations. Surfaces and near neighbors. Training on Arc GIS software. Prerequisite: CEE 317. Offered: AS.

**CEE 425 Reinforced Concrete Construction (3)**

D. JANSSEN

Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction. Prerequisite: either CEE 291 or AutoCAD experience; a minimum grade of 2.5 in either CEE 428 or CEE 452. Offered: Sp.

**CEE 428 Lightweight Cementitious Composites ([0-2], max. 2)**

Janssen

Introduces the process of designing within constraints and introductory experimental design. Covers the importance of proper laboratory documentation. Examines the characteristics of cementitious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Includes organization and production of technical report the documents work performed. Offered: A.

**CEE 429 Sustainability in Building Infrastructure (3)**

Provides an overview of how to plan, design, construct, and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, green building design codes and energy standards, measurement and verification of building performance, and retrofitting existing building through building energy audit. Prerequisite: CEE 307. Offered: A.

**CEE 433 Temporary Structures (3)**

Focuses on the design and analysis of temporary structure systems used on heavy civil projects. Covers design, analysis, and construction means and methods for scaffolding, formwork, shoring, and falsework systems. Prerequisite: CEE 307; CEE 337; and CEE 377; recommended: CEE 291. Offered: AS.

**CEE 434 Project Estimating (3)**

Presents the basic principles of estimating the time and cost of construction projects. Focuses on the thought process that is required for construction engineers to analyze job conditions and assess the required labor, equipment, and methods of construction necessary to perform the work. Prerequisite: CEE 307 and CEE 337. Offered: WS.

**CEE 436 Foundation Design (3)**

Design considerations for foundations and retaining structures. Subsurface investigations and determination of soil properties for design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures. Prerequisite: CEE 367. Offered: AW.

**CEE 440 Professional Practice Studio (2)**

Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors. Offered: W.

**CEE 441 Transportation and Construction Capstone Design Project (5)**

Comprehensive design project focusing on planning, design, and construction of a transportation project such as highways, transit, and airports. Prerequisite: CEE 307; CEE 327; and CEE 337. Offered: Sp.

**CEE 442 Structural Geotechnical Capstone Design Project (5)**

Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CEE 367 and CEE 377; either CEE 451 or CEE 452; and one additional course from CEE 436, CEE 451, CEE 452, CEE 453, CEE 454, CEE 456, or CEE 457. Offered: Sp.
CEE 444 Water Resources and Hydraulic Engineering Capstone Design Project (5)
Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: either CEE 345 or CEE 347; and either CEE 475, CEE 476, CEE 482, CEE 483, or CEE 484. Offered: Sp.

CEE 445 Environmental Engineering Capstone Design Project (5) Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: either CEE 345 or CEE 347; and either CEE 473, CEE 475, CEE 476, CEE 481, CEE 482, CEE 483, or CEE 484. Offered: Sp.

CEE 451 Design of Metal Structures (3) J. BERMAN, C. ROEDER Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CEE 377. Offered: A.

CEE 452 Design of Reinforced Concrete Structures (3) D. LEHMAN, D. REED, J. STANTON Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CEE 377. Offered: AS.

CEE 453 Prestressed Concrete Design (3) Analysis, design, and construction of prestressed concrete structures. Prerequisite: CEE 452. Instructors: Eberhard, Stanton Offered: W.

CEE 454 Design of Timber Structures (3) Includes the design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and manufactured wood products. Prerequisite: CEE 377. Instructors: Berman, Reed Offered: W.

CEE 455 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 377.

CEE 456 Structural Analysis (5) Fundamental analysis and modeling of civil structural systems. Equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving real structures; introduction to finite element analysis of 2D continua. Prerequisite: CEE 377. Instructors: Berman, Eberhard, Lowes Offered: Sp.

CEE 457 Advanced Structures I (3) L. LOWES Introduction to the finite element method for modeling civil structures. Formulation of line and continuum elements using virtual work and the principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456. Offered: W.

CEE 462 Applied Limnology and Pollutant Effects on Freshwater (3) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Offered: W.

CEE 463 Limnology Laboratory (2) NW Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/FISH 474; A.

CEE 465 Data Analysis in Water Sciences (4) J. Lundquist Covers fundamental topics related to data analysis, including statistical inference testing and error estimation, linear and quantile-based regression models, Monte Carlo simulation, time series analysis, Bayes theorem, and data visualization using modern computer techniques. Applications to water sciences, but techniques are applicable to any area. Prerequisite: IND E 315; either AMATH 301 or CSE 142; recommended: Basic stats and computer programming (or matlab) Offered: A.
CEE 473 Coastal Engineering I (3) Linear theory of water waves, wave transformations near shore, sediment motion, and elementary tidal theory; shoreline protection methods; and applications illustrated by selected case histories. Prerequisite: CEE 347. Instructors: Thomson

CEE 474 Hydraulics of Sediment Transport (3) A. HORNER-DEVINE Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streamed roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CEE 347. Offered: Sp.

CEE 475 Analysis Techniques for Groundwater Flow (3) R. NEUMANN Presents the fundamentals of subsurface flow and transport, emphasizing the role of groundwater in hydrologic cycle, the relation of groundwater flow to geologic structure, and the management of contaminated groundwater. Concepts are applied to well-known hydrogeologic sites. Prerequisite: CEE 347. Offered: W.

CEE 476 Physical Hydrology (3) Global water picture, data sources and data homogeneity, precipitation and streamflow hydrography analysis; calculation of surface runoff, evapotranspiration, and groundwater recharge. Hydrologic data frequency analysis and probability theory. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. Prerequisite: CEE 347. Instructors: Istanbulluoglu Offered: A.

CEE 478 Water Systems Management and Operations (3) J. Lundquist Overview of past and future water management and policy issues related to current water resources projects. Through readings, writing, guest speakers, and class discussion, considers both technical and social aspects of water resource system management and operations. Topics include federal water policy, regional water planning, expansion of existing water supplies, stream flow forecasting, planning with climate change, and more. Offered: Sp.

CEE 480 Air-Quality Modeling (3) NW Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with ATM S 480; W.

CEE 481 Hydraulic Design for Environmental Engineering (3) Erkan Istanbulluoglu Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, sewage and storm-water collection systems, and green stormwater infrastructure. Engineering methods and computer programs are applied for designing basic system elements. Prerequisite: CEE 347; and either CEE 350 or CEE 357. Offered: W.

CEE 482 Wastewater Reuse and Resource Recovery (3) Introduces wastewater treatment and systems, emphasizing fundamental biological, chemical, and physical processes related to protection of public health environmental quality and water reuse. Process analysis of the configuration and sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 350 or CEE 357. Offered: A.

CEE 483 Drinking Water Treatment (3) Studies scientific, engineering, and regulatory principles underlying drinking water treatment; development of conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 350 or CEE 357. Offered: A.

CEE 484 Decentralized and On-Site Wastewater Management and Reuse (3) Design and performance of on-site and decentralized wastewater treatment. Determination of appropriate alternatives based on endpoints of water reuse, economics, policy, management, water quality, and ecological considerations. Meeting sanitation and water reuse for situations including, individual homes, rural areas, developing countries,
and high density urban dwellings. Prerequisite: CEE 350 or CEE 357.

**CEE 488 Hazardous Waste Engineering (3)**
Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling: landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 350 or CEE 357. Offered: Sp.

**CEE 489 Water and Air Quality Sampling (2)** Samples collected from lakes, streams, precipitation, and air. Resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

**CEE 490 Air-Pollution Control (4)** Fundamental concepts of air pollution Control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with ENV H 461; Asp.

**CEE 491 Deterministic Systems (3)** Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Offered: A.

**CEE 495 Sustainability and Design for Environment (3)** Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415.

**CEE 496 Fate and Transport of Chemicals in the Environment (3)** Neumann Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

**CEE 497 Engineering Jordan: Water in an Arid Land Study Abroad (5) DIV H. Gough Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering. Offered: S, even years.

**CEE 498 Special Topics (1-5, max. 12)** Special topics in civil engineering offered as course with lecture or laboratory.

**CEE 499 Independent Study/Research (1-5, max. 12)** Individual undergraduate research project.

**CEE 500 Civil and Environmental Engineering Seminars (1, max. 3)** Prerequisite: graduate standing in Civil and Environmental Engineering. Credit/no-credit only.

**CEE 521 Seepage and Consolidation (3)** Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 367 or equivalent.

**CEE 522 Shear Strength and Slope Stability (3)** Shear strength of cohesive and granular soils and slope stability analysis of natural and man-made slopes. Prerequisite: CEE 367 or equivalent.

**CEE 523 Advanced Foundation Engineering (3)** Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations. Prerequisite: CEE 522 and CEE 527.

**CEE 529 Foundation Soil Improvement (3)** Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.

**CEE 531 Rock Engineering (3)** Engineering classification, physical and mechanical properties of
rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: CEE 437 or permission of instructor.

**CEE 576 Water Resources Planning (3)** Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems.

**CEE 599 Special Topics in Civil and Environmental Engineering (1-5, max. 20)** Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

**CEE 600 Independent Study or Research ([1-5]-)** Topics covered depend on faculty and student interest. Prerequisite: permission of instructor.

**CEE 601 Internship (2, max. 6)** Internship in an established program between industry, government, and the University. Prerequisite: permission of Graduate Program Coordinator and committee chair.

**CEE 700 Master’s Thesis (*)** Prerequisite: permission of adviser.

**CEE 800 Doctoral Dissertation (*)** Prerequisite: permission of adviser.

**CONSTRUCTION, ENERGY, AND SUSTAINABLE INFRASTRUCTURE**

**CESI 501 Distributed Renewable Power Systems (3)** Electrical distributed renewable generation. The depth of coverage is suitable for civil engineers and their role as project managers. Topics covered include: (1) microgrids, (2) renewable generation fundamentals, (3) utility economics, and (4) energy planning and simulation. Prerequisite: Graduate Standing Offered: Sp.

**CESI 502 Geomatics in Energy Infrastructure (3)** Overview of basic techniques for location measurements in energy construction projects using traditional surveying techniques, recently developed technologies for surface creation, and data management and analysis using GIS. Prerequisite: Graduate Standing Offered: A.

**CESI 503 Operation of a Power Plant (3)** Explores power plant operations. Topics include plant operating principles, regulatory permitting, maintenance requirements, and plant design and upgrades. Prerequisite: Graduate Standing Offered: Sp.

**CESI 504 Buildings, LEED, and Energy Use (3)** Overview on how to plan, design, construct and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, building energy modeling, indoor environmental qualities, and green building economics. Prerequisite: Graduate Standing Offered: S.

**CESI 505 Air Pollution Control and Occupational Safety and Health (3)** Overview on the fundamental air pollution issues involved in construction and operation of energy facilities and the management of large vehicle fleets. Topics include emission estimation, control technology assessment, ambient air impacts, and technology specific issues of worker safety and health. Prerequisite: Graduate Standing Offered: W.

**CESI 506 Management of Site Remediation, Hazardous Waste, and On-Site Treatment (3)** Covers the project management practices to ensure protection of human health and the environment when handling sites contaminated with hazardous waste generated by traditional and renewable energy sources. It includes identification of hazards, communication of risks and introduces alternatives for hazardous waste clean-up. Prerequisite: Graduate Standing Offered: Sp.

**CESI 508 Accounting and Finance for Construction (3)** Introduction to construction oriented financial management. Explains why construction financial management is different than financial management in other industries. Describes how to account for a company’s financial resources and how to build a company’s accounting system. Prerequisite: Graduate Standing Offered: W.

**CESI 509 Engineering Rome: Study Abroad (5)** Muench Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day.
Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

**CESI 510 Electric Grids (1)** Overview of utility design, operation and construction including an electrical grid's system components and functions. This includes generation, transmission, sub-transmission and distribution. These grid components will be explained as to how they are operated by a utility. Credit/no-credit only. Offered: A.

**CESI 511 Grid Integration of Variable Sources of Generation (1)** Overview of the advantages and challenges associated with the integration of variable sources of generation into the electric grid and distribution systems. It will focus on weather-driven renewables such as wind, solar, and hydropower. Credit/no-credit only. Offered: W.

**CESI 512 Regulating Electric Utilities (1)** Overview on how state utility commissions function including how they regulate utilities, influence permitting and participate in rid management and regional electric markets. Credit/no-credit only. Offered: Sp.

**CESI 513 Operation and Maintenance of a Wind Farm (1)** Operation and maintenance associated with a wind and solar project owned and operated by a major utility in Washington State. Included is an overview of the project including construction aspects, how it is managed and the major maintenance issues. Credit/no-credit only. Offered: W.

**CESI 514 Hydroelectric Project Relicensing (1)** Relicensing of a hydroelectric project in Washington State and includes an overview of the project and the issues faced by the owner in applying for an extension to its federal operating license. This includes the design and construction of a floating fish enhancement structure. Credit/no-credit only. Offered: S.

**CESI 519 Trends and Applications in E-Construction (1)** Developments in eConstruction. The focus will be heavy construction such as bridges, pavements and energy infrastructure. Specific content will be on eConstruction inspector tools and related construction applications. Emphasis will be placed on the use of mobile multi-platform tools and devices. Credit/no-credit only. Offered: Sp.

**CESI 520 Electricity Fundamentals (1)** Refresher for engineers as to the basics associated with electricity as it relates to power production and distribution. Credit/no-credit only. Offered: A.

**CESI 521 Introduction to AutoCAD and Bluebeam (1)** Introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in AutoCAD and Bluebeam software. It should only be taken by those without prior knowledge of this topic area. Credit/no-credit only. Offered: W.

**CESI 522 Introduction to AutoTURN (1)** Focus on AutoTURN which is used to analyze road and site design projects including vertical and horizontal curves, intersections, haul roads and vehicle clearances and turning maneuvers. The software is commonly used in energy infrastructure design and construction activities. Credit/no-credit only. Offered: Sp.

**CESI 524 Statistical Methods for Construction (1)** Overview of basic statistical measures used in construction and materials decision-making including data distributions, hypothesis testing, regression analysis, sampling and quality control/assurance. Credit/no-credit only. Offered: A.

**CESI 525 Wind Turbine Analysis (1)** Wind turbine assessments, including hardware and software for performing such assessments. Includes load testing, power performance, and blade and tower bending. Prerequisite: Graduate standing. Credit/no-credit only. Offered: SpS.

**CESI 526 Ropeway Transportation (1)** Overview of ropeway transportation system fundamentals. Focuses on basic principles for achieving an understanding of the currently available types of technology, their characteristics and limitations, as well as construction and operation considerations and their economics. "Ropeway transportation" is a generic name for cable car transportation. Prerequisite: graduate standing; recommended: CEE graduate status. Credit/no-credit only. Offered: W.
CESI 527 Energy Infrastructure Fundamentals (1) This course will cover an overview of energy infrastructure fundamentals and focuses on basic principles associated with power plant steam and combined cycles, heat transfer and economics. This results in an overview of a selection of power plant operating principles and costs. Prerequisite: Graduate enrollment; recommended: Graduate status in CEE. Credit/no-credit only.

CESI 528 Pavement Design for Project Roads (1) This course will cover an overview on methods used to design and construct pavement structures. The types of pavements will range from gravel surfaced to bituminous surface roads and parking lots and focus on energy infrastructure applications. Prerequisite: Graduate enrollment; recommended: Graduate status in CEE. Credit/no-credit only. Offered: S.

CESI 529 Supplemental Pavement Topics (1) Covers topics in pavement design. Includes pavement responses and layered elastic analysis; rehabilitation by use of HMA overlays; rigid pavement design; and pervious pavement design and construction. Prerequisite: Graduate enrollment; recommended: Graduate status in CEE. Credit/no-credit only. Offered: S.

CESI 534 Transmission Construction (1) Overview of the high-voltage electric transmission system, and how this infrastructure is constructed. Focuses on project planning, substation construction, transmission line construction, quality control/quality assurance, operations, and safety. Prerequisite: graduate standing; recommended: Civil and Environmental Engineering graduate status. Credit/no-credit only. Offered: Sp.

CESI 552 Environmental Regulations (3) I&S Principal emphasis on regulations pertaining to construction site stormwater runoff, including regulatory background and requirements, how to analyze potential site problems and prepare plans to solve them, and specifying practices to avoid or reduce water pollutant releases. Briefer coverage of regulations concerning air pollutions, wetlands, hazardous wastes, and endangered species.

CESI 588 Energy Infrastructure and the Environment (3) Larson, Mahoney Focuses on energy infrastructure, including site selection, permitting, design, construction, and maintenance. Includes electrical production facilities as well as transmission, focusing on permitting and construction of renewable energy facilities. Covers renewable energy infrastructure, emphasizing wind, solar, and geothermal. Offered: A.

CESI 592 Statistical Fundamentals for Construction and Materials Applications (3) S. Muench Overview of statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, quality control and assurance, and experimental design. Uses construction data to illustrate these measures. Offered: Sp.

CESI 594 Computer-Aided Construction (3) Application of information technology to construction management and cost estimating. Topics include, but not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, web publishing, GPS application, and construction data management. Offered: S.

CESI 595 Construction Materials (3) Mahoney Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts, and flowable backfill in construction projects. Emphasis on behavior of materials in various construction applications. Offered: W.

CESI 596 Pavement Construction (3) Muench Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

CESI 599 Special Topics in Construction, Energy and Sustainable Infrastructure (1-3, max. 20) Special topics in construction, energy and sustainable infrastructure offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

ENVIRONMENTAL ENGINEERING

CEWA 532 Advanced Remote Sensing and Earth Observation (4) Covers the theory and application of
satellite remote sensing as a tool for environmental science. Topics include the fundamentals of electromagnetic radiation, reflection and absorption, black body radiation, use of the Plank Function, satellite and sensor technology, map projections, integration of GIS data, and digital image analysis. Practical training with advanced image processing software (ENVI and open source). Recommended: GIS; statistics; and basic physics. Offered: jointly with SEFS 532; W.

CEWA 540 Microbiological Process Fundamentals (3) Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Offered: A.

CEWA 541 Biological Treatment Systems (3) Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, biomethane production, resource recovery, and toxic organics removal. Prerequisite: either both CEE 540 and CEE 482 or equivalent. Offered: W.

CEWA 544 Physical-Chemical Process Principles (4) Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Topics include chemical kinetics, reactor design and analysis, ion exchange, adsorption, and gas transfer. Development of mathematical models and evaluation of current design practice. Offered: W.

CEWA 545 Environmental Organic Chemistry (3) Covers characterization and modeling of properties and processes governing the distribution, fate, and transformation of organic pollutants in environmental systems. Explores linear free energy relationships and their application to examining the water/soil/air partitioning, bioaccumulation, substitution and redox reaction kinetics, and abiotic transformations of organic pollutants. Prerequisite: CEE 543 or permission of instructor. Offered: W.

CEWA 546 Topics in Ecological Effects of Wastewater (3) Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor. CEWA 547 Lake and Watershed Management (3) Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor. Offered: Sp.

CEWA 549 Physical-Chemical Treatment Processes (3) Jessica Ray Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment, with emphasis on particle removal and redox processes. Specific focus areas include precipitation, coagulation, flocculation, granular media filtration, membrane filtration, and chemical oxidation. Development of mathematical models and evaluation of current design practice will be examined. Recommended: CEWA 543 and CEWA 544. Offered: Sp.

CEWA 550 Environmental Chemical Modeling (3) Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications focus on groundwater systems. Prerequisite: CEE 551. Offered: Sp.

CEWA 553 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6) Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the
atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

CEWA 554 Acoustics of Environmental Noise (4)
Offered: jointly with M E 528.

CEWA 555 Topics in Environmental Health (3)
Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CEWA 557 Air Resources Management (3)
Technical, administrative, and legal aspects of air conservation. Topics include urban and regional scale air quality measurement and modeling systems, receptor modeling based on chemical fingerprinting of sources and current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels. Offered: A.

CEWA 560 Risk Assessment for Environmental Health Hazards (4)
Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PUBPOL 589; A.

CEWA 564 Advanced Hydrology (3) E. Istanbulluoglu
Detailed treatment of statistical methods used in hydrology: trend analysis, hypothesis testing, flood frequency, and elements of stochastic hydrology and data generation. Detailed examination of hydrologic models with emphasis on evapotranspiration and water budget, use of a watershed model (e.g., Stanford Watershed Model) in catchment. Offered: Sp.

CEWA 565 Data Analysis in Water Sciences (4) J. LUNDQUIST
Covers fundamental topics related to data analysis, including statistical inference testing and error estimation, linear and quantile-based regression models, Monte Carlo simulation, time series analysis, Bayes theorem, and data visualization using modern computer techniques. Applications to water sciences, but techniques are applicable to any area. Offered: A.

CEWA 566 Satellite Remote Sensing for Water Resources (3) F. HOSSAIN
Basic principles of satellite remote sensing of earth’s water. Practical aspects of remote sensing in the context of conventional water management. Data uncertainty, modeling and assimilation for advancing water management. Offered: A.

CEWA 568 Snow Hydrology (3) Lundquist
Introduces snow hydrology research, emphasizing current research methods and results in both measurements and modeling. Explores the impact of snow on hydrology and water resources. Offered: W.

CEWA 570 Hydrodynamics (4) A. Horner-Devine
Applications of the equations of motion to ideal and real fluid flow, with topics in Environmental Fluid Mechanics. Kinematics, Navier-Stokes equations, viscous flows, Coriolis, density driven flows, free surface flows, and introduction to turbulence. Applications include: tidal flushing, lakes, estuaries, gravity currents and river plumes. Prerequisite: CEE 357 or equivalent. Offered: Sp.

CEWA 571 Hydrodynamics in Water Quality (3)
Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

CEWA 572 Numerical Modeling of Hydrodynamics (3) U. Nirnimesh Kumar
Develops finite-difference, finite-volume and spectral numerical methods to solve ordinary and partial differential equations relevant to hydrodynamics and hydrology, and ocean sciences. The course framework will provide insight into working in a UNIX system, writing numerical models, hands-on training with numerical models. Prerequisite: Working knowledge of MATLAB/Python

CEWA 573 Water Wave Mechanics for Coastal Engineers (4) J. Thomson
Covers theory and numerical modeling of water waves; classical water wave problem and approximate solution techniques; evolution equations and their solutions for wave systems; viscous damping effects and mass
transport; nonlinear shallow-water waves and the Korteweg-deVries equation; and waves on beaches and structures. Prerequisite: CEE 347. Offered: Sp.

CEWA 574 Hydraulics of Sediment Transport (4) A. Horner-Devine Introduction to sediment transport in steady flows with emphasis on physical principles and their extension to modeling of sediment transport. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. HECRAS modeling of transport in channels. Prerequisite: CEE 347; recommended: Fluid Mechanics comparable to CEE 347 course or equivalent. Offered: Sp.

CEWA 576 Physical Hydrology (4) E. Istanbulluoglu Engages familiarity with physical hydrologic processes, interactions, and their representations over multiple timeframe references and scales. Project and report based exercises extend furthering analytical skills using existing theories and observations in Physical Hydrology. Offered: A.

CEWA 577 Open Channel Flow with Modeling (4) A. Jessup Water flow in natural and engineered channels, rivers, and streams. Analysis and design of channels (lined, vegetated), flow controls (weirs, spillways), and structures affecting fish passage (culverts). Prediction of water surface profiles. Introduction to river mechanics. Design-oriented problems. Introduction to the HEC-RAS modeling software. Prerequisite: CEE 347. Offered: W.

CEWA 578 Water Resource System Management and Operations (3) Readings in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Offered: Sp.

CEWA 579 Quantitative Water Management (3) F. Hossain Delivers an understanding of quantitative methods used in practice to manage the earth’s water using a systems approach. It also introduces emerging water management ideas in the context of emerging water management challenges.

CEWA 580 Water-Quality Management (3) Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Offered: Sp.

CEWA 582 Wastewater Reuse and Resource Recovery (3) M. Winkler Designed to provide students with fundamentals of wastewater and biosolids treatment and will focus on technologies utilized to recover resources from waste products. Covers experience with real-world applications both in the United States and abroad. Topics include: bioplastic and biogas production, recovery of water, fertilizer, sulfur and metals. Offered: W.

CEWA 590 Field Measurements for Hydrology and Hydrodynamics (3) Jim Thomson Planning and execution of field measurements in lakes, rivers, and oceans. Usage of oceanographic, meteorologic, and hydrologic sensors (primarily in situ sensors). Prerequisite: CEE 347, or a course in fluid mechanics; recommended: data processing; and basic statistics. Offered: Sp, odd years.

CEWA 596 Fate and Transport of Chemicals in the Environment (3) Neumann Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

CEWA 597 Engineering Jordan: Water in an Arid Land Study Abroad (5) Gough Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

CEWA 599 Special Topics in Environmental Engineering (1-5, max. 20) Special topics in environmental engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.
STRUCTURAL AND GEOTECHNICAL ENGINEERING

CESG 501 Structural Mechanics (4) R. Wiebe
Governing equations of bar and beam elements; vector-based direct stiffness formulation for 3D trusses and frames; the weak form, virtual work, and minimum potential energy methods; buckling and collapse modes; introduction to 3D elasticity and the finite element method. Offered: A.

CESG 502 Structural Dynamics (4) P. Calvi

CESG 503 Advanced Structures I (3) L. Lowes, M. Motley
Introduction to the finite element method for modeling civil structures at the graduate level. Formulation of line and continuum elements using virtual work and the principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456 or CEE 501 Offered: W.

CESG 504 Finite Element Methods in Structural Mechanics (4) P. Mackenzie-Helnwein, M. Motley
Extension of the matrix methods of structural analysis and structural mechanics to the solution of static and dynamic continuum elasticity problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CEE 501 or permission of instructor. Offered: Sp.

CESG 505 Engineering Computing (3) Lowes, Mackenzie, Miller
Applied computing in civil and environmental engineering contexts, including physical systems modeling, graphics and visualization, and data management. Program development using contemporary tools and strategies. Computer architecture fundamentals, theoretical and practical issues affecting memory use and performance. Offered: A.

CESG 507 Structural Stability (3) M. Motley, R. Wiebe
Covers concepts and fundamental principles of mechanics of equilibrium states and their stability properties; analysis of the stability and critical loads of columns; beams, and frames with various boundary conditions and loads; application of design formulas; and approximate method to calculate elastic and inelastic buckling loads. Prerequisite: CEE 501. Offered: W.

CESG 509 Reliability and Design (3) Reed
Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage. Offered: AS.

CESG 521 Advanced Reinforced Concrete (3) Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Prerequisite: CEE 452 or equivalent. Instructors: Eberhard, Stanton Offered: A.

CESG 522 Analysis and Design of Prestressed Concrete (3) J. Stanton
Provides an introduction to prestressed concrete. It will focus primarily on flexural members, but will also include axially loaded
members. First, the concept of prestressing will be discussed, followed by analysis and design under service loads, then analysis for strength. The discussion will be restricted to statically determinate members. A design project may also be included as part of the course. Prerequisite: CEE 452 or equivalent senior course on Reinforced Concrete; recommended: A course in statics and one in mechanics of materials. Offered: W.

CESG 524 Advanced Steel I (3) Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and affect of different fabrication methods on behavior of structure. Prerequisite: CEE 501. Instructors: Berman, Roeder Offered: W.

CESG 527 Earthquake Engineering II (3) Performance-based design, development of fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic inelastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515. Instructors: Roeder Offered: A.

CESG 528 Wind Engineering Design (3) Reed Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and aeroelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort. Fundamentals of wind tunnel testing. Offered: A.

CESG 529 Bridge Engineering (3) M. Eberhard Design of bridges. Includes the design of decks, joints, girders, columns and foundations to resist gravity loads and earthquakes. Prerequisite: CEE 452, CEE 453 (or equivalents) Offered: S.

CESG 561 Advanced Soil Mechanics (4) Flow of fluids through soils, soil consolidation and consolidation equation, normal and overconsolidation, settlement and rebound, rate of settlement, analytical and numerical solution of consolidation equation. Mitigation of settlement problems. Stresses in soils, yield and failure, failure criteria, shear strength of soils, laboratory and field strength tests, shear strength of different soils under drained and undrained conditions. Prerequisite: CEE 367 or equivalent introductory geotechnical engineering course Offered: A.

CESG 562 Advanced Geotechnical Laboratory (5) Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 367 or equivalent. Offered: A.

CESG 563 Physicochemical Aspects of Soil Behavior (3) Study of soil formational processes, minerology, soil-fluid-electrolyte interactions, clay mineral chemistry, inter-particle forces and stresses, conduction phenomena, time-dependent changes, soil fabric, chemical admixtures, electro-osmosis, particle characteristics, and their effects on macroscopic soil engineering behavior including soil strength, stiffness, and volumetric changes. Prerequisite: CEE 367 (or equivalent course) . Offered: A.

CESG 564 Computational Geomechanics (4) P. Arduino Introduction to geotechnical modeling, applied finite elements and soil constitutive modeling. Basic introduction to finite elements as applied to geotechnical problems. Development, implementation and calibration of constitutive models for soils including Von Mises, Drucker Prager, Mohr-Coulomb and Cam-Clay. Offered: W.
CESG 565 Soil Dynamics (3) Vibratory motion, dynamics of linear single-degree-of-freedom (SDOF) systems, dynamics of nonlinear SDOF systems, dynamics of multiple-degree-of-freedom systems, wave propagation, dynamic soil properties for linear, equivalent linear, and nonlinear analysis, ground response analysis, soil-structure interaction.

CESG 566 Slope Stability and Landslides (3) Covers slope processes and mass wasting; landslide characteristics, features and terminology; limit equilibrium slope stability analyses; effects of water on slopes; slope stability and landslide investigations; and design and stabilization of slopes; and landslide risk assessment. Prerequisite: CESG 561. Offered: W.

CESG 567 Advanced Foundation Engineering (3) Design and analysis of shallow and deep foundation systems and earth retention structures. Seismic effects, pile interactions, and other related topics. Site investigation, quality control, and construction methods. Offered: Sp.

CESG 568 Geotechnical Earthquake Engineering (3) Basic seismology (plate tectonics, elastic rebound, intensity and magnitude), ground motions and their prediction, deterministic and probabilistic seismic hazard analysis, soil liquefaction, seismic slope stability, seismic lateral earth pressures, mitigation of geotechnical seismic hazards by soil improvement. Prerequisite: CEE 525 or permission of instructor; recommended: CESG 561 and CESG 565. Offered: Sp.

CESG 569 Geological Engineering (3) Includes study of (i) geologic, geomorphic, and tectonic settings, (ii) rock types, characteristics, and identification; (iii) rock and rock-mass strength assessment, (iv) stereonets and their application to civil engineering problems in rock, (v) rock-slope stability and runout assessment, and (vi) discrete element numerical modeling. Recommended: CEE 367 or equivalent. Offered: Sp.

CESG 570 Geosystems Engineering (3) Advanced geotechnical engineering topics not covered elsewhere in the graduate curriculum: design of earth and rockfill dams and levees; geosynthetics engineering; soil and site improvement methods; environmental geotechnics; lateral earth pressures and retaining systems; emerging topics in geotechnics. Offered: Sp.

CESG 571 Geotechnical Case Histories (3) Geotechnical engineering, exposing successes and limitations of current geotechnical practice and exploring state-of-the-art solutions. Lectures by local practitioners and experts; visits to relevant sites. Offered: W.

CESG 599 Special Topics in Structural and Geotechnical Engineering (1-5, max. 20) Special topics in structural and geotechnical engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

TRANSPORTATION ENGINEERING

CET 511 Planning for People and Freight (4) Anne Goodchild Introduces transportation planning as a process integrating and balancing the needs of diverse users, including automobile drivers, freight carriers, public and private mobility service providers, cyclists, and pedestrians. Addresses the purpose and goals of the transportation system, the planning process and governance, use of road and curb space, land use - transportation interactions, and tools for analyzing impacts. Offered: A.

CET 512 Transportation Data Collection (3) Cynthia Chen Description of types of data collection methods used for transportation planning applications, including both quantitative and qualitative methods. Emerging data sources such as phone and social media also discussed. Pros and cons of various types of data collection. Discussion of sampling, experimental design, survey design and representativeness issues. Ethics also discussed. Recommended: transportation planning; graduate standing; introduction to probability and statistics; and basic levels in programming. Offered: W.

CET 513 Transportation Networks and Optimization (3) Xuegang Ban Network and optimization methods, tools, and applications in transportation and other civil engineering systems. Equips students with network and optimization skills towards data analysis and modeling of civil infrastructure systems. Overview of algorithms, and toolboxes of linear/nonlinear optimization, network flow methods, and applications in modeling and optimization of civil engineering systems. Prerequisite: linear algebra or permission of instructor; recommended: linear or nonlinear programming. Offered: A.
CET 521 Inferential Data Analysis for Engineers (3)
Linda Ng Boyle Application of statistical methods to analyze transportation systems, with an emphasis on modeling individual behaviors and drawing sound inferences about cause and effect. Addresses linear regression and common misuses; generalized linear models including logit and negative binomial; multilevel modeling; matching methods. Emphasizes frequentist approaches but introduces Bayesian analysis and extensions of regression modeling to machine learning. Prerequisite: either IND E 315, STAT 390, or equivalent; recommended: standard introductory probability and statistics course. Offered: jointly with IND E 546; W.

CET 522 Transportation Data Management and Visualization (3) Yinhai Wang Modern concepts, theories, and tools for management, visualization, and analysis of transportation data. Applications of software tools to large data sets, such as highway sensor data, real-time traffic and mobility service data, spatial data, probe vehicle and mobile device data. Addresses information retrieval, storage, knowledge discovery, data exchange, online sharing, visualization, communication, system optimization, and decision support. Offered: W.

CET 561 Transportation Planning and Design (5) Avery Provides an overview of transportation planning and how sustainability fits into this field. Topics include institutional frameworks, legal/legislative issues, land use, capacity analysis, supply management and Intelligent Transportation Systems (ITS). Covers tasks/tools of transportation planning at the site, city, region, and state levels. Offered: A.

CET 562 Livable Communities and Design (4) Bassok Explores the positives and negatives affecting livability. Covers sprawl and compact cities, energy issues and environmental quality, transit-oriented and traditional neighborhood development, and mixed-use and mixed income developments. Includes context-sensitive solutions to transportation projects. Offered: A.

CET 563 Transportation Choices and Technology (4) Rutherford Explores the range of sustainable transportation choices for both people and goods. Studies passenger modes of transportation including bicycles, single-occupancy vehicles, car and van pools, shared autos, bus, rail, ferries, trolleys, and foot travel in the context of sustainability. Offered: A.

CET 564 Sustainable Transportation from a Systems Perspective (5) McCormack Covers tools to evaluate and develop sustainable transportation systems. Emphasizes design approaches that support sustainable transportation, methods to evaluate the full life cycle impacts of transportation systems, and tools to assess transportation networks as resilient systems. Offered: A.

CET 565 Climate Change and Energy (5) Larson, Mahoney Covers the nature of global climate systems, global warming, ozone depletion, and human influences. Introduces tools to evaluate current and alternative energy production and conversion options for transportation. Explores the nexus between transportation and energy in the context of climate change adaptation and mitigation. Offered: W.

CET 566 Environmental Analysis and Assessment (5) Watkins Reviews statistical methods necessary to analyze environmental issues. Uses environmental data to demonstrate how significant impacts are measured and reported. Discusses transportation data sources, sustainable transportation indicators, and related statistical analysis. Includes travel demand forecasting and a review of engineering economy. Offered: Sp.

CET 567 Health and Sustainable Transportation (5) Rowangould Examines how transportation policy is driven by human health impacts. Highlights water and air impacts on health along with the health benefit of human powered transportation. Presents legal and regulatory issues. Case studies provide examples of application of these principles to real-world transportation issues. Offered: A.

CET 568 Transportation Economics (5) Niemeier Economics applied to transportation planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; and the effect of uncertainty. Presents the effect of tolls, parking pricing, transit subsidies, and other pricing and incentive policies. Offered: W.

CET 569 Policy Development, Finance, and Sustainable Transportation (5) Rutherford Covers
the development and implementation of transportation policies to support sustainable transportation systems. Reviews regulations and finance opportunities at the local, state, and federal level highlighting those that promote sustainable transportation. Offered: Sp.

CET 579 Advanced Traffic Detection Systems (3) Wang Introduction to advanced tracking and detection technologies in transportation systems, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

CET 581 Travel Demand Forecasting (4) Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics. Offered: A.

CET 582 Intelligent Transportation Systems (3) Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System's (ITS) social, organizational, and operational changes. Offered: A.

CET 583 Transportation Energy and Sustainability (3) Mackenzie Addresses technical and policy options for making transportation more sustainable, considering economic, environmental, and equity impacts. Topics include transportation demand management; vehicle technologies; alternative fuels; dynamics of technology change; and roles of state, federal, and international policy. Prepares students to think broadly, analyze systematically, and communicate effectively in this area. Offered: Sp.

CET 585 Analytical Methods in Transportation II (3) Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling, with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

CET 586 Pedestrian Travel, Land Use, and Urban Form (3) Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with URBDP 576.

CET 587 Transportation Logistics (4) Goodchild Physical and information flows in supply chains. Economic drivers of supply chain choices as well as applications of technology, policy, and infrastructure to improve freight transportation systems. Focus on fundamental supply chain transportation and logistics concepts that can be mathematically demonstrated, and that underpin more complex analyses or tools used. Offered: Sp.

CET 590 Traffic Systems Operations (3) Goodchild, McCormack Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages. Prerequisite: CEE 327. Offered: A.

CET 591 Freight Transportation (3) Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility. Also covers regional freight demand modeling techniques. Offered: A.
CET 593 Transportation System Analysis (3) X. Ban
Applications of mathematical models to model traffic flow on transportation system. Introduces graph theories of transportation networks, basic network flow methods, network equilibrium and pricing concepts. Discusses impact of emerging techniques (e.g., shared mobility) on transportation. Prepares students on transportation system analysis fundamentals for them to conduct more advanced research. Offered: Sp.

CET 599 Special Topics in Transportation Engineering (1-5, max. 20)
Special topics in transportation engineering offered occasionally by permanent or visiting faculty members. Offered: AWSpS.

COMPUTER SCIENCE AND ENGINEERING

CSE 112 Advanced Placement (AP) Computer Science A (4) NW, QSR Course awarded based on Advanced Placement (AP) score. Consult the Admissions Exams for Credit website for more information.

CSE 120 Computer Science Principles (5) NW, QSR
Introduces fundamental concepts of computer science and computational thinking. Includes logical reasoning, problem solving, data representation, abstraction, the creation of digital artifacts such as web pages and programs, managing complexity, operation of computers and networks, effective web searching, ethical, legal and social aspects of information technology. May not be taken for credit if credit earned in CSE 100/INFO 100.

CSE 131 Science and Art of Digital Photography (4)
VLPA Hemingway Covers the fundamentals of digital photography, including computational imaging; the elements of photographic composition and design; and the future of internet-enabled photography.

CSE 142 Computer Programming I (4) NW, QSR
Basic programming-in-the-small abilities and concepts including procedural programming (methods, parameters, return, values), basic control structures (sequence, if/else, for loop, while loop), file processing, arrays, and an introduction to defining objects. Intended for students without prior programming experience. Offered: AWSpS.

CSE 143 Computer Programming II (5) NW, QSR
Continuation of CSE 142. Concepts of data abstraction and encapsulation including stacks, queues, linked lists, binary trees, recursion, instruction to complexity and use of predefined collection classes. Prerequisite: CSE 142. Offered: AWSpS.

CSE 154 Web Programming (5) QSR
Covers languages, tools, and techniques for developing interactive and dynamic web pages. Topics include page styling, design, and layout; client and server side scripting; web security; and interacting with data sources such as databases. Prerequisite: minimum grade of 2.0 in either CSE 142, CSE 143, or CSE 160.

CSE 160 Data Programming (4) NW, QSR
Introduction to computer programming. Assignments solve real data manipulation tasks from science, engineering, business, and the humanities. Concepts of computational thinking, problem-solving, data analysis, Python programming, control and data abstraction, file processing, and data visualization. Intended for students without prior programming experience. No credit if CSE 143 has been taken.

CSE 163 Intermediate Data Programming (4)
Intermediate data programming. Topics include writing programs that manipulate different types of data; leveraging the growing ecosystem of tools and libraries for data programming; writing programs that are both efficient and elegant; and writing medium-scale programs (100 to 200 lines). Prerequisite: either CSE 142, CSE 143, or CSE 160.

CSE 180 Introduction to Data Science (4) QSR
Survey course introducing the essential elements of data science: data collection, management, curation, and cleaning; summarizing and visualizing data; basic ideas of statistical inference, machine learning. Students will gain hands-on experience through computing labs.

CSE 190 Current Topics in Computer Science and Engineering (1-5, max. 15)

CSE 301 CSE Internship Education (1-2, max. 12)
CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open
only to students who have been admitted to CSE Internship Program or by special permission of the Department. Offered credit/no credit only. Credit/no-credit only. Offered: AWSpS.

CSE 311 Foundations of Computing I (4) QSR
Examines fundamentals of logic, set theory, induction, and algebraic structures with applications to computing; finite state machines; and limits of computability. Prerequisite: CSE 143; either MATH 126 or MATH 136.

CSE 312 Foundations of Computing II (4) QSR
Examines fundamentals of enumeration and discrete probability; applications of randomness to computing; polynomial-time versus NP; and NP-completeness. Prerequisite: CSE 311.

CSE 331 Software Design and Implementation (4)
Explores concepts and techniques for design and construction of reliable and maintainable software systems in modern high-level languages: specifications; program structure and design; program-correctness approaches, including testing; and event-driven programming (e.g., graphical user interface). Prerequisite: CSE 143.

CSE 332 Data Structures and Parallelism (4)
Covers abstract data types and structures including dictionaries, balanced trees, hash tables, priority queues, and graphs; sorting; asymptotic analysis; fundamental graph algorithms including graph search, shortest path, and minimum spanning trees; multithreading and parallel algorithms; P and NP complexity classes. No credit if CSE 373 has been taken. Prerequisite: CSE 311.

CSE 333 Systems Programming (4) Includes substantial programming experience in languages that expose machine characteristics and low-level data representation (e.g., C and C++); explicit memory management; modern libraries and language features; interacting with operating-system services; introduction to concurrent programming. Prerequisite: CSE 351.

CSE 340 Interaction Programming (4) User interfaces for computing systems, including principles and implementation techniques. Covers key topics and programming paradigms for interactive systems, such as event handling; graphical layout, design, and widgets; undo; accessibility; and context awareness. Provides experience with modern application domains and frameworks (e.g., mobile applications). Prerequisite: CSE 143.

CSE 341 Programming Languages (4) Basic concepts of programming languages, including abstraction mechanisms, static and dynamic typing, scope, syntax vs. semantics, first-class function closures, and algebraic datatypes. Detailed study of functional programming and other paradigms. No credit if CSE 413 has been taken. Prerequisite: CSE 143.

CSE 344 Introduction to Data Management (4)
Introduces database management systems and writing applications that use such systems; data models (e.g., relational, semi-structured), query languages (e.g., SQL, XQuery), language bindings, conceptual modeling, transactions, security, database tuning, data warehousing, parallelism, and web-data management. Prerequisite: CSE 311.

CSE 351 The Hardware/Software Interface (4)
Examines key computational abstraction levels below modern high-level languages; number representation, assembly language, introduction to C, memory management, the operating-system process model, high-level machine architecture including the memory hierarchy, and how high-level languages are implemented. Prerequisite: CSE 143.

CSE 352 Hardware Design and Implementation (4)
Covers digital circuit design, processor design, and systems integration and embedded-systems issues. Includes substantial hardware laboratory. Prerequisite: CSE 311; CSE 351.

CSE 369 Introduction to Digital Design (3)
Introduces the implementation, specification, and simulation of digital logic. Boolean algebra; combinational circuits including arithmetic circuits and regular structures; sequential circuits including finite-state-machines; and use of field-programmable gate arrays (FPGAs). Emphasizes simulation, high-level specification, and automatic synthesis techniques. Cannot be taken for credit if credit received for EE 271. Prerequisite: CSE 311.

CSE 371 Design of Digital Circuits and Systems (5)
Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware
description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with E E 371.

CSE 373 Data Structures and Algorithms (4)

CSE 374 Intermediate Programming Concepts and Tools (3) Covers key software development concepts and tools not in introductory courses. Concepts of lower-level programming (C/C++) and explicit memory management; techniques and tools for individual and group software development; design, implementation, and testing strategies. Intended for non-majors. Cannot be taken for credit if credit received for CSE 333. Prerequisite: CSE 143.

CSE 390 Special Topics in Computer Science and Engineering (1-5, max. 10) Covers topics of current interest in computer science and engineering.

CSE 391 System and Software Tools (1) Introduction to tools commonly used in software development. Topics include using a command-line interface, writing scripts for file and string manipulation, managing user permissions, manipulating text with regular expressions, using build-management tools, and using version-control systems. Prerequisite: CSE 143. Credit/no-credit only.

CSE 399 CSE Foreign Study (*) Upper-division computer science or computer engineering course, taken through an approved study abroad program, for which there is no direct University of Washington equivalent. Credit/no-credit only.

CSE 401 Introduction to Compiler Construction (4) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. No credit to students who have taken CSE 413. Prerequisite: CSE 332; CSE 351.

CSE 402 Design and Implementation of Domain-Specific Languages (4) Design and implementation of domain-specific languages. Creation of new programming abstractions, formal and informal language specification techniques, implementation strategies to support language analysis and execution on traditional and non-traditional computing platforms. Selection and use of appropriate software tools and development environments to build novel DSLs. Prerequisite: CSE 332 and CSE 351.

CSE 403 Software Engineering (4) Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include the software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE 331; CSE 332.

CSE 410 Computer Systems (3) Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. Intended for non-majors. No credit to students who have completed CSE 351 or CSE 451. Prerequisite: CSE 373.

CSE 412 Introduction to Data Visualization (4) Introduction to data visualization design and use for both data exploration and explanation. Methods for creating effective visualizations using principles from graphic design, psychology, and statistics. Topics include data models, visual encoding methods, data preparation, exploratory analysis, uncertainty, cartography, interaction techniques, visual perception, and evaluation methods. No credit if CSE 442 taken. Prerequisite: CSE 143 or CSE 163.

CSE 413 Programming Languages and Their Implementation (3) Basic concepts and implementation strategies for modern functional and object-oriented programming languages such as Scheme and Java. Intended for non-majors. No credit to students who have completed CSE 341 or CSE 401. Prerequisite: CSE 373.
CSE 414 Introduction to Database Systems (4)
Introduces database management systems and writing applications that use such systems; data models, query languages, transactions, database tuning, data warehousing, and parallelism. Intended for non-majors. Not open for credit to students who have completed CSE 344. Prerequisite: minimum grade of 2.5 in CSE 143.

CSE 415 Introduction to Artificial Intelligence (3) NW
Principles and programming techniques of artificial intelligence: LISP, symbol manipulation, knowledge representation, logical and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Intended for non-majors. Not open for credit to students who have completed CSE 473. Prerequisite: CSE 373.

CSE 416 Introduction to Machine Learning (4) NW
Provides practical introduction to machines learning. Modules include regression, classification, clustering, retrieval, recommender systems, and deep learning, with a focus on an intuitive understanding grounded in real-world applications. Intelligent applications are designed and used to make predictions on large, complex datasets. Prerequisite: either CSE 143, CSE 160, or CSE 163; and either STAT 311, STAT 390, STAT 391, or IND E 315. Offered: jointly with STAT 416.

CSE 417 Algorithms and Computational Complexity (3)

CSE 421 Introduction to Algorithms (3)
Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 312; CSE 332.

CSE 427 Computational Biology (3)
Algorithmic and analytic techniques underlying analysis of large-scale biological data sets such as DNA, RNA, and protein sequences or structures, expression and proteomic profiling. Hands-on experience with databases, analysis tools, and genome markers. Applications such as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 312; CSE 332.

CSE 428 Computational Biology Capstone (5)
Designs and implements a software tool or software analysis for an important problem in computational molecular biology. Prerequisite: CSE 312; CSE 331; CSE 332.

CSE 431 Introduction to Theory of Computation (3)
Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 312.

CSE 440 Introduction to HCI: User Interface Design, Prototyping, and Evaluation (5)
Human-Computer Interaction (HCI) theory and techniques. Methods for designing, prototyping, and evaluating user interfaces to computing applications. Human capabilities, interface technology, interface design methods, and interface evaluation tools and techniques. Prerequisite: CSE 332.

CSE 441 Advanced HCI: Advanced User Interface Design, Prototyping, and Evaluation (5)
Advanced HCI theory and techniques. Advanced methods for designing, prototyping, and evaluating user interfaces to computing applications. Novel interface technology, advanced interface design methods, and prototyping tools. Prerequisite: CSE 440.

CSE 442 Data Visualization (4)
Techniques for creating effective visualizations of data based on principles from graphic design, perceptual psychology, and statistics. Topics include visual encoding models, exploratory data analysis, visualization software, interaction techniques, graphical perception, color, animation, high-dimensional data, cartography, network visualization, and text visualization. Prerequisite: CSE 332.

CSE 444 Database Systems Internals (4)
CSE 446 Machine Learning (4) Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling: decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: CSE 332; either STAT 390, STAT 391, or CSE 312.

CSE 447 Natural Language Processing (4) Methods for designing systems that usefully and/or intelligently process natural language text data. Language models, text categorization, syntactic and semantic analysis, machine translation. This course emphasizes algorithms and data-driven methods. Prerequisite: CSE 312 and CSE 332; recommended: MATH 308; CSE 446 is recommended before or concurrently.

CSE 450 Animation Production Seminar (1) Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.

CSE 451 Introduction to Operating Systems (4) Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. No credit to students who have completed CSE 410. Prerequisite: CSE 351; CSE 332; CSE 333.

CSE 452 Introduction to Distributed Systems (4) Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 332 and CSE 333; recommended: CSE 451.

CSE 454 Advanced Internet and Web Services (5) Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datamining webserver logs to provide personalized and user-targeted services. Large project. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 455 Computer Vision (4) Introduction to image analysis and interpreting the 3D world from image data. Topics may include segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: CSE 333; CSE 332.

CSE 456 Story Design for Computer Animation (4) Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.

CSE 457 Computer Graphics (4) Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, displays and framebuffers, image processing, affine and projective transformations, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, character animation, and animation principles. Prerequisite: CSE 333; CSE 332.

CSE 458 Computer Animation (5) Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from art, CSE, and music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: CSE 457.

CSE 459 Pre-Production for Collaborative Animation (5) Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

CSE 460 Animation Capstone (5) Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animatics and basics of character animation, and rendering techniques. Prerequisite: CSE 458, CSE 459.
CSE 461 Introduction to Computer-Communication Networks (4) Computer network architectures, protocol layers, network programming. Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: either CSE 326 or CSE 332; either CSE 303 or CSE 333.

CSE 464 Advanced Topics in Digital Animation (1-5, max. 10) Students design individual animated works for professional quality demo reels. 2- and 3-D animatics, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies.

CSE 467 Advanced Digital Design (4) Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 352; CSE 332.

CSE 469 Computer Architecture I (5) Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with E E 469; AWSp.

CSE 472 Introduction to Computational Linguistics (5) VLPA/NW V. BENDER Introduction to computational approaches to modeling language, for linguistic research and practical applications, including analyses at different levels of linguistic structure and symbolic as well as statistical approaches. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 311. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence (3) Principal ideas and developments in artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Not open for credit to students who have completed CSE 415. Prerequisite: CSE 332.

CSE 474 Introduction to Embedded Systems (4) Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with E E 474; AWSp.

CSE 475 Embedded Systems Capstone (5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with E E 475; AWSp.

CSE 478 Autonomous Robotics (4) Theory and application of algorithms and probabilistic techniques for autonomous robotics. Covers topics related to state estimation (Bayes filtering, probabilistic motion and sensor models), planning/control (search based planners, lattice based planners, trajectory following techniques), and perception and learning (object detection, learning from demonstrations etc.). Prerequisite: CSE 332; recommended: CSE 312; MATH 308.

CSE 481 Capstone Software Design (5, max. 15) Student teams design and implement a software project involving multiple areas of the CSE curriculum. Course emphasizes the development
process, rather than the product. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 482 Capstone Software Design to Empower Underserved Populations (5, max. 15) DIV Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum, for the purpose of empowering marginalized or underserved populations. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

CSE 484 Computer Security (4) Foundations of modern computer security, including software security, operating system security, network security, applied cryptography, human factors, authentication, anonymity, and web security. Prerequisite: CSE 332; CSE 351.

CSE 486 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136, MATH 307, or AMATH 351; and either MATH 308, AMATH 352, or CSE 311 Offered: jointly with BIOEN 423/E E 423; A.

CSE 487 Advanced Systems and Synthetic Biology (3) H. Kueh Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/E E 424; Sp.

CSE 488 Laboratory Methods in Synthetic Biology (4) Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/E E 425; W.

CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15) Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

CSE 491 Data Science and Society Seminar (1) Current topics related to the societal implications of data science. Topic selection will vary from quarter to quarter and may include data privacy and security, data anonymization, hypothesis-testing on a shared database, impact of data science-based decisions on society. Includes both guest speakers and case-study or article-based discussions. Credit/no-credit only. Credit/no-credit only.

CSE 492 Undergraduate Seminar (1-2, max. 5) Seminars on current topics in computer science and engineering. Topic selection will vary from quarter to quarter. Credit/no-credit only.

CSE 495 Project Practicum ([1-5]-, max. 5) Available in special situations for computer science majors to compete, under instructor guidance, a substantial computing project that deepens one’s knowledge and experience in the field. Projects may involve a group of students.

CSE 497 Undergraduate Research Seminar (1) Students prepare and give a public talk on their faculty-sponsored research projects.

CSE 498 Senior Project ([1-9]-, max. 9) A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work.

CSE 499 Reading and Research (1-24, max. 24) Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Free elective, but does not replace core course or computer science elective. Credit/no-credit only.

CSE 501 Programming Language Analysis and Implementation (4) Design and implementation of
compilers and run-time systems for imperative, object-oriented, and functional languages. Intra- and interprocedural analyses and optimizations. Prerequisite: CSE 341.

CSE 503 Software Engineering (4) Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications.

CSE 504 Advanced Topics in Software Engineering (4) Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation.

CSE 505 Principles of Programming Languages (4) Design and formal semantics of modern programming languages, includes functional and object-oriented languages. Prerequisite: CSE 341.

CSE 506 Advanced Topics in Programming Languages (4) May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE 501 which may be taken concurrently, and CSE 505.

CSE 507 Computer-Aided Reasoning for Software (4) Covers theory, implementation, and applications of automated reasoning techniques, such as satisfiability solving, theorem proving, model checking, and abstract interpretation. Topics include concepts from mathematical logic and applications of automated reasoning to the design, construction, and analysis of software.

CSE 510 Advanced Topics in Human-Computer Interaction (4) Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

CSE 512 Data Visualization (4) Covers techniques and algorithms for creating effective visualizations based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Topics include data and image models; visual encoding; graphical perception; color; animation; interaction techniques; graph layout; and automated design. Lectures, reading, and project.

CSE 515 Statistical Methods in Computer Science (4) Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

CSE 517 Natural Language Processing (4) Overview of modern approaches for natural language processing. Topics include language models, text, classification, tagging, parsing, machine translation, semantic, and discourse analysis.

CSE 519 Current Research in Computer Science (1, max. 18) Weekly presentations on current research activities by members of the department. Only computer science graduate students may register, although others are encouraged to attend. Credit/no-credit only.

CSE 520 Computer Science Colloquium (1, max. 18) Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no-credit only.

CSE 521 Design and Analysis of Algorithms I (4) Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, network flow, linear programming. Correctness and analysis of algorithms. NP-completeness. Prerequisite: either CSE 332 or equivalent.

CSE 522 Design and Analysis of Algorithms II (4) Analysis of algorithms more sophisticated than those treated in CSE 521. Content varies and may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity, and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE 521.
CSE 523 Computational Geometry (4) Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE 521.

CSE 524 Parallel Algorithms (4) Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems, and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE 521.

CSE 525 Randomized Algorithms and Probabilistic Analysis (4) Examines algorithmic techniques: random selection, random sampling, backwards analysis, algebraic methods, Monte Carlo methods, and randomized rounding; random graphs; the probabilistic method; Markov chains and random walks; and analysis tools: random variables, moments and deviations, Chernoff bounds, martingales, and balls in bins. Prerequisite: either CSE 521 or equivalent.

CSE 526 Cryptography (4) Introduction to the theoretical foundation of cryptography, teaching the design and application of selected important cryptographic objects, and the mathematical frameworks and methodologies of modern cryptography for formalizing security goals and developing provably secure solutions.

CSE 527 Computational Biology (4) Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search.

CSE 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with NEURO 528.

CSE 529 Neural Control of Movement: A Computational Perspective (3) Systematic overview of sensorimotor function on multiple levels of analysis, with emphasis on the phenomenology amenable to computational modeling. Topics include musculoskeletal mechanics, neural networks, optimal control and Bayesian inference, learning and adaptation, internal models, and neural coding and decoding. Prerequisite: vector calculus, linear algebra, MATLAB, or permission of instructor. Offered: jointly with AMATH 533.

CSE 532 Computational Complexity II (4) Advanced computational complexity including several of the following: circuit complexity lower bounds, #p and counting classes, probabilistically-checkable proofs, de-randomization, logical characteristics of complexity, communication complexity, time-space tradeoffs, complexity of data structures.

CSE 533 Advanced Topics in Complexity Theory (4) An in-depth study of advanced topics in computational complexity.

CSE 541 Interactive Learning (4) Foundations and methods of interactive machine learning including multi-armed bandits, active learning, and adaptive experimental design. Stochastic and adversarial K-armed bandits, structured bandits, and contextual...
bandits. Online learning; adaptive data collection for supervised learning.

**CSE 546 Machine Learning (4)** Explores methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

**CSE 547 Machine Learning for Big Data (4)** Covers machine learning and statistical techniques for analyzing datasets of massive size and dimensionality. Representations include regularized linear models, graphical models, matrix factorization, sparsity, clustering, and latent factor models. Algorithms include sketching, random projections, hashing, fast nearest-neighbors, large-scale online learning, and parallel learning (Map-Reduce, GraphLab). Prerequisite: either STAT 535 or CSE 546. Instructors: Fox, Guestrin Offered: jointly with STAT 548; W.

**CSE 549 High-Performance Computer Architectures (4)** Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processors, data flow architectures. Prerequisite: CSE 548 or permission of instructor.

**CSE 550 Computer Systems (4)** Explores computer system design, implementation, and evaluation. Covers principles, techniques, and examples related to the construction of computer systems, including concepts that span network systems, operating systems, web servers, parallel computing, and databases. Prerequisite: CSE 451.

**CSE 551 Operating Systems (4)** Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE 451.

**CSE 552 Distributed and Parallel Systems (4)** Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE 551.

**CSE 555 Computational Fabrication (4)** Overview of the computational tools and concepts used throughout the modern pipeline for computational fabrication, including topics such as hardware abstraction languages, geometry processing fundamentals, physics-based simulation, optimization techniques, data-driven design methods, and algorithms for high-performance interactive applications.

**CSE 556 Computer Graphics (4)** Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character
animation. Prerequisite: solid knowledge of linear algebra.

CSE 558 Special Topics in Computer Graphics (4)
Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE 557 or permission of instructor.

CSE 561 Computer Communication and Networks (4)

CSE 564 Computer Security and Privacy (4)
Examines the fundamentals of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

CSE 567 Principles of Digital Systems Design (4)
Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: basic knowledge of logic design.

CSE 568 Introduction to VLSI Systems (4)
Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: either CSE 567 or permission of instructor.

CSE 571 AI-based Mobile Robotics (4)
Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning Probabilistic sensor interpretation, Bayers filters, particle filters. Projects: Program real robots to perform navigation tasks. Prerequisite: either CSE 473 or permission of instructor.

CSE 573 Artificial Intelligence I (4)
Intensive introduction to artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Prerequisite: either CSE 421 or equivalent; exposure to logic, probability, and statistics.

CSE 574 Artificial Intelligence II (4)
Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects. Prerequisite: CSE 573.

CSE 576 Computer Vision (3)
Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with E E 576.

CSE 577 Special Topics in Computer Vision (3)
Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered: jointly with E E 577.

CSE 578 Convex Optimization (4)

CSE 579 Intelligent Control through Learning and Optimization (3)
Design or near-optimal controllers for complex dynamical systems, using analytical techniques, machine learning, and optimization. Topics from deterministic and stochastic optimal control, reinforcement learning and dynamic programming, numerical optimization in the context of control, and robotics. Prerequisite: vector
calculus; linear algebra; MATLAB. Offered: jointly with AMATH 571.

CSE 583 Software Development for Data Scientists (4) Provides students outside of CSE with a practical knowledge of software development that is sufficient to do graduate work in their discipline. Modules include Python basics, software version control, software design, and using Python for machine learning and visualization.

CSE 586 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/E E 523/MOLENG 525.

CSE 587 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/E E 524; Sp.

CSE 590 Research Seminar (*, max. 50) Several offerings each quarter, on topics of current interest.

CSE 591 Group Projects in Computer Science (1-3, max. 25) Focuses on specialized topics and research activities in computer science.

CSE 599 Special Topics in Computer Science (1-5, max. 30) Studies of emerging areas and specialized topics in computer science.

CSE 600 Independent Study or Research (*-*) Credit/no-credit only.

CSE 601 Internship (1-2, max. 12) CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Credit/no-credit only. Offered: AWSpS.

CSE 700 Master's Thesis (*-) Credit/no-credit only.

CSE 800 Doctoral Dissertation (*-) Credit/no-credit only.

ACCELERATED MASTERS PROGRAM

CSE M 501 Introduction to Compiler Construction (4) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. Cannot be taken for credit if credit received for CSE 401. Prerequisite: CSE 332; CSE 351.

CSE M 544 Database Systems (4) Relational data model and SQL query language. Conceptual modeling; normal forms; XML. Transactions: recovery and concurrency control. Implementation of a database system. Application project using a relational database system. Study of database research papers. May not be taken for credit if student has taken CSE 444. Prerequisite: CSE 332; CSE 344.

CSE M 547 Natural Language Processing (4) Methods for designing systems that usefully and/or intelligently process natural language text data. Language models, text categorization, syntactic and semantic analysis, machine translation. Emphasizes algorithms and data-driven methods. Prerequisite: CSE 312 and CSE 332. Cannot be taken for credit if credit received for CSE 447; recommended: MATH 308; CSE 446 is recommended before or concurrently.

CSE M 552 Introduction to Distributed Systems (4) Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451

CSE M 584 Computer Security (4) Explores foundations and new directions in computer security and privacy, including: risk analysis, system security, applied cryptography, human-computer interaction, design and implementation issues, anonymity, web
security, and side channels. Studies security and privacy research papers. Prerequisite: CSE 351; either CSE 451 or CSE 461.

DATA SCIENCE

CSE D 514 Data Management for Data Science (5)
Introduces database management systems and techniques that use such systems; data models, query languages, database tuning and optimization, data warehousing, and parallel processing. Intended for professional students and non-CSE-majors. Offered: jointly with DATA 514.

CSE D 515 Software Design for Data Science (5)
Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Offered: jointly with DATA 515.

CSE D 516 Scalable Data Systems and Algorithms (5)
Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems. Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE D/DATA 515 or permission of instructor. Offered: jointly with DATA 516; A.

PROFESSIONAL MASTERS PROGRAM

CSE P 501 Compiler Construction (4)
Principles and practice of building efficient implementations of modern programming languages. Lexical, syntactic, and semantic analysis of programs. Intermediate program representations. Intra- and interprocedural analysis and optimization. Run-time system techniques. Related programming environment facilities such as source-level debuggers and profilers.

CSE P 503 Principles of Software Engineering (4)
Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches).

CSE P 504 Advanced Topics in Software Systems (4)
Topics include software architecture, software tools, programming language analysis, type systems, formal reasoning, and other pertinent topics in software engineering and programming languages research.

CSE P 505 Programming Languages (4)
A study of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory.

CSE P 510 Human Computer Interaction (4)
Topics in human-computer interaction, including tools and skills for user interface design, user interface software architecture, rapid prototyping and iterative design, safety and critical systems, evaluation techniques, and computer supported cooperative work.

CSE P 517 Natural Language Processing (4)
Provides an overview of modern approaches for natural language processing. Topics include language models, text classification, tagging, parsing, machine translation, semantics, and discourse analysis.

CSE P 521 Applied Algorithms (4)
Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research.

CSE P 524 Parallel Computation (4)
Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability.

CSE P 527 Computational Biology (4)
Introduction to the use of computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, motif discovery, expression analysis, and regulatory analysis. Techniques such as dynamic programming,
Markov models, MCMC, expectation-maximization, and local search.

**CSE P 531 Computability and Complexity Theory (4)**
Survey of the theory of computation including Turing Machines, Church’s Thesis, computability, incompleteness, undecidability, complexity classes, problem reductions, Cook’s theorem, NP-completeness, randomized computation, cryptography, parallel computation, and space complexity. Some emphasis placed on historical and philosophical aspects of the theory of computation.

**CSE P 544 Database Management System (4)**
Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies.

**CSE P 545 Transaction Processing (4)**
Technology supporting reliable large-scale distributed computing, including transaction programming models, TP monitors, transactional communications, persistent queuing, software fault tolerance, concurrency control and recovery algorithms, distributed transactions, two-phase commit, data replication.

**CSE P 546 Machine Learning (4)**
Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering.

**CSE P 548 Computer Architecture (4)**
Architecture of the single-chip microprocessor: instruction set design and processor implementation (pipelining, multiple issue, speculative execution). Memory hierarchy: on-chip and off-chip caches, TLBs and their management, virtual memory from the hardware viewpoint. I/O devices and control: buses, disks, and RAIDs.

**CSE P 551 Computer Operating Systems (4)**
A study of developments in operating systems from the 1960s to the present. Topics include operating system structure, protection, virtual memory, communication mechanisms, concurrency, lightweight threads, object-oriented systems, distributed systems, and transaction support in operating systems.

**CSE P 552 Distributed Systems (4)**
Principles, techniques, and examples related to the design, implementation, and analysis of distributed computer systems.

**CSE P 557 Current Trends in Computer Graphics (4)**
Introduction to computer image synthesis, modeling, and animation emphasizing the state-of-the-art algorithm applications. Topics may include visual perception, image processing, geometric transformations, hierarchical modeling, hidden-surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles.

**CSE P 561 Network Systems (4)**
Current choices and challenges in network systems. Fundamental concepts combined with emphasis on evaluation of design/operations alternatives. Topics include alternative link, network, and transport-layer technologies, topologies, routing, congestion control multimedia, IPv6, ATM v. IP, network management and policy issues.

**CSE P 564 Computer Security and Privacy (4)**
Examines the fundamental of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

**CSE P 567 Design and Implementation of Digital Systems (4)**
Overview of current implementation technologies for digital systems including custom integrated circuits, field-programmable logic, and embedded processors. Systems components such as buses and communications structures, interfaces, memory architectures, embedded systems, and application-specific devices. Focus on the design of large systems using modern CAD tools.

**CSE P 573 Applications of Artificial Intelligence (4)**
Introduction to the use of Artificial Intelligence tools and techniques in industrial and company settings. Topics include foundations (search, knowledge representation) and tools such as expert systems, natural language interfaces, and machine learning techniques.
CSE P 576 Computer Vision (4) Provides an overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, pre-attentive image processing, boundary and region representations, and case studies of vision architectures.

CSE P 590 Special Topics in Computer Science (1-4, max. 20)

CSE P 595 Software Entrepreneurship (4) Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, typical operating and administrative problems, and alternatives for growth or sale.

CSE P 596 Business Basics Computer Science Professionals (4) Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.

CSE P 600 Independent Study or Research ([1-4]-)

ELECTRICAL AND COMPUTER ENGINEERING

E E 201 Computer Hardware Skills (1) QSR Robert B Darling An exclusively lab-based class focused on basic hands-on skills for electrical and computer engineers. Topics include soldering, PCB layout, basic microcontroller coding, 3D printing, use of basic test & measurement equipment, file management and version control. Prerequisite: CSE 142 or CSE 143, either of which may be taken concurrently. Offered: AWSp.

E E 205 Introduction to Signal Conditioning (4) QSR Introduces analog circuits interfacing sensors to digital systems. Includes connection, attenuation, amplification, sampling, filtering, termination, controls, Kirchhoff’s Laws, sources, resistors, op amps, capacitors, inductors, PSpice, and MATLAB. Intended for non-EE majors. Prerequisite: either MATH 126 or MATH 136; PHYS 122. Offered: W.

E E 215 Fundamentals of Electrical Engineering (4) NW Introduction to electrical engineering. Basic circuit and systems concepts. Mathematical models of components. Kirchhoff’s laws. Resistors, sources, capacitors, inductors, and operational amplifiers. Solution of first and second order linear differential equations associated with basic circuit forms. Prerequisite: either MATH 136, or MATH 126 and either MATH 307 or AMATH 351, either of which may be taken concurrently; PHYS 122. Offered: AWSpS.

E E 235 Continuous Time Linear Systems (5) Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136, MATH 307, or AMATH 351, any of which may be taken concurrently; PHYS 122; either CSE 142 or CSE 143, either of which may be taken concurrently. Offered: AWSp.

E E 271 Digital Circuits and Systems (5) Overview of digital computer systems. Covers logic, Boolean algebra, combinational and sequential circuits and logic design; programmable logic devices; and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. No credit if CSE 369 has been taken. Prerequisite: either CSE 142 or CSE 143. Offered: AWSpS.

E E 299 Introductory Topics in Electrical Engineering (1-5, max. 10) NW New and experimental approaches to basic electrical engineering. May include design and construction projects.

E E 321 Computing Fundamentals (4) QSR Covers the theoretical and mathematical foundations of computation. Logic, set theory, induction, and algebraic structures with applications to computing; models of computation; limits of computability; P, NP, and NP-Complete. Prerequisite: either MATH 126 or MATH 136; and CSE 143. Offered: AW.
E E 331 Devices and Circuits I (5) Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233. Offered: AWSpS.

E E 351 Energy Systems (5) Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission, and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233. Offered: ASp.

E E 361 Applied Electromagnetics (5) Introductory electromagnetic field theory and Maxwell's equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324; PHYS 123. Offered: AW.

E E 371 Design of Digital Circuits and Systems (5) Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with CSE 371.

E E 393 Advanced Technical Communication (4) Christine Pinto, Penny Hinke Practical skills for day-to-day engineering communication as well as an advanced exploration of how to prepare persuasive documents and presentations for technical and non-technical audiences. Prerequisite: either ENGR 231 or HCDE 231. Offered: AWSp.

E E 398 Introduction to Professional Issues (1) Covers topics of interest to students planning their educational and professional path, including salaries, the value of advanced degrees, societal expectations of engineering professionals, the corporate enterprise, ethical dilemmas, patents and trade secrets, outsourcing, and the global market. Offered: AWSp.

E E 399 Special Topics in Electrical Engineering (1-5, max. 10) New and experimental approaches to current electrical engineering problems. May include design and construction projects.

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10) Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 406 Teaching Engineering (3) Explores effective teaching techniques in engineering and related STEM fields. Topics include how students learn in college, active learning, problem-based learning, student evaluations of teaching, and teacher-student interactions.

E E 414 Engineering Innovation in Health (4) Eric J. Seibel, Jonathan D Posner Introduces the role of Innovation and engineering in the design of medical devices and healthcare technologies, applicable both to medical practice and healthcare-focused engineering. May serve as the first course in a medically related senior design project sequence. Discusses medical practice, clinical needs finding, FDA regulation, insurance reimbursement, intellectual property, and the medical device design process. Offered: jointly with M E 414; A.

E E 416 Random Signals for Communications and Signal Processing (4) Probability and random
processes in communications. Random variables, distributions, and expectation. Statistical filter design for detection and estimation. Prerequisite: E E 341; either STAT 390 or IND E 315. Offered: A.

**E E 417 Modern Wireless Communications (4)**
Introduction to wireless networks as an application of basic communication theorems. Examines modulation techniques for digital communications, signal space, optimum receiver design, error performance, error control coding for high reliability, multi-path fading and its effects, RF link budget analysis, WiFi and WiMax systems. Prerequisite: E E 416 Offered: W.

**E E 418 Network Security and Cryptography (3)**
Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: A.

**E E 419 Introduction to Computer-Communication Networks (4)** *Sumit Roy*

**E E 420 Design in Communications (4)**
Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently. Offered: Sp.

**E E 421 Quantum Mechanics for Engineers (3)** *M. Anantram*
Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi's golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351; recommended: Calculus through differential equations. Offered: W.

**E E 423 Introduction to Synthetic Biology (3)**
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136, MATH 307, or AMATH 351; and either MATH 308, AMATH 352, or CSE 311 Offered: jointly with BIOEN 423/CSE 486; A.

**E E 424 Advanced Systems and Synthetic Biology (3)** *H. Kueh*
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/CSE 487; Sp.

**E E 425 Laboratory Methods in Synthetic Biology (4)**
Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/CSE 488; W.

**E E 433 Analog Circuit Design (5)**
Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332. Offered: A.

**E E 436 Medical Instrumentation (4)**
Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students preparing for careers in bioengineering - both research and industrial. Prerequisite: E E 332. Offered: Sp.
E E 437 Integrated Systems Capstone (5)  J. Rudell
Team-based design experience to develop integrated electronic systems by constructing and validating, prototype integrated circuits (IC) and sensors using modern Computer Aided Design (CAD) tools. Systems are simulated using modern semiconductor, MEMs and nanophotonic technologies. Teams define requirements; investigate tradeoffs in performance, cost, power and size; design for both reliability and testability. Prerequisite: E E 331; E E 433; E E 473. Offered: Sp.

E E 438 Instrumentation Design Project Capstone (5)  R. DARLING
Team-based design for developing an electronic instrumentation system and constructing and validating a prototype using modern printed circuit board technology. Teams develop design requirements; investigate tradeoffs for miniaturization, integration, performance, and cost; consider use cases, failure modes, manufacturability, and testability. Includes extensive laboratory. Prerequisite: either E E 433 or E E 436. Offered: Sp.

E E 440 Introduction to Digital Imaging Systems (4)
Image representation and standards, visual perception and color spaces, spatial domain image filtering and enhancement, image restoration, image transforms, image and video coding, image geometrical transformation and camera modeling. Prerequisite: E E 341. Offered: A.

E E 442 Digital Signals and Filtering (3)

E E 443 Design and Application of Digital Signal Processing (5)
Application of learned theories/algorithms and available computer technologies to modern image and speech processing problems. Two-dimensional signals and systems. Image transform, enhancement, restoration, coding. Characteristics of speech signals, linear predictive coding (LPC) of speech, pitch detection, and LPC speech synthesis, speech recognition, hardware designs for signal processing. Prerequisite: 1.0 in E E 442. Offered: Sp.

E E 447 Control System Analysis I (4)
Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols. Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235; MATH 308. Offered: A.

E E 448 Systems, Controls, and Robotics Capstone (4-)
In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results. Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 447. Offered: W.

E E 449 Systems, Controls, and Robotics Capstone (4-)
In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results. Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 448. Offered: Sp.

E E 451 Wind Energy (4)
Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351. Offered: Sp, odd years.

E E 452 Power Electronics Design (5)
Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnets, and control of power converters. Also ac/ac, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work; a four-week power converter design project. Prerequisite: 1.0 in E E 331; 1.0 in E E 351. Offered: A.
**E E 453 Electric Drives (5)** Elements of drive systems, speed-torque characteristics of electric motors and industrial loads, solid-state converter. Starting and braking methods of loaded motors. Speed control of electric motors. Solid-state drives. Transient analysis of loaded motors. Special forms of individual- and multimotor drives. Prerequisite: a minimum grade of 1.0 in E E 452; and a minimum grade of 1.0 in E E 458.

**E E 454 Power System Analysis (4)** Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351. Offered: A.

**E E 455 Power System Dynamics and Protection (4)** Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and instability studies. Prerequisite: 1.0 in E E 351. Offered: W.

**E E 456 Computer-Aided Design in Power Systems (4)** Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455. Offered: Sp.

**E E 457 Electric Energy Distribution Systems (4)** Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351. Offered: W.

**E E 458 Power Electronics Controls (5)** Theory, design, and analysis of closed-loop controllers for power electronics circuits. Emphasis will be placed on modern control methods using digital control. Prerequisite: E E 447 and E E 452; recommended: circuits; control systems; and power electronics. Offered: W.

**E E 459 Neural Engineering (3)** Azadeh Yazdan-Shahmorad, Chet T Moritz Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Prerequisite: either BIOL 130, BIOL 162, or BIOL 220; and one of the following: MATH 308, AMATH 301, or AMATH 352. Offered: jointly with BIOEN 460; A.

**E E 460 Neural Engineering Tech Studio (4)** Azadeh Yazdan-Shahmorad, Chet T Moritz Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 460/E E 460. Offered: jointly with BIOEN 461.

**E E 461 Neural Engineering Tech Studio (4)** Azadeh Yazdan-Shahmorad, Chet T Moritz Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 460/E E 460. Offered: jointly with BIOEN 461.

**E E 462 Electromagnetics I: Microwave Engineering (4)** Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: minimum grade of 1.0 in E E 361. Offered: A.

**E E 463 Microwave Electronic Design (4)** Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: E E 361; E E 332, which may be taken concurrently. Offered: W.

**E E 464 Antennas: Analysis and Design (4)** Fundamentals of antennas, analysis, synthesis, and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361. Offered: Sp.

**E E 466 Neural Computation and Engineering Laboratory (3)** NW Amy Orsborn Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Prerequisite: Either AMATH 342, BIOL 162, or BIOL 220; and one of the following: MATH 308, AMATH 301, or AMATH 352. Offered: jointly with BIOEN 466.

**E E 468 Computer, Network, and Embedded Security (4)** QSR Raadhakrishnan Poovendran
Fundamental principles of software and embedded system security and their application to network, web, and embedded systems. Introduction to the practical tools used for software security, cryptography, and protocols that enable its application to network and system security.
Prerequisite: E E 205 or E E 215; CSE 373; CSE 374. Offered: W.

E E 472 Real-Time and Embedded Operating Systems (4) QSR Software-intensive course in modern operating systems, with a focus on real-time (RT) and embedded applications. Covers a range of topics from the classical OS concepts to RT operating systems, including the OS kernel--process and task abstraction, scheduling, concurrency, memory management, file systems and I/Os, RTOS, and case studies of RTOS programming for Bluetooth or IoT networking. Prerequisite: CSE 373 and CSE 374. Offered: Sp.

E E 473 Linear Integrated Circuits (5) Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332. Offered: W.

E E 474 Introduction to Embedded Systems (4) Introduces the specification, design, development, and test of real time embedded system software.

Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with CSE 474; AWSp.

E E 475 Embedded Systems Capstone (5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with CSE 475; AWSp.

E E 476 Introduction to Very Large-Scale Integrated Design (5) Visvesh S Sathe Breadth-first introduction to digital VLSI design. Integrated CMOS logic design. CMOS logic delay and power analysis. Introduction to IC- mask-layout, gate-sizing, VLSI building blocks (adders, multipliers, counters, shifters etc.), design for testability, and memory. Projects involve some layout design, and mostly transistor and gate-level schematic design. Prerequisite: E E 215; and either E E 271 or CSE 369; recommended: basic circuit theory and basic digital design experience. Offered: A.

E E 477 VLSI II (5) Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: either E E 371/CSE 371, or E E 469/CSE 469. Offered: W.

E E 478 Capstone Integrated Digital Design Projects (5) Visvesh Sathe VLSI-capstone course. A more detailed examination of building high-performance or low-energy integrated circuits. Wire design, timing-elements, clock generation, distribution and control, dynamic-logic, low-power design. Cannot be taken for credit if credit received for E E 526. Prerequisite: E E 331; E E 332; E E 476; and E E 477; recommended: introduction to VLSI design and knowledge of ASIC design flows. Offered: Sp.
**E E 479 High-Performance Graphics Processing Unit Computing (4)** QSR Jeffrey A Bilmes

Introduction to high performance computing (HPC) and graphics processing units (GPUs). GPU based systems, microarchitectures, memory hierarchies, programming models, and general strategies to harness their computational power. Prerequisite: CSE 373 and CSE 374. Offered: A.

**E E 482 Semiconductor Devices (4)** Fundamentals of state-of-the-art semiconductor devices and emerging semiconductor technologies including diodes, LEDs, solar cells, photodetectors, MOS field-effect transistors, power transistors, and nanoscale devices. In-depth analysis of devices using carrier diffusion, drift, effective mass, and density of states. Prerequisite: E E 331. Offered: A.

**E E 484 Sensors and Sensor Systems (4)** Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications. Prerequisite: E E 331. Offered: Sp.

**E E 485 Introduction to Photonics (4)** Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, optical interference, diffraction, polarization, optical waveguides, and optical fibers. Prerequisite: E E 361. Offered: A.

**E E 486 Fundamentals of Integrated Circuit Technology (3)** Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with MSE 486; AW.

**E E 490 Reading and Research (1-5, max. 25)** Reading and research in the field under supervision of an E E faculty member. Credit/no-credit only.

**E E 491 Undergraduate Seminar (1, max. 2)** Weekly seminars on current topics in electrical engineering. Credit/no-credit only.

**E E 492 Electrical Engineering Leadership Seminar (1)** Weekly seminar with program alumni presenting their workforce experience, demonstrating the depth and breadth possible in the field and best practices. Credit/no-credit only. Offered: W.

**E E 496 Engineering Entrepreneurial Systems and Design (2)** P. ARABSHAHI, J. SAHR

Fundamentals of systems engineering methods, system life cycle, project management and scheduling, trade studies, risk mitigation, configuration management, budgeting, procurement, prototyping, technical reviews, and associated tools; startup life cycle, intellectual property, trade secrets, patents, startup financing, incorporation, business plan, market research, roles of officers. Offered: A.

**E E 497 Engineering Entrepreneurial Capstone (4)**

Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes interdisciplinary teamwork. Offered: W.

**E E 498 Engineering Entrepreneurial Capstone (4)**

Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes interdisciplinary teamwork. Prerequisite: E E 497. Offered: Sp.

**E E 499 Undergraduate Research and Special Projects (1-5, max. 10)** Undergraduate research or design project carried out under the supervision of a faculty sponsor.

**E E 500 Graduate Seminar (1, max. 9)** Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no-credit only.

**E E 501 Academic Writing (4)** A. Mamishev

Develops formal technical writing skills for graduate engineering students. Covers organization and structure of archival papers, theses, reports, and proposals; concise technical language; terminology; literature search; peer review process; analysis of grammatical and stylistic errors; organization of multi-authored writing and implementation of figures, equations, and citations. Offered: Sp.

**E E 503 Modeling of MEMS (4)** Microelectromechanical systems (MEMS) including lumped modeling, conjugate power variables, electrostatic
and magnetic actuators, linear transducers, linear system dynamics, design optimization, and thermal analysis. Numerical modeling topics include electro (quasi) static, mechanical, electro mechanical, magneto (quasi) static, and fluidic phenomena; parametric analysis, visualization of multidiensional solutions; and verification of results.

E E 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Cannot be taken for credit if credit received for EE P 504. Offered: jointly with M E 504/MSE 504.

E E 505 Probability and Random Processes (4) Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.

E E 507 Advanced Wireless Systems (4) MIMO (Rate Multiplexing, Diversity, Beamforming) , Space-Time-Frequency Coding; Advanced Modulation, Equalization, Channel Estimation and Synchronization for 5G; Spread Spectrum. Prerequisite: E E 506. Offered: Sp, odd years.

E E 508 Stochastic Processes in Engineering (3) A. GHATE Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with IND E 508; W.

E E 511 Introduction to Statistical Learning (4) Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515.

E E 512 Graphical Models in Pattern Recognition (4) Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation) , probabilistic inference (including pearl's belief propagation, Hugin, and Shafer-Shenoy) , junction theees, dynamic Bayesian networks (including hidden Markov models) , learning new models, models in practice. Prerequisite: E E 508; E E 511.

E E 514 Information Theory I (4) Includes entropy, mutual information, Shannon's source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding) , coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.

E E 515 Information Theory II (4) Includes advanced modern statistical coding techniques (statistical coding) , advanced codes and graphs, source coding with errors (rate distortion) , alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics,
natural language processing, and computer science. Prerequisite: E E 514.

**E E 516 Computer Speech Processing (4)**
Introduction to automatic speech processing. Overview of human speech production and perception. Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.

**E E 517 Continuous-Space Language Processing (4)**
Introduction to human language technology, with in-depth coverage of continuous-space statistical models of language and application to natural language processing tasks. Methods covered include low rank distributional representations, neural networks, and log bilinear statistical models, which are leveraged for language modeling, similarity scoring, classification, and translation/generation. Prerequisite: E E 505.

**E E 518 Digital Signal Processing (4)**
Covers discrete-time processing of continuous-time signals; sampling rate conversion; frequency magnitude, phase delay, and group delay; design techniques for non-recursive (FIR) filters; multirate signal processing; all-pass/minimum phase decompositions; discrete Fourier transforms, fast Fourier transforms; overlap-add; short-time Fourier analysis; and filter banks. Includes applications such as machine learning. Prerequisite: E E 442; recommended: Cannot be taken for credit if credit received for EE P 518.

**E E 519 Stochastic Analysis of Data From Physical Systems (4)**
Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505.

**E E 520 Spectral Analysis of Time Series (4)**

**E E 521 Quantum Mechanics for Engineers (4)**
Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi’s golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351.

**E E 523 Introduction to Synthetic Biology (3)**
Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/MOLENG 525.

**E E 524 Advanced Systems and Synthetic Biology (3)**
Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/CSE 587; Sp.

**E E 525 VLSI II (5)**
Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: either E E 371/CSE 371, or E E 469/CSE 469.

**E E 526 VLSI III (4)**
Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-
speed digital IC design. Prerequisite: E E 477 or E E 525.

**E E 527 Microfabrication (4)** Principles and techniques for the fabrication of microelectronics devices and integrated circuits. Includes clean room laboratory practices and chemical safety, photolithography, wet and dry etching, oxidation and diffusion, metallization and dielectric deposition, compressed gas systems, vacuum systems, thermal processing systems, plasma systems, and metrology. Extensive laboratory with limited enrollment. Recommended: Cannot be taken for credit if credit received for EE P 527.

**E E 529 Semiconductor Optoelectronics (4)** Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485.

**E E 531 Semiconductor Devices and Device Simulation (4)** Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 482.

**E E 534 Power Electronics (4)** Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control.

**E E 535 Applied Nanophotonics (4) Arka Majumdar** Concepts of optics at wave-length, scale-structured medium. Topics include photonic crystal, dielectric and metallic optical resonators, and meta-photonic devices. Introduction to cavity quantum electrodynamics. Students learn about nanoscale photonic devices, via literature survey, problem solving and numerical simulations. Prerequisite: either E E 361, PHYS 321, or equivalent course or experience with nanophotonics. Offered: Sp.

**E E 537 Computation Methods for Circuit Analysis and Simulation (3)** Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

**E E 538 Topics in Electronic Circuit Design (1-5, max. 16)** Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge.

**E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 16)** Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty.

**E E 541 Automatic Layout of Integrated Circuits (4)** Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: either E E 271 or CSE 370; CSE 143.

**E E 542 Advanced Embedded Systems Design (5)** Studies advanced embedded system design principles and practices. Emphasizes formal design methodologies such as hardware-software co-design, investigates techniques for performance
optimization, and examines distributed embedded systems. Prerequisite: E E 478.

E E 543 Models of Robot Manipulation (4) Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra.

E E 546 Advanced Topics in Control System Theory (1-5, max. 16) Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advance registration.

E E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Cannot be taken for credit if credit received for EE P 547. Prerequisite: E E 510/A A 510/CHEM E 510/M E 510. Offered: jointly with A A 547.

E E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/M E 548.

E E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/M E 550.

E E 551 Wind Energy (4) Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351.

E E 552 Power Systems Dynamics and Control (4) Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455.

E E 553 Power System Economics (4) Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation. Cannot be taken for credit if credit received for EE P 553.

E E 554 Large Electric Energy Systems Analysis (4) Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456.

E E 556 Analyzing the Power Grid (4) Discusses the models of the various components of an electricity grid and how they are combined into a set of equations that can be used to analyze the grid under normal, steady state conditions, as well as to calculate fault currents and assess its transient stability.

E E 557 Dynamics of Controlled Systems (4) Explores control techniques for high precision motion control. Covers state variable feedback of linear and
nonlinear, multivariable systems in depth. Uses physical system modeling, graphical analysis, and numerical analysis to describe system performance. Uses simulation mini-projects to emphasize the dynamics of controlled systems and their performance.

**E E 558 Substation and Distribution Automation (4)**
Examines how smart grid technologies affect substation and distribution operations and how history, customer expectations, and state and federal policies have shaped the existing infrastructure. Studies the capabilities of various emerging technologies to assess how they are able to solve existing issues.

**E E 559 Special Topics in Electrical Energy Systems (1-5, max. 16)**
Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge.

**E E 560 Neural Engineering (3)**
Azadeh Yazdan-Shahmorad, Chet T Moritz
Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Offered: jointly with BIOEN 560; A.

**E E 561 Neural Engineering Tech Studio (4)**
Azadeh Yazdan-Shahmorad, Chet T Moritz
Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 560 Offered: jointly with BIOEN 561; W.

**E E 562 Artificial Intelligence for Engineers (3)**
Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373.

**E E 563 Submodular Functions, Optimization, and Applications (4)**
J. Bilmes
Submodularity and supermodularity. Definitions, properties, operations that preserve submodularity, variants, certain special submodular functions, computational properties, matroids and lattices, polyhedral properties, semidifferentials, convex/concave extensions, constrained and unconstrained minimization and maximization, and generalizations of submodularity and uses in machine learning. Prerequisite: E E 510/A A 510/CHEM E 510/M E 510. Offered: Sp, even years.

**E E 564 Neural Computation and Engineering Laboratory (3)**
Amy Orsborn
Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Offered: jointly with BIOEN 566.

**E E 565 Computer-Communication Networks I (4)**
Network architectures and protocols; layered model; reliable transmission protocols at the data control layer; Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505.

**E E 566 Computer-Communication Networks II (3)**
Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks; optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: E E 565.

**E E 567 Mobile Networks (4)**

**E E 568 Digital Image Processing (4)**
Digital image processing techniques and various special topics such as image restoration, image segmentation, multi-resolution imaging with wavelet transform, and image registration. Prerequisite: permission of instructor.

**E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4)**
Planar
microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and discontinuities. Prerequisite: either E E 482 or E E 572.

E E 572 Electromagnetics I: Microwave Engineering (4) Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions. Prerequisite: E E 361. Offered: A.

E E 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered: jointly with CSE 577.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 16) Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge.

E E 580 Geometric Methods for Non-Linear Control Systems (3) Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/M E 580; Sp, even years.

Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with A A 582/M E 582; Sp, even years.

E E 586 Digital Video Coding Systems (4) Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications.

E E 587 Multimedia Compression and Networking (4) Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

E E 589 Advanced Topics in Sensors and Sensor Systems (3) Topics of current interest in sensors and sensor systems.

E E 590 Advanced Topics in Digital Computers (2-5, max. 16) Lectures or discussions of topics of current interest in the field of digital systems. Subject matter may vary from year to year.

E E 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/M E 591.

E E 593 Feedforward Control (3) Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/M E 593; Sp, even years.

E E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 594/M E 594; Sp, odd years.

E E 595 Advanced Topics in Communication Theory (1-5, max. 16) Extension of E E 507, E E 508, E E 518, E E 519, E E 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes.

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 16) Topics of current interest in signal and image processing. Content may vary from offering to offering.

E E 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/M E 597.

E E 598 Special topics in Electrical Engineering (1-5, max. 16) Topics of current interest in non-traditional areas of electrical engineering. Offered: AWSpS.
E E 599 Special Projects in Electrical Engineering (1-5, max. 15) Prerequisite: permission of instructor.

E E 600 Independent Study or Research (*-)

E E 700 Master’s Thesis (*-)

E E 800 Doctoral Dissertation (*-)

ENGINEERING

ENGR 100 Introduction to Engineering Design (5) I&S Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specialties and tools of engineering, creative and analytical thinking, professionalism and ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

ENGR 101 Engineering Exploration (1) Presentations and discussions on topics of current interest in engineering. Explores various areas of engineering research, engineering disciplines, and the relevance to today’s students. Topics vary by quarter.

ENGR 102 Studying Engineering (1-3, max. 6) Intensive seminar focusing on topics relating to the successful study of engineering. Topics include an introduction to the university culture, learning skills development, engagement with critical resources, and an introduction to engineering disciplines and professions. Topics vary by quarter. Credit/no-credit only.

ENGR 105 Introduction to Engineering Design (3) Uses a hands-on approach to teach fundamental aspects of engineering and effective teamwork to help students explore their academic interests. Topics include basic programming, mechanics, circuitry, CAD modeling, and 3D printing. Students will learn the fundamentals of engineering in the classroom, build on those skills in weekly labs, and apply them to a quarter long project of their own.

ENGR 115 Engineering Transformation of Health (3) Introduction to fundamental aspects of engineering and exploration of multidisciplinary engineering approaches to improving and promoting human health, including understanding how engineers from different disciplines collaborate, approach, and solve health problems. Offered: W.

ENGR 120 STARS Mathematics Problem Solving (4) Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 121 STARS Chemistry Problem Solving (3) NW Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 122 STARS Physics Problem Solving (3) Lectures and intensive problem solving in physics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

ENGR 197 Engineering Problem Solving (1, max. 12) Lecture and problem sessions in mathematics, chemistry, and physics with engineering applications. Enrollment restricted to Minority Science, Engineering Program (MSEP), and Women in Science and Engineering (WiSE) students. Credit/no-credit only. Offered: AWSp.

ENGR 199 Special Projects (1-3, max. 3) Students propose problems to solve to an engineering faculty member. Problems selected from the student’s own experiences and interests, from the interest of faculty members, or from other sources such as faculty or graduate students doing research projects, or from personnel in physical medicine, occupational therapy, hospital, industry, or government. Required corroboration by an engineering faculty member. Project suggestions available. Offered: AWSpS.

ENGR 201 Engineering Diversity, Access and Inclusion (3) DIV Scott Pinkham, Ed.D. June Summers Hairston Presentations and discussions on the need for multiple perspectives in broadening the impact of engineering. Students will work collaboratively to enhance their academic skills, solve engineering problems and develop team synergy with emphasis on inclusion of underrepresented groups in engineering. Field trips will provide first hand exposure to diversity and access in the engineering
classroom and workforce. Credit/no-credit only. Offered: A.

ENGR 202 Special Topics (1-5, max. 10) Topics of current interest to engineering students. Offered: AWSp.

ENGR 231 Introduction to Technical Communication (3) Examines basics of researching and presenting technical information for different audiences and purposes. Individually and in teams, students learn to construct document and presentations, following conventions of oral, written, and visual communication. Assignments are grounded in ethical and sustainable engineering practices. Prerequisite: Either both ENGL 109 and ENGL 110, or any one of the following: C LIT 240, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, ENGL 282, ENGL 297, ENGL 298, ENGL 299, ENGL 381, ENGL 382, HONORS 205, HONORS 345 Offered: AWSpS.

ENGR 296 Engineering Study Abroad (1-6, max. 18) Lower-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

ENGR 297 Vertically Integrated Projects ([1-2]-, max. 8) Project-based, design and exploration experiences for lower division students. Through this class, students will take on entry level roles on faculty-led project/research teams while being mentored by upper division students, faculty, and graduate students.

ENGR 320 Engineering Cooperative Education (1-10, max. 12) Engineering practicum; includes integration of classroom theory with on-the-job training. Open only to students who have been admitted to the Engineering Cooperative Education Program. Credits are deducted from student record. Credit/no-credit only. Offered: AWSpS.

ENGR 321 Engineering Internship Education ([1-2]-, max. 16) Practical on-the-job experience to apply classroom theory in the engineering field. Internship credit for undergraduate students as approved by the Engineering Career Center and may be applied to the undergraduate degree requirement, as determined by each department. Credit/no-credit only. Offered: AWSpS.

ENGR 322 Engineering Cooperative Education Postwork Seminar (-0) Reporting and evaluation of co-op work experience, and discussion of current topics in engineering. To be taken during the first quarter in school following each work session. Offered: AWSpS.

ENGR 333 Advanced Technical Communication in the Engineering Workplace (4) Technical communication and writing skills, strategies, and genres. Genres include resumes, proposals, procedures, and presentations. Thematic focus on collaborative teamwork and inclusive language for a diverse workplace. Builds on practical strategies introduced in ENGR 231. Prerequisite: ENGR 231 or HCDE 231; recommended: English composition course. Offered: AWSp.

ENGR 360 Introductory Acoustics (3) NW Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of acoustics, terminology, and units employed. Prerequisite: either MATH 136 or MATH 307; PHYS 123. Offered: Sp.

ENGR 380 Design for Sustainability in the Developing World (2, max. 8) I&S Bolton Introduction to issues in international sustainable development from an engineering perspective. Combines lectures on current approaches and potential pitfalls with work on group projects related to sustainable development efforts of Engineers Without Borders. Develops research and design skills using real life projects. Intended for students from all backgrounds. Credit/no-credit only. Offered: AW.

ENGR 401 Leadership Development to Promote Equity in Engineering Relationships (3) I&S, DIV Engages engineering students’ energy, creativity, social conscience, and on-the-ground perspectives in advancing diversity and inclusion in engineering. Students explore topics such as diversity in science and engineering, impact of unconscious bias, the role of allies, community engagement, and leadership in supporting all current and potential engineers. Credit/no-credit only.
ENGR 496 Engineering Study Abroad (1-6, max. 18)
Upper-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

ENGR 497 Vertically Integrated Projects ([1-2], max. 10)
Advanced project based, design and exploration experiences for upper division students. Students will take on leadership roles and faculty-led research teams while mentoring participating lower division students and engaging with faculty and graduate students.

ENGR 498 Special Topics in Engineering (1-5, max. 6)
Offered: AWSpS.

ENGR 499 Special Projects in Engineering (1-3, max. 6)
Offered: AWSpS.

ENGR 598 Seminar Series in Engineering (1, max. 12)
Graduate seminar series on topics of interest to all engineering students.

ENGR 601 Internship ([1-2], max. 24)
Practical on-the-job experience to apply classroom theory in the engineering field. Internship credit for graduate students as approved by the Engineering Career Center. Credit/no-credit only. Offered: AWSpS.

HUMAN CENTERED DESIGN AND ENGINEERING

HCDE 100 Introduction to Human Centered Design and Engineering (5)
Topics may include: virtual communities, human-computer interaction, web design, usability testing, visual design, and others. Explores course content through individual and group hands-on projects. Offered: A.

HCDE 210 Explorations in Human Centered Design (3) I&S
Explores the core principles, methodologies, and applications of human centered design practice. Areas of investigation include user research, ideation, interaction design, visualization, prototyping, and usability. Offered: AWSp.

HCDE 231 Introduction to Communication in HCDE (3)
Examines fundamentals of researching, writing, and presenting technical information for diverse audiences and purposes. Students learn to conduct secondary research; design and present information written and orally; revise for content, organization and style; and work individually and collaboratively in teams. Assignments are framed around ethical and sustainable human-centered design practices. Prerequisite: either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSp.

HCDE 298 Introductory Special Topics (1-5, max. 10)
Introductory special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members.

HCDE 300 Foundations of Human Centered Design and Engineering (5)
Examines principles and practices of human centered design and engineering. Includes overview of conceptual problems in human centered design and engineering, issues related to communicating scientific and technical information to a variety of audiences, and human centered design approaches. Includes attention to social contexts and environments (legal, ethical, cultural).

HCDE 301 Advanced Communication in HCDE (5)
Examines various communication genres in HCDE. Students conduct primary and secondary research; analyze results; write, design, and orally present communications that meet the needs of stakeholders with differing priorities and cultures. The course is taught through the lens of sustainable and ethical HCDE practices. Prerequisite: HCDE 231 or ENGR 231. Offered: AWSp.

HCDE 303 Project Management and Computer Supported Collaboration and Work (5)
Addresses how to understand and manage communication practices and projects in scientific and technical organizations. Topics include: system design, project design, supporting workflow, communication practices, information structures, and planning. Focuses on CMC and CSC principles and practices.

HCDE 308 Visual Communication in Human Centered Design and Engineering (5) VLPA
Introduces principles of visual communication and design used in human centered design and engineering so that students gain a systematic understanding as they create visual communication
components of print, interactive, and video media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.

**HCDE 310 Interactive Systems Design and Technology (5)** Provides opportunities to identify and build interactive systems to solve problems in human centered design and engineering. Students specify, design, build, and justify design solutions in terms of user experience and technical design choices. Prerequisite: CSE 142 or CSE 160. Offered: A.

**HCDE 313 Introduction to User Research (5)** Introduces user research methods, such as interviews, surveys, usability tests, content analysis, and focus groups. Reviews selecting an appropriate research method, how to conduct research and analyze results, conveying research data in the form of design requirements, and ethics.

**HCDE 318 Introduction to User-Centered Design (5)** Explores the user-centered design paradigm from a broad perspective, with an emphasis on the importance of developing and applying design processes and strategies. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design.

**HCDE 321 Professional Portfolio (2)** Prepares students for professional practice by developing expertise and artifacts that make up an effective professional portfolio for careers in human centered design and engineering. Covers job searches, networking, recruiting, and interviewing, as well as development of resumes, cover letters, and online portfolios. Credit/no-credit only. Offered: AWSp.

**HCDE 322 Organizational Teamwork (2)** Introduces students to teamwork and leadership competencies of particular significance to interdisciplinary, design-oriented, creative, and distributed work of human-centered design and engineering. Particular emphasis on competencies related to interpersonal interactions, group dynamics, and civic responsibility. Credit/no-credit only.

**HCDE 333 Advanced Technical Writing and Oral Presentation (4)** Emphasizes the principles of written and oral communication for the engineering workplace. Designs solutions to professional communication problems: technical reports, proposals, correspondence, resumes, and oral presentations. Focuses on needs assessment and designing solutions that call for effective selection and integration of verbal and visual components. For engineering majors. Prerequisite: HCDE 231. Offered: AWSpS.

**HCDE 398 Special Topics (1-5, max. 10)** Special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members.

**HCDE 407 Software User Assistance (5)** Concepts, skills, and industry practices for designing the full spectrum of information resources that users need to master complex interfaces. Includes interface text, embedded and standard help, manuals, wizards, tutorials, SDK documentations and troubleshooting (Knowledge Base) content, and the role of social media and user-generated content. Prerequisite: HCDE 310. Offered: Sp.

**HCDE 408 Public Documents: Proposals, EISs, Assessments (3)** Analyzing special documents of public character: proposals, EISs, questionnaires, technology assessments. Understanding sociopolitical milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: Sp, odd years.

**HCDE 411 Information Visualization (5)** I&S/VLPA Introduces the design and presentation of digital information. Covers the use of graphics, animation, sound, and other modalities in presenting information to the user; understanding vision and perception; methods of presenting complex information to enhance comprehension and analysis; and the incorporation of visualization techniques into human-computer interfaces. Prerequisite: HCDE 308 and HCDE 310.

**HCDE 412 Qualitative Research Methods in HCDE (5)** Explores qualitative research methodologies, particularly the use of grounded theory methods to conduct field research for design and engineering. Develops skills for understanding and investigating why and how people experience, make meaning, and participate in their own social worlds, including
how to create and iterate research questions, observations, and interviews. Prerequisite: HCDE 313

HCDE 417 Usability Research Techniques (5) Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Prerequisite: HCDE 313.

HCDE 418 Advanced Projects in Human Centered Design and Engineering (5, max. 10) Explores advanced topics in human centered design. Students engage with and discuss an advanced topic and then apply it by researching, designing, and implementing a solution to a design challenge. Team-based investigations culminate in a project response to the challenge. Prerequisite: either HCDE 318, INFO 360, or CSE 440; recommended: Students should have completed at least one project-based human centered design or human-computer interaction course (e.g., HCDE 318).

HCDE 419 Concepts in Human-Computer Interaction (5) I&S Studies the social, cognitive, behavioral, and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Prerequisite: HCDE 300.

HCDE 421 Current Practices in Technical Communication (3) Covers principles and practices of writing to communicate scientific and technical information to a variety of readers. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.

HCDE 422 Style in Technical Communication (3) Covers principles and practices of writing publication-ready American English writing for global audiences. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.

HCDE 423 Introduction to Technical Editing (3) Covers editorial practices and responsibilities in communication of scientific and technical information. Includes the editor’s role as an editor of documents, a collaborator in document development, and a manager of publication projects and groups.

HCDE 424 The Computer in Technical Communication (4) Introduces popular tools used by TC professionals. Students examine the tools’ functionality, the types of design activities supported, and techniques for designing effective solutions. Project-driven course project teaches students how to transform unformatted content, using these tools, into a polished set of documents in multiple formats.

HCDE 426 Software User Assistance (3) Covers how to write effective documentations for a variety of software users, from end-users to developers. Students produce a complete documentation set for a software product or service using the most appropriate delivery mechanisms for the content and the audience. Prerequisite: HCDE 310.

HCDE 427 Production Editing (4) Covers the editorial role in the preparation of text and visual materials, both print and online, for production. Teaches the editor’s responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publication's field.

HCDE 435 Introduction to Content Management (3) Principles and practices of building, managing, and using content management systems in the workplace. Examines both the intricacies of collaborative workflow technologies and the organizational contexts that surround them.

HCDE 437 Web Design and Web Publishing (5) VLPA/I&S Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the web and Internet. Students build a website and plan for ongoing web publishing. Prerequisite: HCDE 318. Offered: W.

HCDE 438 Web Technologies (5) Markup languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these web technologies. Offered: Sp.
HCDE 439 Physical Computing (5) Introduction to engineering and prototyping interactive systems and environments for human-centered applications that employ basic digital electronics components and circuits. Students build systems using microcontrollers and software tools. Provides hands-on experience in a project-based, studio environment. Prerequisite: HCDE 310 or permission of instructor.

HCDE 440 Advanced Physical Computing (5, max. 10) Advanced topics in engineering and prototyping interactive systems and environments for human-centered applications that use digital electronics, components, and circuits. Students build advanced systems using microcontrollers, sensors, wireless communications, and software APIs. Projects incorporate investigation of emerging technologies and their social and cultural impact. Provides hands-on experience in a project-based, studio environment. Prerequisite: HCDE 439.

HCDE 451 User Experience Prototyping Techniques (5) Introduces students to a variety of prototyping techniques for different kinds of user experience design problems. Structured as a series of independent explorations, each on a different prototyping methodology, aimed at many platforms. Prerequisite: HCDE 318.

HCDE 455 User Interface Design (4) Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.

HCDE 461 Japanese for Technical and Business Professions I (5) VLPA Kato Strengthens knowledge of grammar and vocabulary and applies this to basic technical business communication situations. Covers cultural concepts underlying these situations. Reviews skills (such as prediction) for more effective reading and improves skills for analyzing complex sentence structure. Additional grammar, vocabulary, and kanji are introduced. Laboratory work required. Prerequisite: HCDE 461. Instructors: Kato Offered: W.

HCDE 462 Japanese for Technical and Business Professions II (5) VLPA Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Further improves skills introduced in previous courses and reviews skills for understanding inter-sentence structure. Additional grammar, vocabulary, and kanji introduced. Laboratory work required. Prerequisite: HCDE 461. Instructors: Kato Offered: Sp.

HCDE 463 Japanese for Technical and Business Professions III (5) VLPA Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Prerequisite: HCDE 462. Instructors: Kato Offered: W.

HCDE 492 Capstone Planning (2) Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project. Prerequisite: HCDE 300; HCDE 301; HCDE 308; HCDE 310; HCDE 313; and HCDE 318. Offered: W.

HCDE 493 Senior Capstone (5) Capstone design experience. Integrates knowledge and skills acquired during major program into one paper or project. Prerequisite: HCDE 492.

HCDE 495 Internship (3-10, max. 10) Supervised internship where work experience involves substantial application of HCDE concepts learned in the classroom. Credit/no-credit only. Offered: AWSpS.

HCDE 496 Directed Research in Human Centered Design and Engineering (1-5, max. 10) Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no-credit only. Offered: AWSpS.

HCDE 497 Study Abroad: Human Centered Design and Engineering (3-5, max. 15) Upper-division human centered design and engineering courses, for which there are no direct University of Washington
equivalents, taken through the Department of Human Centered Design and Engineering’s study abroad program. Credit/no-credit only. Offered: S.

**HCDE 498 Advanced Special Topics (1-5, max. 10)** Advanced special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members.

**HCDE 499 Special Projects (1-5, max. 10)** Individual undergraduate projects in human centered design and engineering. Offered: AWSpS.

**HCDE 501 Theoretical Foundations of Human Centered Design and Engineering (4)** Examination of the theories that inform work in human centered design and engineering, focusing particularly on communication and interaction design theories. Topics include the complexities of communication as it is configured in different theoretical frameworks, the implications of these different configurations, and why these differences matter to people engaged in professional practice or research. Prerequisite: admission to an engineering master’s program or permission of instructor. Offered: A.

**HCDE 502 Empirical Traditions in Human Centered Design and Engineering (4)** Introduction to empirical traditions that inform research and practice in field of human centered design and engineering. Topics include epistemological assumptions underlying empirical research, empirical methods, and survey of results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

**HCDE 503 Navigating Design in Organizations (4)** Examines how to manage the incubation and development of an idea, communicate it effectively to stakeholders, and deliver a quality product. Students learn to manage a design project from start to finish, collaborating across disciplines, working with partners and end-users, and communicating strategies for project management in organizations.

**HCDE 505 Computer-Assisted Communication (4)** Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

**HCDE 508 Visual Communication (4)** Reviews principles of visual communication and design used in HCDE so that students gain a systematic and critical understanding so they can create visual communication components of print and interactive media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.

**HCDE 509 Writing the Scientific Article (3)** Examination of principles and practice of writing research manuscripts, articles, abstracts, and oral presentations. Detailed examination of scientific publication process includes issues of style, organization, and ethics. Students draft, critique, and revise their own manuscripts and learn to review the manuscripts of others. Offered: Sp.

**HCDE 510 Information Design (4)** Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: HCDE 501 or permission of instructor. Offered: A.

**HCDE 511 Information Visualization (4)** Covers the design and presentation of digital information. Uses graphics, animation, sound, and other modalities in presenting information to users. Studies understanding vision and perception. Includes methods of presenting complex information to enhance comprehension and analysis; and incorporation of visualization techniques into human-computer interfaces.

**HCDE 512 International User Experience and Communication (4)** Covers theory, research, and approaches for creating digital media for international audiences. Topics include cultural schemata and contrastive rhetoric, content, and text types and corresponding translation and localization strategies, market relevance and adaptation, international user research and usability, international policies and geopolitics, and cross-
cultural business management and team work. Offered: Sp.

**HCDE 513 Globalization and Localization Management (4) Spyridakis** Examines globalization and localization business processes. Topics include localization challenges for various business sectors and audiences as well as selecting localization software, services, and content; project types; and associated start-to-finish processes. Offered: S.

**HCDE 514 Strategies for International Product Management (4)** Examines best practices in establishing localization work in technology companies. Covers facets important to research, planning, and decision-making processes, including use of internal company data, and economic, marketing, and technology factors. Uses real-life scenarios to demonstrate how companies have instituted localization processes given user-centered practices. Prerequisite: HCDE 512; HDCE 513; or permission of instructor. Instructors: Spyridakis

**HCDE 515 Accessibility and Inclusive Design (4)** An introduction to designing, prototyping, and evaluating inclusive user interfaces that meet the needs of a diverse range of users - such as older adults, users with visual, cognitive or motor disabilities, and users who are deaf or hard of hearing. Building on basic concepts in human-centered design, students will learn about design exclusion and barriers to use, and methods by which these can be overcome. Prerequisite: HCDE 518.

**HCDE 517 Usability Studies (4)** Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: HCDE 518 or permission of instructor. Offered: A.

**HCDE 518 User-Centered Design (4)** Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: W.

**HCDE 519 Qualitative Research Methods (4)** Provides hands-on experience with qualitative research methods, such as interviewing and participant observation, as used in human-centered design and engineering. Students learn to develop appropriate research questions, collect observational data, develop interview protocols, conduct interviews, analyze data, and communicate findings.

**HCDE 520 Design and Management of Complex Systems (4)** Focuses on how to design and implement improvements to complex work systems. Emphasis on Agile development, including sprints using scrum teams to achieve rapid iteration design with system users, developers and owners. Investigates decision support systems, including sense making and adaptation in ambiguous situations.

**HCDE 521 Seminar: Current Issues in Human Centered Design and Engineering (1-2, max. 3)** Presentations on current issues in human centered design and engineering. Prerequisite: HCDE graduate student status or permission of instructor. Credit/no-credit only. Offered: AW.

**HCDE 523 Design Use Build (DUB) Seminar (1, max. 3)** Exploration of advanced issues in human centered design and engineering research and practice. Students are encouraged to join the dub mailing list for calendar of events. Credit/no-credit only. Offered: AWSp.

**HCDE 524 Programming Concepts in HCDE (2)** Workshop in foundations of computing. Introduces students to core concepts in programming using interactive graphics applications. For students with NO prior experience programming in a high-level language like Java, Python, or C++. Prerequisite: graduate standing or permission of instructor.
HCDE 526 Video Prototyping (2) Explores video as a design tool. Students learn about narrative and storytelling in the context of User Centered Design. Enhances technical abilities in the creation of visual artifacts while communicating design vision. Imparts practical knowledge necessary to create a video prototype. Exposes students to the history of video prototypes, as well as contemporary practices. Prerequisite: Graduate standing or permission of instructor.

HCDE 530 Computational Concepts in HCDE (4) Introduces basic computational concepts and programming skills needed to work with interactive systems in HCDE. Draws on topics such as log analysis, visualization, prototyping, and data mining. Students analyze data to inform user research and design.

HCDE 532 Web Design Studio (2) Provides an overview of basic principles and practices of professional web site design and programming. Students gain hands-on experience with designing and building a successful website using industry standard techniques. For students planning to take HCDE 535 or HCDE 537 without previous programming experience.

HCDE 533 Digital Fabrication (4) Introduces designing for and fabricating with tools such as 3D printers, laser cutters, computer controlled mills, and more. Students produce digital plans and physical prototypes in a variety of materials, and gain hands-on experience in a studio-based environment. Prerequisite: HCDE 518.

HCDE 534 Designing a Human Centered Venture (4) Explores the planning of a new venture related to human-centered design. Examines relevant topics, such as team formation, user and market research, value creation, and the iterative demand planning for a new venture.

HCDE 536 Interaction Design and Prototyping (4) Investigates advanced topics in the theory and practice of interaction design, using a project-oriented approach. Develops expertise in design, development, and critique of solutions in online and mobile platforms. Examines issues such as interaction theory, requirements and specifications, design language, prototyping, and presentation of projects. Prerequisite: HCDE 518.

HCDE 537 User-Centered Web Design (4) Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mock-ups, and production. Prerequisite: HCDE 518.

HCDE 538 Designing for Behavior Change (4) Students are introduced to existing behavior change theories, frameworks, and research to gain an understanding of why and how behavior changes. Utilizing these insights, students practice theory-driven design to nudge positive behavior change. They analyze current behavior change applications and utilize existing resources to guide their design process. Prerequisite: HCDE 501; HCDE 518; and HCDE 536 (or equivalent graduate level interaction design coursework).

HCDE 539 Physical Computing and Prototyping (4) Reviews fundamentals of designing and prototyping human-centered interactive systems and environments that include software and hardware components. Students build projects using electronic devices and fabrication tools. Provides hands-on experience in a project-based, studio environment.

HCDE 541 Introduction to PhD Studies in HCDE (2) Introduces the skills needed as a doctoral student in the field of human-centered design and engineering, including communicating about research, preparing for PhD milestones, identifying mentors, and establishing work practices. Credit/no-credit only. Offered: A.

HCDE 542 Theoretical Foundations in Human Centered Design and Engineering (4) Examines theories that inform work in human centered design and engineering, focusing particularly on theories of communication and interaction design. Topics include complexities of interaction as it is configured in different theoretical frameworks, implications of these different configurations, and why these differences matter to people engaged in professional practice/research.

HCDE 543 Empirical Traditions in Human Centered Design and Engineering (4) Introduces empirical traditions that inform research and practice in the field of human centered design and engineering. Topics include epistemological assumptions.
underlying research approaches and a survey of empirical methods.

**HCDE 544 Research Methods I (4)** Introduces experimental, quasi-experimental, and related research methods in human centered design and engineering. Examines the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Students undertake an intensive research project. Prerequisite: Introductory statistics course.

**HCDE 545 Research Methods II (4)** Provides hands-on experience with qualitative research methods with particular emphasis on how ethnographic fieldwork methods (e.g., interviewing and participant observation) are used in human centered design and engineering. Students undertake an intensive research project at a field site, collecting and analyzing data.

**HCDE 546 Design Thinking (4)** Examines how design is enacted within disciplines, exploring commonalities and differences in design practices. Surveys empirical studies of design practices and approaches.

**HCDE 547 Academic Research Seminar (1, max. 10)** Discussion seminar of a variety of academic research topics for doctoral students. Credit/no-credit only. Offered: AWSp.

**HCDE 548 Advanced Topics in Human Centered Design and Engineering (4, max. 20)** In-depth examination of a specialized topic in an emerging area of human centered design and engineering.

**HCDE 592 Capstone Planning (4)** Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project. Prerequisite: HCDE 501; HCDE 517; HCDE 518; and either HCDE 516 or HCDE 519.

**HCDE 593 Capstone (4)** Capstone design experience. Integration of knowledge and skills acquired during program into one project. Prerequisite: HCDE 592.

**HCDE 596 Directed Research in Human Centered Design and Engineering (1-5, max. 18)** Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

**HCDE 597 Approaches to Teaching Technical Communication (1-2, max. 2)** Examines theory and practice of teaching engineering undergraduate students written and oral technical communication competencies, strategies for developing teaching skills and philosophies. Teaching seminar for instructors of HCDE 231 and HCDE 333. Prerequisite: concurrent teaching appointment or permission of instructor. Credit/no-credit only. Offered: AWSpS.

**HCDE 598 Special Topics (1-5, max. 15)** Special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members. Prerequisite: permission of instructor.

**HCDE 599 Special Projects (1-5, max. 10)** Written report required. Credit/no-credit only. Offered: AWSpS.

**HCDE 600 Independent Study or Research (*)**

**HCDE 601 Internship (2-10, max. 10)** Written report required. Prerequisite: permission of committee chair. Offered: AWSpS.

**HCDE 700 Master’s Thesis (*)** Prerequisite: permission of thesis adviser. Offered: AWSpS.

**HCDE 800 Doctoral Dissertation ([1-10]-)** Prerequisite: permission of thesis adviser. Credit/no-credit only. Offered: AWSpS.

**INDUSTRIAL AND SYSTEMS ENGINEERING**

**IND E 101 Introduction to Industrial Engineering (1)** I&S Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to
industrial engineering students at the University of Washington. Offered: A.

IND E 315 Probability and Statistics for Engineers (3) NW Application of probability theory and statistics to engineering problems, distribution theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136, MATH 307, or AMATH 351. Offered: AWSpS.

IND E 316 Design of Experiments (4) NW Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316; W.

IND E 411 Stochastic Models and Decision Analysis (4) Stochastic systems analysis to industrial engineering problems. Topics include: Markov chains, queueing theory, queueing applications, and decision analysis. Prerequisite: IND E 315; IND E 410. Offered: W.

IND E 424 Simulation (4) Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 337; IND E 411, which may be taken concurrently. Offered: W.

IND E 427 Data Analytics for Systems Engineering (4) Emphasizes data-driven system modeling, including basic statistical learning models, and system modeling and decision-making. Covers experimental design for data collection, tree-based control charts for process monitoring, rule-based decision-making, and diagnosis of root causes as learning problems. Students develop connections between emerging statistical learning techniques with system modeling and optimization methods. Prerequisite: Either IND E 315, STAT 390, or STAT 391; recommended: basic programming skills; and experience with R programming language or Matlab.
IND E 430 Manufacturing Scheduling and Inventory (4) Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release, production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 337; IND E 410, both of which may be taken concurrently. Offered: A.

IND E 439 Plant Layout and Material Handling (4) Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 410 which may be taken concurrently. Offered: A.

IND E 455 User Interface Design (4) Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with HCDE 455; A.

IND E 470 Systems Engineering (4) Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with A A 470; Sp.

IND E 491 Professional Practice Seminar (1) Speakers from industry help students explore the wide variety of careers and opportunities available in the ISE field. Speakers cover topics such as elective coursework and extra-curriculars, networking, getting hired, professional ethics, and how to be flexible in a dynamic work environment. Credit/no-credit only. Offered: A.

IND E 494 Design in the Manufacturing Firm (4) Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 337. Offered: W.

IND E 495 Industrial Engineering Design (4) Capstone senior design project involving identification and synthesis of industrial engineering skills. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494. Offered: Sp.

IND E 496 Technology-Based Entrepreneurship (3) Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with M E 496; Sp.

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9) Lecture and/or laboratory.

IND E 499 Special Projects (2-5, max. 12)

IND E 508 Stochastic Processes in Engineering (3) A. GHATE Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with E E 508; W.

IND E 512 Introduction to Optimization Models (3) Presents optimization models that are used in applications such as industrial engineering, production, transportation, financial investment, healthcare systems, and environmental ecology. Problems span a variety of continuous and integer optimization models, with discussion of multi-objectives and incorporating randomness into optimization models.

IND E 513 Linear Optimization Models in Engineering (3) Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through
introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 410 and MATH 308 or permission of instructor.

**IND E 516 Applications of Optimization in Engineering Design (3)** Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH 515/MATH 515/IND E 515 and MATH 328 or permission of instructor.

**IND E 517 Markov Decision Processes (3)** *ARCHIS GHATE* Markov Decision Processes (MDPs) encapsulate a broad class of mathematical models for solving sequential decision problems under uncertainty. Combines techniques from linear/convex optimization, probability, statistics, and machine learning to build a modeling, theoretical, and algorithmic foundation for MDPs. Prerequisite: either IND E 508 and IND E 513, other similar classes in optimization and stochastic models, or permission of instructor. Coding experience with languages such as MATLAB or Python; recommended: graduate level optimization, probability, and statistics. Computer programming.

**IND E 519 Healthcare Modeling and Decision Making (3)** Applications of operations research in healthcare. Introduction to a variety of modeling techniques including decision analysis, cost-effectiveness analysis, Markov models, Markov decision processes, dynamic programming, simulation, queuing, scheduling, machine learning and their applications in healthcare management and medical decision making.

**IND E 521 Statistical Quality Engineering (3)** Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques.

**IND E 524 Robust Design for Process Improvement (3)** Introduction to robust design for process improvement. Applications of design of experiments for product and process design optimization. Experimental design using factorial design and fractional factorial design. Robustness in design and quality improvement for complex systems including Taguchi methods and response surface methodology. Prerequisite: IND E 316/STAT 316 or equivalent. Offered: W.

**IND E 535 Engineering Simulation (3)** Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling, detailed examination of fundamental computer programming concepts underlying the design and development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.

**IND E 537 Smart Manufacturing Systems (3)** *Ashis G Banerjee* Design, modeling and analysis of manufacturing systems, capable of intelligent decision making for optimal and/or robust productivities. Covers automation, digitization, on-demand design, and demand-supply forecasting. Offered: A.

**IND E 543 Virtual Interface Technology (3)** Explores advanced concepts and technologies for interfacing
humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor.

**IND E 546 Inferential Data Analysis for Engineers (3)**
*Linda Ng Boyle* Application of statistical methods to analyze transportation systems, with an emphasis on modeling individual behaviors and drawing sound inferences about cause and effect. Addresses linear regression and common misuses; generalized linear models including logit and negative binomial; multilevel modeling; matching methods. Emphasizes frequentist approaches but introduces Bayesian analysis and extensions of regression modeling to machine learning. Prerequisite: either IND E 315, STAT 390, or equivalent; recommended: standard introductory probability and statistics course. Offered: jointly with CET 521; W.

**IND E 549 Research Methods in Human Factors (3)**
Includes fundamental guidelines for survey design, controlled experiments, quasi-experimental, and observational studies. Focus on safety, productivity, functionality, and usability. Review of journal articles on research methods and design issues, given functional, psychological, physiological, and environmental constraints. Recommended: introductory class in human factors. Offered: jointly with ENV H 549; Sp.

**IND E 564 Recognition of Health and Safety Problems in Industry (2)** Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with ENV H 564; A.

**IND E 566 Introduction to Ergonomics (3)** Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/NSG 508; W.

**IND E 567 Applied Occupational Health and Safety (3)** Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/NSG 505; Sp, even years.

**IND E 569 Occupational Biomechanics (4)** Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with ENV H 569; Sp, even years.

**IND E 570 Supply Chain Systems (3)** Develops concepts related to the design, evaluation, and performance of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 315 or equivalent.

**IND E 581 Navigating the Business Environment (3)** Covers the fundamentals of finance and accounting, marketing, strategy, and business communication as well as the skill of identifying and influencing the key decision maker. Offered: A.

**IND E 582 Technical Leadership (3)** Includes how to motivate, reach consensus, work virtually, recruit, and work with engineers from different cultures. Offered: W.

**IND E 583 Decision Analysis in Engineering (3)** Examines multi-criteria decision tools involving qualitative and quantitative methods. Covers decision trees, subjective probability, utility and value theories, goals and objectives, risk, optimization, and simulation. Includes case studies in decision and systems analysis. Offered: Sp.
IND E 584 Project Performance (3) Examines the fundamentals of project performance and application of systems engineering theory, concepts, and tools and techniques to plan, manage, and accomplish organizational objectives in a project framework. Also considers the critical roles leadership and team development plays in successful completion of projects. Offered: S.

IND E 585 Systems Architecture and Model-Based Systems Engineering (3) Introduction to systems architecture through development of system requirements, allocations of functionality and reintegration. Utilizes model systems engineering as a graphical, mathematical, and modeling tool for systems analysis. Offered: A.

IND E 586 Systems Engineering Risk: Assessment and Management (3) Management of systems engineering risk ensures costs, schedule, and technical performance objectives are achieved. Covers analysis methods and stochastic modeling for assessing and making decisions about projects and financial and technical risks associated with complex systems engineering projects. Also covers balancing risks across the systems development life cycle.

IND E 591 Seminar (1-) Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: A.

IND E 592 Seminar (-1-) Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: W.

IND E 593 Seminar (-1) Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: Sp.

IND E 595 Global Integrated Systems Engineering (1/5-, max. 9) Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with A A 595; AW.

IND E 596 Global Integrated Systems Engineering Project (3) Project-based systems design course. Prerequisite: A A/INDE 595. Offered: jointly with A A 596; Sp.

IND E 599 Special Topics in Industrial Engineering (1-5, max. 9) Prerequisite: permission of supervisor.

IND E 600 Independent Study or Research (*-)

IND E 700 Master’s Thesis (*-)

IND E 800 Doctoral Dissertation (*-)

MATERIALS SCIENCE AND ENGINEERING

MSE 170 Fundamentals of Materials Science (4) NW Fundamental principles of structure and properties of materials utilized in the practice of engineering. Properties of materials as related to atomic, molecular, and crystalline structures. Metals, ceramics, multiphase systems, and polymeric materials. Relationships between structure and electrical, mechanical, thermal, and chemical properties. Prerequisite: Either CHEM 142, CHEM 143, or CHEM 145. Offered: AWSpS.

MSE 197 Case Studies in Materials Innovation (2) Materials science concepts, with emphasis on career opportunities in Materials Science and Engineering. Includes structural materials, electronic materials, biomaterials, and energy related materials. Development of scientific analysis and research proposal formulation skills. Prerequisite: either CHEM 142, CHEM 143, or Chem 145. Offered: Sp.

MSE 298 Introduction to Modern Materials (1) Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department. Offered: ASp.

MSE 310 Introduction to Materials Science and Engineering (3) Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials, and composites. Structure-properties-manufacturing-design relationships are emphasized. Materials selection design project. Introduction to research. Offered: A.

MSE 311 Integrated Undergraduate Laboratory I (3) Laboratory experimentation and techniques used in evaluating the physical properties of metals,
ceramics, and polymers. Use and instruction of analytical equipment, library resources for reference and literature searches, laboratory report writing, laboratory notebook recording, and data analysis. Prerequisite: MSE 170, which may be taken concurrently. Offered: A.

MSE 312 Integrated Undergraduate Laboratory II (3) Materials processing-related laboratory experiments for producing advanced ceramic, metallic, polymeric and composite materials. Examination of particle-particle interactions and rheological behavior. Proper experimental documentation, formal laboratory reports, research project. Prerequisite: MSE 311. Offered: W.

MSE 313 Integrated Undergraduate Laboratory III (3) Laboratory experiments for characterizing advanced ceramic, metallic, polymeric, semiconducting and composite materials. Examination of processes of mechanical, electrical, dielectric and optical measurements for the understanding of the particulars of property measurements. Materials engineering project, including project paper and oral presentation. Prerequisite: MSE 312. Offered: Sp.

MSE 321 Thermodynamics and Phase Equilibrium (4) Phase equilibria in materials systems of one, two, and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials scientists; detailed review of thermodynamic laws and principles. Offered: A.

MSE 322 Kinetics and Microstructural Evolution (4) Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.

MSE 331 Crystallography and Structure (3) Theory and practice of x-ray diffraction with applications to materials sitemaps. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg’s law of diffraction, Laue conditions, diffraction by X-rays, single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite: MSE 170. Offered: A.

MSE 333 Materials Characterization (3) Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331; MSE 351. Offered: Sp.

MSE 342 Materials Processing I (3) Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between processing, microstructure, and properties. Ferrous and non-ferrous metal and alloy processing discussed. Prerequisite: MSE 170; MSE 321. Offered: W.

MSE 351 Electronic Properties of Materials (3) Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MSE, 170, MSE 331. Offered: W.

MSE 352 Functional Properties of Materials I (3) Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure, and microstructure. Prerequisite: MSE 351. Offered: Sp.

MSE 398 Leadership Seminar (1, max. 4) Weekly seminar with program alumni, or academic and government leaders presenting their workforce
experience and insights with students. Includes varied topics related to leadership in the Materials Science and Engineering profession, such as career planning, management skills, interpersonal skills, entrepreneurship, ethics, and strategic decisions. Credit/no-credit only. Offered: W.

MSE 399 Undergraduate Research Seminar (1) Introduces MSE majors to various research projects available to MSE faculty laboratories. Credit/no-credit only. Offered: W.

MSE 431 Failure Analysis and Durability of Materials (3) Treats the areas of failure analysis and durability in a wide range of materials applications. Reviews concepts in mechanical and environmental behavior of materials. Includes instruments available to engineers, both destructive and nondestructive, and case studies. Prerequisite: MSE 333; MSE 342; MSE 362; CEE 220 Offered: W.

MSE 442 Materials Processing II (3) Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.

MSE 450 Magnetism, Magnetic Materials, and Related Technologies (3) Introduces magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials, structure-sensitive properties, magnetic phenomena, small particles, thin films, and applications (magnetic recording, permanent magnets, and spin-electronics.

MSE 452 Functional Properties of Materials II (3) Functional materials including dielectrics, ferroelectrics, piezoelectrics, pyroelectrics, optoelectronics, and magnetic materials. Detailed discussion of fundamental relations between the chemical composition, crystal structure, microstructure, and physical properties. Description of general devices and applications of these functional materials. Prerequisite: MSE 352. Offered: W.

MSE 462 Mechanical Behavior of Materials II (3) Structural influences on mechanical properties of materials and strengthening mechanisms. States of stress and strain, failure criteria, multiaxial loads. Dynamic loading, kinematic and isotropic hardening, plasticity; Flaws and material reliability, probabilistic failures, fracture and toughening mechanisms. Stress life fatigue, fatigue crack growth, viscoelasticity, viscoplasticity. Prerequisite: AA 210; CEE 220; MSE 362. Offered: Sp.

MSE 466 Energy Materials, Devices, and Systems (3) David S. Ginger Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: either PHYS 431, E E 421, MSE 311, MSE 312, MSE 313, MSE 351, MSE 352, CHEM E 456, CHEM 455, or CHEM 475, any of which may be taken concurrently. Offered: jointly with CHEM 466/CHEM E 440; A.

MSE 471 Introduction to Polymer Science and Engineering (3) Introduction of preparative methods of polymers; physical chemistry of polymeric molecules in solution, liquid and solid phase; thermodynamics of polymers; methods of characterization; mechanical properties; fabrication techniques; properties of commercial polymers. Offered: A.
MSE 473 Noncrystalline State (3) Chemistry and physics of inorganic glass and amorphous semiconductors; structure, properties, and processing of vitreous materials. Prerequisite: MSE 342; MSE 351. Offered: Sp.

MSE 475 Introduction to Composite Materials (3) Microstructural design and processing of composite materials; polymeric, metallic, and ceramic matrices; fibers and fiber-reinforced composites, thermal, mechanical, and electrical properties. Offered: A.

MSE 476 Introduction to Optoelectronic Materials (3) Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunication, biomedical, and renewable energy industries. Prerequisite: CSE 142 or AMATH 301; Completion or concurrent enrollment in MSE 331; or permission of instructor.

MSE 477 Data Science and Materials Informatics (3) Introduction to data science approaches and their applications to materials science research. Basic skills in data mining, data processing, and machine learning for materials research topics using Python taught through case studies and other methodologies. Prerequisite: CSE 160 or CSE 163; recommended: proficiency in Python, achieved through coursework or independent study. Offered: jointly with CHEM 441.

MSE 478 Materials and Device Modeling (3) Implementation of computational and data science methods in materials science discovery and device modeling to gain physical and statistical insights of materials design. First-principles methods, multiscale simulations, and continuum modeling will be introduced within the framework of active machine learning with application of both computational and data science methods to materials study. Prerequisite: MSE 477/CHEM 441. Offered: jointly with CHEM 442.

MSE 479 Big Data for Materials Science (3) Introduces the challenges and opportunities of the big data era for materials science and chemistry research. Students will gain basic knowledge and skills of data management using high performance computing, including automated data processing, batch processing, and cloud based computational tools that are suitable for materials science research. Prerequisite: MSE 477/CHEM 441. Offered: jointly with CHEM 443.

MSE 481 Science and Technology of Nanostructures (3) Comprehensive introduction to the developing field of nanoscience and nanotechnology. Includes materials properties as a function of length-scale and dimensionality, applications in medicine/biology, electronics, magnetism, and electro-mechanical systems. Cooperative learning approaches involving student participation with team assignments, class activities, lectures, and laboratory visits. Offered: W.

MSE 482 Biomaterials/Nanomaterials in Tissue Engineering (3) Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.

MSE 483 Nanomedicine (3) Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.

MSE 484 Electronic and Optoelectronic Polymers (3) NW Covers the chemistry, physics, materials science, and applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examines light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 453 or CHEM 455. Offered: jointly with CHEM 484; ASp.

MSE 485 Introduction to Electronic Packaging and Materials (3) The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with M E 485; AW.
MSE 486 Fundamentals of Integrated Circuit Technology (3) Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with E E 486; AW.

MSE 488 Materials in Manufacturing (3) Primary manufacturing processes used for developing engineering materials components from metals, polymers, ceramics, and composites.

MSE 489 Additive Manufacturing: Materials, Processing and Applications (3) Additive manufacturing processes for polymers, metals, ceramics and composite materials. Operating principles, key process parameters important to the part build process, and the importance of design. Microstructure of the build parts, dependence on processing conditions, the mechanical and physical properties, defects and relevant post-processing treatments for each material system. Hybrid processes, and adoption in various fields. Offered: jointly with M E 402; Sp.

MSE 491 Design in Materials Engineering I (2) Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews materials design, teamwork, leadership, engineering economics, and ethics. Beginning of a two-quarter, team design project on materials engineering. Prerequisite: MSE 313 and MSE 352. Offered: W.

MSE 492 Design in Materials Engineering II (2) Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews process design, manufacturability, and quality control. Completes the two-quarter team design project on materials engineering. Prerequisite: MSE 491. Offered: W.

MSE 497 Undergraduate Research (1-5, max. 12) Research in materials under faculty supervision other than the MSE senior project. Cannot be used toward the technical elective requirements in the MSE major. Credit/no-credit only. Offered: AWSpS.

MSE 498 Special Topics (1-5, max. 15) Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Offered: AWSpS.

MSE 499 Senior Project (*, max. 5) Materials science and engineering field or laboratory investigations in group or individual setting. Final written report and oral presentation required. Offered: AWSpS.

MSE 501 Advanced Processing of Inorganic Materials (3) Discusses advanced processes of inorganic materials including metals, ceramics, and electronic materials, such as high temperature processing, sintering, solidification, single crystal growth form liquid, and vapor phase deposition. Emphasizes both the fundamentals and practical approaches of these processing techniques. Offered: A, even years.

MSE 502 Sol-Gel Processing (3) Fundamentals of colloid science and the physics and chemistry of the sol-gel process. Emphasizes the synthesis and applications of various materials, such as multi-component oxides, nano-composites, meso- and microporous materials, organic/inorganic hybrids, and biomaterials that have important applications in both leading technologies and modern industries. Offered: A, odd years.

MSE 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices.
Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Cannot be taken for credit if credit received for EE P 504. Offered: jointly with EE 504/M E 504.

MSE 510 Bonding, Crystallography, and Symmetry-Related Properties of Materials (3) Rigorous introduction to the fundamentals of bonding, symmetry, crystallography, and related properties. Quantum mechanical foundation of cohesion and properties of solids. Geometric approach to understanding symmetry elements in 2-D and 3-D, including point groups, space groups, stereographic projections, and bravais lattices. Tensor properties of crystals related to crystallography and symmetry. Offered: A.

MSE 512 Experimental Transmission Electron Microscopy (3) Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on defects and multiphase structures in crystalline solids. Prerequisite: MSE 510 which may be taken concurrently. Offered: W, odd years.

MSE 513 Transmission Electron Microscopy Laboratory (2) One four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, electronic biological sample preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512. Offered: W, odd years.

MSE 515 Advanced Transmission Electron Microscopy (3) Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive X-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513.

MSE 520 Seminar (1, max. 6) Review of research problems in recent literature. Registration required for all graduate students. Credit/no-credit only. Offered: AWSp.

MSE 524 Applied Rate Phenomena (3) Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

MSE 525 Kinetics and Phase Transformations (3) Thermodynamic basis for kinetic processes, including diffusion and phase transformation kinetics. Diffusion problems and solution methodologies, statistical treatment of diffusion, solid-liquid and solid-solid transformations, ordering transitions. Special topics related to grain growth, sintering, martensitic transformations. Prerequisite: MSE 322 and MSE 421 or equivalent. Offered: Sp.

MSE 529 Semiconductor Optoelectronics (4) Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with E 529.

MSE 539 Renewable Energy I (4) John D. MacKenzie Covers the underlying physics, manufacturing and performance of current and emerging photovoltaic solar cell and module technologies in a comparative approach. The course will also present practical aspects of the solar resource, module integration, systems and energy production. Recommended: Undergraduate physics and chemistry at the engineering or science level. Students without some previous solid state physics, electronic materials, or semiconductor device coursework may require extra reading. Offered: jointly with M E 539; W.

MSE 541 Defects in Materials (3) Detailed study of the general properties and effects of point, line, and planar defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.

MSE 542 Data Science and Materials Informatics (3) Introduction to data science approaches and their applications to materials science research. Basic skills in data mining, data processing, and machine learning for materials research topics using Python taught through case studies and other methodologies. Prerequisite: either CHEM E 545/CHEM 545/MSE 545 (or equivalent) , CHEM E 546/CHEM 546/MSE 546 (or equivalent) , or proof of proficiency in Python. Offered: jointly with CHEM 541.
MSE 543 Materials and Device Modeling (3) Implementation of computational and data science methods in materials science discovery and device modeling to gain physical and statistical insights of materials design. First-principles methods, multiscale simulations, and continuum modeling will be introduced within the framework of active machine learning with application of both computational and data science methods to materials study. Prerequisite: either MSE 477/CHEM 441, MSE 542/CHEM 541, CHEM E 545/CHEM 545/MSE 545, or CHEM E 546/CHEM 546/MSE 546 (or equivalents). Offered: jointly with CHEM 542.

MSE 544 Big Data for Materials Science (3) Introduces the challenges and opportunities of the big data era for materials science and chemistry research. Students will gain basic knowledge and skills of data management using high performance computing, including automated data processing, batch processing, and cloud based computational tools that are suitable for materials science research. Prerequisite: either MSE 477/CHEM 441 or MSE 542/CHEM 541. Offered: jointly with CHEM 543.

MSE 545 Data Science Methods for Clean Energy Research (3) Jim Pfaendtner Survey of modern data science methods taught in the context of materials for clean energy (e.g., batteries and solar energy). Covers data visualization, statistics, machine learning and data management. Instruction, homework and term project are implemented using Python. Offered: jointly with CHEM 545/CHEM E 545; W.

MSE 546 Software Engineering for Molecular Data Scientists (3) Jim Pfaendtner Introduces basic principles of scientific software development in the Python in the context of Molecular Data Science. The course covers command line tools, Python from the perspective of molecular data science methods, software development and collaboration principles, e.g. version control. Grades are based on homework and group projects. Offered: jointly with CHEM 546/CHEM E 546; W.

MSE 547 Data Science Capstone Project (3) David A. C. Beck Involves teams of graduate students from molecular, materials or clean energy focused disciplines working on Data Science oriented research and engineering projects solicited from internal and external partners. Employ modern team-based software engineering principles and cutting edge Data Science methods, including but not limited to machine learning, statistics, visualization and data management. Prerequisite: CHEM E 545 and CHEM E 546; recommended: prior exposure to data science fundamentals and software development. Offered: jointly with CHEM 547/CHEM E 547; Sp.

MSE 555 Biomimetics: Bioinspired Design and Processing of Materials (4) How biological organisms produce materials with controlled structure, chemistry, and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues. Offered: W, even years.

MSE 560 Organic Electronic and Photonic Materials/Polymers (3) Physical and material concepts determining properties of organic electronic and photonic materials. Discusses electronic structure, physico-chemical characterization, and device application. Includes introduction of electronic band structure of polymers, electrically conducting polymers; organic nonlinear optical electroluminescent materials; polymer optical fibers; tow-photon absorption materials for 3-D microfabrication. Offered: jointly with CHEM 564/MOLENG 530; W.

MSE 562 Introduction to Electronic Composites (3) Taya Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with ME 562; Sp.
MSE 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with M E 563; Sp.

MSE 566 Energy Materials, Devices, and Systems (3) D. Ginger Jr Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/CHEM E 540; A.

MSE 568 Active and Sensing Materials (3) Taya Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with M E 568; Sp.

MSE 570 Graduate Tutorial in Materials Science and Engineering I (2) Physical and chemical structures of materials and their relationship to properties. Understanding and applying the following material science concepts: atomic bonding, crystallography, defects and diffusion, thermodynamics, phase diagrams, and phase transformations. Recommended: introductory undergraduate course in materials science. Offered: A.

MSE 571 Graduate Tutorial in Materials Science and Engineering II (2) Mechanical, electrical, dielectric, optical, and thermal properties of materials; applying these concepts. Prerequisite: MSE 570. Offered: W.

MSE 576 Introduction to Optoelectronic Materials (3) Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunication, biomedical, and renewable energy industries.

MSE 582 Biomaterials/Nanomaterials in Tissue Engineering (3) Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.

MSE 583 Nanomedicine (3) Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.

MSE 588 Materials in Manufacturing (3) Primary manufacturing processes used for developing engineering materials components from metals, polymers, ceramics, and composites.

MSE 589 Additive Manufacturing: Materials, Processing and Applications (3) Additive manufacturing processes for polymers, metals, ceramics and composite materials. Operating principles, key process parameters important to the part build process, and the importance of design. Microstructure of the build parts, dependence on processing conditions, the mechanical and physical properties, defects and relevant post-processing treatments for each material system. Hybrid processes, and adoption in various fields. Offered: jointly with M E 506; Sp.

MSE 590 Composite Materials in Manufacturing (3) Manufacturing processes for composite materials, with a focus on thermosets. Composite manufacturing process from raw materials manufacturing to shipping final products. Controlling parameters leading to defects. Balance between
design and quality system manufacturing controls, relationship of process development to engineering design, and procedures for materials and process changes. Identification and repair of manufacturing anomalies. Offered: Sp.

MSE 598 Engineering Materials Problems (4)
Involves a concentrated project which may include the design of a system or process, or analysis of a set of data related to the materials engineering area. Requires a professional quality report and an oral presentation of the results. Offered: AWSpS.

MSE 599 Special Topics in Materials Science (1-5, max. 15)
Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSpS.

MSE 600 Independent Study or Research (*)
Offered: AWSpS.

MSE 700 Master's Thesis (*)
Offered: AWSpS.

MSE 800 Doctoral Dissertation (*)
Offered: AWSpS.

MECHANICAL ENGINEERING

M E 123 Introduction to Visualization and Computer-Aided Design (4) VLPA/NW Adee
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional skills through freehand sketching and computer-aided design using parametric solid modeling. Offered: AWSpS.

M E 124 Visualization and Computer-Aided Design Laboratory (2) VLPA/NW Adee
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional visualization skills through computer-aided design using parametric solid modeling. Offered: AWSpS.

M E 230 Kinematics and Dynamics (4) NW
Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum. Prerequisite: A A 210. Instructors: Fabien

M E 299 Independent Project (1-3, max. 10)
Research on special topics under supervision of a faculty member. May include design and construction projects. May not be used to satisfy upper-division major requirements Credit/no-credit only. Offered: AWSpS.

M E 323 Engineering Thermodynamics (5)
Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: either CHEM 142 or CHEM 144; MATH 126; PHYS 121. Instructors: Kramlich

M E 331 Introduction to Heat Transfer (4) Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342. Instructors: Emery

M E 333 Introduction to Fluid Mechanics (5)
Introduction to the basic fluid laws and their application. Conservation equations, dynamic similarity, potential flow, boundary-layer concepts, effects of friction, compressible flow, fluid machinery, measurement techniques. Prerequisite: AMATH 301; M E 323; either MATH 307 or AMATH 351. Instructors: Riley

M E 341 Energy and Environment (3) NW Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/ENVIR 341; A.

M E 354 Mechanics of Materials Laboratory (5)
Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220. Instructors: Tuttle
M E 355 Introduction to Manufacturing Processes (4) Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process, and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354. Instructors: Ramulu

M E 356 Machine Design Analysis (4) Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Prerequisite: M E 354. Instructors: Chung

M E 373 Introduction to System Dynamics (5) Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numeric simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; E E 215; M E 230. Instructors: Garbini

M E 395 Introduction to Mechanical Design (4) Design process and methodology; decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Prerequisite: M E 123; M E 323; IND E 315 or MATH 390/STAT 390 either of which may be taken concurrently. Instructors: Cooper

M E 402 Additive Manufacturing: Materials, Processing and Applications (3) Additive manufacturing processes for polymers, metals, ceramics and composite materials. Operating principles, key process parameters important to the part build process, and the importance of design. Microstructure of the build parts, dependence on processing conditions, the mechanical and physical properties, defects and relevant post-processing treatments for each material system. Hybrid processes, and adoption in various fields. Offered: jointly with MSE 489; Sp.

M E 406 Corrosion and Surface Treatment of Materials (3) R. Kent Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen, and leaching) . Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding, and plating) applied to reduce corrosion. Failure analysis applied to case studies.

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, programming methods of NC machines, computer-aided manufacturing, CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently. Instructors: Ramulu

M E 410 Nanodevices: Design and Manufacture (3) Chung Examines design, fabrication, and manufacture of nano devices with state-of-the-art nanotechnology. Covers classification and selection of nanoscale materials and manufacturing methods: Includes nanodevice design projects. Offered: A.

M E 411 Biological Frameworks for Engineers (3) Sniadecki Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A.

M E 412 Biomechanics of Movement (3) K. Steele Introduction to the dynamics and control of human movement and other biological systems. An overview of the major challenges in movement biomechanics and experience with the engineering tools we use to address these challenges. Course includes weekly assignment, hands-on labs, and a final project. Prerequisite: ME 374, or permission of instructor Offered: W.
M E 414 Engineering Innovation in Health (4) Eric J. Seibel, Jonathan D Posner Introduces the role of Innovation and engineering in the design of medical devices and healthcare technologies, applicable both to medical practice and healthcare-focused engineering. May serve as the first course in a medically related senior design project sequence. Discusses medical practice, clinical needs finding, FDA regulation, insurance reimbursement, intellectual property, and the medical device design process. Offered: jointly with E E 414; A.

M E 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/ENVIR 415.

M E 419 Biomechanics Seminar (1, max. 4) N. Sniadecki, K. Steele Weekly seminar on biomechanics research, presented by faculty members, researchers, and graduate students from UW, other institutions, and industry. Credit/no-credit only. Offered: W.

M E 425 HVAC Engineering (4) Heating, ventilating, and air conditioning of built environment. Human comfort, psychrometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331. Instructors: Emery

M E 426 Renewable Energy II (3) B. POLAGYE Explores renewable energy principles and practices of energy conversion, focusing on energy conversion from wind and water. Prerequisite: M E 333.

M E 430 Advanced Energy Conversion Systems (4) Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control are discussed. Prerequisite: M E 323. Instructors: Kramlich

M E 431 Advanced Fluid Mechanics (4) Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333. Instructors: Mescher

M E 432 Gas Dynamics (3)

M E 433 Turbomachinery (4) Aliseda Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.

M E 442 Renewable Energy (4) NW P. MALTE Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with CHEM E 442; W.

M E 445 Introduction to Biomechanics (4) J. SANDERS Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BIOEN 440; Sp.

M E 450 Introduction to Composite Materials and Design (3) Tuttle Stress and strain analysis of continuous fiber composite materials. Orthotropic elasticity, laminate theory, failure criterion, and design philosophies, as applied to structural polymeric composites.

M E 460 Kinematics and Linkage Design (3) Ganter Synthesis of linkage-type mechanisms using graphical and computer methods.

M E 461 Mechanics of Thin Films (3) Wang Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.

M E 469 Applications of Dynamics in Engineering (4) Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton's principle and Lagrange equations, and the design of dynamic system. Prerequisite: M E 374. Instructors: Storti

M E 471 Automatic Control (4) Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: M E 374. Instructors: Berg

M E 473 Instrumentation (4) Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374. Instructors: Garbini

M E 477 Embedded Computing in Mechanical Systems (4) Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, C language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374. Instructors: Garbini

M E 478 Finite Element Analysis (4) Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352. Instructors: Reinhall

M E 480 Introduction to Computer-Aided Technology (4) Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; AMATH 301. Instructors: Ganter

M E 481 Internal Combustion Engines (4) Internal combustion engines including spark and compression ignition piston engines, with focus on engine performance and the thermodynamics, combustion, emissions, and efficiency of engines. Impact of greenhouse gas constraints on engines. Prerequisite: either M E 323, A A 260, or CHEM E 325. Instructors: Kramlich, Malte

M E 485 Introduction to Electronic Packaging and Materials (3) The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with MSE 485; AW.

M E 490 Naval Architecture (3)

M E 494 Mechatronics Design Preparation (1)
Design laboratory preparation. Covers the development of functional specifications; exploration of prior art; static and dynamic modeling. Prerequisite: M E 471; M E 473. Instructors: Garbini Offered: W.

M E 495 Mechanical Engineering Design (4)
Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts used as reference sources. Prerequisite: M E 395. Instructors: Cooper

M E 496 Technology-Based Entrepreneurship (3)
Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with IND E 496; Sp.

M E 498 Special Topics in Mechanical Engineering (1-5, max. 6) Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

M E 499 Special Projects (1-5, max. 6) Written report required. Offered: AWSpS.

M E 500 Advanced Composite Structural Analysis (3)
Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with A A 535; Sp, odd years.

M E 501 Modern Manufacturing Processes (3)
Ramulu General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.

M E 503 Continuum Mechanics (3) Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/liquid materials. Offered: jointly with A A 503; A.

M E 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Cannot be taken for credit if credit received for EE P 504. Offered: jointly with E E 504/MSE 504.

M E 506 Additive Manufacturing: Materials, Processing and Applications (3) Additive manufacturing processes for polymers, metals, ceramics and composite materials. Operating principles, key process parameters important to the part build process, and the importance of design. Microstructure of the build parts, dependence on processing conditions, the mechanical and physical properties, defects and relevant post-processing treatments for each material system. Hybrid processes, and adoption in various fields. Offered: jointly with MSE 589; Sp.

M E 507 Incompressible Fluid Mechanics (3) Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with A A 507; W.

M E 508 Theory and Design for Mechanical Measurements (3) Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering.

M E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces;

**M E 511 Biological Frameworks for Engineers (3)**  
_Sniadecki_ Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A.

**M E 512 Biomechanics of Movement (3)**  
_K. Steele_ Introduction to the dynamics and control of human movement and other biological systems. An overview of the major challenges in movement biomechanics and experience with the engineering tools we use to address these challenges. Course includes weekly assignment, hands-on labs, and a final project. Prerequisite: ME 374, or permission of instructor. Offered: W.

**M E 514 Engineering Innovation in Health (4)**  
_J. Posner, E. Seibel, K. Steele_ Introduces the role of innovation and engineering in the design of medical devices and healthcare technologies, applicable both to medical practice and other healthcare-related needs. May serve as the first course in a medically-related graduate design project sequence. Discusses medical practice, clinical needs finding, regulatory approval, insurance reimbursements, intellectual property, and the medical device design process. Offered: A.

**M E 515 Life Cycle Assessment (3)**  
_Cooper_ Presents and discusses the computation structure and data sources for environmental Life Cycle Assessment. Uses Life Cycle Assessment to analyze materials, products, and services. The analysis either identifies opportunities for improvements or selects a superior alternative on the basis of pollution prevention and resource conservation. Offered: W.

**M E 516 Advanced Manufacturing and Energy Technologies (3)**  
_C. Cobb_ Advanced manufacturing and processing methods for energy devices and systems will be examined, including but not limited to the following application areas: batteries, fuel cells, solar cells, and sensors. This course will study the role of manufacturing in clean energy, current challenges, and investigate opportunities for performance improvement. Recommended: An undergrad training in mechanical or materials science engineering. Prior coursework or experience in the following areas is required: M E 355 or equivalent, M E 395 or equivalent, M E 354 or equivalent, and M E 333 or equivalent. Offered: Sp.

**M E 519 Biomechanics Seminar (1, max. 4)**  
_N. Sniadecki, K. Steele_ Weekly seminar on biomechanics research, presented by faculty members, researchers, and graduate students from UW, other institutions, and industry. Credit/no-credit only. Offered: W.

**M E 520 Seminar (-1, max. 20)**  
The graduate seminar series presents speakers of varied interests, industries, and professions. Credit/no-credit only. Offered: AWSp.

**M E 521 Thermodynamics (3)**  
Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisite: M E 323 and graduate standing in mechanical engineering or permission of instructor. Instructors: Kramlich. Offered: A.

**M E 522 Thermodynamics (3)**  
Topics from statistical thermodynamics, including the Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrodinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Instructors: Malte.

**M E 523 Energy and Environment Seminar (1, max. 20)**  
_Malte_ Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy conversion, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no-credit only. Offered: AWSp.

**M E 524 Combustion (3)**  
Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of
instructor. Instructors: Kramlich Offered: Sp, odd years.

M E 525 Applied Acoustics I (3) Introduces acoustics through various applications such as medical ultrasound, underwater sound, noise control and vibrations. Includes linear acoustics, wave equation, planewave solutions, acoustics scales; reflection, refraction, scattering and diffraction, acoustic sources, radiation form transmission through plates. Prerequisite: graduate standing in Engineering, allied field, or permission of instructor. Instructors: Dahl, Reinhall Offered: Sp.

M E 526 Special Topics in Acoustics (3) Advanced study of special topics in acoustics, such as medical ultrasound, underwater sound, noise control and vibrations. Prerequisite: ME 525, or permission of instructor. Instructors: Dahl, Reinhall Offered: A.

M E 527 Musculoskeletal Biomechanics (4) Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with BIOEN 520.

M E 528 Acoustics of Environmental Noise (4) Offered: jointly with CEWA 554.

M E 529 Advanced Energy Conservation Systems (4) Kramlich Covers advanced energy conversion systems and technologies, including high efficiency combined cycles, advanced rankine, integrated gasification combined cycle, nuclear, biomass thermal conversion, and fuels cells. Discusses environmental consequences. Offered: A.

M E 530 Radiative Heat Transfer (3) Mescher Covers black and gray body radiation, radiative material properties, radiation exchange between surfaces, radiation in participating media, and combined radiation with conduction or convection. Offered: W.

M E 531 Conductive Heat Transfer (3) Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or permission of instructor. M E 532 Convective Heat Transfer (3) Introduction to fluid flow and boundary-layer theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling-layer theory as applicable. Prerequisite: graduate standing or permission of instructor. Instructors: Kramlich Offered: Sp.

M E 534 Fluid Mechanics II (3) Review of basic principles, some exact solutions and their interpretation, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 507 or permission of instructor. Instructors: Riley Offered: W.

M E 535 Computational Techniques in Mechanical Engineering (3) Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Instructors: Emery Offered: Sp.

M E 536 Micro and Nanoscale Fluid Transport Phenomena (3) Posner, Shen Focuses on fundamental fluid transport physics at the micro/and nanometer scale for applications in micro/nanofluidic devices. Presents the core concepts of low-Reynolds number Newtonian fluid mechanics; mass transfer; charged double layers; electrokinetically driven flow and transport; and surface tension. Discusses state of the art micro and nanoscale total analytical devices. Offered: WSp.

M E 537 Topics in Fluid Mechanics (3) Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and turbulent reacting flows.

M E 538 Advanced Fluid Mechanics (4) J. RILEY Advanced topics in fluid mechanics, including kinematics; potential theory and vortex dynamics; viscous flow; turbulence; numerical methods; and design. Offered: A.

M E 539 Renewable Energy I (4) John D. MacKenzie Covers the underlying physics, manufacturing and performance of current and emerging photovoltaic solar cell and module technologies in a comparative approach. The course will also present practical aspects of the solar resource, module integration, systems and energy production. Recommended:
Undergraduate physics and chemistry at the engineering or science level. Students without some previous solid state physics, electronic materials, or semiconductor device coursework may require extra reading. Offered: jointly with MSE 539; W.

**M E 540 Renewable Energy II (3)** *Malte* Explores renewable energy, principles and practices of energy conversion, focusing on wind and hydrokinetic energy. Offered: Sp.

**M E 541 Fatigue of Materials (3)** *Ramulu* Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.

**M E 543 Fluid Turbulence (3)** Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations; spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogoroff's hypothesis; Taylor's hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: W, even years.

**M E 544 Advanced Turbulence Modeling Techniques (3)** The Reynolds stress transport equations; plane homogeneous shear flow; modeling the pressure-strain, diffusion, and dissipation rate correlation tensors; one and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence-related coursework. Instructors: Riley Offered: Sp, even years.

**M E 546 Micro-Scale Heat Transfer (3)** *Mescher* Covers advanced heat conduction and radiation principles, emphasizing micro-scale applications. Offered: Sp, odd years.

**M E 548 Linear Multivariable Control (3)** Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/E E 548.

**M E 550 Nonlinear Optimal Control (3)** Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/E E 550.

**M E 551 Elasticity I: Elastostatics (3)** *Taya* Elasticity, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Eshelby's method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

**M E 552 Viscoelasticity and Plasticity (3)** *Taya* Covers viscoelasticity, including the stress-strain equations in terms of convolution integral, Fourier transform, and Laplace transform modes. Plasticity focuses on generalized plastic behavior.

**M E 553 Adhesion Mechanics (3)** Introduction to adhesive systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Instructors: Tuttle Offered: Sp, even years.

**M E 555 Thermoelasticity (3)** Basic equations of thermoelasticity for isotropic elastic solids. Analysis of disks, cylinders, spheres, beams, and plates under steady temperature and sudden and slow heating and cooling. Introduction to thermoelastic stability. Prerequisite: M E 551 or permission of instructor. Instructors: Emery

**M E 556 Experimental Stress Analysis I (3)** Theory and practice of experimental techniques including
strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: A.

M E 557 Experimental Stress Analysis II (3) Theory and practice of optical mechanics, including interferometric techniques (moire and holographic), geometric moiré methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: W, even years.

M E 559 Introduction to Fracture Mechanics (3) Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Fracture toughness and fatigue testing techniques, crack initiation, and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.

M E 561 Mechanics of Thin Films (3) Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.

M E 562 Introduction to Electronic Composites (3) Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with MSE 562; Sp.

M E 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with MSE 563; Sp.

M E 564 Mechanical Engineering Analysis (3) Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: A.

M E 565 Mechanical Engineering Analysis (3) Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: W.

M E 566 Mechanical Engineering Analysis (3) Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with MOLENG 567; W.

M E 567 Micro- and Nanostructured Biosensors (3) Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with MOLENG 567; W.

M E 568 Active and Sensing Materials (3) Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with MSE 568; Sp.

M E 572 Methodologies for Engineering Design: Conceptual Design (3) Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Instructors: Kumar Offered: W, even years.
M E 574 Introduction to Applied Parallel Computing for Engineers (3) D. Storti Utilization of GPU-based parallel computing for engineering applications. Basics of hardware and software for GPU-based parallel computing. Introduction to GPU programming, language extensions, and interfaces. Introduction to parallel methods for numerical analysis and digital design. Applications in imaging, inspection, and computer-aided design. Hands-on experience creating GPU-powered parallel applications. Prerequisite: Introductory computing; graduate standing or permission of instructor; recommended: Some introductory computing experience and graduate standing in engineering engineering. Offered: W.

M E 580 Geometric Methods for Non-Linear Control Systems (3) Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/E E 580; Sp, even years.

M E 582 Introduction to Discrete Event Systems (3) Modeling DES with automata and Petri nets.

M E 586 Biology Inspired Robotics (3) S. Fuller Principles and practices for converting insights from biology into functioning robotic systems. Concepts vary from year to year and can include passive dynamic stability, soft and flexure-based robotics, model-free control, mechanical intelligence, and machine learning. Term project. Prerequisite: M E 373 or equivalent Offered: A.

M E 588 Dynamics and Vibrations (3) Variational techniques, Hamilton's principle, Lagrange's equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and continuous systems. Prerequisite: graduate standing in engineering or permission of instructor. Instructors: Shen Offered: A.

M E 589 Vibrations (3) Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Instructors: Storti Offered: W, even years.

M E 591 Robotics and Control Systems Colloquium (1, max. 30) Colloquium on current topics in robotics
and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/E E 591.

M E 592 Mechatronics Master’s Project (1-6, max. 9) Santosh Devasia, Joseph L Garbini, Sawyer Buckminster Fuller Special project in mechatronics and robotics research areas under the supervision of a faculty member. Offered: AWSpS.

M E 593 Feedforward Control (3) Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/E E 593; Sp, even years.

M E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 594/E E 594; Sp, odd years.

M E 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/E E 597.

M E 598 Graduate Projects (1-6, max. 9) Graduate student special projects completed under the supervision of a faculty member. Maximum of 9 credits may be applied toward graduation. Prerequisite: Permission of faculty supervisor and graduate program coordinator Offered: AWSpS.

M E 599 Special Topics (1-5, max. 18) Topics of current interest in Mechanical Engineering. Offered: AWSpS.

M E 600 Independent Study or Research (*) Written report required. Offered: AWSpS.

M E 700 Master’s Thesis (*) Offered: AWSpS.

M E 800 Doctoral Dissertation (*) Offered: AWSpS.
COLLEGE OF THE ENVIRONMENT

SCHOOL OF AQUATIC AND FISHERY SCIENCES

FISH 101 Water and Society (5) I&S/NW
Examines ecological and social issues associated with water resources as human populations increase and climate warms. Offered: W.

FISH 230 Economics of Fisheries and Oceans (5) I&S/NW, QSR C. ANDERSON
Examines how and why people and businesses make choices that lead to over-fishing, hypoxic zones, and oil spills in aquatic environments. Applies economic principles to understand how alternative policies might change these decisions, and how distributional effects influence politically feasible solutions. Offered: jointly with ECON 230; Sp.

FISH 250 Marine Biology (3/5) I&S/NW
Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/OCEAN 250; AS.

FISH 260 Recreational Fisheries: Science, Management, and Policy (3/5) I&S/NW Grue
Provides an overview of Washington’s recreational fisheries emphasizing science, management, and policy. Optional laboratory focuses on science and technology behind fishing tactics, tackle, and equipment, ways to minimize impacts and enhance conservation, and politics associated with opportunities for recreational anglers. Suitable for students with or without a strong science background. Offered: Sp.

FISH 261 Recreational Fisheries Seminar (1) Christian E Grue
Overview of issues and perspectives associated with management of Washington's recreational fisheries: opportunity; science and technology behind tactics, tackle and equipment; ways to minimize environmental impacts and enhance conservation of target and non-target species; etiquette; and challenges of enforcing regulations. Suitable for undergraduate students with or without a science background. Offered: Sp.

FISH 270 Aquatic Ecophysiology (5) NW
Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with MARBIO 270/OCEAN 270.

FISH 274 Introduction to Data Analysis for Aquatic Sciences (3) Basic knowledge of data acquisition, manipulation, and visualization are necessary for conducting biological research. Students will be introduced to bash, R, and Jupyter Notebooks, but the concepts learned will easily apply to other computational work. By the end of this course students will be able to import data into R, perform analysis on that data, and export the results to graphs, and presentations. Prerequisite: BIOL 180. Offered: A.

FISH 290 Scientific Writing and Communication (3)
Designed to teach undergraduate students how to gather information on scientific questions; critically read scientific writing; learn the structure and functions of scientific papers to effectively communicate; learn techniques for effective communication of science in oral and poster presentations; and understand the ethical boundaries associated with scientific communication. Offered: AW.

FISH 296 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

FISH 300 Exploring Opportunities in Marine Science (1) Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with MARBIO 300/OCEAN 300; W.
FISH 310 Biology of Shellfishes (5) NW Aquatic invertebrates with emphasis on taxa with economic and cultural significance. Dramatic diversity, adaptation to environment, and evolutionary forces highlighted. Laboratories, field trips. Offered: Sp.

FISH 311 Biology of Fishes (3/5) NW Covers morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of aquatic sciences. 3-credit option does not include laboratory. Offered: jointly with BIOL 311; W.

FISH 312 Fisheries Ecology (3/5) NW Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and community structure. Impacts of human activities on diversity and abundance. Prerequisite: BIOL 220 or FISH 270. Offered: Sp.

FISH 323 Conservation and Management of Aquatic Resources (5) NW Topics include population dynamics, extinction risk, meta-populations, marine reserves, bioeconomics, protection of endangered species, sustainable harvesting, and management institutions. Examines case studies such as salmon, albatross, and whales as representative of conservation issues in aquatic sciences. Sampling, experimental design, computer skills, and research writing. Offered: A.

FISH 324 Aquatic Animal Physiology and Reproduction (3/5) NW Adaptations of aquatic animals to environmental challenges. Energy pathways from feeding and digestion through maintenance (metabolism, movement, repair), homeostasis (respiration, osmoregulation, thermoregulation), growth and reproduction (sex determination, manipulation, sex change). Roles of sensory, nervous, and endocrine systems in mediating environmental information. Hands-on laboratory. Prerequisite: either BIOL 220, B BIO 220 or FISH 270/MARBIO 270/OCEAN 270. Offered: W.

FISH 328 Forestry-Fisheries Interactions (4) NW Offered: jointly with ESRM 328.

FISH 330 Climate Change Impacts on Marine Ecosystems (5) NW Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton’s Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with ENVIR 330; Sp.

FISH 340 Genetics and Molecular Ecology (5) NW Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Prerequisite: BIOL 200. Offered: jointly with BIOL 340; A.

FISH 370 Marine Evolutionary Biology (5) NW Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with MARBIO 370/OCEAN 370; Sp.

FISH 404 Diseases of Aquatic Animals (5) NW Overview of communicable and noncommunicable diseases that affect fish and shellfish. Major pathogens of free-ranging as well as captive animals discussed. Students learn to recognize, prevent, and control economically and ecologically important disease syndromes. Offered: Sp, even years.

FISH 406 Parasite Ecology (5) NW Introduces students to disease ecology theory, with emphasis placed on the ecological processes that govern parasite transmission. Topics include parasite diversity, evolution, and taxonomy, distribution, ecology, and physiological effects of parasites on human and wildlife hosts, and parasites as players in food webs. Pre-req: BIOL 180 Prerequisite: BIOL 180; recommended: Offered: A.

FISH 423 Aquatic Invasion Ecology (4) NW Julian D. Olden Explores the patterns, drivers, and consequences of species invasions in freshwater, estuary, and marine ecosystems. Focuses on the science and management needs for preventing,
controlling, and eradicating invasive species. Topics illustrated with cases from the Pacific Northwest and the world. Prerequisite: either BIOL 462 or BIOL 180. Offered: W.

FISH 424 Biology and Culture of Aquatic Organisms (5) NW Explores the concept of sustainability and the interrelationship between environment, aquatic species, and culture of aquatic animal and plant species globally. Current practices, animal biology and health, near-shore ecosystem conservation, water quality, and strategies to improve the sustainability of aquaculture for food production and species conservation. Offered: Sp, odd years.

FISH 427 Tropical Marine Biology (5) NW By examining the biogeography, evolution, and ecology of coral reefs, mangroves, and sea grass beds, provides an integrated overview of tropical-systems biology. Integrates ecological and physiological concepts in order to show how anthropogenic stressors such as increased temperature, pollution, and ocean acidification can impact the resilience of tropical marine ecosystems. Laboratory research project. Prerequisite: either FISH 270/MARBIO 270/OCEAN 270 or BIOL 220; and either FISH 290, FHL 333, or MARBIO 305. Offered: W.

FISH 428 Stream and Watershed Restoration (5) NW Overview of restoration principles and techniques with specific application to freshwater aquatic systems. Develops knowledge and skills to assess ecosystems conditions, identify and prioritize restoration opportunities, and evaluate them from a scientific and economic perspective. Prerequisite: either BIOL 356, ESRM 304, or FISH 312. Offered: Sp, even years.

FISH 437 Fisheries Oceanography (4) Investigates how the environment influences distributions and abundances of marine vertebrate and invertebrate species. Uses studies to understand fish and zooplankton life histories, predict trends in populations, reduce uncertainty in resource management, and to decouple anthropogenic from natural effects on aquatic populations. Offered: W.

FISH 441 Integrative Environmental Physiology (3/5) NW Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Offered: A.

FISH 444 Conservation Genetics (5) NW Advanced genetic concepts and methods related to species' conservation and management. Includes genetic diversity and evolution, small populations and fragmentation, genetic viability, management of wild and captive populations, reintroductions, hatchery-wild interactions and forensics. Labs include molecular techniques. Offered: W.

FISH 447 Watershed Ecology and Management (3) NW G. HOLTGRIEVE Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with ESRM 447; Sp.

FISH 448 Watershed Ecology and Management Lab (2) Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with ESRM 448; Sp.

FISH 450 Salmonid Behavior and Life History (3/5) NW Behavior, ecology, life history, and conservation of salmonid trout, including their distribution, homing migration, reproduction, ecology of juveniles in different freshwater habitats, seaward migration, and the ecological and evolutionary factors affecting them. Offered: A.

FISH 452 Marine Geospatial Information Science (3) NW Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 452; A.

FISH 454 Ecological Modeling (5) NW T. Essington Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual,
population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with Q SCI 454; W.

**FISH 455 Fish and Wildlife Toxicology (3/5) NW**
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with ESRM 457; W.

**FISH 458 Advanced Ecological Modeling: Applying Ecological Models to Manage and Conserve Natural Resources (5) NW Trevor A. Branch** Models of fish and wildlife population abundance, including age-structured models, the interaction between human exploitation and protected areas, calculating extinction risk, and examining the effect of alternative management strategies on natural populations. A core part of the course is fitting models to data using both maximum likelihood and Bayesian approaches, and increasing the programming abilities of students by implementing models in R. Recommended: FISH 454/Q SCI 454; and familiarity with the programming language R. Offered: jointly with Q SCI 454; W.

**FISH 461 Resource Economics for Management and Policy (4) I&S/DIV** Examines how and why resource users make decisions leading to over fishing and pollution. Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies. Prerequisite: either FISH 230/ECON 230, ENVIR 235/ESRM 235/ECON 235, or a 300-level FISH course. Offered: A.

**FISH 464 Arctic Marine Vertebrate Ecology (4) NW** Explores the structure and function of Arctic ecosystems, life history, and adaptations of vertebrates, and how species are affected by climate warming. Emphasizes upper-level trophic interactions, evolutionary drivers, food chains, energy transport paths, and influence of sea ice. Case studies provide background on Arctic conservation and management. Prerequisite: BIOL 180. Offered: W, odd years.

**FISH 473 Limnology (3) NW** Ecology, conservation, and management of inland aquatic ecosystems. Explores interactions among biological, chemical, and physical features of lakes and other aquatic habitats. Prerequisite: BIOL 180. Offered: jointly with BIOL 473; A.

**FISH 474 Limnology Laboratory (2) NW** Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/CEE 463; A.

**FISH 475 Marine Mammalogy (3/5) NW** Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Offered: Sp.

**FISH 477 Seminar in Marine Biology (3) NW** Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/OCEAN 477; W.

**FISH 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW** Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/ENVIR 478.

**FISH 479 Research in Marine Biology (1-15, max. 15)** Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/MARBIO 479/OCEAN 479; AWSpS.

**FISH 480 Human Dimensions of Fishery Management (3) I&S/NW** Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision
making for policy formation in uncertain environments. Offered: jointly with SMEA 480.

FISH 489 Peer Teaching Assistants in Aquatic and Fishery Sciences (1-5, max. 10) Designed to prepare graduate and public school teaching by developing mentoring and communication skills through direct experience. Skills gained through attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab or discussion sections. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

FISH 491 Aquatic Ecological Research in Alaska (12) NW Intensive, full-time research training experience where a team of students works on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Examines behavioral ecology, limnology, and population dynamics. Students also choose specific research questions for their own exploration. Course location: Alaska. Offered: S, even years.

FISH 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FHL 492/MARBIO 492; S.

FISH 493 Capstone 1: Proposal (1) Includes defining a capstone research question, conducting a literature review, preparing a project proposal and budget, reviewing peer proposals, and attending/critiquing the quarterly capstone symposium. Prerequisite: FISH 290. Offered: AWSp.

FISH 494 Capstone 2: Research (3-) Self-directed research or project under direction of a faculty member. Includes defining research question, determining methodology, data collection and analysis. Required for graduation for majors. Prerequisite: FISH 290; FISH 493; Q SCI 381. Offered: AWSpS.

FISH 495 Capstone 3: Research Synthesis (-3) Self-directed research project under direction of a faculty member. Data analysis, writing a paper, and presenting findings. Required for graduation for majors. Pre-requisite: FISH 494. Prerequisite: FISH 494 Offered: AWSpS.

FISH 496 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

FISH 497 Special Topics in Aquatic and Fishery Sciences (1-15, max. 15) NW One-time offerings of topics in fisheries by resident or visiting faculty.

FISH 498 Internship/Experiential Learning (1-15, max. 15) Structured, practical training in the fishing industry, government agencies, and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Credit/no-credit only. Offered: AWSpS.

FISH 499 Undergraduate Research (1-15, max. 15) Individual research within the School of Aquatic and Fishery Sciences. Each project supervised by an individual faculty member. Written reports required. Offered: AWSpS.

FISH 502 Marine Geospatial Information Science (3) Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 502; A.

FISH 503 Marine Geospatial Information Science (3) Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 502; A.

FISH 507 Special Topics in Fisheries (1-15, max. 15)

FISH 510 Current Topics in Genetics and Physiology (1-5, max. 15) Contemporary problems and issues in genetics and physiology as they relate to aquatic and fisheries sciences.

FISH 511 Current Topics in Evolution, Ecology, and Behavior (1-5, max. 15) Contemporary problems and issues in evolution, ecology, and behavior as they relate to aquatic and fisheries sciences.

FISH 512 Current Topics in Quantitative Science (1-5, max. 15) Contemporary problems and issues in
quantitative science as they relate to aquatic and fisheries sciences.

**FISH 513 Current Topics in Management, Conservation, and Restoration (1-5, max. 15)**
Contemporary problems and issues in management, conservation, and restoration as they relate to aquatic and fisheries sciences.

**FISH 514 Current Topics Aquaculture, Utilization, and Pathology (1-5, max. 15)**
Contemporary problems and issues in aquaculture, utilization, and pathology as they relate to aquatic and fisheries sciences.

**FISH 520 Advanced Ecology of Marine Fishes (4)**
Focuses on the unique ecological challenges facing marine fishes, including individual, population, community, and ecosystem-scale processes. In-depth discussions of issues based on extensive reading of primary literature and analysis.

**FISH 521 Research Proposal Writing for Graduate Students (4)**
Practice in reading, writing, critiquing, and evaluating research grant and contract proposals. Lecture and discussion of funding resources, structure of proposals, proposal review, evaluation criteria, and agency feedback. Examples of successful and unsuccessful grant applications. Preparing proposals and critiquing others' efforts. Offered: W.

**FISH 522 Hot Topics in Aquatic and Fishery Sciences (2)**
Discussion of the primary literature of aquatic and fishery sciences. All readings are current, high profile papers which spark a new avenue of investigation, set out a new paradigm, or define a central problem, etc. Credit/no-credit only. Offered: A.

**FISH 526 Ecology of Aquatic Ecosystems (3)**
Explores natural and human-driven processes regulating the structure and functioning of freshwater and marine ecosystems. Topics include biogeochemistry, energy, and material flows among habitats, evolution in ecological time, commonality of marine and freshwater habitats, and the issues of scale in understanding ecosystem dynamics.

**FISH 530 Application of Bioenergetics Models to Aquatic Food Webs (4)**
Modeling framework quantifying bioenergetics, including consumption, growth, nutrient recycling and contaminant bioaccumulation; links physiology and behavior of individual organisms to ecological processes within populations and aquatic food webs. Common applications include estimating predation, carrying capacity, or growth potential in different habitats. Offered: Sp, odd years.

**FISH 531 Aquatic Food Web Processes (4)**
Examines how temporal-spatial variability in environmental conditions, nutrient, food supply, predation, and competition among species and life stages regulate species in freshwater and marine food webs. Demonstrates how behavior and physiology of individuals are mechanically linked to distribution, trophic interactions, and processes relevant to ecosystem-based management. Offered: Sp, even years.

**FISH 538 Fisheries Acoustics (3-5) Horne**
Studies the use of sound as an aquatic sampling tool and application of acoustic technologies to resource management and aquatic research. Topics include: sonar equation, survey design, equipment use, and abundance estimates. Uses case studies in bio-acoustic predation, habit evaluation, ocean observatories, and marine renewable energy. Offered: A.

**FISH 539 U.S. Fisheries Management and Policy (3)**
Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips. Offered: jointly with SMEA 539.

**FISH 541 Integrative Environmental Physiology (3/5)**
Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Includes lecture, laboratory work, and team-based research project.

**FISH 545 Applied Population Genetics (3)**
Collection, analysis, and interpretation of genetic data (allele frequencies, microsatellite data, DNA sequences) for detection of population structure, population assignment, estimation of population size, and phylogenography. Includes discussion of scientific papers and analysis of example data sets.
FISH 546 Bioinformatics for Environmental Sciences (3) Examines how to incorporate molecular information into environmental and conservation sciences, with an emphasis on analysis of DNA and RNA sequence information. Prerequisite: introductory biology, genetics, and statistics courses.

FISH 547 River Ecology and Watershed Management (3) Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of flowing aquatic ecosystems and the riparian zone. Case studies explore human interactions with rivers and approaches to river management.

FISH 552 Introduction to R Programming for Natural Scientists (2) Introduces R, a freely available and widely used platform for statistical analysis. Covers reading, storing, and manipulating data; introductory graphics; basic statistical analyses; and fitting linear models. Credit/no-credit only. Offered: A.

FISH 553 Advanced R Programming for Natural Scientists (2) Covers the use of maximum likelihood estimation and programming in R. Uses R functions to estimate parameters of models and to quantify uncertainty. Prerequisite: FISH 552; Q SCI 381 or Q SCI 482, or permission of instructor. Credit/no-credit only. Offered: A.

FISH 554 Beautiful Graphics in R (2) Branch Explores how to create beautiful scientific graphics in the open-source language R. Covers the theory of visualization, critically examines elements of good and bad graphics, and teaches students how to translate data in their graduate theses into publication-quality graphics. Offered: W.

FISH 555 Age-Structured Models in Fisheries Stock Assessment (4) Ray W Hilborn Age-structured models as the basis for many stock assessments of commercially important species. Parameter estimation, analysis of uncertainty, and evaluation of alternative harvest strategies for such models constitute the core of most fisheries population dynamics. Prepares students to participate in stock assessments as conducted by NMFS and other agencies. Prerequisite: either FISH 454, FISH 458, or permission of instructor; recommended: FISH 458 or familiarity with stock assessment models, maximum likelihood estimation. Offered: Sp, odd years.

FISH 556 Spatio-temporal Models for Ecologists (5) Applied skills for the understanding, interpretation, and development of new models for spatial patterns in marine, terrestrial, or human communities. Mixed-effects models will be implemented using flexible techniques in R. Statistical properties will be learned using simulation experiments, real-world data, and a class project. Prerequisite: FISH 552 and FISH 553; and either FISH 454, FISH 458, ESRM 451/Q SCI 451, FISH 558, FISH 559, SEFS 590, STAT 516 and STAT 517, or permission of instructor; recommended: Knowledge of the R programming language Knowledge of likelihood-based statistics. Intermediate background in statistical analysis. Offered: Sp, even years.

FISH 557 Estimation of Population Parameters (4) Statistical analysis of population data; design and analysis of mark-recapture experiments on natural populations; laboratory work on computers. Offered: W, even years.

FISH 558 Decision Analysis in Natural Resource Management (4) Focuses on age and size-structured population models; Bayesian methods; Sample Importance Resample algorithm; Markov chain Monte Carlo algorithm; policy evaluation; and risk analysis and uncertainty in fisheries management. Offered: A, odd years.

FISH 559 Numerical Computing for the Natural Resources (5) Focuses on generalized linear and mixed effects models; numerical integration and differentiation; Bayesian and maximum likelihood parameter estimation; root finding; ADMB and WinBUGS coding; and risk analysis. Offered: A, even years.

FISH 560 Applied Multivariate Statistics for Ecologists (4) Use and interpretation of multivariate analysis, including the majority of approaches in common use by ecologists. Emphasizes the conceptual understanding and practical use of the methods, illustrated with ecological case studies. Prerequisite: Q SCI 482 or equivalent.

FISH 561 Resource Economics for Management and Policy (4) Examines how and why resource users make decisions leading to over fishing and pollution.
Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies. Offered: A.

FISH 562 Ecosystem Based Fisheries Management (2) Theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Offered: Sp, odd years.

FISH 563 Ecosystem Based Fisheries Management Laboratory (2) Laboratory covering the theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Recommended: either Fish 454, Fish 458, or Fish 558; R programming experience. Offered: Sp, odd years.

FISH 567 Topics in Advanced Ecology (3, max. 6) Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/SEFS 567; W.

FISH 578 Graduate Topics in Sustainable Fisheries (2, max. 6) Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Post-seminar discussion section led by speaker on topics covered in lecture. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Credit/no-credit only.

FISH 581 Case Study Research: Design and Methods (3) Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analysis, and report data. Offered: jointly with SMEA 581.

FISH 600 Independent Study or Research (*) Credit/no-credit only.

FISH 700 Master’s Thesis (*) Credit/no-credit only.

FISH 800 Doctoral Dissertation (*) Credit/no-credit only.

ATMOSPHERIC SCIENCES

ATM S 100 Climate, Justice, and Energy Solutions (5) NW/I&S, DIV Dargan M Frierson Presents visions of the future when the climate crisis is solved. Describes paths towards reaching these goals. Solutions include building a resilient society with clean energy, sustainable agriculture, climate justice, and a just transition for workers.

ATM S 101 Weather (5) NW The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena. Intended for nonmajors. Offered: AWSpS.

ATM S 103 Hurricanes and Thunderstorms: Their Science and Impact (3) NW/I&S Explores the science, history, and impacts of thunderstorms and hurricanes. Includes basic processes responsible for thunderstorms and hurricanes and for the lightning, hail, high winds, and storm surges that accompany them. Presents significant historical examples, along with the impact on human activities, strategies for personal safety, and societal adaptation. Offered: Sp.

ATM S 111 Global Warming: Understanding the Issues (5) I&S/NW Kat Huybers, Dargan M Frierson Presents a broad overview of the science of global warming. Includes the causes, evidence, and societal and environmental impacts from the last century. Recounts future climate projections and societal decisions that influence greenhouse gas emission scenarios and our ability to adapt to climate change. Presents ways to identify disinformation versus correct science. Offered: AWSpS.

ATM S 211 Climate and Climate Change (5) NW/I&S The nature of the global climate system. Factors influencing climate including interactions among the

ATM S 212 Air Pollution: From Urban Smog to the Ozone Hole (5) I&S/NW Alexander, Jaegle', Thornton
Introduction to air pollution on local, regional, and global scales, with focus on the sources, transformation, and dispersion of pollutants responsible for urban smog, acid rain, climate change, and the ozone hole. Health and environmental effects of air pollutants, technological solutions, and international policy regulations.

ATM S 220 Exploring the Atmospheric Sciences (1, max. 2) NW Focuses on current research in the atmospheric sciences and the related implications for public health, business, and environmental policy. Credit/no-credit only.

ATM S 290 The Weather Challenge (1, max. 8) NW McMurdie Includes participation in a national weather forecast contest; weekly discussion on forecast models, forecasting methods, and unique considerations for specific forecast locations. Prerequisite: either ATM S 101 or ATM S 301. Credit/no-credit only. Offered: AW.

ATM S 301 Introduction to Atmospheric Sciences (5) NW Composition and structure of the atmosphere. Clouds and weather phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors. Prerequisite: minimum grade of 2.0 in each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; and PHYS 123. Offered: A.

ATM S 312 The Science of Climate (3) NW Evolution and present state of earth's climate. Emphasis on physical processes determining the climate of the earth's atmosphere and surface: radiative transfer, energy balance, hydrologic cycle, and atmospheric and oceanic energy transport. Factors controlling climate change. Prerequisite: minimum of grade of 2.0 each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; and PHYS 123. Offered: Sp.

ATM S 340 Introduction to Thermodynamics and Cloud Processes (3) NW Examines thermodynamics and hydrostatics. Studies cloud and precipitation processes with emphasis on the microphysics. Prerequisite: ATM S 301. Offered: W.

ATM S 341 Atmospheric Radiative Transfer (3) Comprehensive introduction to atmospheric radiation, including solar and infrared radiation, the earth's radiation budget, and remote sensing. Prerequisite: ATM S 301. Offered: Sp.

ATM S 350 Ecological Climatology (3) NW Focuses on the connections between ecosystems and climate including physical, chemical and biological interactions. Investigates global scale implications and the expected response of a coupled earth system under past and future climate change. Recommended: MATH 120 or equivalent; and either PHYS 114; PHYS 115; PHYS 116, or PHYS 121; PHYS 122; PHYS 123. Offered: A.

ATM S 358 Fundamentals of Atmospheric Chemistry (3) NW Review of basic principles of physical chemistry; evolution and chemical composition of earth's atmosphere; half-life, residence and renewal time; sources, transformation, transport and sinks of gases in the troposphere; atmospheric aerosols; chemical cycles; air pollution; stratospheric chemistry. Offered: Sp.

ATM S 361 Meteorology and the Media: Broadcast and Online Weather Communication (3, max. 6) I&S Students practice presenting with a green chroma-key screen and camera, and write a daily weather blog for publication. Discusses the history and future of media-driven meteorology. Invited speakers present, and students take field trips to a local television station and the National Weather Service. Prerequisite: ATM S 101 or ATM S 301.

ATM S 370 Atmospheric Structure and Analysis (5) NW Structure and evolution of extratropical cyclones, fronts, and convective systems. Surface and upper air analysis techniques. Radar and satellite data. Real-world applications of basic dynamical principles. Introduction to operational products and forecasting. Prerequisite: ATM S 301. Offered: W.

ATM S 380 Weather and Climate Prediction (3) NW Applies weather and climate models to solve problems in atmospheric sciences. Includes visualization of atmospheric phenomena and Earth's energy and hydrologic cycles; and basics in
numerical modeling and high-performance computing. Prerequisite: MATH 126; PHYS 122; either ATMS 101, ATM S 111, ATM S 211, ATM S 301, ASTR 150, ASTR 321, or ESS 201. Offered: W.

ATM S 390 Honors Tutorial in Atmospheric Sciences (*, max. 6) Review and discussion of selected problems in atmospheric sciences. Introduction to research methods. Presentation of a research paper. Offered: AWSpS.

ATM S 431 Boundary-Layer Meteorology (3) NW Introduction to boundary-layer meteorology. Surface energy budgets, structure and evolution of boundary layers, and basic ideas of turbulence theory. Prerequisite: either ATM S 340 or PHYS 224. Offered: A.

ATM S 441 Atmospheric Motions I (3) NW Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Prerequisite: either AMATH 353 or MATH 309; MATH 324. Offered: A.

ATM S 442 Atmospheric Motions II (5) NW Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: ATM S 441. Offered: W.

ATM S 444 Design and Application of Ensemble Prediction Systems (4) NW Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making. Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381; AMATH 301. Offered: Sp.

ATM S 451 Instruments and Observations (5) NW Principles of operating instruments for measuring important atmospheric parameters (e.g., temperature, humidity, aerosol concentration). Concepts of sensitivity, accuracy, representativeness, time response. Manipulation of output data including signal processing and statistical analysis. Experimental design and implementation of the design in actual field experiments is included. Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381.

ATM S 458 Air Pollution Chemistry (4) NW Global atmosphere as a chemical system emphasizing physical factors and chemical processes that give rise to elevated surface ozone, particulate matter, and air toxics; international issues of air pollution transport and changing tropospheric background composition; and regulatory control strategies and challenges. Aimed at science and engineering majors. Offered: jointly with CHEM 458; A.

ATM S 475 Current Research in Climate Science Seminar (3, max. 6) Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ESS 475/OCEAN 475; A.

ATM S 480 Air-Quality Modeling (3) NW Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with CEE 480; W.

ATM S 487 Fundamentals of Climate Change (3) Examines Earth’s climate system; distribution of temperature, precipitation, wind, ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Prerequisite: ATM S 321.

ATM S 490 Current Weather Analysis (1, max. 6) NW Reviews and analyzes current weather situations
and forecasts. Promotes active discussion between the leader and attendees, and provides exposure to practical aspects of forecasting, the structure of synoptic and local weather phenomena, and applications of basic meteorological concepts. Credit/no-credit only. Offered: AWSp.

ATM S 492 Readings in Meteorology or Climatology (*, max. 15) Credit/no-credit only. Offered: AWSpS.

ATM S 495 EarthGames Studio (2-6, max. 15) D. FRIERSON Students will work in teams to create their own video games or interactive digital experience relating to climate change or other pressing environmental issues. Credit/no-credit only. Offered: AWSpS.

ATM S 497 Undergraduate Internship (1-5, max. 30) Internship experience with a public agency or private company, supervised and approved by a faculty member. Requires preparation of a professional report reflecting on the experience. Credit/no-credit only. Offered: AWSpS.

ATM S 498 Honors Synthesis and Communication (1-5, max. 6) Students synthesize prior knowledge and experience gained through hands-on, applied work with academic research or off campus internship experience under the guidance of a faculty advisor. Students refine their writing skills and practice their presentation skills by conveying information orally and visually by making a formal presentation. Prerequisite: ATM S 497 or ATM S 499; recommended: internship or research experience. Offered: Sp.

ATM S 499 Undergraduate Independent Research (1-5, max. 30) Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or surveys. Credit/no-credit only. Offered: AWSpS.

ATM S 503 Atmospheric Motions I (3) Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Offered: A.

ATM S 504 Atmospheric Motions II (5) Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Prerequisite: either ATM S 441 or ATM S 503. Offered: W.

ATM S 505 Introduction to Fluid Dynamics (4) Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin’s theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/OCEAN 511; A, odd years.

ATM S 508 Geochemical Cycles (4) Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523/OCEAN 523.

ATM S 510 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ESS 531.

ATM S 512 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ESS 533.

ATM S 519 Scientific Writing and Graphics (2) Waddington, Warren Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ESS 519/OCEAN 518; Sp, odd years.

ATM S 520 Atmospheric Sciences Colloquium (1, max. 24) Seminars on current research in advanced topics related to atmospheric sciences, conducted by faculty and visiting professors/scientists. Includes presentation of doctoral dissertations by department graduate students. For Atmospheric Sciences graduate students only. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSp.

ATM S 521 Seminar in Atmospheric and Climate Dynamics (*, max. 24) Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

ATM S 523 Seminar in Atmospheric Physics and Chemistry (*, max. 24) Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

ATM S 524 Seminar in Climate Dynamics and Energy Transfer (*, max. 24) Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AW.

ATM S 525 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6) Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with CEWA 553.

ATM S 532 Atmospheric Radiation: Introductory (3) Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: Sp.

ATM S 533 Atmospheric Radiation: Advanced (3) Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor.

ATM S 534 Remote Sensing of the Atmosphere and Climate System (3) Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to research. Prerequisite: ATM S 532 or ATM S 533.

ATM S 535 Cloud Microphysics and Dynamics (3) Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ESS 573; Sp.

ATM S 536 Mesoscale Storm Structure and Dynamics (3) Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud
models. Prerequisite: either ATM S 535, ATM S 504, or ATM S 509.

**ATM S 542 Synoptic and Mesoscale Dynamics (3)**
Quasi-geostrophic theory, baroclinic instability, symmetric instability, tropical disturbances, frontogenesis, orographic disturbances, convective storms. Prerequisite: ATM S 509/OCEAN 512 and AMATH 402 or equivalents. Offered: Sp.

**ATM S 544 Design and Application of Ensemble Prediction Systems (4)**
Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making. Prerequisite: ATM S 501; ATM S 502; and ATM S 552 or permission of instructor. Offered: Sp.

**ATM S 545 General Circulation of Atmosphere (3)**
Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied. Prerequisite: ATM S 509/OCEAN 512 or permission of instructor. Offered: A.

**ATM S 547 Boundary Layer Meteorology (3)**

**ATM S 551 Atmospheric Structure and Analysis I: Synoptic Scale Systems (4)**

**ATM S 552 Objective Analysis (3)**
Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, and optimum interpolation techniques. Offered: W.

**ATM S 554 Paleoclimate Proxies (3)**
Alexander, Sachs Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ESS 554/OCEAN 554.

**ATM S 555 Planetary Atmospheres (3)**
Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ESS 581.

**ATM S 556 Planetary-Scale Dynamics (3)**
Zonally symmetric circulations, planetary waves, equatorial waves, dynamics of the middle atmosphere, trace constituent transport, nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or permission of instructor.

**ATM S 558 Atmospheric Chemistry (3)**
Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: ATM S 458 or ATM S 501 or CHEM 457 or permission of instructor. Offered: Sp.

**ATM S 559 Climate Modeling (3)**

**ATM S 560 Atmosphere/Ocean Interactions (3)**
Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: OCEAN 512/ATM S 509 Offered: jointly with OCEAN 560.
ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3) Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanics, optics, and physical chemistry of atmospheric aerosols. Brownian motion, sedimentation, impaction, condensation, and hydroscopic growth. Prerequisite: permission of instructor.

ATM S 565 Atmospheric Chemistry Modeling (3) In this course we will discuss the foundations of mathematical models for atmospheric chemistry. Our focus will be on three-dimensional numerical models that simulate transport, chemistry, emissions, and deposition of chemical species in the atmosphere. Prerequisite: ATM S 558.

ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3) Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Prerequisite: ATM S 509/OCEAN 512, ATM S 542.

ATM S 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ENVIR 585/ESS 585/SMEA 585; Sp.

ATM S 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ESS 586/OCEAN 586.

ATM S 587 Fundamentals of Climate Change (3) Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ESS 587/OCEAN 587.

ATM S 588 The Global Carbon Cycle and Climate (3) Emerson Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ESS 588/OCEAN 588; W.

ATM S 591 Special Topics (1-4, max. 9) Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

ATM S 593 Climate Science Seminar (1) Mote
Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ESS 593/OCEAN 593; W.

ATM S 596 Climate Science Capstone Project ([1-5], max. 5) Mote
Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ESS 596/OCEAN 596; AWSpS.

ATM S 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

COLLEGE OF THE ENVIRONMENT
SPECIAL PROGRAMS

C ENV 190 Introductory Topics in Environment (1-5, max. 15) Covers topics related to all areas of the environment.

C ENV 401 FieldNotes - An Undergraduate Journal (2, max. 6) Julian D. Olden FieldNotes, an undergraduate journal connecting UW with the greater Puget Sound community, highlights student-led environmental research and outreach. FieldNotes, publishes two issues annually, features research communications, community features, and vivid imagery to ensure multi-faceted storytelling. Provides a platform for students to actively learn and engage in science communication. Credit/no-credit only. Offered: ASp.

C ENV 410 MESA Introductory Tutor Training Workshop (1) Tutor skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: ASp.

C ENV 420 MESA Introductory Tutor Training Seminar (1-2) Second course in the tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: AW.

C ENV 425 MESA Tutoring Practicum (1-3, max. 15) Trained MESA tutors work in small groups with Seattle middle and high school students in math and science. Develop tutoring skills, share best practices, and problem solve through online interactions with the MESA tutoring program. Credit/no-credit only. Offered: AWSp.

C ENV 430 MESA Advanced Tutor Training Seminar (1-2) Advanced tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: A.

C ENV 490 Special Topics in Environment (1-5, max. 15) Covers topics related to all areas of the environment depending on curricular needs and interests of students and faculty.

C ENV 500 Communicating Science to the Public Effectively (3) Teaches emerging scientists how to effectively communicate their research to the public. Uses lessons and tools such as group discussion, feedback, and practice. Credit/no-credit only. Offered: W.

C ENV 590 Special Topics in Environment (1-5, max. 15) Covers topics related to all areas of the environment depending on curricular needs and interests of students and faculty.
SCIENCE TEACHING

SCI T 501 Observational Science and Experimental Design for Teachers (2) Students consider the nature of scientific exploration; practice using observations, evidence, and explanation to make hypotheses; and explore case studies demonstrating various experimental designs. Combines on-line activities, readings, hands-on activities, presentations, and discussions. Offered: A.

SCI T 502 Data Analysis and Visualization for Teachers (2) Students gain experience analyzing and visualizing data sets, evaluate the use of common data visualization tools, and create graphs of their own data sets. Combines on-line activities, readings, hands-on activities, presentations, and discussions. Offered: W.

SCI T 503 Science Communication for Teachers (2) Students examine effective communication of scientific research. Students critically evaluate example presentation from on-campus departmental seminars, practice communicating their own scientific research to mentors and peers, and deliver a formal oral presentation. Offered: Sp.

EARTH AND SPACE SCIENCES

ESS 100 Dinosaurs (2) NW Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.

ESS 101 Introduction to Geology and Societal Impacts (5) I&S/NW Introduction to the processes, materials and structures that shape Earth. Emphasizes the dynamic nature of the earth's tectonic system and its relationship to physical features, volcanism, earthquakes, minerals and rocks and geologic structures. The course emphasizes the intrinsic relationship between human societies and geologic processes, hazards and resources. Not open for credit to students who have taken ESS 210. Optional field trips. Prerequisite: No prerequisite classes required. Offered: AWSpS.

ESS 102 Space and Space Travel (5) I&S/NW Explores the sun, solar storms, observations from space and from Earth; Earth's space environment, radiation belts and hazards, plasma storms and auroras, rockets and propulsion, human exploration efforts, societal impact, planetary systems and resources, and project highlighting space and its exploration. Open to non-majors. Offered: AWSp.

ESS 103 Earth's Origin and Transformations Over 4.6 Billion Years (1) NW Explores history and evolution of Earth, from the Big Bang to present day. Emphasizes disparate timescales over which Earth processes operate - planetary formation, plate tectonics, evolution of life, geologic climate change, and catastrophes such as earthquakes, volcanoes, meteor impacts, and mass extinctions. Sets stage for understanding the origins of extraordinary geologic features in the Pacific Northwest. Credit/no-credit only.

ESS 104 Prehistoric Life (3) NW Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life unfolded and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geobiology courses.

ESS 105 The Earth: Its Processes and Hazards (5) NW Introduction to physical and environmental geology. Focuses on both large-scale tectonic forces that create Earth's continents and oceans, and surficial forces that shape Earth's landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods). Not open for credit to students who have taken ESS 101.

ESS 106 Living with Volcanoes (3) I&S/NW Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.

majors. Offered: jointly with ASTBIO 115/ASTR 115/BIOL 114/OCEAN 115.

**ESS 119 Introduction to Laboratories (1, max. 3)**
Reviews research being performed in visited and independent research opportunities and possibilities. Includes weekly visits to labs in ESS and related fields. Credit/no-credit only.

**ESS 201 Earth’s Climate System (3) NW Eric Steig**
Earth’s dynamic environment, global energy balance, interplay of chemical, physical, and biological processes shaping the Earth’s surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 134, or Q SCI 291; recommended: An introductory background in earth sciences, chemistry or physics is helpful, but not required. Offered: Sp.

**ESS 202 Earthquakes (5) I&S/NW**
Earthquakes of the Pacific Northwest and around the world - their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape, hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors.

**ESS 203 Glaciers and Global Change (5) I&S/NW**
Explores how glaciers record climate change and human activities through bubbles of ancient air and trace impurities in the ice. Also reviews glaciers impact on societies through sea-level, coastlines, water supplies, and transportation routes. Open to non-science majors.

**ESS 204 The Paleobiology and Geobiology of Mass Extinctions (3-4) NW P. Ward**
Covers the origin and diversification of life on Planet Earth, and abrupt die-offs in mass extinctions. Explores how new instrumentation and experimentation in biology and chemistry, and improved sampling of the fossil record in geology, combine with astrobiology and geobiology to revise out history of Earth and its life. Prerequisite: a minimum grade of 1.7 in ESS 100.

**ESS 205 Access to Space (5) NW**
Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of exploration packages; basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all disciplines. No previous experience of electronics required.

**ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW**
Miscellaneous field-based and experiential learning activities in earth and space sciences.

**ESS 211 Physical Processes of the Earth (5) NW**
Introductory structural geology and geomorphology. Deformation of soil, sediment, and rock. Erosional and depositional processes and landforms. Structural, geomorphic, and climatic interactions in major tectonic regimes. Use of geologic maps and cross sections. One optional overnight field excursion. Prerequisite: a minimum grade of 2.0 in either MATH 124, MATH 134, or Q SCI 291, either of which may be taken concurrently; and a minimum grade of 2.0 in either both PHYS 114 and PHYS 117, or PHYS 121. Offered: A.

**ESS 212 Plate Tectonics and Materials of the Earth (5) NW Juliet Crider**
Origin, composition and structure of the Earth; identification of important rock-forming minerals; identification and description of igneous, metamorphic, and sedimentary rocks; magmatic, metamorphic, and sedimentary processes; formation of continental and oceanic crust; driving mechanisms for plate tectonics; comparison of Earth to other planets. Prerequisite: either CHEM 110, a passing score on the General Chemistry Placement Exam, or a score of 1 or higher on the Chemistry AP test; recommended: high school or college chemistry; and high school or college pre-calculus. Offered: W.

**ESS 213 Evolution of the Earth (5) NW**
Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth's crust, seawater, and atmosphere. Comparison with other planets. Climate changes and man as a geologic agent. Two one-day field excursions. Prerequisite: a minimum grade of 2.0 in either ESS 210, ESS 211, or ESS 212. Offered: Sp.

**ESS 230 Rivers and Beaches (3/5) NW**
Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Field trips examine mountains,
rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.

ESS 290 Special Topics (1-10, max. 20) NW Selected topics in earth and space sciences.

ESS 298 Exploring Opportunities in Earth and Space Sciences (2) Explores topics related to majoring in and pursuing a career in STEM broadly and ESS specifically. Topics include networking, finding community in college, societal attitudes toward and pressures around STEM majors, diversity and equity issues in STEM and ESS, mental health, and undergraduate research, graduate school, and careers in the geosciences and related fields. Credit/no-credit only.

ESS 301 Geology of the Northwest (5) NW Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, or ESS 212.

ESS 305 Geology of the National Parks (5) NW Reviews a wide range of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes plate-tectonic history, volcanism, mountain-building, and glacial, fluvial, and a host of other geomorphic forces as preserved in geologic exposures of National Parks. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, or ESS 212.

ESS 306 Planetary Geology (5) NW Up-to-date survey of geological features and processes on and within planets and their moons deduced from sampling, remote sensing, spacecraft imagery, and theory. Comparative discussion of spacecraft imagery, tectonics, surface processes, and thermal evolution. Examination of moon rocks and meteorites. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, or ESS 212.

ESS 307 Diversity Outreach Program in Earth and Space Sciences (3-5) I&S/NW, DIV Students will lead Earth and Space Sciences outreach events to underserved and underrepresented populations in the Northwest. Gain an understanding to the barriers to education and participate in events to remove some of these barriers. Prerequisite: either ASTR 101, ASTR 102, ASTR 150, BIOL 180, BIOL 240, CHEM 120, CHEM 142, CHEM 143, CHEM 145, ESS 101, ESS 102, ESS 211, ESS 212, ESS 213, ESS 472, PHYS 114, or PHYS 121.

ESS 310 Mathematical Methods in the Earth Sciences (5) NW Presents mathematical methods for Earth Sciences applications. Focuses on setting up equations and on the quality of written solutions. Prerequisite: either Q SCI 292, MATH 125 or MATH 135; either PHYS 114/PHYS 117 or PHYS 121.

ESS 311 Geomechanics (5) NW Introduction to continuum mechanics: elasticity, fluid dynamics, diffusion, porous flow, multiphase flow, dimensional analysis, and natural convection. Example applications: earthquakes and rock mechanics, flow of glaciers, slope stability, debris flows, groundwater flow, contaminant transport, flow in rivers and channels, mantle and magma convection. Prerequisite: a minimum grade of 2.0 in either MATH 125, MATH 135, or Q SCI 292; a minimum grade of 2.0 in either both PHYS 114 and 117, or PHYS 121; and a minimum grade of 2.0 in ESS 211; recommended: Previous experience with MATLAB. Offered: W.

ESS 312 Earth Materials (5) NW Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. One one-day field excursion. Prerequisite: a minimum grade of 2.0 in either CHEM 142 or CHEM 145; and a minimum grade of 2.0 in ESS 212; recommended: ESS 211 and ESS 213. Offered: Sp.

ESS 313 Geobiology (5) NW Introduction to the early record of life on earth. Environmental factors leading to life's diversification. The role of life in biomineralization. The history of biodiversity. The role of life in landform and soil formation. Laboratory exercises demonstrate specimens and techniques. Prerequisite: minimum 2.0 in either CHEM 142 or CHEM 145; minimum 2.0 in ESS 213. Offered: A.

ESS 314 Geophysics (5) NW Introduction to geophysical methods including refraction and
reflection seismology, gravity, magnetics, electrical resistivity, heat flow, and geodesy. Laboratory exercises explore interpretation of geophysical data to determine elastic wave speed, density, magnetic susceptibility, and electrical conductivity at depth. Prerequisite: a minimum grade of 2.0 in either MATH 126, MATH 136, or ESS 310; and a minimum grade of 2.0 in either both PHYS 115 and PHYS 118, or PHYS 122. Offered: A.

ESS 315 Environmental Earth Science (5) NW
Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, or ESS 212. Offered: jointly with ENVIR 313.

ESS 316 Geochemistry (5) NW
Geophysical processes and differentiation of the Earth. Crystal chemistry and elemental affinities, thermodynamics of geologic processes, trace element and isotopic fractionation, radioisotopes, geochronology, cosmochemistry, weathering, introductory aqueous geochemistry and exploration of global geochemical cycles. Laboratory exercises explore and model geochemical processes. Prerequisite: a minimum grade of 2.0 in either CHEM 142 or CHEM 145; a minimum grade of 2.0 in either MATH 125, MATH 135, or Q SCI 292; and a minimum grade of 2.0 in ESS 212. Offered: Sp.

ESS 326 Geomorphology (5) NW
Introduction to landforms and surficial deposits. Emphasis on landscape-forming processes. Intended for students who wish to take additional courses in geomorphology. Prerequisite: either PHYS 114 or PHYS 121.

ESS 345 The Environment of Fuel and Mineral Deposits (3) NW/I&S
Fuels and nonmetallic ores as the substrate of industrial civilization. Provides non-majors with sufficient information about these resources to allow for informed decisions of related geological, environmental, and societal issues. Prerequisite: either ESS 210, ESS 211, or ESS 212.

ESS 400 Field Geology (12) NW
Six weeks of geologic mapping in a variety of rock types in the Western United States. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, and report writing. Students responsible for own living expenses while in the field. Prerequisite: ESS 211; ESS 212; ESS 213; one course selected from ESS 311, ESS 312, ESS 313, ESS 314, or ESS 316. Offered: S.

ESS 401 Field Geology with GIS (12) NW
Geologic mapping in a variety of rock types in the Western United States coupled with and augmented through geospatial analyses. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, GIS/remote sensing analysis, and report writing. Students responsible for own living expenses while in the field. Prerequisite: ESS 211; ESS 212; ESS 213; ESS 420; and either ESS 311, ESS 312, ESS 313, ESS 314, or ESS 316. Offered: S.

ESS 402 International Field Geology (3-12, max. 12)
Supervised field study, international travel, and exploration. Work may include independent research projects and experiential learning in outdoor environments. Prerequisite: No prerequisites required but related experience is encouraged.

ESS 403 Global Tectonics (5) NW
Introduction to large-scale plate tectonics processes and observations including motions on a sphere, polar-wander paths, plate-boundary seismicity, focal mechanisms, gravity, magnetics, and heat flow. Also includes observations and theories of plate deformation and continental dynamics with emphasis on Western North America. Prerequisite: PHYS 121; recommended: either MATH 126, MATH 136, or ESS 310; PHYS 123; either ESS 311 or 314; a background in quantitative analysis using a computer based environment like MATLAB.

ESS 408 Great Geological Issues (3) NW
History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences.

ESS 410 Marine Geology and Geophysics (4)
William Wilcock Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either OCEAN 310 or ESS 211 Offered: jointly with OCEAN 410; A.
ESS 411 Geophysical Continuum Mechanics (5) NW
Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the Earth’s lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352.

ESS 412 Introduction to Seismology (3) NW
Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; recommended: ESS 411 and PHYS 123.

ESS 414 Geophysics: Fluids (3) NW
Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; and PHYS 322.

ESS 415 Space and Plasmas (3) NW
Survey of various phenomena occurring in outer regions of Earth’s atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321; recommended: PHYS 322.

ESS 418 Geoscience Communication (4)
Covers principles of organizing, developing, and writing geoscience information including abstracts, presentations, scientific articles, correspondences, and proposals. Reviews writing conventions, use of illustrations, style, and tone. Prerequisite: Two of ESS 201, ESS 205, ESS 211, ESS 212, ESS 213, any of which may be taken concurrently.

ESS 420 Introduction to Geographic Information Systems for the Earth Sciences (5) S. WALTERS
Examines principles of GISA applied to the geological sciences. Covers basics of GScience, data types, and GIS analyses. Includes hands-on analysis applied to geologic patterns and phenomena: sources geological data; geological mapping; measures of topography; hydrologic flow patterns; and topics of the students’ own interests. Offered: ASp.

ESS 421 Introduction to Geological Remote Sensing (4) NW

ESS 422 Field Methods in Remote Sensing (4) NW
Explores the use of field instrumentation to remotely sense the environment with applications to landslides, glaciers, surface topography, and change detection. Also covers wave propagation, surface scattering, absorption and reflectance; data processing, analysis, and interpretation; field data collection strategies. Prerequisite: ESS 211; recommended: PHYS 116 or PHYS 123; ESS 421.

ESS 425 Tectonic Geomorphology (3) A. Duvall
Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Prerequisite: either ESS 311, ESS 326, ESS 426, or ESS 427.

ESS 426 Fluvial Geomorphology (5)
Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311 or ESS 326.

ESS 427 Hillslope Geomorphology (5) NW
Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311 or ESS 326.

ESS 431 Principles of Glaciology (4) NW
Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Prerequisite: PHYS 121.

ESS 433 Environmental Change in the Glacial Ages (5) NW
Physical, biological evidence of climatic
change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation.

**ESS 439 Petrology of Igneous Rocks (5) NW**
Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: ESS 316.

**ESS 441 Petrology and Petrography of Sedimentary Rocks (5) NW**
Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: ESS 316.

**ESS 445 Economic Geology (4) NW JOHN O. STONE**
Formation and geologic context of metallic and non-metallic ore deposits and energy resources. Covers chemical and physical concentration processes, deposit types, and geology of key mineral commodities. Includes an overview of mineral and energy economics, mineral exploration and Washington state mineral resources. Prerequisite: ESS 211; ESS 212; ESS 213; and ESS 316, which may be taken concurrently.

**ESS 447 Engineering Geology: Methods and Application (4)**
Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips. Prerequisite: either ESS 210, ESS 211, or ESS 212; and either ESS 311, ESS 411, ESS 463, or CEE 220.

**ESS 448 Analytical Paleobiology (5) NW**
Introduction to the principles and analytical methods in the study of paleobiology, morphology, and systematics. Topics include paleobiogeography, morphology-based phylogenetics, evolutionary rates, biodiversity curves, functional morphology, morphometrics, and paleoecology. Emphasis on application of methods using fossil and modern specimens. Prerequisite: either BIOL 280, BIOL 354, or ESS 213. Offered: jointly with BIOL 438; A.

**ESS 449 Paleobiology Field Methods and Research (3-5) NW**
Introduces field methods and research in various areas of biology, e.g., paleontology, ecology, climate change, and mycology. Includes two or more weeks away from campus at field site. Offered: jointly with BIOL 475; 5.

**ESS 450 Paleobiology (3) NW**
Biological evolution over the past 500 million years, considering how the reciprocal interactions between environment and evolution have influenced the major episodes in life's history and providing a background for assessing the evolutionary impact of modern environmental change.

**ESS 451 Invertebrate Paleontology (5) NW**
Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with BIOL 451.

**ESS 452 Vertebrate Paleontology (5) NW C. SIDOR**
Examines fossil vertebrate life, focusing on systematics and morphology of major lineages (fish, reptiles, bird, and early mammal relatives). Examines fossil and modern vertebrates from the Burke Museum collection in the lab. Weekend field trip. Prerequisite: either BIOL 354, BIOL 452, BIOL 453 or ESS 100. Offered: jointly with BIOL 450.

**ESS 453 Fossil Mammals (5) NW**
Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: either ESS 100 or ESS 452.

**ESS 454 Hydrogeology (4) NW**
Covers the analysis of groundwater flow systems, geologic controls, and hydrologic properties; basics of chemistry and solute transport in groundwater; and the use of numerical models. Considers local examples and groundwater resource management. Prerequisite: either ESS 311 or ESS 314; recommended: either MATH 126, MATH 136, or ESS 310; a background in quantitative analysis using spreadsheets or MATLAB.

**ESS 455 Stratigraphy (4) NW**
Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of
sedimentary basins and continental margins.

Prerequisite: ESS 213.

**ESS 456 Sedimentary Geology and Depositional Environments (4) NW** Alexis Licht Principles of sedimentary geology, including survey of modern processes that produce sedimentary rocks and sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: ESS 213; recommended: ESS 311 and either ESS 326, ESS 425, ESS 426, or ESS 427.

**ESS 457 Environmental Geochemistry (4) NW** Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and groundwater quality. Prerequisite: either ESS 316, CHEM 152, or CHEM 155.

**ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW** Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 311 or ESS 316.

**ESS 461 Geological Time (3) NW** Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radiocarbon dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic isotope techniques. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution.

**ESS 462 Volcanic Processes (4) NW** Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other re-working of deposits. Prerequisite: either ESS 311, ESS 312, or ESS 316.

**ESS 463 Structure and Tectonics (5) NW** Geometry, kinematics, and tectonic setting of major types of structures, including those in contractional fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: ESS 211; ESS 212; and ESS 213.

**ESS 467 Seismic Exploration (3) NW** E. Roland Saenger Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to geologic investigations, tectonics and mineral exploration. Practice in the interpretation of subsurface structure. Prerequisite: ESS 311 or ESS 314, or OCEAN 285 and OCEAN 310. Offered: jointly with OCEAN 412; Sp.

**ESS 471 Introduction to Space Physics (3) NW** Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 123.

**ESS 472 Rockets and Instrumentation (2-4, max. 12)** Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year.

**ESS 475 Current Research in Climate Science Seminar (3, max. 6)** Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/OCEAN 475; A.

**ESS 480 Advanced Methods in Isotope Geochemistry (3, max. 18) NW** Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science.
Prerequisite: either ESS 316, ESS 424, ESS 457, or ESS 459.

ESS 482 Environmental Geochemistry Laboratory (4) NW Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Prerequisite: ESS 316 or ESS 457.

ESS 488 Space Law and Policy (5) I&S Saadia M. Pekkanen Law and policy foundations of outer space activities. Essential origins, sources, and role of space law, as well as key institutions, forums, and forces shaping the contemporary governance of space activities. Provides a thorough grounding in U.N. treaties, principles, resolutions, regulations, and private international and national space laws and policies. Offered: jointly with A A 490/JSIS B 444.

ESS 489 Honors Seminar (3) Covers current scientific topics in earth and space sciences; philosophy and methodology of science strategies for developing research projects; scientific education and career planning. May require colloquium or local conference attendance. Offered: A.

ESS 490 Special Topics (1-10, max. 20) NW

ESS 491 US Geology Seminar and Field Trip (1) Supervised preparation for geological field study and domestic fieldwork. Work may include independent research projects focused on the field study region and experiential learning in outdoor environments. Recommended: introductory geology course. Credit/no-credit only. Offered: W.

ESS 492 Education in the Earth Sciences (2-3, max. 12) NW Seminar in earth science education and laboratory teaching practicum. Teaching experience gained through assisting earth science instructors in college or K-12 classrooms, laboratories, and field settings. Earth science pedagogical logistics, teaching methods, laboratory classroom, and field teaching methods are covered in seminar sessions. Prerequisite: either ESS 101, ESS 210, ESS 211, ESS 212, or ESS 213. Credit/no-credit only. Offered: AWSpS.

ESS 495 NASA Science and Engineering Research Seminar (1, max. 4) NW Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no-credit only.

ESS 498 Independent Study (1-5, max. 15) Independent coursework in selected Earth & Space Sciences topics supervised by a faculty member in an area of shared scholarship. Designed for advanced students seeking additional education in a specific subject. Prerequisite: Permission of instructor.

ESS 499 Undergraduate Research (*) (max. 15)

ESS 501 Geochemical Systems (3) Geochemical systems through time, from solar system origin to present. Explores fundamental geochemical concepts using current research issues and discussion. Concepts include radiogenic and stable isotope systematic, thermodynamics, high and low temperature chemistry of rocks and water, geochemical cycles through Earth's history. Prerequisite: graduate student standing or permission of instructor. Instructors: Nelson

ESS 502 The Solid Earth (3) Concepts of internal earth processes: Earth as heat engine and chemical processor, style of mantle convection, origin and evolution of the Earth’s magnetic field, Cascadia subduction and hazards. Introduces seismology, fluid dynamics, heat flow, gravity, and geomagnetism. Focuses on the analysis, critique, and communication of ideas from scientific literature.

ESS 503 Introduction to Solar Terrestrial Physics (3) Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the Earth. Prerequisite: PHYS 123.

ESS 504 The Earth Surface (3) Investigates the coupled tectonic and geomorphic processes that shape the surface of the Earth, creates the surface environment that sustains humanity and other life systems, and produces natural hazards. Introduces modern tolls, techniques, and theories applicable to analysis of this coupled dynamic system.

ESS 505 The Cryosphere (4) Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice
sheets, sea ice, permafrost, methods of paleoclimate reconstruction, and Ice Age theories. Prerequisite: PHYS 121. Instructors: Waddington, Warren Offered: A.

ESS 508 Great Geological Issues (3) History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite: graduate standing in earth sciences, or in history of science, or permission of instructor.

ESS 509 Applied Geology Investigations (3) Introduction to problems and techniques of applied geology. Studies the interactions among land use, infrastructure, and the dynamic landscape of the Pacific Northwest. Focus on field techniques, recording and presentation of observations. Includes mid-September and weekend field trips. Prerequisite: graduate standing in ESS; recommended: undergraduate degree in geology or a closely related field, including a geologic field methods course. Offered: A.

ESS 510 Field Methods in Applied Geology II (3) Application of applied geology core curriculum to field problems. Includes nine-day intensive, mid-June field course held on the Olympic Peninsula and coastal Puget Sound. Prerequisite: ESS 509; three of ESS 420, ESS 454, ESS 526, ESS 527, or ESS 547. Instructors: Troost Offered: S.

ESS 512 Seismology (3) Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either ESS 511 or PHYS 123 and one of MATH 307 or MATH 308.

ESS 514 Geophysics: Fluids (3) Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307, and MATH 308 or equivalent.

ESS 515 Geophysics: Space (3) Various phenomena occurring in outer regions of Earth’s atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent; recommended: PHYS 322.

ESS 517 Early Earth Evolution (3) Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets.

ESS 518 Technical Communication in Applied Geosciences (1, max. 3) Reading, writing, and presentation of technical information in the geosciences. Topics vary by quarter Offered: AWSp.

ESS 519 Scientific Writing and Graphics (2) Waddington, Warren Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/OCEAN 518; Sp, odd years.

ESS 520 Application in Geographic Information Systems for the Earth Sciences (4) S. WALTERS Covers applied uses of GIS in the applied earth sciences. Includes hands-on instruction in and discussion of analysis of geologic patterns and phenomena: terrain analysis and interpretation; riverbed modeling; floodplain analysis; rainfall patterns and effects; landslide forecasting; isostatic phenomena; and topics of the students’ own interest. Also covers basic instruction in geospatial statistics. Prerequisite: ESS 420 or permission of instructor. Offered: W.
ESS 521 Advanced Geospatial Analysis with Python for the Earth Sciences (4) Steven Walters Advanced application of geospatial analysis and spatial numerical methods in the earth sciences, particularly using Python scripting. Hands-on, "workshop" approach exploring topics of interest to students: e.g., 3D (sub-) surface analysis; hydrologic routing/modeling; dynamic landscape change; image interpretation; and pattern analysis/geostatistics. Course activities combine instructional lab exercises with independent project research. Prerequisite: ESS 420 (or equivalent) or permission of instructor; recommended: graduate-level background and/or standing in earth and environmental sciences. Offered: Sp.

ESS 522 Geophysical Data Collection and Analysis (3) Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.

ESS 523 Geophysical Inverse Theory (5) Kenneth C. Creager Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Offered: Sp, even years.

ESS 524 Numerical Heat and Mass Flow Modeling in the Earth Sciences (3) Numerical solution of steady and transient advective-diffusion equations describing heat and mass transport processes in earth sciences, emphasizing finite-volume methods and their relationship to finite-difference and finite-element methods. Topics include discretization methods; coordinate systems; boundary conditions; accuracy; and stability. Prerequisite: MATH 307; MATH 308 or equivalent; or permission of instructor. Instructors: Waddington Offered: Sp, even years.

ESS 525 Tectonic Geomorphology (3) A. Duvall Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Offered: Sp.

ESS 526 Fluvial Geomorphology (5) Collins Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises and independent project emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, and report writing.

ESS 527 Hillslope Geomorphology (5) Duvall Theoretical and applied study of hillslope processes including erosion and deposition; mass wasting; and slope forms and evolution.

ESS 528 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3) Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.

ESS 531 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ATM S 510.

ESS 533 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512.

ESS 541 Applied Fluvial Geomorphology (4) Application of theory in fluvial geomorphology to framing and addressing questions in basic research and problems in applied contexts such as river
engineering, land use planning, resource management, and river restoration. Prerequisite: either ESS 426, ESS 526, or permission of instructor.

**ESS 544 Applied Tsunami Hazard Science (4)** Broad introductory overview of tsunami science and physical, social, and economic impacts of tsunami hazards. Designed for scientific, engineering, earth-science professionals, and graduate students interested in tsunami hazard assessment, mitigation, or warning. Prerequisite: MATH 126; PHYS 123; AMATH 301, or equivalents. Instructors: Gonzalez

**ESS 546 Continental-Margin Sedimentation (3)** *Charles Nittrouer* Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with OCEAN 546.

**ESS 547 Engineering Geology: Methods and Application (4)** Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips.

**ESS 554 Paleoclimate Proxies (3)** *Alexander, Sachs* Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/OCEAN 554.

**ESS 557 Vertebrate Paleontology (5)** Examines the biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips and introduction to regional vertebrate fauna. Offered: jointly with BIOL 557.

**ESS 558 Introduction to Graduate Research in Paleobiology (1)** Introduction to paleobiology techniques and resources. Credit/no-credit only. Offered: jointly with BIOL 555; A.

**ESS 560 Cosmogenic Nuclides in Geomorphology (3)** Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

**ESS 562 Observational Seismology (1, max. 18)** Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no-credit only.

**ESS 567 Environmental Geochemistry (4)** NW Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and groundwater quality. Offered: W.
**ESS 568 Oceanic Lithosphere (3)** William Wilcock  
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

**ESS 573 Cloud Microphysics and Dynamics (3)**  
Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; Sp.

**ESS 575 Advanced Rockets and Instrumentation (2-4, max. 12)** Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.

**ESS 576 Space and Laboratory Plasma Physics (3)**  
Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with A A 556; Sp, odd years.

**ESS 580 Advanced Methods in Isotope Geochemistry (3, max. 18)** Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: one of ESS 316, ESS 424, ESS 457, ESS 459, ESS 501, ESS 554, OCEAN 583, or permission of instructor.

**ESS 581 Planetary Atmospheres (3)** Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555.

**ESS 582 Environmental Geochemistry Laboratory (4) NW**  
Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Offered: Sp.

**ESS 583 Origin of the Solar System (3)** Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

**ESS 584 Space Law and Policy (5)** Saadia M. Pekkanen  
Law and policy foundations of outer space activities. Essential origins, sources, and role of space law, as well as key institutions, forums, and forces shaping the contemporary governance of space activities. Provides a thorough grounding in U.N. treaties, principles, resolutions, regulations, and private international and national space laws and policies. Offered: jointly with A A 590/JSIS B 544; Sp.

**ESS 585 Climate Impacts on the Pacific Northwest (4)** Mantua, Snover  
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/SMEA 585; Sp.

**ESS 586 Current Research in Climate Change (2, max. 20)** Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/OCEAN 586.

**ESS 587 Fundamentals of Climate Change (3)**  
Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate
variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.

ESS 588 The Global Carbon Cycle and Climate (3)
Emerson Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588; W.

ESS 589 Paleoclimatology: Data, Modeling, and Theory (3)

ESS 590 Special Topics (2-10, max. 20)

ESS 592 Professional Practice in Applied Geosciences (1, max. 3)
Covers major issues and current topics in the practice of Geosciences: professional licensing, ethics, business trends, environmental regulation, emerging technologies. Includes internships and career guidance, as well as weekly guest speakers. Offered: AWSp.

ESS 593 Climate Science Seminar (1)
Mote Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/OCEAN 593; W.

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4)
Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

ESS 595 Earth and Space Sciences Research Methods (2, max. 30)
Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Credit/no-credit only.

ESS 596 Climate Science Capstone Project ([1-5], max. 5)
Mote Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/OCEAN 596; AWSpS.

ESS 597 Applied Geoscience Investigation (1-5, max. 10)
Independent investigation in applied geosciences guided by a faculty member and commonly in association with an off-campus mentor or stakeholder organization. Must complete project agreement in advance of registration. Prerequisite: ESS 592 and permission of instructor Credit/no-credit only. Offered: AWSpS.

ESS 599 Seminar (1, max. 24)
Review of current literature in geophysics and graduate student research with faculty participation. Credit/no-credit only.

ESS 600 Independent Study or Research (*)
Credit/no-credit only.

ESS 601 Internship (*)
Graduate internship and final exam. Prerequisite: permission of instructor. Instructors: Crider, Troost

ESS 700 Master's Thesis (*)

ESS 800 Doctoral Dissertation (*)

PROGRAM ON THE ENVIRONMENT

ENVIR 100 Introduction to Environmental Studies (5)
Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates knowledge from different disciplines, and applies insights and methods to actual environmental
problems and situations at scales from local to global. Offered: AWSpS.

ENVIR 101 Orientation to Environmental Studies (1)
Ana Wieman Introduction to the Environmental Studies program and learning community. Weekly group discussions focus on majoring in and pursuing a career in Environmental Studies. Topics include philosophy and structure of the Program on the Environment, connecting academic work to career pursuits, undergraduate research, networking, and connecting with peers and faculty at UW. Credit/no-credit only.

ENVIR 102 International Baccalaureate (IB)
Environmental Systems & Societies (5) I&S Course awarded based on International Baccalaureate (IB) score. Consult the Admissions Exams for Credit website for more information.

ENVIR 103 Society and the Oceans (5) I&S/NW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with JSIS B 103/SMEA 103.

ENVIR 110 Introduction to Food and the Environment (5) I&S/NW Ray W Hilborn Relates the production and consumption of food to the major areas of environmental science including energy use, water consumption, biodiversity loss, soil loss, pollution, nutrient cycles, and climate change. Studies the basic science and how food production impacts the key processes.

ENVIR 200 Communication for Environmental Studies (5) VLPA/I&S Helps develop the skills necessary to engage, analyze, write, and speak about complex environmental issues in a variety of disciplinary contexts with particular values and emphases. Focuses on reading, writing, presentation, and critical analysis of written material. Prerequisite: minimum grade of 2.0 in ENVIR 100; minimum grade of 2.0 in either C LIT 240, ENGL 109 and ENGL 110; ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: AWSp.

ENVIR 201 Climate Governance: How Individuals, Communities, NGOs, Firms, and Governments Can Solve the Climate Crisis (5) NW/I&S, DIV Nives Dolsak, Patrick John Christie Examines climate change, its causes and impacts (on ecosystems, water availability, extreme weather, communities, health, and food) globally, nationally, and locally. Surveys its solutions (mitigation, adaptation, migration, and just transition), actors that implement them (governments, firms, NGOs, activists, communities, individuals) and approaches they use (regulation, markets, planning, innovation, social movements, behavioral change). Offered: jointly with SMEA 201; A.

ENVIR 211 Environmental Justice (5) I&S, DIV
Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with AES 211/ANTH 211.

ENVIR 221 Environmental History of the U.S. (5)
I&S Linda Nash Surveys the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics. Offered: jointly with HSTAA 221; A.

ENVIR 235 Introduction to Environmental Economics (5) I&S/NW S. RABOTYAGOV Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235; SpS.

ENVIR 239 Sustainability: Personal Choices, Broad Impacts (5) I&S/NW Kristi Straus Introduces implications of and approaches to sustainability through models of sustainability, history of sustainability movements, and sustainability in action. Explores how our personal choices can affect
broader change towards sustainability. Examines personal and global aspects of sustainability through issues such as food, energy, waste, water, population, consumption, design, and well-being. Offered: AWS.

**ENVIR 240 The Urban Farm (5) NW**
Develops students’ understanding of the ecological connections between food production, human health, and planetary sustainability. Teaches basic skills needed for food production in urban areas and the ethics behind sustainable urban agriculture, including a hands-on component on the farm at the biology greenhouse.

**ENVIR 243 Environmental Ethics (5) VLPA/I&S L. NICHOLS**
Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

**ENVIR 250 Research Methods in Environmental Studies (5) NW, QSR**
Introduces the processes involved in research design, including methods for environmental data collection, analysis, and presentation. Introduces ecological and social research methods through case studies, followed by practical lab and field work.

**ENVIR 280 Natural History of the Puget Sound Region (5) NW**
Focuses on identification and ecology of defining organisms in major habitats of the Puget Sound region. Geology, climate, and early human history provide a framework for understanding the distribution and development of these habitats. Emphasizes a variety of techniques for the observation and description of nature.

**ENVIR 295 Special Topics in Environmental Studies (1-5, max. 10)**
Selected topics in environmental studies. Format may range from seminar/discussion to formal lectures to laboratory or modeling work. Offered: AWSpS.

**ENVIR 296 Study Abroad - Environmental Studies (1-15, max. 15)**
Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

**ENVIR 300 Analysis of Environmental Cases (5) NW/I&S**
Guides students through the analysis of environmental case studies. Encourages synthesis of information from diverse sources and stakeholder perspectives. Frameworks are provided to help students work through the complexities of socioecological systems in a systematic way. Culminates with significant group project and presentation. Prerequisite: minimum grade of 2.0 in ENVIR 200 and ENVIR 250.

**ENVIR 308 American Indians and the Environment (5) I&S, DIV J. Reid**
Examines the historical relationships American Indians have possessed with local environments, with special attention to the ways these peoples have adapted to altered environments and new conditions, including migrations, involvement with markets of exchange, overhunting, dispossession, conservation, and mainstream environmentalism. Offered: jointly with AIS 308/HSTAA 308.

**ENVIR 313 Environmental Earth Science (5) NW**
Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, or ESS 212. Offered: jointly with ESS 315.

**ENVIR 315 Environmental Pedagogy (5) I&S/NW, DIV Tim Billo, Eli E Wheat**
Introduces the art of teaching in non-traditional settings while exploring inequities in our education system. Designed to help students become effective environmental educators such as park naturalists or interpretive guides while working with organizations serving Seattle’s diverse population. Students learn pedagogical philosophy and evaluate education theory while gaining skills to become more effective environmental educators. Offered: W.

**ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW**
Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused
climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton’s Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330; Sp.

ENVIR 341 Energy and Environment (3) NW Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/M E 341; A.

ENVIR 350 Internship (1-5, max. 15) Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. Credit/no-credit only.

ENVIR 360 Environmental Norms in International Politics (5) I&S Ingebritsen Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with JSIS B 350/SCAND 350.

ENVIR 362 Introduction to Restoration Ecology (5) NW/I&S J. BAKKER An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ESRM 362; A.

ENVIR 371 Anthropology of Development (5) I&S Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

ENVIR 379 Environmental Sociology (5) I&S/NW S. ASAH Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; A.

ENVIR 384 Global Environmental Politics (5) I&S K. LITFIN Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with POL S 384.

ENVIR 385 Political Ecology of the World Food System (5) I&S/NW Karen T Litin Investigates the intersection of globalization and food politics, the pivotal role of petroleum in the world food system, and the commodity chains for some foods. Includes an optional service learning component. Offered: jointly with POL S 385.

ENVIR 400 Professional Environmental Communication (5) I&S P. Sean McDonald Explores the variety of media and methods for conveying environmental information in the digital age. Examines scholarly literature while focusing on practical professional communication. Students participate in classroom and online discussion, social media assignments, improve presentation style and delivery while building professional communication skills. Offered: W.

ENVIR 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415.
ENVR 416 Ethics and Climate Change (5) I&S S. GARDINER, L. NICHOLS Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

ENVR 417 Advanced Topics in Environmental Philosophy (5) I&S S. GARDINER Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

ENVR 418 Communication and the Environment (5) I&S Examines how communication about the environment influences beliefs, values, and treatment of the natural world. Topics include new coverage of the environment; media strategies and rhetoric used by activists, government agencies, and industry to address environmental issues; representations of the environment in popular culture; and/or political argumentation about environmental policy. Offered: jointly with COM 418.

ENVR 431 Ecopsychology (5) I&S P. KAHN Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ESRM 431/PSYCH 431; W.

ENVR 439 Attaining a Sustainable Society (5) I&S/NW, DIV Eli E Wheat Building a sustainable future requires restructuring the global economy and changes in values and lifestyles. How do race, culture, gender, class, and individual experience inform sustainability priorities? How do internalized notions of power and success compliment or undermine our societal efforts towards sustainability? Students explore these questions through four arenas for change: food, governance, economics, and energy. Offered: W.

ENVR 460 Power, Privilege, and Preservation (5) NW/I&S, DIV Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ESRM 460.

ENVR 476 Introduction to Environmental Law and Process (3) I&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMEA 476; A.

ENVR 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/FISH 478.

ENVR 480 Sustainability Studio (5, max. 10) Exploration of definitions and critical concepts of sustainability and analysis of sustainability practices on the UW campus. Student research teams analyze specific sustainability practices related to food, water, energy, and climate, among other topics. Sustainability project topic focus is different each quarter.
ENVIR 485 Environmental Planning and Permitting in Practice (5) I&S Todd A Wildermuth Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA ESA) that shape environmental land use planning and federal planning and permitting systems. Offered: jointly with ESRM 485; W.

ENVIR 489 Peer Teaching Assistants in Environmental Studies (1-5, max. 10) Develops and enhances teaching skills through supervised direct teaching experience. Prepares students for graduate school teaching or other teaching by developing leadership, mentoring, and communication skills. Includes attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab, field, or discussion sections. Credit/no-credit only. Offered: AWSpS.

ENVIR 490 Capstone Preparation (2) Students engage with representatives of established projects or develop a project around their own interests. Students complete a project learning contract and proposal and take part in professional development activities. First in a series of three. Prerequisite: minimum grade of 2.0 in ENVIR 300.

ENVIR 491 Environmental Studies Capstone: Internship and Research (1-12, max. 12) Projects arranged during ENVIR 490 may include internships, directed environmental research, or other experiential learning opportunities working in a professional setting either on campus or with an outside organization. Students complete assignments connecting their hand-on professional experience to scholarly research on related topics. Second in a series of three. Prerequisite: ENVIR 490.

ENVIR 492 Environmental Studies Capstone: Synthesis and Communication (0-3) Students synthesize knowledge gained through hand-on, applied work with academic research. Students refine their writing skills, get practice conveying information orally and visually, and make formal presentations. Professional development exercises help students market their experience and expertise. Third in a series of three. Prerequisite: ENVIR 491.

ENVIR 495 Advanced Topics in Environmental Studies (1-5, max. 15) Advanced topics in environmental studies. Offered: AWSpS.

ENVIR 496 Study Abroad - Advanced Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

ENVIR 497 Seminar in Environmental Studies (1-3, max. 6) Intensive and advanced reading and discussion of selected works in interdisciplinary environmental studies. Topics vary. Credit/no-credit only.

ENVIR 498 Independent Study (1-5, max. 15) Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVIR 499 Undergraduate Research (1-15, max. 15) Undergraduate research in environmental studies. Offered: AWSpS.

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15) Exploration of interdisciplinary themes in environmental science communication. Topics vary.

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15) Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.

ENVIR 502 Business Strategy and the Natural Environment (4) Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms’ interactions with the environment.
ENVIR 511 Environmental Management - Keystone Project I (4) First in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business.

ENVIR 512 Environmental Management - Keystone Project II (4) Second in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Prerequisite: ENVIR 511.

ENVIR 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/SMEA 585; Sp.

ENVIR 600 Independent Study or Research ([1-5]-) Independent reading and research. Limited to students enrolled in the Program on the Environment's graduate certificate programs.

SCHOOL OF ENVIRONMENTAL AND FOREST SCIENCE

BIORESOURCE SCIENCE AND ENGINEERING

BSE 101 Biomass, Biofuels and Bioproducts (5) I&S/NW Renata Bura Provides an introduction to the science and technology of Biofuels, Bioproducts, and Renewable Energy. In particular, the generation and properties of biofuels and specialty products from lignocellulosic sources will be emphasized. Part of this class will concentrate on the social aspects of biomass to biofuels conversion. Prerequisite: None; recommended: high school chemistry and physics, ideally some exposure to organic chemistry. Offered: S.

BSE 150 Bioresource Science and Engineering Seminar (1) R. Gustafson Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no-credit only. Offered: A.

BSE 190 Special Topics (1-5, max. 10) NW R. Bura Introduces current topics or courses under development to address the latest issues in bioresource science and engineering.

BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) NW Broad overview of the science and technology of producing pulp and paper. Introduction of the BSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: A.

BSE 202 Pulp and Paper Lab and Field Studies (1) NW Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for BSE majors. Credit/no-credit only. Offered: A.

BSE 211 Creativity and Society (5) VLPA/I&S G. Allan Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: AWS.

BSE 231 Technical Communication for Process Engineers (3) NW Introduces technical communication skills for process engineers. Topics covered include general communication, technical writing, oral presentations and engineering ethics. Students work individually and in teams to complete oral and written assignments based on modern, industrially relevant bioresource and process engineering problems. Prerequisite: Either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: A.

BSE 248 Paper Properties (4) NW Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures
related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: Sp.

**BSE 309 Creativity and Innovation (2) VLPA G. ALLAN** Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

**BSE 391 Engineering Principles of Biorefineries (5) NW F. PACHECO DE RESENDE** Introduction to biofinery processes, including material and energy balances; sustainability aspects and environmental issues; and process modeling. Application of conservation laws to calculation of flow rates, chemical composition, and heat requirements of non-reactive and reactive systems typical of processes involving lignocellulosic biomass. Prerequisite: A A 260; either CHEM 237 or CHEM 223; MATH 307 Offered: A.

**BSE 392 Bioresource Transport Phenomena (5) NW F. PACHECO DE RESENDE** Focuses on transport phenomena involved in the biofinery processes, including: momentum, heat, and mass transfer; paper drying, transport in biochemical and thermochemical processes, and product separation; and computational tools. Application of conservation laws to calculations of flow rates, chemical composition, and heat requirements involving lignocellulosic biomass. Prerequisite: minimum grade of 2.0 in BSE 391. Offered: W.

**BSE 399 Undergraduate Internship (1-5, max. 15)** Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

**BSE 406 Natural Products Chemistry (5) NW R. BURA** Provides knowledge of chemistry of aqueous and solvent-rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry of biomass conversion process. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

**BSE 410 Industrial Wastewater Treatment and Reduction (4) Heidi Lois Gough** Applications of mathematics, statistics and chemistry for the engineering design of pollution control for high-strength industrial wastewater, with focus on the pulp, paper and biorefineries industries. Includes design of treatment reactors, settling chambers, sorption operations, and approaches for wastewater reduction. Prerequisite: BSE 201; either BSE 391, CHEM E 310, CEE 350, or CEE 357; and either MATH 307 or AMATH 351; recommended: courses in physics; organic chemistry; differential equations; statistics; and engineering fundamentals Offered: W.

**BSE 420 Bioresource Engineering I (4) R. BURA** Covers chemistry and reaction kinetics of conversion of biomass into molecules and fibers for use in making fuels and high value products. Includes chemical, biological, and thermal conversion of biomass. Develops applications of reaction kinetics to design reactor configurations. Prerequisite: BSE 406. Offered: W.

**BSE 421 Bioresource Engineering II (4) R. Gustafson** Introduces basic mass transfer processes and physical basis: diffusion, convection, and mass transfer coefficients. Analyzes separation processes used in forest products and biorenewables industries: membrane separations, flow through porous media, leaching and extraction, and evaporation. Includes industrial processes: dialysis, reverse osmosis, fiber web formation, pulp washing, and black liquor evaporation. Prerequisite: minimum grade of 2.0 in both BSE 392 and BSE 420. Offered: Sp.

**BSE 422 Bioresource Engineering III (4) R. GUSTAFSON** Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: minimum grade of 2.0 in BSE 421. Offered: A.
BSE 426 Bioresource Laboratory (4) R. BURA Covers bioconversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: minimum grade of 2.0 in BSE 420; Q SCI 381 or STAT 311 which may be taken concurrently. Offered: Sp.

BSE 430 Papermaking Processes (5) Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: either BSE 392 or CHEM E 340. Offered: A.

BSE 436 Pulp and Paper Laboratory II (4) Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.

BSE 480 Bioresource Design I (4) I&S/NW R. GUSTAFSON Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific considerations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: minimum grade of 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.

BSE 481 Bioresource Design II (5) I&S/NW R. GUSTAFSON Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.

BSE 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

BSE 490 Special Topics (1-5, max. 15) Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSp.

BSE 497 Pulp and Paper Internship (1, max. 3) Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.

BSE 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

ENVIRONMENTAL SCIENCE AND RESOURCE MANAGEMENT

ESRM 100 Introduction to Environmental Science (5) I&S/NW R. HARRISON Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSp.

ESRM 101 Forests and Society (5) I&S/NW K. VOGT Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken. Offered: ASp.

ESRM 150 Wildlife in the Modern World (5) I&S/NW K. VOGT Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.

ESRM 190 Special Topics (1-5, max. 10) NW Introduces current topics or courses under
development to address the latest issues in environmental science and resource management.

**ESRM 200 Society and Sustainable Environments (5) I&S/NW S. ASAHI, P. KAHN** Introduces the application of social concepts and theories to understanding and managing urban, urbanizing, and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp.

**ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I&S/NW D. BUTMAN, S. DOTY** Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communities, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: ASp.

**ESRM 210 Introductory Soils (5) NW** Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

**ESRM 235 Introduction to Environmental Economics (5) I&S/NW S. RABOTYAGOV** Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ENVIR 235; SpS.

**ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR** Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSpS.

**ESRM 300 Principles of Sustainability (2) NW/I&S** Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Prerequisite: ESRM 200 or ESRM 201, either of which may be taken concurrently. Credit/no-credit only. Offered: W.

**ESRM 304 Environmental and Resource Assessment (5) NW, QSR D. Vogt, E. Turnblom** The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: ESRM 200 or ESRM 201, either of which may be taken concurrently. Offered: ASpS.

**ESRM 311 Soils and Land Use (3) NW** Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions.

**ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) NW/I&S B. Harvey** Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

**ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW D. PAUN** Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in
the context of environmental resource management. Offered: AS.

ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW D. PAUN
Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

ESRM 323 Silviculture (5) NW E. TURNBLOM
Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

ESRM 325 Environmental Applications of Plants: Bioenergy and Bioremediation (3) NW S. DOTY
Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Offered: A.

ESRM 328 Forestry-Fisheries Interactions (4) NW Offered: jointly with FISH 328.

ESRM 331 Landscape Plant Recognition (3) NW Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Offered: jointly with BIOL 331; Sp.

ESRM 350 Wildlife Biology and Conservation (5) NW A. WIRSING Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.

ESRM 351 Wildlife Research Techniques (5) NW Scientific approaches to the field study of wildlife populations including study design, species identification, data collection, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350. Offered: Sp.

ESRM 362 Introduction to Restoration Ecology (5) NW/I&S J. BAKKER An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ENVIR 362; A.

ESRM 368 Natural Resource Measurements (4) NW E. TURNBLOM Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315, Q SCI 381, STAT 220, or STAT 311. Offered: W.

ESRM 371 Environmental Sociology (5) I&S/NW S. ASAH Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ENVIR 379/SOC 379; A.

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: A.

ESRM 399 Field or Teaching Internship (1-5, max. 15) Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of
professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

ESRM 400 Natural Resource Conflict Management (3) I&5/NW C. Ryan Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 403 Forest and Economic Development in the Developing World (4) NW Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: A.

ESRM 404 Plant Microbiology Laboratory (5) NW S. Doty Focuses on measuring impacts of beneficial microorganisms on plants. Assays include colonization of plants, N stress alleviation, photosynthesis, and growth enhancement. Microorganisms are characterized by phytoremediation production, provision of nutrients, and growth. Microbial strains are identified using standard molecular analysis methods (PCR, cloning, sequencing). Includes short lectures. Prerequisite: Prerequisite: BIOL 180; either CHEM 120 or CHEM 142; recommended ESRM 201. Offered: WS.

ESRM 409 Soil Ecology (5) NW Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A, even years.

ESRM 410 Forest Soils and Site Productivity (5) NW Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Offered: A, odd years.

ESRM 411 Plant Propagation: Principles and Practice (3) NW S. Kim Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Offered: Sp.

ESRM 412 Native Plant Production (3) NW J. Bakker Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Offered: Sp.

ESRM 413 Soil Genesis and Classification (5) NW Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Offered: Sp, even years.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Offered: Sp, odd years.

ESRM 415 Terrestrial Invasion Ecology (5) NW P. Tobin Covers major principles of invasion biology and ecology as they apply to terrestrial ecosystems, from invasion pathways and the arrival stage, factors that affect non-native species establishment and spread, impacts to ecosystem function and diversity, and stage-specific management strategies. Prerequisite: either BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 201, ESRM 401, ESRM 472, or ESRM 473. Offered: A.

ESRM 420 Wildland Fire Management (5) NW E. Alvarado-Celestin Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-
use forest, and the wildland-urban interface.
Offered: Sp.

ESRM 421 Role of Culture and Place in Natural Resource Stewardship: Yakama Nation Experience (3) I&S/NW, DIV E. Alvarado-Celestin, T. Hinckley
"Anyone who has not lived in "Indian country" cannot understand just how extensively the United States government and its laws affect Native Americans and their natural resource management." Learn how history, self-determination, and sovereignty have shaped natural resource stewardship on the reservation and on the ceded lands of the Yakama Nation. Offered: A.

ESRM 422 Plant Microbiology Seminar (2, max. 4) Microbes, often essential for plant growth, provide nutrients, pathogen resistance, and increased tolerance to stress. Other microbes may cause plant diseases. Covers plant microbe interactions. Requires literature review of a plant microbiology topic. Prerequisite: BIOL 162 or BIOL 220; recommended: biology. Credit/no-credit only. Offered: W.

ESRM 423 International Trade, Marketing, and the Environment (3) I&S/NW Introduction to international trade, marketing, and environmental business. Concepts include plan writing, exporting and importing, carbon credits, green marketing, and how global exchange rates affect environmental assets such as forests.

ESRM 425 Ecosystem Management (5) NW J. FRANKLIN Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: Sp.

ESRM 428 Principles of Silviculture and Their Application (5) NW Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic, and economic conditions, and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

ESRM 429 Environmental Science and Resource Management Seminar (1, max. 6) NW Weekly presentations covering environmental topics by scientists on and off campus Credit/no-credit only. Offered: AWSp.

ESRM 430 Remote Sensing of the Environment (5) NW Moskal Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR). Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: W.

ESRM 431 Ecopsychology (5) I&S P. KAHN Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ENVIR 431/PSYCH 431; W.

ESRM 432 Advanced Remote Sensing and Earth Observation (4) NW, QSR David E. Butman Covers the theory and application of satellite remote sensing as a tool for environmental science. Topics include the fundamentals of electromagnetic radiation, reflection and absorption, black body radiation, use of the Plank Function, satellite and sensor technology, map projections, integration of GIS data, and digital image analysis. Practical training with advanced image processing software (ENVI and open source). Recommended: GIS; statistics; and basic physics. Offered: jointly with CEE 432; W.

ESRM 433 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) L. MOSKAL Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation
structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360. Offered: Sp.

**ESRM 435 Insect Ecology (3)** NW P. TOBIN
Covers major principles of ecology as they apply to insects, and follows a level of organization from the individual to populations to communities. Applications of insect ecology are extended to insect ecosystem services, conservation, and pest management. Prerequisite: BIOL 161, BIOL 180, BIOL 200, BIOL 220, or ESRM 161; recommended: Offered: Sp.

**ESRM 436 Laboratory in Insect Ecology (2)** NW P. TOBIN
Supplements the lecture course (ESRM 435) by providing hands-on lab and field experience on ecological principles as they pertain to insects. Prerequisite: ESRM 435, which may be taken concurrently.

**ESRM 441 Landscape Ecology (5)** NW J. LAWLER
Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning) . Offered: A.

**ESRM 447 Watershed Ecology and Management (3)** NW G. HOLTGRIEVE
Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with FISH 447; Sp.

**ESRM 448 Watershed Ecology and Management Lab (2)** Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with FISH 448; Sp.

**ESRM 450 Wildlife Ecology and Conservation (5)** NW A. WIRSING
Covers principles of wildlife ecology such as habitat use and selection, population and metapopulation dynamics, and predator-prey interactions, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Prerequisite: minimum grade of 2.0 in ESRM 350. Offered: W.

**ESRM 451 Analytical Methods in Wildlife Science (3)** NW Beth Gardner
This course provides a foundation of techniques commonly used by wildlife biologists in data collection and analysis. Predominantly focused on parameter estimation of demographic rates of animal populations. This course will explore, and discuss in detail, quantitative methods needed to address conservation and management problems in the real world. Prerequisite: ESRM 351 and Q SCI 482. Offered: jointly with Q SCI 451; W.

**ESRM 452 Field Ornithology (3)** NW J. Marzluff
Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: ESRM 350 or ESRM 456 which may be taken concurrently; either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: A.

**ESRM 453 Biology and Ecology of Mammals (3)** NW Laura R Prugh
This course covers the diversity and life history of mammals, with a focus on their ecology, evolutionary relationships, identification, and distribution. Students will complete a term project. An optional field trip to learn snow tracking techniques will be offered. This is a writing intensive (W) course. Prerequisite: BIOL 162 or BIOL 180; recommended: ENGLISH Composition Offered: Sp, odd years.

**ESRM 455 Wildlife Seminar (1, max. 8)** NW
Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

**ESRM 456 Biology and Conservation of Birds (3)** NW J. MARZLUFF
Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on
western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162, any of which may be taken concurrently. Offered: A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW J. MARZLUFF Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Aaron J. Wirsing, John M. Marzluff Extended field course offers wildlife science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

ESRM 460 Power, Privilege, and Preservation (5) NW/I&S, DIV Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ENVIR 460.

ESRM 461 Forest Management and Economics (5) I&S/NW Presents important contemporary decision tools, especially how they are used by forest managers to interpret, critique, and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis, and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: Sp.

ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with BES 462/T BIOL 462.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with BES 463/T BIOL 463.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/T BIOL 464.

ESRM 465 Economics of Conservation (3) I&S/NW Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: A.

ESRM 468 Forest Operations (5) Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM 323 which may be taken concurrently. Offered: Sp.

ESRM 470 Natural Resource Policy and Planning (5) I&S/NW Introduction to and analysis of
environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

ESRM 473 Restoration in North America (5) NW
Investigates the vegetation and climate of North American ecosystems. Includes an ecosystem by ecosystem review of how restoration is done in each system, including some tropical ecosystems. Offered: W.

ESRM 474 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY
Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

ESRM 478 Plant Ecophysiology (5) NW S. Kim
Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant’s occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 180, B BIO 180, TESC 120, T BIOL 120, ESRM 201, ESRM 162, or FISH 162. Offered: jointly with BIOL 424; W.

ESRM 479 Restoration Design (5) I&S/NW K. EWING, J. FRIDLEY
Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.

ESRM 485 Environmental Planning and Permitting in Practice (5) I&S Todd A Wildermuth
Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA ESA) that shape environmental land use planning and federal planning and permitting systems. Offered: jointly with ENVIR 485; W.

ESRM 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSpS.

ESRM 491 Field Studies (1-5, max. 10)
Independent field study or one time organized field courses with emphasis outside the traditional classroom. Offered: AWSpS.

ESRM 494 Senior Capstone Proposal (5-)
Selection of a capstone topic and type, either thesis or project. Students select a faculty adviser to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.

ESRM 495 Senior Project (5)
Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 496 Senior Thesis (5-)
Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisers to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.
SCHOOL OF ENVIRONMENT AND FOREST RESOURCES

SEFS 500 Graduate Orientation Seminar (1)
Introduction to graduate study at the School, student resources and services, and current research. Required for all new graduate students in SEFS. Offered: A.

SEFS 501 Forest Ecosystems - Community Ecology (5) B. Harvey
Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition, and disturbance in determining community composition, structure, and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

SEFS 502 Analytical Techniques for Community Ecology (4) J. Bakker
Analysis of ecological data, focusing on community-level data. Topics include distance measures, group comparison methods (Mantel test, permutational MANOVA), ordinations (PCA, DCA, NMS), methods of identifying groups (cluster analysis, classification trees), as well as Indicator Species Analysis, diversity measures, and related topics. Prerequisite: Q SCI 482, which may be taken concurrently. Offered: W.

SEFS 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10)
Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Credit/no-credit only. Offered: AWSp.

SEFS 504 Research Processes in Forest Resources (4)
Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.

SEFS 506 Terrestrial Invasion Ecology (5) P. Tobin
Covers major principles of invasion biology and ecology as they apply to terrestrial ecosystems, from invasion pathways and the arrival stage, factors that affect non-native species establishment and spread, impacts to ecosystem function and diversity, and stage-specific management strategies. Offered: A.

SEFS 507 Soils and Land Use Problems (4)
Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites.

SEFS 508 Plant Process and Systems Modeling (3) S. Kim
This course explores principles and techniques of quantitative modeling used in plant biology and ecology for graduate and advanced undergraduate students. An emphasis will be given to process-based models that integrate underlying physiological and ecological processes in plant systems. Instruction methods will include lectures, discussions, hands-on computer exercises, assignments, project, and reading primary research articles in modeling. Recommended: Plant biology, Ecology, Algebra, Calculus, Scientific computing. Offered: A.

SEFS 509 Analysis of Research Problems (3) S. Rabotyagov
Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals, including development of a research plan. Offered: W.

SEFS 510 Graduate Studies in Forest Soils (1-5, max. 15)
Offered: AWSpS.

SEFS 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3)
Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: Sp, even years.
SEFS 513 Advanced Soil Genesis and Classification (5) Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: Sp, even years.

SEFS 514 Advanced Forest Soil Fertility and Chemistry (4) Chemical properties of soil, nutrient, and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: Sp, odd years.

SEFS 515 Advanced Soil and Plant Analysis (3) Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: Sp, even years.

SEFS 520 Geographic Information Systems in Forest Resources (5) J. Lawler Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSp.

SEFS 521 Current Topics in Forest Resources (2-5, max. 10) Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.

SEFS 522 Plant Microbiology Seminar (2, max. 4) Sharon L. Doty Microbes, often essential for plant growth, provide nutrients, pathogen resistance, and increased tolerance to stress. Other microbes may cause plant diseases. Covers plant microbe interactions. Requires literature review of a plant microbiology topic. Recommended: undergraduate background that includes biology. Credit/no-credit only. Offered: W.

SEFS 523 Environmental Applications of Plants: Bioenergy and Bioremediation (3) S. DOTY Covers phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.

SEFS 524 Current Topics in Phytoremediation (2) S. DOTY Discussion of current scientific research in the use of plants for remediation of pollution. One paper is student-presented per week and critiqued and discussed in class. Prerequisite: SEFS 523 Credit/no-credit only.

SEFS 525 Advanced Wildland Hydrology (4) Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

SEFS 526 Seminar in Advanced Silviculture (3) Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity, and high productivity in sub-tropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.

SEFS 527 Ecosystems Seminar (1) Discussion by invited speakers on current research related to ecosystems. Credit/no-credit only.

SEFS 529 School of Environmental and Forest Sciences Seminar (1, max. 6) Weekly seminars covering School of Environmental and Forest Sciences topics, with lectures from scientists on and off campus. Credit/no-credit only. Offered: AWSp.

SEFS 530 Introduction to Restoration Ecology (3/5) J. BAKKER Provides introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the
success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: A.

SEFS 532 Advanced Remote Sensing and Earth Observation (4) Covers the theory and application of satellite remote sensing as a tool for environmental science. Topics include the fundamentals of electromagnetic radiation, reflection and absorption, black body radiation, use of the Plank Function, satellite and sensor technology, map projections, integration of GIS data, and digital image analysis. Practical training with advanced image processing software (ENVI and open source). Recommended: GIS; statistics; and basic physics. Offered: jointly with CEWA 532; W.

SEFS 533 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) L. MOSKAL Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360. Offered: Sp.

SEFS 535 Fire Ecology (4) E. ALVARADO-CELESTIN Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in Western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

SEFS 540 Optimization Techniques for Natural Resources (5) S. TOTH Studies optimization techniques for natural resources managers including spatial optimization; linear, integer, and multi-objective programming; and stochastic and combinatorial optimization. Emphasizes model building rather than on algorithmic concepts. Prerequisite: MATH 308 or permission of instructor. Offered: Sp.

SEFS 541 Advanced Landscape Ecology (5) B. Harvey, J. Lawler Hands-on, applied, project-based research class. Students work in a team in conjunction with one or more outside partners to address real landscape-scale conservation problems. Covers scaling, landscape processes, pattern measurement, connectivity, landscape modeling, and conservation planning. Prerequisite: SEFS 501. Offered: W, odd years.

SEFS 549 Urban Horticulture Seminar (1, max. 6) Discussion by invited speakers on current topics in urban horticulture. Credit/no-credit only. Offered: A.

SEFS 550 Graduate Seminar (2-5, max. 10) Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

SEFS 554 Wildlife Seminar (1-2, max. 10) Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

SEFS 561 Professional Presentations in Environmental Sciences (3) Gregory Bratman Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences by developing and practicing professional talks in a supportive environment. Students gain experience through tools and feedback on their approach to presentation materials. Discusses support materials, such as audiovisuals and graphics. Offered: Sp.

SEFS 564 Advanced Forest Biometry (3/5) Eric Turnblom Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Offered: W, even years.

SEFS 567 Topics in Advanced Ecology (3, max. 6) Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/FISH 567; W.

SEFS 570 Seminar in Environmental Sociology (3) Offered: jointly with SOC 570.

SEFS 571 Resource Policy and Administration (4) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PUBPOL 592.
SEFS 574 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

SEFS 590 Graduate Studies (1-5, max. 10) Study of emerging scientific developments in forest resources that may develop into regular course offerings. Offered: AWSpS.

SEFS 595 Graduate Teaching Practicum (1-5, max. 5) Principles of teaching and learning applied to undergraduate instruction in the School of Environmental and Forest Sciences. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for SEFS students only. Credit/no-credit only. Offered: AWSp.

SEFS 600 Independent Study or Research (*) Offered: AWSpS.

SEFS 601 Internship (3-9, max. 9) Graduate internship under the supervision of a faculty member. Credit/no-credit only. Offered: AWSpS.

SEFS 700 Master's Thesis (*) Offered: AWSpS.

SEFS 800 Doctoral Dissertation (*) Offered: AWSpS.

FRIDAY HARBOR LABS

FHL 101 Introduction to Marine Biology in the San Juan Islands (1) NW M. Dethier One-weekend, one-credit course designed to introduce students to the marine ecosystem of the San Juan Archipelago and the facilities of the Friday Harbor Laboratories, while doing basic exploration of marine biology. Students will spend two full-schedule days doing a variety of field and lab studies. Offered: Sp.

FHL 250 Marine Biology (5) NW Physical, biological, and social aspects of the marine environments. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Field and laboratory exercises expose students to common marine biological techniques and the diverse marine ecosystems of the San Juan Islands, WA, and to service-learning with local schools. Recommended: at least one quarter of introductory biology (more preferable). Offered: Sp.

FHL 305 Biology of Fishes (5) NW Covers the morphological, physiological, behavioral, and ecological diversity of fishes worldwide; provides a basic foundation for advanced courses in all areas of aquatic sciences. Participants engage in field-based collecting, copious dissection/illustration laboratories, and delve into scientific literature on this fascinating group's biology. Recommended: 10 credits biological science. Offered: A.

FHL 333 Science Writing for Diverse Audiences (3/5) This course examines the effective communication of scientific ideas in writing for both scientific and public audiences. Students read, analyze, and write diverse materials, learning to identify and practice concise, effective communication about marine science for a variety of audiences. The close-knit, hands-on FHL community creates and environment where students work together both inside and outside of class to build their skills. Recommended: None. Offered: ASp.

FHL 350 Introduction to Research in Marine Biology (6) NW Learn skills important to research scientists while participating in a mentored, hands-on project. Includes gathering, manipulating, and presenting data, plus group discussions on research ethics and the role of research in career options and graduate programs. Focuses on research activities in collaboration with a mentor. Research fields and topics vary. Recommended: any 100- or 200-level laboratory-based science course, ideally basic biology or marine biology. Offered: A.

FHL 375 Marine Mammals of the Salish Sea (5) NW Deborah Ann Giles An overview of the marine mammals found in the Salish Sea: their biology, habitats and conservation. Field trips throughout the San Juan Archipelago allow observation of common species, involving identification and recording of behavior in nature. Prerequisite: BIOL 180, FISH 250, ENVIR 100, OCEAN 101, or OCEAN 200. Offered: A.

FHL 375 Marine Mammals of the Salish Sea (5) NW Deborah Ann Giles An overview of the marine mammals found in the Salish Sea: their biology, habitats and conservation. Field trips throughout the San Juan Archipelago allow observation of common species, involving identification and recording of behavior in nature. Prerequisite: BIOL 180, FISH 250, ENVIR 100, OCEAN 101, or OCEAN 200. Offered: A.

FHL 430 Marine Zoology (5) NW Survey of groups of invertebrate animals represented in the San Juan Archipelago; natural history, functional morphology,
ecology, distribution, habitat, adaptation, trophic interrelationships, and evolution. Prerequisite: BIOL 445, which must be taken concurrently; permission of Friday Harbor director. Offered: jointly with BIOL 430.

**FHL 432 Marine Invertebrate Zoology (9) NW**
Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed live, and studied in detail. Taken at Friday Harbor Laboratories. Not open for credit to students who have taken BIOL 434. Offered: jointly with BIOL 432; S.

**FHL 435 Research Apprenticeship in Marine Science (15) NW**
Immersive quarter in research n close collaboration with one-three faculty mentors on a specific topic that varies with the apprenticeship. Students engage in laboratory or field research in marine science, involving gathering, analyzing, and communicating results as part of a research team. Offered: jointly with BIOL 435/MARBIO 435; ASpS.

**FHL 440 Marine Botany (5) NW**
Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Taken at Friday Harbor laboratories. Prerequisite: either BIOL 220, BIO 220, or TESC 140; BIOL 430, which must be taken concurrently. Offered: jointly with BIOL 445.

**FHL 446 Marine Botany: Diversity and Ecology (9) NW**
*Thomas F Mumford* Introduces marine plants - the diversity, life histories, physiology, and ecology of seaweeds, seagrasses, and marsh plants in the Salish Sea. Emphasizes field and laboratory work, including the application of molecular techniques to explore algal diversity and evolution. Offered: S.

**FHL 450 Nearshore Ecology Research Experience (6) NW**
*M. Dethier* A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of aquatic animals, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 450; A.

**FHL 451 Comparative Anatomy and Physiology of Marine Organisms (5) NW**
*Adam P. Summers* Challenges and opportunities presented by the marine environment. Relationship between organismal form and physiological function in marine animals and plants. Field trips for collection of live local organisms. Physiology experiments and CT scanning. Offered at Friday Harbor Laboratories. Prerequisite: either BIOL 220, BIOL 240, or FISH 270/MARBIO 270/OCEAN 270; recommended: Q SCI 381 or equivalent. Offered: jointly with BIOL 471; A.

**FHL 470 Research in Marine Biology (1-15, max. 15) NW**
*Billie J Swalla* A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research in marine biology; credits vary with the scale of the project with may include lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 470; A.

**FHL 490 Marine Sciences Seminar (1, max. 3) NW**
Students attend seminars by marine scientists each week and ask questions about their seminars. Offered: ASp.

**FHL 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW**
An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FISH 492/MARBIO 492; S.

**FHL 495 Special Topics in Natural Science (3-5, max. 10)**
Special topics courses in the natural sciences that take advantage of unique opportunities at the Friday Harbor Laboratories. Offered: A.

**FHL 496 Comparative Anatomy and Physiology of Marine Organisms (5) NW**
*Adam P. Summers* Challenges and opportunities presented by the marine environment. Relationship between organismal form and physiological function in marine animals and plants. Field trips for collection of live local organisms. Physiology experiments and CT scanning. Offered at Friday Harbor Laboratories. Prerequisite: either BIOL 220, BIOL 240, or FISH 270/MARBIO 270/OCEAN 270; recommended: Q SCI 381 or equivalent. Offered: jointly with BIOL 471; A.

**FHL 497 Comparative Anatomy and Physiology of Marine Organisms (5) NW**
*Adam P. Summers* Challenges and opportunities presented by the marine environment. Relationship between organismal form and physiological function in marine animals and plants. Field trips for collection of live local organisms. Physiology experiments and CT scanning. Offered at Friday Harbor Laboratories. Prerequisite: either BIOL 220, BIOL 240, or FISH 270/MARBIO 270/OCEAN 270; recommended: Q SCI 381 or equivalent. Offered: jointly with BIOL 471; A.

**FHL 498 Ecology and Conservation of Marine Birds and Mammals (9/15) NW**
An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FISH 492/MARBIO 492; S.

**FHL 499 Special Topics in Natural Science (3-5, max. 10)**
Special topics courses in the natural sciences that take advantage of unique opportunities at the Friday Harbor Laboratories. Offered: A.

**FHL 528 Advanced Topics in Fish Biology (9, max. 27)**
Focuses on various aspects of fish biology, such as functional morphology, sensory biology, or swimming mechanics. Taught at Friday Harbor Laboratories. Offered: S.
FHL 536 Comparative Invertebrate Embryology (9)
Studies diversity in developmental patterns in major marine taxa. Analyzes evolutionary changes in development, with emphasis on observation of live embryos and larvae. Offered: jointly with BIOL 536; S.

FHL 548 Advanced Topics in Evolution and Development (9, max. 27) Focuses on various aspects of evolution and development of marine organisms, such as larval biology or evolution and development of metazoans. Students work on individual projects during the course. Taught at Friday Harbor Laboratories. Offered: S.

FHL 568 Advanced Topics in Ecology and Biomechanics (9, max. 27) Focuses on various aspects of ecology and biomechanics of marine organisms, such as experimental ecology, ocean acidification, deep sea biodiversity, or biomechanics. Taught at Friday Harbor Laboratories. Offered: S.

FHL 578 Special Topics in Science Communication (9) NW This FHL course focuses on different aspects of linkages between scientists and the public, including multiple ways to communicate science. Offered at Friday Harbor Laboratories; see FHL website for topic for next summer.

FHL 585 Advanced Topics in Neurobiology and Physiology (9, max. 27) Focuses on various aspects of neurobiology or physiology of marine organisms, such as neurobiology, ethology, or marine chemosensory biology. Taught at Friday Harbor Laboratories. Offered: S.

SCHOOL OF MARINE AND ENVIRONMENTAL AFFAIRS

SMEA 103 Society and the Oceans (5) I&S/NW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with ENVIR 103/JSIS B 103.

SMEA 201 Climate Governance: How Individuals, Communities, NGOs, Firms, and Governments Can Solve the Climate Crisis (5) NW/I&S, DIV Nives Dolsak, Patrick John Christie Examines climate change, its causes and impacts (on ecosystems, water availability, extreme weather, communities, health, and food) globally, nationally, and locally. Surveys its solutions (mitigation, adaptation, migration, and just transition), actors that implement them (governments, firms, NGOs, activists, communities, individuals) and approaches they use (regulation, markets, planning, innovation, social movements, behavioral change). Offered: jointly with ENVIR 201; A.

SMEA 407 International Organizations and Ocean Management (3) I&S
Surveys the manner in which international regimes and organizations govern and manage ocean use. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain organizations in different issues or regions, such as climate change or the Arctic.

SMEA 430 Development and the Environment (3) I&S, DIV Dolsak Critically examines policy approaches that balance economic development, natural resource use/environmental protection, and socioeconomic and political diversity. Examined policy approaches include market instruments, standards, information-based regulation, and corporate responsibility. Offered: A.

SMEA 436 Introduction to Environmental Law and Process (3) I&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

SMEA 480 Human Dimensions of Fishery Management (3) I&S/NW Techniques and
philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.

SMEA 485 Pacific Recreation and Tourism Issues (3) NW/I&S, DIV Miller Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

SMEA 499 Undergraduate Research (1-15, max. 15) Research on assigned topics under the supervision of faculty members.

SMEA 500 Introduction to the Human Dimensions of Global Change (3) Terrie Klinger Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social, and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores changes the use of coastal and ocean resources. Offered: A.

SMEA 501 Integrated Marine Affairs Practice (3) Survey of tools used in integrated assessment of contemporary problems in marine affairs explored through evaluation and comparison of theory and practical application. Prerequisite: SMEA 500 plus two of the following: SMEA 519, SMEA 536, SMEA 591, or permission of instructor. Instructors: Allison Offered: W.

SMEA 502 Decision Making and Action Taking in Marine Affairs (3) P. CHRISTIE Focuses on the dynamic interaction between human- and natural-world marine environmental systems and the policy- and decision-making, implementation, evaluation, and adjustment that must follow for effective response to problems that emerge within the human dimensions of global change in the marine environments framework. Prerequisite: SMEA 500; SMEA 501.

SMEA 506 International Law of the Sea (3)

SMEA 507 International Organizations and Ocean Management (3) Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with PUBPOL 538.

SMEA 509 Integrated Coastal Management (3) Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMEA 500 or permission of instructor. Instructors: Christie

SMEA 510 Topics in Marine Ecology (3) Klingler Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such species declines, species additions, pollution, and global change. Offered: W.

SMEA 511 Coastal Environment Management (3) Evaluation of human uses of the coastal and upland areas in the context of coupled social-ecological systems. Concepts and techniques for evaluation and practical application.

SMEA 512 Interviewing Methods and Environmental Topics (3) Miller Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.
SMEA 514 Marine Pollution Management Issues (3)  
Leschine  
Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.

SMEA 515 U.S. Coastal and Ocean Law (3-5)  
Kelly  
Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

SMEA 517 Marine Uses: Transportation and Commerce (3)  
Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMEA 500 or permission of instructor.

SMEA 519 Marine Policy Analysis (3)  
Dolsak  
Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

SMEA 521 Climate Change Governance (3)  
Exploration of major scientific, policy, and legal issues pertaining to governance of global climate change mitigation and adaptation by a diverse set of governmental and non-governmental actors. Offered: A.

SMEA 523 International Science and Technology Policy (3)  
Dolsak  
Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

SMEA 525 Marine Protected Area Management and Science (3)  
Fluharty  
Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

SMEA 530 Development and the Environment (3)  
Dolsak  
Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.

SMEA 536 Applied Microeconomics for Marine Affairs (3)  
Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

SMEA 537 Economic Aspects of Marine Policy (3)  
Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with ECON 537; W.

SMEA 538 Economics of Living Marine Resources (3)  
Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

SMEA 539 U.S. Fisheries Management and Policy (3)  
Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips. Offered: jointly with FISH 539.
SMEA 540 International Strategic Planning for Marine Resources (3) Marine economies are affected by declining resources, population pressure, and economic globalization. International examples and case studies are used to explore opportunities for strategic planning. Prerequisite: SMEA 500 or permission of instructor. Instructors: Kaczynski. Offered: A.

SMEA 550 Special Topics in Marine Studies (1-3, max. 18) Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.

SMEA 570 Thesis Presentation (1) Fluharty Completion of the thesis requirement for SMEA. Prepare a professional presentation to a peer audience. Credit/no-credit only. Offered: AWSpS.

SMEA 571 Non-Thesis Seminar (1) Leschine Capstone course for students enrolled in non-thesis track to synthesize and integrate their learning into concrete products. Credit/no-credit only. Offered: AWSpS.

SMEA 581 Case Study Research: Design and Methods (3) Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analyze, and report data. Offered: jointly with FISH 581.

SMEA 583 Research Design (3) N. Dolsak Examines types of evidence required to accurately describe a phenomenon, test a hypothesis, evaluate a program, and empower participants. Students learn and critically evaluate core research designs such as longitudinal, cross-sectional, experimental, case study, and activist research design. Students develop a research prospectus for an original study of their choice. Offered: W.

SMEA 584 Statistics for Marine and Environmental Policy (3) S. Jardine Surveys statistical approaches to data analysis with applications to marine and environmental policy, including descriptive statistics, data visualization, and hypothesis testing. Students learn how to make and use data-based claims, critically examine properties and limitation of various datasets relevant for marine and environmental policy, and use appropriate statistical software. Offered: A.

SMEA 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/ESS 585; Sp.

SMEA 591 Marine Science in the Coastal Zone (3) Ryan Kelly Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: A.

SMEA 600 Independent Study or Research (*-)

SMEA 650 Marine and Environmental Affairs Capstone Project (4-5, max. 9) N. Dolsak Student teams develop, manage, and complete an applied project relevant to marine or environmental affairs, in collaboration with an outside stakeholder and in consultation with faculty adviser.

SMEA 700 Master's Thesis (*-)

MARINE BIOLOGY

MARBIO 270 Aquatic Ecophysiology (5) NW Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with FISH 270/OCEAN 270.

MARBIO 300 Exploring Opportunities in Marine Science (1) Explores academic, research, and career opportunities in the field of marine science and
helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with FISH 300/OCEAN 300; W.

MARBIO 305 Scientific Writing in Marine Biology (3)
Introduces the fundamentals of scientific writing about research in marine biology: content, organization, critical thinking, structure, and the mechanics of grammar, wording and formatting. Students critically evaluate scientific writing in this discipline, and practice developing, writing, and revising concise arguments supported by scientific evidence. Prerequisite: Either C LIT 240, ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: A.

MARBIO 370 Marine Evolutionary Biology (5) NW
Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with FISH 370/OCEAN 370; Sp.

MARBIO 433 Marine Ecology (5) NW Jennifer Ruesink
Study of marine ecological processes such as recruitment, disturbance, competition, and predation, and their effects on the structure and diversity of marine communities. Weekend field trips to local intertidal habitats required. Prerequisite: either BIOL 356, BIOL 472, or a minimum grade of 3.4 in either BIOL 180, BIOL 240, B BIO 180, or T BIOL 120. Offered: jointly with BIOL 433; Sp, odd years.

MARBIO 435 Research Apprenticeship in Marine Science (15) NW
Immersive quarter in research in close collaboration with one-three faculty mentors on a specific topic that varies with the apprenticeship. Students engage in laboratory or field research in marine science, involving gathering, analyzing, and communicating results as part of a research team. Offered: jointly with BIOL 435/FHL 435; ASpS.

MARBIO 450 Nearshore Ecology Research Experience (6) NW M. Dethier
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of ecology of nearshore marine ecosystems, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with FHL 450; ASp.

MARBIO 460 Aquatic Animals Research Experience (6) NW
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of aquatic animals, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with FHL 460; ASp.

MARBIO 470 Research in Marine Biology (1-15, max. 15) NW
Billie J Swalla
A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research in marine biology; credits vary with the scale of the project with may include lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with FHL 470; ASp.

MARBIO 479 Research in Marine Biology (1-15, max. 15)
Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479/OCEAN 479; A WS P S.

MARBIO 488 Marine Biology in the Field (4/6)
Uses extensive field work to enhance students' practical knowledge of marine organismic and habitat diversity, and oceanographic processes. Development of integrative skills in experimental design, data collection, field interpretation, and communication. Prerequisite: One 300-level class in FISH, OCEAN, FHL, or BIOL. Offered: A.

MARBIO 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW
An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FHL 492/FISH 492; S.
SCHOOL OF OCEANOGRAPHY

OCEAN 100 Explore Oceanography at UW (1)
Explores the research and experiences of the Oceanography school's faculty, graduate students, and undergraduate students. Intended for freshmen, new transfer students, and other considering oceanography as a major. Credit/no-credit only. Offered: A.

OCEAN 101 Oceanography of the Pacific Northwest (5) NW Mikelle Nuwer Introduces the fundamental principles of oceanography by focusing on the waters that surround us - the Washington coast and Puget Sound. Investigates the geologic history of the Pacific Northwest, and the physics, chemistry, and biology of coastal waters using case studies. Intended for nonmajors. Offered: A.

OCEAN 102 The Changing Oceans (5)
I&S/NW Mikelle Nuwer Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.

OCEAN 115 Astrobiology: Life in the Universe (5)

OCEAN 121 Deep Sea Exploration: Submarine Volcanoes and Novel Life Forms (2) NW Debbie Kelley Examines the dynamic marine processes that shape the planet and cutting-edge oceanographic technologies used to explore the deepest oceans. Includes imagery of rarely seen submarine volcanic eruptions, hot springs, and novel life forms highlighting the interconnected geological-biological processes creating the most extreme environments on Earth. Offered: W.

OCEAN 200 Introduction to Oceanography (3) NW Focuses on importance of ocean processes for the functioning of our planet. Interdisciplinary case studies are used to examine relationships and interactions at macro-, meso-, and microscales in the ocean. Case studies build upon previous topics and examines human influence on these systems. Intended for science majors. Offered: Sp.

OCEAN 201 Introduction to Oceanography Lab (2) NW Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences. Students apply the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem. Co-requisite: OCEAN 200. Offered: Sp.

OCEAN 210 Integrative Oceans (4) NW Presents fundamentals of ocean science through regional case studies that illustrate the relationship between interdependent physical, chemical, biological, and geological process. Students apply tools from these scientific disciplines to understand major changes predicted for future oceanic environments. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH 250. Offered: A.

OCEAN 215 Methods of Oceanographic Data Analysis (4) Stephen C Riser Statistics, graphical representations, and analysis methods for oceanographic datasets using the PYTHON programming language. Prerequisite: Prerequisite: MATH 125. Offered: A.

OCEAN 220 Introduction to Field Oceanography (3) NW Design and conduct a field study in oceanography. Focuses on active learning, deployment of instruments, data collection, interpretation, and presentation. Required field trip during spring break. Prerequisite: OCEAN 200 and OCEAN 215 Offered: Sp.

OCEAN 230 Rivers and Beaches (3/5) NW Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between
landscapes and seascapes. Offered: jointly with ESS 230.

**OCEAN 235 Arctic Change (2/3) I&S/NW Rebecca A. Woodgate** Investigates the Arctic system of ocean, ice, atmosphere, and sea-floor; how human interact with it, and what the future of the Arctic means to the world. Includes sea-ice loss, climate impacts, and Arctic resource exploitation. Offered: Sp.

**OCEAN 240 Special Topics in Oceanography (1-5, max. 9) NW** Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.

**OCEAN 250 Marine Biology (3/5) I&S/NW Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/FISH 250; AS.**

**OCEAN 261 Introduction to Ocean Technology (2) NW** Introduces ocean science and technology in observational ocean science. Covers the basics of underwater sensor design, power, and data communication, and introduces the design and build process and the operational scope of the ERIS cabled observatory. Offered: S.

**OCEAN 270 Aquatic Ecophysiology (5) NW** Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with FISH 270/MARBIO 270.

**OCEAN 285 Physics Across Oceanography: Fluid Mechanics and Waves Laboratory (2) NW Susan L Hautala** Laboratory and tutorial further exploring the oceanography applications of fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: OCEAN 285, which must be taken concurrently; either MATH 125 or Q SCI 292, either of which may be taken concurrently; either PHYS 114 or PHYS 121. Offered: A.

**OCEAN 295 Chemistry of Marine Organic Carbon (5) NW** Explores the movement of organic carbon through the global carbon cycle, in the context of earth sciences and marine biogeochemical cycles. Prerequisite: either CHEM 152 or CHEM 120. Offered: W.

**OCEAN 300 Exploring Opportunities in Marine Science (1)** Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with FISH 300/MARBIO 300; W.

**OCEAN 310 Marine Geology and Geochemistry (5) NW** This course focuses on marine geologic processes including the formation and evolution of the ocean crust; marine sedimentation and diagenesis; subduction zone dynamics; the role of marine geology in seawater composition and sustaining the deep biosphere; and the relationship between marine geological processes and climate. Prerequisite: OCEAN 200; and either ESS 210 or ESS 211; and OCEAN 285 which may be taken concurrently. Offered: A.

**OCEAN 320 Coastal Oceanography (5) NW** The formation of, and processes within, coastal ocean systems emphasizing the geological evolution of coastal and estuarine environments and the physical dynamics within them, including waves, currents, river plumes, and sedimentary processes. Influences of physical processes on marine chemical cycling and biological productivity in the coastal ocean. Prerequisite: OCEAN 285; ESS 210. Offered: W.

**OCEAN 330 Marine Biogeochemical Cycles (5) NW** Covers the distribution of life and chemical elements in the ocean; the relationship between them; and the physical processes affecting these patterns. Emphasizes how marine organisms and the structure
of marine ecosystems influence the fate of carbon and other elements in the ocean. Prerequisite: OCEAN 210; OCEAN 295; BIOL 200. Offered: Sp.

OCEAN 340 Interdisciplinary Topics in Oceanography (1-5) NW Special topics of an interdisciplinary nature setting ocean into a broader context.

OCEAN 351 Foundations of Ocean Sensors (3) NW, QSR Experiential learning giving students foundational knowledge of methods used to observe key quantities that characterize marine environments. Includes theory and application of sensor design and construction principles, in the context of inferences and hypothesis-testing about key physical, biological, chemical, and geological dynamics in the oceans. Prerequisite: OCEAN 215; OCEAN 285. Offered: W.

OCEAN 355 From Big Bang to the Blue Planet (3) NW Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.

OCEAN 361 Ocean Technology I: Introduction to Underwater Observational Sensor Design and Build (2) NW Combines ocean science and technology in a design and build course utilizing the ERIS cabled observatory at the UW Oceanography dock. Students apply the basics of sensor design, power, and data communication to individual underwater observatory projects. Prerequisite: OCEAN 261, which may be taken concurrently. Offered: S.

OCEAN 370 Marine Evolutionary Biology (5) NW Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with FISH 370/MARBIO 370; Sp.

OCEAN 401 Special Topics in Chemical Oceanography (3) NW Randie Bundy

OCEAN 409 Marine Pollution (3) I&S/NW Randie Bundy Explores anthropogenic impacts on the oceans and marine organisms. Examines how scientific understanding informs environmental management, thereby linking science and society. Students develop a detailed understanding of the major categories of anthropogenic pollutants on marine systems, how they impact the environment, their sources, and fates. Prerequisite: OCEAN 101, OCEAN 102, OCEAN 200, OCEAN 250, or permission of instructor Offered: A.

OCEAN 410 Marine Geology and Geophysics (4) NW William Wilcock Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either OCEAN 310 or ESS 211 Offered: jointly with ESS 410; A.

OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW

OCEAN 412 Seismic Exploration (3) NW E. Roland Saenger Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to geologic investigations, tectonics and mineral exploration. Practice in the interpretation of subsurface structure. Prerequisite: ESS 311 or ESS 314, or OCEAN 285 and OCEAN 310. Offered: jointly with ESS 467; Sp.

OCEAN 421 Special Topics in Physical Oceanography (3) NW

OCEAN 423 Ocean Circulation and Climate (3) NW Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: MATH 125; and PHYS 123 or OCEAN 285.

OCEAN 430 Biological Oceanography (4) NW Examines marine organisms, their quantitative distribution in time and space, and their interactions with the ocean. Emphasizes dominant pelagic forms of phytoplankton, bacterioplankton, and archaeoplankton; and their predators, viruses, and zooplankton. Case studies explore extreme environments, coral reefs, influence of climate change on oceanic ecosystems, and the coastal ocean. Prerequisite: BIOL 200; OCEAN 210. Offered: A.
OCEAN 431 Special Topics in Biological Oceanography (3 NW) Reviews current research. Topics include global change effects on marine organisms, marine pathogens and emerging diseases, introduced species, marine viruses, astrobiology, hydrothermal vents, symbiosis, animal physiology, larval forms and dispersal, biogeography, and environmental ethics. Prerequisite: OCEAN 330

OCEAN 443 Undergraduate Thesis: Proposal (3 NW) Work closely with faculty mentors to conceptualize and write a proposal for independent thesis research. Prerequisite: OCEAN 220, OCEAN 310, OCEAN 320, or OCEAN 330. Offered: W.

OCEAN 444 Undergraduate Thesis: Research (2) Work closely with faculty mentors to conduct thesis research as designed in OCEAN 443 in a field, laboratory, or other guided research setting. Prerequisite: OCEAN 443. Offered: Sp.

OCEAN 445 Undergraduate Thesis: Data Analysis and Writing (3 NW) Analyze results from senior thesis experiments and present results in a series of drafts and a final paper. Results are presented at a two-day long public research symposium and on the students' individual websites. Prerequisite: OCEAN 444. Offered: Sp.

OCEAN 450 Climatic Extremes (4 NW) Course examines Earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate. Offered: W.

OCEAN 452 Marine Geospatial Information Science (3 NW) Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3 NW) Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical, and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology. Offered: W.

OCEAN 461 Advanced Ocean Technology - Project Design and Management (2 NW) Project management practicum in the design, build, operations, and management of observational ocean science technology. Students oversee and mentor ongoing design and build projects, with attention to design criteria and deployment timelines. Prerequisite: OCEAN 361. Offered: S.

OCEAN 475 Current Research in Climate Science Seminar (3, max. 6) Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/ESS 475; A.

OCEAN 477 Seminar in Marine Biology (3 NW) Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 479/FISH 479; W.

OCEAN 479 Research in Marine Biology (1-15, max. 15) Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479/MARBIO 479; AWSpS.

OCEAN 480 Global Ocean - Human Culture (3 I&S/NW J. Delaney) Theme and project-based exploration of the role of the ocean basins in human history, poetry, music and the arts related to the seas, the evolution of ships, development of trade routes, modern marine commerce and communications, living and non-living resources, hazards, projection of sea power, entertainment and recreation, ocean science-modulation of climate, exploration of exotic submarine hydrothermal systems, and oceans beyond earth. Prerequisite: permission of instructor; recommended: Capability to conduct upper-division academic inquiry into selected themes, including an ability to conceive of, and implement an engaging project that will be
presented and graded at the end of the class. Well established writing ability. Offered: W.

OCEAN 481 Puget Sound and Estuarine Oceanography (3) NW Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

OCEAN 482 The Changing Arctic Ocean (3) NW Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent scientific advances. Considers the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Prerequisite: OCEAN 200 or OCEAN 210 and BIOL 180, BIOL 200 or BIOL 220. Offered: Sp, even years.

OCEAN 492 Friday Harbor Apprenticeship (9/15) NW Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.

OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

OCEAN 497 Advanced Special Topics in Oceanography (1-15, max. 15)

OCEAN 499 Undergraduate Research (1-15, max. 24) Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.

OCEAN 500 Proposal Writing and Professional Development Seminar for Entering Graduate Students (1/2, max. 3) Gabrielle Rocap Seminar for entering graduate students in the School of Oceanography. Topics include development of a research proposal suitable for submission to the National Science Foundation Graduate Research Fellowship Program competition, oral communication skills, peer review, time and stress management, communication with advisors and committee members, and post-graduate career planning. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

OCEAN 502 Marine Geospatial Information Science (3) Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12) Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.

OCEAN 507 Puget Sound and Estuarine Oceanography (3) Keister, MacCready Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

OCEAN 508 The Changing Arctic Ocean (3) Deming, Woodgate Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most
recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.

OCEAN 509 Seminar (1, max. 30) Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: AWSp.

OCEAN 510 Physics of Ocean Circulation (3) Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

OCEAN 511 Introduction to Fluid Dynamics (4) Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesion tensors, stress-strain relations; Kelvin’s theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/ATM S 505; A, odd years.

OCEAN 513 Geophysical Fluid Dynamics II (3) Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green’s function, setup of general circulation; atmospheric “channels” versus ocean “basins”; wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.

OCEAN 514 Waves (3) Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 515 Ocean Circulation: Observations (3) Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

OCEAN 517 Methods and Measurements in Physical Oceanography (3) Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor.

OCEAN 518 Scientific Writing and Graphics (2) Waddington, Warren Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/ESS 519; Sp, odd years.

OCEAN 520 Marine Chemistry (3) Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world’s oceans. Offered: A.

OCEAN 521 Aquatic Chemistry (3) Alexander C Gagnon Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Offered: W.
**OCEAN 522 Marine Organic Geochemistry (3)**
Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

**OCEAN 523 Geochemical Cycles (4)**
Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with ATM S 508/CHEM 523.

**OCEAN 529 Seminar on Chemical Oceanography (**, max. 30)
Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 530 Marine Bacteria, Archaea, and Viruses (3)**
Explores the role of marine microorganisms in transformations of dissolved and particulate organic matter. Covers the functional and phylogenetic diversity of bacteria, archaea, and viruses in the marine environment; the fate of organic carbon in the microbial loop; and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W, odd years.

**OCEAN 531 Marine Phytoplankton and Biogeochemistry (3)**
Covers phytoplankton in the marine environment: evolution, ecology, primary productivity, and physiology, emphasizing their role in the global carbon cycle; spatial and temporal distributions of phytoplankton and how these patterns may change as ocean conditions change; and methods for determining distributions and rates in different ocean ecosystems. Prerequisite: permission of instructor. Offered: W, even years.

**OCEAN 532 Marine Zooplankton Ecology (3)**
Examines the role of zooplankton in ecosystems and biogeochemical cycles. Covers the distribution and abundance of zooplankton in space and time; small-scale distributions; morphology and behavior; population dynamic, energetics, and secondary production; trophic structure and dynamics; biogeochemistry; impacts of climate change; and models of populations and food chains.

**OCEAN 533 Marine Benthic Ecology (3)**
Analyzes marine communities associated with the porous boundaries of the ocean, from sedimenterd seafloor and hydrothermal vents to sea ice (inverted benthos); emphasizing nutrition to these communities, including sinking organic aggregates, themselves porous habitats, and the role of symbiosis. Prerequisite: permission of instructor. Offered: W, even years.

**OCEAN 535 Biological Oceanography (3)**
Examines major patterns and processes in upper ocean pelagic ecosystems, emphasizing quantitative analysis of mechanisms controlling production and abundances of organisms, from plankton to fish. Introduces interdisciplinary study of effects of anthropogenically induced changes in climate and ocean chemistry on organisms, ecosystem processes, and biogeochemical cycles. Offered: A.

**OCEAN 539 Seminar in Biological Oceanography (**, max. 30)
Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 540 Marine Geology and Geophysics Processes (3)**
Nittrouer, Solomon Synthesis of processes that form ocean basins and fill them with sediment, including: plate tectonics and the creation, evolution, and subduction of ocean crust; accumulation of terrestrial, biogenic, and authigenic sediments; and the history of paleoceanographic events recorded in the seafloor. Offered: W.

**OCEAN 541 Marine Sedimentary Processes (3)**
Andrea S Ogston Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

**OCEAN 544 Subseafloor Hydrogeology and Geochemistry (3)**
Solomon Introduces the occurrence, composition, and movement of groundwater in the ocean crust and its role in a wide
range of geologic and biogeochemical processes. Includes basic theories of groundwater motion, heat transport, solute transport, and hydromechanics with applications to diverse subseafloor environments ranging from mid-ocean ridges to subduction zones. Offered: Sp.

**OCEAN 545 Oceanic Lithosphere (3)**  
*William Wilcock*  
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

**OCEAN 546 Continental-Margin Sedimentation (3)**  
*Charles Nittrouer*  
Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 546.

**OCEAN 549 Seminar in Geological and Geophysical Oceanography (*, max. 30)**  
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 550 Geochemistry and Geophysics of Melt Generation (3)**  
Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor.

**OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1)**  
Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

**OCEAN 554 Paleoclimate Proxies (3)**  
*Alexander, Sachs*  
Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554.

**OCEAN 558 Climate Modeling (3)**  

**OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9)**  
Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

**OCEAN 560 Atmosphere/Ocean Interactions (3)**  
Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: OCEAN 512/ATM S 509. Offered: jointly with ATM S 560.

**OCEAN 569 Topics in Physical Oceanography (1-4, max. 30)**  
Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

**OCEAN 570 Marine Microbial Interactions (1-3, max. 9)**

**OCEAN 572 Marine Protist Ecology (1-3, max. 9)**  
Examines the phagotrophic (protozoa) and mixotrophic (both photosynthetic and phagotrophic) protists, including: interactions with predators and prey; and adaptations to changing environments, evolutionary, and ecological implications of mixotrophy. Prerequisite: OCEAN 532 or permission of instructor. Offered: Sp.

**OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18)**  
Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.
OCEAN 580 Aquatic Kinetics (3) Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO2 hydrolysis, Fe, Mn, and H2S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O2/H2S interfaces. Prerequisite: permission of instructor.

OCEAN 583 Isotope Biogeochemistry (3) The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO3 dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 584 Ocean Tracers and Mixing (3) The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

OCEAN 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/ESS 586.

OCEAN 587 Fundamentals of Climate Change (3) Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587.

OCEAN 588 The Global Carbon Cycle and Climate (3) Emerson Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588; W.

OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18) Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

OCEAN 593 Climate Science Seminar (1) Mote Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/ESS 593; W.

OCEAN 596 Climate Science Capstone Project ([1-5]-, max. 5) Mote Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

OCEAN 600 Independent Study or Research (*) Offered: AWSpS.

OCEAN 700 Master's Thesis (*) Offered: AWSpS.

OCEAN 800 Doctoral Dissertation (*) Offered: AWSpS.

QUANTITATIVE SCIENCE

Q SCI 190 Quantitative Analysis for Environmental Science (5) NW, QSR S. Scherba Jr Covers applications of precalculus techniques and concepts to environmental, ecological, biological, and natural resource problems stressing the formulation,
Credit allowed for STAT 403 or STAT 503 but not Q SCI 403 I

Q SCI 403 Introduction to Resampling Inference (4) NW
Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial.

Offered: jointly with STAT 480; W, odd years.

Q SCI 451 Analytical Methods in Wildlife Science (3)

NW Beth Gardner
This course provides a foundation of techniques commonly used by wildlife biologists in data collection and analysis. Emphasizes parameter estimation, analysis of variance, and the interpretation of statistical tests. Topics include optimization and curve fitting, which are used to model animal populations and natural resources. The course includes the application of statistical models to real-world data. Recommended: Q SCI 482; Q SCI 341, STAT 311/ECON 311, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381.

Offered: jointly with STAT 403; Sp.

Q SCI 454 Ecological Modeling (5) NW T. Essington
Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with FISH 454; W.

Q SCI 458 Advanced Ecological Modeling: Applying Ecological Models to Manage and Conserve Natural Resources (5) NW Trevor A. Branch
Models of fish and wildlife population abundance, including age-structured models, the interaction between human exploitation and protected areas, calculating extinction risk, and examining the effect of alternative management strategies on natural populations. A core part of the course is fitting models to data using both maximum likelihood and Bayesian approaches, and increasing the programming abilities of students by implementing models in R. Recommended: FISH 454/Q SCI 454; and familiarity with the programming language R.

Offered: jointly with FISH 458; Sp.
Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW I. Ganguly Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.

Q SCI 486 Experimental Design (4) NW Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482. Offered: WSp.

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory or modeling work. Offered: AWSpS.

Q SCI 498 Internship (1-15, max. 15) NW Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Offered: AWSpS.

Q SCI 499 Research Experience (1-15, max. 15) Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no-credit only.

QUANTITATIVE ECOLOGY AND RESOURCE MANAGEMENT

QERM 514 Analysis of Ecological and Environmental Data I (4) Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMs: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.

QERM 600 Independent Study or Research (*-)

QERM 700 Master's Thesis (*-)

QERM 800 Doctoral Dissertation (*-)

QUATERNARY SCIENCES

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6) Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no-credit only.

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6) Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Prerequisite: graduate standing. Credit/no-credit only.

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3) Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made
environmental changes, including those of climate, in context of recent earth history. Prerequisite: background courses in earth sciences and ecology. Credit/no-credit only.
THE INFORMATION SCHOOL

INFORMATICS

INFO 102 Gender and Information Technology (5) I&S, DIV Explores the social construction of gender in relation to the history and contemporary development of information technologies. Considers the importance of diversity and difference in the design and construction of innovative information technology solutions. Challenges prevailing viewpoints about who can and does work in the information technology field. Offered: A.

INFO 180 Introduction to Data Science (4) QSR Survey course introducing the essential elements of data science: data collection, management, curation, and cleaning; summarizing and visualizing data; basic ideas of statistical inference, machine learning. Students will gain hands-on experience through computing labs.

INFO 198 Exploring Informatics (1-5, max. 15) Introduces a variety of Informatics and Information Science topics to pre-Informatics and non-Informatics students.

INFO 200 Intellectual Foundations of Informatics (5) I&S Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 201 Technical Foundations (5) QSR Introduces fundamental tools and technologies necessary to transform data into knowledge. Covers the full information lifecycle, including the collection, storage, analysis and visualization of data. Core competencies underlying this process, including functional programming, use of databases, data wrangling, version control, and command line proficiency, are acquired through real-world data-driven challenges.

INFO 270 Data Reasoning in a Digital World (4) I&S Our world is rife with misinformation. This is a course about "calling b***s*** on" - spotting, dissecting, and publicly refuting false claims and inferences based on quantitative, statistical, and computational analysis of data. Spotting misinformation; causal fallacies; statistical traps; data visualization; big data; interpreting scientific claims; fake news and social media; refutation techniques. Prior math/stat background unnecessary.

INFO 290 Orientation to Informatics (1) Provides newly admitted Informatics students with background necessary for success in the major. Includes discussion of iSchool/Informatics mission, culture, values, expectations, resources, degree and career options. Addresses effective classroom performance including teamwork and leadership, and focuses on resume, LinkedIn profile, portfolio, interview and career fair preparation.

INFO 300 Research Methods (5) Introduction to the research methods used in informatics for understanding technology, information, and human behavior. Methods incorporate those from design, engineering, and social science. Topics include science and invention, research contribution types, research through design, theory, ethics, and qualitative/quantitative empirical methods. Prerequisite: either STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 290, STAT 311, STAT 390, QMETH 201, or Q SCI 381.

INFO 310 Information Assurance and Cybersecurity (5) I&S, QSR Provides a theoretical and practical introduction to information assurance and cybersecurity (IAC). Includes methods and practices for securing information and information systems. Covers how vulnerabilities arise, recognizing evolving threats, and mitigating them. Explores the role of
risk analysis, information privacy, accountability, and policy.

INFO 312 Enterprise Risk Management (4) Examines the risk inherent in use of technology, and how to manage risk to information, data, and technology in organizations. Topics include risk management frameworks, risk tolerance, key risk indicators, the legislative and regulatory environment, compliance, and new avenues of risk such as social media and mobile.

INFO 314 Computer Networks and Distributed Applications (5) NW Basic concepts of local and wide-area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems.

Prerequisite: CSE 142 or CSE 143.

INFO 330 Databases and Data Modeling (5) QSR Introduction to relational database management systems, focused on relational theory and the application of conceptual, logical, and physical database modeling. Key topics include the relational model, SQL, entity-relationship modeling, three-tier architectures, implementation of database applications, and related topics in information systems.

INFO 331 Introduction to Information Architecture (5) QSR Introduction to Information Architecture (IA) methodologies and tools used to design and build information spaces. Discusses IA core concepts of navigation, labeling, data modeling, taxonomy and information personas. Also discusses wireframes, sitemaps, information design and integrating IA work with a UX strategy.

INFO 340 Client-Side Development (5) QSR Introduction to client-side web development including markup, programming, protocols, libraries, frameworks, and techniques for creating effective, usable, dynamic, and responsive applications that meet user needs. Includes an introduction to web development roles within organizations, content management systems, and other tools to build and manage websites and applications. Prerequisite: CSE 142 or CSE 143; and INFO 201.

INFO 350 Information Ethics and Policy (5) I&S Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including; intellectual property, file sharing, free speech, privacy, and national security.

INFO 360 Design Methods (4) I&S Design methods for identifying user needs, devising new design concepts, prototyping these concepts, and evaluating utility and usability. Introduces theory and practice of user-centered design. Methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasizes incorporating people in the entire design process.

INFO 362 Visual Information Design (5) VLPA Build fluency in expressing information visually as diagrams, charts, maps, and icons. Learn to solve design problems, give and receive critique, follow an iterative process of design refinement, and learn technical skills. Understand the nature of visual potential, visual design principles, and the impact of color and typography.

INFO 365 Mobile Application Design (5) Fundamentals of mobile UX & UI design through the lens of creating your own mobile OS and core mobile apps in a design studio setting. Includes creating a mobile design language and mobile patterns, app review by professional designers, and how design for mobile is unique from other mediums. Recommended: INFO 360

INFO 370 Core Methods in Data Science (5) QSR Surveys the major topics within data science, including data ingestion, cloud computing, statistical inference, machine learning, information visualization, and data ethics. Includes programming in R and Python. Prerequisite: INFO 201; and CSE 142 or CSE 143; and either STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 290, STAT 311, STAT 390, QMETH 201, or Q SCI 381.

INFO 371 Advanced Methods in Data Science (5) QSR Introduces modern methods in applied data science. Emphasizes practical applications and analysis of real-world data through a survey of common techniques in supervised and unsupervised
machine learning, and methods for experimental design and causal inference. Students learn functional, procedural, and statistical programming techniques for working with data. Prerequisite: INFO 370.

INFO 380 Information Systems Analysis and Design (5) Prepares students to participate in structured systems analysis and design efforts. Students learn how to analyze system context, behavior, and structure; identify stakeholders; gather requirements; and redesign systems to make them more beneficial to the organization.

INFO 386 Professionalism in Informatics (4) Examines professionalism, communication, teamwork, leadership, and interpersonal networking to strengthen students as they seek to excel professionally. Covers developing and presenting business cases and project plans, personal branding, conducting informational interviews, and effective written and oral communication.

INFO 402 Gender, Race, and Information Technology (4) I&S, DIV Explores Information Technology from a feminist standpoint. Considers the intersection of difference - gender, race, class, sexuality, and ability - in technology studies and work. There is a historical overview of women in technology, an introduction to technology education, and discussion about women in the IT workforce.

INFO 415 Emerging Topics in Information Assurance and Cybersecurity (1-5, max. 15) Explores emerging topics and unique subjects in information assurance and cybersecurity (IAC) not otherwise covered in the IAC curriculum.

INFO 431 Metadata Design (3) Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 331.

INFO 433 Content Strategy in Information Architecture (4) I&S Introduces key concepts in understanding the content lifecycle in context of an organization's web, mobile, and other communication channels. Provides knowledge of key theories and principles in information architecture and practical application of skills including user research; information collection and analysis; and information organization and presentation.

INFO 441 Server-Side Development (5) Introduces server-side web development programming, services, tools, protocols, best practices and techniques for implementing data-driven and scalable web applications. Connects topics from human-centered design, information architecture, databases, data analytics and security to build a solution. Prerequisite: CSE 142 or CSE 143; and either INFO 340 or CSE 154; and INFO 330.

INFO 442 Cooperative Software Development (5) Introduces the theory and practice of cooperative user-centered software development, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360; and INFO 340 or CSE 154.

INFO 448 Mobile Development: Android (5) Application development for Android devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and
industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-focused systems. Programming in Java and XML. Prerequisite: CSE 143; and INFO 340 or CSE 154.

**INFO 449 Mobile Development: IOS (5)** Application development for iOS devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-focused systems. Programming in Swift and XML. Prerequisite: CSE 143; and either INFO 340, INFO 343, or CSE 154.

**INFO 463 Input and Interaction (5)** Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models inform the design of new interaction techniques. Prerequisite: INFO 360.

**INFO 464 Value Sensitive Design (5)** VLPA Introduction to value sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: either INFO 360, DESIGN 383, CSE 440, or HCDE 419.

**INFO 465 Technology, Time and Design (4)** Explores relationship between information technology and time. From issues of shortened attention span, internet addiction, and longer-term perspectives on data curation and cultural heritage, considers time as a crucial element in how human beings experience life. Includes the critical role technology plays in that experience. Prerequisite: INFO 360.

**INFO 466 Moral Reasoning and Interaction Design (4)** What does it mean for a technology to be good or evil? Students learn about and critique existing design patterns, features, and products through a diverse set of ethical theories, and they design new technologies grounded in systematic principles of moral reasoning. Mix of studio and seminar. Prerequisite: INFO 350; and either INFO 360 or HCDE 210.

**INFO 468 Designing for Personal Health and Wellness (5)** I&S Focuses on human-centered design of technologies for personal health and wellness. Students will learn how to understand people's health and wellness needs, consider ethical implications, assess existing tools, and design new health and wellness technologies. Students will learn theoretical and empirical approaches to evaluating these technologies. Prerequisite: either INFO 200, HCDE 210, HCDE 310, HCDE 318, or DESIGN 206.

**INFO 474 Interactive Information Visualization (5)** VLPA, QSR Techniques and theory for visualizing, analyzing, and supporting interaction with structured data like numbers, text, and relations. Provides practical experience designing and building interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology. An empirical approach will be used to design and evaluate visualizations. Prerequisite: INFO 340 or CSE 154; CSE 143; and either QMETH 201, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 290, STAT 311, or STAT 390.

**INFO 478 Population Health Informatics (5)** I&S, QSR Introduces applications of Informatics skills to evaluating public health. Students will learn how to leverage their programming and data competencies towards measuring and describing the health of a population. Students will learn about and compute metrics of population health, and leverage visualization to communicate statistical insights to broad audiences. Prerequisite: INFO 201.

**INFO 481 Project Management in Informatics (4)** Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

**INFO 490 Project Capstone I (4)** Student-driven team project including definition of an information problem, a method of investigation, creation of a
project proposal, and completion of project deliverables. Prerequisite: INFO 300 or INFO 470; and INFO 360.

INFO 491 Project Capstone II (4) Includes design and implementation of a system or development of a research question intended to solve an information problem. Incorporates stakeholder and peer feedback, creation of project deliverables, presentation of the project in a public forum, and final assessment. Prerequisite: INFO 490.

INFO 495 Internship in Informatics (1-5, max. 12) Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

INFO 496 Service Learning in Informatics (1-5, max. 12) Utilization of skills in service of the community, as approved by faculty member. Work to be jointly supervised by faculty member (or approved academic sponsor) and on-site service supervisor. Credit/no-credit only.

INFO 497 Informatics Study Abroad (1-8, max. 18) International seminar, led by Information School faculty or researchers. Addresses a specialized area of informatics. Topics vary. May require language proficiency.

INFO 498 Special Topics in Informatics (1-5, max. 15) Various topics in informatics.

INFO 499 Independent Study (1-5, max. 15) Readings, design projects, or research under faculty supervision.

INFORMATION MANAGEMENT AND TECHNOLOGY

IMT 500 Foundations of Information Management (3) Examines the role and function of information and information management in individual, organizational, community, and social contexts. Topics include information and information management concepts; methods of managing information and information flows within organizations; and internal and external communication in professional settings.

IMT 510 Human Aspects of Information Systems (4) Social, organizational, cognitive, behavioral, and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 511 Introduction to Programming for Information and Data Science (4) Introduces fundamentals of computer programming as used for data science. Covers foundational skills necessary for writing stand-alone computer scripts, including programming syntax, data structuring, and procedural definition (functions). Includes programming environments (command-line) and version control. Emphasizes skills in algorithmic thinking, abstraction, debugging, and code reuse. Assumes no previous programming background. Offered: jointly with LIS 511.

IMT 519 Information Science Study Abroad (1-8, max. 18) International seminar, led by Information School faculty or researchers. Addresses a specialized area of information studies. Topics vary. May require language proficiency. Offered: jointly with LIS 519.

IMT 525 Information Management and Technology in Sports (3) Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

IMT 530 Organization of Information Resources (4) Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 535 Introduction to Information Architecture (5) Introduces concepts and methods of front- and
back-end information architecture. Covers back-end topics including data and content modeling, taxonomy, controlled vocabulary, SEO, search, and analytics. Covers front-end topics including design thinking, design process, design patterns, navigation, workflow, labeling, orientation, and information scent. Unifies front- and back-end IA.

**IMT 536 Metadata for Interactive Media (3)**
Explore new ideas and approaches for organizing and providing access to interactive media, particularly from a user-centered perspective. Design and conduct formative and evaluative user studies employing various qualitative and quantitative methods to determine information needs and seeking behaviors of various stakeholders in one or more interactive media domains. Offered: jointly with LIS 536.

**IMT 539 Metadata Design (3)**
Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Offered: jointly with LIS 539.

**IMT 540 Design Methods for Interactive Systems (4)**
Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

**IMT 541 Enterprise Information Systems Analysis and Design (4)**
Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing system and technology needs, defining information and work specifications, process and data modeling, and stakeholder analysis process; and input and output design, database design, test plans and implantation strategies in the design process.

**IMT 542 Information Structures Using XML (4)**
Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Offered: jointly with LIS 542.

**IMT 543 Relational Database Management Systems (4)**
Introduces relational database design, implementation, and management, with a focus on using relational database management systems (DBMS) to manage data in an organization. Topics include: data modeling tools and techniques, conceptual and logical database design, physical implementation, SQL, data management, and database administration. Recommended: INFX 502. Offered: jointly with LIS 543.

**IMT 546 Data Communications and Networking (4)**
Covers local and wide-area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.

**IMT 547 Social Media Data Mining and Analysis (4)**
Explores techniques for collecting and analyzing social media. Students gain direct experience with methods for collecting a social media corpus, defining features of activity that are relevant for analysis, and analyzing those features.

**IMT 549 Beginning Web Development (4)**
Teaches students how to build custom websites/applications from scratch, manage files in a version control system, and deploy them to publicly-accessible web servers. Focus is on client-side technologies, including HTML, CSS, and JavaScript. Existing basic programming knowledge is beneficial but not required. Offered: jointly with LIS 549.

**IMT 550 Policy and Ethics in Information Management (4)**
Explores a range of information issues in the social and organizational context of information professionals, including professional ethics, privacy, freedom of expression, and intellectual property. Gives students tools for analysis of the kinds of social and ethical issues that will arise in their future lives as information professionals.
IMT 551 Foundations of Organizational Information Assurance (3) Concepts, elements, strategies, skills related to life cycle of information assurance—involving policies, practices, mechanisms, dissemination, and validation—that ensure the confidentiality, integrity, and availability of information and information systems. Analyzes the information assurance planning process, including determination and analysis of information assurance organization goals, threat spectrum, risk, and legal and ethical issues.

IMT 552 Information Assurance Risk Assessment and Management (3) Examines the concepts, processes, and skills related to risk management in information assurance involving risk assessment, risk analysis, and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

IMT 553 Establishing and Managing Information Assurance Strategies (3) Applies and combines information assurance concepts, processes, and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

IMT 554 Foundations of Cybersecurity (4) Examines information security challenges and solutions, which information management professionals contend with when providing technology services and applications based on premises and cloud platforms. Students will solidify the terminology and security architecture via hands-on labs using open source and cloud based tools. Covers security topics based relevant attack vectors.

IMT 555 Information and Operational Risk (3) Examines the information dimensions of the most common types of operational risk including: internal and external fraud, regulatory noncompliance, processing errors, information security breaches, and technology failures; practical application of operational risk frameworks where the intersection of people, information, processes, systems, and external events can lead to financial loss.

IMT 556 Operational Risk Management in the Public and Private Sectors (3) Learn to identify, monitor, and mitigate operational risk exposures in corporations and government agencies, analyze risk appetites, and drive risk awareness at each level of corporate or government hierarchies. Examines technology failure and information sharing in crisis management, intellectual property, and data risk in various infrastructure sectors. Prerequisite: IMT 556.

IMT 558 Leading and Managing Enterprise Information Security (4) Examines the elements of managing and leading enterprise information security programs from a leadership perspective. Students review real world scenarios and explore challenges facing information security leaders. Develop an information security plan and program that meets the culture and goals of a company to address the challenging threat environment.

IMT 559 Cybersecurity Functions and Trends (4) Presents and analyzes cybersecurity technologies from a technical leadership stance to prepare information management professionals who will lead cybersecurity technical projects and information security teams. Introduces contemporary cybersecurity topics such as data analytics, digital forensic methodologies and cybersecurity applied in IoT (Internet of Things) and SDN (Software Defined Networks).

IMT 561 Visualization Design (4) Students develop a human-centered visualization design practice using real-world data. This process includes applying graphic principles of visual encoding to data; conducting design explorations using sketches and prototyping; and gathering user feedback to assess output. Design workshops provide opportunities for hands-on engagement with concepts and technical skills.

IMT 562 Interactive Information Visualization (4) Introduces techniques for visualizing, analyzing, and supporting interaction with structured data (numbers, text, graphs). Provides experience creating interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology principles. Students design and evaluate visualizations using perceptual and statistical accuracy.

IMT 563 Advanced Relational Database Management Systems (4) Conducts deeper investigation into construction of high-volume, robust database systems from conception through
IMT 565 Designing Information Experiences (4)
Explores experience design including user experience, customer experience, and service design. Covers the philosophical foundations of experience, how to design and evaluate experiences, and the business aspects of customer experience. The focus is on experiences of and with information.

IMT 569 Capstone I: Project Preparation (1)
Preparation for implementing a capstone project. Topics include choosing a project, team formation, professional communication with a project sponsor, identifying the scope of the project, assessing feasibility, developing a project charter and sponsor agreement. Prerequisite: completion of all MSIM core courses. Credit/no-credit only.

IMT 570 Research and Analysis for Information Management Professionals (4) Provides students with skills and methods to solve complex problems related to information management and business. Using a project model, students are introduced to a variety of data gathering and analysis techniques, culminating in the development of effective, data driven, recommendations specific to information management, systems and product development.

IMT 571 Social Network Analysis (4) Provide students with an understanding of the fundamental concepts, common methods, and analytical tools of social network analysis. Student will gain experience applying both exploratory and inferential methods to real-world problems within the social network domain.

IMT 572 Introduction to Data Science (4) Introduces a broad, non-technical overview of key concepts, skills, and technologies used in "data science". Provides a high-level introduction to common data science pipelines, such as experimental design, data collection and storage, basic analytics, machine learning, and data visualization, focusing on analyzing in real-world datasets using industry standard statistical packages. Offered: jointly with LIS 572.

IMT 573 Data Science I: Theoretical Foundations (4)
Introduces technically focused theoretical foundations of "Data Science." Provides an overview of key concepts, focusing on foundational concepts such as exploratory data analysis and statistical inference. Assignments are data-intensive, and require significant programming and statistical analysis. Students are expected to have college-level statistics and programming experience (R and python preferred) . Prerequisite: either Q METH 201, IMT 570, or equivalent college coursework; either CSE 142, or equivalent college coursework.

IMT 574 Data Science II: Machine Learning and Econometrics (4) Provides theoretical and practical introduction to modern techniques for the analysis of large-scale, heterogeneous data. Covers key concepts in inferential statistics, supervised and unsupervised machine learning, and network analysis. Students will learn functional, procedural, and statistical programming techniques for working with real-world data. Prerequisite: IMT 573.

IMT 575 Data Science III: Scaling, Applications, and Ethics (4) Focuses on utilizing advanced skills for analyzing and deriving insights from large-scale, heterogeneous data. Provides methods, tools, and frameworks for analyzing large-scale data, with topics including scaling and distributed computing, and network analysis. Special attention will be paid to ethical considerations in modern Data Science. Prerequisite: IMT 574.

IMT 576 Foundations of Strategic and Managerial Business Intelligence (4) Provides a broad overview of business intelligence (BI) including foundational BI concepts, strategies, techniques, and technologies. Primary emphasis is on the strategic and managerial perspective, focusing on how one designs, implements, and leverages business intelligence systems and strategies in management and leadership roles.

IMT 577 Business Intelligence Systems (4) Introduces fundamentals of how to architect and develop business intelligence systems for decision making. Topics include dimensional data modeling; extracting, transforming, and loading data (ETL); online analytical processing (OLAP); data warehouse
architecture; developing data visualizations to answer key business questions. Recommended: Students are expected to have basic relational database and SQL knowledge. INFX 543 is recommended for students without this knowledge.

**IMT 578 Research Seminar (1-4, max. 10)** Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities. Offered: jointly with LIS 578.

**IMT 580 Management and Strategic Leadership (4)** Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership, and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

**IMT 582 Strategic Information Initiatives (4)** Tools, techniques, approaches for identifying and planning entrepreneurial initiatives within organizations, including business information assessments, organizational readiness assessments, alignment with organizational priorities, information audits, processes for obtaining organizational investment in and commitment to new initiatives. Focuses on building business and economic justifications and leading strategic initiatives in organizations.

**IMT 585 Consulting Practices (4)** Provides an overview of Information consulting practices including consulting concepts, methodologies, approaches to consultative analysis and problem solving. Emphasizes a systems-thinking approach to practicing effective technical and interpersonal consulting behaviors as well as processes for internal and external consulting. Interpersonal/communication skills, client relationship management and change management are strongly emphasized. Prerequisite: IMT 580.

**IMT 586 Information Dynamics I (4)** Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics) . Offered: jointly with INSC 586.

**IMT 587 Principles of Information Project Management (4)** Introduces project management principles within information-related business contexts. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and their use of computer-based project management tools.

**IMT 588 Enterprise Project Management in Information Organizations (4)** Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.

**IMT 589 Special Topics in Information Management (1-4, max. 12)** Special study and research in topics of current concern to faculty and students.

**IMT 590 Internship in Information Management (1-5, max. 10)** Internship in the private or public sector, jointly supervised by faculty member and an on-site work sponsor. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

**IMT 596 Capstone II - Project Planning (2)** Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Cannot be taken for credit if credit received for LIS 596. Prerequisite: IMT 569. Credit/no-credit only.

**IMT 597 Capstone III - Project Implementation (2)** Implementation of a project demonstrating professional-level knowledge and skills based on a project charter and plan developed in IMT 596.
Cannot be taken for credit if credit received for LIS 597. Prerequisite: IMT 596. Credit/no-credit only.

**IMT 598 Emerging Trends in Information Management and Technology (3)** Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use, and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: permission of instructor.

**IMT 599 Practicum in Information Management (6)** Internship, organized or faculty-sponsored research project related to information management. Required for MSIM one-year students. Usually offered summer quarter. Prerequisite: IMT 500; IMT 550; IMT 570; and IMT 580 Credit/no-credit only.

**IMT 600 Independent Study or Research in Information Management (1-4)** Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

**INFORMATION SCIENCE**

**INSC 500 Faculty Seminar (2)** Presentations by faculty concerning research projects in which they are involved. Credit/no-credit only.

**INSC 501 Theoretical Foundations for Information Science (3)** In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

**INSC 508 Reading Seminar (2)** Discusses theoretical works and contemporary research in areas related to information science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no-credit only.

**INSC 512 Community Analysis (4)** Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Offered: jointly with LIS 512.

**INSC 518 Seminar in Human Information Interaction (4)** Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.

**INSC 538 Seminar in Information Organization (4)** Seminar on information organization, focusing on any area of information organization, including classification theory, metadata, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.

**INSC 541 HCI Design Foundations for Interactive Systems (4)** Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.

**INSC 542 HCI Design Studio for Interactive Systems (4)** Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.
**INSC 543 Value Sensitive Design (4)** Develops knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.

**INSC 546 Assistive Technology and Inclusive Design (4)** Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.

**INSC 547 Collaborative and Social Computing (4)** Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.

**INSC 555 Information and Values (4, max. 12)** Explores value systems within a range of different social and technological environments.

**INSC 557 Cultural and Ethnic Dimensions in Information Science (4)** Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasingly global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.

**INSC 561 PhD Colloquium on Professional Issue (1, max. 12)** Covers topics relating to the professional concerns of doctoral students and their future lives as academics and researchers. Credit/no-credit only.

**INSC 565 Teaching Practicum I (3)** Doctoral student participation in teaching in a faculty-taught course. Credit/no-credit only.

**INSC 566 Teaching Practicum II (3)** Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Prerequisite: INSC 565. Credit/no-credit only.

**INSC 570 Research Design (4)** Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employes an integrated (qualitative and quantitative) and focused approach.

**INSC 571 Quantitative Methods in Information Science (5)** Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

**INSC 572 Qualitative Methods in Information Science (5)** Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

**INSC 573 Design Inquiry and Methods in Information Science (5)** Acquire theory, methods, and skills for design-based inquiry, focusing on making artifacts - technical, informational, managerial, or organizational - and devising courses of action that enable people to mobilize. Students develop knowledge for design in Information Science through practical application of design methods and scholarly investigation of selected literatures.

**INSC 575 Research Practicum I (3)** Students work with a researcher from the Information School as an active member of a research team. Credit/no-credit only.

**INSC 576 Research Practicum II (3)** Students work with an approved researcher as an active member of a research team. Prerequisite: INSC 575 or permission of instructor. Credit/no-credit only.
INSC 578 Research Seminar (1-2, max. 15) Research presentations on a wide variety of topics in information science. Credit/no-credit only.

INSC 579 Research Colloquium in Information Science (2, max. 30) Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Prerequisite: permission of instructor. Credit/no-credit only.

INSC 581 Organizational Theories of Information Systems (4) Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

INSC 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.

INSC 588 Enterprise Project Management in Information Organizations (4) Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588.

INSC 590 Internship in Information Science (1-5, max. 12) Internship in the private or public sector. Jointly supervised by faculty member and an on-site work sponsor. May be taken in as many as four consecutive quarters. Prerequisite: Enrollment in Information School PhD program. Credit/no-credit only.

INSC 598 Special Topics in Information Science (1-5, max. 12)

INSC 599 Independent Study in Information Science (1-5, max. 30) Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

INSC 600 Independent Study or Research (*) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program adviser. Credit/no-credit only.

INSC 800 Doctoral Dissertation (*) Credit/no-credit only.

INFORMATION TECHNOLOGY APPLICATIONS

ITA 340 Introduction to Web Publishing (3) Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).

ITA 341 Client-side Scripting and Design (3) Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

ITA 342 Introduction to SQL and Data Storage Technologies (3) Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as an alternate database storage technology. Prerequisite: ITA 341.

ITA 343 Server-Side Programming and Web-data Integration (3) Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to
design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

LIBRARY AND INFORMATION SCIENCE

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3) Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

LIS 498 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

LIS 500 The Question of Information (2) Provides an overview of the major questions, concepts, and challenges engaging library and information science through seminar discussion. Exploration of the social context in which these questions and challenges occur, and their implications for both research and practice. Credit/no-credit only.

LIS 501 History and Foundations of Libraries and Librarianship (3) Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.

LIS 502 Database Concepts for Information Professionals (3) Introduces the terminology and concepts of managing data with relational database management systems. Students will gain introductory exposure to data modeling, relational database design, creation, and use. Credit/no-credit only. Credit/no-credit only.

LIS 505 Archival and Manuscript Services (3) Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

LIS 506 Introduction to Digital Preservation (4) Focuses on fundamental concepts and techniques for archiving born digital content. Practical activities include design and implementation of a digital preservation plan, auditing existing preservation services, and learning preservation standards such as file formats, metadata schemas, and certifications for trustworthy digital repositories.

LIS 507 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIS 508 History of Recorded Information (4) Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

LIS 509 Information and Contemplation (4) Explores how contemplative practices and perspectives can offer insights into today's information-intensive culture and how they can provide guidelines and design principles for the development of new information practices and technologies. Students explore a variety of contemplative/attentional practices and use these to investigate information trends, practices, and concerns.

LIS 510 Information Behavior (3) Introduction to the user-centered approach to information behavior. Theoretical foundations of need, creation, seeking, sharing, assessment, management, and use. Synthesis of information behavior studies, performance of information behavior field research, and application of the results of information behavior studies to design information systems, services, and policy.

LIS 511 Introduction to Programming for Information and Data Science (4) Introduces fundamentals of computer programming as used for data science. Covers foundational skills necessary for
writing stand-alone computer scripts, including programming syntax, data structuring, and procedural definition (functions). Includes programming environments (command-line) and version control. Emphasizes skills in algorithmic thinking, abstraction, debugging, and code reuse. Assumes no previous programming background. Offered: jointly with IMT 511.

LIS 512 Community Analysis (4) Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Offered: jointly with INSC 512.

LIS 513 Information and Migration (3) Graduate reading seminar about the intersection between human migration and information practices and behaviors. What are the particular needs, behaviors and practices of immigrants, in the US or abroad? How is immigration changing social movements? How do refugees, undocumented migrants and DREAMers in the US change the discourse about immigration?

LIS 516 Youth Development and Information Behavior in a Digital Age (3) Introduction to major theories of human development from birth through age eighteen and application of these theories to examine youth’s information behavior and digital media use at various developmental stages. Explores new research on the impact of digital media tools and practices on youth development. Prerequisite: either LIS 510 or permission of instructor.

LIS 519 Information Science Study Abroad (1-8, max. 18) International seminar, led by Information School faculty or researchers. Addresses a specialized area of information studies. Topics vary. May require language proficiency. Offered: jointly with IMT 519.

LIS 520 Information Resources, Services, and Collections (4) Concepts, processes, and skills related to information, including production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; and principles associated with development of recorded knowledge and collections.

LIS 521 Principles of Information Services (4) Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques.

LIS 522 Collection Development (3) Methods of developing and managing diverse and equitable library collections in academic, public, and school libraries. Acquisition methods, budgeting, collection development policies, selection tools and criteria, selector responsibilities, collection evaluation, challenges to materials, trends, and ongoing inclusion issues in publishing, licensing, and accessing library materials in all formats.

LIS 524 Adult Reader Services in the Public Library (3) Focuses on developing and performing readers’ advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to promote reading including reading advocacy, readers’ advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion groups.

LIS 525 Genres for Adult Readers (3) Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, romance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.

LIS 526 Government Publications (3) Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public’s right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no-credit only.

LIS 527 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and online sources.
LIS 528 Health Sciences Information Needs, Resources, and Environment (3) S.

FULLER Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with BIME 570; Sp.

LIS 529 Digital Humanities Librarianship (3)
Investigates the intersections between content and technology in humanities librarianship with a focus on information problems and resources in the fields of philosophy, religion, the arts, language, and literature.

LIS 530 Organization of Information and Resources (4) Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

LIS 531 Catalogs, Cataloging, and Classification (4)
Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 530.

LIS 534 Indigenous Systems of Knowledge (3)
Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing the cultures and artifacts of indigenous peoples.

LIS 536 Metadata for Interactive Media (3) Explore new ideas and approaches for organizing and providing access to interactive media, particularly from a user-centered perspective. Design and conduct formative and evaluative user studies employing various qualitative and quantitative methods to determine information needs and seeking behaviors of various stakeholders in one or more interactive media domains. Offered: jointly with IMT 536.

LIS 537 Construction of Indexing Languages (4)
Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Prerequisite: either LIS 530 or IMT 530. Credit/no-credit only.

LIS 539 Metadata Design (3) Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Offered: jointly with IMT 539.

LIS 542 Information Structures Using XML (4)
Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Offered: jointly with IMT 542.

LIS 543 Relational Database Management Systems (4) Introduces relational database design, implementation, and management, with a focus on using relational database management systems (DBMS) to manage data in an organization. Topics include: data modeling tools and techniques, conceptual and logical database design, physical implementation, SQL, data management, and
LIS 544 Information Retrieval Systems (3) Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.

LIS 545 Fundamentals of Data Curation (4) Examines principles, practices, and trends in the curation of digital research data. Provides a foundation in data management and data services for professional in institutions involved with data intensive research, scholarship, and innovation. Emphasizes data sharing, preservation, open access, metadata, and policy for development of reusable and accessible data resources.

LIS 546 Data Curation II: Advanced Topics (4) Examines a broad range of issues in the field of data curation. Focus on recent advances and challenging problems in the curation of research data across disciplines and new trends in open data resources and services for the general public. Draws on practical research findings, case studies, and current public and private sector data initiatives to examine key challenges in the field, as well as practical solutions applied by data professionals. Prerequisite: either LIS 545 or permission of instructor.

LIS 547 Design Methods for Librarianship (4) Focused on the human fabric of libraries - stakeholders, values, information technology, and policy - students develop theoretical knowledge and practical skills for design. Methods include futures workshops, scenarios, paper-prototyping, usability methods, among others. To conceptualize and steer design processes, the course includes an introduction to design methodologies and theory.

LIS 549 Beginning Web Development (4) Teaches students how to build custom websites/applications from scratch, manage files in a version control system, and deploy them to publicly-accessible web servers. Focus is on client-side technologies, including HTML, CSS, and JavaScript. Existing basic programming knowledge is beneficial but not required. Offered: jointly with IMT 549.

LIS 550 Information and Society (3) Covers concepts, processes, and issues related to the larger social context within which the life cycle of information and knowledge in society are investigated. Discussion topics include codes of ethics, professionalization, privacy, freedom of expression, intellectual property, social inequalities, and quality of life.

LIS 551 Intellectual Freedom in Libraries (3) Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no-credit only.

LIS 552 Critical and Existential Perspectives on the Information Society (3) Explores different conceptions of what it means to live in an "Information Society." Drawing upon readings in information science, history, philosophy, psychology, and anthropology, students will learn to unpack, problematize, and critique current conceptions of the role of information in society.

LIS 553 Information and Social Justice (3) Information technologies have the potential to help improve the quality of life of marginalized, underserved and impoverished communities around the world, and to promote social justice and inclusion. This course critically explores the intersection between information technologies, social change, and social justice.

LIS 556 Information Ownership and Control: Intellectual Property, Privacy, and Freedom of Speech (3) Concepts, processes, and issues related to the larger social context within which information and knowledge is owned, controlled, and accessed. Discussion topics include the ethics of copyright, patent, and trade secrets; intellectual freedom and access to information; privacy and the control of personal information; misinformation and "fake news."

LIS 560 Instructional and Training Strategies for Information Professionals (3) Develops knowledge and skills in instruction while applying theories of information literacy, teaching, and learning to instruction in an information environment. Teaches
students how to design, develop, and evaluate instructional programs for specific users.

**LIS 561 Storytelling in a Digital Age (3)** Instruction in the art and technique of oral and digital storytelling for all ages. Addresses both traditional and contemporary modes of storytelling, including transmedia. Sources include personal and family stories, folktales, and literary stories. Also explores non-library storytelling: therapeutic storytelling, organizational storytelling, and storytelling for qualitative research.

**LIS 563 Cultural History of Children's and Young Adult Literature (3)** Historical overview of illustrations and social values of children's and young adult literature written in English. Examines the influence of movements such as Romanticism, Rationalism, and postmodernism, as well as changing trends over time; also considers texts from a variety of cultural perspectives.

**LIS 564 Multicultural Resources for Youth (3)** Facilitates development of cross-cultural competence through authentic resources for children, tweens, and teens produced by or about ethnic minorities in the United States. "Issues" focus, providing knowledge in critical examination of various genres of multicultural resources as well as in strategies to use them.

**LIS 565 Resources for Digital Age Children (3)** Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for children, birth to age twelve. Applies theories form human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users'/ advisory for children.

**LIS 566 Resources for Digital Age Teens (3)** Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for teens. Applies theories form human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users'/ advisory for teens.

**LIS 567 Libraries as Learning Labs in a Digital Age (3)** Application of theories and research on youth development to inform practice about programming and resources for youth. Create programs based on current research, including programming such as story times, book talks, and maker spaces. Prerequisite: LIS 516.

**LIS 568 Information Literacy in a Digital Age (3)** Explores theories, process, and practical applications of information literacy. Examines the development of information literacy programs for libraries, community agencies, business, education, and other information settings. Explores the integral relationship between technology and information literacy, and assessment and evaluation of programs.

**LIS 569 Capstone I: Project Preparation (1)** Preparation for implementing a capstone project. Topics include choosing a project, team formation, professional communication with a project sponsor, identifying the scope of the project, assessing feasibility, developing a project charter and sponsor agreement. Prerequisite: completion of 30 credit hours. Credit/no-credit only.

**LIS 570 Research, Assessment, and Design (4)** Students recognize research and design opportunities, translate them into researchable frameworks, and conduct research in libraries and other information agencies. Covers problem definition, data collection and analysis, design and validation of alternative solutions, and reporting of results.

**LIS 572 Introduction to Data Science (4)** Introduces a broad, non-technical overview of key concepts, skills, and technologies used in "data science". Provides a high-level introduction to common data science pipelines, such as experimental design, data collection and storage, basic analytics, machine learning, and data visualization, focusing on analyzing in real-world datasets using industry standard statistical packages. Offered: jointly with IMT 572.

**LIS 577 Participatory Design in Libraries (4)** Explores participatory design, a method focusing on engaging users in a democratic and collaborative process between users and designers to create new technologies and learning activities. Explores how to interact with stakeholders, the role of design techniques, and the different phases in co-design.
Well suited for librarians, educators, and HCI researchers interested in understanding in design processes.

LIS 578 Research Seminar (1-4, max. 10) Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities. Offered: jointly with IMT 578.

LIS 579 Instructional Strategies for Legal Information (2) Develops knowledge and skills in instruction suited for working in a law library environment. Includes how to create and design a legal research course syllabus, how to use appropriate classroom technology, and how to give an effective presentation.

LIS 580 Management of Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources.

LIS 581 Marketing and Planning for Libraries (3) Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed.

LIS 582 Community Engagement Strategies in Information Science (3) Introduces students to strategies for building and sustaining relationships with community partners and other organizations to provide innovative services possible inside and outside of libraries. Students examine case studies, consider partner resources and needs, evaluate outcomes, and develop partner-based services in order to achieve community impact.

LIS 583 Cross Cultural Approaches to Leadership (3) Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership.

LIS 584 Knowledge Management (3) Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems.

LIS 586 Public Libraries and Advocacy (3) Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4) Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities.

LIS 588 Special Librarianship (3) Seminar in the practice of special librarianship in business and commercial firms, government agencies, other non-profits, and the independent consultant sector. Emphasis on management of non-traditional information organizations and the targeted information role.

LIS 589 Academic Librarianship (3) Academic librarianship is a complex combination of tradition and innovation. Academic libraries are redefining themselves, with changes in physical space, job titles, and the format of collections. This course examines the forces at work in academic libraries, from politics to technology, using the lens of social justice and equity.

LIS 590 Directed Fieldwork (1-5, max. 10) Minimum of 50 hours, maximum 250 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one quarter experience, however, may be repeated in a different
setting with a different set of learning objectives for a subsequent quarter. Prerequisite: LIS 510 or LIS 547, LIS 520, LIS 530, and LIS 570 Credit/no-credit only.

LIS 592 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Offered: jointly with LAW A 599.

LIS 593 Collection Management in Law Libraries (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials.

LIS 594 Management Skills in Law Libraries (3) Management topics in law libraries, including organizational structure, personnel, communication skills, project management, supervision and training. Credit/no-credit only.

LIS 595 Research and Writing in Law Librarianship (1-5, max. 5) Students select a topic in law librarianship in collaboration with the faculty member, research it fully, write a major paper, and present their paper. Topics may include historical trends, citation reform, digital media, user studies, etc. Prerequisite: law librarianship majors or permission of instructor. Credit/no-credit only.

LIS 596 Capstone II - Project Planning (2) Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Cannot be taken for credit if credit received for IMT 596. Prerequisite: LIS 569. Credit/no-credit only.

LIS 597 Capstone III - Project Implementation (2) Implementation of a project demonstrating professional-level knowledge and skills based on a project plan developed in LIS 596. Completion of project deliverables and presentation of project results. Cannot be taken for credit if credit received for IMT 597. Prerequisite: LIS 596. Credit/no-credit only.

LIS 598 Special Topics in Information and Library Science (1-6, max. 18) Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

LIS 600 Independent Study or Research (*) Credit/no-credit only.
INTERDISCIPLINARY GRADUATE PROGRAMS

BIOLOGICAL PHYSICS, STRUCTURE AND DESIGN

BPSD 520 Research Seminar (1, max. 30) Group conferences on graduate student research. Prerequisite: BPSD graduate student or permission of instructor.

BPSD 540 Literature Review (2) C. Asbury, T. Davis Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BIOC 540; A.

BPSD 541 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biological physics, structure, and design. Emphasizes scientific writing and oral presentations. Prerequisite: first year BPSD student or permission of instructor. Offered: W.

BPSD 542 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biological physics, structure, and design. Emphasizes scientific writing and oral presentations. Prerequisite: first year BPSD student or permission of instructor. Offered: W.

BPSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24) Students work with one of the research groups within the Biological Physics, Structure and Design program. Minimum two rotations must be in a different laboratory. Prerequisite: BPSD student or permission of instructor. Offered: AWSpS.

INTERDISCIPLINARY DATA SCIENCE GROUP

DATA 501 Data Science Visualization Lab (1) The Data Science Visualization Lab class will provide students additional opportunities to practice and discuss data visualization concepts, with additional emphasis on user-centered design approaches and software development. Students will work in small groups on structured data visualization exercises and UCD methods, and implement simple visualizations.

DATA 511 Data Visualization for Data Scientists (4) Introduction to the visual tools and techniques used in modern data science to develop and deploy data driven insights. Provides a foundation for visualization to support exploratory analysis, statistical modeling, machine learning, and presentation of results on structured and unstructured data. Students develop and present deep analyses for wider audiences. Recommended: basic familiarity with computer programming concepts as well as some prior experience working with data using programming languages like R or Python.

DATA 512 Human-Centered Data Science (5) Fundamental principles of data science and its human implications. Data ethics, data privacy, differential privacy, algorithmic bias, legal frameworks and intellectual property, provenance and reproducibility, data curation and preservation, user experience design and usability testing for big data, ethics of crowdwork, data communication and societal impacts of data science.

DATA 514 Data Management for Data Science (5) Introduces database management systems and techniques that use such systems; data models, query languages, database tuning and optimization, data warehousing, and parallel processing. Intended for professional students and non-CSE-majors. Offered: jointly with CSE D 514.

DATA 515 Software Design for Data Science (5) Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Offered: jointly with CSE D 515.

DATA 516 Scalable Data Systems and Algorithms (5) Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems.
Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE D/DATA 515 or permission of instructor. Offered: jointly with CSE D 516; A.

**DATA 556 Introduction to Statistics and Probability (5)** Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with BIOST 556/STAT 556; A.

**DATA 557 Applied Statistics and Experimental Design (5)** Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BIOST/DATA 556 or instructor’s permission. Offered: jointly with BIOST 557/STAT 557; W.

**DATA 558 Statistical Machine Learning for Data Scientists (5)** Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with BIOST 558/STAT 558; Sp.

**DATA 590 Data Science Capstone I - Project Preparation (2)** Part one of a two-course capstone sequence where students organize project teams, select project topics, write a project proposal and begin preparing project data sets. Prerequisite: either permission of instructor, or DATA 511; DATA 512; CSE D 514/DATA 514; CSE D 515/DATA 515; CSE D 516/DATA 516; STAT 556/BIOST 556/DATA 556; BIOST 557/STAT 557/DATA 557; STAT 558/BIOST 558/DATA 558; and DATA 590.

**DATA 598 Special Topics in Data Science (1-5, max. 15)** Introduction to innovative and specialized topics relating to the study of data science in any context.

**GRADUATE SCHOOL**

**GRDSCH 200 Preparing for Graduate Education (2)** Explores graduate education and its structure and organization. Students use interactive assignments, individual reflective work, and professional portfolio development to explore their preparation for graduate education, and develop strategies for pursuing graduate school. Credit/no-credit only.

**GRDSCH 501 TA Preparation (1)** C. CHANCELLORA hybrid course (in-person at the TA Conference in September and online during Autumn Quarter) to support graduate students in their work as TAs. Students will gain post-conference support, opportunities to connect with other students, and strategies and resources for their teaching and research roles. Credit/no-credit only. Credit/no-credit only. Offered: A.

**GRDSCH 515 Teaching and Learning in Higher Education: Frameworks and Practices (2)** Designed for graduate students seeking to build knowledge and skills in effective teaching practices as a teaching assistant or independent instructor. Students will be introduced to fundamental pedagogical frameworks and practices applicable across the disciplines in: Course design, assessment, active learning strategies, teaching inclusively, and using technology effectively in teaching. Credit/no-credit only.

**GRDSCH 525 Acting Up: Teaching Theater for Change (3, max. 6)** Tikka O. Sears Builds skills in social change interactive theater to challenge institutional oppression, advance community dialogue, and promote inclusive educational environments. Emphasizes political education;
storytelling; collaborative playwriting; rehearsal of plays and interventions; discussion; and self-reflection. Culminates in student-organized, public interactive theater performance and dialogue workshops. No previous acting experience required. Credit/no-credit only. Offered: Sp.

GRDSCH 540 Hybrid Pedagogies: Using Technology in Teaching (2)  C. CHANCELLOR, K. MALCOLM
Students explore pedagogies and practices using technologies for promoting student learning through active engagement; designing and assessing online assignments; and teaching inclusively. Through a blend of face-to-face and online class meetings, students will experience and reflect on models of hybrid teaching. Credit/no-credit only.

GRDSCH 550 Teaching in Global Classrooms: Strategies for Teaching International and Multilingual Students (1) Explores teaching and learning opportunities created by the increasing enrollment of international and multilingual students in U.S. universities. Focuses on evidence-based teaching practices that leverage the diverse linguistic and cultural assets of global classrooms to enrich learning for all students. Credit/no-credit only.

GRDSCH 595 Teaching and Learning in Higher Education: From Campus to Career (2) Focuses on the development of teaching materials for academic job searches. Centers on developing engaging and comprehensive written materials that dovetail with research materials. Includes online group work, peer review, and mock interviews. Recommended for advanced graduate students, year 3 or beyond Credit/no-credit only.

GRDSCH 610 Teaching Mentorship (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student’s ability to make innovative contributions in teaching. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School. Credit/no-credit only.

GRDSCH 615 Teaching Assistant and Research Assistant Preparation (1-6, max. 6) Instruction and teaching, learning, research, and resources for teaching and research assistants. Credit/no-credit only.

GRDSCH 620 Teaching Mentorship Seminar (2) Credit/no-credit only.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6) Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no-credit only.

GRDSCH 640 Seminar on Topics of Diversity and Justice (1) Interdisciplinary course which engages students as co-creators of a learning environment. Through guest presentations, facilitated discussions, small group work, and other dynamic learning, students gain critical understanding of privilege based on intersecting identities and its use. Also, students will gain skills to work across differences to address oppression. Credit/no-credit only.

HUMAN-COMPUTER INTERACTION AND DESIGN

HCID 501 Immersion Studio (2) Orient students to core ideas and terminology in human-computer interaction and design. Provides key skills instrumental to success in a studio learning environment. Students learn to apply the human-centered design process and experience working in an interdisciplinary studio environment. Offered: A.

HCID 510 Designing Interactive Systems (3) Covers issues relating to the design and interactive technologies, favoring design thinking in lieu of implementation concerns. Skills include design processes, design rationale, adductive reasoning, structured brainstorming, design techniques, and design critiques.

HCID 511 Ideation Studio (5) Introduces student to ideation: the systematic process of generating design ideas, developing idea variations, and identifying ideas that open promising design directions; with hands-on exercises that give students the skills to participate in and lead ideation processes on their own.
HCID 512 Interfaces Lab (3) Develop skills necessary to create interfaces that align with visual interface design standards and functional requirements of screen-based interactions. Provides an interdisciplinary approach to interface design and development. Emphasizes applying knowledge and best practices in interface design, improving visual fidelity, and connecting interface design outputs to other parts of the software engineering process. Offered: AWSpS.

HCID 513 Advanced Interfaces (3) Explores alternatives to graphical user interfaces, such as voice and conversational interfaces, gestural interfaces and spatial interactions, and emergent interactive technologies, such as artificial intelligence, machine learning and more. Students incorporate new concepts and practices in a series of short projects exploring interdisciplinary approaches to designing and developing advanced interfaces. Offered: AWSpS.

HCID 520 User Interface Software and Technology (3) Covers fundamental skills in user interface prototyping and implementation, including tools for low and high fidelity prototyping, software architectures for implementing graphical user interfaces on desktop and mobile platforms, and the toolkits that use these software architectures.

HCID 521 Prototyping Studio (5) Examines user-interface prototyping as a foundational skill in user-centered design. Introduces the tools and uses hands-on exercises to enable students to create and refine user-interface prototypes as part of a design process.

HCID 530 Usability and User Research (3) Teaches concepts on engaging with users in the context of a technology design project. Covers both empirical and analytic evaluation techniques. Methods include user interviewing, in-lab usability testing, field deployments, heuristic evaluation, and cognitive walkthrough.

HCID 531 Evaluation Studio (5) Teaches concepts related to conducting user research and usability evaluations. Introduces students to the methods and hands-on exercises that will enable them to determine user needs and usability and acceptability of interactive system designs.

HCID 540 Capstone Planning (1) Students conduct initial research on topic themes, learn to form effective project teams, and identify appropriate industry sponsors, delivering formal project proposals. HCID students only. Offered: W.

HCID 541 Capstone Studio (8) Team-based capstone design an interactive product relevant to industry challenges. Students apply iterative design, prototyping and research techniques in an studio format, with peer, faculty, and industry sponsor reviews of deliverables, culminating in a portfolio presentation documenting process and final solutions. Studio content supplemented by demonstrations and guest lecturers.

HCID 561 Portfolio and Professional Practices (1) Helps students represent themselves as an interdisciplinary connector. Students prepare a professional portfolio and learn the related components of the job search in order to find and start a career path related to human-computer interaction and design. Offered: Sp.

HCID 590 Design, Use, Build Seminar (1, max. 10) Covers the latest research in human-computer interaction and design, through talks by both UW and outside researchers. Credit/no-credit only. Offered: AWSpS.

HCID 598 Special Topics (1-5, max. 12) Studies of emerging areas and specialized topics in human-computer interaction and design. Offered: AWSpS.

HCID 599 Special Projects (1-5, max. 6) Individual graduate projects in human-computer interaction and design.

HCID 600 Independent Study or Research (1-10, max. 10) Independent coursework or research with a faculty member. Offered: AWSpS.

---

**INDIVIDUAL PHD PROGRAM**

IPHD 600 Independent Study (*)

IPHD 800 Doctoral Dissertation (*)
**MOLECULAR AND CELLULAR BIOLOGY**

**MCB 508 Teaching College Science: Theory, Methods and Practice (2)** B. Wiggins Covers the theory and methods of high-level student-centered instruction for diverse college students. Covers active learning and mentored teaching, evaluation design and implementation, fostering of instructor-student relationships, course design and foundational principles of the learning sciences. Students will later apply this material as an Instructor of Record of their own course in an undergraduate department at UW. Credit/no-credit only. Offered: A.

**MCB 509 Teaching College Science: Classroom Experience (2)** Ben Wiggins Practical opportunity for students interested in high-level teaching methods for diverse populations of students. Students will apply teaching skills as Instructor of Record of their own course in an undergraduate department at UW. Prerequisite: MCB 508. Credit/no-credit only. Offered: Sp.

**MCB 511 Cell Cycle Control (3)** Breeden, Roberts, Edgar Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, Drosophila, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

**MCB 512 Scientific Speaking Seminar (1.5)** Biggins, Peichel Teaches how to effectively give a scientific seminar about research. Offered: jointly with CONJ 512; W.

**MCB 513 Development Journal Seminar (1, max. 12)** Moens, Soriano, Swalla Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

**MCB 514 Molecular and Cellular Biology Literature Review (2)** Raible Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology program.

**MCB 515 Molecular and Cellular Biology Literature Review (2)** Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

**MCB 516 Molecular and Cellular Biology Literature Review (2)** Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.

**MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 40)** Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

**MCB 519 Topics in Cancer (1, max. 6)** Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no-credit only.

**MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 40)** M. EMERMAN Special topics reading and discussion. Offered: A.

**MCB 522 Development I: The Developmental Basis of Human Disease (3)** Moens Uses recent discoveries in human genetics to guide student learning about animal development. Explores the normal developmental function of genes that have been identified as causal in human developmental disorders such as skeletal dysmorphologies, ciliopathies, autism, and cancer. Offered: A, odd years.

**MCB 529 Cell Migration (1.5)** Cooper, Moens Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated
MCB 532 Human Pathogenic Viruses (3) Emerman
Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus, and HHV-8. Offered: A.

MCB 533 Evolutionary Genetics and Genomics (3) Malik, Peichel
Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.

MCB 536 Tools for Computational Biology (3) Arvind Subramaniam
Introduces computational research methods to graduate students in biomedical science and related disciplines. Provides a survey of the most common tools in the field. Students should have foundational knowledge in reproducible computational science, and can continue learning relevant tools to suit specific research interests. Offered: A.

MCB 539 Biological Basis of Neoplasia (3) Kemp, Zarbl
Introduces the major themes in research in the biology of neoplastic change. Covers principle molecular mechanisms responsible for tumor initiation and progression, with a specific emphasis on intracellular signaling, DNA repair, cell cycle checkpoints, and loss of normal tissue homeostasis. Offered: Sp.

MCB 540 Nucleic Acid Enzymes (1.5) Stoddard
Surveys a wide variety of enzymatic process that control the structure and modification of DNA and RNA, with particular focus on structure, function and mechanism. Unifying features of major reaction types (such as phosphoryl transfers and base modifications) constitute core material. Offered: W.

MCB 543 Logic Constructs and Methodologies of Biological Research (3) Explores the logic and methods of general scientific practice, form historical, logical, and practical points of view. Covers philosophical and methodological matters upon which there is consensus, and cutting issues of ongoing controversy. Includes both theoretical and practical application of scientific method.

MCB 560 Biotechnology Externship (2-12, max. 12)
Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Instructors: Moon Offered: AWSpS.

MCB 580 Teaching Practicum in Molecular and Cellular Biology (2, max. 4) Supervised training in the teaching of molecular and cellular biology. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MCB 599 Research in Molecular and Cellular Biology (*, max. 40) The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no-credit only. Offered: AWSpS.

MCB 600 Independent Study or Research (*-)

MCB 700 Master's Thesis (*) Offered: AWSpS.

MCB 800 Doctoral Dissertation (*)

MOLECULAR ENGINEERING AND SCIENCES

MOLENG 510 Molecular Engineering Principles (3)
Covers molecular aspects of condensed organic materials, particularly molecular and collective interactions and resulting interfacial forces, entropic phenomena and condensation to systems of higher complexity. Includes the exploration of molecular system constraints and the molecular origin of resulting macroscale properties. Provides introduction into computer modeling.

MOLENG 515 Advanced Molecular Bioengineering (4) P. STAYTON Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine,
and therapeutics based on cells. Offered: jointly with BIOEN 557; A.

MOLENG 520 Seminar in Molecular Engineering (1, max. 30) Weekly seminars on current topics in molecular Engineering. Credit/no-credit only. Offered: jointly with CHEM 597; AWSp.

MOLENG 525 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/E E 523.

MOLENG 567 Micro- and Nanostructured Biosensors (3) Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with M E 567; W.

MOLENG 599 Current Topics in Molecular Engineering (1-5, max. 30) M. SARIKAYA Readings, lectures, and discussions on topics of current interest in the field of molecular engineering. Offered: AWSpS.

MOLENG 600 Independent Study/Research (*) Study and research under the supervision of an affiliated faculty member.

MOLENG 601 Internship (1-10, max. 99) Molecular Engineering graduate internship and Co-Op program. Requires written report. Prerequisite: Permission of supervisory committee chair. Credit/no-credit only. Offered: AWSpS.

MOLENG 800 Doctoral Dissertation (*) Study and research under the supervision of an affiliated faculty member.

MUSEOLOGY

MUSEUM 500 Introduction to Museology (4) Wilson O'Donnell Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: A.

MUSEUM 520 Learning in Museums (3) J. Luke Explore a range of learning theories and frameworks and their implications for museum practice. The course is organized around three key questions: What is learning What do we know about learning in museums, specifically? How do we design for learning in museums?

MUSEUM 521 Community Engagement (3) Students learn about the importance of community engagement, the strategies and tactics of implementation and their impact. Explores underlying theories that support community engagement, analyze frameworks and toolkits developed to help museum staff engage with their communities. Offered: W.

MUSEUM 522 Making Meaning: New Models of Museum Interpretation (3) Explores modes of interpretation from labels to tours to collection management to technology. Through case studies, site visits, class discussion, and writing exercises, introduces students to the theory and practice of museum interpretation. Students think critically and creatively about inclusive, relevant, and engaging interpretive strategies for all museums. Offered: W.

MUSEUM 524 Exhibit Development I (3) Fundamental principles of the museum exhibition
process. Considers the full arc of exhibit development and provides a methodology for creating an exhibition from concept to installation. Applies those principles in collaboration with a community-based client. Offered: W.

MUSEUM 525 Exhibit Development II (3) Continues the work of MUSEUM 524 in developing a complete, ready to install temporary exhibition. Prerequisite: MUSEUM 524. Offered: Sp.

MUSEUM 528 Advocacy and Social Change (3) K. MORRISSEY Explore the ways museums have engaged in representing and advocating for social change and the implications of that engagement. Readings, discussion, and assignments consider the fragile and interesting boundaries between museums and society and the changing expectation of museums to contribute to the common good of society. Offered: A.

MUSEUM 540 Preservation and Management of Collections (3) Focus on fundamental issues related to collections management, ranging from artifact handling and artifact storage solutions, to cataloging and photographing, as well as registration methods such as accessioning, deaccessioning, loans, and legal aspects of managing a museum collection.

MUSEUM 541 Collections Management Lab (2) Practical training in the fundamental areas of collections management including: artifact handling, cataloging, condition reporting, photo-documentation and various storage methods. Prerequisite: MUSEUM 540, or concurrent enrollment.

MUSEUM 542 Preservation of Collections II (3) Nicholas J Dormán, Geneva Griswold Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel. Offered: W.

MUSEUM 544 Philosophy and Ethics of Museum Collections (3) Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria, and botanical gardens preserve, what they do not preserve, for whom, and how.

MUSEUM 560 Museum Administration and Leadership (3) W. O'Donnell Principles and practices of museum administration and leadership. Organizational structures and policies; management and leadership theory; board issues; organizational conflicts; planning issues; collection concerns; financial constructs; professional standards; and museum/community relations from an organizational and management perspective. Offered: W.

MUSEUM 562 Museum Law (3) Adam Eisenberg Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with LAW E 562; A.

MUSEUM 563 Who Owns Humanity? (3) A. Eisenberg Explores the legal and ethical questions surrounding the ownership of art, digital collections, ancient skeletons, biological data and DNA. How do changing views of history, education and science shape how ownership is defined in the 21st Century, and what ethical issues are raised for museums and libraries? Offered: W.

MUSEUM 565 Museums and Technology (3) Angie Ong Introduction to technology's impacts on visitor experiences, learning, engaging virtual audiences, and developing technology infrastructures. Integrates case studies, class discussions, problem-centered workshops, and guest speakers. Offered: A.

MUSEUM 566 Grant Writing in Museums (3) Students learn how to identify relevant grant funding opportunities for museums and determine the fit for a particular institution or project; gain familiarity with the components of a grant proposal; understand how proposals are reviewed, what funders typically look for, and the characteristics of a high quality grant proposal.
MUSEUM 570 Thesis Design (4) Jessica Luke
Prepares students to design their second year thesis; either a research study or a project. Credit/no-credit only. Offered: Sp.

MUSEUM 574 Introduction to Museum Evaluation (3) A. Ong Provides an introduction to the field of evaluation as it relates to museum practice. Introduces basic types, ethics, and practices of evaluation and practices them through readings, reflective fieldwork, mentorships, and discussions.

MUSEUM 575 Museum Evaluation Project I (3) Angie Ong Applies museological training in Museum Evaluation. Students participate in a quarter-long evaluation project, designed by instructors to further student skills in data collection, and provide an introduction to data management, analysis and presentation within a variety of museum settings. Credit/no-credit only. Offered: Sp.

MUSEUM 576 Evaluation Specialization: Project Design (3) Angie Ong First course in a yearlong, student-led evaluation project. Builds on previously acquired skills and further develops competencies in project management, outcome development, evaluation planning, and instrumentation design. Students work with museum partners to develop the framework for an evaluation study and present a final evaluation plan implemented in the following quarter. Prerequisite: MUSEUM 574 and MUSEUM 575. Offered: A.

MUSEUM 577 Evaluation Specialization: Data Collection (3) Angie Ong Second course in a yearlong, student-led evaluation project. Students implement evaluation plan presented in the previous quarter. Students focus efforts on refining their project’s instruments, developing research protocols, and collecting and managing project data. Prerequisite: MUSEUM 576. Offered: W.

MUSEUM 578 Evaluation Specialization: Analysis & Dissemination (3) Angie Ong Culmination of yearlong, student-led evaluation project. Students conduct quantitative and qualitative data analysis, interpret findings, and prepare final project deliverables for museum partners. Dissemination of final project includes a formal presentation and evaluation report. Additionally, students submit a concluding peer-evaluation and reflection of project experience. Prerequisite: MUSEUM 577. Offered: Sp.

MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15) Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/no-credit only.

MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15) Application of museological training in curation of archaeological collections at the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUSEUM 581.

MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15) Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no-credit only.

MUSEUM 588 Special Topics in Museology (1-5, max. 15) In-depth examination of selected current issues within the field of museology.

MUSEUM 594 Public Programs (3) Seth M Margolis Explore and learn about best practices in museum programming. Students will gain the skills necessary to develop museum education programs from the initial concept to the final product, with an emphasis on the end user. Offered: Sp.

MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15) Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Prerequisite: MUSEUM 596. Instructors: Morrissey, Satwicz, Visscher Credit/no-credit only. Offered: AWSp.

MUSEUM 599 Careers and Social Capital (3-5) O'Donnell Prepares students to transition from the academic community of a world-class university to a place of responsibility within a professional
community that is committed to stewardship of the vast natural and created resources of our global communities and environments, including our stories, values, knowledge, mistakes, questions, and aspirations. Offered: Sp.

MUSEUM 600 Independent Study or Research ([1-10]-)

MUSEUM 601 Internship (1-15, max. 15) Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor.

MUSEUM 700 Master’s Thesis ([1-10]-)

MUSEUM 701 Master’s Project ([1-10]-, max. 10) Credit/no-credit only. Credit/no-credit only. Offered: AWSpS.

MUSEUM 710 Master’s Research (1-12, max. 12) Students design and execute a research study that makes a significant contribution to the museum field/literature. The research process includes identifying a research problem, framing research questions, developing instrumentation, collecting data, and analyzing and interpreting the data to answer research questions. Students work individually or in groups to write a journal article describing their research study and findings. Credit/no-credit only. Offered: AWSpS.

NEAR AND MIDDLE EASTERN STUDIES

N&MES 800 Doctoral Dissertation (*-)

NEUROSCIENCE

NEURO 501 Introduction to Neurobiology (3) Carlson Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature.

NEURO 502 Introduction to Neurobiology (5) Sherk Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prosected, and sectioned brain and spinal cord. Emphasis is on human nervous system.

NEURO 503 Cognitive and Integrative Neurobiology (4) Phillips Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature.

NEURO 504 Biophysics of Nerve, Muscle, and Synapse (3) Sullivan Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with P BIO 504.

NEURO 510 Seminar in Neurobiology and Behavior (0.5, max. 30) Biweekly seminar on current topics. Required for students in the graduate program in neurobiology and behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no-credit only.

NEURO 511 Seminar in Advanced Neurobiology (1-3, max. 30) Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior.

NEURO 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 30) Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Credit/no-credit only.

NEURO 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 30) Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the neurobiology and behavior graduate program and permission of the instructor. Credit/no-credit only.

NEURO 526 Introduction to Laboratory Research in Neurobiology (4, max. 30) Students become familiar with, and assist in, the performance of research on
ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Prerequisite: first-year graduate students in neurobiology. Credit/no-credit only.

NEURO 527 Current Topics in Neurobiology and Behavior (1, max. 30) Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Instructors: Rieke Credit/no-credit only.

NEURO 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with CSE 528.

NEURO 535 Research Opportunities in Neurobiology and Behavior (1)

NEURO 541 Neuroendocrinology (3) Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with P BIO 541; W, even years.

NEURO 545 Quantitative Methods in Neuroscience (3) Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with P BIO 545.

NEURO 548 Molecular Mechanisms of Synaptic Plasticity (2) Barria Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with P BIO 548; Sp, even years.

NEURO 550 Biophysics of Calcium Signaling (1) Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with P BIO 550; Sp, odd years.

NEURO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEURO 555 Sensory Receptors (1) Detwiler, Rieke Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEURO 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

NEURO 557 Ion Channel Gating (1) Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

NEURO 559 Neurobiology of Disease (3) Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases,
autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

NEURO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with P BIO 561; Sp.

NEURO 600 Independent Study or Research (*-) Credit/no-credit only.

NEURO 700 Master’s Thesis (*-)

NEURO 800 Doctoral Dissertation (*-)

NUTRITIONAL SCIENCE

NUTR 141 Introduction to Foods (5) NW Examines how foods are used by different people and cultures to deliver nutrients and energy. Explores the evolution of the global food supply, food preparation techniques, food patterns, and eating habits as they relate to diets, nutrition, and personal and public health.

NUTR 200 Nutrition for Today (4) NW Examines the role of nutrition in health, wellness, and prevention of chronic disease. Topics include nutrients and nutritional needs across the lifespan, food safety, food security, wellness, body weight regulation, eating disorders, sports nutrition, and prevention of chronic disease. May not be taken for credit if credit earned in NUTR 300. Offered: AWSp.

NUTR 241 Culinary Nutrition Science (3) NW Explores scientific principles behind modern culinary techniques that transform raw foodstuffs into prepared foods that have sensory appeal. Hands-on kitchen demonstrations show how physical and chemical forces acting on solids, liquids, and gases transform raw ingredients into foods with desirable taste, texture, and aroma. Requires access to a full kitchen to complete assignments. Cannot be taken for credit if credit earned in NUTR 441.

NUTR 290 Topics in Food Systems and Nutritional Sciences (1-5, max. 10) Explores issues in food systems and nutrition.

NUTR 302 Food Systems: Harvest to Health (5) NW/I&S Examines the many facets of the modern food supply from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 200. Offered: ASp.

NUTR 303 Food Systems: Individual to Population Health (5) I&S/NW Examines the food environment in the local community from the public health perspective. Explores where people get their food, what influences this decision, and various aspects of the local food movement, including access to healthy food, urban agriculture, farmers markets, and other public health nutrition initiatives. Includes a weekly discussion section. Prerequisite: NUTR 200. Offered: W.

NUTR 310 Nutrition and the Life Course (4) NW Explores nutrient needs from infancy through adolescence and adulthood, including the physiological basis of nutrient requirements and the genetic, social, and environmental influences on food choices and nutrition status. Uses an evidence-based approach to assess the impact of nutrition across life stages and ways to improve population health by improving nutrition. Prerequisite: NUTR 200.

NUTR 390 Food Seminar (1, max. 3) Examines current food, culinary, and food system issues from production, processing, and marketing to consumption, nutrition, and health. Includes diverse perspectives from producers, processors, public health professionals, and relevant research. Credit/no-credit only.

NUTR 400 Food Systems, Nutrition, and Health Seminar (1, max. 4) I&S Examines emerging issues in food systems, nutrition, and health as they relate to personal and public health. Reviews evidence in the context of food systems and health policy. Credit/no-credit only. Offered: AW.

NUTR 402 Food Systems Modeling and Analysis (5) Provides a foundation in methods of modeling and
analysis used to study food systems. Production, consumption, carrying capacity, food shed analyses, life cycle assessment, system dynamics, and integrated modeling will be addressed. Learn what types of questions are best addressed through modeling approaches, the methods used to conduct food systems models, and the data required to complete the analyses. Prerequisite: NUTR 200; NUTR 302; and NUTR 303 Offered: A.

NUTR 405 Physical Activity in Health and Disease (3) NW Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 220.

NUTR 406 Sports Nutrition (3) NW Covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. Discusses the effect of eating disorders (in both male and female athletes), weight management, and sport nutrition resources. Prerequisite: NUTR 200.

NUTR 411 Diet in Health and Disease (3) QSR Impact of diet on health and the prevention of obesity, diabetes, cardiovascular disease, and other non-communicable diseases. Examines diet-health relationships; social, environmental, and economic factors in eating behavior; and evidence base behind dietary guidelines. Draws on seminal and recent research in nutrition science and uses examples from recent media coverage. Prerequisite: either NUTR 200 or NUTR 300.

NUTR 412 United States Food Systems Policy (3) I&S Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 302 Offered: W.

NUTR 420 Global Nutrition: Challenges and Opportunities (3) I&S Examines global dimensions of malnutrition, its assessment and classification, and global policies and programs to improve nutritional status in developing countries. Emphasizes global consequences of poor nutrition on health, cognition, and development with a focus on the first 1,000 days from conception to age two. Prerequisite: NUTR 200. Offered: A.

NUTR 441 Food and Culinary Science (3) Studies the scientific principles behind culinary techniques, with emphasis on sensory evaluation. Prerequisite: NUTR 200; either CHEM 120 or CHEM 142; and either CHEM 220 or CHEM 237.

NUTR 446 Food Safety and Health (3) Presentation of emerging issues in food safety and toxicology, microbiology, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international and national polices that promote regional solutions for a safe food supply and access to nutritious foods. Offered: W.

NUTR 465 Nutritional Anthropology (3) I&S/NW Examines the interrelationships between biomedical, sociocultural, and ecological factors and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, and nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

NUTR 490 Special Topics in Nutritional Sciences (1-5, max. 10) Examines emerging issues in nutrition. Reviews the evidence and potential policy implications.

NUTR 493 Food Systems Capstone (8) The Food Systems Capstone is a culminating academic endeavor for students majoring in Food Systems, Nutrition & Health. The capstone provides students with an opportunity to apply knowledge and skills acquired in their courses to a specific food systems problem or issue. Emphasizing systems thinking, the capstone experience will explore solutions to real world issues through focused study and under the direction of a faculty member. Prerequisite: NUTR 302; NUTR 303; and NUTR 402 Offered: Sp.

NUTR 495 Undergraduate Internship (1-5, max. 15) This is a Credit/No Credit course, taken for variable credits, in which you have the opportunity to earn credit for academic work associated with an
internship experience. It is intended to be both practical and educational. Through active participation and completion of assignments, you will reflect on your internship experience and identify how it relates to your coursework, college experience, identity, career readiness, and future. Credit/no-credit only. Offered: AWSpS.

NUTR 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Credit/no-credit only. Offered: AWSpS.

NUTR 500 Food Systems, Nutrition, and Health Seminar (1, max. 4) Examines emerging issues in food systems, nutrition, and health as they relate to personal and public health. Reviews evidence in the context of food systems and health policy. Credit/no-credit only. Offered: AW.

NUTR 511 Survey of Advanced Nutrition (2-3) Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

NUTR 512 United States Food Systems Policy (3) Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Offered: W.

NUTR 513 Food and Society: Exploring Eating Behaviors in a Social, Environmental, and Policy Context (2) Socio-cultural, environmental, and policy factors interact with biological and psychological characteristics to influence the foods we eat, and when, where, and how we eat them. Uses contemporary readings, films, and critical discussion to explore these macro-scale influences on food, nutrition, and eating behavior. Offered: A.

NUTR 514 Sustainable Food Systems for Population Health (3) Addresses the food system - including land use, production, distribution, marketing, consumption, and food and resource recovery - and how it affects environmental, social, economic, nutritional, and population health. Topics include agriculture, ecosystem integrity, economics, food security, access, equity, resilience, food justice, climate change, and sustainability. Offered: Sp.

NUTR 520 Nutrition and Metabolism I (4) Provides an in-depth overview of the digestion, absorption, and metabolism of macro- and micro-nutrients. Focuses on dietary patterns and nutrient imbalances and how they relate to physiological systems and health outcomes. Recommended: undergraduate course work in biochemistry; anatomy; and physiology. Offered: A.

NUTR 521 Nutrition and Metabolism II (4) Provides in-depth overview of the digestion, absorption, and metabolism of macro- and micro-nutrients. Focus on micronutrients (vitamins and minerals). Dietary patterns and nutrient imbalances and how they relate to physiological systems and health outcomes. Second of a two-course series. Recommended: undergraduate course work in biochemistry; anatomy; and physiology. Offered: W.

NUTR 526 Maternal and Pediatric Nutrition (4) Examines the influence of maternal, infant, and children's nourishment on growth, development, and health, including children with special healthcare needs, in both individual and population-based environments. Includes nutrition and assessment, critical evaluation of normative data, and evidence-based clinical and community nutritional care and family-centered care. Prerequisite: human nutrition and human physiology.

NUTR 529 Nutrition Research Design (1-3, max. 3) Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Credit/no-credit only.
NUTR 531 Public Health Nutrition (3/6) Offers an introduction to the process of applying the science of nutrition, public health and epidemiology to improve the health of populations and assure access to a safe and nutritious food supply. Through active engagement with a real world public health client, students perform functions of public health: assessment, program planning, policy development, implementation, and evaluation. Recommended: upper-level or graduate coursework in nutritional science, public health, and epidemiology. Offered: A.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12) Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: nutritional sciences graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

NUTR 536 Nutrition Education Principles and Practice (2) Examines theory-based design and delivery of nutrition education, including conducting needs assessments and developing lesson plans, activities, visual aids, and evaluation material. Explores design features of written, oral, and technology-based nutrition education materials and initiatives. Addresses differing learning styles, cultural groups, and literacy levels.

NUTR 537 Laboratory Rotation (1-4, max. 6) Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to ongoing research for preparation of dissertation topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

NUTR 538 Nutritional Epidemiology (3) Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with EPI 538.

NUTR 545 Food Safety and Health (3) Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods.

NUTR 555 Nutrition in Developing Countries (3) Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with GH 555; Sp, odd years.

NUTR 559 Orientation to Clinical Dietetics Practice (3) Provides an orientation to dietetics in clinical settings, including the nutrition care process and integration of evidence-based practice. Offered: A.

NUTR 560 Nutritional Counseling for Chronic Disease (1-3) Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds knowledge and skills needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.

NUTR 561 Graduate Coordinated Program in Dietetics (1-10, max. 35) Focuses on the competencies for entry-level practice in dietetics. Includes supervised practice experience in wellness, public health, food services, ambulatory care, and clinical care. Prerequisite: GCPD students only. Credit/no-credit only. Offered: AWSpS.

NUTR 562 Nutrition and Chronic Disease (4) Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.

NUTR 563 Nutrition in Acute Care (4) Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: either NUTR 562 or permission of instructor. Offered: A.

NUTR 590 Special Topics in Nutritional Science (1-4, max. 4) Examines emerging issues in nutrition. Reviews the evidence and potential policy
NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; NUTR 521; NUTR 522. Credit/no-credit only. Offered: AWSpS.

NUTR 596 Nutrition Practice Capstone (1-10, max. 25) Applies and extends students’ nutritional sciences, dietetics, or public health knowledge and skills to a practice-focused problem or question with the completion of a mentored capstone project and report. Credit/no-credit only. Offered: AWSpS.

NUTR 600 Independent Study or Research (*) Credit/no-credit only. Offered: AWSpS.

NUTR 700 Master's Thesis (*) Credit/no-credit only. Offered: AWSpS.

NUTR 800 Doctoral Dissertation (*) Credit/no-credit only. Offered: AWSpS.

INTERDISCIPNARY GLOBAL INNOVATION EXCHANGE GROUP

TECHIN 510 Programming for Digital and Physical User Interfaces (4) Students will enhance their fundamental programming skills, with a focus on sensor-based signals and data to demonstrate core concepts, while providing useful tools for prototyping digital and physical user interfaces. This course will introduce students to the practices of engineering interactive systems on mobile and desktop computers and low-cost micro-controllers. Offered: A.

TECHIN 511 Fabrication and Physical Prototyping (3) Students gain fundamental fabrication and rapid prototyping skills for interactive systems, with a focus on industrial and product design, employing tools and processes with physical hardware, products, form factors, enclosures and packages. Offered: Sp.

TECHIN 512 Introduction to Sensors and Circuits (3) Students will gain the background and techniques needed to connect digital systems to the physical world by learning the fundamentals of integrating sensors and microcontrollers. Students will also gain experience in the general process of sensor selection and designing hardware systems. Offered: W.

TECHIN 513 Managing Data and Signal Processing (3) Students will gain the understanding needed to process low level sensor data, analyze and interpret that data using basic machine learning and signal processing, and then store the data in the cloud for later retrieval. Offered: W.

TECHIN 514 Hardware Software Lab 1 (4) Students will be given a real-world experience in developing hardware/software systems to gather an understanding of the entire lifecycle of building such a system from concept through requirements and through implementation, and finally testing. Offered: W.

TECHIN 515 Hardware Software Lab 2 (4) Builds on the foundation of TECHIN 514 and incorporate physical fabrication into course objectives. Students continue prototyping hardware/software systems,
with the added complexity of signal processing, networking, cloud interfaces and web-based user interfaces. Prerequisite: TECHIN 514 Offered: Sp.

TECHIN 516 Robotics Lab 1: Robotic Sensing and Mobility (4) Applied work with autonomous mobile robots able to navigate through semi-structured environments using sensors such as cameras and a robust software stack. Laboratory consists of scale model autonomous cars, equipped with realistic 3D and image sensors, embedded in a scale model of a realistic environment. Prerequisite: TECHIN 510. Offered: W.

TECHIN 517 Robotics Lab 2: Robotic Manipulation and Grasping (4) Applied work with robot arms and graspers, often in combination with sensors such as cameras, to perform manipulation and grasping tasks. Laboratory consists of advanced robot manipulators, configured for a series of tasks of increasing difficulty. A matching simulation environment allows student-written software to be initially partially debugged before engaging the actual robots. Prerequisite: TECHIN 516. Offered: Sp.

TECHIN 520 Design Thinking for Technology Innovation (2) Introduces students to the history, theory, methods and core concepts of design thinking as applied to the design of innovations in hardware and software technology. This course will establish exposure to methods that will be applied to projects in the corresponding studio course, Design Thinking Studio, TECHIN 521.

TECHIN 521 Design Thinking Studio (3) Involves practical application of the approach and methods learned in the corresponding lecture course, Design Thinking for Technology Innovation (TECHIN 520). Students apply their understanding to a specific problem and context that they will develop during the class. Offered: A.

TECHIN 522 The History and Future of Technology (2) Gives students an understanding of past trends in hardware and software technology to understand how technology has changed over time. This will be in combination with techniques for enabling students to think about future technology trends and develop prototypes for futuristic ideas. An exploration of technology adoption and maturation models will ground students in the analysis skills to recognize the user and business contexts. Offered: W.

TECHIN 523 User Research and Evaluation Studio (3) This project-based course focuses on the user research and evaluation components of the design process. Students learn methods to engage stakeholders and elicit their needs to provide insight for defining requirements for ethically-grounded designs and aspects of evaluation of technology designs with potential users, including usability and user experience evaluation techniques. Offered: Sp.

TECHIN 524 Visual, Industrial and Interaction Design Studio (3) Immerse students in the theory and practice of basic design concepts for the design of interactive products that are functionally, emotionally and aesthetically appealing. Offered: S.

TECHIN 530 Essentials of Entrepreneurship (3) Introduces business strategy fundamentals and an exploration of key issues and strategies involved in the process of starting up a new enterprise as well as practice in organizational strategy analysis and development.

TECHIN 531 Planning and Managing Hardware/Software Development (2) Students gain experience in creating a software/hardware product road map and an engineering/development plan. Offered: S.

TECHIN 532 Introduction to Finance and Accounting for Entrepreneurs (2) This course provides the financial tools and mindset needed to become a successful entrepreneur. This course teaches common financial vocabulary, how to read and interpret the main financial statements (Balance Sheet, Income Statement and Statement of Cash Flows), capital budgeting fundamentals and valuation fundamentals. Offered: Sp.

TECHIN 533 Corporate and IP Law for Technology Innovators (2) Introduces key areas of business law, including common organizational structures such as corporations, LLCs, and nonprofit/low-profit entities. Covers the roles of founders, directors and shareholders in each structure, as well as the basics of intellectual property and copyright law. Offered: S.
TECHIN 534 Building Effective Teams (3) This course will equip students with tools to establish strong, shared commitment to a compelling team purpose, bring about collective buy-in to concrete performance objectives, promote team member adherence to a set of suitable work rules and roles, and foster the interpersonal trust and respect crucial to mutual team member support and, ultimately, extraordinary team performance. Credit/no-credit only. Offered: S.

TECHIN 540 Integrated Launch Studio 1 (4) The first quarter of a two-quarter course sequence, students work in teams with guidance from industry sponsors and mentors to plan and execute front-end phases of a comprehensive Launch Project. Teams conduct initial research, prototyping for a technology solution proposal, and early functional prototype toward development of a solution demonstration that can be considered for commercialization via external funding or acquisition. Prerequisite: TECHIN 510; TECHIN 512; TECHIN 513; TECHIN 514; TECHIN 515; and TECHIN 523. Offered: S.

TECHIN 541 Launch Seminar (2) Focuses on design and software/hardware industry trends and career outlook. Students develop a personal career vision and plan based on their experience, interests, and skills. Offered: AW.

TECHIN 542 Integrated Launch Studio 2 (8) The final quarter of the two-quarter, team-based project, students continue their work to plan and complete the final phases of a comprehensive MSTI Launch Project. Teams will build on previous phases of exploration with more technical prototyping to develop and refine their solutions, culminating in the development of a technology-based solution proposal, prototype demonstration, and proposed business case for further development or funding. Prerequisite: TECHIN 510; TECHIN 512; TECHIN 513; TECHIN 514; TECHIN 515; TECHIN 523; and TECHIN 540. Offered: A.

TECHIN 599 Special Projects (1) Individual graduate projects for the Masters of Science in Technology Innovation. Credit/no-credit only. Offered: Sp.

TECHIN 600 Independent Study or Research (1-10, max. 10) Supervised independent study work to individual students in order to flexibly address the academic and professional development and research interests of individual students. Offered: AWSpS.

TECHIN 601 Internship (1-10) An experiential learning opportunity with technology employers that provide skill building and professional formation activities for students for future professional employment. Students will complete project work and skill-building activities such as goal setting; analysis and reflection; giving and receiving feedback; and debriefing their learning experience. Prerequisite: TECHIN 510; TECHIN 511; TECHIN 512; TECHIN 513; TECHIN 514; TECHIN 515; TECHIN 520; TECHIN 521; TECHIN 522; TECHIN 523; TECHIN 524; TECHIN 530; TECHIN 531; TECHIN 532; TECHIN 533; TECHIN 534; TECHIN 540; and TECHIN 542. Offered: W.

TECHIN 700 Master's Thesis (1-2, max. 2) Individual graduate thesis research and presentation for the Global Innovation Exchange (GIX) Dual Degree program. Offered: AWSpS.
INTERSCHOOL OR INTERCOLLEGE PROGRAMS

BIOENGINEERING

BIOEN 215 Introduction to Bioengineering Problem Solving (3) Alyssa C Taylor Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, engineering ethics, social constraints, and engineering design process.

BIOEN 217 MATLAB Fundamentals for Bioengineers (1) Christopher Neils Introduction to scientific programming, using both standard programming methods and MATLAB-specific strategies. Intended as preparation for the Bioengineering core sequence. Applications include curve fitting, simulations, ODE solutions, and image processing fundamentals, executed as in-class tutorials and final project. Prerequisite: either CSE 142, CSE 160, or AMATH 301, which may be taken concurrently. Credit/no-credit only.

BIOEN 290 Guided Independent Studies on Transformative Science (4) NW G. POLLACK Intensive laboratory experience mixed with lectures, readings, and discussions aimed at achieving deep understanding of scientific approach, particularly the nature of paradigm shifts, role of governmental support and management of science, power of orthodoxy, role of challenger, and fate of unpopular scientific views. Offered: W.

BIOEN 299 Introduction to Bioengineering (1) G. POLLACK Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no-credit only. Offered: ASp.

BIOEN 315 Biochemical Molecular Engineering (3) V. Daggett, D. Ratner Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223, CHEM 237 or CHEM 335; BIOL 200, which may be taken concurrently. Offered: Sp.

BIOEN 316 Biomedical Signals and Sensors (4) C. NEILS Introduces the sources, detection, and processing of signals in medical instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.

BIOEN 317 Biomedical Signals and Sensors Laboratory (2) A. Yazdan-Shahmorad Uses computational and experimental projects covering methods to acquire, process, and analyze signals from physiological and biochemical origins. Co-requisite: BIOEN 315 and BIOEN 316. Offered: Sp.

BIOEN 325 Biotransport I (4) Y. Zheng Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 136, MATH 307, or AMATH 351; PHYS 122. Offered: A.

BIOEN 326 Solid and Gel Mechanics (4) W. THOMAS Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships between composition, structure, properties, and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self assembling systems. Prerequisite: either CHEM 162, CHEM 164, or CHEM 165; PHYS 122; minimum grade of 2.0 in BIOEN 315. Offered: A.

BIOEN 327 Fluids and Materials Laboratory (2) C. NEILS Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.

BIOEN 335 Biotransport II (3) J. BRYERS Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems
as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: minimum grade of 2.0 in BIOEN 325. Offered: W.

BIOEN 336 Bioengineering Systems and Control (3) H. SAURO Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: minimum grade of 2.0 in BIOEN 327; either MATH 136, MATH 308, or AMATH 352. Offered: W.

BIOEN 337 Mass Transport and Systems Laboratory (2) Alyssa C Taylor Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; and either STAT 311, STAT 390, Q SCI 381, or IND E 315, which may be taken concurrently. Offered: W.

BIOEN 345 Failure Analysis and Human Physiology (4) S. Pun, M. Regnier, M. Scatena Applies engineering analysis to understand human physiology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite: BIOL 220; minimum grade of 2.0 in each of BIOEN 215, BIOEN 335, BIOEN 336, and BIOEN 337. Offered: Sp.

BIOEN 400 Fundamentals of Bioengineering Design (3) Kim A. Woodrow Preparatory project-based course that develops understanding of the engineering design process and incorporates modern tools and methodologies for developing innovative health technologies. Prerequisite: BIOEN 337; either STAT 311, STAT 390, Q SCI 381, or IND E 315; BIOL 220; and PHYS 122. Offered: Sp.

BIOEN 401 Bioengineering Capstone Proposal (1) P. Yager Teaches proposal-writing principles and guides the development and planning of individually-based senior capstone projects. Prerequisite: BIOEN 337; STAT/MATH 390 or IND E 315; BIOL 180, 200, 220; PHYS 121, 122. Co-requisites: BIOEN 400 Offered: Sp.

BIOEN 402 Bioengineering Capstone Research and Design ([2-6], max. 10) Independent senior design project. Prerequisite: BIOEN 401. Offered: AWSpS.

BIOEN 403 Bioengineering Capstone Research (2-, max. 4) Independent senior research project. Prerequisite: BIOEN 401. Offered: AW.

BIOEN 404 Bioengineering Team Design I (3) C. Neils First course in team design project course sequence. Prerequisite: BIOEN 400. Offered: W.

BIOEN 405 Bioengineering Team Design II (4) A. TAYLOR AMOS Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.

BIOEN 410 Bioengineering Honors Seminar (1) Service-learning for departmental honors students. Credit/no-credit only. Offered: A.

BIOEN 415 Bioconjugate Engineering (4) D. Ratner Applies bioconjugate and molecular engineering methods for use in nanotechnology, drug delivery, biomaterials, diagnostics, medical devices, and biomedical research. Students learn how to engineer molecular and macromolecular systems using versatile bioconjugate techniques applicable to both industry and academia. Prerequisite: BIOEN 315, CHEM 221, CHEM 224, CHEM 239, or CHEM 337 Offered: A.

BIOEN 420 Medical Imaging (4) C. YUAN Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT optical imaging, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: either BIOEN 316 or E E 235; either MATH 136, MATH 308, or AMATH 352; either CSE 142 or AMATH 301.

BIOEN 423 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136, MATH 307, or AMATH 351; and either MATH 308, AMATH 352, or CSE 311 Offered: jointly with CSE 486/E E 423; A.
BIOEN 447 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) M. Averkiou Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are presented from an engineering viewpoint. Topics include the physics of MRI and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.

BIOEN 449 Therapeutic and Diagnostic Ultrasound (4) M. AVERKIOU Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Prerequisite: BIOEN 316 or BIOEN 317. Offered: Sp.

BIOEN 451 Optical Coherence Tomography (4) R. Wang Describes the basic physics and engineering principles of optical coherence tomography, and rapid development of imaging applications in medicine and biology. Extends basic concepts of signal processing and instrumentation to imaging physics (optics), image reconstruction, image processing, and visualization. Prerequisite: BIOEN 316 or E E 235; and MATH 136, MATH 308, or AMATH 352; recommended: Contemporary Light Microscopy and Biophotonics Offered: A.

BIOEN 454 Bioengineering Solutions to Improve the Health of Families Worldwide (1) I&S, DIV Alexis L Kaushansky Seminar series that engages students in interdisciplinary discussions about global health. Explores how bioengineering approaches contribute to (1) the study of problems of global health importance, (2) the development of diagnostics, and (3) the discovery of interventional strategies to improve human health. Emphasizes collaboration between students and researchers with backgrounds in infectious disease, basic science, and bioengineering. Credit/no-credit only. Offered: jointly with G H 454; A.

BIOEN 455 BioMEMS (4) Albert Folch Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 316. Offered: W.

BIOEN 457 Advanced Molecular Bioengineering (4) P. STAYTON Fundamentals of molecular recognition: thermodynamics, forces, kinetics. Manipulation of recognition processes for current molecular
bioengineering research and development. Fundamental physical chemistry of molecular recognition in the context of biomedicine. Therapeutics based on cells. Prerequisite: either BIOEN 315 and BIOEN 335. Offered: A.

**BIOEN 460 Neural Engineering (3)** Azadeh Yazdan-Shahmorad, Chet T Moritz Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Prerequisite: either BIOL 130, BIOL 162, or BIOL 220; and one of the following: MATH 308, AMATH 301, or AMATH 352. Offered: jointly with E E 460; A.

**BIOEN 461 Neural Engineering Tech Studio (4)** Azadeh Yazdan-Shahmorad, Chet T Moritz Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 460/E E 460. Offered: jointly with E E 461.

**BIOEN 463 Optogenetics (3)** Andre Berndt Overview of optogenetics, which utilizes light-activated ion channels and fluorescent proteins to control and monitor neuronal activity through remote light stimulation in intact brain tissue. Includes (1) molecular basis, (2) tools and instrumentation, (3) experimental design, and (4) application range of optogenetic approaches. Builds a robust foundation for designing contemporary optogenetic experiments. Offered: W.

**BIOEN 466 Neural Computation and Engineering Laboratory (3)** NW Amy Orsborn Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Prerequisite: Either AMATH 342, BIOL 162, or BIOL 220; and one of the following: MATH 308, AMATH 301, or AMATH 352. Offered: jointly with E E 466.

**BIOEN 467 Biochemical Engineering (3)** F. BANEYX Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with CHEM E 467; W.

**BIOEN 468 Real-Time Biosignal Processing (3)** C. Neils Lab-based introduction to techniques for real-time signal acquisition, processing, and output, emphasizing software as an interface between user and electronic circuits. Students write programs for implementation both in graphical programming environments and in portable microprocessor platforms. In-depth discussion of hardware specifications and implications for circuit design. Prerequisite: Either BIOEN 316, or E E 215 and E E 235. Offered: W.

**BIOEN 470 Systems Immunology and Immunoengineering (3)** Hao Yuan Kueh Explores current progress towards a quantitative, systems-level understanding of immune system function. Topics include sensitivity and selectivity in immune receptor signaling, cell-cell coordination by cytokine communication, and cell engineering for immunotherapy. Prerequisite: MATH 307 or AMATH 351.

**BIOEN 472 Biosensors for Cancer (4)** Albert Folch Introduces the broad field of biosensors for cancer diagnostics. Recommended: basic cancer biology, basic organic chemistry, basic materials science. Offered: A.

**BIOEN 474 Immunoengineering (3)** K. Woodrow Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases. Offered: W.

**BIOEN 475 Global Health Technology: Molecular Diagnostics (4)** B. Lutz Teaches engineering principles, tools, and technologies needed to practice or develop nucleic acid (DNA/RNA) diagnostics and their context in global health. Recommended: Advanced Engineering, Chemistry or math background. Offered: W.
BIOEN 481 Engineering Cell Biology (3) D. Kim
Introduces engineering approaches for analysis and control of cell structure and function, and application of such technologies in cell biology studies. Covers the basics of cell biology, engineering cellular microenvironments, as well as effects of external engineering stimuli on cellular processes, which have significant implications in various diseases such as cancer, neuromuscular disease, and cardiovascular disease. Prerequisite: CHEM 142 and BIOL 200; recommended: Introductory Biology, General Chemistry Offered: A.

BIOEN 483 Vascular Biology and Engineering (3) Y. Zheng
Vascular Engineering has emerged to provide strategies for generating vascular grafts with long-term patency, and vascularized tissues for regenerative medicine and disease modeling. Focuses on understanding the structure and function of different vascular beds in vivo, and learning the cutting edge research and engineering principles in vascular biology and engineering. Recommended: Introductory Biology, General Mechanics, and Cell Biology Offered: W.

BIOEN 485 Computational Bioengineering (4) W. Thomas
Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems. Prerequisite: BIOEN 335; either AMATH 351 or MATH 307. Offered: Sp.

BIOEN 486 Tissue Engineering (3) D. Kim
Tissue structure and function, scaffold design, applications to specialized tissues and organs. Prerequisite: BIOEN 315. Offered: W.

BIOEN 487 Bioengineering and Nanotechnology (3) X. Gao
Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine. Prerequisite: CHEM 142, CHEM 144, or CHEM 145; BIOL 180. Offered: W.

BIOEN 488 Computational Protein Design (4) V. Daggett
Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems. Prerequisite: BIOEN 315. Offered: W.

BIOEN 489 Advanced Tissue Engineering (3)
Develops advanced knowledge in tissue engineering. Primarily through critical assessment of seminal publications in areas such as biomaterials, biofabrication, organ decellularization, cellular self-organization, organoids, and regenerative medicine. Students identify groundbreaking studies in tissue engineering and communicate the impact to other scientists and the public. Prerequisite: BIOEN 486.

BIOEN 490 Engineering Materials for Biomedical Applications (3) J. Bryers
Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

BIOEN 491 Controlled-Release Systems (3) S. Pun
Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.

BIOEN 492 Surface Analysis (3) D. Castner

BIOEN 493 Advanced Surface Analysis (3)
Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with CHEM E 493; W.
BIOEN 494 Advanced Drug Delivery (3)  S. PUN
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Prerequisite: BIOEN 491. Offered: Sp.

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6) Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Credit/no-credit only.

BIOEN 498 Special Topics (1-6, max. 15) Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.

BIOEN 499 Special Projects (1-6, max. 24) Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no-credit only. Offered: AWSpS.

BIOEN 501 Molecular Bioengineering (4) Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery.

BIOEN 502 Cellular Bioengineering (4) Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant RNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501.

BIOEN 503 Systems Bioengineering (4) Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502.

BIOEN 504 Introduction to Technology Commercialization (4) M. O'Donnell, B. Ratner
Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing. Offered: A.

BIOEN 505 Biomedical Entrepreneurship (4) Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing; introduces strategic planning, management of commercialization effort. Offered: W.

BIOEN 506 Applying Technology Commercialization (1) Focuses knowledge of entrepreneurship within the spaces of medical devices, hardware/software, and energy, into a practical description of a potential start-up company. Corequisite: ENTRE 540. Credit/no-credit only.

BIOEN 509 Bioengineering Departmental Seminar (1, max. 16) Research review and discussions centered on demonstrating approaches and solving scientific problems. Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no-credit only. Offered: WSp.

BIOEN 511 Biomaterials Seminar (1, max. 18) D. CASTNER, L. GAMBLE Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 511.

BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) M. REGNIER Current research in cardiac physiology. Student presentation and discussions of current research methodologies. Credit/no-credit only.

BIOEN 515 Bioconjugate Engineering (4) D. Ratner Applies bioconjugate and molecular engineering methods for use in nanotechnology, drug delivery, biomaterials, diagnostics, medical devices, and biomedical research. Students learn how to engineer molecular and macromolecular systems using versatile bioconjugate techniques applicable to both industry and academia. Recommended: Basic organic chemistry, biochemistry, molecular engineering. Offered: A.
BIOEN 516 Medical Imaging Seminar (1) Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no-credit only.

BIOEN 518 Healthcare Transformation: Forces, Directions, Implications (2) L. HUNTSMAN Introduces the history, current realities and forces driving change in healthcare and provides an opportunity to use this knowledge to evaluate contemporary attempts to innovate. Addresses implications for those involved in the science, technology, business and policy of medicine. Offered: W.

BIOEN 520 Musculoskeletal Biomechanics (4) Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with M E 527.

BIOEN 522 Biomechanics of Soft Tissue (3) J. SANDERS Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

BIOEN 523 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 587/E E 524; Sp.

BIOEN 524 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with CSE 587/E E 524; Sp.

BIOEN 530 Bioengineering Professional Series I: Literature Analysis (2) V. DAGGETT Skills in scientific literature analysis developed through topics in bioengineering. Credit/no-credit only. Offered: A.

BIOEN 531 Bioengineering Professional Series II: Proposal Writing (2) M. SCATENA Covers grant and fellowship proposal writing. Offered: W.

BIOEN 532 Bioengineering Professional Series III: Professional Skills Development (1) M. Averkiou Key areas of professional development related to the bioengineering field, including oral communication, management, networking, and interviewing. Credit/no-credit only. Offered: Sp.

BIOEN 536 Quantitative Physiology (3) Hao Yuan Kueh Develops a foundation of human physiology by examining the homeostasis of vital parameters within the body, and the physiological properties of human cells, tissue, and organs. Recommended: MATH 107, AMATH 351, or equivalent; courses in ordinary differential equations; probability theory; introductory programming; and introductory cell and molecular biology.

BIOEN 540 Bioengineering Clinical Practicum (4) Clinical needs identification for the Master of Applied Bioengineering. Students observe diagnosis and treatment in a clinical setting to learn current practice, drivers, and constraints. Students learn to identify and communicate clinical needs not met by current technology, but with potential bioengineering design solutions. Addresses ethics, patient privacy, and medical/academic communication.

BIOEN 541 Design Skills I: Clinical Needs Evaluation (3) First quarter of Design Skills sequence in Master of Applied Bioengineering. Student teams initiate design process through needs evaluation, market analysis, prior art research, identification of design specifications, and brainstorming of design concepts. Offered: A.

Students conceive, evaluate, and present design options to potential clinical users, utilize feedback to revise design concepts, and prepare a formal design proposal. Prerequisite: BIOEN 541. Offered: W.

BIOEN 543 Design Skills III: Project Implementation (4) Culmination of the three-quarter Design Skills sequence in the Master of Applied Bioengineering. Students create and test a proof-of-principle deliverables for the device or system proposed in the previous quarter, and prepare a formal business plan. Prerequisite: BIOEN 542. Offered: S.

BIOEN 544 Advanced Clinical Design Project (1-10) Summer-long culminating design experience in which student teams generate and test a solution to meet desired clinical needs. Prerequisite: BIOEN 543. Offered: S.

BIOEN 546 Fundamentals of Biomedical Imaging: X-ray and Nuclear (4) P. Kinahan Explores core principles of biomedical imaging with a focus on x-ray and nuclear imaging. Fundamental concepts common to all modalities are reviewed: Multi-dimensional Fourier transforms, the imaging equation, the inverse problem, image SNR, and contrast agents. Lectures will emphasize a systems approach that is reinforced though computational mini projects using Matlab. Recommended: Signal and systems (linear systems) , Fourier transforms and advanced linear algebra, scientific programming (e.g. Matlab or other languages). Offered: A.

BIOEN 547 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) M. Averkiou Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are presented from an engineering viewpoint. Topics include the physics of MRI and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Offered: W.

BIOEN 549 Therapeutic and Diagnostic Ultrasound (4) M. Averkiou Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Offered: Sp.

BIOEN 551 Optical Coherence Tomography (4) R. Wang Describes the basic physics and engineering principles of optical coherence tomography, and rapid development of imaging applications in medicine and biology. Extends basic concepts of signal processing and instrumentation to imaging physics (optics), image reconstruction, image processing, and visualization. Recommended: Signal processing and linear systems (at a level of BIOEN 316) Mathematical skills (at a level of AMATH352) Physics level at PHYS 122. BIOEN 498/599: Contemporary Light Microscopy and Biophotonics. Offered: A.

BIOEN 552 Microfabrication and Microfluidics (3) A. FOLCH, P. YAGER Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Co-requisite: BIOEN 553.

BIOEN 553 Microfabrication and Microfluidics Laboratory (2) A. FOLCH, P. YAGER Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Co-requisite: BIOEN 552. Credit/no-credit only.

BIOEN 554 Bioengineering Solutions to Improve the Health of Families Worldwide (1/2) Alexis L Kaushansky Seminar series that engages students in interdisciplinary discussions about global health. Explores how bioengineering approaches contribute to (1) the study of problems of global health importance, (2) the development of diagnostics, and (3) the discovery of interventional strategies to improve human health. Emphasizes collaboration between students and researchers with backgrounds in infectious disease, basic science, and bioengineering. Credit/no-credit only. Offered: jointly with G H 554; A.

BIOEN 555 Water, Nature, and Biological Function (3) G. Pollack Explores emerging concepts of water at interfaces as a new and simpler way to understand many features of chemistry, physics, and biology. Considers new understanding in cell
function, energy transduction, solar energy, flow, transport, weather, green science, and other basics of nature and engineering.

**BIOEN 557 Advanced Molecular Bioengineering (4)**  
P. STAYTON Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine, and therapeutics based on cells. Offered: jointly with MOLENG 515; A.

**BIOEN 560 Neural Engineering (3)**  
Azadeh Yazdan-Shahmorad, Chet T Moritz Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Offered: jointly with E E 560; A.

**BIOEN 561 Neural Engineering Tech Studio (4)**  
Azadeh Yazdan-Shahmorad, Chet T Moritz Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 560 Offered: jointly with E E 561; W.

**BIOEN 563 Optogenetics (3)**  
Andre Berndt Overview of optogenetics, which utilizes light-activated ion channels and fluorescent proteins to control and monitor neuronal activity through remote light stimulation in intact brain tissue. Includes (1) molecular basis, (2) tools and instrumentation, (3) experimental design, and (4) application range of optogenetic approaches. Builds a robust foundation for designing contemporary optogenetic experiments. Offered: W.

**BIOEN 566 Neural Computation and Engineering Laboratory (3)**  
Amy Orsborn Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Offered: jointly with E E 564.

**BIOEN 568 Real-Time Biosignal Processing (3)**  
C. Neils Lab-based introduction to techniques for real-time signal acquisition, processing, and output, emphasizing software as an interface between user and electronic circuits. Students write programs for implementation both in graphical programming environments and in portable microprocessor platforms. In-depth discussion of hardware specifications and implications for circuit design. Recommended: Basic Electrical Engineering Offered: W.

**BIOEN 570 Systems Immunology and Immunoengineering (3)**  
Hao Yuan Kueh Explores current progress towards a quantitative, systems-level understanding of immune system function. Topics include sensitivity and selectivity in immune receptor signaling, cell-cell coordination by cytokine communication, and cell engineering for immunotherapy.

**BIOEN 572 Biosensors for Cancer (4)**  
Albert Folch Introduces the broad field of biosensors for cancer diagnostics. Offered: A.

**BIOEN 573 Biosensors and Biomedical Sensing (3)**  
P. Yager In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Offered: W.

**BIOEN 574 Immunoengineering (3)**  
K. Woodrow Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases. Offered: W.

**BIOEN 575 Global Health Technology: Molecular Diagnostics (4)**  
B. Lutz Teachers engineering principles, tools, and technologies needed to practice or develop nucleic acid (DNA/RNA) diagnostics and their context in global health. Recommended: Advanced Engineering, Chemistry or math background. Offered: W.

**BIOEN 576 Laboratory Techniques in Protein Engineering (4)**  
Practical introduction to
fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or permission of instructor.

**BIOEN 577 Cell and Protein Reaction with Foreign Materials (3)** Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

**BIOEN 578 Biomembranes (3)** P. YAGER Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

**BIOEN 579 Host Response to Biomaterials (3)** C. GIACHELLI Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthesis use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently), or permission of instructor.

**BIOEN 581 Engineering Cell Biology (3)** D. Kim Introduces engineering approaches for analysis and control of cell structure and function, and application of such technologies in cell biology studies. Covers the basics of cell biology, engineering cellular microenvironments, as well as effects of external engineering stimuli on cellular processes, which have significant implications in various diseases such as cancer, neuromuscular disease, and cardiovascular disease. Recommended: Introductory Biology, General Chemistry Offered: A.

**BIOEN 583 Vascular Biology and Engineering (3)** Y. Zheng Vascular Engineering has emerged to provide strategies for generating vascular grafts with long-term patency, and vascularized tissues for regenerative medicine and disease modeling. This course focuses on understanding the structure and function of different vascular beds in vivo, and learning the cutting edge research and engineering principles in vascular biology and engineering. Recommended: Introductory Biology, General Mechanics, and Cell Biology Offered: W.

**BIOEN 585 Computational Bioengineering (4)** W. THOMAS Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems.

**BIOEN 586 Tissue Engineering (3)** D. Kim Tissue structure and function, scaffold design, applications to specialized tissues and organs. Offered: W.

**BIOEN 587 Bioengineering and Nanotechnology (3)** X. Gao Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine.

**BIOEN 588 Computational Protein Design (4)** V. DAGGETT Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems.

**BIOEN 589 Advanced Tissue Engineering (3)** Develops advanced knowledge in tissue engineering. Primarily through critical assessment of seminal publications in areas such as biomaterials, biofabrication, organ decellularization, cellular self-organization, organoids, and regenerative medicine. Students identify groundbreaking studies in tissue engineering and communicate the impact to other scientists and the public. Recommended: BIOEN 586.

**BIOEN 590 Advanced Topics in Biomaterials (3)** Major, controversial issues in application of
synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

**BIOEN 591 Controlled Release Systems (3)** Suzie H Pun
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: W.

**BIOEN 592 Surface Analysis (3)** D. Castner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger) ; ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

**BIOEN 593 Advanced Surface Analysis (3)** D. CASTNER Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with CHEM E 593; W.

**BIOEN 594 Advanced Drug Delivery (3)** S. PUN
Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: Sp.

**BIOEN 598 Research Rotation (1-10, max. 30)**
Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no-credit only. Offered: AWSpS.

**BIOEN 599 Special Topics in Bioengineering (1-6, max. 30)** Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.

**BIOEN 600 Independent Study or Research (*/-)** Offered: AWSpS.

**BIOEN 601 Internship (1-10, max. 10)**
Bioengineering graduate internship program. Requires written report. Prerequisite: permission of supervisory committee chair. Offered: AWSpS.

**BIOEN 700 Master's Thesis (*/-)** Offered: AWSpS.

**BIOEN 800 Doctoral Dissertation (*/-)** Offered: AWSpS.

**PHARMACEUTICAL BIOENGINEERING**

**PHARBE 500 Molecular and Cellular Biology for Pharmaceutical Bioengineering I (4)** Case based examination of fundamental molecular processes that occur in organisms. Topics include structure and organization of prokaryotic and eukaryotic cells, prokaryotic and eukaryotic gene structure and regulation, signaling pathways, RNA, DNA, metagenomics, and systems biology. Integrates online literature/media resources and bioinformatics. Cultivates critical thinking approaches to latest developments. Offered: A.

**PHARBE 502 Pharmaceutics I (4)** Covers the drug development process for both small molecules and biological form discovery stage through the end of phase 1. Addresses the science, logistics, and regulatory environment of preclinical (pharmacology, PKDM, toxicology, CMC) and early clinical development. Offered: A.

**PHARBE 503 Pharmaceutics II (4)** Covers phases II and III of the drug development process. Topics include clinical study design, safety, pharmacology, and statistics. Provides an overview of the preparation and filing of the New Drug Application (NDA) . Uses case studies to demonstrate key concepts. Prerequisite: PHARBE 502 or permission of instructor. Offered: W.

**PHARBE 505 Pathophysiology for Pharmaceutical Bioengineering (4)** Introduction to human anatomy,
physiology, molecular biology and cell biology of major organ systems. Emphasis on the structural, molecular, and cellular mechanisms of common pathological conditions (pathophysiology). Additional emphasis on pharmaceutics development for common pathologic states. Students will understand the basics of normal and aberrant human physiology. Offered: W.

PHARBE 506 Pharmaceutical Bioengineering Seminar (2) Provides a deeper understanding of the biotech and pharmaceutical industries through a mix of scientific talks, presentations by industry leaders, and discussions with program alumni. Students also practice professional skills, such as resume and cover letter writing and interviewing skills. Credit/no-credit only. Offered: A.

PHARBE 510 Applied Pharmacokinetics (5) Covers basic principle of pharmacokinetics and its impact on treatment, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Offered: A.

PHARBE 511 Process Development (5) Examines the principles involved in designed and developing production processes for protein therapeutics. Covers technologies, methods, and unit operations used in the development and GMP manufacture of biopharmaceuticals. Includes interdependencies of upstream, downstream, analytical, formulation and drug delivery technologies, illustrated with key biochemical, chemical, and physical chemical reaction examples. Offered: W.

PHARBE 522 Molecular Targets and Drug Classes (5) Discusses select medicinal compounds, emphasizing mechanism of action, biotransformation, and structural and physical properties governing absorption, distribution, and excretion. Design of therapeutics to focus on maximizing efficacy while reducing toxicities. Compounds include classical organic small-molecules, peptides, proteins, nucleic acids, lipids, carbohydrates, and other bioactive chemical classes. Offered: Sp.

GLOBAL HEALTH

G H 101 Introduction to Global Health: Disparities, Determinants, Policies, and Outcomes (5) I&S Todd Faubion, Stephen Gloyd Provides an introduction to global health, including: the burden and distribution of disease and mortality; the determinants of global health disparities; the making of global health policies; and the outcomes of global health interventions. Offered: jointly with GEOG 180/JSIS B 180; Sp.

G H 201 Multidisciplinary Perspectives in Global Health (1) I&S, DIV David Citrin Presenters from a multidisciplinary group of professionals introduce key topics, challenges, and opportunities in the field of global health. Speakers provide a broad-based overview of disparities, determinants, policies, and outcomes in global health, as influenced by factors such as communication, culture, and global power structures, among others. Credit/no-credit only. Offered: A.

G H 220 Global Environmental Change and Public Health (3) I&S Kristie L Ebi Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with ENV H 220.

G H 305 Global Health and Justice (3) I&S Beth E. Rivin Explores health as a human right, focusing on injustices and inequities that occur around the world that result in disease, disability and death. Using a justice framework, considers social determinants of health and vulnerabilities of marginalized groups. Students learn about SDGs, human rights law, bioethics and the pivotal role that law and ethics play in addressing injustices in health. Offered: jointly with LAW 305; W.

G H 306 Introduction to Collaborative Approaches and Respectful Partnerships in Global Health (5) I&S K. Beima-Sofie, K. West Introduces students to principles and concepts of community-based participatory research (CBPR), and other approaches that center the community and focus on respect, relationships, and mutual benefit. Emphasizes self-reflection of our own abilities to respectfully engage with communities, and prepares students to be mentees in global community partnerships. Recommended: G H 101 Offered: A.

G H 307 Introduction to Implementation Science for Global Health (5) I&S Anjuli D Wagner, Gabrielle O’Malley Introduces the concepts, theories, and methods of implementation science in global health. Through team-based learning approach, students will acquire and use knowledge to solve problems, answer questions, and make decisions about selecting, adapting, disseminating, implementing, and scaling evidence-based interventions. Special topics include quality improvement, de-implementation, capacity building, and sustainability. Recommended: G H 101 Offered: Sp.

G H 308 Contemporary Issues in Non-Communicable Diseases (5) I&S, DIV Rachel A Nugent, David Watkins Introduces noncommunicable diseases by putting their causation, health and socioeconomic impact, and control strategies into a global context. It examines their global burden, determinants, risk factors, health disparities, and preventive actions. Both health service interventions and intersectoral measures are explored based on evidence review and economic evaluation. Global policies to foster and monitor action are reviewed. Recommended: G H 101 Offered: W.

G H 345 Global Health Economics (5) I&S C. Levin Introduces the application of health economics and the tools economists use to inform global health solutions in low and middle-income countries. Examines relationship between global health and development, survey of health economic evaluation concepts with focus on diseases and conditions in low and middle-income countries. Recommended: ECON 200 strongly recommended, G H 101 recommended Offered: jointly with ECON 345; A.

G H 399 Global Health Study Abroad (1-5, max. 15) I&S For participants in approved study abroad programs. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

G H 401 Core Topics in Global Health (1/3) Patricia B Pavlinac Examines a variety of foundational global health topics including maternal, adolescent, and child health; nutrition; infectious diseases; environmental health; non-communicable diseases; and mental health. Within each topic area, we will define the problems, complexities, and context, and establish the need for multidisciplinary approaches. Offered: A.

G H 402 Current Research and Programs in Global Health (1/3) Christine J McGrath Examines current research and programs in Global Health priority areas with an emphasis on the use of research evidence to inform policy and implementation strategies in programmatic settings. Evidence-based approaches to address key global health issues in maternal, adolescent, and child health, infectious diseases, environmental health, and non-communicable diseases will be evaluated. Offered: W.

G H 406 International Climate Negotiations within the United Nations Framework Convention on Climate Change (1) I&S Kristie L Ebi Explores the status of the negotiations under the United Nations Framework Convention on Climate Change, including key agreements reached; the role of science; and the
diverse perspectives of countries and sectors. Offered: A.

G H 410 Advanced Biologic Principles of Global Diseases (3) NW Lucy A. Perrone Presents selected communicable and noncommunicable diseases of global health importance at an advanced level. Students learn about biological principles, host-pathogen interactions, and other factors that influence the burden of global health diseases. Prerequisite: either BIOL 180, G H 210, or MICROM 301. Offered: W.

G H 415 War and Health (4) I&S A. Hagopian, E. Kanter Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 415; Sp.

G H 418 Understanding and Managing the Health Risks of Climate Change (3) Kristie L Ebi The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with ENV H 418; W.

G H 419 Global Perspectives in Bioethics (3) I&S, DIV N. Jecker Examines problems in bioethics from diverse global standpoints, including East Asian, Sub-Saharan African and Western. Our emphasis is on developing a deeper understanding of the cultural assumptions that lie just beneath the surface of bioethics debates. Readings from contemporary philosophy, film and literature. Recommended: Prior course work in ethics, philosophy, or global health. Offered: jointly with B H 488; Sp, odd years.

G H 446 Global Perspectives on Reproductive Health (3) I&S, DIV A. Drake, J. Unger Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics. Offered: Sp.

G H 454 Bioengineering Solutions to Improve the Health of Families Worldwide (1) I&S, DIV Alexis L Kaushansky Seminar series that engages students in interdisciplinary discussions about global health. Explores how bioengineering approaches contribute to (1) the study of problems of global health importance, (2) the development of diagnostics, and (3) the discovery of interventional strategies to improve human health. Emphasizes collaboration between students and researchers with backgrounds in infectious disease, basic science, and bioengineering. Credit/no-credit only. Offered: jointly with BIOEN 454; A.

G H 456 Global Mental Health (3) I&S, DIV Rao Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: A.

G H 458 Global Violence and Health (3) I&S, DIV S. Benki-Nugent Examines the socio-politico-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence and severity of violence in real world circumstances, including countries at all economic levels. Offered: W.

G H 482 The Health of Populations (4) I&S, DIV Examines what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with HSERV 482.

G H 490 Special Topics (1-5, max. 15) Offered: AWSpS.

G H 499 Undergraduate Research (1-15, max. 15) Offered: AWSpS.

G H 501 Core Topics in Global Health (1) Patricia B Pavlinac Examines a variety of foundational global health topics including maternal, adolescent, and child health; nutrition; infectious diseases; environmental health; non-communicable diseases; and mental health. Within each topic area, we will
define the problems, complexities, and context, and establish the need for multidisciplinary approaches. Offered: A.

G H 502 Current Research and Programs in Global Health (1) Christine J McGrath Examines current research and programs in Global Health priority areas with an emphasis on the use of research evidence to inform policy and implementation strategies in programmatic settings. Evidence-based approaches to address key global health issues in maternal, adolescent, and child health, infectious diseases, environmental health, and non-communicable diseases will be evaluated. Offered: W.

G H 505 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560.

G H 511 Problems in Global Health ([0-4]-, max. 4) Steve Gloyd Explores social, political, economic, and environmental determinants of health and societal responses to health problems globally. Covers impact of colonialism, equity strategies, Primary Health Care, neoliberalism, war, international agencies, the climate crisis, water, sanitation, and traditional health systems. Student groups develop proposals to improve health systems or address social determinants of health in a specific low-income country. Offered: jointly with HMS 511; A.

G H 514 Global Societal Determinants of Health (2-3) S. Bezruchka Examines societal determinants of health of nations around the globe. We look at the Americas, Africa, countries of the former Soviet Union, India/China and Western Europe. Asks why there is an increasing inequity in health outcomes today? Topics include early life, population health biology, medical care, mental health, and the environment. Offered: jointly with HMS 511; A.

G H 515 War and Health (4) A. Hagopian, E. Kanter Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 515; Sp.

G H 516 Health and Human Rights (3) Beth E. Rivin Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540; Sp.

G H 517 International Bioethics, Social Justice, and Health Seminar (1, max. 3) Rivin Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Credit/no-credit only. Offered: jointly with LAW H 506; Sp.

G H 518 Understanding and Managing the Health Risks of Climate Change (3) Kristie L Ebi The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with ENV H 518; W.

G H 519 Global Perspectives in Bioethics (3) N. Jecker Examines problems in bioethics from diverse global standpoints, including East Asian, Sub-Saharan African and Western. Our emphasis is on developing a deeper understanding of the cultural assumptions that lie just beneath the surface of bioethics debates. Readings from contemporary philosophy, film and literature. Recommended: Prior course work in ethics, philosophy, or global health. Offered: jointly with B H 588; Sp, odd years.

G H 521 Leadership Development in Global Health (3) Nancy M Campbell Focus on enhancing ability to lead in complex global health environments. Self and group assessment, case studies, and small group work. Topics include personal and professional vision, mission, and values; communication and influencing strategies; understanding strengths and weaknesses as a leader. Offered: W.
G H 522 Global Program Management and Leadership (3) Ann Downer, Britt Yamamoto Focuses on management and leadership skills for complex global health settings. Includes personal leadership strengths/values; management dilemmas, data-driven decisions; program planning design and evaluation; and resource management. Offered: W.

G H 523 Policy Development and Advocacy for Global Health (3) J. Lane Primarily taught through case- and problem-based learning and small group work, explores complex factors affecting global health policy and how context (e.g., ideology, culture, and history), international institutions, scientific knowledge, and stakeholder interests affect the structure of and changes to a nation’s health system and its performance. Offered: Sp.

G H 524 Project Management in Global Health (3) Covers the fundamentals of project management, including conducting needs assessments, creating planning and implementation documents, managing resources, transitioning projects, and monitoring and evaluating projects. Discusses practical tips, tools, and techniques for how to address unexpected challenges that inevitably arise in international and other low resource settings. Offered: W.

G H 520 Methods, Tools, and Data in Global Health (2) Emmanuela Gakidou Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Credit/no-credit only. Offered: jointly with HMS 539; A.

G H 531 Research and Evaluation Methods in Global Health (3-4) Caryl Feldacker Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with EPI 539; Sp.

G H 532 Responsible Conduct of Research: Global and Local (3) Alison Drake, Carey Farquhar Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with EPI 586; A.

G H 533 Survey Research Methods (4) A. MOKDAD Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/HSERV 527.

G H 534 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555/EPI 555.

G H 535 Advanced Methods for Global Health I (4) Bryan Weiner Focuses on the advanced concepts, theories, and methods of implementation science in global health, with a specific focus on fidelity, adaptation, strategy selection, de-implementation, sustainability, scale-up, advanced trials designs, qualitative methods, and mixed methods. Assumes prior knowledge of the fundamentals of implementation science. Prerequisite: G H 541 or permission of instructor. Offered: jointly with HMS 535; A.

G H 536 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 528/EPI 553/HMS 536; W.
G H 537 Advanced Methods for Global Health III (4)
Brad Wagenaar Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 525/EPI 556/HMS 537; Sp.

G H 538 Advanced Qualitative Methods in Anthropology and Public Health (5) Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519; even years.

G H 539 Analyzing Qualitative Data (3) Kristin M Beima-Sofie Expands upon qualitative data analysis methods introduced in other courses to ensure students gain practical skills to complete independent qualitative analysis. Students gain expertise with coding strategies and approaches, use of frameworks, translation and presentation of findings, approaches for rapid data analysis, and mechanics for writing manuscripts and reports. Recommended: prior coursework in qualitative research methods including study designs and data collection procedures

G H 541 Fundamentals of Implementation Science in Global Health (4/5) Judith N. Wasserheit, Kenneth Sherr Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: jointly with HMS 541; Sp.

G H 543 Global Health Pharmacy: Medicines, Practice, and Policy (2) Andy Stergachis Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Offered: jointly with PHARM 581.

G H 544 Maternal and Child Health in Low and Middle Income Countries (3) D. Denno Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; W.

G H 545 Child Health in Low and Middle Income Countries ([0-3], max. 3) Denno Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: Sp.

G H 546 Global Perspectives on Reproductive Health (3) I&S, DIV A. Drake, J. Unger Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics. Offered: Sp.

G H 547 Adolescent Health in Low-Resource Settings (1) Keshet Ronen Highlights issues affecting adolescents in resource limited settings with an initial focus on what makes adolescents unique. Topic-based seminars, journal article discussions, and student-led discussions will include: adolescent development; physical and psychological trauma; illicit activities; ethics and the law; adolescent-focused research and programming; and public policy. Credit/no-credit only. Offered: Sp.
G H 549 Global Laboratory Systems (1) Olusegun O. Soge, Lucy A. Perrone Provides an overview of the role of clinical and public health laboratories in a national public health system, both in US and globally. Covers the functional components of a laboratory system and the importance of quality laboratory information on public health policy making. Topics include disease diagnosis, surveillance, outbreak response, law and regulation and how laboratory information contributes to health policy development. Offered: jointly with LAB M 549; Sp.

G H 554 Bioengineering Solutions to Improve the Health of Families Worldwide (1/2) Alexis L Kaushansky Seminar series that engages students in interdisciplinary discussions about global health. Explores how bioengineering approaches contribute to (1) the study of problems of global health importance, (2) the development of diagnostics, and (3) the discovery of interventional strategies to improve human health. Emphasizes collaboration between students and researchers with backgrounds in infectious disease, basic science, and bioengineering. Credit/no-credit only. Offered: jointly with BIOEN 554; A.

G H 555 Nutrition in Developing Countries (3) Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp, odd years.

G H 556 Global Mental Health (2-3) Deepa Rao Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: A.

G H 558 Global Violence and Health (2-3) Sarah F. Benki Examines the socio-political-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence and severity of violence in real world circumstances, including countries at all economic levels. Offered: W.

G H 560 Principles of STD/HIV Research (2) Renee Heffron, Christine M Khosropour Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no-credit only. Offered: S.

G H 561 Tropical Medicine (1) Seth Cohen, Frederick S Buckner Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: Sp.

G H 562 AIDS: A Multidisciplinary Approach (2) Carey Farquhar Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/MED 530.

G H 563 HIV/STI Prevention Research Methods (3) R. Heffron, A. Roxby Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interventions, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with EPI 549.

G H 565 Diseases and Issues in Global Health (2) O. Soge Provides a broad perspective on global health issues; the biology and strategies for control of diseases of global importance; the global health landscape; and factors that influence global health. Recommended: Background in cellular and molecular biology, and microbiology recommended. This course is intended for students pursuing
laboratory-based research in pathogen biology. Offered: jointly with PABIO 550; A.

**G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4)** Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Instructors: L. Campbell Offered: jointly with PABIO 551; A.

**G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2)** M. Blank, J. Zunt An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no-credit only. Offered: W.

**G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2)** Susan M. Graham Prepares students for community-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after returning to the United States. Explores the problems and promise of current global health strategies. Prerequisite: participation in International Health Opportunities Program or similar experience. Credit/no-credit only. Offered: A.

**G H 573 Clinical Management of HIV (2-3)** H. Kim Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: Sp.

**G H 574 Global Health Nursing (3)** Reviews global health topics and the complex local and global conditions that affect the health and illness of individuals, communities, and populations. Emphasizes the multi-faceted roles of health care providers. Offered: jointly with NURS 581; A.

**G H 575 Global Health Leadership for the Clinician (3)** Carey Farquhar, Aliza Monroe-Wise One-month intensive course for clinicians interested in careers in global health. Designed to teach the skills necessary to become future leaders in this field. Comprised of several different components, including field visits to local global health organizations, lectures, and small group case-based discussions. Credit/no-credit only. Offered: A.

**G H 576 Health in Complex Humanitarian Emergencies (2)** D. Townes Covers the principles of planning, implementing, and evaluating health programs for refugees and internally displaced persons during complex humanitarian emergencies in resource poor countries. Topics include rapid assessment; surveys; surveillance; nutrition; camp management; epidemiology of infectious diseases; water and sanitation; and vaccination campaigns during international relief operations for complex humanitarian emergencies. Credit/no-credit only. Offered: A.

**G H 580 Global Health Doctoral Seminar (1/2, max. 4)** Bernardo Hernandez Prado, Kenneth Sherr Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of metrics and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Credit/no-credit only. Offered: jointly with HMS 580; AWSp.

**G H 590 Selected Topics in Global Health (1-5, max. 15)** Focuses on topics relevant to global health. Offered: AWSpS.

**G H 592 Program Seminars (1-6, max. 6)** Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

**G H 593 Rethinking Global Health (1, max. 3)** Deepa Rao, Ahoua Kone Focuses on building a global health Master of Public Health cohort with a sense of camaraderie, confidence, and communication skills to participate effectively in future work in global health. Topics covered include social injustice, inequity, and a deep examination of our roles as public health professionals within the field of global
health. We use an open forum for exchange of viewpoints. Students are considered co-developers of the course. Offered: AWSp.

**G H 595 Master's Practicum (1-6, max. 6)** Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Prerequisite: permission of faculty adviser. Credit/no-credit only. Offered: AWSpS.

**G H 600 Independent Study or Research (*)** Prerequisite: permission of instructor. Offered: AWSpS.

**G H 700 Master's Thesis (*)** Prerequisite: permission of instructor. Offered: AWSpS.

**G H 800 Doctoral Dissertation (*)** Prerequisite: permission of Graduate Program Advisor. Offered: AWSpS.

---

**UNIVERSITY CONJOINT**

**UCONJ 100 Introduction to Health Professions (1)** Garcia Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

**UCONJ 290 Diversity Issues in the Healthcare Environment (1-2, max. 2) I&S** Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethic and cultural characteristics and healthcare access, health and healthcare concerns of specific communities, traditional and alternative health-care practices, and community-based promotion and disease prevention programs. Credit/no-credit only.

**UCONJ 411 Psychology of Aging (3)** Kiyak Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

**UCONJ 412 The Family in Later Life (3)** Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; intergenerational relationships; economic, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

**UCONJ 413 Current Issues in Aging (3)** Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

**UCONJ 420 Biological Safety Practices (1)** Kenny General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no-credit only.

**UCONJ 422 Sexually Transmitted Diseases: An Overview (2)** Gardner Clinically oriented course designed to provide a knowledge base for upper-division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

**UCONJ 440 Biological Aspects of Aging (3)** Introduction to aspects of the biology of human aging and functional changes associated with normal aging and with illnesses that may be present in the elderly. Explores the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

**UCONJ 442 Social and Cultural Aspects of Aging (3)** Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and
economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

**UCONJ 500 Seminar in Interprofessional Collaboration** ([1-3], max. 7) Interdisciplinary teams of students and community members placed in diverse urban settings address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Offered through Graduate School of Public Affairs. Offered: AWSp.

**UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health** (3) Gorstein, Kurth, Shell-Duncan Uses actual multidisciplinary case studies to (1) analyze quantitative parameters of diseases, (2) contrast the descriptive and analytic approaches of health sciences, anthropology, and nutritional sciences, (3) integrate diverse disciplinary perspectives into cohesive information, (4) organize class presentations, and (5) apply critical thinking in approaching complex health issues. Offered: Sp.

**UCONJ 510 Introductory Laboratory Based Biostatistics** (2) Introduces methods of data description and statistical inference for experiments. Covers principles of design and analysis of experiments; descriptive statistics; comparison of group means and proportions; linear regression; and correlation. Emphasizes examples from laboratory-based biomedical sciences, and provides demonstrations using standard statistical programs.

**UCONJ 517 Interdisciplinary Clinical Research Methods Seminar** (2) Provides an introduction to clinical/translational relational research methods, including selection of research questions, study design, measurement, data analysis, and practical aspects of conducting research in clinical settings. Prerequisite: Students from Health Sciences schools conducting research under the Multidisciplinary Predoctoral Clinical Research Training Program. Credit/no-credit only. Offered: S.

**UCONJ 520 Molecular Biophysics Research Seminar** (1) N. Zheng A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no-credit only.

**UCONJ 524 Developmental Neurobiology** (3) Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Instructors: Raible, Reh Offered: Sp.

**UCONJ 525 Overview of Faculty Research in Neurobiology** (1) Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Prerequisite: first-year graduate student in neurobiology. Credit/no-credit only.

**UCONJ 530 Issues in Indian Health** (2) Surveys historical and contemporary issues in Indian health. Covers Indian contributions to health, traditional Indian medicine, current disease epidemiology, development of federal Indian health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian health. Prerequisite: current health science student or permission of instructor.

**UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective** (2) Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. Goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no-credit only.

**UCONJ 532 Health Sciences Common Book Seminar** (1, max. 4) R. ARNOLD Covers material related to the current health sciences common book, and provides knowledge of key barriers underserved populations face in obtaining adequate healthcare, and strategies health professions can use to effectively care for underserved individuals. Guest speakers
include community leaders. Service learning course. Credit/no-credit only. Offered: W.

**UCONJ 545 Emergency Preparedness for Health Professionals (1)** Introduces the roles of health professionals in preparing for community-wide disasters. Emergency preparedness content for graduate and professional students in health sciences. First of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

**UCONJ 546 Emergency Response for Health Professionals (2, max. 6)** Focuses on interdisciplinary emergency preparedness and response for graduate students in health professions. Includes system and policy issues with emphasis on clinical relevance for health professionals. Second of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

**UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3)** Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

**UCONJ 550 Healthcare in the Underserved Community (1)** *Jocelyn James* Gives graduate/professional students in health sciences an introduction to health related issues faced by underserved populations. Credit/no-credit only.

**UCONJ 565 P-The Healer’s Art: Awakening the Heart of Medicine (1)** Encourages cultivation of humanism in medicine while strengthening a personal commitment to service as our life’s work. Facilitates student recognition of common issues related to resiliency, self-care, working with clinical teams, and supporting peers; also, caring for patients in a healing community of discovery with recognition and appreciation of uncertainty, awe, grief, and loss in the practice of medicine. Prerequisite: health science professional training program. Credit/no-credit only.

**UCONJ 584 Plant Tumors (1, max. 9)** Discussion of the literature of plant tumors and current research work being done in this area at the University. Offered cooperatively by the departments of Biochemistry, Biology, and Microbiology and Immunology. Prerequisite: offered only to persons actively pursuing work in this area. Instructors: Gordon Credit/no-credit only.

**UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6)** Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Prerequisite: UCONJ 517; permission of instructor. Instructors: Marshall, Mitchell Credit/no-credit only. Offered: AWSp.

**UCONJ 624 Health Equity and Community Organizing (1)** *Arnold* Equips students with tools to organize themselves and others to address social and structural injustices that perpetuate health disparities. Didactic coursework complemented with opportunities to apply skills and gain confidence through hands-on collaboration with local leaders and engagement in community-driven listening and advocacy campaigns. Credit/no-credit only. Offered: AW.

**UCONJ 646 Introduction to Advocacy for the Health Professions (1)** *Genevieve L. Pagailiauan* Learn from advocacy and topic specific experts about fundamental elements of health advocacy. Develop hands-on skills for moving beyond witnessing health disparities to upstream action rooted in community-centered advocacy. Credit/no-credit only. Offered: AWSp5.
SCHOOL OF LAW

LAW

LAW 100 Introduction to American Law (2-5, max. 5) I&S Theodore A Myhre Examines the structure of the American legal system and how laws are made. Surveys key doctrinal areas of the law learning fundamental legal concepts, and explore how the law functions and evolves over time, including legal issues and decision-making related to statutory or common law. Offered: A.

LAW 300 Introduction to Law (3-6, max. 6) I&S Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

LAW 305 Global Health and Justice (3) I&S Beth E. Rivin Explores health as a human right, focusing on injustices and inequities that occur around the world that result in disease, disability and death. Using a justice framework, considers social determinants of health and vulnerabilities of marginalized groups. Students learn about SDGs, human rights law, bioethics and the pivotal role that law and ethics play in addressing injustices in health. Offered: jointly with G H 305; W.

LAW 310 Law, Science, and Technology (4) I&S

LAW 410 Problems in Professional Responsibility (4) I&S

LAW 415 Criminal Justice (3) I&S Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

LAW 416 International Contracting: Negotiation and Drafting (3) I&S Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Open to nonlaw students only. Credit/no-credit only.

LAW 422 Copyright (3) I&S

LAW 429 Public Land Law (3) I&S

LAW 440 Legal Issues of Internet Law (3) I&S Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW 442 Land Law and the Urban Environment (3) I&S Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Open to law and nonlaw students. Credit/no-credit only.

LAW 443 The Legal Process I (3/5) I&S The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students.

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I&S Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court’s recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and presidential powers. Open to law and nonlaw students.

LAW 447 Critical Perspectives in Law (3) I&S Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.
LAW 476 International Economic Relations and Trade Policy (3) I&S Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

LAW 477 Law, Literature, and Film ([2-4]-, max. 4) VLPA/I&S An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

LAW 481 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I&S

LAW 489 Law and Aging (3) I&S Survey of principal areas of law of special concern to aging population, considering healthcare and healthcare decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships, and other methods of protecting the property of the elderly, counseling, and professional responsibility.

LAW 600 Independent Study or Research (*-)

LAW 800 Doctoral Dissertation (*-)

LAW A

LAW A 500 Introduction to Perspectives on the Law (1) Explores critical perspectives as a method of understanding common laws to provide context for black letter law. Creates a basic framework for understanding the relationship between race, class, gender, sexuality, and the law to help students deepen their ability to represent and counsel clients from diverse backgrounds and personal identities. Credit/no-credit only. Offered: W.

LAW A 501 Contracts ([2-8]-, max. 8) Focuses on guiding principles of contract law, including formation, consideration, bargaining, performance, conditions, termination, breach, defenses, damages, and remedies available to parties to enforceable agreements. Offered: A.

LAW A 502 Civil Procedure I ([2-6]-, max. 6) Studies procedure that governs how civil disputes in United States are resolved. Offered: ASp.

LAW A 503 Property I ([2-8]-, max. 8)

LAW A 504 Torts ([2-8]-, max. 8) Basic objectives develop an understanding of principles, concepts, and purposes of private law governing injuries and common-law method of adjudication. Topics covered include intentional harms to persons, negligence, and strict liability. The course may cover conversion, trespass to property, nuisance, products liability, misrepresentation, defamation, privacy, misuse of legal procedures, and interference with advantageous relationships.

LAW A 505 Criminal Law ([2-5]-, max. 5)

LAW A 506 Legal Analysis, Research, and Writing ([1-7]-, max. 7)

LAW A 507 Constitutional Law I: Constitutional Structures of Government ([2/6]-, max. 6)

LAW A 508 Transnational Law (3) Survey of basic principles of public international law; comparative and historical overview of various legal traditions (civil law, common law, Islamic law, and mixed systems) . Examines sources, subjects, and challenges of international law, and methodology of comparing foreign legal systems, providing perspective on U.S. legal system and rules. Offered: Sp.

LAW A 509 Administrative Law (3-5)

LAW A 510 Sales (3-4)

LAW A 511 Payment Systems (2/4)

LAW A 512 Secured Transactions (3-4)

LAW A 513 Creditor-Debtor Law ([2-3]-, max. 5)

LAW A 514 Publicly Held Corporations (3)

LAW A 515 Business Organizations (4-5)
LAW A 516 Legal Accounting (2-3)

LAW A 517 Securities Regulation (4) Examines the federal regulations of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934, and the examination of the impact of the Sarbanes-Oxley Act of 2002.

LAW A 518 Restitution (3)

LAW A 519 Trusts and Estates (5) A survey of the law governing gratuitous transfers of property during life and at death. Primary emphasis on the law of wills and intestate succession, trusts and fiduciary relationships. Consideration also given to disability planning, future interests, and common will substitutes such as life insurance, joint tenancy, and multiparty bank accounts.

LAW A 520 Property II ([2-8]-, max. 8)

LAW A 521 Community Property (2/3)

LAW A 523 Real Estate Transactions (3/4)

LAW A 524 Law, Science, and Technology (3) P. KUSZLER Considers how the linkage between science and law has become more pivotal with advancements in technology. Topics include science in the context of criminal law, public regulation, and individual rights. Explores the power of science to promote justice and expose injustice. Offered: A.

LAW A 525 Water Law (3/4)

LAW A 526 Copyrights and Trademarks (5)

LAW A 527 Environmental Law (4)

LAW A 529 Public Land Law (3/4) Covers history of federal public land law, including grants of public land to private interests and the creation of management regimes for lands still publicly owned; aspects of legal rules that govern public timber, grazing, wilderness, and wildlife resources. Also, covers such matters as the public trust doctrine and provides a context for understanding current disputes about use of public lands and resources.

LAW A 530 Individual Income Tax ([2-6]-, max. 6) Study of federal income tax law as it applies to individuals apart from their capacities as partners, shareholders, or beneficiaries of trusts or estates. Examination of the concept of gross income and net income, including investigation of what constitutes income, when it should be taxed, to whom it should be taxed, and its character as unearned, earned, or capital gain income.

LAW A 531 Death and Gift Taxation (2-5, max. 5)

LAW A 532 Taxation of Business Entities (5)

LAW A 534 Mergers and Acquisitions (4-6) Deals with tactics, strategy, and state and federal law relating to transactions by means of which corporations and other forms of business entity combine. Emphasizes corporate law with some treatment of federal tax and securities law issues. Prerequisite: either LAW A 515 or LAW A 567.

LAW A 535 Trademarks and Unfair Competition (2)

LAW A 536 Securities and Shareholder Litigation (2) Covers securities and shareholder litigation in its broadest sense including federal securities litigation, state securities litigation, SEC enforcement, and state law-based derivative litigation. Offered: Sp.

LAW A 537 Taxation of Corporations, Partnerships, and Limited Liability Companies (4-)

LAW A 538 Estate Planning Workshop (3-4)

LAW A 540 Land Use Planning Seminar (3)

LAW A 541 Transnational Tax (5)

LAW A 542 Land Law and the Urban Environment (3)

LAW A 543 Business Reorganization Under the Bankruptcy Code (4)

LAW A 544 Comparative and Transnational Commercial Law (1-4, max. 4) Examines the political economy of transnational commercial law. Uses select international harmonization instruments (e.g. Cape Town Convention on International Interests in Mobile Equipment, UNCITRAL Model Law on Cross-
Border Insolvency, Vienna Convention on Contracts for the International Sale of Goods) to illustrate and critique different methodological and institutional approaches.

LAW A 545 International Environmental Law (3-4)

LAW A 547 Critical Perspectives on Law Seminar ([2-4]-, max. 4) Considers law from the point of view of Continental philosophy and critical social theory. Involves close readings and intensive discussion of canonical texts from various critical traditions of thinking about law. Students also write and present papers concerning themes raised by the readings. Offered: A.

LAW A 548 Civil Rights ([2-6]-, max. 6)

LAW A 549 Advanced Legal Research (4)

LAW A 550 Constitutional Law ([2-8]-, max. 8)

LAW A 551 Global Governance Seminar (3-4) Introduces international and transnational regimes governing issues as varied as international economic inequality and instability; conflict and peacebuilding; humanitarian crises and intervention; and global environmental change. Explores principles of regime design and legal architecture. Evaluates the effectiveness and legitimacy of various modes of global governance.

LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)

LAW A 553 Feminist Jurisprudence Seminar (4) Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.

LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)

LAW A 556 Employment Discrimination ([2-4]-, max. 4)

LAW A 561 Law and Economics (2-4, max. 4) Examines the applications of Law and Economics to: torts, property, contract, and criminal law; intellectual property, tobacco litigation, employment law, human organ sales, and U.S. regulatory design. Offered: jointly with PUBPOL 519.

LAW A 562 Employment Law (3-5) Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers’ compensation, and occupational safety and health.

LAW A 563 Local Government Law (3)

LAW A 564 American Legal History (1-4, max. 4) Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end of slavery, the regulatory state, and rights of women and minority groups.

LAW A 565 American Indian Law (3-4)

LAW A 566 Theories of Justice ([2-4]-, max. 4)

LAW A 567 Closely Held Business Organizations (4) Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken LAW A 515. Offered: A.
LAW A 568 Collective Bargaining and Labor Arbitration (2-4)

LAW A 569 Investments Funds and Managers Seminar (3) Krug Explores U.S. regulation of investment managers and invest companies, including hedge funds and mutual funds. Topics draw heavily from federal securities laws, particularly the Investment Advisers Act and the Invest Company Act of 1940, and encompass regulatory developments/proposals and policy considerations underpinning investment industry regulation. Offered: Sp.

LAW A 571 International Organizations Seminar (3) Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.

LAW A 572 Criminal Justice Policy (4) Provides overview of key policy issues arising in the criminal justice system, such as mass incarceration, victim’s rights movement, racial disparities, and wrongful conviction. Considers role of prosecutors and public defenders in contributing to or alleviating these problems, and how participants in the system can provide leadership in addressing them.

LAW A 574 International Law (2-4, max. 4)

LAW A 576 Cross-Border and International Criminal Law (3-4) Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW A 505. Instructors: Allen. Offered: W.

LAW A 577 Immigration Law (3/4)

LAW A 578 International Business Transactions ([1-4], max. 4)

LAW A 579 Child Advocacy Seminar (2-4, max. 4) Includes child abuse and neglect, parental rights termination, paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.

LAW A 580 Family Law (3-5)

LAW A 581 Washington Constitutional Law ([3/4]-) Studies the history, structure, content, and role of state constitutions generally, and the development of Washington’s constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.

LAW A 582 Bankruptcy (3-4)

LAW A 583 Insurance Law (4)

LAW A 584 American Public School Law (3) Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law in a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.

LAW A 585 Admiralty (3-5)

LAW A 586 Advanced Family Law Seminar (2-4) Discusses family law topics previously excluded or covered only minimally including: adoption, paternity, guardianship, third-party custody, parenting plans in the child welfare context, and family law in the intimate partner violence context. Prerequisite: LAW A 580.
LAW A 588 Survey of the American Judiciary Seminar (1) This course provides a survey of the American Judiciary. Students will learn about a variety of legal proceedings through firsthand observations. Students will compare their observations of the American Judiciary with Afghanistan's judicial system. Prerequisite: either LESPA LLM students, or permission of instructor. Credit/no-credit only.

LAW A 589 Elder Law (4)

LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (2-5, max. 5) Constitutional rights of equal protection, substantive due process, and procedural due process. Also, rights under the Takings Clause and Contracts Clause.

LAW A 591 Constitutional Law: Freedom of Expression (4-5)

LAW A 592 Constitutional Law II ([2-8]-, max. 8) Examines individual constitutional rights, primarily involving guarantees of due process and equal protection found in the 5th and 14th Amendments. Focuses on constitutionality of laws that classify people on basis of race, sex, sexual orientation, and other bases, as well as laws that restrict abortion, contraception, sexual activity, and other individual freedoms. Prerequisite: LAW A 507.

LAW A 595 Jurisprudence and Moral Philosophy ([2/4]-, max. 4) Surveys classic questions in jurisprudence and moral philosophy including the nature, norms, and justifications of legal systems. Considers conceptions of justice in major twentieth- and twenty-first century schools of jurisprudential thought, such as American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.

LAW A 597 Intensive Legal Writing Workshop (2-4) Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editing.

LAW A 599 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Offered: jointly with LIS 592.

LAW B

LAW B 500 Civil Procedure II (2-4) Margaret Ann Kolberg Joinder of claims and parties, complex litigation including class actions, securing and enforcing judgments, appellate procedure, and the binding effect of prior decisions: res judicata and collateral estoppel.

LAW B 503 Evidence ([2-6]-, max. 6)

LAW B 505 Introduction to Law for Masters of Jurisprudence (5) Builds on and incorporates knowledge and fundamental principles of constitutional, contract, tort, property, administrative, and criminal law. Designed for graduate students, seeks to delve more deeply into how law is applied in modern society across many industries. Offered: A.

LAW B 506 Conflicts of Laws ([2-6]-, max. 6)

LAW B 507 Federal Courts and the Federal System (3/4)

LAW B 508 Business, Social Responsibility, and Human Rights (2-4, max. 4) Anita Ramasastry Addresses business obligations to respect human rights. International human rights norms have historically constrained the behavior only of states. Human rights NGOs, investors, consumers, and governments have increasingly pressed businesses to address human rights, the environment, corruption, and other "social" concerns as part of their operations. Offered: A.
LAW B 510 Problems of Professional Responsibility (2-4, max. 4)

LAW B 511 Decision Making for Lawyers: Concepts, Duties, and Skills (3) Enhances students' legal judgment, problem-solving, and prediction skills. Analyzes the psychology of decision making; describes the legal malpractice and disciplinary implications of deficient decision making; identifies the frequency, costs, and predictors of adverse legal outcomes; and demonstrate methods to improve decision making.

LAW B 512 Legislation and the Formulation of Public Policy (3/4) Overview of the constitutional and procedural rules governing the lawmaking process in Washington State. Provides a survey of the processes common to all proposed legislation, regardless of the substantive area addressed in a particular bill. Covers content in an "issue-neutral" format. Offered: A.

LAW B 513 Advanced Evidence ([2-4]-, max. 4) Covers advanced topics in evidence law and policy. Prerequisite: LAW B 503, which may be taken concurrently.

LAW B 514 Street Law ([1-8]-, max. 8)

LAW B 515 Criminal Procedure: Investigation (3-5)

LAW B 516 International Contracting ([2-4]-, max. 4)

LAW B 517 Juvenile Justice Seminar ([1-6]-, max. 6)

LAW B 518 Appellate Advocacy ([1-3]-, max. 3) Credit/no-credit only.

LAW B 519 Pre-Trial Practice (3-4) Offered: A.

LAW B 520 Trial Advocacy ([2-6]-, max. 6) Credit/no-credit only.

LAW B 521 Trial Advocacy II (3-, max. 6) Addresses more advanced trial advocacy issues than are covered in LAW B 520. Includes a civil or criminal track of study and work with trial lawyers who specialize in that area of practice on more sophisticated issues of strategy, evidence, creative use of exhibits at trial, technology in the courtroom, and ethics. Prerequisite: LAW B 520; permission of the Director of the Trial Advocacy Program. Offered: WS.

LAW B 522 Mediation Skills Training (1) Focuses on collaborative style of mediation. Through a mix of theory and practice, students learn the skills, tools, and processes used by mediators. Students observe and practice the five-steps of the mediation process, through demonstrations and roleplaying. Individual coaches work with students to hone their skills. Credit/no-credit only. Offered: AW.

LAW B 523 Negotiation (2-4, max. 4) Credit/no-credit only.

LAW B 524 Alternative Dispute Resolution Seminar (2-, max. 4) Provides opportunities for study, research, and writing related to the legal, policy, and ethical issues in the emerging field of alternative dispute resolution (ADR). Research papers satisfy the advanced writing requirement for JD students. Prerequisite: permission of instructor if LAW B 525 already completed.

LAW B 525 Alternative Dispute Resolution (3) Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of assigned readings, roleplay exercises, videotapes, guest presentations, and student-designed classes.

LAW B 526 Mediation Clinic ([1-10]-, max. 10) Credit/no-credit only.

LAW B 527 Criminal Prosecution Clinic (8) Credit/no-credit only.

LAW B 528 Workers' Rights Clinic ([2-8]-, max. 12) Provides clinical training in workers' rights and administrative law under the supervision of members of the Law School faculty. Students represent workers in employment law matters such as unemployment compensation benefits or wage claims. Credit/no-credit only.

LAW B 529 Advanced Environmental Law and Practice ([1-4]-, max. 4)

LAW B 530 Judicial Externship (1-18, max. 18)
LAW B 531 Immigration Law Clinic ([1-12]-, max. 12) Clinical training in immigration law under the supervision of members of the Law School faculty. The clinic offers a seminar component covering applicable immigration law and procedure, skills training and professional responsibility concerns. The clinic’s practice component will consist of students representing clients in deportation and political asylum cases. Credit/no-credit only.

LAW B 532 Advanced Clinic (1-4, max. 4) Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Prerequisite: Clinical basis for continued work. Credit/no-credit only.

LAW B 533 Interviewing and Counseling for Lawyers (2/3) Credit/no-credit only.

LAW B 534 Counseling Workshop (1-, max. 3) Provides an introduction to the culture of counseling in the legal profession. Students learn about effects of power and privilege in the United States and implications for counseling relationships. Students increase their abilities to engage in respectful practice of counseling people from all backgrounds.

LAW B 535 Legislative Externship (1-18, max. 18) Credit/no-credit only.

LAW B 536 Drafting Business Documents ([1-3]-, max. 3)

LAW B 537 Refugee Advocacy Clinic ([1-12]-, max. 12) Credit/no-credit only.

LAW B 538 Agency Externships (1-18, max. 18) Credit/no-credit only.

LAW B 539 Public Interest Law Externship ([1-18]-, max. 18) Credit/no-credit only.

LAW B 540 Japanese Law (3-4) Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with JSIS A 540.

LAW B 541 Chinese Law (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic, and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with JSIS A 541.

LAW B 542 Comparative Korean Law (2-4) Introduction to basic institutions and processes of the Korean legal systems. Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.

LAW B 544 Civil Litigation in Comparative Context ([2-4]-, max. 4) Covers international jurisdiction, service process abroad, taking evidence abroad, applicable laws and treaties, comparison of trial procedures, enforcement of foreign judgments, and use of arbitration. Uses United States and translated Japanese cases.

LAW B 545 Deposition Practice (3) Offers intensive training in the applicable law, strategy, skills, and techniques of deposition practice. Combines traditional lectures and demonstrations with the case model developed by the National Institute for Trial Advocacy. Multiple opportunities to prepare, take, and defend depositions, with substantial feedback and criticism. Prerequisite: LAW B 503 or LAW B 513; LAW B 520, either of which may be taken concurrently. Credit/no-credit only.

LAW B 546 Cross-Border Business Transactions Between China and the United States (4) Uses case study methodology to explore how United States law and Chinese economic policy and business laws are used in achieving Chinese-United States cross-border transactions. Open to law, business, and international studies students.

LAW B 547 Comparative Constitutional Law (2-5) Examines the constitutional structure of the U.S. government and the jurisprudence of U.S. constitutional courts, and compares them with the constitutional structures and jurisprudence of several foreign countries.

LAW B 548 Forensics (4) Bailey Introduces the world of expert witnesses in both criminal and civil cases,
looking at the forms of scientific and technical knowledge commonly involved. Covers not only the standard and rules governing expert testimony, but also provide opportunities for hands-on experience. Offered: W.

**LAW B 549 Government Regulation of Business in Japan (3)** Offered: jointly with JSIS D 549.

**LAW B 550 American Legal Systems and Method ([1-6]-, max. 6)** Provides an integrated introduction to the basic structure and principles of the U.S. public and private law systems; the sources and techniques for basic legal research; and the analytical and writing skills expected of U.S. trained lawyers. Offered: A.

**LAW B 551 Comparative Law Seminar ([2-6]-, max. 6)** Provides an introduction to comparative legal scholarship and comparative methods for research in Asian, European, and American law. Examines the challenges and controversies found in comparative law and comparative legal studies as well as methodological innovations in modern comparative legal studies.

**LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 6)**

**LAW B 553 Chinese Legal Tradition (3)** Offered: jointly with JSIS D 553.

**LAW B 554 Research Tutorial ([1-15]-, max. 15)**
Introduces students to social science research methods that may be applicable to their research agenda. Focuses on reading, discussion, commentary, writing, and especially rewriting under close and targeted supervision by the professor. Offered: jointly with JSIS 595.

**LAW B 555 Roman Law (2/3)** Constitutional and historical background of Roman law as it evolved over a thousand years: the law of persons (marriage, families, and slavery); the law of property and inheritance; the law of contracts; the law of crimes and torts; and constitutional public law. Focus on the "classical" period of Roman law, roughly 100 BCE to 200 CE. Knowledge of Latin not necessary.

**LAW B 556 Islamic Law (2-5)** Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 536.

**LAW B 557 Graduate Writing Seminar ([2-6]-, max. 6)** Through class instruction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.

**LAW B 558 Doctoral Seminar ([2-10]-, max. 10)** Covers basic analytical frameworks and methodology to help prepare students for writing a dissertation. Surveys doctrinal and interdisciplinary legal theory. Examines law teaching and academic scholarship. Students research, draft, edit, and submit a scholarly article for publication. Offered: AW.

**LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)**

**LAW B 560 Criminal Justice Externship (1-18, max. 18)** Credit/no-credit only.

**LAW B 561 International Law of the Sea (3-4)**

**LAW B 562 Quantitative Methods (4)** Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re) consider issues such as proof, deterrence, and identity politics.

**LAW B 563 Marine Law and Policy Seminar ([2-6]-, max. 6)** Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

**LAW B 564 Women, Poverty, and Natural Resource Management (2-3)** Seminar examines the links between women, law, land/natural resources, poverty in international development. Issues covered include reasons for focusing on women or
men within households rather than households as units; land/natural resource rights as critical to household food security and development; the role of law in supporting women's rights. Issues are examined through the lens of a legal practitioner in international development. Offered: A.

LAW B 565 U.S. Coastal and Ocean Law (3-5) Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

LAW B 566 Legal Problem Solving in the Corporate Context (3) Focuses on the lawyer as a problem-solver in advising corporate and business clients. Topics include resolution of legal risks at the intersection of the duties of officers and directors, corporate governance, securities regulation, internal investigations, whistleblowers, alternative means of resolving disputes, and related issues. Offered: Sp.

LAW B 567 General Externship Perspectives Seminar (2, max. 6) Credit/no-credit only.

LAW B 568 Field Seminar in Law, Rights, and Governance (3-5) Saadia M. Pekkanen, Angelina Snodgrass Godoy, Kathie Friedman Exposes students to theoretical and policy debates about the causes and consequences of legal evolution, rule of law, and a broad range of world governance concerns. Topics include human rights, markets, commerce, climate, environment, migration, institutions, justice, order, and rule of law. Offered: jointly with JSIS 599.

LAW B 569 Development Innovations Laboratory (1-3, max. 6) J. Lenga Students work in teams on international development and human rights projects for nonprofit/nongovernmental organizations under the close supervision of faculty. The work includes legal and factual research and often fact-gathering through interviews. Students present their findings and recommendations to client organizations orally and in writing. Offered: WSp.

LAW B 570 Bio-entrepreneurship and the Law (3) Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up company.

LAW B 571 PhD Colloquium (1-3, max. 3) Designed for students to engage with research agendas in the academy and to build a professional skill set for success - from writing conference abstracts and preparing articles for publication to 'workshopping' papers and developing their dissertations. Credit/no-credit only.

LAW B 572 Election Law (3-4) Examines the law of elections in the United States. Major themes include the design of electoral maps; the protection of voting rights; political parties and state action; money in politics; and the administration of elections.

LAW B 573 Supreme Court Decision Making Seminar (2-4, max. 4) Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

LAW B 575 Family Law: Selected Topics (2-3) Covers current cutting-edge and complex areas of family law that challenge traditional definitions of "family." Examines marriage, dissolution, and parenting disputes through the lens of "nontraditional" families and families created through medical intervention. Prerequisite: LAW A 580 or permission of instructor. Instructors: Mastroianni, Price Offered: A.

LAW B 576 Climate Justice Seminar ([1-6]-, max. 6)

LAW B 577 Law, Literature and Film ([2-4]-, max. 4) An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6) Focuses on the application of law of international development (comparative, transnational and international) to a series of issues; income redistribution (prominently
including comparative land reform and decollectivization experience), health and population, environmental and other aspects of "sustainability", women's participation, and role of transnational resource flows.

LAW B 579 Law and Development: History and Theories (3/4) Examines the role of law in fostering economic and social development in developing countries, emerging markets, and nations in transition. Provides a historical overview of the role of law in alleviating poverty and exposes students to key theoretical perspectives. Offered: A.

LAW B 580 Externship Tutorial (2) Credit/no-credit only.

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

LAW B 582 International Development Practicum (1-8, max. 8) Provides experience with an approved non-profit organization, business, judicial or legislative body, or intergovernmental or governmental agency on issues related to law and development and sustainable development. Students work under the guidance of experienced practitioners. Credit/no-credit only. Offered: AWSpS.

LAW B 584 Indigenous Governance Law ([2-6]-, max. 6) Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.

LAW B 585 Natural Resources Law ([1-4]-, max. 4)

LAW B 586 Global Development Law and Policy Workshop (2-, max. 4) R. HEDIN, A. RAMASASTRY Students engage in hands on legal research to address current development challenges in partnership with key development organizations. Offered: WSp.

LAW B 588 Title Leadership in Sustainable Development Colloquium (1-2, max. 2) Anita Ramasastry Professional development colloquium for students in Sustainable International Development graduate program. Students will meet with experts from the nonprofit sector, governmental and intergovernmental organizations and the private sector to learn about different career paths in the field of sustainability. Students will learn about key skills necessary for career placement. Offered: Sp.

LAW B 589 Social Enterprise Law (2-3) Social enterprise is increasingly driving commerce, corporate norms, and investment foals globally. Begins with an introduction of social enterprise, including underlying principles and legal framework, followed by in-depth analysis of governance, operational and investment considerations, both domestic and abroad Includes lectures, reading, and one student project. Offered: W.

LAW B 590 Constitutional Law: Current and Future Issues Seminar (2) Examines cutting edge constitutional claims currently making their way through the lower courts or that seem likely to be litigated in the near future. Prerequisite: LAW A 507 and LAW A 592.

LAW B 591 Law and Society in Asia ([2-6]-, max. 6)

LAW B 593 Natural Resources Commons Property (3) A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

LAW B 594 Public Land Law Seminar ([2-6]-, max. 6)

LAW B 595 International Humanitarian Law (3-5) Lorenz Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq. Offered: Sp.

LAW B 596 International Human Rights ([2-4]-, max. 6) Examines international treaties and customary laws protecting fundamental human rights against abuse by governments. Covers major international systems including UN, Council of Europe, European Union, Inter-American, and African Union. Readings include international and American judicial opinions, treaties, and studies by human rights groups and scholars.
LAW B 597 Journal Seminar (1-3, max. 3) Focuses on topic selection, research, and drafting to assist students on one of the law school journals. Provides students with the opportunity to explore a topic in depth, to think critically about current law, and to consider future developments by writing a substantial note or comment. Does not satisfy the advanced writing requirement.

LAW B 598 Advanced Research and Writing Seminar ([1-6], max. 6)

LAW B 599 Special Topics (1-12, max. 12)

LAW C

LAW C 507 Constitutional Law I: Constitutional Structures of Government for International Law Graduates (3) Seeks to provide an understanding of the history and theories behind the Constitution, including the source of the federal government’s power, the division of power between the federal and state governments, and the distribution of federal power among the legislative, executive, and judicial branches of government.

LAW C 510 Professional Ethics for International LLM Students (1-4, max. 4) Karen E Boxx Provides foreign-trained LLM students background in professional responsibility issues, including confidentiality, conflicts of interest, role of the lawyer, and understanding business issues. Designed for international students to master professional responsibility rules online prior to arrival at law school, with discussion sections while in residence. Offered: S.

LAW C 530 For-Profit Small Firm Externship (4-6) Field-based experience in pre-approved for-profit small law firm (10 attorneys or fewer) under supervision of authorized field supervisor. Students may not receive any monetary compensation for the work, nor may clients be billed for work performed by a student. Students must enroll concurrently in an approved companion seminar. Credit/no-credit only.

LAW C 535 For-Profit Corporate Counsel Externship (4-6) Field-based experience in pre-approved corporate legal department under supervision of authorized field supervisor. Students may not receive any monetary compensation for the work, nor may clients be billed for work performed by a student. Students must enroll concurrently in an approved companion seminar. Credit/no-credit only.

LAW E

LAW E 500 Advanced Writing Project (1-3, max. 3) Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

LAW E 502 White Collar Crime (3-4)

LAW E 503 Analytic Writing (3)

LAW E 505 International Business Compliance (4) Examines legal regulations covering businesses operating internationally, including ways businesses structure efforts to comply with those regulations. Risk management principles applied by businesses, the roles of lawyers, directors, and others in the compliance program, and the underlying law that compliance programs address. Offered: W.

LAW E 506 Business and Financial Literacy for Law Students (3) Introduces students to a broad range of fundamental business and financial topics. Emphasizes breadth, relevance, and promoting a basic understanding of foundational business concepts and terms; financial statements; quantitative concepts; how markets function; core business challenges; and practical, business-related challenges often faced by lawyers.

LAW E 507 Access to Justice Seminar (2) Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no-credit only.

LAW E 508 Persuasive Writing (2-4) Anderson Studies persuasion and rhetoric by practicing legal argument: working with facts, framing issues, constructing legal arguments. Studies examples of good and bad persuasive writing. Students practice written advocacy skills in a number of assignments. Students practice advocacy in the context of pre-trial motions and appeals.
LAW E 509 European Union Law (2-4) Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.

LAW E 510 Banking Law (2-3) Introduces the basics of banking law and regulation. Topics include separate sections on U.S. regulation of financial services with emphasis on federal regulation of banks, and on international, cross-border, and comparative banking regulatory issues.

LAW E 511 Venture Capital Deals (4) O-Conner Focuses on the legal environment of venture capital (VC) financing of technology start-ups. Analyzes relevant statues and regulations, and the standard set of negotiated terms in typical VC deals. Students negotiate and draft VC deal documents. Offered: W.

LAW E 512 Rule of Law in a Global Context (2/3) Anita Ramasastry Political systems must operate according to the "rule of law" to be deemed legitimate. What does this mean? Explores the meaning of the rule of law, and the importance of the rule of law in terms of economic, socio-political, and human development. Offered: W.

LAW E 513 Theories and Tools for Combating Corruption ([1-4]-, max. 4) Corruption has been identified as an obstacle to development, and a 'cost of doing business' in many countries. Examines theories, causes and consequences of corruption, and select regimes established to combat and measure it, e.g., UNCAC, OECD Anti-Bribery Convention, U.S. Foreign Corrupt Practices Act, and the Transparency International's Corruption Perceptions Index.

LAW E 514 The Law of Nonprofit Organizations (2-4, max. 4) Examines laws generally applicable to nonprofit corporations and legal issue relating to cooperatives, credit unions, and thrift/mutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

LAW E 516 Criminal Procedure: Adjudication (4/5) Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joiner and severance, double jeopardy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post-conviction remedies.

LAW E 517 Legal Information Technology (2-4) A. THOMSON, B. WILLIAMS Introduces the theory and practice of legal informatics.

LAW E 518 Torts II (2-4, max. 4) Covers advanced topics in tort law, including defamation, invasion of privacy, intentional infliction of mental distress, medical malpractice, misuse of legal proceedings, misrepresentation, interference with prospective advantage, nuisance, products liability, toxic torts, trespass to chattels, conversion, and vicarious liability. Prerequisite: LAW A 504. Offered: Sp.

LAW E 519 Philosophy of Law (4) Explores jurisprudence as "the jurist's quest for a systematic vision that will order and illuminate the realities of the law" and legal philosophy as "the philosopher's effort to understand the legal order and its role in human life." Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

LAW E 520 European Union Constitution (4) Examines the European Union constitution adopted in the Lisbon Reform Treaty: history, values, and objectives; EU institutions and finances; economies, political, and constitutional competences; citizenship and democracy; human rights and fundamental freedoms; common foreign policy; security and defense; and amending the constitution. Offered: A.

LAW E 521 Litigation Perspectives: Bench to Trench (3) Focuses on areas of trial practice, highlighting difference between state/federal practice: client communications; cost effective case management; pleadings, discovery and motion practice; Rule 11 sanctions; local rules of Western District of Washington; mysteries inside judicial chambers;
managing "big" case; settlement negotiation/alternative dispute resolution; expert witnesses; demonstrative evidence; trial preparation; and the trial itself.

LAW E 522 Advanced Constitutional Law: Sexual Orientation and Gender Identity (1-4, max. 4)
Examines various constitutional provisions from a gay rights perspective. Topics include the rights of equal protection and substantive due process, as well as the First and Ninth Amendments and the Full Faith and Credit Clause. Offered: A.

LAW E 523 Entrepreneurial Law Clinic ([1-9], max. 9)
Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

LAW E 524 Child Advocacy Clinic ([3-12]), max. 12

LAW E 525 Poverty Law (3-4)
Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care. Offered: A.

LAW E 526 Law Reform in Transition Economies Seminar ([2-4], max. 6)
Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

LAW E 527 Bankruptcy Client Representation Project ([1-4], max. 4)
Kuno Provides an opportunity for students to interview a client, evaluate the appropriateness of different forms on bankruptcy as a solution to their debt problems, and provide representations in obtaining the bankruptcy. Student teams are paired with pro bono attorneys under the supervision of a part-time faculty member. Credit/no-credit only. Offered: W.

LAW E 528 Masters of Jurisprudence Practicum (1/6)
Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to law and/or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only. Offered: AWSpS.

LAW E 529 Tribal Court Public Defense Clinic (4-, max. 12)
Offers clinical training in substantive areas of law implicated in representation of Native American tribal court criminal and dependency proceedings. Open to third year students in the JD program. Offered: AWSp.

LAW E 530 Race and Justice Clinic (3-4, max. 12)
Focuses on how lawyers can address racial disparities for youth in the juvenile justice system by advocating in multiple forums. Students participate in direct representation on clients, community education, and coalition building. Topics include the history of race in juvenile justice, past efforts to reduce disproportionate minority contact in juvenile justice, the School to Prison Pipeline, skills training, community lawyering, and systems cha

LAW E 533 Rights in America Seminar: Equality, Liberty, and Democracy (4)
Deep historical exploration of a jurisprudentially revolutionary constitutional conflict that pits courts, local government, and the U.S. Congress in passionate struggles over gay and lesbian antidiscrimination rights; freedoms of speech and religion; and African-American political equality in the nation's capital. Offered: S.

LAW E 534 Risk and Reward in Sustainable Development (3)
Focuses on the intersection of green, high performing buildings and the law. Students learn to identify and understand the risks and challenges presented by high-performing buildings, and analyze frameworks and strategies to manage and overcome these challenges. Offered: jointly with R E 559; Sp.

LAW E 535 Basic Income Tax Concepts (3)
Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3)
Credit/no-credit only.

LAW E 537 Refugee Law (2)
Examines the processes in the United States for the admission of refugees
and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement, and internal displacement.

**LAW E 538 Transnational Civil Litigation in U.S. Courts (3-4)** Examines the law governing private civil disputes in U.S. courts arising from transnational transactions, including: jurisdiction; forum selection and choice-of-law clauses; extraterritorial service of process, discovery, and application of U.S. law; parallel proceedings; foreign sovereign immunity; Act of State doctrine; and recognition and enforcement of foreign judgments.

**LAW E 539 United States and European Union E-Commerce Law (2/3)** Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

**LAW E 540 Transnational Litigation (3)** *John O Haley* Considers transnational litigation involving civil, common, and hybrid law jurisdictions. Students learn nuances of how jurisdiction is asserted and forum determined in global transnational disputes. Offered: A.

**LAW E 541 Cannabis Law Seminar (2)** Seminar introduces student to federal and state laws governing medical and recreational cannabis. Guest lecturers will include government officials, cannabis law practitioners, and industry leaders. Students will write and present a substantial research or policy paper. Offered: A.

**LAW E 542 Queer Youth Advocacy (2)** Addresses the legal needs of lesbian, gay, bi-sexual, and transgendered youth. Topics include educational advocacy; legal consequences within the parent-child relationship, access, consent, and right to refuse physical and mental health services; and accessing services for homeless and foster youth.

**LAW E 544 Privacy Law (2)** Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statues that attempt to establish fair information practices with respect to electronic personal information.

**LAW E 545 International Trade Law (2-4, max. 4)** Introduces the legal framework, policies, and jurisprudence of the World Trade Organization (WTO). Provides an overview of the regulation of trade in goods, services, and intellectual property that is necessary for international legal practice, and provides the policy analysis to better understand the trade dimensions of international legal disputes.

**LAW E 547 Robotics Law and Policy (2)** Explores the legal and policy aspects of near-term robotics and artificial intelligence. Relevant technologies include driverless cars, drones, medical, personal or service robots, and various expert systems. Readings draw from multiple disciplines, but focus particularly on legal or policy sources. Offered: Sp.

**LAW E 548 India Trade and Transactions Seminar (2)** A comparative commercial law course taught simultaneously to students at UW and law school in India. After learning the law and legal practice of US and India, students will negotiate agreements based on a hypothetical joint venture. Students will learn the cultural differences in the practice of law and business. Offered: AWSp.

**LAW E 549 International Investment Law and Practice (4/5)** Examines the rise of international investment law and practice, including topics such as Bilateral Investment Treaties (BITs), standards of treatment, investor-state arbitrations, and social and political controversies related to the governance of foreign direct investment (FDI) in developed and developing countries. Offered: jointly with JSIS B 549.

**LAW E 550 Complex Litigation Seminar (2-4)** Examines practical and theoretical problems associated with complex litigation, including class
actions and multidistrict litigation. Prerequisite: either LAW B 500 or LAW B 507.

**LAW E 551 Law and Entrepreneurship (3/4)**
Planning-oriented course uses the problem method to explore the corporate tax and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

**LAW E 552 Moderate Means Program Practicum (4)**
The UW Moderate Means Program Practicum provides students, working under faculty supervision, a hands-on, experiential course that will enhance their interviewing, issue spotting, legal research and legal writing skills, while at the same time providing help to individuals in Washington State who need civil legal assistance. Credit/no-credit only. Offered: A.

**LAW E 553 Technology Law and Public Policy (2)**
Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

**LAW E 554 Technology Law and Public Policy Clinic ([2-4]-, max. 12)**
Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Prerequisite: LAW E 553, which may be taken concurrently. Credit/no-credit only.

**LAW E 555 Legislation ([2-5]-, max. 5)**
Studies topics related to legislation and the legislative process. Examines the structure and operation of legislative bodies as well as the contemporary debates and laws that surround the process. Considers the theories and canons of statutory construction and interpretation. Introduces the basic techniques of statutory drafting. Offered: W.

**LAW E 556 International Human Rights Clinic ([1-12]-, max. 12)**

**LAW E 557 Human Rights Advocacy Seminar ([2-4]-, max. 4)**
Provides interdisciplinary training in international human rights advocacy. Provides background knowledge and exposure to skills needed to participate effectively in advocacy efforts, including the Interdisciplinary International Human Rights Clinic. Offered: AW.

**LAW E 558 Voting Rights Research and the Law (3)**
Address two primary topics related to the Voting Rights Act of 1965, Sections 2 and 5, and their application today: 1) redistricting and minority representation; and 2) the protection or suppression of the right to vote. Also includes introductory research methods and statistical analysis.

**LAW E 560 Contemporary Muslim Legal Systems Seminar (2-6, max. 6)**
Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects "Islamic norms." Prerequisite: LAW B 556. Instructors: Lombardi Offered: A.

**LAW E 561 Critical Race Theory (2-4)**
Provides an overview of Critical Race Theory (CRT) and the contrasts between CRT and liberal and conservative analytical frameworks on race and the law. Examines the questions and criticisms raised about CRT, as well as the impact of the field on legal and political discourse.

**LAW E 562 Museum Law (3)**
Adam Eisenberg
Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with MUSEUM 562; A.
LAW E 566 Washington Innocence Project Clinic (3-4, max. 12) Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

LAW E 567 Technology Transfer Law and Policy Seminar (2) O'Connor Covers the law and policy affecting university and non-profit research commercialization and technology transfer. Focuses on the Bayh-Dole Act, the laws and regulations covering data, copyrightable works, materials, tax exempt issues, employee assignments, and other matters. Offered: W.

LAW E 568 Indian Law Clinic (4-, max. 12) Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services, and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.

LAW E 569 Advanced Mediation Practicum (3) Ewalt Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)

LAW E 571 LatCrit Theory, Praxis and Community Seminar (2) Details LatCrit Theory from its origins to its present form as a branch of contemporary critical legal scholarship. Provides students with tools for understanding inter-group differences, including transnational dynamics, within the context of legal decisions and interpretations.

LAW E 572 Race and the Law (3-4) Evaluates the legal regulation of race in the United States. Addresses the racial and legal history of major groups in the United States, including African-Americans, Asian-American, Latinos, Native Americans, and whites, and examines the nexus between law and the construction of race as a concept and locus of identity.

LAW E 575 Veterans Legal Aid Clinic (3, max. 9) Students provide legal aid to low income veterans on upgrading military discharges, child support, VA housing programs, correcting criminal convictions, reinstating suspended driver licenses, assistance before VA on overpayments or complex benefits issues. Specialized outreach and service provided to incarcerated veterans, veterans in treatment courts, women veterans and homeless/at-risk veterans.

LAW E 576 Persuasive Oral Communication (3) No matter whether in the office, the conference room or the courtroom, all great lawyers must be great communicators. Course is designed to help achieve more effective, dynamic and persuasive speech. Workshop setting gives opportunities for regular practice in vocal skills, physical presence, rhetorical devices and acting techniques. There will be weekly assignments to prepare, which will be presented to the class as well as required readings. Credit/no-credit only.

LAW E 578 Foundations in American Law tested on the Bar Exam (2-8, max. 8) Provides LLM students an early start on bar exam preparation. Students review heavily tested areas across several bar exam subject areas while learning test taking strategy for the Essay Multistate and MPT portions of the Washington UBE, NY, or CA bar exams. Offered: WSp.

LAW E 579 International and Foreign Law Research (2-3) Overview of international law materials. Examines primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties, and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

LAW E 580 Gender Violence and the Law (3-4) Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks at national trends and primarily focuses on Washington State Law.
LAW E 581 Reproductive Rights and Justice Seminar (4) Ainsworth Provides students with an in-depth study of the constitutional framework governing reproductive rights, as well as critiques of that framework from feminist theorist, those who oppose abortion and contraception, and those whose reproduction and sexuality have been historically marginalized and regulated. Studies different bases in the law for reproductive rights claims, including privacy, equality, and dignity. Offered: A.

LAW E 582 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

LAW E 583 Globalization and the Law ([1-6], max. 6) Focuses on the rise of global law, intersection of national, international, and global law, and the legitimacy of global law.

LAW E 584 Masters of Jurisprudence Professional Development Seminar (1-, max. 2) Professional development colloquium for Masters of Jurisprudence students. Students learn about professional opportunities available for Masters of Jurisprudence graduates, and obtain key skills to access positions to optimize their opportunities. Credit/no-credit only. Offered: WSp.

LAW E 590 Incarcerated Parents Advocacy Clinic ([4-5], max. 9) Students advocate for incarcerated parents seeking to preserve relationships with children despite incarceration. Supervised by clinic faculty, students represent incarcerated parents in dependency and other court proceedings, working with clients and families to maintain the parent-child relationship. Students develop interviewing and counseling, negotiations, and trial preparation skills. Credit/no-credit only.

LAW E 591 Non-Profit Organizations Clinic (1-3, max. 3) Provides students with an opportunity to represent a real client in setting up a non-profit organization and applying for tax-exempt status. Students draft multiple documents such as articles of incorporation, applications for tax-exempt status, and client communications. Credit/no-credit only.

LAW E 592 Federal Appellate Advocacy (1-6, max. 6) Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no-credit only.

LAW E 594 Regulatory Environmental Law and Policy ([1-12], max. 12) Examines the applied and theoretical dimensions of environmental rule-making, with particular emphasis on the development of an administrative record. Students prepare written comments on pending rules proposed by governmental agencies. Prerequisite: either LAW A 527 or LAW B 585; LAW A 509, which may be taken concurrently. Credit/no-credit only.

LAW E 595 Animal Law (3) Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.

LAW E 596 Wildlife Law Seminar (3) Anderson, Knudsen Covers the basic issues involved in the law of fish and wildlife management. Topics include the relationship between property and wildlife, federalism issues, and international regulatory regimes.

LAW E 597 Global Warming and Justice Seminar (4) Rodgers Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

LAW E 598 Climate Change Law (3-4) Rodgers Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the Earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.
LAW E 599 Legislative Advocacy Clinic (2-6, max. 15)
Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

LAW (HEALTH)

LAW H 501 Fundamentals of Health Law (4)
Topics include: healthcare reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPAA, and COBRA); Medicare; Medicaid and SCHIP; regulation of healthcare providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.

LAW H 502 Medical Malpractice (3-4)

LAW H 503 Medical Ethics and Jurisprudence (3-)
Dudzinski, Kuszler Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with B H 535.

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3)
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/PHG 512; A.

LAW H 506 International Bioethics, Social Justice, and Health Seminar (1, max. 3)
Rivin Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Credit/no-credit only. Offered: jointly with G H 517; Sp.

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2)
Reviews the problem of physicians failing to relieve pain of patients in the dying process and legal and ethical issues they face as well as cultural sources of the problem.

LAW H 508 Beginning of Life: Rights and Choices (2)
Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.

LAW H 509 End of Life: Rights and Choices (2)
Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.

LAW H 510 Topics in Law and Medicine ([1-4]-4, max. 4)
Seminar deals with controversial issues arising from interface and relationship between law and medicine. Focuses on role of government and oversight bodies in understanding and regulating access, use and misuse of medical treatments, and technology.

LAW H 511 International Research Ethics, Law, and Policy (3)
Kuszler, Rivin Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.

LAW H 512 Public Health Law (2-4, max. 4)
Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public
health officers and healthcare industry administrators. Offered: jointly with HSERV 551; A.

LAW H 513 Legal Issues in Emerging Healthcare Technologies (4) Covers legal issues related to the cutting edge ways to deliver healthcare, including telemedicine, healthcare robots, mobile medical apps, gene sequencing, nanotechnology and personalized medicine.

LAW H 515 Global Health Law (3) Kuszler Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.

LAW H 516 Study Abroad: Global Health, Human Rights, and the Rights of the Child in Cambodia (10) Study abroad exploring the theoretical underpinnings and practical aspects of the rights of the child in the context of Cambodia’s health system, focusing on children with disabilities. Approaches the rights of the child from legal and health services perspectives, combining methodologies of research and analysis for practical application. Offered: S.

LAW H 517 Legal Issues for Global Health Programs (2) J. Lane Examines the role of the law, legal strategy and legal research in supporting and advancing global health programs. Provides students an outline of the legal issues impacting global health programs and instruction on working with local counsel and research partners in foreign jurisdictions. Offered: W.

LAW H 518 Legal and Policy Solutions to Improve Global Health of Women, Adolescents, and Children (1-2, max. 2) J. Lenga-Long, B. Shah, J. Sylker Explores specific examples of how legal and policy frameworks can impact health inequities for women, children, and adolescents. Teaches to formulate multi-disciplinary strategies to improve health outcomes. Credit/no-credit only. Offered: W.

LAW H 520 Genetics and the Law (3) Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523; Sp.

LAW H 521 Medicare and Medicaid Finance and Reimbursement (2-3) Gould, Williams Covers the history of Medicare and Medicaid, how they are administered, how eligibility is determined, payments are made, and financing is structured. Includes changes to both programs from the Affordable Care Act, how the federal government audits providers, and the available appeals. Offered: W.

LAW H 522 Affordable Care Act Seminar: Legal and Policy Issues in Health Reform Implementation (2) K. Merrikin, S. Thieme Sanford Delves into the Affordable Care Act, including its historical context, key provisions, policy choices, legal challenges, implementation issues and future directions. As part of the seminar, which utilizes a multi-disciplinary approach, each student analyses an ACA provision of interest.

LAW H 524 Forensic Evidence (3) Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

LAW H 525 Business Transactions in Healthcare (3) Snyder Focuses on the complex business transactions involved in modern healthcare mergers. In addition to the transactional business aspects, the students also address government rules, regulations, and prohibitions that arise, Students in teams represent different sides of the transaction in this simulated experiential learning opportunity. Offered: W.

LAW H 526 Healthcare Employment Law (3) Focuses on employment in health care settings, and will specifically cover "at will" employment and the development of implied and express individual employment contracts, recruiting and hiring, negotiated collective bargaining agreements, managing health care employees, and termination of employment. Offered: Sp.

LAW H 528 Health Law Practicum (1-6, max. 6) Provides experience with an approved non-profit organization, judicial or legislative body, or
governmental agency on issues related to health law or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only. Offered: AWSpS.

**LAW H 529 HIV and the Law: Legal and Political Developments of the AIDS Crisis (2-4, max. 4)** *Price*
Traces thirty years of the HIV/AIDS epidemic, beginning with the discovery of the disease through the present. Focuses on many of the socio-political-legal aspects of the HIV/AIDS crisis, including discrimination, quarantine, immigration, criminal law, insurance, public health, and family law issues. Offered: Sp.

**LAW H 530 Disability Law and Policy (3-4)**
Considers the definition of disability as defined by statute (ADA, FRA) case law, and social perception. Focuses on education law and entitlements, access to and discrimination in employment, housing, public transportation, and healthcare.

**LAW H 531 Health Law Advocacy (2-4, max. 4)** *Fox, Lenga-Long*
Explores select aspects of legal advocacy for vulnerable patients and surrogate decision-makers in healthcare settings. Focuses on practical, pragmatic solutions to complex health law advocacy issues, using both classroom participation and mock guardianship hearings. Offered: Sp.

**LAW H 534 Mental Health and the Law (3)**
Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

**LAW H 536 Research Ethics and Regulation (3)**
*Mastroianni*
Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536; W.

**LAW H 540 Health and Human Rights (3)** *Beth E. Rivin*
Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516; Sp.

**LAW H 545 FDA Law (3)** *Kuszler*
Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.

**LAW H 550 Medical Products Liability Law (3)**
Focuses on product liability claims arising from defective design/development, manufacture, marketing, and distribution of medical technologies. Considers the concepts of strict liability, negligence, breach of warrant, and informed consent as well as the relative roles of state and federal law. Offered: W.

**LAW H 579 Interactive Seminar (1, max. 30)** *Bruce S Weir*
Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with PHG 580; AWSp.

**LAW H 580 Competition in Health Care (3)**
Examines the role competition and its opposite, regulation, play in the healthcare industry in the United States.

**LAW H 582 Healthcare Fraud and Abuse (2-3)**
Considers federal and state laws that impose criminal and civil penalties on healthcare providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.

**LAW H 590 Advanced Research and Writing Seminar in Health Law (2-4, max. 4)** *Kuszler*
Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.

**LAW H 599 Health Law Tutorial (1-4, max. 4)**
Focuses on a specialized area of health law.
Prerequisite: limited to students in the graduate program in health law; must be approved by the program director. Offered: AWSp.

**LAW (INTELLECTUAL PROPERTY)**

**LAW P 501 Intellectual Property Law Core (6-8)**
Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles, their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588.

**LAW P 502 Trademark and Trade Secret Law (3/4)**
Knowledge of trade secret law and trademark law is particularly valuable to all intellectual property and business lawyers. Course explores issues relating to protection of trade secrets under state and federal law. Topics include philosophical bases and policies underlying trademark protection; distinctiveness requirement; protection of trade dress and product configurations; priority of usage; infringement/dilution; and the role of remedies. Offered: A.

**LAW P 503 Introduction to American Legal Systems and Skills (2-3)**
Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations. Teaches legal research, writing, case briefing, and analysis skills. Offered: A.

**LAW P 504 Economic Analysis of Intellectual Property (2-3)**
Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Offered: W.

**LAW P 505 International Intellectual Property Law (2-3)**
Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501.

**LAW P 506 Transnational Intellectual Property Law Theory and Practice (4)**
Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a law school in Asia or Europe. Offered: Sp.

**LAW P 507 Copyright Law (3/4)**
Provides an overview of copyright law/policy. Learn fundamental features of copyright law, including validity, infringement, subject matter requirements/limitations, defenses, boundaries between copyright and other IP regimes. Explore source/nature of copyright protection, justifications for such protection, whether are philosophical, economic, or constitutional. Familiar with Copyright Act/extensive case law, gain understanding of copyright policy. Offered: A.

**LAW P 508 Patent Law (2-4, max. 4)**
Provides an overview of United States patent law. No technical background is required. The course will analyze the origin, evolution and policy behind our patent law, and will cover topics such as the patent-ability doctrine, the novelty and "inventive step" requirements, the interpretation of patent claims, infringement theories and remedies. A primary focus of the course will be the changing Supreme Court patent law jurisprudence. Offered: A.

**LAW P 509 Antitrust and Intellectual Property Rights (2-4)**
Examines in-depth application of competition law and policy to the creation and exploration of intellectual property. Offered: Sp.

**LAW P 510 Advanced Research and Writing Seminar (2-4)**
Instructs IP LL.M students in the research and writing skills necessary to write a major legal research paper. Offered: A.

**LAW P 520 Intellectual Property Theory Seminar (3)**
Seminar introduces students to the history and philosophy of intellectual property theories, justifications, and critiques. Students will write and present a substantial research paper.
LAW P 522 Advanced Copyright Law (2-5) Advanced, in-depth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.

LAW P 525 The Right of Publicity (1-4), max. 4 Provides an understanding of the Right of Publicity and its interaction with other types of intellectual property. Drawing principles from trademark, unfair competition, copyright, and privacy law, the Right of Publicity must respect the First Amendment's guarantee of free expression while protecting the commercial interest of individuals in protecting against unauthorized commercial use of their names, likenesses, and personalities.

LAW P 528 LLM Intellectual Property Law Practicum (1-4, max. 6) Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only.

LAW P 535 Entertainment Law (3) A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.

LAW P 536 Music Law and Policy (3) Covers the broad range of legal issues at play in the music ecosystem - broadly construed as the chain of composition, performance, recording, distribution, and playback. Music recording/playback devices have often been at the forefront of each stage of media technology and so the course covers not only copyright issues, but also patents, other IP, and contract issues.

LAW P 539 Law, Technology, and Development (2-3) Snyder, Winn Provides an overview of selected principles and theories of development economies, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.

LAW P 543 Intellectual Property Law in East Asia (2-3)

LAW P 545 Advanced Patent Law (3) Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Instructors: Taylor Offered: W.

LAW P 546 Advanced Trademark Law (3) Covers advanced procedural and substantive topics of trademark law including protection of trade dress, online trademark infringement, and global trademark protection including gray market issues. Students write and present a research paper on a topic related to trademark law and policy. Prerequisite: either LAW P 501 or LAW P 567 Instructors: Takenaka Offered: W.

LAW P 547 Legal Protection for Computer Software (3) Addresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through antitrust law and the doctrines of fair use and preemption.

LAW P 548 Litigation Strategies in Technology Protection (3) Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 550 Patent Prosecution (4) Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.
LAW P 552 Strategic Intellectual Property Commercialization (3) Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 567 Survey of Intellectual Property (3-6, max. 6) Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeding a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Instructors: O'Connor Offered: W.

LAW P 577 Drafting Intellectual Property Licenses (3) Covers advanced drafting and negotiating licenses and other technology agreements. Credit/no-credit only.

LAW P 589 IP Innovations in Science and Technology (2-, max. 6) Takenaka Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4) Focuses on a specialized area of intellectual property law. Limited to students in the graduate program in intellectual property law and policy. Tutorial must be approved by the program director.

LAW (TAXATION)

LAW T 502 Federal Tax Controversies and Procedures (2-3)

LAW T 503 Problems of Timing (2-3)

LAW T 504 Income Taxation of Business and Investments (3-5) Michael W Hatfield Addresses the fundamental issues of the taxation of income related to businesses and investments. Topics include business deductions; capital expenditures; depreciation; below market loans; non-recourse debt; methods of accounting; gains and losses; like-kind exchanges; installment sales; passive activity losses and credits; and the at-risk rules. Offered: A.

LAW T 505 Introduction to Income Taxation (2) Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.

LAW T 506 Tax Practice and Skills (1-4, max. 4) Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research. Credit/no-credit only.

LAW T 507 Federal Tax Policy Seminar (2-4, max. 4) Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

LAW T 508 U.S. Aspects of International Taxation (5/6) Analyzes principles of "inbound" and "outbound" investment in the U.S., including effectively connected income, source of income, tax treaties, treaty shopping, permanent establishments, the mitigation of double taxation, and the treatment of controlled foreign corporations and other multinational enterprises with a U.S. presence.

LAW T 510 Estate and Gift Taxation (3)

LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)

LAW T 512 Exempt Organizations ([2-4]-, max. 4)

LAW T 513 Estate Planning (3)
LAW T 514 Drafting Estate Planning Documents (2)
Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, healthcare directives, gift and estate tax returns, and opinion letters. Prerequisite: LAW T 513, which may be taken concurrently. Instructors: Adams Offered: Sp.

LAW T 515 International Taxation I (3)

LAW T 516 International Taxation II (3)

LAW T 517 Estate and Gift Taxation II (2)

LAW T 518 Taxation of S Corporations (2)

LAW T 519 Canadian-United States Tax Issues (2)
Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation, and U.S. investment in Canada and similar repatriation issues.

LAW T 520 Professional Regulation of Tax Lawyers (2-3) Addresses the professional regulation of tax lawyers by Congress, the IRS, state bars, and professional associations. May address legal malpractice and criminal liability issues for tax lawyers.

LAW T 521 Compensation and Benefits I (3)

LAW T 522 Compensation and Benefits II (2)

LAW T 523 International Estate Planning (2)

LAW T 524 Transfer Pricing Seminar (2) Andrade Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm’s length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

LAW T 525 Advising Privately-Owned Businesses (3)
Explores the role of the lawyer as an adviser through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

LAW T 526 Federal Tax Clinic (2/3), max. 9 Clinical training in federal tax litigation under the supervision of members of the law school faculty.

LAW T 527 Taxation of Financial Instruments (2)
Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity derivatives, such as notional principal contracts, hedging transactions, and monetization strategies.

LAW T 528 Graduate Tax Practicum (1-6, max. 6) Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no-credit only.

LAW T 529 International Tax Practice Seminar (2-3) Kadet Utilizes case studies of real-world, multi-faceted international business transactions to develop the knowledge and skills to apply international tax principles and tools to both inbound and outbound investments. Offered: Sp.

LAW T 530 Tax Issues in Mergers and Acquisitions (2-3) Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

LAW T 531 Advanced Transactional Tax Problems (2) Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3)
LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) Chiconie Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer’s rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

LAW T 534 State and Local Taxation (4) Survey of taxes imposed by state and local governments, including income taxes, property taxes, and excise taxes (including sales and use taxes and gross receipts taxes such as those in Washington State). Limitations on the power of states to tax will also be covered. Offered: A.

LAW T 536 Taxation of Trans-Pacific Transactions (2-3)

LAW T 537 Business Planning ([2-6]-, max. 6)

LAW T 538 Estate Planning for Business Interests (2-3) Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

LAW T 539 Matrimonial Tax (2) Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

LAW T 540 Federal Tax Research and Writing (2-4)

LAW T 541 Limited Liability Companies (2)

LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2) Okimoto Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair appointment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.

LAW T 543 Advanced Partnership Tax (2) Builds on the material covered in the basic course, Taxation of Partners and Partnership. Covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.

LAW T 544 Tax Aspects of Charitable Giving (2) Examines income, gift, and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

LAW T 545 International Taxation of Intellectual Property (2) Smith Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.

LAW T 546 Taxation of Real Estate Interests (2) An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4) Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

LAW T 548 Tax Writing (2) Designed to improve writing skills as they relate to practice of tax law.
Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice.

**LAW T 549 International Merger and Acquisition Transactions (2)** Examines the rules applicable to international merger and acquisition transactions, both tax-deferred and table, including the anti-inversion rules of 7874 and the rules under 367 for a variety for tax-deferred transaction structures. Also covers the unique considerations applicable to taxable acquisitions of foreign target companies.

**LAW T 550 Global Perspectives on International Taxation (2)** International taxation of multinational corporations, including perspectives of both tax jurisdictions and multinational organizations such as OECD, as well as companies themselves. Topics include transfer pricing, permanent establishment, tax treaties, and tax arbitrage. Emphasizes evolving trends, case studies, and practical application of international tax rules. Offered: W.
SCHOOL OF MEDICINE

ANESTHESIOLOGY

ANEST 498 Undergraduate Thesis (*) Sivarajan By special arrangement. Time and credit to be arranged. Offered: AWSpS.

ANEST 499 Undergraduate Research (*) Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. Offered: AWSpS.

ANEST 501 P-Preceptorship in Anesthesiology (1, max. 12) An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in the operating room. Prerequisite: permission of instructor. Offered: AWSpS.

ANEST 650 P-Pain Medicine Clerkship (8) Participation as part of a Pain Medicine team in evaluation and management of patients experiencing short term post injury (surgery, trauma) pain and/or long-term pain. (Four weeks, full time). Prerequisite: Third- or fourth-year student.

ANEST 654 P-Chronic Care/Pain Management - Alaska - NAPM (8) Exposures to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

ANEST 657 P-Chronic Care/Pain - VAPSHCS - Seattle, WA (8) Exposure to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

ANEST 662 P-Chronic Care/Alaska - Fairbanks APCA (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management through the Chronic Care website and didactics. Students focus their clinical activities on chronic pain management.

ANEST 663 Basic Anesthesia Clerkship - Cheyenne, WY (4) Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation.

ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 667 P-Basic Anesthesia Clerkship - Billings (4) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 668 P-Basic Anesthesia Clerkship - Missoula (4) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 669 P-Basic Clerkship in Anesthesiology Bozeman Health - Gallitan Valley, MT (4) Clerkship

ANEST 670 P Advanced Clerkship in Anesthesiology Bozeman Health - Gallitan Valley, MT (8)
for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student. Offered: AWSpS.

**ANEST 671 P-Basic Anesthesia Clerkship - Boise** *(4)*
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

**ANEST 672 Basic Anesthesiology - Boise, ID VA** *(4)*
Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation (Two weeks, full-time). Prerequisite: third- or fourth-year Medicine student.

**ANEST 673 Outpatient Strategies for Pain Rehabilitation -- Missoula, MT** *(8)*
Emphasis on outpatient strategies for pain rehabilitation, including interventional modalities, with pain education as a foundation. (Four weeks.) Offered: AWSpS.

**ANEST 674 P-Basic Anesthesia Clerkship - Spokane** *(4)*
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

**ANEST 675 P-Basic Clerkship - Deaconess - Spokane, WA** *(4)*
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student. Offered: AWSpS.

**ANEST 677 P-Basic Anesthesia Clerkship - Swedish** *(4)*
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

**ANEST 681 P-Advanced Clerkship in Anesthesiology - UWMC** *(8)*
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

**ANEST 682 P-Advanced Clerkship in Anesthesia - HMC** *(8)*
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student.

**ANEST 683 P-Advanced Clerkship in Anesthesiology - VAMC** *(8)*
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

**ANEST 684 P-Advanced Clerkship in Anesthesiology - Spokane** *(8)*
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: third- or fourth-year medical students.

**ANEST 685 P-Advanced Clerkship in Anesthesiology - Deaconess - Spokane, WA** *(8)*
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: third- or fourth-year student. Offered: AWSpS.

**ANEST 686 P-Basic Clerkship in Anesthesia - Kalispell** *(4)*
Exposure to anesthesiology as a specialty. Individual programs in the following areas:
ANEST 699 P-VWAMI Anesthesiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

BIOCHEMISTRY

BIOC 405 Introduction to Biochemistry (3) NW Neil King, David J Veesler, James B Hurley, Frank Dimaio Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: AW.

BIOC 406 Introduction to Biochemistry (3) NW Peter Brzovic, Young Kwon, Alan Weiner, Michael Aillon Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in
BIOC 426 Basic Techniques in Biochemistry (4)  
NW L. Gu, K. Lewis  
Introduction to basic biochemistry experiments. Acquaints students (largely biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 405. Offered: WSp.

BIOC 440 Biochemistry (4) NW S. Brockerhoff, J. Kollman  
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Offered: A.

BIOC 441 Biochemistry (4) NW S. Hoppins, D. Miller  
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 440, or a 2.2 in BIOC 451. Offered: W.

BIOC 442 Biochemistry (4) NW D. Kimelman, H. Ruohola-Baker  
Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.2 in BIOC 440. Offered: W.

BIOC 450 Honors Biochemistry: Visualizing Biochemical Concepts (4) NW R. Klevit, A. Wills  
For Biochemistry majors and molecular and cellular biology majors. Core concepts in biochemistry, including protein structure, compartmentalization of reactions, thermodynamics and kinetics in a biological context, energy production, and regulation of metabolic pathways. HONORS BIOC covers the same topics as BIOC 440, but emphasizes group exercises and analysis of primary literature. Offered: A.

BIOC 451 Honors Introduction to Biochemistry (4)  
A. Weiner  
BIOC is the honors version of BIOC 441; it covers the same topics in metabolism and gene expression using the same textbook, but is taught as a group discussion of selected publications from the primary literature, with an emphasis on research strategy, experimental design, creative thinking, and scientific communication. Offered: W.

BIOC 495 Biology of Fermentation (3) NW Alexander R. Paredez, Justin M Kollman  
Practical application of biology and chemistry in beer and winemaking. Students learn to culture yeast, ferment foods, brew beer from malted grains, and perform chemical analysis of wine must. Prerequisite: either BIOL 310, BIOL 313, BIOL 340, BIOL 350, BIOL 354, BIOL 355, BIOL 356, BIOL 360, BIOL 380, BIOC 405, BIOC 426, BIOC 440, or BIOC 450. Offered: jointly with BIOL 495; W.

BIOC 499 Undergraduate Research (*, max. 35)  
Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no-credit only. Offered: AWSpS.

BIOC 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) Ruohola-Baker, Ware  
Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with CONJ 510.

BIOC 520 Seminar (1) J. Hurley  
Seminar dealing with timely topics in the field of biochemistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

BIOC 530 Introduction to Structural Biology (3) D. Baker, V. Daggett, W. Hol, R. Klevit, D. Maly, D. Veesler, A. Weiner, N. Zheng  
Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

BIOC 533 Topics in Biochemistry (1, max. 30) N. King, D. Miller  
Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference
to classical papers and recent literature.
Prerequisite: permission of instructor. Offered: AW.

**BIOC 534 Topics In Molecular Biophysics (1.5, max. 30)** Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

**BIOC 540 Literature Review (2)** C. Asbury, T. Davis Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BPSD 540; A.

**BIOC 541 Literature Review (2)** J. Chamberlain, Y. Kwon, L. Loeb, R. Palmiter Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: W.

**BIOC 542 Literature Review (2)** A. Wills Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: Sp.

**BIOC 581 Introduction to Biochemical Research (4, max. 16)** Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Prerequisite: graduate standing in biochemistry or permission of instructor. Credit/no-credit only. Offered: AWSp.

**BIOC 600 Independent Study or Research (±)** Offered: AWSp.

**BIOC 650 Biochemistry Clerkship in Scientific Teaching ([1-6], max. 15)** The pedagogical requirement addressed by this course is direct experience in teaching undergraduate Biochemistry classes under the direct oversee and mentorship of regular course instructors. By the end of this course, the graduate student will have developed skills, abilities and insights as a science educator and communicator through the sustained support and guidance of the instructor of record. Prerequisite: PhD student standing. Offered: AWSp.

**BIOC 700 Master's Thesis (±)** Offered: AWSpS.

**BIOC 800 Doctoral Dissertation (±)** Offered: AWSpS.

### BIOETHICS AND HUMANITIES

**B H 201 Topics in Population Bioethics (2)** I&S Introduces students to bioethical questions that arise in public health, population health, and global health, situating ethical questions and challenges within a broader social context and perspective. Students interact in a small-scale learning environment with classmates and faculty and have the opportunity to learn more about the Bioethics Minor. Credit/no-credit only. Offered: Sp.

**B H 311 Ethical Issues in Modern Medicine (3)** I&S N. JECKER Case-based approach to ethical topics in medicine, such as abortion, genetic testing, physician-assisted death, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis. Offered: Sp.

**B H 339 Bioethics: Secular and Jewish Perspectives (3)** I&S, DIV Hadar Khazzam-Horovitz Legal, ethical, scientific, and Jewish religious perspectives on contemporary medical and biomedical research practices. Legal and civil rights of women, people with disabilities, minors and minority or marginalized groups. Key differences between secular and Biblical/Rabbinic approaches in interpretation, analysis and application of bioethics, doctor-patient relationships; reproductive methods; abortion; euthanasia; and stem cell research. Offered: jointly with JEW ST 339/NEAR E 328.

**B H 402 Ethical Theory (5)** I&S N. JECKER Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: jointly with PHIL 412.

**B H 404 Metaethical Theory (5)** I&S N. JECKER Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth
B H 409 Ethics and the Social Determinants of Health (3) I&S, DIV. 
E. Blacksher Examines ethical issues confronting healthcare workers caring for poor & minority populations, whose capacity for health and recovery from disease are compromised by social conditions in which they grow up, live, work, and age. Aims to broaden/reorient understandings of disease, patient autonomy, and clinician duties within contexts of structural inequalities related to socioeconomic status/race/ethnicity/gender/other salient social differences. Offered: jointly with PHIL 413.

B H 420 Philosophical Problems in Bioethics (3) I&S Jecker Introduces the philosophical concepts and controversies that underlie contemporary bioethical debates. Explores issues using the literature of bioethics and philosophy, contemporary film, works of fiction, and conversations with health professionals. Students learn philosophical methods of analysis and argument, and debate different sides of ethical issues.

B H 421 History of Eugenics (5) I&S Woiak Examines the history of ideas, policies, and practices associated with eugenics and human genetics from the late nineteenth century to the present in American society and other national contexts. Offered: jointly with DIS ST 421.

B H 440 Philosophy of Medicine (5) I&S N. Jecker Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Offered: jointly with PHIL 459.

B H 444 Ethical Implications of Emerging Biotechnology (3) S. Fullerton Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: W.

B H 456 Social Justice and Health (5) I&S Blacksher Examines the moral grounds for the view that social inequalities in health are unjust using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

B H 460 Reflections on Research, Responsibility, and Society (3) I&S Explores ethical and policy issues that emerge in the conduct of basic, applied, translational, community-based, and collaborative research. Addresses the ethical debates that arise in the context of planning, implementing, and disseminating research.

B H 474 Justice in Health Care (5) VLPA/I&S N. Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Offered: jointly with PHIL 411.

B H 488 Global Perspectives in Bioethics (3) I&S, DIV N. Jecker Examines problems in bioethics from diverse global standpoints, including East Asian, Sub-Saharan African and Western. Our emphasis is on developing a deeper understanding of the cultural assumptions that lie just beneath the surface of bioethics debates. Readings from contemporary philosophy, film and literature. Recommended: Prior course work in ethics, philosophy, or global health. Offered: jointly with G H 419; Sp, odd years.

B H 497 Bioethics and Humanities Special Electives (*, max. 30)

B H 499 Undergraduate Research (*, max. 5) Investigative work in biomedical ethics or history of the biomedical sciences.

B H 502 Ethical Theory (5) Jecker Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: A.

B H 509 Ethics and the Social Determinants of Health (3) E. Blacksher Examines ethical issues confronting healthcare workers caring for poor & minority populations, whose capacity for health and recovery from disease are compromised by social conditions in which they grow up, live, work, and age. Aims to broaden/reorient understandings of disease, patient autonomy, and clinician duties...
within contexts of structural inequalities related to socioeconomic status/race/ethnicity/gender/other salient social differences. Offered: Sp.

B H 510 The Humanities in Medicine (2) Mark Tonelli The humanities offer important perspectives on the nature and practice of clinical medicine. Focuses on the intersection of multiple disciplines in the humanities and medicine. Examines medicine through different lenses. Credit/no-credit only. Offered: Sp.

B H 513 P-Ethical Responsibilities of Medical Practice (2) Dudzinski, McCormick Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and surrogate decision-makers, duty to care for indigent and risky patients. One week intensive course. Offered: S.

B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; A.

B H 518 Spirituality in Healthcare (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587; Sp.

B H 527 Social Science Research Methods (3) D. Bowen Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with PHG 527; Sp.

B H 535 Medical Ethics and Jurisprudence (3-) Dudzinski, Kuszler Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503.

B H 536 Research Ethics and Regulation (3) Mastroianni Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with LAW H 536; W.

B H 539 Bioethics: Secular and Jewish Perspectives (5) H. Khazzam-Horovitz Explores legal, ethical, scientific, and Biblical-Rabbinic & contemporary religious perspectives on contemporary medical and biomedical research practices. Review of key differences between secular and Jewish approaches in interpretation, analysis and application of bioethics. The topics include: doctor-patient relationships; reproductive methods; abortion; euthanasia; and stem cell research. Offered: jointly with JEW ST 539.

B H 544 Ethical Implications of Emerging Biotechnology (3) S. Fullerton Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: jointly with PHG 544; W.

B H 548 Methods in Clinical Ethics (3) Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principalism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Instructors: Schellenberg Offered: A.

B H 551 Human Genomics: Science, Ethics, and Society (3) Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with GENOME 573; A.

B H 552 Advanced Qualitative Methods (4) Starks Examines and compares phenomenology, discourse
analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and produces different analyses.

B H 553 International Research Ethics, Law, and Policy (3) Kuszler, Rivin
Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethnically distinct communities. Offered: jointly with LAW H 511; A.

B H 556 Social Justice and Health (5) Blacksher
Examines the moral grounds for the view that social inequalities in health are unjust, using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

B H 560 Genomics, Ethics, and Policy (2, max. 10)
Burke, Edwards, Fullerton, Starks
Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S.

B H 562 Ethical Issues in Pediatrics (3) Nancy S. Jecker, Douglas S. Diekema
Provides a survey of contemporary ethical issues that arise in the clinical and research environment when children are involved, including the role of children and adolescents in decision-making, the limits of parental decision-making authority, and issues related to genetic testing, transplantation, research, and public health. Offered: jointly with PEDS 562; A.

B H 566 Introduction to Person Centered and Interprofessional Palliative Care (1-5)
Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: jointly with FAMED 531/NSG 526; A.

B H 567 Advanced Topics in Person Centered and Interprofessional Palliative Care (1-5)
Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Requires admissions into the Palliative Care Graduate Certificate Program. Prerequisite: NSG 526 Offered: jointly with FAMED 532/NSG 527; W.

B H 568 Palliative Care: Quality Metrics and System Integration (1-5)
Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Requires admissions into the Palliative Care Graduate Certificate Program. Offered: jointly with FAMED 533/NSG 528; Sp.

B H 574 Justice for Healthcare (5) N. Jecker
Examination of the ethical problem of allocating scarce medical resources. Emphasizes fundamental principles of justice that support alternative health policies. Offered: W.

B H 588 Global Perspectives in Bioethics (3) N. Jecker
Examines problems in bioethics from diverse global standpoints, including East Asian, Sub-Saharan African and Western. Our emphasis is on developing a deeper understanding of the cultural assumptions that lie just beneath the surface of bioethics debates. Readings from contemporary philosophy, film and literature. Recommended: Prior course work in ethics, philosophy, or global health. Offered: jointly with G H 519; Sp, odd years.

B H 590 Health Ethics: Theory (4)
Explores ethical theories and shows how they are interpreted and applied in clinical contexts. Examines deontological and teleological approaches, including utilitarianism, kant’s ethics, Aristotle’s ethics, Rawls’s ethics, and feminist ethics. Builds knowledge of ethical theories, skills of ethical argument, and practice using theories in case analysis. Credit/no-credit only. Offered: A.

B H 591 Health Ethics: Law (4)
Explores legal cases, laws, statutes as well as paradigm ethics cases that inform clinical ethics consultation. Focus on ethical and legal issues that arise for ethics consultants from conception (assisted reproductive technologies) through death (withdrawing life-sustaining treatments). Addresses equity issues inherent in our
polarized health care system. Credit/no-credit only. Offered: W.

B H 592 Healthcare Ethics: Consultation Methods (4) Explores the methodologies through which students can employ ethical theory in clinical contexts. Coursework investigates ethical approaches, such as Virtue Theory, Feminist Ethics, and Casuistry. Assignments build the skills of communication and ethical analysis used in the clinical setting, such as writing chart notes and facilitating case discussion. Offered: Sp.

B H 595 Ethics Practicum (1-6, max. 6) Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Prerequisite: permission of instructor. Credit/no-credit only.

B H 596 Master's Research Project ([1-12]-, max. 12) Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Majors only. Credit/no-credit only.

B H 597 Special Topics in Medical Ethics (1-5, max. 15)

B H 600 Independent Study or Research (*-)

B H 650 Bioethics Teaching Clerkship (1-5, max. 15) Affords graduate students a professional development opportunity to build skills that lay the groundwork for becoming an expert teacher. Direct, hands-on experience along with mentoring to develop teaching skills. Students develop lesson plans, lead small group discussions, obtain guidance and feedback by working closely with a faculty mentor to improve pedagogy methods and skills - grading, course website development/management. Prerequisite: MA Bioethics graduate student. Credit/no-credit only. Offered: AWSp.

BIOLOGICAL STRUCTURE

B STR 301 General Anatomy (4) NW Introduces the student to general human anatomy, examining both cellular and gross anatomy. The relationship between structure and function is a central focus of course content. Offered: jointly with NURS 301.

B STR 498 Undergraduate Thesis (*, max. 30) Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.

B STR 499 Undergraduate Research (*, max. 30) Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.

B STR 510 Seminar in Anatomy (1) Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

B STR 515 Biological X-Ray Structure Analysis (3) Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Instructors: Stenkamp Offered: W.

B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.

B STR 520 Structure Based Design of Drugs (3, max. 9) Hol, Verlinde Research papers illustrating protein-structure- based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: W, even years.

B STR 521 Advanced Biomacromolecular Crystallography (3, max. 9) Hol, Merritt, Stenkamp Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: W, odd years.

B STR 540 Special Problems in Anatomy (1-6, max. 6) Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.
B STR 555 Laboratory Rotation in Biological Structure (*, max. 5) Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 557 Biomolecular Structure Seminar (1, max. 9) Literature review of key research in biomolecular structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Prerequisite: graduate standing in bio logical structure or biochemistry and permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSp.

B STR 580 P- Anatomy Teaching Practicum (*, max. 8) Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Instructors: Clark Offered: AWSp.

B STR 584 Seminar in Neurogenesis (1, max. 16) Current research on process by which neurons are generated in the nervous system. Prerequisite: permission of instructor. Instructors: Bermingham-McDonogh, Dhaka Offered: AWSpS.

B STR 590 Electron Cryo-Microscopy of Biological Macromolecules and Complexes (3) Wang Introduces high-resolution cryo-electron microscopy (cryoEM); image formation and three-dimensional reconstruction theories and available software. Includes hands-on experience using the cryoEM facility for data collection and analysis; and presentations on student projects. Offered: ASp.

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) Current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography.

Prerequisite: permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSpS.

B STR 598 Reading in Biological Structure (2) Critical evaluation of research in biological structure, including current problems, methods, and future directions by reading and discussing research and review papers. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

B STR 600 Independent Study or Research (*) Offered: AWSpS.

B STR 700 Master's Thesis (*) Offered: AWSpS.

B STR 800 Doctoral Dissertation (*) Offered: AWSpS.

BIOMEDICAL INFORMATICS AND MEDICAL EDUCATION

BIME 300 Transformational Technologies for Biology, Medicine, and Health (5) An introduction to Biomedical and Health Informatics through three modules focusing on current technologies: (1) Electronic Health Records (EHRs), (2) data mining the EHR, and (3) translational bioinformatics and personalized medicine. Each module includes primary literature readings, and hands-on team projects that explore the technologies involved.

BIME 435 Informatics in Healthcare (5) Introduces information technology applied in healthcare across three modules that (1) overview the U.S. healthcare system, (2) establish an understanding of clinical information systems used in healthcare, including electronic health records, and (3) survey applications in clinical informatics, such as virtual health care and the learning health system. Offered: W.

BIME 498 Special Topics in Biomedical and Health Informatics (1-5, max. 15) Readings, lectures, and discussions pertaining to significant problems or issues in biomedical and health informatics.

BIME 499 Undergraduate Research (*, max. 12) Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.
BIME 520 Teaching Methods in Medical Education (2) Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations.

BIME 521 Evaluation of Learning in the Health Sciences (3) Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems.

BIME 522 Research in Medical Education (2) Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis, and write-up. Assessment and critical reading of related literature stressed.

BIME 530 Introduction to Biomedical and Health Informatics (3) Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in healthcare settings.

BIME 533 Public Health and Informatics (3) Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with HSERV 509.

BIME 534 Biology and Informatics (3) Provides an introduction to some of the fundamental concepts in core fields of biology; the information representation and management problems that arise from these fields; and current and potential informatics solutions to these problems.

BIME 535 Clinical Care and Informatics (3) Explores the ways in which information technology affect healthcare delivery system design and delivery. Considers current and future research questions and trends as well as current and future application opportunities and challenges.

BIME 537 Informatics Research and Evaluation Methods (4) Introduces the many facets of evaluation and research for biomedical and health informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service.

BIME 539 Teaching, Learning, and Communication in Biomedical and Health Informatics (4) Covers learning theory and teaching/communication skills specific to informatics practitioners and researchers. Reviews current learning theories applicable to undergraduate and graduate education. Helps to develop and practice effective teaching techniques.

BIME 540 Critically Appraising and Applying Evidence in Healthcare (3) Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient’s problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528.

BIME 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with EPI 541/HSERV 529/PHARM 529.

BIME 543 Consumer Health Informatics (3) This course provides an introduction to consumer health informatics (CHI) including theories of health
behavior and information behavior; key concepts and terminology; and application domains. The course will cover issues such as health literacy, patient-centered communication, patient empowerment, and privacy; and application domains including personal health records, m-Health, and telehealth.

**BIME 550 Knowledge Representation and Applications (3)**
Defines knowledge representations and explores how knowledge presentations and ontologies are used in the semantic web and why these issues are important for biomedical informatics application builders. Uses a research focus to explore foundational theoretical issues and choices facing application builders.

**BIME 554 Biomedical Information Interactions and Design (4)**
Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems.

**BIME 570 Health Sciences Information Needs, Resources, and Environment (3)**
* S. FULLER
Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528; Sp.

**BIME 581 Telehealth Systems and Applications (4)**
Introduces challenges for designers and managers of telehealth and remote healthcare networks. Develops abilities of managers, leaders, and researchers of telehealth systems through exploration into systems components. Activities range from research to implementation of system design for applications that bridge geographic distance to the development of practical applications. Offered: jointly with NSG 540; S.

**BIME 590 Selected Topics in Biomedical and Health Informatics (1-3, max. 12)**
Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Prerequisite: permission of instructor. Credit/no-credit only.

**BIME 591 Biomedical and Health Informatics Research Colloquium (1, max. 12)**
Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research), but also journal articles, current topics of debate, and other. Credit/no-credit only.

**BIME 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12)**
Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary.

**BIME 600 Independent Study/Research ([1-10]-)\]**
Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

**BIME 700 Master's Thesis ([1-15]-)\]**
Prerequisite: permission of instructor.

**BIME 800 Doctoral Dissertation ([1-10]-)**

**COMPARATIVE MEDICINE**

**C MED 499 Undergraduate Laboratory Research (1-6, max. 12)**
* B. IRITANI, W. LADIGES, L. PRICE, M. RUDDELL
Specific problems in comparative medicine. Credit/no-credit only. Offered: AWSpS.

**C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2, max. 10)**
* J. SNYDER, P. TREATING
Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445,
or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.

C MED 514 Comparative Pathology Conference (1, max. 6) J. SNYDER, P. TREUTING Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underline them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 516 Research and Literature Review Seminar (1, max. 12) C. HSU, B. IRITANI Alternates between research seminars and literature review presentations. Research seminar topics relate to basic and translational animal models. Literature review seminars involve critical evaluation of recent articles on laboratory animal medicine and other scientific or medical topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 518 Clinical Conference and Comparative Pathology Seminar (1, max. 12) N. REYES, P. TREUTING Alternates between clinical veterinary medicine and comparative pathology discussions. Clinical discussions include case reports of spontaneous and induced diseases. Comparative pathology discussions cover gross and histopathology of natural occurring and experimentally induced lesions in laboratory animals and wildlife. Prerequisite: either PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 520 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREUTING Fundamentals of morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of commonly used laboratory animal species. Discusses similarities and differences within and between species, including humans. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

C MED 521 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREUTING Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including humans are discussed. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

C MED 530 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREUTING Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

C MED 531 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREUTING Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

C MED 540 Animal Models (2) T. BRABB, C. HSU, B. IRITANI, P. TREUTING Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases lacking animal models, and approaches to identifying new models. Discusses animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology). Prerequisite: permission of instructor. Offered: Sp.

C MED 590 Selected Topics in Animal Medicine (1-5, max. 10) T. BRABB, L. COLBY, C. FREVERT, B. IRITANI, P. TREUTING Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 592 Comparative Pathology for the Scientist (3) C. FREVERT Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems, plus other topical material related to preclinical drug studies and translational research.

C MED 600 Independent Study or Research (*) Credit/no-credit only. Offered: AWSpS.
C MED 601 Internship Rotation - Laboratory Animal Medicine (*-) Prerequisite: DVM degree. Credit/no-credit only. Offered: AWSpS.

C MED 700 Master’s Thesis (*) Credit/no-credit only. Offered: AWSpS.

CONJOINT

CONJ 401 Human Anatomy and Physiology (4) T. LINDER, A. MELBY Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Offered: A.

CONJ 402 Human Anatomy and Physiology (4) T. LINDER, A. MELBY Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2) Kivlahan, Samson For medical students in the allied health sciences in any year that covers an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

CONJ 480 Neuroscience for Rehabilitation Professionals (5) Anderson, Mulligan, Slimp Structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

CONJ 504 Topics of Molecular Medicine (1.5, max. 5) Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with MOLMED 504; Sp.

CONJ 505 P-Pain Clinic Preceptorship (1, max. 12) One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at UW Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

CONJ 510 ISCRM Research Updates and Stem Cell Club ([0/1], max. 12) Ruohola-Baker, Ware Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with BIOC 510.

CONJ 511 Genomic Dissection (1) Marshall S. Horwitz Uses state of the art technology to sequence the genome of a cadaver. Explores the structure of the genome, as well as genetic variants responsible for human individualization and disease. Credit/no-credit only. Offered: A.

CONJ 512 Scientific Speaking Seminar (1.5) Biggins, Peichel Teaches how to effectively give a scientific seminar about research. Offered: jointly with MCB 512; W.

CONJ 513 Clinical Medical and Human Genetics (4) Byers Rotations through medical genetics clinics for graduate students enrolled in the molecular medicine pathway. Students review clinical data, identify the molecular basis of genetic disorders, and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with MOLMED 513; AWSp.

CONJ 515 Introduction to Team-Based Care in Rural and Underserved Settings (1) Toby Keys Provides opportunities for students in health professional programs to learn about inter-professional education, practice transformation, behavioral health integration, social determinants of health, cultural humility, and current emerging healthcare
topics that concern rural and urban underserved communities. Addresses demographics, economics, community structure, culture, and professional/personal issues. Add code required. Credit/no-credit only. Offered: W.

**CONJ 516 What Every Physician Should Know about Oral Health (1)** Lewis, Mouradian, Slayton Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no-credit only. Offered: W.

**CONJ 518 Molecular Biology and Immunology of HIV and AIDS (1.5)** James I Mullins Intended for a broad array of science and public health majors. Will cover history of AIDS pandemic, and methodology and current progress in AIDS pathogenesis, vaccine development and cure research. Prerequisite: BIOL 200; recommended: For basic background BIOL 180, 200, 302 (or MICROM 301) are recommended. Introduction to the biological problems can be derived from MICROM 445 or 450, IMMUN 441, 532, 537, and more advanced preparation on the topic from (GH 560, PABIO 551, 552) . Offered: Sp.

**CONJ 524 Structural Basis of Signal Transduction (1.5)** Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Instructors: Xu Offered: W.

**CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5)** Aitchison Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis-driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.

**CONJ 529 Cell Migration (1.5)** Cooper, Moens Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with MCB 529; W.

**CONJ 530 Directing Stem Cells Toward Regenerative Medicine (3)** H. Ruohola-Baker An introduction to the rapidly developing field of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. Requires a strong background in biological sciences. Offered: W.

**CONJ 531 Signaling Mechanisms in Excitable Cells (1.5)** W. ZAGOTTA Mechanisms of cellular signaling, particularly in nerve and muscle. Electrical, chemical, and mechanical signaling in the cell that lead to processes such as electrical excitability, action potentials, and muscle contraction. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

**CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (2)** John D. Scott, Shao-En Ong, Rich Gardner Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: jointly with PHCOL 502; A.

**CONJ 533 The Dynamic Chromosome (1.5)** The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Instructors: Henikoff, Roth Offered: A.

**CONJ 534 Selected Problems in Nervous System Development (1.5)** Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.
CONJ 537 Mechanism of Transcriptional Regulations (1.5) Tsukiyama Biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including mechanisms of transcriptional initiation, elongation, and termination. Regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

CONJ 538 Genetic Instability and Cancer (1/1.5) Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor. Instructors: Maizels, Monnat

CONJ 539 Modern Approaches to Vaccines (1.5) Fuller Covers selected topics based on recent publications in viral and bacterial vaccine research. Emphasizes understanding the latest advanced and issues in vaccine discovery, mechanisms of action, and special topics in viral vaccines. Offered: Sp.

CONJ 540 Basic Science of Urologic Complications (3) Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a journal review of each complication. Prerequisite: biological science course.

CONJ 541 Molecular Biology of Cellular Processes (1.5) Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Instructors: Bornstein Offered: Sp.

CONJ 542 Cell Biology of Development (3) C. Berg, D. Raible Molecular mechanisms of development with emphasis on cell biological processes. Prerequisite: comprehensive undergraduate courses in biology, molecular biology, or permission of instructor. Offered: A.

CONJ 544 Protein Structure, Modification and Regulation (1.5) Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.

Instructors: Stoddard, Strong

CONJ 545 Molecular Interactions and Medicine (1.5) Verlinde Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands, and their complexes. In computer ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.

CONJ 546 Survey of Technologies for Molecular Biology (1.5) Bumgarner Broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) Katze Interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

CONJ 548 Modeling Proteins and Proteomes (1.5) Samudrala Hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Technologies involved for protein structure modeling. Offered: W.

CONJ 549 Microbial Population Biology (1.5) Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced
undergraduates with permission of instructor.
Instructors: Mittler
Offered: Sp, even years.

CONJ 550 P-Clinical Infectious Diseases (3) Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no-credit only.

CONJ 551 Immunity (1.5) Strong Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

CONJ 552 Metabolic Flexibility in Biology (1.5) Small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

CONJ 554 Fundamentals of Hypnosis (1) McCann, Schneeweiss Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Credit/no-credit only. Offered: W.

CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2) Chavkin Key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.

CONJ 557 Microbial Evolution and Ecology (2) Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaean speciation and co-speciation, and evidence for early microbial life on Earth.

Prerequisite: MICROM 412 or general microbiology background. Offered: ASp.

CONJ 558 Fundamentals of Prokaryotic Biology (1.5) Harwood, Leigh Basic principles in prokaryotic cell structure, genomics, and metabolism. Introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.

CONJ 562 Advanced Topics in Bacterial Physiology (1.5) Covers cutting-edge research and concepts pertaining to the complexity of the bacterial cell with an emphasis on primary literature and discussion. Offered: Sp.

CONJ 570 Introduction to the Clinical Management of Transgender Patients (1) Covers the steps and protocols providers need to know to provide culturally proficient care for trans-identified patients. Prior completion of FAMED 561 highly recommended. Prerequisite: current graduate health science student and permission of course coordinator. Credit/no-credit only.

CONJ 571 Introduction to the Clinical Management of Patients who are Transgender (1) Covers the steps and protocols providers need to know to provide culturally proficient care for trans identified patients. Credit/no-credit only.

CONJ 583 Molecular Targets in Cancer Therapy (1.5) Maizels, Monnat Examines how molecular targets for cancer therapies are discovered and validated. Covers disease mechanisms, need for new therapeutics, how small molecule and antibody therapeutics are identified and developed, and how preclinical studies are used to establish safety and efficacy. Offered: jointly with MOLMED 583; A.

CONJ 585 Surgical Anatomy (1-3, max. 12) Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure. Instructors: Graney

CONJ 598 P-Chronic Care Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Chronic Care clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in
remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

CONJ 605 P-Introduction to Palliative Care - Consultation (4) Introduction to palliative care in the consultation setting. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care. Prerequisite: Successful completion of required Medicine and/or Family Medicine Clerkships Offered: AWSpS.

CONJ 606 P-Advanced Palliative Care - Inpatient Hospice Track (8) Intensive four week experience in palliative care in the inpatient hospice setting. Students work in interdisciplinary teams to assess and manage symptoms for patients near the end of life under appropriate supervision. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

CONJ 607 P-Advanced Palliative Care (8) Intensive four week experience in palliative care in inpatient and outpatient settings. Students work in interdisciplinary teams to treat and communicate with seriously ill patients and their families to make decisions regarding care. Includes exposure to hospice care. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

CONJ 608 P-Introduction to Palliative Care, Consult Track - ANMC (4) Introduction to palliative care in the consultation setting in Anchorage, AK. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 609 P-Introduction to Palliative Care, Consult Track - Bellingham, WA (4) Introduction to palliative care in the consultation setting in Bellingham, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 610 P-Introduction to Palliative Care, Consult Track - Olympia, WA (4) Introduction to palliative care in the consultation setting in Olympia, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 611 P-Introduction to Palliative Care, Consult Track - Billings, MT (4) Introduction to palliative care in the consultation setting in Billings, MT. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 612 P-Introduction to Palliative Care Consultation - Bozeman, MT (4) Introduction to palliative care in the consultation setting in Bozeman, MT. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 613 P-Introduction to Palliative Care Consultation - Boise, ID (4) Introduction to palliative care in the consultation setting in Boise, ID. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

CONJ 614 P-Correction and Addiction Medicine - Gray's Harbor County, WA (4-8) Clinical elective primarily at Greys Harbor County Jail. Covers a variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Offered: AWSpS.
CONJ 615 P-Advanced Correction and Addiction Medicine - Gray’s Harbor County, WA (8) Advanced clinical elective primarily at Greys Harbor County Jail. Covers variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

CONJ 616 P-Prison/Corrections Medicine Clerkship - Washington (*, max. 16) Covers a wide variety of diseases in a variety of outpatient settings, including urgent care, a chronic care clinic, and a long-term care facility for elderly and medically frail inmates in a men’s prison setting. Also includes the option to learn common procedures including suturing, joint injections, skin biopsies, and toenail removals. Prerequisite: completion of the medicine and family medicine required clerkships. Offered: AWSpS.

CONJ 617 P-Subinternship in Neurocritical Care Medicine (8) As sub-interns on the Neurocritical Care Service, students learn about critical illness, focusing on neurosurgical critical illness. Through direct patient care responsibilities, students gain experience managing traumatic brain injury, acute spinal cord injury, acute cerebral hemorrhage, and other common critical-care issues. Offered: AWSpS.

CONJ 618 P-Sleep Medicine (4) Exposure to sleep disorders including sleep apnea, narcolepsy, hypoventilation, parasomnias and circadian rhythm disorders. Students primarily see outpatients in the UW Medicine Sleep center at Harborview with various sleep faculty. Appropriate for students interested in internal medicine, family medicine, otolaryngology, neurology, psychiatry, anesthesiology and/or a career in sleep medicine.

CONJ 619 Advanced Palliative Care (8) Intensive four week experience in palliative care in inpatient and outpatient settings. Students work in interdisciplinary teams to treat and communicate with seriously ill patients and their families to make decisions regarding care. Includes exposure to hospice care. Prerequisite: Completion of Family Medicine and/or Internal Medicine clerkship Offered: AWSpS.

CONJ 620 Opioid Use Disorder (8) An intensive experience in the clinical care of patients with opioid use disorder in both the inpatient and outpatient settings. Students will evaluate inpatients with opioid use disorder as part of the addiction medicine consult service at HMC, providing treatment recommendations and linkage to outpatient services. They will work with patients in outpatient settings including primary care-based treatment programs and opioid treatment programs Prerequisite: Successful completion of required Medicine and Psychiatry clerkships Offered: AWSpS.

CONJ 621 Advanced Palliative Care-Spokane (8) This APC clerkship is an intensive experience in palliative care. This is an inpatient palliative care experience; under supervision of board certified palliative care physicians, students will see inpatient consultations and provide follow-up inpatient care. The palliative care team provides consults across disciplines in the hospital including pediatric acute care and adult acute care (medical, oncology, surgical and intensive care). Prerequisite: Successful completion of the third year medicine and/or family medicine clerkships Offered: AWSpS.

CONJ 622 Advanced Palliative Care-Boise, ID (8) This APC clerkship is an intensive experience in palliative care. This advanced palliative care rotation is primarily inpatient focused, with approximately 80% of the students’ time spent in direct patient care in the hospital setting. Students work in interdisciplinary teams to treat and communicate with seriously ill patients and their families to make decisions regarding care. Includes exposure to hospice care. Prerequisite: Successful completion of the third year medicine and/or family medicine clerkships. Offered: AWSpS.

CONJ 623 Adult and Pediatric Hospital Medicine (8) Advanced combined rotation in adult and pediatric hospital medicine. Students work with teaching physicians on a busy inpatient service with the opportunity to evaluate and admit patients from the emergency department, attend deliveries, perform consultations and manage assigned inpatients, and may have some opportunity for additional exposure to specialty care and procedures if desired. Focuses on continuity of care where possible. Prerequisite: successful completion of Patient Care Phase clinical curriculum. Offered: AWSpS.

CONJ 625 Global Health Clinical Elective (*, max. 24) Provides a better understanding of the challenges of
providing medical care in international resource-limited settings. Students spend a minimum of five weeks at a developing country medical center, with the goal of learning more about the local burden of disease and strategies for diagnosis and treatment. Prerequisite: fourth year medical students.

CONJ 626 Global HIV Medicine Elective (10-20, max. 20) Chung Prepares health profession students for work in developing countries. Includes experience treating HIV-positive patients in resource-poor settings, analyzing the relationship between poverty and health, recognizing tropical diseases that are common in Sub-Saharan Africa or Southeast Asia, and understanding the epidemiology of HIV in Sub-Saharan Africa or Southeast Asia. Offered: AWSpS.

CONJ 627 Intro to End of Life Home Care (4)
Prerequisite: Successful completion of Foundation Years curriculum. Offered: AWSpS.

CONJ 628 Advanced Palliative Care-Alaska (8) This APC clerkship is an intensive experience in palliative care. This is an inpatient palliative care experience; under supervision of board certified palliative care physicians, students will see inpatient consultations and provide follow-up inpatient care. The palliative care team provides consults across disciplines in the hospital including pediatric acute care and adult acute care (medical, oncology, surgical and intensive care). Prerequisite: Successful completion of the third year medicine and/or family medicine clerkship. Offered: AWSpS.

CONJ 629 Clinical Pediatric Dermatology (8) This is a full-time rotation in Pediatric Dermatology at Seattle Children’s Hospital, which is a referral hospital for all of the Pacific Northwest. Pediatric disorders such as eczema are seen commonly, unusual and complicated patients are also commonplace in these clinics. Inpatient consults are also a significant portion of this rotation. This is ideal for students with an interest in pediatrics, family medicine, or medical genetics. Prerequisite: Successful completion of required medicine and pediatrics clerkships. Offered: AWSpS.

CONJ 630 P-Write Chronic Care Clerkship (8) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: approved by the WRITE committee.

CONJ 631 Introduction to Hospice and Palliative Home Care (4) Students will become integrated into a home care team which practices both palliative and hospice care in patient’s homes. The team consists of an attending physician, nurses, social workers, and spiritual counselors. Students will participate in symptom assessment and management, discussions of goals of care and will also experience spiritual assessment and grief counseling. Prerequisite: Successful completion of Foundations curriculum. Offered: AWSpS.

CONJ 632 Introduction to Palliative Care Consultation (4) The student will work with the interdisciplinary palliative care team, which sees patients in 2 distinct clinic settings; within Montana Cancer Center, providing palliative care to patients with cancer, and in a standalone palliative care clinic doing general consultations for patients with serious illness. Students work with inpatient palliative care consultation team actively managing patients along with primary teams at St. Patrick Hospital. Prerequisite: Successful completion of Foundations curriculum. Offered: AWSpS.

CONJ 633 Intro to Palliative Care - South Puget Sound (4) Inpatient setting. Students work on a palliative care team under direction of an attending physician, with special focus on communication and assisting patients with serious illness and their families with difficult decisions regarding care. Participation in interdisciplinary rounds, meetings with patients, symptom assessment, and interactions with other teams. Prerequisite: successful completion of UWSOM Foundation Phase curriculum. Offered: AWSpS.

CONJ 655 P-Chronic Care - Olympia (8) Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 656 P-Chronic Care/Palliative Care - Cheyenne, WY (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 658 P-Chronic Care/Palliative Care - Providence Spokane (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 659 P-Chronic Care/Geriatrics - Missoula VHC (8) Exposure to rehabilitation, palliative care, pain management, and geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 660 P-Chronic Care/Palliative Care - Group Health Everett (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 661 P-Chronic Care/Palliative Care - Coeur d’Alene (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 663 P-Chronic Care/Alaska - Providence Palliative Care (8) Exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.

CONJ 664 P-Chronic Care/Palliative Care - Kline Galland Home (8) Exposure to rehabilitation. Students assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 665 P-Chronic Care/Palliative Care - PHOS (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 666 P-Chronic Care/Spokane - VAMC Geriatrics Unit (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 667 P-Chronic Care/Palliative Care - Evergreen Hospice (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 668 P-Chronic Care/Spokane - St. Luke’s Rehab, Pain Management (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 669 P-Chronic Care/Spokane - Deaconess Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate clinical activities.

CONJ 670 P-Chronic Care/Billings - St. Vincent Healthcare (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

CONJ 671 P-Chronic Care/Boise - Saint Alphonsus Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.
CONJ 672 P-Chronic Care/Boise - St. Luke's Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

CONJ 673 P-Chronic Care/Boise - VAMC (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

CONJ 674 P-Chronic Care/Alaska - Anchorage APCA (8) Exposure to rehabilitation, geriatrics, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

CONJ 675 P-Chronic Care/Palliative Care - GHHH Tacoma (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 677 P-Clinical Allergy and Immunology (*, max. 12) Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. (Four weeks, full-time) . Prerequisite: MED 665 or basic clerkships in departments of Family Medicine or Pediatrics. Instructors: (Boise Veterans' Affairs Hospital), (University of Washington Medical Center)

CONJ 679 P-Chronic Care/Palliative Care - PRMC (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical studies. Includes didactic orientation on the first day and patient case presentations during didactics on last day.

CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (*, max. 16) J. REDUX Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: Completion of 3rd year psychiatry clerkship.

CONJ 681 P-Chronic Care/Palliative Care - Children's (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 682 P-Chronic Care/Palliative Care - HMC (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 683 P-Chronic Care/Palliative Care - UWMC PC Consult (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 684 P-Chronic Care/Palliative Care - Multicare Hospice (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 685 P-Chronic Care/Palliative Care - Providence Everett (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 686 P-Chronic Care/Rehab - Children's (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 687 P-Chronic Care/Rehab - HMC (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to
CONJ 688 P-Chronic Care/Rehab - VA RMS (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 689 P-Chronic Care/Rehab - VA SCI (8)
Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 690 P-Chronic Care/Rehab - UWMC (8)
Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 691 P-Clerkship in Chronic Care - Boise PMR (8) Required clerkship for fourth year medical students, concentrating on geriatrics, palliative care, and rehab medicine using lectures, group discussions, standardized patients, and case scenarios.

CONJ 692 P-Chronic Care Clerkship - Spokane, St. Luke's Rehab (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 693 P-Chronic Care/Geriatrics - HMC (8)
Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 694 P-Chronic Care/Geriatrics - VA (8)
Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 696 P-WRITE Clinical Electives (*, max. 24)
Clinical electives for WRITE program. Offered: AWSpS.

CONJ 697 International Exchange Clerkship (12)
Hunt Participation in healthcare delivery systems in developing countries; observation of relationship of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about healthcare and life styles. Offered: Sp.

CONJ 698 P-Foreign Medical Student Clerkship (*, max. 24) A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine.

CONJ 699 P-Clinical Clerkships (*, max. 32)

EMERGENCY MEDICINE

MED EM 501 P-Emergency Medicine Preceptorship (1, max. 12) Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Prerequisite: permission of instructor. Credit/no-credit only.

MED EM 550 P-Introduction to Emergency Medicine (1) Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Credit/no-credit only.
MED EM 598 P-Emergency Medicine Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Emergency Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.

MED EM 600 Independent Study/Research (*)
Provides medical students the opportunity to participate in research as part of their medical education. Must obtain permission through submission of a proposal to department and securing a faculty sponsor.

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 606 P-Emergency Medicine - HMC/UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI, PEDS; and SURG required clerkships.

MED EM 607 P-Emergency Medicine - Madigan (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 608 P-Emergency Medicine - Swedish Cherry Hill (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI; PEDS; and SURG required clerkships.

MED EM 609 Emergency Medicine - Seattle Children’s (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 615 Emergency Medicine - VA (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 616 Emergency Medicine-Wenatchee, WA (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 617 P-Emergency Medicine - Olympia (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 618 P-Emergency Medicine - Olympia, WA (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 619 Emergency Medicine - Tacoma, WA (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 624 P-Emergency Medicine - Shelton (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 625 P-Emergency Medicine - Spokane (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 626 P-Emergency Medicine - Spokane Deaconess (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 627 Emergency Medicine - Spokane Valley (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely
injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 647 P-Emergency Medicine - Pocatello, ID (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 648 P-Emergency Medicine - Idaho Falls, ID (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 656 P-Emergency Medicine - Juneau, AK (8) Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 658 P-Emergency Medicine - Anchorage (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 662 P-Emergency Medicine - Bozeman, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 663 P-Emergency Medicine - Billings, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 664 P-Emergency Medicine - Great Falls, MT (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 665 Emergency Medicine - Missoula, MT (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 668 P-Emergency Medicine - Casper (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 669 P-Emergency Medicine - Cheyenne, WY (8) Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 671 P-Emergency Medicine Subinternship - Cheyenne, WY (*, max. 16) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship; permission of department.

MED EM 681 P-Emergency Medicine Advanced Clinical Elective - Seattle, WA (*, max. 16) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: all third year required clerkships plus required fourth year EM clerkship; permission of department.

MED EM 683 Emergency Medicine Point-of-Care Ultrasound (4) Introduction to point-of-care ultrasound in an emergency department setting. Students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. Incorporates classroom didactics, procedure simulation and clinical application. Offered: WSp.
MED EM 697 P-Emergency Medicine Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean’s office a special assignment form at least one month before preregistration. (Two, four, six, or twelve weeks). Prerequisite: required EM clerkship; permission of instructor at away site and department. Offered: AWSpS.

MED EM 699 P-WWAMI Emergency Medicine Special Elective (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.

FAMILY MEDICINE

FAMILY MEDICINE

FAMED 499 Undergraduate Research (*, max. 35) W. PHILLIPS Research activities arranged with University or community-based physicians in diverse areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2, max. 12) Jeanne Cawse-Lucas Medical students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 12) Jeanne Cawse-Lucas Introduces medical students to continuity of care in family medical settings, especially regarding what it means to be someone’s doctor and what it is like to work with individuals to help them achieve optimal health for a minimum of two quarters. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.

FAMED 516 Team Based Care in Rural/Underserved Settings (1) An interdisciplinary, non-clinical elective for all health profession students. Fulfills part of the didactic requirements for the AHEC Scholars Program. Prerequisite: CONJ 515. Offered: A.

FAMED 525 African American Health and Health Care Disparity (1) F. OVERSTREET Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Prerequisite: current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: A.

FAMED 526 Community-Focused Urban Health: Determinants, Disparities, and Equity (1) B. Brown, R. Keys, A. Kost Determinants, disparities, and approaches to health equity for medically underserved urban communities. Credit/no-credit only. Offered: W.

FAMED 527 Community-Focused Urban Health: Inter-Professional Care of Urban Under-Resourced Patients (1) B. Brown, R. Keys, A. Kost Interprofessional approaches to improving health for medically underserved urban communities. Credit/no-credit only. Offered: A.

FAMED 528 Strategies and Skills for Academic Success (1) Edwin G Lindo, Amanda Kost, Toby Keys, Genya N Shimkin Equips students with the skills needed to thrive in the Foundational medical school curriculum. Prepares students for medical licensure examination. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

FAMED 530 Primary Care (1) W. PHILLIPS Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations, and practice observation. Prerequisite: permission of course coordinator. Offered: W.

FAMED 531 Introduction to Person Centered and Interprofessional Palliative Care (1-5) Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply
an interdisciplinary approach to palliative care. Offered: jointly with B H 566/NSG 526; A.

FAMED 532 Advanced Topics in Person Centered and Interprofessional Palliative Care (1-5)
Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Requires admissions into the Palliative Care Graduate Certificate Program. Prerequisite: NSG 526 Offered: jointly with B H 567/NSG 527; W.

FAMED 533 Palliative Care: Quality Metrics and System Integration (1-5)
Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Requires admissions into the Palliative Care Graduate Certificate Program. Offered: jointly with B H 568/NSG 528; W.

FAMED 534 Primary Care Clinical Skills and Procedures Workshop (1)
Explore and hone common diagnostic and therapeutic clinical skills/procedures. Workshops delivered by a local Family Medicine residency program. Hands-on learning in small groups. Examples: EKG, suturing, casting/splinting, OB ultrasound, osteopathic manipulation, musculoskeletal, IUD and miscarriage management.

FAMED 535 Medical Chinese Terminology (1) F. Heidrich, L. Zhu
For healthcare professions students interested in expanding cultural understanding and improving communication with patients whose primary language is Mandarin Chinese. Includes common Mandarin Chinese medical terminology used during medical visits; Chinese culture and beliefs toward health and sickness; and cross cultural comparison of healthcare delivery in China and the United States. Recommended: Some conversational level Chinese will be helpful and basic training in medical history taking. Credit/no-credit only. Offered: Sp.

FAMED 540 Topics in Health and Human Services in Rural Communities (1)
Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Instructors: Shin Offered: W.

FAMED 544 Targeted Rural Underserved Track: Intersession 4 (3)
Fourth of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A.

FAMED 547 Spirituality in Healthcare (2)
Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587; Sp.

FAMED 550 Critical Race Theory and Medicine (1)
Edwin G Lindo
Understanding race and racism, their applicability to medicine, and their effects on marginalized communities. Explores the necessities of critiquing and bettering medicine through a Critical Race Theory lens in order to eliminate bias and decrease health disparities within marginalized communities. Offered: Sp.
FAMED 556 Spanish for Health Professionals (1)
Instruction in interviewing/history taking Spanish-speaking patient. Prerequisite: Spanish fluency at intermediate level; current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: Sp.

FAMED 561 LGBTQ Health and Health Disparities (1)
Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: permission of course coordinator. Offered: W.

FAMED 598 P-Family Medicine Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Family Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

FAMED 631 P-LIC Family Medicine Clinical Clerkship - Olympia, WA (1-24, max. 25) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: permission of course coordinator.

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 633 P-Clinical Clerkship in Family Medicine - Leavenworth (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 634 P-Clinical Clerkship in Family Medicine - Sitka (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 635 P-Clinical Clerkship in Family Medicine - Cheyenne (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 636 P-Clinical Clerkship in Family Medicine - Wenatchee (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 638 P-Clinical Clerkship in Family Medicine - Othello (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 639 P-Clinical Clerkship in Family Medicine - Douglas WY (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Offered: AWSpS.

FAMED 640 P-Clinical Clerkship in Family Medicine - Boise (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 641 P-Clinical Clerkship in Family Medicine - Spokane (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine - Madigan (1-24, max. 25) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine - Tacoma (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine - University of Washington Medical Center (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.
FAMED 645 P-Clinical Clerkship in Family Medicine - Kaiser Permanente Seattle (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine - Swedish First Hill (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine - Swedish Cherry Hill (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 648 P-Clinical Clerkship in Family Medicine - Renton Valley (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 649 P-Clinical Clerkship in Family Medicine - Olympia (1-24, max. 25) For description and prerequisites, see FAMED 636. Offered: AWSpS.

FAMED 650 P-Clinical Clerkship in Family Medicine - Anacortes (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 651 P-Clinical Clerkship in Family Medicine - Omak (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 652 P-Clinical Clerkship in Family Medicine - Anchorage (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 653 P-Clinical Clerkship in Family Medicine - Whitefish (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 654 P-Clinical Clerkship in Family Medicine - Pocatello (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 655 P-Clinical Clerkship in Family Medicine - Sea Mar Clinic (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine - Country Doctor (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine - Yakima (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine - Bremerton (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine - Billings (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 660 P-Clinical Clerkship in Family Medicine - Petersburg (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine - Buffalo (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 662 P-Clinical Clerkship in Family Medicine - Missoula (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 663 P-Clinical Clerkship in Family Medicine - Torrington (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 664 P-Clinical Clerkship in Family Medicine - Harrison - Bremerton (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Offered: AWSpS.

FAMED 665 P-Clinical Clerkship in Family Medicine - Yakima (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 666 P-Clinical Clerkship in Family Medicine - Yakima (1-24, max. 25) Students increase awareness of and begin
to address the social and structural determinants of health impacting underserved populations. Time divided between community engagement and advocacy activities and advanced clinical clerkship in an underserved primary care setting. Credit/no-credit only.

FAMED 672 P-Advanced Preceptorship International (*, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on healthcare delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 673 P-Clinical Clerkship in Family Medicine - Spokane Sacred Heart (1-12, max. 12) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 674 P-Advanced Interviewing in Primary Care (8) L. MAUKSCH Emphasizes developing competency in patient-centered interviewing, interview organization, and time management. Introduces primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.

FAMED 676 P-Clinical Clerkship in Family Medicine - Libby (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 677 P-Clinical Clerkship in Family Medicine - Grand Coulee (1-24, max. 25) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 678 P-Clinical Clerkship in Family Medicine - Port Angeles (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 679 P-Clinical Clerkship in Family Medicine - Ferndale (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16) Broadens students’ knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 682 P-Clinical Clerkship in Family Medicine - Ellensburg (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 683 P-Clinical Clerkship in Family Medicine - Lewiston (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 684 P-Clinical Clerkship in Family Medicine - Butte, MT (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 685 P-Clinical Clerkship in Family Medicine - Valley - Juneau, AK (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 686 P-Clinical Clerkship in Family Medicine - Port Townsend (12) For description and prerequisite, see FAMED 632.

FAMED 687 P-Clinical Clerkship in Family Medicine - While Salmon (1-24, max. 25) For description and prerequisite, see FAMED 632.

FAMED 688 P-Family Medicine Subinternship (*, max. 24) Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 689 P-Sports Medicine in Family Medicine - Spokane (4-8) Introduces medical students to treatment of sports related injuries in the non-operative, family medicine setting. Includes routine sports physicals, advanced musculoskeletal
examination, and assessment of acutely injured athletes. Offered: AWSpS.

FAMED 690 One Health Clinical Elective (4-8) P. Rabinowitz "One Health" recognizes the intricate links between the health of humans, animals and the environment. This elective provides an academic conceptual framework and clinical exposure through which to explore the multitude of applications of the "One Health" paradigm in a multidisciplinary context. Students will gain experience working with interdisciplinary teams including veterinarians and physicians on species-spanning approaches to health. Prerequisite: Permission of Course Instructor. Offered: AWSpS.

FAMED 697 P-Family Medicine Special Electives (*, max. 24) Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the UW SOM family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 701 WRITE Advanced Outpatient Clerkship (8) L. Kirven This 4-week clinical outpatient experience takes place in WWAMI Rural Integrated Training Experience (WRITE) sites, where students function at the level of a beginning intern, taking primary responsibility for outpatient care, with appropriate supervision, to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Completion of core WWAMI Rural Integrated Training Experience (WRITE). Non-WRITE students may take this course if they have completed all of their Patient Care Phase Clerkships; recommended: None. Offered: WS.

FAMED 702 Advanced Family Medicine Outpatient Clerkship (8-24, max. 24) Lawrence Kirven, Kim Kardonsky This 4-week clinical outpatient experience takes place in WWAMI Family Medicine sites, where students may function at the level of a beginning intern, taking primary responsibility for outpatient care, with appropriate supervision, to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Students must have completed all of their Patient Care Phase Clerkships. Offered: AWSpS.

FAMED 703 Advanced LGBTQ Primary Care Clerkship (8) T. Spirenji This 4 week clinical outpatient clerkship addresses health disparities and the unique health concerns that face the LGBTQ community. Students learn to be effective, multidisciplinary advocates who provide non-judgmental, effective, and compassionate medical care for LGBTQ patients. Prerequisite: FAMED 561 and UCONJ 570; recommended: UCONJ 624. Offered: AWSpS.

FAMED 704 Family Medicine Advanced InPatient Clerkship (8, max. 24) T. Spirenji During this four-week clinical inpatient experience, students may function at the level of a beginning intern, taking primary responsibility mostly in the inpatient setting with appropriate supervision. Goals are to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Completion of Phase 2: Patient Care clerkships. Offered: AWSpS.

MEDEX

MEDEX 401 Introduction to Paramedicine (8) Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.

MEDEX 402 Airway Management (3) Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 403 Patient Assessment (4) Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams.
Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

**MEDEX 404 Medical Emergencies I (5)** Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.

**MEDEX 405 Trauma Emergencies (5)** Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.

**MEDEX 406 Medical Emergencies II (3)** Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405. Offered: Sp.

**MEDEX 407 Special Considerations for Paramedicine (4)** Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

**MEDEX 408 Advanced Certifications (5)** Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Prerequisite: MEDEX 407. Credit/no-credit only. Offered: S.

**MEDEX 414 Paramedic Clinical Practicum I (3)** Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Credit/no-credit only. Offered: A.

**MEDEX 415 Paramedic Field Practicum I (6)** Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely monitored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Prerequisite: MEDEX 401 which may be taken concurrently. Credit/no-credit only. Offered: A.

**MEDEX 424 Paramedic Clinical Practicum II (3)** Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Prerequisite: MEDEX 414. Credit/no-credit only. Offered: W.

**MEDEX 425 Paramedic Field Practicum II (7)** Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely monitored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Prerequisite: MEDEX 415. Credit/no-credit only. Offered: W.

**MEDEX 434 Paramedic Clinical Practicum III (4)** Participation in patient care in the CHRMCC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Prerequisite: MEDEX 424. Credit/no-credit only. Offered: Sp.

**MEDEX 435 Paramedic Field Practicum III (8)** Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Prerequisite: MEDEX 425. Credit/no-credit only. Offered: Sp.

**MEDEX 444 Paramedic Clinical Practicum IV (3)** Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with
the medical examiner. Prerequisite: MEDEX 434. Credit/no-credit only. Offered: S.

**MEDEX 445 Paramedic Field Practicum IV (11)**
Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Prerequisite: MEDEX 435. Credit/no-credit only. Offered: S.

**MEDEX 450 Basic Science in Clinical Medicine (6)**
Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.

**MEDEX 451 Anatomy and Physiology in Clinical Medicine (6)**
Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.

**MEDEX 452 Pathophysiology for Primary Care (6)**
Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

**MEDEX 453 Basic Clinical Skills (5)**
Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.

**MEDEX 454 Adult Medicine I (7)**
Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

**MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3)**
Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

**MEDEX 457 Behavioral Medicine I (2)**
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.

**MEDEX 458 Behavioral Medicine (2)**
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.

**MEDEX 459 Behavioral Medicine (2)**
Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: Sp.

**MEDEX 460 Principles of Patient Management (3)**
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.

**MEDEX 461 Principles of Patient Management (3)**
Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

**MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3)**

**MEDEX 463 Clinical Clerkships I (7-19, max. 19)**
Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.

**MEDEX 465 Clinical Clerkships II (5-19, max. 19)**
Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

**MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (7-19, max. 19)**
Ballweg Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.
MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (5-19, max. 19) Ballweg
Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: A/WSpS.

MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2) Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Offered: W.

MEDEX 470 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 471 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 472 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 473 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 474 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 475 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19) Clinical clerkships and independent study activities. Credit/no-credit only. Offered: A/WSpS.

MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

MEDEX 511 Healthcare Administration and Public Health (5) Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5) Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

MEDEX 513 Global Health for Practicing Clinicians (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

MEDEX 521 Capstone Project I (3) Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. (Two weeks on the Seattle campus, six weeks online) Prerequisite: EMCHS students only. Credit/no-credit only. Offered: S.

MEDEX 522 Capstone Project II (3) Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Prerequisite: MEDEX 521. Credit/no-credit only. Offered: A.

MEDEX 523 Capstone Project III (3) Students work on capstone projects. Prerequisite: MEDEX 522. Credit/no-credit only. Offered: W.

MEDEX 524 Capstone Project IV (3) Continuation of work on the capstone project. Prerequisite: MEDEX 523. Credit/no-credit only. Offered: Sp.
MEDEX 525 Capstone Project V (5) Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Prerequisite: MEDEX 524. Credit/no-credit only. Offered: S.

MEDEX 528 Investigative Skills for Practicing Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

MEDEX 531 Clinical Residencies I (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 532 Clinical Residencies II (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 533 Clinical Residencies III (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 536 Health Policy for Practicing Clinicians (4) Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.

MEDEX 537 Leadership for Practicing Clinicians (4) Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.

MEDEX 538 The Physician Assistant Profession (4) Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

MEDEX 540 Healthcare for Rural and Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.

MEDEX 541 Healthcare Administration and Public Health (5) Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

MEDEX 542 Academic Medicine and Specialty Practice (5) Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: A.

MEDEX 543 Global Health (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.

MEDEX 550 Basic Science in Clinical Medicine (6) Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.

MEDEX 551 Anatomy and Physiology (6) Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.

MEDEX 552 Pathophysiology for Primary Care (6) Examines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.

MEDEX 553 Basic Clinical Skills (5) Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

MEDEX 554 Adult Medicine I (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: W.
MEDEX 555 Adults Medicine II (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.

MEDEX 556 Maternal Child Health I (3) Examines the principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 557 Behavioral Medicine I (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.

MEDEX 558 Behavioral Medicine II (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.

MEDEX 559 Behavioral Medicine III (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

MEDEX 560 Principles of Patient Management I (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.

MEDEX 561 Principles of Patient Management II (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.

MEDEX 562 Maternal Child Health II (3) Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.

MEDEX 563 Clinical Clerkships I (7-19, max. 19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 565 Clinical Clerkships II (5-19, max. 19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Prerequisite: MEDEX 563. Credit/no-credit only. Offered: AWSpS.

MEDEX 566 Family Practice Clerkship I (7-19, max. 19) Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

MEDEX 567 Family Practice Clerkship II (5-19, max. 19) Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Credit/no-credit only. Offered: AWSpS.

MEDEX 568 Emergency Medicine I (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: W.

MEDEX 569 Emergency Medicine II (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.

MEDEX 570 Professional Role Development I (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 571 Professional Role Development II (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 572 Professional Role Development III (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.
MEDEX 573 Technical Skills I (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 574 Technical Skills II (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 575 Technical Skills III (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 580 Homelessness in Seattle (2) Multi-disciplinary course developing knowledge and skills in the area of acute and chronic homeless health problems, understanding the history and social constructs as well as the services and disparities facing this population.

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

MEDEX 599 Independent Study (1-19, max. 19) Supervised clinical clerkship or independent study activities to meet specific needs. Prerequisite: permission of the MEDEX program. Credit/no-credit only. Offered: AWSpS.

GENOME SCIENCES

GENOME 151 Human Genetics: The Individual and Society (4) NW Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. For non-science majors only. Offered: Sp.

GENOME 261 Genomes and Society (4) NW Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.

GENOME 361 Fundamentals of Genetics and Genomics (3) NW Introduces fundamentals concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Cannot be taken for credit if credit received for GENOME 371. May not be repeated. Prerequisite: minimum grade of 1.5 in BIOL 200 or BIOL 240 Offered: WSpS.

GENOME 371 Introductory Genetics (5) NW Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. May not be repeated. Prerequisite: either a minimum grade of 2.0 in BIOL 180 and a minimum grade of 2.0 in BIOL 200, or a minimum grade of 2.0 in BIOL 240. Offered: A.

GENOME 373 Genomic Informatics (4) NW Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.

GENOME 414 Molecular Evolution (5) NW Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

GENOME 453 Genetics of the Evolutionary Process (3) NW Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and
the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.

GENOME 454 The Origins of Genetics (4) NW
Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

GENOME 463 Hands-On Science for Elementary School Teachers (5)
Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.

GENOME 465 Advanced Human Genetics (4) NW
Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.

GENOME 466 Cancer Genetics (3) NW
Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.

GENOME 475 Debates in Genetics (3) NW
Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NW
Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSp.

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5) Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Prerequisite: GENOME 371. Credit/no-credit only.

GENOME 499 Undergraduate Research (*, max. 30) Credit/no-credit only. Offered: AWSpS.

GENOME 501 Introduction to Research Materials (1-10, max. 10) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6) Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9) Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9) Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15) Provides secondary school teachers
training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

**GENOME 520 Seminar (1, max. 30)** Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

**GENOME 522 Journal Club (1, max. 30)** Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

**GENOME 523 Research Reports (1, max. 30)** Thomas Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

**GENOME 525 Current Literature in Human Genetics (1)** Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Prerequisite: graduate or postdoctoral status. Credit/no-credit only. Offered: AWSp.

**GENOME 531 Genetics of Human Disease (3)** Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, nematodes, Drosophila, and yeast. Credit/no-credit only.

**GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4)** Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

**GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4)** Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Offered: Sp.

**GENOME 545 Biostatistical Methods for Big Omics Data (3)** This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with BIOST 545/PHG 545.

**GENOME 547 Scientific Writing (1.5)** For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications. Credit/no-credit only.

**GENOME 550 Methods and Logic in Genetics (3)** Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

**GENOME 551 Principles of Gene Regulation (1.5)** A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.

**GENOME 552 Technologies for Genome Analysis (1.5)** Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

**GENOME 553 Advanced Genetic Analysis (1.5)** Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

**GENOME 554 Genomic Informatics (1.5)** Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the
code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.

**GENOME 555 Protein Technology (1.5)** Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine.

**GENOME 559 Introduction to Statistical and Computational Genomics (3)** Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.

**GENOME 561 Molecular Population Genetics and Evolution (1.5)** Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

**GENOME 562 Population Genetics (4) M. Kuhner** Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: W, odd years.

**GENOME 565 Advanced Human Genetics (4)** Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.

**GENOME 569 Bioinformatics Workflows for High-Throughput Sequencing Experiments (1.5)** Programming skills and software tools for building automated bioinformatics pipelines and computational biology analyses. Emphasis on UNIX tools and R libraries for distilling raw sequencing data into interpretable results. For students familiar with UNIX and with some programming experience in Python, R, or C/C++.

**GENOME 570 Phylogenetic Inference (3)** Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Instructors: Felsenstein Offered: W, even years.

**GENOME 573 Human Genomics: Science, Ethics, and Society (3)** Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with B H 551; A.

**GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5)** In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

**GENOME 580 Ethics in Biomedical Research and Teaching (1)** Explores ethical issues in research and teaching and discusses avenues of responsible conduct. Credit/no-credit only.

**GENOME 582 Seminar in Mouse Genetics (1) Braun** Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.

**GENOME 584 Seminar in DNA Replication (1) Brewer, Fangman** Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms
and control of DNA replication. Credit/no-credit only. Offered: AWSp.

**GENOME 585 Seminar in Bacterial Genetics (1)**
Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.

**GENOME 586 Seminar in Mammalian Genetics (1)**
*Sibley* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no-credit only.

**GENOME 587 Seminar in Nematode Genetics (1)**
*Thomas* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.

**GENOME 590 Population Genetics Seminar (1)**
Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Prerequisite: GENOME 562 or permission of instructor. Instructors: Felsenstein Credit/no-credit only.

**GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12)** Prerequisite: permission of instructor. Offered: AWSp.

**GENOME 600 Independent Study or Research (*-)** Credit/no-credit only. Offered: AWSpS.

**GENOME 650 Genome Sciences Teaching Clerkship (1-6, max. 15)** Direct experience teaching undergraduate Genome Sciences classes. Emphasis on pedagogy of educational experience, includes weekly meetings with instructors for training in teaching techniques, classroom management. Students develop as science educators under mentorship of course instructors. Involves attending class lectures, holding office hours, leading study sections, developing homework/quizzes, grading exams, management of course website. Prerequisite: PhD student standing. Credit/no-credit only. Offered: AWSpS.

**GENOME 700 Master's Thesis (*) Offered: AWSpS.**

**GENOME 800 Doctoral Dissertation (*) Offered: AWSpS.**

**HEALTH METRICS SCIENCES**

**HMS 510 Principles of Health Metrics (3)**
*Christopher Murray* Introduces methodological approaches and metrics to comprehensively measure health at the population level. Addresses the question, "What is health?", and provides an overview of the rationale, conceptual, and historical basis of population health measurement and health metrics sciences. Offered: A.

**HMS 511 Problems in Global Health ([0-4], max. 4)**
*Steve Gloyd* Explores social, political, economic, and environmental determinants of health and societal responses to health problems globally. Covers impact of colonialism, equity strategies, Primary Health Care, neoliberalism, war, international agencies, the climate crisis, water, sanitation, and traditional health systems. Student groups develop proposals to improve health systems or address social determinants of health in a specific low-income country. Offered: jointly with G H 511; A.

**HMS 520 Introduction to Programming, Version Control, and Data Wrangling for Health Metrics Sciences (3)**
*Peng Zheng* Covers basics of programming, including communicating with machines, writing clean code, and collaborative programming. Students learn to build code base to deal with a series of tasks focused on data manipulation. Offered: A.

**HMS 530 Global Burden of Disease: Methods and Results (3)**
*Emmanuela Gakidou, Stein Emil Vollset*
Covers (1) the history and importance of the Global Burden of Disease Study (GBD), (2) the quantitative methods used by the GBD to develop estimates of mortality, morbidity, and risk factors from often sparse data, (3) major findings from the GBD, including leading causes of disease burden and the pattern and variability in burden globally, (4)
implications and uses of GBD findings for global health policy. Offered: W.

**HMS 535 Advanced Methods for Global Health I (4)**

*Bryan Weiner* Focuses on the advanced concepts, theories, and methods of implementation science in global health, with a specific focus on fidelity, adaptation, strategy selection, de-implementation, sustainability, scale-up, advanced trials designs, qualitative methods, and mixed methods. Assumes prior knowledge of the fundamentals of implementation science. Prerequisite: G H 541 or permission of instructor. Offered: jointly with G H 535; A.

**HMS 536 Advanced Methods for Global Health II (4)**

Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 528/EPI 553/G H 536; W.

**HMS 537 Advanced Methods for Global Health III (4)**

*Brad Wagenaar* Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 525/EPI 556/G H 537; Sp.

**HMS 539 Methods, Tools, and Data in Global Health (2)**

*Emmanuela Gakidou* Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, qualitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks).

**HMS 541 Fundamentals of Implementation Science in Global Health (4/5)**

*Judith N. Wasserheit, Kenneth Sherr* Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: jointly with G H 541; Sp.

**HMS 580 Global Health Doctoral Seminar (1/2, max. 4)**

*Bernardo Hernandez Prado, Kenneth Sherr* Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of metrics and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Credit/no-credit only. Offered: jointly with G H 580; A/WSp.

**HMS 590 Measures and Metrics of Malnutrition: Results from the Global Burden of Disease Study (2)**

*Ashkan Afshin* Provides an overview of various method of assessing nutrition at the population level; reviews epidemiologic methods used to assess the causal relationship of each form of malnutrition and disease endpoints; evaluates the epidemiologic evidence on health effects of each form of malnutrition. Introduces the process of estimating the global burden of disease attributable to each form of malnutrition at the population level. Credit/no-credit only.

**HMS 591 Measuring the Global Burden of Disease of Tuberculosis and HIV/AIDS (2)**

*Hmwe Hmwe Kyu* Introduces students to the measurement and estimation of trends in the global burden of disease of tuberculosis and HIV/AIDS as well as the burden due to co-infection. Students will learn about primary data sources to estimate the epidemiological burden of these diseases, limitations of data sources, and current modeling approaches. Online visualization tool will be used to analyze results from the Global Burden of Disease Study. Credit/no-credit only.
HMS 592 Health Metrics Sciences Seminar (1, max. 6) Designed to strengthen ability to critically assess, examine, and interpret research articles. Seeks to broaden understanding and knowledge about health metrics science. Three rotating topics: Health Metrics, Health Systems, and Global Institutions and Goal Setting. Credit/no-credit only. Offered: AWSp.

HMS 593 Didactic Teaching for Health Metrics Sciences (2/3) Students work with instructor to identify responsibilities in accordance with learning outcomes, providing opportunities to implement teaching ideas and techniques, and reflect on this experience. Develop portfolio of accomplishments, demonstrating achievement of learning outcomes. Prerequisite: PhD student standing; and permission of instructor. Offered: AW.

HMS 600 Independent Study or Research (0-10, max. 50) Independent study or research on Health Metrics Sciences topics conducted under the direction of one or more instructors. Prerequisite: permission of instructor. Offered: AWSpS.

HMS 800 Doctoral Dissertation (*) Prerequisite: permission of Dissertation committee chair. Credit/no-credit only. Offered: AWSpS.

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3) Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student’s preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

HUBIO 505 WWAMI Preceptorship (*, max. 6) Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: ASp.

HUBIO 510 P-Microscopic Anatomy: Histology (6) Birmingham-McDonogh Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

HUBIO 511 P-Human Anatomy and Embryology (8/13) Clark Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

HUBIO 512 P-Mechanisms in Cell Physiology (5) Detwiler Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513 P-Introduction to Clinical Medicine (3-) Issac, Maestas Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

HUBIO 514 P-Biochemistry I-A (4-) Maizels Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity
with fundamental principles, at the level tested in
the MCATs. Offered: A.

HUBIO 516 P-Systems of Human Behavior (5)
Harrington Effects of behavioral factors in major
management problems faced in medical practice
relating to cultural background, social role, sexual
identity, and belief systems. Acquisition of skills in
analyzing behavior, defining objectives, and
designing precise treatment strategies. Offered: A.

HUBIO 522 P-Introduction to Clinical Medicine (-4-)
Isaac, Maestas Medical history is introduced and
instruction in data collection is begun. Experience in
conducting medical interviews with patients to
obtain the medical history and patient profile.
Special problems related to interviewing are
addressed. Offered: W.

HUBIO 523 P-Introduction to Immunology (2) Gale
Topics covered include: basic concepts such as
antigens; antibodies; complement; B-and T-
lymphocyte function, including interactions with
each other and with accessory cells; immunological
tolerance; major histocompatibility complex and role
of these basic concepts in immunopathology
(immunodeficiencies, hypersensitivities,
autoimmunity, blood transfusion, and
transplantation).

HUBIO 524 P-Biochemistry I-B (-4) Maizels
Metabolism as integrated in the organs and tissue of
the human body for the purpose of generating
energy from food and converting small molecules to
essential building block of our cells. Discusses
principles of nutrition in the context of human
health and disease. Assumes familiarity with
fundamental principles, at the level tested in the
MCATs. Offered: W.

HUBIO 530 P-Clinical Epidemiology and Evidence-
Based Medicine (2) Kestenbaum Community health
and disease, including assessment of disease risk and
mechanisms of epidemic detection, spread, and
control; interpretation of research design, data
analysis, bias source; and clinical epidemiology,
including evaluation and application of diagnostic
tests, natural history of disease, and quantitative
aids for clinical decision making. Offered: W.

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)

HUBIO 532 P-Nervous System (8) Dacey, Mulligan
An integrated approach to the normal structure and
development of the nervous system, including the eye.
Presents neuropathological examples as well as
clinical manifestations of neurological disease.

HUBIO 534 P-Microbiology and Infectious Disease
(9) Moseley An introduction to medical microbiology
and infectious diseases. Emphasizes the biology of
microbial pathogens and the mechanisms of
pathogenesis. Covers clinical manifestations,
epidemiology, general principles of diagnosis,
therapy, and prevention of infectious disease.
Offered: Sp.

HUBIO 535 P-Introduction to Clinical Medicine (-4)
Isaac, Maestas Adult screening physical examination
is taught through the use of lecture, audiovisual aids,
and small-group tutorial, where students in
supervised setting practice the physical examination
on one other. Further practice in the performance
and recording of the patient profile and medical
history. Offered: Sp.

HUBIO 540 P-Cardiovascular System (6) Feigl
Interdisciplinary approach to cardiovascular
medicine, including anatomy, physiology, radiology,
pathology, medicine, and surgery. Function of the
cardiovascular system in health and disease.
Offered: A.

HUBIO 541 P-Respiratory System (4) Culver, Luks
Interdisciplinary approach to the respiratory system,
including anatomy of thorax and lungs, ventilation
mechanics, blood-gas transport, gas exchange, acid-
base balance, and the physiology and pathology of
obstructive, restrictive, and pulmonary-vascular
diseases. Offered: A.

HUBIO 542 P-Introduction to Clinical Medicine (4-)
McDonough Advanced instruction in interview
technique, history taking, and physical examination,
with emphasis on detection of abnormalities.
Offered: A.

HUBIO 543 P-Principles of Pharmacology I (5)
McKnight Includes general principles of
pharmacology and the specific pharmacology of
major drugs acting on the autonomic and
cardiovascular systems. Offered: A.
HUBIO 547 P - Pathology IIA (5) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

HUBIO 548 P - Cases in Clinical Ethics (1) Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student’s current and future work. Prerequisite: second-year medical students. Instructors: Edwards, Timberlake

HUBIO 550 P - Introduction to Clinical Medicine (4) McDonough Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551 P - Gastro-Intestinal System (4) Silverstein Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552 P - Hematology (3) Richard Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553 P - Musculoskeletal System (4) Schmale Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem-based learning. Offered: W.

HUBIO 554 P - Genetics (2) Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 555 P - Medicine, Health, and Society (3) Chen, Masuda Interdisciplinary introduction to health services designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.

HUBIO 556 P - Hormones and Nutrients (4) DeSantis Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

HUBIO 557 P - Pathology IIB (2) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

HUBIO 558 P - Rheumatology (1) An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.

HUBIO 559 P - Problem Based Learning (3) Scott Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by including medical, nursing, and physician assistant students in each group. Offered: W.
HUBIO 560 P-Introduction to Clinical Medicine (5)

HUBIO 562 P-Urinary System (4) *Jefferson* Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 565 P-Reproduction (4) *Steiner* Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

HUBIO 566 P-Pathology IIC (3) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which affect more than one organ system including cardiovascular, renal, and respiratory.

HUBIO 567 P-Skin System (2) *Colven* Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 569 P-Mind, Brain, and Behavior (6) *O. Pascualy* Defines and describes major psychiatric disorders and presents a systematic approach to differential diagnosis. Discusses conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry; along with physiological and biochemical mechanisms, and therapeutic and adverse effects. Offered: Sp.

HUBIO 590 P-Medical Information for Decision Making (1) Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Instructors: Tarczy-Hornoch Offered: W.

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*) (max. 30) Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*) (max. 30) Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*) (max. 30) Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage (*) (max. 30) Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 595 P-Independent Investigative Inquiry, GHIP (8) *S. Graham* With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: GHIP students only. Offered: S.

HUBIO 596 P-WWAMI Non-Clinical Selectives - Bozeman (*) (max. 30) Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*) (max. 30) Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.
HUBIO 599 P-Independent Study in Medical Science (6) Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4) A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

MEDICAL SCIENCE

MEDSCI 500 Research Methods (1) Bryan Kestenbaum Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: AWSpS.

MEDSCI 501 P-Independent Investigative Inquiry (6-) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: AWSpS.

MEDSCI 502 Foundations of Clinical Medicine (3-) Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Recommended: Offered: A.

MEDSCI 503 Independent Investigative Inquiry Final Project (-1) Shobha W Stack Students will engage in a project with an in-depth focus on a health-related, thereby giving additional context to their training and career as a physician. In the process they will develop the skills to acquire and critically evaluate new information under the guidance of faculty mentorship. This will culminate in dissemination of their scholarly work through a poster presentation or a final paper depending on the type of scholarship chosen. Offered: AWSpS.

MEDSCI 504 Foundations of Clinical Medicine (-4-) J. CAWSE-LUCAS Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

MEDSCI 505 Introduction to Telemedicine (6) John F. McCarthy, Toby Keys Gain knowledge of telemedicine and telemedicine technologies, and their practical applications to improve the health of rural and underserved populations. Offered: AWSpS.

MEDSCI 506 Foundations of Clinical Medicine (-4-) J. CAWSE-LUCAS Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

MEDSCI 508 Foundations of Clinical Medicine (4) Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: A.

MEDSCI 510 P-Molecular and Cellular Basis of Disease (11) T. Chestnut, P. Fuerst, B. Wisser Introduces cell physiology and cell biology; genetics and genetic diseases; and genes. Topics include

MEDSCI 500 Research Methods (1) Bryan Kestenbaum Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: AWSpS.

MEDSCI 501 P-Independent Investigative Inquiry (6-) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: AWSpS.

MEDSCI 502 Foundations of Clinical Medicine (3-) Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Recommended: Offered: A.

MEDSCI 503 Independent Investigative Inquiry Final Project (-1) Shobha W Stack Students will engage in a project with an in-depth focus on a health-related, thereby giving additional context to their training and career as a physician. In the process they will develop the skills to acquire and critically evaluate new information under the guidance of faculty mentorship. This will culminate in dissemination of their scholarly work through a poster presentation or a final paper depending on the type of scholarship chosen. Offered: AWSpS.

MEDSCI 504 Foundations of Clinical Medicine (-4-) J. CAWSE-LUCAS Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

MEDSCI 505 Introduction to Telemedicine (6) John F. McCarthy, Toby Keys Gain knowledge of telemedicine and telemedicine technologies, and their practical applications to improve the health of rural and underserved populations. Offered: AWSpS.

MEDSCI 506 Foundations of Clinical Medicine (-4-) J. CAWSE-LUCAS Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

MEDSCI 508 Foundations of Clinical Medicine (4) Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: A.

MEDSCI 510 P-Molecular and Cellular Basis of Disease (11) T. Chestnut, P. Fuerst, B. Wisser Introduces cell physiology and cell biology; genetics and genetic diseases; and genes. Topics include
membrane physiology; sensory receptors; muscle energetics and contractibility; autonomic nervous system; tissue response to disease; pharmacodynamics and pharmacokinetics; genetic disorders; and pharmacogenetics. Incorporates relevant fundamental principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: A.

MEDSCI 511 Independent Study Molecular Cellular Basis of Disease Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Molecular and cellular Basis of Diseases block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission. Offered: AWSpS.

MEDSCI 515 Themes in Medicine- Foundations 1 (-1-)
Suzanne M. Allen Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSp.

MEDSCI 520 P-Invaders and Defenders (10) Lynch, Pottinger, Torgerson, Voyich Covers the immune system; microbial biology; infectious diseases; inflammation and repair; and skin and connective tissue. Topics include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, and the basis of immunologic diagnostics. Includes relevant fundamental scientific principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: A.

MEDSCI 521 Independent Study Invaders and Defenders Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Invaders and Defenders block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund knowledge. Prerequisite: Department permission. Offered: AWSpS.

MEDSCI 525 Themes in Medicine- Foundations 2 (-1-)
Suzanne M. Allen Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: W.

MEDSCI 530 P-Circulatory Systems (16)
Interdisciplinary approach to cardiovascular, respiratory, and renal-urinary medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Includes cardiac electrophysiology and cardiac muscle mechanics; myocardial infarction and cardiac repair; thoracic and pulmonary anatomy; ventilation mechanics; obstructive, restrictive, and pulmonary-vascular diseases; renal function; and common kidney diseases. Pass/Fail only. Offered: W.

MEDSCI 531 Independent Study Circulatory Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Circulatory block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission. Offered: AWSpS.

MEDSCI 535 Ecology of Health and Medicine- Foundations 3 (-1) This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

MEDSCI 540 Blood, Cancer & Musculoskeletal (8) Familiarizes students with basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. The Musculoskeletal content will focus on clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation. Pass/Fail only. Offered: W.
MEDSCI 541 Independent Study Blood, Cancer, and Musculoskeletal Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Blood, Cancer, and musculoskeletal block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 542 Blood and Cancer (5) Sioban Keel
Comprehensive introduction and overview of hematology, and oncology content for medical students to gain knowledge on basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Offered: AWSpS.

MEDSCI 543 Independent Study Blood and Cancer Remediation (2-24, max. 24) Sioban Keel
Designed for medical students required to complete additional study related to the required Blood and Cancer block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 545 Ecology of Health and Medicine-Foundations 4 (1)
This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

MEDSCI 545 P-Energetics and Homeostasis (10)
DeSantis, Silverstein Covers metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology, and endocrinology. Topics include physiology and pathology of digestion and hepatic function; principles and practice of clinical nutrition; the endocrine integration of metabolism; and clinically important endocrine pathophysiology. Includes anatomy, pathology, and pharmacology of the endocrine and GI systems. Pass/Fail only. Offered: Sp.

MEDSCI 551 Independent Study Energetics Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Energetics block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 555 Ecology of Health and Medicine-Patient Care 1 (1)
This Patient Care course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

MEDSCI 560 P-Mind, Brain, and Behavior (14)
Explains the foundational principles of the organization and function of the head, neck, and central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Covers current therapeutic approaches to disease including pharmacological, behavioral, surgical, and other therapies. Pass/Fail only. Offered: A.

MEDSCI 561 Independent Study Mind, Brain and Behavior Remediation (1-24, max. 24)
Designed for medical students required to complete additional study related to the required Mind, Brain and Behavior block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 565 Ecology of Health and Medicine-Patient Care 2 (1) Heidi L. Combs, Mike Spinelli, Amanda Kost
Core concepts needed for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSpS.
MEDSCI 570 P-Lifecycle (8) Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology. Offered: A.

MEDSCI 571 Independent Study Lifecycle Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Lifecycle block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 575 Ecology of Health and Medicine-Explore and Focus (1) This Explore & Focus Phase course provides students with a deep understanding of systems that constitute health care are fundamental to becoming a successful physician. The course encourages reflections from clinical clerkships experiences and requires the completion of a capstone project. Pass/Fail only. Offered: AWSp.

MEDSCI 579 Comprehensive Basic Sciences Review (8) Meghan M Kiefer Involves review of basic science previously covered in the Foundations curriculum, as well as multi-system processes and disorders. Provides enhanced academic support to review foundational biomedical knowledge and develop study strategies in anticipation of Step 1 and transition to clinical phase. Pass/Fail only. Offered: WSp.

MEDSCI 580 P-Consolidation and Transition (11) Reinforces content in the UWSOM foundations phase. Learning experiences will address key content areas which need further review identified throughout terms 1 and 2, with specific sessions developed as indicated; faculty/staff and peer educators will provide sessions for this basic science review as well as preparation for clerkships. Offered: W.

MEDSCI 582 P-Consolidation (10, max. 20) Meghan M Kiefer Focused course to prepare students for the USMLE Step 1. Will include large group review of study strategies and approach to integration of foundational knowledge with clinical reasoning, as well as mentored self-assessment and formation of an individualized study plan for the USMLE Step 1. Pass/Fail only. Offered: WSp.

MEDSCI 583 P-Transition to Clerkships (2) Meghan M Kiefer Reinforces clinical content in the UWSOM Foundations phase. Lectures and small-group activities address clinical skills and resources for clerkships, and peer educators provide strategies for success clerkships. Pass/Fail only. Offered: WSp.

MEDSCI 584 Independent Study Foundations of Clinical Medicine Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Foundations of Clinical Medicine offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master knowledge & skills. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 585 Independent Study Research Methods (1-24, max. 24) Designed for medical students required to complete additional study related to the required Research Methods Course offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 586 Independent Study Consolidation and Transition Remediation (1-24, max. 24) M. Kiefer Designed for medical students required to complete additional study related to the required Consolidation and Transition course offered between the foundation and patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes
terms to identify which quarter the course is being offered. Pass/Fail only Offered: AWSpS.

MEDSCI 587 Independent Study Themes in Medicine (1-7, max. 7) Suzanne M. Allen Designed for medical students required to complete additional study related to the required Themes in Medicine offered throughout the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 588 Independent Study Human Form and Function Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 589 Independent Study Human Form and Function Term 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 590 Independent Study Human Form and Function Term 3 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 591 Independent Study Pathology Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 592 Independent Study Pathology Term 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 593 Independent Study Pathology Term 3 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. The course title includes terms to identify which quarter the course is being offered. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 594 Independent Study Pharmacology Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

MEDSCI 595 Independent Study Pharmacology Term 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being
MEDSCI 600 Transition to Residency (4) G

*Pagalilauan* The Transition to Residency course will:
1. Prepare graduating 4th year medical students in the knowledge and skills necessary to perform expected intern duties in the first 3 months of residency. 2. Provide a forum for the academic, research and service accomplishments of the graduating students. 3. Incorporate sessions that create community and give students a platform to celebrate their experiences in medical school. Offered: Sp.

MEDSCI 596 Independent Study Pharmacology Term 3 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 597 Indep Study USMLE Step 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required USMLE Step 1 licencing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 598 Indep Study USMLE Step 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required USMLE Step 2 licencing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 599 Indep Study or Research (1-24, max. 24) Designed for medical students who elect a special or research related to the required foundation phase pre-clinical courses. This course can also be used for a student who fails a thread remediation course. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 603 Introductory Hands-On Cardiac Ultrasound (1) Acquire cardiac ultrasound images at three acoustic windows, identify cardiac anatomy in standard views, and recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator.

MEDSCI 604 Introduction to Chronic Pain (1) Medical students will be paired with a pain specialist for three morning sessions in an outpatient chronic pain clinic. Students will be exposed to musculoskeletal, neuropathic, and visceral pain conditions while learning about various management options. A 1-2 page reflection on a patient or pain topic will be required. Offered: SpS.

MEDSCI 605 From Electrons to the Emergency Department: The Cell Biology of Poisons (1) This course will describe how various poisons (naturally occurring or following overdose) interrupt molecular pathways to produce toxicity. Concepts will be introduced in a base-based manner before describing in depth the metabolic pathway affected. Examples include electron transport chain poisons, sodium channel poisons, and free poisons (iron).

MEDSCI 606 Emergency Medicine Point-of-Care Ultrasound (1) A. ADEDIPE, B. BACKLUND, M. VRABLIK Introduction to point-of-care ultrasound. This elective will help students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated
and patient care settings. The elective is designed to be interactive and will incorporate classroom didactic, procedure simulation and clinical application. Offered: WSp.

MEDSCI 607 Science and Practice of Empathy and Compassion Cultivation in Medicine (1) This course will aim at helping students develop the ability to face suffering and pain with empathy, kindness, and compassion. Emphasis will be on cultivating a non-judgmental and curious attitude, self-compassion, appreciation of common humanity and acknowledging that suffering is universal to the human condition, and the practice of compassion. Offered: AS.

MEDSCI 608 Ethical Issues in Solid Organ Transplantation and Allocation (1) A. WIGHTMAN Explore the ethical issues that underlie some of the major controversies in transplantation through brief readings (including selections from the press, canonc texts, and academic articles) and case-based discussion. Students will be evaluated based on participation and a written response to a case. Offered: W.

MEDSCI 609 Ethics in emergency Medicine Workshop (1) Learn how to consider and evaluate the ethical issues surrounding various real-life, frequently encountered medical situations. Discuss various approaches to ethical reasoning and decision-making, then implement in case evaluation. Students will be encouraged to both participate in and lead discussions of each case.

MEDSCI 610 Food, Health, and the Environment (1) A multi-modal session comprised of interactive presentations, documentaries, guest speakers, and small group discussions covering major nutrition topics, such as: nutrition and effects on health, the American food industry and the environment, changing eating behaviors on individual, community, and national levels, as well as food insecurities and health disparities.

MEDSCI 611 Intersection of Genetics with Patient Care (2) Create hypothesis-driven clinical inquiry in an interactive learning environment. Employ peer-review sessions and team-based analysis of genetics case scenarios. Apply your science and clinical knowledge towards solving your patient’s specific healthcare need. A team experienced clinicians and researchers will give support and feedback.

MEDSCI 612 Introduction to Humanitarian Emergencies (1) The course provides an introduction to health related issues faced by acutely displaced populations, including refugees and internally displaced persons, in developing countries, in the setting of humanitarian emergencies. Challenges in planning, implementing, and evaluating health programs for these populations will be discussed through case studies of recent humanitarian emergencies.

MEDSCI 613 Mind Body Medicine: Mind Body Skills for Medical Students (2) L. ERLANGER, C. SCOTT This seminar course will provide scientific background and foundational self-care skills for stress management through mindfulness and mutual support. Students will be encouraged to develop self-care and related pt care philosophy statement. Includes highly interactive, short didactic sessions, practice with experiential activities, and sharing reflections with group members.

MEDSCI 614 Theoretical and Clinical Aspects of Pain (1) The course will introduce pain and pain neurobiology with a close look into nociceptive, neuropathic and visceral pain and treatments to pain and addiction. The course will be a combination of articles, lecture, videos of real patients with chronic pain, and discussion.

MEDSCI 615 Community Engagement and the School of Medicine Pathways (1) The interactive and engaging Pathways intersession will cover the following topic area: determinants of health, the built environment, health equity and advocacy, structural competency, narrative medicine and additional topics related to working effectively with underserved, vulnerable and marginalized communities. Open to all WWAMI medical students.

MEDSCI 616 The Physician Online: Mindful Use of Digital Media (1) A. BROWN, A. CHIPMAN, M. JACKSON, J. JAUREGUI, J. RIDDELL This course explores the use of social media in medicine by exploring online identity, interactions, consumption and creation of content, and reflection. The goal is to equip students to use digital media mindfully while leveraging it to collaborate intelligently, teach more efficiently, and learn for a lifetime.
MEDSCI 617 Prison/Jail Health Care, Part 1 (1)  M. STERN, L. STRICK  This 2-day course serves as an introduction to correctional healthcare. The instructors will provide a short overview of the US correctional system and why and how health care is delivered in jails and prisons. The class will tour a busy county jail on Day 1 and a state prison on Day 2. Offered: AW.

MEDSCI 618 Prison/Jail Health Care, Part 2 (1)  M. STERN, L. STRICK  This course will explore the unique ethical challenges of correctional medicine through case-based discussions. There will be an opportunity to better understand some of those challenges first hand through a guided visit to a prison caring for the state’s most seriously mentally ill. Offered: S.

MEDSCI 619 Refugee and Immigrant Health (1)  This is a weeklong UWSOM intersession course familiarizing students with various aspects of immigrant and refugee health care. There will be an emphasis on the social context of clinical care and the importance of effective teamwork and collaboration.

MEDSCI 620 Rheumatology Foundations (1)  H. EMERY, K. HAYWARD, M. THAPA, T. TORGERSON  This course reviews pathology, clinical presentation, initial evaluation and management of patients with musculoskeletal complaints and common rheumatologic disorders. The in-class sessions include interactive lectures, case-based small groups and a volunteer patient panel that allow students to synthesize knowledge from earlier Foundations blocks and prepare for transition into clinical clerkships. Offered: Sp.

MEDSCI 621 Basic Skills in Emergency Resuscitation (1)  Impart the critical skills needed to evaluate and manage common emergencies that medical students will encounter during their clinical clerkships and internship.

MEDSCI 622 Topics in Global Infectious Diseases (1)  This course will combine didactic sessions presented by local topic experts on global infectious diseases with interactive case-based learning. Small groups will tackle cases that explore epidemiology, diagnosis and management of significant global infections. The course will conclude with a career panel of speakers highlighting various global health career paths.

MEDSCI 623 Introduction to Toxicology: The Intersection of Natural Toxins and Human Physiology (1)  This is a didactic-based course illustrating the pathophysiology of natural toxins. Toxins from multiple organ systems including central nervous system, hepatic, hematologic, immunologic, and renal toxins will be covered. Specific examples include: shellfish poisonings, plant and mushroom poisonings, and envenomations from jellyfish, snakes, scorpions, and spiders.

MEDSCI 624 Medical Students as Advocates: Practical Skills for Effective Advocacy (1)  Students will develop tangible, hands on skills for moving beyond witnessing health disparities to upstream action that is rooted in effective and community-centered advocacy. Through a cycle of interactive learning, research, action and reflection, this course both explores and develops the role of medical students and future physicians as advocates. Credit/no-credit only.

MEDSCI 625 Building a Framework for Effective Service-Learning, Health Equity, and Leadership (1)  This course hones student leadership skills for: cultivating strong teams, assessing community strengths and needs, building community partnerships, sustaining projects, transitioning leadership, and facilitating reflective practices rooted in an analysis of systemic inequalities and cultural humility. Students will emerge with renewed confidence and refined skills for developing or strengthening projects. Credit/no-credit only.

MEDSCI 626 Foundations of Scholarship: Discovery (1)  Investigate different types of scholarship of discovery within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AW.

MEDSCI 627 Foundations of Scholarship: Integration (1)  Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 628 Foundations of Scholarship: Engagement (1)  Investigate different types of
scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 629 Foundations of Scholarship: Teaching (1) Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 630 Procedures and Advanced Skills for Clinical Practice (1) Explore common diagnostic and therapeutic clinical procedures through a hands-on approach. Experience more advanced skills needed for clinical practice in a mentored environment. Credit/no-credit only. Offered: AWSp.

MEDSCI 631 Skills and Strategies for Personal and Professional Development (1) Teach skills and strategies required to sustain lifelong personal and professional growth. Equip students with resources and strategies that will improve their studying and learning skills. Topics will include time management, stress management, adult learning and organizational skills. Guest presenters will include professionals in the fields of health and education. Offered: W.

MEDSCI 632 Clinical Global Health and Social Medicine (1) P. DRAIN Applying clinical global health and social medicine principles are critical to providing excellent medical care. In this intersession, students will learn and discuss elements of clinical global health and social medicine through interactive case-based lectures, group discussions, and independent reading. Students will be graded (pass/fail) on participation and an essay. Offered: W.

MEDSCI 699 Clinical Independent Study or Research (1-24, max. 24) Michael J. Ryan Independent study course designed for medical students electing to complete a project or research related to clinical medicine or other clinical courses during the medical school Patient Care or Explore and Focus Phases. Offered: AWSpS.

IMMUNOLOGY

IMMUN 441 Introduction to Immunology (4) NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated. Offered: A.

IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4) Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in immunology; other graduate students with permission of instructor. Offered: W.

IMMUN 534 Central Issues in Immunology (3) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in immunology. Offered: Sp.

IMMUN 537 Immunological Methods (1.5) Fink, Weinmann Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.

IMMUN 538 Immunological Based Diseases and Treatments (2) E. BETTELLI, R. SAVAN Addresses the mechanisms leading to the development of immunologically based diseases. In particular, covers immunological basis and treatment of infection, autoimmunity, and cancer. Offered: Sp.

IMMUN 540 Immunology Teaching Clerkship (2) The pedagogical requirement addressed by this
course is direct experience in teaching undergraduate Introduction to Immunology classes under the direct oversight and mentorship of regular course instructors. By the end of this course, the graduate student will have developed skills, abilities and insights as a science educator and communicator through the sustained support and guidance of the instructor of record. Prerequisite: PhD student standing and permission of instructor; recommended: advanced Immunology course or equivalent. Credit/no-credit only. Offered: A.

**IMMUN 550 Selected Topics in Immunology (1, max. 30)** Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSp.

**IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Clark Credit/no-credit only. Offered: AWSp.

**IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Prerequisite: immunology graduate student; permission of instructor. Instructors: Stetson Offered: AWSpS.

**IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Maizels Credit/no-credit only. Offered: AWSpS.

**IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Nepom Credit/no-credit only. Offered: AWSpS.

**IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Goverman Credit/no-credit only. Offered: AWSpS.

**IMMUN 556 Research Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30)** Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ziegler Credit/no-credit only. Offered: AWSpS.

**IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30)** Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology or permission of instructor. Instructors: Oberst Credit/no-credit only. Offered: AWSpS.

**IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30)** Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Elkon Credit/no-credit only. Offered: AWSpS.

**IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate student; permission of instructor. Instructors: Urdahl Credit/no-credit only. Offered: AWSpS.
IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Bevan, Fink, Goverman, Greenberg, Pepper, Stetson Credit/no-credit only. Offered: AWSpS.

IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Fink Credit/no-credit only. Offered: AWSpS.

IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate students; permission of instructor. Instructors: Strong Credit/no-credit only. Offered: AWSpS.

IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Aderem Credit/no-credit only. Offered: AWSpS.

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Greenberg Credit/no-credit only. Offered: AWSpS.

IMMUN 565 Research Conference in Innate Immune Defenses against Virus Infection (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Gale Credit/no-credit only. Offered: AWSpS.

IMMUN 566 Research Conference in the Studies of Lymphocyte Memory (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Pepper Credit/no-credit only. Offered: AWSpS.

IMMUN 567 Research Conference in the Role of miRNAs in Modulating the Immune System (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Savan Credit/no-credit only. Offered: AWSpS.

IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Hamerman Credit/no-credit only. Offered: AWSpS.

IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Bettelli Credit/no-credit only. Offered: AWSpS.

IMMUN 570 Research Conference in Mucosal Immunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and
permission of instructor. Instructors: Oukka
Credit/no-credit only. Offered: AWSpS.

**IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Rawlings Credit/no-credit only.

**IMMUN 572 Research Conference in Signal Transduction in B-Cells (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Scharenberg Credit/no-credit only.

**IMMUN 573 Immunology Seminar Series (1, max. 30)** Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Prerequisite: graduate standing in immunology; other graduate students with firm background in immunology and permission of instructor. Credit/no-credit only.

**IMMUN 574 Research Conference in Kaposi’s Sarcoma-Associated Herpes Virus: Interactions with B-Cells and Endothelial Cells (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Lagunoff Credit/no-credit only.

**IMMUN 575 Research Conference in Infection and Immunity (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Bevan Credit/no-credit only.

**IMMUN 576 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30)** A. LACY-HULBERT Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than once conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.

**IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Campbell Credit/no-credit only. Offered: AWSpS.

**IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ramakrishnan Credit/no-credit only. Offered: AWSpS.

**IMMUN 579 Research Conference in Liver Immunology (1, max. 30)** Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Crispe Credit/no-credit only. Offered: AWSpS.

**IMMUN 580 Research Conference in Immune Imaging and Structure-Function Biology (1, max. 30)** M. GERNER Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Offered: AWSpS.

**IMMUN 581 Research Conference on the Initiation of Type 2 Immune Responses by Parasitic Worms and Allergens (1)** J. VON MOLTKE Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Credit/no-credit only. Offered: AWSpS.

**IMMUN 599 Introduction to Immunology Research (1-10, max. 40)** Current problems in immunological
research. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

**IMMUN 600 Independent Study or Research (*)**
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

**IMMUN 700 Master's Thesis (*)**
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

**IMMUN 800 Doctoral Dissertation (*)**
Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

---

**LABORATORY MEDICINE AND PATHOLOGY**

**LABORATORY MEDICINE**

**LAB M 201 Medical Laboratory Science (2)**
Explores the field of Medical Laboratory Science covering the concepts and practices of this profession. Provides an overview of Laboratory Medicine disciplines and an examination of the impact of Medical Laboratory Science on patient care. Medical Microbiology, Forensics, Hematology, Genetics, Clinical Chemistry, and Immunohematology will be discussed.
Prerequisite: CHEM 152. Offered: A.

**LAB M 301 Introduction to Medical Laboratory Science (4)**
Explores Medical Laboratory Science covering concepts and practices through lecture and laboratory practice. Provides an overview of Laboratory Medicine disciplines and an examination of the impact of Medical Laboratory Science on patient care. Medical Microbiology, Forensics, Hematology, Genetics, Clinical Chemistry, and Immunohematology will be discussed.
Recommended: MLS Student Offered: A.

**LAB M 302 Introduction to Medical Laboratory Science Laboratory (2)**
Laboratory coverage of the theories, concepts, and practices defining medical laboratory science as a profession. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of laboratory services. Subjects include quality management, safety, regulatory and compliance, and overview laboratory techniques.
Prerequisite: LAB M 201 and admission to the MLS major Offered: A.

**LAB M 418 Introductory Clinical Chemistry (6)**
Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory.
Limited to medical laboratory science students. Offered: Sp.

**LAB M 419 Clinical Coagulation (4)**
Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical laboratory science students. Offered: S.

**LAB M 420 Laboratory Analysis of Urine and Body Fluids (3)**
Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical laboratory science students. Offered: S.

**LAB M 421 Medical Microbiology (1/6, max. 6)**
Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease.
Limited to medical laboratory science students. Offered: S.

**LAB M 423 Clinical Chemistry (*) - (max. 24)**

**LAB M 424 Clinical Microbiology (*) - (max. 24)**
Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical laboratory science students. Offered: AWSp.

**LAB M 425 Clinical Hematology (*) - (max. 24)**
Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features.
Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical laboratory science students. Offered: AWSp.

LAB M 426 Clinical Immunohematology ([1-7]-, max. 7) Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical laboratory science students. Offered: A.

LAB M 427 Selected Studies in Laboratory Medicine (*-, max. 24) Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Limited to medical laboratory science students. Credit/no-credit only. Offered: AWSpS.

LAB M 430 Medical Laboratory Science: Intro Clinical Hematology (5) Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical laboratory science students. Prerequisite: either LAB M 201, or LAB M 301 and LAB M 302. Offered: W.

LAB M 431 Clinical Immunohematology Rotation (7-) Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Limited to medical laboratory science students. Offered: AWSp.

LAB M 433 Enrichment Rotation (-9) Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Limited to medical laboratory science students. Offered: AWSp.

LAB M 435 Molecular Diagnostics for Medical Laboratory Science (3) Provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores its use in the diagnosis of disease. Topics include: nucleic acid structure and function, genetics, DNA chemistry, nucleic acid isolation, amplification techniques, components of a molecular laboratory, and evaluation of controls to validate results obtained. Limited to medical laboratory science students. Offered: W.

LAB M 436 Molecular Diagnostics Clinical Rotation (2) Provides technical expertise, proficient clinical judgment, and a broad cognitive understanding of current molecular diagnostic practices equivalent to that expected of a career entry-level medical laboratory scientist. Prerequisite: LAB M 435; recommended: Be admitted to the MLS major and take all didactic lecture and lab courses required for the major, but specifically LAB M 435. Offered: AWSp.

LAB M 499 Undergraduate Research (*, max. 35) Specific project in clinical laboratory investigation. Offered: AWSpS.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no-credit only. Offered: AWSp.

LAB M 510 Laboratory Medicine Research Conference (1, max. 6) Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Offered: Sp, odd years.
LAB M 521 Advanced Laboratory Hematology (1, max. 6) Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.

LAB M 549 Global Laboratory Systems (1) Olusegun O. Soge, Lucy A. Perrone Provides an overview of the role of clinical and public health laboratories in a national public health system, both in US and globally. Covers the functional components of a laboratory system and the importance of quality laboratory information on public health policy making. Topics include disease diagnosis, surveillance, outbreak response, law and regulation and how laboratory information contributes to health policy development. Offered: jointly with G H 549; Sp.

LAB M 555 Critical Thinking and Research Design in Laboratory Medicine (2) Develops critical thinking skills. Offered: W.

LAB M 590 P-Research Projects in Laboratory Medicine (*) Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.

LAB M 600 Independent Study or Research (*)- Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 601 Internship (3-9, max. 9) Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*) , max. 30) Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Prerequisite: completion of Internal Medicine and Surgery Patient Care phase clerkships. Offered: AWSpS.

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4) Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Four weeks halftime). Prerequisite: completion of required clerkships. Offered: W.

LAB M 699 P-WWAMI Laboratory Medicine Special Electives ( , max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

LAB M 700 Master's Thesis ( -) Credit/no-credit only. Offered: AWSpS.

PATHOLOGY

PATH 498 Undergraduate Thesis ( , max. 35) Elective.

PATH 499 Undergraduate Research ( , max. 35) Elective.

PATH 501 Pathology Proseminars (1, max. 9) Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 502 Inflammation and Repair (2) Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Prerequisite: permission of instructor. Credit/no-credit only. Offered: even years.

PATH 507 Introduction to Pathology Research (2) Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.
PATH 510 Introduction to Pathology Methods (3)
Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 511 Topics in Experimental Pathology (1-2, max. 10) Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 512 Molecular Basis of Disease: Death and Repair (1.5) First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

PATH 513 Mechanisms of Neurodegeneration (1.5) Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

PATH 516 Molecular Basis of Human Genetic Disease (3) Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

PATH 517 The Biology and Pathology of Aging (3/4) Matt Kaeberlein Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

PATH 518 Emerging Topics in Cancer (2) Eleanor Y Chen, Rosana Risques, Shreeram Akilesh Science and translational advances in cancer and therapeutics, related to recent major technological progress in cancer research. Explores how knowledge of cancer genetics as well as new molecular discoveries are translated to clinical management and treatment options. Prerequisite: undergraduates by permission of instructor. ; recommended: introductory biology and/or genetics. Offered: W, odd years.

PATH 520 Experimental Pathology Seminar (1) Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only. Offered: AWSp.

PATH 521 Anatomy and Autopsy (1) Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Instructors: Fligner Offered: WSp.

PATH 535 Innate Immunity and Immunopathology (1.5) Ian N. Crispe, Kelly Smith Explores the relationship between the innate immune system and disease processes, using a student-led seminar format. Students analyze, present, and critique primary research literature, and use the knowledge gained to develop a sophisticated insight into the mechanisms of immunopathology. Offered: Sp.

PATH 540 Translational Research Topics (1) Horwitz First and second year students in the M.D./Ph.D. program present and discuss current papers form the biomedical literature in journal club format, and describe their own research in seminar format. Credit/no-credit only. Offered: AWSp.
PATH 544 General and Systemic Pathology ([2-3]-, max. 5) Bill Mahoney Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite: for nondental students: permission of instructor.

PATH 550 Mechanisms of Disease (3) Conrad-Liles, Rendi Examines the mechanisms of inflammation, cell injury, death, repair, immunity, and neoplasia as well as diseases of various organ systems. Systems covered include the cardiovascular, pulmonary, gastrointestinal, neurologic, endocrine, and genitourinary/renal systems. Topics presented through lecture, primary literature, and small-group discussion. Offered: A.

PATH 551 Experimental and Molecular Pathology (2-5, max. 20) Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: Pathology PhD student; permission of instructor Credit/no-credit only. Offered: AWSp.

PATH 555 Environmental Pathology (3) Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520. Instructors: Monnat Offered: Sp, even years.

PATH 558 Integrative Omics (1.5) Jessica E Young, Jennifer L. Davis Explores how to integrate genomic, transcriptomic, and proteomic approaches with state-of-the-art genetic engineering strategies to uncover a systems-level understanding of pathway interactions that regulate disease pathogenesis and complex phenotypes. Recommended: undergraduate biology or cellular and molecular biology. Offered: jointly with MOLMED 558; Sp.

PATH 560 Molecular Analysis of Human Disease (*, max. 10) Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Credit/no-credit only. Offered: AWSp.

PATH 580 Mitochondria and Metabolism in the Pathogenesis of Human Disease (1.5) Hawkins, Tian Explores the fundamentals of mitochondrial biology, bioenergetics, and cellular metabolism. Includes topical lectures and literature reviews introducing students to advanced metabolic concepts within the context of human disease. Offered: W, even years.

PATH 590 Patient-Centered Translational Research (1) Horwitz MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house office, preview the medical or surgical ward team environment, select a patient-focused translation research topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered: WSp.

PATH 600 Independent Study or Research (*) Prerequisite: Pathology PhD student. Credit/no-credit only. Offered: A.

PATH 667 P-Renal Pathology Laboratory (*, max. 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

PATH 675 P-Diagnostic Pathology Clerkship - Missoula (4, max. 24) Medical student participation in microscopic examination, laboratory specimen processing and on occasion aid surgeons, endoscopists or radiologists with immediate evaluation of specimens.

PATH 676 P-Diagnostic Pathology Clerkship - Spokane (*, max. 24) Medical student participation in dissection and study of autopsy and surgical pathology cases at Sacred Heart Medical Center in Spokane. Can be taken for either two or four weeks.
PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16) Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff, including dissection, microscopic examination, and literature review.

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24) Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner’s Office.

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24) Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing. Instructors: Swanson

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)

PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)

PATH 683 P-Forensic Pathology Clerkship - Medical Examiner's Office (*, max. 24)

PATH 686 P-Diagnostic Pathology Clerkship (4/8) Lisa K Koch Provides medical students an opportunity to improve on gross and microscopic diagnosis, and to experience what it is like to be a pathology resident at the University of Washington. Participants pair with a trainee and faculty mentors to serve as a source of information and guidance. Students attend resident didactics, tumor boards, daily signouts, discussion groups, and personalized slide sessions. Prerequisite: completion of the UW School of Medicine foundations and patient care phases. Offered: AWSpS.

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*, max. 24)

PATH 697 P-Pathology Special Electives (*, max. 24) By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington.

Prospective students obtain special assignment forms from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

PATH 700 Master's Thesis (*)

PATH 800 Doctoral Dissertation (*) Prerequisite: Pathology PhD student. Offered: AWSpS.

MEDICINE

MED 498 Undergraduate Thesis (*)

MED 499 Undergraduate Research (1-10, max. 25) Laboratory research within the Department of Medicine. Available to undergraduate students. Must be supervised directly by UW faculty within UW PI lab, no remote labs. Offered: AWSpS.

MED 503 Cardiac Ultrasound (1) Florence H Sheehan Instruction will be given in how to 1) acquire cardiac ultrasound images at three acoustic windows, 2) identify cardiac anatomy in standard views, and 3) recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator. Prerequisite: MED C standing or Undergraduate premedicine students with Senior status. Credit/no-credit only. Offered: AWSpS.

MED 505 P-Preceptorship in Medicine (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSpS.

MED 507 HIV in Latinos (1-4, max. 12) Students shadow an attending physician, and participate in
routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556. Credit/no-credit only.

MED 510 Health Issues of Sexual Minorities (1)
Introduction to the special healthcare issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.

MED 515 Medicine as Culture (1)
Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/no-credit only.

MED 522 Introduction to Human and Medical Genetics (2, max. 12) Fuki Marie Hisama Provides in-depth examination of current topics in human and medical genetics with an emphasis on clinical and molecular diagnosis of genetic conditions, approaches to therapy, research, and molecular genetic technology. Credit/no-credit only. Offered: AWSp.

MED 525 Introduction to Gerontology and Geriatric Medicine (1)
Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider. Credit/no-credit only.

MED 530 AIDS: A Multidisciplinary Approach (2)
Carey Farquhar Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/G H 562.

MED 531 P-Human Genetics (*) Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

MED 533 P-Clinical Endocrinology (2) Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students.

MED 534 Wilderness Medicine (1) Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypothermia, and hyperthermia, and toxin exposures. Offered: Sp.

MED 536 Introduction to Critical Care Medicine (1)
Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W.

MED 540 Preventing Healthcare Associated Infections (1) Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505.

MED 546 Clinical Applications of Gene Therapy (2)
Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.

MED 547 Quantitative Methods in Medical Genetics (2)
Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.
MED 549 Clinical Medical Genetics (1, max. 6) Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1) Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

MED 556 Visual Thinking and Medical Diagnosis (1) Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Credit/no-credit only. Offered: A.

MED 557 Hispanic Health and Healthcare Disparities (1) Acosta Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community. Credit/no-credit only.

MED 558 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with G H 505.

MED 559 P-Transfusion Machine (3) Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 560 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

ELECTIVE CLERKSHIPS

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks) Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 602 P-Primary Care - Seattle (8/12) Four-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Roosevelt Clinic following a panel of patients in medicine,
rheumatology, and virology clinics. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 604 P-Clinical Dermatology - Seattle (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 605 P-Clinical Endocrinology and Metabolism - Seattle (*, max. 12) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 606 P-Clinical Gastroenterology - Seattle (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work. Students are scheduled at one of three sites: UWMC, Harborview Medical Center, and Veterans' Administration hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 608 P-Clinical Infectious Diseases - Seattle (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8) Students see clinical nephrologists problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 610 P-Clinical Respiratory Disease (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 611 Advanced Inpatient Geriatrics (8) This is a unique intensive experience in geriatric and consultative medicine. The "Medicine G" service is a special inpatient service for elderly adults at a major trauma center with active geriatrics presence (outpatient, inpatient, and post-acute); the service provides consultative care with the goal of preventing and managing complications for elderly and often frail and/or medically complex patients. Prerequisite: Successful completion of the third-year medicine clerkship Offered: AWSpS.

MEDECK 612 P-Clinical HIV Care - Seattle (8) Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 613 Women's Primary Care (8) For students with strong interest in women's health care in the ambulatory setting. Educates students on the diagnosis, management, and treatment of medical and outpatient gynecological issues of adult women of all ages and life stages. Working alongside internal medicine trained women's health care specialists, students manage a panel of patients, working independently and taking on more responsibility when possible. Prerequisite: completion of Patient Care Phase Medicine Clerkship. Offered: AWSpS.

MEDECK 614 P-Oncology Subinternship (8) Students participate in the oncology service in the inpatient
oncology consult service at UWMC hospital, obtaining exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

MEDECK 615 P-Rheumatology - Seattle (8) Full-time inpatient-outpatient clerkship in rheumatology. Includes diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the UW Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

MEDECK 616 P-Advanced Dermatology Clinic - Seattle (8) Advanced clinical dermatology clerkship at various sites including HMC, UWMC, VA Seattle, and Children's Hospital. Students choose from four tracks within the rotation: dermatopathology, pediatric dermatology, dermatologic surgery, and advanced medical dermatology. (Four weeks) . Prerequisite: third-year required Medicine clerkship.; MEDECK 604. Offered: AWSps.

MEDECK 617 P-Harborview Evening Clinic - Seattle (2) A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students must apply to this program, and are expected to participate for the full academic year. Prerequisite: third-year required Medicine clerkship.

MEDECK 618 P-Medical Consultation - Seattle (8) Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2, max. 12) Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. (Two weeks) . Prerequisite: third-year required Medicine, OB/GYN, and Surgery clerkships. Offered: AWSps.

MEDECK 620 P-Critical Care Medicine Subinternship - Seattle (8) Participating students function at the sub-intern level on the MICU service at either Harborview Medical Center, UWMC, or VAMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

MEDECK 621 Advanced Outpatient Geriatrics (8) This is an advanced rotation in the care of older adults with an emphasis on age-related changes in physiology, pathophysiology, function, and quality of life. Students will prevent, diagnose and manage common geriatric syndromes; Identify available health and community services for older adults to address their care needs; and identify the complexity and uncertainty of many conditions and circumstances older adults experience. Prerequisite: Successful completion of the third year medicine clerkship Offered: AWSps.

MEDECK 622 P-Clinical Medical Genetics (8) Students see outpatients and attend a variety of outpatient clinics including subspecialty clinics in cancer genetics, connective tissue genetics, neurogenetics, Turner syndrome and dermatologic genetics, and pediatric general genetics clinics with an emphasis on dysmorphology, developmental delay, disorders of sexual differentiation, skeletal dysplasia, craniofacial anomalies, and neurogenetics. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSps.

MEDECK 623 P-Clinical Wound Management (*) Opportunity for medical student to be exposed to and learn wound care management in clinical setting. At end of rotation students should be able to diagnose cause of chronic ulcer or wound, outline the approach to the management of diabetic foot
ulcer, peripheral artery disease ulcer and VLU, and initiate treatments such as sharp debridement, VAC, dressing, and Unna Boot placement. (Two weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 624 Hospitalist Subinternship - Seattle, WA (8)** Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist.

**MEDECK 625 Cardiology Subinternship - Seattle, WA (8)** Students serve as intern on the cardiology service under the supervision of senior resident and cardiology attending physicians.

**MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship.

**MEDECK 627 P-Clinical Endocrinology and Metabolism - Tacoma (*, max. 12)** Clerkship in clinical endocrinology and metabolism. Combined inpatient and outpatient assignments at selected hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship.

**MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8)** Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 631 P-Ward Medicine Subinternship - Spokane (8)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 632 APC Inpatient and Outpatient Cardiology-Spokane (8)** This rotation provides opportunities in inpatient and outpatient settings. Students assume ownership of inpatients, rounding on patients, formulating treatment plans, and following them through their hospital course. Emphasis will be placed on physical examination, electrocardiogram interpretation, basics of echocardiographic imaging, and the management of patients with congestive heart failure, dysrhythmia, angina, and valvular heart disease. Prerequisite: Successful completion of required medicine clerkship. Offered: AWSpS.

**MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 634 P-Clinical Dermatology - Washington (8)** Participation in dermatology clinics and inpatient consultations. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 636 P-Clinical Gastroenterology - Washington (8)** Participation in consulting ward rounds, procedures, conferences, and selected clinics at Sacred Heart Hospital in Spokane. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

**MEDECK 637 Clinical Infectious Diseases - Yakima, WA (8)** Students participate in the clinic and consulting service at area hospitals. Includes patients with a range of community acquired and hospital acquired infectious diseases. Students participate in antibiotic stewardship discussions and infection control meetings.
MEDECK 638 Clinical Infectious Diseases - Spokane (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 639 P-Nephrology and Fluid Balance - Washington (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 640 Critical Care Medicine Subinternship - Washington (8) Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 641 Hospitalist Subinternship-WY (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist. Prerequisite: Medicine Required Clerkship Offered: AWSpS.

MEDECK 643 P-Clinical Cardiology and Electrocardiography - WY (8) The student will spend time in a consultative cardiology clinic. They will see new patients independently and present to the attending cardiologist on a daily basis. They will perform inpatient consultations and follow in patients. They will see ED patients in consultation. The student will spend time observing in the echocardiographic suite, the pacemaker clinic and the cardiac catheterization laboratory. Prerequisite: Successful completion of third year Medicine Clerkship Offered: AWSpS.

MEDECK 644 P-Clinical Dermatology - Wyoming (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 652 P-Infectious Disease Consults - Alaska (8) Intensive four week experience caring for patients with complex infectious diseases and immune compromise. Outpatient management of HIV-infected patients, execution of antimicrobial stewardship program, and exposure to treatment of a wide range of infectious disease pathology seen in Alaska. Prerequisite: Required internal medicine clerkship.

MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8) Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 654 P-Clinical Dermatology - Alaska (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks) . Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 657 Clinical Hematology/Oncology (8) Work with patients with benign and malignant hematology disorders and patients with various solid tumors, with an emphasis on those with GI malignancies, breast, lung, and head/neck cancers. Procedures performed include bone marrow biopsy and aspirate and lumbar puncture with intrathecal chemotherapy. Learn about the diagnostic workup, staging, and treatment of such cancers. Learn about therapies to treat hematologic diseases and solid tumors. Prerequisite: Successful completion of third year required medicine clerkship Offered: AWSpS.

MEDECK 658 P-Clinical Infectious Diseases Alaksa (8) Students participate in clinic and in the consulting service throughout the hospital, attend ICU, antimicrobial stewardship rounds, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four
weeks). Prerequisite: third-year required Medicine clerkship; fourth-year standing. Offered: AWSpS.

MEDECK 660 P-Critical Care - Alaska (8) Advanced patient care clerkship on the MICU service at Alaska Native Medical Center. Through direct patient care responsibilities, students learn about critical care illness and gain experience in application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 661 P-Ward Medicine Subinternship - Billings, MT (8) Students act in the capacity of interns on the medical wards under supervision of the house staff and visiting physicians. They attend all regular medicine rounds and conference as their schedules permit. Prerequisite: Third year required Medicine clerkship.

MEDECK 662 Outpatient Medicine - Montana (8) Advanced ambulatory medicine elective at the Bozeman Health Internal Medicine Clinic. Students spend the most time in the Bozeman Health Internal Med Clinic, a primary care clinic serving a series of complex patients in the outpatient setting. Students see 3-4 patients a half day with a high level of autonomy. Time is also spent in medicine specialty clinics, as developed or desired. Prerequisite: successful completion of Patient Care Phase. Offered: AWSpS.

MEDECK 664 P-Clinical Dermatology - Montana (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 665 P-Clinical Endocrinology - Bozeman (8) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals in Bozeman, MT. Prerequisite: Third-year required Medicine Clerkship Offered: AWSpS.

MEDECK 667 Hospitalist Medicine Subinternship - MT (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist. Prerequisite: Successful completion of required medicine clerkship. Offered: AWSpS.

MEDECK 668 Critical Care Medicine, Great Falls, MT (8) Students evaluate and manage critically ill patients in a mixed medical, surgical, cardiothoracic and neuro ICU. Students act as the primary provider and work closely with the intensivist and interprofessional team. Students will encounter a patient with septic shock on vasopressors, a patient with respiratory failure on mechanical ventilation, a post-cardiothoracic surgery patient, and a patient with a primary neurological insult. Prerequisite: Successful completion of the third year medicine clerkship Offered: AWSpS.

MEDECK 669 P-Nephrology and Fluid Balance - Montana (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Credit/no-credit only. Offered: AWSpS.

MEDECK 670 P-Clinical Medicine Critical Care - Idaho Falls (8) Inpatient critical care rotation in community hospital setting at Eastern Idaho Regional Medical Center in Idaho Falls. Assist in diagnosis and management of common ICU problems and major trauma resuscitation under supervision of critical care physicians. Exposure to common ICU problems, which may include sepsis, respiratory failure, hypotension, organ failure, and gastrointestinal hemorrhage. Students work as multidisciplinary team. (Four weeks) Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 671 P-Ward Medicine Subinternship - Idaho (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 672 P-Clinical Endocrinology and Metabolism - Idaho Falls, ID (8) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: medicine required clerkship. Offered: AWSpS.
MEDECK 673 P-Clinical Cardiology and Electrocardiography - Idaho (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 674 P-Clinical Dermatology - Idaho (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 675 P-Clinical Allergy and Immunology - Boise, ID (8) Clinical experience seeing a combination of new and recheck patients with allergy, asthma and immunology disorders for example but not limited to, seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, and food allergy. Prerequisite: Medicine Clerkship and 4th year standing.

MEDECK 676 P-Critical Gastroenterology - Boise, ID (8) Clerkship in clinical gastroenterology in Boise, ID. Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work.

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 681 P-Clinical Aspects of Aging - Idaho (8) Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 682 P-Critical Care Subinternship - Idaho (8) Students function at the sub-intern level on the MICU service. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 683 P-Outpatient Clinical Cardiology Virginia Mason (8) Four-week clerkship in clinical outpatient cardiology at Virginia Mason Heart Institute. Covers ECG interpretation, stress testing, coronary angiography, stenting EP procedures, and echo cardiography. Prerequisite: third-year required Internal Medicine clerkship. Offered: AWSpS.

MEDECK 684 Subinternship in Hospital Medicine and Hematology/Oncology - Seattle, WA (8) Intensive experience in hospital medicine in which the student acts as an intern for the Medicine O service.

MEDECK 686 P-Advanced Clinical Dermatology Clinic - Idaho (8) Advanced clinical dermatology clerkship. (Four weeks). Prerequisite: third-year required Medicine clerkship; either MEDECK 604, MEDECK 634, MEDECK 644, MEDECK 664, or MEDECK 674. Offered: AWSpS.
MEDECK 687 Advanced Outpatient Clerkship - Idaho (8) The advanced outpatient clerkship at the Boise Veterans Medical Center (VAMC) is designed for medical students with an interest in solidifying ambulatory clinical knowledge and skills, with a unique focus on learning new models of primary care delivery. This four-week, full-time clinical experience based in a primary care teaching clinic at the Boise VAMC will focus on inter-professional collaboration and the patient centered medical home model. Prerequisite: successful completion of the medicine clerkship. Offered: AWSpS.

MEDECK 690 P-General Internal Medicine - Shiprock (8) Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 697 P-Medicine Special Electives - Away (*, max. 24) Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. (Two, four, six, or twelve weeks). Prerequisite: permission of department.

MEDECK 701 P-Occupational and Environmental Medicine (8) Overview of Occupation and Environmental Medicine subspecialty. Introduction to Washington Worker's Compensation system and diagnosis and treatment of occupational injuries and illness. Students complete special projects in OEM aligning with student interest, participate in worksite visits, and attend conferences.

MEDECK 704 P-Intro to Clinical Dermatology (2 Wks) (4) Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology resident under the supervision of dermatology faculty. (2-weeks) Offered: AWSpS.

MEDECK 711 P-Introduction to Community Internal Medicine Subspecialty Practice (4) Introduction to the outpatient Medicine specialty clinics of Endocrinology, Gastroenterology (GI), and Rheumatology in the Olympia medical community. Two weeks. Offered: Sp.

MEDECK 713 P-Intro to Clinical Nutrition (2 Wks) (4) Develop a basic approach to the assessment of nutritional status and management of nutrition across a variety of disease states. Mix of hands-on patient centered learning, interactive didactic based teaching sessions and independent learning. Exposure to inpatients and outpatients. Prerequisite: Completion of Foundation Curriculum. Offered: Sp.

MEDECK 714 Intro to Opioid Use Disorder (4) Intensive experience in the clinical care of patients with opioid use disorder in the inpatient and outpatient settings. Students will evaluate inpatients with opioid use disorder, providing treatment recommendations and linkage to outpatient services with appropriate supervision. Will work with patients in outpatient settings including primary care-based and opioid treatment programs. Students will complete training for buprenorphine waiver.
Prerequisite: successful completion of medicine clerkship. Offered: AWSpS.

**MEDECK 724 P-Interprofessional Hospital Medicine (4)** Introduction to inpatient internal medicine focusing on interprofessional hospital services. Students work as a member of Hospitalist service, managing 1-2 patients, under direction of an attending physician with afternoons dedicated to rounding with other interprofessional services. (Twelve weeks, full-time.) Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundations curriculum. Offered: AWSpS.

**MEDECK 744 P-Intro to Clinical Dermatology (2 Wks) - Sheridan, WY (4)** Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology clinic while paired with a PA and attending dermatologist. Prerequisite: Completion of Foundation Curriculum. Offered: AWSpS.

**MEDECK 764 Clinical Dermatology-Bozeman, MT (4-8, max. 8)** Students will provide surgical assist for cancer procedures, and will have a variety of general-dermatologic clinic exposures and patient care. Shared time between surgical and general dermatology. Prerequisite: successful completion of medicine clerkship. Offered: AWSpS.

**MEDECK 774 P-Intro to Clinical Dermatology (2 Wks) - Boise, ID (4)** Clinical rotation designed to help students develop a basic approach to the diagnosis and management of common skin conditions. They will see patients in dermatology clinic at Gem State, Boise, Idaho. Offered: Sp.

**REQUIRED CLERKSHIPS**

**MEDRCK 601 P-Clinical Clerkship (*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a six-week outpatient experience emphasizing continuity of care. Inpatient daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

**MEDRCK 610 P-Clinical Clerkship Seattle-Shelton, WA (24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

**MEDRCK 612 P-Clinical Clerkship - Seattle-Madigan (*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

**MEDRCK 614 P-Clinical Clerkship - Seattle-Montesano (*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

**MEDRCK 615 Clinical Clerkship Seattle-Longview (1-24, max. 25)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a six-week outpatient experience emphasizing continuity of care. Inpatient daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite:
Successful completion of foundation years curriculum. Offered: AWSpS.

MEDRCK 616 P-Clinical Clerkship Seattle-Olympia (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 617 P-Clinical Clerkship Seattle-Port Townsend (*, max. 24) Paauw Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 618 P-LIC Clinical Clerkship (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (38-44 week integrated clerkship, full-time). Offered: AWSpS.

MEDRCK 621 P-Clinical Clerkship - Spokane (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Some students can schedule outpatient time in Pullman, WA. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 623 Clinical Clerkship Seattle-Spokane (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: successful completion of foundation years curriculum. Offered: AWSpS.

MEDRCK 624 P-Clinical Clerkship - Seattle-Wenatchee (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 625 Clinical Clerkship Seattle - Moses Lake, WA (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time).

MEDRCK 630 P-Write Medicine Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (18-22 week integrated clerkship, full-time.)

MEDRCK 632 P-Clinical Clerkship - Seattle-Jackson (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.
MEDRCK 633 P-Clinical Clerkship Seattle- Gillette (1-24, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time). Offered: AWSpS.

MEDRCK 634 P-Clinical Clerkship - Seattle-Sheridan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.

MEDRCK 635 Clinical Clerkship-Seattle-Casper-Cody (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

MEDRCK 636 P-Clinical Clerkship - Seattle-Douglas (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.

MEDRCK 638 P-Clinical Clerkship - Seattle-Lander (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.

MEDRCK 639 P-Clinical Clerkship - Anchorage (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.
resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 674 P-Clinical Clerkship - Seattle-Dillon (*)
(3rd year) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 675 P-Clinical Clerkship Boise-Billings (1-
24, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 676 P-Clinical Clerkship - Seattle-Missoula
(*) (3rd year) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 678 P-Clinical Clerkship - Seattle-Bozeman
(*) (3rd year) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 691 P-Clinical Clerkship - Boise (*)
(3rd year) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 693 Clinical Clerkship Seattle-Twin Falls
(24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

MEDRCK 697 Clinical Clerkship Boise-Twin Falls (1-
24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

**MICROBIOLOGY**

MICROM 101 Microbes and Society (5) NW
Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts.

MICROM 301 General Microbiology (3) NW D.
*Anderson, R. Bumgarner* Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: ASpS.
MICROM 302 General Microbiology Laboratory (2) NW Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Offered: ASpS.

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200. Offered: ASp.

MICROM 410 Fundamentals of General Microbiology I (3) NW Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Instructors: Parsek, Traxler Offered: A.

MICROM 411 Bacterial Genetics (4) NW Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

MICROM 412 Prokaryotic Diversity (3) NW Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200. Instructors: Greenberg, Leigh Offered: Sp.

MICROM 413 Special Topics in Microbiology (1, max. 3) Examines current subjects in microbiology. Credit/no-credit only.

MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

MICROM 435 Microbial Ecology (3) NW Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180. Instructors: Stahl

MICROM 442 Medical Bacteriology (3) NW Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200. Instructors: Cookson Offered: W.

MICROM 443 Medical Bacteriology Laboratory (3) NW Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200. Offered: AW.

MICROM 445 Medical Virology (3) NW Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp. Instructors: Lagunoff, Smith

MICROM 450 Molecular Biology of Viruses (3) NW Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200. Instructors: Champoux Offered: W.

MICROM 460 Medical Mycology and Parasitology (3) D. ANDERSON, M. CHANDLER, C. FISHER, S. MURPHY Examines medically important fungi and parasites in terms of the symptoms, diagnosis, epidemiology, and therapy of the diseases they
cause as well as their mechanisms of pathogenesis.
The laboratory course MICROM 461 complements this lecture course but is not required. Prerequisite: BIOL 200 or MICROM 301 Offered: Sp.

MICROM 461 Medical Mycology and Parasitology Laboratory (2) D. ANDERSON, M. CHANDLER Hands-on practice to identify medically important fungi and parasites, using live, preserved, and stained samples. Demonstrations along with limited procedures are used to illustrate important features used to distinguish organisms. Prerequisite: Prerequisite: MICROM 460, which may be taken concurrently. Offered: Sp.

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10) Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Prerequisite: MICROM 402; MICROM 410. Credit/no-credit only. Offered: AWSpS.

MICROM 495 Honors Undergraduate Research (*-) Leigh Specific problems in microbiology or immunology. Offered: AWSpS.

MICROM 496 Undergraduate Library Research (2) An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

MICROM 499 Undergraduate Laboratory Research (*-, max. 35) Leigh Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.

MICROM 500 Introduction to Research (*, max. 20) Introduction to research areas of the faculty and the techniques employed in their investigations. Prerequisite: graduate standing in microbiology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 522 Current Research in Microbiology (1, max. 30) Weekly student and faculty seminar presentations based on the current literature. Prerequisite: graduate standing in microbiology. Instructors: Harwood, Merrikh, Parsek Credit/no-credit only. Offered: AWSp.

MICROM 526 Research of Cell Surface Problems (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Prerequisite: permission of instructor. Instructors: Traxler Credit/no-credit only.

MICROM 529 Mechanisms of Bacterial Pathogenesis (1, max. 30) Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Prerequisite: graduate standing in microbiology. Instructors: Fang Credit/no-credit only. Offered: AWSp.

MICROM 532 Methanogenesis Research Meeting (1, max. 30) Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Prerequisite: MICROM 410, permission of instructor. Instructors: Leigh Credit/no-credit only. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Prerequisite: permission of instructor. Instructors: Lagunoff Credit/no-credit only. Offered: AWSpS.

MICROM 534 Research Seminar in Salmonella Pathogenesis (1, max. 30) Fang Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.

MICROM 540 Virology (3) J. Hyde, M. Lagunoff, J. Smith The molecular biology, transmission, and pathogenesis of human viruses will be explored. In addition to general principles of virology, lectures and paper discussions will focus on specific human pathogens including HIV, herpesviruses, ebolaviruses, alphaviruses, and adenoviruses, among others. Recommended: one year of undergraduate
cellular and molecular biology Offered: A, even years.

MICROM 553 Molecular Interactions of Bacteria with their Hosts (3) The processes bacteria employ to shape interactions with their hosts will be explored in molecular detail through selected examples in the literature. Prerequisite: One year of undergraduate cellular and molecular biology. Recommended: An introductory course in microbiology is recommended. Offered: A, odd years.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Prerequisite: permission of instructor. Instructors: Cookson Credit/no-credit only. Offered: AWSp.

MICROM 555 Advanced Clinical Microbiology (2.5) Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Prerequisite: MICROM 443 and permission of instructor. Instructors: Butler-Wu, Fang Credit/no-credit only. Offered: AWSp.

MICROM 560 Research and Journal Club in Retrovirology (1, max. 30) Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Instructors: Linial Offered: AWSpS.

MICROM 562 Oncogene and Retrovirus Research Seminar (1, max. 30) Weekly discussions of ongoing research related to retroviral replication, retroviral oncogenes and pathology. Prerequisite: graduate standing or permission of instructor. Instructors: Linial, Overbaugh Offered: AWSpS.

MICROM 585 Research in Cell and Molecular Biology (1, max. 30) Weekly research seminar. Prerequisite: permission of instructor. Instructors: Champoux Credit/no-credit only. Offered: AWSpS.

MICROM 588 Research in Applied Microbiology (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with CHEM E 588; AWSpS.

MICROM 599 Research Presentations (2) Current research review. Credit/no-credit only.

MICROM 600 Independent Study or Research (*) Credit/no-credit only. Offered: AWSpS.

MICROM 650 Microbiology Clerkship in Scientific Teaching ([1-6]-, max. 15) The pedagogical requirement addressed by this course is direct experience in teaching undergraduate microbiology classes under the direct oversight and mentorship of regular course instructors. By the end of this course, the graduate student will have developed skills, abilities and insights as a science educator and communicator through the sustained support and guidance of the instructor of record. Prerequisite: PhD student standing. Offered: AWSp.

MICROM 700 Master's Thesis (*) Credit/no-credit only.

MICROM 800 Doctoral Dissertation (*) Credit/no-credit only. Offered: AWSpS.

NEUROLOGICAL SURGERY

NEUR S 498 Undergraduate Thesis (*, max. 35) D’Ambrosio, Ellenbogen, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez Offered: AWSpS.

NEUR S 499 Undergraduate Research (*, max. 35) Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Instructors: D’Ambrosio, Ellenbogen, Ferreira, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez, Rostomily, Silber Offered: AWSpS.

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1, max. 12) Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Instructors: Chestnut, Ellenbogen,
NEUR S 655 P—Clinical Neurosurgery Clerkship—Spokane WA (1–8, max. 8) Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students. Offered: AWSpS.

NEUR S 665 P—Clinical Neurosurgery Clerkship (8) Ellenbogen, Lee Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students.

NEUR S 680 P—Neurological Surgery Clerkship (*, max. 8) Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. (Four weeks). Prerequisite: HUBIO 563. Instructors: Ellenbogen, Lee Offered: AWSpS.

NEUR S 697 P—Neurological Surgery Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Ellenbogen Offered: AWSpS.

NEUR S 699 P—WWAMI Neurological Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Instructors: Ellenbogen

NEUROLOGY

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Fraser, Clemmons Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*, max. 25) Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

NEURL 505 P—Preceptorship in Neurology (1, max. 12) Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Instructors: Kraus Offered: Sp.

NEURL 536 Topics in Clinical Neurology (1) Spain Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Credit/no-credit only. Offered: S.

NEURL 555 Frontiers in Neuroimmunology (1) Current concepts and developments in neuroimmunology. Prerequisite: either NBIO 301 or IMMUN 441. Instructors: Moeller Credit/no-credit only. Offered: AWSpS.

NEURL 559 Neurobiology of Disease (3) Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURO 559/P BIO 559.

NEURL 598 P—Neurology Independent Study and Radiation (1–8, max. 8) Designed for medical students required to complete additional study related to the required Neurology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.
NEURL 600 P-Independent Study or Research (*)
Prerequisite: Instructor permission.

NEURL 631 P- Introduction to Neurology - Cheyenne (8)
Provides the medical student with a general understanding of basic clinical neurology, at Cheyenne Regional Medical Center Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 632 P-Introduction to Neurology - Casper, WY (8)
Provides the medical student with a general understanding of basic clinical neurology in Casper, WY. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.

NEURL 633 P-Introduction to Neurology - Anchorage - Alaska Neurology Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.

NEURL 634 P-Introduction to Neurology - Anchorage - ANMC (8)
Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 636 P-Introduction to Neurology-Kalispell (8)
Provides the medical student with a general understanding of basic clinical neurology, at kalispell Regional Medical Center. For third- or fourth-year students. Prerequisite: Medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 637 P-Introduction to Neurology-Missoula (8)
Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 638 P-Introduction to Neurology - Great Falls (8)
Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 639 P-Introduction to Neurology - Billings Regional Neuroscience Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 640 P-Introduction to Neurology - Billings Clinic (8)
Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 641 P-Introduction to Neurology- Bozeman (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Joshua Knappenberger in Bozeman, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 642 P-Introduction to Neurology- St. Lukes Boise (8)
Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.

NEURL 643 P-Introduction to Neurology - Dr. Lyons, Boise (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 644 P-Introduction to Neurology - Idaho Falls EINA (8)
Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 645 P-Introduction to Neurology - Idaho Falls Neurology (8)
Provides the medical student with a general understanding of basic clinical
neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 647 P-Introduction to Neurology - Boise St. Alphonsus (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 648 P-Introduction to Neurology - Coeur D’ Alene (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d’ Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 649 P-Introduction to Neurology - Tacoma St. Joseph (8)** Provides the medical student with a general understanding of basic clinical neurology in Tacoma, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

**NEURL 650 P-Introduction to Neurology - Lacey, WA (8)** Provides the medical student with a general understanding of basic clinical neurology in Lacey, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

**NEURL 651 P-Introduction to Neurology - Kirckland, WA (8)** Provides the medical student with a general understanding of basic clinical neurology in Kirkland, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

**NEURL 652 P-Introduction to Neurology - Spokane Rockwood Clinic (8)** Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

**NEURL 653 P-Introduction to Neurology - Spokane CMA, WA (8)** Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics.

**NEURL 654 P-Introduction to Neurology - Selkirk (8)** Provides the medical student with a general understanding of basic clinical neurology at Selkirk Neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

**NEURL 655 P-Introduction to Neurology - Spokane (8)** Provides the medical student with a general understanding of basic clinical neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

**NEURL 656 P-Introduction to Neurology - Wenatchee (8)** Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 657 P-Introduction to Neurology - Yakima (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 658 P-Introduction to Neurology - Olympia Neurology (8)** Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewood (8)** Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 660 P-Introduction to Neurology - Madigan (8)** Provides the medical student with a general understanding of basic clinical neurology at Madigan...
Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 661 P-Introduction to Neurology - Tacoma/Puyallup Multicare (8)** Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 664 P-Introduction to Neurology - Burien (8)** Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 665 P-Introduction to Neurology- UWMC (8)** Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus Offered: AWSpS.

**NEURL 666 P-Introduction to Neurology - HMC (8)** Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 667 P-Introduction to Neurology - VA (8)** Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 668 P-Introduction to Neurology - Northwest Hospital (8)** Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 669 P-Introduction to Neurology - Virginia Mason (8)** Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 670 P-Introduction to Neurology - Minor and James (8)** Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 671 P-Introduction to Neurology - Swedish (8)** Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 673 P-Introduction to Neurology - Renton, Valley Medical Center (8)** Provides the medical student with a general understanding of basic clinical neurology in Renton, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics.

**NEURL 674 P-Introduction to Neurology - Bellingham (8)** Provides the medical student with a
general understanding of basic clinical neurology at Peace Health in Bellingham, Washington. Prerequisite: Completion of one required clerkship in medicine, family medicine, surgery or pediatrics. Offered: AWSpS.

**NEURL 675 P-Introduction to Neurology- Vancouver (8)** Provides the medical student with a general understanding of basic clinical neurology in Vancouver, Washington. For third- or fourth-year students. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

**NEURL 681 P-Seizure Clinic Clerkship (2.5)** Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Instructors: A. Wilensky Offered: AWSpS.

**NEURL 685 Epilepsy and Clinical Electroencephalography (4/8, max. 8) Miller** Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.

**NEURL 686 P-Clinical Neurology (8) Swanson** Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

**NEURL 687 Advanced Clerkship in Child Neurology (4, max. 8)** Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Instructors: Gospe Offered: AWSpS.

**NEURL 688 Elective Clerkship in Child Neurology (8)** Fundamentals of the neurological history and exam for children. As part of a team at Seattle Children’s Hospital, students have opportunity for both outpatient and inpatient experiences. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

**NEURL 697 Neurology Away Elective (*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean’s office at least one month prior to preregistration. Prerequisite: permission of department adviser. Offered: AWSpS.

**NEURL 699 WWAMI Neurology Special Assignment Elective (4/8, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of adviser. Offered: AWSpS.

**OBSTETRICS AND GYNECOLOGY**

**OB GYN 498 Undergraduate Thesis (*, max. 30)** By arrangement.

**OB GYN 499 Undergraduate Research (*, max. 30)**

**OB GYN 505 P-OB GYN Preceptorship (1, max. 12)** Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.

**OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Prager** A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

**OB GYN 551 Perinatal Care Elective (1)** Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSp.

**OB GYN 579 P-Obstetric and Gynecologic Investigation (*)** The investigation may cover any
one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

**OB GYN 598 P-OB/GYN Independent Study and Remediation (*, max. 8)** Designed for medical students required to complete additional study related to the required Obstetrics and Gynecology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSp.

**OB GYN 610 P-Introduction to Obstetrics and Gynecology - Twin Falls, ID (1-12, max. 12)** Provides experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. Offered: AWSpS.

**OB GYN 620 P - Introduction to Obstetrics and Gynecology- Meridian, ID (12)** This 6 week clerkship course is an introductory experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. The obstetrical conditions and gynecological problems commonly encountered by the physician provide the primary focus for this clerkship experience, but knowledge of serious, less common conditions, is also required.

**OB GYN 626 Maternal Fetal Medicine Elective - Missoula, MT (4)** Provides clinical training experiences and hands-on education within a Maternal Fetal Medicine (MFM) clinic serving non-urban areas throughout western Montana and eastern Idaho. Students integrate into the MFM service as a member of the team, participating in all aspects of the MFM practice, offering both inpatient and outpatient experiences. Rural outreach experiences may be available. Offered: AWSpS.

**OB GYN 627 Reproductive Endocrinology and Infertility Elective (8)** V. Mendiratta The rotation will provide the 4th year student clerk multidisciplinary exposure to the full spectrum of reproductive endocrinology and infertility in a variety of clinical settings including at comprehensive university-based IVF center, county hospital based clinic, cancer center and sub specialty clinic in pediatric and adolescent gynecology. Opportunity to participate on scheduled reproductive surgeries at URC, UWMC, HMC, and SMH. Prerequisite: All required patient care phase electives.

**OB GYN 628 P- Gynecology Elective (4)** This elective is designed to introduce 4th year medical students to first trimester abortion care and family planning through direct involvement under the supervision of family medicine and OBGYN providers. Please contact obgyn administrator for more information and permission to take this elective. Prerequisite: OBGYN required clerkship. Offered: AWSpS.

**OB GYN 629 P- Introduction to Obstetrics and Gynecology- Wasilla, AK (1-24, max. 25)** Clerkship equivalent to OB GYN 649 Fairbanks, AK Offered: AWSpS.

**OB GYN 630 P-WRITE Obstetrics and Gynecology Clinical Clerkship (6-12)** Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: Completion of Foundations Phase curriculum; acceptance to the WRITE program. Offered: AWSpS.

**OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12)** See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, full-time) . Prerequisite: HUBIO series, 3rd year medical students.

**OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12)** See OB GYN 665.

**OB GYN 633 P-Introduction to Obstetrics and Gynecology- Spokane Rockwood (1-24, max. 25)** Clerkship equivalent to OB GYN 665 offered in Spokane, WA. (Six weeks, full time) Offered: AWSpS.

**OB GYN 634 P- Introduction to Obstetrics and Gynecology- Olympia LIC (1-12)** Clerkship equivalent of OB GYN 665, but held in Olympia, WA Offered: AWSpS.

**OB GYN 635 P-Introduction to Obstetrics and Gynecology - Great Falls, MT (1-12)** Clerkship equivalent to OBGYN 665, but offered in Great Falls, MT. Offered: AWSpS.
OB GYN 636 P- Introduction to Obstetrics and Gynecology Clerkship - Butte, MT (1-12) Clerkship equivalent to OBGYN 650 on Kalispell, MT.

OB GYN 637 P- Introduction of Obstetrics and Gynecology - Hamilton, MT (1-12) Clerkship equivalent to OB GYN 665 offered in Hamilton, MT. Offered: AWSpS.

OB GYN 638 P-Gynecology Planned Parenthood-Spokane, WA (4) Clinical elective in family planning at Planned Parenthood in Spokane, WA. Exposure to contraceptive and options counseling. Experience in evaluating patients for sexually transmitted infections and appropriate therapies. May participate in first trimester ultrasound, medical and surgical abortions. Prerequisite: Basic OB GYN clerkship experience, but knowledge of serious, less common conditions, is also required. Offered: AWSpS.

OB GYN 639 P-Introduction to Obstetrics and Gynecology, St. Alphonsus (*, max. 12) See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time) . Prerequisite: HUBIO series, 3rd year medical students.

OB GYN 640 P- Introduction to Obstetrics and Gynecology- Pullman/Moscow (12) Clerkship equivalent to OB GYN 668 Spokane, WA Offered: AWSpS.

OB GYN 641 P- Introduction to Obstetrics and Gynecology- Nampa, ID (1-24, max. 25) This 6 week clerkship course is an introductory experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. The obstetrical conditions and gynecological problems commonly encountered by the physician provide the primary focus for this clerkship experience, but knowledge of serious, less common conditions, is also required. Offered: AWSpS.

OB GYN 642 P- Gynecology Elective (4) 4th year medical student OBGYN elective in Cody, WY. Students will be rotating in private physician office. Student’s weeks will consist of a combination of clinic and doing surgeries. They will be learning how to care for women of all ages from young women - through menopause - into geriatric. Please contact OBGYN clerkship administrator for permission to take this course. Prerequisite: OBGYN required clerkship. Offered: AWSpS.

OB GYN 643 P-Introduction to Obstetrics and Gynecology- Powell WY (*, max. 12) See OB GYN 665. Offered in Powell, WY. (6 weeks, full time.)

OB GYN 644 P-Introduction to Obstetrics and Gynecology - Gillette, WY (12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 645 P-Introduction to Obstetrics and Gynecology - Sheridan, WY (1-24, max. 25) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 646 Introduction to Obstetrics and Gynecology - Rock Springs, WY (12) Clerkship equivalent to OB GYN 665 offered in Rock Springs, WY. (Six weeks, full-time).

OB GYN 647 Introduction to Obstetrics and Gynecology - Nampa, ID (*, max. 12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Offered in Nampa, ID. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565. Offered: AWSpS.

OB GYN 648 P- Introduction to Obstetrics and Gynecology- Pocatelo, ID (12) Clerkship equivalent to OBGYN 665 but offered in Pocatelo, ID. Offered: AWSpS.

OB GYN 649 P-Introduction to Obstetrics and Gynecology- Fairbanks,TVC (1-12) Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Offered: AWSpS.

OB GYN 650 P-Introduction to Obstetrics and Gynecology - Kalispell, MT (1-24, max. 25) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.
OB GYN 651 P-Introduction to Obstetrics and Gynecology - Helena, MT (1-24, max. 25) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 653 Introduction to Obstetrics and Gynecology - Ellensburg, WA (1-24, max. 25) Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full-time). Prerequisite: HUBIO series; 3rd Year medical students.

OB GYN 654 Introduction to Obstetrics and Gynecology - Moses Lake, WA (12) Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full time).

OB GYN 656 P-Introduction to Obstetrics and Gynecology - Wasilla (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wasilla, AK. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 657 P-Introduction to Obstetrics and Gynecology - Lander (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Lander, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 659 P-Introduction to Obstetrics and Gynecology - Cody (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cody, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 660 P-Introduction to Obstetrics and Gynecology - Billings, St. Vincent (*, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private physicians' offices. Prerequisite: third-year medical student after completion of HUBIO series.

OB GYN 663 P-Introduction to Obstetrics and Gynecology - Wenatchee (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wenatchee, WA. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 664 P-Introduction to Obstetrics and Gynecology - GH Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma, WA. Includes experience in several private physicians' offices. (six weeks, full time) Prerequisite: HUBIO series; third-year medical student status.

OB GYN 665 P-Introduction to Obstetrics and Gynecology - Seattle WA (*, max. 25) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Prerequisite: HUBIO 565. Offered: AWSpS.

OB GYN 667 P-Introduction to Obstetrics and Gynecology - Madigan (*, max. 12) Clerkship equivalent to OB GYN 665 offered at Madigan Army Medical Center, Tacoma. (Six weeks. Limit: three students). Prerequisite: HUBIO 565.

OB GYN 668 P-Introduction to Obstetrics and Gynecology - Spokane (1-24, max. 25) Clerkship
OB GYN 669 P-Introduction to Obstetrics and Gynecology - Swedish (1-24, max. 25) Clerkship equivalent to OB GYN 665 offered at Swedish Hospital Medical Center. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 671 P-Introduction to Obstetrics and Gynecology - Anchorage (1-24, max. 25) Clerkship equivalent to OB GYN 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians’ offices as well as Providence Hospital. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.

OB GYN 676 P-Introduction to Obstetrics and Gynecology - Missoula (12) Clerkship equivalent to OB GYN 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 677 P-Introduction to Obstetrics and Gynecology - Rock Springs (12) Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.

OB GYN 678 P-Introduction to Obstetrics and Gynecology - Billings (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians’ offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 679 P-Introduction to Obstetrics and Gynecology - Cheyenne (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cheyenne, WY. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 681 P-Gynecological Oncology Subspecialty (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Limit: two students each four weeks). Prerequisite: basic OB GYN clerkship.

OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks).

OB GYN 683 P-Gynecological Oncology Subspecialty - Boise, ID (4/8, max. 8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Two- and four-week options). Prerequisite: basic OB GYN clerkship. Offered: AWSpS.

OB GYN 685 P-Subspecialty Gynecology - UWMC (8) Specialty areas in gynecology including urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Patients in both outpatient and inpatient setting, follow patients to operating room and fully participate in their hospital care. Consult on inpatients and emergency room visits. Exposes
interested students to the breadth and depth of benign gynecologic subspecialty areas. (Limit: one student/four weeks.)

**OB GYN 686 P-Introduction to Obstetrics and Gynecology - Yakima (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in Yakima (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 687 P-Introduction to Obstetrics and Gynecology - Fairbanks (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 689 P-Introduction to Obstetrics and Gynecology - Havre (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in Havre, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 690 P-Introduction to Obstetrics and Gynecology - Sandpoint (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in Sandpoint, ID. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 691 P-Introduction to Obstetrics and Gynecology - Tacoma (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in Tacoma. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 692 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Bozeman OB/GYN (*) , max. 12** Clerkship equivalent to OB GYN 665 offered Bozeman, MT. Includes experience in several private physician offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

**OB GYN 693 P-Introduction to Obstetrics and Gynecology - Valley Medical Center (*) , max. 12** Clerkship equivalent to OB GYN 665 offered at Valley Medical Center. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.

**OB GYN 695 P-Introduction to Obstetrics and Gynecology - Tri Cities (*) , max. 12** Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.

**OB GYN 697 P-Obstetrics and Gynecology Special Electives (*) , max. 24** By arrangement, for qualified students, special clerkship or research opportunities are sometimes made available at other institutions. Prospective students obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.

**OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*) , max. 24** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located inside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

**OPHTHALMOLOGY**

**OPHTH 498 Undergraduate Thesis (*) , max. 25** Francis Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.

**OPHTH 499 Undergraduate Research (*) , max. 25** Francis Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

**OPHTH 501 P-Ophthalmology Preceptorship (1, max. 12)** Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Instructors: Francis Offered: AWSpS.

**OPHTH 600 Independent Study or Research (*)** Prerequisite: Permission of instructor.
OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8, max. 12) Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4) Students examine and observe treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of an ophthalmology clerkship. Offered: AWSpS.

OPHTH 686 P-Ophthalmology Clerkship - Kaiser Permanente (4) Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Kaiser Permanente ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 688 P-Ophthalmology Clerkship - Anchorage (4-8) Two or four week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus.

OPHTH 690 P-Ophthalmology Clerkship - Missoula (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 691 P-Ophthalmology Clerkship - Nampa (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 692 P - Ophthalmology Clerkship - Bozeman (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Offered: AWSpS.

OPHTH 695 P-Ophthalmology Advanced Clerkship - HMC (4) Students gain advanced experience in the diagnosis, evaluation, and treatment of inpatient and emergency department ophthalmology consults, including emergency surgeries. Prerequisite: completion of human biology series; prior ophthalmology clerkship. Offered: AWSpS.

OPHTH 697 P-Ophthalmology Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Francis Offered: AWSpS.

OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.
ORTHP 498 Undergraduate Thesis (*, max. 30) Eyre
Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

ORTHP 499 Undergraduate Research (*, max. 90) Eyre
Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

ORTHP 585 P-Sports Medicine (2) Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Instructors: O’Kane Offered: Sp.

ORTHP 643 P-General Orthopedic Clerkship - Cody, WY (8) Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students.

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Khoury Offered: AWSpS.

ORTHP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Shenton Offered: AWSpS.

ORTHP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Instructors: Scheffel

ORTHP 662 P-General Orthopaedic Surgery-Casper, WY (8) Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: Third or fourth year medical student.

ORTHP 668 P-Pediatric Orthopaedics - Spokane (*, max. 8) Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time) . Prerequisite: SURG 665 or HUBIO 553. Instructors: Caskey Offered: AWSpS.

ORTHP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8) Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Instructors: Scott Offered: AWSpS.

ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4) Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. (Two weeks, full-time) . Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 676 P-Pediatric Orthopaedics - Seattle Children’s (*, max. 8) Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and
opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Instructors: Burton, Dales, Jinguiji, Krengel, Lindberg, Mosca, Schmale, Steinman, White Offered: AWSpS.

ORTHLP 677 P-Musculoskeletal Trauma (*, max. 8) Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Instructors: Barei, Beingessner, Bellabarba, Bransford, Dunbar, Firoozabadi, Henley, Klewen, Nork, Taitssman Offered: AWSpS.

ORTHLP 678 P-Musculoskeletal Oncology (8/12) In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Instructors: Conrad, Davidson Offered: AWSpS.

ORTHLP 680 P-General Orthopaedic Clerkship - VAMC (*, max. 8) Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Instructors: Chansky Offered: AWSpS.

ORTHLP 681 P- Sports Medicine Orthopaedic Clerkship (8) Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Instructors: Green, Larson, O'Kane, Twaddle Offered: AWSpS.

ORTHLP 682 P-Outpatient Orthopaedics (8) Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Instructors: Conrad, Davidson, Manner, Matsen, Wagner, Warme Offered: AWSpS.

ORTHLP 684 P-Disorders of the Spine (8) Evaluation and assessment strategies of spinal disorders for patients of all ages and wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Outpatient, surgical, and conference-based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management. Offered: AWSpS.

ORTHLP 685 P-Adult Reconstruction: Total Joint Service (8) Manner Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscope. Offered: AWSpS.

ORTHLP 686 Orthopaedics: Lower Extremity/Foot and Ankle - Boise, ID (1-8, max. 8) Gregory A Schmale Orthopaedic clinical clerkship in Boise, ID. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care focused on the treatment and rehabilitation of foot and ankle injuries. Students work primarily in one subspecialty area (foot and ankle) and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

ORTHLP 687 P-Shoulder and Elbow (8) Matsen, Warme Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service,
which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery.

Offered: AWSpS.

ORTH 688 P-Sports Medicine- Spokane, WA (8)
Orthopedic clinical clerkship in sports medicine. Students participate in care of patients with sports-related injuries. Emphasis on physical examination and determining appropriate operative interventions and rehabilitation. Offered: AWSpS.

ORTH 697 P-Orthopaedic External Elective (*, max. 24)
Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

ORTH 699 P-WWAMI Orthopedics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

tolaryngology — head and neck surgery

OTOHN 498 Undergraduate Thesis (*, max. 35)
Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*, max. 35)
Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 501 P-Preceptorship in Otolaryngology - Head and Neck Surgery (1, max. 12) One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.

OTOHN 600 Independent Study or Research (1-3, max. 24) Independent study or research in otolaryngology conducted under the direction of one or more instructors. Prerequisite: permission of department and sponsoring faculty member. Offered: AWSpS.

OTOHN 670 Otolaryngology - Head and Neck Surgery - Subinternship (*, max. 16) Provides medical students exposure to an immersive educational experience in otolaryngology. Sub-interns function as members of the surgical team, participating in outpatient clinics, inpatient care, emergency procedures, and the operating room. Prerequisite: clinical rotations in General Surgery and Internal Medicine.

OTOHN 675 P-Otolaryngology Clerkship Bozeman, MT (4-8, max. 8) Surgical subspecialty of otolaryngology-head and neck surgery is structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: third or fourth year medical student; recommended: patient-care courses in internal medicine or surgery. Offered: AWSpS.

OTOHN 676 P-Otolaryngology Clerkship Jackson Hole WY (4-8, max. 8) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: completion of Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 677 P-Otolaryngology Clerkship Harborview (4, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: Completion of Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 679 P-Otolaryngology - Head and Neck Surgery Clerkship - Missoula (4/8, max. 24) M. Whipple Introduction to surgical subspecialty of
OTOHN 680 P-Otolaryngology - Head and Neck Surgery Clerkship - UWMC (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 681 APC-Otolaryngology Clerkship - Harborview (8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 682 P-Otolaryngology - Head and Neck Surgery Clerkship - VA (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 683 P-Otolaryngology - Head and Neck Surgery Clerkship - Madigan (4, max. 8)
Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. (Two or four weeks, full-time). Prerequisite: completion of human biology series. Instructors: (Madigan Army Medical Center) Offered: AWSpS.

OTOHN 684 P-Otolaryngology - Head and Neck Surgery Clerkship - Seattle Children’s (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 685 P-Otolaryngology - Head and Neck Surgery Clerkship - Boise (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 686 P-Otolaryngology - Head and Neck Surgery Clerkship - Greater Seattle Private Practice (4)
Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of course director. Offered: AWSpS.

OTOHN 687 P-Otolaryngology - Head and Neck Surgery Clerkship - Spokane (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 688 P-Otolaryngology - Head and Neck Surgery Clerkship - Anchorage (4/8, max. 24)
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 689 P-Otolaryngology - Head and Neck Surgery Clerkship - Laramie (4/8, max. 24)
P. Johnson Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: Human biology series. Offered: AWSpS.
OTOHN 697 P-Otolaryngology - Head and Neck Surgery - Away Externship (*, max. 8) By specific arrangement. Special clerkship, externship, or research opportunities are at times made available at institutions other than the University of Washington. Prospective students obtain a special assignment form from the dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Instructors: Fultran Offered: AWSpS.

OTOHN 699 P-Otolaryngology - Head and Neck Surgery Clerkship - WWAMI (4/8, max. 8) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

PEDIATRICS

PEDS 498 Undergraduate Thesis (*, max. 35) For medical students. Offered: AWSpS.

PEDS 499 Undergraduate Research (*, max. 35) Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

PEDS 505 P-Preceptorship in Pediatrics (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSpS.

PEDS 513 Scientific Investigation in Pediatric Medicine (1) Faculty Investigators in the Department of Pediatrics will lecture on the general biology of their research area and its relevance to understanding pediatric disease and developing therapies. Given the varied nature of research represented in the Department of Pediatrics, the course will be wide-ranging and include basic science and clinical/translational approaches. Each participating investigator will give one 1-hour presentation. Offered: AWSp.

PEDS 530 P-Homeless Youth and Their Medical Care (1) Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no-credit only. Offered: W.

PEDS 562 Ethical Issues in Pediatrics (3) Nancy S. Jecker, Douglas S. Diekema Provides a survey of contemporary ethical issues that arise in the clinical and research environment when children are involved, including the role of children and adolescents in decision-making, the limits of parental decision-making authority, and issues related to genetic testing, transplantation, research, and public health. Offered: jointly with B H 562; A.

PEDS 598 P-Pediatrics Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Pediatrics Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

PEDS 600 Independent Study or Research (*) Facilitates and promotes mentored independent study/scholarship related to the care of children. Students participate in projects that promote individual, self-directed and creative scholarly activity with appropriate supervision, oversight, and mentorship with an emphasis on the process of scholarship.

PEDS 609 Indian Healthcare Clerkship (8, max. 16) Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

PEDS 610 Traditional Indian Medicine (8, max. 24) Students experience how Western physicians collaborate with traditional Indian healers (and vice versa) to best care for American Indian and Alaska Native patients. Prerequisite: UCONJ 530; Indian Health Pathway declaration; and advanced
permission from Indian Health Pathway Program Manager. Offered: AWSpS.

PEDS 611 P-Country Doctor Free Teen Clinic (1, max. 2) Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: one student.) Offered: AWSpS.

PEDS 612 Pediatric Intensive Care - HMC (8) Elective in Pediatric Intensive Care at Harborview Medical Center. Open to Explore and Focus medical students who have completed their Core Pediatrics Rotation. Students will be expected to manage patients with the supervision of the Pediatric Critical Care attending or fellow. Students will have the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive care setting. Prerequisite: Explore and Focus standing, completion of Core Pediatrics Rotation. Offered: AWSpS.

PEDS 613 Pediatric Gastroenterology (8) Fourth-year medical students will see clinical pediatric gastrointestinal problems under close faculty supervision. They will participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. Prerequisite: Completion of Peds, IM and Surgery required clerkships Offered: AWSpS.

PEDS 620 Pediatric Sub-Specialty Clinics-Billings (4, max. 8) The student will choose 2 weeks of specialty clinics based on student interest and availability of faculty preceptors at the time of the rotation. Available clinics include: Pediatric Cardiology, Pulmonary, Gastroenterology and Neurology. The maximum time spent with one specialty is 2 weeks; the minimum is one week. Students will evaluate both patients seen in consultation and patients returning for ongoing care for existing problems. Prerequisite: completion of Pediatrics Clinical Clerkship. Offered: AWSp.

PEDS 623 Pediatrics Child Abuse - Spokane, WA (4, max. 8) Exposes future clinicians to the most common issues relating to child abuse and neglect. (Limit: one student) . Prerequisite: fourth-year medical students who have completed their core pediatrics rotation; permission of department. Offered: AWSpS.

PEDS 624 Pediatric Emergency Medicine - Spokane (8) Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; by departmental permission. Offered: AWSpS.

PEDS 625 Pediatric Emergency Medicine (8) Elective in Pediatric Emergency Department at Seattle Children’s Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: fourth- year medical students. Offered: AWSpS.

PEDS 628 P-Pediatric Allergy and Immunology - Missoula (*, max. 24) The clinic involves seeing patients with allergy asthma and immunology disorders, such as seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, food allergies and more. Focus on obtaining a detailed history, physical exam and formulating a personalized management plan for patients. Training and interpretation of major procedures - allergen skin, patch and pulmonary function testing. Prerequisite: PEDS core clerkship; departmental permission Offered: AWSpS.

PEDS 629 Neonatal Pediatrics - Missoula, MT (4, max. 24) Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Offered: AWSpS.

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665, impatient only; acceptance in the WRITE program.

PEDS 631 LIC Pediatrics Clinical Clerkship (12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.
PEDS 635 Pediatric Cardiology - Boise, ID (4/8, max. 24) Michael S. Womack Emphasis on physical examination skills. Application of fundamental anatomy and physiology to analyze a variety of cardiovascular situations, normal and abnormal, applicable to any medical field, including congenital heart disease. Independent reading and analysis of relevant anatomy and physiology for one-on-one discussion. Clinic and catheterization laboratory each week. (Two or four week rotation. Limit: one student). Prerequisite: permission of department. Offered: AWSpS.

PEDS 636 Pediatric Cardiology - Spokane (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 637 Pediatric Cardiology - Anchorage (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 638 Pediatric Cardiology - Missoula (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 640 Pediatric Gastroenterology - Boise (4, max. 24) Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. (Limit: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 642 Pediatric Clinical Clerkship - Sheridan, WY (12) Offers a comprehensive overview of the approach for providing care to children and their families. Explores the range of reasons children seek medical care, from well-child visits to acute medical problems. Students gain experience in inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 643 Pediatric General Clerkship - Spokane Kaiser (1-24, max. 25) The core pediatric clerkship is designed to provide a comprehensive overview of the approach to the care of children and their families. In addition, explores the range of reasons children seek medical care, from well child visits to acute medical problems in both inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 644 Pediatric General Clerkship - Wasilla, AK (1-24, max. 25) General introductory pediatric clerkship. Student will split time in hospital setting, outpatient department, clinic, or private office. Open to all third- and fourth year students. (Six weeks, full-time. Limit per rotation: one student). Offered: AWSpS.

PEDS 645 Pediatric General Clerkship - Kalispell (1-24, max. 25) General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third and fourth year student. Offered: AWSpS.

PEDS 647 Pediatric General Clerkship - Lewiston, ID (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time) Offered: AWSpS.

PEDS 648 Pediatric General Clerkship - Everett, WA (1-24, max. 25) General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third-and fourth year students. (Six weeks, full-time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
Peds 650 Pediatric General Clerkship - Moses Lake, WA (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 651 Pediatric General Clerkship - Bozeman, MT (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 652 Pediatric General Clerkship - Idaho Falls, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 653 Pediatric General Clerkship - Helena, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in Helena, MT.

Peds 655 Pediatric General Clerkship - Jackson, WY (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 656 Pediatric General Clerkship - Wenatchee (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 657 P-Pediatric General Clerkship - Missoula (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 658 Pediatric General Clerkship - Boise (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: Awp.

Peds 659 Pediatric General Clerkship - Billings, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Offered: Awp.

Peds 660 Pediatric General Clerkship - Cheyenne, WY (*, max. 24) Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 661 Pediatric General Clerkship - Anchorage (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AwpS.

Peds 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office.
Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: ten students) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 667 Pediatric General Clerkship - Madigan (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students) . Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24) Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: one or two students) . Prerequisite: PEDS and OB GYN core clerkships. Offered: AWSpS.

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student) . Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.

PEDS 671 Pediatric Endocrinology (*, max. 24) Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, impatient endocrine rounds, and a variety of conferences at Seattle Children’s Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 672 P-Office Practice - Spokane (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student) . Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 673 P-Office Practice (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student) . Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24) Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student) . Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.
PEDS 675 P-Clinical Complementary and Integrative Medicine (4/8, max. 8) Clinical rotation for students interested in Complementary and Integrative Medicine (CIM). Students arrange clinical placements with selected CIM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Students arrange their own schedules and must do so at least four weeks in advance of the rotation. (Limit per rotation: one or two students). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 677 P-Pediatric Intensive Care (8) Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive-care setting. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.

PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12) Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 681 P-Medical Genetics (*, max. 24) Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 683 P-Pediatric Nephrology (8) Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: one student). Prerequisite: third- or fourth-year medical student; PEDS and MED core clerkships; departmental permission. Offered: AWSpS.

PEDS 684 P-Pediatric Pulmonary Medicine (8) Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourth-year medical student standing. Offered: AWSpS.

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24) One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two or four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 686 P-Pediatric Cardiology (*, max. 24) Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 687 Neonatal Pediatric Clerkship (4) Offered: AWSpS.
PEDS 688 Pediatric Rheumatology (8) Exposes students to a wide range of pediatric rheumatologic diseases and provides them with the opportunity to evaluate new patients, help work up and manage inpatients with complex multisystem disease, and learn key elements of evaluation and treatment of childhood rheumatic diseases. Open to 4th year medical students. Prerequisite: completion of core pediatrics rotation; interest in rheumatology.

PEDS 689 P-Advanced Rural Pediatrics - Ft. Washakie, WY (8) Student functions at the sub-intern level to care for patients with acute pediatric illness, proved well child care, and provide follow up care to patients seen in the newborn nursery, Level II Neonatal ICU, hospitalizations, and previous clinic visits. Students interested should make arrangements well in advance of registration. Prerequisite: required clerkship in Pediatrics, Obstetrics and Gynecology, Internal Medicine, and Surgery.

PEDS 690 Advanced Pediatric Clerkship - Boise (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at St. Lukes Hospital. (Limit per rotation: one student) . Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care as Seattle Children’s. (Limit per rotation: three students) . Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Heart Children’s Hospital. (Limit per rotation: one student) . Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 693 Advanced Pediatric Subinternship - Mary Bridge (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. (Limit per rotation: one student) . Prerequisite: Core Clerkship in PEDS, OB/GYN, I-Med, Surgery; departmental permission.

PEDS 694 P-Pediatric Adolescent Medicine (8) Elective in Adolescent Medicine at Seattle Children’s Hospital. Open to 4th year medical students who have completed their Core pediatrics Rotation. Students will be expected to manage patients with the supervision of attending physicians. Students will have the opportunity to manage adolescent patients in the outpatient setting and learn key elements of subspecialty care of adolescents.

PEDS 695 Pediatric Hematology and Oncology (4) Offered: AWSpS.

PEDS 696 Pediatric Endocrinology (4) Offered: AWSpS.

PEDS 697 P-Pediatric Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from the Department of Pediatrics at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.

PEDS 698 Pediatric Boot Camp (4) Focuses on what is needed on day one of internship to care for children through hands-on experience, simulation, group problem solving, role-playing, didactics, and supplemental reading material. Emphasizes the acquisition and practice of core skills. Themes include communication, procedural competency, and medical decision making pertinent to both inpatient and outpatient pediatrics. (Two weeks.) Prerequisite: Prerequisite: fourth-year standing; departmental approval. Offered: Sp.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.

PHARMACOLOGY

PHCOL 401 General Pharmacology I (2-4, max. 4) Wang Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics
and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.

PHCOL 402 General Pharmacology II (3/4) General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Instructors: Storm Offered: W.

PHCOL 434 General Pharmacology (2) Grubbs Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 435 General Pharmacology (2) Grubbs Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

PHCOL 498 Undergraduate Thesis (*, max. 35) Offered: A.

PHCOL 499 Undergraduate Research (*, max. 35) Participation in departmental research projects. Offered: AWSpS.

PHCOL 501 Drug Discovery and Emerging Therapeutics (2) Ning Zheng Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: A.

PHCOL 502 Signal Transduction from the Cell Membrane to the Nucleus (2) John D. Scott, Shao-En Ong, Rich Gardner Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: jointly with CONJ 532; A.

PHCOL 503 Autonomic/Cardiovascular Pharmacology (2) Neil M Nathanson Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

PHCOL 504 Neuropharmacology (2) Sandra Bajjalieh Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addiction. Lecture, group discussion, and analysis of recent research. Offered: W.

PHCOL 505 Endocrine Pharmacology (2) Stanley McKnight Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Lecture, group discussion, and analysis of recent research. Prerequisite: coursework in biochemistry and physiology. Offered: Sp.

PHCOL 506 Immunopharmacology and Chemotherapeutics (2) Stanley McKnight Basic principles of immunology as applied to immunopharmacology. Current overview of cancer chemotherapy and antimicrobial chemotherapy. Lectures, group discussions, student presentations, and analysis of recent research. Prerequisite: coursework in biochemistry and physiology. Offered: Sp.

PHCOL 507 Pharmacology Seminar (1, max. 30) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.
PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2) Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: McKnight Offered: Sp.

PHCOL 514 Current Topics in Pharmacology (1, max. 30) Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Instructors: Gardner Offered: AWSp.

PHCOL 515 General Pharmacology Laboratory (*, max. 9) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4, max. 20) Storm On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.

PHCOL 527 Drug Metabolism (4) A. RETTIE, K. THUMMEL Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with MEDCH 527; W, odd years.

PHCOL 529 Ion Channel Pharmacology (2) Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Instructors: Catterall, Tempel Offered: A, odd years.

PHCOL 530 Neuronal Signaling Pathways (2) Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Instructors: Beavo, Hague, Storm, Xia Offered: W, even years.

PHCOL 531 Genetic Analysis of Signaling Systems (3) Rich Gardner, Stanley McKnight Introduction to classic model organisms including plants, yeast, slime mold, flies, worms, fish, mice, and humans and a discussion of their use in current signal transduction research. A major focus will also be on developing a research grant proposal culminating in a mock study section in which student proposals are evaluated by their peers. Prerequisite: permission of instructor; recommended: molecular and cellular biology; and genetics. Offered: Sp, odd years.

PHCOL 534 Molecular Basis of Addictive Drug Action (2) Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Chavkin, Phillips, Stella Offered: A, even years.

PHCOL 535 Transcriptional Control in Human Disease (3) Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Bomsztyk, Wang Offered: Sp, even years.

PHCOL 550 An Overview of Faculty Research (1) Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Prerequisite: first-year student standing in pharmacology. Instructors: Wang Credit/no-credit only. Offered: A.
PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1) Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Prerequisite: permission of instructor. Instructors: Beavo. Credit/no-credit only. Offered: AWSpS.

PHCOL 561 Molecular Properties of Ion Channels (1) Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Catterall. Credit/no-credit only. Offered: AWSpS.

PHCOL 562 Molecular Basis for Motivated Behavior (1) Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Chavkin. Credit/no-credit only. Offered: AWSpS.

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Storm. Credit/no-credit only. Offered: AWSpS.

PHCOL 564 Cellular Regulation by Protein Kinases (1) Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Prerequisite: permission of instructor. Instructors: McKnight. Credit/no-credit only. Offered: AWSpS.

PHCOL 565 Intercellular Signaling in Development (1) Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophila segment polarity genes. Prerequisite: permission of instructor. Instructors: Moon. Credit/no-credit only. Offered: AWSpS.

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokine Receptors (1) Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokine receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Nathanson. Credit/no-credit only. Offered: AWSpS.

PHCOL 569 Molecular Genetics of Potassium Channel Function (1) Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Tempel. Credit/no-credit only. Offered: AWSpS.

PHCOL 571 Molecular Mechanisms of Neurosecretion (1) Discussion of research strategies, methodologies, and literature relating to cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Bajjalieh. Credit/no-credit only.

PHCOL 572 Transcriptional Regulation of Growth Control Genes (1) Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Wang. Credit/no-credit only.

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and
PHCOL 575 Structural Biology of Ubiquitination (1)
Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Stella Offered: AWSpS.

PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1) Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Zheng Credit/no-credit only. Offered: AWSpS.

PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1) Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Instructors: Hague Credit/no-credit only. Offered: AWSpS.

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) Scott Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWSpS.

PHCOL 579 Genetic Regulation of Emotional Behavior (1) Zweifel Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWSpS.

PHCOL 580 Proteomics for Cellular Systems (1) Ong Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge form existing literature with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWSpS.

PHCOL 581 Mitochondrial Signaling and Metabolism (1, max. 35) Y. Sancak Trains graduate students on mitochondrial biology, signaling and metabolism by literature review and data analysis. Focuses on effective experimental design, scientific presentation and writing. Introduces basic and advanced laboratory techniques commonly used in mitochondrial biology. Offered: AWSpS.

PHCOL 582 Nuclear Architecture and the Noncoding Transcriptome (1, max. 35) D. Shechner Examines the biogenesis, regulation, and functional impact of mammalian nuclear architecture during differentiation and disease, emphasizing the interplay between chromatin biology and noncoding RNAs. Trains graduate students in rigorous approaches to experimental design and data analysis, novel technology design and implementation, effective scientific communication and writing, and comprehensive command of the literature. Offered: AWSpS.

PHCOL 583 Kinase Signaling in Neurodevelopment and Disease (1, max. 35) Explores fundamental concepts in kinase mediated signaling pathways and their regulation of neuronal structure and function during development and disease. Current genetic and proteomic approaches to investigate kinase pathways will be examined. Principles of experimental design, data interpretation and analysis will be discussed as graduate students present key findings of their individual research projects. Offered: AWSpS.

PHCOL 600 Independent Study or Research (*-) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

PHCOL 700 Master's Thesis (*) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.
PHCOL 800 Doctoral Dissertation (*) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

PHYSIOLOGY AND BIOPHYSICS

P BIO 375 Human Physiology in Health and Disease (4) NW Anna Melby Structure and function of the human body with emphasis on pathophysiology and disease treatment. Introduces the basic concept of homeostasis and focuses on the nervous system, musculoskeletal system, endocrine system, and immune system. Prerequisite: BIOL 220; and either CHEM 155 or CHEM 162; recommended: knowledge of basic cell biology and biochemistry. Offered: A.

P BIO 376 Human Physiology in Health and Disease (4) NW Anna Melby Structure and function of the human body with emphasis on pathophysiology and disease treatment. Focuses on the digestive system, cardiovascular system, respiratory system, renal system, and reproductive system. Prerequisite: P BIO 375; recommended: knowledge of basic cell biology and biochemistry. Offered: W.

P BIO 498 Undergraduate Thesis (*, max. 35) Offered: AWSpS.

P BIO 499 Undergraduate Research (*, max. 35) Offered: AWSpS.

P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) Sullivan Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEURO 541; W, even years.

P BIO 505 Human Physiology (4-) Binder Provides an introduction to the study of human physiology. Covers the physiology of excitable cells, muscle physiology, renal physiology, gastrointestinal physiology, and the physiology of the central nervous system. Offered: A.

P BIO 506 Human Physiology (-4) Provides an introduction to the study of human physiology. Covers cardiovascular physiology, respiratory physiology, acid base balance, neuroendocrinology, and reproductive physiology. Prerequisite: P BIO 505, or equivalent with permission of instructor. Instructors: Wordeman Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15) Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

P BIO 509 Neuroendocrinology (3) Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with NEURO 541; W, even years.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4) Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.

P BIO 519 Membrane and Muscle Biophysics Seminar (1) Oscar Vivas, Sharona E Gordon Lectures on current research topics in cell membrane function and muscle contraction with emphasis on presentation skills. Prerequisite: permission of instructor. Credit/no-credit only. Offered: Sp.

P BIO 520 Physiology Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3) Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Instructors: Hildebrandt Offered: AWSpS.
P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5) Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor. Instructors: Brengelmann Credit/no-credit only.

P BIO 525 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

P BIO 526 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

P BIO 540 Molecular Mechanisms of Cardiac Remodeling and Heart Failure (1) The mini-course discusses recent progress on novel molecular mechanisms underlying cardiac hypertrophy, myocardial remodeling, and heart failure development. Novel methodologies in basic and translational cardiovascular research will also be discussed.

P BIO 545 Quantitative Methods in Neuroscience (3) Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory.

Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with NEURO 545.

P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) Barria Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEURO 548; Sp, even years.

P BIO 550 Biophysics of Calcium Signaling (1) Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with NEURO 550; Sp, odd years.

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEURO 554.

P BIO 555 Sensory Receptors (1) Detwiler, Rieke Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEURO 555.

P BIO 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEURO 556.

P BIO 557 Ion Channel Gating (1) Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and
partial agonists, and ion channel structure. Offered: jointly with NEURO 557.

P BIO 558 Concepts and Mechanisms in Mitosis (2)
Asbury, Wordeman Examines how the miotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.

P BIO 559 Neurobiology of Disease (3) Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/NEURO 559.

P BIO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with NEURO 561; Sp.

P BIO 600 Independent Study or Research (*-)
Offered: AWSp.

P BIO 700 Master's Thesis (*-)
Offered: AWSp.

P BIO 800 Doctoral Dissertation (*-)
Offered: AWSp.

PSYCHIATRY AND BEHAVIORAL SCIENCES

PBSCI 498 Undergraduate Thesis (*, max. 15)
Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Offered: AWSpS.

PBSCI 499 Undergraduate Research (*, max. 15)
Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Offered: AWSpS.

PBSCI 505 P-Psychiatry Preceptorship (1, max. 12)
Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Instructors: Combs
Offered: AWSp.

PBSCI 525 P-Psychiatry and the Law (3)
GOLDENBERG, J. PIEL Explores issues at the interface of law and psychiatry through didactic curriculum and research. Trainees develop an individualized research project with the assistance of their faculty mentors. Covers topics in civil and criminal forensic psychiatry, research ethics, research design, grantsmanship, and mental health law. Offered: Sp.

PBSCI 546 Psychiatric Epidemiology (3) I. Rhew, A. Vander Stoep Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with EPI 546.

PBSCI 580 Applied Research in Behavioral Health and Justice Policy (2) Direct experience working with community agencies to build research capacity. Emphasized child welfare, children's mental/behavioral health, and juvenile justice. Seminars cover translational research, community-based research, and communicating research to program and policy audiences. For graduate students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and public health students. Offered: AW.

PBSCI 598 P-Psychiatry Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Psychiatry Clerkship offered during the patient care phase of the School of Medicine. Offered: AWSp.
PBSCI 600 Research in Psychiatry ([1-15]-) 
Independent laboratory research under the guidance 
and supervision of research scientists in the Psychiatry 
Department. Faculty permission required.

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, 
max. 24) Basic clinical clerkship for students enrolled 
in the WRITE Program. Prerequisite: completion of basic 
curriculum; third- and fourth-year students; 
acceptance in the WRITE program.

PBSCI 631 P-Basic Psychiatry Clerkship - Juneau, AK 
(1-24, max. 25) Basic psychiatry clerkship in Juneau, 
Alaska. Fulfills graduation requirements for clerkship in 
psychiatry.

PBSCI 632 P-LIC Psychiatry Clinical Clerkship (1-12, 
max. 12) Basic clinical clerkship for students enrolled 
in the LIC program. Prerequisite: acceptance into LIC 
program.

PBSCI 633 P-Basic Psychiatry Clerkship - Billings 
Clinic (1-24, max. 25) Rotations on inpatient adult, 
child, and adolescent psychiatry, consultations, 
electroconvulsive therapy (ECT), crisis stabilization 
units (CSU), psychiatry teleconsultation (project ECHO). 
Involves a range of psychiatric disorders and 
substance abuse. Professional experiences working 
with nurse practitioners, physician assistants, and 
social workers. Drug screening prior to student 
rotation. Prerequisite: successful completion of School 
of Medicine 1st and 2nd year foundation courses. 
Offered: AWSpS.

PBSCI 635 P-Basic Psychiatry Clerkship - Kalispell (1- 
24, max. 24) Basic psychiatry clerkship in Kalispell, 
MT. Fulfills graduation requirement for clerkship in 
psychiatry.

PBSCI 637 P-Basic Psychiatry Clerkship - Fairfax - 
Kirkland, WA (12) Basic psychiatry clerkship in 
Kirkland, Washington. Fulfills graduation 
requirements for clerkship in psychiatry.

PBSCI 639 P-Basic Psychiatry Clerkship - Olympia 
(12) Basic psychiatry clerkship at Olympia, WA.

PBSCI 640 P-Basic Psychiatry Clerkship - Pocatello 
(12) Basic psychiatry clerkship at Pocatello, ID. 
Fulfills graduation requirement for clerkship in 
psychiatry.

PBSCI 641 P-Basic Psychiatry Clerkship - Orofino, ID 
(12) Basic psychiatry clerkship in Orofino, ID. Fulfills 
graduation requirement for clerkship in psychiatry. 
Offered: AWSpS.

PBSCI 642 P-Basic Psychiatry Clerkship - Blackfoot 
ID (1-24, max. 25) Students will spend most of their 
time in a State hospital with 29 geriatric, 90 adult, 
and 16 adolescent beds. Students participate as a 
member of a multidisciplinary team and have 
exposure to a wide range of psychiatric illnesses 
including mood, anxiety, psychotic, personality and 
substance use disorders. They have the opportunity 
to spend time in the outpt setting at the Fort Hall 
Indian Reservation and spend time with a 
psychopharmacologist. Prerequisite: Successful 
completion of School of Medicine 1st and 2nd year 
foundation courses. Offered: AWSpS.

PBSCI 649 P-Basic Psychiatry Clerkship-Eastern 
State Hospital-Spokane (1-24, max. 25) Basic 
psychiatry clerkship at Eastern State Hospital in 
Spokane, WA. Fulfills graduation requirement for 
clerkship in Psychiatry. Offered: AWSpS.

PBSCI 655 P-Basic Psychiatry Clerkship - Cheyenne 
(1-24, max. 25) Basic psychiatry clerkship in 
Cheyenne, WY. Fulfills graduation requirement for 
clerkship in psychiatry.

PBSCI 660 P-Basis Psychiatry Clerkship-Bozeman (1- 
24, max. 25) Basic psychiatry clerkship in Bozeman, 
MT. Fulfills graduation requirement for clerkship in 
psychiatry. Offered: AWSpS.

PBSCI 661 P-Basic Psychiatry Clerkship - Helena (1- 
24, max. 25) Basic psychiatry clerkship in Helena, 
MT. Fulfills graduation requirement for clerkship in 
psychiatry.

PBSCI 662 P- Basic Psychiatry Clerkship - Missoula 
(1-24, max. 25) Students work at St. Patrick Hospital 
with adult and adolescent inpatients and in the
emergent room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

**PBSCI 663 P-Basic Psychiatry Clerkship - Billings (1-24, max. 25)** Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience includes consultations at the community mental health center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.

**PBSCI 665 P-Basic Clinical Clerkship (*, max. 24)** Inpatient clerkship in psychiatry. Students have primary responsibility under direction of attending psychiatrists and residents for diagnosis and care of patients at UW Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

**PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12)** Rotation aims to increase student’s skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.

**PBSCI 667 P-Basic Psychiatry Clerkship - Boise (1-24, max. 25)** Basic psychiatry clerkship at Veterans’ Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.

**PBSCI 668 P-Psychiatry Clerkship - Spokane (1-24, max. 25)** Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourth-year medical students.

**PBSCI 669 P-Basic Psychiatry Clerkship - Casper, Wyoming (12)** Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

**PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24)** Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.

**PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24)** Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Includes evaluation of (non-financial) decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.

**PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry - Boise, VAMC (8/12)** Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four weeks; visiting students
interested in the Boise Psych Residency Track allowed.)

**PBSCI 673 P-Outpatient Psychiatry Elective (\(\ast\), max. 24)** Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

**PBSCI 674 P-Elective in Therapeutic Communication (4-8)** J. Carr, H. Combs Students participate in diverse, interdisciplinary clinical encounters while being supervised by advanced psychotherapists. Includes multidisciplinary chemical dependency evaluations, cognitive assessments, cognitive-behavioral training, and hypnosis. Students complete a holistic patient assessment and are introduced to the complexities of therapeutic communication and improvement methods.

**PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12)** For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Johnston

**PBSCI 677 P-Alcohol and Drug Treatment Clerkship - American Lake VA (8/12)** Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six weeks, full-time). Instructors: Lim

**PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (\(\ast\), max. 12)** Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington’s, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship. Instructors: Johnston

**PBSCI 680 P-Clerkship in Emergency Psychiatry (\(\ast\), max. 24)** Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Pasic

**PBSCI 682 P-Addiction Medicine - Rock Spring WY (4)** Students identify, assess, diagnose, and treat addiction disorders in inpatient and outpatient settings through hospital rounds, inpatient hospital consults, and observation of intensive outpatient groups. 2 weeks.

**PBSCI 685 P-Geriatric Psychiatry Clerkship (\(\ast\), max. 12)** Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.

**PBSCI 688 P-Subinternship in General Psychiatry (\(\ast\), max. 16)** Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.

**PBSCI 689 P-Subinternship in General Psychiatry - Spokane, WA (8, max. 16)** Students function as
PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (*, max. 24) Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24) Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student) Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 697 P-Psychiatry Special Electives (*, max. 24) By special arrangement, clerkships, externships, and research opportunities can be taken at other institutions. Students obtain permission from Dr. Combs before contacting the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

RADIATION ONCOLOGY

R ONC 499 Undergraduate Research (*, max. 51) R. Ermoian, U. Parvathaneni, M. Phillips, D. Wilbur Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.

R ONC 505 P-Radiation Oncology Preceptorship (1, max. 12) Kane, Kelly, Kim, Koh, Laramore, Liao, Patel, Rockhill, Russell Students choose either to follow an attending physician through all aspects of radiation oncology including consults, follow-up, and treatment planning; or to follow a small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no-credit only.

R ONC 600 Independent Study or Research (*) Prerequisite: permission of department and faculty sponsor. Offered: AWSpS.

R ONC 601 Multidisciplinary Oncology Clerkship (4) Ralph P Ermoian Introduces students to interdisciplinary oncology care. Students follow patients through multidisciplinary clinic visits, attend tumor boards, and spend dedicated time with specialties like medical oncology, radiation oncology, pediatric oncology, surgical oncology, pathology, and radiology. Students see patients at the Seattle Cancer Care Alliance, Seattle Children's Hospital, and University of Washington Medical Center. Prerequisite: UW School of Medicine students must have completed the Foundations phase of the curriculum. Visiting students must have completed their preclinical curriculum and be in the clerkship phase of medical school. Credit/no-credit only. Offered: AWSpS.

R ONC 694 P-Clinical Cancer Management - SCCA (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 695 P-Clinical Cancer Management - UWMC (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up...
evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor. Instructors: Kane

**R ONC 697 P-Radiation Oncology Special Elective (\*, max. 24)** By specific arrangement for qualified students, special clerkship, externship, or research opportunities are made available at institutions other than the University of Washington. Students obtain a "special assignment" form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor. Instructors: Kane

**R ONC 699 P-WWAMI Radiation Oncology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region, other than the University of Washington. Prerequisite: permission of department. Instructors: Kane

**RADIOLOGY**

**RADGY 498 Undergraduate Thesis (\*, max. 30)** Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

**RADGY 499 Undergraduate Research (\*, max. 35)** Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

**RADGY 505 P-Preceptorship in Radiology (1-, max. 24)** Opportunity for medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of diagnostic radiology, interventional radiology, or nuclear medicine, including clinical problems, the different relationships in clinic between physician and patient, and research aspects of the department. Prerequisite: permission of instructor. Offered: AWSpS.

**RADGY 508 Physical Aspects of Medical Imaging (4)** Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.

**RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5)** Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

**RADGY 600 Independent Study or Research (\*)** Prerequisite: permission faculty sponsor. Offered: AWSpS.

**RADGY 684 Interventional Radiology (8) David Shin**
Advanced Patient Care (APC) clerkship in interventional radiology (IR) for third- or fourth-year medical students strongly considering application to IR residency. Sites include UWMC, HMC, VA, and SCH. Prerequisite: permission of clerkship coordinator and director; recommended: RADGY 694. Offered: AWSpS.

**RADGY 685 P-Introduction to Diagnostic Radiology - Bozeman (4/8)** Overview of the sub-specialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

**RADGY 686 P-Introduction to Diagnostic Radiology - Idaho Falls (4)** Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

**RADGY 687 P-Introduction to Diagnostic Radiology - Casper (4)** Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)**
RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4) Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 691 P-Introduction to Diagnostic Radiology - Alaska (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4/8) Full-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 694 P-Advanced Radiology Clerkship (4/8) G. REDDY Clerkship for third- or fourth-year medical students providing a more in depth experience in diagnostic or interventional radiology. Prerequisite: Offered: AWSpS.

RADGY 695 P-Radiology Elective Clerkship (4/8) Clinical rotations for third- or fourth-year medical students in one to four subspecialty areas of radiology at University of Washington and affiliated hospitals for those who have not previously completed a radiology clerkship. Offered: AWSpS.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 697 P-Radiology Special Electives (*, max. 24) Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

REHABILITATION MEDICINE

PROSTHETICS AND ORTHOTICS

RHB PO 501 Prosthetics and Orthotics Skills (1) Emphasizes the development of psychomotor skills for the application of contemporary technology uses. Practice and discussion of material and design theories related to durability, weight, and ease of fabrication to encourage problem-solving skills for independent practice. Credit/no-credit only. Offered: A.

RHB PO 502 Professional and Practice Issues (1) Provides an overview of professional and practice issues in prosthetics and orthotics. Includes discussion of healthcare, policy, and systems; introduction to reimbursement, Medicare and Medicaid rules and regulations; practice management; bioethics; professional organizations; legislative issues; and medical ethics and compliance. Offered: Sp.

RHB PO 511 Upper Limb Prosthetics I (4) Covers upper limb prosthetics providing students with
background knowledge of rehabilitation planning and principles of below elbow prosthetic management and prescription consideration. With direct patient contact, students assess and then formulate, implement, and evaluate a prosthetic treatment plan. Offered: A.

RHB PO 512 Upper Limb Prosthetics II (4) Integrates principles from upper limb prosthetics I, focusing on above-elbow prosthetic management. Encourages critical thinking and appropriate clinical decision-making through discussions and case study exercises that include body-powered, externally-powered, and hybrid systems. Offered: Sp.

RHB PO 515 Upper Limb Orthotics (3) Focuses on the integration of information acquired in previous foundational courses in anatomy and patient evaluation procedures with knowledge and skills of orthotic principles and theories related to upper limb orthotic interventions and patient management.

RHB PO 521 Lower Limb Prosthetics and Orthotics I: Theory and Application (5) Integrates prior core foundational knowledge (anatomy, kinesiology, medical science, gait analysis, patient evaluation procedures, and functional skills) with new knowledge of prosthetic and orthotic theory, patient evaluation, and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in developing intervention plans for individuals with lower limb dysfunction or amputation. Offered: S.

RHB PO 522 Lower Limb Prosthetics I: Clinical Practice (4) Explains and applies biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations below the knee. Students develop individualized treatment plans that demonstrate analysis of client needs, application of transfemoral socket design, prescription principles, and components. Integrates knowledge of available research and protocols into the planning process. Offered: S.

RHB PO 523 Lower Limb Orthotics I: Clinical Practice (4) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: S.

RHB PO 524 Lower Limb Prosthetics and Orthotics II: Theory and Application (5) Integrates prior foundational knowledge acquired in RHB PO 521 with new knowledge and skills of prosthetic and orthotic theory and practice. Students actively analyze, evaluate, and synthesize principles and theories in the development of prosthetics/orthotics intervention plans for individuals with lower limb dysfunction or amputation. Prerequisite: RHB PO 521. Offered: A.

RHB PO 525 Lower Limb Prosthetics II: Clinical Practice (3) Includes advanced instruction in concepts and skills developed in Lower Limb Prosthetics I. Offered: A.

RHB PO 526 Lower Limb Orthotics II: Clinical Practice (3) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate, develop, and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: A.

RHB PO 527 Pediatric Prosthetics and Orthotics (2) Focuses on the integration of information from previous coursework focusing on specific pediatric medical conditions and interventions. Includes discussion of pathology/pathophysiology, etiology, clinical presentation, natural history, and surgical and medical management. Discusses implications of various medical interventions and their functional considerations based on the available literature. Offered: Asp.

RHB PO 528 Lower Limb Prosthetics III: Theory and Application (5) Develops individualized prosthetic treatment plans based on a comprehensive knowledge of prosthetic gait, alignment, transfemoral socket design, and component principles. Develops support treatment plans by integrating knowledge of available research and treatment protocols into the decision-making process. Offered: W.

RHB PO 529 Lower Limb Prosthetics III: Clinical Practice (6) Advanced instruction in application of
biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations above the knee. Includes obtaining histories, assessing physical function, and taking residual limb impressions and measurements to prove prosthetic care. Offered: W.

RHB PO 530 Lower Limb Orthotics III: Theory and Application (4) Integrates knowledge and competencies from prior courses with new knowledge of orthotics management of the lower limb involving the knee and hip. Students acquire knowledge of components and design options for dysfunction of the hip and knee. Offered: WSp.

RHB PO 531 Lower Limb Orthotics III: Clinical Practice (4) Integrates prior knowledge of design principles, material science, and fabrication process; acquires knowledge of components and design options; and analyzes efficacy of orthotic treatment plans in achieving desired biomechanical goals and outcomes. Offered: WSp.

RHB PO 532 Spinal Orthotics (5) Yamane Integrates competencies gained from core foundational courses with additional theories and principles of orthotic management of spinal pathologies including scoliosis, trauma, and congenital and degenerative etiologies. Offered: Sp.

RHB PO 533 Spinal Orthotics I (2) Integrates prior knowledge (anatomy, physiology, patient evaluation skills) obtained in the foundational courses with knowledge and skills of orthotic theory and practice related to trauma and degenerative etiologies. Learning is achieved through lectures, discussion, and laboratory experiences. Offered: AWSp.

RHB PO 534 Spinal Orthotics II (3) Integrates prior knowledge of anatomy, physiology, and clinical evaluation with knowledge and skills of orthotic theory and practice related to scoliosis and kyphosis. Learning is achieved through lectures, discussion, and laboratory experiences.

RHB PO 541 Engineering Concepts (3) S. Spaulding Students are introduced to principles of mechanics, strength of materials, force analyses, fatigue, materials science and related topics that are relevant to prosthetic and orthotic device design. These concepts are applied to component failure and are relevant to the overall curriculum's laboratory and clinical work. Engineering concepts are discussed for application in future courses. Offered: Sp.

RHB PO 561 Clinical Rotation I (2) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: S.

RHB PO 562 Clinical Rotation II (1) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: A.

RHB PO 563 Clinical Rotation III (1) Students actively participate in the provision of prosthetics and orthotics treatment services and develop clinical patient care skills under the mentorship of clinical preceptors. Offered: W.

RHB PO 564 Clinical Rotation IV (1) Students actively participate in the provision of prosthetics and orthotics treatment services and refine clinical patient care, decision-making, and problem-solving skills under the mentorship of clinical preceptors. Offered: Sp.

RHB PO 581 Outcome Measures for the Prosthetics and Orthotics Clinic (2) Examines development and use of health-related outcome measures. Focuses on the relationship between measurement constructs and patient populations as well as psychometric properties. Students select, implement, and critically evaluate patient outcome measures. Offered: Sp.

RHB PO 582 Critical Evaluation of the Prosthetics and Orthotics Literature (1) Examines and applies appropriate methods of analyzing prosthetics/orthotics literature. Offered: A.

RHB PO 583 Evidence Based Practice I (3) Focuses on the use and critical evaluation of evidence to answer clinical problems. Encourages students to become consumer of evidence by developing an understanding of how to acquire and incorporate evidence into routine clinical practice. Offered: W.

RHB PO 584 Evidence Based Practice II (3) Covers developing a treatment plan based on theory, evidence, and experience; and proposing a
quantitative and qualitative assessment strategy to evaluate the developed treatment. Encourages students to become consumers of evidence to answer clinically relevant questions. Offered: Sp.

**REHABILITATION MEDICINE**

**REHAB 300 Introduction to Occupational Therapy** *(1)* Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only.

**REHAB 496 Special Topics in Rehabilitation** *(1-9, max. 14)* Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

**REHAB 498 Undergraduate Thesis** (*, max. 15)*

**REHAB 499 Undergraduate Research** (*, max. 15)* Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.

**REHAB 500 Clinical Clerkship in Physical Therapy** *(4)* Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.

**REHAB 502 Pediatric Physical Therapy** *(4, max. 8)* Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.

**REHAB 503 Lifespan III: Geriatric Physical Therapy** *(3)* Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

**REHAB 504 Procedures I: Basic Physical Examination of the Extremities** *(2)* Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Special emphasis on examination of the extremities, including applied anatomy, posture, screening tests, special tests, and scanning exams.

**REHAB 505 Introduction to Pharmacology** *(2)* Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies.

**REHAB 506 Procedures II: Basic Physical Examination of the Spine** *(2)* Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Emphasizes examination of the spine including applied anatomy, posture, screening tests, special tests, and scanning exams.

**REHAB 507 Physical Therapy Procedures III: Modalities** *(3-4)* Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

**REHAB 508 Principles of Therapeutic Exercise** *(5)* Theory, principles, and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

**REHAB 509 Rehabilitation Procedures: Functional Skills Assessment** *(1)* Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques, transfers, and assisted ambulation.

**REHAB 510 Rehabilitation Psychology** *(2)* Focuses on understanding assimilation of disability, participation in rehabilitation, management of behavior, and maintenance of performance from both the practitioner and patient perspective. Focuses on the role of the psychologist in the...
rehabilitation team. Includes case study and case conference materials.

REHAB 511 Musculoskeletal IV: Clinical Management (4) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format. Offered: A.

REHAB 512 Musculoskeletal V: Clinical Management (3-4, max. 8) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper and lower extremity musculoskeletal conditions. Lecture, laboratory and simulation learning format.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no-credit only.

REHAB 514 Systems Review for Physical Therapists (3) Development of advanced physical assessment skills to provide students with the ability to determine if a patient’s disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no-credit only.

REHAB 516 Medical Information for Rehabilitation Counselors (3) Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor. Instructors: Johnson

REHAB 517 Physical Therapy Seminar (2-, max. 12) Focuses on physical therapy topics pertaining to transcurricular and professional practice issues.

REHAB 518 PT Professional Series III: Diversity, Inclusion and Health Disparities (2) In-depth exploration of health disparities in the United States based on race, ethnicity, culture, social economic status, or sexual orientation. Covers roles of health status indicators, social determinants of health, cultural competency, and access to health services. Offered: Sp.

REHAB 519 P-Preceptorship in Rehab Medicine (1, max. 12) McNalley Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.

REHAB 520 Seminar (1-5, max. 12) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents, and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 521 Survey of Pathophysiology for Rehabilitation (2-3, max. 6) J. Jandreau Uses a systems approach overview of the disease process and the impact it has on the rehabilitation process. Provides a foundation for understanding how dysfunction of major systems can influence a person's ability to move. Discusses risk reduction and prevention strategies surrounding diseases. Offered: AW.

REHAB 522 Physiological Topics in Rehabilitation Medicine (2) Reviews traditional physiological concepts related to the nervous, muscoskeletal, and cardiopulmonary systems as a foundation for rehabilitation practice. Includes recent advances in research and applicable case studies.

REHAB 523 Neuroscience III: Applied Neurology (4) Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and
treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 525 Exercise Physiology for Rehabilitation (3) Provides systems approach to exercise physiology, including cardiovascular and musculoskeletal response to exercise training, and the impact it has on the rehabilitation process. Reviews common disease processes that effect ability and tolerance, and may benefit from rehabilitation interventions.

REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3) Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

REHAB 528 International Clinical Clerkship (2) Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their caregivers. Sponsored sites selected and screened by clinical coordinator. Students may choose area of clinical focus. Credit/no-credit only.

REHAB 529 PT Professional Series II: Professional and Practice Issues in Physical Therapy (2) Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Offered: W.

REHAB 530 Medical Aspects of Vocational Counseling (2-3) Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor. Instructors: Johnson

REHAB 531 PT Professional Series I: Critical Thinking Skills in Physical Therapy (2) Kevin J McQuade Introduces students to structured critical thinking for discussion and analysis of selected musculoskeletal approaches. Interactive small groups explore key papers with controversial or novel assertions, or that address commonly used treatment techniques. Offered: A.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor. Instructors: Johnson

REHAB 533 Diseases and Diagnosis in Rehabilitation (2-, max. 4) Provides an introduction to medical diagnoses and diseases having high rates of referral to rehabilitation services in order to promote comprehensive patient care.

REHAB 535 Physical Therapy Administration Issues (2) In-depth discussion of administrative issues overarching physical therapy practice, including economic trends, operational policy, budgeting, reimbursement, staffing, business structure, and entrepreneurship. Required for physical therapy students. Credit/no-credit only.

REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max. 8) General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

REHAB 537 Functional Mobility Skills (2) Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2) Principles and practice of physical therapy evaluation and
interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

**REHAB 539 Communication Disorders in Rehabilitation Medicine (1)** Yorkston Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

**REHAB 540 Acute Care Practice in Physical Therapy (3, max. 6)** Provides an in-depth analysis of the role of the physical therapist in the acute care setting. Lectures frame care-based problem solving and experiential learning. Consequences of recumbent positioning and reduced activity examined using a systems-based approach. Develop entry-level knowledge for delivery of acute care PT services within a multidisciplinary team.

**REHAB 541 Gross Anatomy Laboratory - Extremities (1)** Uses cadavers to study the musculoskeletal, peripheral-vascular, and peripheral-nervous systems. Focuses on the extremities. Uses primarily prospected material, but provides some opportunity for independent dissection. Credit/no-credit only.

**REHAB 542 Gross Anatomy Laboratory - Spine (1)** Studies the musculoskeletal, peripheral-vascular, and peripheral-nervous systems from cadavers. Focuses on the spine. Uses primarily prospected material, but includes some opportunity for independent dissection. Credit/no-credit only.

**REHAB 543 Rehabilitation Kinesiology Laboratory (1)** Provides instruction and focus on practical experience and clinical problem solving in kinesiology by exploring and developing proficiency in a framework for observation, analysis, and description of human movement on the normal pathological spectrum. Credit/no-credit only.

**REHAB 544 Functional Anatomy for Rehabilitation of the Extremities (5-)** Covers the functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on anatomy and of the upper and lower extremities, including associated peripheral-vascular and peripheral-nervous systems. Intended to enhance functional assessment and to improve diagnosis and treatment through greater understanding of underlying anatomy. Offered: A.

**REHAB 545 Functional Anatomy for Rehabilitation of the Spine (-4)** Covers functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on the anatomy of the spine, including associated vascular and nervous systems. Enhances functional assessments and the improvement of diagnosis and treatment through greater understanding of underlying anatomy. Offered: W.

**REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15)** Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: permission of instructor.

**REHAB 550 Neuropsychology in Rehabilitation (2)** J. HOFFMAN Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

**REHAB 551 Neurobiology for Rehabilitation (5)** In-depth analysis of human neuroanatomical structure and neurophysiological function as a basis for rehabilitation practice.

**REHAB 554 Perspectives in Interprofessional Practice (0/1, max. 1)** Distributed over seven consecutive quarters, this course integrates diverse interprofessional perspectives to prepare graduate and professional students for effective practice as collaborative team members. Offered: A.WSpS.

**REHAB 555 P-Neuromuscular Electrodiagnosis (2.5)** Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations.
Prerequisite: permission of instructor. Instructors: Kraft

REHAB 556 Foundations of Rehabilitation Science (3) Overview of rehabilitation science and social constructs of disability emphasizing bio-psycho-social-environmental models of the enabling-disabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary thinking. Prerequisite: instructor permission. Instructors: Johnson, Kartin, Yorkston

REHAB 557 Evidence-Based Rehabilitation (3) Addresses frameworks for evaluating the evidence in rehabilitation science; asking answerable questions, using advanced search strategies; critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor. Instructors: Kartin, Yorkston

REHAB 558 Rehabilitation Research Methods (3) Provides an orientation and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: permission of instructor. Instructors: Johnson, Kartin, Yorkston

REHAB 559 Introduction to Global Rehabilitation (3) Cody L McDonald Explores rehabilitation from a global perspective. Provides framework for students to develop proposals addressing current global rehabilitation issues. Offered: S, odd years.

REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3) Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor. Instructors: Amtmann

REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3) Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor. Instructors: Ciol, Hoffman

REHAB 562 Neuroscience in Rehabilitation (3) Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor. Instructors: Kelly, Yorkston

REHAB 564 Practice Skills for Occupational Therapy (1, max. 3) Provides an introduction to physical assessments and interventions with a focus on physical management of clients, management of medical and adaptive equipment, splint fabrication, and maintenance of therapist and client safety. The therapeutic skills covered serve as a foundation for more advanced technical and professional competencies in subsequent courses and fieldwork. Credit/no-credit only. Offered: AWSp.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) Propagation and absorption characteristics of physical forms of energy used for
treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Esselman

REHAB 569 Prosthetics and Orthotics for Physical Therapists (2) Introduces the principles and designs of orthoses and prostheses, using a clinical problem-solving approach to determine functional deficits to create joint rehabilitation goals between physical therapy and prosthetics and orthotics in regards to the prosthesis and orthosis. Emphasizes team medicine and collaboration in rehabilitation.

REHAB 570 Foundations of Occupational Therapy (5) Powell An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7) Fogelberg An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) Powell Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7) Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families.

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) Powell Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework.

REHAB 578 Occupational Therapy Domain and Process I (4) Skills in the analysis, adaptation, and sequencing of therapeutic occupations and activities to support occupational performance through the lifespan. The analysis process covers all aspects of the domain of occupational therapy including areas of occupation, client factors, performance skills, performance patterns, context, and environment.

REHAB 579 Occupational Therapy Domain and Process II (3) Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences.

REHAB 580 Introduction to Research in Rehabilitation (3) Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation.

REHAB 581 Application of Measurement Systems (3) Jirikowic Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications
of testing. Critical evaluation of selected standardized test used in occupational therapy.

REHAB 582 Assistive Technology in Rehabilitation (3) T. JIRIKOWIC Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements.

REHAB 583 Exploring Disability (1) Explores multiple aspects of disability including social, mental, physical, and financial factors. Provides skills for working with people with disabilities and exposure to a multidisciplinary team approach to overcoming healthcare barriers. Utilizes interactive didactic with patient participation and introduction to community resources for people with disabilities.

REHAB 585 Leadership and Management in Occupational Therapy (5) T. MROZ Focuses on occupational therapy leadership and management in healthcare delivery systems. Includes theoretical and professional competencies focuses on healthcare access, health policy laws, service delivery settings, reimbursement, regulation, political advocacy. Management topics include leadership, program planning, budgeting, personnel, and outcome measurement.

REHAB 588 Fieldwork II Seminar (1) Supports a successful transition from academic work to the full-time Fieldwork II clinical experiences by reinforcing integration and application of acquired technical and professional competencies needed for REHAB 594, Fieldwork II. Credit/no-credit only. Offered: Sp.

REHAB 591 Graduate Project (1-4, max. 10) Graduate project focuses on practice, administration, education, policy, research, or other scholarly or creative work. Required of entry-level occupational therapy students.

REHAB 592 Principles of Orthotic Use in Rehabilitation (2) Crane General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

REHAB 593 Principles of Prosthetic Use in Rehabilitation (2) Morgenroth General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 30) Rollinger 12-week, full-time fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various settings reflective of current practice. Students must complete a minimum of two 12-week placements. Credit/no-credit only.

REHAB 595 Clinical Affiliation in Physical Therapy (2-10)-, max. 30) Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no-credit only.

REHAB 596 Electromyography and Clinical Neurophysiology (4) Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft

REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

REHAB 598 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

REHAB 599 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in
rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

REHAB 600 Independent Study or Research (*-) Credit/no-credit only.

REHAB 683 P-Rehabilitation medicine Clerkship-Pediatric, Boise, ID (8) Incorporates material of REHAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four week, full time clerkship permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: Third year medical student standing.

REHAB 684 Rehabilitation Elective - Boise, ID (8) Students work directly with the physician, seeing a variety of patients with musculoskeletal diagnoses as outlined in the objectives for the course, as well as working as a member of a multidisciplinary rehab team. They also observe procedures such as EMGs, nerve conduction studies, and a variety of peripheral and central injections. Students participate in care of injured workers and their return to work. (Four weeks).

REHAB 685 P-Chronic Disease and Disability (4) Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing. Instructors: McNalley

REHAB 686 P-Rehabilitation Medicine Clerkship - Pediatrics (8/12) Incorporates material of REHAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing. Instructors: McNalley

REHAB 687 Rehabilitation Medicine Clerkship - Harborview Medical Center - Seattle (8) Focuses on neuro-rehabilitation and general rehabilitation. Intended for those interested in exploring a career in Physical Medicine and Rehabilitation or wishing to gain more experience working with patients with disability. Students primarily work on the inpatient rehabilitation unit. Some exposure to outpatient general rehabilitation and neuro-rehabilitation clinics. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 688 Rehabilitation Medicine Clerkship - VA Puget Sound Seattle Division, Rehab Care Services (8) Focuses on providing medical and rehabilitative care to inpatients with a variety of diagnoses and functional limitations including, but not limited to, stroke, amputation, multiple sclerosis and motor neuron disease. Structured clinical experience on a general inpatient rehabilitation unit. Opportunities to participate at a variety of outpatient rehabilitation clinics. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 689 Rehabilitation Medicine Clerkship - VA Puget Sound Seattle Division, Spinal Cord Injury (8) Introduction to diagnosis, management, and rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 690 Rehabilitation Medicine Clerkship - UW Medical Center - Seattle (8) Four-week clerkship on inpatient PM&R management of patients with disabilities and functional impairments due to disorders such as acquired brain injury, CNS disorders, spinal cord injury, and complex medical conditions. Recommended for careers in family medicine, internal medicine, neurology, geriatrics, orthopedic surgery, neurosurgery, rheumatology, and cardiology. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 691 Rehabilitation Medicine Clerkship - Community Medical Center - Missoula (4/8) Two or four week Physical Medicine and Rehabilitation (PM&R) clerkship at Community Medical Center in Missoula, Montana. Work in inpatient setting for patients in acute rehab, and see patients in outpatient clinic. Two week rotation for students desiring broad overview of PM&R, seeing variety of patients. Four week rotation for students desiring more exposure to neuromuscular anatomy, physical exam, and neuromuscular disorders. Prerequisite:
REHAB 692 P-Rehabilitation Medicine Elective - Spokane-St. Luke's (8) Students will provide medical and rehabilitative care to patients with a variety of diagnoses and functional limitations including, but not limited to, stroke, amputation, multiple sclerosis and motor neuron disease. Recommended for careers in PM&R, family medicine, internal medicine, neurology, rheumatology, geriatrics, orthopedic surgery, or neurosurgery. Site is St. Luke's Rehabilitation in Spokane, WA. Prerequisite: 3rd year medical student standing Offered: AWSpS.

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24) Equivalent to REHAB 686, REHAB 687, or REHAB 688. Student arranges with another university, using the "special assignment form." Students qualify after review, similar experience at another university. Prerequisite: permission of instructor. Instructors: McNalley

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

REHAB 700 Master's Thesis (-) Credit/no-credit only.

REHAB 800 Doctoral Dissertation in (-) Offered: AWSpS.

REHAB 801 Practice Doctorate Project/Capstone ([1-4]-, max. 12) Credit/no-credit only. Offered: AWSpS.

SURGERY

SURG 498 Undergraduate Thesis (*, max. 35) Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

SURG 499 Undergraduate Research (*, max. 35) Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505 P-Preceptorship in Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

SURG 598 P-Surgery Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Surgery clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

SURG 600 Independent Study or Research (-)

SURG 601 General Surgery Advanced Clerkship - Swedish Medical Center (8) Advanced clerkship at Swedish Medical Center/First Hill offering training in a 700-bed tertiary-care hospital. Emphasizes collegial relationships between attending surgeons, residents, and fourth year medical students considering a career in general surgery or one of its subspecialties. Prerequisite: required surgery clerkship. Offered: AWSpS.

SURG 602 P-Clinical Clerkship - Coeur D'Alene, ID (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 603 P-Clinical Clerkship - Spokane VAMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical care.
management. Care of inpatients and outpatients, including participation in the operating room.

**SURG 604 P-Clinical Clerkship - Bozeman, MT** (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

**SURG 605 P-Clinical Clerkship - Swedish Medical Center (1-24, max. 25)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

**SURG 606 P-Clinical Clerkship - Anchorage, AK (1-24, max. 25)** Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

**SURG 607 Colorectal Surgery - Boise, ID** (8) Focus on benign and malignant diseases: colorectal carcinoma, colitis, inflammatory bowel disease, anorectal diseases such as anal fissure, anorectal abscess and fistula, hemorrhoids and pilonidal disease. Focus primarily on minimally invasive techniques with exposure to the OR, clinic, endoscopy unit, and da Vinci robotic surgical procedures. Practice of modern surgical techniques. Prerequisite: General Surgery clerkship. Offered: AWSpS.

**SURG 608 General Surgery Advanced Clerkship - Virginia Mason (8)** Advanced clerkship designed to give fourth year medical students direct exposure to defined categories of general surgery. Students participate in the pre-op, intra-op, and post-operative care of surgical patients. Students also participate in outpatient clinic and perform initial consults and post-operative visits. Students work closely with resident physicians to provide primary care for post-operative inpatients. Prerequisite: required Surgery clerkship.

**SURG 609 Surgery Clerkship - Alaska Native Medical Center (12)** Students participate in and contribute to the team approach to managing emergency general surgery conditions and oversight of management of complex trauma victims. Activities include patient care assessment in both inpatient and outpatient settings, observation and participation in the operating room, attendance of weekly conferences, and didactic experience with faculty. Offered: AWSpS.

**SURG 610 Plastic Surgery Sub-Internship (8)** Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participants act in sub-intern capacity in all surgery-related activities and work towards essential skills necessary for surgical residency. Students rotate through Veterans Affairs Puget Sound (primary site), UW Medical Center Montlake, and UW Medical Center Northwest. Prerequisite: completion of required general surgery and medicine clerkships.

**SURG 630 P-WRITE Surgery Clinical Clerkship** (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**SURG 631 P-LIC Surgery Clinical Clerkship** (12) Basic clinical clerkship for students enrolled in LIC program. Prerequisite: Acceptance into LIC program. Offered: AWSpS.

**SURG 632 P-Plastic Surgery - Spokane Plastic Surgeons (4-8)** Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: Surgery and medicine required clerkships.

**SURG 633 P-Clinical Clerkship - Olympia (non LIC)** (1-12, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Offered: WSpS.
SURG 634 Surgery Clerkship - Twin Falls, ID (1-24, max. 25) Required surgery clerkship - Patient Care Phase; St. Luke’s Magic Valley, Twin Falls ID Offered: AWSpS.

SURG 638 P-Rural Surgery - Lewistown, MT (8) Learn to identify and describe the most common surgical problems presenting in the particular community to which you are assigned. Prerequisite: Surgery required clerkship Offered: AWSpS.

SURG 639 P-Rural Surgery - Polson, MT (8) Evaluate and diagnose surgical referrals; do pre-op evaluations and counseling/discussion of surgical procedures. Evaluation of post operative patients in the hospital and clinic. Assessment of acute care surgical patients in the ED and hospital. Trauma resuscitations. Prerequisite: Surgery and Medicine required clerkships Offered: AWSpS.

SURG 640 P-Rural Surgery - Dillon, MT (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department. Offered: AWSpS.

SURG 641 P-Rural Surgery - Glasgow, MT (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department. Offered: AWSpS.

SURG 642 P-Rural Surgery Clerkship - Pullman, WA (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

SURG 644 P-Rural Surgery Clerkship - Lewiston, ID (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

SURG 646 P-Rural Surgery Clerkship - Gillette (8) Designed to supplement basics learned in surgery required clerkship. Provides an excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery clerkship; medicine clerkship; permission of the department.

SURG 647 P-Rural Surgery Clerkship - Powell (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 648 P-Rural Surgery Clerkship - Libby (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 649 P-Rural Surgery Clerkship - Lewistown (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 650 P-Rural Surgery Clerkship - Twin Falls (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 651 P-Community Surgery Clerkship - Rock Springs, WY (8) Designed to supplement basics learned in Surgery 665. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Encouraged for students entering primary care. Prerequisite: completed required Surgery and Medicine clerkships.

SURG 652 P-Plastic Surgery - Spokane (8) Introduces fundamental techniques and enhances knowledge of
plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.

**SURG 653 P-Pediatric Surgery - Spokane (8)** Student functions as a subintern directly assisting on the services and is an integral part of the team. Prerequisite: surgery required clerkship.

**SURG 654 P-Cardiothoracic Surgery - Spokane (4-8)** The student functions as a subintern and directly assists on the service and is an integral part of the team. Prerequisite: surgery required clerkship.

**SURG 655 Surgery Clerkship - Gillette, WY (12)** Provides a method of focused evaluation for patients with surgical problems. Includes workup and preparation of patients for anesthesia and surgical intervention. Offered: AWSpS.

**SURG 656 P-Trauma/Acute Care Surgery - Boise (8)** The student functions as a subintern and directly assists on the service and is an integral part of the team at St. Alphonous Trauma Services. (Four weeks).

**SURG 657 P-Vascular Surgery - Spokane (4/8)** Student spends two or four weeks at the Vascular Institute in Spokane. The student functions as a subintern and directly assists on the service and is an integral part of the team.

**SURG 658 P-Ambulatory Surgery Clerkship - Mary Bridge (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 659 P-Ambulatory Surgery Clerkship - Madigan (4-8, max. 12)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 660 P-Ambulatory Surgery Clerkship - Group Health (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 661 P-Surgical Intensive Care Unit Sub-Internship - VA (8)** Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

**SURG 662 P-Community Surgery Clerkship - Longview (8)** Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

**SURG 663 P-Subinternship in General Surgery - Virginia Mason (*, max. 16)** Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

**SURG 664 P-Subinternship in General Surgery - VAMC (*, max. 16)** Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

**SURG 665 P-Clinical Clerkship - UWMC (*, max. 24)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

**SURG 666 P-Clinical Clerkship - Boise (1-24, max. 25)** Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and
inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 667 P-Clinical Clerkship - Spokane (1-24, max. 25) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 668 P-Clinical Clerkship - Casper (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 669 P-Clinical Clerkship - Billings (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 670 P-Clinical Clerkship - Missoula (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 671 P-Clinical Clerkship - Madigan (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 672 P-Clinical Clerkship - HMC (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 673 P-Clinical Clerkship - VA (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 674 P-Clinical Clerkship - Virginia Mason (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 675 P-Clinical Clerkship - Caldwell, ID (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 676 P-Pediatric Cardiothoracic Surgery (8) Students will learn about the technical and physiological aspects of cardiopulmonary treatments. Prerequisite: Surgery required clerkship. Offered: AWSpS.

SURG 677 P-Clinical Clerkship - Sheridan, WY (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 678 P-Clinical Clerkship - Kalispell, MT (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.
SURG 679 P-Clinical Clerkship - Wenatchee, WA (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 680 P-Clinical Clerkship - Northwest Hospital (1-12, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Offered: AWSpS.

SURG 681 P-Peripheral Vascular Disease (4/8, max. 8) Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: surgery required clerkship.

SURG 682 P-Clinical Burn Care (*, max. 12) Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: surgery required clerkship.

SURG 683 P-Pediatric Surgery Externship (8/12) Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. Prerequisite: surgery required clerkship.

SURG 684 P-Pediatric Surgery Clerkship- Boise (8) Student functions as a subintern directly assisting on the services and is an integral part of the team. Held in Boise, ID. Prerequisite: Peds and SURG clerkships. Offered: AWSpS.

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12) Serve as a subintern on the Cardiothoracic surgery service at the UWMC. Opportunity to participate in the full spectrum of perioperative care for both cardiac and thoracic surgery patients including end stage lung disease, heart failure and transplantation patients, with an emphasis on cardiopulmonary physiology and perioperative management.

SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.

SURG 687 P-Transplantation Surgery Clerkship (8) Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: surgery and medicine required clerkships.

SURG 688 P-Subinternship in General Surgery (*, max. 12) Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 689 P-Community Surgery Clerkship - Coeur d' Alene (8) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8/12) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.
SURG 691 P-Surgical Intensive Care Unit Sub-Internship - HMC (8) Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

SURG 692 P-Ambulatory Surgery Clerkship - Seattle Children’s (4) Rotation focuses on increasing the student’s ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 693 P-Rural Surgery Clerkship - Buffalo (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 694 P-Rural Surgery Clerkship - Riverton (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 695 Vascular Surgery (8/12) The student spends four weeks on the vascular surgery at Harborview Medical Center. The student functions as a subintern and directly helps the residents manage all patients on the service and is an integral part of the OR team.

SURG 696 P-Breast Surgery - Spokane (4/8) Two or four weeks at the Breast Center in Spokane. Student functions as a subintern directly assisting on the service and is an integral part of the team.

SURG 697 P-Surgery Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean’s office a special assignment form at least one month before preregistration. Prerequisite: surgery required clerkship and permission of department.

SURG 698 P-Clinical Clerkship - Fairbanks (*, max. 24) Includes the diagnosis and management of surgical problems. Focuses on the physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

UROLOGY

UROL 498 Undergraduate Thesis (*, max. 35) Provides an opportunity for medical students to write in the area of urology.

UROL 499 Undergraduate Research (*, max. 35) The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1, max. 12) Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 600 Independent Study or Research (1-3, max. 16) John L Gore Independent study or research in urology conducted under the direction of one or more instructors. Offered: AWSpS.

UROL 675 P-Urology Preceptorship (*, max. 8) Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. (Two or four weeks). Prerequisite: UROL 680, HUBIO 562.

UROL 678 P-Urology Clerkship - Idaho (4-8, max. 8) Medical clinical rotation. Involves participation in a standard urology clinic, as well as procedures and
surgical cases. Prerequisite: completion of Internal Medicine or Surgery required third year clerkship is recommended. Offered: AWSpS.

**UROL 679 P-Urology Clerkship - Boise VA (*, max. 8)**
Two or four week rotation. Full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

**UROL 680 P-Urology Clerkship (*, max. 8)**
Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562. Instructors: Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang

**UROL 681 P-Female Urology (4)** Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor. Instructors: J. Miller

**UROL 682 P-Urology Clerkship - Spokane (4-8, max. 8)** Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Offered: AWSpS.

**UROL 683 P-Urology Clerkship - Boise (*, max. 8)**
Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

**UROL 684 P-Urology Clerkship - Billings (*, max. 8)**
Two or four week rotation. Includes full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

**UROL 685 P-Urology Sub-Internship (*, max. 12)**
Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor. Instructors: Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang

**UROL 686 P-Urology Clerkship - Bozeman (4-8, max. 8)**
Medical clinical rotation. Involves participation in a standard urology clinic, as well as procedures and surgical cases. Prerequisite: completion of Internal Medicine or Surgery required third year clerkship is recommended. Offered: AWSpS.

**UROL 687 P-Urology Clerkship - Northwest Hospital (4-8, max. 8)** Rotation providing exposure to all aspects of patient care in urology, including exposure to outpatient clinic and operating room. Recommended: third-year clerkship and completion of Patient Care Phase courses in Internal Medicine or Surgery. Offered: AWSpS.

**UROL 688 Advanced Patient Care -Urology Clerkship - Bozeman (8)** Advanced patient care rotation provides exposure to all aspects of patient care in urology through a private practice setting. Students, as part of a primary or consultative team, are exposed to outpatient clinic and operating room procedures, with daily responsibilities. Four weeks. Prerequisite: third- or fourth-year medical student; recommended: Internal Medicine and/or Surgery clerkships. Offered: AWSpS.

**UROL 690 P-Urology Specialties (*, max. 8)** For those who wish further exposure to a specific aspect of urology. Students spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, or Veterans' Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

**UROL 697 P-Urology Special El-ectives (*, max. 24)**
Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor.

**UROL 699 P-WWAMI Urology Special Electives (*, max. 24)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.
SCHOOL OF NURSING

INFANT AND EARLY CHILDHOOD MENTAL HEALTH

IECMH 537 Development and Psychopathology: Parents and Infants (3) Spiker Provides an overview of typical social and emotional development and psychopathology in children ages three and younger. Demonstrates attachment relationships with parents and family to infant's development and psychopathology. Core course of Infant Mental Health Certificate program. Recommended: IECMH 548 Offered: A.

IECMH 548 Frameworks in Infant an Early Childhood Mental Health (3) Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation. Offered: A.

IECMH 555 Relationship Based Mental Health Assessment of Young Children (3) Focuses on multidisciplinary, diagnostic mental health observation and assessment of infants, toddlers, and preschoolers within the context of their primary relationships. Recommended: IECMH 548 Offered: Sp.

IECMH 569 Reflective Practice And Consultation (2) Colleen O. Dillon, Susan J Spiker Focuses on reflective practice, consultation and supervision, distinct and core features of practice across disciplines providing infant mental health services to young children and families. Recommended: IECMH 548 Offered: S.

NURSING (NSG)

NSG 432 Infants and Children: Risk and Resilience (5) I&S C. Dillon, M. Hirschstein, S. Spiker Provides a survey of infant and early childhood development, including prenatal and neonatal factors, and social/societal influences, using an infant mental health framework. Emphasizes how risk and protective factors can impact social-emotional, physical, and cognitive growth. Includes research-based principles and approaches to supporting families, teachers, and caregivers of young children. Offered: SpS.

NSG 505 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/IND E 567; Sp, even years.

NSG 506 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

NSG 507 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with ENV H 562; W.

NSG 508 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.
NSG 511 Prevention Issues in Community Health (3)
An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.

NSG 512 Prevention Critique in Community Health (3)
Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among U.S. racial and ethnic people of color, and how to be a critical program consumer, adopter, and adapter. Offered: A.

NSG 513 Psychopharmacology for Children and Adolescents (1)
Tyson, Walsh Reviews pertinent issues in prescribing psychoactive medications to children and adolescents. Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescribing for children and adolescents. Credit/no-credit only. Offered: S.

NSG 516 Physiological Aspects of Aging (3)
Barbara B. Cochrane Focuses on biological theories of aging, major physiological and pathophysiological changes that occur in human body systems with aging. Also addresses health considerations and individual adaptations based on current research. Offered: A.

NSG 526 Introduction to Person Centered and Interprofessional Palliative Care (1-5)
Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: jointly with B H 566/FAMED 531; A.

NSG 527 Advanced Topics in Person Centered and Interprofessional Palliative Care (1-5)
Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Requires admissions into the Palliative Care Graduate Certificate Program. Prerequisite: NSG 526 Offered: jointly with B H 567/FAMED 532; W.

NSG 528 Palliative Care: Quality Metrics and System Integration (1-5)
Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Requires admissions into the Palliative Care Graduate Certificate Program. Offered: jointly with B H 568/FAMED 533; Sp.

NSG 530 Leadership, Communication, and Professional Identity (3)
Analyzes professional identity, transition to new roles and responsibilities, leadership approaches, and inter-professional teamwork skills needed to provide effective, efficient and patient/community-centered care. Covers advanced, multi-modal communication strategies specific to professional role certification, conflict resolution, professional communication, inter-professional teamwork and leadership using interactive, skills-based learning.

NSG 539 Management of Common Newborn Conditions (1-2, max. 2)
Focuses on evidence-based clinical-decision making and management of common newborn health conditions. Emphasizes concepts of health promotion and patient/family centered care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Prerequisite: NCLIN 502 or equivalent, or permission of instructor.

NSG 540 Telehealth Systems and Applications (4)
Introduces challenges for designers and managers of telehealth and remote healthcare networks. Develops abilities of managers, leaders, and researchers of telehealth systems through exploration into systems components. Activities range from research to implementation of system design for applications that bridge geographic distance to the development of practical applications. Offered: jointly with BIME 581; S.

NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2)
Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.

NSG 550 Seminar on Professional Issues in Nursing Education (3) Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.

NSG 551 Health Politics and Policy (3) Critically analyzes the politics of health policy in the United States. Examines leadership and advocacy in influencing politics and policy to address and influence health outcomes.

NSG 552 Social Determinants of Health and Health Equity (3) Examines fundamental concepts, emerging theory, research, and intervention strategies regarding the influence and putative mechanisms of environment and societal factors on health at population, community, and individual levels. Emphasizes an interdisciplinary, multi-level socio-ecological perspective on health and illness with consideration of principles of equity and justice in societal contexts.

NSG 553 Foundations of Health Systems and Health Economics (3) Examines health systems and care delivery in the context of principles of business, finance, and economics. Concepts applied in the design of cost and care effectiveness system-level health improvements. Prerequisite: either NMETH 536, which may be taken concurrently, or permission of instructor.

NSG 554 Population Health and the Environment (3) Introduces core concepts and principles related to the science and practice of environmental and occupational health. Examines historical cases and current issues to illustrate how environmental conditions contribute to injury and illness among human populations. Explores health professionals' roles in actions that protect and promote healthy environmental and workplace settings. Offered: Sp.

NSG 555 Perspectives on Implementing Research in Advanced Nursing Practice (3) Boutain, Landis Provides an overview of contemporary multidisciplinary perspectives, models and research approaches for advanced practice nursing. Focuses on understanding and applying science to practice, and practice to science. Emphasizes ethical practice, scientific responsibility, research curiosity and use.

NSG 556 Program Planning and Health Systems and Multicultural Communities (4) Carolyn Jb Strickland, Jenny Hsin-Chun Tsai Explores culture as it related to the program planning process, methods, theories, attitudes, and skills in health promotion and disease prevention through community engagement. Offered: W.

NSG 557 Physiology and Pathophysiology Across the Life Span (4) Analyzes disordered physiologic responses in individuals within the context of lifespan physiology. Examines pathophysiologic principles and responses, using case studies as exemplars for selected concepts, and the relationship between physiologic and pathophysiologic principles and the evidence basis for current practice. Offered: A.

NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3) Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involving workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.

NSG 559 Prevention Effectiveness in Community Health (1) Focuses on increasing effectiveness of organization- and community-level health promotion
and prevention programs with multicultural communities. Includes web-based tool-kits pertaining to: cross-cultural adaptations of health promotion programs; mental health promotion in communities; institutional readiness to sustain prevention policies; and community engagement in health promotion efforts. Credit/no-credit only.

NSG 560 Pediatric Case Studies (2) Focuses on integration and application of pediatric history-taking, diagnostic reasoning, behavioral and developmental assessment, health promotion, and management of common pediatric conditions in case-based scenarios. Prerequisite: NCLIN 502; NURS 518; NURS 529, any of which may be taken concurrently, or permission of instructor. Credit/no-credit only. Offered: W.

NSG 561 Community Health Systems for Equity (3) Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business, inhibit or promote communal health. Highlights advanced practice, practice inquiry, and leadership implications. Offered: A.

NSG 562 Management of Adults I (2-3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care.

NSG 563 Management of Adults II (3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Offered: Sp.

NSG 564 Management of the Adult III (3) Focuses on evidence-based patient-centered care of older adults with multiple chronic conditions across the continuum form outpatient to acutely or critically ill, including prevention and management of geriatric syndromes. Explores strategies for optimal transition across care settings and across the health continuum.

NSG 565 Primary Care Management Across the Lifespan (1) Clinical application of theories of health promotion and chronic disease management in complex patients across lifespan, utilizing evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision-making, considering the chronic care model, coordination of care, poly-drug therapy, and information systems. Prerequisite: NCLIN 518, which must be taken concurrently; permission of instructor. Credit/no-credit only. Offered: A.

NSG 566 Pediatric Pharmacology (1-2, max. 2) Focuses on clinical application of pharmacologic management in pediatric acute and chronic illnesses. Emphasizes pediatric pharmacotherapeutics including selection of therapeutic agents, indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles. Includes didactic as well as case-based learning strategies. Offered: Sp.

NSG 567 Advanced Pharmacotherapeutics in Complex Case Management (1) Uses a case-based method to examine an evidence-based approach to pharmacotherapeutic management of complex chronic conditions across the lifespan. Incorporates examination of both pharmacologic factors and patient-related factors, such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across multiple settings. Prerequisite: PHARM 514; permission of instructor. Offered: A.

NSG 568 Infant Observation (1-, max. 4) Susan J Spiker, Colleen O. Dillon Includes observing an infant and parent in the first year of life and reflecting on observations. GCPAPN-IMH core course. Four quarter sequence begins each Autumn. Offered: AWSpS.

NSG 569 Pediatric Cardiac Anatomy, Physiology, Pathophysiology, and Management (2) Explores anatomy and physiology of the normal heart,
transition from fetal circulation, and pathophysiology of congenital and acquired cardiac conditions common in pediatric patients. Comprehensive care from diagnosis through medical and surgical management as well as appropriate follow-up care and potential long-term sequelae. Content appropriate for both primary and acute-care providers. Prerequisite: NCLIN 502 or permission of the instructor. Offered: S.

NSG 571 Theory and Science of Population Health Nursing (3) Covers foundational concepts, principles, and historical events related to population health. Examines the evolution and intersection of nursing and public health sciences as they shape contemporary nursing knowledge, competencies, practices, and roles. Considers multidisciplinary frameworks and perspectives to understand health needs and strategies for groups, communities, and populations. Offered: A.

NSG 572 Collaborating for Health Equity (3) Evaluates models and approaches to effective collaboration with communities and other stakeholders toward advancing health equity. Emphasizes application of cultural humility in working across sectors, leveraging existing assets and other resources, and developing collective impact. Develops approaches to build community and organizational capacity, rectify power asymmetries, and institutionalize supportive practices for sustainment. Prerequisite: NSG 571. Offered: A.

NSG 573 Systems Thinking for Population Health (3) Develops systems-level thinking with emphasis on identifying, analyzing, and addressing factors relevant to improving population health. Reviews theories focused on approaches and actions to affect change for the utilization and delivery of health promoting services. Emphasis on developing a theory of action and multicultural considerations to transform the health status of underserved and marginalized communities. Prerequisite: either EPI 511; NSG 572; and NMETH 536, or permission of instructor. Offered: W.

NSG 574 Program Development and Evaluation to Improve Population Health (4) Steps in developing population health interventions and programs, including assessment, prioritization, planning, and evaluation. Appraise best practices and evidence to inform the execution of strategies that improve health. Makes use of reliable data sources and stakeholder engagement, while considering ethical, political, and socio-cultural contexts. Prerequisite: either EPI 511, NSG 572, NMETH 536, or permission of instructor. Offered: W.

NSG 575 Leadership for Population Health (3) Analyzes and applies leadership literature and models for advanced nursing practice in population health. Explores skills in organizational strategic planning and change, with emphasis on roles and responsibilities in advocacy, workforce development, operational management of organizations, and professional ethics. Emphasis on transforming organizations, communities, systems, and other contexts to advance the health of all populations. Prerequisite: NSG 571, or permission of instructor. Offered: Sp.

NURSING (NURS)

NURS 201 Growth and Development through the Life Span (5-6) I&S Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors. Offered: AWS.

NURS 204 Learning Wellness: Healthy Ways to Respond to Stressful Student Life (3) Examines the intimate connections of body, mind, spirit, as well as how stress challenges personal health. Provides overview of methods that respond to stress in health-producing ways, including time management, making healthy choices, and practicing wellness. Discusses evidence for each method and provides experiential components. Credit/no-credit only.

NURS 205 Nursing as a Career in Contemporary Society (1) Introduces an accurate description of nursing career, educational requirements and rationale, including advanced degree career possibilities. Explores breadth of nursing roles in promoting health to individuals, groups, and populations. Links historical development with contemporary practice. Explores factors that promote student and professional success in nursing. Credit/no-credit only.
NURS 210 Science, Evidence and Health: Mastering Health Information and Personal Health Technologies (4/5) NW/I&S, DIV Provides foundations for becoming skilled consumers of health information and health technologies. Using current topics in health, students will learn to navigate the available health information, understand its quality, become familiar with personal health technologies, and link information learned to their health and the health of their communities. Offered: W.

NURS 215 Disaster Management, Risk Reduction, and Health (5) I&S Explores how disasters affect the health of individuals and populations both locally and globally. Covers common health problems associated with disasters and the health care provider's role during disasters. Topics include natural hazards, responses to disasters, communicable and non-communicable disease management, water, sanitation, and hygiene (WASH), nutrition, policy, and personal and community preparedness. Offered: Sp.

NURS 301 General Anatomy (4) NW Introduces the student to general human anatomy, examining both cellular and gross anatomy. The relationship between structure and function is a central focus of course content. Offered: jointly with B STR 301.

NURS 303 Foundations of Professional Nursing Practice (4) Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking healthcare, and the U.S. healthcare system.

NURS 304 Foundations in Pharmacotherapeutics and Pathophysiology (4) Covers concepts of normal and pathophysiological responses to states of health and illness. Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are discussed. Offered: A.

NURS 308 Human Responses II (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

NURS 309 Pharmacotherapeutics in Nursing Practice I (2-) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a two-quarter sequence. Offered: A.

NURS 310 Pharmacotherapeutics in Nursing Practice II (-[2-3]) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.

NURS 401 Fundamentals of Nursing Practice for Illness Care I (6) Examines pathophysiological responses to illness. Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W.

NURS 404 Gerontological Nursing (2) Focuses on concepts and issues relevant to the nursing care of older adults across the care continuum. Major course themes include nursing assessment of the older adult, health promotion, patient safety, geriatric syndromes, gerontechnology and influence of payer systems on care for older adults. Prerequisite: NURS 310.

NURS 405 Fundamentals of Nursing Practice for Illness Care II (6) Examines pathophysiological responses to illness. Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. Second course of a two-quarter sequence.

NURS 407 Culture, Diversity, and Nursing Practice (3) Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse
groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the healthcare needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of healthcare analyzed using specific moral-ethical perspectives. Offered: AW.

NURS 412 Healthcare Systems (3) Introduction to healthcare systems with emphasis on the political economy of health; access to, utilization and quality of healthcare services; health inequities and the social determinants of health; health insurance and reimbursement; global health issues and innovations; leadership and teamwork; and community-engagement/activism to ensure the best health outcomes for all.

NURS 415 Nursing Care of Childbearing Families (3) Apply family and cultural competency concepts to nursing of childbearing families. Focus on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental concepts for health promotion, disease prevention, and nursing therapeutics. Uses current evidence-based research to guide best practices related to childbearing families. Offered: A.

NURS 417 Psychosocial Nursing in Health and Illness (4) Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently.

NURS 419 Transition to Professional Practice (3-5) Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership, and nursing care of individual clients or groups of clients and populations. Offered: SpS.

NURS 420 Community and Public Health Nursing (3) DIV Community and public health nursing theory focused on populations. A synthesis of theory, practice, and research in relation to community/public health in informed by: 1) social justice framework, 2) social determinants of health, 3) community partnerships. and 4) culturally and linguistically appropriate population focused care. Theory class for NCLIN 420

NURS 425 Health Equity (3) This course focuses on understanding and addressing health inequities. Theoretical frameworks and the root causes for health disparity will be reviewed. Health inequities found among marginalized groups will be discussed. This course will also explore approaches, strategies and tools that can be used to address health inequity.

NURS 431 Child Health (2) Focuses on the core processes of growth and development from infancy to adolescence, highlighting the family as the context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics.

NURS 445 Special Topics in Nursing (1-10, max. 10) Guided seminar that focuses on selected professional nursing and patient care topics.

NURS 452 Care Coordination and Transition Management (3) Focuses on exploring the role, skills, and competencies related to care coordination and transition management across care continuum. Course themes include the role of the RN, models of care, evidence-based practice to support patient outcomes and cost savings, patient-centered care planning, collaboration and communication within and between settings/community, the role technology plays, and the structures for reimbursement for services. Prerequisite: NURS 412.

NURS 499 Special Electives (1-4, max. 15) Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Credit/no-credit only. Offered: AWSpS.
NURS 500 Child Management II: Chronic Conditions (3) Kieckhefer, Magyary Focuses on approaches to caring for children and adolescents with chronic physical, neurobiological, developmental, or psychosocial conditions. Emphasizes evidence-based, culturally-competent, family-centered, interdisciplinary, and comprehensive assessment, referral, management, and care-coordination strategies. Offered: S.

NURS 501 Child Mental Health Assessment and Interventions (3) Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized.

NURS 505 Selected Topics in Child, Family, and Population Health Nursing (2-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and healthcare. Offered: Sp.

NURS 507 Older Adult Mental Health Assessment and Intervention (2) Examines the dynamics of mental health research and practice in normal, optimal, and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

NURS 509 Issues in Violence and Aggression for Health Professionals (3) Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

NURS 514 Physiologic Adaptations in Women and Children: Physiologic Adaptations During Pregnancy and Postpartum (1-3, max. 6) Blackburn Analyzes the physiologic adaptations in the maternal-fetal-neonatal unit, fetal development, and developmental adaptations in children from infancy to adolescence. Implications of normal and altered physiologic functions for nursing practice and examination of the basis for selected nursing intervention strategies.

NURS 515 Common Adolescent Health Problems (2-3) Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

NURS 517 Pediatric Pulmonary Anatomy, Physiology, and Pathophysiology: Clinical Applications (2) Content includes normal pediatric lung development infancy through adolescence and explores evidence for diagnosis, management, and follow up of commonly encountered respiratory problems. Emphasizes coordination of care with multiple disciplines when diagnosing and treating children with special health care pulmonary needs and family centered care and professional leadership role. Prerequisite: permission of instructor. Offered: Sp.

NURS 518 Child Management I: Acute Conditions (3) Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.

NURS 520 Evaluation of Clinical Performance in Nursing (3) For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 524 Conceptual Foundations for Healthcare Systems: Organizational Structure and Effectiveness (4) Examines the healthcare delivery system and systems of care within it, including evolution and structure of organized healthcare in the United States, key drivers of organizational effectiveness,
components of care systems, and Innovations in care system design and adoption. Explores use of various types of information technology to monitor and increase organizational effectiveness. Prerequisite: graduate standing. Offered: A.

**NURS 525 Managing Quality Improvement, Access and Utilization (5)** Care-system practices for managing quality and process improvement, access, and utilization within health care systems. Emphasis on managing care systems with a focus on leadership, healthcare access and resource utilization among diverse populations, reimbursement models and team-based strategies, and impacts on healthcare delivery from policy, leadership, and practical perspectives.

**NURS 526 Managing Organizational Effectiveness Within Care Systems (3)** Analysis of management strategies for attaining effective and efficient organizational structures and processes within healthcare systems. Prerequisite: NURS 524 or permission of instructor.

**NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4)** In-depth inquiry into healthcare access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

**NURS 529 Childhood Common Developmental and Behavior Issues (2)** Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

**NURS 534 Aging and Health in Contemporary Society (3)** Explores demographic, cultural, psychological, theoretical, political, and ethical context of aging and health in contemporary society. Content is based on empirical data and policy statements on aging. Analyzes healthcare delivery at an individual, community, and systems level to support optimal functioning across the health continuum for older adults. Offered: Sp.

**NURS 535 Pharmacotherapeutics for Acute/Critical Illness (3)** Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimens for patients with acute/critical illness or injury. Current evidence together with pharmacotherapeutic principles are considered within the clinical context as the basis for decision-making in acute/critical care clinical practice. Prerequisite: PHARM 514 or equivalent. Offered: Sp.

**NURS 537 Symptom Science and Patient-reported Outcomes Research (3)** Focuses on research to understand symptom development and trajectories, design of interventions to prevent and treat symptoms and improve function and quality of life across diverse populations. Recommended: Graduate Student Offered: Sp.

**NURS 539 Management of Patients with Acute/Critical Illness and Injury I (4)** Systematic inquiry into pathophysiology and management of the acute/critically ill or injured across the lifespan. Emphasizes evidence-based assessment, management, and evaluation strategies, including therapeutics and use of technology to support care. Highlights advanced practice provider role and multidisciplinary approach to management. Offered: W.

**NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (1-6, max. 12)** Guided seminar that focuses on selected biobehavioral and health system topics.

**NURS 541 Sexual and Reproductive Healthcare (2/3)** Examines advanced practice sexual and reproductive healthcare issues including health maintenance, contraceptive care, and diagnosis, and treatment of sexual and reproductive health problems across the lifespan. Prerequisite: permission of instructor. Offered: W.

**NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (1-4, max. 4)** Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to the normal childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.
NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (3) Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to at-risk childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

NURS 546 Interpersonal Therapeutics in Advanced Psychiatric Mental Health Nursing: Current Perspectives (3) Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Neuroscience Basis of Advanced Practice Psychiatric/Mental Health (4) Focuses on the role of the neuroendocrine system in the integration of genetic and environmental domains as these pertain to mental health/mental illness. Emphasis will be placed on mental health disorders as these occur across the lifespan. Current research on the role of gene-environment interactions will be addressed. Prerequisite: graduate standing in nursing or permission of instructor.

NURS 549 Assessment in Psychosocial Nursing (3) Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners’ cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

NURS 552 Wellness, Health Promotion, and Disease Prevention (3) Covers theoretical perspectives and evidence for wellness, health promotion, disease prevention, and risk reduction through the lifespan for advanced practice nursing. Examines issues impacting individual, family, population, and community health related to context and culture. Includes strategies for health promotion and behavior change at individual, family, population, and community levels.

NURS 554 Management of Psychiatric Disorders: Adult and Adolescent (3) Focuses on advanced nursing management strategies for psychiatric disorders and primary mental health conditions. Emphasizes the synthesis and integration of scientific evidence to formulate psychiatric diagnoses, and select appropriate interventions for individuals, families, and communities. Measures outcomes through practice inquiry at both system and policy levels. Prerequisite: NURS 549.

NURS 557 Health, Culture, and Community (3) Chrisman A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.

NURS 560 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one’s clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with HSERV 508.

NURS 561 Selected Topics in Comparative Nursing Care Systems (2/3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and healthcare systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and healthcare stressed.

NURS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of culturally relevant healthcare. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.
NURS 564 Biological Intervention in Advanced Practice Psychiatric/Mental Health Nursing (3-4)
Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Legal and ethical issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.

NURS 566 Work Stress and Health (3) Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job-stress are considered and methodological issues examined. Uses social justice framework to explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp.

NURS 569 Management of Patients with Acute/Critical Illness and Injury II (2/3) Continuing inquiry into pathophysiology and management of the acute/critically ill or injured patient across the lifespan. Emphasizes evidence-based assessment, management, and evaluation strategies, including therapeutics and use of technology to support care. The advanced practice provider role and multidisciplinary approach to management are emphasized. Prerequisite: NURS 539 or permission of instructor.

NURS 573 Foundational Seminar in Advanced Practice Nursing (1) Explores specific advanced practice nursing roles and populations within the healthcare system. Links historical development and analysis of health care trends with contemporary specialty practice. Exploration of current issues and trends in the specialty. Credit/No Credit only. Prerequisite: Credit/no-credit only.

NURS 576 Assessment and Collaboration with Communities and Systems (3) Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.

NURS 579 Transcultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

NURS 581 Global Health Nursing (3) Reviews global health topics and the complex local and global conditions that affect the health and illness of individuals, communities, and populations. Emphasizes the multi-faceted roles of health care providers. Offered: jointly with G H 574; A.

NURS 582 Culture, Society, and Genomics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521; Sp.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3-4) Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically
analyze various public health policies from a social justice framework.

NURS 587 Leadership Seminar (1, max. 3) Facilitates transition to successful doctoral study and future professional roles and serves to integrate content and experiences across core courses. Addresses leadership and future roles, cross-disciplinary teamwork, and scientific communication competencies. Topics include collaboration and facilitation, giving and receiving feedback, leadership and career development strategies to facilitate success in the doctoral program. Prerequisite: enrolled in PhD program in Nursing Science; recommended: PhD student in good standing. Credit/no-credit only. Offered: AWSp.

NURS 588 Philosophical Inquiry and Nursing Science (4) Focuses on the epistemological and ontological basis of forms of inquiry for generating knowledge in nursing. Emphasizes approaches to knowledge development as applied to phenomena in nursing. Includes critique of conceptual issues among schools of thought including but not limited to interpretive/postmodern, critical/feminist, and contemporary empiricist and how the philosophical underpinnings influence the generation of research questions. Prerequisite: matriculated student in PhD in Nursing Science Program. Offered: A.

NURS 589 Application of Theory and Evidence in Nursing Science (4) Addresses the role of theory in guiding scientific inquiry in nursing. Concept and theory development, analysis, and critique are examined as foundational to the scientific evidence that informs nursing inquiry, practice, and systems/contexts of health. Distinct approaches for synthesizing and representing knowledge about health phenomena are reviewed for their theoretical elements and contributions to the quality of evidence in nursing science. Prerequisite: NURS 588, or permission of instructor; recommended: matriculation in the PhD in Nursing Science Program. Offered: W.

NURS 590 Ecology of Human Health (5) Provides the conceptual foundation for the study of human health ecology within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied.

NURS 592 The Science of Therapeutics: Theoretical Foundations (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems. Prerequisite: NURS 590 or equivalent with permission of instructor.

NURS 595 Synthesis of Nursing Science (3/4) Provides a forum for the development of a grant proposal in a focused area of nursing science including development of specific aims, background and significance, choosing a research design and method to answer research questions, choosing outcomes and measures, constructing the analysis plan, and addressing important human subject issues. Practice and participation in the peer review process via mock scientific reviews and written critiques. Prerequisite: completion of the year 1 core PhD curriculum; successful completion of preliminary examination. Credit/no-credit only. Offered: Sp.

NURS 597 Health in the Context of Culture (5-6, max. 24) Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.

NURS 599 Selected Readings in Nursing Science (1-6, max. 18) Analysis of synthesis of selected readings with faculty mentor. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

NURS 610 Teaching Practicum (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching/learning at the university level and designed to target specific teaching competencies enhancing the student’s ability to make innovative contributions in teaching. Prerequisite: student in doctoral program; permission of faculty member. Credit/no-credit only. Offered: AWSpS.
NURSING CLINICAL

NCLIN 301 Practicum: Health Assessment and Foundational Skills for Nursing Practice (6) Focuses on foundational nursing skills including health assessment, interviewing and communication, as well as psychomotor skills and critical thinking in the context of nursing care to individuals across the lifespan. Person-centered care and patient safety and are emphasized through use of simulation.

NCLIN 302 Practicum: Health Assessment (3) First in a series of clinical courses emphasizing beginning nursing skills. These skills will include health assessment of the individual and family, communication, and interviewing. Predominant themes include communication skills, physical and psychosocial assessment of the individual across the developmental life span. Offered: A.

NCLIN 306 Practicum: Foundational Skills for Professional Nurses ([1-3], max. 6) This laboratory-based course focuses on psychomotor skills and critical thinking in the context of nursing care to individuals across the lifespan. Patient safety and quality; person-centered care are emphasized through use of simulation. Prerequisite: NCLIN 302, which may be taken concurrently. Credit/no-credit only. Offered: AWSp.

NCLIN 403 Practicum: Pediatric Nursing (4) Provides supervised acute/chronic illness nursing care to pediatrics clients. Emphasizes beginning skills in systematic health and developmental assessment, including person/environment fit, basic competency in selected nursing therapies, and developing role as care agent for pediatrics clients and their families. Prerequisite: NURS 401, may be taken concurrently. Credit/no-credit only. Offered: WSp.

NCLIN 407 Practicum: Nursing Care of Ill Adults (5) Provides supervised nursing care to ill adults and their families. Emphasizes systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing a role as a professional nurse. Prerequisite: NURS 401, which may be taken concurrently. Credit/no-credit only.

NCLIN 409 Population Health Through Community Health Nursing Partnerships (4) Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health, and to promote health/prevention of injury and disease. Credit/no-credit only.

NCLIN 411 Transition to Clinical Practice (7) Capstone clinical in a specialty focusing on critical examination, synthesis, and evaluation of professional nursing care. Client populations include individuals and/or groups reflecting diverse settings, ages, and ethnic communities. Emphasis on mastering theoretical concepts, applying theory and research findings, improving skill competency, and developing leadership capabilities in the clinical setting. Credit/no-credit only.

NCLIN 416 Practicum: Care of Childbearing Families (2) Provides the opportunity for supervised nursing of childbearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing. Prerequisite: NURS 415, which may be taken concurrently. Credit/no-credit only. Offered: WSp.

NCLIN 418 Practicum: Psychosocial Nursing (3-4) Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Credit/no-credit only. Offered: AW.

NCLIN 422 Practicum: Ambulatory Care (3) Provides opportunity for simulated and supervised nursing of individuals in a variety of ambulatory care settings. Discussion of organization of ambulatory care within the health care system and role of professional nursing. Emphasizes concepts of episodic care, triage, health promotion and education, interdisciplinary communication, care coordination, and resource and environmental management. Prerequisite: NCLIN 407. Offered: A.

NCLIN 475 Foundations of Interprofessional Practice ([0-1]-, max. 3) Team-based training in healthcare team functioning for professional nursing
students. Students work and co-learn with other health sciences students in applying knowledge of evidence-based practice, quality improvement principles, and informatics to patient-centered care situations. The course will provide careful attention to development of intra- and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSp.

NCLIN 490 Special Laboratory Elective (1-4, max. 4) Provides supervised laboratory experience to enhance and document clinical skills and decision making. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 499 Clinical Practicum Elective (1-5) Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.

NCLIN 500 Comprehensive Health Assessment (3) Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial, physiological, psychosocial, occupational, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWS.

NCLIN 501 Diagnostic Health Assessment (1-5, max. 5) Examines evidence-informed clinical decision-making in the advanced assessment of symptoms experienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Prerequisite: NCLIN 500, which may be taken concurrently. Credit/no-credit only. Offered: AWS.

NCLIN 502 Pediatric Diagnostic Health Assessment (1-4), max. 4) Uses didactic and experimental learning to develop evidence informed advanced assessment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial, physiological, psychosocial, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

NCLIN 505 Diagnostic Management and Decision Making (2-5) P. CHRISTIANSON Examines diagnostics pertinent to adult and geriatric illnesses from individual and population perspectives in the context of evidence, risk/benefits, equity, cost, access and care quality. Case analyses integrate health assessment and differential diagnoses into selection of appropriate tests. Includes didactic and laboratory/simulation components. Prerequisite: NCLIN 501 or equivalent. Offered: W.

NCLIN 508 Seminar in Group Treatment (1) Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

NCLIN 511 Introduction to Perinatal Care for Advanced Practice (1) Provides an introduction to women's health and prenatal care visit structure, documentation, and skill development necessary to be successful in advanced practice clinical practicum. Both didactic and experiential learning will be used
to prepare students for the systematic collection of subjective and objective data and clinical decision-making in the clinical setting. Intended for NM and PNS students. Prerequisite: permission of track lead. Credit/no-credit only. Offered: W.

NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35) Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the collaboration of care with individuals and/or groups. Credit/no-credit only.

NCLIN 514 Seminar in Home Care for Chronic Illness (3) Home-care services as component of community health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

NCLIN 516 Advanced Clinical Practicum I (4-5) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals and groups. Credit/no-credit only. Offered: Sp.

NCLIN 517 Advanced Clinical Practicum II (5-7) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: S.

NCLIN 518 Advanced Clinical Practicum III (5-7) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: A.

NCLIN 519 Newborn Assessment for Advanced Practice (1) Credit/no-credit only.

NCLIN 520 Clinical Reasoning and Assessment Across the Lifespan (2) Provides the framework to begin evidence-informed clinical decision-making in the advanced assessment of patients across the lifespan. Includes didactic and experiential learning in systematic collection, integration, analysis, interpretation, and communication of focused subjective and objective data, including formulation of diagnostic hypotheses. Emphasizes a holistic approach. Credit/no-credit only. Offered: A.

NCLIN 521 Diagnostic Decision Making and Clinical Skills Laboratory (2) Designed to enhance student's knowledge, performance, and interpretation of various diagnostic tests and clinical procedures in multiple settings. Includes skills across the age span. Skill demonstration and validation occur in the lab classroom. Co-requisite: NCLIN 516; permission of instructor. Credit/no-credit only.

NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and
NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to health-related organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to systems-level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention (3-6), max. 18 Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. Prerequisite: admission to Infant Mental Health certificate program. Credit/no-credit only. Offered: W.

NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues.

NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Prerequisite: NCLIN 542. Credit/no-credit only.

NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Prerequisite: NCLIN 543. Credit/no-credit only.

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Prerequisite: permission of instructor, or NCLIN 501 or equivalent. Credit/no-credit only.

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 549 or permission of instructor. Credit/no-credit only.

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice
Nursing. Prerequisite: NCLIN 550 or permission of instructor. Credit/no-credit only.

**NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10)** Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Prerequisite: NCLIN 551. Credit/no-credit only.

**NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3)** Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: DNP nursing student or permission of instructor. Credit/no-credit only.

**NCLIN 567 Advanced Practice Clinical Practicum (1-6, max. 22)** Practicum used to expand, deepen, or enrich advanced practice skills relevant to area of specialty preparation. Uses clinical activities to reflect an integration of advanced practice, leadership, and practice inquiry. Emphasizes self-directed learning, in-depth clinical skill building and decision-making, continuity of care, and inter professional collaboration. Prerequisite: permission of instructor. Credit/no-credit only.

**NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25)** Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: matriculated MN, DNP students, or post-master’s student, and permission of academic adviser and instructor. Credit/no-credit only. Offered: AWSpS.

**NCLIN 798 Tripartite Immersion Practicum (1-5, max. 5)** Practicum to synthesize and expand knowledge and skills in application of tripartite role of advanced practice, inquiry, and leadership. Analysis of practice issues including reflective practice, collaboration, health systems, technology, ethics, and policy. Prerequisite: permission of instructor and Supervisory Committee. Credit/no-credit only.

**NCLIN 801 Advanced Clinical Practicum Immersion (6-9)** Immersion clinical practicum and seminar providing opportunities to integrate advanced nursing practice competencies, leadership, professional role, and collaboration with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: AW.

### Nursing Methods

**NMETH 403 Introduction to Research in Nursing (1/3, max. 3)** Introduction to concepts and processes of research used in investigating nursing problems.

**NMETH 416 Methods for Research and Inquiry in Nursing I (2)** Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on appraising literature and methods for generating evidence. Offered: A.

**NMETH 417 Methods for Research and Inquiry in Nursing II (2)** Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on searching evidence, appraising evidence, and classifying different types/levels of evidence. Offered: W.

**NMETH 418 Methods for Research and Inquiry in Nursing III (2)** Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on identifying gaps in the literature/evidence, and formulating a plan to conduct research. Offered: Sp.

**NMETH 419 Application of Methods for Research and Inquiry in Nursing (2)** Apply methods for contributing to evidence relevant to nursing. In small groups identify, implement, and disseminate a plan for generating, evaluating, synthesizing, or translating evidence around health, healthcare, and/or nursing practice. Offered: Sp.
NMETH 450 Informatics, Patient Safety, and Quality Improvement (4) Explores concepts of the patient safety, quality and cost-effectiveness of health care, root cause analysis, and use of information technologies that promote quality and safety. Culminates in the design, implementation and evaluation of a small test of change with presentation of findings. Prerequisite: NMETH 403 or ABSN status; recommended: NMETH 403 ABSN status

NMETH 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem. Credit/no-credit only.

NMETH 520 Scholarly Inquiry for Clinical Informatics Practice (5) Evaluation of completed research for scientific adequacy and applicability to clinical informatics practice. The student applies conceptual, theoretical, ethical, and empirical knowledge as a basis for posing clinical informatics research questions, identifying research designs, selecting sampling and data collection strategies and proposing analytic methods to answer a research question. Offered: Sp.

NMETH 522 Data Management for Research Professionals (4) Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no-credit only.

NMETH 523 Project Management and System Analysis for Health Informatics (3) Application of methods of inquiry to develop a scholarly proposal through faculty-guided individual composition. Students select the project topic and complete the conceptual phase of proposal development to fulfill their project plan. Offered: A.

NMETH 524 Healthcare Information Systems and the Electronic Health Records (3) Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in healthcare organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: A.

NMETH 526 Patient-Centered Technologies (3) Current and emerging consumer-centric eHealth technologies. Theories and principles of health, communication, information, cognitive processing, and human-technology interaction. Experts from multiple disciplines and patient/consumers lead seminar presentations and discussions on select topics. Addresses ethical implications of these tools, including health disparities. Offered: Sp.

NMETH 527 Introduction to Clinical Informatics (3) Overview of the history, current efforts, and future challenges in designing, developing, and implementing information and communication technologies for healthcare. Examines how these technologies fulfill the Quadruple Aim: enhancing the patient experience, improving population health, reducing the overall cost of care, and improving the work life of health care providers. Offered: A.

NMETH 528 Computing Fundamentals for Health Professionals (3) Survey of applied computing concepts, including computer algorithms, operating systems, networking, databases, digital privacy and security, applied programming principles to enhance productivity, and data science opportunities and pitfalls in healthcare. Offered: W.

NMETH 529 Database Concepts and Applications in Clinical Informatics (3) Introduction to relational database theory and technology from a clinical informatics perspective. Focuses on transactional database theory, architecture, and implementation in a socio-technical context and analyzes database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Offered: Sp.

NMETH 530 Scholarly Proposal Development (3) Application of methods of inquiry to develop a scholarly proposal through faculty-guided individual composition. Students select the project topic and complete the conceptual phase of proposal development to fulfill their project plan. Prerequisite: NMETH 520. Offered: S.

NMETH 533 Appraisal and Translation of Evidence for Practice (5) Designed to enhance use of methods to critically appraise literature, design, and
implement processes to evaluate outcomes of practice, and promote patient-centered care. Applies relevant findings to improve practice, develop guidelines, and use information technology and research methods. Includes dissemination of findings. Prerequisite: either NMETH 535 or permission of instructor.

NMETH 535 Nursing Inquiry to Support Evidence-Based Practice (4) Works to understand and apply conceptual, ethical, and practical aspects of quantitative and qualitative research methods by design, sampling, data collection, measurement, and analysis, as a basis for evaluating and generating evidence for nursing practice. Develops skills in data management and statistical analysis to utilize in practice-based inquiry. Prerequisite: either NGS 555 or permission of instructor.

NMETH 536 Methods of Program Evaluation and Quality Improvement (4) Teaches principles and practice of program evaluation and quality assurance. Emphasizes current practices in designing, managing, evaluating, and disseminating finding for use in a variety of healthcare contexts. Includes content on use of informatics to improve healthcare delivery effectiveness, efficiency, and safety. Prerequisite: either NMETH 535, which may be taken concurrently, or permission of instructor. Instructors: Jarrett, Walsh

NMETH 570 Seminar in Clinical Research in Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.

NMETH 575 Methodological Issues in Family Research (3) Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to healing situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

NMETH 579 Quantitative Research Methods (5) Provides the foundation for appraising and designing quantitative research (non-experimental, quasi-experimental, and experimental), including research questions, hypothesis testing, methodological and analytic approaches for nursing and health-related sciences. Prerequisite: matriculated student in PhD Nursing Science Program; recommended: epidemiology; and Advanced Nursing Science via Scholarly Inquiry, Translational methods. Offered: Sp.

NMETH 580 Methodological Perspectives in Nursing Inquiry (3) Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci include the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods. Prerequisite: NURS 588 or permission of instructor.

NMETH 581 Observational Research Methods (2-6, max. 6) Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

NMETH 583 Advanced Qualitative Research Methods (4) Advanced seminar and practicum focused on study design, analysis, and dissemination within a selected interpretive tradition. Demonstration of a selected research strategy and method is required. Prerequisite: prior introductory course about qualitative research; and completion of a pre-course survey to determine course preparation.

NMETH 584 Methods: Physiologic Measures (4) Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 588 Mixed Methods Research for Health Sciences (4) Focuses on understanding research designs that combine qualitative and quantitative data collection, analysis and integration to answer critical healthcare questions. Includes application of
analysis and synthesis of selected design approaches using real data. Prerequisite: graduate student standing. Foundational graduate level quantitative and qualitative research courses. Permission of instructor. Offered: A.

**NMETH 590 Special Topics in Nursing Research (2-5, max. 9)** Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

**NMETH 591 The Science of Therapeutics: Design and Outcomes (4)** Synthesizes advanced strategies to evaluate the short- and long-term outcomes of clinical therapeutics with special emphasis on feasibility, pilot studies, and randomized control trials. Includes analysis of completed studies as well as the design of a randomized control trial of a clinical therapeutic. Prerequisite: NMETH 579, NURS 592, or permission of instructor.

**NMETH 592 Clinical Outcome Research II (2-4, max. 4)** Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in NMETH 591. Two modules are offered: a) case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.

**NMETH 594 Innovations in Health Systems Delivery: Implementation and Measurement (3)** Overview of T3/T4 research focusing on translation of effective interventions into practice and the community. Innovations in health services research including frameworks, appropriate study designs, methods, modalities, strategies and tools (formative, implementation, dissemination and communication). Introduces basic cost/comparative effectiveness. Prerequisite: graduate standing. Offered: W, odd years.

**NMETH 595 Designing a Theory-Driven Behavioral Intervention (3)** Focuses on design and development of a theory- and population-informed behavioral intervention to enhance health behavior and outcomes. Examines selected theories of health behavior, including potential contribution to framing a behavioral intervention. Analytical process of "fitting" a theory onto an observed health related problem in a specific population is included as well as research designs and methods to evaluate interventions. Prerequisite: NURS 589 (or equivalent), or permission of instructor; recommended: graduate-level standing.

**NMETH 596 Application of Methods in Conduct of Research (5)** Develops knowledge and skills related to practical implementation of research projects for PhD students. Areas include protocol development, IRB procedures and applications, standard operating procedures, data management, study staff composition, community advisory boards, budget management, and study oversight. Prerequisite: graduate standing in Nursing, or permission of instructor. Offered: Sp.

**NMETH 598 Special Projects ([1-12], max. 12)** Fulfills the requirements of the non-thesis option for Master's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Prerequisite: NMETH 520 or permission of instructor. Credit/no-credit only.

**NMETH 600 Independent Study or Research (**) Credit/no-credit only.

**NMETH 610 Research Practicum (2-4, max. 8)** Hands-on, practical experience as a member of a research team, supervised by graduate faculty in Nursing or related disciplines. Students will participate in team meetings, complete reflection assignments, and contribute to study activities. Possible areas of contribution include subject recruitment and screening; instrument development; data collection, management or analysis, interpretation of results; and dissemination or report writing. Prerequisite: PhD students in Nursing Science. Credit/no-credit only. Offered: AWSpS.

**NMETH 700 Master's Thesis (**) Credit/no-credit only.

**NMETH 800 Doctoral Dissertation (**) Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator. Credit/no-credit only.
NMETH 801 Practice Doctorate Project (3-, max. 6)
Addresses a clinical or systems problem using an evidence-based, practice relevant approach. Students engage in self-reflection, collaborative partnership building, and use of leadership strategies. Analyzes implications of project for future practice and practice inquiry activities. Culminates in written and oral reports for dissemination. Recommended: Student in final year of program Credit/no-credit only. Offered: AW.
SCHOOL OF PHARMACY

MEDICINAL CHEMISTRY

MEDCH 327 The Science of Drugs (3) NW Libin Xu
Introduces students to medicinal chemistry and pharmaceutical sciences. Recommended for sophomore, junior and senior students majoring in chemistry, biochemistry, bioengineering, chemical engineering, public health and other health sciences, and related fields. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; recommended: basic knowledge in general chemistry and organic chemistry. Offered: jointly with PCEUT 327; Sp.

MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 499 Independent Study/Research (*, max. 24) Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

MEDCH 500 Fundamental Medicinal Chemistry (2)
Provides pharmacy students a working knowledge of different aspects of chemical and physical properties of drugs, such as chemical bonds, functional groups, acid and base properties, stereochemistry, ADME properties, and organic transformations in drug actions and metabolism. Recommended: completion of undergraduate organic chemistry series. Offered: A.

MEDCH 501 Medicinal Biochemistry (3) Abhinav Nath
Provides a working knowledge of biochemistry directly related to understanding disease and drug therapy in pharmacy practice. Areas of study include drug metabolism, principles of enzyme kinetics and receptor theory, signal transduction, lipids and membrane transport, structure and function of antibodies, and regulation of protein expression and modification. Recommended: completion of undergraduate biochemistry series. Offered: W.

MEDCH 520 Seminar (1, max. 30) Qingcheng Mao
Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with PCEUT 520.

MEDCH 521 Advanced Medicinal Chemistry (3)
Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOL 442, or permission of instructor. Instructors: Atkins, Nelson Offered: Sp.

MEDCH 527 Drug Metabolism (4) A. RETTIE, K. THUMMEL
Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with PHCOL 527; W, odd years.

MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (2) Atkins, Catalano
Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-protein interactions and protein-lipid interactions, and methods for their study. Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W, even years.

MEDCH 529 Advanced Medicinal Chemistry (4) Atkins, Kunze, Nelson, Rettie, Totah
Covers the fundamental aspects of contemporary medicinal chemistry. Discusses the chemical characteristics of drugs and drug targets, pharmaceutical properties of drugs, drug metabolism, toxicology, and pharmacogenetics. Focuses on various drug classes; their biochemistry, pharmacology, mechanism of action, and toxicology. Offered: W.

MEDCH 530 Integrated Pharmacology (1) Atkins, Beavo, Rettie
Students present and discuss primary literature that integrates aspects of medicinal chemistry and pharmacokinetics with the physiology, pharmacology, and genetics of therapeutic drug
targets. Examples of targets discussed include ion channels and enzymes relevant to cardiovascular disease, and neurodegenerative disease. Credit/no-credit only. Offered: Sp.

MEDCH 531 Laboratory Methods in Protein Therapeutics (3) Hands-on experience with laboratory methods and data analysis used to characterize biophysical properties of therapeutic antibodies. Students measure functional protein interactions and stability of constructs currently used for anti-body-based therapeutics. Background lectures from industry and government scientists highlight the role of these analyses in development of protein-based therapeutics.

MEDCH 532 Chemical and Molecular Pharmacology I: Autonomic and Cardiovascular Drugs (5) Chemical and molecular properties of drugs, their mechanism of action, and adverse effects. Drugs that act on the autonomic nervous system, used to treat endocrine disorders and pathologic conditions that disrupt pulmonary or cardiovascular function, including diabetes and dyslipidemia. Prerequisite: MEDCH 500 and MEDCH 501. Offered: A.

MEDCH 533 Chemical and Molecular Pharmacology II: Blood, CNS, Endocrine and GI Drugs (4) Chemical and molecular properties of drugs, their mechanism of action and adverse effects. Focuses on drugs that act on the blood, in the brain, and are used to treat hematological disorders, inflammation, pathologic conditions that disrupt central nervous system function, and gastrointestinal disorders. Prerequisite: MEDCH 500 and MEDCH 501. Offered: W.

MEDCH 535 Diagnostic Medicinal Chemistry (3) Catalano, Kunze Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Offered: W.

MEDCH 541 Biological Mass Spectrometry (3) Covers the basics of modern ionization methods and mass analyzers; small molecule structure assignment, quantitative assay development by LC-MS and metabolomics; quantitative discovery-based proteomics and validation methods; and peptide sequence determination, post-translational modification mapping, and protein structure determination methods. Prerequisite: permission of instructor. Instructors: Whittington Offered: Sp.

MEDCH 551 Flavin and Heme-Containing Monooxygenases (1) Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavin-containing monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Rettie Credit/no-credit only. Offered: AWSpS.

MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1) Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Nelson Credit/no-credit only. Offered: AWSpS.

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1) Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Prerequisite: permission of instructor. Instructors: Atkins Credit/no-credit only. Offered: AWSpS.

MEDCH 554 Biophysical and Structural Virology (1) Lee Discusses current topics in virus research and literature. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor Credit/no-credit only. Offered: AWSpS.

MEDCH 555 Biophysics and Pharmacology of Dynamic Proteins (1) Discusses current topics in protein dynamics, focusing on intrinsically disordered proteins and drug-metabolizing enzymes. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Instructors: Nath Credit/no-credit only. Offered: AWSpS.
MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1) Discussion of research methodologies and new approaches to elucidate chemical mechanisms and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity. Prerequisite: permission of instructor. Instructors: Totah Credit/no-credit only. Offered: AWSpS.

MEDCH 557 Antibody-Antigen Interactions (1, max. 10) M. Guttman Discussion of research strategies, methods, and current literature in characterizing the structures of antibody-antigen interactions with an emphasis on carbohydrate interactions. Weekly sessions are led by all participating members of the research group. Prerequisite: Permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 558 Human Cytochrome P-450 Biochemistry (1) Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Prerequisite: permission of instructor. Instructors: Kunze Credit/no-credit only. Offered: AWSpS.

MEDCH 559 Biosynthesis, Metabolism, and Analysis of Lipids (1) L. XU Covers recent advanced on oxidative metabolism of lipids, lipid biosynthesis, and application of advanced mass spectrometry to the analysis of lipids and oxidized lipids. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 561 Immunizing and Antimicrobial Agents (3) Rheem A. Totah, Kelly K. Lee A course for pharmacy students focused on introducing the major classes of antimicrobial drugs for treatment of bacterial, viral, and fungal infections. For antimicrobial agents, the focus is on mechanisms of action and drug targets rather than for therapeutic applications. The course will also discuss the issue of antibiotic resistance. In the second half of the course the primary focus will be on vaccines for infectious disease. Prerequisite: MEDCH 501 or equivalent, PharmD major, or permission of instructor; recommended: completion of undergraduate Biochemistry series. Offered: Sp.

MEDCH 562 Medicinal Chemistry (3) W. ATKINS, K. KUNZE, D. PORUBEK, A. RETTIE Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 563 Medicinal Chemistry (3) Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Instructors: Nelson, Rettie Offered: W.

MEDCH 564 Medicinal Chemistry (3) Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Instructors: Atkins, Nelson Offered: Sp.

MEDCH 580 Current Trends in Pharmacy Science and Practice (1, max. 2) Current topics in active research relevant to professional pharmacy practice. Topics include drug metabolism, molecular mechanisms of diseases progression, large molecule drug development and analysis, or related to research within the Department of Medicinal Chemistry. Prerequisite: School of Pharmacy professional or graduate student standing. Undergraduate students with permission of instructor. Credit/no-credit only. Offered: A.

MEDCH 582 Topics in Medicinal Chemistry (1, max. 30) Discussion of pertinent articles from current literature. Credit/no-credit only. Offered: AWSp.

MEDCH 599 Cumulative Exams for Medicinal Chemistry (1) Quarterly cumulative examinations for graduate students. Credit/no-credit only. Offered: AWSp.

MEDCH 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.
MEDCH 700 Master's Thesis (*-*) Credit/no-credit only. Offered: AWSpS.

MEDCH 800 Doctoral Dissertation (*-*) Credit/no-credit only. Offered: AWSpS.

PHARMACEUTICS

PCEUT 327 The Science of Drugs (3) NW Libin Xu
Introduces students to medicinal chemistry and pharmaceutical sciences. Recommended for sophomore, junior and senior students majoring in chemistry, biochemistry, bioengineering, chemical engineering, public health and other health sciences, and related fields. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; recommended: basic knowledge in general chemistry and organic chemistry. Offered: jointly with MEDCH 327; Sp.

PCEUT 499 Undergraduate Research (1-6, max. 12)
Research problems in drug disposition, drug targeting, and drug development. Prerequisite: cumulative GPA of 2.50 and permission of instructor.

PCEUT 501 Pharmacometrics (3) Jashvant D Unadkat
Compartmental (rich and sparse data) pharmacokinetic/pharmacodynamic and physiologically-based pharmacokinetic models. Evaluates how well models fit data. Advantages and disadvantages of various modeling and simulation approaches. Prerequisite: PCEUT 506 and PCEUT 532. Offered: Sp, even years.

PCEUT 502 DrugDisposition Science (2) Introduction to drug metabolism and transport pharmacokinetics. Topics include basic processes of drug absorption, distribution and elimination, enzyme/transporter kinetics, associated experimental methodologies for generating kinetic parameter estimates, and principles of drug-drug interactions and other sources of inter-individual variability. Covers experimental rigor and reproducibility and research ethics. Recommended: biochemistry. Offered: A.

PCEUT 503 Drug Transport and Delivery (5) Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506.
Instructors: Ho, Hu, Mao, Shen, Unadkat, Wang

PCEUT 505 Concepts in Pharmaceutical Sciences I (2) R. HO Provides the student with foundational knowledge of drug properties and interaction with physiology upon administration in vivo, and an understanding of pharmaceutical formulation which is a key disciplinary area within the pharmaceutical sciences and its application to small molecules and protein-based therapeutics. Offered: A.

PCEUT 506 Concepts in Pharmacokinetics (3) Jashvant D Unadkat, Nina Isoherranen Theory and practice. Includes principles of physiological basis of pharmacokinetics, a mechanistic understanding of pharmacokinetic parameters, and the ability to derive basic pharmacokinetic equations and concepts. Prerequisite: either PCEUT 505, PCEUT 531, or permission of instructor. Offered: W.

PCEUT 507 Advanced Pharmacokinetics (3) Yvonne S Lin
Includes absorption kinetics, bioavailability, multi-compartment kinetics, non-linear clearance, pharmacokinetics of biologics, and animal and clinical study design. Prerequisite: either PCEUT 506 and PCEUT 532, or permission of instructor. Offered: Sp.

PCEUT 510 Drug Interactions (3) Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 558; PHARM 559; PHARM 560; PHARM 561; PHARM 563; PHARM 564, and PHARM 565. Instructors: Lin and Horn.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) K. THUMMEL
Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PHG 513; W.

PCEUT 520 Seminar (1, max. 30) Qingcheng Mao
Graduate students attend seminars and make one
formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with MEDCH 520.

**PCEUT 531 Pharmaceutical Formulation: Principles and Dosage Forms (4)**  
Qingcheng Mao  
Provides knowledge base for subsequent pharmacy courses and professional practice. Theory and problems involved in incorporating drugs into stable dosage forms suitable for human use and intended routes of drug administration. Fundamentals of safe and appropriate handling and use of dosage forms. Common dosage forms and basic compounding skills. Recommended: general chemistry. Offered: A.

**PCEUT 532 Clinical Pharmacokinetics (4)**  
Nina Isoherranen  
Covers basic principles of pharmacokinetics and their application to the clinical setting. Includes the design of an appropriate dosing regimen, such as single-dose intravenous and oral administration, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacodynamics, inter-individual variability and the physiological basis of pharmacokinetics. Prerequisite: PCEUT 531. Offered: W.

**PCEUT 534 Principles of Precision Medicine (2)**  
Kenneth E Thummel  
Variation in drug absorption, distribution, elimination, and response, with emphasis on pharmacokinetic-pharmacodynamic relationships. Includes pharmacogenetics, drug-drug interactions, as well as ontogenic and disease state effects and associated precision testing platforms. Uses case studies to integrate possible sources of variation and impact on individual therapeutic decisions. Prerequisite: MEDCH 501; PCEUT 531; and PCEUT 532; recommended: basic understanding of pharmacokinetics and principles of drug absorption, distribution and elimination and drug response. Offered: Sp.

**PCEUT 537 Chemical and Molecular Pharmacology III: Cancer Treatments and Biotherapeutics (4)**  
Covers personal health promotion, treatment of illness, and health care. Explores several medication-related topics, provides insight on drug development and efficacy, and serves as introduction to students contemplating careers in health sciences, especially in pharmacy. Credit/no-credit only. Offered: Sp.

**PCEUT 570 Advanced Research Topics (1, max. 15)**  
Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor. Credit/no-credit only.

**PCEUT 583 Topics in Pharmaceutics (1, max. 30)**  
Kenneth E Thummel, Nina Isoherranen  
Discussion of pertinent articles from current literature and recent laboratory results. Credit/no-credit only.

**PCEUT 586 Biotechnology and Biopharmaceutics (2-3)**  
Edward J Kelly  
Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screening, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses.

**PCEUT 598 Independent Research (*, max. 24)**  
Basic and clinical research problems in drug disposition and effect. Prerequisite: minimum grade of 2.50 GPA and permission of instructor.

**PCEUT 600 Independent Study or Research (*-)**  
Credit/no-credit only.

**PCEUT 700 Master’s Thesis (*-)**  
Credit/no-credit only.

**PCEUT 800 Doctoral Dissertation (*-)**  
Credit/no-credit only.

**PHARMACY (PHARM)**

**PHARM 301 Medications and Health: It’s Not All About Drugs (3)**  
I&S/NW Dawson, Odegard, Weber  
Covers basic principles of pharmacokinetics and their application to the clinical setting. Includes the design of an appropriate dosing regimen, such as single-dose intravenous and oral administration, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacodynamics, inter-individual variability and the physiological basis of pharmacokinetics. Prerequisite: PCEUT 531. Offered: W.

**PHARM 499 Undergraduate Research (1-6, max. 24)**  
Research problems in clinical pharmacy or
pharmaceutical sciences, including preclinical and/or clinical drug development and effectiveness research, and participate in departmental research projects. Prerequisite: permission of instructor. Offered: AWSpS.

PHARM 500 Profession of Pharmacy (1) Introduces the new student to the profession of pharmacy. Provides both an historical and a modern context that assists student pharmacists begin to participate in the profession. Provides an overview of career opportunities. Prerequisite: professional PharmD class 1 student. Instructors: Kedzierski, Weber. Credit/no-credit only. Offered: A.

PHARM 501 Alternative and Complementary Medicines (2) Studies popular alternative and complementary medicines used in the United States. Focuses on herbal products with some coverage of other non-nutritional dietary supplements. Open to professional and graduate students in the Schools of Pharmacy, Nursing, Medicine, Dentistry, and Public Health, or by permission of instructor. Prerequisite: completion of first-professional year in PharmD program. Credit/no-credit only. Offered: A.

PHARM 503 Senior Care Introductory Pharmacy Practice Experience (2) Under faculty supervision, provides clinical services for senior patients in various settings. Includes reviewing charts, interviewing patients, collaborating with other health care providers, and making recommendations on medication therapies to providers and patients. All students participate in an orientation/seminar workshop and in a weekly (for five weeks) clinical pearls workshop. Prerequisite: either successful completion of the first five quarters of the PharmD curriculum or permission of instructor. Instructors: Murphy, Plein. Credit/no-credit only. Offered: A.

PHARM 509 Principles of Evidence Based Medicine III: Critical Evaluation of Published Evidence (1) T. O'SULLIVAN Provides a critical evaluation of medical literature. Prerequisite: permission of School of Pharmacy.

PHARM 510 Contemporary Concepts in Clinical Nutrition Support (2) Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Recommended: biochemistry, anatomy and physiology, or permission of instructor. Credit/no-credit only. Offered: A.

PHARM 512 Timely Topics for Health Professionals (1, max. 4) Explores timely and inter-professionally relevant topics on social justice, health disparities, and health care; including the annual UW Health Sciences "Common Book". Involves active learning methods and group discussions where students and faculty can share thoughts and perspectives. Credit/no-credit only. Offered: AWSpS.

PHARM 513 Medical Devices for Home Healthcare (3) D. DOWNING Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

PHARM 514 Pharmacotherapeutics for Advanced Nursing Practice (3) Hertig Application of principles of pharmacology as foundation for clinical decision making by advanced practice nurses for individuals and populations. Incorporates pharmacotherapy into advanced nursing therapeutics by addressing pharmacokinetics, pharmacodynamics, pharmacogenetics as well as patient-related factors that support selection of commonly used drugs. Selected drugs within categories are compared/contrasted.

PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3) Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regiments for patients with acute/critical illness or injury. Current evidence together with pharmacotherapeutic principles are considered within the clinical context as the basis for decision-making in acute/critical care clinical practice. Prerequisite: either PHARM 514 or equivalent. Offered: A.

PHARM 516 Introduction to Biomedical Regulatory Affairs (3) Hazlet Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.

PHARM 517 Product Development and Manufacturing Systems (3) Hazlet Surveys government oversight of drugs, devices, and
biotechnology derived products; laws and regulations that apply to development, testing, and production.

**PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3)** Hazlet Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct, and follow-up actions; surveillance and studies, reimbursement, and economics.

**PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2)** Black, Simpson Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimes, and identifying judicious pharmacotherapeutic plans.

**PHARM 520 Introduction to Pharmacoeconomics and Outcomes Research (2)** Veenstra Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.

**PHARM 521 Pharmacy Teaching Practicum (1-3, max. 6)** R. Allen, D. Downing, A. Ellsworth, T. Hazlet Allows students the opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences. Prerequisite: PHARM 586, instructors permission. Credit/no-credit only. Offered: AWSp.

**PHARM 525 Advanced Compounding Skills (1)** Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes pre-readings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Prerequisite: PCEUT 531. Instructors: Lawhorn, Needham Credit/no-credit only.

**PHARM 526 Bayesian Biostatistics (3)** Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor’s permission. Offered: jointly with BIOST 526/EPI 540; Sp.

**PHARM 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3)** Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/HSERV 529.

**PHARM 531 Advances in the Diagnosis, Treatment and Management of Epilepsy (2)** Complexity of epilepsy pathophysiology, classification, diagnosis, and treatment. Introduces principles of anti-seizure drug discovery and emerging opportunities for epilepsy research at UW. Five week condensed survey. Prerequisite: permission of Instructor. Offered: W.

**PHARM 532 Methods in Pharmaceutical Policy Analysis (4)** Garrison, Hazlet Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.

**PHARM 533 Pharmacoepidemiology (3)** Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with EPI 533.
PHARM 534 Economic Evaluation in Health and Medicine (3) J. Babigumira, L. Steuten Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.

PHARM 535 Assessing Outcomes in Health and Medicine (3) Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Instructors: Devine, Edwards Offered: jointly with HSERV 584; W.

PHARM 536 Advanced Methods in Economic and Outcomes Evaluation in Health and Medicine (3) Covers advanced methods and techniques for evaluating costs, outcomes, and cost-effectiveness of health, medical, and pharmaceutical interventions. Topics include: network meta-analysis, Markov modeling, probabilistic sensitivity analysis, value of information analysis, utility mapping, conjoint analysis, and budget impact analysis. Prerequisite: either PHARM 534 and PHARM 535 or permission of instructor. Instructors: Carlson Offered: Sp.

PHARM 537 Chemical Dependency Concepts (2) Kedzierski Examines the development of therapeutic frame for working with patients with addictions. Includes the genesis of addiction harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, detection and dealing with substance abuse issues in pharmacy practice, community resources. Course offered to professional PharmD, class 2. Credit/no-credit only. Offered: A.

PHARM 538 Chemical Dependency Issues in Practice (3) Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Prerequisite: PHARM 537. Instructors: Kedzierski Credit/no-credit only. Offered: W.

PHARM 539 Principles of Professional Practice Management (3) Downing, Somani Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

PHARM 540 Systematic Reviews and Meta-Analysis (2) Provides students an overview of best practices to conduct a systematic review of an intervention; then analyzing data through meta-analytic methods. Classroom activities solidify topics covered in lectures and readings. Collaboration with another student to complete a systematic review. Recommended: a basic understanding of statistics and a background in evidence-based medicine. Offered: Sp.

PHARM 541 Pharmacy, Healthcare, and Society (3) Sullivan Introduction to health services and pharmacy practice designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student’s ability to adopt a broad perspective across healthcare disciplines and traditional boundaries.

PHARM 542 Managed Care Pharmacy: Principles and Practice (3) Fullerton, Penna Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. class 2, 3, and 4 PharmD students.

PHARM 543 Pharmacy Laws and Ethics ([2-3], max. 5) Hazlet Studies the laws governing the practice of pharmacy, approaches to legal, and ethical dilemmas in the delivery of pharmaceutical care, and methods of statutory and regulatory reform.
PHARM 544 Survey of Pharmacy Laws (1) Hazlet
Prepare, discuss, and present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in February and March. Email and web access required. Open to fourth-year PharmD students; non-matriculated students by permission only. Credit/no-credit only.

PHARM 548 Current Topics in Geriatrics (1, max. 2)
Case-based approach to principles of geriatric pharmacotherapy and medications commonly prescribed for older adults. Utilizes a "layered-learning model" in which more experienced students teach junior students under guidance of a faculty mentor. Credit/no-credit only. Offered: W.

PHARM 549 Pharmacotherapeutics for Older Adults (3-4)
Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: either PHARM 561; PHARM 565 or permission of the School of Pharmacy. Instructors: Murphy Offered: W.

PHARM 550 Seminar in Geriatrics ([0-1]-1, max. 1) L.
MIKE Students facilitate a discussion with students/faculty about the management of an older adult with complex medication regimen. In addition, students critically review and appraise primary literature relevant to contemporary issues related to geriatric pharmacotherapy. Prerequisite: PHARM 549; permission of the instructor. Credit/no-credit only. Offered: AWSpS.

PHARM 552 Practice-Based Leadership and Project Development (2) J. Arnold, N. Murphy
Strengthens skills necessary to develop, implement, and evaluate innovated programs that improve health, healthcare delivery, and the patient experience. In addition to actively participating in class discussions and group work, students are responsible for submitting weekly assignments, a final reflection paper, and a project proposal. Credit/no-credit only. Offered: W.

PHARM 557 Pharmacotherapeutics II (3) Peggy Soule Odegard
Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of school. Offered: Sp.

PHARM 558 Pharmacotherapeutics I - Pharmacotherapy with Non-prescription (OTC) Drugs (3) Ellsworth

PHARM 559 Pharmacotherapeutics III (4)
Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 560 Pharmacotherapeutics IV (6)
Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: A.

PHARM 561 Pharmacotherapeutics V (7)
Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: W.

PHARM 562 Pharmacotherapeutics VI (6)
Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 563 Applied Pharmacotherapeutics I (2) L.
Mike Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific
care. Prerequisite: permission of School of Pharmacy. Offered: Sp.

**PHARM 564 Applied Pharmacotherapeutics II** (2) L. Mike Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: A.

**PHARM 565 Applied Pharmacotherapeutics III** (2) L. MIKE Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: W.

**PHARM 566 Applied Pharmacokinetics** (2) Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite: PCEUT 532. Instructors: Bauer

**PHARM 567 Cancer Pharmacotherapeutics** (2) Pharmacotherapy of cancer, covering supportive care therapeutics (antibiotics, antiemetics, analgesics,) to the antineoplastic agents. The pathophysiology, staging, and treatment of different cancers is discussed. Specialists from the different oncology practice areas serve as guest lecturers. Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy. Instructors: Gibson, Kwok, McQuary, Vincent Offered: Sp.

**PHARM 568 Health Economics** (3) Applies microeconomics principles and models to understand the nature of healthcare markets and systems. Includes a wide range of health sector activities and policy issues studied by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Instructors: Garrison Offered: W.

**PHARM 569 Fluid and Electrolytes and Parenteral Nutrition** (2) Chan Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro- and micro-nutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special populations (e.g., ICU) . Prerequisite: Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy.

**PHARM 570 Critical Care Pharmacotherapeutics** (2) Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses, and other timely topics reflecting current clinical practice. Prerequisite: third-year PharmD student, or approval of instructor. Instructors: Mike

**PHARM 571 Current Topics in Acute Care Pharmacotherapy** (1) Increases understanding and stimulates discussion in current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by instructors. May be taken alone or concurrently with PHARM 570. Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy. Instructors: Chan

**PHARM 572 Pharmacist Advocacy I: Legislative and Grassroots Affairs** (1, max. 3) Increases student awareness and knowledge of local, state, and national healthcare issues that affect pharmacists and their patients. Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Credit/no-credit only. Offered: A.

**PHARM 573 Pharmacist Advocacy II: Legislative and Grassroots Affairs** (1, max. 3) Downing Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Students actively participate in off-campus legislative and advocacy activities while the Washington State legislature is in session. Credit/no-credit only. Offered: W.

**PHARM 579 Current Topics in Pharmacy** (1, max. 3) Black, Murphy Provides a forum for discussing late-breaking topics that impact current and future pharmacy research and practice. Credit/no-credit only. Offered: AW.
PHARM 581 Global Health Pharmacy: Medicines, Practice, and Policy (2) Andy Stergachis Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Offered: jointly with G H 543.

PHARM 582 Special Topics in Global Health Pharmacy and Medical Products ([1-3]-, max. 6) Babigurmira, Garrison Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no-credit only.

PHARM 584 Pharmacy Practice I - Introduction to Community Pharmacy Practice I (3) R. ALLEN, J. BACCI, K. DAWSON Introduction to development and practice of skills in drug information resources; prescription processing and problem solving; pharmaceutical calculations and compounding; patient information and counseling on over-the-counter and compounded medications. Offered: A.

PHARM 585 Pharmacy Practice II (3) R. ALLEN, J. BACCI, K. DAWSON Continued development and practice of skills in drug information resources; prescription problem solving; pharmaceutical calculations; and patient information and counseling. Emphasizes use of commonly prescribed prescription medication as well as patient-specific characteristics that impact their care. Prerequisite: PHARM 584. Offered: W.

PHARM 586 Pharmacy Practice III: Applications of Public Health Practice (3) R. ALLEN, J. BACCI, K. DAWSON Develops skills that enable public health screening and health promotion in community-based settings: administration of vaccines to adults and adolescents; practical application of community-based health screenings, counseling, and referral; and teaching self-monitoring techniques to patients. Emphasizes communication with members of special populations. Prerequisite: PHARM 585. Offered: Sp.

PHARM 587 Diabetes Prevention (2) Provides students with knowledge/skills to serve as Diabetes Prevention lifestyle coaches. The knowledge/skills developed can be applied to promote health/wellness in the community. Prerequisite: PHARM 563. Instructors: Danielson, McKennon, Odegard Credit/no-credit only. Offered: A.

PHARM 588 Diabetes Care (2) Further develops foundations in the principles of diabetes management and provides practice in application of diabetes-care principles. Develops knowledge and ability to assess, manage, educate, and monitor patients with diabetes. Prerequisite: either PHARM 560; PHARM 564, or permission of the School of Pharmacy. Instructors: Danielson, Odegard Credit/no-credit only.

PHARM 591 Community Collaborations in Healthcare Practicum (2, max. 8) Collaboration with representatives from the Salvation Army Adult Rehabilitation Center and other community sites to improve health literacy and health outcomes of men and women beneficiaries (residents) in addiction treatment and recovery. Prerequisite: permission of instructor. Instructors: Kedzierski Credit/no-credit only. Offered: A.Sp.

PHARM 592 Pharmacy Practice IV: Design and Analysis of Medical Studies (3) Introduces the basic biostatistical concepts used in the medical literature, and the various study designs. Develops students' skills in critically evaluating the medical literature, with the goal of applying these skills to clinical practice. Prerequisite: PHARM 584; PHARM 585; PHARM 586. Instructors: Devine Offered: A.

PHARM 593 Pharmacy Practice V: Institutional Pharmacy Practice (3) Soman Includes discussion and skill development related to contemporary institutional pharmacy practice. Focuses on health information technology, the quality improvement process, MUE and cost management, medication order processing, counseling and medication reconciliation, interpersonal teamwork, and patient-oriented services. Students create and present mock proposals for new guidelines and practice protocols. Prerequisite: PHARM 592. Offered: W.

PHARM 594 Pharmacy Practice VI: Medication Quality and Safety (2) Introduces topics related to medication safety and quality improvement. Describes the role of information technology and the importance of organizational leadership and
teamwork in improving safety. Introduces topics of collaborative drug therapy management and managed care pharmacy practice. Prerequisite: PHARM 593. Offered: Sp.

PHARM 595 Special Studies in Pharmacy (1-6, max. 24) Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.

PHRRMCY 501 Foundations of Being a Pharmacist I (3) First course of a two-quarter series providing a foundation in the knowledge, skills, and attitudes to be an effective patient-centered pharmacist provider. Content is designed to facilitate the development of a student's professional identity and leadership abilities. Prerequisite: PHRMCY 511; recommended: undergraduate course in statistics. Offered: Sp.

PHRMCY 515 Population Health and Pharmacy Management (3) Examines the concept of population health and the pharmacist's role therein as well as pharmacy management for future healthcare practitioners. Offered: A.

PHRMCY 531 Pharmacotherapeutics I (4) First course in a 7-course series providing a foundation in
knowledge for patient-centered clinical case management. Includes introduction to pharmacotherapeutics and special populations, over-the-counter medications and self-care. Offered: W.

PHRMCY 532 Pharmacotherapeutics II (3) Second course in a 7-course series providing a foundation in knowledge for patient-centered clinical case management. Includes assessment and management of drug-related hypersensitivity and various bacterial, fungal, and viral infectious diseases. Prerequisite: PHRMCY 531. Offered: Sp.

PHRMCY 533 Pharmacotherapeutics III (4) Third course in a 7-course series providing a foundation in knowledge for patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of diseases affecting the cardiovascular, pulmonary, renal, and endocrine systems. Prerequisite: PHRMCY 532. Offered: A.

PHRMCY 534 Pharmacotherapeutics IV (4) Fourth in a seven-course series. Patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of diseases associated with hematological, neurological, psychiatric, and gastrointestinal systems. Prerequisite: PHRMCY 533. Offered: W.

PHRMCY 535 Pharmacotherapeutics V (3) Patient-centered clinical case management. Assessment and pharmacotherapeutic management of diseases associated with the hematological, gastrointestinal, and immune systems, as well as pharmacotherapeutics associated with cancer therapy, transplantation, and biological therapies. Prerequisite: PHRMCY 534. Offered: Sp.

PHRMCY 536 Pharmacotherapeutics VI (4) Provides a foundation in knowledge for patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of issues related to gender-related health and care, reproductive health, geriatrics, rheumatological diseases, and diseases affecting the urological, dermatological and ophthalmic systems. Prerequisite: PHRMCY 535. Offered: A.

PHRMCY 537 Pharmacotherapeutics VII (4) Provides a foundation in knowledge for patient-centered clinical case management. Covers pharmacotherapeutics in special patient populations, including children, critically ill patients, obese patients, patients requiring nutrition support, and those with multiple comorbidities. Prerequisite: PHRMCY 536. Offered: W.

PHRMCY 541 Pharmacist Provider Readiness I (2) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: successful completion of on-boarding and compliance requirements for PharmD program. Credit/no-credit only. Offered: A.

PHRMCY 542 Pharmacist Provider Readiness II (2) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMPR 511 and PHRMCY 541. Credit/no-credit only. Offered: W.

PHRMCY 543 Introductory Pharmacist Provider Readiness III (3) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMCY 542 and PHRMPR 512. Offered: Sp.

PHRMCY 544 Pharmacist Provider Readiness IV (3) Delivery of care to patients with increasingly complex health care needs. Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMCY 543 and PHRMPR 513. Credit/no-credit only. Offered: A.

PHRMCY 545 Pharmacist Provider Readiness V (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Emphasizes delivery of care to multiple patients with increasingly complex health
care needs. Prerequisite: PHRMCY 544 and PHRMPR 514. Credit/no-credit only. Offered: W.

PHRMCY 546 Pharmacist Provider Readiness VI (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMCY 545 and PHRMPR 515. Credit/no-credit only. Offered: Sp.

PHRMCY 547 Pharmacist Provider Readiness VII (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series; and Introductory Pharmacy Practice Experiences (IPPEs) and Advanced Pharmacy Practice Experiences (APPEs). Prerequisite: PHRMCY 546 and PHRMPR 516. Credit/no-credit only. Offered: A.

PHRMCY 550 Readiness for Advanced Pharmacy Practice Experiences (5) Capstone course preparing students for transition to Advanced Pharmacy Practice Experiences (APPEs). Involves applying and integrating skills acquired from both the didactic courses and experiential training. Credit/no-credit only. Offered: Sp.

PHRMCY 580 Current Trends in Pharmacy Science and Practice (1, max. 2) Current topic areas pertinent to professional pharmacy practice. Emphasizes use of applied knowledge in pharmaceutical sciences for professional development in critical thinking, data analysis, and in-depth expertise in pharmacy-related research sciences and practice areas. Prerequisite: open to undergraduates with permission of instructor; recommended: general undergraduate science background. Credit/no-credit only. Offered: Sp.

PHARMACY PRACTICE (PHARMP)

PHARMP 511 Introductory Pharmacy Practice Experience in Community Pharmacy I (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orient students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. First in a series of four. Prerequisite: PHARM 584. Credit/no-credit only. Offered: W.

PHARMP 512 Introductory Pharmacy Practice Experience in Community Pharmacy II (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Second in a series of four. Prerequisite: PHARMP 511. Credit/no-credit only. Offered: Sp.

PHARMP 513 Introductory Pharmacy Practice Experience in Community Pharmacy III (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Third in a series of four. Prerequisite: PHARMP 512 and PHARM 586. Credit/no-credit only. Offered: A.

PHARMP 514 Introductory Pharmacy Practice Experience in Community Pharmacy IV (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Fourth in a series of four. Prerequisite: PHARMP 513. Credit/no-credit only. Offered: W.

PHARMP 521 Foundations of Interprofessional Practice I ([0-1], max. 1) J. DANIELSON Team-based training and experiential immersion in healthcare team functioning for PY2 pharmacy students. Work with medical, nursing, physician assistant, social work, dental and dietetics students in patient care situations to apply evidence-based practice and
quality improvement principles. Focuses on development of intra- and inter-professional roles and professional identity. Credit/no-credit only.

PHARM 522 Foundations of Interprofessional Practice II ([0-1], max. 1) J. DANIELSON, P. ODEGARD Team-based training and experiential immersion in healthcare team functioning for PY3 pharmacy students. Work with medical, nursing, physician assistant, social work, dental, and dietetic students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSpS.

PHARM 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1) Introduces institutional pharmacy practice. The role of pharmacists in the inpatient settings, participation in product distribution, provision of drug information, and exposure to quality assurance activities in hospitals. Orientes students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. First in a series of three. Prerequisite: PHARM 514. Credit/no-credit only. Offered: AWSpS.

PHARM 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1) Introduces institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Quality assurance in hospital practice, reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Second in a series of three. Prerequisite: PHARM 531. Credit/no-credit only. Offered: AWSpS.

PHARM 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (1) J. DANIELSON Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient setting, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion, and progress assessment. Third in a three-part series. Prerequisite: PHARM 532. Credit/no-credit only. Offered: AWSpS.

PHARM 541 Introductory Pharmacy Practice Experience in Clinical Skills (1) Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Prerequisite: PHARM 533. Instructors: O'Sullivan Credit/no-credit only. Offered: Sp.

PHARM 571 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARM 572 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARM 573 Advanced Pharmacy Practice Experience in Ambulatory Care (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARM 574 Advanced Pharmacy Practice Experience in Community Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience
PHARMP 575 Advanced Pharmacy Practice Experience in Patient Care (6, max. 30) *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 576 Advanced Pharmacy Practice Experience in Non-Patient Care (6, max. 24) *O'Sullivan* Advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Credit/no-credit only. Offered: AWSpS.

PHARMP 577 Advanced Pharmacy Practice Experience in Senior Care (6, max. 12) *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 578 Advanced Pharmacy Practice Experience Elective (1-6, max. 12) *O'Sullivan* Advanced pharmacy practice experience in patient or non-patient care settings. Credit/no-credit only. Offered: AWSpS.

PHARMP 580 Preparation for Global Health Experience in Low-resource Countries (3) Prepares students to safely and fully engage in clinical healthcare experiences in low-resource countries. Helps students understand common barriers to healthcare access and to appreciate the communicable and non-communicable health issues that individuals and communities experience in these countries. Credit/no-credit only. Offered: Sp.

PHARMP 581 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (9, max. 36) *O'Sullivan* Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 582 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (9, max. 36) *O'Sullivan* Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 583 Advanced Pharmacy Practice Experience in Ambulatory Care (9, max. 36) *O'Sullivan* Six week advanced pharmacy practice experience focusing on providing patient-centered care in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 584 Advanced Pharmacy Practice Experience in Community Pharmacy (9, max. 36) *O'Sullivan* Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 585 Advanced Pharmacy Practice Experience in Patient Care (9, max. 27) *O'Sullivan* Six...
week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 586 Advanced Pharmacy Practice Experience in Non-Patient Care Settings (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Offered: AWSpS.

PHARMP 587 Advanced Pharmacy Practice Experience in Senior Care (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMACY PRACTICE (PHRMPR)

PHRMPR 511 Pharmacist Provider Experience I (2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesday in Practice (WIP) course series. Prerequisite: successful completion of on-boarding and compliance requirements for PharmD program. Credit/no-credit only. Offered: A.

PHRMPR 512 Pharmacist Provider Experience II (2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesdays in Practice course series. Prerequisite: PHRMPR 511 and PHRMCY 541. Credit/no-credit only. Offered: W.

PHRMPR 513 Pharmacist Provider Experience III (2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesday in Practice (WIP) course series. Prerequisite: PHRMCY 542 and PHRMPR 512. Credit/no-credit only. Offered: Sp.

PHRMPR 514 Pharmacist Provider Experience IV (2) Delivery of care to patients with increasingly complex health care needs. Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient-care setting. Part of the Wednesday in Practice (WIP) course series. Prerequisite: PHRMCY 543 and PHRMPR 513. Credit/no-credit only. Offered: A.

PHRMPR 515 Pharmacist Provider Experience V (2) Application of classroom learning in a patient-care setting. Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMCY 544 and PHRMPR 514. Credit/no-credit only. Offered: W.

PHRMPR 516 Pharmacist Provider Experience VI (2) Application of classroom learning to a patient-care setting. Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMCY 545 and PHRMPR 515. Credit/no-credit only.

PHRMPR 517 Pharmacist Provider Experience VII (1-3, max. 2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesday in Practice course series. Emphasizes the delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMCY 546 and PHRMPR 516. Credit/no-credit only. Offered: ASp.

PHRMPR 541 Introductory Pharmacy Practice Experience in Institutional Health-System Setting (1-3, max. 3) Jennifer M Danielson Prepares students for practice in institutional health-system setting. Students learn about the role of pharmacists in inpatient setting; medication use and patient safety; pharmacists’ patient care process; medication knowledge; calculations; ethical, legal and professional behavior; general communication; patient education; drug information; insurance/prescription drug coverage; quality improvement. Prerequisite: PHRMCY 542. Credit/no-credit only. Offered: ASp.
PHRMPR 542 Introductory Pharmacy Practice Experience in Community Practice Settings ([1-2]-, max. 3) Prepares students for practice in the community practice setting: medication use and patient safety; pharmacists’ patient care process; medication knowledge; calculations; ethical, legal and professional behavior; general communication; patient education; drug information; insurance/prescription drug coverage; and health and wellness. Students will spend the majority of class time for this course at a practice site. Prerequisite: PHRMCY 545 and PHRMPR 515. Credit/no-credit only. Offered: A Sp.

PHRMPR 561 Core Community Pharmacy Advanced Pharmacy Practice Experience (7) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a community pharmacy care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: A Sp.

PHRMPR 562 Core Ambulatory Care Advanced Pharmacy Practice Experience (7) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a primary or specialty care clinic setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: A Sp.

PHRMPR 563 Core General Medicine Acute Care Advanced Pharmacy Practice Experience (7) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine acute care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: A Sp.

PHRMPR 564 Core Health System Pharmacy Advanced Pharmacy Practice Experience (7) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a health system acute care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: A Sp.

PHARMACY REGULATORY AFFAIRS

PHRMRA 524 Introduction to Clinical Trials (3) D. Hammond, E. Hayashi Introduces the major concepts under which clinical trials are designed to run. Foci on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.

PHRMRA 525 Implementation and Conduct of Clinical Trials (3) D. Hammond, E. Hayashi Outlines the work of carrying out a clinical trial including the complex work of study initiation, issues of site and data managements, preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.

PHRMRA 526 Project Management and the Business of Clinical Trials (3) D. Hammond, E. Hayashi Addresses the business dimension of clinical trials, including the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

PHRMRA 527 International Regulatory Affairs (3) Develops an understanding of international differences in the regulation of design, manufacture, and post-marketing surveillance of medical products relative to U.S. Food and Drug Administration requirements. Prerequisite: PHARM 504. Instructors: Hammond Offered: A.

PHRMRA 528 Medical Risk Analysis and Management (3) Karp Examines the principles and application of risk management methods in the design, manufacture, and marketing of medical products. Offered: A.

PHRMRA 536 Skills for the Regulatory Affairs Professional (2) Rose Covers essential skills in
regulatory affairs and includes an overview of local medical products companies. Offered: A.

**PHRMRA 545 Statistical Topics for Biomedical Regulatory Affairs Professionals (3)** Applies statistical techniques to meet medical product regulatory commitments including biosimilars, product comparability, design and continued process verification. Prerequisite: introductory statistics. Offered: A.

**PHRMRA 546 Technical Writing for the Medical Products Industries (3)** Teal Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addresses the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.

**PHRMRA 548 Biomedical Regulatory Affairs Practicum ([1-9]-, max. 9)** Feagin Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulatory, clinical, and quality assurance aspects. Includes a project and final report. Offered: AWSpS.

**PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2)** Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Prerequisite: PHRMRA 546 or permission of instructor. Instructors: Teal Credit/no-credit only. Offered: Sp.

**PHRMRA 554 Advanced Medical Products Regulation I (2)** Hammond Provides an in-depth exploration of regulatory issues primarily related to non-clinical and clinical aspects of medical product development. Offered: W.

**PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max. 30)** Hazlet Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization) . Locale based on program impact, unique features, or recent or controversial regulatory issues.

**PHRMRA 595 Special Topics in Regulation (1-6, max. 24)** Offered: AWSpS.
EVANS SCHOOL OF PUBLIC POLICY AND GOVERNANCE

PUBLIC AFFAIRS EXECUTIVE MPA

PA EX 502 Executive Decision Making (3) Examines multiple ways in which analysis can support good decision making by leaders. Examines the normal heuristics managers and leaders use and looks at the role of data analysis, modeling, and expert judgment in management and leadership.

PA EX 503 Strategic Financial Management I (4) Introduction to state and local public finance and nonprofit financial management and analysis; political context and economic forces causing fundamental shift in resources and types of financing for public service; fundamental concepts of financial statements, their nature, and use in the public and nonprofit sectors.

PA EX 504 Executive Economics (3) Explores basic principles of economics needed by executives to become critical consumers of economic analysis, recognizing when and how it is pertinent to decision-making.

PA EX 505 Strategic Financial Management II (3) Focuses on strategic financial management; alternative forms of organizational financial structure; analytic skills and managerial applications of financial accounting and budgeting, techniques of financial analysis, performance budgeting, and debt management; strategic finance linked to contracting, multiple forms of privatization, social enterprise, and managing multiple revenue streams.

PA EX 506 Improving Organizational Performance (3) Integrates organizational mission with the culture using effective communications, outcomes assessments, and other tools for a citizen-oriented approach that relies on modern marketing methods.

PA EX 507 Values and Integrity (3) Provides a personal and value context from which to use the framework and methods to sustain a personal and institutional mission. Examines ranges of intelligence and learning styles to create a foundation of self understanding for leadership strength and integrity.

PA EX 508 Managing People (3) Focuses on how to build a humane and fair workplace consistent with the laws that govern modern employment. Examines critical moments of building a strong culture through evaluation, promoting, firing, discrimination, work force succession, and intergenerational leadership.

PA EX 509 Leading Across Boundaries (3) Examines the modern challenges of leading across complex networks of institutions and stakeholders, examining institutional, national, sectoral, and cultural boundaries. Examines these challenges in the context of globalization and the emergence of multi-sectoral and multi-cultural networks of governance.

PA EX 510 Strategic Negotiations (4) Explores a theoretical framework for negotiations with an equal emphasis on developing negotiation skills through role-plays. Focuses on techniques and nuances of negotiation that are most useful for a manager working in a complex, dynamic environment with multiple stakeholders.

PA EX 511 Strategic Communication (3) Focuses on effective communication, highlighting the advocacy and motivation facet of leadership. In order to understand elements of persuasive communication, emphasizes concepts of negotiation analysis; power and dependence, perceptions of conflict, and finding mutual gains.

PA EX 512 Strategic Policy-Making (4) Examines how managers can expertly function at the intersection of politics, policy, and the wishes of the public.

PA EX 513 Leading for a Legacy (3) Explores the nature of human culture and values and how they relate to human legacy by impacting the quality of humans in an organization and how legacy grows from the values of the trusteeship and stewardship.
PUBLIC POLICY

PUBPOL 201 Introduction to Public Policy and Governance (5) I&S Provides an introduction to policy analysis, governance, and public service. Students learn how individuals organize for common purposes, and design, implement, analyze, and evaluate policy. Students examine how policy decisions emerge and how the values of public, nonprofit, and private sector leaders and institutions affect decisions and implementation.

PUBPOL 201 Truth, Evidence, and Public Policy Analytics (5) I&S, QSR Sound public policy and governance decisions rely on having evidence to support conclusions, as well as having an understanding of the extent of certainty regarding the available evidence. Students will learn qualitative, statistical, experimental, and mixed methods to evaluate: the origins of policy; the management, implementation, and administration of public programs; and the intended and unintended impacts of public policies. Prerequisite: PUBPOL 201; and one of the following: STAT 220, STAT 221/CS&SS 221/SOC 221, or STAT 311.

PUBPOL 313 Evidence-Based Policy Implementation (5) I&S Explores the multidimensional challenge of turning policy and program intentions into valued results on the ground. Understanding why implementation can fall short of expectation requires an understanding of how public/nonprofit organizations work; including their mission, resources, collaborators, and results measurement. Examines the role that evidence can play in service of democratic governance and policy effectiveness. Recommended: PUBPOL 201

PUBPOL 321 Decision-making, Behavior, and Policy Design (5) I&S Provides a foundation in the application of decision theory and behavioral science to study public policy problems. Students learn how cognition, heuristics, biases, emotion, and social dynamics interact in decision-making, and how context and framing shape decisions. Students learn how decision-making influences the effect of public policies on the equity and efficiency of the production and distribution of goods and resources. Prerequisite: PUBPOL 201.

PUBPOL 355 Special Topics in Nonprofits (3-4, max. 12) Covers various topics regarding nonprofit essentials.

PUBPOL 403 Professional Leadership (4) Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.

PUBPOL 499 Topics in Public Policy (3-5, max. 6) I&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.

PUBPOL 501 Legislative Relations (4) Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

PUBPOL 502 Strategy for Public Leaders (4) Explores the design and execution of strategy in public life. Covers concepts and practical tools for making strategy, including situational assessment, strategy design, implementation, and reassessment and revision.

PUBPOL 503 Executive Leadership (4) Cultivate the practical skills required to lead within various operational contexts. Managerial strategies for addressing problems in public, not-for-profit and business organizations will be examined through case studies, general readings, class-exercises, presentations by practitioners, and self-reflection. Throughout this course, students will practice the core skills required for their success as future leaders.

PUBPOL 504 Leadership Ethics in the Public Interest (4) Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.
PUBPOL 505 The Law of Public Administration (3)
Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

PUBPOL 506 Ethics and Public Policy (3/4)
Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PUBPOL 507 Mediation and Negotiation (4)
Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

PUBPOL 509 Managing People in Public and Nonprofit Agencies (4)
Explore the fundamentals of managing people with a specific emphasis on managing people in nonprofit and public agencies. Covers theoretical and practical aspects of management such as: learning how to motivate a team for results; understanding key aspects of human resource law and practice; exploring how lean management can be utilized in nonprofit and government agencies; managing a diverse workforce, and managing in a union environment.

PUBPOL 510 Foundations of American Democracy (4)
Examines the fundamental values such as equality, liberty, dignity, freedom, and autonomy that individuals justify and shape American political culture and institutions. Focuses upon the philosophical and religious foundations of these values and examines the relations among them as well as how they influence American political culture, institutions, and conflict.

PUBPOL 511 Managing Politics and the Policy Process (4)
Examines broad aspects of organizational life and orients students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process.

PUBPOL 512 Managing Organizational Performance (4)
Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership. Prerequisite: permission of instructor; recommended: PUBPOL 511

PUBPOL 513 Public Policy Analysis (4)
Equips students to rigorously assess policy responses to public problems, through defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: permission of instructor; recommended: PUBPOL 516, PUBPOL 517

PUBPOL 514 Psychology for Policy Analysis (4)
Examines basic concepts in social psychology, judgment and decision making, and behavioral economics. Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

PUBPOL 515 Decision Making for Public Managers (3)
Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

PUBPOL 516 Economics for Policy Analysis and Management I (4)
Examines the use of microeconomics in policy analysis. Includes a review of supply, demand, and how government actions (e.g., taxes, subsidies) affects economic efficiency in a competitive market. Develops a deeper understanding of consumer choice as a function of preferences and constraints - the building blocks of demand - and examine how changes in constraints
or opportunities via public policy affects choices. Recommended: elementary economics

**PUBPOL 517 Economics for Policy Analysis and Management II (4)** Serves to deepen student understanding of microeconomic theory with a focus on understanding the economic analysis of market failures and on developing policies to address them. Prerequisite: PUBPOL 516 or permission of instructor.

**PUBPOL 518 Applied Cost Benefit Analysis (4)** Explores the use of benefit-cost techniques for analyzing policy, regulatory, and public investment decisions. Topics to include discounting, estimating demand in primary and secondary markets, risk and uncertainty, and nonmarket valuation. This widely-used applied economics tool will be mastered through lecture, applied problem-solving and a benefit-cost analysis project. Prerequisite: PUBPOL 516 and 517, or permission of instructor.

**PUBPOL 519 Law and Economics (2-4, max. 4)** Examines the applications of Law and Economics to: torts, property, contract, and criminal law; intellectual property, tobacco litigation, employment law, human organ sales, and U.S. regulatory design. Offered: jointly with LAW A 561.

**PUBPOL 520 Intergovernmental Relations (4)** Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

**PUBPOL 521 Managing Public Grants and Contracts (4)** Public organizations are increasingly reliant on partners and contractors for the delivery of public services, using a variety of means to engage these partners, including grants and contracts. This course explores how to best design, manage, and evaluate contracts/grants to improve performance, including the process through which contracts and grants are managed, and how to effectively evaluate performance to inform future partnerships.

**PUBPOL 522 Financial Management and Budgeting (4)** An introduction to financial and management accounting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

**PUBPOL 523 Advanced Budgeting in the Public Sector (4)** Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Recommended: PUBPOL 522, or instructor permission. Recommended: PUBPOL 522

**PUBPOL 524 Public Sector Financing (4)** Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PUBPOL 522, or instructor permission.

**PUBPOL 525 Qualitative Field Methods and Analysis (4)** Provides a review of qualitative field research methods, exposure to writing from the field, and opportunities to try practicing fieldwork. Emphasizes study design, case selection, interviewing techniques, survey design, and field notes. Addresses coding, analysis, writing, and presenting findings.

**PUBPOL 526 Program Evaluation (4)** Introduction to the theory, practice, and politics of program and policy evaluation. Covers the major types of evaluation, including theory of change, implementation and process evaluation, and impact evaluation, as well as quantitative and qualitative data collection techniques, the ethics of evaluation, and engaging stakeholders in evaluation.

**PUBPOL 527 Quantitative Analysis I (4)** Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals.

**PUBPOL 528 Quantitative Analysis II (4)** Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and causal inference methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate
regression. Prerequisite: permission of instructor; recommended: PUBPOL 527

PUBPOL 529 Advanced Quantitative Methods for Policy Analysis (4) Teaches students more advanced quantitative methods applied to program evaluation and policy analysis. Students develop ability to do independent research by developing skills in assessing data qualities, research design, and appropriate application of a variety of quantitative methods. Prerequisite: permission of instructor; recommended: PUBPOL 527, PUBPOL 528

PUBPOL 531 Development Management and Governance (4) Addresses the connections linking governance systems, the management and implementation of public policies, and policy and program outcomes, with focus on capacities and strategies of a broad array of actors engaged in international development. Covers management challenges faced by government bureaucracies and civil society actors, the changing landscape of development assistance, public sector reforms, and human rights in development context.

PUBPOL 532 International Development Capstone (2) Provides students the opportunity to interact with professionals in the field during panel discussions. Students produce a short summative paper as a final project. Students will have completed the preceding International Development Certificate Program (IDCP) core courses: PUBPOL 531 and PUBPOL 533.

PUBPOL 533 Economics of International Development (4) Economics of International Development critically examines the validity and reliability of most common economic development indicators of poverty, growth and inequality, and provides an overview of, and basic literacy around, international macroeconomic topics including debt, aid, trade and financial markets.

PUBPOL 534 Food and Agricultural Policy in Developing Countries (4) Provides an understanding of the role of agriculture in economic development. Examines frontier policy issues in developing countries related to food security and agricultural production. The emphasis is on developing a nuanced understanding of contemporary food and agricultural policy issues, with a firm grounding in theory and history.

PUBPOL 535 American Foreign Policy (4) Examines how the U.S. foreign policy process works, emphasizing formation, content, and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.

PUBPOL 536 Diagnosing and Reforming Corrupt Systems (4) Corruption - one of the greatest obstacles to social, economic, and political development around the world - has become a focal point for efforts to improve public sector performance. This course explores strategies for the prevention and mitigation of corruption across a range of contexts and takes an action-oriented approach, drawing lessons from corruption cases and focusing on what approaches might be undertaken under different circumstances.

PUBPOL 537 Topics in International Affairs (3-5, max. 20) Examines selected topics of interest and import in foreign policy and international affairs or development. Focuses on an in-depth analysis of policy issues considering economic, institutional, and political dimensions.

PUBPOL 538 International Organizations and Ocean Management (3) Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with SMEA 507.

PUBPOL 539 Values in International Development (4) Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

PUBPOL 540 Advanced Policy Analysis (4) Provides a more critical view of policy analysis by taking a deep dive into topics related to policy analysis and questioning underlying assumptions while conceptualizing policy analysis within societal structures. Recommended: PUBPOL 513.
PUBPOL 541 The Role of Nongovernmental Organizations in International Development (4)
Explores issues faced by nongovernmental organizations (NGOs) working in developing and transition countries, including perspectives from international and indigenous NGOs and community-based organizations. Topics covered include relationships between NGOs and the state, the market, intended beneficiaries, and funder relationships. Key issues discussed include the challenges of funding, participation, advocacy humanitarianism, and social change.

PUBPOL 542 Computational Thinking for Governance Analytics (4)
Combines data science and computational social science in a policy studies structure. Introduces algorithmic thinking and develops good practices in reproducibility for professional work in policy research.

PUBPOL 543 Visual Analytics for Policy and Management (4)
Provides students with visualization tools to show insights to political or scientific communities, while presenting different strategies to avoid biased interpretations. Emphasis on the building of templates to produce information.

PUBPOL 544 Tax Policy and Analysis (4)
Provides theoretical and empirical tools to analyze current tax policy and proposed tax reforms. Prerequisite: either PUBPOL 517 and PUBPOL 528, or permission of instructor.

PUBPOL 547 Water Resource Economics (4)
Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on water resources, and economic approaches to mitigate these effects.

PUBPOL 550 Managing Nonprofit and Philanthropic Organizations (4)
Focuses on the roles and practices of nonprofit and philanthropic organizations. Provides an overview of topics relevant to nonprofit and social sector organizations, including theoretical foundations, legal forms, governance and leadership, cross-sector relationships, revenue streams and fundraising, and policy advocacy.

PUBPOL 551 Measuring Social Impact: Advanced Program Design and Evaluation (4)
Topics covered include applying theory of change and design thinking to evaluation; formative and process evaluation; qualitative and participatory approaches; new approaches in quasi-experimental and experimental methods, and evaluating advocacy and collective impact. Prerequisite: instructor permission; recommended: PUBPOL 526.

PUBPOL 552 Philanthropy and Society (4)
Provides students a holistic background of the philanthropic sector. Begins with an in-depth analysis of history and context and ends with a discussion of current strategies and approaches to giving by foundations. Builds in sequence: history, context, sub-sectors, accountability, and results.

PUBPOL 553 Nonprofit Financial Management (4)
Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.

PUBPOL 554 Nonprofit Organizations and Public Policy (3)
Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

PUBPOL 555 Topics in Nonprofit Management, Philanthropy, and Social Enterprise (3-5, max. 20)
Covers a range of topics applied to nonprofit, philanthropic, and social enterprise organizations.

PUBPOL 556 Public-Private Partnerships (4)
Provides a comprehensive overview and examination of partnerships and their implications for public policy and nonprofit and public management. Examines the diverse array of partnerships in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

PUBPOL 557 Financial Modeling for the Public Sector (4)
Covers financial modeling concepts at the core of public sector finance including: cash flow (or revenue) forecasting and proforma financial statements, capital life-cycle cost analysis, portfolio...
valuation and risk management, debt sizing, structure, and refinancing.

**PUBPOL 558 Collaboration and Management Across Sectors (4)** Organizations from different sectors (public, business, nonprofit) increasingly work together to achieve unique, collaborative outcomes. Managing cross-sector relationships presents dynamic process and governance challenges that go well beyond the difficulties of managing within an organization. Explores the opportunities and risks involved in working across organizational boundaries.

**PUBPOL 559 Advanced Performance Management: Quadruple Bottom Line Lab (4)** Examines the Quadruple Bottom Line as a conceptual framework and emerging set of tools for a more comprehensive and balanced accounting of organizational and institutional behavior and outcomes related to economic efficiency, social equity, environmental sustainability, and creative cultural vitality.

**PUBPOL 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4)** Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

**PUBPOL 561 Urban Economics and Public Policy (4)** Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and growth management, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: successful completion of an introductory microeconomics course or permission of the instructor. Offered: jointly with URBDP 561.

**PUBPOL 562 Immigration Policy (4)** Builds foundational knowledge of American immigration policy, providing students with the conceptual and analytical tools required to critically evaluate any and all arguments made in current policy debates, and to move toward making unique and original contributions to those debates.

**PUBPOL 563 Intergroup Relations and Public Policy (4)** Explores how social psychological research on intergroup relations is pertinent to various aspects of public policy. Includes historical and current perspectives. Examines how the literature describes how individuals perceive, judge, and feel about individuals from various social groups. The groups discussed ranges from minimal groups to classic social groups.

**PUBPOL 564 Housing and Social Policy (4)** Provides an overview of the field of housing policy and its interrelationships with social problems in the United States. Explores various dimensions of housing problems with an emphasis on housing affordability and examines the primary policy tools used to respond to housing problems.

**PUBPOL 565 Topics in Urban Affairs (3-5, max. 20)** Examines various topics of public importance in urban policy. Integrates the political, managerial, economic, and technical dimensions of these issues.

**PUBPOL 566 Community Economic Development (4)** Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.

**PUBPOL 567 Community Engagement and Urban Governance (4)** Investigates interactions between citizen participation and efforts to measure and improve policy and program performance in large cities. Develops analytic frameworks and practical strategies for sustaining and enhancing participation and performance.

**PUBPOL 568 Social Justice and Public Policy (3/4)** Examines the values of social justice that motivate action in the public arena; thinks about how those values create concerns and solutions; and explores issues of equity and liberty, of balancing the rights of the individual, the common good, and redistribution.

**PUBPOL 569 Race and Public Policy (3-4)** Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.
PUBPOL 570 Foundations of Social Policy (3)
Examines major institutions and programs in social policy including: income maintenance, social services, education, and healthcare. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.

PUBPOL 571 Education, The Workforce, and Public Policy (4)
Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, and among the various levels of the education system, underutilized workers, race and gender issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

PUBPOL 572 Race and Equity in Policy and Governance (2, max. 4)
An introduction for understanding race and equity in policy and governance. Power, privilege, and disadvantage are distributed based on race, skin color, and ethnicity. Develop the ability to identify and critique racist or racialized policies and management practices; examine your own experience of race, privilege, and oppression; and learn to use tools for increasing racial equity and inclusion in public, nonprofit, and private sectors. Credit/no-credit only.

PUBPOL 573 Topics in Education and Social Policy (3-5, max. 20)
Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

PUBPOL 574 Economics of Race and Inequality in the United States (3/4)
Covers the history of racial inequality over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.

PUBPOL 575 Taxes and Social Policy (4)
Examines major areas of social policy that interact with the tax system. Prerequisite: either PUBPOL 517 and PUBPOL 528, or permission of instructor.

PUBPOL 576 Poverty and Anti-Poverty in the United States (4)
Examines the nature and extent of poverty in the United States, its causes and consequences, and the antipoverty effects of public policies.

PUBPOL 577 Economics of Health Policy (4)
Uses an economic perspective to examine a variety of issues related to the provision of medical care in the United States. Topics include medical care demand, the role of health insurance, the health and financial consequences of being without insurances, health care spending, and the Affordable Care Act. Prerequisite: instructor permission; recommended: PUBPOL 517

PUBPOL 578 Asset Building for Low Income Families (4)
Explores assets and finances for low income families primarily in the United States. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.

PUBPOL 579 Child Well-being and Public Policy (4)
Covers the contexts of child well-being, the arguments for government intervention during childhood, and 4-5 specific topics in child policy. Integrates theory and evidence from Developmental Psychology, Economics, Sociology, and Social Neuroscience. Focuses on US Federal, state, and local policies.

PUBPOL 582 Communicating Climate Change (4)
Surveys climate change communications and their role in achieving climate change policy goals. Assesses the ethics and science of climate change communication. Explores theories and frameworks to evaluate and improve climate change communications. Examines the role of climate change communication as a policy tool.

PUBPOL 583 Science, Technology, and Public Policy (4)
Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy,
information technology, global warming, robotics, national security, homeland security, and space exploration.

**PUBPOL 585 Topics in Science, Technology, and Public Policy (3-5)** Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

**PUBPOL 587 Native Nations, Native Lands, Native Waters (4)** Examines the ways that Native Nations in the US function as self-governing sovereigns and the ways that Native Nations govern their lands and waters. Considers how Native Nations interact with other governments and the consequences of those interactions.

**PUBPOL 589 Risk Assessment for Environmental Health Hazards (4)** Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEWA 560/ENV H 577; A.

**PUBPOL 590 Environmental Policy (4)** Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Explores different policy tools for environmental protection, including command-and-control regulation, market-based incentives, third-party certifications, and collaborative partnerships.

**PUBPOL 592 Resource Policy and Administration (4)** Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with SEFS 571.

**PUBPOL 593 Climate Change and Energy Policy (4)** Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental, and equity considerations; government research and development programs.

**PUBPOL 594 Economic Approaches to Environmental Management (4)** Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples. Prerequisite: PUBPOL 516; PUBPOL 517; PUBPOL 527; PUBPOL 528

**PUBPOL 595 Topics in Environmental Policy and Management (3-5, max. 20)** Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

**PUBPOL 596 Environmental Risks and Values (4)** Explores a range of sources of risk to human health and the environment, and the values that color communication, perception, and decision making about risk. This topic lies at the core of an ongoing conversation between communities, governments, scientists, the media, and others. Topics include energy, climate, water supply, emerging technology, and environmental justice.

**PUBPOL 597 Environmental Decision Analysis (4)** Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.

**PUBPOL 598 Administrative and Policy Professional Skills Workshop (1-3, max. 12)** Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice. Credit/no-credit only.
PUBPOL 599 Special Topics (1-6, max. 28) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

PUBPOL 600 Independent Study or Research (*) Evans School MPA students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School MPA Student Handbook for details.

PUBPOL 605 Degree Project ([1-8]-) Evans School MPA students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School MPA Student Handbook for details.

PUBPOL 608 Capstone Project Seminar ([4-8]-) Meets the capstone project requirements as part of the Evans School MPA curriculum. Students work in a supportive seminar environment facilitated by peers and faculty to complete team-based capstone degree projects.

PUBLIC POLICY AND MANAGEMENT

PPM 500 Proseminar in Public Policy and Management (1, max. 9) Engages students with faculty to discuss research in public policy and management. Provides an effective means to become familiar with research agendas and opportunities in this field, and other aspects of socialization into the academic process, including teaching, grant writing, and publishing. Credit/no-credit only.

PPM 502 Research Design (4) Provides a rigorous foundation for interdisciplinary research design. Introduces iconic types of theory (predictive, interpretive, and explanatory) and the philosophical foundations underlying these. Reviews a range of methodological approaches to research: experimental and quasi-experimental, ethnographic, comparative case-study, statistical, meta-analytic, simulations, and triangulation.

PPM 504 Perspectives on Institutions (4) Prepares doctoral students for careers in research and teaching public policy, management, and leadership by introducing foundational scholarship on the major institutional forces that influence the policy process. Examines key critiques as well as integration and application of the perspectives to public policy and management challenges.

PPM 506 Advanced Microeconomics for Policy Analysis (4) Introduction to advanced economic theory. Covers core models in consumer theory, producer theory, and public economics. Topics include: consumer choice, the theory of the firm, choice under uncertainty, neoclassical and behavioral models of inter-temporal choice, basic game theory, externalities, public goods, and an introduction to welfare economics. Recommended: multivariate calculus; intermediate microeconomic theory.

PPM 508 Public Policy Processes (4) Political science frameworks, approaches, and theories concerning development and implementation of public policies within American and other democratic political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and the role of institutions in constraining and enabling policy change.

PPM 510 Public Policy Analysis (4) Reviews public policy analysis and evaluation building on prior study of microeconomics, policy processes, research design, and statistics. Covers theoretical and interdisciplinary frameworks and applications of empirical methods to policy problems and solutions, and considers regularities in incidence, and effects of the use of alternative policy tools.

PPM 512 Data Analysis Practicum (4) Develops the methodological capacity to undertake independent research. Includes reading, critiquing, and replicating portions of selected empirical papers from a range of scholarly areas. Provides opportunities to deal with issues of research design, data limitations, measurement, model specification, and interpretation.

PPM 514 Organizations, Management, and Theory (4) Explores key theories of organizations and management employing perspectives from sociology, political science, economics, and public management. Theories are applied in the context of private, nonprofit, and public sector organizations. The course builds on the required course PPM 504 Institutional Perspectives. Recommended: PPM 504
PPM 599 Topics in Public Policy and Management (1-6, max. 16) Examines various research topics of importance in public policy and management.

PPM 600 Independent Study or Research (*) Evans School PhD students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School PhD Student Handbook for details.

PPM 603 Teaching Mentorship (2, max. 50) Evans School PhD students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School PhD Student Handbook for details. Credit/no-credit only.

PPM 800 Doctoral Dissertation (*) Evans School PhD students only. See current Time Schedule for link to application. By arrangement with doctoral dissertation supervisor. Refer to Evans School PhD Student Handbook for details.
SCHOOL OF PUBLIC HEALTH

BIOSTATISTICS

BIOST 111 Lectures in Applied Statistics (1) NW
Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no-credit only. Offered: jointly with STAT 111; Sp.

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NW Introduces biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research. Includes biomedical study design, randomization, graphical data displays, control bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations.

BIOST 302 Forensic Genetics (3) I&S/NW, QSR Bruce S Weir Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with PHG 302; W.

BIOST 310 Biostatistics for the Health Sciences (4) QSR Introduction to statistics for students who plan to major in health sciences. Uses case studies from popular and scientific literature to study topics such as data description, study design, estimation, hypothesis testing, regression. Emphasizes concepts and interpretation rather than computation. Students should be able to interpret graphs and use concepts covered in 2nd-year algebra, including linear equations, logarithms, summation notation. Offered: AWSp.

BIOST 311 Regression Methods in the Health Sciences (4) QSR Introduces regression methods for analysis of continuous, binary, and time-to-event (survival) data. Covers linear regression; logistic regression; and proportional hazards regression, all at an introductory level. Makes use of examples drawn from the biomedical and health sciences literature. Prerequisite: BIOST 310.

BIOST 401 Computational and Applied Genetic Epidemiology (5) QSR Alison Fohner Advanced topics in genetic epidemiology for undergraduate students, focusing on hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students will investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: PHG 301 or prior background in basic genetics and statistics. Offered: jointly with EPI 410/PHG 401; Sp.

BIOST 405 Introduction to Health Data Analytics (3) Covers the process of and tools used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with HIHIM 405.

BIOST 406 Research Design and Statistics for HIHIM (3) Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with HIHIM 425/STAT 406.

BIOST 425 Introduction to Nonparametric Statistics (3) NW Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: Either STAT 311 and STAT 340, STAT 390, or STAT 391. Offered: jointly with STAT 425.

BIOST 499 Undergraduate Research (1-10, max. 30) Supervised reading programs; library and field research; special projects.
BIOST 502 Introduction to Statistics in Health Sciences (4) Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Emphasizes applications in health sciences. Offered: W.

BIOST 503 Application of Statistics to Health Sciences ([0-3]-, max. 3) Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: Sp.

BIOST 504 Foundations of Public Health for Biostatistics (2) Introduces students to key foundational concepts in Public Health and highlights the role of biostatistical methods and applications. Prerequisite: BIOST 522 or STAT 512; and BIOST 514 or BIOST 517 (can be taken concurrently) Credit/no-credit only. Offered: A.

BIOST 505 Writing, Presentation, and Collaboration Skills for Biostatistics (2) Develops communication and collaboration skills for biostatisticians working as part of a biomedical research team. Topics include effective dialogue with collaborators; summarizing scientific ideas and questions and translating these to targets of inference; collaborating to develop appropriate study designs and statistical analyses; communicating statistical analysis methods and results in clear written summaries and graphical displays. Prerequisite: BIOST 514; and BIOST 515, which may be taken concurrently; recommended: at least one quarter of both mathematical statistics and applied Biostatistics at the graduate level. Credit/no-credit only. Offered: W.

BIOST 507 Health Data Analytics (3) Ken White Healthcare organizations generate a large number of clinical performance metrics. Extracted data from different data systems is used to display relevant metrics in dashboards that are meaningful to senior leadership. Statistical tools may determine if differences in performance are significant and what factors are associated with the differences. Predictive models may then be built and inputs varied to obtain performance improvements. Recommended: beginner Excel skills. Offered: jointly with HIHIM 524; Sp.

BIOST 508 Biostatistical Reasoning for the Health Sciences (4) Provides a broad overview of biostatistical methods. Students are introduced to the data summaries and presentation, statistical inference (including hypothesis testing, p-values, and confidence intervals), sample size calculation, and modeling approaches such as linear regression analysis. Includes hands-on data analysis. Prerequisite: EPI 511 or instructor’s permission Offered: W.

BIOST 509 Introduction to R for Data Analysis in the Health Sciences (2) Introduction to R for data analysis. Covers installing R; scripts; reading in data and writing output; using help files; using functions; writing functions; graphics; R packages; data manipulation; loops; permutation tests; bootstrapping; and fitting models. Prerequisite: upper-division course in statistics or permission of instructor.

BIOST 510 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Instructors: Spiekerman Offered: jointly with OHS 568; S.

BIOST 511 Medical Biometry I (4) Presents the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.

BIOST 512 Medical Biometry II (4) Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the
biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOL 511, BIOL 517, PHI 512, or equivalent. Offered: W.

**BIOST 513 Medical Biometry III (4)** Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOL 512 or permission of instructor. Offered: Sp.

**BIOST 514 Biostatistics I (4)** Presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test. Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

**BIOST 515 Biostatistics II (4)** Introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons. Real biomedical data sets analyzed. Prerequisite: BIOL 514, biostatistics major, or permission of instructor. Offered: W.

**BIOST 516 Statistical Methods in Genetic Epidemiology (3)** Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOL 513 or BIOL 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with EPI 535/PHG 519.

**BIOST 517 Applied Biostatistics I (4)** Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right-censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

**BIOST 518 Applied Biostatistics II (4)** Multiple regression for continuous, discrete, and right-censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOL 517 or permission of instructor. Offered: W.

**BIOST 519 Advanced Epidemiologic Methods I (3)**

Steve Mooney

First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 512 and EPI 513 Offered: jointly with EPI 515.

**BIOST 520 Advanced Epidemiologic Methods II (4)**

Brandon Guthrie

Second of a series of 2 courses whose objective is to deepen students’ knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with EPI 516.

**BIOST 522 Statistical Inference for Biometry I (4)**

This is the first in a two-course sequence that introduces the theory of statistical inference that provides foundations to common biostatistical methods. Topics of the sequence include basic concepts of probability, parametric distributions, exact and asymptotic sampling distribution of statistics, maximum likelihood estimation, unbiased estimating equations, theory of hypothesis testing and Bayesian inference. Prerequisite: either STAT 395, STAT 421, STAT 423, STAT 504 or BIOL 514 (can be taken concurrently) Offered: A.

**BIOST 523 Statistical Inference for Biometry II (4)**

This is the second in a two-course sequence that introduces the theory of statistical inference that provides foundations to common biostatistical methods. Topics of the sequence include basic concepts of probability, parametric distributions, exact and asymptotic sampling distribution of statistics, maximum likelihood estimation, unbiased estimating equations, theory of hypothesis testing and Bayesian inference. Prerequisite: BIOL 522, or permission of instructor. Offered: W.
BIOST 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

BIOST 525 Advanced Methods for Global Health II (4) Brad Wagenaar Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with EPI 553/G H 536/HMS 536; W.

BIOST 526 Bayesian Biostatistics (3) Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor’s permission. Offered: jointly with EPI 540/PHARM 526; Sp.

BIOST 527 Nonparametric Regression and Classification (3) Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Offered: jointly with STAT 527; Sp.

BIOST 528 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with EPI 553/G H 536/HMS 536; W.

BIOST 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

BIOST 531 Statistical Methods for Analysis with Missing Data (3) Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs’ sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with EPI 531.

BIOST 532 Research Ethics in the Data Sciences (2) E. Sheppard Exposes students to ethical issues in the conduct of biomedical research, particularly the computation, interpretation, and communication of statistics. Provides the knowledge and resources needed to practice statistics ethically in this domain. Helps students formulate justified responses to ethical challenges, and nurtures a sense of professional responsibility to take action. Credit/no-credit only. Offered: Sp, even years.

BIOST 533 Theory of Linear Models (3) Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423 or BIOST 515; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.
BIOST 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

BIOST 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4) Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software computer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOST 536 or EPI 536. Offered: jointly with EPI 537; W.

BIOST 540 Longitudinal and Multilevel Data Analysis (3) Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with software gained by analysis of data and critiques of published analyses. Prerequisite: either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

BIOST 544 Introduction to Biomedical Data Science (3/4) Provides an introduction to biomedical data science with an emphasis on statistical perspectives, inducing the process of collecting, organizing, and integrating information toward extracting knowledge from data in public health, biology, and medicine. Prerequisite: either BIOST 511 or equivalent; either BIOST 509 or equivalent; or permission of instructor. Offered: A.

BIOST 545 Biostatistical Methods for Big Omics Data (3) This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with GENOME 545/PHG 545.

BIOST 546 Machine Learning for Biomedical and Public Health Big Data (3) Provides an introduction to statistical learning for biomedical and public health data. Intended for graduate students in SPH/SOM. Prerequisite: BIOST 511 or BIOST 512 and familiarity with R. Offered: W.

BIOST 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 551; GENOME 371; or permission of instructor. Offered: jointly with STAT 551; A.

BIOST 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 552; W.

BIOST 554 Introduction to Biomedical Data Science (3/4) Provides an introduction to biomedical data science with an emphasis on statistical perspectives, inducing the process of collecting, organizing, and integrating information toward extracting knowledge from data in public health, biology, and medicine. Prerequisite: either BIOST 511 or equivalent; either BIOST 509 or equivalent; or permission of instructor. Offered: A.

BIOST 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to
geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555/G H 534.

**BIOST 556 Introduction to Statistics and Probability (5)** Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with DATA 556/STAT 556; A.

**BIOST 557 Applied Statistics and Experimental Design (5)** Inference statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BIOST/DATA 556 or instructor’s permission. Offered: jointly with DATA 556/STAT 556; W.

**BIOST 558 Statistical Machine Learning for Data Scientists (5)** Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with DATA 557/STAT 558; Sp.

**BIOST 561 Computational Skills for Biostatistics I (1/2)** Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: biostatistics and statistics graduate student. Credit/no-credit only. Offered: A.

**BIOST 562 Computational Skills for Biostatistics II (1)** Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 561 or permission of instructor. Credit/no-credit only.

**BIOST 563 Computing and Research (2)** Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 562 or permission of instructor. Credit/no-credit only.

**BIOST 565 Statistical Evaluation of Biomarkers (3)** Covers evaluation of biomarkers for diagnosis; decision-theoretic assessment tools; measures of the incremental value of a new biomarker; evaluation of risk prediction models; evaluation of biomarkers for prognosis or for guiding therapy; statistical learning for developing a diagnostic/prognostic score; and clinical trial designs for biomarker guided decisions. Prerequisite: BIOST 515; either BIOST 518 or both BIOST 512 and BIOST 513; or equivalent.

**BIOST 570 Advanced Regression Methods for Independent Data (3)** Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelihood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: STAT 512 and STAT 513; BIOST/STAT 533 or STAT 421/STAT 502 and STAT 423/STAT 504; a course in matrix algebra. Offered: jointly with STAT 570; A.

**BIOST 571 Advanced Regression Methods for Dependent Data (3)** Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST 570/STAT 570. Offered: jointly with STAT 571; W.

**BIOST 572 Advanced Regression Methods: Project (3)** Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with STAT 572; Sp.

**BIOST 576 Statistical Methods for Survival Data (3)** Statistical methods for censored survival data arising from follow-up studies on human or animal
populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

**BIOST 578 Special Topics in Advanced Biostatistics** (*, max. 30) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

**BIOST 579 Data Analysis and Reporting (2/3, max. 12)** Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics. Credit/no-credit only. Offered: jointly with STAT 579; SpS.

**BIOST 580 Seminar in Biostatistics** (*, max. 30) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

**BIOST 581 Statistical Genetics Seminar (1, max. 30)** Presentations and discussion of special topics and research results in statistical genetics. Students, postdocs, and faculty present their work and papers from the literature. Credit/no-credit only. Offered: A.

**BIOST 582 Student Seminar (1, max. 30)** Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, master’s theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no-credit only. Offered: AWSp.

**BIOST 588 Special Topics in Biostatistical Practice (1-10, max. 30)** Selected topics in biostatistical practice.

**BIOST 590 Biostatistical Consulting (3, max. 6)** Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, under the supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOST 595 Biostatistics Master’s Practicum (1-12, max. 12)** Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: BIOST 514; BIOST 515; BIOST 536; BIOST 537.

**BIOST 596 Biostatistics Capstone I - Project Planning (3)** Project sponsors introduce students to health data analytics challenges. Students form collaborative teams, each of which writes, presents and revises a project proposal that outlines the approach and methods the group plans to use. Prerequisite: BIOST 504; BIOST 514; BIOST 515; BIOST 522; BIOST 523; BIOST 561; and BIOST 579, or permission of instructor. Credit/no-credit only. Offered: A.

**BIOST 597 Biostatistics Capstone II - Project Implementation (3)** Student teams implement their project proposals. At the end of the course, teams share their results in oral and written form, and prepare materials for individual portfolios. Prerequisite: BIOST 596, or permission of instructor. Credit/no-credit only. Offered: W.

**BIOST 598 Techniques of Statistical Consulting (1)** Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASp.

**BIOST 600 Independent Study or Research (*-)** Offered: AWSpS.

**BIOST 700 Master’s Thesis (*-)** Offered: AWSpS.
BIOST 800 Doctoral Dissertation (*-*) Offered: AWSpS.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES

ENV H 105 Toxic Tales: Building Skills for Academic Success through the Study of Poisons (2) T. MAR
Designed to help first-year undergraduate students develop the study skills necessary for success through an exploration of the environmental health sciences and toxicology. Through a series of lectures, readings, case studies, group discussions, and student presentations, students are introduced to, master, and demonstrate a variety of learning strategies. Offered: Sp.

ENV H 111 Exploring Environment and Health Connections (3) I&S/NW
Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: Sp.

ENV H 205 Environmental Health in Media (3) I&S
Explores how the perspective of filmmakers and documentaries can influence the public's interpretation of environmental health issues, and examines the science and cultural norms that support both sides of the argument. Offered: AW.

ENV H 220 Global Environmental Change and Public Health (3) I&S Kristie L Ebi
Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with G H 220.

ENV H 305 Environmental Poisons and Public Health (3) I&S/NW
Introduces concepts and tools that help students think critically about how environmental toxicants can impact human health. Covers basic principles and core concepts from toxicology, epidemiology, exposure assessment, risk assessment and risk management through a case-based approach that focuses on a selection of representative toxicants of current public health relevance. Offered: A.

ENV H 306 Health and Sustainability (3) I&S/NW, DIV H. Frumkin
Focuses on the intersection of human health and environmental sustainability. Introduces core concepts of sustainability (for health sciences students) and public health (for environmental studies students) and explores the intersections of health and sustainability in specific domains including energy, transportation, the built environment, food systems, and chemicals. Emphasizes a systems thinking approach to formulating solutions. Prerequisite: any of the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, or CHEM 145. Offered: Sp.

ENV H 310 Green Chemicals, Green Products, Green Processes: Crafting a Less Toxic World (3) I&S/NW D. KALMAN
Presents green chemistry in the context of social impact and public health. Focuses on the relationship between the science and application of chemistry, and the conditions of life that affect everyone's health, particularly in the developed world. Prerequisite: CHEM 142 or CHEM 120; recommended: either CHEM 220 or CHEM 237; either one ENV H or SPH course.

ENV H 311 Introduction to Environmental Health (3) I&S/NW
Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

ENV H 320 Introduction to Technical Communication in Environmental Health (5)
Written and oral communication for environmental health professionals. Principles of effective writing for technical articles, proposals, and reports with attention to structure, clarity, style, and language usage. Students learn to translate complex technical information for broader audiences. Offered: W.

ENV H 405 Toxic Chemicals and Human Health (3)
Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing, disposition in the body; modifiers of
response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: minimum grade of 2.0 in BIOL 220; and a minimum grade of 2.0 in either CHEM 220, CHEM 224, CHEM 238, or CHEM 336. Offered: Sp.

ENV H 406 Disasters and Public Health (3) I&S/NW
Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

ENV H 409 Microbiome and Environmental Health (3) NW
Introduces the current science of microbiome impacts on environmental public health. Defines human, animal, and environmental microbiomes, describes the methods used to characterize these microbiomes, and discusses the impact of microbiomes on the health of human and animal populations. Factors that have been suggested to modulate microbial populations, host-microbe interactions, and the dynamics of microbiome populations are also examined. Offered: Sp.

ENV H 417 Case Studies in Children's Environmental Health Disparities (3) DIV
Introduces students to the ways in which children are disproportionately affected by environmental health hazards. Through a series of engaging case studies, student learn the core scientific concepts of children's environmental health while exploring the social, cultural, regulatory, political, and economic factors that lead to children's health disparities. Offered: Sp.

ENV H 418 Understanding and Managing the Health Risks of Climate Change (3) Kristie L Ebi
The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 418; W.

ENV H 426 Leadership in Public Health I (1) I&S, DIV
Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on development of personal leadership skills and acumen. Credit/no-credit only. Offered: A.

ENV H 427 Leadership in Public Health II (1) I&S, DIV
Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in academic settings. Credit/no-credit only. Offered: W.

ENV H 428 Leadership in Public Health III (1) I&S, DIV
Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in practice/community settings. Credit/no-credit only. Offered: Sp.

ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW
Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 162; PHYS 114; and ENV H 311, may be taken concurrently. Offered: A.

ENV H 432 Chemical Sampling and Analysis (5) NW
Laboratory and lecture on chemical sampling and analysis. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 152. Offered: Sp.

ENV H 433 Microbiological Sampling and Analysis (5) NW
Laboratory and lecture on microbiological sampling and analysis. Field and laboratory analysis of microbiological agents found in the occupational and ambient environments (water, food and air). Prerequisite: MICROM 301 or MICROM 410; and MICROM 302 or MICROM 402. Offered: W.

ENV H 439 One Health: Human and Animal Health in a Changing Environment (3) I&S/NW P. RABINOWITZ
Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Prerequisite: BIOL 180. Offered: Sp.
ENV H 440 Water, Wastewater, and Health (3)
Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 441 Food Protection (3)
Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either CHEM 120, CHEM 142, MICROM 301, or MICROM 410. Offered: W.

ENV H 442 Zoonotic Diseases and Their Control (3)
Examines the transmission and control of zoonotic and vector-borne diseases of public health importance in the United States and globally. Pays attention to identification, surveillance, and control methods. Prerequisite: minimum grade of 2.0 in BIOL 220. Offered: W.

ENV H 443 Housing and Health (3) I&S/NW C. TRESE
Explores healthy and safe homes as a crucial element in public health. Review of federal, state and local approaches to housing-related programs under the banner of healthy homes. Students completing this course will understand the relationship between housing and human health and well-being. Offered: A.

Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Offered: A.

ENV H 445 Solid Waste Management (3)
Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Offered: Sp.

ENV H 446 Hazardous Waste and Public Health (3)
Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: CHEM 152 or CHEM 220; and MATH 124 or Q SCI 291. Offered: W.

ENV H 447 Environmental Change and Infectious Disease (3) G. CANGELOSI
Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

ENV H 448 Community Air Pollution (3)
Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Offered: Sp.

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3)
Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3)
Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms. Provides coverage of engineered controls and
disinfection/decontamination processes for infectious microorganisms. Offered: W.

ENV H 453 Industrial Hygiene (3) Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Offered: A.

ENV H 460 Occupational Safety Management (3) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Offered: Sp.

ENV H 461 Air-Pollution Control (4) Fundamental concepts of air pollution control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with CEE 490; ASp.

ENV H 462 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, students receive an OSHA 510 30-hour Construction Safety and Health certification. Offered: W.

ENV H 465 Geographic Information Systems (GIS) in Public Health (3) NW/I&S Applications of Geographic Information Systems (GIS) in public health. Practical experience using the principles, methods, and techniques of spatial analysis to solve practical public health problems within a variety of sub-disciplines, focusing on environmental health, but also exploring infectious diseases, health services and community health. Spatial data representation and management, visualization of spatial data, and exploratory analyses. Offered: A.

ENV H 472 Environmental Risk and Society (3) I&S Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

ENV H 473 Environmental Health Policy and Practice (4) I&S Explores how environmental health problems are controlled in the United States. Examines both the policies and practices of environmental health. Looks at how various government programs are established, organized, and operated to prevent or control hazards in the community. Also examines the legal and regulatory framework. Offered: A.

ENV H 480 Undergraduate Seminar (1, max. 6) Covers career exploration and planning within the environmental health major through presentation of current environmental and occupational health issues. Offered: A.

ENV H 482 Environmental Health Internship (2-15, max. 15) Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning, and utilization of community resources. Prerequisite: minimum grade of 2.5 in ENV H 311. Credit/no-credit only. Offered: A/W/Sp/S.

ENV H 490 Selected Topics in Environmental Health (1-6, max. 20) In-depth study of a current environmental health topic. Offered: Sp.

ENV H 497 Environmental Health Special Electives (*) Offered: Sp.

ENV H 499 Undergraduate Research (*) Offered: A/W/Asp/Sp.

ENV H 501 Foundations of Environmental and Occupational Health (4) Covers the foundational environmental and occupational public health knowledge domains. Provides a comprehensive overview of an environmental and occupational public health framework and a One Health systems
model for assessing and managing environmental health risks on a local and global scale. Offered: A.

**ENV H 502 Assessing and Managing Risks from Human Exposure to Environmental Contaminants (4)** Exposure science provides quantitative data needed to inform risk assessments and apply regulatory standards to a wide range of hazards. Introduces techniques such as hazard identification, dose response estimation, fate and transport modeling, statistical exposure and dose estimation, exposure biomarkers and toxicological risk characterization as applied in both occupational and community environments. Offered: W.

**ENV H 503 Adverse Health Effects of Environmental and Occupational Toxicants (4)** Principles governing the effects of toxicants on health, including: acute, sub-acute and chronic toxicity; dose response modeling; derivation of potency; response modifiers; adverse health effects including cancer, birth defects and damage to major organ systems; regulation of toxicants in the home, workplace and general environment. Focus on human health impacts of toxicants in a public health context. For non-toxicology majors. Offered: Sp.

**ENV H 506 Disasters and Public Health (3) I&S/NW** Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

**ENV H 509 Microbiome and Environmental Health (3)** Introduces the current science of microbiome impacts on environmental public health. Defines human, animal, and environmental microbiomes, describes the methods used to characterize these microbiomes, and discusses the impact of microbiomes on the health of human and animal populations. Factors that have been suggested to modulate microbial populations, host-microbe interactions, and the dynamics of microbiome populations are also examined. Offered: Sp.

**ENV H 510 Global Environmental and Occupational Health (4)** Provides an overview of environmental and occupational health, with major focus on developing countries. Examines a variety of environmental hazards and influential factors, interactions with human health and well-being, and relevance to public health. Considers workplace, community, home, regional, and global problems. Offered: W.

**ENV H 511 Environmental and Occupational Health (4)** J. HESS Provides a graduate-level overview of the multidisciplinary field of environmental and occupational health. Environmental, occupational, and nutritional problems in different settings (e.g. the workplace, community, and home) and at varying scaled (local, regional, and global) are considered, with special emphasis on considerations related to food systems and nutrition. Offered: Sp.

**ENV H 512 Environmental and Occupational Health for Public Health Practitioners (3)** Introduces students in professional degree programs in Public Health to basic concepts from environmental and occupational health sciences, to the methods used to study the links between the environment and health, to the health impacts of various environmental exposures, and to the environmental public health approach to controlling or managing risks and promoting health. Offered: W.

**ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3)** K. THUMMEL Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with PCEUT 513/PHG 513; W.

**ENV H 514 Fundamentals of Toxicology (3)** Covers major fundamentals and core areas of toxicology, including dose response, absorption, distribution, metabolism, and excretion of toxicants, toxicity testing, interpretation of toxicological data; and biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses. Also explores mechanisms and fate of chemical interaction with biological systems. Prerequisite: BIOL 212, BIOC 405, or permission of instructor. Offered: A.
ENV H 515 Organ System Toxicology (3) T. KAVANAGH Focuses on organ system toxicology. Emphasizes the pathophysiology of toxicant-induced organ injury, including adaptive responses to toxicant exposure, inflammation, and tissue repair pathways. Prerequisite: ENV H 514 or permission of instructor. Offered: W.

ENV H 516 Toxic Agents: Effects and Mechanisms (3) Focuses on the toxic effects and the underlying mechanisms of the principal classes of toxicants: pesticides, metals, solvents, air pollutants, persistent organic pollutants, radiation, as well as on food safety and occupational/clinical/eco toxicology. Prerequisite: ENV H 515 or permission of instructor. Offered: Sp.

ENV H 517 Children's Environmental Health (3) Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and benefits of seafood consumption during pregnancy; use of pesticides on food and in the home; air pollution and childhood asthma, and childhood injuries and the built environment. Offered: Sp.

ENV H 518 Understanding and Managing the Health Risks of Climate Change (3) Kristie L Ebi The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 518; W.

ENV H 520 Advanced Technical Communication in Public Health (3) Covers written and oral communication for environmental health and public health professionals, with particular emphasis on three main areas: conveying information more effectively to technical audiences, translating that information for general audiences in the public arena, and crafting effective commentary relating to topics of professional interest.

ENV H 521 Effective Communication Strategies for Environmental Public Health Professionals (2) Introduces students to the science of and best practices in science communication. Covers how and why to use narrative structure, how to identify and emphasize important messages, how to influence behavioral change, identifying common mistakes in messaging, and how to interact with the media. Prepares students to present at conferences, interact with the media, engage with diverse communities, and write high impact papers and competitive grants. Credit/no-credit only. Offered: Sp.

ENV H 526 Leadership in Public Health I (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on development of personal leadership skills and acumen. Credit/no-credit only. Offered: A.

ENV H 527 Leadership in Public Health II (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in academic settings. Credit/no-credit only. Offered: W.

ENV H 528 Leadership in Public Health III (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in practice/community settings. Credit/no-credit only. Offered: Sp.

ENV H 530 Research Proposal Preparation for Biological Sciences (3) Provides first-hand experience for doctoral students in the biological sciences on proposal writing and the review process. Focuses on hypothesis-driven, laboratory benchwork based research following the NIH pre-doctoral fellowship format, and aims to prepare students for their pre-doctoral fellowship submissions and general qualifying exams. Offered: A.

ENV H 531 Neurotoxicology (3) Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: W, even years.

ENV H 532 Reproductive and Developmental Toxicology (3) Investigates chemicals that can induce
adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: W, odd years.

**ENV H 533 Molecular Toxicology (3)** Advanced discussion of molecular mechanisms whereby chemical and biological agents produce their harmful effects on biological tissues. Topics include the role of xenobiotic biotransformation enzyme expression in chemical susceptibility, toxicogenomics, chemical-induced oxidative stress, alternative models, species differences, and dietary anti-carcinogens. Prerequisite: prior coursework in toxicology and biochemistry, or permission of instructor. Offered: Sp, odd years.

**ENV H 534 Biochemical Toxicology of the Puget Sound (3)** Advanced discussion of effects of pollutants on aquatic organisms at the molecular, biochemical, and physiological levels, and in the context of Puget Sound case studies. Topics include assessing toxicant-induced cell injury in aquatic organisms, biotransformation and detoxification pathways, toxicogenomics, assessing chemical diseases in fish, biomarkers, and zebrafish models. Prerequisite: prior coursework in toxicology and biochemistry or permission of instructor. Offered: W, even years.

**ENV H 536 Health Impact Assessment (2)** Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with URBDP 536.

**ENV H 538 Public Health and the Built Environment (2)** Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with URBDP 538.

**ENV H 539 One Health: Human and Animal Health in a Changing Environment (3)** P. RABINOWITZ Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Offered: Sp.

**ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3)** Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

**ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3)** Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

**ENV H 543 Quantitative Microbial Risk Assessment (3)** Focuses on the principles of quantitative risk assessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communication. Offered: Sp, even years.

**ENV H 544 Antibiotic Resistant Bacteria/Genes Impact on the Environment and Public Health (4)** M. ROBERTS Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Prerequisite: either EPI 320, BIOL 220, or MICROM 301. Offered: A.

**ENV H 545 Water, Wastewater, and Health (4)** Review of water supply, water quality, and water/wastewater treatment as they relate to
human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

**ENV H 546 Hazardous Waste and Public Health (3)**
Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Offered: W.

**ENV H 547 Environmental Change and Infectious Disease (3)**
G. CANGELOSI Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

**ENV H 548 Community Air Pollution (3)**
Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

**ENV H 549 Research Methods in Human Factors (3)**
Includes fundamental guidelines for survey design, controlled experiments, quasi-experimental, and observational studies. Focus on safety, productivity, functionality, and usability. Review of journal articles on research methods and design issues, given functional, psychological, physiological, and environmental constraints. Recommended: introductory class in human factors. Offered: jointly with IND E 549; Sp.

**ENV H 550 Occupational and Environmental Disease (3/4)**
J. SPECTOR A case-based introduction to occupational and environmental diseases, focusing on disease epidemiology, pathophysiology, diagnostic testing basics, and aspects of population management such as disease surveillance, policy development, and health protection programs. A four credit option offered to clinically-oriented students additionally covers diagnostic test interpretation, differential diagnosis, and clinical management. Offered: Sp.

**ENV H 552 Environmental Chemistry of Pollution (4)**
Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

**ENV H 553 Environmental Exposure Monitoring Methods (4)**
Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, and soil, and for biological markers of exposure and effect in humans and other biota. Prerequisite: ENV H 453 or permission of instructor. Offered: W.

**ENV H 554 Biological Monitoring for Chemical Exposure (2)**
Advanced seminar on biological monitoring for assessment of chemical exposure and health risks from environmental agents. Considers applications and interpretation of results from analysis of biological specimens taken from persons exposed to chemicals in the work place and the general environment. Prerequisite: ENV H 551 or permission of instructor. Credit/no-credit only. Offered: Sp, odd years.

**ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3)**
Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.

**ENV H 556 Quantitative Exposure Assessment (3)**
Offers statistical skills and examples to conduct analysis of occupational and environmental exposure data in order to understand the nature of airborne exposures in the environment, and their
interpretation for human health. Focuses on reading and discussion of primary exposure assessment literature and statistical analysis and interpretation of real datasets. Prerequisite: either BIOST 508, BIOST 511, or BIOST 517. Offered: W, odd years.

ENV H 557 Exposure Controls (3/4) Presents engineering concepts for selecting exposure controls for chemical, physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and biohazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

ENV H 559 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with IND E 567/NSG 505; Sp, even years.

ENV H 560 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

ENV H 562 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with NSG 507; W.

ENV H 564 Recognition of Health and Safety Problems in Industry (2) Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

ENV H 565 Geographic Information Systems (GIS) in Public Health (3) Applications of Geographic Information Systems (GIS) in public health. Practical experience using the principles, methods, and techniques of spatial analysis to solve practical public health problems within a variety of sub-disciplines, focusing on environmental health, but also exploring infectious diseases, health services and community health. Spatial data representation and management, visualization of spatial data, and exploratory analyses. Offered: A.

ENV H 566 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

ENV H 569 Occupational Biomechanics (4) Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; Sp, even years.

ENV H 570 Occupational and Environmental Epidemiology (3) Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570.

ENV H 571 Neuroepidemiology and Environmental Risk Factors (3) Walter A Kukull Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk
factors, including stroke, Parkinson’s disease, Alzheimer’s disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with EPI 571.

ENV H 572 Environmental Risk and Society (3) Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: A.

ENV H 574 Probabilistic Exposure Analysis (3) Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: Sp, odd years.

ENV H 576 Clinical Occupational Medicine (2) For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider’s role in workers’ compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENV H 577 Risk Assessment for Environmental Health Hazards (4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEWA 560/PUBPOL 589; A.

ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max. 21) Presentation of current environmental and occupational health research and issues. Credit/no-credit only. Offered: AWSp.

ENV H 581 Environmental Health Reading (1) Critical reading of selected basic and applied research publications on environmental health problems and programs.

ENV H 583 Thesis Research Proposal Preparation (1) Includes reviewing components of research proposals and practicing writing and developing effective aims, hypotheses, background materials, and analytic strategies for writing theses and presenting at scientific meetings. Offered: Sp.

ENV H 584 Environmental Health Policy and Practice (4) Explores how environmental health problems are controlled in the United States by examining the policies and practices of environmental health. Covers how various government programs are established, organized, and operated to prevent or control hazards in the community, and the legal and regulatory framework behind them. Offered: A.

ENV H 586 Current Issues in Occupational Health at the Human Animal Interface (2, max. 8) Problem-based seminar about the occupational health issues faced by workers with animal contact, including animal agriculture workers, veterinary workers, wildlife workers, and laboratory animal workers. Anchoring course for trainees in the Occupational Health at the Human Animal Interface (OHHAI) training grant. Offered: ASp.

ENV H 590 Selected Topics (1-6, max. 20) In-depth study of a current environmental health topic.
ENV H 591 Current Topics in Toxicology (2, max. 12)
T. KAVANAGH, Z. XIA Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

ENV H 592 Current topics in Occupational Health Sciences (1/3) Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no-credit only. Offered: A.

ENV H 593 Current Topics in Risk Assessment (2, max. 24) Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Offered: AWSp.

ENV H 594 Current Topics in Environmental Health (1, max. 2) Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no-credit only. Offered: W.

ENV H 595 Research Rotation (3, max. 9) Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.

ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; AWSp.

ENV H 597 Case Studies in Environmental and Occupational Health (1, max. 12) Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational health-related illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

ENV H 598 Degree Program Project/Portfolio ([1-9]-, max. 18) Supervised project work on a topic related to student’s concentration in graduate study that results in a project paper. Offered: AWSpS.

ENV H 599 Field Studies (2-6, max. 6) Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no-credit only. Offered: AWSpS.

ENV H 600 Independent Study or Research (*-*) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 700 Master’s Thesis (*-*) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 800 Doctoral Dissertation (*-*) Prerequisite: permission of departmental adviser. Credit/no-credit only. Offered: AWSpS.

EPI 201 Outbreak Investigation and Response (5) I&S/NW, QSR J. BASEMAN Provides an introduction to infectious disease outbreaks of both domestic and global significance. Students learn about outbreak detection, investigation and response activities and methodologies through a combination of lecture, case studies, homework, and popular media. Offered: Sp.
EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART
Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. Enquobahrie Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART
Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. Enquobahrie Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART
Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. Enquobahrie Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART
Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. Enquobahrie Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART
Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. Enquobahrie Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.
misclassification, effect modification, and confounding. First in a two course sequence. Prerequisite: BIOST 511, which may be taken concurrently, or equivalent. Offered: A.

EPI 513 Epidemiologic Methods II (4) Amanda I Phipps, Ali Rowhani-Rahbar
Considers how epidemiologic studies may be designed to maximize etiologic inference. Covers infectious disease epidemiologic studies, randomized controlled trials, cohort studies, case-control studies, cross-sectional studies, ecological and multilevel studies, and selected topics such as meta-analysis. Second in a two course sequence. Prerequisite: either EPI 512 or PHI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (5) Stephen E. Hawes, Alyson Littman
Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in EPI 512 and EPI 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513, and epidemiology major. Offered: Sp.

EPI 515 Advanced Epidemiologic Methods I (3) Steve Mooney
First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 512 and EPI 513 Offered: jointly with BIOST 519.

EPI 516 Advanced Epidemiologic Methods II (4) Brandon L Guthrie
Second of a series of 2 courses whose objective is to deepen students' knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with BIOST 520.

EPI 517 Genetic Epidemiology (3) Sara Lindstroem
Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with PHG 511.

EPI 519 Research Methods and Current Topics in Cardiovascular Epidemiology (3) N. Smith
Overview of epidemiologic research methods applied to current topics in cardiovascular and cardiometabolic health and disease in human populations. Covers pathophysiology; molecular, clinical, behavioral, and social risk factors; burden and disparities across and within populations nationally and globally; and public health interventions. Prerequisite: EPI 511 or EPI 512; BIOST 508, BIOST 511 or BIOST 517; or permission Credit/no-credit only.

EPI 520 Epidemiology of Infectious Diseases (3) Christine M Khosropour
Focuses on infectious diseases from a public health perspective. Uses domestic and international case studies to apply traditional and contemporary epidemiologic principles and methods to infectious disease research and public health practice. Specific topics include: surveillance, program evaluation, outbreak investigation, transmission dynamics, and mathematical modeling. Prerequisite: either EPI 511, EPI 512, or permission of instructor.

EPI 521 Epidemiology of Maternal and Child Health Problems (3-4) D. ENQUOBAHRIE
Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542.

EPI 522 Reproductive Epidemiology (3) M. MADELEINE
Focuses on female reproductive system conditions and diseases, non-birth pregnancy outcomes, and impact of pregnancy on later health. Presentation of current epidemiologic knowledge and discussion of methodologic issues on topics including the menstrual cycle; contraception; infertility; spontaneous and induced abortion; and uterine and ovarian disease. Prerequisite: either EPI 511, both EPI 512 and EPI 513, or permission of instructor.

EPI 524 Cancer: Epidemiology and Biology (3) M. MADELEINE
Explores the epidemiology of major
cancers (infection-related, breast, prostate, lung, colon, melanoma), with an emphasis on milestones in cancer mechanisms (such as tumor viruses, cell cycle, DNA repair, and metastasis). Integrates knowledge from different fields of cancer research, with guest lectures from experts in epidemiology and cancer biology. Prerequisite: either EPI 511 or EPI 512; either undergraduate biology coursework or instructor permission.

**EPI 527 Vaccines (3)** H. Chu
Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature.

**EPI 529 Emerging Infections of International Public Health Importance (3)** Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536.

**EPI 530 AIDS: A Multidisciplinary Approach (2)** Carey Farquhar
Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with G H 562/MED 530.

**EPI 531 Statistical Methods for Analysis with Missing Data (3)** Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with BOST 531.

**EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3)** A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies.

**EPI 533 Pharmacoepidemiology (3)** Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with PHARM 533.

**EPI 535 Statistical Methods in Genetic Epidemiology (3)** Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

**EPI 536 Categorical Data Analysis in Epidemiology (4)** Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

**EPI 537 Survival Data Analysis in Epidemiology (4)** Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software computer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOST 536 or EPI 536. Offered: jointly with BIOST 537; W.
EPI 538 Nutritional Epidemiology (3) Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with NUTR 538.

EPI 539 Research and Evaluation Methods in Global Health (3-4) Caryl Feldacker Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with G H 531; Sp.

EPI 540 Bayesian Biostatistics (3) Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor’s permission. Offered: jointly with BIOST 526/PHARM 526; Sp.

EPI 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/HSERV 529/PHARM 529.

EPI 542 Clinical Epidemiology (2) Weiss Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513.

EPI 546 Psychiatric Epidemiology (3) I. Rhew, A. Vander Stoep Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with PBSCI 546.

EPI 547 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor. Offered: jointly with HSERV 514.

EPI 548 Research Methods for Social and Contextual Determinants of Health (3) A. Hajat Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: EPI 511 or EPI 512/513; and BIOST 511/512/513 or BIOST 517/518. Credit/no-credit only. Offered: jointly with HSERV 548; W.

EPI 549 HIV/STI Prevention Research Methods (3) R. Heffron, A. Roxby Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interviews, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with G H 563.

EPI 553 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540,
CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 528/G H 536/HMS 536; W.

**EPI 554 Introduction to Epidemic Modeling for Infectious Diseases (3)** R. BARNABAS Covers the basic tools for building and analyzing mathematical models of infectious disease epidemics. Model types include deterministic and stochastic models, compartmental and individual-based models. Laboratory provides hands-on model building experience in Excel, Stella, and R.

**EPI 555 Statistical Methods for Spatial Epidemiology (3)** Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555/G H 534.

**EPI 556 Advanced Methods for Global Health III (4)** Brad Wagenaar Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 525/G H 537/HMS 537; Sp.

**EPI 570 Occupational and Environmental Epidemiology (3)** Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570.

**EPI 571 Neuroepidemiology and Environmental Risk Factors (3)** Walter A Kukull Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with ENV H 571.

**EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (2)** Weiss Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Prerequisite: EPI 512 Credit/no-credit only.

**EPI 583 Epidemiology Seminar (1, max. 12)** Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

**EPI 584 Doctoral Dissertation Seminar (1, max. 2)** A. FITZPATRICK, N. WEISS Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: EPI 512 and EPI 513, admission to the PhD program, successful completion of the preliminary examination, or second-year status. Credit/no-credit only.

**EPI 585 Injury and Violence: A Public Health Approach (3)** Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes,
falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide.

EPI 586 Responsible Conduct of Research: Global and Local (3) Alison Drake, Carey Farquhar Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with G H 532; A.

EPI 588 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3) A. Fitzpatrick, L. Kessler Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with HSERV 578.

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6) Tutorials arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult department program adviser.

EPI 591 Current Literature in Epidemiology (1, max. 15) Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Prerequisite: EPI 513. Credit/no-credit only. Offered: AWSp.

EPI 592 Program Seminars (1-6, max. 16) Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor.

EPI 593 Cancer Prevention Research Laboratory (3, max. 24) Research experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no-credit only. Offered: AWSpS.

EPI 594 Field Epidemiology: Student Epidemic Action Leaders Team (1-2, max. 8) J. Baseman Introduces applied epidemiology in public health practice, specifically in areas of outbreak investigation, public health preparedness and response. Includes fieldwork opportunities. Offered: AWSpS.

EPI 595 Epidemiology Master's Practicum (1-6, max. 6) Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 512 and BIOT 511 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

EPI 600 Independent Study or Research (*) Prerequisite: permission of independent study supervisor. Credit/no-credit only. Offered: AWSpS.

EPI 700 Master's Thesis (*) Prerequisite: permission of thesis chair. Credit/no-credit only. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*) Prerequisite: permission of dissertation chair. Credit/no-credit only. Offered: AWSpS.

HEALTH SERVICES

HEALTH INFORMATICS AND HEALTH INFORMATION MANAGEMENT

HIHIM 400 Health Care Language for Health Informatics and Information Management (3) Designed for HIHIM majors to compile a working vocabulary in health care and to explain clinical documentation. Strengthens student competence to read/write/comprehend and speak the language used by health providers/administrators. Employs a variety of tools (reading, writing, listening exercises; electronic health record documents/case studies; mini-lectures on body systems). Practices written and verbal communication to achieve proficiency. Prerequisite: BIOL 118 and BIOL 119 Offered: A.
HIHIM 405 Introduction to Health Data Analytics (3)
Covers the process of and tools used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with BIOST 405.

HIHIM 407 Foundations for Healthcare Vocabularies (3)
Focuses on health concepts, documentation, healthcare taxonomies, and clinical vocabularies, terminologies, classifications, and nomenclatures required for health data analysis, clinical coding, and clinical systems associated with the electronic health record.

HIHIM 408 Management Concepts with HIM Applications (4)
Covers management principles from a health information management perspective and core management functions of planning, organizing, staffing, delegating, leading, and controlling; theories of management, both traditional and contemporary; leadership concepts in HIM; change management; human resource management; employment law; performance management, and HIM organizational structure.

HIHIM 409 Disease Concepts for Managers (4)
Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective.

HIHIM 410 Foundations in Health Information Management (4)
Focuses on the basic of health information through study of the creation and maintenance of health records, access to and retention of health information, accreditation, licensure and professional standards in acute care hospitals and alternate care facilities.

HIHIM 411 Health Data Management (3)
Addresses the governance and management of healthcare data through exploration of data assets and linking the assets to standards and quality.

HIHIM 412 Healthcare Coding (5)
Covers healthcare coding principles for International Classification of Diseases (ICD) and Current Procedural Terminology (CPT) code sets used in diagnosis and procedure code assignments for research and reimbursement by healthcare providers in all settings. Prerequisite: HIHIM 409.

HIHIM 413 Revenue Cycle Management (3)
Covers the revenue cycle management of health information administration.

HIHIM 414 ICD, Clinical Documentation and Revenue Management (3)
In depth study of ICD code sets for diagnosis and procedure coding, clinical documentation to support ICD code assignment, and reimbursement methodologies which use the ICD code set to determine payment models.

HIHIM 415 CPT/HCPCS, Clinical Documentation and Revenue Management (5)
In depth study of CPT/HCPCS code sets for procedure coding, clinical documentation to support CPT/HCPCS code assignment, and reimbursement methodologies which use the CPT/HCPCS code sets to determine payment models.

HIHIM 420 Healthcare Computer Systems and Electronic Health Records (5)
Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410; HIHIM 411.

HIHIM 421 Health Information Systems Analysis (5)
Examines lifestyle systems development process and tools, project management and team coordination, analysis of health information systems, and user requirements. Prerequisite: HIHIM 420.

HIHIM 425 Research Design and Statistics for HIHIM (3)
Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with BIOST 406/STAT 406.

HIHIM 450 Healthcare Delivery and Policy (5)
Organization of healthcare services across delivery
systems - both governmental (federal, state, local) and private. Financing health care services and related policy issues. Competencies and content areas related to public health profession, science, and human health. Offered: A.

HIHIM 454 Finance Concepts for Healthcare Managers (4) Covers financial concepts applied to today’s healthcare environment, financial management tools, and budgeting.

HIHIM 455 Leadership and Strategic Management (4) Focuses on leadership and strategic management for enterprise-wide health information and information governance initiatives; evaluates organizational ethics and culture for situations impacting HIM and health informatics; and analyze individual interpersonal skills and professional and personal goals.

HIHIM 456 Quality Improvement in Healthcare (5) Focuses on quality improvement, risk management and utilization management; management of quality improvement systems; use of data systems in quality assurance; health data retrieval, analysis and presentation. Recommended: statistics; medical terminology.

HIHIM 460 Professional Pathways (3) Explores the development of management skills and competencies, and a seminar through site experience in healthcare facilities with campus and clinical faculty. Prerequisite: HIHIM 410

HIHIM 461 Professional Development and Networking (2) Addresses the professional portfolio and mentoring, and preparation for the national credentialing examination for Registered Health Information Administrator (RHIA).

HIHIM 462 Capstone Project (5) Explores applied management using a formal capstone project in a healthcare setting. Prerequisite: HIHIM 460.

HIHIM 470 Legal Concepts for Health Fields (3) Examines principles of law as applied to the health field, with reference to health information management.

HIHIM 480 HIM Operations and Project Management (5) Provides the tools and experiences useful for health informatics and information management professionals in the daily functions and activities of a HIM department, and in the controlling the activities of a health care project.

HIHIM 490 Special Topics (1-5, max. 15)

HIHIM 499 Independent Study (1-5, max. 5)

HIHIM 508 Health Information Management Systems and Leadership (3) Provides a high level framework of health informatics and health information management practice. Covers practice related systems with emphasis on enterprise information governance, patient record organization, content and structure, and associated enterprise business functions and processes to provide foundation for understanding the practice. Offered: A.

HIHIM 509 Introduction to Health Informatics (3) Healthcare is one of today’s most information-intense industries. Yet healthcare delivery organizations have been slow to adopt advanced health information technology (HIT). It is imperative that future health care leaders have a deep understanding of and belief in HIT spanning the spectrum of health delivery systems.

HIHIM 510 Enterprise Systems and Electronic Health Records (3) Covers industry drivers, development, compliance framework, and certification of electronic health record systems status and operations addressed through strategic decision making and leadership: data movement among enterprise clinical, business, administrative systems to legal health record; and barrier and benefit assessment within major institutional culture and technology initiative changes. Offered: A.

HIHIM 520 Law, Policy, and Ethics in Health Information (3) Explores the laws, policies, and issues involved in oversight and management of health data and health information systems. Defines the legal health record and the requirements, role, and uses. Covers the legal and ethical framework, issues and concepts, and the role of e-discovery on the emerging health data environment. Offered: W.

HIHIM 524 Health Data Analytics (3) Ken White Healthcare organizations generate a large number of clinical performance metrics. Extracted data from
different data systems is used to display relevant metrics in dashboards that are meaningful to senior leadership. Statistical tools may determine if differences in performance are significant and what factors are associated with the differences. Predictive models may then be built and inputs varied to obtain performance improvements. Recommended: beginner Excel skills. Offered: jointly with BIOST 507; Sp.

HIHIM 525 Healthcare Databases and Applications (3) Provides an overview of data models, architecture platforms, and relational database theory and technology. Covers design and uses of databases in patient record systems, registries and indexes, and health databases, security, privacy and ethical issues, database design, data integrity, field properties, tables, reports, queries, and data retrieval. Offered: Sp.

HIHIM 535 Clinical Vocabularies and Terminologies (3) Covers clinical terminologies, classifications, and mapping, which provides information on taxonomies and metadata, information objects, and classification theory in organizing information in an electronic system. Includes current initiatives in terminologies and data mapping in electronic health record systems. Offered: S.

HIHIM 540 Consumer Health Informatics (3) Covers community and consumer health informatics associated with health services provides; electronic health records that address internal and external standards; accreditation and regulatory requirements needed to provide quality care; and health information exchange from policy to implementation. Offered: A.

HIHIM 550 Health Care Information Governance (3) Covers the conceptualization, design, and management of data initiatives and knowledge needed by the healthcare enterprise. Reviews data integrity principles and guidelines to determine methodology for evaluation development and management of internal and external information requirements. Offered: W.

HIHIM 552 Healthcare Business Intelligence (3) Examines business and enterprise data used to inform enterprise healthcare business intelligence and decision making to underpin and meet strategic and operational business goals and objectives. Performance metrics, business data analytics, data mining, predictive modeling, business process modeling, data visualization and other tools used to enable healthcare program and product performance assessment are featured. Offered: A.

HIHIM 555 EHR/HI Systems Operations and Improvement (3) Addresses leadership and management of an organization's health information assets that are required as the nation transitions to interoperable health information systems. Offered: A.

HIHIM 556 Healthcare Quality and Technology (3) Explores the current healthcare environment related to healthcare safety issues. Examines an overview of major health and safety challenges and responses; focusing on the impact of the issues in improving health and safety in healthcare and information resources needed. Offered: Sp.

HIHIM 560 Special Topics in Health Informatics (3) Presents problem solving opportunities on health industry information issues, strategies and unmet challenges. Topics reflect the current state, progress, and future expectations faced by healthcare and health information managers.

HIHIM 598 Project Management (3) Focuses on applying leadership readiness at the enterprise level; informatics and information governance challenges; research and project management resources; communication management strategies; and the impact of technology from management oversight to health services delivery. Offers an opportunity to practice a key role of leadership: transforming organizational culture by effective implementation of change. Offered: W.

HIHIM 599 Capstone Project (3) Provides a practice-based problem solving experience that draws on health informatics and information management;
health industry knowledge; leadership and management strategies; and applies project management skills to design, plan, and implement a management project in healthcare and healthcare related organizations. Offered: S.

**HEALTH SERVICES**

**HSERV 100 Personal and Public Health (3) I&S**
Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.

**HSERV 204 Communicating about Health: Current Issues and Perspectives (3)**
Provides an overview of health communication topics and perspectives for students who are interested in pursuing careers in the health industry and those with a research interest in health communication such as caregivers, health care administrators, marketing and public relations professionals, media planners, public health promoters, and educators, researchers and others. Offered: WSp.

**HSERV 230 Sleep and Population Health (3)**
NW/I&S M. Garrison Examines the role of sleep in population health, including risk factors and short and long-term consequences for inadequate sleep. Expands understanding of sleep science and how sleep can function as not only an outcome, but also as a predictor, mediator, confounder, and effect modifier of health outcomes and disparities. Also explores established and emerging sleep interventions and their potential to improve population health outcomes. Offered: W.

**HSERV 290 Special Topics (1-6, max. 12) I&S**
Explores current or evolving areas of interest in public health.

**HSERV 343 Health Behavior and Health Promotion (5)**
Introduction to health behavior change and health promotion. The course will cover theoretical foundations of health behavior and health promotion, as well as how to apply theory and evidence in health promotion practice. It will also introduce strategies for implementing and evaluating health promotion programs. Offered: A.

**HSERV 344 Public Health and Health Systems Management (5)**
Introduces public health and health systems management concepts. Students learn key tenets of high-performing public health and healthcare organizations, and environments in which these organizations operate. Examines a variety of health system models, including governmental public health, healthcare delivery systems, accountable communities of health and other collaborative models. Offered: S.

**HSERV 345 Community Health Assessment (5)**
Introduces role of assessment in planning for community health improvement through health promotion activities. Considers determinants of health; methods to find, collect, and analyze quantitative and qualitative data; interpret findings to describe the health resources, risks, and outcomes; role of assessment in identifying health disparities and patterns of health inequities. Offered: Sp.

**HSERV 346 Using Economics to Solve Today's Healthcare Problems (4)**
I&S Health economics is a growing field and an important aspect of public policy. Introduces health economics and the tools economists use to analyze current issues in health care. Furthers the understanding of economics and how it is used in current debates. Prerequisite: ECON 200. Offered: jointly with ECON 346; A.

**HSERV 415 War and Health (4)**
I&S A. Hagopian, E. Kanter Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 415; Sp.

**HSERV 475 Perspectives in Medical Anthropology (5)**
I&S Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.
HSERV 476 Introduction to Applied Ethnographic Methods in Public Health (4) Introduces practical methods of gathering ethnographic data. Students investigate a local culture, including such diverse groups as graffiti artists and dumpster divers.

HSERV 482 The Health of Populations (4) I&S, DIV Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with G H 482.

HSERV 488 Dark Empire: Race, Health, and British Society - Abroad (6) I&S, DIV Explores factors responsible for the well-being and health of black and other racial/ethnic minorities in Britain. Addresses: the National Health Service; ethnic diaspora, anti-immigration laws; urban riots; inequality, and the rise of Muslim fundamentalism and Islamophobia. Conducted in Britain.

HSERV 490 Advanced Topics (1-6, max. 12) I&S Explores current or evolving public health problems. Offered: W.

HSERV 499 Independent Study in Health Services (1-12, max. 12) Individual library or field study project selected in consultation with a faculty adviser.

HSERV 504 Health Promotion and Behavior Change Communication (1-3), max. 3 Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

HSERV 507 Health Communication and Marketing for Health Promotion: Theory and Practice (3) Discusses health communication theories and applications at the individual level (persuasion), interpersonal level (motivational) interviewing, and population level (mass media). Examines marketing principles for health promotion. Develops a health communication campaign for clients. Investigates adaptation frameworks of communication campaign cutting across cultures.

HSERV 508 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one’s clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with NURS 560.

HSERV 509 Public Health and Informatics (3) Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with BIME 533.

HSERV 510 Social and Behavioral Sciences in Health Program Planning and Implementation (3) Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of individual and population health, health promotion and disease prevention, and cultural competency and community collaboration. Offered: A.

HSERV 511 Introduction to Health Services and Public Health (3-4) History, organization, and effectiveness of U.S. healthcare and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

HSERV 512 Health Systems and Policy (3) Students review and examine selected topics from literature. Includes need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511.
HSERV 513 Health Policy Research (3) Extends students’ understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor.

HSERV 514 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor. Offered: jointly with EP 547.

HSERV 515 War and Health (4) A. Hagopian, E. Kanter Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 515; Sp.

HSERV 516 Introduction to Health Services ([3-4]-) Provides overview of healthcare system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended MPH degree program.

HSERV 517 Qualitative Research Methods: An Introduction (3) Introduction to research skills to discern how and why humans behave relative to their health. Emphasizes planning, design, evaluation, using qualitative research procedures. Students gain an understanding of qualitative research techniques by articulating a phenomenon of interest, identifying a target population, employing proper data collection strategies, and rigorous verifying results. Offered: S.

HSERV 518 Social and Ethical Issues (2-4, max. 4) Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

HSERV 519 Study Design and Causal Inference (1) Increases depth of knowledge about causal inference in impact evaluation. Applies the elements of causal inference to impact study design and statistical analysis, including the concept of statistical conclusion validity, internal validity, construct validity, and external validity. Credit/no-credit only. Offered: A.

HSERV 520 Methods in Applied Community Research ([0-4], max. 4) Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for MPH thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing potential errors. Prerequisite: registration in Extended MPH degree program. Credit/no-credit only.

HSERV 522 Health Program Evaluation ([1-5], max. 5) Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations. Prerequisite: background in introductory statistics.

HSERV 523 Advanced Health Services Research Methods I: Large Public Databases; Big Data (4-5) Introduces the new big data of health services research, health claims, and survey databases. Discusses the promises and pitfalls of the data and models for analyzing the correlates of health care costs and utilization. Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

HSERV 524 Advanced Health Services Research Methods II: Hierarchical and Incomplete Data (4-5) Introduces advanced biostatistical techniques for analyzing incomplete data in population health research. Examines a wide range of topics including:
missing data and potential outcome framework for causal inference, propensity score and multiple imputation, multilevel random effect linear and logistic models, and empirical Bayes prediction. Prerequisite: either HSERV 523 or permission of instructor.

HSERV 525 Advanced Health Services Research Methods III: Casual Inference Using Observational Data (4-5-) Focuses on reviewing statistical methods developed for "micro" (individual-level) data on behavior (choices or exposures) and outcomes in order to make causal inference about the role of a choice or an exposure on outcomes. Prerequisite: either HSERV 523, BIOST 511, BIOST 512, BIOST 513, or permission of instructor.

HSERV 527 Survey Research Methods (4) A. MOKDAD Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/G H 533.

HSERV 528 Critically Appraising and Applying Evidence in Healthcare (3) Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with BIME 540.

HSERV 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/PHARM 529.

HSERV 531 COPHP Population Health and Community Development (6) Population Health considers social and other factors that determine health. The course challenges dominate views of health. We compare health in the United States with other countries. In Community Development, we learn asset-based community engagement. Students work directly with community members, advocates, and service organizations to address health issues. Offered: A.

HSERV 533 COPHP Quantitative Methods (6) Acquaints students with methods of epidemiology and biostatistics used in conceptualizing, collecting, analyzing, and interpreting quantitative data on health outcomes and risk factors with quantitative methods for evaluating programs or treatments that address health concerns in populations. Expands skills in communicating quantitative aspects of public health, using writing, tables, and graphs. Offered: W.

HSERV 534 COPHP Health Behavior and Health Promotion and Environmental Health (6) Environmental Health reviews scientific principles utilized in environmental public health and examines the occurrence of diseases resulting from environmental and occupational exposures. Health Behavior and Promotion reviews theory and practice of planning and evaluating public health promotion problems and applying sound judgment when deciding about identification, audience segmentation, and intervention selection. Offered: Sp.

HSERV 536 Emerging Infections of International Public Health Importance (3-) Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with EPI 529.

HSERV 537 COPHP Health Policy (6) Covers concepts and analytic tools for health policy analysis, development, and advocacy, while exploring factors affecting public health policy, including science and community values. Student write a policy statement for an advocacy organization, teach a lay audience
about an issue, and arrive at policy conclusions based on quantitative data.

**HSERV 538 COPHP Evaluation Design and Community Organizing (6)**
Covers concepts and approaches for program evaluation in public health. Uses one case, including a final assignment requiring students to work as a team to design an evaluation. Integrates a broad array of skills to consolidate perspectives of the many players that interact in dynamic community settings. Offered: W.

**HSERV 540 COPHP Management and Leadership (6)**
Explores the principles of leadership and management within the context of public health organizations. Explores the distinction between management and leadership and examines the management functions of planning, organizing, directing, and controlling the use of human and financial resources to accomplish the goals of the organization.

**HSERV 541 Topics in Maternal and Child Health I (3-4)**
Provides an overview of the historical and legislative basis for the major MCH health and social service policies and programs. Uses the life-course perspective to examine the social determinants of health and development of women, children, and adolescents. Pays special attention to racial inequities on the health of families.

**HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-)**
D. ENQUOBABRIE
Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with EPI 521.

**HSERV 544 Maternal and Child Health in Low and Middle Income Countries (3)**
D. DENO
Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with G H 544; W.

**HSERV 548 Research Methods for Social and Contextual Determinants of Health (3)**
A. Hajat
Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: EPI 511 or EPI 512/513; and BIOST 511/512/513 or BIOST 517/518. Credit/no-credit only. Offered: jointly with EPI 548; W.

**HSERV 551 Public Health Law (2-4, max. 4)**
Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with LAW H 512; A.

**HSERV 552 Health Policy Development (3-)**
Uses primarily case- and problem-based learning and small-group projects to focus on factors that influence public policy development concerning health services in the U.S., with some global health content. Examines the roles of science and stakeholder interests in the structure of and changes to a nation's health system. Offered: A.

**HSERV 555 Health Disparities (2)**
Focuses on health disparities and health inequity in the United States. Course will cover both theoretical and empirical approaches to understanding patterns of health across social groups, with a focus on designing research and public health programs to addressing health disparities. Offered: W.

**HSERV 556 Tobacco-Related Health Disparities (1/2)**
Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental
illness, social stress, acculturation processes, and genetics.

**HSERV 558 Tobacco and Public Health: Prevention, Treatment, Policy, and Social Change (1-3, max. 3)**
Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilizes readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use.

**HSERV 559 Public Policy and the Public's Health ([0-3], max. 3)**
Watts Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through public health examples. Examines how science and community values intertwine in policy development, and how context influences the structure of and changes to a nation's health system.

**HSERV 560 Adult Learning: Theory and Practice (3)**
Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

**HSERV 561 Introduction to Health Promotion Planning and Evaluation ([0-3], max. 3)**
Links practice to theory between the planning, implementation, and evaluation of health promotion intervention and behavior change theory. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

**HSERV 567 Strategic Leadership of Public Health Systems ([2/3], max. 5)**
Prepares students to become public health leaders as envisioned in the Public Health 3.0 framework. Emphasizes leadership and communication skills for public health leaders to spearhead health promotion efforts in partnership with stakeholders such as health care clinicians and leaders in widely diverse sectors, and being deeply engaged in addressing social determinants of health and advancing health equity. Offered: WSp.

**HSERV 568 Health Economics (3)**
Applies microeconomics principles and models to understand the nature of health care markets and systems. Includes a wide range of health sector activities and policy issues by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

**HSERV 571 Cultural Competency for Public Health Practice ([1-4], max. 4)**
Application of cultural competency to clinical practice, healthcare management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology.

**HSERV 572 Planning, Advocacy and Leadership Skills (4)**
An opportunity to master basic concepts, analytic tools, and skills for health program and policy planning, advocacy, evaluation and leadership skills under close mentor-ship of faculty and teaching staff in an interdisciplinary and applied setting. Engages MPH and other graduate students with real-world public health problems, partners with local community health organizations, builds skills and competencies in a number of topics and processes. Offered: Sp.

**HSERV 575 Cancer Prevention and Control (3)**
Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

**HSERV 576 Health, Culture, and Community (3)**
*Chrisman* A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social
determinants of health at the population level. Offered: jointly with NURS 557; W.

**HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4)** Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of healthcare services; and clinic and community based applications.

**HSERV 578 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3)** A. FITZPATRICK, L. KESSLER Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with EPI 588.

**HSERV 579 Structural Racism and Public Health (1)** Introduces the concept of institutional racism and ways structural racism undermines public health. Discusses history of racism and intersections between structural racism and other systems of oppression. Explores relationship to racism and ways internalized racism acts as a barrier to health equity. Considers public health practitioners' role in addressing racism. Credit/no-credit only. Offered: jointly with PHI 579; AWSp.

**HSERV 580 Foundations of Health Behavior and Social Determinants of Health (2)** Provides an overview of core areas of health behavior and social determinates of health, including: social determinants of health; population health and health disparities; community engagement; and working effectively in diverse communities. Offered: A.

**HSERV 581 Strategies of Health Promotion (4)** Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Prerequisite: HSERV 511.

**HSERV 583 Economic Evaluation in Health and Medicine (3)** J. Babigumira, L. Steuten Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534.

**HSERV 584 Assessing Outcomes in Health and Medicine (3)** Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Instructors: Devine, Edwards Offered: jointly with PHARM 535; W.

**HSERV 585 Seminar in Medical Geography (5, max. 10)** Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.

**HSERV 586 Medical Geography (3)** Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with GEOG 580.

**HSERV 587 Health Policy Economics (3)** Applies economic theory to selected topics in healthcare, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications. Offered: jointly with ECON 547.

**HSERV 589 Community Based Participatory Research and Health (3)** Begins with a research topic of importance to the community with the aim of combining knowledge and action for social change. Provides an understanding of principles and
strategies, and appreciate of its advantages and limitations, and skills for participating effectively.

HSERV 590 Selected Topics in Health Services (*-, max. 30) Explores current or evolving public health problems. Prerequisite: permission of instructor.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42) Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

HSERV 592 Program Seminars (1-6, max. 20) Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 595 Practicum/Field Work in Community Medicine ([1-12], max. 12) Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.

HSERV 598 Executive Master of Public Health Capstone ([1-10], max. 25) Students work with a community, public or private health-related agency to (a) identify and contribute to the solution of a community health problem, and (b) summarize, present, and evaluate this effort. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's coursework.

HSERV 599 Capstone Project (*) Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

HSERV 600 Independent Study or Research (*) Prerequisite: permission of instructor.

HSERV 700 Master's Thesis (*) Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*)

HEALTH SERVICES MANAGEMENT

HSMGMT 500 Risk and Insurance Seminar (3) Presents the principles and practices of health insurance and risk. Emphasizes healthcare financing arrangements in the United States, including both private and government-sponsored (public) programs. Discusses comparisons with other developed countries.

HSMGMT 501 Epidemiology/Critical Evidence Appraisal (2-4, max. 4) Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.

HSMGMT 503 Population Health Management (2) Provides health administration students with an introduction to managing the health of defined populations. Examples include: the population within the catchment area of a hospital, the members of a health maintenance organization, the persons served by an accountable care organization, and the population employed in a workplace.

HSMGMT 505 Managing Healthcare Organizations (2-4) Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.
HSMGMT 506 Introduction to Clinical Care (2)
Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to healthcare administration.

HSMGMT 507 Group Dynamics and Team Leadership ([1-4]-, max. 4) Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no-credit only.

HSMGMT 510 Organizational Behavior (3-4)
Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead healthcare organizations. Focuses on "best practices" for managing individuals, teams, and organizations.

HSMGMT 513 Seminar in Healthcare Finance (3-4)
Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles.

HSMGMT 514 Health Economics (3/4) Uses economic concepts and tools to examine range of issues pertaining to healthcare, delivery of healthcare services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.

HSMGMT 515 Advanced Economics - Decision Analysis ([1-3]-, max. 3) Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.

HSMGMT 518 Ethical Issues in Health Services (2-3)
Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.

HSMGMT 523 Informatics in Healthcare Management (3) Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its healthcare applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.

HSMGMT 531 Systems Modeling Frameworks for Healthcare (3) Focuses on methodologies to support strategic decision making in a systems context, considering the material, patients, providers, information, and resource dependencies of most healthcare organizations. Includes optimization models and basic alternative evaluation methods for the applications of capacity planning, policy investigation, and design and planning decisions. Offered: W.

HSMGMT 532 Quantitative Methods for Health Systems Design and Analysis (3) Focuses on the method and application of operations research in health systems design and analysis. Covers a variety of topics in healthcare management and decision making. Healthcare decision making touches areas in resource allocation, scheduling, staffing, capacity planning, cost-effectiveness analysis, and assessment of medical technologies. Offered: W.

HSMGMT 545 Capstone Integrative Seminar ([1-4]-, max. 4) Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies, team building exercises, and field projects. Prerequisite: second-year MHA students.

HSMGMT 550 Medical Practice Quality Measurement and Management (3) Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement, and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines, and pathway; and the evidence-based medicine movement interconnect. Utilizes examples of cutting edge programs to apply and promote improvement.
HSMGMT 552 Health Administration and Business Law (4) Studies numerous interrelated legal topics pertinent to healthcare organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemption, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.

HSMGMT 553 Healthcare Marketing Strategy (2) Provides an understanding of wholesale and retail markets in the healthcare sector. Examines market research and the application of marketing strategies and tactics to support an organization’s core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.

HSMGMT 554 Entrepreneurship (2) Focuses on developing students’ resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing, and growth strategies; and corporate venturing.

HSMGMT 560 Management Practice in Healthcare and Public Health Organizations (1-4, max. 4) Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications, are utilized in order to apply theoretical material. Prerequisite: graduate student.

HSMGMT 562 Strategic Management of Healthcare Organizations (3-5) Management of goals, strategy, and structure in healthcare organizations. Design of external relationships and internal structures, strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

HSMGMT 563 Personnel Management for Health Professionals (1-3)-, max. 3) Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems—selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH degree program or permission of instructor; non-business majors.

HSMGMT 566 Decision Support Models for Health Services (3) Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program; non-business majors.

HSMGMT 567 Clinical Systems Management (3) Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance, and clinical leadership development of physician-administrator partnerships in complex medical care settings.

HSMGMT 568 Quality Process Management (3-4) Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to healthcare organizations.

HSMGMT 570 Quantitative Methods (3-4) Concentrates on fundamental concepts of statistics and their application to healthcare management. Approaches statistics from two different perspectives that benefit leaders in healthcare: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.

HSMGMT 571 Healthcare Financial Management (3) Focuses on the tools and analytic frameworks that healthcare managers use to make prospective forward-looking decisions. Problems worked in-class and assigned as homework to ensure that
participants develop competencies and confidence in applying the analytic tools and frameworks. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor. Offered: W.

HSMGMT 572 Financial Management for Health Professionals (3) Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program or permission of instructor; non-business majors.

HSMGMT 574 Financial Management I (3-4) Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of healthcare organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.

HSMGMT 576 Capital Planning (2) Emphasizes preparing clinical executives for managerial and leadership in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.

HSMGMT 577 Environment of Care (2) Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.

HSMGMT 578 Project Management (2/3) Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects. Offered: W.

HSMGMT 579 Accounting for Health Service Managers (3) Emphasis on preparing graduate students for management and leadership roles in their healthcare organizations. Covers financial accounting including the accounting equation, journal entries, and processes of accounting.

HSMGMT 590 Select Topics (1-6, max. 12) By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. Topic chosen is within the special competence of the participating faculty member, in the area of health services management.

HSMGMT 592 Health Management Program Seminar (1-6, max. 6)

PATHOBIOLOGY

PABIO 498 Undergraduate Thesis (*)
PABIO 499 Undergraduate Research (*, max. 12)
PABIO 500 Introduction to Pathobiology Research (3-9, max. 15) Rotation through research laboratory. Credit/no-credit only. Offered: AWSpS.
PABIO 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PHG 536; Sp.
PABIO 548 Molecular and Cellular Parasitology (3) Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor. Instructors: Feagin

PABIO 550 Diseases and Issues in Global Health (2) O. Soge Provides a broad perspective on global health issues; the biology and strategies for control of diseases of global importance; the global health landscape; and factors that influence global health. Recommended: Background in cellular and molecular biology, and microbiology recommended. This course is intended for students pursuing
laboratory-based research in pathogen biology. Offered: jointly with G H 565; A.

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4) Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Instructors: L. Campbell Offered: jointly with G H 566; A.

PABIO 552 Cell Biology of Human Pathogens and Disease (4) Cell biology and immunology explored through diseases of public health importance. Examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W.

PABIO 553 Survival Skills for Scientific Research (2) Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: W.

PABIO 580 Pathobiology Seminar (1, max. 21) Research from students, faculty members, and invited speakers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W.

PABIO 581 Current Literature in Pathobiology (1, max. 15) Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5, max. 12) Analysis of issues, hypothesis and experimental design and testing. Prerequisite: graduate standing in pathobiology. Instructors: Lingappa Credit/no-credit only. Offered: Sp.

PABIO 590 Selected Topics (1-20, max. 20) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Prerequisite: permission of instructor.

PABIO 591 Rotating Pathobiology Minicourses (1) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format with discussion. Offered: Sp.

PABIO 598 Didactic Pathobiology (*, max. 12) Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor.

PABIO 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 700 Master's Thesis (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 800 Doctoral Dissertation (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PUBLIC HEALTH GENETICS

PHG 200 Implications of Public Health Genomics for the Modern World (3) I&S/NW J. GOGARTEN Introduces the field of public health genomics through examples of genetic, ethical, political, and social issues emerging in the wake of the Human Genome Project. Students develop the skills to analyze and critique public health, clinical, personal, and social implications resulting from emerging genomic technologies. Offered: A.

PHG 301 Introduction to Genetic Epidemiology (5) I&S/NW J. Gogarten Explores basic approaches that are used to identify genetic and environmental factors in health and disease, and how application of this information can be used to improve population
health. Discusses the relevant ethical, legal, and social implications that occur in research and translation to practice. Offered: Sp.

PHG 302 Forensic Genetics (3) I&S/NW, QSR Bruce S Weir Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with BIOST 302; W.

PHG 303 Direct-to-Consumer Genetic Testing: Uses and Issues (5-) I&S/NW Jennifer Morris Gogarten Surveys current genetic tests offered directly to customers (including all types of genomic data generated, and interpretations in health and ancestry) . Investigates current use of personal genomics in forensic and political realms, as well as marketing and regulation of these tests. Ethical, legal, and social implications covered in lectures, debates, and case studies. Recommended: prior exposure to basic genetics (at any level) . Offered: Sp.

PHG 401 Computational and Applied Genetic Epidemiology (5) QSR Alison Fohner Advanced topics in genetic epidemiology for undergraduate students, focusing on hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students will investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: PHG 301 or prior background in basic genetics and statistics. Offered: jointly with BIOST 401/EPI 410; Sp.

PHG 511 Genetic Epidemiology (3) Sara Lindstroem Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with EPI 517.

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/LAW H 504; A.

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) K. THUMMEL Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PCEUT 513; W.

PHG 519 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/EPI 535.

PHG 521 Culture, Society, and Genomics (3) B. MCGRATH Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/NURS 582; Sp.

PHG 523 Genetics and the Law (3) Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520; Sp.
PHG 527 Social Science Research Methods (3) D. BOWEN Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with B H 527; Sp.

PHG 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; Sp.

PHG 544 Ethical Implications of Emerging Biotechnology (3) S. FULLERTON Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: jointly with B H 544; W.

PHG 545 Biostatistical Methods for Big Omics Data (3) This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with BIOST 545/GENOME 545.

PHG 580 Interactive Seminar (1, max. 30) Bruce S Weir Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with LAW H 579; AWSp.

PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6) Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

PHG 595 Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: practicum agreement.

PHG 600 Independent Study or Research (*-) Credit/no-credit only.

PHG 700 Master's Thesis (*) Credit/no-credit only.

PHG 800 Doctoral Dissertation (*) Credit/no-credit only.

SCHOOL OF PUBLIC HEALTH
PUBLIC HEALTH INTERDISCIPLINARY

PHI 511 Foundations of Public Health (3) Examines public health and healthcare - U.S. and globally. Covers foundational elements of public health, including history and impact, importance of health equity and human rights, and how racism manifests and is perpetuated within public health/healthcare systems. Builds community and provides a foundation for students to work effectively as public health professionals on inter-professional teams.

PHI 512 Analytic Skills for Public Health I (7) Focuses on principles and methods of epidemiology and biostatistics, including: descriptive epidemiology, data summaries and presentation, study design, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, confounding, confidence intervals, hypothesis testing, p-values, sample size calculation, and linear regression analysis. Includes hands-on data analysis.

PHI 513 Analytic Skills for Public Health II (3) Introduces qualitative and mixed methods and relevance to rigorous public health research and practice. Places a strong emphasis on qualitative data analysis as an integral dimension of the mixed-methods approach. Focuses on contexts for and types of qualitative research questions, integration with quantitative measures of magnitude and frequency, and assessment of strength of evidence in the context of implementation science. Prerequisite: PHI 511 and PHI 512.

PHI 514 Determinants of Health (3) Describes and applies frameworks for understanding determinants of health at multiple levels and within different
systems. Emphasizes individual- and family-level determinants, physical and social environments, population-level determinants, and systems dynamics. Students learn how to apply theory and to interpret and weigh evidence to identify and prioritize health determinants for public health research, practice, and policy. Prerequisite: PHI 511 and PHI 512.

PHI 515 Implementing Public Health Interventions (4) Uses evidence and ethics in intervention design, implementation, and evaluation. The concepts, models, and methods of implementation science in public health are emphasized across multiple levels of the socio-ecological framework. Ethical considerations include assessing and acting on the values and preferences of stakeholder groups and striving for equity in potential outcomes. Prerequisite: PHI 511; PHI 512; PHI 513; and PHI 514.

PHI 516 Public Health Practice (3) Integrates knowledge of health determinants, public health systems, analytic skills and evidence-based approaches to public health problem solving. Public Health Practice, the culminating course of the MPH core curriculum, develops new skills in public health leadership, management, communication and community engagement. Students work in teams to apply knowledge and skills to real world public health practice challenges through case studies. Prerequisite: PHI 511; PHI 512; PHI 513; and PHI 514.

PHI 579 Structural Racism and Public Health (1) Introduces the concept of institutional racism and ways structural racism undermines public health. Discusses history of racism and intersections between structural racism and other systems of oppression. Explores relationship to racism and ways internalized racism acts as a barrier to health equity. Considers public health practitioners’ role in addressing racism. Credit/no-credit only. Offered: jointly with HSERV 579; AWSp.

PHI 590 Public Health Interdisciplinary Selected Topics (1-10, max. 20) Topics vary.

SCHOOL OF PUBLIC HEALTH

SPH 380 History and Practice of Public Health (5) Suzinne Pak-Gorstein Provides a historical overview of public health as a framework to understand organization of contemporary public health and key issues faced today. Offered: AWSp.

SPH 381 Science and Public Health (5) Edward J. Kasner, Sarah F. Benki Provide an overview and introduction to the ways different scientific disciplines are used to address public health goals. Prerequisite: minimum grade of 1.7 in SPH 380; either BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or both MICROM 301 and MICROM 302. Offered: AWSp.

SPH 480 Research Methods in Public Health (5) Sara Nelson Glick, Jennifer A. Slyker, Kate McGlone West Applies concepts and research methods to real public health problems. Prerequisite: EPI 320; either BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, or STAT 311; and a minimum grade of 1.7 in SPH 381. Offered: AWSp.

SPH 481 Ethics, Social Justice, and Policy in Public Health (5) ALEXANDRA MONTANO, Stephanie Ann Farquhar, Rabi Yunusa Integration of prior learning and consideration of public health decision from an ethics and justice perspective. Prerequisite: minimum grade of 1.7 in SPH 480. Offered: WSp.

SPH 489 Structural Racism and Public Health (1) DIV Tara Bostock, Omid Bagheri Garakani Introduction to and exploration of institutional and structural racism in a public health context. Credit/no-credit only. Offered: AWSp.

SPH 490 Selected Topics in Public Health (1-5, max. 15) In depth study of current public health topics. Offered: AWSpS.

SPH 491 Public Health Capstone I (2-) Anjulie Ganti Part one of integrative experience bringing together students’ knowledge and skills acquired in the public health major. Prerequisite: SPH 380, SPH 381, or SPH 480. SPH 480 may be taken concurrently. Offered: AWS.

SPH 492 Public Health Capstone II (3-) Anjulie Ganti Part two of integrative experience bringing together students’ knowledge and skills acquired in the public health major. Prerequisite: SPH 491. Offered: WSpS.

SPH 493 Public Health Capstone (5) Students complete a final self-directed paper on public health...
topic of interest integrating the knowledge and skills acquired during their time in the public health major. Offered: AWSpS.

SPH 494 Honors Seminar in Public Health (1, max. 5)  
*Anjulie Ganti*  
Skill-building, discussion-based seminar designed to challenge ability to analyze issues in public health using topics raised in current media. Credit/no-credit only. Offered: AWSp.

SPH 495 Public Health Internship (1-5, max. 15)  
*Anjulie Ganti*  
Internship in public health related area. Credit/no-credit only. Offered: AWSpS.

SPH 497 Public Health Special Electives (1-5, max. 15)  
Independent study of a current public health topic. Offered: AWSpS.

SPH 499 Undergraduate Research (1-5, max. 15)  
Individual research on a specific topic in public health. Offered: AWSpS.

SPH 589 Undoing Racism in Public Health (1)  
Introduction to and exploration of institutional and structural racism in a public health context. Credit/no-credit only. Offered: AWSp.

SPH 590 Selected Topics in Public Health (1-5, max. 15)  
In depth study of current public health topics.
RESERVE OFFICER TRAINING CORPS

AEROSPACE STUDIES

A S 101 Foundations of the United States Air Force I (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officer/civilian/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 102 Foundations in the United States Air Force II (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officer/civilian/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Foundations in the United States Air Force III (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officer/civilian/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

A S 211 The Evolution of Air and Space Power I (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: A.

A S 212 The Evolution of Air and Space Power II (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: W.

A S 213 The Evolution of Air and Space Power III (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: Sp.

A S 250 Aerospace Studies Leadership Laboratory (0-1, max. 10) Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Corequisite: any A S course. Credit/no-credit only. Offered: AWSp.

A S 331 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: A.

A S 332 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership
experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: W.

**A S 333 Aerospace Studies 300 (3)** Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: Sp.

**A S 431 Aerospace Studies 400 (3)** I&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: W.

**A S 432 Aerospace Studies 400 (3)** I&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: Sp.

**MILITARY SCIENCE**

**M SCI 101 Military Science and Leadership Development (3)** Introduction to challenges and competences critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.

**M SCI 102 Military Science and Introduction to Tactical Leadership (3)** Overviews leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

**M SCI 103 Military Science and Introduction to Applied Basic Leadership (3)** Final introductory series on leadership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously, considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

**M SCI 110 Military Science Leadership Laboratory (0.5, max. 3)** Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credits do not count toward graduation. Credit/no-credit only. Offered: AWSp.

**M SCI 201 Military Science and Innovative Team Leadership (3)** Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

**M SCI 202 Military Science and Foundations of Tactical Leadership (3)** Explores creative and innovative tactical leadership strategies and styles by
examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders, and cultural awareness. Lessons include fundamentals of leadership, personal development, and tactics and techniques. Offered: W.

M SCI 203 Military Science and Transformational Leadership (3) Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

M SCI 301 Military Science and Tactical Leadership (3) Studies, practices, and evaluates adaptive leadership skills. Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: A.

M SCI 302 Military Science and Applied Leadership (3) Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 303 Military Science and Advanced Tactical Leadership (3) Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments.

Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: AWSp.

M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3) Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher.

M SCI 310 Military Science Advanced Leadership Laboratory (1, max. 6) Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Prerequisite: M SCI 110. Offered: AWSp.

M SCI 401 Military Science and Developmental Leadership (3) I&S Develops proficiency in planning, executing, and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing on advanced leadership development. Prerequisite: M SCI 301; M SCI 302. Offered: A.

M SCI 402 Military Science IV: Advanced (3) I&S Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: W.
M SCI 403 Military Science and Advanced Leadership (3) I&S Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: Sp.

NAVAL SCIENCE

N SCI 101 The Naval Service (3) General introduction to the U.S. Navy and Marine Corps, with emphasis on organization, missions, roles, tasks, assets, and operations. Offered: A.

N SCI 102 History of U.S. Sea Power I (3) I&S A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from the American Revolution to the outbreak of World War II. Prerequisite: N SCI 101. Offered: W.

N SCI 103 History of U.S. Sea Power II (3) I&S A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from World War II to the present day. Prerequisite: N SCI 102. Offered: Sp.

N SCI 110 Naval Science Laboratory (*, max. 12) Evaluates the challenges of leading teams in complex contemporary environments. Topics vary. Required each quarter for NROTC students. Credit/no-credit only. Offered: AWSp.

N SCI 201 Naval Leadership and Management (3) I&S Introduction of the theory and techniques of naval leadership based on principles of behavioral science pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Prerequisite: minimum 2.0 grade in N SCI 101. Offered: A.

N SCI 202 Navigation I (3) NW The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Prerequisite: N SCI 101. Offered: W.

N SCI 301 Naval Ship Systems I (3) Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.

N SCI 302 Naval Ship Systems II (3) Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Prerequisite: N SCI 301. Offered: W.

N SCI 321 Evolution of Warfare (3) I&S Focuses on how and why warfare has changed. Explores how warfare technology has evolved over time. Topics include military theory, fourth generation warfare, and Marine Corps doctrine. Designed for future Marine Corps Officers, but open to all students. Offered: A.

N SCI 323 USMC Leadership and Administration of Justice I (3) Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Prerequisite: N SCI 110; N SCI 421. Offered: Sp.
N SCI 401 Naval Operations (3) Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Prerequisite: N SCI 101. Offered: A.

N SCI 402 Naval Leadership and Ethics (3) I&S Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Offered: W.

N SCI 403 Naval Organization and Management (3) Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis on the leadership and management role of the junior officer in the fleet. Prerequisite: minimum 2.0 grade in N SCI 402. Offered: Sp.

N SCI 421 Amphibious Warfare (3) I&S Provides basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic, operational, and tactical considerations in planning specific operations and amphibious landings. Prerequisite: either N SCI 321 or minimum two POL S or JSIS courses. Offered: A, even years.
SOCIAL WELFARE (BASW)

SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) I&S Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

SOC WF 120 International Responses to Human Needs: Social Welfare Policies and Services (5) Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.

SOC WF 200 Introduction to Social Welfare Practice (5) I&S Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.

SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5) I&S Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, includes dialogue about ways to enhance the exchange of ideas between research and practice communities, and explores implications for social policy.

SOC WF 215 Intergroup Dialogues (3) DIV Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.

SOC WF 250 Writing for Social Welfare (1-2, max. 2) Offers an engaging space for social welfare students to develop, practice, and strengthen college-level writing using exercises, discussion, and lecture. Covers summarizing and responding, critical thinking and argument, APA style and academic honesty, as well as language and the writing process. Review of punctuation and mechanics, grammar, and sentence style. Credit/no-credit only.

SOC WF 297 Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 310 Social Welfare Practice I (5) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

SOC WF 311 Social Welfare Practice II (5) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

SOC WF 312 Social Welfare Practice III (5) Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

SOC WF 315 Community Service Learning (1-5, max. 6) Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-
based experience through the completion of community-based projects in social work-type agencies. Majors only.

**SOC WF 320 Social Welfare Policy (5)** I&S
Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.

**SOC WF 390 Introduction to Social Welfare Research (5)** Introduction to logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.

**SOC WF 402 Human Behavior and Social Environment I (5)** I&S
Focuses on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores the relationship between the person and the environment including families, groups, organizations, communities, and institutions.

**SOC WF 404 Cultural Diversity and Justice (5)** I&S, DIV
History and culture of disadvantaged and oppressed groups served by social welfare generalist practitioners. Offered: Sp.

**SOC WF 405 Fieldwork Seminar (1-4, max. 9)**
Integrates social work practicum experiences with prior and concurrent coursework in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: AWSp.

**SOC WF 410 Evidence-Based Practices in Social Welfare (3)**
Focuses on interface between social work research and practice, with attention to origins and defining features of evidence-based practice (EBP) and approaches to intervention consistent with EBP framework. Integrates content on research and practice priorities, and provides students with knowledge and skills to promote use of theory-driven, empirically-supported interventions.

**SOC WF 415 Beginning Field Instruction (1-12, max. 12)** Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no-credit only. Offered: AWSp.

**SOC WF 435 Skills for Social Welfare Practice (1)**
Builds on first-year generalist practice content. Provides skill building in one or two areas of social work practice relevant to many practice settings. Topic chosen by students and faculty. Credit/no-credit only.

**SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5)** VLPA/I&S, DIV
Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators.

**SOC WF 443 Facilitating Intergroup Dialogue (5)**
Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, troubleshooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in SOC WF 442.

**SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6)**
Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

**SOC WF 450 Integrative Seminar: Poverty Analysis (5)**
Critical analysis of poverty both in the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.
SOC WF 460 Chemical Dependency: Assessment and Treatment (3) Provides students the knowledge and basic skills needed to recognize and understand the dynamics of chemical dependency in the lives of individuals. Students learn how to assess the presence of this disorder and what the issues are in referring individuals to treatment.

SOC WF 465 Social Welfare Capstone Seminar (1) Students demonstrate and reflect on mastery of core competencies and respective practice behaviors foundational to generalist practice. Studies analyze and synthesize data from their experiences in the BASW program and integrate this understanding with their new identity as a professional social worker. Credit/no-credit only.

SOC WF 490 Independent Research in Social Welfare (1-15, max. 15) Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no-credit only.

SOC WF 491 Honors Seminar (1, max. 3) Three quarter seminar for students admitted into the BASW Honors Program. Guides students through stages of research conceptualization and proposal writing, IRB application, data collection and analysis, and dissemination. Includes feedback and discussion with instructor and peers. Credit/no-credit only.

SOC WF 492 Honors Thesis I (3-) Part one of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data collection, management, and preliminary analysis.

SOC WF 493 Honors Thesis II (-3) Part two of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data analysis, research writing, and presentation of results.

SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.

SOC WF 497 Advanced Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 499 Independent Study in Social Welfare (1-15, max. 15) Independent reading or independent study. Includes written paper. Not open to graduate or non-matriculated students.

SOCIAL WELFARE

SOC WL 515 Community Service Practicum (3, max. 6) Development of skills on working in partnership with community institutions in the role of researcher or scholarly collaborator, through ongoing reflection and consultation with a faculty member. Uses a learning contract to focus specific activities. Credit/no-credit only. Offered: AWSpS.

SOC WL 552 Seminar in Contemporary Social Welfare Policy (3) Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to SOC WL 553.

SOC WL 553 Policy Implementation and Organizations (3) Examines diverse organization theories relevance to policy implementation, translational research, and practice interventions within health and human service settings. Emphasizes multilevel models and integrative frameworks that take into account individual, group, and organizational factors, recognizing outcomes as embedded phenomenon nested within organization, community, and societal contexts. Offered: Sp.

SOC WL 554 Analytical Perspectives on Social Welfare Policy (3) Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and
concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.

SOC WL 556 West Coast Poverty Center Seminar Series {1, max. 15} Presents cutting-edge research on poverty, inequality, and public policy. Offered: AWSp.

SOC WL 557 Dissertation and Career Seminar {1, max. 20} Orient advanced PhD students to three main tasks: dissertation, job market, and entering teaching and research careers. Offered: AWSp.

SOC WL 559 Preparing to Teach: Instructional Theory and Practice {3} Teaching conceptualized as professional practice. Focuses on integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis, and experimentation.

SOC WL 573 Proseminar: Cross-Cohort Impact Science Career Development {1} Paula S Nurius Year long course reserved for social welfare doctoral students toward building a cross-cohort collegial support community. Topical foci are broadly: (1) transdisciplinary collaboration skills, (2) translational dissemination and science communication skills, (3) social justice and equity driven aims in scholarship, and (4) stakeholder engagement, co-production of research models and strategies. Offered: AWSp.

SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research {3} Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.

SOC WL 578 Seminar in Special Topics for Prevention Research {1, max. 30} Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Credit/no-credit only.

SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents {3} Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no-credit only.

SOC WL 580 Quantitative Research Methods and Design {3} Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating, and designing defensible quantitative research studies).

SOC WL 581 Qualitative Research Methods and Design {3} Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and community-based research with vulnerable populations.

SOC WL 582 Research Practicum {3} Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 583 Research Practicum {3} Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 584 Teaching Practicum {3} Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract
used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Credit/no-credit only. Offered: AWSpS.

SOC WL 585 Qualitative Methods in Social Work Research I (3) The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3) The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) E. EROSHEVA Multivariate analysis aims to summarize and describe patterns among multiple observed characteristics. Explores theoretical introduction and practical skills to carry out multivariate analysis methods such as cluster analysis, principal components, factor analysis, and latent class analysis. Prerequisite: SOC 504, SOC 505, or SOC 506. Offered: jointly with CS&SS 589; A.

SOC WL 590 Topics in Advanced Research Methods (3) Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

SOC WL 591 Seminar on Topics in Social Welfare (1-5, max. 15)

SOC WL 592 Applied Longitudinal Data Analysis For Social Sciences (4) E. Erosheva Addresses statistical methodology for using longitudinal data to answer research questions about changes over time including exploratory analysis tools, and random coefficient, growth curve, multilevel and hierarchical models, and their extensions. Prerequisite: Successful completion of SOC 504, SOC 505, and SOC 506; and a solid knowledge of linear regression. Offered: jointly with CS&SS 592; A, odd years.

SOC WL 594 The Embodiment of Risk, Health Disparities, and Stress Mechanisms (3) Interdisciplinary course focused on multi-level exposure to and impacts of stress, integrating social determinants and life course development perspectives. An overview of theory and research integrating biological and psychosocial processes with emphasis on vulnerable populations and disparities. Encourages interdisciplinary engagement and supporting students in articulating their research perspectives. Offered: A.

SOC WL 598 Theory and Metatheory in Social Research (3) Explores the nature and role of theory in social research, theoretical and metatheoretical foundations of major social science research paradigms, and interdisciplinary perspectives on the socially constructed nature of theory and definitions of social "problems." Encourages critical, collaborative reflection on the role of theory in contemporary interdisciplinary research environments.

SOC WL 599 Theory Development for Social Research (3) Assists students in applying theory in building an original conceptual model. Emphasizes critical and integrative thinking derived from a social justice framework. Encourages students to examine the ideological, political, methodological, and ethical principles shaping theories, models, and concepts in contemporary social science and social welfare research. Open to interdisciplinary students with instructor permission. Prerequisite: admission to social welfare PhD program or permission of instructor.

SOC WL 600 Independent Study or Research (*) Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Credit/no-credit only. Offered: AWSpS.

SOC WL 800 Doctoral Dissertation (*) Offered: AWSpS.
SOCIAL WORK (MSW)

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3)
Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession’s history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

SOC W 501 Poverty and Inequality (3)
Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (1-4, max. 4)
Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization. Credit/no-credit only.

SOC W 505 Foundations of Social Welfare Research (3)
Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one’s own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.

SOC W 506 Social Welfare Research and Evaluation (3)
Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis. Prerequisite: minimum 2.5 grade in SOC W 505.

SOC W 507 Advanced Standing Social Welfare Research and Evaluation (5)
Introduces a range of methods for informing evidence-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and technique for conducting practice-relevant research, including data collection and analysis. Prerequisite: advanced standing students.

SOC W 510 Micro/Meso Social Work Practice 1: Individuals (3)
Foundation course in direct social work practice with individuals. Introduces knowledge and skills needed for effective and accountable person-centered and participant-directed practice. Students gain skills for engagement, relationship building, interviewing, assessment and collaborative intervention planning with individuals through an intersectional lens.

SOC W 511 Micro/Meso Social Work Practice 2: Families and Groups (3)
Foundation course in direct practice with families and groups. Provides generalist practice knowledge and skills for social work practice with families, small groups and service delivery systems to promote maximum self-determination, functioning, and quality of life. Prepares students for assessment, intervention planning and decision making with families and groups within the context of social systems.

SOC W 512 Macro Social Work Practice 1: Community and Policy Practice (3)
Foundation course in macro social work, focused on community-based social work and policy practice. Students develop skills in system-level assessment, intervention, and evaluation. Theories of social change are examined with examples drawn from community organizing and policy advocacy.

SOC W 513 Macro Social Work Practice 2: Organizational Practice (3)
Foundation course in macro social work practice, focused on organizational change. Using an anti-oppression lens, students develop skills in assessment, intervention and evaluation with groups, organizations, and communities. Students examine ways to facilitate change within organizations and critically assess the cultural aspects of organizations.
SOC W 514 Clinical Social Work: Practice with Adults (3) Theory and practice of clinical social work, emphasizing social justice frameworks and life course perspectives. Emphasizes specialized, strengths-based approaches to all phases of social work practice. Students learn motivational interviewing, critically examining applications with clients of varying social identity categories, given intersectional identities.

SOC W 515 Clinical Social Work: Practice With Children, Youth, and Families (3) Builds on foundational frameworks/competencies applying strength-based, social-justice informed approaches including motivational interviewing to all phases of social work practice specific to children and families. Covers common child and family topics (historical trauma, child development, attachment, intersectionality and disability) focusing on assessment and intervention through a culturally responsive lens.

SOC W 516 Research Base for Prevention Science (3) Introduces the transdisciplinary field of prevention science; enhances understanding of the developmental epidemiology of risk, protection and outcome and how prevention interventions are conceptualized and evaluated; critiques research on preventive interventions and practice; and outlines the role of prevention science in advancing health and well-being over the life course.

SOC W 517 Promoting Individual, Family, School, and Community Risk Prevention (3) Covers existing evidence-based practices in prevention science that have demonstrated effects on reducing risks and promoting positive development in youth. Emphasizes practice skills, topic include promotion of healthy development in childhood/adolescence; prevention of child abuse and neglect, early pregnancy, violence and delinquency, substance abuse, school misbehavior, and mental health disorders.

SOC W 518 Macro Practice in Health and Prevention (3) Students engage in the translation of research, advocacy, and the sustainability and dissemination of prevention initiatives and programs. Includes skill development in policy analysis, community organizing, and media/legislative advocacy. Covers current issues in prevention, the policy context surrounding them, and skills to propel prevention forward as a priority in or society.

SOC W 519 Policy/Services: Health/Mental Health (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 520 Policy/Services: Multigenerational (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 521 Child and Family Inequalities: Policy/Services Platform (3) Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized populations. Examines social construction of policies in historical, political, and comparative context.

SOC W 522 Advanced Standing Integrative Seminar (5) Assists with transition to graduate study for students entering MSW Advanced Standing Program. Serves as bridge between students' BASW preparation and the advanced MSW curriculum; builds graduate-level critical analysis and writing skills, integrating MSW foundation course content in social justice principles, diversity, structural inequalities, anti-oppression work; and micro/mezzo/macro practice.

SOC W 523 Preparation for Advanced Professional Practice - Advanced Standing Students (3) Designed to prepare students in the Advanced Standing MSW program for field/practicum experience. Builds upon content and skills acquired through generalist (micro, mezzo, and macro levels) practice. Includes development of critical thinking skills, values, and knowledge to advance social justice, skills for advancing multiculturalism, intergroup
collaboration, and empowerment. Credit/no-credit only.

SOC W 524 Foundation Practicum (0-10, max. 14) Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Prerequisite: social work major. Credit/no-credit only. Offered: AWSpS.

SOC W 525 Advanced Practicum (1-10, max. 24) Agency-based advanced practicum. Prerequisite: completion of foundation courses and practicum. Credit/no-credit only. Offered: AWSpS.

SOC W 526 Social and Healthcare Policy in an Aging Society (3) Applies a multigenerational, social justice framework to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan, especially marginalized populations. Builds and applies skills to analyze, critique, and advocate for policies and services that support growing numbers of older adults and multigenerational families.

SOC W 527 Global and Local Inequalities: Critical Analyses of the Processes and Policies of Globalization (3) Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era, and their local impacts. Foci include international agreements, UN conventions, immigration, and refugee policies.

SOC W 528 Healthcare Inequalities: Policy/Services Platform (3) Examines the organization, policies, and services of U.S. healthcare system from a social justice framework. Topics include the U.S. healthcare system's historical development, differential access to health and healthcare, healthcare system reform, and the analysis of healthcare policy from contrasting ideological perspectives.

SOC W 529 Mental Health Inequalities: Policy/Services Platform (3) Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

SOC W 530 Advanced Practice with Diverse Children and Families (3) Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

SOC W 531 Practice with Diverse Children and Families: Focus on Child Mental Health (3) Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics include culture and mental health, system of care, psychotropic medication, ADHD, and depression.

SOC W 532 Practice with Diverse Children and Families: Focus on Child Welfare (3) Develops specialized knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.

SOC W 533 Practice with Diverse Children, Youth, and Families: Community Settings (3) Focuses on the critical role of neighborhoods and communities as settings for child and family social work intervention. Provides the theoretical, empirical, and practical foundations for engaging with, implementing, and designing effective programs and services with and for children, youth, and families in diverse community settings.

SOC W 534 Praxis of Intergroup Dialogue (3) Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.
SOC W 535 Special Topics in Interpersonal/Direct Practice (2-3, max. 9) Examines current substantive topics in direct/interpersonal practice.

SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3) Focuses on social, economic, and political problems from an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a good organizer.

SOC W 537 Empowerment Practice with Refugees (3) Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.

SOC W 538 Critical Empowerment Practice with Multi-ethnic Communities (3) Principles of empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

SOC W 539 Breaking Down the Wall and Shifting the Paradigm: Engaged Practice with Latinas and Latinos (3) Provides advanced knowledge and skills for practice with diverse Latinx populations through 1) examination of structural and cultural factors, and 2) understanding of Latinx practice models to promote the well-being of Latinx communities at multiple levels and in local and global contexts in culturally responsive ways.

SOC W 540 Advanced Social Work Practice in Health Settings I (3) Teaches theory and strengths-based practice within interprofessional health care settings from bio-psychosocial, family systems, multicultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

SOC W 541 Social Work Practice in Health Settings (3) Teaches health care theory and practice skills relevant to working with adults and children in a variety of health care settings, using biopsychosocial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

SOC W 542 Recovery-Oriented Social Work Practice in Community Mental Health (3) Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

SOC W 543 Social Work Practice in Community Mental Health II (3) Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Covers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and working with Social Security. Complements SOC W 542, but may be taken free-standing.

SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3) First quarter of a two-quarter sequence on the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, counter transference, psychological defenses, resistance, phases of treatment, transference, countertransference, and vicarious trauma.

SOC W 545 Evidence-Based Practices for Clinical Social Work (3) Continues knowledge building around the theory and practice of clinical social work with adults. Focuses on deeper application of
theories and evidence-based practices for clinical social work. Emphasizes cognitive-behavioral approaches within the context of a social ecological framework and a recovery orientation.

SOC W 546 Addressing Trauma and Recovery in Multi-Generational Advanced Practice (3)
Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the-art techniques for healing trauma.

SOC W 547 Multigenerational Integrative Seminar (1-3, max. 3) Designed to foster the integration of classroom learning and field education. Taken concurrently with advanced practicum, provides support for addressing challenges in professional settings, development of leadership skills, and preparing for future work in the field of multigenerational practice. Credit/no-credit only.

SOC W 548 Advanced Practice I: Multigenerational (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 549 Advanced Practice II: Multigenerational (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 550 Strategic Program Management and Change Leadership in Human Services (3) Examines tools and techniques required for leadership, program planning, implementation, and program change. Topics include strategic planning, logic modeling, agency-bound relations, work-group facilitation, and diversity-promoting management. Lecture, discussion, and exercises. Required for SSW administration concentrators; open to others with permission of instructor.

SOC W 551 Human Resource Management in the Human Services (3) Theories and techniques for designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.

SOC W 552 Financial Management of Human Services Programs (3) Covers key financial management components of human service programs, including development and use of business plans, budgets, and financial statements. Helps students to demonstrate an understanding of financial management through budget preparation, financial statement analysis, new project cost projections, audits, and presentations using computer-based spreadsheets and presentation software.

SOC W 554 People, Place, Equity (3) Introduces empirical, theoretical, and applied knowledge on place as a key dimension of social work practice. Examines how people-place relationships differentially affect social opportunities such as health and wellness, employment, and housing. Provides intellectual and practical foundations for incorporating spatial analyses and collaborative place-making interventions in practice.

SOC W 555 Global Perspectives in Social Work Practice (3) Focuses on contemporary social issues of global importance: poverty; HIV/AIDS; population growth; gender inequality; and war, conflict, and displacement, with specific focus on these issues in the global south. Examines sociocultural, economic, and political processes that shape these issues, and entwined perspective of human rights and development.

SOC W 556 Family Healing: A Cross-Generational Approach (3) Lustbader Explores how to respond to multi-generational dynamics within the entire extended family and examines how bow difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.
SOC W 557 Caring for Persons with Life-Limiting Illness: A Lifespan Approach (3) Focuses on multi-systemic social work practice with seriously ill people with a life-limiting condition. Examines how families care for a critically ill love one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.

SOC W 558 Gender, Gender Identity, and Sexuality (3) Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students’ micro and macro practice skills.

SOC W 559 Child Development (3) Provides students with a basic understanding of child development theory and research as well as specific knowledge about the development of children from infancy through adolescence. Emphasizes developmental approach to assessment and intervention with children and families. Particular emphasis paced on developmentally-based child welfare practice.

SOC W 560 Policy Processes, Institutions, and Influences (3) Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy process, including social problem definition, policy design, policy adaptation, and policy implementation.

SOC W 561 Concepts and Methods of Policy Analysis (3) Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.

SOC W 562 Advanced Practice I: Health/Mental Health (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 563 Advanced Practice II: Health/Mental Health (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 565 Special Topics in Policy Practice (2-3) Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.

SOC W 569 Community-Centered Integrative Practice (3) This interactive student-centered course shifts the paradigm from the binary of macro vs micro and elevates the importance of relationships, connectivity, and allyship as acts of love, justice and resistance. Provides advanced skill building in assessing and maximizing community strengths, empowering practices and coalition building.

SOC W 570 Anti-racist Organizing for Social and Economic Change (3) Applies an institutional analysis of racism and white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.

SOC W 571 Assessment of Mental Disorders (3) Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-V) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.

SOC W 572 Understanding Addiction, Pharmacology of Drugs, and Treatment Methods (3) Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of individuals, how to assess the presence of this disorder, and what the issues
are in referring individuals to treatment for this disorder.

**SOC W 573 Child Welfare and Permanency Planning (3)** Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.

**SOC W 574 Collaborative Community-Based Program Evaluation (3)** Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

**SOC W 575 Domestic Violence Policy and Intervention (3, max. 6)** Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

**SOC W 576 Contexts of Disability and Anti-Ableist Practice (3)** Engages several areas of social work practice where knowledge about disability as an element of human diversity is needed. Examines disability’s recent socio-political history, models of disability, disability rights and disability justice frameworks. Emphasizes how policies and their implications for practice affect peoples’ daily lives and facilitates critical personal reflection.

**SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2-3)** Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.

**SOC W 578 Evidence-Based Practice in Child Mental Health (3)** Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a “systems care philosophy” and which offer alternatives to traditional services.

**SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3)** Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

**SOC W 580 Grant Writing and Fund Development (3)** Prepares students to participate and provide leadership in grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.

**SOC W 581 Historical Trauma and Healing (3)** Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.

**SOC W 582 Interpersonal Violence and Trauma (3)** Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference reactions. Includes lecture, discussion, case presentations, and presentations by community experts.

**SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3)** Uses critical analysis to expand Western symptom-oriented grief and loss theory to include...
multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.

**SOC W 584 Multicultural Mental Health Practice (3)**
Advanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.

**SOC W 585 Advanced Group Work (3)**
Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

**SOC W 586 Policy Advocacy (1-3, max. 3)**
Focuses on involvement in the policy-making process. Students design projects to influence public policy in local, state, and federal levels. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no-credit only.

**SOC W 587 Spirituality in Healthcare (2)**
Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/FAMED 547; Sp.

**SOC W 588 Social Work in Schools (3)**
Meets professional standards for Washington State Educational Staff Associate certification. Explores social work role within organizational and legal contexts of school systems. Addresses evidence-informed and multi-level social work practice relative to national, state and local trends in education. Examines school reform, truancy, homelessness, diversity, violence, student support and special education.

**SOC W 589 Social Work Practice with Families (3)**
Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.

**SOC W 590 Social Work Supervision and Consultation (3)**
Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staff-related performance problems.

**SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3)**
Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.

**SOC W 592 Social Work Practice with African-American Families (3)**
Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.

**SOC W 593 Social Work Practice with Chemically Dependent Adults: Understanding Assessment, Evaluation, and Counseling (3)**
Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.

**SOC W 594 Gender and Inequalities in the Global Context (3)**
Examines issues of gender, globalization, and inequality through a gender lens. Topics include
global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public polices, international frames (human rights), resistance, and response.

**SOC W 595 Co-Occurring Addiction and Mental Health Disorders (3)** Provides students with the knowledge and skills to understand the dynamics of co-occurring addiction and mental health disorders (COD) in the lives of individuals. Students learn how to assess the presence of COD and what the issues are in referring individuals to treatment or providing them treatment for COD.

**SOC W 596 Special Topics in Social Work (1-10, max. 15)** Introduces and explores a specific area of social work, with specific focus on emerging methods of practice. Content varies according to recent developments in the field and the interests of the instructor.

**SOC W 597 Graduate Study Abroad in Social Work (1-15, max. 15)** For graduate students in a UW study abroad program. Specific content varies and must be individually evaluated.

**SOC W 598 Integrative Seminar (1-5, max. 12)** Integrative, skill-based seminar that provides MSW students an opportunity to synthesize social work theory and practice through applied critical thinking, case presentations, skill-building, and professional development. Credit/no-credit only.

**SOC W 599 Independent Study in Social Work (1-10, max. 10)** Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities. Credit/no-credit only.

**SOC W 600 Independent Study or Research (1-10, max. 10)** An independent research project. Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities included on the SOC W 600 form.

**SOC W 700 Master’s Thesis (•-•)**
INTERDISCIPLINARY UNDERGRADUATE PROGRAMS

HONORS PROGRAM

HONORS 100 Introduction to Honors Education (1)
Introduces students to the essential features of the Honors Program, including interdisciplinary thinking, experiential learning, and the Honors portfolio. For University Honors Program students only.

HONORS 205 What We Know and How We Know It (5) C Helps students to develop methods of researching and gaining knowledge through critical reading of texts, dialogue, reflective writing, and visiting faculty lecturers from different disciplines. For University Honors Program students only. Cannot be taken for credit if credit received for HONORS 345.

HONORS 210 Humanities for Honors Students I (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 211 Humanities for Honors Students II (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 212 Humanities for Honors Students III (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 213 Honors Foreign Study I - Humanities (2-5, max. 15) VLPA Coursework drawn from interdisciplinary groups in the arts and humanities. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 220 Science for Honors Students I (5, max. 15) NW Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 221 Science for Honors Students II (5, max. 15) NW Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 222 Science for Honors Students III (5, max. 15) NW Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 223 Honors Foreign Study II - Natural Science (2-5, max. 15) NW Coursework drawn from interdisciplinary groups in the natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 230 Social Science for Honors Students I (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 231 Social Science for Honors Students II (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 232 Social Science for Honors Students III (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 233 Honors Foreign Study III - Social Science (2-5, max. 15) I&S Coursework drawn from interdisciplinary groups in the social sciences.
Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 240 Fine Arts for Honors Students I (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 241 Fine Arts for Honors Students II (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 242 Fine Arts for Honors Students III (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 245 Interdisciplinary Writing Seminar (5, max. 15) C Investigates emerging topics of interest in the arts and sciences and frames the investigation of subject matter through writing and dialogic inquiry within a particular field. Students discuss, revise, and reflect upon their work through peer review, in-class writing activities, and editorial feedback. For University Honors Program students only. Cannot be taken for credit if credit received for HONORS 205.

HONORS 345 Interdisciplinary Writing Seminar (5, max. 15) C Investigates emerging topics of interest in the arts and sciences and frames the investigation of subject matter through writing and dialogic inquiry within a particular field. Students discuss, revise, and reflect upon their work through peer review, in-class writing activities, and editorial feedback. For University Honors Program students only. Cannot be taken for credit if credit received for HONORS 205.

HONORS 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For University Honors Program students only. Credit/no-credit only.

HONORS 381 Honors Foreign Study IV (2-5, max. 15) NW/I&S/VLPA Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 382 Honors Foreign Study V (2-5, max. 15) I&S/NW Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 383 Honors Foreign Study VI (2-5, max. 15) VLPA/NW Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 384 Honors Foreign Study VII (2-5, max. 15) VLPA/I&S Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 391 Honors Interdisciplinary Study I (5, max. 15) NW/VLPA/I&S Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. For University Honors Program students only.

HONORS 392 Honors Interdisciplinary Study II (5, max. 15) NW/I&S Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. For University Honors Program students only.

HONORS 393 Honors Interdisciplinary Study III (5, max. 15) VLPA/NW Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. For University Honors Program students only.

HONORS 394 Honors Interdisciplinary Study IV (5, max. 15) I&S/VLPA Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. For University Honors Program students only.

HONORS 396 Interdisciplinary Special Topics-Natural Science (1-5, max. 10) NW Special courses drawn from interdisciplinary groups in the natural sciences. Content varies. For University Honors Program students only.
HONORS 397 Interdisciplinary Special Topics-Social Science (1-5, max. 10) I&S Special courses drawn from interdisciplinary groups in the social sciences. Content varies. For University Honors Program students only.

HONORS 398 Interdisciplinary Special Topics-Humanities (1-5, max. 10) VLPA Special courses drawn from interdisciplinary groups in the humanities. Content varies. For University Honors Program students only.

HONORS 496 Integration of the Honors Core Curriculum (1) Allows students completing the Interdisciplinary Honors Program to reflect on and present to peers the intersection between their Interdisciplinary Honors core courses and experiential learning projects. For University Honors Program students only. Offered: WSp.

HONORS 499 Honors Independent Study or Research (1-5, max. 10) Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. For University Honors Program students only.

LEADERSHIP

LEAD 100 Learning Leadership in Theory and Practice (5) Introduces students to contemporary leadership theories and frameworks. Emphasis on translating formal, academic study of leadership into practice. Highlights authentic leadership constructs and concepts that center the value of social justice and critical perspectives. Develops students’ leadership identity and confidence and sets the stage for continued leadership development. Credit/no-credit only. Offered: AWSp.

LEAD 298 Special Topics in Leadership Studies (1-5) Varied topics related to leadership studies taught at an introductory level. Offered: AWSpS.

LEAD 495 Leadership E-portfolio (2/3) Francesca C. Lo Guides the creation of a leadership e-portfolio through a series of reflective exercises. Supports students in integrating learning and articulating connections between personal strengths, values, key learning experiences and future goals through a leadership development lens. Credit/no-credit only. Offered: W.
FACULTY

Entries include appointment to the Graduate School faculty (indicated by *); year of appointment to the University; graduate or professional degree(s), date(s) and institution(s) (or highest-known degree where graduate or professional degree was unavailable; see note below). Faculty are listed only under their primary appointing department.

Please note: Due to a change in databases just prior to publication of this edition of the General Catalog, many of the highest-attained degrees for faculty were unavailable. Listed is the highest-attained degree that was available at the time of publication. For full information on faculty, please consult the departmental web pages listed with each department’s entry.

Professors

ANAGNOST, ANN S * 1990; Bachelor's, 1971, University of Michigan-Ann Arbor
BARKER, HOLLY M * 2004; Master's, 1993, American University
BILANIUK, LAADA M * 1997; Master's, 1991, University of Michigan-Ann Arbor
CLOSE, ANGELA E. * 1995; Bachelor's, 1971, University of Cambridge
DUNCAN, BETTINA SHELL * 1995; Bachelor's, 1985, Northwestern University
FITZHUGH, J.BEN * 1997; Master's, 1992, University of Michigan-Ann Arbor
GOODREAU, STEVEN M. * 2001; Bachelor's, 1994, Harvard University
HUNN, EUGENE S * 1982; Bachelor's, 1964, Stanford University
KAHN, MIRIAM * 1986; Master's, 1974, Bryn Mawr College
KEYES, CHARLES F * 1982; Bachelor's, 1959, American University
KRAMER, PATRICIA * 1993; Bachelor's, 1984, The University of Texas
LAPE, PETER V * 2000; Doctorate, 2000, Brown University
LEONETTI, DONNA * 1982; Bachelor's, 1965, University of Washington
LOWE, CELIA * 1999; Bachelor's, 1990, Wesleyan University
NASON, JAMES * 1982; Bachelor's, 1964, University of California-Riverside
O'CONNOR, KATHLEEN A. * 1999; Bachelor's, 1984, New York University
OTTENBERG, SIMON, 1982; Doctorate, 1957, Northwestern University
PENA, DEVON G * 1999; Bachelor's, 1976, The University of Texas
SMITH, ERIC A, 1982; Master's, 1976, Cornell University
SPAIN, DAVID H, 1968; Bachelor's, 1961, Ohio State University Agricultural Technical Institute
WINANS, EDGAR V, 1957; Bachelor's, 1952, University of California-Los Angeles
**Associate Professors**

AMRUTE, SAREETA BIPIN * 2008; Bachelor's, 1997, Columbia University  
CHAPMAN, RACHEL R * 2004; Master's, 1991, University of California-Los Angeles  
EISENBERG, DANIEL T A * 2012; Doctorate, 2012, Northwestern University  
FEATHERS, JAMES K * 1983; Bachelor's, 1972, University of North Carolina  
GONZALEZ, SARA L * 2013; Master's, 2006, University of California-Berkeley  
GOVINDRAJAN, RADHIKA * 2015; Master's, 2006, Jawaharlal Nehru University  
HAAKANSON, SVEN D * 2013; Master's, 1996, Harvard University  
HOLMAN, DARRYL J. * 1999; Doctorate, 1996, Pennsylvania State University-College of Medicine  
JOLLES, CAROL Z, 1982; Bachelor's, 1963, Roosevelt University  
GOVINDRAJAN, RADHIKA * 2015; Master's, 2006, Jawaharlal Nehru University  
HAAKANSON, SVEN D * 2013; Master's, 1996, Harvard University  
HOLMAN, DARRYL J. * 1999; Doctorate, 1996, Pennsylvania State University-College of Medicine  
JOLLES, CAROL Z, 1982; Bachelor's, 1963, Roosevelt University  
LLOBERA, MARCOS * 2004; Bachelor's, 1991, Southern Illinois University  
MARWICK, BENJAMIN * 2008; Doctorate, 2008, Australian National University

**Assistant Professors**

DUBAL, SAM BHARAT, 2020; Medical Doctorate, 2017, Harvard University  
GRANT, JENNA M * 2015; Bachelor's, 1999, University of California-Berkeley  
HILL, ALEXANDER KIRKLAND, 2015; Master's, 2011, Pennsylvania State University-College of Medicine  
MARTIN, MELANIE A., 2017; Master's, 2011, University of California-Santa Barbara; Anthropology  
RABANES, RAPHAELLE * 2020; Bachelor's, 2003, Université Denis Diderot Paris VII; Clinical Psychology  
VAN EIJK, MARIEKE SIMONE, 2014; Master's, 2002, University of Amsterdam

**Lecturers**

CLARK, HEATHER, 2017; Bachelor's, 1991, The Evergreen State College  
DUNCAN, ANDREA E, 2002; Bachelor's, 1993, Duke University; Anthropology  
LEE, RACHEL JIHYUN, 2016  
TAYLOR, MATTHEW STRICKLAND, 2013; Bachelor's, 1998, Angelo State University  
TREIN, DEBORA C., 2017; Doctorate, 2016, The University of Texas at Austin; Anthropology

**Applied Mathematics**

MOENS, CECILIA B * 1998; Doctorate, 1993, University of Toronto
PAREDEZ, ALEXANDER R. * 2012; Associate, 1995, College of the Sequoias
PARRISH, JAY Z * 2010; Doctorate, 2002, University of Colorado at Boulder
PETERSEN, KAREN E, 1990; Bachelor's, 1975, University of Nebraska-Lincoln
SANTANA MATA, SHARLENE E. * 2012; Master's, 2004, Universidad de los Andes Mérida
SCHIVELL, AMANDA E, 1994; Bachelor's, 1992, Stanford University
SELF, CASEY J, 2007; Bachelor's, 2003, University of California-Davis
SHOU, WENYING * 2008; Doctorate, 2001, California Institute of Technology

Assistant Professors

ABRAHMS, BRIANA LEE * 2020; Doctorate, 2016, University of California-Berkeley; Environmental Science
HURME, KRISTIINA JUNE, 2019; Doctorate, 2011, University of Connecticut; Biology
RASMUSSEN, JEFFREY P * 2018; Bachelor's, 2002, Brown University; Biology
RICO-GUEVARA, ALEJANDRO, 2019; Doctorate, 2014, University of Connecticut; Ecology
STEINBRENNER, ADAM D * 2019; Doctorate, 2015, University of California-Berkeley; Botany/Plant Biology
THEOBALD, ELINORE JENKINS, 2004; Doctorate, 2016, University of Washington; Biology

Lecturers

COOPER, JACOB DEVIN, 2008; Bachelor's, 2005, University of California-Berkeley
DOOLEY, FREDERICK DANIEL, 2009
DRAPER, MOON, 2014; Doctorate, 2005, The University of Texas; Molecular Genetics
FREEMAN, SCOTT RIDER * 1985; Bachelor's, 1978, Carleton College
Chemistry

For complete faculty listing, please visit https://chem.washington.edu/people/faculty

Professors

CAMPBELL, CHARLES T * 1989; Bachelor's, 1975, The University of Texas

CHIU, DANIEL T. * 2000; Doctorate, 1998, Stanford University

CHRISTIAN, GARY D * 1982; Master's, 1962, University of Maryland-University College

COSSAIRT, BRANDI MICHELLE * 2012; Bachelor's, 2006, California Institute of Technology

DALTON, LARRY R. * 1998; Doctorate, 1971, Harvard University

DROBNY, GARY P * 1981; Bachelor's, 1976, San Francisco State University

DUNNING, THOMAS HAROLD * 2013; Doctorate, 1970, California Institute of Technology

GAMELIN, DANIEL R. * 2000; Bachelor's, 1990, Reed College

GELB, MICHAEL H. * 1985; Bachelor's, 1979, University of California-Davis

GINGER JR, DAVID S. * 2003; Bachelor's, 1997, Indiana University-Bloomington

GOLDBERG, KAREN * 1995; Bachelor's, 1983, Barnard College

HEINEKEY, DENNIS M, 1991; Doctorate, 1982, University of Alberta

KELLER, SARAH L. * 2000; Doctorate, 1995, Princeton University

KHALIL, MUNIRA * 2006; Bachelor's, 1998, Colgate University

KOVACS, JULIA A. * 1988; Doctorate, 1986, Harvard University

KWIRAM, ALVIN L, 1982; Doctorate, 1963, California Institute of Technology

LALIC, GOJKO * 2008; Doctorate, 2004, Harvard University

LI, XIAOSONG * 2005; Bachelor's, 1999, University of Science and Technology of China; Chemistry

MALY, DUSTIN JAMES * 2006; Doctorate, 2002, University of California-Berkeley

MASIELLO, DAVID * 2004; Bachelor's, 1999, University of Florida

MC COY, ANNE BOWEN * 2015; Bachelor's, 1987, Haverford College

RATHOD, PRADIPSINH K. * 2001; Doctorate, 1982, Oregon Health & Science University

RAUCHER, STANLEY, 1982; Bachelor's, 1970, University of Minnesota-Duluth

REID, PHILIP J. * 1995; Doctorate, 1992, University of California-Berkeley

REINHARDT, WILLIAM P., 1991; Master's, 1966, Harvard University

ROBINSON, BRUCE H * 1980; Bachelor's, 1967, Princeton University

ROE, NORMAN J, 1966; Bachelor's, 1957, Knox College

SASAKI, TOMIKAZU * 1989; Master's, 1981, Kyoto University

SPIRO, THOMAS, 2007; Doctorate, 1960, Massachusetts Institute of Technology

SYNOVEC, ROBERT E. * 1986; Bachelor's, 1981, Bethel College

TURECEK, FRANTISEK * 1990; Master's, 1973, Charles University

VANDENBOSCH, ROBERT, 1982; Bachelor's, 1954, Calvin College

VARANI, GABRIELE * 2001; Bachelor's, 1982, Università degli Studi di Milano

WIEGAND, DEBORAH H, 1990; Doctorate, 1990, Northern Illinois University

XANTHEAS, SOTIRIS * 2016

ZHANG, BO * 2008; Master's, 2002, Peking University

Associate Professors

BOYDSTON, ANDREW JACKSON * 2010; Doctorate, 2007, The University of Texas

BUSH, MATTHEW FRANCIS * 2011; Bachelor's, 2003, Carleton College

CARROLL, ANDREA D., 1998; Bachelor's, 1997, Creighton University

CHATTERJEE, CHAMPAK * 2010; Master's, 1999, IIT
CRAIG, COLLEEN, 2001; Bachelor’s, 2001, University of Colorado Denver
GOLDMAN, LAWRENCE MICHAEL, 2014; Bachelor’s, 2005, Rutgers University-Camden
MICHAEL, FORREST * 2004; Master’s, 1998, Harvard University
NELSON, ALSHAKIM * 2015; Bachelor’s, 1999, Pomona College
STOLL, STEFAN * 2011; Doctorate, 2003, Swiss Federal Institute of Technology ETH Zürich
VAUGHAN, JOSHUA CHARLES * 2013; Doctorate, 2005, Massachusetts Institute of Technology

Assistant Professors

FU, DAN * 2015; Bachelor’s, 2003, Peking University
GOLDER, MATTHEW ROSS * 2019; Master’s, 2014, Boston University; Chemistry
MAIBAUM, LUTZ GERRIT, 2011; Diploma, 2001, Heinrich Heine Universität Düsseldorf; Physics
ROBINSON, SAMANTHA JO, 2018; Bachelor’s, 2009, University of Iowa; Chemistry
SCHLENKER, CODY W * 2011; Bachelor’s, 2004, Linfield College
THEBERGE, ASHLEY * 2015; Doctorate, 2011, University of Cambridge
VELIAN, ALEXANDRA * 2017; Bachelor’s, 2009, California Institute of Technology
XIAO, DIANNE JING * 2019; Bachelor’s, 2011, Harvard University; Chemistry
ZALATAN, JESSE GEORGE * 2014; Bachelor’s, 2002, Harvard University

Senior Lecturer

BRYANT, JASMINE R, 1998; Bachelor’s, 1995, California Institute of Technology

Lecturers

CHONG, ERICA CHRISTINE, 2010; Bachelor’s, 2010, Mississippi College; Chemistry
FURUTANI, JUSTINE L., 2018; Bachelor’s, 1983, California Institute of Technology; Chemistry
SKOGERBOE, KRISTEN, 2017; Bachelor’s, 1982, Colorado State University; Chemistry

Cinema and Media Studies

For complete faculty listing, please visit https://chem.washington.edu/people/faculty

Professors

ADAMS, HAZARD S, 1977; Bachelor’s, 1948, Princeton University
AMES, ERIC C. * 1991; Bachelor’s, 1991, Dartmouth College
BORCH-JACOBSEN, MIKKEL * 1986; Doctorate, 1981, Université de Strasbourg
BRAESTER, YOMI * 2000; Bachelor’s, 1985, Hebrew University of Jerusalem
BROWN, MARSHALL J * 1988; Bachelor’s, 1965, Harvard University
STEELE, CYNTHIA * 1986; Bachelor’s, 1973, California State University-Chico
TWEEDIE, JAMES * 2004; Bachelor’s, 1992, Stanford University

Associate Professors

BEAN, JENNIFER M * 1998; Bachelor’s, 1990, Davidson College
GROENING, STEPHEN F * 2014; Master’s, 2001, Claremont Graduate University
KOGOJI-KAPETANIC, BREDA, 1982; Doctorate, 1966, University of Zagreb
MAHADEVAN, SUDHIR * 2008; Master’s, 2000, New York University
Assistant Professors

AHERN, MALLORY * 2019; Master's, 2011, CUNY Graduate School and University Center

Lecturer

DIAZ POZUETA, MARIA, 1999

Classics

For complete faculty listing, please visit https://classics.washington.edu/people/faculty

Professors

BLIQUEZ, LAWRENCE J * 1982; Bachelor's, 1963, St Mary's University
BLONDELL, RUBY * 1985; Doctorate, 1984, University of California-Berkeley
CLAUSS, JAMES J * 1984; Master's, 1976, Fordham University
CONNORS, CATHERINE M. * 1990; Bachelor's, 1984, Harvard University
GOWING, ALAIN M. * 1988; Master's, 1981, Bryn Mawr College
HARMON, DANIEL P * 1982; Bachelor's, 1962, Loyola University Chicago
HINDS, STEPHEN E * 1992; Doctorate, 1985, St John's College
KAMEN, DEBORAH E * 2007; Bachelor's, 1998, Bryn Mawr College
LEVANIOUK, OLGA * 2001; Doctorate, 2000, Harvard University
STROUP, SARAH C * 1992; Master's, 1994, University of California-Berkeley

Associate Professors

HOLLMANN, ALEXANDER J * 2001; Doctorate, 1998, Harvard University
LEVIN-RICHARDSON, SARAH * 2009; Master's, 2006, Stanford University
TOPPER, KATHRYN R * 2008; Bachelor's, 2000, Bryn Mawr College

Assistant Professor

WALDO, CHRISTOPHER, 2020

Lecturer

GOREY, MATTHEW M, 2012

Communication

For complete faculty listing, please visit https://com.uw.edu/people/faculty/

Professors

BALDASTY, GERALD J * 1974; Bachelor's, 1972, University of Washington
BEAM, RANDAL A * 1997; Bachelor's, 1974, American University
BOWEN, LAWRENCE, 1982; Bachelor's, 1968, Pennsylvania State University-College of Medicine
CECCARELLI, LEAH M. * 1996; Master's, 1992, Northwestern University
COUTU, LISA, 1990; Bachelor's, 1988, University of Massachusetts
CRANSTON, PATRICIA, 1982; Bachelor's, 1944, The University of Texas
DOMKE, DAVID S. * 1998; Bachelor's, 1991, California State University-Fullerton
FOOT, KIRSTEN A * 2001; Bachelor's, 1989, Northwestern University
HAROLD, CHRISTINE L * 2007; Master's, 1999, Pennsylvania State University-College of Medicine
JOSEPH, RALINA L * 2005; Bachelor's, 1996, Brown University
LANG, KURT, 1984; Bachelor's, 1949, University of Chicago
MANUSOV, VALERIE L * 1993; Master's, 1984, Michigan State University
MCGARRITY, MATTHEW K, 2004; Master's, 2000, Indiana University-Bloomington
MOY, PATRICIA * 1998; Bachelor's, 1989, Cornell University
NISHIME, LEILANI * 2008; Bachelor's, 1989, University of California-Berkeley
PEMBER, DON R, 1982; Bachelor's, 1964, Michigan State University
PHILIPSEN, GERRY F, 1982; Doctorate, 1972, Northwestern University
RIVENBURGH, NANCY * 1990; Master's, 1982, Boston University
RUSSELL, ADRIENNE MARIE * 2017; Doctorate, 2001, Indiana University-Bloomington
SCHEIDEL, THOMAS, 1976; Master's, 1955, University of Washington
UNDERWOOD, DOUGLAS M, 1987; Master's, 1974, Ohio State University Agricultural Technical Institute

**Associate Professors**

COOK, CALEY K, 2013; Bachelor's, 2002, University of San Diego
CROFTS, ANITA, 1996; Bachelor's, 1992, Haverford College
FEARN-BANKS, KATHLEEN A. * 1990; Master's, 1965, University of California-Los Angeles
KIELBOWICZ, RICHARD B * 1984; Bachelor's, 1975, The College of Wooster
OTANEAZ, ANDREA K., 2013; Bachelor's, 1986, University of Utah
PEARCE, KATY E. * 2012; Doctorate, 2011, University of California-Santa Barbara
POST, ROBERT M, 1982; Master's, 1958, Ohio Christian University
POWERS, MATTHEW J * 2013; Doctorate, 2013, New York University
SPRATT, MARGARET, 1998; Bachelor's, 1982, University of California-Los Angeles
YASIN, EKIN, 2013; Bachelor's, 2003, Georgetown University

**Assistant Professors**

CROWLEY, JOHN P. * 2008; Master's, 2006, San Diego State University
FRIZ, AMANDA, 2020; Master's, 2013, University of Utah
GONZALEZ, CARMEN * 2015; Bachelor's, 2005, University of Southern California
HILL, BENJAMIN C * 2013; Bachelor's, 2003, Hampshire College
RAHMAN, ABU SALEH MOHAMMAD ANISUR, 2020; Master's, 2007, Rajshahi University
SCHARP, KRISTINA * 2018; Doctorate, 2014, University of Iowa
SLAKER, JANINE S, 2020; Bachelor's, 2005, Maryland Institute College of Art

**Lecturers**

KEYES, WHITNEY M, 2017
MAYO, JUSTIN, 2017
SOUDERS, MICHAEL C., 2013; Bachelor's, 2004, Eastern New Mexico University-Main Campus
STUTEVILLE, SARAH R, 2009
VANNINI, SARA, 2016

**Artists in Residence**

SILBERNER, JOANNE MARCIA, 2010; Master's, 1979, Columbia University
TOMASIC, JOHN F., 2019; Doctorate, 1997, Indiana University-Bloomington

**Comparative History of Ideas**

For complete faculty listing, please visit https://chid.washington.edu/people

**Professors**

HANDWERK, GARY J * 1984; Doctorate, 1984, Brown University
THURTLE, PHILLIP S * 1998; Master's, 1994, Stanford University

**Associate Professors**

GARCIA, MARIA E * 2008; Master's, 1996, Brown University
SIMPSON, CAROLINE CHUNG * 1994; Bachelor's, 1985, The University of Texas

**Senior Lecturers**

WYGANT, CHRISTINA D, 2003

**Dance**

For complete faculty listing, please visit https://dance.washington.edu/people/faculty

**Professors**

KNAPP, JOAN S, 1981; Bachelor's, 1946, Bennington College
MCMAINS, JULIET * 2006; Bachelor's, 1994, Harvard University
WILEY, HANNAH * 1983; Master's, 1981, New York University

**Associate Professors**

LINCOLN, RACHAEL * 2013; Bachelor's, 1996, University of Arizona
SALK, JENNIFER * 2002; Master's, 1994, Ohio State University Agricultural Technical Institute

**Assistant Professors**

DUMBUTSHENA, RUJEKO * 2020
MCCORMICK, BRUCE, 2013; Bachelor's, 1998, The Juilliard School

**Lecturers**

LIAPIS, STEPHANIE, 2011
MEEKER, JORDYN D, 2017
MONTOYA, CHRISTOPHER E, 2017
MORENO, CARLOS, 2017; Doctorate, 2010, Harvard University
SMYTH, LAURA ANN, 2018
STEFFENSEN, LESLIE KRAUS, 2015

**Artists in Residence**

ISIGUEN, ALANA * 2020
MENDIETA, WILSON, 2011; Bachelor’s, 1995, Montclair State University

SOFIA, STEVEN, 2013

**Digital Arts and Experimental Media**

For complete faculty listing, please visit https://dxarts.washington.edu/people/faculty

**Professors**

PAMPIN, JUAN C. * 1999; Master’s, 1995, Conservatoire de Paris

**Associate Professor**

COUPE, JAMES * 2004; Master’s, 1999, University of Edinburgh

**Assistant Professors**

PSARRA, AFRODITI * 2016; Master’s, 2008, Universidad Autónoma de Madrid

RICE, TIVON C. * 2004; Bachelor’s, 2000, University of Colorado at Boulder; Sculpture

**Drama**

For complete faculty listing, please visit https://drama.washington.edu/people/faculty

**Professors**

BOND, TIMOTHY J, 1982; Bachelor’s, 1980, Howard University

COLE, CATHERINE M * 2016; Doctorate, 1996, Northwestern University

COMTOIS, MARY ELIZABETH, 1984; Master’s, 1962, San Francisco State University

CURTIS-NEWTON, VALERIE * 1993; Bachelor’s, 1981, College of the Holy Cross

DAHLSTROM, ROBERT A, 1982; Master’s, 1967, University of Illinois at Urbana-Champaign

JOHNSON, DAVID ODAI * 1998; Doctorate, 1994, The University of Texas

KORF, GEOFFREY L, 2002; Bachelor’s, 1983, California State University-Chico

LONDON, TODD, 2014; Doctorate, 1985, American University

LYNCH, THOMAS, 2005; Bachelor’s, 1971, Yale University

MADDEN, CATHERINE M * 1987; Bachelor’s, 1974, Pennsylvania State University-College of Medicine

MAGELSSEN, SCOTT * 2013; Bachelor’s, 1996, Augsburg College

MERCIER, GEORGE W, 2015; Bachelor’s, 1980, University of California-Berkeley

POSTLEWAIT, THOMAS E * 2007; Bachelor’s, 1966, Portland State University

TROUT, DEBORAH L * 1994; Bachelor’s, 1994, Yale University

VALENTINETTI, AURORA, 1982; Bachelor’s, 1943, University of Washington

WITHAM, BARRY B * 1982; Doctorate, 1968, Ohio State University Agricultural Technical Institute

**Associate Professors**

BRAUN, NATHAN A, 2016; Bachelor’s, 1979, Grinnell College

CONNORS, BRIDGET, 2016; Master’s, 1989, California Institute of the Arts

FRACE, JEFFREY H * 2008; Master’s, 1997, Columbia University

HAFSO, SCOTT, 1992; Bachelor’s, 1984, University of Alberta

TSAO, ANDREW H, 2006; Master’s, 1990, California Institute of the Arts
Assistant Professors

KING, ELIZABETH JANE, 2020; Bachelor's, 2000, Clemson University
MIHAYLOVA, STEFKA G * 2011; Master's, 2001, Central European University
WOLCOTT, JOHN R, 1982; Bachelor's, 1960, Carnegie Mellon University

Senior Lecturers

JONES, ZANE, 2012; Bachelor's, 1980, Ohio Christian University
SHAHN, JUDITH, 1990; Bachelor's, 1977, Carnegie Mellon University

Lecturers

COEN, ELIZABETH M, 2018
SMITH, ANDREW D, 2003; Bachelor's, 1996, Duke University
TIENCKEN, CHARLOTTE, 2018
WAITE, SHANNA MARIE, 2017

Senior Artist in Residence

HARTMAN, KAREN, 2014; Bachelor's, 1992, Yale University

Economics

Rockafellar, r t * 1982; Bachelor's, 1957, Harvard University
Rohde, steffen * 1998; Master's, 1987, Technische Universität Berlin
Smith, hart f * 1991; Doctorate, 1989, Princeton University
Smith, sholto paul * 1986; Bachelor's, 1975, University of Canterbury
Stein, william a, 2006; Bachelor's, 1994, Northern Arizona University
Sullivan, john b * 1982; Doctorate, 1971, Cornell University
Sylvester, john * 1987; Master's, 1977, New York University
TAGGART, JENNIFER, 2001; Bachelor’s, 1991, University of California-San Diego
THOMAS, REKHA R. * 2000; Master’s, 1992, Cornell University
TORO, TATIANA * 1996; Master’s, 1989, Stanford University
TUNCEL, SELIM * 1982; Bachelor’s, 1978, University of Sussex
UHLMANN, GUNTHER A. * 1984; Doctorate, 1976, Massachusetts Institute of Technology
WARNER, GARTH * 1982; Bachelor’s, 1962, University of Arizona
YUAN, YU * 2001; Master’s, 1993, National Taipei University
ZHANG, JIAN JAMES * 1994; Bachelor’s, 1982, Fudan University

Associate Professors

ALPER, JAROD D * 2016; Bachelor’s, 2002, Brown University
ARMS, JUDITH M * 1980; Master’s, 1974, University of California-Berkeley
CONROY, MATTHEW, 2001; Doctorate, 1997, University of Colorado at Boulder
DRUSVYATSKYI, DMITRIY * 2014; Master’s, 2010, Cornell University
KING, JAMES RICHARD * 1975; Bachelor’s, 1965, Harvard University
KLEE, STEVEN R. * 2005; Master’s, 2009, University of Washington
NICHIFOR, ALEXANDRA, 1997; Bachelor’s, 1994, New Jersey City University
OSTROFF, JONAH K, 2013; Doctorate, 2013, Brandeis University
PERKINS, PATRICK, 1982; Doctorate, 1988, University of Washington
ROTHVOSS, THOMAS * 2013; Doctorate, 2009, École Polytechnique Fédérale de Lausanne
VIRAY, BIANCA * 2014; Doctorate, 2010, University of California-Berkeley

Assistant Professors

BEKYEL, EBRU, 2005; Bachelor’s, 1995, Bogazici University
DROUOT, ALEXIS FRANCK * 2020; Doctorate, 2017, University of California-Berkeley; Mathematics
LARSON, ERIC KERNER * 2020; Doctorate, 2018, Massachusetts Institute of Technology; Mathematics
LIU, XUE * 2020; Doctorate, 2017, Massachusetts Institute of Technology; Mathematics
NAECHRIG, NATALIE, 2013; Doctorate, 2008, Rheinisch Westfälische Technische Hochschule Aachen; Mathematics
PEZZOLI, ELENA, 2000; Doctorate, 1998, Stanford University; Mathematics
SHOKRIEH, FARBOD * 2019; Doctorate, 2013, Georgia Institute of Technology-Main Campus; Mathematics
STEINERBERGER, STEFAN * 2020; Doctorate, 2013, Rheinische Friedrich Wilhelms Universität Bonn; Mathematics
VOGT, ISABEL MARLEY * 2020; Doctorate, 2019, Massachusetts Institute of Technology; Mathematics
WILSON, BOBBY L.E. * 2018; Doctorate, 2015, University of Chicago; Mathematics

Lecturers

BERGET, ANDREW S, 2012
CASPER, WILLIAM R, 2011
DOS REIS, FANNY, 2013
HEALD, ANDREA M, 2014
SCHOLL, TRAVIS W., 2013

ERICKSON, GARY, 1982; Master's, 1973, Stanford University
ETCHESON, WARREN W, 1982; Bachelor's, 1943, Indiana University-Bloomington
FONG, CHRISTINA T. * 2003; Master's, 2000, Stanford University
FOREHAND, MARK ROBECK * 1997; Bachelor's, 1992, Stanford University
GE, WEILI * 2006; Bachelor's, 1999, Shanghai Medical University
GLASSMAN, DEBRA A, 1989; Bachelor's, 1975, University of Michigan-Ann Arbor
Haley, Charles, 1982; Master's, 1964, Stanford University
HARFORD, JARRAD * 2001; Bachelor's, 1993, Pennsylvania State University-College of Medicine
HEATH, LOYD C, 1962; Master's, 1953, Northwestern University
HENNING, DALE A, 1955; Doctorate, 1954, University of Illinois at Urbana-Champaign
HIGGINS, ROBERT C * 1982; Master's, 1965, Harvard University
HILL, CHARLES WILLIAM L * 1988; Bachelor's, 1979, University of Manchester
HODGE, FRANK D * 2000; Bachelor's, 1988, Carroll College
JAIN, SHAILENDRA P * 2008; Bachelor's, 1982, Birla Institute of Technology and Science
JIAMBALVO, JAMES * 1977; Doctorate, 1977, Ohio State University Agricultural Technical Institute
JONES, THOMAS M * 1977; Doctorate, 1977, University of California-Berkeley
KAMARA, AVRAHAM * 1984; Master's, 1981, Columbia University
KARPOFF, JONATHAN M * 1983; Bachelor's, 1978, University of Alaska Southeast
KAST, FREMONT E, 1978; Bachelor's, 1946, San Jose State University
KLASTORIN, THEODORE * 1974; Bachelor's, 1969, Carnegie Mellon University
KOSKI, JENNIFER LYNCH * 1991; Bachelor's, 1983, Brown University
KOTHA, SURESH * 1996; Master's, 1982, Rensselaer Polytechnic Institute
LEE, THOMAS W * 1983; Master's, 1977, Bowling Green State University-Firelands
MACLACHLAN, DOUGLAS, 1982; Bachelor's, 1963, University of California-Berkeley
MALATESTA, PAUL H * 1980; Bachelor's, 1973, University of California-Santa Barbara
MAMANI, HAMED * 2008; Doctorate, 2008, Massachusetts Institute of Technology
MATSUMOTO, DAWN A * 1993; Bachelor's, 1989, University of Hawaii
MCVAY, SARAH E * 2012; Doctorate, 2004, University of Michigan-Ann Arbor
MIZIK, NATALIE * 1996; Master's, 1995, Moscow State Institute of International Relations
MOINZADEH, KAMRAN * 1984; Master's, 1982, Stanford University
MOXON, RICHARD W, 1982; Doctorate, 1973, Harvard University
MUELLER, GERHARD G, 1982; Bachelor's, 1956, University of California-Berkeley
NARVER, JOHN C, 1982; Bachelor's, 1957, Oregon State University
PALMATIER, ROBERT W * 2007; Bachelor's, 1983, Georgia Institute of Technology-Main Campus
PARSONS, CHRISTOPHER ALAN, 2018; Doctorate, 2008, The University of Texas at Austin; Finance
RAMANATHAN, K V, 1982; Master's, 1962, Northwestern University
REYNOLDS, SCOTT J. * 2002; Bachelor's, 1993, Brigham Young University
SCHLOSSER, ANN E. * 2000; Bachelor's, 1991, Carleton College
SEFCIK, STEPHAN E * 1986; Bachelor's, 1974, University of Illinois at Urbana-Champaign
SHULMAN, JEFFREY D * 2006; Bachelor's, 2001, Northwestern University
SIEGEL, STEPHAN * 2005; Master's, 2002, Columbia University
SPRATLEN, THADDEUS H, 1972; Bachelor's, 1956, Ohio State University Agricultural Technical Institute
STEENSMA, HARVEY K. * 2000; Doctorate, 1996, Indiana University-Bloomington
SULLIVAN, JEREMIAH J, 1982; Bachelor's, 1962, New York University
TAMURA, HIROKUNI, 1967; Bachelor's, 1960, University of Michigan-Ann Arbor
TAN, YONG * 1987; Bachelor's, 1987, Huazhong University of Science and Technology
TURNER, DANIEL J. * 1999; Doctorate, 2001, Northwestern University
UMPHRESS, ELIZABETH * 2011; Bachelor's, 1997, The University of Texas
YALCH, RICHARD F * 1982; Bachelor's, 1970, Carnegie Mellon University
YOGANARASIMHAN, HEMA * 2014; Bachelor's, 2004, Indian Institute of Technology Delhi
YOUNG, LANCE A, 1995; Master's, 1999, University of Rochester
ZHOU, YONGPIN * 2000; Master's, 1995, Johns Hopkins University

Associate Professors

BEARD, OLETA, 1982; Bachelor's, 1978, University of Washington
BIGLEY, GREGORY * 2000; Master's, 1991, University of California-Irvine
BLANKESPOOR, ELIZABETH ANN * 2018; Bachelor's, 2006, Dordt College; Accounting
BOEH, KEVIN K, 2018; Bachelor's, 1990, Colorado College; Economics
CHEN, SHI * 2013; Doctorate, 2013, Stanford University
CURTIS, ASHER B * 2012; Bachelor's, 2001, Australian School of Business University of New South Wales
DEHAAN, EDUARD * 2008; Master's, 2008, San Francisco State University
DEWENTER, KATHRYN L, 1992; Master's, 1985, Stanford University
FAN, MING * 2002; Bachelor's, 1987, Nanjing University
FEHR, RYAN * 2010
FINKELSTEIN, CRYSTAL L., 2004; Bachelor's, 2004, University of Washington
GILBERT, THOMAS * 2008; Master's, 2002, Imperial College
GUPTA, ABHINAV * 2015; Bachelor's, 2008, Aligarh Muslim University
HALLEN, BENJAMIN L * 2014; Doctorate, 2007, Stanford University
HILLIER, MARK S. * 1993; Master's, 1991, Stanford University
JAIN, APURVA * 1999; Bachelor's, 1988, Indian Institute of Technology Roorkee
JOHNSON, MICHAEL D. * 2006; Bachelor's, 1985, Hope College
KESKIN, TAYFUN, 2010; Bachelor's, 2001, Bogazici University
LEON DIMAS, ALEXIS, 2016; Doctorate, 2004, Massachusetts Institute of Technology; Economics
LEVIT, DORON YIZHAK, 2020; Master's, 2006, Hebrew University of Jerusalem; Finance
MADUNIC, MARKO, 2018; Master's, 2001, University of Central Florida
OU, SHAOSONG, 2007; Bachelor's, 1996, Huazhong University of Science and Technology
PAHNKE, EMILY * 2010; Bachelor's, 1998, Brigham Young University
PARAMESWARAN, MANOJ, 2010; Master's, 1994, All India Institute of Medical Sciences
PHILLIPS, THOMAS E., 1986; Bachelor’s, 1988, University of Washington
RICE, EDWARD M * 1979; Doctorate, 1978, University of California-Los Angeles
RUTZ, OLIVER * 2011; Master’s, 2003, University of California-Los Angeles
SAYEDI ROSH KHAR, SEYED AMIN * 2014; Master’s, 2009, Carnegie Mellon University
SESLEN, TRACEY, 2012; Doctorate, 2003, Massachusetts Institute of Technology
SHORES, DONNA J * 1986; Doctorate, 1986, Stanford University
SIRICHAKWAL, ISSARIYA, 2014; Master’s, 2009, Carnegie Mellon University
STEARNS, ELIZABETH P, 1995; Master’s, 1978, New York University
TAN, DAVID * 2013; Bachelor’s, 2004, Creighton University
WAGNER, MICHAEL * 2012; Bachelor’s, 2000, Massachusetts Institute of Technology
WALKER, FRANKLIN RUSSELL, 2019; Doctorate, 1999, Cornell University; Civil Engineering
WEBER, ELIZABETH L, 2007; Bachelor’s, 2011, University of Washington
WESTERFIELD, MARK M * 2012; Doctorate, 2004, Massachusetts Institute of Technology
ZHANG, CRYSTAL FARH * 2015; Bachelor’s, 2005, Harvard University

Assistant Professors

ANANTHAKRISHNAN, UTTARA MADURAI, 2018; Bachelor’s, 2010, Anna University
BERNARD, DARREN G., 2020; Bachelor’s, 2008, University of Minnesota-Twin Cities; Business Administration/Management
BISWAS, SHIRSHO, 2020; Doctorate, 2020, University of Chicago; Business Administration/Management
BLACKBURNE, TERRENCE P, 2014; Master’s, 2003, Stanford University
BORAH, ABHISHEK, 2013; Bachelor’s, 2002, University of Delhi

MAZZA, JAMES J. * 1996; Bachelor's, 1986, St Johns College
MC CARTIN, ROSEMARIE E, 1969; Master's, 1960, Immaculata University
MCCUTCHEN, DEBORAH ELAINE * 1986; Master's, 1978, University of Pittsburgh-Bradford
MISSALL, KRISTEN * 2015; Master's, 1999, University of Minnesota-Duluth
MORISHIMA, JAMES K, 1982; Bachelor's, 1962, University of Washington
NOLEN, SUSAN B. * 1990; Master's, 1976, Lewis and Clark Community College
O'DOHERTY, ANN * 2012; Bachelor's, 1981, Illinois State University
PARKER, WALTER C * 1985; Bachelor's, 1970, University of Colorado at Boulder
PECK, CHARLES A * 2003; Master's, 1976, Sonoma State University
PECKHAM, PERCY D, 1982; Doctorate, 1968, University of Colorado Denver
PLECKI, MARGARET L * 1994; Doctorate, 1991, University of California-Berkeley
SANDALL, SUSAN R., 1982; Bachelor's, 1974, University of California-Berkeley
SCHWARTZ, ILENE SHARON * 1991; Bachelor's, 1981, University of California-Santa Barbara
SEBESTA, SAM L, 1982; Master's, 1960, Northwestern University
STANDAL, TIMOTHY, 1982; Doctorate, 1976, University of Minnesota-Duluth
STOWITSCHEK, JOSEPH JAMES * 1986; Bachelor's, 1965, Monmouth College
TAYLOR, CATHERINE S., 1991; Bachelor's, 1974, University of Kansas
TAYLOR, EDWARD * 1985; Bachelor's, 1982, Gonzaga University
TOSTBERG, ROBERT JAMES * 1986; Bachelor's, 1965, Monmouth College
TUAN, MIA, 2015; Bachelor's, 1990, University of California-Berkeley
VALENCIA, SHELIA DENISE W * 1987; Bachelor's, 1971, New York University
VARGHESE, MANKA M * 2000; Bachelor's, 1990, University of Bristol
WASLEY, PATRICIA A, 1986; Doctorate, 1989, University of Washington
WILLIAMS, DONALD T, 1969; Master's, 1957, Stanford University
WILLIAMSON-LOTT, JOY ANN * 2007; Bachelor's, 1993, University of Illinois at Urbana-Champaign
WINDSCHITL, MARK A * 1996; Bachelor's, 1979, Iowa State University
ZEICHNER, KENNETH * 2009; Master's, 1970, Syracuse University

**Associate Professors**

BARAJAS, FILIBERTO * 2010; Master's, 2001, Claremont Graduate University
BEAL, JACK L, 1982; Bachelor's, 1957, University of Kansas
BEAM-CONROY, TEDDI, 2016; Bachelor's, 1984, University of Wisconsin-Milwaukee
BEITLERS, ANNE, 1994; Doctorate, 2014, New York University
CHEN, JONDOU * 2014; Master's, 2010, Columbia University
CLEVENGER-BRIGHT, MARY, 2004; Bachelor's, 1978, Iowa State University
DABACH, RAFENY BLANCA * 2010
DIETRICH, LYNN, 2015; Bachelor's, 1984, Emory University
ELFERS, ANN M. * 1995; Master's, 1993, University of Belgrade
FETTIG, ANGEL * 2017
FREY, KARIN S. * 1983; Bachelor's, 1971, University of Washington
GALLUCCI, CHRYSAN J., 1986; Bachelor's, 1971, University of Oregon
HOFFMAN, JENNIFER L * 1989; Master's, 1998, Seattle University
ISHIMARU, ANN * 2012; Master's, 2008, Harvard University
JACKSON, KARA * 2013; Bachelor's, 1997, Bates College
JEGATHEESAN, BRINDA INDIA * 2006; Bachelor's, 1985, Bangalore University
JOSEPH, GAIL * 1987; Bachelor's, 1991, University of Washington
KELLEY-PETERSEN, MEGAN M, 2005; Bachelor's, 2000, Seattle University
LEWIS, KATHERINE * 2012; Master's, 2007, University of California-Berkeley
LI, MIN * 2001; Bachelor's, 1994, Beijing Normal University
LOTT, JOE * 2007; Master's, 2000, Louisiana State University
MCDONALD, MORVA A, 2006; Master's, 1999, Stanford University
MEEKER, KATHLEEN * 2013; Bachelor's, 2002, Ohio State University Agricultural Technical Institute
NEWMAN, JODI, 1999; Bachelor's, 1995, Haverford College
PARIS, DJANGO * 2018; Doctorate, 2008, Stanford University; Philosophy
POWELL, SELMA, 2014; Doctorate, 2012, University of Central Florida
RIGBY, JESSICA * 2014; Bachelor's, 1998, Oberlin College
ROBERTS, CARLY * 2015; Master's, 2010, University of Alaska Southeast
ROSENBERG, NANCY E * 2003; Bachelor's, 1987, Stanford University
SANDERS, ELIZABETH * 2004
SCHINDLER, HOLLY S * 2012; Doctorate, 2007, Boston College
SPAULDING, SCOTT * 2009; Bachelor's, 1989, The University of Tennessee
SUN, MIN * 2014; Master's, 2006, Beijing Normal University
TAYLOR, KATHERINE * 2015; Bachelor's, 2003, New York University
THOMPSON, JESSICA J * 1992; Master's, 2001, University of Washington
WANG, CHUN * 2018

**Assistant Professors**

ASTIVIA, OSCAR OLVERA * 2020; Doctorate, 2017, University of British Columbia
BENEKE, MARGARET R * 2017
DUNCHEON, JULIA * 2019
ELLIOTT-GROVES, EMMA * 2019; Doctorate, 2016, University of Washington; Educational Psychology
KAUERZ, KRISTIE * 2011; Master's, 1995, American University
KNIGHT, DAVID * 2019; Doctorate, 2015, University of Southern California; Education
MACHADO, EMILY, 2018; Master's, 2011, American University
MARTINEZ, CARLOS RICARDO * 2020; Doctorate, 2019, University of Pennsylvania; Education
NICKSON, DANA * 2020
PARK, SOOJIN OH * 2015; Master's, 2010, Harvard University
ROCHA, TOMAS DE REZENDE * 2020
SANTIAGO, MARIBEL * 2020
SHAH, NIRAL * 2019; Doctorate, 2013, University of California-Berkeley; Education
SHEA, MOLLY * 2019; Doctorate, 2013, University of Colorado at Boulder; Education
WASHINGTON, SHANEE ADRIENNE * 2019; Doctorate, 2019, Boston College; Education

**Senior Lecturer**

BRENNAN, CAROLYN, 2008; Bachelor's, 2003, University of Colorado at Boulder

**Lecturers**

IVES, CHARLES, 2013
MATLACK, ALEXA, 2013
OLSON, ERIN, 2002
PARKIN, JASON R, 2017
College of Engineering

Aeronautics and Astronautics

Professors

ACIKMESE, BEHCET * 2015; Master’s, 1996, Indiana University-Purdue University-Indianapolis
Bragg, Michael B * 2013; Doctorate, 1981, Ohio State University Agricultural Technical Institute
Breidenthal, Robert E * 1980; Master’s, 1974, California Institute of Technology
Bruckner, Adam * 1972; Bachelor’s, 1966, McGill University
Dabiri, Dana * 2002; Master’s, 1987, University of California-Berkeley
Decher, Reiner, 1982; Master’s, 1962, Massachusetts Institute of Technology
Fyfe, Ian M, 1982; Doctorate, 1957, Stanford University
Hermanson, James C. * 1986; Master’s, 1980, California Institute of Technology
Hill, Kristi Morganse n * 2002; Bachelor’s, 1993, Boston University
Holsapple, Keith A * 1982; Bachelor’s, 1960, University of Washington
Jarboe, Thomas R. * 1989; Doctorate, 1974, University of California-Berkeley
Kurosaka, Mitsuru * 1968; Doctorate, 1968, California Institute of Technology
Livne, Eli * 1990; Bachelor’s, 1989, Technion Israel Institute of Technology
Mesbahi, Mehran * 2002; Bachelor’s, 1989, California State University-Northridge
Parmeter, R Reid, 1963; Bachelor’s, 1958, California Institute of Technology
Shumlak, Uri * 1994; Bachelor’s, 1987, The University of Texas
Vagners, Juris * 1982; Master’s, 1963, Stanford University
Waas, Moderage Anthony * 2014; Master’s, 1983, California Institute of Technology

Associate Professors

Ferrante, Antonino * 2008
Hurlen, Erik, 2020
Knowlen, Carl * 1983; Bachelor’s, 1983, University of Washington
Mattick, Arthur T., 1982; Bachelor’s, 1971, Massachusetts Institute of Technology
Yang, Jinkyu * 2013; Bachelor’s, 2000, Korea University

Assistant Professors

Habtour, Ed Mansour * 2020
Littl e, Justin M * 2015
Lum, Christopher W. M. * 2001; Bachelor’s, 2003, University of Washington
Narang, Anshu, 2013; Master’s, 2008, Indian Institute of Technology Delhi
Sali vato, Marco * 2015; Bachelor’s, 2007, Università degli Studi di Padova
Williams, Owen James * 2016; Master’s, 2008, Imperial College
You, Setthivoine, 2008

Lecturers

Nagabhushan, Vivek, 2018
SPETZLER, MAX GEORG, 2011

**Chemical Engineering**

**Professors**

BANEYX, FRANCOIS * 1992
BERG, JOHN C * 1964; Bachelor's, 1960, Carnegie Mellon University
BOWEN, J RAY, 1982; Bachelor's, 1956, Massachusetts Institute of Technology
CASTNER, DAVID G. * 1986; Bachelor's, 1975, Oregon State University
DAVIS, E JAMES * 1983; Bachelor's, 1956, Gonzaga University
FINLAYSON, BRUCE A, 1982; Bachelor's, 1961, Rice University
HEIDEGER, WILLIAM J, 1957; Bachelor's, 1954, Carnegie Mellon University
HILLHOUSE, HUGH * 1995; Bachelor's, 1995, Clemson University
JENEKHE, SAMSON A * 2000; Bachelor's, 1977, Michigan Technological University
LIDSTROM, MARY E. * 1982; Master's, 1975, University of Wisconsin-Madison
OVERNEY, RENE M * 1996; Bachelor's, 1987, Universität Basel
PFAENDTNER, WALTER JAMES * 2009; Bachelor's, 2001, Georgia Institute of Technology-Man Main Campus
POZZO, LILO D. * 2007; Bachelor's, 2001, American University of Puerto Rico
RIBE, FRED L, 1977; Bachelor's, 1944, The University of Texas
RICKER, NEIL L, 1982; Master's, 1972, University of California-Berkeley
SCHWARTZ, DANIEL T. * 1991; Master's, 1985, University of California-Davis
SLEICHER, CHARLES A, 1982; Bachelor's, 1944, Brown University
STUVE, ERIC M * 1985; Master's, 1979, Stanford University
SUBRAMANIAN, VENKAT * 2014; Bachelor's, 1997, Madurai Kamaraj University
WOODRUFF, GENE L, 1982; Master's, 1963, Massachusetts Institute of Technology

**Associate Professors**

ADLER, STUART B. * 2001; Master's, 1989, University of California-Berkeley
BECK, DAVID * 2000; Bachelor's, 2000, Drexel University
CAROTHERS, JAMES * 2012; Doctorate, 2005, Harvard University
DEFOREST, COLE ALEXANDER * 2013; Bachelor's, 2006, Princeton University
KRIEGER-BROCKETT, BARBARA, 1982; Bachelor's, 1968, University of Wisconsin Colleges

**Assistant Professors**

BERGSMAN, DAVID STEVENS * 2020
HOLMBERG, VINCENT * 2015; Master's, 2010, The University of Texas
NANCE, ELIZABETH * 2015; Doctorate, 2012, Johns Hopkins University
VALLEAU, STEPHANIE * 2019; Doctorate, 2016, Harvard University; Chemical Physics

**Lecturers**

KIM, ANTHONY YOUNG, 1987; Master's, 1993, University of California-Davis
MURBACH, MATTHEW, 2013
Civil and Environmental Engineering

Professors

ARDUINO, PEDRO * 1997; Master's, 1992, American University of Puerto Rico
BAN, XUEGANG * 2016; Bachelor's, 1997, Tsinghua University
BENJAMIN, MARK M * 1982; Bachelor's, 1972, Carnegie Mellon University
BERMAN, JEFFREY WILLIAM * 2006; Bachelor's, 2000, New York University
BRETT, MICHAEL T * 1997; Bachelor's, 1983, Humboldt State University
CARLSON, DALE A, 1955; Bachelor's, 1950, University of Washington
CHEN, QIUZI * 2009; Bachelor's, 1992, Nankai University
EBERHARD, MARC O * 1989; Bachelor's, 1984, University of California-Berkeley
GOODCHILD, ANNE V. * 2005; Master's, 2002, University of California-Berkeley
HORNER-DEVINE, ALEXANDER * 2004; Bachelor's, 1995, Princeton University
HOSSAIN, FAISAL * 2014; Bachelor's, 1996, Indian Institute of Technology Delhi
ISTANBULLUOGLU, ERKAN * 2009; Bachelor's, 1996, Uludag University
KORSHIN, GREGORY * 1991; Bachelor's, 1978, Kazan State University
LARSON, TIMOTHY * 1970; Bachelor's, 1968, Lehigh University
LEHMAN, DAWN E * 1998; Bachelor's, 1989, Tufts University
LETENMAIER, DENNIS P * 1982; Master's, 1973, George Washington University
LOWES, LAURA N * 1989; Doctorate, 1999, University of California-Berkeley
LUNQUIST, JESSICA D * 2006; Bachelor's, 1999, University of California-Davis
MAHONEY, JOE PAUL * 1978; Bachelor's, 1968, The University of Texas
MARSHALL, JULIAN * 2015; Bachelor's, 1996, Princeton University
MILLER, GREGORY * 1983; Master's, 1981, Northwestern University
MUENCH, STEPHEN T * 1990; Bachelor's, 1990, University of Washington
NECE, RONALD E, 1982; Master's, 1951, Lehigh University
NIHAN, NANCY L * 1982; Bachelor's, 1964, Northwestern University
NIJSSEN, BART * 1994; Doctorate, 2000, University of Washington
REED, DOROTHY * 1983; Master's, 1977, Princeton University
RUTHERFORD, G. SCOTT, 1981; Doctorate, 1974, Northwestern University
STAHL, DAVID A * 2000; Master's, 1975, University of Illinois at Urbana-Champaign
STANTON, JOHN * 1978; Master's, 1975, Cornell University
WANG, YINHAI * 1998; Bachelor's, 1989, Tsinghua University
WARTMAN, JOSEPH * 2010; Master's, 1996, University of California-Berkeley

Associate Professors

DODD, MICHAEL * 2009; Bachelor's, 2001, Georgia Institute of Technology/Main Campus
KAMINSKY, JESSICA A * 2014; Bachelor's, 2004, Rice University
MACKENZIE, DONALD W * 2013; Master's, 2009, Massachusetts Institute of Technology
MACKENZIE-HELNWEIN, PETER * 2003; Doctorate, 1997, International University Vienna
MCCORMACK, EDWARD D * 1982; Bachelor's, 1979, University of Washington
MOTLEY, MICHAEL * 2012; Bachelor's, 2003, Citadel Military College of South Carolina
NEUMANN, REBECCA B * 2010; Doctorate, 2009, Massachusetts Institute of Technology
Assistant Professors

CALVI, PAOLO * 2015; Bachelor's, 2008, Università degli Studi di Pavia
GOMEZ, MICHAEL GREGORY * 2017; Bachelor's, 2011, University of California-Davis
KIM, AMY AHIM * 2014; Master's, 2008, Illinois Institute of Technology
MAURER, BRETT W * 2017; Bachelor's, 2009, Syracuse University
NIRNIMESH KUMAR, UNKNOWN, 2016; Bachelor's, 2007, Indian Institute of Technology Kharagpur
RAY, JESSICA R. * 2019; Doctorate, 2015, Washington University in St Louis; Chemical Engineering
SHEAN, DAVID E * 2011; Bachelor's, 2004, Brown University
THONSTAD, TRAVIS E. * 2020; Doctorate, 2016, University of Washington; Civil Engineering
WIEBE, RICHARD * 2014; Doctorate, 2012, Duke University
WINKLER, MARIKAROLIINA H * 2015; Bachelor's, 2007, Indian Institute of Technology Kharagpur
YAMAURA, JULIAN TAKASHI, 2009; Doctorate, 2018, University of Washington; Civil Engineering

Computer Science and Engineering

Professors

ANDERSON, RICHARD J. * 1986; Bachelor's, 1981, Reed College
ANDERSON, THOMAS E. * 1987; Bachelor's, 1983, Harvard University
BAER, JEAN-LOUP, 1969; Bachelor's, 1961, École Supérieure d’Ingenierie Informatique Grenoble
BALAZINSKA, MAGDALENA * 2005; Bachelor's, 1998, Êcole Polytechnique de Montréal
BEAME, PAUL W. * 1987; Bachelor's, 1981, University of Toronto
BODIK, RASTISLAV * 2015; Bachelor's, 2016, University of Pittsburgh-Bradford
BURGER, DOUGLAS CHRISTOPHE * 2008; Master's, 1993, University of Wisconsin-Madison
CEZE, LUIS HENRIQUE DE BAR * 2007; Bachelor's, 2000, Universidade de São Paulo (USP)
COHEN, MICHAEL F * 1998; Bachelor's, 1976, Beloit College
CURLESS, BRIAN L. * 1997; Master's, 1991, Stanford University
DOMINGOS, PEDRO MORAIS DEL * 1999; Bachelor's, 1992, Universidade Técnica de Lisboa
EGGERS, SUSAN JANE * 1989; Bachelor's, 1965, Connecticut College
ERNST, MICHAEL D * 1996; Bachelor's, 1989, Massachusetts Institute of Technology
ETZIONI, OREN * 1991; Bachelor's, 1988, Carnegie Mellon University
FOGARTY, JAMES A * 2006; Master's, 2005, Carnegie Mellon University
FOX, DIETER * 2000; Bachelor's, 1990, Rheinische Friedrich Wilhelms Universität Bonn
FOX, EMILY * 2012; Bachelor's, 2004, Massachusetts Institute of Technology
GROSSMAN, DANIEL JOSEPH * 2003; Bachelor's, 2001, Cornell University
GUESTRIN, CARLOS E * 2012; Master's, 2000, Stanford University
HEER, JEFFREY M * 2013; Bachelor's, 2001, University of California-Berkeley
KAKADE, SHAM * 2015; Bachelor's, 1997, California Institute of Technology
KARLIN, ANNA R. * 1994; Bachelor's, 1981, Stanford University
KEHL, THEODORE, 1982; Bachelor's, 1956, University of Wisconsin Colleges
KHULLER, SAMIR * 2011; Master's, 1989, Cornell University
KOHNO, TADAYOSHI * 2006; Bachelor's, 2004, University of California-San Diego
KRISHNAMURTHY, ARVIND * 2005; Bachelor's, 1991, Indian Institute of Information Technology
LADNER, RICHARD E * 1971; Bachelor's, 1965, St Marys University
LANDAY, JAMES ANTHONY * 2003; Master's, 1993, Carnegie Mellon University
LAZOWSKA, EDWARD D * 1977; Bachelor's, 1972, Brown University
LEE, JAMES RUSSELL * 2006; Bachelor's, 2001, Purdue University-Main Campus
LEVY, HENRY M * 1983; Bachelor's, 1974, Carnegie Mellon University
MANKOFF, JENNIFER CAROLYN * 2017; Doctorate, 2001, Georgia Institute of Technology-Main Campus
MONES, BARBARA ELLEN, 1999; Master's, 1979, Rhode Island School of Design
MORRIS, MEREDITH JUNE * 2008; Bachelor's, 2001, Brown University
PATEL, SHWETAK NARAN * 2008; Bachelor's, 2003, Georgia Institute of Technology-Main Campus
POPOVIC, ZORAN * 1999; Bachelor's, 1991, Brown University
RAO, RAJESH P.N. * 2000; Bachelor's, 1992, Angelo State University
REGES, STUART THOMAS, 2004; Bachelor's, 1979, Case Western Reserve University
RUZZO, WALTER L * 1977; Bachelor's, 1968, California Institute of Technology
SALESIN, DAVID HENRY * 1992; Bachelor's, 1983, Brown University
SEITZ, STEVEN M * 2000; Bachelor's, 1991, University of California-Berkeley
SHAPIRO, LINDA G. * 1986; Bachelor's, 1970, University of Illinois at Urbana-Champaign
SHAW, ALAN CARY, 1971; Master's, 1962, Stanford University
SMITH, JOSHUA R. * 2005; Master's, 1995, Massachusetts Institute of Technology
SMITH, NOAH A * 2014; Master's, 2004, Johns Hopkins University
SNYDER, LAWRENCE * 1983; Doctorate, 1973, Carnegie Mellon University
SUCIU, DAN * 2000; Master's, 1991, University of Bucharest
TAN, DESNEY SWEE-LEONG * 2007; Doctorate, 2004, Carnegie Mellon University
TANIMOTO, STEVEN L * 1977; Bachelor's, 1971, Harvard University
TODOROV, EMANUIL V * 2009; Bachelor's, 1993, West Virginia Wesleyan College
WELD, DANIEL SABEY * 1988; Master's, 1984, Massachusetts Institute of Technology
ZAHORJAN, JOHN * 1980; Bachelor's, 1975, Brown University
ZETTLEMOYER, LUKE S * 2010; Master's, 2003, Massachusetts Institute of Technology

Associate Professors

ANDERSON, RUTH ELIZABETH, 1991; Bachelor's, 1991, University of North Carolina
BOOTS, BYRON EMERETH * 2019; Doctorate, 2012, Carnegie Mellon University
CAKMAK, MAYA * 2013; Doctorate, 2012, Georgia Institute of Technology-Main Campus
CHOI, YEJIN * 2014; Master's, 2009, Cornell University
FARHADI, ALI * 2012; Doctorate, 2011, University of Illinois at Urbana-Champaign
FROEHLICH, JON E * 2017
GOLLAKOTA, SHYAMNATH V * 2012; Bachelor's, 2006, Indian Institute of Technology Delhi
HEMINGWAY, BRUCE RAY, 2002
KEMELMAHER, IRENA * 2009; Bachelor's, 2001, Bar Ilan University
LEE, SU-IN * 2009; Bachelor's, 2001, Korea University
LIN, HUIJIA * 2019
MAHAJAN, RATUL * 1999; Bachelor's, 1999, Indian Institute of Technology Delhi
MAUSAM, MAUSAM * 2001; Bachelor's, 2001, Indian Institute of Technology Delhi
MOSTAFAVI, SARA * 2020
OH, SEWOONG * 2019
OSKIN, MARK H. * 2001; Bachelor's, 1996, University of California-Davis
OVEIS GHARAN, SHAYAN * 2015; Bachelor's, 2008, Sharif University of Technology
PERKINS, JOHN H. JR., 1998; Bachelor's, 1975, Arizona State University
RAO, ANUP * 2010; Bachelor's, 2002, Georgia Institute of Technology-Main Campus
REINECKE, KATHARINA * 2015; Master's, 2006, Universität Koblenz Landau
ROESNER, FRANZISKA * 2009; Bachelor's, 2008, The University of Texas
SRINIVASA, SIDDHARTHA * 2017; Master's, 2001, Carnegie Mellon University
TATLOCK, ZACHARY L * 2013; Bachelor's, 2007, Purdue University-Main Campus
TAYLOR, MICHAEL BEDFORD * 2017; Bachelor's, 1996, Dartmouth College
TESSARO, STEFANO MASSIMO * 2019
TORLAK, EMINA * 2014; Bachelor's, 2003, Massachusetts Institute of Technology
WANG, XI * 2014; Doctorate, 2014, Massachusetts Institute of Technology

Assistant Professors

AGARWAL, SAMEER * 2006; Master's, 2000, Indian Institute of Technology Delhi
ALTHOFF, CHRISTOPHER TIM * 2019
BRICKER, LAUREN J, 2017; Bachelor's, 1985, University of Michigan-Ann Arbor
CHEUNG, ALVIN K * 2014; Doctorate, 2015, Massachusetts Institute of Technology
DU, SIMON S * 2020; Doctorate, 2019, Carnegie Mellon University
HAJISHIRZI, HANNANEH * 2012; Bachelor's, 2003, Sharif University of Technology
HARROW, ARAM WETTROTH * 2010; Bachelor's, 2001, Massachusetts Institute of Technology
HEIMERL, KURTIS L. * 2002; Master's, 2009, University of California-Berkeley
HSIA, JUSTIN EZEKIEL, 2016; Bachelor's, 2007, University of California-Berkeley
JAMIESON, KEVIN G * 2017; Master's, 2010, Columbia University in the City of New York
JUST, RENE * 2018; Doctorate, 2013, Universität Ulm; Computer and Information Science
KOHLBRENNER, DAVID WILLIAM * 2020
LEE, YIN TAT * 2017; Bachelor's, 2012, Chinese University of Hong Kong
LIN, KEVIN, 2019
MAAS, RYAN W., 2006
MORGENSTERN, JAMIE * 2019; Doctorate, 2015, Carnegie Mellon University
PORTS, DANIEL ROBERT KENNE * 2012; Bachelor's, 2005, Massachusetts Institute of Technology
RATNER, ALEXANDER J. * 2019; Doctorate, Stanford University
SCHAER, HUNTER A, 2014; Master's, 2018, University of Washington; Computer Engineering
SCHMIDT, LUDWIG * 2020
SCHULZ, ADRIANA * 2018; Doctorate, 2018, Massachusetts Institute of Technology
THACHUK, CHRISTOPHER * 2020
WANG, YULIANG * 2016; Bachelor's, 2009, Tianjin University
WEBER, ROBERT THOMAS, 2015
WORTZMAN, BRETT G. B., 2017; Bachelor's, 2006, Harvard University
ZHANG, AMY XIAN * 2019

Lecturers

BLANK, ADAM DAVID, 2014; Bachelor's, 2012, Carnegie Mellon University
COHN, GABRIEL ADAM, 2018; Bachelor's, 2009, California Institute of Technology; Electrical Engineering
EVANS, SUSAN R, 2011; Bachelor's, 2008, University of Arizona
HESS, CRYSTAL, 2017
MARTIN BRUALLA, RICARDO, 2018; Doctorate, 2016, University of Washington; Computer and Information Science
MCCARTY, EVAN JAMES, 2014
WINSTANLEY, MELISSA R, 2018
ZATLOUKAL, KEVIN, 1997
Electrical and Computer Engineering

Professors

AFROMOWITZ, MARTIN * 1982; Bachelor's, 1965, Career School of NY
ALEXANDRO, FRANK J * 1982; Bachelor's, 1956, New York University
ANANTRAM, MANJERI * 2008; Bachelor's, 1986, Anna University
ANDERSEN, JONNY * 1967; Master's, 1962, Massachusetts Institute of Technology
ATLAS, LES EUGENE * 1983; Master's, 1978, Stanford University
BERNARD, GARY D * 1989; Bachelor's, 1959, University of Washington
BILMES, JEFFREY A * 1999; Master's, 1993, Massachusetts Institute of Technology
BOHRINGER, KARL F. * 1998; Master's, 1992, Cornell University
BUSHNELL, LINDA GRACE * 2000; Master's, 1989, University of California-Berkeley
CHIZECK, HOWARD JAY * 1989; Bachelor's, 1974, Case Western Reserve University
DAMBOURG, MARK J * 1982; Bachelor's, 1962, Iowa State University
DARLING, ROBERT B * 1985; Bachelor's, 1980, Georgia Institute of Technology-Main Campus
DOW, DANIEL G * 1968; Doctorate, 1958, Stanford University
DUNHAM, SCOTT T. * 1999; Bachelor's, 1979, Cornell University
FAZEL SARJOUI, MARYAM * 2007; Bachelor's, 1995, Sharif University of Technology
HANNAFORD, BLAKE * 1989; Master's, 1982, University of California-Berkeley
HARALICK, ROBERT M * 1986; Bachelor's, 1964, University of Kansas
HAUCK, SCOTT * 1990; Bachelor's, 1990, University of California-Berkeley
HENDERSON, THOMAS R * 2002; Bachelor's, 1990, Stanford University
HWANG, JENQ-NENG * 1989; Bachelor's, 1981, National Taiwan University
KIRSCHEN, DANIEL SADI * 2011; Master's, 1980, University of Wisconsin-Madison
KLAVINS, ERIC * 2003; Bachelor's, 1991, San Francisco State University
KUGA, YASUO * 1982; Bachelor's, 1977, University of Washington
LAURITZEN, PETER O * 1982; Bachelor's, 1956, California Institute of Technology
LIN, LIH-YUAN * 2003; Bachelor's, 1990, National Taiwan University
LIU, HUI * 1998; Bachelor's, 1988, Fudan University
MAMISHEV, ALEXANDER V * 1999; Bachelor's, 1999, Massachusetts Institute of Technology
MORITZ, WILLIAM E, 1982; Bachelor's, 1965, Drexel University
OSTENDORF, MARI * 1999; Bachelor's, 1980, Stanford University
PARVIZ, BABAAMIR * 2003; Bachelor's, 1995, Sharif University of Technology
POOVENDRAN, RAADHAKRISHNAN * 2000; Bachelor's, 1988, Indian Institute of Technology Delhi
RISKIN, EVE A * 1990; Bachelor's, 1984, Massachusetts Institute of Technology
RITCEY, JAMES A * 1985; Bachelor's, 1976, Duke University
ROY, SUMIT * 1998; Bachelor's, 1983, Indian Institute of Technology Delhi
SAHR, JOHN D., 1991; Bachelor's, 1984, California Institute of Technology
SEELIG, GEORGE * 2009; Doctorate, 2003, Switzerland University of Business and International Studies Geneva
SHI, CHUAN-JIN RICHARD * 1998; Bachelor's, 1985, Fudan University
SOMA, MANI * 1982; Bachelor's, 1975, California State University
SUN, MING-TING * 1996; Bachelor's, 1976, National Taiwan University
WILSON, DENISE M * 1999; Master's, 1989, Georgia Institute of Technology-Main Campus
ZURK, LISA, 2018
Associate Professors

CHEN, TAI-CHANG, 1991; Bachelor's, 1988, National Tsing Hua University Taiwan
CHRISTIE, RICHARD DUNSTAN * 1989; Doctorate, 1989, Carnegie Mellon University
HELMS, WARD J * 1982; Master's, 1963, University of Washington
Li, MO * 2018; Doctorate, 2007, California Institute of Technology; Applied Physics
MAJUMDAR, ARKA * 2013; Master's, 2009, Stanford University
MORITZ, CHET T * 1998; Doctorate, 2003, University of California-Berkeley
REYNOLDS, MATTHEW STEPHEN * 2013; Bachelor's, 1998, Massachusetts Institute of Technology
ROSEN, JACOB * 1997; Bachelor's, 1988, Tel Aviv University
RUDELL, JACQUES CHRISTOPHE * 2009; Master's, 1994, University of California-Berkeley
SATHE, VISVESH * 2013; Bachelor's, 2001, Indian Institute of Technology Delhi

Assistant Professors

BURDEN, SAMUEL A. * 2004; Doctorate, 2014, University of California-Berkeley
HINKE, PENNY ELIZABETH, 2011
HUSSEIN, RANIA, 2012
JOHNSON, BRIAN * 2017
KANNAN, SREE RAM * 2014; Master's, 2008, All India Institute of Medical Sciences
MOAZENI, SAIJAD, 2019
ORSBORN, AMY * 2016; Bachelor's, 2007, Case Western Reserve University
RAITI, JOHN GIULIAN, 2017
ZHANG, BAosen * 2015; Doctorate, 2013, University of California-Berkeley

Lecturer

ECKER, ALLAN C., 2003

Human Centered Design and Engineering

For complete faculty listing, please visit https://www.hcde.washington.edu/faculty

Professors

ARAGON, CECILIA * 2010; Bachelor's, 1982, California Institute of Technology
ATMAN, CYNTHIA J. * 1998; Doctorate, 1990, Carnegie Mellon University
BEREANO, PHIL, 1982; Doctorate, 1965, Columbia University
CONEY, MARY B, 1982; Master's, 1963, University of Illinois at Urbana-Champaign
FARKAS, DAVID K * 1983; Master's, 1969, University of Chicago
HASELKORN, MARK P * 1985; Bachelor's, 1971, Columbia University
KIENTZ, JULIE A * 2008; Doctorate, 2008, Georgia Institute of Technology-Main Campus
KOLKO, BETH E * 2000; Bachelor's, 1989, Oberlin College
MCDONALD, DAVID W * 2002; Master's, 1992, California State University
RAMEY, JUDITH A * 1983; Bachelor's, 1969, The University of Texas
SPYRIDAKIS, JAN * 1982; Bachelor's, 1970, University of Washington
TSUTSUI, MICHIO * 1990; Bachelor's, 1970, Osaka University
TURNS, JENNIFER A. * 1999; Doctorate, 1999, Georgia Institute of Technology-Main Campus
ZACHRY, MARK R * 2006; Bachelor's, 1992, Arizona State University
Associate Professors

CRAFT, BROCK R * 2015; Bachelor's, 1992, Columbia College
DAVIDSON, ANDREW H., 2006; Master's, 1982, University of Pennsylvania
FINDLATER, LEAH K * 2017; Master's, 2004, University of British Columbia; Computer and Information Science
FOX, TYLER STEVEN * 1998; Doctorate, 2015, Simon Fraser University
HENDRICKS, DIANNE G., 2013; Doctorate, 2010, Duke University
HSIEH, GARY * 2013; Doctorate, 2010, Carnegie Mellon University
LEE, CHARLOTTE P * 2008; Master's, 1997, San Jose State University
MUNSON, SEAN A * 2010; Bachelor's, 2006, Franklin W. Olin College of Engineering
RIBES, DAVID * 2015; Master's, 2000, McGill University
ROSNER, DANIELA K * 2013; Bachelor's, 2003, Rhode Island School of Design
STARBIRD, CATHARINE E * 2012; Bachelor's, 1999, Stanford University
WAGNER, LINDA E, 2013; Master's, 1998, Illinois Institute of Technology

Assistant Professors

COPPOLA, SARAH MARIE, 2020; Doctorate, 2019, Harvard University
DEW, KRISTIN N * 2011
PEEK, NADYA M * 2018; Doctorate, 2016, Massachusetts Institute of Technology
SPYRIDAKIS, IRINI K, 2007

Senior Lecturer

SANOCKI, ELIZABETH, 1988; Bachelor's, 1985, Michigan State University

Lecturers

BARBOZA, LAURA M, 2017; Bachelor's, 2006, Florida International University
BRUNDETT, ALEXANDER, 2018; Master's, 2018, University of Washington
CAMPBELL, JASON, 2006; Master's, 2007, University of Washington; Art
FERRO, TONI DIANE, 2008; Master's, 2010, University of Washington
FLEISHER, JACOB, 2017
GEISTWEIDT, JASON, 2017
HUTCHINSON, BLAIR NEVILLE, 2017; Bachelor's, 2015, University of Vermont; Computer and Information Science
IRANI, XERXES, 2018; Bachelor's, 1998, Alberta Vocational College
JENKINS, MARY-COLLEEN, 2010
KAYES, JEREMY, 2017; Bachelor's, 2000, Virginia Commonwealth University
LOUCKS-JARET, CHRISTINE M, 1997
MARTIN-EMERSON, ROBIN, 2015
MARX, JUSTIN ANDREW, 2017; Bachelor's, 2003, New York University; Music
MOBRAND, KATHRYN A, 2005
NEELY, TAMARA L, 2018; Master's, 2000, American University; Journalism
SHI, KEVIN, 2017; Master's, 2018, University of Washington
SLOTA, STEPHEN C, 2017
SPENCE, JEANINE, 2018; Master's, Rhode Island School of Design; Industrial Design
Industrial and Systems Engineering

For complete faculty listing, please visit https://ise.washington.edu/facultyfinder

Professors

BOYLE, LINDA T. * 1992; Bachelor's, 1986, University at Buffalo
FURNESS, THOMAS A * 1989; Bachelor's, 1966, Duke University
GHATE, ARCHIS VIJAY * 2006; Bachelor's, 2001, Indian Institute of Technology Delhi
KAPUR, KAILASH C. * 1992; Master's, 1965, Indian Institute of Technology Delhi
STORCH, RICHARD * 1982; Master's, 1968, Massachusetts Institute of Technology
ZABINSKY, ZELDA * 1985; Master's, 1984, University of Michigan-Ann Arbor

Associate Professors

DRUI, ALBERT B, 1959; Bachelor's, 1949, Washington State University
HUANG, SHUAI * 2014; Doctorate, 2012, Arizona State University
LIU, SHAN * 2013; Master's, 2008, Massachusetts Institute of Technology
MASTRANGELO, CHRISTINA M. * 2002; Bachelor's, 1986, Arizona State University

Assistant Professors

BANERJEE, ASHIS G * 2015; Bachelor's, 2004, Indian Institute of Technology Delhi
BUCHANAN, PATRICIA CECILIA, 2016; Doctorate, 2014, University of Central Florida
CHOE, YOUNGJUN * 2016; Bachelor's, 2010, Korea Advanced Institute of Science & Technology
KIM, JI-EUN * 2017; Doctorate, 2017, Pennsylvania State University-Main Campus; Industrial Engineering
RAJIVAN, PRASHANTH * 2018; Bachelor's, 2007, Anna University; Information Technology
YAN, CHIWEI * 2019; Doctorate, 2017, Massachusetts Institute of Technology
ZHAO, CHAOYUE * 2019; Doctorate, 2014, University of Florida; Industrial Engineering

Materials Science and Engineering

For complete faculty listing, please visit https://mse.washington.edu/facultyfinder

Professors

CAO, GUOZHONG * 1996; Bachelor's, 1982, East China University of Science and Technology
HINDS, BRUCE JACKSON III * 2014; Bachelor's, 1991, Harvey Mudd College
JEN, ALEX K-Y. * 1999; Bachelor's, 1978, National Tsing Hua University Taiwan
KRISHNAN, KANNAN * 2001; Bachelor's, 1978, Indian Institute of Technology Delhi
LIU, JUN * 2019; Bachelor's, 1982, Hunan University; Chemical Engineering
LUSCOMBE, CHRISTINE K. * 2006; Master's, 2000, University of Cambridge
OHUCHI, FUMIO * 1992; Bachelor's, 1972, Sophia University
POLONIS, DOUGLAS H, 1955; Bachelor's, 1951, University of British Columbia
SARIKAYA, MEHMET * 1984; Bachelor's, 1976, Middle East Technical University
STOEBE, THOMAS GAINES, 1966; Bachelor's, 1961, Stanford University
TAMERLER-BEHAR, CANDAN * 2002; Master's, 1971, Bogazici University
YANG, JIHUI * 2011; Bachelor's, 1989, Fudan University
ZHANG, MIQIN * 1999; Bachelor's, 1983, Jiangxi University of Science and Technology
Associate Professors
AROLA, Dwayne D * 1991; Bachelor's, 1989, University of Washington
BRUSH, Lucien N * 1990; Master's, 1984, Carnegie Mellon University
FLINN, Brian D. * 1991; Bachelor's, 1984, Colorado School of Mines
MACKENZIE, John Devin * 2015; Bachelor's, 1994, Massachusetts Institute of Technology
MILLER, Alan D, 1967; Bachelor's, 1957, University of Washington
PAUZAUSKIE, Peter John * 2010

Assistant Professors
CAO, Ting * 2018; Bachelor's, 2012, Peking University; Physics
HUANG, Yue, 2017
ROLANDI, Marco * 2008; Doctorate, 2005, Stanford University
ROUMELI, Eleftheria * 2019; Doctorate, 2014, Aristotle University of Thessaloniki
ZOBEIRY, Navid * 2019; Master's, 2005, University of British Columbia

Lecturer
ROHATGI, Aashish, 2017

Mechanical Engineering
For complete faculty listing, please visit https://www.me.washington.edu/facultyfinder

Professors
ALISEDA, Alberto * 2006; Master's, 1998, Polytechnic University of Puerto Rico San Juan
BALISE, Peter, 1950; Bachelor's, 1948, Massachusetts Institute of Technology
CHALUPNIK, James, 1964; Bachelor's, 1953, Texas Tech University
COOPER, Joyce S. * 1998; Master's, 1992, Duke University
DALY, Colin H., 1982; Bachelor's, 1963, University of Glasgow
DEL ALAMO DE PEDRO, Juan Carlos, 2019; Bachelor's, 2000, Universidad Politécnica de Madrid; Aerospace Engineering
DEVASIA, Santosh * 2000; Bachelor's, 1988, Indian Institute of Technology Delhi
EMERY, Ashley F * 1961; Bachelor's, 1956, University of California-Berkeley
FORSTER, Fred * 1982; Master's, 1968, Stanford University
GALLE, Kurt R, 1982; Bachelor's, 1946, Purdue University-Main Campus
GANTER, Mark * 1986; Bachelor's, 1979, University of Wisconsin Colleges
GAO, Dayong * 2004; Doctorate, 1991, Concordia College
GARBINI, Joseph * 1979; Bachelor's, 1971, University of Washington
KLUTE, Glenn K. * 1985; Master's, 1990, Pennsylvania State University-College of Medicine
KOBAYASHI, Albert S * 1982; Doctorate, 1958, Illinois Institute of Technology
KRAMLICH, John C. * 1991; Bachelor's, 1973, Washington State University
KUMAR, Vinod * 1988; Bachelor's, 1970, Indian Institute of Technology Delhi
LEDOUX, William R. * 1999; Master's, 1993, University of Pennsylvania
LI, JIANGYU * 2006; Bachelor's, 1994, Tsinghua University
MAMIDALA, Ramulu * 1978; Master's, 1976, Indian Institute of Technology Delhi
MC CORMICK, Norman J, 1982; Bachelor's, 1960, University of Illinois at Urbana-Champaign
POSNER, Jonathan D * 2011
PRATT, DAVID T, 1981; Master's, 1962, University of California-Berkeley
REINHALL, PER G * 1982; Master's, 1978, California Institute of Technology
SEIBEL, ERIC J. * 1988; Bachelor's, 1983, Cornell University
SHEN, I-YEU * 1993; Bachelor's, 1981, National Taiwan University
SNIADECKI, NATHAN JOHN * 2007; Doctorate, 2003, University of Maryland-University College
STORTI, DUANE W * 1983; Bachelor's, 1979, Cornell University
TUTTLE, MARK E * 1985; Bachelor's, 1975, Michigan Technological University
WANG, JUNLAN * 2008; Bachelor's, 1994, Huazhong University of Science and Technology

Associate Professors

BERG, MARTIN C * 1986; Doctorate, 1986, Stanford University
BRUNTON, STEVEN L. * 2012; Bachelor's, 2006, California Institute of Technology
CHUNG, JAEHYUN * 2005; Doctorate, 2004, Northwestern University
COBB, CORIE * 2016; Bachelor's, 2002, Stanford University
HOLT, RICHARD, 1947; Bachelor's, 1947, University of Washington
JONES, JULIA H, 1983; Bachelor's, 1984, University of Washington
LIU, JONATHAN * 2014; Bachelor's, 1999, Princeton University
MESCHER, ANN M * 1996; Bachelor's, 1988, Ohio State University Agricultural Technical Institute
NOVOSSELOV, IGOR * 1999; Master's, 2002, University of Washington
POLAGYE, BRIAN L * 2002; Bachelor's, 2000, Princeton University
STEELE, KATHERINE M. * 2012; Bachelor's, 2007, Colorado School of Mines

Assistant Professors

AUBIN, PATRICK M. * 2004; Bachelor's, 2004, University of Washington
BOECHLER, NICHOLAS S. * 2012; Bachelor's, 2008, California Institute of Technology
CHEN, XU * 2019; Bachelor's, 2008, Tsinghua University; Mechanical Engineering
FULLER, SAWYER BUCKMINSTER * 2015; Doctorate, 2011, California Institute of Technology
KANG, SOYOUNG, 2014
LIPTON, JEFFREY IAN * 2018; Bachelor's, 2010, Cornell University; Applied Physics
MALAKOOTI, MOHAMMAD H * 2019; Bachelor's, 2008, Iran University of Science and Technology (IUST); Mechanical Engineering
MANOHAR, KRITHIKA * 2013; Bachelor's, 2013, University of Washington; Mathematics
MEZA, LUCAS R. * 2018; Bachelor's, 2013, California Institute of Technology; Mechanical Engineering
ROMBOKAS, ERIC SCOTT * 2005; Bachelor's, 2001, Rice University
VASHISTH, ANIRUDDH * 2020; Doctorate, 2018, Pennsylvania State University-Main Campus; Philosophy

Lecturer

PRABHAKAR, RENUKA, 2008
College of the Environment

Aquatic and Fishery Sciences

For complete faculty listing, please visit https://fish.uw.edu/faculty-research/

Professors

ANDERSON, CHRISTOPHER M. * 2012; Bachelor's, 1996, Brown University
ANDERSON, JAMES J * 1969; Bachelor's, 1969, University of Washington
CONQUEST, LOVEDAY L * 1976; Bachelor's, 1970, Pomona College
ESSINGTON, TIMOTHY E. * 2003; Bachelor's, 1991, University of Michigan-Ann Arbor
FRIEDMAN, CAROLYN * 1984; Doctorate, 1990, University of California-Davis
GALLUCCI, VINCENT * 1976; Master's, 1966, New York University
GUNDERSON, DONALD R, 1982; Bachelor's, 1963, Montana State University
HAUSER, LORENZ * 2002; Master's, 1989, International University Vienna
HILBORN, RAY * 1987; Bachelor's, 1969, Grinnell College
HORNE, JOHN K. * 1999; Bachelor's, 1985, Dalhousie University
KARR, JAMES, 1991; Bachelor's, 1965, Iowa State University
LISTON, JOHN, 1957; Doctorate, 1955, University of Aberdeen
MILLER, BRUCE S, 1971; Bachelor's, 1958, Grinnell College
NAIMAN, ROBERT J, 1988; Doctorate, 1974, Arizona State University
NAISH, KERRY-ANN * 2000; Bachelor's, 1988, Rhodes University
OLDEN, JULIAN D. * 2006; Doctorate, 2004, Colorado State University
PARRISH, JULIA * 1990; Bachelor's, 1982, Carnegie Mellon University
PIETSCH, THEODORE * 1978; Bachelor's, 1967, University of Michigan-Ann Arbor
PLISETSKAYA, ERIKA, 1982; Bachelor's, 1952, Leningrad State University AS Pushkin
PUNT, ANDRE * 1992; Bachelor's, 1985, University of Cape Town
QUINN, THOMAS P. * 1986; Bachelor's, 1976, Swarthmore College
SCHINDLER, DANIEL E. * 1997; Bachelor's, 1990, University of British Columbia
SEEB, JAMES * 2007; Bachelor's, 1974, University of Puget Sound
SEEB, LISA * 2007; Master's, 1977, The University of Montana
SIMENSTAD, CHARLES * 1969; Bachelor's, 1969, University of Washington
SKALSKI, JOHN RAYMOND * 1987; Master's, 1978, Cornell University
SMITH, LYNWOOD S, 1982; Bachelor's, 1952, University of Washington
SWARTZMAN, GORDON LENI, 1982; Bachelor's, 1964, Cooper Union for the Advancement of Science and Art
WISSMAR, ROBERT C * 1982; Master's, 1968, University of Idaho
YOUNG, GRAHAM * 2004; Bachelor's, 1975, University of Sheffield

Associate Professors

BRANCH, TREVOR * 2000; Bachelor's, 1994, University of Cape Town
HOLTGRIEVE, GORDON W. * 2003; Bachelor's, 1999, Stanford University
ROBERTS, STEVEN * 2006; Bachelor's, 1997, North Carolina A & T State University
SCHEUERELL, MARK D. * 1997; Master's, 1996, Cornell University
Assistant Professors

BERDAHL, ANDREW * 2017; Doctorate, 2014, Princeton University
BRAUN, CAMRIN, 2018; Master's, 2013, King Abdullah University of Science & Technology; Marine Science
GUZMAN JIMENEZ, JOSE M, 2015; Doctorate, 2010, Universidad de Cádiz
PADILLA GAMINO, JACQUELINE * 2016; Master's, 2005, California State University-Northridge
TORNABENE, LUKE M. * 2016; Bachelor's, 2007, Hofstra University
WOOD, CHELSEA L. * 2016; Doctorate, 2013, Stanford University

Atmospheric Sciences

Professors

BATTISTI, DAVID S * 1983; Bachelor's, 1978, University of Massachusetts
BITZ, CECILIA * 1988; Bachelor's, 1988, Oregon State University
BRETHERTON, CHRISTOPHER S * 1984; Bachelor's, 1980, California Institute of Technology
BROWN, ROBERT A, 1971; Bachelor's, 1957, University of California-Berkeley
BUSINGER, JOOST A, 1958; Doctorate, 1954, Utrecht University
CHEN, SHUYI * 2001
COVERT, DAVID S, 1982; Bachelor's, 1970, University of Washington
DURRAN, DALE R * 1987; Bachelor's, 1974, California Polytechnic State University-San Luis Obispo
FU, QIANG * 2000; Bachelor's, 1983, Peking University
HAKIM, GREGORY J * 1999; Bachelor's, 1990, SUNY at Albany
HARTMANN, DENNIS L * 1977; Master's, 1973, Princeton University
HEGG, DEAN A * 1975; Bachelor's, 1969, University of Chicago
JAEGLE, LYATT * 2000; Master's, 1992, California Institute of Technology
MARCHAND, ROGER T * 2007; Bachelor's, 1990, Virginia Polytechnic Institute and State University
MASS, CLIFFORD F * 1981; Bachelor's, 1974, Cornell University
SARACHIK, EDWARD, 1984; Master's, 1963, Brandeis University
SUSS, BECKY ALEXANDER * 2004; Bachelor's, 1997, Colgate Rochester Crozer Divinity School
THORNTON, JOEL A. * 2004; Bachelor's, 1996, Dartmouth College
WALLACE, JOHN M * 1982; Doctorate, 1966, Massachusetts Institute of Technology
WARREN, STEPHEN G * 1981; Bachelor's, 1967, Cornell University
WOOD, ROBERT * 2001; Bachelor's, 1992, University of Cambridge

Associate Professors

FRIERSON, DARGAN M * 2007; Bachelor's, 2000, North Carolina A & T State University
HARRISON, HALSTEAD, 1971; Bachelor's, 1955, Stanford University
KIM, DAEHYUN * 2014; Bachelor's, 2003, Seoul National University
MC MURDIE, LYNN A * 1982
SWANN, ABIGAIL * 2012; Master's, 2005, Columbia University

Assistant Professors

ANDERSON-FREY, ALEXANDRA * 2019
BLANCHARD, EDWARD * 2007; Bachelor's, 2003, University of Cambridge
TURNER, ALEXANDER JAY, 2020; Doctorate, 2017, Harvard University; Atmospheric Science
Lecturer

WARNER, MICHAEL DAVID, 2006; Bachelor's, 2007, University of Washington

Earth and Space Sciences

Professors

ADAMS, JOHN B, 1975; Bachelor's, 1956, Stanford University
ANDERSON, PATRICIA M * 1982; Master's, 1976, Brown University
ATWATER, BRIAN F * 1986; Bachelor's, 1974, Stanford University
BAKER, MARCIA * 1980; Bachelor's, 1959, Cornell University
BERGANTZ, GEORGE W * 1988; Master's, 1985, Georgia Institute of Technology-Main Campus
BODIN, PAUL A * 2006; Master's, 1981, Humboldt State University
BOOKER, JOHN R, 1982; Bachelor's, 1963, Stanford University
BOOTH, DEREK B * 1982; Bachelor's, 1974, Hampshire College
BROWN, J MICHAEL * 1984; Doctorate, 1980, University of Minnesota-Duluth
BUICK, ROGER * 2001; Bachelor's, 1976, University of Western Australia
CATLING, DAVID C. * 2001; Bachelor's, 1990, University of Birmingham
CHENEY, ERIC S * 1982; Bachelor's, 1956, Yale University
COWAN, DARREL S * 1974; Bachelor's, 1966, Stanford University
CREAGER, KENNETH C * 1986; Bachelor's, 1978, Pomona College
CROSSON, ROBERT S, 1982; Doctorate, 1966, Stanford University
EVANS, BERNARD W, 1982; Bachelor's, 1955, University of London
GILLESPIE, ALAN R * 1985; Master's, 1977, California Institute of Technology
GOMBERG, JOAN * 2006; Bachelor's, 1979, Massachusetts Institute of Technology
GONZALEZ, FRANK IGNACIO * 2005; Bachelor's, 1967, St Marys University
GREENE, MOTT T * 1984; Bachelor's, 1967, Columbia College
HALLET, BERNARD * 1980; Bachelor's, 1970, University of California-Los Angeles
HOLZWORTH, ROBERT * 1982; Master's, 1974, University of California-Berkeley
HOUSTON, HEIDI B * 2006; Doctorate, 1987, California Institute of Technology
HUNTINGTON, KATHARINE W * 2008; Doctorate, 2006, Massachusetts Institute of Technology
MALONE, STEPHEN * 1982; Bachelor's, 1966, Occidental College
MONTGOMERY, DAVID R * 1991; Bachelor's, 1984, Stanford University
NELSON, BRUCE K. * 1986; Bachelor's, 1977, Carleton College
PARKS, GEORGE K, 1982; Bachelor's, 1961, University of California-Berkeley
RAYMOND, CHARLES F, 1982; Doctorate, 1969, California Institute of Technology
RENSBERGER, JOHN M, 1982; Master's, 1961, California State University
RICHARDS, MARK ALAN, 2018
ROE, GERARD H * 1999; Doctorate, 1999, Massachusetts Institute of Technology
SCHMIDT, DAVID A * 2012; Doctorate, 2002, University of California-Berkeley
SMITH, STEWART W, 1982; Master's, 1958, California Institute of Technology
STEIG, ERIC J * 1989; Bachelor's, 1988, Hampshire College
STUIVER, MINZE, 1969; Bachelor's, 1953, University of Groningen
SWANSON, TERRY W * 1988; Associate, 1981, Santa Rosa Junior College
TENG, FANGZHEN * 2012; Bachelor's, 2001, Huazhong University of Science and Technology
TOBIN, HAROLD JAMES * 2018; Doctorate, 1995, University of California-Santa Cruz; Geology
VIDALE, JOHN E * 2006; Doctorate, 1987, California Institute of Technology
WADDINGTON, EDWIN D * 1984; Master's, 1973, University of Alberta
WINGLEE, ROBERT M, 1991; Bachelor's, 1980, University of Sydney

**Associate Professors**

ABRAMSON, EVAN H. * 1988; Doctorate, 1985, Massachusetts Institute of Technology
COLLINS, BRIAN D * 1983; Bachelor's, 1979, Oberlin College
CRIDER, JULIET G * 1991; Bachelor's, 1989, Amherst College
DUVALL, ALISON R * 2012; Master's, 2003, University of California-Santa Barbara
GORMAN-LEWIS, DREW J * 2008; Doctorate, 2006, University of Notre Dame
KOUTNIK, MICHELLE R * 2002; Bachelor's, 2001, University of California-Los Angeles
MCCARTHY, MICHAEL P * 1978; Doctorate, 1988, University of Washington
NESBITT, ELIZABETH A., 1993; Doctorate, 1982, University of California-Berkeley
SEETEN, RONALD S * 1983; Bachelor's, 1979, University of Washington
STONE, JOHN O.H. * 1998; Doctorate, 1986, University of Cambridge
SWANSON, BRIAN, 1982; Bachelor's, 1981, University of Washington
TROOST, KATHY G. * 1996; Bachelor's, 1979, Indiana State University
VANCE, JOSEPH A, 1982; Bachelor's, 1951, University of Washington
WALTERS, STEVEN * 2006; Bachelor's, 1991, Carnegie Mellon University

**Assistant Professors**

CHRISTIANSON, KNUT * 2014; Doctorate, 2012, Pennsylvania State University-College of Medicine
CONDIT, CAILEY, 2018; Doctorate, University of Colorado at Boulder; Geology
DECOSMO, JANICE M, 1984; Bachelor's, 1979, University of Iowa
DENOLLE, MARINE, 2020
FUDGE, TYLER JEFFREY * 2007; Bachelor's, 2002, Bowdoin College
LICHT, ALEXIS GERMAIN A * 2015; Master's, 2009, École des Mines de Paris
LIPOVSKY, BRADLEY PAUL, 2020
MORIARTY, ERIN W * 2014; Bachelor's, 2009, New York University
SHERROD, BRIAN L * 1995; Bachelor's, 1986, James Madison University

**Lecturers**

MARTIN, RUTH A., 2004

**Program on the Environment**

Professors

ALLAN, G GRAHAM, 1966; Bachelor’s, 1952, University of Glasgow
BAKKER, JONATHAN * 2006; Bachelor’s, 1994, Dordt College
BARE, B BRUCE, 1982; Bachelor’s, 1964, Purdue University-Main Campus
BOLTON, SUSAN M * 1992; Master’s, 1985, New Mexico State University-Grants
BORMANN, BERNARD * 1984; Doctorate, 1981, Oregon State University
BRADLEY, GORDON A * 1982; Bachelor’s, 1969, Pomona College
BROWN, DANIEL G * 2018; Bachelor’s, 1987, Shippensburg University of Pennsylvania
BROWN, SALLY L. * 1998; Master’s, 1993, University of Maryland-University College
BURA, RENATA * 2006; Bachelor’s, 1997, Ryerson University
DOTY, SHARON L * 1989; Bachelor’s, 1989, University of California-Davis
EASTIN, IVAN * 1987; Bachelor’s, 1983, Michigan Technological University
EDMONDS, ROBERT L * 1982; Bachelor’s, 1964, University of Sydney
EWING, KERN * 1983; Bachelor’s, 1962, Texas Tech University
FORD, E DAVID * 1985; Doctorate, 1968, University College London
FRANKLIN, JERRY F * 1986; Bachelor’s, 1959, Oregon State University
FRIDLEY, JAMES * 1982; Master’s, 1980, Michigan State University
GARA, ROBERT I * 1968; Master’s, 1962, Oregon State University
GRAUMLICH, LISA J * 2010; Doctorate, 1985, University of Washington
GUSTAFSON, RICHARD ROY * 1986; Bachelor’s, 1977, University of Washington
HALPERN, CHARLES * 1991; Bachelor’s, 1980, Cornell University
HARRELL, STEVAN * 1974; Master’s, 1971, Stanford University
HINCKLEY, THOMAS M * 1980; Bachelor’s, 1966, Carleton College
JOHNSON, JAY A, 1983; Master’s, 1970, New York University
KIM, SOO-HYUNG * 2006; Bachelor’s, 1992, Seoul National University
LAWLER, JOSHUA J * 2007; Bachelor’s, 1993, Bowdoin College
LEVIN, PHILLIP SCOTT * 2016; Bachelor’s, 1984, The University of Texas
MARZLUFF, JOHN M. * 1997; Master’s, 1983, Northern Arizona University
MCKEAN, WILLIAM T * 1982; Bachelor’s, 1960, University of Colorado
MOSKAL, LUDMILA M. * 2006; Master’s, 2000, University of Calgary
PETERSON, DAVID L * 1989; Bachelor’s, 1976, University of Illinois at Urbana-Champaign
RYAN, CLARE * 1984; Master’s, 1990, University of Michigan-Ann Arbor
SCHREUDER, GERARD FRITZ, 1982; Master’s, 1967, University of North Carolina
TORGersen, CHRISTIAN E. * 2006; Master’s, 1996, Oregon State University
VOGT, KRISTIINA * 1982; Master’s, 1974, New Mexico State University-Grants
WEST, STEPHEN D * 1979; Master’s, 1974, University of Alaska Southeast
WIRSING, AARON * 1996; Bachelor’s, 1996, Bowdoin College
WOTT, JOHN A * 1981; Master’s, 1966, Cornell University
ZABOWSKI, DARLENE * 1982; Bachelor’s, 1981, University of Washington
**Associate Professors**

ALVARADO-CELESTIN, ERNESTO * 1988; Bachelor’s, 1980, Universidad Autónoma Chapingo
ASAHI, STANLEY TANYI * 2009; Master’s, 2003, University of Minnesota-Duluth
BUTMAN, DAVID E * 2014; Bachelor’s, 2000, Connecticut College
CONVERSE, SARAH J * 2017; Doctorate, 2005, Colorado State University
ETTL, GREGORY J * 1988; Master’s, 1989, University of Washington
GANGULY, INDRONEIL * 2002; Bachelor’s, 1996, University of Calcutta
GARDNER, BETH ANN * 2016; Bachelor’s, 1999, Allegheny College
GOUGH, HEIDI LOIS * 2004; Bachelor’s, 1993, Northwestern University
PRUGH, LAURA RYANNE * 2015; Bachelor’s, 1996, Earlham College
RABOTYAGOVA, SERGEY S. * 2007; Master’s, 2002, Iowa State University
TOBIN, PATRICK C * 2014; Master’s, 1997, Pennsylvania State University-College of Medicine
TOTH, SANDOR F. * 2007; Master’s, 1994, Mendel University of Agriculture and Forestry Brno
TURNBLOM, ERIC * 1994; Master’s, 1986, University of British Columbia
VOGT, DANIEL * 1982; Bachelor’s, 1968, New Mexico State University-Grants
WHEILER, KENT WILLIAM * 2017; Doctorate, 1994, The University of Texas at Austin; Marketing

**Assistant Professors**

ANDERSEN, HANS * 1995; Master’s, 1997, University of Washington
BRATMAN, GREGORY NELSON * 2017; Bachelor’s, 1997, Princeton University
COMBS, JULIE * 1998; Bachelor’s, 1994, University of California-Davis; Environmental Science
DICIARA, ANTHONY BRUNO * 2015; Doctorate, 2012, École Centrale Paris
HARVEY, BRIAN J * 2016; Master’s, 2010, San Francisco State University
JOHNSON, BRITTANY * 2018; Bachelor’s, 2007, Concordia College at Moorhead
KANE, VAN R * 2004; Bachelor’s, 1977, Pennsylvania State University-College of Medicine
MCKENZIE, DONALD * 1992; Bachelor’s, 1971, University of California-Berkeley
PACHECO DE RESENDE, FERNAN, 2011; Bachelor’s, 2000, Universidade Estadual de Campinas (Unicamp)

**Lecturers**

EWANICK, SHANNON M, 2007
SUGDEN, EVAN A, 1998; Doctorate, 1984, University of California-Davis; Entomology

**Marine and Environmental Affairs**

TENNIS, JOSEPH T. * 2001; Master's, 1999, Indiana University-Bloomington
WILLIAMS, HELENE C., 1995; Master's, 1989, Indiana University-Bloomington
WOBBOCK, JACOB O * 2006; Doctorate, 2006, Carnegie Mellon University

Associate Professors

ANNABI, HALA P * 2004; Bachelor's, 1997, Le Moyne College
BARKER, SCOTT F, 1999; Bachelor's, 1984, Syracuse University
CARLYLE, ALLYSON, 1996; Master's, 1986, University of California-Los Angeles
CARTER, MICHELLE SUZANNE * 2014; Bachelor's, 2000, Anglia Ruskin University
DAVIS, KATHARINE E. * 2012; Master's, 2002, Harvard University
DOANE, MICHAEL, 2008; Bachelor's, 1983, San Francisco State University
FREEMAN, MICHAEL, 2010; Bachelor's, 2010, Colorado College
GOMEZ, RICARDO J * 2007; Doctorate, 1997, Cornell University
HENDRY, DAVID * 2002; Doctorate, 1996, Robert Gordon University
HILL, TRENT G., 2000; Bachelor's, 1985, Duke University
HUNTE, WILLIAM GREGORY * 2009; Bachelor's, 1999, Georgia Institute of Technology-Main Campus
HUNT, CHANCE, 1991; Bachelor's, 1985, University of California-San Diego
JANES, JOSEPH W * 1998; Bachelor's, 1982, Syracuse University
JOHNSON, RONALD A., 1986; Master's, 1972, University of Chicago
JONES, WILLIAM P. * 2000; Bachelor's, 1975, University of Kansas
LEE, JIN HA * 2009; Bachelor's, 2000, Ewha Womens University
MENKING, AMANDA * 2012; Master's, 2002, Hardin-Simmons University; English
METOYER, CHERYL * 2003; Bachelor's, 1968, Immaculata University; English
NAHON, KARINE * 2004; Bachelor’s, 1997, Tel Aviv University
REIFERS, ANDREW, 2019; Doctorate, 2010, Pennsylvania State University-Main Campus; Information Science
ROSS, JOEL, 2015; Bachelor’s, 2006, Colorado College
SAXTON, MATTHEW * 2000; Bachelor’s, 1991, Occidental College
SEARLE, MARGARET A, 2009; Bachelor’s, 1966, University of Iowa
SHAH, CHIRAG * 2019; Bachelor’s, 2000, Dharmasinh Desai University; Computer Engineering
SPIRO, EMMA STUART * 2013; Bachelor’s, 2007, Pomona College
SUTTON, STUART, 1999; Doctorate, 1981, Golden Gate University
TEEVAN, JAIME * 2016; Master’s, 2001, Massachusetts Institute of Technology
WALE, CARLA PRITCHETT * 2020; Juris Doctor, 2006, Loyola University New Orleans
WEST, JEVIN D * 2005; Doctorate, 2010, University of Washington

Assistant Professors
ALTHOUSE, BENJAMIN M * 2007; Doctorate, 2013, Johns Hopkins University; Epidemiology
BELARDE-LEWIS, MIRANDA H. * 2017; Bachelor’s, 2002, University of Arizona; Anthropology
BLUMENSTOCK, JOSHUA E * 2012; Master’s, 2010, University of California-Berkeley
CIFOR, MARIKA L * 2019; Bachelor’s, 2007, Mills College; Political Communication
DAHYA, NEGIN * 2014; Bachelor’s, 2005, University of British Columbia
FINN, MEGAN * 2014; Master’s, 2005, University of California-Berkeley
HAY, GREGORY THOMAS, 2008; Bachelor’s, 2005, University of Washington
HINIKER, ALEXIS * 2012; Bachelor’s, 2005, Harvard University; Computer and Information Science
HOFFMANN, ANNA LAUREN * 2017; Bachelor’s, 2005, University of Minnesota-Twin Cities
HULLMAN, JESSICA * 2015; Master’s, 2006, Naropa University
LEFTHAND-BEGAY, CLARITA * 2005; Bachelor’s, 2002, University of Arizona
LITTLETREE, SANDRA D, 2012; Master’s, 2004, New Mexico State University-Main Campus
MITRA, TANUSHREE * 2020; Doctorate, 2017, Georgia Institute of Technology-Main Campus; Computer and Information Science
NELSON, JEROLD A, 1982; Doctorate, 1971, University of California-Berkeley
SCHILDKRAUT, LAURA B., 1996; Bachelor’s, 1982, New York University
SELVAKUMAR, MEENA * 2017; Bachelor’s, 1990, Osmania University
SNYDER, JAIME * 2014; Master’s, 1997, Stanford University
SOPER, MARY E, 1982; Bachelor’s, 1955, University of Illinois at Urbana-Champaign
STURMAN, RICHARD O, 2017; Master’s, 2013, RMIT University
THAYER, KYLE M, 2014; Bachelor’s, 2006, Colorado State University; Computer and Information Science
TOOMET, OTT S., 2015; Doctorate, 2005, Aarhus University
WEBER, NICHOLAS M * 2015; Bachelor’s, 2005, University of Illinois at Urbana-Champaign
YIP, JASON * 2015; Doctorate, 2014, University of Maryland-University College

Senior Lecturers
LARSON, ROBERT E, 1983; Bachelor’s, 1983, Central Washington University
MANRIQUE, EDMUND, 2019; Master’s, 1999, Benedictine University; Management Information Systems
STEARNNS, DAVID L, 2013; Bachelor’s, 1991, Pacific Lutheran University

Lecturers
ANKNEY, DONALD J, 1993
BRAUN, LINDA W, 2016; Master’s, 1996, Lesley University
BROOK, FREEDA, 2017; Bachelor’s, 2007, Grinnell College
CHAFFIN, KRISTIN, 2017; Bachelor's, 1990, Louisiana State University; Anthropology
CHAN, JOHN, 2018
DEL VECCHIO, STEPHEN V., 2017; Master's, 1987, Columbia University; Library Science
DRAVID, AVNIEL, 2006
FRIMER, DANIEL DAVID, 2018; Master's, 2018, University of Washington; Information Technology
GOLDSMITH, ANNETTE, 2009; Doctorate, 2009, Florida State University
HIMMA, KENNETH E, 1992
LALAIAN, MICHAEL G, 2017; Master's, Azerbaijan Technical University; Mechanical Engineering
LUNG, JANNIE, 2018; Bachelor's, 1998, University of Illinois at Urbana-Champaign; Finance
MCKENNA, ANDREW CHARLES, 2009; Bachelor's, 2012, University of Washington; Political Science
MORRISSEY, KRISTINE A., 2007; Bachelor's, 1974, Michigan State University
NICKLAS, ROBERT, 2003; Bachelor's, 1974, The College of Wooster
PAJEWSKI, AMY L, 2017; Master's, 2010, Clarion University of Pennsylvania
PARK, NAM HO, 2014; Master's, Columbia University; Architecture
PATEL, SHOPEN, 2012
SWAMINATHAN, GANDHINATH, 2018; Bachelor's, 1997, University of Madras; Business Administration/Management
TIBBETTS, TODD, 2017
TROTTA, VICTORIA, 2017
WANG, CHUN-KAI, 2013; Master's, 2007, Stanford University; Computer and Information Science
WHEELER, RONALD E, 2018; Juris Doctor, University of Michigan-Ann Arbor; Pre-Law
YI, MYONGHO, 2017; Doctorate, 2006, Florida State University
ZIEMER, MARIA L., 2015; Master's, 2006, Dominican University; Library Science
ZIMMERMAN, JOHN, 2017

Professors

ALLBRITTON, NANCY LYNN, 2019; Medical Doctorate, 1985, Johns Hopkins University
BASSINGTHWAIGHTE, JAMES, 1975; Doctorate, 1964, Mayo Graduate School
BRYERS, JAMES D * 2004; Doctorate, 1980, Rice University
DAGGETT, VALERIE D. * 1993; Bachelor's, 1983, Reed College
FOLCH, ALBERT * 2000; Bachelor's, 1989, Universitat de Barcelona
FOSTER, DAVID M, 1982; Bachelor's, 1962, Northwestern University
GAO, XIAOHU * 2005; Doctorate, 2004, Indiana University-Bloomington
GIACHELLI, CECILIA * 1982; Bachelor's, 1982, University of California-Davis
HORBETT, THOMAS A * 1982; Doctorate, 1970, University of Washington
O’DONNELL, MATTHEW * 2006; Bachelor’s, 1972, University of Notre Dame
POLLACK, GERALD H * 1968; Bachelor’s, 1961, American Institute
PUN, SUZIE H * 2003; Bachelor’s, 1998, California Institute of Technology
RATNER, BUDDY D * 1972; Doctorate, 1972, American Institute
RATNER, DANIEL M. * 1993; Doctorate, 2004, Massachusetts Institute of Technology
REGNIER, MICHAEL * 1995; Bachelor’s, 1980, Portland State University
SANDERS, JOAN ELIZABETH * 1985; Bachelor’s, 1985, Northwestern University
SAURO, HERBERT M * 2007; Bachelor’s, 1981, University of Kent
SIMS, CHRISTOPHER E, 2020; Bachelor’s, 1980, Auburn University-Montgomery
SPELMAN, FRANCIS A, 1982; Bachelor’s, 1959, Stanford University
STAYTON, PATRICK * 1992; Bachelor’s, 1984, Illinois State University
THOMAS, WENDY * 1998; Bachelor’s, 1987, Princeton University
WANG, RUIKANG * 2010; Bachelor’s, 1988, Tianjin University of Commerce China
YAGER, PAUL * 1987; Bachelor’s, 1975, Princeton University

Associate Professors

AVERKIOU, MICHALAKIS A * 1994; Bachelor’s, 1987, The University of Texas
CHUDLER, ERIC H * 1982; Bachelor’s, 1980, University of California-Los Angeles
GAMBLE, LARA J. * 1991; Bachelor’s, 1990, University of California-Santa Cruz
KIM, DEOK-HO, 2011
LAI, JR-IUAN * 2005; Master’s, 2003, American Institute
LUTZ, BARRY R. * 1998; Bachelor’s, 1995, The University of Texas
NEILS, CHRISTOPHER * 2001; Bachelor’s, 1990, Massachusetts Institute of Technology
PELIVANOV, IVAN * 2010; Master’s, 1998, Moscow State Technical University
PRICE, NATHAN * 1999; Bachelor’s, 2000, Brigham Young University
SCATENA, MARTA * 1996; Bachelor’s, 1989, Università degli Studi di Padova
SPEER, YANFENG * 2000; Medical Doctorate, 1982, Huazhong University of Science and Technology
TAYLOR AMOS, ALYSSA, 2010; Bachelor’s, 2003, University of California-Davis
WOODROW, KIM A. * 2009; Master’s, 2001, Stanford University
ZHENG, YING * 2011; Doctorate, 2008, University of Michigan-Ann Arbor
Assistant Professors

BAILEY, SORAYA, 2018; Bachelor’s, 2009, University of Calgary
BERNDT, ANDRE * 2016; Bachelor’s, 2003, Humboldt Universität zu Berlin
BOYLE, PATRICK MICHAEL JOSEPH * 2018
GIBBONS, SEAN M * 2020; Doctorate, 2015, University of Chicago
INTERLANDI, GIANLUCCA * 2007; Master’s, 2000, Universität Zürich
KUEH, HAO YUAN * 2016; Doctorate, 2008, Harvard University
STEVENS, KELLY R. * 2003; Doctorate, 2008, University of Washington
YAZDAN-SHAHMORAD, AZADEH * 2016; Doctorate, 2011, University of Michigan-Ann Arbor

Lecturer

BLANK, MOLLY ANNELISE B., 2010; Doctorate, 2016, Carnegie Mellon University

Global Health

Professors

BAETEN, JARED * 1995; Doctorate, 2001, University of Washington
BAEZA, CRISTIAN C, 2014; Master’s, 1994, Johns Hopkins University
BUKUSI, ELIZABETH ANNE * 1996; Medical Doctorate, 1987, University of Nairobi
CAMPBELL, LEE ANN * 1985; Bachelor’s, 1977, Pennsylvania State University-College of Medicine
CELUM, CONNIE L. * 1987; Bachelor’s, 1979, Stanford University
COLER, RHEA N. * 1994; Master’s, 1990, London School of Hygiene & Tropical Medicine
EBI, KRISTIE L * 2014; Master’s, 1976, Massachusetts Institute of Technology
FARQUHAR, CAREY * 1994; Bachelor’s, 1989, Brown University
GIMBEL-SHERR, KENNETH * 1999; Bachelor’s, 1995, Kenyon College
GLOYD, STEPHEN S. * 1985; Bachelor’s, 1969, Harvard University
HAKOMORI, SEN-ITIROH, 1982; Medical Doctorate, 1951, Tohoku University
HOLMES, KING K. * 1967; Medical Doctorate, 1963, Cornell University
JOHN STEWART, GRACE C. * 1992; Bachelor’s, 1983, University of Michigan-Ann Arbor
KENNY, GEORGE E. * 1982; Bachelor’s, 1952, Fordham University
LAMPE, PAUL D. * 1996; Bachelor’s, 1979, Carleton College
LINGAPPA, JAIRAM R. * 1991; Doctorate, 1987, Harvard University
LINGAPPA, JAISRI * 1999; Doctorate, 1985, Harvard University
MURRAY, CHRISTOPHER J * 2007; Bachelor’s, 1984, Harvard University
PFEIFFER, JAMES T. * 2004; Master’s, 1989, University of California-Los Angeles
RAO, DEEPA * 2009; Doctorate, 2004, Illinois Institute of Technology
STAMATATOS, LEONIDAS * 2001; Master’s, 1983, American University of Paris
UNUTZER, JURGEN * 1994; Bachelor’s, 1983, Iowa State University
WALSON, JUDD L. * 2004; Bachelor’s, 1993, Pitzer College
WASSERHEIT, JUDITH N. * 1982; Medical Doctorate, 1978, Harvard University
WEINER, BRYAN * 2016; Bachelor’s, 1989, University of California-Santa Cruz

Associate Professors

BABIGUMIRA, JOSEPH BRIAN, 2006; Master’s, 2004, Case Western Reserve University
BARNABAS, RUANNE V. * 2009; Medical Doctorate, 1997, University of Cape Town
DONNELL, DEBORAH J * 1982; Bachelor's, 1980, University of Auckland
DRAIN, PAUL K * 1999; Bachelor's, 1996, Miami University-Oxford; Microbiology
FRAHM, NICOLE, 2008; Doctorate, 2003, Universität Hamburg
FRIESEN, JENNIFER LUND * 2006; Bachelor's, 2001, Macalester College
GORSTEIN, JONATHAN L. * 2003; Bachelor's, 1982, The Evergreen State College
GRAHAM, SUSAN M. * 2003; Master's, 1990, Boston University
HANSEN, JOHN D. * 2004; Doctorate, 1996, Oregon State University
HEFFRON, RENEE * 2008; Bachelor's, 2000, Boston University
KURTH, ANN E. * 1998; Master's, 1987, Columbia University
LEVIN, CAROL E. * 2003; Doctorate, 1992, Cornell University
MUGO, NELLY * 1998; Medical Doctorate, 1987, University of Nairobi
O'MALLEY, GABRIELLE E. * 1992; Master's, 1989, Johns Hopkins University
RIVIN, BETH E. * 1996; Medical Doctorate, 1982, East Carolina University
SLYKER, JENNIFER A. * 2000; Bachelor's, 1997, Colgate University

Assistant Professors

COWAN, JAMES FAIRMAN, 2008; Bachelor's, 2003, Brown University
DRAKE, ALISON LOUISE * 2005; Bachelor's, 2000, University of Michigan-Ann Arbor
FELDACKER, CARYL B, 2010; Master's, 2001, Tulane University of Louisiana
GUTHRIE, BRANDON L * 2003; Bachelor's, 2000, Macalester College
HERBECK, JOSHUA THOMAS, 2004; Bachelor's, 1995, Tufts University
JOHNSON, WENDY L. * 2006; Master's, 2004, Johns Hopkins University
LANE, JEFFREY PATRICK, 2008; Bachelor's, 2005, Boston College
MCGUIRE, ANDREW * 2018; Doctorate, 2011, University of Guelph
MUGAMBI, MELISSA, 2015; Doctorate, 2013, Case Western Reserve University
MUGWANYA, KENNETH, 2011; Master's, 2009, Case Western Reserve University
NG, TAN HUNG MARIE, 2002; Master's, 2006, University of Southern California
PAVLINAC, PATRICIA B. * 2008; Bachelor's, 2005, Colgate University
PERRONE, LUCY A., 2012; Bachelor's, 1999, Fordham University
PUTTKAMMER, NANCY * 2002; Bachelor's, 1989, Princeton University
SOGE, OLUSEGUN O., 2003; Master's, 2001, University of Ibadan
WAGENAAR, BRADLEY H. * 2012; Master's, 2012, Emory University
School of Law

KIM, JERRY HYUN, 2006; Bachelor’s, 1999, Pennsylvania State University-College of Medicine
LATHAM, GREGORY J., 2009; Bachelor’s, 1994, Kansas State University
LAW, EMILY F, 2012; Bachelor’s, 2004, Brandeis University
LOW, DANIEL K W, 2007; Medical Doctorate, 1997, University of Nottingham
MARTAY, KENNETH, 1999; Medical Doctorate, 1987, Universität Freiburg
MARTIN, LIZABETH D., 2010; Bachelor’s, 2000, Dartmouth College
METZNER, IULIA IRINA, 2003; Medical Doctorate, 1986, University of Medicine and Pharmacy Victor Babes Timisoara
NIKRAVAN, SARA, 2020; Bachelor’s, 2002, Austin College; Biology
NISHIO, ISUTA, 2004; Doctorate, 1997, Keio University
OBELCZ, YULIA, 2006; Medical Doctorate, 1989, Russian University of Cooperation Far Eastern Branch
O’REILLY-SHAH, VIKAS NAVIN, 2019; Medical Doctorate, 2007, Vanderbilt University
PITTMAY, ANDREW J, 2002; Medical Doctorate, 1991, University of Nottingham
RABBITTS, JENNIFER A, 2011; Medical Doctorate, 2002, Stellenbosch University
RAMAIAH, RAMESH, 2006; Medical Doctorate, 1990, Jawaharlal Nehru University
RAMPERSAD, SALLY E., 1996; Medical Doctorate, 1986, University of Southampton
RICHARDS, MICHAEL J., 2003; Medical Doctorate, 1993, University of Southampton
RUBENS, DANIEL D, 1999; Medical Doctorate, 1992, University of New South Wales
THILEN, STEPHAN R, 2008; Medical Doctorate, 1981, Karolinska Institute
VATER, YOURI L., 1999; Medical Doctorate, 1977, Riga Medicine College
VITIN, ALEXANDER A., 2003; Bachelor's, 1997, Technion Israel Institute of Technology
VON HOMeyer, Peter, 2008; Medical Doctorate, 2001, Freie Universität Berlin
WANG, WANG * 2010; Doctorate, 2002, Peking University
WEISS, KAREN E, 2016; Master's, 2006, University of Maryland-Baltimore
WRIGHT, DAVID R, 2011; Medical Doctorate, 1990, University of Southampton

Assistant Professors

ACCUARDI-RAVID, MICHELLE C, 2014; Master's, 2010, SUNY at Binghamton
ADAMS, TREVOR L, 2013; Medical Doctorate, 2009, Eastern Virginia Medical School
ARORA, VIVEK, 2015
BEN-ARI, ALON Y, 2011; Bachelor's, 1997, Technion Israel Institute of Technology
BHALLA, PAUL I, 2011; Bachelor's, 1998, University of Bristol
CHIEM, JENNIFER LINH, 2015; Medical Doctorate, 2011, New York Medical College
DALE, REBECCA C, 2012; Bachelor's, 2003, Antioch College
DELGADO UPEGUI, CARLOS M, 2014; Medical Doctorate, 2007, Universidad CES
DINGES, EMILY, 2008; Medical Doctorate, 2007, Oregon Health & Science University
FRANZ, AMBER MICHELE, 2016; Medical Doctorate, 2012, University of North Carolina at Chapel Hill
GROENEWALD, CORNELIUS B, 2011; Medical Doctorate, 2002, Stellenbosch University
HALL, MICHAEL L, 2004; Bachelor's, 2003, Montana State University
HANSEN, ELIZABETH ERICA, 2012; Medical Doctorate, 2012, Washington University in St Louis
HELLER, KATHERINE Q, 2015; Bachelor's, 2007, Duke University
HETMANIUK, MALI, 2008; Medical Doctorate, 2008, Stony Brook University
HOLLAND, ERICA L, 2017; Medical Doctorate, 2013, Dartmouth College
HSU, YU NING, 2018; Medical Doctorate, 2012, Royal College of Surgeons of Ireland
JELACIC, SRDJAN, 1997; Bachelor's, 1998, University of Washington
KAMATH, ARUNA M, 2015; Master's, 2006, Columbia University
KANMANTHREDY, SIRI, 2015; Bachelor's, 2006, University of Missouri-St Louis
KOMATSU, RYU, 2018; Doctorate, 2009, Tokyo Medical University
LEE, ALEX T, 2011; Bachelor's, 2002, Columbia University
LEE, SARAH ANGELINE, 2014; Bachelor's, 2004, Yale University
LI, LI, 2014; Bachelor's, 2006, Stanford University
LISTON, DAVID E, 2009; Medical Doctorate, 1999, Baylor University
MCPOLAND, PAULA D., 2019
MEHTER, NAJMA S, 2014; Bachelor's, 2004, Brown University
NATHWANI, RAJEN V., 2019; Medical Doctorate, 2004, Imperial College
OJO, BUKOLA, 2016; Medical Doctorate, 2012, Mount Sinai School of Medicine
PATAK, LANCE S., 2015; Bachelor's, 1999, California State University-Los Angeles
PATRAG, FIONA M, 2011
PENNINGTON, MATTHEW W, 2011; Bachelor's, 2002, University of Michigan-Ann Arbor
PEPERZAK, KATHARIN A, 2014; Bachelor's, 2003, Carnegie Mellon University
ROSS, FAITH E, 2014; Bachelor’s, 2004, University of Central Oklahoma
SHEU, RICHARD D, 2015; Bachelor’s, 2006, Duke University
SLADE, IAN, 2003; Bachelor’s, 2003, University of Washington
SONG, PINGPING, 2019; Master’s, 2006, Duke University
STECK, DOMINIK T., 2017
STURGEON, JOHN ANDREW, 2017
SUHRE, WENDY M, 2014; Bachelor’s, 1997, University of Arizona
SUNDER, RANI A, 2015
SUNSHINE, JACOB EUGENE, 2006; Master’s, 2011, University of Washington
THAM, SEE WAN, 2009; Medical Doctorate, 2001, University of Sydney
TOGASHI, KEI, 2010; Master’s, 2014, University of Washington
VAN CLEVE, WILLIAM C., 2006; Bachelor’s, 2000, Columbia University
VAN GILST, MARC R, 2008; Bachelor’s, 1993, Calvin College
WALTERS, ANDREW M, 2013; Medical Doctorate, 2013, University of Rochester
WU, JIANG, 2015; Master’s, 1997, Jilin University
YANG, JEN-TING, 2017; Medical Doctorate, 2009, National Yang Ming University

Professors

AKEY, JOSHUA M, 2004; Doctorate, 2002, The University of Texas Health Science Center at Houston
BERG, CELESTE A * 1990; Bachelor's, 1977, University of California-Santa Cruz
BRENT, ROGER * 2010; Doctorate, 1982, Harvard University
BREWER, BONITA J * 1982; Bachelor's, 1968, University of Missouri
BRUCE, JAMES * 2008; Bachelor's, 1987, Troy University
BYERS, BRECK E * 1982; Master's, 1963, Harvard University
DUNHAM, MAITREYA J * 2008; Bachelor's, 1999, Massachusetts Institute of Technology
EICHLER, EVAN E * 2004; Doctorate, 1995, Baylor University
FELSENSTEIN, JOSEPH * 1968; Doctorate, 1968, University of Chicago
FIELDS, STANLEY * 1995; Bachelor's, 1976, Middlebury College
GREEN, PHILIP * 1994; Bachelor's, 1972, Harvard University
HARTWELL, LELAND H * 1968; Bachelor's, 1961, California Institute of Technology
MACCOSS, MICHAEL * 2003; Bachelor's, 1996, University of Vermont
MANOIL, COLIN C. * 1986; Bachelor's, 1973, Princeton University
NICKERSON, DEBORAH A * 1992; Bachelor's, 1974, Adelphi University
NOBLE, WILLIAM S * 2002; Bachelor's, 1991, Stanford University
PALLANCK, LEO J. * 1997; Bachelor's, 1985, University of California-Davis
QUEITSCH, CHRISTINE H * 2007; Master's, 1993, Martin Luther Universität Halle Wittenberg
SHENDURE, JAY A * 2007; Doctorate, 2005, Harvard University
STAMATOYANNOPoulos, JOHN A * 2005; Bachelor's, 1990, Stanford University
SWANSON, WILLIE J * 2002; Bachelor's, 1992, University of California-San Diego
THOMAS, JAMES H * 1988; Bachelor's, 1979, Haverford College
WATERSTON, ROBERT H * 2002; Bachelor's, 1965, Princeton University

Associate Professors

BLOOM, JESSE D * 2011; Doctorate, 2007, California Institute of Technology
FOWLER, DOUGLAS M * 2007; Bachelor's, 2001, Northwestern University
NUNN, BROOK L. * 1998; Bachelor's, 1998, Colorado College
TRAPNELL, BRUCE C * 2014; Bachelor's, 2005, University of Maryland-University College
VILLEN, JUDIT * 2010; Bachelor's, 1998, Universitat de Barcelona

Assistant Professors

BELIVEAU, BRIAN JOSEPH * 2018; Doctorate, 2015, Harvard University; Genetics
BRADLEY, ROBERT K * 2011; Bachelor's, 2004, Princeton University
CHEONG, KA YAN, 2011; Doctorate, 2010, Johns Hopkins University
HARRIS, KELLEY * 2018; Doctorate, 2015, University of California-Berkeley; Applied Mathematics
JORDT, HANNAH LILLIAN, 2009; Doctorate, 2019, University of Washington; Biology
SCHWEPPPE, DEVIN KARL, 2016; Doctorate, 2013, Dartmouth College
WOLF YADLIN, ALEJANDRO M, 2010; Doctorate, 2007, Massachusetts Institute of Technology

Lecturers

LOVECLOUD, ATOM J LESIAK, 2013; Bachelor's, 2006, Colorado State University
MUNN, MAUREEN M., 1993; Doctorate, 1986, University of California-San Francisco

Health Metrics Sciences

Professors

GAKIDOU, EMMANUELA * 2007; Bachelor's, 1995, Harvard University
HAY, SIMON IAIN * 2015; Bachelor's, 1992, University of Bristol
LIM, STEPHEN SZE-PING * 2007; Bachelor's, 1998, Monash University
LOZANO, RAFAEL * 2008; Medical Doctorate, 1979, Universidad Autónoma de Yucatán (UADY)
MOKDAD, ALI H. * 2008; Bachelor's, 1984, American University of Beirut
NAGHAVI, MOHSEN * 2007; Medical Doctorate, 1979, University of Tehran
SMITH, DAVID L., 2015; Bachelor's, 1991, Brigham Young University
VOLLSET, STEIN EMIL * 2015; Medical Doctorate, 1981, University of Bergen
VOS, ERIC THEO * 2013; Doctorate, 2006, Erasmus University of Rotterdam
WEAVER, MARCIA R * 1984; Bachelor's, 1977, Hampshire College

Associate Professors

DIELEMAN, JOSEPH L * 2008; Bachelor's, 2002, Calvin College
FLAXMAN, ABRAHAM DAVID * 2007; Doctorate, 2006, Carnegie Mellon University
HERNANDEZ PRADO, BERNARDO, 2011; Doctorate, 1998, Harvard University
REINER, ROBERT C. * 2016; Master's, 2005, California State University-Northridge
WANG, HAIDONG * 2008; Bachelor's, 2000, Peking University

Assistant Professors

AFSHIN, ASHKAN, 2015; Doctorate, 2014, Harvard University
BURKART, KATRIN GABRIELE, 2018; Master's, 2007, Humboldt Universität zu Berlin; Geography
DWYER-LINDGREN, LAURA, 2009; Doctorate, 2017, Erasmus University of Rotterdam; Public Health
EL BCHERAQUI, CHARBEL, 2012; Bachelor's, 2002, Beirut University
FORCE, LISA, 2019; Medical Doctorate, 2012, Boston University
HAAKENSTAD, ANNIE M, 2020; Doctorate, 2019, Harvard University
KYU, HMWE HMWE, 2013; Master's, 2004, Chulalongkorn University
MICAH, ANGELA E, 2016; Doctorate, 2016, Tulane University of Louisiana; Health Administration
MOSSER, JONATHAN FINK, 2013; Master's, 2012, Johns Hopkins University
NSOESIE, ELAINE O, 2015; Bachelor's, 2007, University of Maryland-University College
PIGOTT, DAVID MICHAEL, 2016; Bachelor's, 2011, University of Oxford
STANAWAY, JEFFREY, 2008; Master's, 2008, University of Arizona

Immunology

Professors

ALPERS, CHARLES E. * 1986; Medical Doctorate, 1978, University of Rochester
ARGENYI, ZSOLT B, 2001; Medical Doctorate, 1978, Semmelweis University
BAIRD, GEOFFREY S * 2003; Bachelor’s, 1995, Stanford University
BOWEN-POPE, DANIEL, 1979; Doctorate, 1979, University of California-Berkeley
BYERS, PETER H * 1976; Medical Doctorate, 1969, Case Western Reserve University
CHATRIAN, GIAN E, 1959; Medical Doctorate, 1951, Università degli Studi di Napoli Federico II
CHHIENG, CHEUNG F, 2017; Medical Doctorate, 1987, Chinese University of Hong Kong
CHOU, DAVID, 1998; Bachelor’s, 1970, Carnegie Mellon University
COOMBS, ROBERT W * 1985; Doctorate, 1977, Dalhousie University; Medical Doctorate, 1981, Dalhousie University
COREY, LAWRENCE * 1977; Medical Doctorate, 1971, University of Michigan-Ann Arbor
COYLE, MARIE B, 1982; Doctorate, 1965, Kansas State University
CRISPE, IAN N. * 2009; Bachelor’s, 1975, University of London
CYDERS, MELISSA UPTON, 2002; Medical Doctorate, 1978, Northwestern University
DE ROSA, STEPHEN C. * 2004; Bachelor’s, 1983, Columbia University
DETTRE, JAMES C, 1982; Bachelor’s, 1955, University of Kansas
DEUTSCH, GAL H, 2008; Medical Doctorate, 1993, University of Chicago
DISTECHE, CHRISTINE M * 1980; Doctorate, 1976, Université de Liège
FANG, FERRIC C. * 2001; Medical Doctorate, 1983, Harvard University
FANG, MIN, 2008; Medical Doctorate, 1990, Shanghai Medical University
FINE, JAMES * 1977; Bachelor’s, 1968, University of Minnesota-Duluth
FINN, LAURA S, 1998; Bachelor’s, 1985, Pennsylvania State University-College of Medicine
FLIGNER, CORINNE LINA, 1982; Bachelor’s, 1973, University of Phoenix-New Mexico Campus
GARCIA, ROCHELLE, 1983; Medical Doctorate, 1989, University of Washington
HESS, JOHN R, 2012; Master’s, 1979, University of Hawaii
HOOFNAGLE, ANDREW N * 2004; Doctorate, 2002, University of Colorado at Boulder
HORWITZ, MARSHALL S * 1983; Bachelor’s, 1983, University of California-San Diego
JEROME, KEITH R * 1993; Doctorate, 1992, Duke University; Medical Doctorate, 1993, Duke University
KAEBERLEIN, MATT R * 2003; Doctorate, 2002, Massachusetts Institute of Technology
KAPUR, RAJ P. * 1988; Bachelor’s, 1981, University of California-Los Angeles
KEAN, LESLIE S * 2013; Bachelor’s, 1987, Case Western Reserve University
KENNY, MARGARET, 1982; Doctorate, 1968, University of Illinois at Urbana-Champaign
KIVIAT, NANCY C, 1979; Bachelor’s, 1967, University of Washington
LOEB, LAWRENCE A * 1978; Bachelor’s, 1957, New York University
MARTIN, GEORGE * 1982; Bachelor’s, 1949, University of Washington
MONNAT, RAYMOND J * 1982; Medical Doctorate, 1976, University of Chicago
MORROW, RHODA ASHLEY * 1982; Doctorate, 1977, University of California-Davis
MURRY, CHARLES E. * 1989; Doctorate, 1989, Duke University
NARAYANAN, A SAMPATH * 1971; Bachelor’s, 1961, The Tamil Nadu Dr. M.G.R. Medical University
NARESH, KIKKERI NARASIMHAMURTHY, 2020
NESTER, THERESA * 2001; Bachelor’s, 1988, Bowdoin College
NICOSIA, ROBERTO F, 1999; Medical Doctorate, 1976, American University of Rome
NORWOOD, THOMAS H * 1973; Bachelor’s, 1960, Brown University
POLYAK, STEPHEN J. * 1993; Doctorate, 1993, McMaster University
PORTER, PEGGY L. * 1987; Bachelor’s, 1974, Humboldt State University
PROMISLOW, DANIEL E * 2013; Bachelor’s, 1986, University of Chicago
QIN, XUAN, 2005; Medical Doctorate, 1982, Nanjing University
RABINOVITCH, PETER S. * 1980; Bachelor’s, 1972, University of Washington
RAGINEY, PETRIE M., 2000; Doctorate, 1973, University of California-Berkeley
SCHMIDT, RODNEY, 1982; Bachelor’s, 1977, Bethel College
SCHWARTZ, STEPHEN MARK, 1974; Medical Doctorate, 1967, Boston University
SMITH, KELLY D. * 1996; Doctorate, 1996, University of Iowa
STEPHENS, KAREN G. * 1989; Bachelor’s, 1972, Indiana State University
SUMI, SHUZO MARK, 1966; Medical Doctorate, 1956, University of Toronto
SWANSON, PAUL E, 2001; Bachelor’s, 1979, Dartmouth College
TAIT, JONATHAN F * 1983; Bachelor’s, 1977, Harvard University
TRUE, LAWRENCE DASHIELL * 1990; Bachelor’s, 1967, Harvard University
WENER, MARK H * 1980; Medical Doctorate, 1974, Washington University in St Louis
WIGHT, THOMAS * 1982; Bachelor’s, 1966, University of Maine
WOOD, BRENT L., 1990; Doctorate, 1988, Loma Linda University
XU, HAODOONG, 2017; Medical Doctorate, 1987, Soochow University
YEH, MENG-CHE, 2002; Medical Doctorate, 1989, National Taiwan University
ZHANG, JING, 2002; Doctorate, 1995, Duke University

Associate Professors

BANKSON, DANIEL DUKE, 1993; Master’s, 1981, Massachusetts Institute of Technology
BIELAS, JASON H * 2003; Bachelor’s, 1998, York University
CHEN, ELEANOR Y * 1995; Doctorate, 2006, University of Minnesota-Duluth
CHEN, XUEYAN, 2011; Master’s, 1998, Peking Union Medical College
CHERIAN, SINDHU, 2005; Bachelor’s, 1996, Brown University
DAVIS, JENNIFER M * 2015; Master’s, 2001, San Diego State University
DINTZIS, SUZANNE M, 2008; Bachelor’s, 1985, Princeton University
EDLEFSEN, KERSTIN, 1998; Bachelor’s, 1997, The Evergreen State College
FROMM, JONATHAN R, 1998; Bachelor’s, 1990, Grinnell College
GUI, XIANYONG, 2018; Medical Doctorate, 1994, Peking Union Medical College
HERR, ALAN J * 1992; Bachelor’s, 1992, Pacific Lutheran University
HOCH, BENJAMIN, 2008; Medical Doctorate, 1999, Thomas Jefferson University
HOFFMAN, NOAH G * 2005; Bachelor’s, 1995, University of North Carolina
HUANG, ERIC, 2018; Medical Doctorate, 2005, Albany Medical College
KEENE, CHRISTOPHER D * 2005; Doctorate, 2003, University of Minnesota-Duluth
LI, KE, 2019
LIBBY, STEPHEN JAMES * 2003; Master’s, 1983, Iowa State University
LIU, YAJUAN, 1995; Doctorate, 1995, New York University
LOCKWOOD, CHRISTINA M, 2014; Bachelor’s, 2001, University of North Carolina at Chapel Hill
LOEB, KEITH, 1983; Doctorate, 1994, Medical College of Wisconsin
MAHONEY, WILLIAM * 2004; Bachelor’s, 1999, Connecticut College
MORISHIMA, CHIHIRO * 1991; Bachelor’s, 1984, Washington State University
MURPHY, SEAN C, 2008; Bachelor’s, 1999, Iowa State University
MYERSON, DAVID, 1985; Bachelor’s, 1970, Brown University
NAJAFIAN, BEHZAD, 2010; Medical Doctorate, 1996, University of Tehran
NEWELL, EVAN * 2020; Doctorate, 2006, University of Toronto; Physiology
PAGANO, MONICA BEATRIZ, 2009; Medical Doctorate, 1999, Universidad de Buenos Aires
PRITCHARD, COLIN C., 1996; Bachelor’s, 1997, University of Washington
REA, SHANE LESLIE, 2017; Doctorate, 1999, University of Queensland
RENDI, MARA HESTER * 2009; Doctorate, 2004, Dartmouth College
RISQUES, ROSA ANA * 2003; Bachelor’s, 1996, Universitat Autònoma de Barcelona
SABATH, DANIEL E. * 1989; Doctorate, 1989, University of Pennsylvania
SALIPANTE, STEPHEN * 2003; Doctorate, 2009, University of Washington
SCHMECHEL, STEPHEN C., 1998; Bachelor’s, 1990, Carroll College
SCHWARZE, ULRIKE, 1993; Medical Doctorate, 1992, Technische Universität Berlin
SHIRTS, BRIAN H * 2012; Doctorate, 2006, University of Pittsburgh-Bradford
SOMA, LORINDA A, 2012; Bachelor’s, 1994, Hamline University
TRETIAKOVA, MARIA S, 2012; Medical Doctorate, 1994, Saint Petersburg State Medical Academy
TSUCHIYA, KAREN D. * 1990; Bachelor’s, 1985, University of Michigan-Ann Arbor
WU, DAVID * 2008; Medical Doctorate, 2003, Harvard University
YEUNG, CECILIA C S, 2011; Bachelor’s, 1999, University of California-Davis
ZAFAR, NADIA, 2018
ZHOU, JIA * 2003; Doctorate, 1994, University of Science and Technology of China
ZHOU, TUOFU, 1997; Medical Doctorate, 1984, Jiangxi Traditional Chinese Medicine University

Assistant Professors

AKILESH, SHREERAM * 2012; Bachelor’s, 2000, Dartmouth College
BERONJA, SLOBODAN * 2018; Doctorate, 2006, University of Toronto
BOURASSA, LORI A., 2014; Bachelor’s, 2001, Boston College
BRYAN, ANDREW BEVAN BRODY, 2013; Doctorate, 2013, University of Michigan-Ann Arbor
BUCHAN, JILLIAN G, 2020; Master’s, 2010, University College Dublin National University of Ireland
CAMPBELL, JEAN S * 1990; Bachelor’s, 1981, The College of Wooster
CIMINO, PATRICK J., 2001; Bachelor’s, 2004, University of Washington
DARVAS, MARTIN C * 2008; Master’s, 2003, Rheinische Friedrich Wilhelms Universität Bonn
ECKEL, ASHLEY M, 2016
FINK, SUSAN L * 1999; Bachelor’s, 1999, University of Hawaii
GLYNN, EMILY H., 2004; Medical Doctorate, 2011, University of Washington
GONZÁLEZ-CUYAR, LUIS F., 2009; Bachelor’s, 2001, American University of Puerto Rico
GREENINGER, ALEX * 2015
HAFFNER, MICHAEL, 2019
JALIKIS, FLORENCIA G., 2008; Medical Doctorate, 2001, Universidad del Salvador Buenos Aires
KENNEDY, SCOTT * 2008; Bachelor’s, 2001, University of North Carolina at Chapel Hill
KILGORE, MARK R., 2002; Medical Doctorate, 2010, Jefferson College
KOCH, LISA KRISTINE, 2011; Bachelor’s, 2003, Brown University
KONNICK, ERIC Q, 2010; Bachelor’s, 1998, University of Utah
KRUMM, NIKLAS, 2008
LATIMER, CAITLIN SHANNON, 2013; Doctorate, 2011, University of Kentucky
LIAO, HSUAN-CHIEH, 2018; Doctorate, 2016, National Yang Ming University
LIEBERMAN, JOSHUA A, 2014
LOUZON, MAX JOSEPH, 2011
MARSHALL, DESIREE A, 2010; Bachelor’s, 2005, Texas Tech University
MARTIG, DANIEL, 2020; Bachelor’s, 2010, University of Minnesota-Twin Cities
MATHIAS, PATRICK C, 2012; Bachelor’s, 2004, Duke University
MENDENHALL, ALEXANDER R * 2016; Bachelor’s, 2000, The University of Texas
METCALF, RYAN ADAMS, 2015; Medical Doctorate, 2010, University of California-Davis
NOLAN MUNN, AMBER, 2020; Medical Doctorate, 2012, University of Chicago
PAULSON, VERA, 2018; Medical Doctorate, 2012, University of Texas Southwestern Medical Center at Dallas
RICCIOTTI, ROBERT, 2014; Bachelor’s, 2004, University of Arizona
ROGERS, DAVID, 2020
STALEY, ELIZABETH, 2019
TSANG, HAMILTON, 2017; Medical Doctorate, 2012, University of Southern California
YOUNG, JESSICA E * 2003; Master’s, 2002, Sonoma State University
ZHOU, YI, 2013; Doctorate, 1995, Louisiana State University

Lecturer
TSUCHIDA, AKIKO, 2013; Bachelor’s, 2001, Science University of Tokyo

MEDEX Northwest

Associate Professors

HAHN, PATRICIA L, 2013; Bachelor’s, 1990, Lewis-Clark State College
NAIDU, AMEE S., 2007; Bachelor’s, 1996, Houston Baptist University
SHERMAN, PATRICK A, 2020
STEWART, BETTY L., 1985; Bachelor’s, 1996, Seattle University
SYMINGTON, SUSAN L, 2015; Bachelor’s, 1990, Spring Arbor University
VADER, KIRA S, 2005; Master’s, 2002, Duke University
WICK, KEREN * 1990; Bachelor’s, 1990, San Francisco State University

Assistant Professors

BATTs, AVERY, 2018; Doctorate, 2013, Northeastern University; Education
BERNARD, KARI S, 2014; Bachelor’s, 1998, Eastern New Mexico University-Main Campus
BESTER, VANESSA S, 2012; Master’s, 2003, University of Florida
CASEY, SHANNON M, 2020; Master’s, 2017, University of St Francis; Physician Assistant
COPPS-WILSON, KATIE M, 2018
ERICKSON, JENNIFER M, 2016; Bachelor’s, 2009, University of Washington
GREENLEE, QUANTE’ LAMONT, 2019; Master’s, 2009, Duke University; Physician Assistant
HAWKINS, MARC ANTONIO, 2013; Master’s, 2000, University of Nebraska at Omaha
IMLACH, HOLLY A, 2017; Bachelor’s, 1995, Massachusetts Institute of Technology
JOY, BONNIE, 2020; Master’s, 2014, Samuel Merritt University; Physician Assistant
KEMPE, CHRISTINE, 2013; Bachelor’s, 1999, Brigham Young University
LAUFENBERG, MAGGIE R, 2019
ORCHARD, THEO RAY, 2018
RIORDAN, BRENDAN M., 2016
ROBERTSON, DALE, 1994; Bachelor’s, 2007, University of Washington
SMITH, MICHAEL B, 2014; Medical Doctorate, 2012, A T Still University of Health Sciences
STURGES, DAYTHEON D, 2019
WACHTEL, DIANNA L, 2007; Master’s, 2008, A T Still University of Health Sciences

Lecturers

ALVITRE, JOHN JEFFREY, 2014; Bachelor’s, 1997, California State University-Chico
BORDERS, ROSA M., 2001; Master’s, 1987, American University of Health Sciences
BUTLER, JESSICA C, 2018; Master’s, 2014, University of Washington; Physician Assistant
BYRNE, THOMAS J, 2020; Master’s, 1983, Brigham Young University; Athletic Training
CHA, HANA, 2017; Bachelor’s, 2002, Kansas State University
COOPER, SCOTT A, 2019
FARTHING, BRYAN CHRISTOPHER, 2018
GARZA, EDUARDO JR, 2004
GRIMM, PATRICK J, 2016; Master’s, 1998, University of Nebraska Medical Center
HACKENBRUCH, GREGORY S, 2017; Bachelor’s, 2009, University of Alaska Anchorage
HAVERKAMP, KENNETH, 1996; Bachelor’s, 1990, Whitman College
HOOK, TARA R, 2018; Master’s, Saint Louis University-Main Campus
HUYNH, CONSTANCE D, 1999; Bachelor’s, 2003, University of Washington
JAIN, ANJU, 2014; Master’s, 1997, Western Washington University
KELLY, KAIDEN G, 2020
MAHER, JONATHAN C., 2000; Bachelor’s, 1997, University of Massachusetts
MCCROSKEY, JEFFREY J, 2017; Master’s, 2007, University of Nebraska Medical Center; Physician Assistant
OLSON, TIMOTHY C, 2020; Master’s, 2015, Rosalind Franklin University of Medicine and Science; Physician Assistant
PATTON, SARAH B. W., 2019
RAGOSTA, RACHEL E, 2017
RODGERS, CARI R, 2020; Diploma, 2010, University of Washington; Physician Assistant
SERPINAS, SARAH L, 2014; Bachelor’s, 2010, University of Washington
SIEGEL, MALINDA S, 2007; Bachelor’s, 1974, Colby College
SMITH, COLLEEN E, 2016; Bachelor’s, 2003, Eastern Washington University
SMITH, DONALD J, 2014
THETFORD, LOIS C., 1994; Bachelor’s, 1967, Cornell University
WHIPPLE, KATHERINE J, 2016; Bachelor’s, 1992, Eastern Washington University
WIESE, TRACEY L, 2020
Medicine

Professors

ABKOWITZ, JANIS L * 1980; Bachelor's, 1972, Harvard University
ABRASS, ITAMAR B., 1983; Bachelor's, 1963, University of California-San Francisco
AITKEN, MOIRA L., 1982; Bachelor's, 1975, University of Edinburgh
ALTEMEIER, WILLIAM A. * 1992; Bachelor's, 1986, Vanderbilt University
AMORY, JOHN K., 1997; Bachelor's, 1989, Harvard University
ANAWALT, BRADLEY D., 1989; Bachelor's, 1984, Santa Clara University
APPELBAUM, FREDERICK R, 1978; Bachelor's, 1968, Dartmouth College
AU, DAVID H., 1996; Bachelor's, 1989, University of Chicago
BACK, ANTHONY L., 1984; Medical Doctorate, 1984, Harvard University
BANKS, WILLIAM A., 2010; Medical Doctorate, 1979, University of Missouri
BARNHART, SCOTT * 1979; Medical Doctorate, 1979, George Washington University
BECKER, PAMELA S, 2003; Bachelor's, 1979, Harvard University
BENDITT, JOSHUA O., 1994; Bachelor's, 1978, University of Washington
BLAGG, CHRISTOPHER R, 1982; Medical Doctorate, 1954, University of Leeds
BLAU, CARL A. * 1989; Medical Doctorate, 1986, Ohio State University Agricultural Technical Institute
BOECKH, MICHAEL J. J., 1994; Medical Doctorate, 1985, Freie Universität Berlin
BOMSZTYK, KAROL * 1983; Bachelor's, 1973, Brookline College
BORNFELDT, KARIN E * 1991; Bachelor's, 1985, Linköping University
BOYKO, EDWARD J. * 1982; Medical Doctorate, 1979, University of Pittsburgh-Bradford
BRANCH, KELLEY R., 2001; Medical Doctorate, 1998, Thomas Jefferson University
BREMNER, WILLIAM J, 1982; Bachelor's, 1964, Harvard University
BRENTNALL, TERESA A., 1984; Medical Doctorate, 1987, University of Washington
BROWNING, BRIAN LEE, 1992; Bachelor's, 1991, University of Alaska Southeast
BUCKNER, FREDERICK S., 1992; Bachelor's, 1983, Princeton University
BUCKNER, JANE HOYT * 1992; Bachelor's, 1983, Carleton College
CALDWELL, JAMES H, 1983; Bachelor's, 1966, DePauw University
CARVALHO, PAULA G., 1984; Bachelor's, 1980, University of Washington
CHAIT, ALAN, 1977; Medical Doctorate, 1967, University of Cape Town
CHEEVER, MARTIN A, 1982; Medical Doctorate, 1970, University of Michigan-Ann Arbor
CHIOREAN, ELENA G, 2012; Medical Doctorate, 1993, University of Medicine and Pharmacy Iuliu Hatieganu Cluj Napoca
CHOW, LAURA QUAN MAN, 2010; Bachelor's, 1994, University of British Columbia
CLURMAN, BRUCE E. * 1991; Doctorate, 1988, Cornell University
COBB, LEONARD A, 1982; Bachelor's, 1949, University of Minnesota-Duluth
COLLIER, ANN C, 1982; Medical Doctorate, 1978, Dartmouth College
COLVEN, ROY M., 1987; Bachelor's, 1983, University of Washington
CRANE, HEIDI, 1991; Bachelor's, 1992, University of Washington
CRANE, PAUL K * 1997; Medical Doctorate, 1997, University of Washington
CROITHERS, KRISTINA ANNE, 2009; Bachelor's, 1992, Yale University
CUMMINGS, DAVID E., 1987; Bachelor's, 1982, Dartmouth College
CURTIS, JARED R., 1988; Bachelor's, 1984, Hampshire College
DALE, DAVID C, 1974; Bachelor's, 1962, Carson-Newman College
DAVIDSON, NANCY E, 2016; Medical Doctorate, 1979, Harvard University
DE BOER, IAN H. * 2003; Medical Doctorate, 1999, Oregon Health & Science University
DEAN, LARRY S., 1982; Bachelor’s, 1975, University of Alabama
DEEG, H. JOACHIM, 1985; Medical Doctorate, 1972, Rheinische Friedrich Wilhelms Universität Bonn
DEL ZOPPO, GREGORY J., 2007; Master’s, 1972, California Institute of Technology
DELLIT, TIMOTHY H., 2001; Medical Doctorate, 1997, Cornell University
DHANIREDDY, SHIREESHA, 1999; Bachelor’s, 1995, Georgetown University
DICHEK, DAVID A. * 2001; Bachelor’s, 1976, Princeton University
DOMINITZ, JASON A, 1998; Master’s, 1996, Duke University
DONEY, KRISTINE, 1982; Bachelor’s, 1968, University of Michigan-Ann Arbor
DONG, JING-FEI, 2011; Medical Doctorate, 1984, Lanzhou University
DUCHIN, JEFFREY S., 1995; Medical Doctorate, 1985, Rutgers University-Camden
DUGDALE, DAVID C., 1982; Master’s, 1978, Cornell University
EATON, KEITH D., 1998; Bachelor’s, 1989, University of California-Berkeley
ELKON, KEITH B * 2001; Medical Doctorate, 1974, University of the Witwatersrand
ESTEY, ELIHU, 2008; Medical Doctorate, 1972, Johns Hopkins University
FIHN, STEPHAN, 1982; Bachelor’s, 1973, Occidental College
FISHBEIN, DANIEL P, 1981; Bachelor’s, 1976, Wesleyan University
FLECKMAN, PHILIP H., 1982; Bachelor’s, 1968, The University of Texas
FLOWERS, MARY E., 1994; Medical Doctorate, 1977, Universidade Federal do Rio de Janeiro (UFRJ)
FREDRICKS, DAVID N. * 2001; Medical Doctorate, 1990, Case Western Reserve University
FREEMAN, ROSARIO, 2001; Medical Doctorate, 1995, Loyola University Chicago
FUJIMOTO, WILFRED Y, 1969; Bachelor’s, 1962, Johns Hopkins University
FUJISE, KENICHI, 2020; Medical Doctorate, 1987, Kyoto University
FURLONG, CLEMENT E. * 1977; Bachelor’s, 1963, San Jose State University
GALLAGHER, THOMAS H * 2002; Bachelor’s, 1986, Carleton College
GARCIA, DAVID A., 2012; Bachelor’s, 1989, Duke University
GARDNER, GREGORY, 1989; Medical Doctorate, 1984, Baylor University
GARTLER, STANLEY M, 1957; Doctorate, 1952, University of California-Berkeley
GASTER, BARAK, 1993; Medical Doctorate, 1993, University of California-San Francisco
GEBALLE, ADAM PHILIP * 1988; Medical Doctorate, 1978, Duke University
GERNSHEIMER, TERRY B., 1984; Bachelor’s, 1975, New York University
GHARIB, SINA A., 1996; Medical Doctorate, 1996, Harvard University
GILLILAND, DWIGHT GARY, 2019
GLENNY, ROBB * 1987; Bachelor’s, 1979, Duke University
GOLDEN, MATTHEW R * 1994; Bachelor’s, 1985, Grinnell College
GOODNER, CHARLES J, 1982; Bachelor’s, 1951, Reed College
GOPAL, AJAY, 1997; Bachelor’s, 1989, Duke University
GOSS, CHRISTOPHER HOOPER, 1997; Medical Doctorate, 1992, University of Colorado Denver
GOSS, J. RICHARD, 1993; Medical Doctorate, 1987, Oregon Health & Science University
GOTTLIEB, GEOFFREY S., 1998; Medical Doctorate, 1994, Chicago State University
GRADY, WILLIAM M., 1990; Bachelor’s, 1987, University of Michigan-Ann Arbor
GRALOW, JULIE R., 1992; Bachelor’s, 1981, Stanford University
GREENBERG, PHILIP D * 1978; Medical Doctorate, 1971, New York University
HALL, YOSHIO N., 2007; Medical Doctorate, 1999, Baylor University
HALLSTRAND, TEAL, 1990; Bachelor’s, 1989, Humboldt State University
HANDSFIELD, HUNTER, 1983; Medical Doctorate, 1968, Columbia University
HARRINGTON, ROBERT D, 1989; Bachelor’s, 1978, Tufts University
HAWN, THOMAS R. * 1995; Doctorate, 1995, Johns Hopkins University
HEINECKE, JAY W, 1982; Bachelor’s, 1977, Antioch College
HIGANO, CELESTIA S., 1982; Bachelor’s, 1975, Clark University
HILL, GEOFFREY * 2018; Doctorate, 2001, University of Auckland; Medicine
HIMMELFARB, JONATHAN * 2008; Bachelor’s, 1977, Brandeis University
HINGORANI, SUNIL, 2006; Bachelor’s, 1985, Yale University
HIRSCH, IRL B., 1990; Bachelor’s, 1980, University of Missouri
HISAMA, FUKI MARIE, 2009; Medical Doctorate, 1988, University of Chicago
HOCKENBERY, DAVID M. * 1994; Bachelor’s, 1978, University of Rochester
HOLMBERG, LEONA A., 1987; Bachelor’s, 1973, Briarcliffe College
HIMMELFARB, JONATHAN * 2008; Bachelor’s, 1977, Brandeis University
HINGORANI, SUNIL, 2006; Bachelor’s, 1985, Yale University
HIRSCH, IRL B., 1990; Bachelor’s, 1980, University of Missouri
HISAMA, FUKI MARIE, 2009; Medical Doctorate, 1988, University of Chicago
HOCKENBERY, DAVID M. * 1994; Bachelor’s, 1978, University of Rochester
HOLMBERG, LEONA A., 1987; Bachelor’s, 1973, Briarcliffe College
HIGHTOWER, ASHLEY M, 2012; Medical Doctorate, 1996, Georgetown University
INADOMI, JOHN M, 2010; Bachelor’s, 1984, Massachusetts Institute of Technology
IOANNOU, GEORGE, 2000; Bachelor’s, 1993, University of Oxford
JACKSON, J. CAREY, 1990; Medical Doctorate, 1986, Michigan State University
JARVIK, GAIL P. * 1991; Bachelor’s, 1980, University of Iowa
JEFFERSON, JONATHAN ASHLEY, 1997; Medical Doctorate, 1989, Queens University
JUNG, BARBARA HEDWIG, 2019
KAHN, STEVEN EMANUEL, 1986; Medical Doctorate, 1978, University of Cape Town
KAPUR, VISHESH, 1993; Bachelor’s, 1983, Harvard University
KEARNEY, DAVID J, 1996; Bachelor’s, 1988, University of Missouri
KESTENBAUM, BRYAN * 1999; Bachelor’s, 1991, University of Massachusetts
KIM, FRANCIS, 1992; Bachelor’s, 1985, University of California-Berkeley
KING, MARY-CLAIRE * 1995; Bachelor’s, 1966, Carleton College
KIRKPATRICK, JAMES N, 2015; Medical Doctorate, 1998, Loma Linda University
KITAHATA, MARI M., 1991; Medical Doctorate, 1987, University of Pennsylvania
KOELLE, DAVID * 1988; Bachelor’s, 1980, University of Washington
KONKLE, BARBARA A., 2009; Bachelor’s, 1975, Northwestern University
KRAEMER, BRIAN * 2000; Doctorate, 2000, University of Wisconsin-Madison
KRIEGER, PATRICIA A, 2010; Master’s, 2006, Harvard University
KRUSE-JARRES, REBECCA, 2014; Master’s, 1999, Tulane University of Louisiana
KUDENCHUK, PETER J, 1982; Bachelor’s, 1975, University of Washington
LEE, STEPHANIE J., 2006; Doctorate, 1996, Harvard University
LEE, SUM PING, 1985; Doctorate, 1978, University of Auckland
LEVY, WAYNE C., 1985; Bachelor’s, 1981, Columbia Union College
LIEBER, ANDRE * 1994; Doctorate, 1992, Humboldt Universität zu Berlin
LILES, WAYNE CONRAD * 1982; Doctorate, 1987, University of Washington
LIMAYE, ABHIJIT P., 1983; Bachelor’s, 1986, University of Washington
LINDEN, HANNAH M., 1993; Medical Doctorate, 1989, University of Massachusetts
LINNENBERGER, MICHAEL L., 1986; Bachelor’s, 1978, University of Kansas
LOGERFO SR., JAMES P * 1974; Medical Doctorate, 1968, University of Rochester
LOPEZ, JOSE A, 1982; Bachelor’s, 1977, New Mexico Institute of Mining and Technology
LUKEHART, SHEILA A * 1980; Doctorate, 1978, University of California-Los Angeles
LUKS, ANDREW M., 2000; Bachelor’s, 1990, Duke University
LYMAN, GARY * 2013; Master’s, 1982, Harvard University
MACLELLAN, W. ROBB * 2011; Bachelor’s, 1984, University of Guelph
MALONEY, DAVID G., 1995; Medical Doctorate, 1985, Stanford University
MANNIK, MART, 1966; Medical Doctorate, 1959, Case Western Reserve University
MARTIN, PAUL J, 1978; Bachelor’s, 1970, Marquette University
MARTINS, RENATO, 2004; Master’s, 1998, Harvard University
MATUTE-BELLO, GUSTAVO, 1994; Medical Doctorate, 1988, Universidad Central de Venezuela
MCCLELLAND, RAYMOND SCOTT * 1988; Bachelor's, 1989, University of Washington
MCCORMICK, WAYNE C., 1987; Bachelor's, 1974, University of Missouri
MCELRATH, MARGARET JULIANA * 1990; Bachelor's, 1973, Furman University
MEHROTRA, RAJNISH, 2012; Medical Doctorate, 1989, All India Institute of Medical Sciences
MERRILL, JOSEPH O., 1996; Master's, 1998, University of Washington
MIELCAREK, BESSIE YOUNG, 1983; Bachelor's, 1983, Pacific Lutheran University
MIELCAREK, MARCO B, 1998; Medical Doctorate, 1986, Freie Universität Berlin
MILLER, SAMUEL L * 1995; Medical Doctorate, 1979, Baylor University
MONTGOMERY, ROBERT B., 1990; Medical Doctorate, 1987, Duke University
MORALES, LEO * 2010; Master's, 1997, Pardee Rand Graduate School of Policy Studies
MORTON, GREGORY J. * 2000; Master's, 1997, Deakin University
MUSTELIN, TOMAS M, 2018
NARITA, MASAHIRO, 2003; Medical Doctorate, 1988, Keio University
NELSON, JUDITH LEE * 1981; Bachelor's, 1971, Stanford University
NELSON, KARIN * 2001; Bachelor's, 1989, Brown University
NELSON, PETER S. * 1993; Bachelor's, 1982, University of Kansas
NGHIEM, PAUL * 2006; Bachelor's, 1986, Harvard University
NICHOL, GRAHAM, 2004; Master's, 1995, Harvard University
O'BRIEN, KEVIN, 1984; Bachelor's, 1980, University of Idaho
O'HARE, ANN M, 2007; Master's, 1987, University of Minnesota-Duluth
OLSON, MAYNARD V., 1992; Bachelor's, 1965, California Institute of Technology
OTT RALPH, SUSAN MARIE, 1980; Bachelor's, 1970, Stanford University
OTTO, CATHERINE M., 1982; Bachelor's, 1975, Reed College
PAAUW, DOUGLAS, 1985; Bachelor's, 1980, Macalester College
PAGE, STEPHANIE T, 1991; Bachelor's, 1989, Stanford University
PATTON, KRISTEN K, 2004; Medical Doctorate, 1995, Oregon Health & Science University
PAULOVICH, AMANDA G., 1989; Bachelor's, 1988, Carnegie Mellon University
PAYNE, THOMAS H., 1991; Bachelor's, 1976, Stanford University
PEARLMAN, ROBERT A * 1981; Medical Doctorate, 1975, Boston University
PETERSDORF, EFFIE WANG, 1982; Bachelor's, 1978, Harvard University
PLYMATE, STEPHEN R, 1983; Master's, 1968, University of Nebraska-Lincoln; Medical Doctorate, 1968, American University
POOLE, JEANNE E, 1981; Medical Doctorate, 1980, University of Washington
POTTINGER, PAUL S., 2002; Bachelor's, 1990, Harvard University
PRESS, OLIVER W., 1982; Bachelor's, 1973, Stanford University
PROBSTFIELD, JEFFREY L, 1993; Bachelor's, 1961, Pacific Lutheran University
PSATY, BRUCE M. * 1984; Master's, 1975, Indiana University-Bloomington
RADICH, JERALD P, 1983; Master's, 1979, Harvard University
RAGHU, GANESH, 1981; Medical Doctorate, 1974, University of Mysore
RAMSEY, PAUL G, 1980; Bachelor's, 1971, Harvard University
RAMSEY, SCOTT D. * 1990; Bachelor's, 1983, University of Iowa
RASKIND, WENDY H * 1982; Bachelor's, 1964, Brown University
RAUGI, GREGORY J, 1980; Bachelor's, 1969, Brown University
REA, THOMAS D., 1992; Medical Doctorate, 1992, University of Michigan-Ann Arbor
REID, BRIAN J * 1983; Bachelor's, 1969, University of Washington
RIDDELL, STANLEY R. * 1985; Medical Doctorate, 1979, University of Manitoba
RODRIGUEZ, RUDOLPH, 2007; Bachelor's, 1985, Stanford University
SANDMAIER, BREND A M., 1985; Medical Doctorate, 1983, Universität Freiburg
SCHUFFLER, MICHAEL D, 1973; Medical Doctorate, 1966, University of Illinois at Urbana-Champaign
SCHWARTZ, MICHAEL W * 1983; Medical Doctorate, 1983, Rush University
SCOTT, BART L., 1999; Bachelor’s, 1991, University of Alabama
SCOTT, JOHN D., 2002; Medical Doctorate, 1998, Georgetown University
SHANKLAND, STUART J., 1994; Medical Doctorate, 1983, University of Cape Town
SHEEHAN, FLORENCE * 1980; Bachelor’s, 1971, Massachusetts Institute of Technology
SHEFFIELD-CASSAN, JOHN V.L., 1989; Medical Doctorate, 1989, Harvard University
SHUSTOV, ANDREI R, 2003; Medical Doctorate, 1993, Crimea State Medical University
SIMKIN, PETER A, 1982; Bachelor’s, 1957, Swarthmore College
SKERRETT, SHAWN J., 1983; Medical Doctorate, 1978, New York University
SPACH, DAVID H, 1986; Medical Doctorate, 1986, Duke University
STAIGER, THOMAS O., 1985; Bachelor’s, 1979, University of Michigan-Ann Arbor
STAMATOYANNOPoulos, G, 1964; Medical Doctorate, 1958, American University of Athens
STAMATOYANNopoulos, Thalia, 1974; Medical Doctorate, 1961, American University of Athens
STARKEBAUM, GORDON A, 1970; Medical Doctorate, 1970, Columbia University
STEINBERG, KENNETH P, 1989; Bachelor’s, 1981, Colgate University
STEKLER, JOANNE D., 1997; Medical Doctorate, 1997, Duke University
STEVENS, DENNIS L, 1982; Doctorate, 1967, Montana State University
STORB, RAiNER F, 1976; Medical Doctorate, 1960, Universität Freiburg
STOUT, KAREN K., 2000; Bachelor’s, 1991, University of Arizona
STRATE, LISA, 2006; Master’s, 2001, Harvard University
SWENSON, ERIK R., 1983; Bachelor’s, 1974, Princeton University
TENO, JOAN M, 2015; Medical Doctorate, 1982, American College
THOMPSON, JOHN A., 1979; Bachelor’s, 1973, Davidson College
TONELLI, MARK R., 1993; Bachelor’s, 1984, University of Colorado
TURCK, MARVIN, 1982; Bachelor’s, 1957, University of Illinois at Urbana-Champaign
VAN VOORHIS, WESLEY C * 1986; Medical Doctorate, 1984, Cornell University
WALD, ANNA * 1989; Medical Doctorate, 1985, Mount Sinai School of Medicine
WALLACE, JAMES F., 1982; Bachelor’s, 1957, Washington State University
WARREN, EDUS HOUSTON * 1993; Bachelor’s, 1981, Harvard University
WATNICK, SUZANNE, 2017; Bachelor’s, 1990, Harvard University
WEIGLE, DAVID S, 1982; Medical Doctorate, 1978, Harvard University
WEST, TIMOTHY E, 2003; Medical Doctorate, 1999, Eastern Virginia Medical School
WIJSMAN, ELLEN M * 1987; Bachelor’s, 1975, Michigan State University
WIPF, JOYCE E., 1984; Bachelor’s, 1980, Minnesota State University-Moorhead
WURFEL, MARK M, 1997; Medical Doctorate, 1997, Cornell University
YU, EVAN Y, 1990; Bachelor’s, 1994, University of Washington
ZAGER, RICHARD A., 1985; Bachelor’s, 1965, Northwestern University
ZIMRING, JAMES * 2013; Bachelor’s, 1992, Emory University

Associate Professors

ADAMSON, ROSEMARY, 2012; Medical Doctorate, 2004, King’s College London
AKOUM, NAZEM, 2015; Bachelor’s, 1997, American University of Beirut
AYARS, ANDREW G, 2009; Medical Doctorate, 2006, University of Missouri-St Louis
BAERNSTEIN, AMY, 1993; Bachelor’s, 1989, Cornell University
BAIK, CHRISTINA, 2009; Master’s, 2006, Harvard University
BAMBHA, KIRAN M, 2017; Bachelor’s, 1991, College of William and Mary
BANSAL, NISHA, 2013; Bachelor’s, 1999, Brown University
BAR, MERAV, 1999; Bachelor’s, 1994, Hebrew University of Jerusalem
BEDALOV, ANTONIO * 1996; Medical Doctorate, 1989, University of Zagreb
BERGER, DOUGLAS BRADLEY, 2006; Medical Doctorate, 2006, Columbia University
BEST, JENNIFER ANN, 1993; Medical Doctorate, 2000, Northwestern University
BESTE, LAUREN A, 2007; Medical Doctorate, 2004, Johns Hopkins University
BHATIA, SHAILENDER, 2004; Medical Doctorate, 2000, All India Institute of Medical Sciences
BIGGINS, SCOTT W, 2017; Bachelor’s, 1994, University of California-Los Angeles
BILLINGS, MARTHA, 2006; Bachelor’s, 1997, Stanford University
BLUE, ELIZABETH, 2008; Bachelor’s, 2003, Indiana University-Bloomington
BUBER, YONATAN, 2018
CARLBOM, DAVID J, 1988; Medical Doctorate, 1997, University of Washington
CASSADAY, RYAN D., 2010; Bachelor’s, 2000, University of Wisconsin-Madison
CHAPUIS, AUDE GEORGIANA * 2007; Medical Doctorate, 2002, Université de Lausanne
CHAUNCEY, THOMAS R., 1985; Bachelor’s, 1976, Bowdoin College
CHEN, MICHAEL A, 1999; Bachelor’s, 1989, Haverford College
CHENG, GUANG-SHING, 2011; Bachelor’s, 1996, Harvard University
CHENG, HEATHER, 1998; Bachelor’s, 1998, Princeton University
CHENG, RICHARD KAR-HANG, 2013; Medical Doctorate, 2005, Columbia University
CHERRY, DEBRA C * 2013; Bachelor’s, 1990, Baylor University
CHEW, LISA D., 1993; Bachelor’s, 1989, University of California-Berkeley
CHILDS, MARIAN T, 1982; Bachelor’s, 1946, University of California-Berkeley
CHOE, JOHN H, 2000; Medical Doctorate, 1997, New York University
CHU, HELEN Y., 2009; Bachelor’s, 2001, Cornell University
CIRULLI, VINCENZINO * 2009; Medical Doctorate, 1986, American University of Rome
COHEN, STACEY A., 2000; Bachelor’s, 2004, Brandeis University
CONNELLY-SMITH, LAURA S., 2011; Medical Doctorate, 2007, University of Nottingham
COOK, DAVID G. * 1998; Bachelor’s, 1984, University of Utah
CORNIA, PAUL B., 1996; Bachelor’s, 1991, Case Western Reserve University
CORUH, BASAK, 2006; Medical Doctorate, 2006, Virginia Commonwealth University
COVELER, ANDREW L., 2003; Bachelor’s, 1998, Northwestern University
CRANMER, LEE DUNCAN, 2015; Bachelor’s, 1988, Harvard University
CRISA, LAURA M * 2009; Medical Doctorate, 1986, American University of Rome
DANDEKAR, AJAI ARVIND * 2005; Bachelor’s, 1997, Stanford University
DAVIDSON, ROBERT C, 1982; Medical Doctorate, 1953, University of Washington
DEPAOLO, RANDY * 2016; Bachelor’s, 1999, Bates College
DOMBROWSKI, JULIA C. * 2007; Medical Doctorate, 2004, Duke University
DON, CREIGHTON W., 2004; Bachelor’s, 1993, University of California-Berkeley
EACKER, ANNE M., 1993; Medical Doctorate, 1997, University of Washington
EDELMAN, JEFFREY, 2005; Medical Doctorate, 1989, Columbia University
EVANS, LAURA ELISE, 2019; Medical Doctorate, 1999, University of Michigan-Ann Arbor
EVANS, TIMOTHY C, 1980; Bachelor’s, 1968, University of Michigan-Ann Arbor
FAN, VINCENT S. * 1995; Medical Doctorate, 1995, University of Minnesota-Duluth
FEEMSTER, LAURA CECERE, 2002; Bachelor’s, 1997, The University of Texas
FISHER, CYNTHIA E., 1999; Master’s, 2006, Johns Hopkins University
FLOYD, JAMES * 2005; Bachelor’s, 2000, Duke University
FOSTER-SCHUBERT, KAREN, 1990; Medical Doctorate, 1998, Johns Hopkins University
FREEDMAN, BENJAMIN S * 2015; Doctorate, 2009, University of California-Berkeley

Professors

AMLIE-LEFOND, CATHARINE M., 2011; Bachelor’s, 1985, University of California-Irvine
BECKER, KYRA J., 1996; Medical Doctorate, 1989, Duke University
BIRD, THOMAS D., 1983; Medical Doctorate, 1968, Cornell University
CHAMBERLAIN, JEFFREY S * 1982; Bachelor’s, 1978, Rice University
DODRILL, CARL B, 1973; Master’s, 1967, Purdue University-Main Campus
FARRELL, DONALD, 1982; Medical Doctorate, 1965, George Washington University
GOSPE, SIDNEY M, 2000; Doctorate, 1980, Duke University
HOLMES, MARK D., 1987; Bachelor’s, 1974, Ohio State University Agricultural Technical Institute
LONGSTRETH, WILLIAM T. * 1981; Bachelor’s, 1971, Hamilton College
MARRA, CHRISTINA M., 1984; Master’s, 1979, Oregon State University
MILLER, JOHN W., 1999; Bachelor’s, 1983, University of Illinois at Chicago
NOVOTNY, EDWARD J, 2009; Bachelor’s, 1975, University of California-Irvine
POOLOS, NICHOLAS P * 2001; Bachelor’s, 1984, Harvard University
SAMII, ALI, 1998; Medical Doctorate, 1989, McGill University
SANETO, RUSSELL P, 2001; Doctorate, 1994, Kaplan University-Des Moines Campus
SPAIN, WILLIAM * 1981; Medical Doctorate, 1977, Columbia University
SWANSON, PHILLIP D, 1964; Medical Doctorate, 1958, Johns Hopkins University
TAPSCOTT, STEPHEN J. * 1986; Bachelor’s, 1975, Hampshire College
TIRSWELL, DAVID L., 1991; Medical Doctorate, 1991, Cornell University
WAINWRIGHT, MARK STEPHEN, 2017; Bachelor’s, 1982, King’s College London
WATSON, NATHANIEL F., 1996; Bachelor’s, 1989, University of North Carolina
WEISS, MICHAEL D., 2001; Bachelor’s, 1986, Brown University
WILENSKY, ALAN J, 1982; Bachelor’s, 1963, Columbia University
WILLIAMS, MICHAEL A, 2013; Doctorate, 1985, Indiana University-Bloomington
ZABETIAN, CYRUS P. * 1988; Bachelor’s, 1986, University of California-Los Angeles
ZUNT, JOSEPH R. * 1991; Bachelor’s, 1986, University of Minnesota-Duluth

Associate Professors

BLUME, HEIDI K, 1997; Medical Doctorate, 1997, Harvard University
BOZARTH, XIUHUA L, 2014; Medical Doctorate, 1990, China Medical University
CONSENS, FLAVIA B., 2010; Medical Doctorate, 1992, Universidad de la República
CREUTZFELDT, CLAIRE J., 2004; Medical Doctorate, 2003, Ludwig Maximilians Universität München
DISTAD, B. JANE, 2001; Bachelor's, 1989, Northwestern University
GRABER, JEROME JEFFREY, 2018; Master's, 2004, Johns Hopkins University; Public Health
HAKIMIAN, SHAHIN, 2004; Bachelor's, 1995, University of California-Los Angeles
HU, SHU-CHING, 2001; Doctorate, 2001, Johns Hopkins University
JAYADEV, SUMAN * 2000; Medical Doctorate, 2000, New York Medical College
KHOT, SANDEEP, 2002; Master's, 2002, Tulane University of Louisiana
KIM, HOJOONG, 2003; Bachelor's, 1997, Amherst College
KRAUS, ERIC E., 1991; Medical Doctorate, 1991, University of Minnesota-Duluth
OAKLEY, JOHN C. * 1993; Bachelor's, 1994, Pacific Lutheran University
OWENS, JAMES W, 1990; Doctorate, 1996, University of Washington
PERLMAN, SETH, 2019
RHOADS, KRISTOFFER, 2004; Doctorate, 2003, Colorado State University
STEINMAN, KYLE J, 2011; Bachelor's, 1996, Stanford University
TSAI, JEFFREY J, 2012; Doctorate, 2001, Cornell University
VON GELDERN, GLORIA, 2007; Medical Doctorate, 2004, Universität Leipzig
WANG, LEO HONG-LOHI, 2005; Bachelor's, 1997, University of California-Berkeley
WEINSTEIN, JONATHAN R. * 1998; Doctorate, 1998, University of California-Irvine
WUNDES, ANNETTE, 2003; Medical Doctorate, 1995, Heinrich Heine Universität Düsseldorf

Assistant Professors

BEATTY, CHRISTOPHER W., 2009; Medical Doctorate, 2009, Case Western Reserve University
BENEDETTI, GIULIA, 2019; Bachelor's, 2007, Ohio State University-Main Campus; Psychology
CHEN, DONG-HUI, 1999; Doctorate, 1999, Kobe University
DAVIS, ARIELLE PATRICIA, 2006; Medical Doctorate, 2006, Columbia University
DAVIS, MARIE Y, 2008; Bachelor's, 1999, Bryn Mawr College
DOMOTO-REILLY, KIMIKO, 2005; Bachelor's, 1999, Harvard University
ESMAEILI, BEHNAZ, 2020; Medical Doctorate, 2009, Tehran University of Medical Sciences
HUFFER, ANDREW A., 2014; Bachelor's, 2005, Carleton College
JOHNSON, SIMON, 2019; Bachelor's, 2009, Oregon State University; Biochemistry
KALANI, RIZWAN, 2014; Bachelor's, 2006, University of Florida
KIM, MICHELLE S, 2014; Master's, 2008, Fuller Theological Seminary in California
LEIGH, FAWN A., 2018
LOCKROW, JASON PARK, 2011; Bachelor's, 2002, University of South Carolina-Columbia
MA, MAXWELL TIANRAN, 2010; Medical Doctorate, 2010, Cornell University
MARASHLY, AHMAD, 2019
MCGRANAHAN, TRESA, 2018
MINGBUNJERDSUK, DARARAT, 2015; Medical Doctorate, 2000, Mahidol University
MONRAD, PRIYA ALEXANDRA, 2019; Medical Doctorate, 2006, University of Colorado Denver
MORGAN, LINDSEY, 2016; Bachelor's, 2004, University of Michigan-Ann Arbor
NATARAJAN, NIRANJANA, 2013; Bachelor's, 2004, Case Western Reserve University
PARSEY, CAROLYN MARIE, 2018; Bachelor’s, 2009, Washington State University; Psychology
PATRICK, KRISTINA ELISE, 2018
PHATAK, VAISHALI, 2007; Master's, 1998, Lewis and Clark Community College
RANSOM, CHRISTOPHER B., 2010; Bachelor's, 1994, California Polytechnic State University-San Luis Obispo
SATO, AIMMEE AOI, 2018
Obstetrics and Gynecology

Professors

ADAMS WALDORF, KRISTINA M * 1992; Medical Doctorate, 1998, Mayo Graduate School
AMIES OELSCHLAGER, ANNE-MA, 1997; Bachelor's, 1991, University of California-Los Angeles
CHENG, EDITH Y., 1987; Master's, 1979, Sarah Lawrence College
CHIANG, SEINE, 2006; Medical Doctorate, 1990, Oregon Health & Science University
CLIFTON, DONALD K, 1981; Bachelor's, 1968, Oregon State University
EASTERLING, THOMAS R, 1985; Bachelor's, 1972, Davidson College
ECKERT, LINDA O., 1992; Bachelor's, 1983, Carleton College
ESCHENBACH, DAVID A, 1976; Bachelor's, 1964, Lawrence University
FIALKOW, MICHAEL F., 1994; Bachelor's, 1989, University of Pennsylvania
GARDELLA, CAROLYN M., 1995; Bachelor's, 1989, Dartmouth College
GOFF, BARBARA A., 1993; Bachelor's, 1982, Brown University
GRAY, HEIDI J., 1997; Medical Doctorate, 1997, University of California-Los Angeles
HITTI, JANE, 1993; Bachelor's, 1984, Brown University
LENTZ, GRETCHEN M., 1983; Bachelor's, 1982, University of Puget Sound
NAPOLITANO, PETER GUY, 1996; Medical Doctorate, 1989, Loyola University Chicago
NEAL-PERRY, GENEVIEVE S., 2015; Bachelor's, 1988, Dartmouth College
PATTON, DOROTHY L, 1981; Bachelor's, 1971, University of Puget Sound
PRAGER, SARAH WARD, 2006; Bachelor's, 1993, Princeton University
REED, SUSAN D., 1991; Master's, 1979, Sarah Lawrence College
SHY, KIRKWOOD K, 1979; Bachelor's, 1969, St. Olaf College
STEINER, ROBERT A * 1977; Doctorate, 1975, University of Oregon
SWISHER, ELIZABETH M., 1992; Medical Doctorate, 1992, University of California-San Diego
VONTVER, LOUIS A, 1977; Bachelor's, 1956, University of Minnesota-Duluth

Associate Professors

CALLEGARI, LISA S * 2011; Bachelor's, 1994, Harvard University
DEBIEC, KATHERINE E, 1999; Medical Doctorate, 2005, University of Washington
DELANEY, SHANI S, 2009; Medical Doctorate, 2005, University of California-San Francisco
IRWIN, TRACY E, 2014; Bachelor's, 1997, Emory University
LIAO, JOHN B, 2010; Medical Doctorate, 1998, George Washington University
MAO, CONSTANCE, 1988; Bachelor's, 1984, Princeton University
MENDIRATTA, VIKSA, 1998; Bachelor's, 1990, Ohio State University Agricultural Technical Institute
MOORE, DONALD E, 1982; Medical Doctorate, 1967, Case Western Reserve University
STEPHENSON-FAMY, AYLISSA B., 1999; Bachelor's, 1999, University of Washington
URBAN, RENATA R, 2011; Bachelor's, 2000, Boston University
Assistant Professors

ALBRIGHT, CATHERINE M, 2016; Master's, 2016, Brown University
BENSON, LYNDSEY S, 2014; Bachelor's, 2005, Brown University
BURKE, ALSON K, 2005; Bachelor's, 2000, Mount Holyoke College
DOLL, KEMI M, 2016; Medical Doctorate, 2008, Columbia University
FAY, EMILY E, 2012; Medical Doctorate, 2012, Rutgers University-Newark
FUCHS, ESTHER, 2016; Medical Doctorate, 2001, Universität Bern
HERNDON, CHRISTOPHER N, 2017
KIRBY, ANNA C, 2004; Bachelor's, 2002, Stanford University
MA, KIMBERLY K, 2011; Bachelor's, 2003, University of Iowa
MICKS, ELIZABETH A, 2012; Medical Doctorate, 2006, Jefferson College
NORQUIST, BARBARA S., 1998; Bachelor's, 1999, University of Washington
PENNINGTON, KATHRYN P, 2011; Bachelor's, 2002, University of Michigan-Ann Arbor
SHREE, RAJ, 2014; Medical Doctorate, 2010, University of Missouri-St Louis
UNGER, JENNIFER A., 2005; Bachelor's, 1995, Mount Holyoke College
YU, BO, 2016; Master's, 1997, Clemson University

Ophthalmology

Professors

CHEN, PHILIP P., 1996; Bachelor's, 1986, Stanford University
KALINA, ROBERT E, 1967; Bachelor's, 1956, University of Minnesota-Duluth
NEITZ, JOHN * 2009; Bachelor's, 1979, San Jose State University
NEITZ, MAUREEN * 2009; Bachelor's, 1979, San Jose State University
SAARI, JOHN C, 1982; Bachelor's, 1961, University of Central Oklahoma
SHEN, TUENG T * 2003; Medical Doctorate, 1997, Harvard University
TARCZY-HORNOCHE, KRISTINA, 1998; Medical Doctorate, 1998, University of California-San Francisco
VAN GELDER, RUSSELL * 2008; Bachelor's, 1985, Stanford University
WEISS, AVERY H, 1991; Medical Doctorate, 1974, Miami University-Oxford

Associate Professors

ATTARAN REZAEE, KASRA, 2014; Medical Doctorate, 2001, Islamic Azad University, Tehran Medical Sciences
BANITT, MICHAEL, 2015; Bachelor's, 1996, University of Missouri-St Louis
CABRERA, MICHELLE T, 2014; Bachelor's, 2001, Stanford University
CHAMBERS, CHRISTOPHER B, 2015; Medical Doctorate, 2005, Ohio State University Agricultural Technical Institute
CHAO, JENNIFER, 2009; Bachelor's, 1996, Stanford University
FRANCIS, COURTNEY, 2010; Bachelor's, 1999, Brown University
HERLIHY, ERIN P., 2004; Medical Doctorate, 2003, Loyola University Chicago
LAM, DEBORAH, 2002; Bachelor's, 1996, Northwestern University
LEE, CECILIA S, 2014; Bachelor's, 2004, Emory University; Biology
MUDUMBAI, RAGHU, 2000; Bachelor's, 1990, New York University
OLMOS DE KOO, LISA, 2016; Medical Doctorate, 2005, Baylor University
PEPPLE, KATHRYN, 2013; Doctorate, 2006, Baylor College of Medicine; Molecular Genetics
TARAVATI, PARISA, 2009; Bachelor's, 2001, University of Iowa
WEN, JOANNE C, 2014; Bachelor's, 2004, Harvard University
Assistant Professors

CHEE, YEWLIN E, 2016; Bachelor’s, 2004, Princeton University
CHEN, ANDREW, 2020; Medical Doctorate, 2015, University of California-Los Angeles
JUNG, HOON C, 2014; Bachelor’s, 1998, Cornell University
KUMAR, SABESAN RAM * 2015; Bachelor’s, 2005, Indian Institute of Technology Delhi
LEE, AARON, 2015; Bachelor’s, 2004, Harvard University
MANOOKIN, MICHAEL B * 2009; Bachelor’s, 2002, Brigham Young University
MERCADO, CARMEL, 2019; Medical Doctorate, 2014, Johns Hopkins University
PETERSSEN, CHRISTINE A, 2015; Bachelor’s, 2008, Eastern Oregon University; Biochemistry
SARAF, STEVEN, 2017; Medical Doctorate, 2012, University of California-Los Angeles
STACEY, ANDREW, 2016; Bachelor’s, 2005, Brigham Young University
YANG, DONG, 2019; Medical Doctorate, 2010, University of Florida
ZHANG, MATTHEW MAO, 2018; Medical Doctorate, 2012, University of Pittsburgh-Pittsburgh Campus

HOFMANN, LUCAS * 1998; Bachelor’s, 1990, University of California-Berkeley
HORSLEN, SIMON PETER, 2005; Medical Doctorate, 1984, University of Bristol
JACOBS, J CRAIG, 1979; Bachelor’s, 1975, Duke University
JENNY, CAROLE, 1983; Bachelor’s, 1970, Dartmouth College
JENSEN, MICHAEL C. * 1984; Bachelor’s, 1986, Tufts University
JONES, THOMAS K, 1983; Medical Doctorate, 1978, Jefferson College
JUUL LEDBETTER, SANDRA, 1982; Doctorate, 1997, University of Chicago
KAPPE, STEFAN H. I. * 2004; Master’s, 1991, Rheinische Friedrich Wilhelms Universität Bonn
KARR, CATHERINE * 1987; Bachelor’s, 1984, University of Michigan-Ann Arbor
KLEIN, EILEEN J., 1988; Medical Doctorate, 1988, Johns Hopkins University
LAW, YUK M., 2006; Bachelor’s, 1983, Brown University
LAWLOR, ELIZABETH RACHEL * 2020
LEWIN, MARK, 2001; Master’s, 1987, Freed-Hardeman University
LIU, LENNA L., 1992; Bachelor’s, 1987, Cornell University
MAGARET, AMALIA SOPHIA * 1997; Bachelor’s, 1992, University of Notre Dame
MAJESKY, MARK W. * 1982; Bachelor’s, 1977, San Jose State University
MARSHALL AARONSON, SUSAN, 1979; Bachelor's, 1976, University of California-Los Angeles
MATTHEWS, DANA C., 1984; Bachelor's, 1977, University of Washington
MAYOCK, DENNIS EDWARD, 1985; Bachelor's, 1972, Miami University-Oxford
MAZOR, SUZAN, 2004; Bachelor's, 1991, University of Illinois at Urbana-Champaign
MCCARTY, CAROLYN A. * 1999; Master's, 1995, University of California-Los Angeles
MCDONALD, RUTH A., 1987; Bachelor's, 1979, Gustavus Adolphus College
MCPhillips, HEATHER A., 1998; Bachelor's, 1990, Alma College
MEFFORD, HEATHER C, 1994; Doctorate, 2001, University of Washington
MELVIN, ANN JORNS, 1987; Bachelor's, 1980, Kansas State University
MELZER, SANFORD M., 1990; Medical Doctorate, 1982, Mount Sinai School of Medicine
MENDOZA, JASON A. * 2001; Medical Doctorate, 2001, Rush University
MERRITT, JOHN LAWRENCE, 2007; Bachelor's, 1994, American University
MESHINCHI, SOHEIL, 1997; Bachelor's, 1984, University of Michigan-Ann Arbor
MIAO, CAROL H, 1981; Bachelor's, 1978, National Taiwan University
MILLEN, KATHLEEN J., 2010; Bachelor's, 1988, University of Calgary
MILLER, DANIEL G., 1989; Doctorate, 1994, University of Washington
MUSA, NDIDIAMAKA L., 2013; Medical Doctorate, 1987, University of Liberia
MYLER, PETER J. * 1993; Bachelor's, 1977, University of Queensland
NOVACK, ALVIN H, 1982; Bachelor's, 1954, Temple University
OCHS, HANS D, 1969; Medical Doctorate, 1969, Universität Freiburg
OLSON, JAMES M. * 1991; Medical Doctorate, 1991, University of Michigan-Ann Arbor
ORENTAS, RIMAS * 2018; Doctorate, 1991, Johns Hopkins University
PAGON, ROBERTA A, 1979; Medical Doctorate, 1972, Harvard University
PARK, JULIE RUGGIERI, 1988; Bachelor's, 1983, University of Vermont
PIHOKER, CATHERINE, 1997; Medical Doctorate, 1987, Albany Medical College
PORTMAN, MICHAEL A., 1992; Bachelor's, 1974, John Carroll University
RAJAGOPAL, LAKSHMI * 1999; Bachelor's, 1993, Bangalore University
RAMSEY, BONNIE W, 1978; Medical Doctorate, 1976, Harvard University
RAWLINGS, DAVID J * 2001; Bachelor's, 1979, Davidson College
REDDING, GREGORY J, 1980; Medical Doctorate, 1974, Stanford University
RICHARDSON, LAURA P., 1998; Bachelor's, 1991, University of Michigan-Ann Arbor
RIVARA, FREDERICK P. * 1984; Bachelor's, 1970, College of the Holy Cross
ROSE, TIMOTHY M * 1991; Doctorate, 1981, Switzerland University of Business and International Studies Geneva
ROSENFELD, BRIAN E * 2006; Bachelor's, 1992, Cornell University
SCHARENBERG, ANDREW M., 2000; Bachelor's, 1985, Indiana University-Bloomington
SCOTT, C RONALD, 1965; Medical Doctorate, 1959, University of Washington
SESAR, STEPHEN, 2008; Doctorate, 1993, Georgetown University
SHUGERMAN, RICHARD P, 1984; Bachelor's, 1979, Case Western Reserve University
SIDBURY, ROBERT, 2000; Bachelor's, 1985, Duke University
SMITH, CHARLES VINCENT, 2007; Bachelor's, 1970, Rice University
SMITH, JODI, 1999; Bachelor's, 1991, McGill University
SMITH, JOSEPH * 2003; Bachelor's, 1988, Macalester College
SMITH, MARK S, 1977; Medical Doctorate, 1969, Virginia University of Lynchburg
SMITH, SHERILYN, 1994; Medical Doctorate, 1989, Baylor University
SODORA, DONALD L * 2008; Bachelor's, 1985, Rutgers University-Camden
STAPLETON, F. BRUDER, 1996; Bachelor's, 1968, University of Kansas
STOUT, JAMES W., 1986; Master’s, 1981, Duke University
STUART, KENNETH DANIEL * 1985; Bachelor’s, 1963, Northeastern University
STUDHOLME, COLIN * 2011; Bachelor’s, 1990, University of Bradford
SUSKIND, DAVID, 2003; Medical Doctorate, 1997, Louisiana State University
SYMONS, JORDAN, 1999; Medical Doctorate, 1992, Columbia University
TORBETT, BRUCE E., 2020; Doctorate, 1988, University of California-Los Angeles; Philosophy
URDAHL, KEVIN B. * 1995; Bachelor’s, 1987, Concordia College
WALKER, WILLIAM O., 1993; Bachelor’s, 1975, Tulane University of Louisiana
TORBETT, BRUCE E., 2020; Doctorate, 1988, University of California; Philosophy
URDAHL, KEVIN B. * 1995; Bachelor’s, 1987, Concordia College
WALKER, WILLIAM O., 1993; Bachelor’s, 1975, Tulane University of Louisiana
WALKER-HARDING, LESLIE, 2016
WATSON, ROBERT SCOTT, 1993; Medical Doctorate, 1993, University of Pennsylvania
WEDGWOOD, RALPH J, 1962; Medical Doctorate, 1947, Harvard University
WELSH, JOHN P. * 2009; Bachelor’s, 1983, Bucknell University
WILFOND, BENJAMIN S * 2006; Bachelor’s, 1981, Muhlenberg College
WOODWARD, GEORGE A., 2003; Medical Doctorate, 1983, Temple University
YOUNG, LUCIANA T, 2016; Bachelor’s, 1985, Wayne State University
ZERR, DANIELLE M., 1993; Bachelor’s, 1989, Brandeis University
ZINNER, SAMUEL, 2003; Bachelor’s, 1987, University of California-Berkeley

**Associate Professors**

AHRENS, KYM, 2002; Medical Doctorate, 2002, University of Iowa
ALBERS, ERIN, 2012; Bachelor’s, 2000, University of Illinois at Urbana-Champaign
AMBARTSUMYAN, LUSINE, 2013; Medical Doctorate, 2007, Drexel University
ARYA, BHAWNA, 2013; Bachelor’s, 2002, Johns Hopkins University

Professors

BAJJALIEH, SANDRA M. * 1995; Bachelor’s, 1975, University of Illinois at Urbana-Champaign
BEAVO, JOSEPH A * 1977; Bachelor’s, 1965, Stetson University
CATTERALL, WILLIAM A * 1977; Bachelor’s, 1968, Brown University
CHAVKIN, CHARLES * 1984; Bachelor’s, 1974, Cornell University
GARDNER, RICHARD G. * 2006; Bachelor’s, 1992, Cornell University
HORITA, AKIRA, 1982; Bachelor’s, 1950, University of Washington
JUCHAU, MONT RAWLINGS, 1969; Doctorate, 1966, University of Iowa
MCKNIGHT, G. STANLEY * 1979; Bachelor’s, 1970, Bates College
MOON, RANDALL T * 1985; Bachelor’s, 1977, New College of Florida
NATHANSON, NEIL * 1979; Doctorate, 1975, Brandeis University
SCHUEER, TODD, 1985; Bachelor’s, 1977, Grinnell College
SCOTT, JOHN D * 2008; Bachelor’s, 1980, Heriot-Watt University
SLATTERY, JOHN T * 1982; Doctorate, 1978, New York University
STELLA, NEPHI * 1999; Doctorate, 1995, École Polytechnique Fédérale de Lausanne
STORM, DANIEL R * 1978; Doctorate, 1971, University of California-Berkeley
VINCENZI, FRANK F, 1982; Bachelor’s, 1960, University of Washington
ZHENG, NING * 2002; Bachelor’s, 1991, Fudan University

Associate Professors

HAGUE, CHRIS * 2005; Doctorate, 2002, Creighton University
ONG, SHAO-EN * 2010; Bachelor’s, 1995, University of Minnesota-Duluth
WANG, EDITH H. * 1996; Master’s, 1987, Columbia University

Assistant Professors

GUJRAL, TARANJIT S * 2018; Bachelor’s, 2003, Queen’s University
LAND, BENJAMIN * 2003; Bachelor’s, 2002, Cornell University
SANCAY, YASEMIN S. * 2017; Bachelor’s, 1997, Bogazici University; Molecular Biology
SHECHNER, DAVID MICHAEL * 2017; Doctorate, 2010, Massachusetts Institute of Technology; Biology
YADAV, SMITA * 2017; Doctorate, 2011, Carnegie Mellon University; Biology
Physiology and Biophysics

Professors

ASBURY, CHARLES L * 1993; Bachelor’s, 1991, Cornell University
BARRIA-ROMAN, ANDRES * 2005; Doctorate, 1998, Universidad de Chile
BERGER, ALBERT J * 1982; Bachelor’s, 1964, Cornell University
BINDER, MARC D * 1978; Bachelor’s, 1971, Columbia University
BOTHWELL, MARK ALLEN * 1985; Doctorate, 1975, University of California-Berkeley
BRENGELMANN, GEORGE L, 1966; Bachelor’s, 1956, University of Rochester
BUCK, LINDA B * 2003; Doctorate, 1980, The University of Texas
BUFFALO, ELIZABETH A * 2013; Master’s, 1995, University of California-San Diego
CARLSON, STEVEN S. * 1985; Doctorate, 1975, University of California-Berkeley
COOK, DANIEL L * 1978; Bachelor’s, 1967, University of Michigan-Ann Arbor
DETWILER, PETER B * 1977; Doctorate, 1970, Georgetown University
FAIRHALL, ADRIENNE L * 2003; Bachelor’s, 1992, Australian National University
FEIGL, ERIC O * 1982; Bachelor’s, 1954, University of Minnesota-Duluth
FETZ, EBERHARD * 1975; Doctorate, 1966, Massachusetts Institute of Technology
FROEHNER, STANLEY C * 2000; Doctorate, 1973, California Institute of Technology
FUCHS, ALBERT F * 1982; Bachelor’s, 1960, Drexel University
GORDON, SHARONA E. * 1993; Bachelor’s, 1990, Brown University
HILDEBRANDT, JACOB * 1966; Bachelor’s, 1957, University of British Columbia
HILLE, BERTIL * 1968; Doctorate, 1967, Rockefeller University
HORWITZ, GREGORY * 2007; Bachelor’s, 1993, Harvard University
KOERKER, DONNA J, 1982; Doctorate, 1970, University of Michigan-Ann Arbor
PERLMUTTER, STEVE I * 1991; Doctorate, 1991, Northwestern University
RIEKE, FREDERICK MARTIN * 1997; Bachelor’s, 1988, University of California-Berkeley
ROWELL, LORING B, 1963; Bachelor’s, 1953, Springfield College
SANTANA, LUIS F * 2001; Bachelor’s, 1991, American University of Puerto Rico
SCHWINDT, PETER C, 1974; Master’s, 1965, Massachusetts Institute of Technology
SMITH, ORVILLE A, 1958; Master’s, 1950, Michigan State University
STIRLING, CHARLES E, 1982; Bachelor’s, 1961, George Washington University
WORDMAN, LINDA * 1994; Bachelor’s, 1982, University of California-Berkeley
ZAGOTTA, WILLIAM N. * 1993; Doctorate, 1989, Stanford University

Associate Professors

ADAMS, MARVIN * 2000; Doctorate, 1991, Colorado State University
LIU, QINGHANG * 2011
MELBY, ANNA, 1996; Bachelor’s, 1984, McGill University
SULLIVAN, JANE M * 2002; Bachelor’s, 1984, Amherst College

Assistant Professors

MORENO MORENO, CLAUDIA M * 2019; Doctorate, 2012, Universidad Nacional Autónoma de México (UNAM)
OLSEN, SHAWN R * 2014; Doctorate, 2009, Harvard University
TUTHILL, JOHN C * 2016; Bachelor’s, 2006, Swarthmore College
VIVAS RODRIGUEZ, OSCAR L * 2019; Doctorate, 2012, Universidad Nacional Autónoma de México (UNAM); Biomedical Science
WATERS, DAVID J * 2013; Doctorate, 1997, University of London

**Senior Lecturer**

LINDER, THOMAS M, 1982; Bachelor's, 1966, Baldwin-Wallace College

**Psychiatry and Behavioral Sciences**

Professors

ALESSIO, ADAM M., 2003; Bachelor's, 1998, University of Notre Dame
BHARGAVA, PUNEET, 2006; Medical Doctorate, 1997, All India Institute of Medical Sciences
CHAM, MATTHEW D., 2018; Bachelor's, 1995, University of Rochester; Psychology
CHAPMAN, TERESA, 1994; Bachelor's, 1994, University of Colorado
CHEN, DELPHINE, 2019; Medical Doctorate, 1999, Washington University in St Louis
CHEW, FELIX S, 2004; Master's, 2004, Duke University
COHEN, WENDY, 1987; Medical Doctorate, 1975, Harvard University
CONLEY, KEVIN E, 1988; Bachelor's, 1976, Lake Forest College
DAGER, STEPHEN R * 1979; Bachelor's, 1976, American University
DIGHE, MANJIRI K., 2003; Medical Doctorate, 1998, Mumbai University
DUBINSKY, THEODORE J., 1984; Bachelor's, 1979, Johns Hopkins University
GHODKE, BASAVARAJ, 2002; Medical Doctorate, 1989, Mumbai University
GODWIN, J. DAVID, 1986; Bachelor's, 1966, San Diego State University
GRABOWSKI, THOMAS J * 2009; Bachelor's, 1982, Vanderbilt University
GROSS, JOEL A., 2000; Medical Doctorate, 1990, University of California-Davis
GUNN, MARTIN, 2002; Bachelor's, 1991, University of Auckland
HA, ALICE S., 2009; Bachelor's, 1995, University of California-Los Angeles
HALLAM, DANI AL K., 2000; Bachelor's, 1982, Brown University
HARRIS, ROBERT D., 2018; Bachelor's, 1977, Middlebury College; Chemistry
HAYES, CECIL E., 1991; Bachelor's, 1964, Cornell University
HAYNOR, DAVID R * 1979; Bachelor's, 1968, Harvard University
IYER, RAMESH S., 2002; Bachelor's, 2001, Brown University
JARVIK, JEFFREY * 1993; Bachelor's, 1981, University of California-San Diego
KANAL, KALPANA M., 2000; Bachelor's, 1988, Mumbai University
KINAHAN, PAUL E. * 2001; Bachelor's, 1985, University of British Columbia
KUSHMERICK, MARTIN J., 1988; Medical Doctorate, 1963, University of Pennsylvania
LEE, CHRISTOPH ILSUK, 2012; Bachelor's, 1998, Princeton University
LEE, JANIE M, 2013; Bachelor's, 1993, Harvard University
LEWIS, DAVID H., 1985; Medical Doctorate, 1985, Virginia Commonwealth University
MARCINEK, DAVID J. * 2000; Bachelor's, 1993, Kalamazoo College
MIYAOKA, ROBERT SADA0 * 1984; Bachelor's, 1983, Harvey Mudd College
MONSKY, WAYNE L., 2012; Master's, 1988, Georgetown University
MOSHIRI, MARIAM, 2005; Bachelor's, 1991, New York University
NELP, WIL B, 1982; Bachelor's, 1951, Franklin and Marshall College
ORDOVAS, KAREN, 2020; Medical Doctorate, 1998, Universidade Federal do Rio Grande do Sul (UFRGS)
PALADIN, ANGELISA M., 1998; Medical Doctorate, 1999, Chicago State University
PARISI, MARGUERITE T., 2001; Bachelor's, 1974, Brookline College
PARTRIDGE, SAVANNAH C, 2005; Doctorate, 2001, University of California-Berkeley
PIPAVATH, SUDHAKAR N., 2002; Medical Doctorate, 1997, All India Institute of Medical Sciences
RAJENDRAN, JOSEPH, 1994; Medical Doctorate, 1973, Madurai Kamaraj University
REDDY, GAUTHAM P., 2008; Master's, 1991, George Washington University
RICHARDSON, MICHAEL L., 1984; Medical Doctorate, 1975, Baylor University
SAHANI, DUSHYANT, 2019
SHAW, DENNIS, 1983; Bachelor's, 1979, University of Washington
SHIBATA, DEAN K., 1990; Bachelor's, 1983, California Institute of Technology
STERN, ERIC J., 1992; Bachelor's, 1981, Moravian College and Moravian Theological Seminary
TALNER, LEE B., 1993; Bachelor's, 1959, Amherst College
VALJI, KARIM, 2007; Bachelor's, 1978, Harvard University
VESSELLE, HUBERT J. * 1997; Master's, 1986, Case Western Reserve University
WESTPHALEN, ANTONIO, 2020; Medical Doctorate, 1995, Universidade Federal do Rio Grande do Sul (UFRGS)
YANG, XIAOMING, 2006; Master's, 1986, Peking Union Medical College
YUAN, CHUN * 1991; Bachelor's, 1982, Beijing Normal University
YUH, WILLIAM, 2013; Master's, 1974, Auburn University-Montgomery

Associate Professors

ANDRE, JALAL B., 2011; Medical Doctorate, 2004, Drexel University
BASTAWROUS, SARAH, 2009; Bachelor's, 1996, Old Dominion University
BHUTTA, SADAF, 2013; Medical Doctorate, 1996, King Edward Medical University
BOLUS, DAVID N., 2018; Bachelor's, 1981, University of Alabama at Birmingham
CUEVAS, CARLOS, 2001; Medical Doctorate, 1992, Pontificia Universidad Católica de Chile *
DALLEY, ROBERTA W., 1987; Medical Doctorate, 1982, University of Utah
FERGUSON, MARK R., 2004; Bachelor's, 1996, University of Michigan-Ann Arbor
FINK, JAMES R, 2005; Bachelor's, 1987, Reed College
HOFF, MICHAEL N, 2013; Bachelor's, 1997, University of British Columbia
INGRAHAM, CHRISTOPHER R., 2006; Bachelor's, 2001, New York University
ISHAK, GISELE ELIAS, 2005; Medical Doctorate, 2000, Beirut University
JOHNSON, GUY, 1999; Medical Doctorate, 2007, New York Medical College
KAMPS, SHAWN ELIZABETH, 2002; Medical Doctorate, 2001, Eastern Virginia Medical School
KIM, SOOAH, 2011; Master's, 2003, Chungbuk National University
KLEINHANS, NATALIA M., 2005; Doctorate, 2005, San Diego State University
KOGUT, MATTHEW J., 2004; Bachelor's, 2000, Grand Valley State University
KOLOKYTHAS, ORPHEUS, 2002; Medical Doctorate, 1994, Ruprecht Karls Universität Heidelberg
KWAN, SHARON W, 2011; Medical Doctorate, 2005, Stanford University
LEE, HYOJEONG, 2007; Medical Doctorate, 1992, Chungnam National University
LEE, JEAN H., 2004; Medical Doctorate, 1996, Korea University
LI, TAO, 2012; Doctorate, 1992, Southern Medical University (First Military Medical University)
LINNAU, KEN F., 2000; Medical Doctorate, 1996, International University Vienna
MAXIMIN, SURESH T, 2013; Medical Doctorate, 1988, Northeastern Ohio Universities Colleges of Medicine and Pharmacy
MEDVERD, JONATHAN R., 1995; Medical Doctorate, 1995, New York University
MONROE, ERIC JAMES, 2010; Bachelor's, 2005, University of Wisconsin-Madison
O’MALLEY, RYAN B., 2013; Bachelor's, 2003, University of Notre Dame
OTTO, RANDOLPH K, 2007; Bachelor's, 1981, University of Michigan-Ann Arbor
PEREZ, FRANCISCO A., 1998; Bachelor's, 1998, Harvard University
PHILLIPS, GRACE SIAN, 2002; Medical Doctorate, 1997, Johns Hopkins University
RAHBAR, HABIBOLLAH, 2005; Medical Doctorate, 2005, University of Michigan-Ann Arbor
RELYEA-CHEW, ANNEMARIE, 2004; Bachelor's, 1977, Sojourner-Douglass College
ROBINSON, JEFFREY D., 1998; Medical Doctorate, 1985, University of Minnesota-Duluth
SANDSTROM, CLAIRE K., 2007; Medical Doctorate, 2006, Duke University
SCHEEL, JOHN, 2012; Bachelor’s, 1997, University of California-Riverside
SHIVARAM, GIRIDHAR M., 2008; Bachelor’s, 2000, Harvard University
SHRIKI, JABI E, 2014; Medical Doctorate, 2000, The University of Texas at San Antonio
STANESCU, ARTA LUANA, 2006; Medical Doctorate, 1994, Carol Davila University of Medicine and Pharmacy
SWANSON, JONATHAN, 2004; Bachelor’s, 1995, Duke University
THAPA, MAHESH, 2001; Bachelor’s, 1996, University of Nevada-Las Vegas
VAIDYA, SANDEEP, 2004; Medical Doctorate, 1995, Mumbai University
WANG, CAROLYN L, 2009; Bachelor’s, 1999, Rice University
WEAVER, KURT E., 2006; Master’s, 2001, Boston University

Assistant Professors

AMIN, KATHAN, 2019; Bachelor’s, 2009, Illinois Institute of Technology
BEHNIA, FATEMEH, 2006; Medical Doctorate, 1987, University of Tehran
BENJERT, JAYSON L, 1999; Medical Doctorate, 2005, A T Still University of Health Sciences
BRUNNQUELL, CHRISTINA L., 2018; Bachelor’s, 2010, Gustavus Adolphus College; Physics
CHALIAN, MAJID, 2019; Medical Doctorate, 2006, Iran University of Medical Sciences
CHICK, JEFFREY, 2019; Bachelor’s, 2005, Colgate University; Biochemistry
COLIP, CHARLES GEORGE, 2017
CROSS, NATHAN, 2011; Bachelor’s, 2006, Case Western Reserve University
JAHANIAN, HESAMODDIN, 2017; Bachelor’s, 2000, Amirkabir University of Technology; Biomedical Engineering
JOYCE, RYAN, 2019; Medical Doctorate, 2013, St. George’s University School of Medicine
KHALATBARI, HEDIEH, 2012; Medical Doctorate, 1995, University of Tehran
KIM, HELEN HYE RYONG, 2019; Medical Doctorate, 2011, Stony Brook University
KOO, KEVIN S, 2017; Bachelor’s, 2004, Emory University
LAM, DIANA LAP YING, 2010; Bachelor’s, 2004, Massachusetts Institute of Technology
LERNER, DAVID, 2019; Bachelor’s, 2005, Rutgers University-New Brunswick
LIM, JIHOON, 2020; Bachelor’s, 2007, University of California-Berkeley
LOWRY, KATHRYN P., 2017; Bachelor’s, 2005, Duke University; Psychology
MALONEY, EZEKIEL J., 2006; Bachelor’s, 2005, Columbia University in the City of New York
MANSOORI, BAHAR, 2019; Medical Doctorate, 2008, Iran University of Medical Sciences
MATESAN, MANUELA CRISTINA, 2007; Medical Doctorate, 1996, University of Medicine and Pharmacy Victor Babes Timisoara
MCNEELEY, MICHAEL FIELDEN, 2009; Bachelor’s, 2001, The University of Tennessee
MENASHE, SARAH J, 2012; Medical Doctorate, 2007, Jefferson College
MILETO, ACHILLE, 2016; Medical Doctorate, 2008, Università degli Studi di Messina
MOGENSEN, MONIQUE A., 2018; Bachelor’s, 1991, University of Pennsylvania; Biology
NGO, ANH-VU HUYNH, 2000; Medical Doctorate, 2008, Medical College of Wisconsin; Medicine
OTJEN, JEFFREY P., 2005; Medical Doctorate, 2005, Baylor University
RANE, SWATI D, 2015; Doctorate, 2009, Georgia Institute of Technology-Main Campus
REHWALD, CHRISTINE, 2000; Medical Doctorate, 2013, George Washington University; Medicine
REIS, JOSEPH, 2018; Medical Doctorate, 2008, SUNY
RIPLEY, BETH ANN, 2015; Bachelor’s, 1998, Stanford University
ROMBERG, ERIN K., 2018; Bachelor’s, 2008, Oberlin College; Biology
SHIN, DAVID SUNWOONG, 2011; Bachelor’s, 2006, Stanford University
SOLOFF, ERIK, 2017; Bachelor’s, 1993, University of Michigan-Ann Arbor
TANG, ELIZABETH, 2014; Medical Doctorate, 2009, Albert Einstein College of Medicine
WANGARYATTAWANICH, PATTANA, 2020; Medical Doctorate, 2003, Chulalongkorn University; Medicine
WRIGHT, JASON NEAL NIXON, 2007; Medical Doctorate, 2006, Chicago State University
Rehabilitation Medicine

Professors

AMTMANN, DAGMAR * 1991; Bachelor's, 1980, University of Economics and Management
ANDERSON, MARGIE E., 1982; Bachelor's, 1963, Michigan State University
APKON, SUSAN D, 2009; Bachelor's, 1986, Northwestern University
BOMBARDIER, CHARLES H. * 1989; Bachelor's, 1979, University of Washington
CHILDERS, MARTIN K, 2012; Bachelor's, 1980, Seattle Pacific University
CIOI, MARCIA A. * 1985; Bachelor's, 1979, Universidade Estadual de Campinas (Unicamp)
CZERNIECKI, JOSEPH M * 1982; Bachelor's, 1975, University of British Columbia
DEITZ, JEAN L, 1982; Master's, 1970, University of Florida
EHDE, DAWN M * 1991; Master's, 1989, University of North Dakota
ESSELMAN, PETER C. * 1986; Bachelor's, 1975, University of Washington
FRASER, ROBERT T * 1976; Bachelor's, 1968, Le Moyne College
FRIEDLY, JANNA L., 2001; Medical Doctorate, 2001, Oregon Health & Science University
GOLDSTEIN, BARRY * 1987; Bachelor's, 1974, Occidental College
HAFNER, BRIAN * 1996; Bachelor's, 1996, Southeastern Oklahoma State University
HASSELKORN, JODIE K. * 1985; Bachelor's, 1985, Louisiana State University
HOFFMAN, JEANNE MARIE, 1999; Master's, 1995, Arizona State University
JENSEN, MARK PHILIP * 1987; Master's, 1984, Arizona State University
JIRIKOWIC, TRACY L. * 1993; Master's, 1995, University of Washington
JOHNSON, KURT LEWIS * 1990; Bachelor's, 1978, University of Washington
KARTIN, DEBORAH * 1984; Bachelor's, 1973, Boston University
KRAFT, GEORGE HOWARD * 1982; Bachelor's, 1958, Harvard University
LITTLE, JAMES WENDELL * 1984; Bachelor's, 1972, Brigham Young University
MASSAGLI, TERESA L. * 1985; Bachelor's, 1978, Brown University
MCCOY, SARAH WESTCOTT * 1984; Bachelor's, 1976, The University of Montana
MOLTON, IVAN, 2005; Master's, 2001, University of Colorado at Colorado Springs
PATTERSON, DAVID R. * 1984; Bachelor's, 1977, Emory University
PEPPING, MARY, 1994; Master's, 1975, California State University-Los Angeles
SHUMWAY-COOK, ANNE, 1995; Bachelor's, 1969, Indiana University-Bloomington
SLIMP, JEFFERSON C, 1979; Bachelor's, 1970, University of Washington
TURNER, AARON P., 1995; Master's, 1997, University of Washington
WILLIAMS, RHONDA M., 1998; Master's, 1995, Arizona State University
YORKSTON, KATHRYN * 1975; Bachelor's, 1970, Stanford University

Associate Professors

ALSCHULER, KEVIN N, 2010; Master's, 2006, Eastern Michigan University
BARR, KAREN P., 2001; Bachelor's, 1989, Kent State University
BAYLOR, CAROLYN RAE * 1987; Bachelor's, 1991, University of Washington
BROWN, MARY BETH, 2018; Doctorate, 2009, Georgia Institute of Technology-Main Campus
BURNS, STEPHEN P. * 1992; Bachelor's, 1988, Brown University
CRANE, DEBORAH ANN, 2005; Bachelor's, 1999, Santa Clara University
FOGELBERG, DONALD J, 2010; Bachelor's, 1989, Occidental College
GUTHRIE, MARK R., 1983; Master's, 1980, University of Washington
HAKIMI, KEVIN N., 2000; Bachelor's, 1996, University of Michigan-Ann Arbor
HARNISS, MARK * 1998; Doctorate, 1996, University of Oregon
HECKMAN, JEFFREY T, 2012; Bachelor's, 2002, Pennsylvania State University-College of Medicine
HOLDEFER, ROBERT N, 2009; Bachelor's, 1979, Drake University
HOWARD, ILEANA M, 2005; Medical Doctorate, 2004, Harvard University
KANNY, ELIZABETH M, 1982; Master's, 1977, Seattle University
KELLY, VALERIE E * 2003; Bachelor's, 1996, University of Pennsylvania
KINNEY, GREGORY A. * 1997; Doctorate, 1996, Northwestern University
MACK, DAVID L * 2012; Master's, 1993, Indiana University-Bloomington
MAITLAND, MURRAY E * 2006; Bachelor's, 1984, University of British Columbia
MARTINEZ, VICENTE, 2000; Bachelor's, 1998, Michigan State University
MC MILLAN, JO ANN, 1982; Bachelor's, 1953, University of North Texas
MCGOUGH, ELLEN L. * 1990; Master's, 2003, University of Washington
MCQUADE, KEVIN J * 1982; Bachelor's, 1980, California State University-Long Beach
MORGENROTH, DAVID C * 2004; Medical Doctorate, 2003, SUNY
MROZ, TRACY * 2014; Master's, 2005, Boston University
ODDERSON, IB R. * 1985; Doctorate, 1979, Indiana University-Bloomington
OSORIO, MARISA, 2012; Medical Doctorate, 2006, Ohio Christian University
POWELL, JANET M. * 1998; Bachelor's, 1973, University of Washington
PRADHAN, SUIJATA * 2008; Bachelor's, 1998, Mumbai University
ROBINSON, CYNTHIA ANN, 1992; Bachelor's, 1986, Ithaca College
SPAULDING, SUSAN E, 1995; Master's, 2007, University of Oregon
SURI, PRADEEP, 2003; Master's, 2011, Harvard University
SVIRCEV, JELENA N, 2005; Bachelor's, 1997, University of Minnesota-Duluth
WIECHMAN, SHELLEY A * 1994; Master's, 1994, University of Arizona
YAMANE, ANN, 1979; Bachelor's, 1976, University of Washington
YORK, BERNADETTE WILLIAMS, 2019; Bachelor's, 1983, Tulane University of Louisiana
ZUMSTEG, JENNIFER M, 2005; Bachelor's, 2001, Sonoma State University

Assistant Professors

AGRESTA, CRISTINE E, 2019
BUNNELL, AARON ELIJAH, 2008; Bachelor's, 1998, Stanford University
CUMMER, KATHLEEN, 2019
DASHER, NICKOLAS A, 2017
DEL PIERO, LARISSA, 2016
FELDNER, HEATHER * 2016; Bachelor's, 1998, Marquette University
FUENTES, MOLLY M, 2008; Bachelor's, 2003, Stanford University
GILBERTSON, TOREY J, 2010; Doctorate, 2003, Pacific University
HUMBERT, ANDREW, 2013
JUNN, CHERRY C, 2014; Bachelor's, 2007, Boston University
KAPP, SUSAN L, 2017; Bachelor's, 1979, Texas A & M University
LAM, NY-YING, 2015; Medical Doctorate, 2011, Emory University
LEE, DANBI, 2018
LEUNG, AUDREY SAN, 2019
MATSUDA, PATRICIA A, 1993; Bachelor's, 1982, University of Washington
MCCULLOUGH, JANIS A, 2014
MORGAN, SARA J., 2001; Bachelor's, 2004, University of Washington
PHAM, KELLY LORAINE DAUER, 2014; Bachelor's, 2006, Canisius College
RAD, NASSIM, 2017
RUNDELL, SEAN, 2009; Doctorate, 2005, Duke University
SMITH, REBECCA, 2017
SONG, SHAWN H, 2011; Master's, 2009, University of California-San Francisco
STAROSTA, AMY, 2017
TSAO, ELAINE Y, 2009; Medical Doctorate, 2008, Medical College of Wisconsin

Senior Lecturer
OKUMURA, RAMONA M., 1990; Bachelor's, 1981, University of Washington

Lecturer
BENNETT, KIMBERLY D., 1996

ZHANG, WAYNE WEI, 2017
ZIERLER, ROBERT, 1984; Bachelor's, 1973, Johns Hopkins University
ZIMPFER, DANIEL, 2020; Medical Doctorate, 2002, Medizinische Universität Wien; Medicine

**Associate Professors**

ATKINS, BROADUS ZANE, 2017
AVANSINO, JEFFREY RONALD, 1999; Master's, 2016, Seattle University; Business Administration/Management
BIRGFELD, CRAIG B, 2006; Bachelor's, 1994, College of William and Mary
CALHOUN, KRISTINE E., 2005; Bachelor's, 1992, University of Washington
CHENG, AARON MING, 2007; Bachelor's, 1994, Harvard University
COLOHAN, SHANNON MARGARET, 2011; Bachelor's, 2000, Dalhousie University
COWAN, MICHELLE L, 2020; Medical Doctorate, 2007, Virginia Commonwealth University; Medicine
DAVIDSON, GIANA HYSTAD, 2003; Bachelor's, 2002, Montana State University
DICK, ANDRE AINSWORTH S., 2006; Bachelor's, 1995, New York University
DRUGAS, GEORGE THEODORE, 2008; Bachelor's, 1980, Northwestern University
EVANS, HEATHER L, 2007; Medical Doctorate, 1999, University of Rochester
FAJARAH, FARHOOD, 2002; Medical Doctorate, 2002, Oregon Health & Science University
FIGUEREDO, EDGAR JOSE, 2003; Medical Doctorate, 1988, Universidad El Bosque
JAVID, PATRICK J, 2008; Bachelor's, 1996, University of Michigan-Ann Arbor
JAVID, SARA H, 2008; Bachelor's, 1995, Cornell University
KEYS, KARI ANNE, 2006; Medical Doctorate, 2006, University of California-San Francisco
KHANDELWAL, SAURABH, 2008; Bachelor's, 1998, George Washington University
KRANE, MUKTA KATDARE, 2014; Medical Doctorate, 2002, Mount Sinai School of Medicine
LAVALLE, DANIELLE M. * 2012; Medical Doctorate, 2003, University of Kansas
LOUIE, OTWAY, 2008; Bachelor's, 1993, Massachusetts Institute of Technology
LYNGE, DANA C., 1993; Medical Doctorate, 1985, McGill University
MANDELL, SAMUEL P, 2005; Bachelor's, 2000, Brown University
MAUCHLEY, DAVID COURTNEY, 2020; Medical Doctorate, 2004, University of Washington; Medicine
MCINTYRE, LISA KUWAMURA, 1987; Bachelor's, 1989, University of Washington
MEEHAN, JOHN JAMES, 2008; Medical Doctorate, 1993, University of Iowa
MONTENOVO, MARTIN IGNACIO, 2004
PERMUT, LESTER C., 2002; Bachelor's, 1983, Boston University
PETERSEN, REBECCA P, 2009; Master's, 2000, Harvard University
QUIROGA, ELINA, 2002; Medical Doctorate, 1998, Universidad de Buenos Aires
RASMUSSEN, SARA K., 2020; Medical Doctorate, 2004, West Virginia University; Medicine
RIEHLE, KIMBERLY, 2001; Medical Doctorate, 2001, Emory University
ROBINSON, BRYCE RH, 2015; Bachelor's, 1997, Miami University-Oxford
SAID, HAKIM K, 2006; Bachelor's, 1994, Johns Hopkins University
SHALHUB, SHERENE, 2003; Bachelor's, 1998, University of South Florida
SIBULESKY, LENA, 2013; Bachelor's, 1997, Brandeis University
SMITH, JASON W, 2012; Bachelor's, 1993, Baylor University
STURDEVANT, MARK LEO, 2020; Medical Doctorate, 1999, University of Iowa; Medicine
SWEET, MATTHEW P, 2011; Bachelor's, 1998, Dartmouth College
TANG, GALE LYNN, 2008; Bachelor's, 1991, University of Michigan-Ann Arbor
TRAN, NAM THANH, 1992; Bachelor's, 1992, University of Washington
TSE, RAYMOND, 2009; Bachelor's, 1996, Queen's University
VAN EATON, ERIK, 1996; Bachelor's, 1992, Oregon State University
WU, PETER CHANG CHUNG, 2004; Medical Doctorate, 1993, Jefferson College

**Assistant Professors**

ATKINSON, SARAH J, 2019; Bachelor's, 2007, Tulane University of Louisiana; Neuroscience
BERFIELD, KATHLEEN S., 2005; Medical Doctorate, 2010, University of Washington
BERNIER, GRETA VALENTINE, 2008; Bachelor's, 2004, University of San Diego
BURKE, CHRISTOPHER R., 2011; Medical Doctorate, 2011, University of Michigan-Ann Arbor
CHEN-MEEKIN, JUDY Y, 2017; Medical Doctorate, 2007, Loyola University Chicago
CHOW, WARREN, 2017
ESTEFANO, LAUREN M., 2020; Bachelor's, 2008, Fordham University; Biology
ETTINGER, RUSSELL EDWARD, 2018; Bachelor's, 2007, University of Washington; Neurobiology
FLANAGAN, MEGHAN R., 2010; Medical Doctorate, 2010, Albert Einstein College of Medicine; Medicine
GOLDSBERRY-LONG, SARAH R., 2013
GOGOUTAS, ALEXANDER J, 2012; Bachelor's, 2000, University of Pennsylvania
GREENBERG, SARAH, 2017; Master's, 2014, Harvard University; Public Health
HANANEL, DAVID M, 2016
HERMSEN, JOSHUA L., 2011; Bachelor's, 2000, Citadel Military College of South Carolina
INCHAUSTE, SUZANNE M, 2019; Medical Doctorate, 2006, Indiana University-Purdue University-Indianapolis; Medicine
KAO, DENNIS SHUN JEN, 1997; Medical Doctorate, 2003, The University of Texas Medical Branch
KEENAN, JEFFREY EDWARD, 2020; Medical Doctorate, 2011, University of Maryland-Baltimore; Medicine
KHORSANDI, MAZIAR, 2020; Medical Doctorate, 2010, University of Dundee; Medicine
KIM, TERESA, 2017; Medical Doctorate, 2008, Harvard University; Medicine
KLING, CATHERINE ELIZABETH, 2016; Bachelor's, 2004, Dartmouth College
MAINE, REBECCA GWYNNE, 2016; Master's, 2013, Harvard University; Public Health
MARQUARDT, DEBORAH LANE, 2002; Medical Doctorate, 2002, Loma Linda University
MILLER, ERIN A, 2012; Medical Doctorate, 2012, Case Western Reserve University; Medicine
NEHRA, DEEPIKA, 2019; Medical Doctorate, 2007, Stanford University; Medicine
O’CONNELL, KATHLEEN M., 2015
OYETUNJI, SHAKIRAT OMOLARA, 2016; Medical Doctorate, 2009, University of Chicago; Medicine
RICE-TOWNSEND, SAMUEL, 2016; Bachelor’s, 2001, Amherst College; Biology
SHAM, JONATHAN GHING CHI, 2010; Bachelor’s, 2006, Brandeis University; Biochemistry
SHIN, SUSANNA, 2014; Bachelor’s, 1998, College of William and Mary
SMITH, CAITLIN A., 2000; Medical Doctorate, 2009, Albany Medical College; Medicine
SOUSA, JANELLE DUBBINS, 2004; Bachelor’s, 2005, University of Washington
STARK, REBECCA ANNE, 2018
STEWART, BARCLAY T., 2011; Medical Doctorate, 2011, Medical University of South Carolina; Medicine
SUSARLA, SRINIVAS M, 2016; Master’s, 2007, Harvard University
WANG, DUANE, 2020; Medical Doctorate, 2013, Ohio State University-Main Campus; Medicine
WILLIAMS, ESTELL JAMIELA, 2009; Bachelor’s, 2007, University of San Francisco; Biology
ZERN, NICOLE KANSIER, 2010; Medical Doctorate, 2010, Emory University
ZETTERVALL, SARA L., 2020; Medical Doctorate, 2011, George Washington University; Medicine

Professors

ANSELL, JULIAN S, 1959; Bachelor’s, 1947, Bowdoin College
CAIN, MARK, 2019; Medical Doctorate, 1987, Oregon Health & Science University
CHAPMAN, WARREN H, 1962; Bachelor’s, 1946, Massachusetts Institute of Technology
DALKIN, BRUCE L, 2008; Medical Doctorate, 1985, Northwestern University
ELLIS, WILLIAM J., 1991; Medical Doctorate, 1985, Johns Hopkins University
GORE, JOHN L, 2009; Medical Doctorate, 2001, Baylor University
JOYNER, BYRON DAVID, 1999; Medical Doctorate, 1988, Harvard University
LANG, PAUL HENRY, 1988; Medical Doctorate, 1967, Washington State University
LENDVAY, THOMAS S * 2004; Bachelor’s, 1995, Rice University
LIN, DANIEL W., 1994; Bachelor’s, 1989, Stanford University
MERGUEIRAN, PAUL ARTHUR, 2011; Master’s, 2009, Dartmouth College
PORTER, MICHAEL, 1997; Bachelor’s, 1992, University of Iowa
SHNHORHAVORIAN, MARGARETT, 2005; Master’s, 1999, University of California-Berkeley
SWEET, ROBERT, 1997; Medical Doctorate, 1997, University of Minnesota-Duluth
WALSH, THOMAS JAMES, 2000; Medical Doctorate, 2000, Northwestern University
WESSELS, HUNTER, 2000; Bachelor’s, 1984, Georgetown University
WRIGHT, JONATHAN, 1998; Medical Doctorate, 2001, University of Washington
XIN, LI, 2018
YANG, CLAIRE C, 1993; Medical Doctorate, 1988, Vanderbilt University

Associate Professors

DASH, ATREYA, 2013; Medical Doctorate, 1998, University of Vermont
HARPER, JONATHAN D, 2009; Bachelor’s, 1996, University of California-Santa Cruz
KIERAN, KATHLEEN, 2015; Medical Doctorate, 2002, Boston University
MILLER, JANE L., 1985; Medical Doctorate, 1985, University of Central Oklahoma
MULLER, CHARLES HOLBROOK, 1980; Doctorate, 1976, University of California-Berkeley
SORENSEN, MATHEW D., 2004; Medical Doctorate, 2004, University of Colorado Denver
SUTHERLAND, SUZETTE E, 2013; Medical Doctorate, 1997, Case Western Reserve University
VOELZKE, BRYAN B, 2008; Bachelor’s, 1996, Baylor University

**Assistant Professors**

AHN, JENNIFER, 2015; Bachelor’s, 2004, Harvard University
FERNANDEZ BONILLA, JOSE NICOLAS, 2020
HAGEDORN, JUDITH C, 2014; Master’s, 2004, Johns Hopkins University
HAIDER, MAAHUM A., 2010; Medical Doctorate, 2010, University of California-Los Angeles
HEHEMANN, MARAH, 2018; Doctorate, 2012, Rush University
NYAME, YAW, 2018; Master’s, 2007, George Washington University; Health Administration
OSTROWSKI, KEVIN, 2015; Medical Doctorate, 2009, University of Missouri-St Louis
PSUTKA, SARAH, 2018; Bachelor’s, 2003, Harvard University; Biology
SCHADE, GEORGE R, 2013; Bachelor’s, 2003, University of Chicago
SKOKAN, ALEXANDER JOSEUF, 2019; Medical Doctorate, University of Pennsylvania
School of Nursing

LAZARUS, JUDY * 1984; Master's, 1988, University of California-San Francisco
LOVELL, DAVID GILBERT, 1984; Bachelor's, 1968, Carleton College
MARKS, JESSIE NOEL, 2018; Doctorate, 2014, University of Washington; Nursing
O'CONNOR, MARY R * 2009; Bachelor's, 2003, New York University
RASMUSSEN, SHERYL RUHLMAN, 1987
REDING, KERRYN WALCK * 2003; Bachelor's, 1998, Arizona State University
SADAK, TATIANA I * 2008
SCHROEDER, CAROLE A. * 1993; Doctorate, 1993, University of Colorado Denver
SUMMEROUR, MELANIE, 1995; Master's, 1991, Emory University
TAKAMIYA, KRISTINE * 2013; Master's, 2001, Columbia University
TANG, HSIN-YI * 1998; Bachelor's, 1994, Duquesne University
TSAI, JENNY HSIN-CHUN * 1992; Bachelor's, 1990, National Yang Ming University
WALKER, AMY LYNNE * 2010
WALSH, ELAINE M. * 1994; Bachelor's, 1986, Mount St Mary's College
WILLGERODT, MAYUMI * 2001; Bachelor's, 1987, Georgetown University
WOLPIN, SETH * 2004; Bachelor's, 1994, New York University
ZASLAVSKY, OLEG * 2008; Master's, 2007, Tel Aviv University

Assistant Professors

ALTMAN, MOLLY R * 2017; Bachelor's, 2002, University of Vermont; Nursing
AULD, JONATHAN, 2018; Doctorate, 2018, Oregon Health & Science University
BLAKEY, ERIN LINDSEY * 2009; Bachelor's, 2005, Johns Hopkins University
BYUN, EEESEUNG * 2016; Bachelor's, 2000, Ewha Womens University
HASH, JONIKA B, 2018; Bachelor’s, 2010, University of Washington; Nursing
IRIBARREN, SARAH * 2016; Doctorate, 2013, University of Utah
KANTROWITZ-GORDON, IRA * 1993; Bachelor’s, 1990, Brown University
MATTHEWS, SARAH W. * 1992; Bachelor’s, 1988, University of Washington
MYERS, JULIE, 2006; Bachelor’s, 2007, University of Washington
PINTYE, JILLIAN C. * 2012
SONNEY, JENNIFER TEDDER * 2005; Doctorate, 2015, University of Arizona
STREUR, MEGAN * 2016; Bachelor’s, 2005, Oral Roberts University
VANDRAANEN EARWAKER, JENNA * 2020; Doctorate, 2017, University of California-Los Angeles; Public Health

Senior Lecturers

BOSQUE, ELENA MARIE, 2000; Master’s, 1984, University of California-San Francisco
KROENING, KATHLEEN M, 1990

Lecturers

BANASIK, JACQUELYN, 2018; Master’s, 1983, University of Washington
CARROLL, MAURA, 2018
CUNITZ, TAMARA CYHAN, 2005; Bachelor’s, 1994, Catholic University of America
FRANTZ, LAURA, 2013; Bachelor’s, 2008, Edgewood College
GERICH, ANNE E., 2017; Doctorate, 2013, University of Washington; Nursing
HUYNH, DOQUYEN LE, 2018
JOHNSON, KATHLEEN H, 2016; Doctorate, 2013, University of Washington; Nursing
KALKBRENNER, ANNE CLAIRE, 1997; Bachelor’s, 1988, Baylor University
MORIARTY, ERIN C, 2013; Bachelor’s, 2002, Duquesne University
SHERLEY, CLARE M., 2019
SIMPSON, JESSICA, 2007
STEVENS, MEGAN, 2017; Bachelor’s, University of Northern Colorado
School of Pharmacy

Medicinal Chemistry

Professors

ATKINS, WILLIAM M. * 1991; Bachelor's, 1980, College of William and Mary
ELMER, GARY W, 1982; Doctorate, 1970, Rutgers University-Camden
KRUPSKI, EDWARD, 1983; Bachelor's, 1939, University of Washington
NELSON, WENDEL * 1965; Bachelor's, 1962, Idaho State University
RETTIE, ALLAN E. * 1984; Bachelor's, 1979, Heriot-Watt University

Associate Professors

KUNZE, KENT * 1989; Doctorate, 1981, University of California-San Francisco
LEE, KELLY K. * 2009; Bachelor's, 1996, Harvard University
NATH, ABHINAV * 2003; Doctorate, 2008, University of Washington
TOTAH, RHEEM A. * 2002
XU, LIBIN * 2014; Bachelor's, 2002, Nankai University

Assistant Professors

BHARDWAJ, GAURAV * 2014
GUTTMAN, MIKLOS * 2010; Bachelor's, 2003, University of California-Irvine

Pharmaceutics

For complete faculty listing, please visit https://sop.washington.edu/department-of-pharmaceutics/faculty/

Professors

HO, RODNEY J.Y. * 1990; Master's, 1985, The University of Tennessee
HU, SHIU-LOK * 1988; Bachelor's, 1971, University of California-Berkeley
RAGUENAUX-MAJLESSI, ISABELLE * 1999; Medical Doctorate, 1993, American University of Paris
THUMMEL, KENNETH E. * 1982; Bachelor's, 1978, Boise State University
UNADKAT, JASHVANT D * 1985; Bachelor's, 1977, University of London
WANG, JOANNE * 2000; Bachelor's, 1992, Peking University

Associate Professors

KELLY, EDWARD J * 1991; Bachelor's, 1985, University of California-Riverside
LIN, YVONNE S. * 1997; Bachelor's, 1994, University of California-Berkeley
MAO, QINGCHENG * 2002; Bachelor's, 1985, East China Normal University

Assistant Professor

PRASAD, BHAGWAT, 2011; Bachelor's, 2004, Hemwati Nandan Bahuguna Garhwal University
Pharmacy

For complete faculty listing, please visit https://sop.washington.edu/department-of-pharmacy/faculty-staff/

Professors

ANDERSON, GAIL * 1981; Bachelor's, 1978, University of Washington
BASU, ANIRBAN * 2010; Bachelor's, 1995, Jadavpur University
BAUER, LARRY, 1980; Medical Doctorate, 1980, University of Kentucky
BLACK, DOUGLAS J, 1981; Bachelor's, 1981, University of Washington
BOUDREAU, DENISE M. * 1998; Bachelor's, 1992, University of Rhode Island
BURKHART, VINCENT D, 1982; Bachelor's, 1959, University of Maryland-University College
CHAN, LINGTAK-NEANDER * 1994; Bachelor's, 1994, Northeastern University
DEVINE, EMILY E. * 1999; Master's, 1999, University of California-San Francisco
GARDNER, JACQUELINE S., 1990; Bachelor's, 1962, University of California-Berkeley
GARRISON, LOUIS P, 2004; Bachelor's, 1972, Indiana University-Bloomington
GRAY, SHELLY L. * 1995; Medical Doctorate, 1989, University of Michigan-Ann Arbor
HANSTEN, PHILIP D, 1989; Medical Doctorate, 1968, University of California-San Francisco
HEBERT, MARY F * 1996; Medical Doctorate, 1987, University of California-San Francisco
ISOHERRANEN, NINA * 2003; Doctorate, 2003, Hebrew University of Jerusalem
LEO, RENE H * 1982; Doctorate, 1970, University of California-San Francisco
ODEGARD, PEGGY SOULE, 1986; Bachelor's, 1985, University of Washington

Professors

ALLARD, SCOTT W * 2014; Doctorate, 1999, University of Michigan-Ann Arbor
ANDERSON, C. LEIGH * 1984; Bachelor's, 1984, University of Calgary
BOSTROM, ANN * 2007; Doctorate, 1990, Carnegie Mellon University
CULLEN, ALISON * 1995; Master's, 1989, Harvard University
GORDON, ANDREW * 1988; Doctorate, 1970, Columbia University
GORDON, MARGARET T, 1988; Bachelor's, 1961, Northwestern University
GUGERTY, MARY KAY * 2001; Bachelor's, 1985, Georgetown University
HILL, HEATHER D * 2014; Doctorate, 2007, Northwestern University
KLAWITTER, MARIEKA * 1990; Bachelor's, 1983, University of Michigan-Ann Arbor
LAYTON, DAVID F * 1990; Bachelor's, 1989, University of Virginia-Main Campus
LOCKE, HUBERT G, 1976; Bachelor's, 1959, University of Chicago
LAYTON, DAVID F * 1990; Bachelor's, 1989, University of Virginia-Main Campus
HILL, HEATHER D * 2014; Doctorate, 2007, Northwestern University
KLAWITTER, MARIEKA * 1990; Bachelor's, 1983, University of Michigan-Ann Arbor
LAYTON, DAVID F * 1990; Bachelor's, 1989, University of Virginia-Main Campus
LOCKE, HUBERT G, 1976; Bachelor's, 1959, University of Chicago
LONG, MARK C * 2004; Bachelor's, 1989, DePauw University
MARLOWE, JUSTIN, 2009; Bachelor's, 1999, Northern Michigan University
MCCORKLE, SANDRA ARCHIBALD * 2003; Bachelor's, 1967, University of California-Berkeley
PLOTNICK, ROBERT D. * 1984; Bachelor's, 1971, Princeton University
THOMAS, CRAIG W. * 2006; Master's, 1988, University of California-Berkeley
VIGDOR, JACOB L * 2014; Bachelor's, 1994, Cornell University
ZERBE, RICHARD O. * 1975; Doctorate, 1969, Duke University
ZUMETA, WILLIAM M * 1985; Bachelor's, 1969, Haverford College; Political Science

Associate Professors

BARNHART, ERICA * 1999; Bachelor's, 1995, University of Washington; Political Science
BLUME, GRANT H, 2007; Bachelor's, 2001, University of Oregon
BROCK, JONATHAN, 1982; Bachelor's, 1971, Franklin and Marshall College
COOK, JOSEPH H, 2007; Bachelor's, 1996, Cornell University
CUEVAS, CARLOS E, 2012; Doctorate, 1984, Ohio State University Agricultural Technical Institute
EVANS, LAURA E * 2004; Bachelor's, 1994, University of California-Berkeley
FRITZEN, SCOTT A * 2015; Bachelor's, 1991, Michigan State University
FYALL, RACHEL * 2014; Master's, 2006, George Washington University
HALL, CRYSTAL C * 2008; Bachelor's, 2003, Carnegie Mellon University
HERRANZ JR, JOAQUIN * 2004; Doctorate, 2004, Massachusetts Institute of Technology
KIOKO, SHARON N * 2015; Master's, 2004, Indiana University-Bloomington
KOSACK, STEPHEN * 2013; Bachelor's, 2001, University of Miami
PAGE, STEPHEN B * 1999; Master's, 1989, Massachusetts Institute of Technology
QUINN, ADRIENNE E, 2014; Bachelor's, 1984, College of the Holy Cross
STEUERWALT, MATTHEW, 1995; Bachelor's, 1990, University of California-San Diego
SUAREZ, DAVID * 2013; Master's, 2002, Stanford University
VIGDOR, ELIZABETH R, 2014; Master's, 1995, Harvard University
Assistant Professors

BRUNJES, BENJAMIN M * 2016; Master's, 2012, University of Georgia
DILLON, BRIAN M, 2013; Master's, 2009, Cornell University
JURCEVIC, INES * 2017; Doctorate, 2016, University of California-Los Angeles; Social Psychology
KIM, CAROLINE WEBER, 2018; Doctorate, 2012, University of Michigan-Ann Arbor; Economics
MARTIN, KARIN D. * 2017; Bachelor's, 1995, Stanford University
XU, DAFENG, 2019; Doctorate, 2016, Cornell University

Senior Lecturers

BULLITT, DOROTHY C, 2009; Doctorate, 1980, Boston University
GONZALEZ, MICHELLE, 2011; Master's, 1994, Harvard University
School of Public Health

Biostatistics

Professors

BARLOW, WILLIAM E. * 1984; Master's, 1976, University of Toronto
BROWN, ELIZABETH * 2002; Doctorate, 2002, Harvard University
BROWNING, SHARON * 1995; Bachelor's, 1995, University of Auckland
CHAN, KWUN CHUEN GARY * 2008; Doctorate, 2008, Johns Hopkins University
CHEN, YING QING * 2005; Doctorate, 1999, Johns Hopkins University
DIEHR, PAULA K., 1982; Bachelor's, 1963, Harvey Mudd College
FISHER, LLOYD D, 1982; Master's, 1965, Dartmouth College
FLEMING, THOMAS RICHARD * 1984; Master's, 1974, University of Maryland-University College
GILBERT, PETER B * 1991; Bachelor's, 1992, University of Washington
HALLORAN, M. ELIZABETH * 2006; Medical Doctorate, 1983, Freie Universität Berlin
HALLSTROM, ALFRED, 1982; Master's, 1961, Brown University
HEAGERTY, PATRICK J. * 1995; Bachelor's, 1985, Cornell University
HSU, LI * 1989; Bachelor's, 1989, Nanjing University
HUGHES, JAMES P * 1982; Bachelor's, 1977, University of Maine
INOUE, LURDES * 2002; Master's, 1998, Duke University
KERR, KATHLEEN F. * 2001; Bachelor's, 1993, Bryn Mawr College
KOOPERBERG, CHARLES L * 1991; Master's, 1985, Delft University of Technology
KRONMAL, RICHARD A * 1964; Bachelor's, 1961, University of California-Los Angeles
LE BLANC, MICHAEL * 1987; Bachelor's, 1983, Simon Fraser University
MAY, SUSANNE * 2008; Master's, 1994, Universität Karlsruhe (Karlsruhe Institute of Technology)
MCCELLAND, ROBYN L. * 1994; Bachelor's, 1991, McGill University
MCKNIGHT, BARBARA * 1981; Bachelor's, 1976, Pomona College
PRENTICE, ROSS L * 1974; Master's, 1968, University of Toronto
RICE, KENNETH M. * 2004; Bachelor's, 1995, University of Cambridge
RICHARDSON, BARBRA * 1993; Bachelor's, 1987, Pomona College
SHOJAIE, ALI * 2010; Master's, 2001, Amirkabir University of Technology
THOMPSON, MARY LOU * 1982; Doctorate, 1979, Universität Göttingen
THORNTON, TIMOTHY * 2009; Bachelor's, 1998, Hampton University
WAHL, PATRICIA W, 1982; Bachelor's, 1960, San Jose State University
WEIR, BRUCE SPENCER * 2005; Doctorate, 1968, North Carolina A & T State University

Associate Professors

BRUMBACK, LYNDIA C. * 2001; Master's, 1996, University of Wisconsin-Madison
CARONE, MARCO * 2013; Doctorate, 2010, Johns Hopkins University
COOK, ANDREA * 2000; Master's, 2003, Harvard University
EMOND, MARY JANE * 1987; Bachelor's, 1984, University of Minnesota-Duluth
JANES, HOLLY E. * 2000; Bachelor's, 1998, Skidmore College
LUMLEY, THOMAS S. * 1995; Bachelor's, 1991, Monash University
POLISSAR, NAYAK LINCOLN * 1980; Master's, 1968, Princeton University
SHORTREED, SUSAN * 2001; Bachelor’s, 2001, University of Michigan-Ann Arbor
SIMON, NOAH * 2013; Bachelor’s, 2008, Pomona College
SZPIRO, ADAM A. * 2006; Doctorate, 1999, Brown University
WU, MICHAEL * 2015; Master’s, 2006, Harvard University
ZHAO, YINGQI * 2017; Master’s, 2007, Fudan University; Operations Management

Assistant Professors

DAI, JAMES YU * 2002; Medical Doctorate, 1998, Peking University
LILA, EARDI, 2019; Master’s, 2014, Politecnico di Milano
SADINLE GARCIA-RUIZ, MAURICIO * 2017; Master’s, 2011, Carnegie Mellon University; Statistics
WANG, CHING-YUN * 1993; Bachelor’s, 1983, National Taiwan Normal University
WILLIS, AMY DONALDSON * 2017; Bachelor’s, 2011, Australian National University; Actuarial Science

Lecturer

GOGARTEN, JENNIFER, 2003; Bachelor’s, 2006, University of Chicago; Biology

Environmental and Occupational Health Sciences
