UNIVERSITY ADMINISTRATION

- Ana Mari Cauce, President
 - Mark Richards, Provost and Executive Vice President for Academic Affairs
 - Timothy H. Dellit, Interim Executive Vice President for Medical Affairs
 - Lisa Brandenburg, Vice President for Medical Affairs
 - Jacqueline Cabe, Vice President for Medical Affairs
 - Ruth Mahan, Vice President for Medical Affairs
 - Don Theophilus, Vice President for Medical Affairs
 - Paul Rucker, Vice President of Alumni and Stakeholder Engagement
 - Mary Gresch, Senior Vice President for University Advancement
 - Tamara M. Josserand, Vice President of Development
 - Randy Hodgins, Vice President of External Affairs
 - Lou Cariello, Vice President of Facilities
 - Brian McCartan, Vice President of Finance
 - Mindy Kornberg, Vice President of Human Resources
 - Andreas Bohman, Vice President of Information Technology and Chief Information Officer
 - Rickey Hall, Vice President of Minority Affairs and Diversity
 - Denzil Suite, Vice President of Student Life
 - Philip J. Reid, Vice Provost of Academic and Student Affairs
 - Cheryl A. Cameron, Vice Provost of Academic Personnel
 - Rovy Branon, Vice Provost of Continuum College
 - Jeffrey Riedinger, Vice Provost of Global Affairs
 - François Baneyx, Vice Provost of Innovation
 - Sarah Norris Hall, Vice Provost of Planning and Budgeting
 - Mari Ostendorf, Vice Provost of Research
 - Ed Taylor, Vice Provost and Dean of Undergraduate Academic Affairs
 - Helen Garret, University Registrar
-

BOARD OF REGENTS

- William S. Ayer
- Leonard Forsman
- Leonor R. Fuller
- Jeremy Jaech
- Elizabeth Lee
- Libby G. MacPhee
- Constance W. Rice
- Rogelio Riojas
- Blaine Tamaki
- David Zeeck

ABOUT THE UNIVERSITY OF WASHINGTON

Founded in 1861, the University of Washington is one of the oldest state-assisted institutions of higher education on the Pacific coast. From its original site on a 10-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 703 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation. Two additional campuses, one south of Seattle in Tacoma, and one north in Bothell, were opened in 1990. Enrollment at the University in autumn quarter 2021 was more than 60,000, across all three campuses, of which 42,500 were undergraduates and the balance were in professional and graduate programs. Nearly 75% of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. In 2021, the teaching faculty of the University numbered more than 5,000 members.

ROLE AND MISSION OF THE UNIVERSITY

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of sixteen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation's outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the University seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through continuing education and distance learning, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington Seattle campus is its College of Arts and Sciences; the teaching and research of the University's many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of built environments, business, education, engineering, environment, information, nursing, pharmacy, public policy, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the University, share a long tradition of educating undergraduate and graduate students toward achieving an excellence that well serves the state, the region, and the nation.

BR, February 1981; February 1998; AI, December 2001; BR, July 11, 2013; RC, September 23, 2016; RC, September 20, 2017; [formerly numbered Regent Policy No. 5] BR, July 11, 2019.

NON-DISCRIMINATION POLICY

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Gubernatorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans' Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is provided by the Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195, 206-543-1830, eoaa@uw.edu.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, can be found in UW Executive Order No 31.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, contact Disabled Resources for Students, 206-543-8924 (voice and relay), uwdrs@uw.edu; for other non-academic related information and accommodation, contact the Disability Services Office, 206-543- 6450 (voice), 206-543-6452 (TTY), dso@uw.edu.

ACCREDITATION

The University of Washington is accredited by the Northwest Commission on Colleges and Universities (NWCCU). Individual schools and colleges are members of the various accrediting association in their respective fields. Currently enrolled or prospective students should contact the Office of the University Registrar to review accreditation documents for the University and the respective departments to review programmatic accreditation documents.

The University of Washington General Catalog is produced by the Office of the University Registrar at the University of Washington:
registrar@u.washington.edu.

KEY TO SYMBOLS AND ABBREVIATIONS

COURSE DESCRIPTIONS

Each course listing includes prefix, course number, title and credits. Each listing also may include general education designator(s), names of instructor(s), description of the course, prerequisite(s), and quarter(s) offered.

Specific information on courses offered in a particular quarter appears in the [quarterly Time Schedule](#).

COURSE NUMBERS

- **100–299** Lower-division courses primarily for freshmen and sophomores.
- **300–499** Upper-division courses primarily for juniors, seniors, and postbaccalaureate (fifth-year) students. Graduate students may enroll in 300- and 400-level courses. When acceptable to the major department and the Graduate School, approved 400-level courses may be applied as graduate credit in the major field and approved 300-level courses may be applied in the supporting field(s).
- **500+** Restricted to graduate students. (Courses numbered in the 500 and 600 series with a P before the course title denote professional courses for students in the schools of Dentistry and Medicine, and such courses may not be applied as graduate credit in the Graduate School.) Undergraduate, postbaccalaureate, and nonmatriculated students who wish to register for 500-level courses must obtain permission from the instructor of the class, departmental Chair, or other designated person.

Graduate School-Restricted Courses

Graduate courses numbered 600, 601, 700, 750, or 800 are restricted to students in the Graduate School. They appear by number and title only where applicable under the departmental course listings in this catalog. Descriptions for these courses are listed below.

- **(PREFIX) 600 Independent Study or Research (*)** Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program advisor.
- **(PREFIX) 600 Internship (3–9, max. 9)** Internship required of students in a graduate degree program. Prerequisite: permission of Supervisory Committee chair or graduate program advisor.
- **(PREFIX) 700 Master's Theses (*)** Research for the master's thesis, including research preparatory or related thereto. Limited to premaster graduate students (i.e., those who have not yet completed the master's degree in their major field at the University of Washington). Prerequisite: permission of Supervisory Committee or graduate program advisor.
- **(PREFIX) 750 Internship (*)** Internship required of all graduate students in the Doctor of Arts degree program.
- **(PREFIX) 800 Doctoral Dissertation (*)** Research for the doctoral dissertation and research preparatory or related thereto. Limited to graduate students who have completed the master's degree or the equivalent, or Candidate-level graduate students. Premaster students initiating doctoral dissertation research should register for 600. Prerequisite: permission of Supervisory Committee or graduate program advisor.

CREDIT DESIGNATION

- **ART 100 (5)** 5 credits are received for the quarter.
- **ART 100 (5-)** Course may take longer than one quarter to complete or is the first course in a hyphenated sequence. Credit is earned, but may not be applied toward graduation until the entire sequence is completed. If not part of a hyphenated sequence, repeated registration may be necessary. An N grade is received until the final grade is submitted.
- **ART 100 (2, max. 8)** 2 credits per quarter; course may be repeated up to four times to earn a maximum of 8 credits.
- **ART 100 (1–5)** Up to 5 credits may be taken in a given quarter. Specific number is determined in consultation with instructor of adviser. When a maximum is not stated, course is not repeatable.
- **ART 100 (1–5, max. 15)** Up to 5 credits may be taken in a given quarter. Course may be repeated to a maximum of 15 credits.
- **ART 100 (*, max. 10)** Credit to be arranged per quarter; course may be repeated to a maximum of 10 credits.
- **ART 100 (3/5)** 3 or 5 credits are earned in a given quarter. Specific amount is determined by school or college offering the course. The Time Schedule may indicate 3 credits, 5 credits, or 3 or 5 credits. Credits may vary by section.
- **ART 100 (3/5, max. 15)** 3 or 5 credits are earned in a given quarter. Course may be repeated to earn a maximum of 15 credits.
- **ART 700 (*)** Credit is to be arranged with school or college offering the course. No maximum stated. Only 600-, 700-, and 800-level courses do not require a maximum.

UNDERGRADUATE GENERAL EDUCATION REQUIREMENT DESIGNATORS

- **A&H** Arts & Humanities (Areas of Inquiry requirement)
- **SSc** Social Sciences (Areas of Inquiry requirement)
- **NSc** Natural Sciences (Areas of Inquiry requirement)
- **RSN** Reasoning
- **DIV** Diversity
- **C** English Composition

Courses marked C may be used for the English Composition requirement or the additional-writing (W-course) requirement, but not both; none may count for the Areas of Inquiry requirements. Courses marked RSN may be used for both the RSN requirement and an Area of Inquiry requirement, if one is listed. Courses marked with more than one Areas of Inquiry designator (A&H, SSc, and/or NSc) may be used for any one of the areas indicated, but not for more than one.

BACKGROUND REQUIRED

Prerequisites Courses to be completed or conditions to be met before a student is eligible to enroll in a specific course.

QUARTERS OFFERED

A, W, Sp, S indicates the quarter(s) the course is offered.

Example

ART 100 AWSp ART 100 offered Autumn, Winter, and Spring Quarters.

Term a classes end	July 17
Term b classes begin	July 18
Full-term and term b classes end	August 16

Dates in this calendar are subject to change without notice. A detailed calendar with the latest information on registration can be found online at www.washington.edu/students/.

For directory assistance, call the University switchboard, (206) 543-2100.

Address correspondence to:

University of Washington
(Name of office and box number)
Seattle, Washington 98195

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

UNDERGRADUATE ADMISSION

admit.washington.edu

FRESHMAN APPLICANTS

Definition of Freshman Status

Apply as a freshman if *any* of the following statements describe you.

- You plan to enter the UW right after graduating from high school.
- You are in Washington State’s Running Start Program and you plan to enter the UW right after graduating (regardless of how many college credits you have earned or will earn).
- You have never attended college since leaving high school regardless of your age or whether you ever graduated. (Taking courses during the summer term immediately following high school graduation doesn’t make you a transfer student.)

Admission Policy

Selecting the Freshman Class

The University of Washington seeks students who can benefit from its wealth of academic and cultural opportunities and contribute to its amazing energy and rich diversity of experience. Choosing students from a very able group of applicants requires a selection process that looks beyond grades and standardized tests. While these factors are important, they tell only part of an applicant’s story. The University uses an individualized application review more typically found at smaller, private universities and colleges. In addition to grade-point average (GPA), the University takes into account many aspects of an applicant’s achievements and personal history.

Academic Preparation and Performance

While the UW looks at many factors in reviewing applications for admission, academic preparation and performance are still primary. Indicators of preparation and performance include:

- An overall strong level of academic achievement as demonstrated by GPA, rigor of curriculum, and academic distinctions
- Taking advantage of college-preparatory courses during high school, such as Advanced Placement (AP), International Baccalaureate (IB), Running Start, or college in the high school; or core subjects beyond the minimum required for college entrance
- Taking full academic advantage of the senior year
- Demonstrating a positive grade trend
- Demonstrating habits associated with independent intellectual growth such as self-guided reading, engagement with other cultures, or research activities
- Demonstrating exceptional artistic talent and achievement

Personal Achievements and Characteristics

In addition to academic preparation and performance, personal achievements and characteristics can also indicate promise to benefit from and contribute to the University of Washington. These include:

- Demonstrating a commitment to community service and leadership
- Exercising significant responsibility in a family, community, employment, or through activities
- Attaining a college-preparatory education in the face of significant personal adversity, economic disadvantage, or disability
- Demonstrating cultural awareness or unique perspectives or experiences
- Demonstrating notable tenacity, insight, originality, or creativity

The entire application, including the Writing Section and Activities Log, is important in the individualized application review. Because the University receives over 50,000 freshman applications every year, this process takes

time to complete. The University takes great care in assessing applications and does not rush the selection of future students. While this process requires patience on the part of many applicants, the benefit is that each applicant is reviewed as an individual. Applications may be submitted between September 1 and November 15. An admission decision will be sent to all freshman applicants between March 1 and March 15.

College Academic Distribution Requirements (CADR)

To be eligible for full admission consideration, applicants must present the following:

- Completion of a college-preparatory course of study to include the following high school credits*:
 - a. 4 high school credits of English
 - b. 2 high school credits of a single world language
 - c. 3 high school credits of mathematics: algebra, geometry, and preferably trigonometry (a fourth high school credit of mathematical analysis or calculus is recommended for students preparing for majors in the sciences or engineering)
 - d. 3 high school credits of social science
 - e. 3 high school credits of science, including 2 years of lab science
 - f. 1 senior-year math-based quantitative course
 - g. 0.5 high school credits of the fine, visual, or performing arts
 - h. 0.5 high school credits of electives taken from the above areas

* One high school credit represents a standard full year of high school coursework

Because these are admission requirements, all CADR must be satisfactorily completed before the first quarter of enrollment at the UW. Almost all applicants will have satisfied these requirements through high school coursework, which is generally defined as that completed in grades 9–12. There are, however, several ways to satisfy CADR at the college level. In general, five quarter credits (or three semester credits) at the college level equals one credit of high-school study. If you completed a portion of these requirements in high school, you can supplement high school courses with college course work. For example:

High School:	3 credits of English
Community college:	5-credit English composition or literature course is equivalent to one high-school year
Total:	4 credit high school requirement satisfied

Grading Restrictions

In general, you must attain at minimum a passing grade (including ‘D’) to satisfy a CADR. Also acceptable is a grade of ‘Pass’ in a course taken on a ‘Pass/Not Pass’ basis. However, if you are completing CADR through college course work you are strongly encouraged to choose a letter or numerical grade, because you may later want to apply CADR courses towards requirements for your major or University or college graduation requirements, for which grading restrictions pertain. Applicants using a college course to satisfy the mathematics CADR: specific restrictions on grading apply. See the Mathematics section.

English Composition/Literature

1. IF TAKEN IN HIGH SCHOOL

Four high school credits of study are required, at least three of which must be in college-preparatory composition or literature.

- One of the four credits may be satisfied by courses in drama as literature, public speaking, debate, journalistic writing, business English, or English as a Second Language (ESL).
- Courses that are generally not acceptable include those identified as remedial or applied (e.g., acting, basic English skills, developmental reading, library, newspaper staff, remedial English, review English, vocabulary, yearbook/annual).

2. IF SATISFIED BY COLLEGE COURSE WORK

College course work must be at the 100 level or higher. For the composition/literature component, generally any course with an English or Writing prefix is acceptable.

- One of the four credits may be satisfied by a college course in speech, drama as literature, journalistic writing, business English, ESL, or engineering/technical writing.
- Courses such as developmental or speed reading, vocabulary, or remedial English are not acceptable.
- English courses are considered equivalent to ESL unless taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

3. APPLICANTS WHOSE FIRST LANGUAGE IS NOT ENGLISH

Although the four-credit English high school course requirement cannot be waived, there are some alternatives for meeting the English subject requirement for U.S. citizens, permanent residents or refugees

- whose first language is not English or,
- who attended school in a non-English speaking country. English-speaking countries are defined as Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

ALTERNATIVE ONE (*Applicants with Test Scores*)

To fulfill the English core subject requirement under this alternative, both A and B must be satisfied.

A: Test Score Requirement

Submit one of the following official test scores by the application closing date:

- SAT Critical Reading 430
- ACT English 17
- Other tests (e.g., Test of English as a Foreign Language [TOEFL] or IELTS) cannot be used to meet this requirement.

B: Coursework Requirement

A total of four years of study are required.

- Composition or literature courses in the student's first language may satisfy up to three years of the requirement.
- English composition or literature courses taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S. may satisfy up to four years of the requirement.
- These courses may satisfy no more than one year of the requirement:
 - English, if taken outside of Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
 - ESL taken in the U.S.
 - Courses in drama as literature, public speaking, debate, journalistic writing, or business English that were completed in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

ALTERNATIVE TWO (*Applicants with 60 or more college quarter credits*)

All three of the following conditions (A, B, and C) must be satisfied:

- A. A minimum of 60 transferable quarter credits from a regionally accredited college or university in the U.S. or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United

Kingdom must be completed at the time of application. Transcripts showing 60 completed credits must be submitted by the application closing date.

- B. A minimum of two college-level English composition courses, for a minimum of six credits, taken at a regionally accredited college or university in the U.S., or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom. All college-level English composition and literature courses must be completed with a minimum cumulative grade-point average (GPA) of 3.00 (B) and must be recorded on a transcript at the time of application.
- C. Additional English Course Work Requirements: The remaining two units of the requirement may be satisfied by any combination of course work from among the following options:
1. Up to two units may be satisfied by high school English composition or literature courses from high schools where the primary language of instruction is English.
 2. Up to two units may be satisfied by composition or literature courses in the student's first language (when the first language is not English) for coursework completed in educational systems other than the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom.
 3. Only one unit (year) of the requirement may be satisfied by one of the following:
 - English courses taken in countries where English is NOT recognized as the primary language of instruction.
 - ESL courses taken in the U.S.
 - Courses in drama as literature, public speaking, debate, journalistic writing, or business English that were completed in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
 4. Up to two units may be satisfied by additional college-level English composition or English literature courses from a regionally accredited college or university in the U.S., or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom.

Mathematics

1. IF COMPLETED IN HIGH SCHOOL

Three high school credits are required, at least at the level of algebra, geometry, and second-year algebra.

- An algebra course completed in the last year of junior high school may partially satisfy the requirement if the second-year algebra is completed in secondary school.
- Arithmetic, pre-algebra, business math, and statistics will not count toward the requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

If your high school preparation in mathematics was insufficient, you must complete one of the courses listed below:

- A course in intermediate algebra: The course must be completed with a grade of 'C' (2.0) or better, even though it does not transfer to the UW as college credit and the grade earned in the course is not used in computing the transfer GPA.
- MATH 104 (Trigonometry) or its equivalent — The course must be completed with a grade of 'C' (2.0) or better.
- MATH 107 (Mathematics: A Practical Art) or its equivalent — The course must be completed with a grade of 'C' (2.0) or better.
- Mathematics courses with intermediate algebra as a prerequisite (except statistics courses) — This includes any higher-level math courses such as elementary functions, calculus, and beyond.

Social Science

1. IF COMPLETED IN HIGH SCHOOL

Three high school credits are required in history or in any of the social sciences, e.g., anthropology, contemporary world problems, economics, geography, government, political science, psychology, sociology. Credit for religion courses, consumer economics, student government, or community service will not count towards the requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

Courses in the social sciences-e.g., anthropology, economics, ethnic

studies, history, philosophy, political science, psychology, sociology-will count toward the requirement.

- Any course in drama except drama as literature courses.
- Courses in architecture are generally not accepted, except for those in architectural history.

World Languages

1. IF COMPLETED IN HIGH SCHOOL

Two high school credits are required. The two credits must be completed in the same language. Note: The world language requirement will be considered satisfied for applicants who complete their education through the 7th grade in school(s)

- where English was not the language of instruction and
- in countries other than Australia, Canada, Ireland, New Zealand, the United Kingdom, and the U.S.

International applicants who entered the U.S. education system prior to the 8th grade must satisfy the foreign language requirement. Any natural language that has been formally studied may be used to satisfy this requirement, including American Sign Language (ASL, the language of the deaf community), and languages no longer spoken, such as Latin and ancient Greek. However, neither computer 'languages' nor forms of deaf signing aside from ASL are acceptable. A world language course taken in the eighth grade may satisfy one credit of the requirement if the second-year course is completed in high school.

2. IF SATISFIED BY COLLEGE COURSE WORK

For purposes of admission, each 5-quarter-credit course of language in college is considered equivalent to one high school credit. Applicants who have never studied a world language will need to complete ten quarter credits of a single world language. However, an applicant who studied French for one credit in high school needs to complete only the second quarter (e.g., FREN 102) or the second semester of a first-year language sequence. Of course, you may prefer to begin with 101 to refresh your memory.

Lab Science

1. IF COMPLETED IN HIGH SCHOOL

A minimum of three credits of science, including two years of lab science, are required. At least one of the two credits must be in biology, chemistry, or physics. Students typically take this full year course in two successive high school semesters. Additionally, at least one of the two years of laboratory science must be an algebra-based science course. The principles of technology courses taught in Washington State high schools may apply toward the laboratory science requirement. Additionally, courses identified by the school district as a laboratory science courses—e.g., astronomy, environmental science, geological science, genetics, marine science—may also apply toward the additional credit of laboratory science requirement.

2. IF SATISFIED BY COLLEGE COURSE WORK

College science courses with a lab will count toward the laboratory science portion of the requirement. Any course in astronomy, atmospheric science, biological structure, biology, botany, chemistry, environmental science (but not environmental studies), genetics, geology, oceanography, physical anthropology, physical geography, physics, or zoology will count toward the second-year requirement, as will introductory courses in biological or physical science.

Fine, Visual, or Performing Arts

1. IF COMPLETED IN HIGH SCHOOL

One-half credit is required in the fine, visual, or performing arts, to be chosen from art appreciation, band, ceramics, choir, dance, dramatic performance and production, drawing, fiber arts, graphic arts, metal design, music appreciation, music theory, orchestra, painting, photography, print making, or sculpture.

Courses that do NOT satisfy this requirement include architecture, color guard, creative writing, drafting, drill team, fashion design, foreign languages, interior design, sewing, speech, web design or graphics, woodworking, and yearbook.

2. IF SATISFIED BY COLLEGE COURSE WORK

Two quarter credits (or 2 semester credits) chosen from any of the following subjects will satisfy the requirement:

- Art, art history, cinema/filmmaking, dance, music, or photography;

Academic Electives

1. IF COMPLETED IN HIGH SCHOOL

Academic electives are courses in any of the six core subject areas — English, Mathematics, Social Science, World Languages, Lab Science, and the Arts — beyond the minimum number of credits specified. An additional half-credit is required.

2. IF SATISFIED BY COLLEGE COURSE WORK

Three quarter credits (2 semester credits), chosen from any of the six subject areas, satisfy this requirement.

High School Students Enrolled in Dual-Credit Programs

The Running Start Program allows academically qualified 11th- and 12th-graders the opportunity to enroll in certain Washington colleges for college credit. College in the High School, which may go under names such as dual enrollment or dual credit, allows high school students to take college courses while enrolled at their local high school and receive college credit.

ADMISSION

Dual-enrollment applicants are evaluated for admission on the same basis as other freshman applicants: academic preparation and performance; and personal achievement and characteristics. See Requirements/Freshman/Review.

- You must satisfy the College Academic Distribution Requirements (CADR).

APPLICATION PROCEDURES

- If you are applying for summer or autumn quarter after you graduate from high school, use the freshman application and apply by the freshman application deadline, November 15, regardless of the number of college credits you have taken or will have taken. All materials to complete the application file must be submitted or postmarked by the deadline.
- If you are starting college after you leave high school, apply as a transfer student.

Recommendations for Academic Planning

We encourage dual-enrollment applicants—particularly those with a significant number of college credits—to begin their academic planning as early as possible to ensure that they make the most of their college credit.

- Keep in mind that you have established a college record. Grades you earn now could affect admission to the University and to your intended major.
- If you anticipate entering the UW with 90 or more transferable credits, please know that you will be expected to declare a major at the end of your first quarter at the UW or request an extension from your adviser.
- Two online tools will help you look ahead toward UW requirements—for your intended major and for graduation—while still completing course work at the college you are now attending:
 - For transferable courses at Washington State community colleges and transfer credit policies, get to know the Equivalency Guide.
 - Consult the Academic Planning Worksheets, to help you prepare for your intended major and UW graduation requirements.

Transfer Credit Policy

In general, it is UW policy to accept college credits earned at institutions fully accredited by their regional accrediting association for colleges and universities, provide that such credits have been earned through university-level undergraduate courses appropriate to the student's degree program at the UW. Exceptions are noted under Notable Restrictions on Transfer Credit and Courses Receiving No Credit in the Transfer Credit section of the catalog.

Scholarships

You may be considered for freshman scholarships as long as you do not enroll in another degree-seeking program after leaving high school and before enrolling at the UW. November 15 is the application deadline for freshman admission.

Homeschooled Applicants

Homeschooled students bring unique qualities to our campus, and we welcome their interest in the University of Washington. Homeschool applicants are assessed in the same context as other freshmen in the UW's holistic review process.

College Academic Distribution Requirements (CADR)

All freshman applicants are required to meet minimum academic distribution requirements as set by the Washington Student Achievement Council (WSAC) and the faculty of the University of Washington. These requirements are explained in detail elsewhere.

Test Score Requirements

- Home-schooled applicants and applicants who come from schools with non-standard grading practices that do not have letter or numeric grades are still required to submit SAT or ACT scores. Exceptions include home-schooled applicants with at least one year of college coursework (i.e. Running Start).

Transcripts

Do not send transcripts unless you receive a request from the Office of Admissions. The application asks you to provide a detailed account of your academic coursework. Applicants who are admitted and who confirm their intention to enroll at the UW will be required to send final transcripts. Final college transcripts are also required for applicants who attended college.

Applicants with College Coursework: Freshman vs. Transfer Application

Freshman

If you are applying for admission for the summer or autumn quarter immediately following your high school graduation, apply using the freshman application, regardless of the number of college credits you have taken, are taking, or will have taken.

Transfer

If you will have completed college coursework after leaving high school and will be applying for a quarter beyond the autumn immediately following high school graduation, use the transfer application.

College Credit

In general, the UW awards credit for academic, college-level course work completed through regionally accredited colleges. See the section on Transfer Credit Policies below.

English Language Proficiency Requirement

Admission Requirement

- U.S. Applicants: Proof of English language proficiency is not an admission requirement
- International Applicants: Minimum test scores are required to be considered for admission. Applicants should read more about the admission process in the International Applicants section of the catalog.

Freshman Application Checklist

A complete application file for freshman admission must include:

- Application
- \$80 (\$90 for international applicants) nonrefundable application fee OR approved fee waiver
- International Applicants:** Official scores from English proficiency exam
- Test Scores:** The UW no longer requires SAT or ACT scores. Students who have taken the exams are welcome to send their scores, however, there is absolutely no advantage or disadvantage in doing so.

- Transcripts:** If you attend a U.S. school or international school that follows a U.S.-style curriculum, do not send high school or college transcripts unless you receive a request from the Office of Admissions. The application asks you to provide a detailed account of your academic coursework. Regardless of whether you are applying as a U.S. or international student, if you have attended a school outside of the U.S. that follows a local or national compulsory curriculum, you are required to upload a scanned, unofficial copy of your transcript for grade levels 9 and higher as part of your application. Do not mail high school transcripts or mid-year school reports to the Office of Admissions.
- Letters of Recommendation:** Do not send.
- The Writing Section:** a required and important part of your application for admission. See admit.washington.edu/apply/freshman/how-to-apply/writing-section/

Application Deadlines

All required materials, including official exam and test score results, must be received by the application deadline.

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Nov. 15
Autumn	Nov. 15

TRANSFER APPLICANTS

Definition of Transfer Status

Apply as a transfer student if all of the following statements describe you.

- You wish to enroll at the University of Washington to earn your first bachelor's degree.
- You are no longer in high school (regardless of how old you are or whether you graduated).
- You have completed, plan to complete or will have completed any coursework at a regionally accredited college or university after leaving high school and before enrolling at the UW (excluding the summer term immediately following high school).

Admission Policy

Selecting the Transfer Class

The University seeks students who will enhance the intellectual and cultural vitality of the university community. Choosing students from an able group of applicants requires a selection process that looks beyond grades.

Minimum Requirements

Transfer applicants must meet the following minimum standards to be assured their application will receive a comprehensive review:

- Completion of the College Academic Distribution Requirements (see Freshman Admission section for complete details) unless you have earned 40 transferrable college quarter credits or more at the time of application.
- Transfer GPA of 2.50 or better

Comprehensive Review

The Comprehensive Review is a holistic assessment of an applicant's academic performance and personal qualities and achievements. The comprehensive review includes the following assessment areas:

- Level of academic achievement including cumulative transfer GPA based on all transferable college-level courses attempted; rigor of curriculum; and consistency in course completion
- Well-defined academic goals

- Preparation for intended major
- Plan for timely completion of a bachelor's degree
- Completion of foreign language through the 103-level, or equivalent, when applying to Arts and Sciences or Social Work
- Evidence of a need to enroll at the UW and the availability of the applicant's intended academic program at other Washington public educational institutions
- Academic or artistic awards and achievements, community service, work experience, or research that demonstrates success or potential contributions to the University and community
- Improved grades after an extended absence from college or evidence of a new maturity in approaching college work
- Cultural awareness
- Perseverance in attaining higher education in spite of personal adversity, disability, or economic disadvantage
- Admission test scores, if provided

Enrollment Goals and Priorities

The University is committed to the following transfer goals and priorities to benefit students from Washington's community and technical colleges.

- Among community college transfer students, the highest admission priority will be given to those with academic associate degrees and those with 90 transferable credits taken in preparation for a professional academic major. Applicants with fewer than 90 credits may also be admitted when early transfer is advisable, but the number of such transfers remains small.
- The University accepts applicants who have completed fewer than 40 quarter credits (slightly less than one year of college) at the time of application. However, admission for these applicants is competitive and, due to enrollment pressures, priority is low.

English Language Proficiency Requirement

Admission Requirement

- **U.S. Applicants:** Proof of English language proficiency is not an admission requirement
- **International Applicants:** Minimum test scores are required to be considered for admission. Applicants should read more about the admission process in the International Applicants section of the catalog.

Transfer Application Checklist

A complete application file for transfer admission must include:

- \$80 (\$90 for international applicants) nonrefundable application fee OR approved fee waiver
- International Applicants: Official scores from English proficiency exam
- Personal Statement: a required and important part of your application. See admit.washington.edu/apply/transfer/how-to-apply/personal-statement/
- Unofficial high school transcript must be uploaded with the application if you have less than 40 quarter credits of transferable college coursework at the time of application. For U.S. students, a high school transcript should be a final transcript, showing all coursework completed, beginning with grade 9 and continuing through grade 12 or the highest grade completed. For international students, the high school transcript should include grades 10, 11 and 12 or the equivalent years in your country.
- Official college or university transcript(s) from each institution attended.
- Test Scores: The UW no longer requires SAT or ACT scores. Students who have taken the exams are welcome to send their scores, however, there is absolutely no advantage or disadvantage in doing so.

Application Deadlines

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Feb. 15
Autumn	Feb. 15

* ATTN: Engineering Applicants and Computer Science Applicants Only. You may apply for spring quarter admission only if you are also applying for spring quarter direct entry to the programs listed below. The deadline to apply to the university is December 15. Direct entry applicants must also submit a departmental application to the program; check department websites for instructions.

The following departments admit new transfer students for spring quarter only:

- Bioengineering
- Chemical Engineering

The following departments admit new transfer students for spring and autumn quarters:

- Bioresource Science and Engineering
- Computer Science
- Computer Engineering

POSTBACCALAUREATE APPLICANTS

Admission Policy

Postbaccalaureate is a highly competitive status, reserved for students who are working toward a second bachelor's degree or preparing for entrance to graduate or professional school. Only a small number of applicants are admitted every quarter as postbaccalaureates because the University's primary commitment is to undergraduates who are completing the first bachelor's degree. The primary factors in the admission decision are the Statement of Purpose, the applicant's academic record from the first bachelor's degree, and any relevant postbaccalaureate course work.

Postbaccalaureate Application Checklist

A complete application file consists of:

- Application
- \$80 (\$90 for international applicants) nonrefundable application fee via Visa, MasterCard or electronic check
- **International Applicants:** Official scores from English proficiency exam
- Statement of Purpose: an important and required part of the application. See admit.washington.edu/apply/postbac/how-to-apply/#statement-of-purpose
- One official transcript from each college or university attended

Application Deadlines

Quarter of Application	Deadline
Winter	Sept. 1
Spring	Not Open for General Admission
Summer	Feb. 15
Autumn	Feb. 15

INTERNATIONAL APPLICANTS

An international student is anyone who needs an F-1 student visa or has any other type of temporary, non-immigrant visa. You are not considered an international student if you have US citizenship, US permanent residency, political asylum, refugee status, or an A, E, I, G, K, or V visa. The University of Washington accepts international student applications for either summer or autumn quarters. Admission to the University of Washington is competitive for international degree-seeking students.

English Proficiency for Admission

All international students are required to submit official TOEFL, IELTS or Duolingo English Test (DET) scores that meet the UW's minimum English proficiency requirement for admission consideration. English proficiency is considered in the holistic review of applications and the most competitive applicants will demonstrate a higher level of English language proficiency than the required minimums. Exams must be taken on or before December 31 of the year of application, and scores must be sent directly from the testing agency to the UW.

Exception. If your primary and secondary education took place in Australia, Canada, Great Britain, Ireland, New Zealand, or the US, you are exempt from this requirement. Students who were born in one of these countries but educated elsewhere are still required to satisfy the English proficiency requirement.

Alternatives to TOEFL, IELTS or Duolingo: Although the SAT and ACT are not required, the University will consider the English proficiency requirement satisfied if you have earned a minimum average grade of B in all high-school-level English writing or literature courses where English is the primary language of instruction for all grade 10-12 classes taught at the school **and** you have earned a minimum SAT Evidence-Based Reading and Writing score of 580 or ACT English score of 22. Official scores must be sent to the UW directly from ACT or the College Board to satisfy this requirement. If self-reported scores are used to meet the English requirement, official scores will be required prior to enrollment.

Test Score Requirements

Test Title	Minimum Requirement for Admission to UW Seattle
TOEFL Internet-based	76
IELTS	6.0
Duolingo	105

Selecting International Students for Admission

All international students for a given year are reviewed to determine which applicants meet minimum requirements and have the strongest overall academic background. In selecting students for admission, the University considers the overall academic record, the rigor of a student's curriculum, the education system where the student has studied, test scores, personal achievements, educational goals, academic preparation, special talents, and a student's personal background as seen through the personal statement. Admission will be offered to as many highly qualified students as space allows and to those applicants who will most benefit from and contribute to the University's educational resources.

TRANSFER CREDIT POLICY

General Policy

To students pursuing a first bachelor's degree, the Office of Admissions awards transfer credit according to the guidelines discussed here. Admissions reserves the right to accept or reject credits earned at other institutions of higher education. In general, it is University policy to accept credits earned at institutions fully accredited by their regional accrediting association for colleges and universities, provided that such credits have been earned

through undergraduate university-level courses appropriate to the student's degree program at the University of Washington (UW). Exceptions are noted below.

State Policy on Inter-college Transfer and Articulation

The UW subscribes to the statewide Policy on Inter-College Transfer and Articulation Among Washington Public Colleges and Universities, endorsed by the public colleges and universities of Washington as well as by the State Board for Community and Technical College Education, and adopted by the Washington Student Achievement Council (WSAC). The policy deals with the rights and responsibilities of students, and the review and appeal process in transfer-credit disputes.

Class Standing

A student's class standing is determined by the total number of transfer credits awarded by the UW, not by the number of years of college study or by the completion of an associate degree.

Standing	Credit total
Freshman	0–44 credits
Sophomore	45–89 credits
Junior	90–134 credits
Senior	135+ credits

Satisfying UW graduation requirements depends not only on the number of credits completed—a minimum of 180 for most programs—but also on completing all College and major requirements.

Quarter vs. Semester Credits

Colleges and universities that operate on a semester system award semester credit. The UW awards quarter credit. To convert quarter credits to semester credits, multiply by two-thirds. To convert semester to quarter credits, multiply by 1.5. For example, a student who has earned 30 credits at an institution on a semester calendar would earn 45 quarter credits at the UW.

Applying Transfer Credit to Degree Requirements

Before a student first registers for classes at the University of Washington, s/he should meet with an academic adviser to plan a program of study. The adviser determines how the transfer credits may be used to meet UW degree requirements. For example, suppose that Admissions awards a student 120 transfer credits, but only 100 of those credits can be applied toward graduation requirements for that student's degree program. If selective credits are needed, credits that do not apply toward specific requirements may still be applied toward the minimum number of total credits required for graduation.

Alternative Credit Options

The UW does not award credit for work or life experience; however, two avenues exist for obtaining credit. Both situations require a formal approval process and a fee of \$30 per course.

- Once enrolled at the UW, students may explore the possibility of obtaining departmental approval for transfer of credit earned through coursework taken at a non-regionally accredited institution.
- Students may arrange to challenge specific UW courses via credit by examination if the same knowledge has been gained through independent study outside a formal educational setting. For course work taken at an unaccredited institution, contact Admissions. For credit by examination for independent study completed outside a formal educational setting, contact the Graduation and Academic Records Office, ugradoff@uw.edu.

Transfer Credit Limit

The University allows a maximum of 90 credits of lower-division transfer course work to be applied toward a UW degree. Of the 180 credits required for graduation from the University (some majors require more than 180), a maximum of 90 lower-division transfer credits are allowed. Upon enrolling at the UW, students with a lower-division credit total that exceeds 90 will see a

difference between the “total credits earned” and the “total credits allows” on their UW record under the Summary of Transfer Credit following the course by course “Detail of Transfer Credit.”

Additionally, a maximum of 135 total transfer credits are allowed toward the 180-credit total. Therefore, a student transferring 135 or more credits must complete a minimum of 45 more credits in residence at the UW.

Despite these restrictions, all transferable credit are listed under the Detail of Transfer Credit and, with an adviser’s approval, may be used to satisfy individual requirements for graduation. It may be helpful to think of transfer credits as a “bank account” of credits from which applicable credits may be drawn. All transferable credits remain in the bank, but no more than 90 lower-division credits and no more than 135 total transfer credits may be “withdrawn” in order to be applied toward the 180 (or more) credits required for a degree.

Extension Credit from Other Schools

Extension credit, including correspondence courses, earned at other schools may not exceed 45 credits. Military credit is included in this 45-credit limit.

Foreign Language Courses

Students who complete two or more years of a foreign language in high school and then go on to complete an entry-level language course in the same language (e.g., FRENCH 101) before transferring to the UW are eligible to receive transfer credit. However, students who complete an entry-level course after their transfer to the UW will not receive college credit.

Military Credit

Coursework recommended for academic college credit at the lower- or upper-division level by the American Council on Education (ACE) will be considered for transfer provided that the coursework is applicable to the student’s degree program at the UW. Official military transcripts (Joint Services Transcripts) must be submitted to the Office of Admissions for evaluation. A maximum of 30 quarter credits may be awarded for academic courses completed through Armed Forces training schools (AFTS). No credit is awarded for Military Occupational Specialty (MOS) programs.

Native Language

First-year (elementary) or second-year (intermediate) foreign-language credit is not granted either by examination or by course completion in a student’s native language. “Native language” is defined as the language spoken in the student’s home during the first six years of his or her life and in which he or she received instruction through the seventh grade.

Out-of-Sequence Courses

Credit is not awarded for prerequisite courses in mathematics or foreign languages completed after a more advanced course has been completed. For example, students will not be awarded credit for Spanish 102 if taken after Spanish 103.

Overlapping Content

If a department considers two of its courses to have overlapping content, credit will be awarded for only one. For example, credit is granted for either PHYS 114 or PHYS 121.

Physical Education

No more than three quarter credits will be allowed for physical-education activity courses.

Restricted Transfer Credit

Transfer credit will not generally be awarded for vocational or technical courses. However, a maximum of 15 quarter credits will be awarded in transfer for college-level vocational-technical courses when they have been allowed as electives within the 90 credits comprising an academic associate degree from a Washington community college. Courses in this category are those that ordinarily provide specialized training for an occupation (e.g., allied health, bookkeeping, electronics, or physical therapy assistant). When allowed, these credits will apply only toward the elective credit component of a baccalaureate degree at the UW. Such courses are not included in the transfer GPA.

Senior Residency Requirement

To be recommended for a first bachelor’s degree, a student must complete 45 of the last 60 credits as a matriculated student at the UW campus where the degree is to be awarded.

Appeal Procedure

If not all courses transfer as the student had anticipated, and it is not evident to the academic adviser is unable to answer questions about an individual student’s transfer credit award, the student should first consult with an admissions specialist in the Office of Admissions. If appropriate, further appeal can be directed to the UW Transfer Officer in the Admissions Office.

The Direct Transfer Agreement (DTA)

The public community colleges and baccalaureate colleges and universities in Washington have adopted an inter-institutional transfer agreement. The agreement applies to the applicability of transfer credit from community colleges to baccalaureate institutions; the DTA is not an admission agreement. The DTA Associate Degree Guidelines developed by the Intercollege Relations Commission (ICRC) outline an acceptable transfer curriculum, which serves as the foundation of the DTA associate degrees offered at each community college. In general, transfer students who have been awarded a qualifying DTA associate will be eligible to transfer to a baccalaureate institution with junior standing and will have completed lower division general education requirements.

The University of Washington subscribes to the Direct Transfer Agreement as follows:

- Students will be assigned junior standing upon admission.
- The UW transfers credit on a course-by-course basis. However, approved DTA degree-holders may use transfer courses toward the UW Areas of Knowledge requirements comparable to those the community college used toward DTA associate degree distribution requirements—even if those courses would not otherwise be allowed toward specific Areas of Knowledge requirements at the UW—if doing so is to the student’s advantage.
- The UW’s College of Arts and Sciences agrees that transfer students from Washington community colleges who complete approved associate degree programs will be considered to have satisfied the College’s general education and proficiency requirements with the following provisos:
 1. Students who have completed the minimum of 45 credits of distribution (15-15-15) as part of their DTA degree will be required to take an additional 5 credits in each area plus an additional 15 credits drawn from their choice of one or more of the three areas in order to satisfy the Arts and Sciences Areas of Knowledge requirement.
 2. Up to 15 credits in the student’s major may be applied towards the 75-credit Areas of Knowledge requirement.
 3. Students who complete first-year language courses as a part of the transfer degree distribution requirement, and later use that foreign language to satisfy the Arts and Science language proficiency requirement (see item 4), may NOT use those foreign language credits towards the Arts and Science Areas of Knowledge requirement.
 4. Students will be required to complete foreign language study through the 103-level or to demonstrate language proficiency at the 103-level through an examination.
 5. Ten credits in courses emphasizing writing (W-courses or English composition) are required in addition to the 5-credit English composition requirement. W courses must have attributes as defined by Arts and Sciences. If not completed as part of the transfer degree, this requirement must be completed at the University.

Note: Additional courses taken at the UW to fulfill general education or proficiency requirements may be upper division courses; students will not be required to complete additional lower division courses at the UW.

ADVANCED PLACEMENT PROGRAM (COLLEGE BOARD)

AP Credit Policies

The UW recognizes AP coursework as a challenging academic program that provides excellent preparation for university study. College Board Advanced Placement (AP) exams are scored on a scale of 1 – 5. At the UW, scores of 3 or higher are considered for college credit awards or placement into UW courses.

For complete AP credit policies and current credit awards, see the following: admit.washington.edu/apply/freshman/exams-for-credit/ap/

NOTE: AP test results may be submitted only for courses taken in high school and for tests taken during or within 6 months of leaving high school. AP test results may not be used to waive admission requirements.

INTERNATIONAL BACCALAUREATE PROGRAM

Policy Overview

The UW recognizes the IB curriculum as a challenging academic program that provides excellent preparation for university study. In most cases, credits are awarded for subjects in which the student has earned a grade of 4 or higher. Additionally, students who earn an IB diploma (not a certificate) will be awarded 5 more quarter credits toward UW graduation requirements. A maximum of 45 quarter credits may be awarded for IB.

For complete IB credit policies and current credit awards, see the following: admit.washington.edu/apply/freshman/exams-for-credit/ib/

A LEVEL AND AS LEVEL EXAMS

Policy Overview

The UW recognizes A Level/AS Level curriculum as a challenging academic program that provides excellent preparation for university study. In general, 15 quarter credits will be granted for A Level exams with a passing grade and 7.5 quarter credits for AS level exams with a passing grade. A maximum of 45 quarter credits (one year) awarded for A level and AS level exams may be applied towards a UW degree.

For complete A Level/AS Level credit policies and current credit awards, see the following: admit.washington.edu/apply/freshman/exams-for-credit/a-as-level/

REGISTRATION POLICIES

Full-Time Requirements

You should register for 12 or more credits to be considered full-time if you are an undergraduate or professional student. If you are a graduate student, you should register for 10 or more credits. It is important to note that differing criteria and standards for full-time enrollment exist for eligibility in certain programs. Consult the Financial Aid Office for its requirements on satisfactory student progress. The tuition schedule does not reflect full-time credit requirements for loan deferments, teaching assistantships or other programs.

Class Attendance

If you do not attend regularly scheduled class meetings during the first week of the quarter, you are subject to being dropped at the discretion of the teaching department to allow enrollment space for other students. Affected courses should be identified in the Time Schedule and/or posted in departmental offices. Do not assume that departments will automatically drop you from the course if you do not attend. If you are not going to go to class, you should drop the course through the registration system. Students who are registered for a course section but do not attend will be assigned a failing grade by the instructor. You may not attend a University course in which you have not been officially registered after the first two weeks of the quarter. An instructor may allow you to attend their class only if your name appears on the official class list from Office of the University Registrar. A faculty member may attend informally with the approval of the instructor.

Satisfactory Progress

If you are pursuing a baccalaureate degree, you are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and graduate after completion of a reasonable number of credits. NOTE: Individual departments may have additional satisfactory progress requirements.

The 105-Credit Rule

Undergraduates must declare a major by the time they have earned 105 credits or a hold will be placed on their registration until they either declare a major, or meet with an adviser and receive a pre-major extension. The hold is placed on the student record when 105 or more credits have been completed. Transfer students who are admitted to the University with 105 or more credits are expected to declare a major before their second quarter at the UW, or obtain an extension from an adviser.

You will be granted a pre-major extension if your adviser decides that you are pursuing a reasonable goal, and have a good chance of gaining admission to your intended major. The extension will be granted for the number of quarters it should take you to complete the admission requirements of your major.

If your adviser feels that your choice of major is unrealistic, they will deny your request for an extension. You will not be allowed to register for subsequent quarters until you can present a reasonable degree plan. The intent of the rule is not to drop you from the University but to encourage you to meet with an adviser and plan for an attainable goal.

You will receive a warning letter from the University as you approach five academic-year quarters and 105 credits, if you have not yet declared a major. If you complete five academic-year quarters and 105 credits and are still a pre-major, the registration system will not let you register for the next quarter. To avoid registration delays, meet with the appropriate adviser at least one quarter before you complete five academic-year quarters and 105 credits.

The 210-Credit Rule

The University's satisfactory progress policy requires students to complete their undergraduate degree programs within 30 credits beyond the minimum required for the degree. Because most degrees require 180 credits, students generally must complete their programs by the time they earn 210 credits. Undergraduates who have completed over 210 credits will be notified by e-mail the third week of the quarter that a hold is being placed on their

registration due to lack of satisfactory progress. Students ineligible to graduate will be permitted to register for succeeding quarters only if they receive approval from their department and college after filing a graduation plan. Approval to enroll beyond 210 credits may not extend beyond two additional quarters.

Students receiving satisfactory progress registration holds should immediately contact their departmental academic adviser to file a graduation application or to initiate a satisfactory progress appeal.

Postbaccalaureate Students

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. If you are admitted as "postbaccalaureate undeclared," you must declare a major by the time you have earned 30 credits beyond your last degree. Once a degree objective has been declared, you must make progress toward that degree as evidenced by courses satisfactorily completed. College advisers may grant extensions beyond the 30-credit limit.

Excessive Course Repeats and/or Drops

The Committee on Admissions and Academic Standards may terminate your enrollment if you have demonstrated lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. You may be reinstated with the approval of your college and the Committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Registration Tampering

A student who tampers or attempts to tamper with the registration records of another student, including but not limited to dropping courses and adding courses, may be subject to disciplinary sanctions as defined in the Student Conduct Code (WAC 478-120).

Registration Abuse

The registration system is provided for the sole express purpose for students to register themselves into sections. Any use of the registration system other than for this purpose is considered abuse of the system. Such abuse includes, but is not limited to, selling one's seat in a class or otherwise registering for a section that one has no intention of taking.

To help conserve University resources and ensure the registration system is available to all, students are locked out of Web Registration after a specific number of excessive transactions are made per day. This threshold is sufficient for students' regular use and should not interfere with typical use. The use of robots and other automated tools to submit registration requests is expressly forbidden.

If your account is locked out for excessive use, you must wait until the registration system removes the lockout (within 24 hours). The Office of the University Registrar is unable to override a locked account.

GRADING SYSTEM

Standard Grading System

The UW uses a numerical grading system, with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or if a student does not officially withdraw. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the University Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

Letter	Number	Note
A	4.0–3.9	
A-	3.8–3.5	
B+	3.4–3.2	

B	3.1–2.9	
B-	2.8–2.5	
C+	2.4–2.2	
C	2.1–1.9	
C-	1.8–1.5	
D+	1.4–1.2	
D	1.1–0.9	
D-	0.8–0.7	Lowest passing grade.
E	0.0	Academic failure. No credit earned.

Additional information on grades and scholarship rules may be obtained from the Graduation and Academic Records Office, 264 Schmitz.

The following letter grades also may be used:

- **N In Progress** — Indicates that the student is making satisfactory progress and a final grade will be given at the end of the quarter the work is completed. Used only for thesis, research, and hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800. An “N” grade carries with it no credit or grade until a regular grade is assigned.
- **I Incomplete** — An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student’s control. A written statement of the reason for the giving of the Incomplete, listing the work which the student will need to do to remove it, must be filed by the instructor with the head of the department or the dean of the college in which the course is given.

To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. For Spring Quarter, the following quarter is considered to be Fall Quarter. The student should never reregister for the course as a means of removing the Incomplete. An Incomplete grade not made up by the end of the next quarter is converted to the grade of 0.0 by the Office of the University Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

An instructor may approve an extension of the Incomplete removal deadline by writing to the Graduation and Academic Records Office no later than the last day of the quarter following the quarter in which the Incomplete grade was assigned. Extensions, which may be granted for up to three additional quarters, must be received by the Office of the University Registrar before the Incomplete has been converted into a failing grade. In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

In no case shall an Incomplete on the record at the time a degree is granted be subsequently changed to any other grade.

An Incomplete grade does not count for registered hours nor in computation of grade-point averages.

For DL-suffix courses that do not follow the quarter schedule, an Incomplete shall be given only when the student has done satisfactory work to within two weeks of the maximum term for completion of the course, as specified at the time of registration. In order to obtain credit for the course, a student must convert an Incomplete into a passing grade by the end of the quarter following the one in which the

Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

- **S Satisfactory grade** for courses taken on a satisfactory/not-satisfactory basis — An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the University Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.
- **NS Not-satisfactory grade** for courses taken on a satisfactory/not-satisfactory basis — A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.
- **CR Credit awarded** in a course offered on a credit/ no-credit basis only or in courses numbered 600, 601, 700, 750, and 800 — The minimum performance level required for a CR grade is determined, and the grade is awarded directly, by the instructor. CR is not computed in GPA calculations.
- **NC Credit not awarded** in a course offered on a credit/ no-credit basis only or in courses numbered 600, 601, 700, 750, and 800 — The grade is awarded directly by the instructor and is not included in GPA calculations.
- **RD Registrar Drop** for a drop made after the second week of the quarter, whether made during the quarter (current quarter drop) or after the quarter (former quarter drop), as well as complete withdrawal from the University. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. For DL-suffix courses that do not follow the quarter schedule, the grade RD shall be assigned to any course dropped after the fourteenth calendar day after the start of the course and more than two weeks before the end of the maximum term for completion of the course, as specified at the time of registration. The date of withdrawal shall be noted on the transcript.

Nontraditional Grading Options

Credit/No Credit—Only as a Course Option

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor’s satisfaction.

Satisfactory/Not-Satisfactory Grading Option

You may elect to take certain courses on a satisfactory/not satisfactory (S/NS) basis.

When registering through Personal Services on MyUW, select the Grade Option box to select S/NS grading option. The S/NS grade option can be elected through the day shown on the academic calendar for the current quarter. NO EXCEPTIONS. A \$20 fee is charged beginning the eighth calendar day of the quarter.

As an undergraduate, a course in which an S is earned may not be used to satisfy any department, college, or University requirement, except that the credits may be applied to the minimum of 180 credits required for graduation. Each instructor will report numerical grades to the Registrar, who will convert satisfactory grades (2.0 or greater) to S, and unsatisfactory grades (less than 2.0) to NS for the student’s transcript. No more than 25 S/NS credits may apply toward an undergraduate degree.

If you are a graduate student and earn grades of 2.7 or above, you will receive a grade of S while 2.6 or below are recorded as NS. With the approval of your graduate program adviser or the Supervisory Committee Chairperson, you may elect to take any course for which you are eligible outside of your major academic unit on an S/NS basis. In cases of withdrawal, the W is recorded. Neither S nor NS is included in the grade-point average.

Grade-Point Average (GPA)

The University's cumulative GPA is based solely on courses taken in residence at the UW; this includes some, but not all, courses taken through UW Extension. The UW transcript also reflects grades for UW Extension course work that is not residence credit, and the grades for credit by examination. These latter grades do not affect the University cumulative GPA.

Computation of GPA

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/NS basis are counted as follows: Satisfactory grades are printed on the permanent record as an S and do not count in the quarterly or cumulative GPA, but they do count as credits earned toward graduation. Not-satisfactory grades, NS, do not count in the quarterly and cumulative GPA and do not count as credits earned toward graduation.

EXAMPLE 1

Course	Credits	Grade	Grade Points
CLAS 205	3	CR	
OCEAN 101	5	2.7	= 13.5
HIST 111	5	4.0	= 20.0
SCAND 100	2	3.3	= 6.6
Total credits earned toward graduation	15		
Total graded credits attempted	12		40.1

$$\text{GPA} = 40.1 \div 12 = 3.34$$

The total graded credits attempted, not the credits earned toward graduation, are used in computing the GPA.

EXAMPLE 2

Course	Credits	Grade	Grade Points
ENGL 121	5	2.3	= 11.5
OCEAN 101	5	0.0	= 0.0
SPHSC 100	3	2.7	= 8.1
ART 121	5	I	= 0.0
Total credits earned toward graduation	8		
Total graded credits attempted	13		19.6

$$\text{GPA} = 19.6 \div 13 = 1.51$$

The student attempted 18 credits, but only 13 are graded, because the Incomplete (I) is not computed in the GPA. The 0.0 for OCEAN 101 is computed in the GPA, but no credit is awarded toward graduation.

If the work in ART 121 is not made up by the end of the next quarter, the I is converted to a numeric grade and the GPA is recomputed.

Repeating Courses

Undergraduates

With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade are computed in the GPA but credit is allowed only once. Veterans receiving benefits must receive approval from the Veterans Center before a course is repeated.

Graduates

Graduate students may repeat any course. Both the original grade and the second grade are computed in the GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. Veterans receiving benefits must receive approval from the Veterans Center before a course is repeated.

Grading Procedures

Change of Grade

Except in case of error, no instructor may change a grade that they have turned in to the Registrar. Grades cannot be changed after a degree has been granted.

Grade Appeal Procedure

A student who believes they have been improperly graded must first discuss the matter with the instructor. If the student is not satisfied with the instructor's explanation, the student, no later than ten days after his or her discussion with the instructor, may submit a written appeal to the chair of the department, or in a non-departmental college, to the dean, with a copy of the appeal also sent to the instructor. Within ten calendar days, the chair or dean consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the chair believe the instructor's conduct to be arbitrary or capricious and the instructor declines to revise the grade, the chair (or the dean in a non-departmental school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

Grade Reports

Grades are not mailed. You may display and print a grade report through MyUW.

PROCEDURES AND FEES

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice Provost for Student Life in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

Registration

www.washington.edu/students/reg/regelig.html

Instructions for registration are available on MyUW (myuw.washington.edu). Notification is e-mailed to each student quarterly with information about registration for the next quarter.

Registration Period I

www.washington.edu/students/reg/addpolicy.html

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (update and selection of address information, insurance/optional charges, and ASUW membership) are charged a Late Registration Fee.

Registration Period III

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

Late Add Period

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

Unrestricted Drop Period

www.washington.edu/students/reg/wdpolicy.html

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

Late Course Drop Period (Current Quarter Drop)

Students may drop one course each academic quarter after the fourteenth calendar day of the quarter through the online registration system. Students are allowed to drop more than one course through the adviser-assisted course-drop process. All course drops made during the Late Course Drop Period are recorded on the transcript with an RD. A Change of Registration service fee is charged.

Credits Required for Full- or Half-Time Status Requirements

www.washington.edu/students/reg/regpol.html

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional or undergraduate student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

Restrictions on Attending Classes

www.washington.edu/students/reg/regpol.html

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered. An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the University Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

Adding Courses/Permission Guidelines

www.washington.edu/students/reg/regopt.html

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the University Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity. Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overload courses that registration is not guaranteed if enrollment exceeds 115% of room capacity. If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the University Registrar.
2. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.
3. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

Dropping a Course

www.washington.edu/students/reg/wdpolicy.html

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter). A student who does not officially drop a course through the registration system or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, 206-543-6101, before dropping a class because it may affect their eligibility.

Students receiving veterans' benefits should contact the UW Veterans Center, 520 Schmitz, when dropping courses.

Complete Withdrawal from the University for a Registered Quarter

www.washington.edu/students/reg/wdoffleave.html

Once registered, a student must officially withdraw if they later choose not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may drop all their courses via the online registration system prior to the Late Course Drop Period.
2. To withdraw from a quarter during the Late Course Drop Period, students should use the adviser-assisted drop process listed above under 'Dropping a Course.'
3. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.
4. Submission of a graduate On-Leave application does not constitute official withdrawal from the University. Refer to the grading section in the Graduate School: Graduate Study section.
5. Students receiving veterans' benefits should immediately notify the Veterans Center of withdrawal.
6. Students with a scholarship or loan awarded through the University should notify Student Fiscal Services.
7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a

full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

ADDITIONAL INFORMATION

Address Change

www.washington.edu/students/reg/address.html

Students are responsible for notifying the Office of the University Registrar when their address changes. Individual addresses may be viewed and updated through MyUW. A confirmation message will be sent to the student's e-mail address. The mailing of notices to the last address on record constitutes official notification.

Residence Classification Requirements

www.washington.edu/students/reg/residency.html

Residence classification information is available from the Office of the University Registrar.

Student Identification Cards

www.washington.edu/students/reg/id.html

All new students should go to the Husky Account and ID Card Center, Ground Floor, Odegaard Library, to be issued a permanent student identification card. Photo identification (such as a driver's license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. The student ID card is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student's name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Husky Account and ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice Provost for Student Life for appropriate University action.

Transcripts

www.washington.edu/students/reg/transcripts.html

Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Registrar, and the date of issue.

Transcript Fee

A charge of \$11 is required for each transcript. Additional fees may be added to cover printing and shipping costs.

Transcripts from Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Veterans' Center, 520 Schmitz. Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements

as regular students and are expected to enroll in accordance with University requirements.

The University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

TUITION, FEES, AND SPECIAL CHARGES

Estimated Expenses

The University's official estimated expenses calculator is at <https://www.washington.edu/opb/tuition-fees/estimated-annual-cost-of-attendance-for-first-year-undergraduates/>.

New Undergraduates — New Student Enrollment and Orientation Fee

As a new undergraduate, you must return the Enrollment Confirmation Form and the \$354 nonrefundable New Student Enrollment and Orientation Fee (NSEOF) to confirm your intention to enroll at the University of Washington. If you have applied for financial aid and you and your family cannot afford the \$354 NSEOF, you may apply for a fee deferral. Write to the Office of Admissions; include your name, student number, phone number, and reason for the deferral. Send your letter, along with the Enrollment Confirmation Form. Any deferral will be conditional on the verification of your financial aid status.

Returning Undergraduates, Graduates and Professional Students Enrollment Confirmation

New graduate students, and new students in a professional program are required to confirm his or her intention to enroll by paying a nonrefundable Enrollment Confirmation Deposit (not required of students admitted summer quarter). The ECD is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. Returning undergraduates pay a non-refundable Enrollment Confirmation Fee (ECF) which is not applied toward tuition and fees. A student who pays the fee or deposit for a given quarter but does not register in that quarter is not entitled to a refund except by petition in the situation listed below.

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter. A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.
2. A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.
3. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

Fee Payment

f2.washington.edu/fm/sfs/

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student's address on file with the Office of the University Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in a late payment charge. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Student Guide should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

Fees listed above do not apply to students registered through UW Professional and Continuing Education.

Special Course and Laboratory Fees

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees

- **Auditors:** There is no reduction in fees for auditors.
- **Admission Application Fees:** Varies by school and degree program.
- **On-Leave Registration Fee:** This fee of \$25, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.
- **Late Registration/Reregistration Fees:** A late registration service charge of \$25 is assessed when a student registers after the last scheduled day of Period II registration and through the fourteenth day of the quarter. Students registering after the fourteenth day pay a \$75 Late Registration Fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Fiscal Services Office.
- **Change of Registration Service Fee:** A charge of \$20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.
- **Transcript Fees:** A charge of \$11 is required for each transcript. Additional costs may apply, depending on the type of transcript requested.
- **Replacement Fees:** Duplicate diploma, \$20; student identification card, \$10.
- **U-PASS Fee:** The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of \$150 (subject to change) is included on the tuition bill.

All fees are subject to change without notice.

Cancellation of Tuition

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

Continuing Students

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.

3. A student who withdraws after the thirtieth calendar day must pay full tuition.

New and Returning Students

1. A student who withdraws on or before the seventh calendar day forfeits the New Student Enrollment and Orientation fee or the Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition. The Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The Enrollment Confirmation Deposit is applied toward payment of tuition.

Fee Forfeiture

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

Fee Refund

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

Financial Obligations

The Comptroller is authorized under certain circumstances to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the University Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

Tuition Exemptions and Reductions

www.washington.edu/students/reg/tuition_exempt.html

Faculty, Staff, and Washington State Employee Tuition Exemption Programs

Eligible faculty, staff, and state employees admitted to the University may request an exemption for a maximum of 6 credits each quarter under these tuition exemption programs. Applicable tuition will be charged for credits that exceed the 6-credit limit. Because such students are registered on a space-available basis, they must register after other students. The quarterly Time Schedule lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Professional & Organizational Development Office, or the Registration Office.

“Access” Program for Older Adults
www.washington.edu/students/reg/access.html

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.

Tuition Reductions

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

Tuition Exemptions

Category	Contact Office

Tuition Reductions

For more information on tuition reductions and waivers, please see <https://registrar.washington.edu/students/tuition-waivers/>

STUDENT LIFE AND STUDENT SERVICES

Freshman Convocation

Freshman Convocation is an academic ceremony involving the President of the University, other administrators, student leaders, and members of the Board of Regents and the faculty, to welcome and honor new freshmen and their families. It is held annually on the Sunday preceding the first day of autumn quarter. The President presides over the ceremony, which features remarks by a distinguished member of the faculty. Neither tickets nor reservations are required for the Convocation. Formal invitations are mailed in mid-August. A no-host brunch, which requires tickets, is held in the Student Union Building (HUB) and precedes the Convocation.

Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

International Student Services Office

The International Student Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The office is located in 459 Schmitz, (206) 543-0841.

UW Veterans’ Center

The Veterans’ Center, 520 Schmitz, assists students eligible for veterans’ educational benefits.

Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. Information describing the different programs, eligibility criteria, and application procedures may be viewed at www.washington.edu/students/osfa or may be obtained by calling (206) 685-9535. To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University’s financial aid application deadline of February 28 (e.g., February 28, 2014, for the academic year beginning in September 2014).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

Student Legal Services

Student Legal Services (SLS) provides legal advice, counseling, negotiating, and court representation in many civil and criminal matters. All currently enrolled undergraduate and graduate students at UW Seattle are eligible for a free initial consultation. If additional services are needed, there is an hourly charge, plus an office supply fee. Students are responsible for court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys.

Student Publications

The Daily is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, The Daily is published once a week. Any student with an interest in journalism may serve on The Daily staff.

Student Union Facilities

The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

Husky Union Building

The Husky Union Building (HUB), located in the center of campus, is currently undergoing renovation, to reopen in autumn quarter 2012. Most of the offices that resided in the HUB have relocated to Condon Hall during construction.

South Campus Center

The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

Student Activities and Organizations

Student Activities Office

The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom

experiences. Additional information about the services is available from the Student Activities Office, 232 HUB, (206) 543-2380.

Student Organizations

Students at the University are encouraged to become active in at least one of the campus's approximately 450 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, (206) 543- 2380.

Associated Students of the University of Washington

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW's annual budget is supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of directors elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to either the ASUW Office, 121/131 HUB, (206) 543-1780, or the Student Activities Office, 232 HUB, (206) 543- 2380.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of more than seventy sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card). For additional information visit the Recreational Sports website at depts.washington.edu/ima/.

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a Student Conduct Code, which applies to both the academic and nonacademic conduct of students while they are attending the University. The Code specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due-process procedures. Students may obtain copies of the code through either their advisers or the Office of the Vice Provost for Student Life, 101 Gerberding Hall.

Computer Use Policy

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for commercial purposes, to send unwanted e-mail, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see www.washington.edu/itconnect/policy/.

University Policy on Student Education Records

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available from the Office of the University Registrar, 2nd floor, Schmitz Hall.

Sexual Harassment Complaint Procedure

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the University Ombudsman, (206) 543-6028, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual harassment concerns.

Office of Minority Affairs and Diversity

Fostering diversity is the ongoing work of the entire University, but it is a special responsibility of the Office of Minority Affairs and Diversity (OMAD). To this end, OMAD provides a variety of services to undergraduates from underrepresented and economically and educationally disadvantaged backgrounds. These services include a statewide Recruitment and Outreach Office whose staff provides assistance with the admissions and financial aid process in high schools and community colleges throughout Washington state. Through its Counseling Center, OMAD offers academic advising, financial aid advocacy, housing assistance, and other services related to life on campus. OMAD's services are available mainly to students who, following admission, are invited to become members of the Educational Opportunity Program (EOP). Participation in EOP is limited to students who are U.S. citizens or permanent residents, with priority given to Washington state residents. OMAD's other services are open to EOP participants and other students as resources permit.

The Office of the Vice President for Minority Affairs and many of OMAD's services are located on the third floor of Schmitz Hall. For information about OMAD's program locations and services, call (206) 685-0774.

Residence Halls

Students like the convenience of living in the residence halls (being close to classes and having access to a variety of dining options), but that's just the beginning. Those who live on campus are part of a community that offers opportunities for fun, friendships, personal development and academic success.

Undergraduate Study

Office of Undergraduate Academic Affairs

www.washington.edu/uaa/

The University of Washington established the Office of Undergraduate Academic Affairs (UAA) in 1992 (as the Office of Undergraduate Education) in order to make undergraduate education a more visible and central part of the University's work and purpose. UAA offers opportunities and resources for students and their families, faculty members, and academic departments and programs. UAA's unique mission of ensuring excellence in undergraduate teaching and learning is critical to the University's commitment to providing students a rich academic experience.

Individualized Studies

www.washington.edu/students/genecat/academic/indivstudies.html

Individualized Studies provides students an opportunity to obtain an individually designed interdisciplinary degree through the College of Arts and Sciences. Students may also pursue a major in one of several existing interdisciplinary programs. Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog.

Undergraduate Majors

www.washington.edu/students/ugrad/advising/majmenu.html

To graduate from the UW, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that must be started early on if the student expects to finish in four years.

Students can enter some majors directly (e.g., those in Ocean and Fishery Sciences, most in Forest Resources, and some in Arts and Sciences), but most students start out as premajors. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Many majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisite course work, depending on their grades and other factors.

The General Catalog shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

Satisfactory Progress

www.washington.edu/students/reg/satprog.html

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits. By the time undergraduate students have completed 105 credits, they must either be accepted in their major or have their premajor status extended temporarily by an adviser. Extensions are normally granted only to students who are in the final phases of completing admission requirements for a major to which they have a reasonable chance of acceptance.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a "hold" placed against registration for the following quarter. Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree. Students admitted as "postbaccalaureate undeclared" must declare

a major by the time they have earned 30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. Advisers may grant extensions beyond the 30-credit limit.

The Faculty Council on Academic Standards may terminate a student's enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student's college and the council. EOP students may be reinstated in consultation with the Office of Minority Affairs and Diversity.

Undergraduate Minors

Undergraduate students have the option of completing a minor. Minors require the completion of at least 25 credits, 15 of which must be taken in residence at the UW. There are no departmental admission requirements for minors. Students may declare an approved minor when they have earned 90 credits or more. A cumulative GPA of 2.00 is required for courses within the minor. Some departments do not offer minors. Requirements for minors established as of spring 2002 are shown in the academic programs section of this catalog. A list of currently offered minors is available at the Undergraduate Gateway Center, 171 Mary Gates Hall.

Undergraduate Degrees

The UW grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

• Bachelor of Arts	BA
• Bachelor of Arts in Business Administration	BABA
• Bachelor of Clinical Health Services	BCHS
• Bachelor of Design	BDes
• Bachelor of Fine Arts	BFA
• Bachelor of Landscape Architecture	BLArch
• Bachelor of Music	BMus
• Bachelor of Science	BS
• Bachelor of Science in Aeronautical and Astronautical Engineering	BSA&A
• Bachelor of Science in Bioengineering	BSBioE
• Bachelor of Science in Chemical Engineering	BSChE
• Bachelor of Science in Civil Engineering	BSCe
• Bachelor of Science in Computer Engineering	BSCCompE
• Bachelor of Science in Construction Management	BSCM
• Bachelor of Science in Electrical and Computer Engineering	BSECE
• Bachelor of Science in Engineering	BSE
• Bachelor of Science in Environmental Engineering	BSEnvE
• Bachelor of Science in Health Informatics and Health Information Management	BSHIHIM
• Bachelor of Science in Human Centered Design	BSHSCDE
• Bachelor of Science in Industrial Engineering	BSIE
• Bachelor of Science in Informatics	BSInfo
• Bachelor of Science in Materials Science and Engineering	BSMSE
• Bachelor of Science in Mechanical Engineering	BSME
• Bachelor of Science in Medical Technology	BSMedTech
• Bachelor of Science in Nursing	BSNurs

Freshmen Interest Groups

A FIG consists of 20–25 freshmen who have similar academic interests and share the same cluster of three or four courses for their first quarter at the UW. The FIG provides both a social support network and a learning community. More than 100 FIGs are offered in the autumn, spanning a range of topics and interests.

Freshman Seminars

Taught by faculty members, many nationally and internationally recognized leaders in their fields, these seminars meet once a week, are limited to 15 students, and are graded credit/no credit. Students can establish a rapport with a professor while learning about different fields of study, all in a low-pressure academic setting.

The University Honors Program offers the best of both worlds: the combined riches of a small learning community and the inexhaustible resources of a large research university.

Phi Eta Sigma

A national freshman honor society with more than 300 chapters and 500,000 lifetime members. The UW chapter focuses on community service, campus service, and membership services.

University Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience.

Most Honors students enter the Full College Honors Program as incoming freshmen. This Honors option is a four-year track through our program consisting of an Honors Core followed by Departmental Honors and results in a degree earned "With College Honors." The rest of our students participate only in Departmental Honors (which students enter once they enter their department). Completion of Departmental Honors alone results in a degree earned "With Distinction."

The University Honors Program assists and encourages students to find ways to enrich their education and to create an experience that facilitates their long-term goals. Honors seeks to enhance the already rich experience available at the University of Washington by bringing students and the best opportunities of a large research university into close contact. Honors students benefit from unique opportunities such as:

- Personalized and Comprehensive Honors Advising
- Small, Intensive, Interdisciplinary Honors Classes
- Continuous Contact with Honors Faculty
- Assistance in Finding Appropriate Research and Internship Opportunities
- Bonderman Honors Travel Fellowship
- Mary Gates Research Grants
- Mary Gates Leadership Grants
- Honors Peer Advisers
- Honors Computer Lab

CLUE

The Center for Learning and Undergraduate Enrichment (CLUE) is a free late-night study center. It is designed to provide supplementary educational

opportunities for and enhance the academic achievement of all UW undergraduates. The program places a strong emphasis on creating a rich learning community while supporting freshmen, sophomore, and transfer students who are enrolled in many of the UW's crucial lower-division courses. CLUE services include drop-in help sessions for subjects like chemistry, math, biology, writing, economics, and foreign languages; evening discussion and review sessions with TAs and fellow students; and exam reviews for a variety of courses.

Computing Resources

UW students have access to computers, e-mail, the Internet (in campus labs or from home), MyUW, and other online resources, training, and Web services for publishing. You don't need to buy your own computer, although it's recommended. Regardless of your major or future career plans, learning how to navigate campus computing resources— and to make the most of them— will be a significant part of your UW education.

Educational Opportunity Program

EOP provides educational opportunity and creates greater cultural diversity within the University. The program is open to underrepresented minority students from American Indian, Native American, African-American, Hispanic, and Asian/Pacific Islander backgrounds, and to economically disadvantaged students of all ethnicities whose parents do not have 4-year college degrees. EOP services include academic and personal counseling, advocacy and support with financial aid and housing, placement testing, academic tutoring, and special instruction.

Libraries

The University of Washington Libraries received the 2004 Excellence in Academic Libraries Award, which recognizes the top university research library in the country. UW Libraries rank 12th among North American research libraries. Here are some more numbers: 5.9 million volumes, 6.9 million items in microform, and more than 50,000 periodical titles. Impressive, but what does all of this mean to you? Simple: the chance to explore to the fullest extent of your interest and imagination. And in the process, you'll be acquiring valuable skills for navigating and analyzing information. There's no more important skill in the 21st century.

Women's Center

Located in historic Imogen Cunningham Hall, the Women's Center offers classes, workshops, and events. The Re-Entry Program offers free services to women and men who are considering returning to the University after a significant time away or who, for whatever reason, feel they need additional support and advice in making the transition into higher education.

The Graduate School: Graduate Study

www.grad.uw.edu

The University of Washington offers more than 110 graduate degrees through more than 370 graduate programs across all three UW campuses and online, from master's degrees for people launching or continuing their careers to doctoral degree programs for those pursuing academic, research or professional careers. The Graduate School manages graduate education from application through graduation for all UW degree programs, with the exception of the M.D., D.D.S., J.D. and Pharm.D. A list of graduate degrees offered is below.

Guided by the dean, the Graduate School serves approximately 14,000 graduate students a year. The Graduate School processes nearly 30,000 applications and grants about 4,300 degrees each year, in addition to ensuring compliance with the University's policies concerning graduate education.

Interdisciplinary Programs

The Graduate School is home to several interdisciplinary degree programs, including a master's degree in Museology and PhDs in Urban Design and Planning, Neuroscience and Molecular and Cellular Biology. Interdisciplinary programs draw together faculty from various disciplines to create new fields of study and provide research and education.

Student Success and Diversity

The Graduate School creates endowments and oversees fellowships and awards totaling approximately \$12 million a year. To help programs attract students, the Graduate School provides more than \$1.5 million a year in recruitment funding. In addition, The Office of Graduate Student Equity and Excellence, GSEE (formerly known as Graduate Opportunities & Minority Achievement Program, GO-MAP) awards about 2 million a year to approximately 45 departments so they can recruit graduate students from diverse backgrounds. Seattle Chapter of Achievement Rewards for College Scientists (ARCS) Foundation is a steadfast supporter of graduate education at the UW as its members fund approximately 120 fellowships worth more than \$700,000 yearly, which aids graduate programs in offering multi-year financial commitments to top recruits.

In support of the University's outreach, recruitment and retention of ethnic minority and other underrepresented graduate students, GSEE presents networking and professional development opportunities for graduate students throughout the academic year, in collaboration with graduate programs and campus units. GSEE's recruitment efforts include sponsoring a series of Prospective Student Days, in which admitted graduate students visit the Seattle campus in a virtual or hybrid setting as they weigh the UW's offer of admission. GSEE supports the UW Graduate School participation in the National Name Exchange, which is a GS database hosted and maintained by the Council of Graduate Schools (CGS) involving more than 50 institutions nationwide that annually share names of approximately 7,000 high achieving historically underrepresented minority undergraduates who are interested in graduate study. Please send questions to uwgsee@uw.edu.

The [Office of Student and Postdoc Affairs](#) (OSPA) in the Graduate School utilizes a holistic approach to support the success of graduate students through student-centered programming, timely informational resources, and university partnerships. OSPA offers the following services: consultations on navigating grad student life, professional and career exploration events, and wellness skills workshops. Equity and access are core values of the OSPA—and we engage in university collaborations and offer events that support the success of first-gen and international graduate students. Send questions to OSPA at cpinfo@uw.edu.

The Office of Equity & Justice in Graduate Programs coordinates and provides resources for faculty and staff on issues pertaining to race, equity, and ameliorating disparities in graduate education. Our programming culminates each academic year in our annual Equity Summit in collaboration with GSEE, OSPA, and other equity-focused units on the tri-campus. Via research and resources, including our developing Equity Audit Tool, we work

every day to create and promote a more mutual, respectful, inclusive and diverse place of learning and excellence. Send questions to gseequity@uw.edu.

[Preparing for Graduate School](#) is a course designed to help undergraduate and returning students ask and answer the questions about graduate and professional school that will help them find the path that's right for them, whether they decide to pursue an advanced degree at the UW or look into other options. It is 2-credits and offered most quarters. Send questions to prep4grad@uw.edu.

Quality and Assessment

Academic program reviews ensure that the UW continues to offer innovative, high quality education by reviewing each program – undergraduate and graduate – every 10 years through a streamlined process that encourages strategic planning and can be linked to national accreditation reviews.

The Center for Teaching and Learning is a collaboration of the Graduate School, UW Libraries and Undergraduate Academic Affairs that brings together individuals, departments and communities to share best practices and evidence-based research on teaching, learning and mentoring. The center offers training to graduate students who are teaching assistants and research assistants, as well as supports and promotes innovation in teaching among the faculty.

Public Scholarship and Outreach

The Graduate School is the home of the Office of Public Lectures (OPL). OPL receives funding from three endowments: Walker Ames, Jessie and John Danz and Mary Ann and John D. Mangels. Its purpose is to share the work of world-renowned scholars and intellectuals with faculty, students and members of the public. Past speakers include educator Geoffrey Canada, author Amy Tan and astrophysicist Neil deGrasse Tyson.

Graduate Degree Programs

College of Arts and Sciences

- Anthropology PhD
- Applied Mathematics MSCFRM, MS, PhD
- Art, Art History, and Design MA, MDes, MFA, PhD
- Asian Languages & Literature MA, PhD

Because the following professional doctoral degrees offered by the University are not considered to be graduate degrees, they are not administered through the Graduate School: Doctor of Medicine (MD), Doctor of Dental Surgery (DDS), Juris Doctor (JD), and Doctor of Pharmacy (PharmD).

GRADUATE ADMISSIONS

Additional program information is available on the World Wide Web at www.grad.washington.edu.

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam-era veteran in accordance with University policy and applicable federal and state statutes and regulations.

Application to the UW through the Graduate School is available for three types of students:

A **graduate student** is someone who has been admitted to a specific program and is working toward a graduate certificate, a master's or doctoral degree, or earning a school administrator's credential.

A **visiting graduate student** plans to transfer a limited number of graduate credits earned at the UW to another institution where they are actively pursuing a graduate degree. A certificate of status signed by the home institution is required. The application and certificate are available at <https://grad.uw.edu/admission/understanding-the-application-process/visiting-graduate-students/>. Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose or a list of desired course work.

Graduate non-matriculated students are taking courses without seeking a graduate degree. They may apply a maximum of 12 credits to degree requirements at a later time.

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student's record should be a strong one with an average grade of "B" or a 3.00 grade-point, or better.

The primary criterion and the priority for admission of new applicants into a graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors vary among graduate degree

programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant's apparent ability, as determined by the University, to complete the program with a high level of achievement.
2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.
3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.
4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.
5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.
6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:
 - a. Grades earned, especially for subjects in or closely related to the field of the applicant's proposed graduate work.
 - b. Scores on the Graduate Record Examination (GRE) verbal, quantitative and analytical tests, on the GRE advanced test, on other tests related to the applicant's field, and on other aptitude tests which may be required.
 - c. Personal interviews of the applicant by the department admissions committee.
 - d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.
 - e. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.
 - f. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's followed by a doctoral degree).
 - g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.
 - h. Academic accomplishments in light of the applicant's life experiences and special circumstances. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants, as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at www.grad.washington.edu.

Admission Process

Information about the application process for both graduate and graduate non-matriculated status must be obtained directly from the department. Visiting graduate applicants should go to <https://grad.uw.edu/admission/understanding-the-application-process/visiting-graduate-students/> for application information. It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.

Registration

After successful applicants have been offered admission, applicants will receive a request for an enrollment confirmation deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter's tuition.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on continuous enrollment.)

Financial Aid for Graduate Students

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by Feb. 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program advisor of the appropriate department.

Fellowships, Traineeships, and Scholarships

A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program advisors in the departments.

The Graduate School and the UW Libraries have collaborated to provide the Graduate Funding Information Service (GFIS) for UW graduate students (and faculty) who are seeking any type of general research funding for use at the UW. Located in the Research Commons, Allen Library, South Wing, the service works to provide resources for outside funding opportunities to graduate students at the master's and doctoral levels who have been admitted to or who are attending the UW.

The service offers workshops and individual consultations to help students explore resources for potential funding. The service does not provide search services or money directly to students, but does guide students to resources (print, database, or web-based) and helps students better understand how to use these resources.

To set up a consultation, email gfis@u.washington.edu. For drop-in office hours and funding seminar schedules, check www.lib.washington.edu/gfis/events.html.

Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work-study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the Feb. 28 to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the department in which they hope to work or check the Career Center's Husky Jobs website careers.washington.edu/HuskyJobs/Students. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs. Advisory positions in University residence halls paying room and board are available for graduate students. Additional information may be obtained from the Housing and Food Services Human Resources Office, 305 Schmitz Hall, hfsjobs@uw.edu.

Spouses of students also may apply for regular full- and part-time University employment. Job listings are posted at www.washington.edu/admin/hr/jobs/

Loans

Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct PLUS, and the Federal Direct Unsubsidized Stafford Loan programs. For more detailed information on these loan programs, visit the Office of Student Financial Aid www.washington.edu/students/osfa/. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available

at www.fafsa.gov. The priority filing date is Feb. 28 for the following autumn quarter. The Office of Student Financial Aid may be reached at osfa@uw.edu or www.washington.edu/students/osfa/.

Students should meet the priority filing date even if they have not yet been admitted to the Graduate School.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. For information, see their website at www.washington.edu/students/osfa/gradaid/short.term.loans.html

GRADUATE DEGREE POLICIES

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships and participation in research. Graduate programs leading to the master of arts, master of science or doctor of philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many masters and all doctoral programs (excluding practice doctorates) culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems.

The student must defend the doctoral dissertation in a final examination conducted by a faculty committee and open to all other graduate faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the Graduate School, including various major evaluations such as the general examination and final examination.

Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate non-matriculated students, and are given numbers from 500 through 801. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee and the Graduate School, may be part of the graduate program. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major, as well as minor or supporting fields. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum 36 offers additional information on graduate courses.

Repeating Courses

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. or

formally approved repeatable courses, each course will be fully counted on the transcript with regard to credits, grades, and GPA calculation.

Grading System for Graduate Students

In reporting grades for graduate students, graduate degree-offering units shall use the system described herein. Grades shall be entered as numbers, the possible values being 4.0, 3.9, . . . and decreasing by one-tenth until 1.7 is reached. Grades below 1.7 will be recorded as 0.0 by the Registrar and no credit is earned. A minimum of 2.7 is required in each course that is counted toward a graduate degree. A minimum cumulative grade-point average of 3.0 is required for graduation.

Correspondence between number grades and letter grades is as follows:

Numeric Grade Point Equivalent	Letter Grade
4.0	A
3.9	
3.8	A-
3.7	
3.6	
3.5	
3.4	B+
3.3	
3.2	
3.1	
3.0	B
2.9	
2.8	B-
2.7	
2.6	
2.5	
2.4	C+
2.3	
2.2	
2.1	
2.0	C
1.9	
1.8	
1.7	
1.6-0.0	E

The following letter grades also may be used:

- **I Incomplete.** An Incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or

other circumstances beyond the student’s control. To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. An incomplete received by the graduate student does not automatically convert to a grade of 0.0 but the “I” will remain as a permanent part of the student’s record.

- **N No grade.** Used only for hyphenated courses and courses numbered 600 (Independent Study and Research), 601 (Internship), 700 (Thesis), 750 (Internship), and 800 (Dissertation). An N grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or Supervisory Committee Chairperson should change the N grade(s) to one reflecting the final evaluation.
- **S/NS Satisfactory/Not-Satisfactory.** A graduate student, with the approval of the Graduate Program Coordinator or Supervisory Committee Chairperson, may elect to be graded S/NS in any numerically-graded course for which they are eligible. If a student does not so elect, then he/she will be graded on a numerical basis. If approval is granted the student must elect the S/NS option either when registering or no later than the end of the last day of finals week of the quarter. The instructor shall submit a numeric grade to the Registrar, who shall convert grades of 2.7 and above to S and grades lower than 2.7 to NS.
- **CR/NC Credit/No Credit.** With the approval of the faculty in the academic unit, any course may be designated for grading on the CR/NC basis by notice in the appropriate Time Schedule. For such courses, the instructor will submit a grade of CR or NC to be recorded by the Registrar’s Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 800, and 801 may be graded with a decimal grade, a CR/NC or N at the instructors’ option.
- **W Withdrawal.** Refer to the University of Washington time schedule or homepage at www.washington.edu/students/reg/wdoffleave.html.
- **HW Hardship withdrawal.** Grade assigned when a graduate student is allowed a hardship withdrawal from a course after the seventh week of the quarter.

Graduate students who withdraw from the University (dropping all courses for the quarter) during the first week of two consecutive quarters (Summer Quarter excepted) will not be eligible to register as a continuing graduate student for the third quarter. Such graduate students must reapply as former graduate students returning to the University. For example, if a graduate student withdraws during the first week of Spring Quarter and Autumn Quarter, the student must reapply as a returning former graduate student for Winter Quarter.

Of the minimum credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter credits of course work taken at the University of Washington. These numerical grades may be earned in approved 400-level courses and 500-level courses.

A graduate student’s grade-point average will be calculated entirely on the basis of number grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N will be excluded, as will all grades in courses numbered 600, 601, 700, 800, and 801, and in 100- and 200- level courses.

The graduate student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the Graduate Program Coordinator or Supervisory Committee Chairperson.

Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student’s GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

For more information, see Graduate School Memorandum 16: <https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-16-academic-performance-and-progress/>

Withdrawal Policy

Refer to the University of Washington Time Schedule for procedures and dates, or look on the Web at www.washington.edu/students/reg/wdoffleave.html

Language Competency Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language-competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, English Language Competence for Admission to the Graduate School (<https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-8-graduate-school-english-language-competency-requirements/>) and Graduate School Memorandum 15, Conditions of Appointment for TAs Who Are Not Native Speakers of English (<https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-15-conditions-of-appointment-for-tas-who-are-not-native-speakers-of-english/>) for more information.

Enrollment Requirement

The enrollment requirement for the master's degree is 36 credits, 30 of which must be taken at the University of Washington.

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from a regionally accredited institution may substitute for (30 credits) of enrollment. Doctoral Study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time and/or on-site study.

Only courses numbered 400, 500, 600, 700, and 800 can be applied to enrollment or course credit in the major field for advanced degrees (please see the Graduate Courses policy regarding courses numbered 499). Courses numbered 300 are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

Full-Time Enrollment

Full-time quarterly enrollment for graduate students is 10 credits.

Final Quarter Registration

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the graduate certificate, master's degree, the candidate certificate, or doctoral degree is conferred. A student who does not complete all degree requirements by the last day of the quarter must be registered for the following quarter.

Continuous Enrollment and Official On-Leave Requirement

Policy

To maintain graduate status, a student must be enrolled on a full-time, part-time, or official on-leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. (Summer quarter on-leave enrollment is automatic for all graduate students who were either registered or officially on-leave during the prior spring quarter.) Any student who fails to register for classes or on-leave status after being admitted to the UW will need to be approved for reinstatement by his or her program to regain active student status within the Graduate School. Failure to maintain either continuous enrollment or on-leave status constitutes evidence that the student has resigned from the Graduate School.

Registration is required to take the master's final examination or doctoral general or final examinations. Students may either be registered or eligible to use the graduate registration waiver fee for filing the request for master's degree, submitting a thesis or dissertation, and receiving the degree.

To be eligible for on-leave status, the student must have registered for, and completed, at least one quarter as a graduate student at the University of Washington immediately prior to going on-leave; international students must complete three consecutive quarters.

Any student who has registered for a quarter may NOT submit a petition for on-leave status form directly to the Graduate School for that quarter unless he/she officially withdraws from all courses before the first day of the quarter. Students who have been registered for even one day of a quarter are deemed to have status for the quarter and will be eligible to register for classes or apply for on-leave for the following quarter. (Spring enables registration for summer or autumn.) The student's email account will be active for the quarter, but library privileges will not be maintained once courses are dropped.

The procedure for going on leave is online at <https://grad.uw.edu/policies-procedures/general-graduate-student-policies/graduate-on-leave-status/>.

If a student who is in on-leave status registers in any other status, i.e., matriculated, non-matriculated, graduate nonmatriculated, it will terminate their official on-leave status for that quarter, even if they subsequently drop those courses.

Readmission

A student previously registered in the Graduate School who has failed to maintain graduate student status, but wishes later to resume studies, must for reinstatement to the Graduate School by the published closing dates. If the student is reinstated by the department, registration will occur during the usual registration period.

The Graduate School allows a maximum of six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent on-leave or out of status are included.

Concurrent Degree Programs

Concurrent programs are defined as a pair of programs that may be pursued at the UW by a post-baccalaureate student resulting in completion of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one degree and then the other, the student's time and the University's resources may be conserved by arrangements that permit the student to proceed in a coordinated way toward completion of the degree programs. Graduate

School policy allows for both formal and informal concurrent degree programs, as described below.

Formal Concurrent Degree Programs

Graduate School policy defines a formal concurrent degree program as a curriculum established by two participating academic units resulting in completion of two graduate degrees, or a graduate and a professional degree. These specific programs must be formally approved by the Graduate School, and students in formal concurrent degree programs are designated by unique program codes.

The two types of formal concurrent degree programs are as follows:

1. Graduate/Professional Degrees

Examples of formal graduate/professional concurrent degrees:

- School of Dentistry: DDS/Master's or Doctoral degree
- School of Law: JD/Master's or Doctoral degree
- School of Medicine: M.D./Master's or Doctoral degree
- School of Pharmacy: PharmD/Master's or Doctoral degree

The graduate program coordinators are the primary representatives of the professional schools and the graduate degree-offering units.

Requirements for the master's degree are those which are in effect at the time the degree is awarded. All program and Graduate School minimum requirements must be met by appropriate graduate courses. It is the responsibility of the student to submit a written list of courses which apply toward the graduate degree at the time the student applies for the master's degree. This list must be approved by both programs.

Requirements for the doctoral degree are those which are in effect at the time the degree is awarded with the understanding that only approved graduate courses will be applicable.

2. Graduate/Graduate degrees

Examples of formal graduate/graduate concurrent programs:

- Master of Health Administration/Master of Business Administration
- International Studies/Epidemiology
- Master of Arts in International Studies/Master of Public Health

To earn two master's degrees in a formal concurrent degree program, a student must complete at least the equivalent of two Graduate School minimum degree requirements of 36 credits each for a minimum total of 72 credits. If one or both of the participating programs require more than the minimum of 36 credits, those additional credits may be "shared" and applied to both degrees. Further, a maximum of 12 credits from one master's program, earned beyond the 36 credit minimum, may be applied in the second master's program towards the Graduate School minimum of 36 credits required. In this case, the minimum number of additional credits for the second degree, with the 12 approved credits, is 24. In all cases the total minimum required credits remains 72. For formal concurrent degree programs, both programs must approve the shared credits counting toward both degrees. A formal concurrent degree program may allow a shared thesis as described within the formal concurrent degree proposal. The proposing programs should follow the best practices guidelines developed by the Graduate School Council (Concurrent Degrees Shared Thesis Best Practices) and articulate these in the proposal sent to the Graduate School.

For formal PhD/masters concurrent programs, up to 12 credits earned toward a PhD may be counted toward a master's degree in another program with the approval of both degree-offering units.

The student is responsible for submitting a list of courses which apply toward each respective degree at the time they file an application for the master's degree or schedules the general examination. This list must be approved by both programs.

Informal Concurrent Degree Programs

Students may pursue two degrees from different departments simultaneously in an informal concurrent degree program. These programs have not been approved as formal concurrent programs and do not have unique program codes, but students have flexibility to "share" coursework, given the approval of both programs.

Current graduate students wishing to pursue an informal concurrent degree program must go to the Graduate School online application and submit an application and fee for the second program.

Graduate School Memorandum 35: Concurrent Degree Programs contains additional information. <https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-35-concurrent-degree-programs/>.

Master's Degree

Summary of Requirements

- A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.
- Total credits required for the degree program must be completed.
- All courses numbered 400-799 that are numerically graded 2.7 and above, or have a grade of satisfactory (S) or credit (CR) count toward total credits. 499 courses are not counted in the total credits.
- At least 18 credits must be in courses numbered 500 and above.
- 18 credits must be numerically graded in department approved 400-level courses accepted as part of the major and in 500-level courses. This excludes 499 and transfer credits.
- No more than six graduate level quarter credits can be transferred from other academic institutions to count toward the credit total.
- No more than 12 UW graduate non-matriculated credits can be applied to the credit total.
- No more than 12 credits derived from any combination of UW graduate non-matriculated credits and transfer credits can be applied to the credit total.
- A minimum cumulative GPA (grade point average) of 3.00 is required for a graduate degree at the University.
- The master's degree request must be filed by the last day of the quarter. After the last day of the quarter, the system is closed.
- All degree requirements must be completed within six years.
- The six-year timeframe begins on the first day of the quarter in which the student — coded as either a graduate non-matriculated student (department code with class 6) or as a graduate student (department code with class 8) — uses a course to satisfy degree requirements in the department to which the student is admitted.
- Only UW graduate non-matriculated credits taken within the six-year time frame may be applied toward the credit total.
- Quarters spent on-leave and out of status are counted in the six years.
- A student must maintain registration through the end of the quarter in which the degree is conferred or, if eligible, pay the graduate registration waiver fee within 14 days following the last day of the quarter in which all degree requirements were met.
- Thesis track students are required to take a minimum of nine thesis credits in their credit total.
- Thesis track students are required to submit an electronic copy of an acceptably formatted thesis and the supervisory committee approval form to the Graduate School no later than the last day of the quarter.

Transfer Credit

A student working toward the master's degree may petition the dean of the Graduate School for permission to transfer to the University of Washington the equivalent of a maximum of six quarter credits of graduate level course work taken at another recognized academic institution. These credits may not have been used to satisfy requirements for another degree. The petition must include a recommendation from the graduate program coordinator and an official transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

With the approval of a student's graduate program and the Graduate School, up to 6 credits of 400-level or 500-level coursework, taken as a senior while

an undergraduate at the University of Washington, may be applied towards graduate degree requirements.

Approved transfer credits are applied toward the total credit count only for the master's degree. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

Credit taken as an undergraduate non-matriculated student or post-baccalaureate student at the UW may not be transferred to a graduate program. Credit by advanced credit examinations is not transferable.

Thesis Program

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Thesis track students are required to submit an electronic copy of an acceptably formatted thesis and the supervisory committee approval form to the Graduate School no later than the last day of the quarter (www.grad.washington.edu/students/etd/) or by the deadline specified in the graduate registration waiver fee. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes online format guidelines for theses and dissertations (www.grad.washington.edu/students/etd/). These guidelines should be read thoroughly before the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. A thesis adviser is available in the Graduate School for consultation during the thesis preparation process.

Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master's degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

Final Examination for Master's Degree

As soon as is appropriate, the faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty. (See Graduate School Memorandum 13 <https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-13-supervisory-committee-for-graduate-students>). The committee chairperson arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of finals week) in which degree requirements are met. The examination may be oral or written, and all members of the supervisory committee must certify its results. If the examination is not satisfactory, the committee may recommend to the dean of the Graduate School that the student be allowed to take another examination after a period of further study. A student must be registered the quarter in which any required exam or presentation occurs.

Application for Master's Degree

Students apply for the master's degree on at <https://grad.uw.edu/admission/apply-now/>. The online application period commences on the first day of each quarter and closes on Sunday (midnight Pacific Time) of the ninth week of the quarter (eighth week during summer quarter). If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their master's degree request. The filing of the application is the responsibility solely of the student. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School minimum requirements:

- Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the supervisory committee. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the general examination.
- Presentation of 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment.
- Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the general examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- Creditable passage of the general examination.
- Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.
- Preparation of and acceptance by the dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The candidate must register for a minimum of 27 credits of dissertation. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (800).
- Creditable passage of a final examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The general and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.
- Completion of all work for the doctoral degree within 10 years. This includes quarters spent on-leave or out of status, as well as applicable work from the master's degree from the UW.
- Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under final quarter registration).
- A student must satisfy the requirements that are in force at the time the degree is to be awarded.

Appointment of Doctoral Supervisory Committee

A supervisory committee is appointed by the dean of the Graduate School to guide and assist a graduate student working toward a doctoral degree and is expected to evaluate a student's performance throughout a program. A supervisory committee should be appointed no later than four months prior to a general examination. Appointment of a supervisory committee indicates that the graduate faculty in a student's field finds a student's background and achievement a sufficient basis for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to a request for appointment of a supervisory committee. If preliminary examinations are not an academic unit's requirement, it is appropriate to request appointment of a supervisory committee during a student's first year of study. See Graduate School Memorandum 13: Supervisory Committees for Graduate Students, <https://grad.uw.edu/policies-procedures/graduate-school-memoranda/memo-13-supervisory-committee-for-graduate-students/>.

Admission to Candidacy for Doctoral Degree

A general examination may be scheduled if: (a) the student has completed 60 credits (some of these credits may be taken the same quarter of the exam); (b) all required program examinations that do not need Graduate School approval have been completed and; (c) all members of the supervisory committee agree that the student's background of study and preparation is sufficient and have approved the student to schedule a general examination. At least four members of a supervisory committee — including the chair, Graduate School representative, and one additional graduate faculty member — must be present at the examination.

If the general examination is satisfactory, the supervisory committee members who participate at the examination sign the warrant and return it to the student's graduate program by the last day of the quarter. If an examination is unsatisfactory, a supervisory committee may recommend that the dean of the Graduate School permit up to a maximum of two additional re-examinations after a period of additional study. Any members of a supervisory committee who do not agree with the majority opinion are encouraged to submit a minority report to the dean of the Graduate School.

The student must be registered as a graduate student during the quarter that they take the general examination. When the Graduate School approves candidacy, a student is identified and designated as a candidate for the appropriate doctoral degree and is awarded a candidate certificate. After achieving candidate status, a student ordinarily devotes his or her time primarily to completing research, writing the dissertation and preparing for the final examination.

A candidate certificate and the doctoral degree may not be awarded the same quarter.

Candidate's Certificate

A candidate certificate is formal recognition of the completion of a very significant step towards a doctoral degree. Students who have passed a general examination and have completed all requirements for a doctoral degree, except a final examination and Graduate School acceptance of a dissertation, are awarded a candidate certificate. Candidacy is conferred on the last day of a quarter.

Dissertation and Final Examination

A candidate must present a dissertation demonstrating original and independent investigation and achievement. A dissertation should reflect not only a mastery of research techniques, but also ability to select an important problem for investigation, and to deal with it competently.

Normally, a dissertation is written in English. However, if there are circumstances that warrant a dissertation be written in another language, approval must be received from the dean of the Graduate School via petition.

The Graduate School publishes online formatting guidelines for theses and dissertations (www.grad.washington.edu/students/etd/) and students should familiarize themselves with the requirements before they begin. A dissertation must meet these format requirements before being accepted by the Graduate School. Thesis and dissertation advisers are available in the Graduate School to answer questions.

A final examination may be scheduled if: (a) a student passed a general examination in a previous quarter; (b) a reading committee is officially established with the Graduate School; (c) the reading committee has read an entire draft of the dissertation and; (d) the entire supervisory committee has agreed that the student is prepared and has approved the student to schedule a final examination. At least four members of a supervisory committee — including the chair, Graduate School representative, and one additional graduate faculty member — must be present at the examination.

If the final examination is satisfactory, the supervisory committee members who participate at the examination sign the warrant and return it to the student's graduate program by the last day of the quarter. Any members of a supervisory committee who participate at an examination, but do not agree with the majority opinion, are encouraged to submit a minority report to the

dean of the Graduate School. If an examination is unsatisfactory, a supervisory committee may recommend that the dean of the Graduate School permit a second examination after a period of additional study.

Registration as a graduate student is required the quarter that a final examination is taken *and* the quarter the dissertation is submitted. The degree is conferred the quarter in which the student's dissertation is accepted by the Graduate School.

Publication of Doctoral Dissertations

Part of the obligation of research is publication of the results and, in the case of doctoral research, this means microfilm publication of the dissertation. This is a Graduate School requirement, in addition to any previous or planned publication of any or all of a dissertation, and provides worldwide distribution of the work. A candidate signs a publication agreement when a dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

Individual PhD Program

The Graduate School maintains the individual Ph.D. program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. It is not intended as a mechanism for offering the Ph.D. within units that do not have their own authorized Ph.D. programs.

Information and application materials for the individual Ph.D. program are available at <https://grad.uw.edu/about-the-graduate-school/interdisciplinary-programs/iphd-2/>

College of Arts and Sciences

[Website](#)

The departments and schools of the College of Arts and Sciences offer nearly 100 curricula leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Design, and Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

Undergraduate Study Graduation Requirements

A liberal arts education entails mastery of certain basic skills, exposure to a broad range of academic disciplines, and concentration in a particular field of knowledge. To be awarded a baccalaureate degree a student in the College must fulfill requirements* in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Inquiry, Diversity, and a Major. All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below.

- *Language Skills (5-20 credits):*
 - English composition (5 credits)
 - Foreign language (0-15 credits, depending on placement or high school background)
- *Reasoning and Writing in Context (15 credits):*
 - Reasoning (RSN) (5 credits)
 - Additional writing (W) courses (10 credits)

- *Areas of Inquiry (75 credits):* General-education courses to include at least 20 credits in each of the following three areas:
 - Arts & Humanities (A&H)
 - Social Science (SSc)
 - Natural Science (NSc)
- *Diversity (3 credits):* Sociocultural, political, and economic diversity (DIV)
- *Major (50-90 credits):* An area of specialization, usually in a single department
- *Minor (25-35 credits):* An additional area of specialization
- *Electives (varies):* Free choice; as many credits as necessary to bring the total to 180

*Requirements of colleges other than Arts and Sciences are based on these, but may differ. Students who have not chosen a major are advised to follow the College of Arts and Sciences requirements.

Language Skills

To receive a degree from the College of Arts and Sciences, students whose first enrollment in college (whether at the UW or elsewhere) was in autumn quarter 1985 or later are required to complete 5 credits of English composition with a minimum 2.0 grade. They must also complete coursework through the end of the first-year college sequence in a foreign language, with a 2.0 or higher grade in the third-quarter course, or demonstrate equivalent proficiency through one of the following: successful completion of the third-year or higher level of high school language instruction; by passing a proficiency examination and placing into a course beyond the first year; or by receiving

a passing grade in a qualifying course beyond the first-year level. Credits used for these two requirements (including the entire first year of foreign language, if taken) cannot also be applied to the Areas of Inquiry requirements described below.

Reasoning and Writing in Context

Students who first entered college autumn quarter 1985 or later must complete a minimum of 5 credits in Reasoning (RSN) and 10 credits of additional composition courses or courses that emphasize the development of writing skills in the context of an academic discipline (W courses). RSN and writing courses, if they apply, can also be counted toward Areas of Inquiry or major requirements. The writing requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

Areas of Inquiry

The Areas of Inquiry requirement is the means by which the student develops a breadth of knowledge. Undergraduate courses are currently divided broadly into three categories: Arts & Humanities (A&H); Social Sciences (SSc); and Natural Sciences (NSc). Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the three fields. Of the 75 total credits required, 15 may be from courses in the student's major department.

Diversity

No fewer than 3 credits of courses focusing on the sociocultural, political, and economic diversity of human experience at local, regional, or global scales.

Course Designators

The following symbols, included in course descriptions in this catalog, indicate which, if any, of the above requirements are fulfilled by certain courses:

A&H -- Arts & Humanities (Area of Inquiry requirement)

SSc -- Social Sciences (Area of Inquiry requirement)

NSc -- Natural Sciences (Area of Inquiry requirement)

RSN -- Reasoning

DIV -- Diversity

Courses that meet the foreign-language requirement and the additional-writing requirement are not marked. The third-quarter (or second-semester) course in any language meets the language requirement, so long as the entire first-year sequence totals at least 12 credits (regardless of whether the student earned credit for the earlier parts of the sequence). Consult the quarterly Time Schedule for writing-intensive courses that meet the additional-writing requirement.

Major

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the "major" required of each student consists of 50 or more prescribed credits in a department of the College or a closely related group of departments.

Minor

Completion of a minor, available through many departments, is optional.

Credits Required Outside Major Department

So that the student does not overspecialize, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree.

GPA Required for Graduation

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence through the University.

Applying for Graduation

Students should apply for the baccalaureate degree no later than the first quarter of their final year. Seniors who apply by announced quarterly deadlines receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. GSP status is limited to two quarters.

All current and past UW students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent major requirements. Students wishing to fulfill a previous set of requirements should see an adviser for

details and options. All responsibility for fulfilling graduation requirements rests with the student concerned.

Limits on Physical Education Courses Allowed Toward Graduation

A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical-education activity courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical-education courses are not offered at the University.

Graduate Study

Students who intend to work toward advanced degrees must apply for admission to the [Graduate School](#) and must meet the general requirements outlined in this General Catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree in force at the time the degree is to be awarded.

American Ethnic Studies

B510 [Padelford Hall](#)
206-543-5401
[Website](#)
[Faculty Website](#)
aes@uw.edu

The Department of American Ethnic Studies encompasses specific, interrelated,

multiethnic, and transnational histories of African Americans, Asian Americans, Pacific Islander Americans, Chicanos/Chicanas, Latinos/Latinas, and Native Americans. Nationally, it was among the first programs in this field to gain departmental status.

Undergraduate Program

B504 [Padelford Hall](#)
206- 221-0664
aes@uw.edu

Program of Study: Major: American Ethnic Studies

Program Overview

American Ethnic Studies is the interdisciplinary and comparative exploration of historical and contemporary relations of power and issues of social justice in American societies. Our main fields of research and pedagogy focus on the United States but also extend into questions about global and transnational dimensions, concepts, and histories concerning race and ethnicity in America.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in American Ethnic Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: United States history, literature, drama, arts, sociology, political science, ethnic studies.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in American Ethnic Studies

Credential Overview

Students earn a BA degree in American Ethnic Studies by taking core courses on ethnic-specific and comparative, multi-ethnic subjects. At the same time, they develop an emphasis in one of our concentrations - African American Studies, Asian American/Pacific Islander Studies, Chicano/a Studies, and Comparative AES - that make up the major.

Completion Requirements

60 credits

1. *Core courses (30 credits):*
 1. 15 credits of AES 150, AES 151, AES 212
 2. 15 credits of AFRAM 101, AAS 101, CHSTU 101
2. *Concentration:* 30 credits in one of the following: African American Studies, Asian/Pacific American Studies, Chicano Studies, Comparative American Ethnic Studies. See department for list of concentration courses. Some concentration requirements may be met while fulfilling the core courses requirement.
3. *Electives:* Sufficient electives to reach 60 credits of approved courses applied to the major.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The American Ethnic Studies curriculum prepares undergraduate students to understand the breadth, key content, methodologies, and theories in the field of ethnic studies as well as comparative interdisciplinary knowledge of African American, Asian/Pacific American, and Chicano issues. The major is designed to help students acquire the skills to think and write critically about race, class, and ethnicity in social and historical contexts and multiple categories of social diversity.
 - *Instructional and Research Facilities:* Writing Center
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Students have the opportunity to become actively engaged in personalized research and discovery through independent study and research courses in each program concentration.
 - *Department Scholarships:* None
 - *Student Organizations/Associations:* Ethnic Studies Student Association
-

American Indian Studies

C514 [Padelford Hall](#)
206-543-9082
[Website](#)
[Faculty Website](#)
native@uw.edu

The American Indian Studies Department at the University of Washington advances and promotes knowledge integral to Native peoples through research, teaching, and community service. It is the largest and most comprehensive program of its kind in the Pacific Northwest.

Undergraduate Programs

C514 [Padelford Hall](#)
206-543-9082
native@uw.edu

Program of Study: Major: American Indian Studies

Program Overview

American Indian Studies approaches its teaching and research from a decolonized, community based, and global perspective. American Indian Studies faculty and students strive to develop innovative theories and methodologies that increase knowledge about Indigenous Peoples and support the needs of Indigenous communities. The department promotes faculty and student exchange programs with institutions that are committed to a deeper understanding of Indigenous communities and Peoples throughout the world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in American Indian Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: Completion of AIS 102 and AIS 103. Completion of two courses from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, or HSTAA 210/AIS 210. Courses that sharpen writing and analytical reasoning skills. Exposure to courses in history, environmental studies, sociology, anthropology, ethnic studies, literature, political science, communications, and gender, women, and sexuality studies.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in American Indian Studies

Credential Overview

The American Indian Studies degree prepares students for a variety of careers, including community-based and university-based research; cultural resource management; education; writing; fundraising; tribal administration; academic advising and administration; museum curation; resource management; and many other careers. The degree also provides a foundation for graduate study in indigenous studies, law, museology, tribal administration, documentary filmmaking, education, history, and other areas of study.

Completion Requirements

55 credits

1. Introductory courses (10 credits): AIS 102, AIS 103
2. Content courses (10 credits): two courses from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, and HSTAA 210/AIS 210
3. Concentrations (25 credits): Minimum 5 credits each from governance; environment and health; and culture and history. (See department website for courses that fulfill concentration requirements.)
4. Electives (10 credits): Any AIS courses not used to satisfy other major requirements; also, approved courses taught by AIS adjunct faculty. (See department website for adjunct faculty courses.)
5. Minimum 30 credits completed at the 300 level or above

Program of Study: Minor: American Indian Studies

Program Overview

Any undergraduate student with at least sophomore standing may declare this minor with his or her major adviser's permission. Like the major, the minor in AIS prepares students for a variety of careers, including community-based and university-based research; cultural resource management; education; writing; fundraising; tribal administration; academic advising and administration; museum curation; resource management; and many other careers. The AIS minor can be combined with a major in almost any field to complement that degree with additional knowledge integral to Native peoples.

This program of study leads to the following credential:

- Minor in American Indian Studies

Minor in American Indian Studies

Completion Requirements

Minimum 30 credits

1. Introductory courses (10 credits): AIS 102, AIS 103
2. Content course (5 credits): one selected from AIS 170, AIS 202, AIS 203, HSTAA 209/AIS 209, and HSTAA 210/AIS 210
3. Electives (15 credits): in AIS courses; minimum 5 credits at the 300 level or above

Program of Study: Minor: Oceania and Pacific Islander Studies

Program Overview

The Minor in Oceania and Pacific Islander Studies is designed to enable a transformative academic experience for UW students through the use of collaborative, interdisciplinary, and innovative pedagogical approaches adapted from indigenous knowledges and practices from Oceania. It brings cohesion to the different kinds of courses designed to increase students' critical and transformative thinking about all aspects of knowledge and practice in Oceania and Pacific Islander Studies.

This program of study leads to the following credential:

- Minor in Oceania and Pacific Islander Studies

Minor in Oceania and Pacific Islander Studies

Completion Requirements

Minimum 25 credits

1. Required Core Courses (15 credits): AIS 102; one from AAS 206, AAS 210, or ANTH 309; one from AES 494, AIS 497, ANTH 489
2. Electives (10 credits): two courses from an approved list of courses, including at least one at the 300 or 400 level. Refer to department website for list of approved courses.
3. Minimum 15 credits of upper-division courses
4. Minimum 15 credits taken in residence at UW Seattle

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The AIS curriculum prepares students to understand the breadth, key content, methodologies, and theories in American Indian and Indigenous studies, while developing their skills to write and think critically. The degree prepares students to earn advanced degrees in related fields, as well as to pursue careers involving critical thinking and knowledge of American Indian and the Indigenous experiences.
- *Honors Options Available:* None
- *Undergraduate Research, Internships, and Service Learning:* Contact adviser for internship opportunities
- *Department Scholarships:* None
- *Student Organizations/Associations:*
 - American Indian Science and Engineering Society (AISES):

College of Engineering, 013 Loew Hall

- American Indian Student Commission - ASUW: asuwaisc@uw.edu
- First Nations at the UW: Samuel E. Kelly Ethnic Cultural Center, 3931 Brooklyn Avenue N. E.
- Medicine Wheel Society: Samuel E. Kelly Ethnic Cultural Center
- Native Organization of Indigenous Scholars: Samuel E. Kelly Ethnic Cultural Center

Graduate Program

Program of Study: Graduate Certificate in American Indian and Indigenous Studies

This program of study leads to the following credential:

- Graduate Certificate in American Indian & Indigenous Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: Completion of two courses from AIS 102, AIS 201, AIS 202, AIS 203

Admission Requirements

1. 10 credits of college American Indian studies classes
2. Minimum 2.00 cumulative GPA
3. Upon satisfying items 1 and 2, above, students may declare the major any time. Transfer students must be enrolled at the UW before applying.

Graduate Certificate in American Indian & Indigenous Studies

Completion Requirements

Anthropology

314 [Denny Hall](#)
206-543-5240

[Website](#)
[Faculty Website](#)
anthinfo@uw.edu

The Department of Anthropology is committed to describing, interpreting, and explaining the historical, biological, and cultural diversity of the human species. The department offers three distinct academic programs: archaeology, biocultural anthropology, and sociocultural anthropology. Additional emphases include medical anthropology and global health, archaeological sciences, and anthropology of globalization.

Undergraduate Programs

310 [Denny Hall](#)
206-543-7772
anthinfo@uw.edu

Program of Study: Major: Anthropology

Program Overview

Anthropology undergraduates earn either a Bachelor of Arts (BA) or a Bachelor of Science (BS) in Anthropology. The difference between the two degrees lies in how they are structured. If you want a broad

overview of Anthropology as a discipline or if you want to focus on the more humanistic side of Anthropology, the BA is for you. If you want to focus on a particular area within the more scientific side of Anthropology, you should pursue the BS. Both degrees are appropriate for a myriad of post-baccalaureate opportunities including graduate and professional school training in the health sciences (e.g. medical school, public health, physical therapy), law, social justice advocacy, and (of course!) anthropology. Anthropology is mainly about two things: Understanding and engagement. It seeks to make sense of this world we share and to uncover new ways to transform the world and ourselves. It takes on issues of social justice, from preserving the environment to preserving languages and culture.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Anthropology
- Bachelor of Arts degree with a major in Anthropology: Anthropology of Globalization
- Bachelor of Arts degree with a major in Anthropology: Archaeological Sciences
- Bachelor of Arts degree with a major in Anthropology: Human Evolutionary Biology
- Bachelor of Arts degree with a major in Anthropology: Indigenous Archaeology
- Bachelor of Arts degree with a major in Anthropology: Medical Anthropology and Global Health
- Bachelor of Science degree with a major in Anthropology: Archaeological Sciences
- Bachelor of Science degree with a major in Anthropology: Human Evolutionary Biology
- Bachelor of Science degree with a major in Anthropology: Medical Anthropology and Global Health

Recommended Preparation

Suggested First- and Second-Year College Courses: any 200-level ARCHY course; BIO A 201; any 200-level ANTH course; and one from CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Anthropology

Credential Overview

The undergraduate program leads to the Bachelor of Arts degree. After completing required courses within the anthropology core, students can elect to focus on one area or take courses in different areas within the major, including archaeology, biocultural anthropology and sociocultural anthropology. Additionally, students may complete an undergraduate option in medical anthropology and global health, archaeological sciences, anthropology of globalization, or human evolutionary biology.

Completion Requirements

55 credits

1. *Core courses (20 credits):* BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT

- 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
 - b. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
 3. *Additional major requirements:*
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Arts degree with a major in Anthropology: Anthropology of Globalization

Credential Overview

The Anthropology of Globalization option prepares students for a diverse range of career, including those in business, human rights and social justice, immigration rights, and non-governmental organization work, as well as for further study in anthropology, law, politics, economics, philosophy, and critical thought. Anthropology is

increasingly valued and utilized in the business world. Courses in archaeology, sociocultural anthropology and biocultural anthropology will introduce students to the study of cross-border exchange of artifacts and objects, the circulation of knowledge, beliefs, and technologies, migration movements, transnational legislation, and genes, people and disease. By thinking through these questions against a background of historical and regional differences, students will enhance their understanding of emerging forms of circulation.

Completion Requirements

55 credits

1. *Core courses (20 credits):* BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. Option courses: Requirements for the general anthropology major, as shown above, to include 20 credits from courses in ANTH, ARCHY, and BIO A approved for the Anthropology of Globalization option. A list of approved courses is available on the department website.
 - b. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS

- 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
- c. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
3. *Additional major requirements:*
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Arts degree with a major in Anthropology: Archaeological Sciences

Credential Overview

The Archaeological Sciences option is recommended to students who are interested in an in-depth study of archaeological methods and theories. More specifically, it introduces students to the rigorous study of archaeological data. The required courses in this option will equip students with specialized laboratory, analytical, and field skills, and will provide them with the historical context needed for understanding contemporary issues in archaeological sciences.

Completion Requirements

55 credits

1. *Core courses (20 credits):* BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495

2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. Option courses: Requirements for the general anthropology major, as shown above, to include at least 15 credits from courses approved for the Archaeological Sciences core, and at least 15 credits from courses approved for the ASc elective lists. Lists of approved courses are available on the department website.
 - b. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
 - c. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
3. *Additional major requirements:*
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Arts degree with a major in Anthropology: Human Evolutionary Biology

Credential Overview

To understand our species, human evolutionary biologists begin with a simple

premise: that our past informs the present -- that humans, in their rich array of diversity, are the product of millions of years of evolution. Science has uncovered an evolutionary history that shaped humans to adapt and thrive in the environments of our Paleolithic ancestors. Yet recent changes in our society, our lifestyles, and our environment have occurred at an unprecedented rate -- one that may have outpaced evolution. How does this influence modern human biology? Could some of the most pressing human health issues -- ailments such as cardiovascular disease, diabetes, and cancers -- arise from living in a world that is far different from that of our ancestors? The Human Evolutionary Biology Option allow students to explore these questions. The liberal arts education offered through anthropology is recognized as an ideal course of preparation for careers in health-related fields.

Completion Requirements

55 credits

1. *Core courses (20 credits)*: BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. Option courses: Requirements for the general anthropology major, as shown above, to include BIO A 351 or BIO A 355; either BIO A 101 or

BIO A 348; and 15 credits from courses approved for the Human Evolutionary Biology option. A list of approved courses is available on the department website.

- b. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
 - c. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
3. *Additional major requirements*:
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Arts degree with a major in Anthropology: Indigenous Archaeology

Credential Overview

Students pursuing the option in Indigenous Archaeology will complete courses in both Anthropology and American Indian Studies. This collaborative approach will prepare students to work alongside tribal communities as well as with cultural resource management firms to ensure the protection and preservation of sites integral to tribal heritage. The Indigenous Archaeology option is recommended to students who are interested in an in-depth study of indigenous archaeological perspectives on the evaluation and protection of cultural heritage sites. The required courses in this option will provide

students with the historical context needed for understanding contemporary issues in indigenous archaeology, and equip students with specialized analytical, laboratory and field skills.

Completion Requirements

55 credits

1. *Core courses (20 credits)*: BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.
 - a. Option courses: Requirements for the general anthropology major, as shown above, to include AIS 102, three courses from the approved Indigenous Archaeology (IA) core list, and 15 credits from courses approved for the IA elective list. Lists of approved courses are available on the department website.
 - b. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
 - c. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.

3. *Additional major requirements*:
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Arts degree with a major in Anthropology: Medical Anthropology and Global Health

Credential Overview

Many students who complete the option in Medical Anthropology and Global Health plan to pursue post-graduate training and careers in anthropology and health-related fields such as public health, epidemiology, nursing, medicine, and global health. The liberal arts education offered through anthropology is recognized as an ideal course of preparation for these fields.

Completion Requirements

55 credits:

1. *Core courses (20 credits)*: BIO A 201; any 200-level ANTH course; any 200-level ARCHY course; and one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. Minimum 20 of these credits in upper-division (300- or 400-level) courses. One 100-level ANTH, ARCHY, or BIO A course, or AIS 102 may be counted toward the major, but is not required.

- a. Option courses: Requirements for the general anthropology major, as shown above, to include either ANTH 215 or ANTH 302 and 15 additional credits from ANTH, ARCHY, and BIO A courses approved for the Medical Anthropology and Global Health option. A list of approved courses is available on the department website.
- b. The following AIS courses may apply toward this requirement: AIS 202, AIS 203, AIS 209, AIS 210, AIS 311, AIS 330, AIS 335, AIS 340, AIS 425, AIS 443, AIS 480. No limit on the number of AIS courses that may apply to this requirement.
- c. Maximum 12 credits (18 credits for departmental Honors students) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major.
3. *Additional major requirements:*
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 15 upper-division credits in anthropology completed through the UW.

Bachelor of Science degree with a major in Anthropology: Archaeological Sciences

Credential Overview

The Archaeological Sciences option is recommended to students who are interested in an in-depth study of archaeological methods and theories. More specifically, it introduces students to the rigorous study of archaeological data. The required courses in this option will equip students with specialized laboratory, analytical, and field skills, and will provide them with the

historical context needed for understanding contemporary issues in archaeological sciences.

Completion Requirements

75 credits

1. *Core Courses (15 credits):* BIO A 201; any 200-level ARCHY course; one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. *Option Courses (50 credits):* Any 200-level ANTH course; minimum 15 credits from ASc core course list; minimum 15 credits from approved ASc elective course list; minimum 15 additional credits in ANTH, ARCHY, or BIO A; see department website for approved courses
3. Additional credits from Department of Anthropology courses: (10 credits)
4. Additional Requirements
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 40 credits in upper-division (300-400 level) courses; one 100-level ANTH, ARCHY, or BIO A course may be counted toward the major, but is not required.
 - c. Maximum 12 credits (18 credits for departmental Honors) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major
 - d. Minimum 35 upper-division credits in Department of Anthropology courses completed through the UW
 - e. Minimum 50 credits of Natural Sciences (NSc) courses in Department of Anthropology courses
 - f. Minimum 55 ANTH, ARCHY, and BIO A credits

Bachelor of Science degree with a major in Anthropology: Human Evolutionary Biology

Credential Overview

Human evolutionary biologists begin with a simple premise: that our past informs the present — that humans, in their rich array of diversity, are the product of millions of years of evolution. Could some of the most pressing human health issues, such as cardiovascular disease, diabetes, and cancers, arise from living in a world that is far different from that of our ancestors? The Human Evolutionary Biology Option allows students to explore this and many other related questions.

Completion Requirements

75 credits

1. *Core Courses (15 credits)*: BIO A 201; any 200-level ARCHY course; one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495
2. *Option Courses (50 credits)*: any 200-level ANTH course; BIO A 351 or BIO A 355; BIO A 101 or BIO A 348; minimum 35 credits from approved HEB course list; see department website for approved courses
3. Additional credits from Department of Anthropology courses: (10 credits)
4. Additional Requirements
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 40 credits in upper-division (300-400 level) courses; one 100-level ANTH, ARCHY, or BIO

A course may be counted toward the major, but is not required.

- c. Maximum 12 credits (18 credits for departmental Honors) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major
- d. Minimum 35 upper-division credits in Department of Anthropology courses completed through the UW
- e. Minimum 50 credits of Natural Sciences (NSc) courses in Department of Anthropology courses
- f. Minimum 55 ANTH, ARCHY, and BIO A credits

Bachelor of Science degree with a major in Anthropology: Medical Anthropology and Global Health

Credential Overview

Many students who complete the option in Medical Anthropology and Global Health plan to pursue post-graduate training and careers in anthropology and health-related fields such as public health, epidemiology, nursing, medicine, and global health. The liberal arts education offered through anthropology is recognized as an ideal course of preparation for these fields.

Completion Requirements

75 credits

1. *Core Courses (15 credits)*: BIO A 201; any 200-level ARCHY course; one from the following: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, Q SCI 381, or ARCHY 495

2. *Option Courses (50 credits):* ANTH 215; minimum 45 credits from courses approved for the MAGH list; see department website for approved courses.
3. Additional credits from Department of Anthropology courses: (10 credits)
4. Additional Requirements
 - a. Minimum 2.00 cumulative GPA for courses counted toward the major
 - b. Minimum 40 credits in upper-division (300-400 level) courses; one 100-level ANTH, ARCHY, or BIO A course may be counted toward the major, but is not required.
 - c. Maximum 12 credits (18 credits for departmental Honors) from ANTH 499, ARCHY 499, and BIO A 499 combined may be counted toward the major
 - d. Minimum 35 upper-division credits in Department of Anthropology courses completed through the UW
 - e. Minimum 50 credits of Natural Sciences (NSc) courses in Department of Anthropology courses
 - f. Minimum 55 ANTH, ARCHY, and BIO A credits

Program of Study: Minor: Anthropology

Program Overview

The undergraduate program leads to the Bachelor of Arts degree. After completing required courses within the anthropology core, students can elect to focus on one area or take courses in different areas within the major, including archaeology, biocultural anthropology and sociocultural anthropology. Additionally, students may complete an undergraduate option in medical anthropology and global health, archaeological sciences, anthropology of

globalization, or human evolutionary biology.

This program of study leads to the following credential:

- Minor in Anthropology

Minor in Anthropology

Credential Overview

The anthropology minor focuses on examining the cultural and biological diversity humans and their material remains. Areas of interest can include the study of the relationship between humans and their environment, the archaeological record, language and culture, human evolution, and cultural modes of being as these differ in time and space. By studying anthropology, students begin to understand better how to find ways to live and work together in today's world, respecting cultural diversity while building upon common human values.

Completion Requirements

30 credits

1. At least 15 credits at upper-division level from courses with the following prefixes: ANTH, ARCHY, BIO A. (Certain AIS courses may apply toward this requirement. See departmental adviser for list.)
2. Minimum 2.00 cumulative GPA for courses counted toward the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of anthropology develops skills in critical thinking,

research, and writing, as well as technical skills specific to the different subfields (ethnographic field techniques, interpretation of data, statistical analysis, archaeological methods of data collection and interpretation). An undergraduate degree prepares students for many positions that involve working with people, as well as for academic studies in a variety of fields. Careers in anthropology can be developed through employment with government agencies, museums, teaching and research, private consulting firms, and nongovernmental organizations.

- *Instructional and Research Facilities:* Undergraduate students have access to the following facilities for classroom training in laboratory methods and for research experiences subject to faculty approval and supervision: the Burke Museum (ethnological, archaeological, natural history, and archival collection), Quaternary Research Center, Biodemography Laboratory, Luminescence Dating Laboratory, Electron Microscope Laboratory Cooperative, Geoarchaeology Laboratory, Digital Imaging and Microscopy Laboratory, Geographical Information System (GIS) Computer Laboratory, Primate Evolutionary Biomechanics Laboratory. In addition, the department has a writing center offering undergraduate writing support for anthropology classes.
- *Honors Options available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The Department of Anthropology supports students who

undertake community-based internships under faculty supervision.

- *Department Scholarships:*
 - The Brett E Baldwin Scholarship, for approximately \$1,000, is awarded to an outstanding graduate or undergraduate majoring in anthropology.
 - The Wienker Prize for Best Undergraduate Essay. Four awards are given each year, one in each sub-discipline for the best essay in an undergraduate anthropology class, and one for the best senior honors thesis.
- *Student Organizations/Associations:* The Anthropology Club is run by and for students in the department.

Graduate Programs

gradanth@uw.edu

Program of Study: Doctor of Philosophy (Anthropology)

This program of study leads to the following credentials:

- Doctor of Philosophy (Anthropology)
- Doctor of Philosophy (Anthropology: Archaeology)
- Doctor of Philosophy (Anthropology: Biological Anthropology)
- Doctor of Philosophy (Anthropology: Sociocultural Anthropology)

Doctor of Philosophy (Anthropology)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All options in this program require 90 total credits

1. *Required Coursework (Credit total varies depending on option):*
Completion of MA requirements in Archaeology, Biological, or Sociocultural option (see additional requirements for option-specific information)
2. *Dissertation (Minimum 27 credits)*
ANTH 800 Doctoral Dissertation (*-) Credit/no-credit only.
3. *Electives (To reach total 90 credits):*
Any course numbered 400-level and above taken while in graduate student status at the UW.
4. Exams, Teaching, and Research requirements (see additional requirements for option-specific information)

Additional Completion Requirements

Option-specific requirements

1. *Required Coursework (18 credits):* 18 graded credits in ANTH, ARCHY or BIO A at the 400- and/or 500-level.

Doctor of Philosophy (Anthropology: Archaeology)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All options in this program require 90 total credits

1. *Required Coursework (Credit total varies depending on option):*
Completion of MA requirements in Archaeology, Biological, or Sociocultural option (see additional requirements for option-specific information)
2. *Dissertation (Minimum 27 credits)*
ANTH 800 Doctoral Dissertation (*-) Credit/no-credit only.
3. *Electives (To reach total 90 credits):*
Any course numbered 400-level and above taken while in graduate student status at the UW.
4. Exams, Teaching, and Research requirements (see additional requirements for option-specific information)

Additional Completion Requirements

Option-specific requirements

1. *Required Courses (8 credits):* ARCHY 510, ARCHY 599
2. *Required Theory and Methods (15 credits):* List of courses maintained by department.
3. *Required Area Courses (5 credits):* List of courses maintained by department.
4. *Required Social Impacts in Archaeology (5 credits):* List of courses maintained by department.
5. *Additional Requirements:*
Comprehensive written examination, language translation, teaching requirement, general examination, dissertation colloquium, dissertation field research, and dissertation.

Doctor of Philosophy (Anthropology: Biological Anthropology)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All options in this program require 90 total credits

1. *Required Coursework (Credit total varies depending on option):*
Completion of MA requirements in Archaeology, Biological, or Sociocultural option (see additional requirements for option-specific information)
2. *Dissertation (Minimum 27 credits)*
ANTH 800 Doctoral Dissertation (*-) Credit/no-credit only.
3. *Electives (To reach total 90 credits):*
Any course numbered 400-level and above taken while in graduate student status at the UW.
4. Exams, Teaching, and Research requirements (see additional requirements for option-specific information)

Additional Completion Requirements

Option-specific requirements:

1. *Core: Five Theory and Methods Courses (15 - 25 credits), must include at least one course in each of the following:*
 - a. *Human Biology (minimum 3 credits):*
Course list maintained internally by the program.
 - b. *Evolution (E) (minimum 3 credits):*
Course list maintained internally by the program.

- c. *Paleoanthropology (minimum 3 credits):* Course list maintained internally by the program.
 - d. *Primatology (minimum 3 credits):*
Course list maintained internally by the program.
 - e. *Additional Theory and Methods Course (minimum 3 credits):* Course list maintained internally by the program.
2. *Statistical sequence - one from below or approved by faculty (minimum 8 credits):* Course list maintained internally by the program.
 3. *Additional Course Requirement: BIO A 525*
 4. *Additional Requirements:*
Comprehensive written examination, teaching requirement, general examination, dissertation colloquium, dissertation research, and dissertation.

Doctor of Philosophy (Anthropology: Sociocultural Anthropology)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All options in this program require 90 total credits

1. *Required Coursework (Credit total varies depending on option):*
Completion of MA requirements in Archaeology, Biological, or Sociocultural option (see additional requirements for option-specific information)
2. *Dissertation (Minimum 27 credits)*
ANTH 800 Doctoral Dissertation (*-) Credit/no-credit only.

3. *Electives (To reach total 90 credits):*
Any course numbered 400-level and above taken while in graduate student status at the UW.
4. Exams, Teaching, and Research requirements (see additional requirements for option-specific information)

Additional Completion Requirements

Option-specific requirements:

1. *Core Requirements (25 credits):* ANTH 550, ANTH 551, ANTH 565, ANTH 566, ANTH 567
2. 4 additional ANTH courses at the 400/500 level with different members of the sociocultural anthropology faculty (12 credits)

Additional Information

- *Financial Aid:* One multi-year recruitment fellowship is awarded to an outstanding entering student. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Applicants should apply for Foreign Language Area Studies Fellowships if qualified. Applicants are encouraged to seek funding from outside sources. Work-study positions may also be available for eligible graduate students.
- *Department Scholarships*
 - Student Training in Anthropological Research Tools and Skills (STARTS), in support of graduate students conducting pre-dissertation pilot research.
 - The Brett E. Baldwin Scholarship, for approximately \$1,000, awarded to an outstanding graduate or undergraduate majoring in anthropology.

- Evan David James Fellowship, for approximately \$5,000, awarded to an outstanding graduate student conducting research in any time period in the PNW.
- Ronald Leroy Olson Fellowship, for one quarter of funding (tuition and a stipend), for UW graduate students in the field of anthropology. Whenever possible, such students are to be “members of a Native American or Native Alaskan Tribe,” ideally from Washington, Alaska, or British Columbia.

Program of Study: Master of Arts (Anthropology)

Program Overview

The department recognizes three principal subfields of anthropology: archaeology, biological anthropology, and sociocultural anthropology (including linguistic anthropology). Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies. The M.A. in archaeological heritage is the only master's degree available for admission. All other M.A. degrees in the department are only available to students enrolled in the Ph.D. program in Anthropology.

This program of study leads to the following credentials:

- Master of Arts (Anthropology)
- Master of Arts (Anthropology: Archaeological Heritage)
- Master of Arts (Anthropology: Archaeology)
- Master of Arts (Anthropology: Biological Anthropology)
- Master of Arts (Anthropology: Sociocultural Anthropology)

Master of Arts (Anthropology)

Admission Requirements

Admissions not available to this degree. It is only available to students enrolled in the Doctor of Philosophy (Anthropology) program.

Completion Requirements

1. *Required Credits (18 credits)*: At least 18 graded credits in ANTH, ARCHY, or BIO A at the 400 or 500-level.
2. *Elective Courses (18 credits)*: Any course numbered 400-level and above taken while in graduate student status at the UW

Master of Arts (Anthropology: Archaeological Heritage)

Credential Overview

The University of Washington Master of Arts Program in Archaeological Heritage is designed to provide graduate training and credentials to qualify students for careers in Cultural Resource Management (CRM) in the US, as well as archaeological heritage globally. These career areas employ the majority of archaeologists in the US and beyond.

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

36 credits

1. Coursework (Minimum 17 credits): ARCHY 500-level coursework

identified by student and advisor. Course list maintained by the program.

2. Field School (Minimum 5 credits): Course list maintained by the program.
3. Internship (Minimum 5 credits): ARCHY 601
4. Thesis Project (Minimum 9 credits): ARCHY 710

Master of Arts (Anthropology: Archaeology)

Admission Requirements

Admissions not available to this degree. It is only available to students enrolled in the Doctor of Philosophy (Anthropology) program.

Completion Requirements

36 total credits

1. *Required Courses (8 credits)*: ARCHY 510 and ARCHY 599
2. *Required Theory and Methods (15 credits)*: Course list maintained internally by the program.
3. *Required Area Courses (5 credits)*: Course list maintained internally by the program.
4. *Required Social Impacts in Archaeology (5 credits)*: Course list maintained internally by the program.
5. *Electives (3 credits)*: Any course numbered 400-level and above taken while in graduate student status at the UW.
6. Comprehensive written examination.

Master of Arts (Anthropology: Biological Anthropology)

Admission Requirements

Admissions not available to this degree. It is only available to students enrolled in the Doctor of Philosophy (Anthropology) program.

Completion Requirements

36 total credits

1. *Human Biology (minimum 3 credits)*: See departmental list
2. *Evolution (minimum 3 credits)*: See departmental list
3. *Paleoanthropology (minimum 3 credits)*: See departmental list
4. *Primatology (minimum 3 credits)*: See departmental list
5. *Additional Theory and Methods (minimum 3 credits)*: See departmental list
6. *Statistical sequence (minimum 8 credits)*: See departmental list
7. *Elective Courses (3-13 credits)*: Any course numbered 400-level and above taken while in graduate student status at the UW.
8. A non-thesis MA degree is earned once all core courses have been completed and after receiving a passing grade on the written comprehensive exam.

Master of Arts (Anthropology: Sociocultural Anthropology)

Admission Requirements

Admissions not available to this degree. It is only available to students enrolled in the Doctor of Philosophy (Anthropology) program.

Completion Requirements

37-46 total credits

1. *Core Requirements (25 credits)*: ANTH 550, ANTH 551, ANTH 565, ANTH 566, ANTH 567
2. 4 additional ANTH courses at the 400/500 level with different members of the sociocultural anthropology faculty (12 credits)
3. Thesis (optional): ANTH 600/700 (9 credits)

Applied and Computational Math Sciences

C36 [Padelford Hall](#)

[Website](#)
advising@math.washington.edu

Mathematics is the common language of modern science, engineering, and business. Techniques of mathematical modeling and data analysis are key instruments in the tool kit of modern practitioners and researchers in a wide array of disciplines. ACMS is an interdisciplinary program in the mathematical sciences that provides sound training in mathematical modeling, scientific computation, mathematical reasoning, and statistical analysis. The program is jointly administered by the Departments of Applied Mathematics, Computer Science and Engineering, Mathematics, and Statistics, offering students access to their combined resources. An ACMS major is an excellent stepping stone to a career in engineering and the physical, life, and management sciences.

Undergraduate Program

206-543-6830

advising@math.washington.edu

Program of Study: Major: Applied and Computational Mathematical Sciences

Program Overview

The Applied and Computational Mathematical Sciences (ACMS) program is a multidisciplinary Bachelor of Science degree program in the College of Arts and Sciences, offered jointly by the Departments of Applied Mathematics, Computer Science & Engineering, Mathematics, and Statistics. It is designed for students interested in the application of mathematical and computational concepts and tools to problems in research or in the business world.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Biological and Life Sciences
- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Data Science and Statistics
- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Discrete Mathematics and Algorithms
- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Engineering and Physical Sciences
- Bachelor of Science degree with a major in Applied and Computational Math

Sciences: Mathematical Economics and Quantitative Finance

- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Scientific Computing and Numerical Analysis
- Bachelor of Science degree with a major in Applied and Computational Math Sciences: Social and Behavioral Science

Recommended Preparation

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CSE 123 or CSE 143.

Admission Requirements

Admission to all programs is capacity constrained. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the unit's admission decision. The application and additional information are available at the department website.

Applicants are considered in two groups: Currently Enrolled UW Students and Entering Transfers.

1. *Currently Enrolled UW Students:* A portion of each year's class is admitted after matriculating to UW. Admission is capacity constrained.
 - a. *Minimum Course Requirements:* CSE 123 or CSE 143; MATH 124, MATH 125, MATH 126; one from MATH 207, MATH 208, AMATH 351, AMATH 352 with a minimum 2.0 grade in each of these courses and an overall minimum 2.50 GPA in these courses. MATH 134, MATH 135 and MATH 136 may replace

- MATH 124, MATH 125, MATH 126, MATH 207 and MATH 208.
- b. *Determining Factors:* Factors considered include performance in all degree-related courses as measured by GPA, difficulty of all courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, amount and type of college-level credit, relevant work and life experience, and record of honors.
 - c. *When to Apply:* Applications are accepted twice each year at the beginning of autumn and spring quarters. Refer to department website for deadlines.
2. *Entering Transfers.* Admission is capacity constrained.

Transfer applicants must submit a departmental application for the same quarter they submit an application to the University. Applicants must meet the following requirements:

- a. Minimum 30 graded college credits completed by the University transfer application deadline.
- b. *Minimum Course Requirements:* CSE 123 or CSE 143; MATH 124, MATH 125, MATH 126; one from MATH 207, MATH 208, AMATH 351, AMATH 352 with a minimum 2.0 grade in each of these courses and an overall minimum 2.50 GPA in these courses. MATH 134, MATH 135 and MATH 136 may replace MATH 124, MATH 125, MATH 126, MATH 207 and MATH 208.
- c. *Determining Factors:* Factors considered include performance in all degree-related courses as measured by GPA, difficulty of all courses completed, frequency of incompletes or withdrawal grades,

number of repeated courses, amount and type of college-level credit, relevant work and life experience, and record of honors.

- d. *When to Apply:* Application deadlines: April 5 for autumn admission

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Biological and Life Sciences

Credential Overview

Applied and Computational Math Sciences: Biological and Life Sciences In recent years, the application of mathematical modeling and computation has paved the way for great strides in our understanding of basic biological phenomena. A solid training in mathematics is rapidly becoming essential for modern research in a wide variety of biological and medical disciplines, including developmental biology, genetics and genomics, biostatistics, ecological modeling, physiology, and biomechanics. This Option focuses on basic techniques of mathematical modeling and computation that are employed in the life sciences.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core:* 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 44 credits to include option core (24 credits): CHEM 142, CHEM 152 and BIOL 180; AMATH 353, AMATH 422, AMATH 423; and option electives (20 credits): outside area (12 credits or double major/double degree at the 300 level or above chosen from the four participating departments; see adviser for options) and 8 credits of approved courses at the 300 level or above in the biological and life science area.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Data Science and Statistics

Credential Overview

Applied and Computational Math Sciences: Data Sciences and Statistics The ACMS Data Sciences and Statistics option is designed with strong Statistics and

Modeling components. The track incorporates coursework in Computation, Statistics and Machine Learning, Databases and Data Visualization, as well as topics related to science and society. This option is unique in its double emphasis on Statistics and Modeling & Scientific Computing. Our graduates will have a unique blend of skills to build models for data, use them efficiently, and interpret them statistically.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core:* 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 46-47 credits to include program core (29 or 30 credits): PHYS 121, PHYS 122, PHYS 123, AMATH 301 or STAT 302, STAT 395/MATH 395, STAT 391, CSE 414; and option electives (17 credits): at least 6 credits from List A and 6 credits from List B. Remaining credits from approved courses (List C) at the 300 level or above, chosen

from the four participating departments. See adviser for approved lists.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Discrete Mathematics and Algorithms

Credential Overview

Applied and Computational Math Sciences: Discrete Math and Algorithms This Option gives students a broad background in mathematics and computation with special emphasis on discrete mathematics and its application to optimization and algorithm design. It is particularly well suited for students interested in mathematical aspects of Computer Science, or who wish to pursue a double major in this direction.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core*: 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 47-49 credits to include option core and option electives. Option core: PHYS 121, PHYS 122, PHYS 123. 19-20 credits for non-Computer Science/Computer Engineering majors - MATH 300, MATH 394/STAT 394, CSE 373, CSE 417, and two of CSE 374, CSE 410, CSE 413, CSE 414, CSE 415; 9 credits for Computer Science/Computer Engineering double major/double degree - MATH 394/STAT 394, CSE 421, CSE 431. Option electives: 14 credits for non-Computer Science/Computer Engineering majors, 23 credits for Computer Science/Computer Engineering double majors, to include 9 credits from MATH 407, MATH 408, MATH 409, MATH 461, MATH 462, or one of AMATH 481, AMATH 482, or AMATH 483. Remaining 15 credits from approved courses at the 300 level or above from the four participating departments.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Engineering and Physical Sciences

Credential Overview

Applied and Computational Math Sciences: Engineering and Physical Sciences Applied and computational mathematics are heavily used in the physical sciences and engineering. Mathematical models form the basis for much of our understanding of the physical world, and can be used to predict and analyze complex phenomena. Differential equations are particularly important since they are essential in modeling mechanical systems, heat transfer, fluid dynamics, and wave motion of all kinds (electromagnetic, sound, seismic, water waves, etc.). Statistical analysis,

computational techniques, linear algebra, Fourier analysis, and other mathematical techniques are also critical in many fields. This Option is an excellent choice for students with an interest in the physical world and classical areas of applied mathematics. It is also ideal as a second major for students in engineering or a physical science who want to obtain a firm foundation in applied mathematics.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core:* 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 47 credits to include option core (27 credits): PHYS 121, PHYS 122, PHYS 123; AMATH 401, AMATH 402, AMATH 403; and option electives (20 credits): outside area (14 credits or double major/double degree at the 300-level or above; see adviser for options) and 6 credits of approved courses at the 300-level or

above, chosen from the four participating departments.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Mathematical Economics and Quantitative Finance

Credential Overview

Applied and Computational Math Sciences: Mathematical Economics and Quantitative Finance In the business and financial world, mathematical and statistical models are becoming increasingly important as tools for prediction and analysis. Students in this Option will obtain a firm foundation in applied and computational mathematics as well as a basic grounding in economic theory. It is also ideal as a second major for students in Economics who want more mathematical training, especially those preparing for graduate school since the academic field of Economics relies heavily on mathematical models.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core:* 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 50-51 credits to include option core and electives. Option core (30-31 credits): PHYS 121, PHYS 122, PHYS 123 or ECON 200, ECON 201, ECON 300; MATH 300, MATH 327, MATH 394/STAT 394, MATH 407; and either MATH 395/STAT 395, MATH 408, MATH 409 or STAT 423. Option electives: Either (1) or (2), below. (1) 20 credits including at least 15 credits from CFRM 405, CFRM 410, CFRM 415, CFRM 420, CFRM 425, ECON 301, ECON 400, ECON 401, ECON 404, ECON 421, ECON 422, ECON 424, ECON 426, ECON 435, ECON 472, ECON 482, ECON 483, ECON 485, ECON 486 (only one of CFRM 420 and ECON 424 may be counted toward the major); at least 5 additional credits at the 300 level or above from AMATH, CSE, MATH, STAT, or from the Department of Economics (taken from ECON courses listed above). (2) Complete a double major with a Bachelor of Science degree in Economics.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Scientific Computing and Numerical Analysis

Credential Overview

Applied and Computational Math Sciences: Scientific Computing and Numerical Analysis Computer simulation is heavily used in science and engineering as a tool in analysis, visualization, and design. Complex mathematical models can give very accurate

prediction of real-world phenomena, but typically lead to equations that can only be solved with the aid of a computer. This Option focuses on the design, mathematical analysis, and efficient implementation of numerical algorithms for such problems.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core*: 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.
3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 47 credits to include option core (27 credits): PHYS 121, PHYS 122, PHYS 123, MATH 300, MATH 327, two of MATH 464, MATH 465 AMATH 481, AMATH 482, or AMATH 483; and option electives (20 credits), to include 11 credits from the following: AMATH 301; AMATH 353 or MATH 309; CSE 373 or CSE 326; CSE 410; AMATH 401, AMATH 402, AMATH 403; MATH 407, MATH 408, MATH 409; MATH 427, MATH 428; remaining 9 credits from approved courses

at the 300 level or above from the four participating departments.

Bachelor of Science degree with a major in Applied and Computational Math Sciences: Social and Behavioral Science

Credential Overview

Applied and Computational Math Sciences: Social and Behavioral Sciences
Mathematical models and statistical analysis are becoming increasingly important in many social and behavioral sciences. Solving complex problems requires sophisticated approaches to gathering and analyzing large amounts of data. Creating mathematical models useful in prediction and analysis can require a broad range of mathematical techniques including graph theoretical analysis, Markov chains and other stochastic processes, or differential equations. This Option provides a foundation in commonly-used statistical and computational techniques followed by flexibility in pursuing different sets of advanced courses. It is also ideal as a second major for students in social sciences who want to obtain more background in quantitative methods and mathematical techniques.

Completion Requirements

82-90 credits

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core*: 38-39 credits to include MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208, MATH 381; STAT 390; CSE 123 or

CSE 143; AMATH 352, AMATH 383. Students in the *Data Science and Statistics Option* substitute MATH 394/STAT 394 for STAT 390.

3. Additional requirements specified below.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted below.

Additional Completion Requirements

Option specific credits: 47 credits to include option core (31 credits): PHYS 121, PHYS 122, PHYS 123, STAT 340, STAT 341, STAT 342, STAT 423; and option electives (16 credits): outside area (10 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The ACMS degree emphasizes the development of advanced skills in discrete and continuous mathematical modeling, computing and scientific computation, mathematical reasoning and analytic skills, and statistical reasoning and analytic skills. Students develop an expertise at an advanced level in an applications area. This set of skills provides the basis for careers in a wide array of quantitative disciplines including engineering; the physical, life, and social sciences; as well as business and management sciences. In addition, the ACMS program has developed partnerships with a number of

departments on campus to facilitate the pursuit of double majors.

- *Instructional and Research Facilities:* The program has access to the combined instructional and research facilities of the four participating departments, as well as the Mathematics and Statistics library and the Math Study Center.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The program is provided with internship opportunities periodically, which are then passed on to students.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* MAA Student Chapter, Actuarial Club, SIAM

Program of Study: Major: Applied Mathematics

Program Overview

Applied and computational mathematics encompasses some of the most diverse and interdisciplinary research in the physical, engineering, and biological sciences. The Department of Applied Mathematics at the University of Washington provides a dynamic and engaging graduate training environment that is especially strong in scientific computing and in the application areas of mathematical biology (ecology, biochemistry, neuroscience), nonlinear waves and coherent structures (water waves and tsunamis, lasers, nonlinear optics), mathematical finance, climate modeling (atmospheric dynamics, global warming) and modern mathematical methods (inverse problems, numerical analysis, optimization).

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Applied Mathematics
- Bachelor of Science degree with a major in Applied Mathematics: Data Science

Admission Requirements

Admission to the major is capacity constrained. Completion of minimum requirements described below does not guarantee admission. The application and

additional information are available at the department website.

There are two types of applicants - Currently Enrolled UW Students and Entering Transfers.

1. Currently Enrolled UW Students

- a. *Minimum requirements:* Minimum 2.0 grade in each of MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136). Minimum 2.0 grade in AMATH 301. Successful applicants typically have earned above a minimum 2.50 cumulative GPA in courses listed above with no individual course grade lower than a 2.0.
- b. *Determining factors:* Admission is based on a holistic review of the student's record to include: grades in courses required for admission, overall cumulative GPA, and rigor of courses completed; time to degree set by the UW Satisfactory Progress Policy, including frequency of incompletes or withdrawals and number of repeated courses; personal statement that demonstrates interest in pursuing advanced study in the field of applied mathematics and related fields.
- c. *When to Apply:* Applications are accepted twice each year at the beginning of autumn and spring quarters. Refer to department website for deadlines.

2. Entering Transfers

Transfer applicants must submit a departmental application for the same quarter they submit an application to the University.

- a. *Minimum requirements:* Minimum 2.0 grade in each of MATH 124,

MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136). Minimum 2.0 grade in AMATH 301. Successful applicants typically have earned above a minimum 2.50 cumulative GPA in courses listed above with no individual course grade lower than a 2.0.

- b. *Determining factors:* Admission is based on a holistic review of the student's record to include: grades in courses required for admission, overall cumulative GPA, and rigor of courses completed; time to degree set by the UW Satisfactory Progress Policy, including frequency of incompletes or withdrawals and number of repeated courses; personal statement that demonstrates interest in pursuing advanced study in the field of applied mathematics and related fields.
- c. *When to apply:* Admission is once per year. Application deadline: 5 p.m. April 5th of spring quarter for an autumn admission.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science degree with a major in Applied Mathematics

Completion Requirements

General Education Requirements

1. Areas of Inquiry: A&H (20 credits); SSc (20 credits); NSc (20 credits). 15 additional credits in any area.
2. English Composition (C): 5 credits
3. Additional Writing: 10 credits
4. Foreign Language: completion of the third college quarter of a foreign language
5. Reasoning (RSN): 4 or 5 credits from the RSN list
6. Diversity (DIV): 3 credits

Major Requirements

Minimum 54-59 credits, depending on credential/option

1. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) (15 credits)
2. *Computing*: AMATH 301 (4 credits)
3. *Introductory Applied Mathematics*: AMATH 351, AMATH 352, AMATH 353 (9 credits)
4. Additional requirements specified below
5. Minimum 2.00 cumulative GPA in courses applied to the major

Additional Completion Requirements

Minimum 27 credits

1. Minimum two courses from AMATH 401, AMATH 402, AMATH 403
2. Minimum two courses from AMATH 342, AMATH 383, AMATH 422, AMATH 423

3. Minimum two courses from AMATH 481, AMATH 482, AMATH 483, CFRM 410, CFRM 420, CFRM 421

Bachelor of Science degree with a major in Applied Mathematics: Data Science

Credential Overview

Data Science continues to be a growing area of study within Applied Mathematics and the sciences in general. It incorporates statistical modeling, machine learning, artificial intelligence, and optimization, among other aspects of Applied Mathematics. The Data Science option in Applied Mathematics is designed to provide students training in data science methods and practices.

Additional Admission Requirements

Students apply for the Data Science option at the time of application to the major. Non-option students in the major can petition to enroll in the Data Science option during the admissions rounds in autumn and spring quarters, and the decision is made based on course capacities.

Completion Requirements

General Education Requirements

1. Areas of Inquiry: A&H (20 credits); SSc (20 credits); NSc (20 credits). 15 additional credits in any area.
2. English Composition (C): 5 credits
3. Additional Writing: 10 credits
4. Foreign Language: completion of the third college quarter of a foreign language
5. Reasoning (RSN): 4 or 5 credits from the RSN list

6. Diversity (DIV): 3 credits

Major Requirements

Minimum 54-59 credits, depending on credential/option

1. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) (15 credits)
2. *Computing*: AMATH 301 (4 credits)
3. *Introductory Applied Mathematics*: AMATH 351, AMATH 352, AMATH 353 (9 credits)
4. Additional requirements specified below
5. Minimum 2.00 cumulative GPA in courses applied to the major

Additional Completion Requirements

Option specific credits (26-31 credits)

1. *Data Science* (23-26 credits credits):
 - a. one of AMATH 481 or CSE 163 (4-5 credits)
 - b. one of AMATH 482, CSE 414, or INFO 430 (4-5 credits)
 - c. AMATH 483; CFRM 410, CFRM 420 (11 credits)
 - d. one of CFRM 421, CSE 416/STAT 416, INFO 350, or STAT 435 (4-5 credits)
2. *Society and Data* (3-5 credits): INFO 350 or SOC 225 (3 credits)

Program of Study: Major: Computational Finance and Risk Management

Program Overview

In the finance industry, there is a great demand for advanced quantitative computational finance competencies.

Mathematical models, statistical methods, and computational techniques are becoming increasingly important as tools for quantitative analysis, risk management, as well as models and strategies implementation. The Computational Finance major is designed to provide UW undergraduate students with a rigorous applied mathematical foundation and solid understanding of how mathematical models as well as statistical and computational methods are used in financial applications, such as portfolio optimization, derivatives pricing, and risk management.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Computational Finance and Risk Management

Admission Requirements

Admission to the major is capacity constrained. Completion of minimum requirements described below does not guarantee admission. The application and additional information are available at the department website.

There are two types of applicants - Currently Enrolled UW Students and Entering Transfers.

1. Currently Enrolled UW Students
 - a. *Minimum requirements*: Minimum 2.0 grade in each of MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136). Minimum 2.0 grade in AMATH 301. Successful applicants typically have earned above a minimum 2.50 cumulative GPA in courses listed above with no individual course grade lower than a 2.0.

Completion Requirements

29-30 credits

1. *Core Courses (15 credits)*: CFRM 405, CFRM 410, CFRM 415, CFRM 420 (or ECON 424), CFRM 425
2. *Additional Requirements (14-15 credits)*:
 - a. MATH 125, or MATH 135, or equivalent
 - b. MATH 126, or MATH 136, or equivalent
 - c. STAT 311 or STAT 390
3. Minimum 2.00 cumulative GPA for courses applied to the minor.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Through the Applied Mathematics major, students will gain the ability to apply mathematics to problems that society is facing today in the physical, engineering and biological sciences, industry, and many additional application areas. Students develop advanced skills in mathematical modeling, computing and scientific computation, mathematical reasoning and analytical skills. Through the Computational Finance and Risk Management major, students will gain the ability to master mathematical and

computing aspects, such as financial software development, financial modeling, machine learning and data science; gain advanced quantitative computational finance competencies and next generation risk management skills.

- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* When available, internship opportunities are passed on to students. Course credit available for undergraduate reading/research with faculty.
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None currently active

gpa@amath.washington.edu

Program of Study: Doctor of Philosophy (Applied Mathematics)

Program Overview

Primarily a research degree, based on proficiency in applied mathematics, and the ability to carry out an independent investigation. The dissertation must exhibit original mathematical contributions relevant to a significant area of application.

This program of study leads to the following credentials:

- Doctor of Philosophy (Applied Mathematics)
- Doctor of Philosophy (Applied Mathematics: Advanced Data Science)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Doctor of Philosophy (Applied Mathematics)

Completion Requirements

Minimum 90 credits

1. *Course Requirements (40 credits):* Choose eight from the following: AMATH 561, AMATH 562, AMATH 563; AMATH 567, AMATH 568, AMATH 569; AMATH 584, AMATH 585, AMATH 586.
2. AMATH 600 (4 credits) (Reading during first four quarters, including first summer) (2x2 credits each with separate faculty members)
3. *Minimum 15 Numerically Graded Courses (to reach required total):* Minimum 9 courses from Applied Mathematics curriculum. Maximum two courses at the 400 level (or cross-listed with courses at the 400 level)
4. *Dissertation (27 credits):* AMATH 800
5. *Supervisory Committee:* Formed no later than end of the second year
6. *Qualifying Examination:* The qualifying exam is passed by completing six courses from AMATH 561, 562, 563, 567, 568, 569, 584, 585, 586 before the second year of study, with a minimum course grade of 3.4 in each.
7. *General Examination:* Oral examination administered by the student's supervisory committee; students must pass their general exam prior to the start of year three of their PhD studies.
8. *Final Examination:* Oral defense of dissertation
9. *Satisfactory Performance:* Minimum overall 3.40 GPA

10. *Satisfactory Progress*: Timely passing of examinations. Department funding contingent on satisfactory progress.

Doctor of Philosophy (Applied Mathematics: Advanced Data Science)

Completion Requirements

Minimum 90 credits

1. *Course Requirements (40 credits)*: Choose eight from the following: AMATH 561, AMATH 562, AMATH 563; AMATH 567, AMATH 568, AMATH 569; AMATH 584, AMATH 585, AMATH 586.
2. AMATH 600 (4 credits) (Reading during first four quarters, including first summer) (2x2 credits each with separate faculty members)
3. *Minimum 15 Numerically Graded Courses (to reach required total)*: Minimum 9 courses from Applied Mathematics curriculum. Maximum two courses at the 400 level (or cross-listed with courses at the 400 level)
4. *Dissertation (27 credits)*: AMATH 800
5. *Supervisory Committee*: Formed no later than end of the second year
6. *Qualifying Examination*: The qualifying exam is passed by completing six courses from AMATH 561, 562, 563, 567, 568, 569, 584, 585, 586 before the second year of study, with a minimum course grade of 3.4 in each.
7. *General Examination*: Oral examination administered by the student's supervisory committee; students must pass their general exam prior to the start of year three of their PhD studies.
8. *Final Examination*: Oral defense of dissertation

9. *Satisfactory Performance*: Minimum overall 3.40 GPA

10. *Satisfactory Progress*: Timely passing of examinations. Department funding contingent on satisfactory progress.

Additional Completion Requirements

Option-specific requirements (these courses count toward the required total of 90 credits)

1. *Advanced Data Science Option Specific requirement (11-12 credits)*: Three courses from STAT 509, CSE 546 OR STAT 535, CSE 544, CSE 512
2. *eScience Community Seminar (4 credits)*: CHEM E 599

Additional Information

- *Financial Aid*: Both research and teaching assistantships are available to full-time students who qualify. Fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.
- *Research Facilities*
 - Five mid-scale computer servers (12-cores and 24 GBRAM each), available to faculty, staff, students, and visitors via physical or remote access. All faculty and student accounts use Dropbox for backup and cloud access.
 - In addition to desktop computers, the department maintains five network printers, scanner facilities, six Bloomberg terminals, local laptops and projectors, camera and camcorders and other computing peripherals, including a conference room wired with a large-screen television and webcams for remote conferencing.
 - Licensing for commercial software packages such as Matlab, Maple and

Mathematica, Microsoft products and Adobe, and media tools, is provided by the College of Engineering and the UW IT Department. In addition, the department makes use of many free and open source tools such as Python, Numpy, and Scipy, as well as mathematical software packages.

Program of Study: Master of Science (Applied Mathematics)

This program of study leads to the following credentials:

- Master of Science (Applied Mathematics)
- Master of Science (Applied Mathematics: Applied & Computational Mathematics) (fee based)
- Master of Science (Applied Mathematics: Applied & Computational Mathematics) (online) (fee-based)

Master of Science (Applied Mathematics)

Credential Overview

The on-campus M.Sc. Program is intended to give the student a working knowledge of several areas of applied mathematics, which may include a specific area of application, in order to prepare for a productive career in industry or elsewhere, or to prepare the student for continuing towards a Ph.D. degree.

Admission Requirements

Graduate degree program admission requirements vary. Please see this program's

[Graduate Admissions Page](#) for specific requirements.

Completion Requirements

All options require 36 total credits.

1. *Core Courses (20 credits)*: Core courses vary by option, see additional requirements section below for option-specific courses.
2. *Additional Courses (to meet required credit total)*: From AMATH or other departments. Any non-AMATH courses taken to fulfill degree requirements must be at the graduate level, numerically graded, and approved by the department.
3. *Applied Mathematics Courses*: Minimum 24 credits from the Applied Mathematics curriculum. Core courses count toward this requirement.
4. Minimum nine numerically graded courses, including core courses listed above, with a minimum 3.20 cumulative GPA. One may be substituted with 4 credits of AMATH 500 or AMATH 600.
5. *Program Plan*: Approved no later than the end of the first quarter of registration.
6. *Satisfactory Progress*: Minimum 3.20 GPA. Students normally complete requirements for an MS degree in one year.

Additional Completion Requirements

1. *Core Courses for this option (20 credits)*: AMATH 567, AMATH 568, AMATH 569, AMATH 584.

Master of Science (Applied Mathematics: Applied & Computational Mathematics) (fee based)

Credential Overview

The Master of Science in Applied and Computational Mathematics curriculum is intended to give the student a working knowledge of several areas of applied mathematics, which may include a specific area of application, in order to prepare for a productive career in industry.

Completion Requirements

All options require 36 total credits.

1. *Core Courses (20 credits)*: Core courses vary by option, see additional requirements section below for option-specific courses.
2. *Additional Courses (to meet required credit total)*: From AMATH or other departments. Any non-AMATH courses taken to fulfill degree requirements must be at the graduate level, numerically graded, and approved by the department.
3. *Applied Mathematics Courses*: Minimum 24 credits from the Applied Mathematics curriculum. Core courses count toward this requirement.
4. Minimum nine numerically graded courses, including core courses listed above, with a minimum 3.20 cumulative GPA. One may be substituted with 4 credits of AMATH 500 or AMATH 600.

5. *Program Plan*: Approved no later than the end of the first quarter of registration.
6. *Satisfactory Progress*: Minimum 3.20 GPA. Students normally complete requirements for an MS degree in one year.

Additional Completion Requirements

1. *Core Courses for this option (20 credits)*: AMATH 501, AMATH 502, AMATH 503, AMATH 581.

Master of Science (Applied Mathematics: Applied & Computational Mathematics) (online) (fee-based)

Credential Overview

The University of Washington online Master of Science in Applied & Computational Mathematics is a top-ranked degree program that prepares students for dynamic careers in a variety of fields. This interdisciplinary program offers a thorough grounding in mathematical methods that underlie the physical, engineering and biological sciences.

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

All options require 36 total credits.

1. *Core Courses (20 credits)*: Core courses vary by option, see additional

requirements section below for option-specific courses.

2. *Additional Courses (to meet required credit total):* From AMATH or other departments. Any non-AMATH courses taken to fulfill degree requirements must be at the graduate level, numerically graded, and approved by the department.
3. *Applied Mathematics Courses:* Minimum 24 credits from the Applied Mathematics curriculum. Core courses count toward this requirement.
4. Minimum nine numerically graded courses, including core courses listed above, with a minimum 3.20 cumulative GPA. One may be substituted with 4 credits of AMATH 500 or AMATH 600.
5. *Program Plan:* Approved no later than the end of the first quarter of registration.
6. *Satisfactory Progress:* Minimum 3.20 GPA. Students normally complete requirements for an MS degree in one year.

Additional Completion Requirements

1. *Core Courses for this option (20 credits):* AMATH 501, AMATH 502, AMATH 503, AMATH 581.

- **Financial Aid:** Both research and teaching assistantships are available to full-time students who qualify. Fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.
- **Research Facilities:**
 - Five mid-scale computer servers (12-cores and 24 GBRAM each), available to faculty, staff, students, and visitors via physical or remote

access. All faculty and student accounts use Dropbox for backup and cloud access.

- In addition to desktop computers, the department maintains five network printers, scanner facilities, six Bloomberg terminals, local laptops and projectors, camera and camcorders and other computing peripherals, including a conference room wired with a large-screen television and webcams for remote conferencing.
- Licensing for commercial software packages such as Matlab, Maple and Mathematica, Microsoft products and Adobe, and media tools, is provided by the College of Engineering and the UW IT Department. In addition, the department makes use of many free and open source tools such as Python, Numpy, and Scipy, as well as mathematical software packages.

Program of Study: Master of Science in Computational Finance and Risk Management

Program Overview

The MS-CFRM addresses the demand in the financial-services profession for advanced quantitative and computational finance skills, and next generation risk-management competencies. Three degree options are available: general program (42 credits), computing concentration (54 credits), and risk management concentration (54 credits).

This program of study leads to the following credentials:

- Master of Science in Computational Finance and Risk Management (Computing) (fee-based)
- Master of Science in Computational Finance and Risk Management (Computing) (fee-based) (Online)
- Master of Science in Computational Finance and Risk Management (fee-based)
- Master of Science in Computational Finance and Risk Management (fee-based) (Online)
- Master of Science in Computational Finance and Risk Management (Risk Management) (fee-based)
- Master of Science in Computational Finance and Risk Management (Risk Management) (fee-based) (Online)

Master of Science in Computational Finance and Risk Management (Computing) (fee-based)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

Total 42-54 credits, varies by option

1. *Core Courses (26 credits)*: CFRM 501, CFRM 502, CFRM 503, CFRM 504, CFRM 505, CFRM 509, and either CFRM 506 or CFRM 507
2. *Option-specific requirements for General, Computing, or Risk Management*: (See additional requirements below for option-specific requirements)
3. *Final Examination*: Students pursuing a thesis give an oral defense. Final

examination not required for non-thesis students.

4. *Satisfactory Progress*: minimum 3.20 GPA

Additional Completion Requirements

1. *Computing option specific requirements (minimum 28 credits)*: Course list maintained internally by the program.

Master of Science in Computational Finance and Risk Management (Computing) (fee-based) (Online)

Program of Study: Major: Art

Program Overview

The Art Program offers undergraduate degrees in Interdisciplinary Visual Art, Painting & Drawing, Photomedia, 3D4M: Ceramics, Glass, and Sculpture. Our faculty are top educators in their fields as well as professional artists, scholars, and designers. They exhibit, publish, lecture nationally and internationally, and are active in many professional organizations. They frequently collaborate with arts organizations and businesses, forging strong community relationships with innovative outcomes. Students are recognized for their creative

achievements and academic merit through many scholarships, awards, exhibitions, and public presentations. They graduate with the confidence and critical problem solving skills needed to participate in a wide range of personal, professional and creative pursuits.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Art

Admission Requirements

1. Minimum 2.50 cumulative GPA
2. 5 credits college-level art with a minimum 2.5 grade
3. Art does not accept postbaccalaureate applicants.

How to Declare a Major in Art

1. Current UW Students/Freshmen: After completing any 100- or 200-level ART class in the School of Art, Art History, and Design, meet with an academic adviser (room 104 Art) to declare the major.
2. Transfer Students: Complete any 5-credit introductory art class with a minimum 2.5 grade prior to transferring to UW. During initial orientation and advising appointment, meet with an academic adviser (room 104 Art) to declare the major.

Bachelor of Arts degree with a major in Art

Credential Overview

Students pursuing a Bachelor of Arts degree may choose courses which progress through a structured curriculum in Painting +

Drawing, or choose to gain skills in a variety of media (interdisciplinary Visual Arts), which can then be synthesized into a coherent approach to visual expression. Students develop a deep understanding of historical and contemporary issues related to artistic practice, art history and visual culture, while benefiting from broad study across diverse learning communities at the University of Washington. Bachelor of Arts students are prepared for a range of career paths in the creative arts through experiential learning.

Completion Requirements

70 credits

1. Core courses (40 credits)
 - a. 15 credits introductory art classes: ART 101, ART 140, ART 190, ART 191, ART 233, ART 240, ART 245, ART 246, ART 253, ART 260, ART 272, ART 280, ART 285, ART 290, ART 292
 - b. 10 credits from ART 400, ART 440, ART 453, ART 494
 - c. 15 credits art history to include one 300-level class from an approved list.
2. Concentrations (tracks) (30 credits)
 - a. Interdisciplinary Visual Art: 5-credit additional introductory ART class; 20 credits from ART 300, ART 301, ART 302, ART 303, ART 333, ART 345, ART 350, ART 353, ART 355, ART 358, ART 360, ART 365, ART 372, ART 390, ART 392, ART 393, ART 395; 5 credits from the following: ART 400, ART 450, ART 453, ART 457, ART 485, ART 490, ART 492, or ART 496
 - b. Painting and Drawing: ART 290 or ART 292; ART 390, ART 392; ART 393; ART 490; ART 492 or ART 494

- c. Photomedia: ART 240, ART 300, ART 301, ART 302, ART 303, ART 440
- d. Three-Dimensional Forum: 5 credits additional introductory art classes; 20 credits from ART 333, ART 353, ART 372; and ART 453
3. Minimum 35 credits taken in 300/400 level courses
4. Minimum 40 credits of ART-prefixed courses taken in residence through the UW

Program of Study: Major: Art History

Program Overview

Art History is the study of art and visual culture as instruments of knowledge and methods of human expression that operate in many arenas of history, tradition and the contemporary environment. The faculty in this department are engaged in the study of a broad geographical, temporal, and ethnic range of cultures, alert to the variety of ways in which visual artifacts are used to express and convey the diverse values of society.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Art History

Admission Requirements

Entering freshmen and transfer students may declare the major by meeting with an academic adviser (room 104 ART) on or after their orientation/registration date.

Currently enrolled University students must present a minimum 2.50 GPA and meet with

an academic adviser (room 104 ART) any time during the quarter.

Art History does not accept postbaccalaureate applicants.

Bachelor of Arts degree with a major in Art History

Credential Overview

Art History is the study of art and visual culture as instruments of knowledge and methods of human expression that operate in many arenas of history, tradition and the contemporary environment. The faculty in this department are engaged in the study of a broad geographical, temporal, and ethnic range of cultures, alert to the variety of ways in which visual artifacts are used to express and convey the diverse values of society.

Completion Requirements

60 credits

1. 10 credits from ART H 200, ART H 201, ART H 202, ART H 203, ART H 204, ART H 206, ART H 209, ART H 212, ART H 214, ART H 220, ART H 233, ART H 270, ART H 272, ART H273, ART H 290
2. 20 credits from ART H 309, ART H 310, ART H 311, ART H 312, ART H 314, ART H 333, ART H 361, ART H 373, ART H 380, ART H 381, ART H 390, ART H 391
3. 20 credits from ART H 400, ART H 412, ART H 413, ART H 414, ART H 435, ART H 471, ART H 473, ART H 484, ART H 488, ART H 491, ART H 492, ART H 494
4. 10 credits from ART H electives to include any ART H courses listed above or other courses with an ART H prefix (10 credits)

Program of Study: Major: Design

Program Overview

The Division of Design educates and trains designers to create and develop concepts that optimize the function, value, and appearance of communications, products and systems for the benefit of both industry and society. Within the Division of Design, there are three majors: Visual Communication Design, Industrial Design and Interaction Design.

This program of study leads to the following credentials:

- Bachelor of Design degree with a major in Industrial Design
- Bachelor of Design degree with a major in Interaction Design
- Bachelor of Design degree with a major in Visual Communication Design

Admission Requirements

3.00 minimum GPA

For currently enrolled students

Admission to Industrial Design, Interaction Design, and Visual Communication Design: DESIGN 166. Students receiving a minimum 3.7 grade in DESIGN 166 are admitted. Students below a minimum 3.7 grade may apply to the design program via the design workshop in June. For details on the design workshop, see department website.

For transfer students

Admission to Industrial Design, Interaction Design, and Visual Communication Design:

DESIGN 166 (see admission requirements for currently enrolled students) or the equivalent of DESIGN 166 at their previous school. Students apply for admission to the UW, and attend the design workshop in June. Transfer students should meet with a School of Art adviser prior to applying to the UW to discuss the design workshop and selection process. See program guides at department website for specific information.

Admission Policy for Postbaccalaureate Applicants: Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admissions online at department website.

Bachelor of Design degree with a major in Industrial Design

Credential Overview

The Industrial Design program at the University of Washington, one of several undergraduate programs in the School of Art, has evolved over the past forty years. It is a professional program aimed primarily at industrial design practice in the corporate and institutional innovation sector where new technologies lead to the development of new forms of products, processes, and service from a human-centered design perspective. The ID course of undergraduate study is an intensive program emphasizing the development of form that is derived from patterns of use, requirements for function, constraints imposed by industrial manufacturing and aesthetics driven by social context. Key aspects in this view on design are understanding the interactions between people and technology. Students are trained to identify design challenges and to envision promising strategies for design responses, communication, documentation, and organizational skills to conduct the

design process from project brief to design implementation.

Completion Requirements

89-93 credits

1. Successful completion of design admission selection process
2. 76-78 credits from DESIGN 206, DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 211, DESIGN 316, DESIGN 317, DESIGN 318, DESIGN 319, DESIGN 322, DESIGN 324, DESIGN 445, DESIGN 446, DESIGN 485, DESIGN 486
3. 3-5 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 483, DESIGN 488
4. 10 credits of art history

Bachelor of Design degree with a major in Interaction Design

Credential Overview

Interaction Designers define the structure and behavior of interactive products and services. Interaction Designers create compelling relationships between people and the interactive systems they use, from computers to mobile devices to appliances; Interaction Designers lay the groundwork for intangible experiences. The need for interaction designers for the development of new interactive products, systems and services has increased exponentially in recent years in virtually all industries. Interactive systems are present in many areas in everyday life where people coordinate tasks and engage in activities in collaboration with others, facilitated through technology. Examples range from mobile phones to computer software, from GPS systems for cars or navigation in the open

ocean, and information systems that support the work of expert practitioners in technology-driven domains such as aviation, medicine, and process control.

Completion Requirements

87-93 credits

1. Successful completion of design admission selection process
2. 61-63 credits from DESIGN 206, DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 215, DESIGN 371, DESIGN 372, DESIGN 383, DESIGN 481, DESIGN 483, DESIGN 485, DESIGN 486
3. 16-20 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 488
4. 10 credits of art history

Bachelor of Design degree with a major in Visual Communication Design

Credential Overview

The Visual Communication Design program educates and trains designers for the communication needs of industry and society. Emphasis is placed on the conception, creation, planning and realization of visual solutions to complex problems in contemporary culture. Students integrate methodology, prototyping, aesthetics, human factors, technology, materials, context and audience to develop strategies and solutions that give form to print, screen and the built environment. Faculty emphasize the objectives of design rather than the process of production, and encourage innovative visual ideas that inform, interpret, instruct or persuade the

intended user across the spectrum of application.

Completion Requirements

89-93 credits

1. Successful completion of design admission selection process.
2. 76-78 credits from DESIGN 207, DESIGN 208, DESIGN 209, DESIGN 210, DESIGN 214, DESIGN 368; DESIGN 369, DESIGN 370, DESIGN 371, DESIGN 372, DESIGN 376, DESIGN 466; DESIGN 478, DESIGN 485, DESIGN 486
3. 3-5 credits from DESIGN 325, DESIGN 326, DESIGN 373, DESIGN 374, DESIGN 376, DESIGN 400, DESIGN 467, DESIGN 483, DESIGN 488
4. 10 credits of art history

Program of Study: Minor: Art History

Program Overview

Art History is the study of art and visual culture as instruments of knowledge and methods of human expression that operate in many arenas of history, tradition and the contemporary environment. The faculty in this department are engaged in the study of a broad geographical, temporal, and ethnic range of cultures, alert to the variety of ways in which visual artifacts are used to express and convey the diverse values of society.

This program of study leads to the following credential:

- Minor in Art History

Minor in Art History

Completion Requirements

30 credits

1. 30 credits of art history courses, of which 15 must be upper-division.
2. Minimum 2.0 grade in each course applied to the minor.
3. Minimum 15 credits completed through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*
 - Practiced problem-finding and problem-solving skills
 - Expertise in visual literacy
 - Polished presentation and communication skills
 - Collaboration and leadership experience
 - Research methods and ability to complete resulting projects
 - Motivated for and by critical feedback
 - Ability to network, create, and engage in community
- *Study Abroad:* Refer to department website for more information.
- *Instructional and Research Facilities:* Refer to department website for more information.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Available for Art History and for the Bachelor of Arts in Art.

- *Research, Internships, and Service Learning:* Refer to department website for more information.
- *Department Scholarships:* Refer to department website for more information.

Program of Study: Major: Asian Languages and Cultures

Program Overview

The Department of Asian Languages and Literature offers an undergraduate major in Asian Languages and Cultures. Students will develop their ability to read, write, and speak one or more Asian languages and will combine those language skills with Asia-related studies in various humanities disciplines. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates at the University of Washington is to combine a minor in Asian Languages and Cultures with a major from another department, such as Computer Science, Business Administration, or International Studies. Graduates of the Department go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Asian Languages and Cultures

Recommended Preparation

Suggested First- and Second-Year College Courses: First year of an Asian language, or languages. Any courses relating to the area or discipline of major study.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Asian Languages and Cultures

Completion Requirements

60 credits

1. Core Courses
 - a. Primary language. Second-year level (course numbered 203 or above) in one Asian language (15 credits)
 - b. Literature, culture, linguistics at 300-400 level, chosen from Asian Languages and Literature courses, not primarily using original-language materials. See department for list of approved courses. (5 credits)
2. Electives
 - a. Literature, culture, linguistics, chosen from Asian Languages and Literature courses, not primarily using original-language materials. See department for list of approved courses. (10 credits)
 - b. Language, literature, culture, linguistics. Any combination of language and/or disciplinary Asian Languages and Literature courses, subject to major's other requirements. See department for list of approved courses. (30 credits; 10 credits may be chosen from outside Asian Languages and Literature.)
3. At least 30 credits at the 300-400 level
4. Minimum 2.0 cumulative GPA for courses applied to the major
5. Minimum 30 credits taken in residence through the UW

Program of Study: Major: Chinese

Program Overview

The Department of Asian Languages and Literature offers an undergraduate major and minor in Chinese. In the major and minor, students will develop their ability to read, write, and speak Chinese and will combine those language skills with an understanding and appreciation of the literature, linguistics, and culture associated with the language. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates at the University of Washington is to combine a major in Chinese with a second major from another department, such as Computer Science, Business Administration, or International Studies. Graduates of the Department go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Chinese

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Chinese language. Any courses relating to the area or discipline of major study.

Admission Requirements

1. Minimum 20 credits of college coursework (or department-approved

equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be taken through the UW, with a minimum 2.5

2. Completion of one writing course (W-prefix) taught in English with a minimum 2.0 grade.
3. The department prefers that prospective majors present a cumulative 2.50 GPA. Students with a cumulative GPA below 2.50 may be considered for the major if they submit materials in addition to transcripts, clarifying any aspect of past coursework. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

Note: Students entering the junior year without two years of the appropriate foreign language are not able to complete the degree requirements in two years unless they take accelerated courses through the UW during summer quarter.

Bachelor of Arts degree with a major in Chinese

Completion Requirements

Minimum 50 credits

1. Minimum 50 credits in Chinese language, linguistics, literature, and/or culture. Maximum 10 credits may be in courses outside Asian Languages and Literature. See department for list of courses outside Asian Languages and Literature that may apply. (Students who begin language study with first-quarter Chinese need 75 credits to complete the major.)
2. *Language:* CHIN 213 (heritage-track Chinese, considered equivalent of third-

year level) or CHIN 303 required, unless waived because of advanced skills.

Students may take additional modern Chinese language courses (CHIN 411, CHIN 412, CHIN 413, CHIN 445, I BUS 490 [when the topic is business Chinese], CHIN 470, CHIN 482, CHIN 496 [when the topic is advanced language instruction]) toward the major, or may take additional courses in linguistics, literature, culture, and/or classical language beyond the minimum 30 credits required as shown in 3, below. No more than 20 credits of modern Chinese language courses may apply toward the major, although students may need to take more to reach the required third-year level of language competence.

3. Linguistics, literature, culture, and/or classical language courses (minimum 30 credits), to include CHIN 451, CHIN 452 (10 credits); CHIN 342 or CHIN 442 (5 credits); CHIN 461, CHIN 463 (10 credits). See department for additional courses in linguistics, literature, culture, and/or classical language that may apply.

Program of Study: Major: Japanese

Program Overview

The Department of Asian Languages and Literature offers an undergraduate major and minor in Japanese. In the major and minor, students will develop their ability to read, write, and speak Japanese and will combine those language skills with an understanding and appreciation of the literature, linguistics, and culture associated with the language. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates at the University of

Washington is to combine a major in Japanese with a second major from another department, such as Computer Science, Business Administration, or International Studies. Graduates of the Department go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Japanese

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Japanese language. Any courses relating to the area or discipline of major study.

Admission Requirements

1. Minimum 20 credits of college coursework (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be taken through the UW, with a minimum 2.5
2. Completion of one writing course (W-prefix) taught in English with a minimum 2.0 grade.
3. The department prefers that prospective majors present a cumulative 2.50 GPA. Students with a cumulative GPA below 2.50 may be considered for the major if they submit materials in addition to transcripts, clarifying any aspect of past coursework. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

Note: Students entering the junior year without two years of the appropriate foreign language are not able to complete the degree requirements in two years unless they take accelerated courses through the UW during summer quarter.

Bachelor of Arts degree with a major in Japanese

Completion Requirements

Minimum 50 credits

1. Minimum 50 credits in Japanese language, linguistics, literature, and/or culture. (Students who begin language study with first-quarter Japanese need 75 credits to complete the major.)
2. *Language:* JAPAN 303 (or JAPAN 334) required, unless waived because of advanced skills. Maximum 20 language credits may be counted toward the major, chosen from JAPAN 203 (or five credits of JAPAN 234); JAPAN 245; or any 300- or 400-level Japanese language courses. See department for list of approved language courses.
3. Linguistics, literature, and/or culture courses (minimum 30 credits, including at least 25 credits taken in the department.) Minimum 5 credits of advanced work, which may require linguistics, literature, and/or culture prerequisites. Any such prerequisites also count toward the 30-credit requirement. See department for list of approved courses.
4. Students entering with advanced language skills complete a placement test and interview to determine language course placement. Students who need fewer than 20 credits to complete JAPAN 303, or for whom JAPAN 303 is waived because of advanced skills, must still earn a minimum 50 credits for the

major. These students may take 400-level Japanese language courses (placement interview may be required), or additional linguistics, literature, and/or culture courses. Students are strongly encouraged to consult an adviser to determine both language and other course options.

Program of Study: Major: Korean

Program Overview

The Department of Asian Languages and Literature offers an undergraduate major and minor in Korean. In the major and minor, students will develop their ability to read, write, and speak Korean and will combine those language skills with an understanding and appreciation of the literature, linguistics, and culture associated with the language. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates at the University of Washington is to combine a major in Korean with a second major from another department, such as Computer Science, Business Administration, or International Studies. Graduates of the Department go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Korean

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Korean language. Any courses relating to the area or discipline of major study.

Admission Requirements

1. Minimum 20 credits of college coursework (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be taken through the UW, with a minimum 2.5
2. Completion of one writing course (W-prefix) taught in English with a minimum 2.0 grade.
3. The department prefers that prospective majors present a cumulative 2.50 GPA. Students with a cumulative GPA below 2.50 may be considered for the major if they submit materials in addition to transcripts, clarifying any aspect of past coursework. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

Note: Students entering the junior year without two years of the appropriate foreign language are not able to complete the degree requirements in two years unless they take accelerated courses through the UW during summer quarter.

Bachelor of Arts degree with a major in Korean

Completion Requirements

50-75 credits

1. *Language*: (15-45 credits; minimum 15 credits beyond second year)
2. Area-related humanities and social science courses (30-35 credits, to reach minimum 50 credits for the major).
3. Students placed beyond second year Korean must take 35 credits of area-related humanities and social science courses.

Program of Study: Major: South Asian Languages

Program Overview

The Department of Asian Languages and Literature offers undergraduate majors in Hindi and Sanskrit. Undergraduate minors include Bengali, Hindi, Sanskrit, and Urdu. In these majors and minors, students will develop their ability to read, write, and speak South Asian languages and will combine these language skills with an understanding and appreciation of the literature, linguistics, and culture associated with the languages. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates is to combine a major in South Asian languages with a second major from another department, such as Business Administration, International Studies, Biology, or Computer Science. Graduates of AL&L go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in South Asian Languages

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year South Asian language (Hindi or Sanskrit). Any courses relating to the area or discipline of major study.

Admission Requirements

1. Minimum 20 credits of college coursework (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be taken through the UW, with a minimum 2.5
2. Completion of one writing course (W-prefix) taught in English with a minimum 2.0 grade.
3. The department prefers that prospective majors present a cumulative 2.50 GPA. Students with a cumulative GPA below 2.50 may be considered for the major if they submit materials in addition to transcripts, clarifying any aspect of past coursework. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

Note: Students entering the junior year without two years of the appropriate foreign language are not able to complete the degree requirements in two years unless they take accelerated courses through the UW during summer quarter.

Bachelor of Arts degree with a major in South Asian Languages

Credential Overview

The Department of Asian Languages and Literature offers undergraduate majors in

Hindi and Sanskrit, with a comparable track for Urdu under development. Undergraduate minors include Bengali, Hindi, Sanskrit, and Urdu. In these majors and minors, students will develop their ability to read, write, and speak South Asian languages and will combine these language skills with an understanding and appreciation of the literature, linguistics, and culture associated with the languages. Students are encouraged to explore wider interests by taking courses in other units and to take advantage of numerous study abroad opportunities. A popular option for many undergraduates is to combine a major in South Asian languages with a second major from another department, such as Business Administration, International Studies, Biology, or Computer Science. Graduates of AL&L go on to a wide variety of careers, reflecting the indispensability of knowledge of Asian languages and cultures in our increasingly interconnected world.

Completion Requirements

70 credits

1. *Language*: 45 credits beyond first-year level in a single South Asian language (Hindi or Sanskrit)
 - a. *Basic Language*: For Hindi - HINDI 201, HINDI 202, HINDI 203, HINDI 301, HINDI 302, HINDI 303; for Sanskrit - SNKRT 201, SNKRT 202, SNKRT 203, SNKRT 311, SNKRT 312, SNKRT 313
 - b. *Advanced Language, Literature, and Linguistics*: 15 credits at 400 level, all drawn from either the following Hindi or Sanskrit courses, depending on the basic language selected: For Hindi - HINDI 404, HINDI 421, HINDI 422, HINDI 423, HINDI 431, HINDI 451; for Sanskrit - SNKRT

- 491, SNKRT 492, INDN 401, INDN 402, INDN 410
2. *Literature in Translation (10 credits)*: ASIAN 203, ASIAN 206
3. *South Asian History (5 credits)*: One course from among HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404
4. *South Asian Humanities and Social Sciences (5 credits)*: Chosen in consultation with adviser. A list of courses that satisfy this requirement is included on the expanded description of the major available from the adviser.
5. *Capstone Seminar (5 credits)*: INDN 490

This program of study leads to the following credential:

- Minor in Chinese

Minor in Chinese

Completion Requirements

30 credits

1. Minimum 30 credits in modern Chinese language, linguistics, literature, culture, and/or classical language, taken within Asian Languages and Literature. (See department for Asian Languages and Literature courses other than Chinese that may be counted toward the minor.)
2. *Language*: CHIN 213 (heritage-track Chinese, considered equivalent to third-year level) or CHIN 303 (or equivalent). Maximum 15 credits of modern Chinese language, which may include CHIN 213, CHIN 301, CHIN 302, CHIN 303, or certain 400-level Chinese courses. First and second-year Chinese courses may not apply to the minor.
3. *Linguistics, literature, culture, and/or classical language*: Minimum 15 credits to include CHIN 342 or CHIN 442 (5 credits) and CHIN 461 or CHIN 463 (5 credits). Additional credits in linguistics, literature, culture, and/or classical language may be taken from courses on the department website.

Program of Study: Minor: Indonesian Language and Culture

Program Overview

Students who earn a minor in Indonesian achieve proficiency in Bahasa Indonesian, the national language of Indonesia, and gain an in-depth knowledge of Indonesian culture. Language is taught using a communicative method, emphasizing not only grammar but also speaking and listening, so students learn to converse, read, and write in real-life situations. Courses emphasize exploring Indonesia's diverse culture, including literature as well as videos, music, and current events. By pairing the minor with a major in the College of Arts and Sciences or a professional field, students find an advantage after graduation as they enter business and nonprofit work, STEM fields, graduate programs, and more across the globe.

This program of study leads to the following credential:

- Minor in Indonesian Language and Culture

Minor in Indonesian Language and Culture

Completion Requirements

30 credits

1. *Language Courses*: 15 credits of second- and/or third-year Indonesian language (INDO 211, INDO 212, INDO 213; INDO 311, INDO 312, INDO 313)
2. *Culture Courses*: 15 credits of humanities and social science courses

offered through the UW, chosen from approved Indonesian-related content courses or joint-listed equivalents. See department website for approved list.

3. Minimum 15 credits from 1 and 2 (above) taken at the 300 level or above
4. Minimum 2.00 cumulative GPA for courses applied to the minor

Program of Study: Minor: Japanese

Advanced language courses and Vietnam-related content courses will strengthen students' competitiveness in the

internationalized job market and broaden their global perspective.

Completion Requirements

30 credits

1. *Language*: 15 credits of second and/or third year Vietnamese (VIET 211, VIET 212, VIET 213, VIET 214, VIET 311, VIET 312, VIET 313)
2. *Culture*: 15 credits of Vietnamese-related humanities and social science courses offered at UW, chosen from approved list. See department for approved courses.
3. Minimum 15 credits at the 300 level or above
4. Minimum cumulative 2.00 GPA for courses applied to the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - *Language*: A student of one of the languages achieves competency in speaking, listening, reading, and writing. Skills acquired for the *minor* include the ability to manage simple spoken communicative tasks and social situations; to understand sentence-length utterances on familiar topics in face-to-face situations; to read simple connected texts dealing with personal and social topics; to write short essays on familiar topics grounded in personal experience and immediate surroundings. Skills acquired for the *major* include the ability to manage spoken communicative tasks, including topics of common interest, description and narration, expression

- of personal viewpoints, and presentation and support of an argument; to understand the main idea and important details of connected spoken discourse, ranging from face-to-face situations to radio and TV broadcasting; to understand the main idea and important details of written texts in a range of styles and registers; to write routine social correspondence using the appropriate conventions, and to write connected essays of several paragraphs in an appropriate linguistic register.
- *Linguistics*: A student with a **minor** achieves competency in understanding the basic structure of the language, including its grammatical forms, writing system, and phonology; recognizing the language's historical relationships with other languages in the geographical region; understanding the structured and hierarchical nature of linguistic systems. A student with a **major** additionally achieves competency in understanding basic linguistic concepts and terminology in such fields as syntax, morphology, and phonology, and applying them to the analysis of the linguistic structures of the language; understanding the historical development of the language, including its historical linguistic features and dialectal development; recognizing the relationship between linguistic structures and literary forms and devices.
 - *Literature*: A student with a **minor** achieves competency in identifying major works and forms within the literary tradition; understanding the place of selected literary texts within the ongoing tradition; understanding the historical and cultural contexts of major literary forms and works; understanding the roles of literary works and literary activity within the culture; utilizing basic research skills. A student with a **major** additionally achieves competency in reading selected literary texts in the original; employing linguistic and philological analysis as tools for understanding literary texts; performing formal analysis of literary texts; analyzing literary texts with reference to relevant literary traditions and intertextual dynamics; analyzing literary texts with reference to their historical background and broader cultural context; practicing critical reading of primary and secondary texts; employing research and writing skills to produce formal written analysis of literary texts.
 - Asian Languages and Cultures: *Common Skills*: Basic foundation in at least one Asian language, including competency in speaking listening, reading, and writing; fundamental skills in critical thinking, research, and oral and written communication; knowledge of various Asian cultural traditions, familiarity with disciplinary methodologies of the humanities. *Shared Outlook*: Appreciation of Asian cultures in broader regional and international contexts, emphasizing mutual relations and influences. *Skills Specific to Students Individual Choices*: Varying levels of competence in from one to three Asian languages; advanced proficiency in disciplinary methodologies; more in-depth knowledge of selected Asian cultural traditions; comparative understanding of cultural phenomena

and their history across different regions of Asia. *Career Preparation:* Skills in one or more languages, critical thinking, research, and written and oral communication; capacity to explore and find connections among diverse fields of knowledge; adaptability, broad skill set, and learning capacity (as opposed to narrow specialization) necessary to succeed within the diverse and rapidly changing technological, economic, social, and cultural environments of today's global economy in such fields as teaching and research, professional programs, consulting firms, commerce, law, the media, museums, cultural institutions, public administration, government agencies, and non-governmental organizations.

- *Instructional and Research Facilities:* None
- *Honors Program:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* None offered
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None

astrobio@uw.edu

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators -- a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous

methodology. Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

Astronomy

C 319 [Physics](#)

[Website](#)

[Faculty Website](#)

Astronomy is the quest to make the Universe comprehensible; an adventure into the beginning of time and through the vast distances of space. We ask how stars and planetary systems form and evolve, how galaxies form, how the elements arose, and probe the origin, fate, and structure of the Universe. Along the way we challenge and enrich physics with our discoveries.

Undergraduate Program

C 319 [Physics](#)

office@astro.washington.edu

Program of Study: Major: Astronomy

Program Overview

The Astronomy Department at the University of Washington offers a full curriculum of courses in various fields, including planetary astronomy, stellar structure and evolution, interstellar matter, galactic structure, extragalactic astronomy, observational and theoretical cosmology, and a summer observing course using a 30-inch telescope with modern instrumentation.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Astronomy

Recommended Preparation

Suggested First-Year Courses: MATH 124, MATH 125, MATH 126, MATH 208, MATH 224; PHYS 121, PHYS 122, PHYS 123. At community colleges it is better to take courses in physics, chemistry, mathematics, and computer science rather than the usual introductory astronomy courses.

Admission Requirements

Applicants are considered in two groups - Currently Enrolled UW Students and Entering Transfers.

1. *Currently Enrolled UW Students*

- Minimum requirements for consideration: PHYS 121, PHYS 122, PHYS 123 (or transfer equivalent; may be presently enrolled in PHYS 123). Minimum 2.00 cumulative GPA for physics courses. Either MATH 124, MATH 125, MATH 126 or MATH 134, MATH 135, MATH 136 (or full transfer equivalent; may be presently enrolled in MATH 126 or MATH 136).
- Standard admission is twice a year. Application deadlines: April 5 for autumn quarter and October 5 for spring quarter.
- Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - Academic performance to include review of overall GPA and content of all courses completed; frequency of incompletes or withdrawals and number of repeated courses; and an academic record that demonstrates interest in science, technology, engineering, and/or mathematics.
 - Personal statement, consisting of a brief (500-1,000 word) description of the student's interest and goals in the astronomy major and addresses strategies of success in the major. In cases of exceptional or extenuating circumstances, the personal statement may include a petition for waiver of one of the stated minimum requirements shown in admission requirement 1, above. A more extensive list of possible additional topics is provided on the Astronomy

- Department Undergraduate Admission web page.
2. *Entering Transfers*: A portion of each year's class is admitted directly from students transferring from another college or university.

Transfer student admission is capacity constrained. Transfer applicants must submit a departmental application for the same quarter they submit an application to the University. Applicants must meet the following requirements:

- a. Minimum 30 graded college credits completed by the University transfer application deadline.
- b. Minimum course requirements for consideration: PHYS 121, PHYS 122, PHYS 123 (or transfer equivalent; may be presently enrolled in PHYS 123). Minimum 2.00 cumulative GPA for physics courses. Either MATH 124, MATH 125, MATH 126 or MATH 134, MATH 135, MATH 136 (or full transfer equivalent; may be presently enrolled in MATH 126 or MATH 136).
- c. Application deadlines: April 5 for summer or autumn admission; October 5 for winter admission.
- d. Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - i. Academic performance to include review of overall GPA and content of all courses completed; frequency of incompletes or withdrawals and number of repeated courses; and an academic record that demonstrates interest in science,

- ii. Personal statement, consisting of a brief (500-1,000 word) description of the student's interest and goals in the astronomy major and addresses strategies of success in the major. In cases of exceptional or extenuating circumstances, the personal statement may include a petition for waiver of one of the stated minimum requirements shown in admission requirement 1, above. A more extensive list of possible additional topics is provided on the Astronomy Department Undergraduate Admission web page.

Consult the Astronomy Department website for additional application information and sample graduation plans.

Bachelor of Science degree with a major in Astronomy

Credential Overview

The Bachelor of Science degree emphasizes the necessary background in physics and mathematics. It is designed for students who plan to attend graduate school or work at astronomical facilities. The small size and informal atmosphere of the department encourages close working relationships between faculty and students.

Completion Requirements

87-91 credits

1. ASTR 300, ASTR 322 and ASTR 323; plus one of either ASTR 321 or ASTR 324.

2. 9 graded credits of astronomy 400-level courses. Data analysis (ASTR 480) and senior-year research (ASTR 499) are highly recommended for students planning graduate work.
3. PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); PHYS 224, PHYS 225, PHYS 226, PHYS 227, PHYS 321, PHYS 322, PHYS 334
4. Mathematics (21-25 credits) complete one of the following:
 - a. MATH 124, MATH 125, MATH 126; and 6 credits from MATH 207, MATH 208, MATH 209, MATH 224, AMATH 352, or AMATH 353
 - b. MATH 134, MATH 135, MATH 136*
5. An additional 6 physics credits in courses at the 300 level or above in physics (chosen from PHYS 311, PHYS 323, PHYS 324, PHYS 325, PHYS 328, PHYS 331, PHYS 335, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 431, PHYS 432, PHYS 433, PHYS 434) or engineering as approved by adviser.
6. No grade below 2.0 is acceptable in courses fulfilling the above requirements.
7. Undergraduates interested in advanced work in astronomy are advised to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program. For students planning on graduate work in Astronomy, a capstone sequence of hands-on research and dissemination of results, the following is highly recommended: ASTR 480, followed by either ASTR 481 or ASTR 499 or a Research Experience for Undergraduates

(REU) project, and ending with ASTR 482.

*May receive advanced placement (AP) credit for MATH 124 (after completing MATH 134) and MATH 125 (after completing MATH 135).

Of Special Note: The first required astronomy course, ASTR 321, must be preceded by at least one year of college physics and mathematics. Any lower-division astronomy courses count as electives and not as part of the major. To finish in four years, the student must have completed PHYS 123 before winter quarter of the sophomore year. Students planning on graduate work in Astronomy are encouraged to take the capstone sequence: spring: ASTR 480; summer: ASTR 481 or ASTR 499 or an REU (Research Experiences for Undergraduates) program; autumn: ASTR 482.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* With this degree, students obtain knowledge of the components of the universe, an understanding of the physics of its structure, and the technical skills to obtain and analyze data from telescopes. Graduates go on to graduate school or work at observatories or in industrial applications (lasers, x-ray, optical imaging) or in teaching applications. Students are able to do the following:
 - Understand the principal findings, common application, and current problems within astronomy as a scientific discipline

- Be versed in the computational methods and software resources utilized by professional astronomers
- Have experience operating modern astronomical instrumentation and analyzing a range of experimental data
- Assess, communicate, and reflect their understanding of astronomy and the results of astrophysical experiments in both oral and written formats
- Learn in a diverse environment with a variety of individuals, thoughts, and ideas
- *Instructional and Research Facilities:* The department operates a 30-inch telescope with modern instrumentation, primarily for students, at the Manastash Ridge Observatory near Ellensburg. The department is also part of a consortium of universities that operate a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico and that are partners in the innovative Sloan Digital Sky Survey and the future Large Synoptic Survey Telescope. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. Data analysis and theoretical research are conducted on the department's cluster of computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* Washington State Space Grant, NSF research experiences for undergraduates. NASA internships, outreach opportunities
- *Department Scholarships:* Baer Prize. See adviser for details.
- *Student Organizations/Associations:* The Society of Physics Students. Undergraduate Astronomy Institute/Palen Radio Astronomy Group. League of Astronomers. See adviser for details.

Biology

106 [Kincaid Hall](#)

206-543-1620

[Website](#)

[Faculty Website](#)

Biology is one of the most in-demand degrees available at UW, as well as the largest producer of STEM degrees in Washington and the engine of life sciences education for the future. By using an integrative, connective approach to the life sciences, we foster collaboration and intellectual partnerships, driven by curiosity to catalyze discovery. Our success as a department is due to our faculty, staff and students. They help us maintain our research and education missions at the highest level, evidenced by the tremendous work exhibited every day in classrooms, labs, and field sites.

Undergraduate Programs

318 [Hitchcock Hall](#)

206-543-9120

bioladv@uw.edu

Program of Study: Major: Biology

Program Overview

Through coursework in the classroom, lab, and field as well as experience through research, internships, and study abroad our undergraduates gain the requisite knowledge and skills for careers in basic and applied research, education, health sciences, environmental sciences, science policy, government, business and the non-profit sector. Students may earn a Biology BA with a General Biology Option. The Biology BS degree can be earned with one of 5

options: Ecology Evolution and Conservation Biology (EEC), General Biology, Molecular Cellular and Developmental Biology (MCD), Physiology, and Plant Biology. Minors in Paleo Biology and Marine Biology are also part of the curriculum offered to Undergraduates.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Biology
- Bachelor of Science degree with a major in Biology: Ecology, Evolution, and Conservation
- Bachelor of Science degree with a major in Biology: General
- Bachelor of Science degree with a major in Biology: Molecular, Cellular, and Development
- Bachelor of Science degree with a major in Biology: Physiology
- Bachelor of Science degree with a major in Biology: Plant

Admission Requirements

Admission is capacity constrained. Applications, accepted quarterly, are due the second Friday of autumn, winter, spring, and summer quarters, by 11:59 p.m. Applications received after the quarterly deadline are considered for the subsequent quarter.

Minimum requirements for consideration

1. Matriculated student in good academic standing at UW Seattle.
2. Minimum 2.0 grade in each of BIOL 180, BIOL 200, and BIOL 220; or in BIOL 240
3. Minimum 2.50 cumulative GPA for any supporting chemistry, physics,

mathematics, and biology courses (or other courses that may apply to major requirements) completed at time of application.

4. Personal statement: May include description of interest in biology, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.

Meeting minimum requirements does not guarantee admission. Other factors include overall academic record and difficulty of other courses completed; time to degree set by UW Satisfactory Progress Policy, including frequency of incompletes or withdrawal grades and number of repeated courses; relevant work and life experience; and record of honors.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Biology

Credential Overview

The BA Degree with an Option in General Biology is designed for students who desire a breadth of training throughout their program of study. Compared to the BS degree, the BA does not require physics or a third quarter of organic chemistry. This is an ideal program for students wishing to get the scope of the biological sciences without some of the supporting science sequences.

Completion Requirements

87-98 credits

1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
2. One of the following general and organic chemistry sequences (15-23 credits)
 - a. CHEM 120, CHEM 220, CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 - c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238
3. Physics: not required
4. One of the following calculus/statistics sequences (9-10 credits)
 - a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381 or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340 (3-5 credits)
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. 300- and 400-level courses, in addition to any 300-/400-level courses taken to fulfill requirements above. See department website for approved courses. (42 credits.)
8. Minimum 2.0 cumulative GPA for courses applied toward major requirements

Bachelor of Science degree with a major in Biology: Ecology, Evolution, and Conservation**Credential Overview**

The Ecology, Evolution, and Conservation option is for students interested in the origins, maintenance, or conservation of biological diversity. This option prepares students with strong system level approaches to problem solving, and careers in natural resources and conservation. A strong quantitative background is emphasized, and courses serve to develop skills in data collection, analysis, and communication. It is a degree option that allows students to explore courses offered through the College of Environment and Arts and Sciences.

Recommended Preparation

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Inquiry requirement during the first two years.

Completion Requirements

87-104 credits

1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221

- b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 - c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
3. One of the following two-quarter sequences of mathematics (calculus/statistics):
- a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. *Option Requirement:* 300- and 400-level courses selected from list specific to this option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

8. *Additional Degree Requirements:*
- a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)

- b. Minimum 15 credits of 400-level biology electives taken through the UW.
- c. Two 300- or 400-level laboratory courses

Bachelor of Science degree with a major in Biology: General

Credential Overview

The General Biology option emphasizes breadth of training in Biology. As the most flexible among the options leading to a Science degree in Biology, students have input in the composition of their degree by choosing from the wide range of electives available through several different departments.

Recommended Preparation

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Inquiry requirement during the first two years.

Completion Requirements

87-104 credits

- 1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
- 2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224

- c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
3. One of the following two-quarter sequences of mathematics (calculus/statistics):
- a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. *Option Requirement:* 300- and 400-level courses selected from list specific to this option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

8. *Additional Degree Requirements:*
- a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)
 - b. Minimum 15 credits of 400-level biology electives taken through the UW.

- c. Two 300- or 400-level laboratory courses

Bachelor of Science degree with a major in Biology: Molecular, Cellular, and Development

Credential Overview

The Molecular, Cellular, and Developmental Biology option is for students seeking undergraduate training in the molecular, genetic, and cellular basis of life. These topics will assist students in understanding the complex biological processes that underlie cellular function, disease processes and embryonic development.

Recommended Preparation

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Inquiry requirement during the first two years.

Completion Requirements

87-104 credits

- 1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
- 2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224

- c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
3. One of the following two-quarter sequences of mathematics (calculus/statistics):
- a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
6. Natural history/biodiversity: one course selected from approved list (3 credits)
7. *Option Requirement:* 300- and 400-level courses selected from list specific to this option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

8. *Additional Degree Requirements:*
- a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)
 - b. Minimum 15 credits of 400-level biology electives taken through the UW.

- c. Two 300- or 400-level laboratory courses

Bachelor of Science degree with a major in Biology: Physiology

Credential Overview

The Physiology option emphasizes physiological processes from cellular to organismal levels. This is an attractive option for students interested in the internal processes of both animals and plants in relation to the systems and components that create a working living organism.

Recommended Preparation

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Inquiry requirement during the first two years.

Completion Requirements

87-104 credits

- 1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
- 2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 - c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239

- d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
- 3. One of the following two-quarter sequences of mathematics (calculus/statistics):
 - a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOST 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
- 4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
- 5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
- 6. Natural history/biodiversity: one course selected from approved list (3 credits)
- 7. *Option Requirement*: 300- and 400-level courses selected from list specific to this option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

- 8. *Additional Degree Requirements*:
 - a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)
 - b. Minimum 15 credits of 400-level biology electives taken through the UW.
 - c. Two 300- or 400-level laboratory courses

Bachelor of Science degree with a major in Biology: Plant

Credential Overview

The Plant Biology option provides students with strong and broad training in plant biology, ranging from the cellular, physiological and systematic levels to an ecological, horticultural, and restoration perspective on a macro level.

Recommended Preparation

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Inquiry requirement during the first two years.

Completion Requirements

87-104 credits

- 1. BIOL 180, BIOL 200, BIOL 220; or BIOL 240 (15 credits)
- 2. One of the following general and organic chemistry sequences:
 - a. CHEM 120, CHEM 220, and CHEM 221
 - b. CHEM 142 (or CHEM 143), CHEM 152 (or CHEM 153), CHEM 223, CHEM 224
 - c. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239
 - d. CHEM 143, CHEM 153, CHEM 237, CHEM 238, CHEM 239
- 3. One of the following two-quarter sequences of mathematics (calculus/statistics):

- a. MATH 124 and MATH 125
 - b. Q SCI 291 and Q SCI 292
 - c. Either BIOS 310, Q SCI 381, or STAT 311; Q SCI 482
 - d. One approved calculus class and one approved statistics class; see adviser for approved lists.
4. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
 5. Genetics: either GENOME 361, GENOME 371, or BIOL 340/FISH 340.
 6. Natural history/biodiversity: one course selected from approved list (3 credits)
 7. *Option Requirement*: 300- and 400-level courses selected from list specific to this option. See department website for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and that sequence does require CHEM 162.

8. *Additional Degree Requirements*:
 - a. Minimum 2.00 cumulative GPA for all UW courses applied toward major requirements, including required supporting courses (chemistry, physics, mathematics), introductory biology, and upper-division coursework. (A grade of 2.0 is not required in individual courses.)
 - b. Minimum 15 credits of 400-level biology electives taken through the UW.
 - c. Two 300- or 400-level laboratory courses

Program of Study: Minor: Paleobiology

Program Overview

Paleobiology at UW, which began in 1907, has undergone significant expansion in recent years. The program now includes ten faculty with research interests ranging from the earliest evidence of life on Earth to the Permian-Triassic extinction, origin of mammals, mid-Cenozoic ‘greenhouse’ to ‘icehouse’ transition, and Neogene expansion of grasslands. We integrate new analytical approaches, such as stable isotope geochemistry and 3D visualization, with field explorations to Washington’s many locales as well as far-off sites in places like India, Antarctica, and Peru. On campus, the paleontological collections of the Burke Museum boast microfossils and invertebrate, plant, and vertebrate fossils from the Pacific Northwest and beyond.

This program of study leads to the following credential:

- Minor in Paleobiology

Minor in Paleobiology

Completion Requirements

Minimum 30 credits

1. BIOL 354
2. *Electives*: Two from the paleobiology core content area and one from each of the three other content areas, selected from approved courses available on the paleobiology website.
3. BIOL 483
4. *Integrative experience in paleobiology*: Minimum 3 credits from one of BIOL 475 or BIOL 499, ESS 499 or BIO A 499, at the discretion of the instructor

5. Remaining credits from any of the above or BIO A 389, BIO A 491, or an approved elective
6. Minimum 2.00 cumulative GPA for courses presented for the minor
7. Minimum 18 credits from outside the student's major.
8. Minimum 15 credits completed through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The department graduates between 350 and 400 students each year. Biology degrees are applicable to many different fields, depending upon student interests. Students in the program gain analytical and laboratory skills that prepare them for entry-level positions in a variety of biologically related areas, including, but not limited to, biotechnology, laboratory and/or field research support, health science support, wildlife biology, and ecology and conservation work with a variety of agencies, consulting firms, and research organizations in the Northwest. Students may enter graduate programs that focus on some aspect of biological science (such as genetics, microbiology, immunology, ecology, environmental health, or cell and molecular biology), or enter a variety of professional programs, such as veterinary medicine, medicine, dentistry, pharmacy, laboratory medicine, and nursing.
- *Instructional and Research Facilities:* The Department of Biology occupies 128,000 square feet in Hitchcock, Johnson, and Kincaid Halls. Extensive research laboratories, teaching laboratories, computer workstations, and support services are found throughout

the department. Specialized facilities include more than 16,000 square feet of greenhouse, seawater facilities, growth rooms, electron microscopes, and other specialized equipment. Undergraduates have access to most of these facilities, especially those engaged in undergraduate research. Off campus, the internationally recognized Marine Research Station, Friday Harbor Laboratories, provides many opportunities for undergraduates, from courses to research apprenticeships.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Biology faculty welcome undergraduates into their research programs, often working closely with them. Approximately 40 percent of the 900 undergraduate biology majors finish with undergraduate research experience. UW proximity to such Seattle area organizations as the Fred Hutchinson Cancer Research Center, Swedish Hospital, numerous biotech companies, NOAA, National Marine Fisheries Research Center, the Seattle Aquarium, and the Woodland Park Zoo, as well as the close ties of Biology faculty to Friday Harbor Laboratories and the faculty in the College of the Environment provide opportunities for biology majors to develop internships within these organizations. See adviser for ways to get credit for such experiences.
- *Department Scholarships:* Several scholarships are available, in a few cases to biology majors only. Most of these support students wishing to pursue an undergraduate research experience. They

are competitive, sometimes highly so.

They include:

- *Howard Hughes Undergraduate Research Internship*: approximately 20 per year for freshmen and 20 per year for juniors and seniors.
- *Friday Harbor Laboratory (FHL) Apprenticeships*: \$3,000 for one quarter, spring or autumn.
- *Mary Gates Scholarships*: very competitive, across all science disciplines.
- *Herschel and Caryl Roman Scholarship*: \$2,500-\$5,000 annually to one or two students who have an interest in genetics research.
- *Porath/Johnson Endowed Scholarship*: one-year, \$5,000 scholarship to an outstanding biology major.

For qualifications, deadlines, and other details, see adviser or consult the Department of Biology website.

- *Student Organizations/Associations*: Beta Beta Beta Biology Honor Society, tribeta@uw.edu; Pre Med Society (Alpha Epsilon Delta), aed@uw.edu.

info@chem.washington.edu

Chemistry is the science that studies matter, the stuff of which all things are made. Chemists study the composition, structure, properties, and reactions of matter on the molecular scale and larger. Chemists also discover and synthesize entirely new materials. Modern chemistry touches many other fields of science, engineering, and medicine. Chemistry will continue to provide critical solutions to intellectually exciting and societally important problems.

Program of Study: Major: Biochemistry

Program Overview

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of life processes. Biochemistry is well suited for students planning a career in biomedical research, the health care professions, or biotechnology. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Biochemistry
- Bachelor of Science degree with a major in Biochemistry

Recommended Preparation

Suggested First- and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Admission Requirements

Admission is capacity constrained. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors Admission, Early

Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. Refer to Department of Chemistry website for application and additional information.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. Indication on the UW freshman application of biochemistry as the student's first choice of major
3. Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections), or minimum 30 on the ACT
4. Admission is for autumn quarter only

Research/Honors Admission

1. Students with exceptional records can apply for consideration for admission to the biochemistry major via the Honors or Research track. Students seeking admission should submit an application that includes:
 - a. Cover sheet (available on the Department of Chemistry website)
 - b. Unofficial transcript
 - c. Statement of purpose. May include a description of interest in biochemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.

- d. (Research track only) Written letter or recommendation from research adviser
2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum 3.00 cumulative GPA: CHEM 145, CHEM 155; MATH 124 and MATH 125, or MATH 134 and MATH 135
 3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research adviser. Chemistry undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); BIOL 180; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors included in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS biochemistry program typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336); BIOL 180, BIOL 200; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS biochemistry program typically have over the minimum 2.5 cumulative GPA or in courses listed above under course requirements, with no individual course grade lower than a 2.0. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade below a 1.7.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the

Bachelor of Arts degree with a major in Biochemistry

Credential Overview

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of life processes. The BA Biochemistry degree is especially designed for students pursuing careers in the health care field such as medicine, dentistry, and pharmacy.

Completion Requirements

90-92 credits as follows:

1. *General Chemistry*: either CHEM 142, CHEM 152, CHEM 162, (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry*: either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
3. *Biochemistry*: BIOC 405, BIOC 406
4. *Physical Chemistry*: CHEM 452, CHEM 453
5. *Biology*: BIOL 180, BIOL 200
6. *Mathematics*: either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136
7. *Physics (12-15 credits)*: either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116
8. *Science Electives*: 9 credits to be taken from a current department list available in 303 Bagley or department website. Up to 3 credits of advanced undergraduate research may count toward this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.

9. *Grade and Graduation Requirements:* Minimum 1.7 grade in chemistry, biochemistry, and biology courses required for the major. Minimum 2.00 cumulative GPA required for graduation.

Bachelor of Science degree with a major in Biochemistry

Credential Overview

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of life processes. The BS Biochemistry degree is well suited for students planning a career in biomedical research, the health care professions, or biotechnology. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

Completion Requirements

103-114 credits

1. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
3. *Physical Chemistry:* CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457)
4. *Biochemistry:* BIOC 426, BIOC 440 (or BIOC 450), BIOC 441 (or BIOC 451), BIOC 442
5. *Biology:* BIOL 180, BIOL 200

6. *Mathematics:* MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
7. *Physics:* PHYS 121, PHYS 122, PHY 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
8. *Genome Science:* GENOME 361 or GENOME 371
9. 11 credits chosen from a current department list (available in 303 Bagley or see department website) of upper-division science classes including math, biology, microbiology, chemistry, and genome sciences. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
10. *Grade and Graduation Requirements:* Minimum 2.0 grade and minimum cumulative 2.50 GPA required for all chemistry, biology, and biochemistry courses counted toward the major. Minimum 2.50 GPA required for the BIOC 440, BIOC 441, and BIOC 442 sequence. Minimum 2.50 cumulative GPA required for graduation.

Of Special Note:

- The Bachelor of Science degree with a major in biochemistry requires a minimum of 193 credits.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic

laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors. Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- *Instructional and Research Facilities:* Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology, and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the

location of the department within the School of Medicine.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See adviser for more information.
- *Program Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.
- *Student Organizations/Associations:*
 - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
 - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
 - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

Of Special Note:

- Students are strongly encouraged to participate in undergraduate research.

Program of Study: Major: Chemistry

Program Overview

Chemistry plays a central role in the sciences because the goal of chemical study is understanding natural processes on an atomic and molecular level. Thus, graduating chemistry and biochemistry majors should experience the excitement of relating molecular properties to the order they observe in nature.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Chemistry
- Bachelor of Science degree with a major in Chemistry
- Bachelor of Science degree with a major in Chemistry: ACS Certified

Admission Requirements

Admission is competitive. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors, Early Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. Refer to department website for application and additional information.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. Indication on the UW freshman application of chemistry as the student's first choice of major
3. Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections) or a minimum 30 on the ACT.
4. Admission is for autumn quarter only.

Research/Honors

1. Students with exceptional records can apply for consideration for admission via the Honors or Research track. Students seeking admission should submit an application that includes:
 - a. Cover sheet (available on the Department of Chemistry website)
 - b. Unofficial transcript
 - c. Statement of purpose: May include a description of interest in chemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.
 - d. (Research Track only) Written letter or recommendation from research adviser.
2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum cumulative GPA of 3.00: CHEM 145, CHEM 155 (10 credits); MATH 124 and MATH 125 (or MATH 134 and MATH 135) (10 credits).
3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research advisers. Biochemistry

undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); PHYS 121, PHYS 122 (recommended) or PHYS 114, PHYS 115. MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS chemistry and BS chemistry-ACS certified programs typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA chemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or accelerated series CHEM 143, CHEM 153; or Honors series CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336). PHYS 121, PHYS 122 (recommended) (or PHYS 114, PHYS 115). MATH 124, MATH 125 (or MATH 134, MATH 135)

2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS chemistry and BS chemistry-ACS certified programs typically have a cumulative GPA greater than 2.50 in courses listed above under course requirements, with no individual grade lower than a 2.0. Successful applicants for the BA chemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade lower than 1.7.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Chemistry

Credential Overview

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics and mathematics. A BA Chemistry degree

prepares students for graduate school, the health professions, careers in the chemical industry, teaching at a high school level, and a host of other career options.

Completion Requirements

79-82 credits as follows:

1. *Chemistry Courses:*
 - a. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162, CHEM 312 (or accelerated series CHEM 143, CHEM 153, CHEM 312; or Honors series CHEM 145, CHEM 155, CHEM 165)
 - b. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
 - c. *Analytical Chemistry:* CHEM 321
 - d. *Advanced Chemistry Lab:* Either CHEM 317 or CHEM 461
 - e. *Advanced Chemistry:* 11 credits of numerically graded CHEM 400-level courses to include either CHEM 455, CHEM 456, CHEM 457 series, or CHEM 452, CHEM 453 series
2. *Mathematics:* MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
3. *Physics:* One year of physics including at least 1 credit of laboratory (PHYS 114, PHYS 115, and PHYS 116 and at least one of PHYS 117, PHYS 118, or PHYS 119; or PHYS 121, PHYS 122, and PHYS 123; PHYS 121 sequence recommended).
4. *Grade Requirements:* Minimum 2.00 GPA in chemistry courses counted toward major; minimum 1.7 grade in all required chemistry courses

Of Special Note:

The Bachelor of Arts degree with a major in Chemistry requires a minimum of 180 credits to graduate.

Bachelor of Science degree with a major in Chemistry

Credential Overview

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics and mathematics. A BS Chemistry degree prepares students for graduate school, the health professions, careers in the chemical industry, teaching at a high school level, and a host of other career options.

Completion Requirements

90-100 credits

1. *Chemistry and Related Courses (62-67 credits):*
 - a. General Chemistry (15-18 credits): one of the following options: (1) CHEM 142, CHEM 152, CHEM 162, CHEM 312; (2) CHEM 143, CHEM 153, CHEM 312; (3) CHEM 145, CHEM 155, CHEM 165, CHEM 416
 - b. Organic Chemistry (15 credits): one of the following options: (1) CHEM 237, CHEM 238, CHEM 239, CHEM 241; (2) CHEM 335, CHEM 336, CHEM 337, CHEM 346
 - c. Physical Chemistry (9) credits: CHEM 455, CHEM 456, CHEM 457

- d. Advanced Chemistry Laboratories (7-9 credits): Two of the following three courses: CHEM 317, CHEM 321, CHEM 461
 - e. Additional Laboratories: 5 additional laboratory credits chosen from the following: CHEM 242, CHEM 317, CHEM 321, CHEM 347, CHEM 426, CHEM 428, CHEM 461, CHEM 462, CHEM 463, CHEM 464, CHEM 466, BIOC 426
 - f. Science Electives: 11 credits chosen from CHEM 242, CHEM 317, CHEM 321, CHEM 347, any 400 - level numerically graded chemistry or biochemistry courses, or one from MATH 207, MATH 208, AMATH 351, or AMATH 352. Students with a chemistry GPA of 3.30 or higher may apply up to 6 credits of approved research (CHEM 399 or CHEM 499) toward satisfying this requirement. CHEM 498 may not be used to satisfy this requirement.
2. *Mathematics (15-18 credits)*: one of the following options: (1) MATH 124, MATH 125, MATH 126; one additional course chosen from MATH 207, MATH 208, AMATH 351, or AMATH 352; (2) MATH 134, MATH 135, MATH 136.
 3. *Physics (13-15 credits)*: one of the following options: (1) PHYS 121, PHYS 122, PHYS 123 (recommended); (2) PHYS 114, PHYS 115, PHYS 116; one of PHYS 117, PHYS 118, PHYS 119; (3) PHYS 141, PHYS 142, PHYS 143.
 4. *Grade Requirements*: Minimum 2.0 grade in each chemistry course; minimum 2.50 GPA required for all chemistry, mathematics, and physics courses used to satisfy major requirements; minimum overall cumulative 2.50 GPA and minimum 180 credits required for graduation.

Of Special Note:

The Bachelor of Science degree with a major in Chemistry requires a minimum of 180 credits to graduate.

Bachelor of Science degree with a major in Chemistry: ACS Certified

Credential Overview

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics and mathematics. A BS Chemistry (ACS Certified) degree prepares students for graduate school, the health professions, careers in the chemical industry, teaching at a high school level, and a host of other career options.

Completion Requirements

93-104 credits

1. *Chemistry and Related Courses (65-71 credits)*:
 - a. General Chemistry (12-15 credits): one of the following options: (1) CHEM 142, CHEM 152, CHEM 162; (2) CHEM 143 and CHEM 153; (3) CHEM 145, CHEM 155, CHEM 165
 - b. Organic Chemistry (18 credits): one of the following options: (1) CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; (2) CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
 - c. Inorganic Chemistry (4-7) credits: CHEM 312 and CHEM 317

- (students completing CHEM 165 are exempt from CHEM 312)
- d. Analytical Chemistry (8 credits): one of the following options: (1) CHEM 321 and CHEM 426; (2) CHEM 321 and CHEM 428
 - e. Physical Chemistry (12 credits): CHEM 455, CHEM 456, CHEM 457, CHEM 461
 - f. Biochemistry (3 credits): one course from BIOC 405, CHEM 432, or CHEM 436. Contact adviser regarding alternative prerequisites for BIOC 405.
 - g. Advanced Chemistry: 8 credits of numerically graded CHEM or BIOC 400-level courses (not previously listed) and one more course with laboratory (currently CHEM 462, CHEM 463, CHEM 464, and CHEM 466)
 - h. Strongly recommended, research credits in CHEM 399 and CHEM 499.
2. *Mathematics (15-18 credits)*: one of the following options: (1) MATH 124, MATH 125, MATH 126; one course from MATH 207, MATH 208, AMATH 351, or AMATH 352; (2) MATH 134, MATH 135, MATH 136.
 3. *Physics (13-15 credits)*: one of the following options: (1) PHYS 121, PHYS 122, PHYS 123 (recommended); (2) PHYS 114, PHYS 115, PHYS 116; one of PHYS 117, PHYS 118, PHYS 119; (3) PHYS 141, PHYS 142, PHYS 143.
 4. *Grade Requirements*: Minimum 2.0 grade in each chemistry course; minimum 2.50 GPA for courses used to satisfy the major degree requirements; minimum overall cumulative 2.50 GPA and minimum 183 credits required for graduation.

Of Special Note:

The Bachelor of Science degree with a major in Chemistry: ACS Certified requires a minimum of 183 credits to graduate.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: At the conclusion of their studies, graduating chemistry majors should have a general knowledge of the basic areas of chemistry with a working knowledge of at least one area: be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of chemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to chemistry majors. Teaching high school chemistry, environmental or patent law practice, or working in the chemical industry in sales or management positions are career choices for which the BA in chemistry is generally useful.
- *Instructional and Research Facilities*:
 - Departmental facilities include a spectroscopic and analytical instrumentation laboratory (NMR, GC-MS, X-Ray, IR), Chemistry

- Library, Center for Enabling New Technologies through Catalysis (CENTC), Center for Process and Analytical Chemistry (CPAC), Materials and Devices for Information Technology Research (MDITR), Center for Nanotechnology, and extensive computing capabilities.
- The department's local area network (LAN) is extended through a fiber optic cable to the university-wide network that is connected to Internet, HEPNET, SPAN, and other national and international computer networks.
 - The Chemistry Study Center offers assistance to students in 100-level chemistry courses and has 40 Pentium computers available to undergraduates taking chemistry courses.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for information.
 - *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.
 - *Student Organizations/Associations:*
 - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors

- Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
- The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

Of Special Note:

- Students are strongly encouraged to participate in undergraduate research.
- The maximum number of credits that may be earned combining CHEM 199 and CHEM 299 is 12; the maximum number of credits that may be earned combining CHEM 399 and CHEM 499 is 24.

Program of Study: Minor: Chemistry

Program Overview

Chemistry plays a central role in the sciences because the goal of chemical study is understanding natural processes on an atomic and molecular level. Thus, graduating chemistry and biochemistry majors should experience the excitement of relating molecular properties to the order they observe in nature.

This program of study leads to the following credential:

- Minor in Chemistry

Minor in Chemistry

Credential Overview

Chemistry plays a central role in the sciences because the goal of chemical study is understanding natural processes on an atomic and molecular level. Students with a Minor in Chemistry will have a foundation

to experience the excitement of relating molecular properties to the order they observe in nature.

Completion Requirements

35-44 credits

1. One of the following three sequences:
 - a. CHEM 142, CHEM 152, CHEM 162, and one of CHEM 223, CHEM 237, or CHEM 335
 - b. CHEM 145, CHEM 155, CHEM 165, and one of CHEM 223, CHEM 237, or CHEM 335
2. MATH 124 (or Q SCI 291 and Q SCI 292)
3. PHYS 114 or PHYS 121
4. Three of the following four groups:
 - a. CHEM 312 (or CHEM 165)
 - b. CHEM 321
 - c. One of CHEM 452, CHEM 455, or CHEM 456
 - d. One of CHEM 224, CHEM 238, CHEM 336
5. Minimum 2.00 GPA for the minor; minimum 1.7 grade in each course presented for the minor.
6. A minimum of 15 credits taken for the minor must be completed in residence at the University of Washington.

Program of Study: Major: Cinema and Media Studies

Program Overview

Cinema and media studies emphasizes the study of film, television, and related media in the context of global culture. It stresses the importance of historical and cultural awareness for effective interpretation of visual, audiovisual and verbal texts. Students earning a degree in cinema and media studies may pursue work at the MA and PhD levels in allied curricula in the humanities and the arts. They may aim for a broad range of careers including advertising, education, entertainment law, information technology, media archiving, museum work or public relations. Cinema and media studies majors often seek positions related to

film, television and digital media production, marketing or distribution.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Cinema and Media Studies

Recommended Preparation

Suggested First-and Second-Year College Courses: Any course related to the area or discipline of major study.

Admission Requirements

One from CMS 270, CMS 271, CMS 272, CMS 273, CMS 274, or CMS 275; minimum 2.00 cumulative GPA; completion of one course fulfilling either College of Arts and Sciences English composition requirement or W (writing) requirement (5 credits).

Bachelor of Arts degree with a major in Cinema and Media Studies

Credential Overview

Cinema and media studies emphasizes the study of film, television, and related media in the context of global culture. It stresses the importance of historical and cultural awareness for effective interpretation of visual, audiovisual and verbal texts. Students earning a degree in cinema and media studies may pursue work at the MA and PhD levels in allied curricula in the humanities and the arts. They may aim for a broad range of careers including advertising, education, entertainment law, information technology, media archiving, museum work or public relations. Cinema and media studies majors often seek positions related to

film, television and digital media production, marketing or distribution.

Completion Requirements

60 credits

1. Core courses: CMS 301; CMS 480 (10 credits)
2. History courses: either CMS 310 or CMS 311; one of CMS 312, CMS 313, CMS 314, or CMS 315 (10 credits)
3. Critical concepts courses: one from CMS 302, CMS 303, or CMS 304; either CMS 320 or CMS 321 (10 credits)
4. Approved electives (30 credits). See adviser for approved list.
 - a. Minimum 20 credits from 300- and 400-level courses
 - b. Minimum 10 credits from CMS courses
 - c. May include additional history and critical concepts CMS courses
 - d. Maximum 5 credits of independent study (CMS 490) and maximum 5 credits of internship (CMS 491)
5. At least 35 credits applied toward the major completed in residence through the UW.
6. Minimum 2.00 cumulative GPA for courses applied to the major

Program of Study: Major: Comparative Literature

Program Overview

Comparative Literature, Cinema & Media trains students in the critical analysis of texts, seeking to understand how the rhetorical and aesthetic features of those texts—whether literary, visual, or theoretical—respond to and shape social values, attitudes, and beliefs. International in scope and interdisciplinary in orientation, our department programs emphasize

intellectual breadth and foster intellectual initiative by maximizing students' opportunities to design and focus on their own courses of study.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Comparative Literature
- Bachelor of Arts degree with a major in Comparative Literature: Cinema Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: Courses in foreign languages, classics, history, philosophy, literature, and writing.

Admission Requirements

One of C LIT 250, C LIT 251, or C LIT 252; minimum 2.00 cumulative GPA; completion of one course fulfilling either College of Arts and Sciences English composition requirement or W (writing) requirement (5 credits).

Bachelor of Arts degree with a major in Comparative Literature

Credential Overview

The Literature Option offers a degree track within the Comparative Literature major that allows a specialization in the study of literature. It explores the relationships among different cultures and between literature and other fields of knowledge, both visual and verbal, such as art history, philosophy, religion, and political thought.

Completion Requirements

50 credits

1. Core Courses: one of C LIT 250, C LIT 251, or C LIT 252; one of C LIT 320, C LIT 321, C LIT 322, C LIT 323; C LIT 400 (15 credits).
2. CMS course: one of CMS 310, CMS 311, CMS 312, CMS 313, CMS 320, CMS 321 (5 credits)
3. 300-400 level electives. See adviser for approved list. (15 credits)
4. Additional requirements specified below
5. Minimum 35 credits applied toward the major completed in residence through the UW
6. Minimum 2.00 cumulative GPA for courses applied to the major

Additional Completion Requirements

Option specific credits (15 credits)

1. One of C LIT 360, C LIT 361, or C LIT 362; one additional course from C LIT 320, C LIT 321, C LIT 322, C LIT 323, C LIT 360, C LIT 361, C LIT 362 (10 credits)
2. One from 300/400-level comparative literature courses. See adviser for approved list (5 credits)
3. One course must focus on literature written before 1800

Bachelor of Arts degree with a major in Comparative Literature: Cinema Studies

Credential Overview

The Cinema Studies Program offers a degree track within the Comparative Literature major that allows a specialization in the study of film. Cinema Studies allows students to develop their understanding of how films function as a distinctive mode of transmitting and critiquing cultural values and practices. The Comparative Literature, Cinema & Media Department also hosts an

array of Cinema Faculty from a number of backgrounds.

Completion Requirements

50 credits

1. Core Courses: one of C LIT 250, C LIT 251, or C LIT 252; one of C LIT 320, C LIT 321, C LIT 322, C LIT 323; C LIT 400 (15 credits).
2. CMS course: one of CMS 310, CMS 311, CMS 312, CMS 313, CMS 320, CMS 321 (5 credits)
3. 300-400 level electives. See adviser for approved list. (15 credits)
4. Additional requirements specified below
5. Minimum 35 credits applied toward the major completed in residence through the UW
6. Minimum 2.00 cumulative GPA for courses applied to the major

Additional Completion Requirements

Option specific credits (15 credits)

1. One from CMS 270, CMS 271, CMS 272 (5 credits)
2. One from CMS 310, CMS 311, CMS 312, or CMS 313; one from CMS 301, CMS 302, CMS 303, CMS 320, or CMS 321 (10 credits)
3. Maximum 5 credits of internship (CMS 491) may be applied toward the cinema studies option with approval of the faculty internship coordinator

Program of Study: Minor: Comparative Literature

Program Overview

Comparative Literature, Cinema & Media trains students in the critical analysis of

texts, seeking to understand how the rhetorical and aesthetic features of those texts— whether literary, visual, or theoretical—respond to and shape social values, attitudes, and beliefs. International in scope and interdisciplinary in orientation, our department programs emphasize intellectual breadth and foster intellectual initiative by maximizing students' opportunities to design and focus on their own courses of study.

This program of study leads to the following credential:

- Minor in Comparative Literature

Minor in Comparative Literature

Completion Requirements

30 credits

1. C LIT 250, C LIT 251, or C LIT 252 (5 credits)
2. C LIT 400 (5 credits)
3. Two differently numbered courses from C LIT 320, C LIT 321, C LIT 322, C LIT 323 (10 credits)
4. Remaining credits in upper-division literature courses offered through Comparative Literature, Cinema, and Media, and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures. See adviser for approved list.

Program of Study: Minor: Environmental Cultures and Values

Program Overview

The Environmental Cultures and Values minor introduces students to historical and contemporary understandings of the environment through literature, the arts, philosophy, history, anthropology, political science and cultural geography. Taking a broad view of the meaning of "environment" (humans, the non-human world, built and natural environments, and all interactions among them), this interdisciplinary program prepares students for further study of environmental cultures and values and related professional paths (e.g., environmental NGO's, arts organizations, government, natural history writing).

This program of study leads to the following credential:

- Minor in Environmental Cultures and Values

Minor in Environmental Cultures and Values

Completion Requirements

25 credits

1. CHID 450 or C LIT 450 (5 credits)
2. 20 credits with at least one course taken from each of the following (see department for approved list)
 - a. Area I: Environmental Values and Histories
 - b. Area II: Cultures, Communities, and the Environment
 - c. Area III: Ecocriticism and Ecoaesthetics

3. Minimum 15 upper division credits
4. Minimum 15 credits outside student's major
5. Minimum 15 credits taken through UW Seattle campus

Additional Information

Department Policy for Double Majors

Students receiving a BA in Cinema and Media Studies are ineligible to also receive the BA in Comparative Literature with Cinema Studies Option. Any other double major is acceptable, including Comparative Literature majors selecting the Literary Studies Option.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Cinema and media studies emphasizes the study of film, television, and related media in the context of global culture. It stresses the importance of historical and cultural awareness for effective interpretation of visual, audiovisual, and verbal texts. Students may pursue work at the MA and PhD levels in allied curricula in the humanities and the arts. They may aim for a broad range of careers including advertising, education, entertainment law, information technology, media archiving, museum work, or public relations. Or, they may seek positions related to film, television, and digital media production, marketing, or distribution. The study of comparative literature provides training in the analysis and critique of varied kinds of social texts and discourses. It stresses the centrality of historical and cross-cultural awareness for effective interpretation of both verbal and visual texts. Students earning the degree in comparative

literature may pursue advanced work at the MA and PhD. level in language and literature programs, or allied curricula in film studies, philosophy, intellectual history, and cultural studies. They may aim for degrees in education, specializing in language arts, foreign language teaching, or both. Comparative literature majors may also find jobs in fields where liberal arts skills, such as strong writing ability and fluency in foreign languages, are valued.

- *Honors Options Available:* Comparative Literature major only. With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). With Distinction (Departmental Honors, by invitation). See adviser for requirements.
- *Undergraduate Research, Internships, and Service Learning:* See adviser for internship information.
- *Department Scholarships:* None
- *Student Organizations/Associations:* UW Film Club; Lux Video Production Club.

gradcinema@uw.edu

Program of Study: Doctor of Philosophy (Cinema and Media Studies)

Program Overview

The five year Ph.D. program concentrates on scholarship and research as preparation for teaching at the university or college level in Cinema and Media Studies. In addition, Ph.D. students emerge with: 1) an

interdisciplinary understanding of the field from a humanistic perspective; 2) the ability to assess and implement diverse pedagogical techniques; 3) the ability to engage in primary research on a subject of their choosing; 4) a sense of the role of cinema and media in national identity, globalization, and other forms of transnationalism; 5) a familiarity with a range of historiographic practices in the field; 6) an awareness of the importance of media technologies as objects; 7) recognition of the crucial role of the aesthetic encounter 8) advanced reading knowledge in at least one language other than English. The faculty in the Department of Cinema and Media have particular strengths in world cinema; silent-era film; documentary cinema; Chinese cinemas; South Asian cinemas; media technologies; television studies; new media; and digital studies.

This program of study leads to the following credential:

- Doctor of Philosophy (Cinema and Media Studies)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Doctor of Philosophy (Cinema and Media Studies)

Completion Requirements

90 credits

1. *Cinema and Media Studies Course Requirements (30 credits):*
 - a. CMS 520
 - b. CMS 525
 - c. CMS 600 (10 credits)

- d. Core Seminars (15 credits): 500-level CMS coursework. Course list maintained by the program.
2. *Additional Coursework (25 credits)*: Graduate coursework at the UW. Course list maintained by the program.
3. *Dissertation (30 credits)*: CMS 800
4. *Language Requirement*: Advanced reading knowledge in one language other than English must be demonstrated before the end of the second year after entry into the program. Language competence is attested either by exams or by completion of satisfactory coursework in the language.

Program of Study: Graduate Certificate in Cinema and Media Studies

Program Overview

This graduate program emphasizes the study of film and related media from a humanistic perspective, within the broader context of global culture. While our curriculum centers on the medium of film, we understand the key concerns of film history and film theory as a productive horizon for assessing the phenomenal advances of digital and electronic media as well as a cinematic genealogy that stretches back to encompass the magic lantern, photography, sound recordings, and television among other technologically-produced art forms. At the core of our curricular goals, then, we emphasize the fundamental skills of cinema studies: an ability to interpret and clearly communicate the formal and stylistic elements of moving-image and audio-visual texts; a knowledgeable assessment of the canon of popular, art-cinema, and avant-garde cinemas, as well as animation and documentary forms; a capacity to engage the philosophical and social debates most

germane to film theory since the early 20th century. Our curriculum stresses a comparative framework. In particular, students will be encouraged to assess our objects of study as they cross national borders, historical periods, and media forms.

This program of study leads to the following credential:

- Graduate Certificate in Cinema and Media Studies

Admission Requirements

Please visit this [program's website](#) for current admission requirements.

Graduate Certificate in Cinema and Media Studies

Completion Requirements

20 credits

1. *Core course (5 credits)*: CMS 520
2. *Electives (15 credits)*: Course list maintained by the program.
3. *Capstone requirement*: Research paper or Qualifying Examination and Dissertation.

Program of Study: Master of Arts (Cinema and Media Studies)

Program Overview

The two year M.A. degree program prepares students for advanced work in Cinema and Media Studies, or for careers in teaching at the elementary, secondary, or junior college levels. In addition, M.A. students emerge with: 1) an interdisciplinary understanding of the field from a humanistic perspective;

2) awareness of the relationships between their scholarly practice and the communities in which we live; 3) basic reading knowledge in at least one language other than English; and 4) the ability to assess effective pedagogical techniques in the field. The faculty in the Department of Cinema and Media have particular strengths in world cinema; silent-era film; documentary cinema; Chinese cinemas; South Asian cinemas; media technologies; television studies; new media; and digital studies.

Program of Study: Major: Classical Studies

Program Overview

Classics concerns itself with the languages and cultures of the ancient Greeks and Romans, whose civilizations had a central role in shaping the basic conceptual categories of our present cultural, intellectual, professional, and civic lives.

Study of Ancient Greek and Latin and the cultures of ancient Greece and Rome fosters broad and deeply informed critical perspectives on the human experience and develops excellent analytical, problem-solving and communication skills.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Classical Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Classical Studies

Credential Overview

The Bachelor of Arts in Classical Studies is especially suited to students wishing to explore the literature, history, art, archaeology, and philosophy of ancient Greece and Rome primarily through English translations. Students with no previous exposure to ancient Greek or Latin can complete the Classical Studies major in two years.

Completion Requirements

61-67 credits

Especially suited for students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity, primarily through English translation.

1. Either Greek or Latin through 307, or the equivalent (25-30 credits)
2. 34 additional credits chosen with department approval from the following courses: Greek and Latin at the 400 level; classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list
3. CLAS 495 (2-3 credits)

Note: Competence to take 400-level courses which count toward the Latin, Greek, and classics majors generally requires four-to-six quarters (20-30 credits) of previous study.

Program of Study: Major: Classics

Program Overview

The BA in Classics allows students to develop advanced expertise in both ancient Greek and Latin to explore the cultural, social and artistic life of the ancient Greek and Roman world and its continuing relevance to contemporary life. Many students participate in the Department's study abroad programs in Rome or elsewhere.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Classics

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Classics

Credential Overview

Students who complete a B.A. in Classics develop advanced proficiency in Latin and ancient Greek and the literatures and cultures of ancient Greece and Rome. This degree provides excellent preparation for the study of the ancient world at the graduate level.

Completion Requirements

67-68 credits

1. 15 credits of 300-level classical Greek, excluding GREEK 300, GREEK 301
2. 15 credits of 300-level Latin, excluding LATIN 300, LATIN 301
3. Minimum 30 credits in 400-level GREEK and LATIN courses, with at least 10 credits in each language
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Program of Study: Major: Greek

Program Overview

Learning ancient Greek allows direct access to the thoughts and writings of the ancient Greeks and the dynamic world in which they lived and wrote. The study of ancient Greek fosters robust historical perspectives and develops strong analytical and communication skills that serve students well in a variety of careers. Many students participate in study abroad programs focused on the ancient world, including the department's programs in Rome.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Greek

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Greek

Credential Overview

The B.A. in Greek allows students to develop advanced expertise in the language, literature and culture of ancient Greece.

Completion Requirements

52-58 credits

1. Either GREEK 101, GREEK 102, GREEK 103; or GREEK 300, GREEK 301 (10-15 credits)
2. 15 credits of 300-level GREEK courses, excluding GREEK 300 and GREEK 301
3. 20 credits of 400-level GREEK courses
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Program of Study: Major: Latin

Program Overview

Learning Latin provides direct access to the thoughts and writings of the ancient Romans and the dynamic social, cultural and political world in which they lived and wrote. The study of Latin develops robust historical perspectives and strong analytical and communication skills that serve students well in a variety of careers. Many students participate in the Department's excellent study abroad program in Rome.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Latin

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation,

ancient history, classical art and archaeology, ancient philosophy.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Latin

Credential Overview

The B.A. in Latin allows students to develop advanced expertise in the Latin language and the literature and culture of ancient Rome.

Completion Requirements

52-58 credits

1. Either LATIN 101, LATIN 102, LATIN 103; or LATIN 300, LATIN 301 (10-15 credits)
2. 15 credits of 300-level LATIN courses, excluding LATIN 300 and LATIN 301
3. 20 credits of 400-level LATIN courses
4. 5 credits from approved classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. See adviser for approved list.
5. CLAS 495 (2-3 credits)

Program of Study: Minor: Classics

Program Overview

The Minor in Classical Studies allows students to explore the cultures, history, literatures and civilizations of Ancient Greece and Rome from a variety of perspectives while participating in the

Classics Department's vibrant and collegial intellectual community. Students minoring in Classical Studies have access to the Department's seminar room and are encouraged to participate in the Department's quarter-long program in Rome. The Department makes every effort to work with students who wish to complete a minor.

This program of study leads to the following credentials:

- Minor in Classical Studies
- Minor in Classics and Ancient History

Minor in Classical Studies

Credential Overview

The Minor in Classical Studies allows students to explore the cultures, history, literatures and civilizations of Ancient Greece and Rome from a variety of perspectives while participating in the Classics Department's vibrant and collegial intellectual community. Students minoring in Classical Studies have access to the Department's seminar room and are encouraged to participate in the Department's quarter-long program in Rome. The Department makes every effort to work with students who wish to complete a minor.

Completion Requirements

25 credits

1. 25 credits chosen with departmental approval from classics in English, classical art and archaeology, ancient history, history of ancient philosophy, and history of ancient science, or up to 15 credits of Latin or Greek. See

department website for list of approved courses.

2. Minimum 15 credits must be at the 300/400 level.

Minor in Classics and Ancient History

Credential Overview

The Minor in Classics and Ancient History allows students to combine coursework in History with courses in Classical Studies and Classical Archaeology to explore the history of Ancient Greece and Rome while participating in the Classics Department's vibrant and collegial intellectual community. Students minoring in Classics and Ancient History have access to the Department's seminar room and are encouraged to participate in the Department's quarter-long program in Rome. The Minor in Classics and Ancient History is not available to students pursuing majors or other minors in the Classics Department.

Completion Requirements

30 credits

1. 30 credits from the course list below, including at least 20 upper-division credits (15 of which must be taken at the UW). 100-level credit is not accepted. Minimum 10 credits from each department (Classics and History).
2. A minimum grade of 2.0 is required in each course.
3. Not available to students pursuing majors or other minors in classics.

Courses: CLAS 210, CLAS 320, CLAS 322, CLAS 324, CLAS 326, CLAS 328, CLAS 330, CLAS 424, CLAS 427, CLAS 428, CLAS 430, CLAS 432, CLAS 435, CLAS 445, CLAS 496 (except when topic is medieval); CL AR 340, CL AR 341, CL AR

342, CL AR 343, CL AR 442, CL AR 443, CL AR 444, CL AR 446, CL AR 447, CL AR 448; GREEK (all upper-division courses except GREEK 300 and GREEK 301); LATIN (all upper-division courses except LATIN 300, LATIN 301, LATIN 401, and LATIN 402); HSTAM 205, HSTAM 302, HSTAM 312, HSTAM 313, HSTAM 314, HSTAM 330, HSTAM 401, HSTAM 402, HSTAM 403; HIST 490 (when topic is ancient), HIST 498 (when topic is ancient).

Program of Study: Minor: Greek

Program Overview

The Minor in Greek allows students to gain an in-depth knowledge of Ancient Greek language, literature and civilization. Minors can take full advantage of the Classics Department's vibrant and collegial intellectual community and can, if they wish, participate in the Department's undergraduate seminar. Students minoring in Greek have access to the Department's seminar room and are encouraged to participate in the Department's quarter-long program in Rome. The Department makes every effort to work with students who wish to complete a minor.

This program of study leads to the following credential:

- Minor in Greek

Minor in Greek

Completion Requirements

Minimum 30 credits

25 credits in Greek and 5 credits chosen with departmental approval from classics in English, classical art and archaeology,

ancient history, history of ancient philosophy, and history of ancient science. Minimum 15 credits must be at the 300/400 level. See department for list of acceptable courses.

Program of Study: Minor: Latin

Program Overview

The Minor in Latin allows students to gain an in-depth knowledge of the Latin language, and ancient Roman literature and civilization. Minors can take full advantage of the Classics Department's vibrant and collegial intellectual community and can, if they wish, take the Department's undergraduate seminar. Students minoring in Latin have access to the Department's seminar room and are encouraged to participate in the Department's quarter-long program in Rome. The Department makes every effort to work with students who wish to complete a minor.

This program of study leads to the following credential:

- Minor in Latin

Minor in Latin

Completion Requirements

Minimum 30 credits

25 credits in Latin and 5 credits chosen with departmental approval from classics in English, classical art and archaeology, ancient history, history of ancient philosophy, and history of ancient science. Minimum 15 credits must be at the 300/400 level. See department for list of acceptable courses.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The undergraduate study of classics emphasizes critical analysis of language and culture and clear and effective writing. The BA with a major in classics is a respected terminal degree in itself. Like other degree programs in the humanities, it emphasizes the acquisition of those analytic and communications skills which are indispensable for careers in government, journalism, law, industry, medicine, and business. The classics major (especially in its more language-intensive forms) is often a mark of distinction when a graduate applies for admission to professional school.

Many who take the bachelor's degree in classics go on to pursue graduate work in the subject at leading PhD programs. Graduates include winners of prestigious national awards such as Mellon Fellowships for graduate study and the Rhodes Scholarship.

- *Instructional and Research Facilities:* The departmental office provides access to several computers for research and coursework. The Classics Department sponsors numerous lectures by distinguished speakers visiting from universities in this country and abroad; undergraduates are always welcome to attend.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* None offered.
- *Department Scholarships:*
 - *Jim Greenfield Undergraduate Scholarship* is intended for undergraduate majors in classics. The object of the Jim Greenfield scholarship is to enable exceptionally well-qualified students to devote the maximum time and energy to their study of the classics at the University of Washington. While the first criterion is academic promise, an applicant's current means of support is also taken into consideration; therefore, the amount of the award may vary from partial tuition to full tuition and some expenses. Successful candidates may reapply for the following year.
 - *Jim Greenfield Undergraduate Travel Bursaries:* Jim Greenfield Undergraduate Travel Bursaries may be used for the department's Rome program, for travel associated with participation in archaeological excavations, for independent travel to areas of classical interest, or for other kinds of study-related travel for which the applicant can make a cogent case. In some cases an award might allow a student to remain overseas for study travel in the wake of the department's Rome Program. Further information about applying for a Jim Greenfield Undergraduate Travel Bursary is available in the department office.
 - In addition to the above, undergraduates are eligible to apply or be nominated for:
 - *Classics Students Travel Fund:* provides financial support for students in the Classics Department who are intending to participate in the departmental Rome program or

- extramural programs, to attend conferences, or to travel to specific places in support of their studies.
- *Harvey Bruce Densmore Memorial Fund*: rewards distinguished undergraduate students of Greek.
- *Student Organizations/Associations*: None

Of Special Note:

- CLAS 101, CLAS 102, CLAS 205, and HIST 111 may not be taken in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.
- *Classical Seminar in Rome*: During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de Fiori.

206-543-2660

[Website](#)

[Faculty Website](#)

comadv@uw.edu

The Department of Communication advances the study and practice of communication across a range of contexts, including face-to-face interactions, public discourse, mass media, and digital media. Our research and teaching enhance critical awareness of communication's role in an increasingly global society.

Undergraduate Program

118 [Communications Building](#)

206-543-8860

comadv@uw.edu

Program of Study: Major: Communication

Program Overview

Undergraduate study in communication at the University of Washington has four foundations: communication literacy, communication inquiry, theory and concepts, and community engagement. We teach our students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. We work actively to enroll a diverse set of students in our courses and in the major: almost half of Communication majors are students of color, and students come from all over

Washington and even the world to study in this program.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Communication
- Bachelor of Arts degree with a major in Communication: Journalism and Public Interest Communication

Bachelor of Arts degree with a major in Communication

Credential Overview

The educational mission of undergraduate study in the Department of Communication is to prepare students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. We seek out and appeal to students from a variety of backgrounds and perspectives. We nurture socially responsible, literate citizens who can interpret and evaluate the images and messages they create and receive. We teach students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication at the University of Washington has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement. The department integrates these to create a curriculum that helps students become thoughtful, informed, and articulate citizens.

Recommended Preparation

Suggested First- or Second-Year College Courses: COM 200 and one additional COM 200-level course

Admission Requirements

1. Minimum 10 200-level COM credits, including minimum 2.5 grade in both COM 200 and one additional 200-level COM course.
2. Minimum 2.50 cumulative GPA in all COM coursework
3. Minimum 2.50 cumulative GPA for all college coursework, including transfer credits
4. Admission is capacity constrained, based on information in the application packet, cumulative GPA, and COM GPA. Completion of the above requirements does not guarantee admission.
5. Students are admitted quarterly: autumn, winter, and spring. Applications are due one week after the quarter begins, autumn, winter, and spring quarters. Applications and additional information are available on the department website. Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
6. Applications are available from the department website on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, and an essay explaining what led applicants to apply to the major.

Completion Requirements

50 credits

1. *Introductory Courses (10 credits):* COM 200 and one additional 200-level COM course.
2. *Methods in Inquiry (5 credits):* See department adviser or website for list of approved courses.

3. *Theory in Communication (5 credits):* See department adviser or website for list of approved courses.
4. *Electives (30 credits)* from the Department of Communication and from selected courses outside the department. See advising office or website for electives list.

Of the 50 required credits specified above, at least 25 must be Communication courses at the 300 level or above, and of those 25, at least 10 must be Communication courses at the 400 level (excluding COM 498/COM 499). In addition, of the 50 required credits specified above, only 10 credits may be from courses offered outside the Department of Communication, unless approved by a departmental adviser.

Bachelor of Arts degree with a major in Communication: Journalism and Public Interest Communication

Credential Overview

The Journalism Program is an undergraduate emphasis area within the Department of Communication. The mission of our program is to help students develop strong analytical and communication skills for careers in digital and traditional media. At the program's core is our commitment to educating journalism students about content creation, content curation and audience engagement for the many "platforms" now used to distribute news and information. We embrace a digital-first philosophy, even as we remain committed to teaching fundamental journalistic values and techniques, such as accurate information gathering, excellent writing, sound ethical decision-making and valuable public service. Our faculty seeks to instill in students the entrepreneurial spirit required to succeed in today's media environment.

Through courses such as News Lab, we offer immersion experiences that force our students to grapple with real-world challenges.

Admission Requirements

1. Minimum 2.5 grade in COM 200.
2. Minimum 2.50 cumulative GPA in all COM coursework
3. Minimum 2.50 cumulative GPA for all college coursework, including transfer credits
4. Admission is capacity constrained, based on information in the application packet, cumulative GPA, and COM GPA. Completion of the above requirements does not guarantee admission.
5. Students are admitted quarterly: autumn, winter, and spring. Applications are due one week after the quarter begins, autumn, winter, and spring quarters. Applications and additional information are available on the department website. Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
6. Applications are available from the department website on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, selection of the journalism and public interest communication option, an essay explaining what led applicants to apply to the major, and a writing sample. See department adviser or website for approved types of writing samples.

Completion Requirements

Minimum 55 credits

1. *Introductory Courses (10 credits)*: COM 200 and one additional 200-level COM course.
2. *Methods of Inquiry (5 credits)*: See department adviser or website for list of approved courses.
3. *Skills/Competencies Core (20 credits)*: COM 360, COM 361, COM 362, COM 364, and COM 457.
4. *Law and Ethics Core (10 credits)*: COM 440 and COM 468.
5. *Advanced Skills/Competencies (10 credits minimum)*: See department adviser or website for list of approved courses.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The Department of Communication prepares students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. The department seeks out and appeals to students from a variety of backgrounds and perspectives. It nurtures socially responsible, literate citizens who can interpret and evaluate images and messages they create and receive. It teaches students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement.
- *Instructional and Research Facilities*: The Department of Communication has the following laboratories: Media Lab. News Lab. Observation Labs. It also has

an Instructional Resources Center and video-editing facilities. Additionally the department manages the following centers: The Dart Center, the Center for Communication and Civic Engagement, and the Center for Communication, Difference, and Equity. See the department website for further information.

Graduate Programs

cmuadv@uw.edu

Program of Study: Doctor of Philosophy (Communication)

This program of study leads to the following credential:

- Doctor of Philosophy (Communication)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Communication)

Completion Requirements

102 total credits, at least 25 credits (not including COM 600 or 800) must be 500-level or above.

Prior master's degree (required to enter PhD program) will count for 30 credits, per Graduate School policy.

1. *Core Requirements (18 credits):* COM 500, COM 501, COM 594 (3 credits minimum), COM 591 (5 credits minimum) OR COM 592 (5 credits minimum)
2. *Methods Courses (14-15 credits):* Three courses, course list maintained internally by the program.
3. *Electives (as needed to reach 45 credits across Core, Methods, and Electives combined):* Any course numbered 400-level and above taken while in graduate student status at the UW.
4. *General examination:* COM 600 (exam prep) credits do not count toward the required credits (unless student is a UW Communication MA).
5. *Dissertation:* (minimum 27 credits in COM 800 over at least three quarters) and final examination.

Students who completed their MA in Communication at the UW do not repeat the core courses, and need only 30 post-master credits, which may include COM 600 credits, and 3 credits of COM 594 in three different topics. Such students take two methods courses beyond the minimum methods course requirements for the MA degree. COM 594 credits and additional methods courses beyond the minimum MA requirements taken during MA work may fulfill the COM 594 and methods

requirements for the doctoral program, but may not be applied to the 30 post-master credits.

Additional Information

Research Facilities: In addition to the University's research facilities available to all students, the department houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

Program of Study: Master of Arts (Communication)

Program Overview

Graduate study is guided by four related principles: intellectual and cultural pluralism, interdisciplinary theorizing, collaboration, and public scholarship. Coursework brings together humanistic and social scientific intellectual traditions through a unified core curriculum and a wide selection of graduate seminars. Research and teaching focus on six interrelated areas: communication and culture; communication technology and society; international communication; social interaction; political communication; and rhetoric and critical studies. The MA provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. The MA requires a minimum 45 credits of approved coursework and a research thesis.

This program of study leads to the following credential:

- Master of Arts (Communication)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Master of Arts (Communication)

Completion Requirements

Minimum 45 credits. At least 25 of these credits (not including COM 700) must be 500- or 600-level.

1. *Core Courses (10 credits):* (COM 500 and COM 501) during the first year of study.
2. *Methods Course (4-5 credits):* Course list maintained internally by the program.
3. *Electives (as needed to reach minimum total credit requirement):* Any course numbered 400-level and above taken while in graduate student status at the UW.
4. *Thesis:* (minimum 10 credits in COM 700) and oral defense.

Program of Study: Master of Communication

Program Overview

The department offers three MC degrees, each of which has specific requirements tailored to that degree. The general MC degree is targeted for mid-career communication professionals who seek to develop an understanding of communication theory related to a special area of interest. The MC in digital media is a professional degree focused on digital media content creation, management, and policy. Native Voices is an MC degree offered in conjunction with American Indian Studies, designed for documentary filmmakers who

focus their work on subjects relevant to the Native American community.

This program of study leads to the following credentials:

- Master of Communication (Communities and Networks) (fee-based)
- Master of Communication (Digital Media) (fee-based)
- Master of Communication (Native Voices)

Admission Requirements

Contact department for requirements.

Master of Communication (Communities and Networks) (fee-based)

Completion Requirements

45 credits

1. *Core Requirements (5 credits):* COMMLD 501 and COMMLD 502
2. *Research Methods Requirement (5 credits):* Course list maintained internally by the program.
3. *Law and Ethics Requirement (5 credits):* Course list maintained internally by the program.
4. *Electives (to meet required credit total):* Any COMMLD course within degree option (course list maintained internally by the program) at the 400- or 500- level taken while a graduate student at UW. 10 credits may be taken outside of degree option, including a maximum of 5 credits taken outside of the Communication Leadership program. Max 5 credits COMMLD/COM 600 may apply.

Master of Communication (Digital Media) (fee-based)

Completion Requirements

1. *Core Requirements (5 credits):* COMMLD 501 and COMMLD 502
2. *Research Methods Requirement (5 credits):* Course list maintained internally by the program.
3. *Law and Ethics Requirement (5 credits):* Course list maintained internally by the program.
4. *Electives (to meet required credit total):* Any COMMLD course within degree option (course list maintained internally by the program) at the 400- or 500- level taken while a graduate student at UW. 10 credits may be taken outside of degree option, including a maximum of 5 credits taken outside of the Communication Leadership program. Max 5 credits COMMLD/COM 600 may apply.

Master of Communication (Native Voices)

Completion Requirements

Minimum 45 credits

1. *20 credits in the Department of Communication:*
 - a. 10 credits of 500-level communication courses, typically two 500-level seminars.
 - b. COM 600: 10 credits in documentary research and production, taken for completion of the final project.
2. *25 credits in American Indian Studies/Native Voices:* GWSS 443, AIS 501, AIS 502, AIS 503, AIS 504

Additional Information

Research Facilities: In addition to the University's research facilities available to all students, the department houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

Comparative History of Ideas

B102 [Padelford Hall](#)

206-543-7333

[Website](#)

[Faculty Website](#)

chid@uw.edu

The Comparative History of Ideas (CHID) program fosters students' examination of ideas and their cultural, historical, and political contexts through experiential learning and self-reflection. The program encourages students to explore how their own subjective position relates to texts, cultures, societies, historical periods, and current global trends. The wide range of topics that CHID offers allows students to follow their curiosity and craft an individual course of study. Students are encouraged to engage thoughtfully in critical intellectual inquiry and reflection. CHID also emphasizes the significance of being actively engaged in the world; of understanding the forces that shape individual lives and identities; and of each person's role in transforming the world.

206-543-2097

chid@uw.edu

Program of Study: Major: Comparative History of Ideas

Program Overview

The Comparative History of Ideas Program (CHID) is a unique interdisciplinary undergraduate program emphasizing the examination of ideas and their cultural, historical, and political contexts through experiential learning and self-reflection. CHID offers students the creative freedom to follow their curiosity by tailoring their education to their own interests and professional goals, while providing and supporting direct contact with faculty, staff, and local and international organizations. CHID majors engage thoughtfully in intellectual inquiry and reflection, developing critical thinking skills and competencies in their chosen area of study.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Comparative History of Ideas

Recommended Preparation

Suggested First- and Second-Year College Courses: Introductory courses in history, philosophy, English, comparative literature, ethnic and gender studies, American Indian studies, and other areas of the humanities and social sciences.

Admission Requirements

Students in good academic standing may declare this major after meeting with an adviser.

Bachelor of Arts degree with a major in Comparative History of Ideas

Completion Requirements

60 credits

1. CHID 101 (2 credits)
2. Gateways to CHID (10 credits)
3. Cultural and historical engagements (5 to 10 credits). Students choose from three options: CHID study abroad program; local/global engagements; or encounters across cultures. Must be chosen with guidance of program adviser.
4. Ideas in the world (5 credits). Must be chosen with guidance of program adviser.
5. Power and difference (5 credits). Must be chosen with guidance of program adviser.
6. CHID 390 (5 credits)
7. Senior thesis/capstone project (CHID 491 and CHID 493) (10 credits)
8. Remaining 13-18 credits chosen from among approved electives (300 level or above).
9. At least half the credits presented for the major must be at the upper-division level.
10. Minimum 2.50 GPA in courses presented for the major.
11. Students may expand the senior project to 15 credits (CHID 492). The 5 optional senior project credits are in addition to the 60 credits required of all CHID majors.

Program of Study: Minor: Comparative History of Ideas

Program Overview

The undergraduate minor in the Comparative History of Ideas fosters students' examination of ideas and their cultural, historical, and political contexts through experiential learning and self-reflection. This flexible minor encourages students to follow their curiosity in an area of their own design, while developing critical thinking skills and competencies in their chosen area of study.

This program of study leads to the following credential:

- Minor in Comparative History of Ideas

Minor in Comparative History of Ideas

Completion Requirements

30-35 credits as follows:

1. Gateways to CHID (5 credits)
2. Cultural and historical engagements (5-10 credits). Students choose from three options: CHID study abroad program; local/global engagements; or encounters across cultures. Must be chosen with guidance of program adviser.
3. Ideas in the world (5 credits). Must be chosen with guidance of program adviser.
4. Power and difference (5 credits). Must be chosen with guidance of program adviser.
5. CHID 390 (5 credits)
6. One upper-division CHID course (5 credits)

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The program encourages students to adopt nuanced perspectives on their position relative to texts, cultures, societies, and historical periods. Program graduates have gone on to postgraduate studies in the humanities and social sciences, as well as professional training and careers in a wide variety of fields including law, administration and public policy, medicine, education, journalism, new media, and film.
- *Instructional and Research Facilities:* Computer workstations for students in B102 Padelford and in C101 Padelford.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* CHID undergraduates participate in a variety of educational experiences outside the classroom. Students interested in the opportunity to integrate theory with practice while making connections to organizations outside the University may sign up for CHID 399. Additionally many CHID study abroad programs incorporate an "engaged community learning" project, which provides an opportunity for students to apply their analytical skills and understanding of the historical and cultural context to a close participation in the work of local organizations. The diversity of these community efforts allows students to engage their particular interests through participation in social welfare organizations, grassroots

community groups, after-school programs, health clinics, theater and other performing arts groups, as well as video and other visual arts projects.

- *Department Scholarships:* See CHID website for information and deadlines
- *Of Special Note:* CHID also sponsors two undergraduate journals: *interSections*, which features senior theses, research papers, seminar papers, and essays addressing subjects within the arts, humanities, and social sciences; and *The Anthology Project*, which is dedicated to providing a forum where students can discuss and reflect on experiences abroad.

Computer Science

AC 101 [Paul G. Allen Center for Computer Science & Engineering](#)
206-543-1695
[Website](#)
[Faculty Website](#)

Computer Science & Engineering (CSE) educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. Our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more. Computer scientists and computer engineers combine creative

problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

101 [Paul G. Allen Center for Computer Science & Engineering](#)

206-543-1695

ugrad-advisor@cs.washington.edu

Program of Study: Major: Computer Science

Program Overview

CSE offers two undergraduate degrees: Computer Science (through the College of Arts and Sciences) and Computer Engineering (through the College of Engineering). Students working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. The Computer Science major may be more appropriate for students who are primarily interested in the design of software systems and applications, or who want to earn a double major with another College of Arts and Sciences program.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Computer Science
- Bachelor of Science degree with a major in Computer Science: Data Science

Admission Requirements

Applicants are considered in three groups - Entering Freshmen, Currently Enrolled UW Students, and Entering Transfers. Admission

is capacity constrained. Completion of minimum requirements does not guarantee admission.

1. *Entering Freshmen*: The largest pathway for admission to Computer Science is directly out of high school, prior to completion of university-level prerequisites. Freshman applicants listing Computer Science as their intended major are automatically considered. Competitive applicants have usually taken the equivalent of four years of high school mathematics and at least one year of high school laboratory science upon entering the University. Admission is for autumn only.
2. *Currently Enrolled UW Students*: A portion of each year's class is admitted after matriculating to UW. Admission is for autumn or spring quarter. Application deadlines: July 1 for autumn and January 15 for spring. To be considered, applicants must complete the following course requirements prior to the Allen School application deadline:
 - a. Minimum 30 graded college credits completed.
 - b. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CSE 123 or CSE 143; 5 credits from the list of approved natural science courses for Computer Science on the Allen School website; and at least five credits of English composition.
3. *Entering Transfers*: A portion of each year's class is admitted from students transferring from another college or university. Admission is for autumn or spring quarter only. Transfer applicants are considered based on their University transfer application and supplemental material provided to the Allen School. Application deadlines: April 5 for autumn quarter and January 15 for

spring quarter. Applicants interested in transferring from an institution that does not offer equivalent coursework should reach out to the Allen School advising team before applying. Applicants must identify Computer Science as their intended major, and indicate they will begin the major immediately upon transferring. Entering transfer applicants must meet the following requirements:

- Minimum 30 graded college credits completed by the University transfer application deadline.
- Minimum course requirements needed for the Allen School supplemental application: MATH 124, MATH 125, MATH 126; CSE 123 or CSE 143; 5 credits from the list of approved natural science courses for computer science on the Allen School website; and at least five credits of English composition. These courses must be completed by the Allen School supplemental application deadline.

Bachelor of Science degree with a major in Computer Science

Credential Overview

CSE offers two undergraduate degrees: Computer Science (through the College of Arts and Sciences) and Computer Engineering (through the College of Engineering). Students working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. The Computer Science major may be more appropriate for students who are primarily interested in the design of software systems and applications, or who want to earn a double major with another College of Arts and Sciences program.

Completion Requirements

77-81 Credits

- Science (5 credits)*: 5 credits from the list of approved natural science courses for Computer Science on the Allen School website.
- Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 208 (waived if MATH 136 taken)
- Fundamental Courses (24-25 credits)*: CSE 123 or CSE 143, CSE 311, CSE 312, CSE 331, CSE 332, CSE 351
- Core and Electives*: 33 additional 300-level and 400-level credits as follows:
 - Six courses from the CSE Core Courses list on the Allen School website of which at least four courses must be 400-level CSE courses.
 - Either one additional course from the CSE Core Courses list or one course from the CSE Capstone list on the Allen School website.
 - Additional courses from the CSE Electives list (which includes the CSE Core Courses list) on the Allen School website to bring the total for core and electives to 33 credits.
- Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.

Bachelor of Science degree with a major in Computer Science: Data Science

Credential Overview

Computer Science and Engineering (CSE) offers two undergraduate degrees: Computer

Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). Students working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. The Computer Science major may be more appropriate for students who are primarily interested in the design of software systems and applications, or who want to earn a double major with another College of Arts & Sciences program. Students in Computer Science may also decide to pursue a data science option.

Completion Requirements

77-81 Credits

1. *Science (5 credits)*: 5 credits from the list of approved natural science courses for Computer Science on the Allen School website.
2. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 208 (waived if MATH 136 taken)
3. *Fundamental Courses (24-25 credits)*: CSE 123 or CSE 143, CSE 311, CSE 312, CSE 331, CSE 332, CSE 351
4. *Core and Electives*: 33 additional 300-level and 400-level credits as follows:
 - a. Six courses from the CSE Core Courses list on the Allen School website of which at least four courses must be 400-level CSE courses.
 - b. Either one additional course from the CSE Core Courses list or one course from the CSE Capstone list on the Allen School website.
 - c. Additional courses from the CSE Electives list (which includes the CSE Core Courses list) on the Allen

School website to bring the total for core and electives to 33 credits.

5. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.

Additional Completion Requirements

Additional credits required for the Data Science Option increase total major requirements to 80-86 credits. Requirements #1 and #3 below also apply toward the *Core and Electives* major requirement #4 shown above.

1. CSE 421, CSE 442, CSE 444, CSE 446 (15 credits)
2. SOC 225 (3/5 credits)
3. One additional course from the data science elective list (see the Allen School website for list) (3-4 credits)

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship.
- *Instructional and Research Facilities*: Paul G. Allen Center for Computer Science and Engineering includes more

than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

The Allen School general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. The special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center and Gates Center are two of the finest computer science and computer engineering facilities in the nation. All Allen School students have access to these resources.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. Refer to department website for more information.
- *Departmental Scholarships:* The Allen School has a limited number of scholarships available to current Allen School majors. Refer to department website for more information.
- *Student Organizations/Associations:* A student chapter of the Association for

Computing Machinery (ACM) operates within the Allen School.

Program of Study: Major: Dance

Program Overview

The Dance Major is a liberal arts degree which takes a broad approach to studying dance as: a movement practice, a performance activity, a choreographic enterprise, a social practice, a cultural practice, a creative endeavor, a subject of scientific inquiry, a subject of historical inquiry, and an agent of sociopolitical change. The curriculum includes study in a variety of genres, including African and African-Diasporic dance, Western concert

dance, somatic practices, and social dance. Embodied learning is brought into dialogue with artistic, scientific, and humanistic modes of inquiry throughout the curriculum, which is designed for students with diverse backgrounds and interests. Students have opportunities to engage in academic or creative research, perform, choreograph, and contribute to community projects. Dance majors can elect to pursue an honors track.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Dance

Admission Requirements

Applicants who meet the following requirements are accepted during autumn, winter, and spring quarters on a rolling basis.

1. Minimum 2.00 cumulative GPA
2. Successful completion of 3 credits in any of the academic courses required for the major.
3. Successful completion of or registration in at least one dance technique course.

Bachelor of Arts degree with a major in Dance

Completion Requirements

Minimum 56 credits

1. *Core Courses (17 credits):* DANCE 150, DANCE 166, DANCE 242, DANCE 271 (1 credit), DANCE 493 (5 credits)
2. *Dance Studies Courses (6-10 credits):* Must include at least one diversity (DIV) course. See adviser for list of approved courses.

3. *Career Transition Course (3-5 credits):* DANCE 480 or DANCE 494
4. *Dance Electives (6-12 credits):* to reach minimum 38 credits in core, dance studies, dance electives, and career transition courses (or approved alternatives)
5. *Technique Courses:* Minimum 18 credits from list of approved courses, representing at least four different movement idioms.
6. Minimum 23 credits at the 300- or 400-level
7. Minimum 2.00 cumulative GPA for courses applied to the major

Program of Study: Minor: Dance

Program Overview

The Minor in Dance is open to all students who select from a wide range of practice-based and academic courses to investigate dance through a range of learning modalities. Practice-based courses include African and African-Diasporic dance, Western concert dance, somatic practices, and social dance. Students connect experiential learning to artistic, scientific, and humanistic modes of inquiry in a range of academic courses.

This program of study leads to the following credential:

- Minor in Dance

Minor in Dance

Completion Requirements

Minimum 25 credits

10 credits from Dance academic courses, and 15 credits from Dance technique courses. See adviser for approved lists.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Dance Program curriculum provides a balance between academic rigor and artistic development and serves as a basis for a broad range of career choices in dance related and other fields demanding strong communication skills, creativity, commitment, and the ability to work collaboratively and independently. Majors are encouraged to supplement their dance studies with coursework in other disciplines that provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.
- *Instructional and Research Facilities:* Three spacious and well-equipped dance studios in Meany Hall. A video and sound editing facility. Use of Meany Hall and the Meany Studio Theatre for Dance Program performances.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Dance Endorsement:* See department website.
- *Department Scholarships:* See adviser.
- *Research, Internships, and Service Learning:* See adviser.
- *Student Organizations/Associations:* Dance Student Association

Program of Study: Master of Fine Arts (Dance)

Program Overview

The program offers graduate study leading to an MFA that prepares dance artists (with a minimum eight years professional performance experience) for careers in higher education. The full two-year program begins mid June and includes summer quarter study. MFA candidates are supported in the development of a scholarly dimension to their creative work in dance, receive a tuition waiver, and earn a monthly stipend in exchange for working as a teaching assistant in the Dance Program. For more information visit: dance.washington.edu/graduate-programs

This program of study leads to the following credential:

- Master of Fine Arts (Dance)

Admission Requirements

Please see this program's [Graduate Admissions page](#) for requirements.

Master of Fine Arts (Dance)

Completion Requirements

71 credits

1. *Required Courses (44 credits):* DANCE 510 Chamber Dance Production (16 credits total), DANCE 515, DANCE 516, DANCE 519, DANCE 520,

DANCE 521, DANCE 530 (2 credits total), DANCE 531 (6 credits total), DANCE 590, DANCE 595

2. *Competency Courses (10 credits):*
DANCE 545, DANCE 493
3. *Elective Courses (to meet required total credits):* Any course numbered 400-level and above taken while in graduate student status at the UW. For exceptions, see the Graduate Program Coordinator.

Note: A student may request a competency waiver for 2 credits of DANCE 530, 3 credits of DANCE 531, and as many as 10 credits for DANCE 545 and 493. In these cases, elective courses will be taken to replace waived courses.

Program of Study: Minor: Digital Arts and Experimental Media

Program Overview

Open to all undergraduates, this non-competitive minor offers students the opportunity to be part of a new generation of hybrid artists, leveraging cross-disciplinary knowledge and learning cutting-edge digital arts skills. Some areas of research and professional opportunities within DXARTS include: digital video, experimental film, digital sound, computer music, 3D audio, robotics, wearable technology, digital fabrication, interactive media, virtual reality, algorithmic processes and programming. Students minoring in DXARTS have access to state-of-the-art facilities including professional video and sound production labs, 3D audio listening rooms, as well as a full-fledged fabrication lab equipped with 3D printers, laser cutter, CNC milling machines and many other tools. Students in DXARTS classes can also checkout professional audio and video equipment to work in their media projects.

Program of Study: Major: Drama

Program Overview

The Bachelor of Arts in Drama enhances and enriches the general bachelor's degree at the University of Washington with the specific study of the history, methods and applications in the dramatic arts. Students who graduate from the School of Drama with a bachelor's degree have evolved creative skills, are poised to become citizen leaders and possess a wide range of skills that are applicable to any career that requires collaborative skills, creative innovation, project realization, personnel organization and critical thinking. In addition, we have designed the major so that students can access the hundreds of diverse course offerings at the University of Washington. The Bachelor of Arts degree in Drama also allows students the opportunity to double major with another program at UW.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Drama
- Bachelor of Arts degree with a major in Drama: Design
- Bachelor of Arts degree with a major in Drama: Performance

Admission Requirements

DRAMA 201

No audition is required to enter the program.

Bachelor of Arts degree with a major in Drama

Credential Overview

With classes in theatre history, theory and criticism, performance, design, and production, we offer a range of educational opportunities that teach critical thinking, creativity, collaboration, entrepreneurship, and artistic excellence based on a thorough and rigorous study of theatre arts. Bachelor of Arts degree options include Drama, Drama Performance, and Drama Design.

Completion Requirements

60-68 credits, depending on credential/option

1. DRAMA 201, DRAMA 251, DRAMA 302, DRAMA 371, DRAMA 372, DRAMA 373 (30 credits)
2. DRAMA 290 (2 credits), DRAMA 291 (2 credits), DRAMA 292 (2 credits) (6 credits)
3. One choice/special studies course from DRAMA 365, DRAMA 416, DRAMA 494, or other adviser-approved course (5 credits)
4. Additional requirements specified below
5. Minimum 2.00 cumulative GPA in courses applied to the major

Additional Completion Requirements

19 credits

1. Two courses from DRAMA 215, DRAMA 221, DRAMA 222 (10 credits)
2. 9 elective credits from approved list of 300- and 400-level courses on the department website

Bachelor of Arts degree with a major in Drama: Design

Credential Overview

With classes in theatre history, theory and criticism, performance, design, and production, we offer a range of educational opportunities that teach critical thinking, creativity, collaboration, entrepreneurship, and artistic excellence based on a thorough and rigorous study of theatre arts. 1. Two courses from DRAMA 215, DRAMA 221, DRAMA 222 (10 credits)

2. DRAMA 466 (2 credits)
3. One course from DRAMA 351, DRAMA 352, DRAMA 353 (4 credits)
4. One course from DRAMA 451, DRAMA 452, DRAMA 453, DRAMA 454, DRAMA 455 (2 or 3 credits), DRAMA 456 (3 credits), DRAMA 457 (4 credits) (2-4 credits)
5. *Electives*: See department website for approved list of 300- and 400-level courses (4-5 credits)

Program of Study: Minor: Drama

Program Overview

A minor in Drama offers students a foundation in one of the following areas: performance studies, acting, or design. Students pursuing one of the Drama minors have an opportunity to experience a guided education on the art, design, and history of theatre.

This program of study leads to the following credentials:

- Minor in Design for Performance
- Minor in Drama (Acting)
- Minor in Drama (Theatre Studies)

Minor in Design for Performance

Credential Overview

Students who earn a Minor in Design for Performance will begin to develop the skills to work in the areas of costume design, set design, lighting design or sound design, as well as learning about being citizen leaders and developing skills that are applicable to any career that requires collaboration, creative innovation, project realization, personnel organization and critical thinking.

Completion Requirements

25 credits

1. DRAMA 221, DRAMA 222, DRAMA 290 (2 credits) (12 credits)
2. 13 credits from the following: DRAMA 316, DRAMA 317, DRAMA 319, DRAMA 391, DRAMA 414, DRAMA 415, DRAMA 416, DRAMA 417, DRAMA 418, DRAMA 419, DRAMA 420, DRAMA 421, DRAMA 491, or DRAMA 498
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Minor in Drama (Acting)

Credential Overview

Students who earn a Minor in Acting hone acting techniques and creativity, learn about being citizen leaders and develop skills that are applicable to any career that requires collaboration, creative innovation, project realization, personnel organization and critical thinking.

Completion Requirements

25 credits

1. DRAMA 251, DRAMA 252 (10 credits)
2. 15 credits from the following: DRAMA 351, DRAMA 352, DRAMA 353, DRAMA 451, DRAMA 452, DRAMA 453, DRAMA 454, DRAMA 455, DRAMA 456, DRAMA 457, DRAMA 460, DRAMA 461, DRAMA 490, DRAMA 498
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Minor in Drama (Theatre Studies)

Credential Overview

Students who earn a Minor in Theatre Studies will become familiar with theatre history and theories, as well as learning about being citizen leaders and developing skills that are applicable to any career that requires collaboration, creative innovation, project realization, personnel organization and critical thinking.

Completion Requirements

25 credits

1. DRAMA 201 (5 credits)
2. 20 credits from the following: DRAMA 302, DRAMA 303, DRAMA 365, DRAMA 371, DRAMA 372, DRAMA 373, DRAMA 416, DRAMA 494, DRAMA 499
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The faculty of the School of Drama considers the optimum preparation for the theatre artist to be comprised of a liberal arts undergraduate major in drama and a graduate conservatory education. Learning objectives include enriched artistic expression, a foundation for further study, and cultivation of essential life skills: teamwork, communication, critical thinking, and imagination. Students earning the Bachelor of Arts in drama are prepared to seek employment in the theatre industry, apply for advanced degrees in a specific area of

theatre (e.g., MFA in acting or design), or transfer the skills gained through the program to broader career opportunities. Recent graduates have pursued careers in acting, design, directing, technical direction, stage management, dramaturgy, playwriting, literary management, teaching, and in such non-theatre occupations as real estate agent, fund-raiser, public relations staff, politician, librarian, academic counselor, lawyer, nurse, translator of foreign films, admissions counselor, trade show/convention production assistant, talent agent, casting director, music promoter, special events coordinator, tour guide, human resources coordinator, wedding coordinator, aerobics instructor, music promoter.

- *Instructional and Research Facilities:* Rehearsal and performance spaces include the Glenn Hughes Penthouse Theatre (the first theatre-in-the-round built in the United States), the thrust-stage Floyd and Delores Jones Playhouse, the end-stage Meany Studio Theatre, and occasionally the proscenium in Meany Hall. Other spaces include the Cabaret Theatre and Hutchinson 218. School of Drama facilities include a design studio, costume shop, scene shop, and computer labs.

The Drama Library houses reserve books, plays, sound effects, dialect tapes, local audition and job notices, and a special collection of acting editions. Also available are specialized indexes and theatre databases. The librarian assists in the use of reference materials and indexes, bibliographic searches of on-line databases, and offers reference service and bibliographic instruction sessions for groups and individuals.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Student participation in all aspects of dramatic art is provided through student productions, and faculty- and student-directed plays drawn from the full range of world dramatic literature and produced throughout the year.

To enhance employability and gain hands-on experience, students are encouraged to participate in internships with regional theatres, and related organizations or businesses. Academic credit may be earned for internships under the course number DRAMA 493. Internship credits count toward drama elective credits to graduate. A resource guide to drama-related internships is available at the drama undergraduate advising website.

Drama students are also encouraged to apply for undergraduate research, leadership, and/or fellowship grants available through the Mary Gates Endowment.

- *Department Scholarships:* School of Drama scholarships are awarded annually every spring for the following academic year to students who have demonstrated academic and/or artistic merit and contributed significantly to the School of Drama. Applications are distributed from the advising office.
- *Student Organizations/Associations:* There are a number of theatre-related RSOs including The Undergraduate Theater Society (UTS), Stage Notes,

Chinese Theatre Club, Acting with Kindness, and others. The School of Drama recognizes such RSOs as a valuable resource for students interested in Drama and is supportive of them. Many of these RSOs have produced undergraduate theatre work in the Cabaret black-box performance space in Hutchinson Hall. Any UW student may audition for School and/or RSO productions.

A volunteer elected group of drama students, the BA Council, meets with the School of Drama Executive Director, Undergraduate Advisor and Undergraduate Coordinator to discuss issues relative to the undergraduate program.

Program of Study: Major: Economics

Program Overview

Economics studies the institutions and arrangements that are used to create, protect, and allocate scarce resources that have alternative uses. It advances our understanding of the behavior of individuals, firms, governments and other organizations. Economics' deep intellectual roots, rigorous analytic methods, and powerful ability to explain and evaluate social phenomena make it an exceptionally rewarding field of study.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Economics
- Bachelor of Science degree with a major in Economics

Bachelor of Arts degree with a major in Economics

Credential Overview

The Bachelor of Arts is for students who are intrigued by economic problems and questions and are attracted to economists' challenging and analytical approach to explaining social phenomena. The BA provides an excellent preparation for employment in the private and public sectors, and for graduate study in a variety of fields, such as law and business.

Recommended Preparation

Suggested First- and Second-Year College Courses: ECON 200, ECON 201; STAT 311; MATH 124. Courses that develop strong analytical and quantitative-reasoning skills.

Admission Requirements

1. Minimum 45 quarter credits, including ECON 200, ECON 201; STAT 311; one of the following: MATH 124, MATH 134, or MATH 145; and 5 credits of English composition
2. Minimum 2.50 cumulative GPA for all prior college work; minimum 2.50 GPA for all UW coursework, when applicable.
3. Minimum 2.50 cumulative GPA for the following four courses: ECON 200, ECON 201; STAT 311; one of the following: MATH 124, MATH 134, or MATH 145, with a minimum 2.0 grade for each of these courses and for English composition.
4. A one-page personal statement, typed and double-spaced, responding to the following questions: What are your personal/educational goals, and how do you expect those to be met through an

economics major? What background do you bring to the program? Describe any special experiences that would contribute to your studies in the field.

5. Completion of reading comprehension, critical thinking, and writing assessment essay. See department website for details.
6. Quarterly admission (autumn, winter, spring); refer to department website for details. Admission is capacity-constrained. Meeting above criteria does not guarantee admission to the major.

Completion Requirements

60 credits

1. Admission to the major
2. STAT 311 (or equivalent) and MATH 124 (or equivalent)
3. ECON 200 and ECON 201; minimum 2.0 grade
4. ECON 300 and ECON 301; minimum 2.0 grade
5. ECON 382
6. Five ECON courses (25 credits) at the 400 level (not including ECON 496, ECON 497, ECON 499)
7. Minimum 50 credits in ECON-prefix courses; minimum 2.00 GPA for these 50 credits
8. ECON 300, ECON 301, and ECON 382 taken in residence as a matriculated student through the UW, Seattle
9. Maximum 10 credits at the 400 level taken out of residence at the UW

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the

departmental adviser or refer to the department website.

Bachelor of Science degree with a major in Economics

Credential Overview

The Bachelor of Science requires a more intensive background in math and statistics, reflecting the distinctive quantitative character of modern economics. It is especially suitable for students intending to go on to graduate study in economics and related fields such as finance.

Recommended Preparation

Suggested First- and Second-Year College Courses: ECON 200, ECON 201, and MATH 120, MATH 124 and STAT 311. Additional calculus preparation during the first year is strongly recommended as MATH 125 and MATH 126 are required for admission. Courses that develop strong analytical and quantitative-reasoning skills.

Admission Requirements

1. Minimum 45 quarter credits completed, including ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; MATH 124, MATH 125, and MATH 126 (or MATH 134, MATH 135, MATH 136); and 5 credits of English composition
2. Minimum 2.50 cumulative GPA for all prior college work; minimum 2.50 GPA for all UW coursework, when applicable.
3. Minimum 2.50 cumulative GPA for four of the seven courses required for entrance - ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; calculus at the level of MATH 124, or first calculus course taken, with a

minimum 2.0 grade for each of the seven courses required for entrance.

4. A one-page personal statement, typed and double-spaced, responding to the following questions: What are your personal/educational goals, and how do you expect those to be met through an economics major? What background do you bring to the program? Describe any special experience that would contribute to your studies in the field.
5. Completion of reading comprehension, critical thinking, and writing assessment essay (RTW). See department website for details.
6. Quarterly admission (autumn, winter, spring); refer to department website for details. Admission is capacity-constrained. Meeting the above criteria does not guarantee admission to the major.

Completion Requirements

70 credits

1. Admission to the major
2. STAT 311 (or equivalent) and MATH 124, MATH 125, MATH 126 (or equivalent) (20 credits)
3. ECON 200 and ECON 201, minimum 2.0 grade (10 credits)
4. ECON 300 and ECON 301, minimum 2.0 grade. Must be taken in residence as a matriculated student at the UW, Seattle (10 credits).
5. Six ECON courses (30 credits) at the 400 level (not including ECON 496, ECON 497, ECON 499). Of these, minimum 15 credits of the following theory and methods courses: ECON 400 or ECON 401, ECON 404, ECON 405, ECON 424, ECON 482, ECON 483, ECON 484, ECON 485, ECON 486, ECON 487, ECON 488. Of these, 5 credits chosen from either ECON 400 or

ECON 401; and another 5 credits from either ECON 424, or ECON 482, or ECON 483; 15 additional credits at the 400 level.

6. Minimum 50 credits in ECON-prefix courses; minimum 2.00 cumulative GPA in these 50 credits
7. Minimum 20 credits at the 400 level taken in residence at the UW, Seattle

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* For undergraduates, the role of the Department of Economics is to train students in a rigorous, analytical discipline that advances their problem-solving abilities and their understanding of important public issues. The Bachelor of Arts program provides the flexibility and social science training to prepare students for employment in a variety of areas. Also, it is excellent preparation for many master's-level graduate programs in other disciplines and for professional schools such as law, business, and medicine. The Bachelor of Science program is designed to provide undergraduates a rigorous background in economic analysis. This degree is designed for students who plan to do graduate study in economics or who plan to enter certain technically oriented professions, such as actuarial science,

demography, financial analysis, or environmental consulting.

- *Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors. See website for details.
- *Internships, Research, and Service Learning:* Course credit available for internships and research. For more information, please refer to the department website.
- *Department Scholarships:* Scholarship opportunities are available for application during spring quarter. Contact departmental advisers for details. Note: Students must have filed a FAFSA with the University of Washington's Financial Aid Office to be eligible.
- *Study Abroad Opportunities:* The department offers a variety of exchange programs. For more information, please refer to the department website.
- *Student Organizations/Associations:* The Economics Undergraduate Board (EUB) serves as a liaison between economics students, faculty, and alumni, and also provides services to the general economics undergraduate student body. The EUB provides free tutoring for ECON 200, ECON 201, ECON 300, and ECON 301; holds career seminars and faculty lectures; and publishes the quarterly newsletter, "The Economizer." For more information on these services, as well as others provided by the EUB, please refer to the department website.

Of Special Note:

- Courses accepted in transfer as ECON 1XX or ECON 2XX cannot be applied to major requirements unless courses equivalent to ECON 200 and ECON 201

were required as prerequisites. ECON X courses not having these prerequisites may be applied to electives for the degree, but not to the 50-credit economics-course requirement.

- Internship and independent study economics credits do not count toward the required economics credits for the BA or BS degree.

Program of Study: Doctor of Philosophy (Economics)

Program Overview

The program is designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department's graduate program.

This program of study leads to the following credential:

- Doctor of Philosophy (Economics)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Economics)

Completion Requirements

90 total credits

1. *Required Courses (36 credits):* ECON 500, ECON 501, ECON 502, ECON 503, ECON 508, ECON 509, ECON 580, ECON 581, ECON 582 (An average grade of at least 3.0 is required for the ECON 580 - 582 sequence.)
2. *Elective Courses (24 credits):* Approved courses ECON 511 - 595 (Minimum of 8 courses that satisfy at least two fields of specialization (Exceptions ECON 580-582 and ECON 537-538). NOTE: A grade of at least 3.0 is required in each course.
3. *Dissertation (27 credits):* ECON 800 Doctoral Dissertation
4. *Additional (3+ credits):* Additional approved credits ECON 500-level or above (including ECON 600 and ECON 800) to meet required credit total.
5. *Core exams:* Students are required to take core exams in micro- and macroeconomics before the beginning of their 2nd year in the program. Students who do not pass one or both exams must retake it in the spring of their 2nd year. One retake is allowed per exam. Registration with ECON 800 begins upon formation of the doctoral supervisory committee. Courses must be taken over at least three quarters.

Additional Information

- *Financial Aid:* The principal form is a teaching assistantship. Assistantships are available to entering graduate students with promising academic records. A small number of fellowships are also available.
- *Research and Computing Resources:* The department houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted

to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

Program of Study: Master of Arts (Economics)

Program Overview

This degree program is only available to students already in the Doctor of Philosophy (Economics) program.

This program of study leads to the following credential:

- Master of Arts (Economics)

Admission Requirements

Admission to this program is not available; this degree can only be earned by students in the Doctor of Philosophy (Economics) program.

Master of Arts (Economics)

Completion Requirements

60 credits total

1. *Required Courses (36 credits):* ECON 500, ECON 501, ECON 502, ECON 503, ECON 508, ECON 509, ECON 580, ECON 581, ECON 582
2. *Elective Courses (24 credits):*
 - a. *Students Completing Final MA:*
 - i. ECON 601 (3 credits), Up to two approved courses 500 level and above taken from other departments.

- ii. Approved ECON 500 level and above within a field of specialization to meet Elective Totals
- b. *Students Continuing to PhD:*
 - i. Up to two approved courses 500 level and above taken from other departments.
 - ii. Approved ECON 500 level and above within a field of specialization to meet Elective Totals
 - iii. Satisfy two fields of Specialization.

[Faculty Website](#)

English is at the heart of the liberal arts. One of the largest departments in the UW College of Arts and Sciences, the Department of English makes major contributions to the intellectual vitality, academic excellence, and educational mission of the University. The many interests and instructional programs of the Department - including literature, rhetoric, culture, theory, criticism, history, pedagogy, and creative writing - are linked by the study of this common language.

Undergraduate Programs

A2B [Padelford Hall](#)

engladv@uw.edu

Program of Study: Major: English

Program Overview

The undergraduate English major at the University of Washington offers students a broadly based, historically grounded introduction to the literatures of Britain, the United States, and, increasingly, Anglophone literature from around the world. Courses in literature emphasize techniques of literary analysis, theoretical problems posed by the interpretation of texts, the social, historical, and political context of literary production and reception, and the pleasures of reading. Most require significant written work and stress the development of critical thinking skills. Courses in language study examine the structural, historical, social, and aesthetic dimensions of English. Our Creative Writing Program offers a range of workshops in verse, short story, novel, and creative non-fiction or expository writing.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in English
- Bachelor of Arts degree with a major in English: Creative Writing

Bachelor of Arts degree with a major in English

Credential Overview

The English major provides a rigorous course of study in the language, literature, and culture of the English speaking world. The major is structured around three key principles: historical depth, power and difference, and a reflexive awareness of

genre, method, and language. These three overlapping areas of study help students see how language, literature, and culture are always intertwined with the movement of history, bound up with questions of power and difference, and shaped by form, genre, and grammar. By giving students the tools to think critically and reflectively about these concepts, the major prepares them to be engaged readers, writers, and thinkers throughout their lives.

Recommended Preparation

Suggested First- and Second-Year College Courses: Foreign languages, classics, English history, American history, and philosophy.

Admission Requirements

1. Minimum cumulative 2.00 GPA
2. Minimum cumulative 2.50 English GPA
3. Enrolled students may declare the English major in the Humanities Advising Center, A2B Padelford, during the first two weeks of autumn, winter, spring, and summer quarters.

Completion Requirements

60 credits

1. Minimum 2.0 grade in ENGL 202, taken within one quarter of admission to the major.
2. Minimum 2.0 grade in ENGL 302, taken within two quarters of admission to the major.
3. *Historical Depth Courses (15 credits):* Focused on pre-1945 materials, of which at least 5 credits must focus on pre-1700 materials. Refer to department website for list of approved courses.

4. *Power & Difference Courses (15 credits)*: Refer to department website for list of approved courses.
5. *Genre, Method, and Language Courses (15 credits)*: Refer to department website for list of approved courses.
6. *Capstone (5 credits)*: Minimum 2.0 grade in approved 400-level senior capstone English course. Refer to department website for list of approved senior capstone courses.
7. Maximum 20 credits of 200-level courses and maximum 5 credits of creative writing may apply towards the major.
8. Minimum 30 credits of English at the 200-level or above must be completed in residence through the UW.

Bachelor of Arts degree with a major in English: Creative Writing

Credential Overview

The Creative Writing Option prepares students not only to be more effective communicators and artists, but also creative problem solvers and more nuanced critical thinkers. By situating small, student-oriented writing workshops alongside literary models, Creative Writing classes enhance the broader study of literature and critical theory, helping students gain a greater understanding of the social and cultural forces informing their work. A student completing the program is more able to situate themselves in a larger context and make more meaningful, informed decisions about their own artistic practice. In addition, through the intense practice of creative writing students are able to see the world more clearly, in a more nuanced and meaningful manner, and apply these skills to a wide variety of work and life situations.

Admission Requirements

1. Admission to the English major
2. Minimum cumulative 2.00 GPA
3. Minimum cumulative 2.50 English GPA
4. Minimum 2.0 grade in ENGL 202.
5. ENGL 283 and ENGL 284 or transfer equivalents
6. Submission of an unofficial transcript and a writing sample of 3-5 poems and 5-10 pages of fiction (preferably a complete story)
7. Students interested in the creative writing option should apply to the Creative Writing Office, B-25 Padelford, during the first three weeks of autumn, winter, and spring quarters.
8. Admission is capacity constrained. Completion of the above requirements does not guarantee admission.

Completion Requirements

Minimum 65 credits

1. Minimum 2.0 grade in ENGL 202, taken within one quarter of admission to the major.
2. ENGL 283 and ENGL 284
3. *Historical Depth Courses (15 credits)*: Focused on pre-1945 materials, of which at least 5 credits must focus on pre-1700 materials. Refer to department website for list of approved courses.
4. *Power & Difference Courses (15 credits)*: Refer to department website for list approved courses.
5. ENGL 383 and ENGL 384
6. Approved 400-level creative writing courses (10 credits)
7. Maximum 20 credits of 200-level courses may apply towards the major.
8. Minimum 30 credits of English at the 200-level or above must be completed in residence through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Program of Study: Minor: English

Program Overview

With an English minor, students will: Develop familiarity with and deeper appreciation for English-language literary and cultural texts. Gain an understanding of how literary texts and language shape/are shaped by culture and history. Strengthen critical reading skills by learning techniques for parsing, analyzing, and contextualizing a variety of texts and genres. Improve writing, research, and communication skills through explicit attention to constructing arguments, using evidence, crafting prose, and structuring discourse for a variety of audiences, genres, and contexts. Acquire introductory awareness of the variety of methodologies and theories employed by scholars of literature, language, and culture to interpret texts (and their effects).

This program of study leads to the following credentials:

- Minor in English
- Minor in English: Writing

Minor in English

Credential Overview

The English minor encourages students to develop familiarity with and deeper

appreciation for English-language literary and cultural texts, and gain an understanding of how literature and language shape, and are shaped by, culture and history. It also strengthens critical reading skills by learning techniques for parsing, analyzing, and contextualizing a variety of texts and genres, and improve writing, research, and communication skills through explicit attention to constructing arguments, using evidence, crafting prose, and structuring discourse for a variety of audiences, genres, and contexts. Students acquire introductory awareness of the variety of methodologies and theories employed by scholars of literature, language, and culture to interpret texts and their effects.

Completion Requirements

30 credits

1. 30 credits of English courses, of which 20 credits must be upper-division
2. Minimum 2.00 cumulative GPA in courses applied toward the minor
3. Minimum 20 credits must be completed in residence through the UW

Minor in English: Writing

Credential Overview

The Writing Minor is designed to provide students with concentrated study of and practice in writing, language, and rhetoric. The minor is most appropriate for students entering writing-intensive careers such as journalism, business, marketing, law, publishing, editing, education, and public relations, or for students interested in enhancing their writing, analytic, and communication skills.

Completion Requirements

25 credits

1. 25 credits, of which 15 must be upper-division, with a minimum 2.00 cumulative GPA in courses applied toward the minor.
2. 15 credits from approved list of courses in academic, professional, and creative writing. 10 credits from approved list of courses in theory, history, and design. See adviser or department website for approved lists. No more than 5 credits from creative writing or courses outside the English Department.
3. Minimum 15 credits must be completed in residence through the UW.

Additional Information

Student *Outcomes and Opportunities*

- *Learning Objectives and Expected Outcomes:* Good writing, analytical ability, research skills, and broadened perspectives are among the practical accomplishments majors acquire, all of which can be applied to a range of careers, including, but not limited to advertising, business and marketing, law, library science, the media, public administration, publishing, the social services, and teaching.

The undergraduate program of study in English concentrates on developing students' critical and interpretive abilities with regard to literatures written in English. Students become familiar with the critical developments in the study of language and literary forms, including especially understanding the cultural and historical contexts of various forms of literature. Students are, accordingly, asked to cultivate a habit of self-

conscious and careful reading of written texts. Honing a successful habit of reading depends on acquiring an early awareness of the broad range of critical and interpretive methods available to readers of literature, as well as comprehending the basic purpose and effects at stake in different reading methods. Finally, students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities or nuances of language, literature, and culture.

- *Instructional and Research Facilities:* Computer laboratories in Mary Gates Hall for computer-integrated sections.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The English internship program maintains an active list of over 200 local employers, including publishers, arts organizations, the media, advertising agencies, social service groups, schools, and businesses. Credit is available to declared English majors (ENGL 491).
- *Department Scholarships:*
 - English Department scholarships are available to declared English majors enrolled at the UW for at least two quarters with a 3.50 UW GPA and a 3.70 UW English GPA. Scholarship recipients must enroll for at least two quarters and carry at least 6 credits each quarter during the term of the scholarship. Applications, due in early March, are available in A11 and A2B Padelford.

- Additional scholarships and prizes in creative writing are open to UW English majors only. Applications, due in early March, are available in B25 and A2B Padelford.
- *Student Organizations/Associations:* *Bricolage* is a student literary arts annual published entirely by UW undergraduates and features the works of University students, faculty, staff, and alumni. Students from all majors welcome. See department website for details.

Of Special Note::

- Students considering teaching English at the secondary level should consult an English adviser regarding coursework for the English Language Arts endorsement required for entry into the Secondary Teacher Education Program (TEP).
- The Department of English offers study abroad opportunities in London and Rome. Students from all majors welcome. See department website for more information.

French and Italian Studies

C254 [Padelford Hall](#)

206-616-3486

[Website](#)

[Faculty Website](#)

frenital@uw.edu

We strive to prepare our students to become leaders in an increasingly diverse society by providing them with French and Italian cultural literacy in dialogue with global contexts, and professionally relevant linguistic, research, interpretive, and expressive skills and tools. Students learn to understand their multilingual, multicultural world in historical perspective, to convincingly convey this understanding to others in both English and one or both of our target languages, and to articulate and implement the career transferability of their skills. The study of French and Italian language and culture is more important than ever in our increasingly interconnected world. France and Italy are core members of the European Union and important players in the global economy and their cultures are among the world's richest and most influential. French and Italian are among the five most popular languages studied at American universities, ranking second and fifth respectively.

Program of Study: Major: French

Program Overview

French Studies allows you to develop advanced French language skills and cultural fluency. French is a key language of government and non-governmental organizations, business, and the arts and an official language of countries in Africa, Europe, the Americas, and Southeast Asia. You will refine your skills in French while pursuing topics ranging from the development of the French language to contemporary debates on immigration. As you engage with cultural forms (art, literature, cinema, environment, sport) through a variety of lenses (language, gender, race, religion), you will develop robust analytical and rhetorical skills to accompany advanced proficiency in the language.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in French

Recommended Preparation

Suggested First- and Second-Year College Courses: Transfer students should take as many lower-division French language courses as possible before transferring to the UW.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in French

Credential Overview

French Studies allows you to develop advanced French language skills and cultural fluency. French is a key language of government and non-governmental organizations, business, and the arts and an official language of countries in Africa, Europe, the Americas, and Southeast Asia. You will refine your skills in French while pursuing topics ranging from the literature of the European Middle Ages to contemporary popular culture. As you engage with cultural forms (art, literature, cinema, environment, sport) through a variety of lenses (language, gender, race, religion), you will develop robust analytical and rhetorical skills.

Completion Requirements

50 credits

1. Core: FRENCH 301, FRENCH 302, FRENCH 303; one course at the FRENCH 370-level (20 credits)
2. Advanced: 10 credits at the 400-level. Transfer credits at the 400-level accepted only by petition.
3. Electives: 20 credits above FRENCH 203 from an approved list. See adviser for approved list
4. Minimum 2.00 cumulative GPA for courses applied to the major
5. Maximum 15 credits of approved study-abroad coursework may be petitioned to apply to the major

Program of Study: Major: Italian

Program Overview

Italian Studies allows you to develop advanced Italian language skills and cultural fluency. Italy, the birthplace of the Renaissance, remains central in the realms of art, design, food, and manufacturing. In the major, you will refine your skills in Italian while pursuing topics ranging from Dante to contemporary popular culture. As you engage with cultural forms (art, literature, cinema, language and identity, fashion, immigration, religion), you will develop robust analytical, rhetorical, and methodological skills.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Italian

Recommended Preparation

Suggested First- and Second-Year College Courses: Community college students should take as many lower-division language courses as possible before transferring to the UW.

Admission Requirements

Students in good academic standing may declare this major at any time.

Core courses that pursue topics ranging from Dante to contemporary popular culture deepen your cultural knowledge and refine your language skills.

This program of study leads to the following credential:

- Minor in Italian Language and Culture

Minor in Italian Language and Culture

Credential Overview

The Italian minor provides students with the language skills and basic cultural knowledge that serve as the basis for further study and foster more meaningful experiences abroad. Language courses develop your skills in oral and written expression while introducing cultural knowledge. Core courses that pursue topics ranging from Dante to contemporary popular culture deepen your cultural knowledge and refine your language skills.

Completion Requirements

31 credits

1. ITAL 201, ITAL 202, ITAL 203; or ITAL 234 (15 credits)
2. ITAL 301 (5 credits)
3. ITAL 351, ITAL 352, ITAL 353, ITAL 354, ITAL 355, ITAL 356, ITAL 357, one of which must be taken concurrently with ITAL 380 (6 credits)
4. Electives (see website or adviser for approved list of courses) (5 credits)
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Maximum 10 credits of approved study-abroad coursework may be petitioned to apply to the minor.

Program of Study: Minor: Textual Studies and Digital Humanities

Program Overview

Study of textual forms from scrolls, manuscripts and printed books to digital texts and textual data, highlighting factors that have shaped their creation, editing,

publication, and reception, historically and globally. Courses offer opportunities to work with primary sources and archival materials and to learn techniques for digitizing, editing and curating these materials as well as for analyzing digitized text as data. May be of interest to undergraduates interested in careers in editing and publishing, libraries, archives, cultural institutions, and working with cultural and literary texts in digital environments.

This program of study leads to the following credential:

- Minor in Textual Studies and Digital Humanities

Minor in Textual Studies and Digital Humanities

Completion Requirements

25 credits

1. *Core Courses (10 credits)*: two courses from TXTDS 401, TXTDS 402, TXTDS 403, TXTDS 404
2. *Electives (10 credits)*: refer to program website for list of approved courses
3. *Capstone (5 credits)*: TXTDS 405
4. Minimum 15 credits taken from outside student's major requirements.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Students achieve levels of linguistic and cultural competency that allow them to pursue professional opportunities in a wide variety of internationally oriented fields and to be

effective citizens in a rapidly changing world.

Students with substantial foreign language fluency who combine language skills with a solid foundation in liberal education and adequate job preparation and internships find fulfilling occupations. . The combination of studies in foreign languages and international affairs is ideal for students seeking job opportunities in government (foreign service and diplomatic fields, intelligence agencies, immigration and customs, Department of Labor, law enforcement, armed forces, legal agencies, public aid, social and community work, and international agencies, such as the United Nations and UNICEF), business (airlines, marketing, banking/finance, multi-national corporations, shipping industry, travel and hotel industries, import/export firms, publishing houses, and consulting), and communication fields (journalism, radio and television, fashion enterprises, teaching/counseling, translation, bilingual office work, library/museum work, nursing, phone companies, art and cultural affairs, and film and theatrical industries).

Beyond the practical, the department's commitment is to impart to our students the skills and the genuine desire to learn throughout their lives, fostering the type of cultural and intellectual flexibility that lends itself to the multiple work and personal changes that most will face over the course of their lives.

- *Instructional and Research Facilities:* UW Rome Center in Rome, Italy.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors);

With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* The Rome Center offers one intern position per year, providing room and board and a modest stipend. Interns work in the administrative Rome/UW office and are required to follow an independent course of language and literature study or other proposed course of study.
- *Department Scholarships:* Scholarships for departmental study abroad programs are available. Program applicants are notified of opportunities by their program director.
- *Student Organizations/Associations:* French Club, Italian Club.

Of Special Note: The department sponsors study-abroad programs in France, Italy, and Martinique. See adviser for details.

Gender, Women, and Sexuality Studies

B110 [Padelford Hall](#)

206-543-6900

[Website](#)

[Faculty Website](#)

gwss@uw.edu

The mission of Gender, Women and Sexuality Studies is to analyze and change society from the unique perspective of unequal gender relations in a world where violence and discrimination is still commonplace. In GWSS, students learn about the racialized and global dimensions of contemporary sexual discourses, practices, and histories and question the mechanisms by which non-normative sexual desire has been segregated and disciplined. GWSS generates knowledge through frameworks that are interdisciplinary, transnational, decolonial and intersectional.

Program of Study: Major: Gender, Women, and Sexuality Studies

Program Overview

Our undergraduate major provides a highly flexible and individualized approach while creating a learning community. We emphasize integrative courses that explore relationships among phenomena such as gender, race/ethnicity, and social class. Required courses focus on feminist

theorizing of race/ethnicity and psychobiology of women, and synthesize these areas of academic inquiry through internships and a capstone class. The capstone culminates in a portfolio tracing the student's path toward achieving the department's learning goals. With over 2,000 students enrolled each year, Gender, Women & Sexuality Studies reaches far beyond our department into the entire University.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Gender, Women, and Sexuality Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: GWSS 200, and any of the following: GWSS 206, GWSS 257, GWSS 283, GWSS 290.

Admission Requirements

Any student with a cumulative GPA of at least 2.00 can declare this major at any time.

Bachelor of Arts degree with a major in Gender, Women, and Sexuality Studies

Credential Overview

Gender, Women and Sexuality Studies provides a window into discussions about globalization, violence, commerce, reproductive rights, art, music and many other issues. Students gain broad exposure to interdisciplinary methods and activist strategies, and are trained to analyze inequities in society and work toward social justice and change.

Completion Requirements

Minimum 58 credits

1. GWSS 200 or equivalent (5 credits)
2. GWSS 302 (5 credits)
3. One upper-division course focusing on transnational perspective. See adviser for list of eligible courses. (5 credits)
4. GWSS 497 (fieldwork) (minimum 3 credits)
5. One course in at least three of the four following overlapping focus points: Global Identity Formations; Decolonizing Empire; Feminist Knowledge Production and Radical Critique; Building Social, Cultural, and Political Movements for Change. See adviser for list of courses in each category (15 credits)
6. Additional gender, women, and sexuality studies upper-division credits. 10 credits must be graded. Maximum 10 credits from variable credit courses (GWSS 495, GWSS 496, GWSS 497, GWSS 499) can be applied toward this requirement. (20 credits)
7. Senior capstone, GWSS 494 (5 credits)
8. Minimum 20 credits applied toward the major must be completed in residence through the UW.
9. Minimum 2.00 cumulative GPA in courses applied to the major.

Program of Study: Minor: Gender, Women, and Sexuality Studies

Program Overview

A minor in Gender, Women and Sexuality Studies (GWSS) provides a window into discussions about globalization, violence, commerce, reproductive rights, art, music and many other issues. GWSS minors gain

exposure to the interdisciplinary methods and activist strategies, and training that allows students to analyze inequities in society and work toward social justice and change. By adding the GWSS minor to a course of study at UW, students are able to explore the intersections between their work in their major department and GWSS.

This program of study leads to the following credential:

- Minor in Gender, Women, Sexuality

Minor in Gender, Women, Sexuality

Credential Overview

A minor in Gender, Women and Sexuality Studies (GWSS) provides a window into discussions about globalization, violence, commerce, reproductive rights, art, music and many other issues. By adding the GWSS minor to a course of study at UW, students are able to explore the intersections between their work in their major department and GWSS.

Completion Requirements

30 credits

1. GWSS 200 or equivalent; and one additional GWSS 200-level course (10 credits)
2. GWSS 302 (5 credits)
3. Additional upper-division (300-400 level) credits in gender, women, and sexuality studies. Minimum 10 credits must be graded. Maximum 5 credits from variable credit courses (GWSS 495, GWSS 496, GWSS 497, and

GWSS 499) may be applied toward this requirement. (15 credits)

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A Bachelor of Arts in gender, women, and sexuality studies helps students prepare for careers in human, health, legal, or civil service, as well as in the private sector. Some gender, women, and sexuality studies graduates develop careers that focus directly or indirectly on women and women's issues. Many others move into careers that entail understanding the dynamics of gender, race, class, and sexuality. Such positions exist in politics, business, education, government, medicine, and the arts. Recent graduates of gender, women, and sexuality studies have found employment in public agencies, community services, health services, private businesses, and legal firms.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students intern in local agencies or businesses to develop skills in an area of specialization appropriate to their area of interest. For lists of these opportunities, see adviser.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* Students can join the National Women's Studies Association (NWSA).

Graduate Programs

Program of Study: Doctor of Philosophy (Feminist Studies)

Program Overview

The department offers graduate training leading to the PhD in interdisciplinary women studies as well as in a chosen discipline. A master's degree may be awarded to students in the doctoral program, but the department does not offer a terminal master's degree. The core faculty represent the following disciplines: anthropology, American Indian studies, cultural studies, economics and development, English, history, international studies, psychology, queer/sexuality studies, and sociology. Although students work primarily with a core faculty member in Gender, Women, and Sexuality Studies, they have the opportunity to study with more than 90 adjunct faculty members from a wide range of disciplines.

This program of study leads to the following credential:

- Doctor of Philosophy (Feminist Studies)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Feminist Studies)

Completion Requirements

90 total credits

1. *Required Core Courses (20 credits):* GWSS 501, GWSS 502, GWSS 503, GWSS 504
2. *Area of Specialization (20 credits):* GWSS 400 level or above in area of concentration.
3. *Electives (20 credits):* Approved elective courses 400 level or above in area of concentration.
4. *Doctoral Dissertation (30 credits):* GWSS 800 Doctoral Dissertation

Additional Information

Financial Aid: A limited number of teaching and research assistantships are offered to PhD students.

General Studies

141 [Mary Gates Hall](#)

206-543-2550

[Website](#)

istudies@uw.edu

Individualized Studies is an interdisciplinary major option for students who wish to create a program of study by combining selected courses from two or more departments. Students are required to identify a central organizing theme for their major and design it under the guidance and supervision of a faculty member and an Individualized Studies adviser. The Individualized Studies major also currently supports two faculty-designed majors, Disability Studies and Musical Theater.

Undergraduate Programs

141 [Mary Gates Hall](#)
206-543-2550
istudies@uw.edu

Program of Study: Major: Individualized Studies

Program Overview

The Individualized Studies program is an interdisciplinary major option for highly motivated and self-directed students to pursue intellectual studies not available in current UW programs. Prospective students are required to construct an Individualized Learning Plan articulating the rationale, learning goals, proposed coursework, and a plan for assessing their learning, all under the guidance and supervision of at least two faculty members and Individualized Studies advising. The Individualized Studies program also houses a small number of faculty-designed majors in development, currently including a BA in Disability Studies and a BA in Musical Theater (BA).

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Individualized Studies
- Bachelor of Science degree with a major in Individualized Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: Varies, depending on student's area of concentration.

Admission Requirements

Before developing an Individualized Studies major, students should read "[Designing an Individualized Studies Major](#)," or obtain a copy from the UAA Advising, 141 Mary Gates Hall. Particular attention should be paid to the sections defining restrictions on themes and restricted access to courses. Individualized Studies majors are not possible in a number of subjects because the UW does not offer sufficient coursework. Upper-division courses in departments with competitive admission are generally not available to students not in that major and ordinarily cannot be included in Individualized Studies proposals.

After reading the guidelines, the student must go through the following steps to design a major:

1. Identify the unifying interdisciplinary theme of the program.
2. Make a list of courses taken or planned to be taken toward this goal. This list should comprise between 50 and 70 quarter credits, all of which are related to the area of concentration. These courses must come from at least two departments, but may come from any number of areas, so long as interrelationships are discernible. Most courses must be at the 300- or 400-level. At least half the 50-70 credits selected for the major must come from courses taught within the College of Arts and Sciences.
3. Draft a statement that describes the proposed major and discusses the interrelationships among the courses chosen. Propose a brief, descriptive title for the major.
4. Submit the proposal to the Individualized Studies Committee for initial approval. Prospective majors

should submit proposals to the Individualized Studies Committee for review at least three quarters prior to graduation.

5. Identify at least two faculty sponsors for the major. The faculty sponsors attest to the intellectual soundness of the proposal and agree to provide whatever guidance is jointly decided upon. They may also suggest changes in the previously approved written proposal or list of courses.
6. Obtain final approval from an Individualized Studies adviser.
7. Transfer students must be enrolled at the UW before applying to the major.
8. For admission requirements for the technical writing option, see an adviser.

Bachelor of Arts degree with a major in Individualized Studies

Credential Overview

The Individualized Studies program is an interdisciplinary major option for highly motivated and self-directed students to pursue intellectual studies not available in current UW programs. Prospective students are required to construct an Individualized Learning Plan articulating the rationale, learning goals, proposed coursework, and a plan for assessing their learning, all under the guidance and supervision of at least two faculty members and Individualized Studies advising.

Completion Requirements

55 to 70 credits, including completion of the approved curriculum and a 5-credit required senior study (minimum grade of 2.7 required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

Bachelor of Science degree with a major in Individualized Studies

Credential Overview

The Individualized Studies program is an interdisciplinary major option for highly motivated and self-directed students to pursue intellectual studies not available in current UW programs. Prospective students are required to construct an Individualized Learning Plan articulating the rationale, learning goals, proposed coursework, and a plan for assessing their learning, all under the guidance and supervision of at least two faculty members and Individualized Studies advising.

Completion Requirements

Program of Study: Minor: Diversity

Program Overview

The Diversity Minor is intended to engage students with a broad and critical understanding of human diversity and difference in domestic and transnational settings. It draws from a wide variety of courses in departments across the College of Arts & Sciences. Upon completion of the minor, students should have deep foundational knowledge of socially constructed identities—race, class, gender, sexuality, disability, age, ethnicity, and nationality—and the ways in which they intersect with each other through different relationships of power.

This program of study leads to the following credential:

- Minor in Diversity

Minor in Diversity

Credential Overview

The Diversity Minor is intended to engage students with a broad and critical understanding of human diversity and difference in domestic and transnational settings. It draws from a wide variety of courses in departments across the College of Arts & Sciences. Upon completion of the minor, students should have deep foundational knowledge of socially constructed identities—race, class, gender, sexuality, disability, age, ethnicity, and nationality—and the ways in which they intersect with each other through different relationships of power.

Completion Requirements

25 credits

1. One foundation course (5 credits) chosen from an approved list of courses (refer to program website).
2. Minimum four additional courses, with at least one each from four of the five following categories (20 credits): arts/cultural; historical; global; contemporary/institutional; applications. Refer to program website for list of courses by category.
3. Minimum 15 credits must be completed in residence through the UW.
4. Maximum 10 credits from one department and maximum 10 credits from the student's major department may be applied toward the minor.
5. Diversity minor students are strongly encouraged to complete an internship, volunteer project, research project, study abroad program, intergroup dialogue course, or some applied learning opportunity that promotes the goals of the minor.

Program of Study: Minor: Human Rights

Program Overview

The Tri-Campus Minor in Human Rights is an option for students who are interested in the rapidly emerging field of human rights. The curriculum reflects the rising interest in human rights throughout the world – even as human rights violations persist, and debate continues over the meaning and realization of human rights. Understanding this complex subject requires an interdisciplinary approach, one that combines in a new way the study of philosophy, politics, economics, culture, and law. The University of Washington is fortunate to house one of the

strongest human rights programs in the country. We offer a rich selection of courses taught by scholars from diverse schools, departments, and programs. The minor also includes a human rights-related experiential requirement through service learning, an internship, or study abroad.

This program of study leads to the following credential:

- Minor in Human Rights

Minor in Human Rights

Credential Overview

The Tri-Campus Minor in Human Rights is an option for students who are interested in the rapidly emerging field of human rights. The curriculum reflects the rising interest in human rights throughout the world – even as human rights violations persist, and debate continues over the meaning and realization of human rights. Understanding this complex subject requires an interdisciplinary approach, one that combines in a new way the study of philosophy, politics, economics, culture, and law. The University of Washington is fortunate to house one of the strongest human rights programs in the country. We offer a rich selection of courses taught by scholars from diverse schools, departments, and programs. The minor also includes a human rights-related experiential requirement through service learning, an internship, or study abroad.

Completion Requirements

25 credits:

1. 10 credits from an approved list of courses* concerned with human rights as a core concept

2. 5 credits from an approved list of courses* concerned with human rights in a broad context
3. 10 additional credits drawn from the above approved lists of courses* concerned with human rights
4. At least 3 credits of the required 25 credits must be in a human-rights-related internship, practicum, international study abroad, or demonstrated equivalent. Courses that satisfy this requirement include BIS 403, BIS 480; LSJ 310, LSJ 499, POL S 496, JSIS 387, and similar practicum and study-abroad courses in other programs (on the Seattle campus); and TIAS 496. See adviser for faculty-approved alternatives. Courses used to satisfy this requirement must be approved/supervised by the faculty offering courses appropriate to the minor. Credits for the minor may be completed across the three UW campuses, or on any single campus. If the minor is completed by a Seattle-major student, no more than 10 credits applied to the minor may be in the student's major department.

* The list of core courses and context courses is maintained by the Human Rights Advisory Committee (refer to [website](#)). Note: From time to time, the advisory committee adds, subtracts, or reclassifies courses on the approved list. Students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified in that earlier list.

Additional Information

The human rights minor is offered at all three University campuses, allowing students to take advantage of the expertise available on the campuses where they are not regularly in residence, although the minor can be completed on any one campus.

Program of Study: Minor: Labor Studies

Program Overview

The field of Labor Studies encompasses scholarship and teaching across a wide array of academic disciplines about work, workers, and worker organizations. Topics covered include unions and collective bargaining, immigrant workers, the impact of globalization on worker well being, worker rights in comparative and historical perspective, and unpaid caring and domestic labor. The Labor Studies minor brings together a variety of courses on labor and social justice. It provides students an interdisciplinary program of study focusing on the importance of labor to the economic, social, political, legal, and cultural development of modern societies.

Program of Study: Major: Geography

Program Overview

Geographers research and engage the world by asserting the importance of space, environment, context, location, place, and scale in relation to societies' most pressing environmental and social concerns. We draw from interdisciplinary theories across the humanities, social sciences, and natural sciences to consider how these concerns are mapped, represented, and understood in a changing world, and to offer theoretically informed and empirically based responses. Our students are deeply engaged in community service through internships, service learning, and senior projects, which center upon questions of environmental and social justice. Our undergraduate majors employ social and political theories; develop the ability to create and analyze maps and other forms of geo-visualization; gather, analyze and interpret quantitative and qualitative data; and write clear and compelling research reports and papers.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Geography
- Bachelor of Arts degree with a major in Geography: Data Science

Admission Requirements

1. Minimum 2.00 cumulative GPA.
2. Completion of any GEOG-prefix course at 200-level or higher with a minimum grade of 2.0.
3. Visit department website for instructions to declare the geography major.

Bachelor of Arts degree with a major in Geography

Completion Requirements

60 credits

1. *Foundations (30 credits)*: See departmental adviser for approved track courses.
 - a. GEOG 315
 - b. One methods course from the following: GEOG 317, GEOG 326, GEOG 425, GEOG 426, or faculty approved methods course
 - c. One Cities, Citizenship, and Migration Track course (5 credits)
 - d. One Environment, Economy, and Sustainability Track course (5 credits)
 - e. One Globalization, Health, and Development Track course (5 credits)
 - f. One GIS, Mapping, and Society Track course (5 credits)
2. *Track (20 credits)*: Students select one of the following four tracks:
 - a. Cities, Citizenship, and Migration
 - b. Environment, Economy, and Sustainability
 - c. Globalization, Health, and Development
 - d. GIS, Mapping, and Society

Four upper-division (300- and 400-level) geography courses are required for the track the student selects, at least two of which must be at the 400 level. As an alternative to one of the four defined tracks, students may also customize their own hybrid focus along more thematic or issue-driven lines, such as inequality, race/class/gender studies, etc. See department website for approved track courses, and/or geography adviser for details.

3. *Electives (10 credits):* GEOG electives at the 200 level or above; 300- and 400-level courses preferred.
4. *Additional Degree Conditions and Program Features*
 - a. Students must complete a minimum of 25 upper-division credits (300- and 400-level) in geography in residence through the UW.
 - b. Students are encouraged to take appropriate elective courses outside the Department of Geography in fields that support their track. Courses appropriate to various tracks are available on lists supplied by geography advisers, or may be recommended by the faculty adviser. Students should be aware that 300- and 400-level courses in other departments likely have prerequisites.
 - c. 5 credits of internship (GEOG 496) or independent study (GEOG 499) may apply toward the required 60 credits.
 - d. No single course may be counted toward more than one major requirement.
5. Minimum 2.00 cumulative GPA in courses applied to the major.

Bachelor of Arts degree with a major in Geography: Data Science

Credential Overview

The B.A. in Geography with Data Science Option builds on geography coursework in data management, data visualization and the societal implications of data science while offering students additional opportunities to engage in coursework in programming, machine learning, and advanced statistics and probability. This series of coursework allows students to graduate with evidence of data science experience on their transcript.

Completion Requirements

60 to 65 credits

1. *Foundations (23-25 credits):*
 - a. GEOG 315
 - b. GEOG 360
 - c. One from CSE 180, INFO 201, GEOG 245, or GEOG 258
 - d. One from GEOG 317, GEOG 326, GEOG 426, STAT 220, STAT 221, STAT 290, STAT 311, STAT 390, Q SCI 381, or QMETH 201
 - e. 5 credits from either Environment, Economy and Sustainability; Cities, Citizenship and Migration; or Globalization, Health & Development tracks. Refer to department website for list of approved courses.
2. *Data Science Electives (37-40 credits):*
 - a. Programming: two courses from CSE 121, CSE 122, CSE 123, CSE 142, CSE 143, CSE 160, CSE 163, or INFO 370
 - b. Machine Learning: one from CSE 416/STAT 416, STAT 435, INFO 371
 - c. GIS, Mapping, and Society courses (25 credits): Refer to department website for list of approved upper-division courses.
3. *Additional Degree Conditions and Program Features*
 - a. Students must complete a minimum of 25 upper-division credits (300- and 400-level) in geography in residence through the UW.
 - b. No single course may be counted toward more than one major requirement.
4. Minimum 2.00 cumulative GPA in courses applied to the major

Completion Requirements

30 credits

1. 30 credits in geography, including 15 upper-division geography credits with at least 5 credits at the 400-level. No more than 5 credits applied to the minor may be from 100-level classes. Independent learning and internship credits (GEOG 494, GEOG 496, GEOG 497, GEOG

499) may not be counted as part of the 30 credits.

2. A minimum 2.0 grade for each course counted toward the minor.
3. At least 15 credits of upper-division geography courses must be taken through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Geographers address some of the world's most urgent challenges, including global and environmental change, economic and social inequality and poverty, world hunger, global health and healthcare, social justice in the city, migration and immigration, and what it means to be a global citizen in the twenty-first century. Responses to such questions are complex and partial, and these issues are not "fixable" by one-dimensional solutions. Geography's contribution to these public issues and solutions is through evidence-based, multi-scalar analyses and mapping of socio-spatial and environmental change. Social justice, community engagement and activism, and an accountability to place inform our inquiry and study.

In geography classes students learn how to design and conduct research, employing quantitative and qualitative methods; use statistical and demographic analysis; and interpret and analyze data, discourses, and texts and images in order to address significant topics and questions in human geography. Students combine classroom study with internships, community service, and independent research to develop integrated, rich, and relevant learning experiences. These experiences help

develop and refine critical and analytical research and communication skills, offer hopeful and engaged responses to daunting problems, and emphasize that individuals can make a difference.

Typical lines of inquiry in each track include:

1. **Cities, Citizenship, and Migration:** Why do people move, and where do they go? What are the constraints and opportunities for migrants as they settle and integrate in new cities and new nations? How are cities formed and what are the forces that impact their economic and cultural development? The courses in this track focus on themes of urbanization and human movement, emphasizing the importance of labor and housing, as well as cultural processes and historical forms of discrimination that shape where people live and work. Students in this track develop an understanding of the intersections of power and place as they pertain to migration and immigrant life, citizenship and belonging, and the production of urban space.
2. **Environment, Economy, and Sustainability:** Courses in this track study the reciprocal and often contradictory forces of economic activity, environmental policy, and sustainability. Using such key geographic concepts as scale, place and location, they analyze relations between such complex processes as: land use, labor markets, corporate location, international trade, energy policy and consumption, environmental regulatory policy, resource use, and food systems.
3. **Globalization, Health, and Development:** How does globalization shape life and death around the planet? How can development initiatives address global health disparities? Providing geographical answers to such questions, this track traces the extraordinarily uneven effects of global trade, global finance, and market-led development on food systems, health, and the geography of impoverishment. By putting global health challenges in a global socio-economic context, the track simultaneously highlights how social movements and social organizing can make a difference, including differences in formal policies affecting human well-being directly as well as innovations in the ethics of care. Courses in the track provide frequent opportunities for service learning as part of the goal of helping students engage with real world challenges. All classes also approach these themes through a geographical lens: charting global-local relations and the links between nature, society, and political-economy in particular places. This geographical approach in turn enables us to explore how nutrition, health, and development are intertwined with other processes ranging from the personal experiences of migrant farm workers, to urban and regional redevelopment, to global financial reforms. Specific questions that frame our classes include: What are the links between life and debt (GEOG 123)? How have sixty years of development increased in-country inequality (GEOG 230)? How do global disease etiologies reflect other

global interconnections (GEOG 280)? How does agricultural modernization relate to hunger (GEOG 371)? and what are the implications for food security, health security, and developmental security when they are re-framed in terms of geopolitics and the global security challenges of international relations (GEOG 375)?

4. GIS, Mapping, and Society: In courses that comprise the GIS, Mapping, and Society track, students learn to use GIS, web-based geospatial applications, and database management systems for problem solving in relation to a diverse range of societal concerns, such as those within the other geography tracks. Students learn a range of analytical and critical methods for cartographic representation, spatial analysis, geovisualization, and database management. Further, students learn about the politics, ethics, and values of mapping and geospatial technologies, and integrate their social and technical skills to undertake projects with research partners in the region.
5. Geography Data Science: The data science option builds on geography coursework in data management, data visualization and the societal implications of geospatial data while offering students additional opportunities to engage in coursework in programming, machine learning, and advanced statistics and probability.

Geography students find positions in non-profit organizations, business, data visualization, geographic information systems, and community engagement. Refer to department website for

resources including career exploration and preparation courses.

- *Instructional and Research Facilities:* A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in Smith Hall 415 provides a unique collaborative classroom with networked computer workstations. The Geography Commons also provides computer workstations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Refer to department website for more information.
- *Research, Internships, and Service Learning:* More than 125 geography students participate each year in internships. For support with these opportunities, contact Geography Advising.
- *Department Scholarships:* Gerald W. Halmo Geography Scholars Program. Refer to department website for more information.
- *Student Organizations/Associations:* Plenum Journal of Undergraduate Geography; GeoDat: The Society for Geography Data Science at UW;

Geography Graduate Students
Association (GGSA).

Of Special Note: Students interested in GIS are encouraged to learn a high-level programming language such as C , C++, Java, Javascript, R or Python.

Graduate Programs

Program of Study: Doctor of Philosophy (Geography)

This program of study leads to the following credential:

- Doctor of Philosophy (Geography)

Admission Requirements

Please see this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Geography)

Completion Requirements

90 credits total

1. *Required Courses:*
 - a. GEOG 500
 - b. GEOG 511
2. *Methods Course:* Satisfactory completion of one graduate level methods course in- or outside the Department of Geography. Subject to advance approval by student's supervisory committee and the graduate program coordinator.
3. Minimum three quarters of GEOG 598
4. *Two departmental research seminars:* Course list maintained by the program. See department website for more information.

5. *Professional development course:* GEOG 502 or GEOG 513
6. Two graduate-level courses in a supporting field of concentration outside Geography.
7. *Dissertation (27 credits):* GEOG 800 (up to 10 credits per quarter, 27 credits total)
8. *Electives (to meet required total):* Additional credit 500-level and above

Additional Requirements

1. Minimum 3.0 overall GPA. Minimum 3.0 grade in departmental courses. Minimum 2.7 grade in related courses.
2. Minimum 60 credits through UW (including 27 GEOG 800 credits). An approved master's degree may substitute for 30 credits.
3. Numerical grades in at least 18 quarter credits taken through UW
4. General examination
5. Final examination

Additional Information

Financial Aid: The department awards approximately 15 to 20 teaching assistantships for the academic year. Most assistantships are for teaching quiz sections for a larger lecture class. A few advanced doctoral candidates may teach a class. Normally several research assistantships are also available. In recent years, all the department's graduate students have been funded by internal or external sources.

Program of Study: Master of Arts (Geography)

This program of study leads to the following credential:

- Master of Arts (Geography)

Admission Requirements

Please see this program's [Graduate Admissions page](#) for requirements.

Master of Arts (Geography)

Completion Requirements

36 credits total; students may write either a thesis or two high-quality papers

1. *Required Courses:*
 - a. GEOG 500
 - b. GEOG 511
2. *Methods Course:* Satisfactory completion of one graduate level methods course in- or outside the Department of Geography. Subject to advance approval by student's supervisory committee and the graduate program coordinator.
3. Minimum three quarters of GEOG 598
4. *Two departmental research seminars:* Course list maintained by the program. See department website for more information.
5. *Thesis (9 credits):* GEOG 700

Additional Requirements

1. Minimum 18 graded credits. With thesis, students complete at least 9 credits of GEOG 700 as part of the minimum 36-credit requirement.
2. Minimum three full-time (at least 9 credits) quarters of residence credits. Part-time quarters may be accumulated to meet one quarter's worth of this requirement.
3. Final Examination constituting a defense of the thesis or research papers.
4. Students must earn a grade of at least 3.0 in all GEOG courses and minimum 2.7 grade in all related courses.
5. All work completed within six years.

Additional Information

[Website](#)

[Faculty Website](#)

uwgerman@uw.edu

The study of language and literature is at the core of the liberal arts curriculum in a global society. Our goal is to teach students the uses of language and its critical function by widening their linguistic horizons and enhancing their cross-cultural and historical awareness. Concentrating on the artistic and intellectual traditions of German-speaking countries in the broader European context, we offer advanced training in critical reading, analytical writing, translation and interpretation.

Program of Study: Major: German Studies

Program Overview

The Department of German Studies offers an undergraduate degree program leading to a BA in German. The German major provides transferable skills for any career that involves formulating questions and solving problems, especially for students in a wide range of fields such as business, politics, and STEM. Students gain advanced competency in spoken and written German, enhanced cultural expertise, and the ability to work across disciplines. They develop analytical skills through studies of literary, intellectual, and visual culture from the Middle Ages to the present. Emphases include: environmental and urban humanities; Jewish studies; gender and queer studies; philosophy; and performance. The German Studies Department remains at the forefront of innovative language teaching and literary research. We offer undergraduate and advanced degrees for students at the University of Washington, as

well as outreach events for the surrounding community.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in German Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year German or equivalent. Courses in Central European history, literature and culture. Courses on broad cultural topics taught in English by Germanics.

Admission Requirements

Admission to the major status requires completion of GERMAN 202 or equivalent.

Bachelor of Arts degree with a major in German Studies

Credential Overview

The Department of German Studies offers an undergraduate degree program leading to a BA in German. The German major provides transferable skills for any career that involves formulating questions and solving problems, especially for students in a wide range of fields such as business, politics, and STEM. Students gain advanced competency in spoken and written German, enhanced cultural expertise, and the ability to work across disciplines. They develop analytical skills through studies of literary, intellectual, and visual culture from the Middle Ages to the present. Emphases include: environmental and urban humanities; Jewish studies; gender and queer studies; philosophy; and performance. The German Studies Department remains at

the forefront of innovative language teaching and literary research. We offer undergraduate and advanced degrees for students at the University of Washington, as well as outreach events for the surrounding community.

Completion Requirements

51 credits

1. GERMAN 203, GERMAN 311, GERMAN 401 (15 credits)
2. Two 400-level courses in literature and culture chosen from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 493, GERMAN 494, GERMAN 495, GERMAN 497 (10 credits)
3. Two 300-level courses in language, chosen from GERMAN 301, GERMAN 302, GERMAN 303 (6 credits)
4. 20 additional credits from any combination of the following courses, or additional courses from the list above. No more than 10 credits at the 200 level. Students who test out of language courses (GERMAN 203, GERMAN 301, GERMAN 302, GERMAN 303, GERMAN 401) because of prior competency in German must take additional courses from those listed below to bring the minimum German credits for the major to 51.
 - a. *Language*: GERMAN 304, GERMAN 307, GERMAN 333, GERMAN 334, GERMAN 498
 - b. *Literature*: GERMAN 210, GERMAN 243, GERMAN 293, GERMAN 295, GERMAN 300, GERMAN 312, GERMAN 313, GERMAN 340, GERMAN 341, GERMAN 342, GERMAN 345, GERMAN 346, GERMAN 349,

- GERMAN 350, GERMAN 351, GERMAN 352, GERMAN 353, GERMAN 360, GERMAN 390, GERMAN 397, GERMAN 490, GERMAN 494, GERMAN 497
- c. *Culture*: GERMAN 322, GERMAN 323, GERMAN 355, GERMAN 370, GERMAN 371, GERMAN 399, GERMAN 499
 - d. *Linguistics*: GERMAN 220, GERMAN 451, GERMAN 452, GERMAN 479
 - e. *Other*: GERMAN 395/GERMAN 396 (4 credits max.), GERMAN 398, GERMAN 446 (5 credits max.), GERMAN 447 (5 credits max.)
5. Minimum 2.0 grade in every upper-division German course counted toward the major. Overall 2.50 GPA for all German courses counted toward the major.

Program of Study: Minor: German Studies

Program Overview

The minor in German offers training in verbal interpretation and analysis. It fosters critical thinking as well as the imagination and provides transferable skills for any career that involves formulation and solving problems, especially for those with a particular interest in Europe and German-speaking countries. Students gain confidence in German and the ability to analyze major aspects of culture and society, such as literature, film, architecture, and political and social institutions. They may participate in the Department's study abroad program in Vienna or the direct exchanges with German universities, among them Tübingen, Heidelberg, and Berlin.

This program of study leads to the following credential:

- Minor in German Studies

Minor in German Studies

Credential Overview

The minor in German offers training in verbal interpretation and analysis. Students gain confidence in German and the ability to analyze major aspects of culture and society, such as literature, film, architecture, and political and social institutions. They may participate in the Department's study abroad program in Vienna or the direct exchanges with German universities, among them Tübingen, Heidelberg, and Berlin.

Completion Requirements

35 credits

1. GERMAN 203, GERMAN 311 (10 credits)
2. 400-level coursework from either GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 493, GERMAN 494, GERMAN 495, GERMAN 497, GERMAN 498, GERMAN 499 (5 credits)
3. 20 additional credits from the following courses (no more than 10 credits may be taken from 200-level courses). Students who test out of GERMAN 203 because of prior competency in German must take additional courses from those listed below to bring the minimum German credits for the minor to 35.

- a. *Language*: GERMAN 301, GERMAN 302, GERMAN 303, GERMAN 304, GERMAN 307, GERMAN 333, GERMAN 334, GERMAN 401, GERMAN 498
 - b. *Literature*: GERMAN 210, GERMAN 243, GERMAN 293, GERMAN 295, GERMAN 300, GERMAN 312, GERMAN 313, GERMAN 340, GERMAN 341, GERMAN 342, GERMAN 345, GERMAN 346, GERMAN 349, GERMAN 350, GERMAN 351, GERMAN 352, GERMAN 353, GERMAN 360, GERMAN 390, GERMAN 397, GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, GERMAN 490, GERMAN 494, GERMAN 495, GERMAN 497
 - c. *Culture*: GERMAN 285, GERMAN 322, GERMAN 323, GERMAN 355, GERMAN 370, GERMAN 371, GERMAN 385, GERMAN 399, GERMAN 493, GERMAN 499
 - d. *Linguistics*: GERMAN 220, GERMAN 451, GERMAN 452, GERMAN 479
 - e. *Other*: GERMAN 395/GERMAN 396 (4 credits max.), GERMAN 398, GERMAN 446 (5 credits max.), GERMAN 447 (5 credits max.)
4. 2.0 minimum grade for each course counted toward the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - To acquire linguistic fluency in German and broad knowledge of German/Austrian/Swiss language, literature, and culture;

- To increase critical awareness and sensitivity to other languages and cultures as well as to one's own;
- To develop skills of analytical and integrative thinking, critical reading, and writing;
- To communicate clearly and concisely both in written and spoken form;
- To understand how to do research in German literacy and cultural studies.
- *Instructional and Research Facilities:* None
- *Honors Options Available:* With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:*
 - Advanced undergraduate majors and minors can sign up for 1-5 credits of faculty-sponsored research (GERMAN 447) for one quarter with a maximum of 15 credits. Five credits can count towards the major as an elective. Regular grades are assigned for research results. To see examples of research projects currently being offered, see the departmental website.
 - The internship in German (GERMAN 446) offers students the opportunity to do internships in public institutions or private businesses to apply their German language skills in practice. The internship experience provides a valuable tool to further increase students' communication skills in the German language, to explore and test potential career options, and to specify or expand study goals. Ideally an internship in German serves to enhance and further students' educational and professional objectives.
- *Study Abroad:* The Office of International Programs and Exchanges offers a number of different study abroad options for Austria and Germany. Students can consult their website. The Department of Germanics offers a program in Vienna, Austria. Qualified students are invited to take part in the "Spring in Vienna" program. Every spring quarter the department sends a group of approximately 20 students to Vienna to participate in a program of studies in German language and Austrian culture for which students are able to earn 16 credits. Program costs are commensurate with in-state tuition at the University of Washington. Consult the departmental website for more information.
- *Department Scholarships:* The department's German Express program consists of a series of intensive courses able to take a student from no knowledge of German to fluency in one year. The best five students are awarded stipends of \$1,000 each to be applied toward study during spring quarter at a German university. Additional scholarship opportunities can be found on the departmental website.
- *Student Organizations/Associations:* German Club.

History

318 [Smith Hall](#)

206-543-5790

[Website](#)

[Faculty Website](#)

History is a core discipline in any liberal arts education. The study of history enables us to see how the present world came into being; at the same time, it asks us to understand diverse people in different times and places. The interests of faculty and students in

History range temporally from ancient times to present, and geographically from Asia and Europe to the Americas, Africa, and the Middle East.

Undergraduate Programs

histadv@uw.edu

Program of Study: Major: History

Program Overview

Dynamic, diverse, and intellectually challenging, the Department of History cultivates in undergraduates a lasting curiosity about the world, and imparts useful tools for understanding and participating in it responsibly. With an emphasis on critical reading and writing, discriminating research skills, and persuasive presentation, the history major prepares students for a variety of occupations in the fields of business, government, non-profit, education, and many more. Undergraduates are guided in their path by an excellent and diverse faculty, including eight recipients of Distinguished Teaching Awards – more than any other unit on campus. Our faculty members claim as their areas of expertise nearly every continent on earth, throughout the chronological span of written history. We also have a number of adjunct faculty, allowing students to explore an interdisciplinary approach to their studies.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in History
- Bachelor of Arts degree with a major in History: Empire and Colonialism

- Bachelor of Arts degree with a major in History: Race, Gender, and Power
- Bachelor of Arts degree with a major in History: Religion and Society
- Bachelor of Arts degree with a major in History: War and Society

Recommended Preparation

Suggested First- and Second-Year College Courses: Courses that develop writing skills.

Admission Requirements

1. Minimum college/university GPA of 2.00
2. Completion of 10 credits of college history with a minimum cumulative GPA of 2.50
3. Completion of 10 credits of composition/writing courses with a minimum 2.0 grade for each course. The requirement may be met by a freshman English composition course or a "W" course.
4. Students may apply to the major at any time in the quarter. Transfer students must be enrolled at the UW before applying.

Bachelor of Arts degree with a major in History

Credential Overview

Dynamic, diverse, and intellectually challenging, the Department of History cultivates in undergraduates a lasting curiosity about the world, and imparts useful tools for understanding and participating in it responsibly. With an emphasis on critical reading and writing, discriminating research skills, and persuasive presentation, the history major prepares students for a variety of occupations in the fields of business, government, non-profit, education, and

many more. Undergraduates are guided in their path by an excellent and diverse faculty, including eight recipients of Distinguished Teaching Awards – more than any other unit on campus. Our faculty members claim as their areas of expertise nearly every continent on earth, throughout the chronological span of written history. We also have a number of adjunct faculty, allowing students to explore an interdisciplinary approach to their studies.

Completion Requirements

60 credits

1. At least one 5-credit course in four of the following six fields: Asia; Europe; Latin America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Minimum 2.25 cumulative GPA in courses applied to the major.

Bachelor of Arts degree with a major in History: Empire and Colonialism

Credential Overview

This major explores the historical development of imperial and colonial formations around the world, from ancient times to the current era of neoliberalism and globalization. How have imperial and

colonial formations shaped larger processes and events in world history? and how have historical actors in both colonies and metropolises experienced, negotiated, advanced, and resisted imperial and colonial domination?

Completion Requirements

60 credits

1. At least one 5-credit course in four of the following six fields: Asia; Europe; Latin America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Minimum 2.25 cumulative GPA in courses applied to the major.

Additional Completion Requirements

Option specific credits: 25 credits from approved course list, of which 15 credits must be upper-division.

Credit requirements for this option count toward the 60 total credits for the major. HSTRY 388, HSTRY 494, HSTRY 498 do not count for option requirements. See the Department of History for an approved course list for this option.

Bachelor of Arts degree with a major in History: Race, Gender, and Power

Credential Overview

This major explores the centrality of race and gender in shaping and reproducing hierarchical relations of power around the world. From social classifications and legal codes in ancient and medieval societies to scientific and cultural conceptions of racial and sexual differences over the last four centuries, how have race and gender defined and denied access to power to justify and naturalize social inequalities? and how have different peoples organized politically around racial and gender identities (e.g., as women, as Chicanas, as First Nations, etc.) to contest and transform social norms?

Completion Requirements

60 credits

1. At least one 5-credit course in four of the following six fields: Asia; Europe; Latin America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Minimum 2.25 cumulative GPA in courses applied to the major.

Additional Completion Requirements

Option specific credits: 25 credits from approved course list, of which 15 credits must be upper-division.

Credit requirements for this option count toward the 60 total credits for the major. HSTRY 388, HSTRY 494, HSTRY 498 do not count for option requirements. See the Department of History for an approved course list for this option.

Bachelor of Arts degree with a major in History: Religion and Society

Credential Overview

This major explores the development of religious traditions worldwide, asking how religious beliefs, practices, and institutions have helped shape culture, politics, and ideology from pre-modern times to the present. Courses in the minor push students to consider the multifarious ways in which religion structures society and is structured by it.

Completion Requirements

60 credits

1. At least one 5-credit course in four of the following six fields: Asia; Europe; Latin America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major

5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Minimum 2.25 cumulative GPA in courses applied to the major.

Additional Completion Requirements

Option specific credits: 25 credits from approved course list, of which 15 credits must be upper-division.

Credit requirements for this option count toward the 60 total credits for the major. HSTRY 388, HSTRY 494, HSTRY 498 do not count for option requirements. See the Department of History for an approved course list for this option.

Bachelor of Arts degree with a major in History: War and Society

Credential Overview

This major explores experiences of civil and international wars as a means to question how violence, conflict, and other traumatic acts have shaped political, social, and cultural formations in the past and present. In addition to military history, courses in this minor examine the following aspects of war's linkage to society: how the experiences and exigencies of war create conditions for broader changes, including changes in notions of territorial integrity, sovereignty, national belonging, citizenship, gender, and race, as people are called to serve in battle zones and on the home front.

Completion Requirements

60 credits

1. At least one 5-credit course in four of the following six fields: Asia; Europe; Latin

- America and the Caribbean; Middle East and Africa; United States and Canada; and Comparative and Trans-Regional
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division history credits completed in residence at the UW
4. 5 credits of HSTRY 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Approved electives to reach 60 credits
7. Minimum 2.25 cumulative GPA in courses applied to the major.

Additional Completion Requirements

Option specific credits: 25 credits from approved course list, of which 15 credits must be upper-division.

Credit requirements for this option count toward the 60 total credits for the major. HSTRY 388, HSTRY 494, HSTRY 498 do not count for option requirements. See the Department of History for an approved course list for this option.

Program of Study: Minor: History

Program Overview

The general minor in history allows students to study a range of subjects in different regions and at different periods in time. Students can individually construct a minor around themes not covered in the other minors, as well as work specifically in one region or in one time period.

This program of study leads to the following credentials:

- Minor in History
- Minor in History of Empire and Colonialism
- Minor in History of Race, Gender, and Power
- Minor in History of Religion and Society
- Minor in History of Science
- Minor in History of War and Society

Minor in History

Credential Overview

The general minor in history allows students to study a range of subjects in different regions and at different periods in time. Students can individually construct a minor around themes not covered in the other minors, as well as work specifically in one region or in one time period.

Completion Requirements

30 credits

1. 30 credits of history, of which 20 must be upper-division
2. Minimum 2.0 grade in each course applied toward the minor
3. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW

Minor in History of Empire and Colonialism

Credential Overview

The history of empire and colonialism minor explores the historical development of imperial and colonial formations around the world, from ancient times to the current era of neoliberalism and globalization. How have imperial and colonial formations shaped larger processes and events in world history? and how have historical actors in

both colonies and metropolises experienced, negotiated, advanced, and resisted imperial and colonial domination?

Completion Requirements

30 credits

1. 30 credits from approved course list, of which 20 credits must be upper-division
2. Minimum 2.00 cumulative GPA in courses applied toward the minor
3. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

Minor in History of Race, Gender, and Power

Credential Overview

The history of race, gender, and power minor explores the centrality of race and gender in shaping and reproducing hierarchical relations of power around the world. From social classifications and legal codes in ancient and medieval societies to scientific and cultural conceptions of racial and sexual differences over the last four centuries, how have race and gender defined and denied access to power to justify and naturalize social inequalities? and how have different peoples organized politically around racial and gender identities (e.g., as women, as Chicanas, as First Nations, etc.) to contest and transform social norms?

Completion Requirements

30 credits

1. 30 credits from approved course list, of which 20 credits must be upper-division
2. Minimum 2.00 cumulative GPA in courses applied toward the minor

3. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

Minor in History of Religion and Society

Credential Overview

The history of religion and society minor explores the development of religious traditions worldwide, asking how religious beliefs, practices, and institutions have helped shape culture, politics, and ideology from pre-modern times to the present. Courses in the minor push students to consider the multifarious ways in which religion structures society and is structured by it.

Completion Requirements

30 credits

1. 30 credits from approved course list, of which 20 credits must be upper-division
2. Minimum 2.00 cumulative GPA in courses applied toward the minor
3. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

Minor in History of Science

Credential Overview

The history of science minor gives students an introduction to the development of science in history, and its historical interpretation. It includes survey courses, a junior methods seminar, and an independent study project undertaken with the advice of a faculty member.

Completion Requirements

25 credits

1. 25 credits, including HSTCMP 311, HSTCMP 312, HSTRY 390, and HSTRY 493; plus one course from an approved list of elective courses
2. Minimum 2.0 grade required in each course

Minor in History of War and Society

Credential Overview

The history of war and society minor explores experiences of civil and international wars as a means to question how violence, conflict, and other traumatic acts have shaped political, social, and cultural formations in the past and present. In addition to military history, courses in this minor examine the following aspects of war's linkage to society: how the experiences and exigencies of war create conditions for broader changes, including changes in notions of territorial integrity, sovereignty, national belonging, citizenship, gender, and race, as people are called to serve in battle zones and on the home front.

Completion Requirements

30 credits

1. 30 credits from approved course list, of which 20 credits must be upper-division
2. Minimum 2.00 cumulative GPA in courses applied toward the minor
3. Minimum 15 of the 20 upper-division credits must be completed in residence through the UW. Up to 5 credits may overlap with other minors.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of history enhances critical thinking and writing skills. It is a creative process in which students learn to use arguments and evidence to communicate a sound historical thesis. It is a liberal arts degree that encourages students to become well rounded, educated people. Graduates are prepared for a variety of careers in many professions and businesses. In addition to teaching, research, and museum and archives work, recent graduates have pursued careers as political lobbyists, journalists, and law enforcement officers. Many history majors pursue, and are well prepared for, further education and professional programs such as medicine, law, library science, and museum curatorship.
- *Instructional and Research Facilities:* The department funds a writing center for students enrolled in history courses. The department also has a small computer laboratory available for history majors.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department encourages students to participate in internships that include historical elements. Students work with a sponsoring organization and a history faculty member. See adviser for details.
- *Department Scholarships:*
 - *The Faye Wilson Scholarship* is awarded to students emphasizing

U.S. history and *the Schwartz Fellowship* to students pursuing historical study of a non-western civilization. The *Freedman Remak Scholarship* is awarded to non-resident history majors based on academic merit.

- History majors may compete for two paper prizes: *the Thomas Power Prize* for papers written in a history course during the last year, and the *York/Mason Award* for history papers written on African Americans in the West.
- The *Millican Fund* and the *Willstadter Snow-Smith Award* provide funding for travel in the course of historical research.
- In addition, the department allows students to nominate their high school history teacher for the *Pressly Prize*, which honors excellence in education.
- Scholarship and prize competitions run in February and March of each year. See adviser for details.
- *Student Organizations/Associations:* Phi Alpha Theta, a history honors society. See adviser for details.

Integrated Social Sciences

208 [Cunningham Hall](#)

206-685-2695

[Website](#)

[Faculty Website](#)

issadv@uw.edu

Integrated Social Sciences is an online bachelor's degree completion program in the College of Arts and Sciences. ISS is a 60-credit interdisciplinary major, offering courses from across the social sciences, and an integrative set of core courses. General Education requirements are the same as for all A&S majors. Students with 75 transferable credits and an overall GPA of 2.0 are eligible for admission, including new transfer students, and returning and continuing UW Seattle undergraduates. Career fields open to ISS graduates include government and public policy, international affairs, law and law enforcement, nonprofit management, education and research, library science, business and management, communication and information technology, marketing and sales, social media, human resources, social services, and many more fields appropriate for liberal arts graduates.

Undergraduate Program

206-685-2695

issadv@uw.edu

Program of Study: Major: Integrated Social Sciences

Program Overview

Integrated Social Sciences (ISS) is an online bachelor's degree completion program in the College of Arts and Sciences and in

partnership with UW Continuum College. ISS offers courses from across the social sciences, including anthropology, communications, economics, history, international studies, philosophy, political sciences, sociology, and more. An integrative set of core courses provides a common intellectual foundation and supports a reflective, intentional student learning practice. General Education requirements are the same as for all A&S majors. Career fields open to ISS graduates include government and public policy, international affairs, law and law enforcement, nonprofit management, education and research, library science, business and management, communication and information technology, marketing and sales, social media, human resources, social services, and many more fields appropriate for liberal arts graduates.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Integrated Social Sciences

Recommended Preparation

Suggested First- and Second-Year College Courses: General coursework developing critical thinking, analytical, and writing skills. Coursework which satisfies general education requirements for the College of Arts and Sciences, including courses in English composition, foreign language, and reasoning.

Admission Requirements

1. Minimum 75 transferable quarter credits
2. Minimum 2.00 GPA in all transferable college coursework
3. Minimum 2.50 GPA in all courses applied to ISS major requirements

4. Completion in high school or community college of College Academic Distribution Requirement (CADR).
5. Demonstrated progress toward University and College of Arts and Sciences general education requirements

ISS accepts only program-specific students. Admission is competitive. Completion of minimum admission requirements does not guarantee admission to the University. In addition, applicants are evaluated on the following criteria: (1) overall academic record; (2) a personal statement; (3) likelihood of success in an online-format program, based on a separate application question.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Integrated Social Sciences

Credential Overview

Integrated Social Sciences (ISS) is an online bachelor's degree completion program in the College of Arts and Sciences and in partnership with UW Continuum College. ISS offers courses from across the social sciences, including anthropology, communications, economics, history, international studies, philosophy, political sciences, sociology, and more. An integrative set of core courses provides a common intellectual foundation and supports a reflective, intentional student learning practice. General Education

requirements are the same as for all A&S majors. Career fields open to ISS graduates include government and public policy, international affairs, law and law enforcement, nonprofit management, education and research, library science, business and management, communication and information technology, marketing and sales, social media, human resources, social services, and many more fields appropriate for liberal arts graduates.

Completion Requirements

60 credits

1. *ISS Core (20 credits)*: ISS 301; ISS 302; ISS 350; ISS 355; ISS 401
2. Thematic areas courses (40 credits), to include at least one 5-credit course from each of five of the following seven areas of inquiry: (1) information and technology; (2) population movement; (3) conflict and cooperation; (4) diversity and global justice; (5) inequalities and power; (6) health and risk; (7) societies and environments. Three or more disciplinary prefixes must be included. The list of approved courses is available from the ISS advising office or the program website.
3. 20 of the 40 thematic areas course credits must be upper division.
4. Minimum 45 credits applied to major requirements must be taken through the UW ISS program.
5. Minimum 2.00 cumulative GPA in courses applied to major requirements
6. Completion of all Arts and Sciences general education requirements

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The Integrated Social Sciences program fosters intentional learning, analytical thinking, communication, cultural competence, and global citizenship. By degree completion, all students should be able to:
 - Explain social scientific research in terms of questions, theories, methods, and findings
 - Construct, debate, and communicate arguments about social phenomena
 - Evaluate, integrate, and critique information and sources
 - Collaborate with diverse communities and demonstrate cultural competence

ISS majors learn how to reflect thoughtfully on their learning and how to articulate what they have learned to others. They accomplish these important goals by developing an ongoing learning plan and by creating a web-based learning portfolio that is transformed into a polished showcase of learning in the capstone course (ISS 401).

- *Honors Options Available*: None
- *Research, Internships, and Service Learning*:
 - Internships and Public Service: ISS students are eligible to earn credit via online sections of GEN ST 350 for approved experiential learning in both the private and public sectors.
 - Undergraduate Research and Independent Study: ISS students may earn credit via appropriate department-based courses for approved independent study or research projects. Credit is typically awarded through the supervising faculty person's home department.

- *Department Scholarships:* None offered
- *Student Organizations/Associations:* None currently active

Program of Study: Major: Comparative Religion

Program Overview

The program in Comparative Religion is known for its unusually large range of course offerings in the religious traditions of both the East and West. The faculty has particular strength in history, anthropology, and sociology. Participants in the program have an opportunity to enroll in small

classes and interact with a faculty that puts emphasis on maintaining close contact with students. Comparative Religion has four tracks: History of Religions-Western Emphasis; History of Religions-Eastern Emphasis; Religion and Society; and Religion and Symbolic Expression. The program offers a Bachelor of Arts degree in Comparative Religion.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Comparative Religion

Recommended Preparation

Suggested First- and Second-Year College Courses: JSIS C 201, JSIS C 202. Courses that develop writing proficiency. Courses in particular religious traditions such as Christianity, Judaism, Islam, Hinduism, and Buddhism. Courses in the history of civilizations such as Chinese, South Asian, and Western.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Comparative Religion

Credential Overview

The program in Comparative Religion is known for its unusually large range of course offerings in the religious traditions of both the East and West. The faculty has particular strength in history, anthropology, and sociology. Participants in the program have an opportunity to enroll in small classes and interact with a faculty that puts emphasis on maintaining close contact with

students. Comparative Religion has four tracks: History of Religions-Western Emphasis; History of Religions-Eastern Emphasis; Religion and Society; and Religion and Symbolic Expression. The program offers a Bachelor of Arts degree in Comparative Religion.

Completion Requirements

55 credits

1. JSIS C 201, JSIS C 202; JSIS B 380/CHID 380; JSIS 201
2. 35 additional credits in comparative religion courses, of which at least 15 must be at the 300 level or above, selected from the three rubrics of textual canons, historical traditions, and social contexts and cultural forms. The distribution must include at least 5 credits and no more than 20 credits in any particular rubric.

Program of Study: Major: Global and Regional Studies

Program Overview

The Jackson School combines the social sciences, humanities, and professional fields to enhance understanding of our increasingly interconnected world. The Global and Regional Studies program equips students with the skills (including writing and foreign languages) and the disciplinary tools needed to analyze global and regional issues and challenges. Students can choose from a variety of thematic and regional concentrations in shaping their course of study. The program's capstone experience provides students with a bridge between their academic and professional pursuits, either by participating in a team-based creation of policy reports and recommendations that are evaluated by

external policy experts or by deepening their research and publication skills.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Global and Regional Studies

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Global and Regional Studies

Credential Overview

The Jackson School combines the social sciences, humanities, and professional fields to enhance understanding of our increasingly interconnected world. Students can choose from a variety of thematic and regional concentrations in shaping their course of study. The program's capstone experience provides students with a bridge between their academic and professional pursuits, either by participating in a team-based creation of policy reports and recommendations that are evaluated by external policy experts or by deepening their research and publication skills.

Completion Requirements

Competency in a language other than English through the second-year college level (proficiency requirement prior to graduation), plus 50 credits as follows:

1. Introductory Courses: 15 credits from JSIS 200, JSIS 201, JSIS 202, JSIS 203, RELIG 201, RELIG 202.
2. Political Economy: 5 credits from list of approved courses. Refer to department website for list of approved courses.
3. Culture, Power & Religion: 5 credits from list of approved courses. Refer to department website for list of approved courses. No overlap allowed with courses chosen in "Concentration I/Themes".
4. Concentration I/Themes: 10 credits from one of following themes: (1) Environment and Health; (2) States and Markets; (3) Culture, Power and Religion; (4) Technology, Security and Diplomacy; (5) Rights and Movements. Refer to department website for list of approved courses.
5. Concentration II/Regions: 10 credits in one of the following regions: (1) Africa; (2) Americas; (3) Europe; (4) Russia/Eastern Europe/Central Asia; (5) Asia; (6) Middle East; (7) Arctic. Refer to department website for list of approved courses.
6. Capstone Experience (5 credits): JSIS 495 or JSIS 498
7. Minimum 25 credits taken in 300/400 level courses.
8. Minimum 2.00 cumulative GPA in courses applied to the major.

Program of Study: Major: International Studies: Asia

Program Overview

The International Studies (Asia) major provides students with the background and analytical tools to understand the history and contemporary issues in Asia's many regions and countries. Students in this major can choose a general and cross-regional course of study, or they can concentrate in one of

five countries/regions: China, Korea, Japan, South Asia and Southeast Asia. Students may select any Asian language to fulfill the programs two-year college-level language requirement. Students who are native speakers of an Asian language may satisfy this requirement by demonstrating proof of fluency or proficiency through the second year college level.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in International Studies: Asia

Recommended Preparation

Suggested First- and Second-Year College Courses: Either JSIS 203 or JSIS A 207, and two introductory Asian civilization courses (see major requirements, below). Progress toward two years of a relevant Asian language. Courses that develop writing skills, especially in the social sciences.

Admission Requirements

Students in good academic standing may declare this major at any time.

**Bachelor of Arts degree with a major
in International Studies: Asia**

Completion Requirements

80 credits

1. 30 credits or second-year equivalent language training in a language appropriate to student's concentration, plus 50 credits as follows:
2. Either JSIS 203 or JSIS A 207 (5 credits)
3. JSIS 201 (5 credits)
4. An Asian civilization course in student's concentration chosen from JSIS A

212/HSTAS 212, JSIS A 241/HSTAS 241, JSIS A 242, HSTAS 201, HSTAS 202, HSTAS 211, JSIS A 206, JSIS A 221/HSTAS 221 (5 credits)

5. 35 credits of approved coursework from one regional or country concentration, or from the general Asia concentration
6. Approved research paper required in one of the upper-division concentration courses
7. Minimum grade of 2.0 in all courses counted toward the major (except first- and second-year language courses, where grades must average 2.00)
8. 30 of the 35 credits required for the concentration requirement must be taken in residence through the UW.

Program of Study: Major: International Studies: Canada

Program Overview

The Canadian Studies Program is an interdisciplinary program designed to promote the understanding of Canada, of Canada's relationships with the United States, and of Canada's major role in the Commonwealth and in the United Nations. Core courses introduce the student to the origins and evolution of the Canadian people, their society and culture; interdisciplinary courses broaden the student's scope of understanding. Canada-related courses are offered as well in many of the university's professional schools. Language competency in French through the second year is required for completion of the B.A. degree.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in International Studies: Canada

Recommended Preparation

Suggested First- and Second-Year College Courses: ECON 200, ECON 201. Progress toward two years of French language. Canadian history courses. Courses that develop writing skills.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in International Studies: Canada

Completion Requirements

30 credits or second-year-equivalent French language training, plus 53 credits as follows:

1. JSIS 200, JSIS 201, JSIS 202; ECON 200, ECON 201; JSIS A 356, JSIS A 498
2. Minimum 18 credits from approved Canadian Studies elective course list

Program of Study: Major: International Studies: Europe

Program Overview

The European Studies major prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today. These include the legacies of the Cold War and the complex dynamics of European political and economic integration. Students gain analytical and writing skills that can be

applied widely in a wide variety of professional areas. The equivalent of second-year proficiency in a European language is required by the time of graduation, either through language study or placement testing.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in International Studies: Europe

Recommended Preparation

Suggested First- and Second-Year College Courses: Progress toward two years of a modern European language. A survey course on modern Europe.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in International Studies: Europe

Completion Requirements

50 credits plus language proficiency

Modern European language through second year, either through proficiency test or successful completion of an applicable second college-level year (e.g., Spanish 203). See approved list.

1. JSIS A 301 (5 credits)
2. JSIS 201 (5 credits)
3. European history (10 credits from approved list)
4. Global elective (5 credits from approved list)

5. European Studies electives (20 credits from approved list; minimum 15 credits at 300-400 level)
6. European Studies senior capstone: JSIS A 494 or JSIS A 495 (5 credits)
7. Minimum cumulative 2.0 GPA in all European Studies major courses

Program of Study: Major: International Studies: Jewish Studies

Program Overview

The Jewish Studies major offers students from varied backgrounds and disciplines a comprehensive and interdisciplinary perspective on the study of Jews and Judaism. Students learn about the geographic, historical, philosophical, and cultural diversity of the Jewish experience, including contemporary. They also gain critical and analytical skills that can be applied widely, including to the understanding and study of current challenges facing Jews and Judaism in the world.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in International Studies: Jewish Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: JSIS C 145; JSIS C 250/HSTCMP 250; JSIS C 201; JSIS 200, JSIS 201, or JSIS 202. Courses that develop critical analysis skills and writing proficiency. Courses in modern or biblical Hebrew.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in International Studies: Jewish Studies

Credential Overview

The Jewish Studies major offers students from varied backgrounds and disciplines a comprehensive and interdisciplinary perspective on the study of Jews and Judaism. Students learn about the geographic, historical, philosophical, and cultural diversity of the Jewish experience, including contemporary. They also gain critical and analytical skills that can be applied widely, including to the understanding and study of current challenges facing Jews and Judaism in the world.

Completion Requirements

50 credits

1. Either proficiency in one Jewish language, completion of two years (or equivalent) in one Jewish language, or completion of one year each (or equivalent) in two different Jewish languages. See adviser for approved Jewish languages. Students who wish to satisfy language requirements by demonstrating sufficient knowledge may take a proficiency examination. See department adviser for information.
2. Introductory Courses (15 credits): JSIS C 145; JSIS C 250/HSTCMP 250; one of JSIS 200, JSIS 201, or JSIS 202
3. Minimum 35 credits of electives from an approved list. May include up to 10 credits from the second year of Jewish

language courses. See adviser for approved list.

4. Minimum 25 credits at the 300-400 level
5. Maximum 15 credits from an approved UW Study Abroad program (exclusive of language)
6. Minimum 2.00 cumulative GPA for courses applied to the major

Program of Study: Major: International Studies: Latin America and Caribbean

Program Overview

The Latin American and Caribbean Studies major provides a comprehensive and interdisciplinary understanding of this major world region, emphasizing themes such as economic development, the role of the region in the global economy, the indigenous experience, popular movements, and relations between the region and the United States. Students will need second-year proficiency of one regional language, and first-year proficiency year of another regional language, by the time they graduate.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in International Studies: Latin America and Caribbean

Recommended Preparation

Suggested First- and Second-Year College Courses: Substantial progress toward completing the language requirement described below. Courses in any of the following disciplines that deal with Latin America and the Caribbean: history,

literature, economics, geography, sociology, political science.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in International Studies: Latin America and Caribbean

Completion Requirements

52 credits plus language training, as follows:

1. Training in two foreign languages of Latin America and the Caribbean, to include the sixth quarter (or equivalent) of one language chosen from Spanish, Portuguese, or French, and the third quarter (or equivalent) of a second of these languages
2. JSIS 201
3. Latin American History (10 credits): Courses to be selected from an approved list.*
4. Contemporary Latin America (15 credits): Courses drawn from a range of disciplines including anthropology, comparative literature, geography, international studies, and Spanish. See program website for a complete list of courses.
5. Electives (15 credits): Courses on Latin America, the Caribbean, and international studies selected from an approved list*
6. Interdisciplinary Seminar: JSIS A 486, JSIS A 492, or another course chosen from an approved list of research seminars
7. JSIS 493: Senior paper or project

*See department website for list of approved courses.

Program of Study: Minor: Arctic Studies

Program Overview

Arctic & International Relations is a Henry M. Jackson School of International Studies (JSIS)-wide initiative, led by the Canadian Studies Center since 2008, to address the Arctic as an emerging global region and actor on the world stage. JSIS and the Center are working in partnership with a parallel initiative, Future of Ice – a College of the Environment, College of Arts and Sciences, and Applied Physics Laboratory initiative – to enhance the University of Washington’s (UW) profile in research, education and public engagement about the polar regions. JSIS and School of Oceanography proposed a minor in Arctic Studies that has been signed; the Office of Global Affairs, and the College of Arts and Sciences and the College of the Environment have sponsored a Canada Fulbright Visiting Chair in Arctic Studies; and, the Center, JSIS and a number of units in both colleges are collaborating on several projects.

This program of study leads to the following credential:

- Minor in Arctic Studies

Minor in Arctic Studies

Completion Requirements

Minimum 28 credits

1. Foundation Coursework (9 credits): ARCTIC 200; OCEAN 235; ARCTIC 401
2. Integrative Experience (3 credits): ARCTIC 400

3. Electives (minimum 16 credits): see adviser for approved list
4. Minimum two courses from the approved social sciences list
5. Minimum two courses from the approved sciences list
6. Minimum one course with North-Star designation; may be combined with social science or science elective offering
7. Minimum 2.00 cumulative GPA for courses applied to the minor
8. Minimum 15 credits taken from outside student's major requirements
9. Minimum 15 credits 300- and 400-level coursework
10. Minimum 15 credits completed in residence through the UW

Program of Study: Minor: Comparative Religion

Program Overview

The program in Comparative Religion is known for its unusually large range of course offerings in the religious traditions of both the East and West. The faculty has particular strength in history, anthropology, and sociology. Participants in the program have an opportunity to enroll in small classes and interact with a faculty that puts emphasis on maintaining close contact with students. Comparative Religion has four tracks: History of Religions-Western Emphasis; History of Religions-Eastern Emphasis; Religion and Society; and Religion and Symbolic Expression.

This program of study leads to the following credential:

- Minor in Comparative Religion

Minor in Comparative Religion

Completion Requirements

30 credits as follows:

1. JSIS C 201, JSIS C 202
2. 15 additional credits in comparative religion courses or joint-listed equivalents
3. 5 additional credits chosen from comparative religion courses or from an approved list of electives. See department website for approved list of courses.

Program of Study: Minor: Hellenic Studies

Program Overview

The minor in Hellenic Studies is designed for students interested in acquiring a comprehensive study of the Greek world, from antiquity to the present. The curriculum of the Hellenic Studies program draws on the histories and methodologies of the Social Sciences and the Humanities, encompassing a broad range of courses in the disciplines of Classics, Comparative Literature, Classical Archaeology, History, Art History, Comparative Religion, Political Science and Philosophy. Hellenic Studies enables students to study the Greek world in depth and from a variety of scholarly perspectives.

This program of study leads to the following credential:

- Minor in Hellenic Studies

Minor in Hellenic Studies

Credential Overview

Completion Requirements

25 credits

1. Minimum 5 credits from history and 10 credits from contemporary Greece (see department website for list of approved courses) (15 credits)
2. Electives (see department website for list of approved courses) (10 credits)
3. Minimum 15 credits at the 300-400 level

Program of Study: Minor: International Studies

Program Overview

The Jackson School combines the social sciences, humanities and professional fields to enhance understanding of our increasingly interconnected world. The International Studies (General) program equips students with the skills and tools needed to analyze global issues and challenges. The minor exposes students to a variety of regional and thematic classes and

allows them explore issues of global reach in an interdisciplinary course of study.

This program of study leads to the following credential:

- Minor in International Studies

Minor in International Studies

Credential Overview

The International Studies (general) minor combines study of the social sciences to understand global issues. Using a multidisciplinary approach the minor encourages students to look at our increasingly interdependent world in order to learn how to study it and better understand its politics, societies, economies, and cultures.

Completion Requirements

30 credits:

1. 10 credits chosen from JSIS 200, JSIS 201, JSIS 202
2. 15 credits in JSIS B-prefix courses, including at least 10 credits at the 300 or 400 level (courses with other JSIS prefixes are not eligible, but JSIS 478 may be counted).
3. 5 additional credits chosen from courses in any of these prefixes: JSIS A, JSIS B, JSIS C, JSIS D
4. Minimum 2.0 grade required in each course applied toward the minor.

Program of Study: Minor: International Studies: Africa and the African Diaspora

Program Overview

African Studies involves a cross-campus, interdisciplinary group of faculty, staff, and students who have an interest in questions relating to Africa and the African Diaspora. Africa-focused courses are taught in a variety of scholarly disciplines and programs, including Aquatic & Fishery Sciences, American Ethnic Studies, Anthropology, Architecture, Art History, Bioengineering, Comparative History of Ideas, English, Ethnomusicology, Forest Resources, French, Genome Sciences, Geography, Global Health, Health Services, History, Honors Program, Interdisciplinary Arts & Sciences (UW-Bothell), Interdisciplinary Arts & Sciences (UW-Tacoma), International Studies, Linguistics, Marine Affairs, Music, Near Eastern Languages & Civilizations, Nursing, Public Affairs, Political Science, School of Law, School of Nursing, School of Public Health, Social Work, Sociology, and Gender, Women & Sexuality Studies.

This program of study leads to the following credential:

- Minor in International Studies: Africa and the African Diaspora

Minor in International Studies: Africa and the African Diaspora

Credential Overview

African Studies involves a cross-campus, interdisciplinary group of faculty, staff, and students who have an interest in questions relating to Africa and the African Diaspora.

The minor in Africa and the African Diaspora offers students a wide variety of courses on Africa and on the historical and current experiences of peoples and communities with historical roots in Africa.

Completion Requirements

30 credits

1. 30 credits from at least three departments whose approved courses are shown on the African Studies website
2. Minimum 15 credits at the 300 level or above
3. Minimum 5 credits from the approved list of courses on the African diaspora
4. Minimum 10 credits from the approved list of courses on Africa
5. Maximum 10 credits of language courses, which may include 5 credits at the third-year level or above from the Africa-relevant languages of Arabic, French, or Portuguese and 10 credits of Swahili at the second-year level or above
6. Other courses not on the website may be approved by the program office.
7. Minimum 15 credits completed through the UW
8. Minimum 2.0 grade in each course applied toward the minor

Program of Study: Minor: International Studies: Canada

Program Overview

The Canadian Studies Program is an interdisciplinary program designed to promote the understanding of Canada, of Canada's relationships with the United States, and of Canada's major role in the Commonwealth and in the United Nations. Core courses introduce the student to the

origins and evolution of the Canadian people, their society and culture; interdisciplinary courses broaden the student's scope of understanding. Canada-related courses are offered as well in many of the university's professional schools.

This program of study leads to the following credential:

- Minor in International Studies: Canada

Minor in International Studies: Canada

Completion Requirements

25 credits

1. JSIS A 356 and JSIS A 498 (10 credits)
2. 15 credits of electives chosen from an approved list. See department website for approved list of courses.
3. Minimum grade of 2.0 in each course applied to the minor
4. Minimum 15 credits toward the minor completed through the UW

Program of Study: Minor: International Studies: China

Program Overview

The China concentration in Asian Studies provides students with a sound foundation in one or more aspects of the study of China. The faculty has particular strength in history, both modern and pre-modern, as well as the social sciences. In addition, an extensive range of outstanding courses is available in the areas of language and literature. Students in the China Program are encouraged to take advantage of intensive overseas language training offered by the Inter-University Program in Taipei or the

Beijing Chinese Language Program available through Beijing University.

This program of study leads to the following credential:

- Minor in International Studies: China

Minor in International Studies: China

Completion Requirements

30 credits

1. HSTAS 211 and either JSIS C 202 or one additional introductory Asian civilization course (10 credits)*
2. 10 credits of electives taken through the UW, chosen from the China history/social science electives list*
3. 5 credits of electives taken through the UW, chosen from the China history/social science list or the China arts/literature electives list*
4. 5 additional credits chosen from: the China history/social science electives list*, or upper-division transfer courses on China, or Chinese language beyond second-year level.
5. Minimum grade of 2.0 required in each course applied toward the minor

*See department website for list of approved courses.

Program of Study: Minor: International Studies: Comparative Islamic Studies

Program Overview

The program in Comparative Religion is known for its unusually large range of course offerings in the religious traditions of both the East and West. The faculty has

particular strength in history, anthropology, and sociology. Participants in the program have an opportunity to enroll in small classes and interact with a faculty that puts emphasis on maintaining close contact with students. Comparative Religion has four tracks: History of Religions-Western Emphasis; History of Religions-Eastern Emphasis; Religion and Society; and Religion and Symbolic Expression.

This program of study leads to the following credential:

- Minor in International Studies:
Comparative Islamic Studies

Minor in International Studies: Comparative Islamic Studies

Completion Requirements

30 credits

1. NEAR E 210/JSIS A 210 (5)
2. NEAR E 211/JSIS C 211 or NEAR E 212/JSIS C 212 (5)
3. 10 credits in Islamic religious traditions and texts, chosen from an approved list (see department website)
4. 10 credits in history, society, and culture of Islam, chosen from an approved list (see department website)
5. Minimum grade of 2.0 in each course counted toward the minor

Program of Study: Minor: International Studies: Europe

Program Overview

The purpose of the curriculum in European Studies is to help prepare students to pursue careers requiring an understanding of all the

forces, both material and cultural, contemporary and historical, that are shaping Europe today, in the transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations of Europe West, East, North and South. Students may pursue European Studies either as an area concentration for its own sake or as a supplement to the development of particular expertise in a related discipline. Students may also focus, within the major, on Hellenic Studies or Russian, east European and Central Asian Studies.

This program of study leads to the following credential:

- Minor in International Studies: Europe

Minor in International Studies: Europe

Completion Requirements

25 credits

1. JSIS A 301 (5 credits)
2. JSIS 201 (5 credits)
3. European Studies elective courses (15 credits from approved list)
4. Language proficiency through first-year (from approved list)
5. Minimum 15 credits at the 300-400 level

Program of Study: Minor: International Studies: Japan

Program Overview

The Japan concentration combines language training with interdisciplinary study to give students a solid background in one or more areas of Japanese studies. Students are offered courses to an advanced level in the following: interdisciplinary studies,

economics, business, political science, history, art, literature, and language. Advanced language training is available through the Inter-University Center for Japanese Language Studies in Tokyo, of which the University of Washington is a sponsoring member.

This program of study leads to the following credential:

- Minor in International Studies: Japan

Minor in International Studies: Japan

Credential Overview

The Japan concentration combines language training with interdisciplinary study to give students a solid background in one or more areas of Japanese studies. Students are offered courses to an advanced level in the following: interdisciplinary studies, economics, business, political science, history, art, literature, and language. Advanced language training is available through the Inter-University Center for Japanese Language Studies in Tokyo, of which the University of Washington is a sponsoring member.

Completion Requirements

30 credits

1. JSIS A 241/HSTAS 241 or JSIS A 242 and one course on a different Asian civilization (10 credits)*
2. 10 credits of electives taken through the UW, chosen from the Japan history/social science electives list*
3. 5 credits of electives taken through the UW, chosen from either the Japan history/social science list or from the Japan arts/literature elective list*

4. 5 additional credits chosen from: the Japan history/social science electives list*, or upper-division transfer courses on Japan, or Japanese language beyond second-year level.
5. Minimum grade of 2.0 required in each course applied toward the minor.

*See department website for list of approved courses.

Program of Study: Minor: International Studies: Jewish Studies

Program Overview

Jewish Studies offers students from varied backgrounds and disciplines a comprehensive and interdisciplinary perspective on the study of Jews and Judaism. In learning about the geographic, temporal, philosophical, and cultural diversity of the Jewish experience, students gain critical skills that complement any direction of study and can be applied to myriad future aspirations.

This program of study leads to the following credential:

- Minor in International Studies: Jewish Studies

Minor in International Studies: Jewish Studies

Credential Overview

The Jewish Studies minor offers students from varied backgrounds and disciplines an interdisciplinary perspective on the study of Jews and Judaism. Students learn about the geographic, historical, philosophical, and

cultural diversity of the Jewish experience, including contemporary.

Completion Requirements

30 credits as follows:

1. JSIS C 145; JSIS C 250/HSTCMP 250 (10 credits)
2. 20 credits of Jewish studies courses from an approved electives list. See adviser or department website for list of approved courses. May include up to 5 credits of Jewish language courses.
3. Minimum 15 credits at the 300-400 level
4. Minimum 15 credits taken in residence through the UW
5. Minimum 2.00 cumulative GPA for courses applied to the minor

Program of Study: Minor: International Studies: Korea

Program Overview

The Paull Shin Korea Studies Program focuses on Korea within the broader context of East Asia. While it concentrates on the history, society, and language of Korea, courses on China and Japan are also an important part of the curriculum. In addition, visiting professors in other disciplines regularly complement the resident faculty.

This program of study leads to the following credential:

- Minor in International Studies: Korea

Minor in International Studies: Korea

Completion Requirements

30 credits

1. JSIS A 212/HSTAS 212 and one additional introductory Asian civilization course (10 credits)*
2. 20 credits of electives, 15 of which must be taken through the UW, to include: (a) 10 credits chosen from the list of core courses*; (b) 5 credits chosen from the list of core courses or the list of electives*; (c) 5 additional credits chosen from: the Korea history/social science electives list*, or upper-division transfer courses on Korea, or Korean language beyond second-year level.
3. Minimum grade of 2.0 required in each course applied toward the minor.

*See department website for list of approved courses.

Program of Study: Minor: International Studies: Latin America and Caribbean

Program Overview

The Latin American and Caribbean Studies minor provides an interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, the role of the region in the global economy, and the indigenous experience.

This program of study leads to the following credential:

- Minor in International Studies: Latin America and Caribbean

Minor in International Studies: Latin America and Caribbean

Completion Requirements

30 credits as follows, plus foreign language:

1. One year of Spanish or Portuguese, or equivalent proficiency
2. At least 5 credits in history chosen from an approved list*
3. At least 15 credits chosen from an approved list of courses on contemporary Latin America*
4. At least 10 additional credits chosen from the history or contemporary Latin America lists, or from an approved list of electives*
5. At least 20 of the 30 credits must be completed through the UW (UW foreign study programs included).
6. Minimum 2.0 grade required in each course applied toward the minor.

*See department website for list of approved courses.

Program of Study: Minor: International Studies: Middle East

Program Overview

Middle East Studies offers interdisciplinary programs at the undergraduate and graduate level. Students take courses through the Jackson School of International Studies and other departments on campus, covering Middle East issues and challenges in a variety of social science and humanities disciplines.

This program of study leads to the following credential:

- Minor in International Studies: Middle East

Minor in International Studies: Middle East

Credential Overview

The undergraduate curriculum in Middle East studies provides a grounding in the modern Middle East and a view of how this region fits into the world community politically, historically, and economically. To achieve this understanding, students in the minor take courses in the social sciences and the humanities related to the Middle East.

Completion Requirements

28-30 credits

1. Two courses chosen from JSIS A 210/NEAR E 210, JSIS A 215/NEAR E 213, ANTH 318, HIST 161, or HIST 163
2. 20 credits of electives chosen from the approved list. See department website for list of approved courses.
3. Study of a Middle East language is encouraged, but not required. A maximum 5 credits in Arabic, modern Hebrew, Persian, or Turkish language beyond the first-year level may be applied toward the 20 credits of approved electives. No credits from any first-year language course may be counted.
4. No more than 12 credits counted in the minor may also be counted toward requirements of a major.
5. Minimum 15 credits of 300-/400-level courses
6. Minimum 15 credits completed in residence through the UW
7. Minimum 2.00 cumulative GPA in courses applied to the minor.

Program of Study: Minor: International Studies: Russia, Eastern Europe and Central Asia

Program Overview

Russian, East European and Central Asian Studies offers interdisciplinary programs at the undergraduate and graduate level. Students take courses through the Jackson School of International Studies and other departments on campus, covering issues and challenges in the region in a variety of social science and humanities disciplines.

This program of study leads to the following credential:

- Minor in International Studies: Russia, Eastern Europe and Central Asia

Minor in International Studies: Russia, Eastern Europe and Central Asia

Credential Overview

A minor in Russian, East European, and Central Asian Studies (REECAS) allows students to select courses from a diverse range of courses involving history, politics, economics, languages and cultures. Drawn from Jackson School courses, as well as other departments, the REECAS minor is a solid complement to anyone interested in enhancing regional knowledge for future career placement.

Completion Requirements

30 credits from courses in at least three disciplines

1. JSIS A 301 (5 credits)

2. An approved modern REECAS survey course chosen from the approved list* (5 credits)
3. 20 credits of electives at the 300 level or above, chosen from the approved list*
4. Study of a regional language is encouraged, but not required. Maximum 10 credits of BCS, Czech, Estonian, Kazakh, Latvian, Lithuanian, Polish, Russian, Uighur, or Uzbek language beyond the first-year level may be applied toward the 30-credit total.
5. Minimum 15 credits completed in residence through the UW
6. Minimum 2.00 cumulative GPA in courses applied to the minor
7. Minimum 18 credits outside student's major
8. Participation in service learning and Study Abroad programs in completing minor requirements is encouraged.

*See department website for list of approved courses.

Program of Study: Minor: International Studies: South Asia

Program Overview

South Asia includes India, Pakistan, Bangladesh, Sri Lanka, Nepal, Sikkim, Bhutan, Maldives, Afghanistan and Tibet. Students are expected to gain proficiency in a South Asian language (Hindi, Urdu, Bengali and Sanskrit are offered regularly at all levels) and to pursue a course of study that includes both disciplinary concentration and interdisciplinary breadth. Students have opportunities to pursue language study in India through the program's membership in the American Institute of Indian Studies. Other organizations provide similar

opportunities for study in many of the other countries of the region.

This program of study leads to the following credential:

- Minor in International Studies: South Asia

Students have opportunities to pursue language study in India through the program's membership in the American Institute of Indian Studies. Other organizations provide similar opportunities for study in many of the other countries of the region.

Completion Requirements

30 credits

1. HSTAS 202 or JSIS A 200 (5 credits)
2. One additional introductory Asian civilization course (5 credits)*
3. 15 credits of electives taken through the UW, chosen from the approved list*
4. 5 additional credits chosen from: the South Asia history/social science electives list*, or upper-division transfer courses on South Asia, or a South Asian language beyond second-year level
5. Minimum grade of 2.0 required in each course applied toward the minor.

*See department website for list of approved courses.

Program of Study: Minor: International Studies: Southeast Asia

Program Overview

The Southeast Asian Studies concentration promotes the study of Viet Nam, Laos, Cambodia, Thailand, Indonesia, Malaysia, Burma, Singapore, Brunei, Timor Loro'sae and the Philippines. Core courses introducing students to the cultures and societies of the region are offered in the Jackson School and in the Departments of Anthropology and History. Additional courses are offered by the Departments of Geography, Asian Languages and Literature, Political Science, Sociology, and in the School of Public Health. Language instruction in Thai, Indonesian, Tagalog, Khmer, Burmese and Vietnamese is offered at beginning and intermediate levels, and Thai, Indonesian, Tagalog and Vietnamese offered at the advanced level.

This program of study leads to the following credential:

- Minor in International Studies: Southeast Asia

Minor in International Studies: Southeast Asia

Completion Requirements

30 credits

1. JSIS A 221/HSTAS 221 (5 credits)
2. One introductory Asian civilization course (5 credits)*

3. 15 credits of electives taken through the UW, chosen from the approved list*
4. 5 additional credits chosen from: the Southeast Asia history/social science electives list*, or upper-division transfer courses on South Asia, or a Southeast Asian language beyond second-year level.
5. Minimum grade of 2.0 required in each course applied toward the minor.

*See department website for list of approved courses.

Program of Study: Minor: Portuguese Language and Luso-Brazilian Studies

Program Overview

The Minor in Luso-Brazilian Studies offers a combination of Portuguese language classes with elective courses with a focus on the Luso-Brazilian world. The elective classes are offered in Latin American and Caribbean Studies, African Studies, Cultural Studies, Interdisciplinary Studies, Sociology, Anthropology, Film, History, Global Health, and other related areas.

This program of study leads to the following credential:

- Minor in Portuguese Language and Luso-Brazilian Studies

Minor in Portuguese Language and Luso-Brazilian Studies

Completion Requirements

25 credits

1. PORT 202, PORT 203, PORT 301 (PORT 299 may substitute for PORT 202 or PORT 203) (15 credits)
2. Two courses from the following: JSIS A 243, JSIS A 410, JSIS A 365/PORT 365, PORT 366, JSIS B 436/POL S 436, HSTLAC 482, JSIS A 355/SOC 355 (5 credits may be cross-listed with the student's major or from another minor/certificate) (10 credits)
3. Minimum 15 credits at the 300-400 level
4. Minimum 20 credits taken at the UW

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The majors offered in the School of International Studies emphasize development of critical thinking and provide a challenging framework for research and writing. Graduates attain competency in foreign language and an understanding of the political, economic, and cultural underpinnings of the global system and specific world regions. This background lays a foundation for advanced study in professional and academic disciplines, and for careers in the evolving global community. Graduates work in a wide range of jobs, depending on their interests and skills, including: Foreign Service officers, international trade specialists, political analysts, human rights associates, research assistants, social studies and language teachers, international student advisers, foreign study coordinators, program officers/managers for international non-profits and NGOs, foreign exchange specialists, international sales representatives/managers, import/export brokers, marketing analysts, associate

editors/publicists, international news writers/journalists.

- *Instructional and Research Facilities:* More than 1.5 million volumes in the University library system are related to international studies. The library has a large current international and domestic newspaper collection, with an emphasis on Slavic, South, and Southeast Asian papers and a selection of European papers. Specialized facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University's library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Jackson School undergraduates can draw upon an extensive roster of more than 500 UW Study-Abroad programs and exchanges, in 70 countries, to enrich their studies.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The School's Office of Career Services provides resources for students exploring job and internship opportunities. The Jackson School has limited funds available for students who serve as unpaid interns in nonprofit and

governmental agencies. The Leslianne Shedd Memorial Internship Fund honors a Jackson School alumna killed while serving with the CIA. The Dorothy Fosdick Internship Fund is sponsored by the Henry M. Jackson Foundation in memory of the senator's foreign policy adviser. The George E. Taylor Internship Endowment supports students engaged in community-based internships. The Fathi-DiLuck Endowment supports unpaid internships with organizations in the greater Seattle area.

- *Department Scholarships:* Ivy Hovey Fitch Endowed Scholarship, Neal and Helen Fosseen Endowed Scholarship, David Hughes Endowed Scholarship (tuition); Vincent H. Gowen Scholarship (undergraduate-China); Margaret Mykut Scholarships; Ayako Betty Murakami Scholarship (Japan); I. Mervin and Georgiana Gorasht Scholarship, Arthur A. Jacobovitz Scholarship, Richard M. Willner Memorial Scholarship, and Jewish Studies Advisory Board Scholarship (Jewish Studies); Katherine M. Tyler Endowed Fellowships (Asia); Eugene and Marilyn Domoto Webb Scholarship and Marilyn Domoto Webb Fellowship (Comparative Religion); Margaret Mykut scholarships, Alice Wanamaker scholarships, and Jao scholarships (undergraduate study abroad). See also the funding opportunities described under Internships.
- *Student Organizations/Associations:* Jackson School Student Association

Law, Societies, and Justice

M253 [Smith Hall](#)

206-543-2396

[Website](#)

[Faculty Website](#)

lsjadv@uw.edu

Law, Societies, and Justice is an interdisciplinary program committed to challenging students to understand the forms and functions of law in an increasingly globalized world. The program engages students in critical and comparative examination of legal institutions, principles, practices, and power around the world, with a particular emphasis on the role of rights in shaping contemporary political and legal conflicts.

Undergraduate Programs

M253 [Smith Hall](#)

206-543-2396

lsjadv@uw.edu

Program of Study: Major: Law, Societies, and Justice

Program Overview

The Law, Societies, and Justice Program offers students opportunities to understand the complex roles of law in society. Law takes multiple forms and performs a wide array of important functions. At the same time, the work of law is shaped by numerous political, economic, social, cultural and geographic factors. Because of this, law “on the books” is not the same as law “in action.” Students in the LSJ major develop a deep appreciation for the variety of dynamics that shape the translation of law “on the books” to law “in action.”

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Law, Societies, and Justice

Recommended Preparation

Suggested First- and Second-Year College Courses: Courses that emphasize development of reading, writing, and especially analytical skills. Also, classes that provide background knowledge of modern world history, politics, institutions, and political theory.

Admission Requirements

1. Admission is capacity constrained, based on the following: GPA, with emphasis on grades in courses required for admission and for completion of major requirements (applicants accepted normally present cumulative UW GPAs above 2.50); personal statement representing the student's interest in and

commitment to becoming a Law, Societies, and Justice major; other evidence of a commitment to the study of society, justice, and law. Admitted applicants often show evidence of success in social science courses. (See department website or academic adviser for recommended social science courses.)

2. Minimum 2.50 cumulative UW GPA
3. Two of the following courses: LSJ 200 or LSJ 363/POL S 363; LSJ 320/POL S 368, LSJ 321/ANTH 323, LSJ 322/JSIS A 324, or LSJ 329; LSJ 367/POLS S 367 or LSJ 366/JSIS B 366
4. One English composition course. (Further evidence of writing skills in the social sciences is encouraged.)
5. Students may apply autumn, winter, or spring quarters. Application deadline: second Friday of the quarter. Students are notified of admission decisions by the sixth week of the quarter in which they apply.
6. Satisfactory progress to degree may be considered when making admission decisions.

Bachelor of Arts degree with a major in Law, Societies, and Justice

Completion Requirements

Minimum 53-55 credits

1. Completion of four LSJ core courses (20 credits):
 - a. one of LSJ 200 or LSJ 363/POL S 363 (5 credits)
 - b. two of LSJ 320/POL S 368, LSJ 321/ANTH 323, LSJ 322/JSIS A 324, or LSJ 329 (10 credits)
 - c. one of LSJ 367/POLS S 367 or LSJ 366/JSIS B 366 (5 credits)
2. Three courses from one of the two designated subfields of study

(comparative legal institutions; and rights) and two courses from the other subfield. See program website or advisers for list of approved courses. (23-25 credits)

3. One LSJ departmental seminar. Departmental seminar cannot count simultaneously towards the LSJ subfield requirements. (5 credits)
4. Completion of LSJ 401, which includes completion of 100 hours of volunteer experience or internship in a field related to LSJ. (5 credits)

Of Special Note: The required departmental seminar emphasizes close reading of texts, active class discussions, and well-reasoned analytic writing, providing an opportunity to establish a close connection to faculty and other students, and to hone analytic and communicative skills.

Program of Study: Minor: Law, Societies, and Justice

Program Overview

The undergraduate minor in Law, Societies, and Justice provides an opportunity for students to develop a multidisciplinary liberal arts orientation to the study of law, social control, and justice, with particular emphasis on the studies of crime, comparative law, and human rights. This knowledge is gained through critical examination of the research literature and exchange of ideas and information with other students and faculty.

This program of study leads to the following credential:

- Minor in Law, Societies, Justice

Minor in Law, Societies, Justice

Completion Requirements

28-30 credits

1. Two courses from the following: LSJ 320/POL S 368, or LSJ 321/ANTH 323, or LSJ 322/JSIS A 324; LSJ 363/POL S 363 or LSJ 200; LSJ 367/POL S 367 or LSJ 366/JSIS B 366; LSJ 375 or SOC 372. (10 credits)
2. Two courses from each LSJ major subfield. (Major subfields are "comparative legal institutions" and "rights." Courses fulfilling subfield requirements are outlined on the departmental website and handouts. (18-20 credits).

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Law, Societies, and Justice curriculum emphasizes the development of a range of analytic and communicative skills. Courses challenge students to develop the capacities to: read and interpret texts, including theoretical, empirical, and legal documents; comprehend and contrast arguments; develop and defend arguments; contrast theoretical arguments with empirical realities; assess contemporary practices of justice delivery against contemporary conceptions of justice. Students are required to express these skills in both verbal and written forms, through active class discussions and well-constructed writing assignments. Development of these skills assists students in a range of possible future endeavors, including a wide array of careers in law and justice.

- *Instructional and Research Facilities:* Students have access to the Political Science/Law, Societies, and Justice/School of International Studies writing center for most classes. Research opportunities are available on an individual and group basis with many professors.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* LSJ requires each of its majors to complete an internship for credit. Internship aims: (1) to provide students with insights into the workings of law in practice; (2) to scrutinize and 'test' some of the theories and concepts found in the literature against 'real world' practice; (3) to advance career development and goals, and (4) to provide 100 hours of local community service. Student assignments vary, and include government agencies, non-profit social service organizations, private law firms, rights-focused organizations, and other sites that focus on issues connected to LSJ coursework. It is the student's responsibility to find an internship, although the LSJ adviser can help find a suitable one. Students are required to write two papers according to specific guidelines for internship course credit. Many LSJ faculty regularly invite majors to assist them in the development and execution of research endeavors. These provide students an unparalleled opportunity to understand the challenges and mechanics of high-level research.
- *Department Scholarships:* The Stromberg Study Abroad Fund provides financial assistance to LSJ majors who

pursue Study Abroad opportunities in socio-legal studies.

- *Student Organizations/Associations:* The Law, Societies, and Justice Student Association sponsors regular events of interest to LSJ students, including career panels and service events.

Linguistics

414 [Guggenheim Hall](#)

206-543-2046

[Website](#)

[Faculty Website](#)

linguw@uw.edu

The Department offers degree programs in General Linguistics and Romance Linguistics, each leading to a BA, MA, or

PhD, and a Professional MS degree in Computational Linguistics (CLMS). In all programs, students study issues relating to any and all languages. General Linguistics students have a basic mastery of at least two languages from different language families, while Romance Linguistics students specialize in at least one Romance language. Computational Linguistics students study the underlying theory and current state of the art in speech and language processing technology. The Department also teaches ASL and Deaf Studies.

has-center@uw.edu

Program of Study: Major: Linguistics

Program Overview

Linguistics is the study of language as a natural phenomenon. It focuses on grammar, the social context of language variation, the physics of speech sounds, and the properties of language evolution. As language is an exclusively and intrinsically human characteristic, research on the structure, acquisition, and use of language cuts to the heart of human cognition and the social world, linking linguistics to psychology, anthropology, information science, and many other disciplines.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Linguistics

Recommended Preparation

Suggested First- and Second-Year College Courses: One year of a foreign language that belongs to a different family from the student's native language.

Admission Requirements

1. Completion of at least the third quarter, or equivalent, of a foreign language, with a minimum 2.0 grade
2. Completion of either LING 200, LING 400, or an approved introductory linguistics course; at least one writing (W) course; and one additional reasoning (RSN) course. Minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a 2.50 GPA or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

Bachelor of Arts degree with a major in Linguistics

Credential Overview

The degree program in General Linguistics leads to a BA. Students study issues relating to any and all languages. General Linguistics students have a basic mastery of at least two languages from different language families.

Completion Requirements

80 credits

1. LING 400 or other introductory course in linguistics
2. LING 450, LING 451, LING 461, LING 462

3. Minimum one additional 400-level LING course, excluding LING 400, LING 419, LING 430, LING 480, LING 490, and LING 499
4. At least one year of each of two languages, one of which must belong to a language family different than the student's native language, with a minimum grade of 2.0 in the third quarter of each language
5. 20 additional credits of departmentally approved courses in linguistics.

Program of Study: Major: Romance Linguistics

Program Overview

The degree program in Romance Linguistics, leads to a BA. Students study issues relating to any and all languages. Romance Linguistics students specialize in at least one Romance language.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Romance Linguistics

Recommended Preparation

Suggested First- and Second-Year Courses:
Two college years of study in a Romance language.

Admission Requirements

1. Completion of at least one year of college work in a single Romance language
2. Completion of either LING 200, LING 400, or an approved introductory linguistics course; at least one writing (W) course; and one additional

reasoning (RSN) course. Minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses.

3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

Bachelor of Arts degree with a major in Romance Linguistics

Credential Overview

The degree program in Romance Linguistics, leads to a BA. Students study issues relating to any and all languages. Romance Linguistics students specialize in at least one Romance language.

Completion Requirements

Minimum 63 credits

1. LING 400 or another introductory course in linguistics
2. LING 450, LING 451, LING 461, and LING 462
3. 15 credits at the 300 level or higher of one Romance language
4. LING 419
5. 20 additional credits of departmentally approved courses in linguistics, with at least one course for which a research paper on a Romance language is written

Program of Study: Minor: American Sign Language

Program Overview

An American Sign Language minor may be of particular interest to students in Speech

and Hearing Sciences, Education, Social Work, and Nursing.

This program of study leads to the following credential:

- Minor in American Sign Language

Minor in American Sign Language

Completion Requirements

33-35 credits

1. *Second-year American Sign Language (15 credits)*: ASL 201; ASL 202; ASL 203
2. *Culture and History (3 credits)*: ASL 305
3. *Theory and Structure (8-10 credits)*: LING 400 or LING 461; either ASL 343 or LING 403
4. Approved 300- 400-level electives (minimum 7 credits). See adviser for approved list.
5. Minimum 2.00 cumulative GPA for all courses applied to the minor
6. Minimum 18 credits from outside student's major requirements

Program of Study: Minor: Linguistics

Program Overview

A Linguistics minor may be of particular interest to students majoring in a foreign language, as well as majors in such fields as speech and hearing sciences, English, communication, psychology, computer science, and anthropology.

This program of study leads to the following credential:

- Minor in Linguistics

Minor in Linguistics

Credential Overview

A Linguistics minor may be of particular interest to students majoring in a foreign language, as well as majors in such fields as speech and hearing sciences, English, communication, psychology, computer science, and anthropology.

Completion Requirements

32 credits

1. LING 400 or another introductory course in linguistics
2. Three courses from LING 432, LING 442, LING 450, LING 451, LING 461, LING 462, or LING 481
3. 12 additional credits from a list of departmentally approved courses in linguistics, 6 of which must be in upper-division courses

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of linguistics emphasizes formal reasoning and critical thinking skills. Linguists' skill sets include the ability to analyze sound, word, and sentence structures of individual languages; the ability to understand and account for how languages change in certain patterns; the ability to understand how social factors can affect language, how people learn their first or second languages; and the ability to find out and appreciate how apparently vastly different languages can be governed by the same set of rules.

Linguistics is a valuable component of liberal education and vocationally can have applications wherever language itself becomes a matter of practical concern. Graduates have a good foundation for pursuing further training and careers in teaching languages, in areas of rehabilitative medicine such as audiology or speech therapy, in special education, in work with native peoples or with immigrant groups, in lexicographic work, in interpretation and translation, in work in computer science and artificial intelligence, or in academic disciplines such as psychology, philosophy, literature and language studies, where the contribution of linguistics is recognized. An undergraduate degree in linguistics from the UW also serves as preparation for graduate work in linguistics or language-related fields such as speech and hearing science or language teaching.

- *Instructional and Research Facilities:* The Language Learning Center located in Denny Hall provides audio and video services facilitating language learning. It also has a computer laboratory providing instructional software for linguistics and varieties of languages. Departmental facilities include a phonetics laboratory for students conducting phonetic experiments and doing digital acoustic analyses, a linguistics library that supplements the linguistics collection of the UW libraries and provides a quiet study place, and a computer laboratory for research in computational linguistics.
- *Honors Options Available:* With College Honors (Completion of both Honors Core Curriculum and Honors requirements in the major). With Honors (Completion of Departmental Honors requirements). See adviser for requirements.

- *Research, Internships, and Service Learning:* None offered
- *Department Scholarships:* None offered
- *Student Organizations/Associations:* The Linguistics Undergraduate Association (LingUA)

Mathematics

C138 [Padelford Hall](#)

206-543-1150

[Website](#)

[Faculty Website](#)

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern

science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics - tool of science and subject of inquiry for its own sake - have come to be interwoven into a complex fabric.

advising@math.washington.edu

Program of Study: Major: Mathematics

Program Overview

The Department of Mathematics offers four degree programs designed to meet the needs of students interested in the foundations of mathematics. Degrees promote competence in abstract thinking, logical rigor, analysis, expository clarity, and critical writing. Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, math is a surprisingly effective tool for describing the natural world. Math has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics - tool of science and subject of inquiry for its

own sake - have come to be interwoven into a complex fabric.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Mathematics
- Bachelor of Arts degree with a major in Mathematics: Philosophy
- Bachelor of Arts degree with a major in Mathematics: Teacher Preparation
- Bachelor of Science degree with a major in Mathematics

Admission Requirements

Admission to all programs is capacity constrained. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. The application and additional information are available at the department website.

Applicants are considered in two groups - Currently Enrolled UW Students and Entering Transfers.

1. *Currently Enrolled UW Students:* A portion of each year's class is admitted after matriculating to UW.

Admission Criteria

- a. *Minimum Course Requirements:* MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), with a minimum 2.0 grade in each of these calculus courses and an overall minimum 2.50 GPA in all mathematics courses.
- b. *Determining Factors:* Factors considered include performance in

all mathematics courses as measured by GPA, difficulty of all mathematics courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, amount and type of college-level credit, relevant work and life experience, and record of honors.

- c. *When to Apply:* Applications are accepted via catalyst twice each year. Deadline is the end of the day on January 15 and September 15.
2. *Entering Transfers.* A portion of each year's class is admitted from students transferring from another college or university.

Transfer student admission is capacity constrained.

Transfer applicants must submit a departmental application for the same quarter they submit an application to the University. Applicants must meet the following requirements:

- a. Minimum 30 graded college credits completed by the University transfer application deadline.
- b. Minimum course requirements: MATH 124, MATH 125, MATH 126 with a minimum 2.0 grade in each of these calculus courses and an overall minimum 2.50 GPA in all mathematics courses.
- c. *When to apply:* Application deadlines: April 5 for summer or autumn admission; October 5 for winter admission.

Factors considered include performance in all mathematics courses as measured by GPA, difficulty of all mathematics courses completed, frequency of incompletes or withdrawal grades,

number of repeated courses, amount and type of college-level credit, relevant work and life experience, and record of honors.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Mathematics

Credential Overview

The Standard option is intended for students who are interested in a versatile degree in Mathematics. Although the requirements for the degree are more liberal than those of the other options, we recommend choosing electives with the idea of gaining more knowledge in a specific area of mathematics, possibly in conjunction with a minor in a related area. Students can choose coursework in algebra, geometry, topology, combinatorics, analysis, number theory, optimization and probability.

Completion Requirements

51-55 credits

1. Core (27-31 credits)
 - a. Complete one of the following:
 1. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208
 2. MATH 134, MATH 135, MATH 136*
 - b. MATH 224, MATH 300
2. Electives (24 credits): Eight mathematics courses numbered 301 or higher,

including three at the 400-level, excluding MATH 398, MATH 399, MATH 497, MATH 498, MATH 499. No more than two courses numbered MATH 380 or MATH 480. MATH 420 cannot be applied toward the three required 400-level classes.

3. Minimum 2.0 grade in all courses presented to satisfy major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats
4. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through UW, Seattle.

*May receive advanced placement (AP) credit for MATH 124 (after completing MATH 134) and MATH 125 (after completing MATH 135).

Bachelor of Arts degree with a major in Mathematics: Philosophy

Credential Overview

The Philosophy option allows students to combine mathematics and philosophy. The math courses introduce the student to mathematical reasoning; the philosophy courses complement this method of reasoning with methods that have arisen within the historical tradition of philosophy. Students are encouraged to take coursework specifically in the areas of the Philosophy of Science or Mathematics.

Completion Requirements

65-69 credits

1. Core (30-34 credits)
 - a. Complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208

- ii. MATH 134, MATH 135, MATH 136*
- b. MATH 300, MATH 327, MATH 424
- 2. Advanced Math (15 credits): Five additional mathematics courses at the 300- or 400-level, including at least one two-quarter sequence at the 400-level other than MATH 407, MATH 408, or MATH 409.
- 3. Philosophy (20 credits): PHIL 120 or an upper-level course in logic; PHIL 100, PHIL 160, or PHIL 240; one philosophy course at the 300-level; one philosophy course at the 400-level
- 4. Minimum 2.0 grade in all courses presented to satisfy mathematics major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats.
- 5. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW.

*May receive advanced placement (AP) credit for MATH 124 (after completing MATH 134) and MATH 125 (after completing MATH 135).

Bachelor of Arts degree with a major in Mathematics: Teacher Preparation

Credential Overview

The Teacher Preparation option prepares students for teaching careers in secondary or middle schools. The majority of these majors go on to finish a Master's in Teaching. This degree requires students to complete specific coursework designed to give them an in-depth experience in Mathematics. Beyond learning the content of Mathematics, the coursework will teach students how to communicate Mathematics (and their love for the subject) to others.

Completion Requirements

58-63 credits

- 1. Core (24-28 credits):
 - a. Complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208
 - ii. MATH 134, MATH 135, MATH 136*
 - b. MATH 300
- 2. Upper-division (34-35 credits):
 - a. MATH 394, MATH 411, MATH 412, MATH 444, MATH 445
 - b. one of STAT 311, STAT 390, or Q SCI 381
 - c. 15 credits of approved electives at the 300- or 400-level in MATH, AMATH, or STAT courses (minimum 6 credits of electives from the Mathematics Department); or PHYS 407, PHYS 408, and PHYS 409.
- 3. Minimum 2.0 grade in all courses presented to satisfy the program requirements. Minimum 2.50 cumulative GPA in all mathematics courses at the University, including course repeats
- 4. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW

*May receive advanced placement (AP) credit for MATH 124 (after completing MATH 134) and MATH 125 (after completing MATH 135).

Bachelor of Science degree with a major in Mathematics

Credential Overview

For students wanting both a strong foundation and the freedom to shape their program in Mathematics. The B.S.

Mathematics- Standard Option gives students coursework in a range of Mathematics courses and is especially suited for students interested in the mathematical sciences.

Completion Requirements

69-76 credits

1. *Core (33-40 credits):*
 - a. Complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208
 - ii. MATH 134, MATH 135, MATH 136*
 - b. Complete one of the following:
 - i. MATH 224, MATH 300, MATH 327, MATH 424
 - ii. MATH 334, MATH 335, MATH 336**
2. *Advanced Mathematics (15-18 credits):*
At least six courses from the following, or five if using item b., either in two three-quarter sequences or three two-quarter sequences, with at least one sequence from items a. through d.
 - a. *Modern Algebra:* MATH 402, MATH 403, MATH 404
 - b. *Concepts of Analysis:* MATH 425, MATH 426. MATH 424 counts as the first course in the sequence.
 - c. *Complex Analysis:* MATH 427, MATH 428
 - d. *Topology & Geometry:* MATH 441, MATH 442, MATH 443
 - e. *Optimization:* MATH 407, MATH 408, MATH 409
 - f. *Combinatorics:* MATH 461, MATH 462
 - g. *Numerical Analysis:* MATH 464, MATH 465
 - h. *Probability:* MATH 491, MATH 492

Proficiency in items a. and b. is generally expected for graduate study in mathematics. In addition, items c. and d. are recommended for PhD programs in pure mathematics. Alternative combinations may be preferred for graduate study in other areas of the mathematical sciences and for industry careers. Consult Mathematics Student Services for more information.

3. *Electives (18-21 credits):* Six or seven additional mathematics courses at the 300- or 400-level from a list maintained by the Department. Courses from the Advanced Mathematics core sequences not used to fulfill that requirement may be used to fulfill the elective requirement.
4. A total of 12 courses (36 credits) taken from *Advanced Mathematics* and *Electives*.
5. Minimum 2.0 grade in all courses presented to satisfy mathematics major requirements. Minimum 2.00 cumulative GPA in all mathematics courses at the University, including course repeats.
6. Minimum 18 credits of graded mathematics courses numbered 300 or higher taken in residence through the UW Seattle campus.

*May receive advanced placement (AP) credit for MATH 124 (after completing MATH 134) and MATH 125 (after completing MATH 135).

**MATH 335 may also be used as one upper-division elective and MATH 336 may also be used either as MATH 427 or one upper-division elective.

Program of Study: Minor: Mathematics

Program Overview

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. The two facets of mathematics - tool of science and subject of inquiry for its own sake - have come to be interwoven into a complex fabric.

This program of study leads to the following credential:

- Minor in Mathematics

Minor in Mathematics

Credential Overview

A minor in Mathematics is intended to strengthen a student's mathematical skills while complementing their degree program. Students complete a set of core course requirements then can select coursework from a variety of Mathematical topics of interest to them.

Completion Requirements

Minimum 30 credits

1. *Core (18-20 credits)*: MATH 124 or MATH 134, MATH 125 or MATH 135, MATH 126 or MATH 136, MATH 300 or MATH 334.
2. *Electives (10-12 credits)*: mathematics courses numbered 301 or higher.
3. At least 9 credits of courses numbered 301 or higher taken in residence through the UW. Minimum 2.0 grade required for each course offered as part of the minor.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of mathematics emphasizes exposure to the core foundational areas of analysis, modern algebra, and geometry. A mathematician's skill set includes the technical tools specific to each area as well as the development of critical thinking skills necessary for logical reasoning. Graduates have pursued careers in teaching, finance, science, engineering, and professional fields such as law and medicine.
- *Instructional and Research Facilities*: Mathematical Research Library, Mathematics Study Center
- *Honors Options Available*: With College Honors (Completion of Honors core curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Washington Experimental Mathematics Lab. When available, internship opportunities are passed on to students.
- *Department Scholarships*: None offered.

- *Student Organizations/Associations:*
MAA Student Chapter, AWM Student Chapter, Actuarial Club, Math Club.

Microbiology

K343 [Fialkow Biomedical Sciences Research Pavilion \(K wing\)](#)

206-543-5824

[Website](#)

[Faculty Website](#)

micro@uw.edu

Microbiology is the study of the smallest living organisms (bacteria, algae, fungi, and protozoa) and viruses. Because of their simplicity and rapid growth rates, microorganisms are readily amenable to study in the laboratory. Because their

cellular processes closely resemble those of higher organisms they are ideally suited for fundamental studies of biological structure, physiology, metabolism, genetics and development. The Microbiology department at the University of Washington works mainly in cutting edge research in Bacteria and Viruses. The B.S. in Microbiology is complemented by the College of Arts and Sciences general educational requirements such as English Composition, Writing, Foreign Language, Reasoning, Arts & Humanities, and Social Sciences courses which provide a comprehensive liberal arts degree.

Sciences general educational requirements such as English Composition, Writing, Foreign Language, Quantitative & Symbolic Reasoning, Visual Literary & Performing Arts and Individuals and Societies courses which provide a comprehensive liberal arts degree.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Microbiology

Recommended Preparation

Suggested First- and Second-Year Courses: PHYS 114, PHYS 115, or PHYS 121, PHYS 122; one of the following: MATH 112, MATH 124, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

Admission Requirements

1. Minimum 75 credits applicable to graduation, with a minimum 2.00 overall cumulative GPA.
2. Completion of the following prerequisite courses with a minimum 2.50 cumulative GPA: BIOL 180; BIOL 200 (minimum 2.3 grade); BIOL 220; either

CHEM 142, CHEM 152, CHEM 162; or
CHEM 143 and CHEM 153; either
CHEM 223, CHEM 237, or CHEM 335

Completion Requirements

Minimum 90 credits (including microbiology courses) in the biological, physical, and mathematical sciences

1. Minimum 2.50 cumulative GPA in courses required for admission: BIOL 180; BIOL 200 (minimum 2.3 grade), BIOL 220; either CHEM 142, CHEM 152, and CHEM 162, or CHEM 143 and CHEM 153; either CHEM 223, CHEM 237, or CHEM 335
2. *Core Courses (8 credits)*: MICROM 402; MICROM 410; MICROM 496
3. *Distribution Groups and Electives (28 credits)*: Minimum one course from each of the following four distribution groups; minimum two laboratory courses. Remaining credits from additional courses from the distribution groups or from an approved list of electives. See adviser for approved list
 - a. *Medical Microbiology*: IMMUN 441, MICROM 442 MICROM 443, MICROM 460, or both MICROM 460 and MICROM 461
 - b. *Virology*: MICROM 445 or MICROM 450
 - c. *Diversity and Ecology*: MICROM 412 or MICROM 435
 - d. *Genetics and Molecular Biology*: MICROM 411; or MICROM 431; and either GENOME 361 or GENOME 371
4. Either PHYS 114 and PHYS 115; or PHYS 121 and PHYS 122 (PHYS 116 or PHYS 123 recommended)
5. Either MATH 112, MATH 124, MATH 144, Q SCI 381, STAT 220, or STAT 311
6. Either BIOC 405 and BIOC 406, or BIOC 440, BIOC 441, and BIOC 442
7. All required courses taken for a numerical grade unless course is offered credit/no-credit only. Minimum 2.25 cumulative GPA; minimum 1.8 grade in all MICROM and IMMUN core and elective courses applied to the major
8. Transfer students must complete at least 20 required and elective microbiology credits through the UW.

Program of Study: Minor: Microbiology

Program Overview

Microbiology is the study of the smallest living organisms (bacteria, algae, fungi, and protozoa) and viruses. Because of their simplicity and rapid growth rates, microorganisms are readily amenable to study in the laboratory. Because their cellular processes closely resemble those of higher organisms, they are ideally suited for fundamental studies of biological structure, physiology, metabolism, genetics and development. The Microbiology department at the University of Washington works mainly in cutting edge research in Bacteria and Viruses. Our minor program is great for students who want to add an extra area of concentration to their major, or are looking for more specific content to study at the micro level. It includes content from basic chemistry and biology, as well as upper division courses in bacteria and virology.

This program of study leads to the following credential:

- Minor in Microbiology

Minor in Microbiology

Credential Overview

Microbiology is the study of the smallest living organisms (bacteria, algae, fungi, and protozoa) and viruses. Because of their simplicity and rapid growth rates, microorganisms are readily amenable to study in the laboratory. Because their cellular processes closely resemble those of higher organisms, they are ideally suited for fundamental studies of biological structure, physiology, metabolism, genetics and development. The Microbiology department

at the University of Washington works mainly in cutting edge research in Bacteria and Viruses. Our minor program is great for students who want to add an extra area of concentration to their major, or are looking for more specific content to study at the micro level. It includes content from basic chemistry and biology, as well as upper division courses in bacteria and virology.

Completion Requirements

29 credits

1. 14 credits to include BIOL 200; one of CHEM 152, CHEM 155, CHEM 162, or CHEM 165; one of CHEM 223, CHEM 237, or CHEM 355.
2. 15 credits from the following: MICROM 410; one from MICROM 302, MICROM 402, MICROM 431, or MICROM 443; and approved 400-level, graded microbiology courses to reach 29 credits. See adviser for approved list.
3. Minimum cumulative 2.00 GPA for all courses counted toward the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal BS degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these

microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.

- *Department Scholarships:* The department offers four awards each year. More information is available at the department's website.
- *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

Program of Study: Major: Applied Music

Program Overview

The School of Music offers both performance and research-oriented degree programs. More than 200 music majors and graduate students enrolled at the School choose among numerous degree options: Bachelor of Arts, Bachelor of Music, Master of Arts, Master of Music, Doctor of Musical Arts, and Doctor of Philosophy. In addition, many non-music majors take private lessons or participate in one or more of the dozens of auditioned and non-auditioned ensembles active in our performance divisions. Non-majors also increase their appreciation of music through various courses in music appreciation and music history that are open to majors and non-majors alike.

This program of study leads to the following credentials:

- Bachelor of Music degree with a major in Composition
- Bachelor of Music degree with a major in Music Education
- Bachelor of Music degree with a major in Orchestral Instruments
- Bachelor of Music degree with a major in Organ
- Bachelor of Music degree with a major in Piano
- Bachelor of Music degree with a major in String Instruments
- Bachelor of Music degree with a major in Voice

Admission Requirements

Admission is competitive to all music programs. All students must participate in an entrance audition or submit an application

and satisfy the requirements of each degree program or track for admittance. Check department website for entrance audition dates. Major status in performance areas is accorded when, after admission to the College of Arts and Sciences is acknowledged and the required School of Music audition is successfully completed, the student commences applied-music study in a performance medium (e.g., voice) with an approved faculty member of the School of Music. In American music studies, music education, composition, and ethnomusicology, additional entrance requirements apply.

All music programs require instruction on an instrument. Auditions into freshman-level applied-music instruction (private lessons) are based on the assumption that a student's background includes four to eight years of private study on an instrument. Completion of a further two years of college-level private instruction does not automatically guarantee entry at the junior level of private instruction; placement is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

Theory and Ear Training Preparation

In preparation for theory and ear training coursework, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may be required to take MUSIC 113/MUSIC 119 and MUSIC 120.

Transfer students who have had at least two quarters of music theory or music history are

evaluated by a faculty member the quarter they are admitted to their program.

Continuation Policy

Performance studies should begin after audition and acceptance, and continue each subsequent quarter of registration until the minimum program requirements for applied-music lessons have been met. Applied-music study should continue as long as the student is registered and in residence until the final approved recital is given. In order to retain major standing, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Concurrent enrollment or participation in at least one School of Music ensemble is required during each quarter in which a student receives MUSAP (applied-music) instruction, at the 300 level and above, except for MUSAP 389/589. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133/235 series until appropriate proficiency is attained. Any departure from the above requirements must have the recommendation of the appropriate program chair and the written consent of the Director of the School of Music.

Bachelor of Music degree with a major in Composition

Credential Overview

The highly selective composition program at the University of Washington emphasizes mastery of technique and encourages students to develop their own artistic voices.

Additional Admission Requirements

MUSIC 302 and MUSIC 305; MUHST 212; and MUSIC 216, MUSIC 217, MUSIC 218. Prospective students must also submit a

portfolio of recent compositions. See adviser for more information on the application process.

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

114-120 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus MUSIC 216, MUSIC 217, MUSIC 218; PHYS 207; 18 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 380, MUSIC 381, MUSIC 382; MUSIC 400 or MUSIC 401; MUSIC 471 or MUSIC 472; MUSIC 490; 18 credits of private instruction in composition (MUSIC 391/MUSIC 491); 12-18 credits of MUSICP applied

instruction; 6 credits of MUSEN ensembles; and one 400-level course in ethnomusicology. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Music Education

Credential Overview

Music education students at the University of Washington enjoy in-depth musical study with world class artist-teachers with a range of strengths and areas of interest. Undergraduate degrees in Music Education prepare students to teach at the primary and secondary levels. At the graduate level, the School for Music offers both a Master of Arts and Doctor of Philosophy degree for individuals seeking advance professional development or pursuing a career in higher education. Concentration include choral and instrumental teaching/conducting, music for children, and numerous other areas of musical and educational study. In addition to degree programs, the UW offers several ways to achieve teacher certification. Each of the programs listed leads to a teaching license in the State of Washington.

Additional Admission Requirements

Students must complete a separate music education audition and interview. See adviser for more information on the application process.

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the

School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

115-119 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus MUSIC 350, MUSIC 351, MUSIC 352 (or MUSIC 380, MUSIC 381, MUSIC 382); MUSED 301; MUSED 304, MUSED 305; MUSED 340; MUSED 403; MUSED 405 (or MUSEN 303); MUSED 440; MUSED 442 (or MUSED 443); MUSED 452; MUSED 465; 18 credits of MUSICP applied instruction; 6-7 credits of MUSEN ensembles; 12-14 credits of techniques courses; 3 credits of approved jazz coursework; EDC&I 494; and 3 credits of education electives. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Orchestral Instruments

Credential Overview

Along with the core curriculum common to all degree programs at the School of music,

students at both the undergraduate and graduate levels may investigate degree programs geared towards mastery of performance techniques of their instruments of focus. The School's woodwinds and brass program includes a variety of degree pathways and opportunities for performance and preparation for professional careers in music. Admission to the Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

116 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306;

MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSICP applied instruction; 18 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Organ

Credential Overview

The keyboard program at the University of Washington is the school's oldest area of instruction, with a history extending all the way to the UW's earlier days. Piano instruction has been offered since 1862, just one year after the territorial university first opened, and by 1891, students were offered the opportunity to take pipe organ lessons as well. Today, the program offers degree programs at the bachelor, master and doctoral levels in both piano and organ performance, as well as advanced degrees (MM and DMA) in harpsichord performance. Admission to the Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the

School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

120 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302;/MUSIC 305, MUSIC 303/MUSIC 306, MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSICP applied instruction; MUSIC 454; MUSIC 473 and MUSIC 474; MUSIC 458 and MUSIC 459; MUSIC 350, MUSIC 351, MUSIC 352; 1 credit of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Piano

Credential Overview

The keyboard program at the University of Washington is the school's oldest area of instruction, with a history extending all the way to the UW's earlier days. Piano instruction has been offered since 1862, just one year after the territorial university first

opened, and by 1891, students were offered the opportunity to take pipe organ lessons as well. Today, the program offers degree programs at the bachelor, master and doctoral levels in both piano and organ performance, as well as advanced degrees (MM and DMA) in harpsichord performance.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

120 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 12 credits of division-approved upper-level MUSIC or

MUHST electives; MUSIC 487; 36 credits of MUSICP applied instruction; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 326, MUSIC 327, MUSIC 328; 7 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in String Instruments

Credential Overview

The strings program at the University of Washington prepares students for professional careers as solo, chamber, or large ensemble performers and as educators. The program emphasizes mastery of performance techniques in specific instruments of focus. Admission to the Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music

course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

105 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 15 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSICP applied instruction; MUSIC 380; 3 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Voice

Credential Overview

With its rich tradition of voice and choral excellence, close proximity to the region's top opera and choral performance organizations, and committed, engaged faculty, the University of Washington School of Music remains a top choice for serious students of voice and choral activities. The Bachelor of Music degree in Voice is a comprehensive performance oriented degree program, which includes course requirements in vocal pedagogy, foreign language diction, art song repertoire, and hands-on individual vocal coaching.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at

the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

119 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 307, MUSIC 308, MUSIC 309; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434; MUSIC 460, MUSIC 461, and MUSIC 462; MUSIC 379 and MUSIC 479; 36 credits of MUSICP applied instruction; 10 credits of MUSEN ensembles; and 3 credits of music electives. Proficiency through the third quarter college level in two languages from French, German, and Italian. See undergraduate adviser for more specific information.

Program of Study: Major: Music

Program Overview

The School of Music at the University of Washington is a comprehensive professional school offering both performance and research-oriented degree programs. There are over 500 music majors pursuing the following degrees: Bachelor of Arts, Bachelor of Music, Master of Arts, Master of Music, Doctor of Musical Arts, and Doctor of Philosophy. In addition, many students who are not majors take private instruction or participate in an ensemble for their own enjoyment. Degree programs in the School of Music take into consideration the dual nature of music. First, music is a creative art requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Advanced study at the graduate level offers students a rich environment in which to pursue studies in either the performance or academic area in greater depth.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in American Music
- Bachelor of Arts degree with a major in Ethnomusicology
- Bachelor of Arts degree with a major in Music
- Bachelor of Arts degree with a major in Music Theory
- Bachelor of Arts degree with a major in Music: Early Music
- Bachelor of Arts degree with a major in Music: Music History

- Bachelor of Arts degree with a major in Music: Voice
- Bachelor of Music degree with a major in Guitar
- Bachelor of Music degree with a major in Jazz Studies
- Bachelor of Music degree with a major in Percussion: Orchestral Percussion

Admission Requirements

Admission is competitive to all music programs. All students must participate in an entrance audition or submit an application and satisfy the requirements of each degree program or track for admittance. Check department website for entrance audition dates. Major status in performance areas is accorded when, after admission to the College of Arts and Sciences is acknowledged and the required School of Music audition is successfully completed, the student commences applied-music study in a performance medium (e.g., voice) with an approved faculty member of the School of Music. In American music studies, music education, composition, and ethnomusicology, additional entrance requirements apply.

All music programs require instruction on an instrument. Auditions into freshman-level applied-music instruction (private lessons) are based on the assumption that a student's background includes four to eight years of private study on an instrument. Completion of a further two years of college-level private instruction does not automatically guarantee entry at the junior level of private instruction; placement is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

Theory and Ear Training Preparation

In preparation for theory and ear training coursework, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may be required to take MUSIC 113/MUSIC 119 and MUSIC 120.

Transfer students who have had at least two quarters of music theory or music history are evaluated by a faculty member the quarter they are admitted to their program.

Bachelor of Arts degree with a major in American Music

Credential Overview

This degree is offered with a major in Music, and is intended for students who are intrigued by the regional, racial, ethnic, sacred, secular, communal and cultural diversities represented in the music of the Americas. Students are strongly encouraged to formulate individual programs of study under the guidance of faculty mentors in the program. Interdisciplinary approaches, both within music and between music and other areas of study, serve as primary focus of the program.

Additional Admission Requirements

Admission is competitive. Meeting minimum grade and course requirements does not guarantee admission. Minimum 3.0 grade in two of the following courses: MUSIC 160, MUSIC 161, MUSIC 162, MUSIC 216, MUSIC 250, MUSIC 317, MUSIC 325, MUSIC 331, or MUHST 212. Minimum 2.50 cumulative GPA. Admission is based on student's transcripts, musical ability, and statement of purpose, which should explain the student's interest and

intent, specifying the direction of study the students wishes to take and indicating the desired outcome(s) in terms of specialized knowledge and skills, and possible career directions(s).

Completion Requirements

74 credits

1. Core courses (30 credits): MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 216, MUSIC 250, MUSIC 331, MUSIC 498, MUHST 212
2. Minimum 6 credits MUSEN ensembles
3. Minimum 23 credits approved American music studies electives with at least one course from each of the following lists: theory/music analysis; comparative perspective; and ethnomusicological/cultural. See adviser for approved lists.
4. Interdisciplinary electives (15 credits): upper-division non-music electives selected with faculty mentor, with permission of offering department
5. Minimum 2.50 cumulative GPA in music courses applied to the major
6. Minimum 2.0 grade in music courses applied to the major

Bachelor of Arts degree with a major in Ethnomusicology

Credential Overview

Ethnomusicology encompasses studies of music and culture and integrates aspects of musicology and anthropology as well as music performance, history, and theory. Interdisciplinary work, field study, and explorations of music and culture have been key components of the UW Ethnomusicology program since its beginnings in 1963. Students in the program

study music and musicians in various contexts and through various disciplinary lenses. The Bachelor of Arts degree is intended for students whose primary desire is for a well-rounded liberal arts education in music.

Additional Admission Requirements

Admission is competitive. Minimum 3.0 grade in either MUSIC 251 or MUSIC 252, minimum 2.0 grade in each MUSIC course taken, and minimum 2.50 cumulative GPA. Admission is based on the student's transcript(s), musical interests, and statement of purpose, which should explain the student's interest in ethnomusicology and potential areas of specialization.

Completion Requirements

51-67 credits

1. Core courses (33-39 credits): MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 251, MUSIC 252, MUSIC 499 (5 credits), and minimum six quarters of MUSEN 389 and/or MUSAP 389 (6-12 credits)
2. Ethnomusicology electives (9-15 credits): minimum three 400-level ethnomusicology courses from approved list
3. Sociocultural anthropology elective (3 credits): minimum one sociocultural anthropology course from approved list
4. Interdisciplinary electives (6-10 credits): minimum two interdisciplinary electives from approved list
5. Minimum 2.00 cumulative GPA in courses applied to the major

Bachelor of Arts degree with a major in Music

Credential Overview

Along with the core curriculum common to all degree programs at the School of Music, students at the undergraduate levels may investigate degree programs geared toward general competence in music within their instrument of focus while obtaining a liberal arts education.

Completion Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Major Requirements

63 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/ MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 6 credits approved upper-level MUSIC or MUHST electives, 6 credits approved 300- or 400-level MUSAP, MUSEN, MUSIC, or MUHST courses, 10 credits MUSICP vocal or instrumental private applied instruction, 5 credits MUSEN (ensembles)

Bachelor of Arts degree with a major in Music Theory

Credential Overview

Music Theory encompasses many areas of study, ranging from the relatively traditional (Schenkerian analysis, set theory) to the more recently emergent (neo-Riemannian theory, semiotics). In recent times, strong links have developed between theory and other disciplines, such as mathematics, psychology, ethnomusicology, and philosophy. The undergraduate program in music theory introduces students to the teachings, research, and the foundations of the field that is constantly changing. This degree is offered with a major in Music, and is intended for students who wish to emphasize general competence in music within the framework of a liberal arts education.

Completion Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Major Requirements

63 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level

ethnomusicology course; MUSIC 470, MUSIC 471, and minimum 6 credits selected from MUSIC 472, MUSIC 485, MUSIC 487, and/or MUSIC 489; 10 credits MUSICP vocal or instrumental private applied instruction; 5 credits MUSEN (ensembles)

Bachelor of Arts degree with a major in Music: Early Music

Credential Overview

Students in music history explore music from antiquity to the new millennium, earning degrees up to the doctoral level. The faculty teach and conduct research in cultural context, interdisciplinary research, and critical theory, and encourage students to work in growing fields in music history, such as digital humanities, historical performance practice, American popular musical culture, and film music. The undergraduate degree in Early Music allow students to explore music from medieval chant to the Broadway musical, considering the aesthetic issues, cultural forces, and practices that shape musical composition, performance, and reception. This degree is offered with a major in Music, and is intended for students who wish to emphasize general competence in music within the framework of a liberal arts education.

Completion Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Option Requirements

66 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 15 credits approved 300- and 400-level electives, selected from MUHST 400, MUHST 401, MUHST 406; MUSIC 418, MUSIC 421; MUSEN 369, MUSEN 383, and other approved 300- or 400-level courses. 10 credits MUSICP vocal or instrumental private applied instruction, 5 credits MUSEN (ensembles). Students are strongly encouraged to take 10 credits in pre-1700 literature, art history, and history courses as part to their A&H requirement.

Bachelor of Arts degree with a major in Music: Music History

Credential Overview

Students in music history explore music from antiquity to the new millennium, earning degrees up to the doctoral level. The faculty teach and conduct research in cultural context, interdisciplinary research, and critical theory, and encourage students to work in growing fields in music history, such as digital humanities, historical performance practice, American popular musical culture, and film music. The undergraduate degree in music history allow students to explore music from medieval chant to the Broadway musical, considering the aesthetic issues, cultural forces, and practices that shape musical composition, performance, and reception. This degree is offered with a major in Music, and is

intended for students who wish to emphasize general competence in music within the framework of a liberal arts education.

Completion Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Option Requirements

69 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 12 credits approved 400-level MUHST electives; 6 credits approved 300- or 400-level music theory or MUHST courses; 10 credits MUSICP vocal or instrumental private applied instruction; 5 credits MUSEN (ensembles). Students must earn a minimum 2.00 cumulative GPA for all required MUHST courses.

Bachelor of Arts degree with a major in Music: Voice

Credential Overview

With its rich tradition of voice and choral excellence, close proximity to the region's top opera and choral performance organizations, and committed, engaged

faculty, the University of Washington School of Music remains a top choice for serious students of voice and choral activities. The Bachelor of Arts degree is intended for students whose primary desire is for a well-rounded liberal arts education in music.

Completion Requirements

Minimum 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Minimum cumulative 2.50 GPA for all music courses and a minimum 2.0 grade for each music course counted toward the major.

Option Requirements

75 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course, plus 6 credits approved upper-level MUSIC or MUHST electives, 18 credits MUSICP vocal private applied instruction, 6 credits vocal diction, and 9 credits in ensembles. Proficiency through the third quarter college level in two languages from French, German, and Italian.

Bachelor of Music degree with a major in Guitar

Credential Overview

The guitar program at the University of Washington offers a pathway for mastery of

technique at the professional level and prepares students for careers in guitar performance and teaching. Guitar students working toward the instrumental performance degree music receive focused training in technique in addition to completing a core curriculum providing a solid foundation in ear-training, history, theory, piano proficiency, and repertoire. Admission to the Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

120 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC

302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; and at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487 or MUSIC 438; 36 credits of MUSICCP applied instruction; 7 credits of electives; 2 credits of recitals; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380, MUSIC 381, MUSIC 382; and 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Jazz Studies

Credential Overview

Long a catalyst for innovative directions in new music and for preparing students to perform at the highest levels of musicianship in the professional realm, the program provides a foundation in the significant historical figures, works, styles, and movements of jazz, coupled with an encouragement toward pushing boundaries and extending the art form. Among the most vibrant and energetic musical communities at UW, the program benefits tremendously from its proximity to the excellent jazz programs of Seattle's middle and high schools and the atmosphere of experimentation in the clubs and coffeehouses of the Seattle's music scene. Admission to the Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

120 credits

MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206, MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course; plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 319 or MUSIC 331; MUHST 425; MUSIC 336 and MUSIC 436; MUSIC 467, MUSIC 468, MUSIC 469; MUSIC 379, MUSIC 479; 6 credits of MUSIC 464; 10 credits of music electives; 30 credits of MUSICP applied instruction; 12 credits of MUSEN ensembles. See undergraduate adviser for more specific information.

Bachelor of Music degree with a major in Percussion: Orchestral Percussion

Credential Overview

The University of Washington's Percussion Studies program emphasizes technical mastery and musicianship with a practical aim of preparing students to excel in a wide range of professional musical settings. Graduates of the program are teaching at universities, touring internationally as bandleaders and percussionists, performing in musical theater productions from Seattle to Broadway, and performing in jazz ensembles, orchestras, experimental contemporary music ensembles, and popular music groups. The Bachelor of Music is intended for especially qualified students who wish to emphasize professional training in performance or composition within a four year program.

Additional Admission Requirements

Students admitted into the BA program have the option to jury into the B.M. program at the end of the freshman and sophomore years.

Completion Requirements

Minimum 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Inquiry, to include at least 20 credits each in two of the following three areas: : Arts & Humanities; Social Sciences; and Natural Sciences. Piano proficiency at MUSAP 235 level, a minimum 2.0 grade in each music

course counted toward the major, and a minimum 2.50 GPA in music courses.

Major Requirements

111 credits

MUSIC 201, MUSIC 202, MUSIC 203, MUSIC 204, MUSIC 205, MUSIC 206, MUSIC 301, MUSIC 302, MUSIC 303; MUSIC 304, MUSIC 305, MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from MUSIC 250, MUSIC 251, MUSIC 252, or any 400-level ethnomusicology course; minimum 18 credits from MUSICP 337; MUSIC 379; MUSIC 479; minimum 18 credits from MUSICP 437; minimum 12 credits of MUSEN 304; minimum 12 credits from MUSEN 300, MUSEN 301, or MUSEN 302; minimum 1 credit from MUSEN 384, MUSEN 389, MUSEN 410, or MUSEN 411; 12 credits of approved upper-division MUSIC or MUHST electives.

Program of Study: Minor: Music

Program Overview

The School of Music offers a general minor in music that is open to everyone except music majors. In order to declare a minor, you first need to have a major declared. You can declare your Music Minor with your major department.

This program of study leads to the following credential:

- Minor in Music

Minor in Music

Completion Requirements

Minimum 25 credits of music courses (MUSIC, MUHST, MUSEN, MUSAP, or MUSED prefixes). Maximum 10 credits at the 100 level, minimum 15 credits at the 200 level or above including:

1. At least 4 credits from courses dealing with the elements of music (chosen from MUSIC 116, MUSIC 117, MUSIC 118, MUSIC 113/MUSIC 119, or MUSIC 120).
2. 5 credits from courses for non-majors that focus on a particular music area (MUSIC 121, MUSIC 122, MUSIC 160, MUSIC 162, MUSIC 316, MUSIC 317, MUSIC 318, MUSIC 319, MUSIC 331).
3. Maximum 10 transfer credits (including maximum 5 transfer credits in performance lessons and ensembles) may count toward the minor.

Additional Information

Student Outcomes and Opportunities

- *Instructional and Research Facilities:* None.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* None.
- *Department Scholarships:* None.
- *Student Organizations/Associations:*
 - *Music Student Association (MSA):* A group of undergraduate and graduate students from various divisions of the School of Music, working

- to foster a stronger sense of professional community, serve the larger cultural community, and build practical tools for encouraging and promoting student musicians' endeavors. For more information, contact the School of Music.
- *Ethnomusicology Student Association*: A student association which deals with the concerns of the ethnomusicology division, as well as meeting socially. For further information, contact the division at 206-543-0949 or 64 Music Building.
 - *Music Educators National Conference (MENC)*: A local chapter of this national scholarly organization of music educators is directly involved in annual state and regional meetings and events. For more information, contact the School of Music.

Graduate Programs

Program of Study: Doctor of Musical Arts

This program of study leads to the following credentials:

- Doctor of Musical Arts
- Doctor of Musical Arts (Accompanying)
- Doctor of Musical Arts (Brass)
- Doctor of Musical Arts (Choral Conducting)
- Doctor of Musical Arts (Composition)
- Doctor of Musical Arts (Harp)
- Doctor of Musical Arts (Harpsichord)
- Doctor of Musical Arts (Instrumental Conducting)
- Doctor of Musical Arts (Opera Production)

- Doctor of Musical Arts (Organ)
- Doctor of Musical Arts (Percussion)
- Doctor of Musical Arts (Piano)
- Doctor of Musical Arts (Strings)
- Doctor of Musical Arts (Voice)
- Doctor of Musical Arts (Woodwinds)

Doctor of Musical Arts

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Doctor of Musical Arts

(Accompanying)

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Doctor of Musical Arts (Brass)

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option,

specific course requirements maintained by the program.

2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral recitals*: Present a minimum of three recitals.
2. *Music Ensemble (6 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken, course list maintained internally by the program.
3. *Additional Music Courses (15 credits)*: Course list maintained internally by the program.
4. *Electives (24 credits)*

Doctor of Musical Arts (Choral Conducting)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Note: the 18-credit program-level Instruction/Performance requirement listed above includes Graduate Choral Conducting Instruction and Choral Repertoire.*
2. *Advanced Choral Techniques (12 credits)*: MUSIC 553
3. *Doctoral Recitals*: Present a minimum of two recitals.
4. *Music Ensemble (6 credits)*: Enroll in an appropriate ensemble each quarter in which conducting is taken. Course list maintained internally by the program.
5. *Additional Music Courses (15 credits)*: Academic coursework in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
6. *Electives (12 credits)*

Doctor of Musical Arts (Composition)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Music Electives (18 credits): approved 400- or 500-level courses chosen from the fields of Composition, Analysis, Computer Music, Music Theory, Music History, Ethnomusicology, Performance, and Digital Arts Technology. Interdisciplinary study may be taken according to interest.*
2. *Other Electives (27 credits)*
3. *Foreign Language: Students must pass a foreign language examination, choice of language to be approved by the supervisory committee.*

Doctor of Musical Arts (Harp)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits):* Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits):* See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits):* MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals:* Present a minimum of three recitals.
2. *Music Ensemble (9 credits):* Enroll in an appropriate ensemble each quarter in

which private instruction is taken, course list maintained internally by the program.

3. *Additional Coursework (15 credits):* academic coursework* in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (21 credits)*

Doctor of Musical Arts (Harpsichord)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits):* Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits):* See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits):* MUSIC 800

Additional Completion Requirements

Option-specific requirements

1. *Doctoral Recitals:* Present four recitals consisting of 2 solo recitals, 1 chamber recital and 1 lecture recital.
 - a. Register for 6 credits of MUSIC 590 in the quarter the lecture-recital/concerto-recital is performed.
2. *Music Ensemble (6 credits): Music Ensemble:* Enroll in an appropriate ensemble each quarter in which private instruction is taken. Course list maintained internally by the program.

3. *Theory Electives (9 credits)*: Theory courses or seminars at the 400- or 500-level in addition to those taken for the master's degree.
4. *Music History*: MUHST 500
5. *Music History Electives (9 credits)*: Course list maintained internally by the program,
6. *Electives (12 credits)*
7. *Foreign Language*: Students must pass a foreign language examination, choice of language to be approved by the supervisory committee. If a student has fulfilled this requirement for the master's degree, no additional language is required.

Doctor of Musical Arts (Instrumental Conducting)

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present at least two doctoral recitals.
2. *Other Studies in Music (15 credits)*: Academic coursework in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
3. *Electives (30 credits)*

Doctor of Musical Arts (Opera Production)

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present a minimum of two opera recitals.
2. *Other Studies in Music (15 credits)*: Academic coursework in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
3. *Electives (30 credits)*
4. *Foreign Language*: Students must pass a second foreign language examination different from that taken at the master's level. The choice of the language is to be approved by the supervisory committee.

Doctor of Musical Arts (Organ)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present four recitals consisting of 2 solo recitals, 1 chamber recital and 1 lecture recital.
 - a. 6 credits of MUSIC 590 during the quarter in which the lecture-recital/concerto-recital
2. *Music Ensemble (6 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken. Course list maintained internally by the department.
3. *Theory Electives (9 credits)*: Theory courses or seminars at the 400- or 500-level in addition to courses taken for the master's degree.
4. *Music History (3 credits)*: MUHST 500
5. *Music History Electives (9 credits)*: 400- or 500-level courses in addition to courses taken for the master's degree.
6. *Electives (12 credits)*
7. *Foreign Language*: Students must pass a foreign language examination, choice of language to be approved by the supervisory committee. If a student has fulfilled this requirement for the master's degree, no additional language is required.

Doctor of Musical Arts (Percussion)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present a minimum of three recitals.
2. *Music Ensemble (9 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken. Course list maintained internally by the program.
3. *Additional Music Courses (15 credits)*: academic coursework* in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (21 credits)*

Doctor of Musical Arts (Piano)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present four recitals consisting of 2 solo recitals, 1 chamber recital and 1 lecture recital or concerto recital.
 - a. Register for 6 credits of MUSIC 590 during the quarter in which the lecture-recital/concerto-recital is performed.
2. *Music Ensemble (6 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken. Course list maintained internally by the program.
3. *Additional Music Courses (15 credits)*: academic coursework in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (18 credits)*
5. *Foreign Language*: Students must pass a foreign language examination, choice of language to be approved by the supervisory committee. If a student has fulfilled this requirement for the master's degree, no additional language is required.

Doctor of Musical Arts (Strings)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present a minimum of three recitals.
2. *Music Ensemble (6 credits)*: Enroll in MUSEN 500 each quarter in which private instruction is taken.
3. *Additional Music Courses (15 credits)*: academic coursework* in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (24 credits)*

Doctor of Musical Arts (Voice)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present a minimum of three recitals.
2. *Music Ensemble (4 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken. Students exempt from this requirement the quarter they give their recitals. Course list maintained internally by the program.
3. *Additional Music Courses (15 credits)*: academic coursework in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (26 credits)*
5. *Foreign Language*: Students must pass a second foreign language examination, choice of language to be approved by the supervisory committee. This must be a different language than that passed at the master's level.

Doctor of Musical Arts (Woodwinds)**Admission Requirements**

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Completion Requirements

90 credits

1. *Instruction/Performance Requirement (18 credits)*: Varies by degree option, specific course requirements maintained by the program.
2. *Additional Requirements (45 credits)*: See additional requirements section for option-specific requirements.
3. *Dissertation (27 credits)*: MUSIC 800

Additional Completion Requirements

Option-specific requirements:

1. *Doctoral Recitals*: Present a minimum of three recitals.
2. *Music Ensemble (6 credits)*: Enroll in an appropriate ensemble each quarter in which private instruction is taken
3. *Additional Music Courses (15 credits)*: academic coursework* in music at the 400- or 500-level in addition to coursework taken at the master's level. Course list maintained internally by the program.
4. *Electives (24 credits)*
5. *Foreign Language*: Students must pass a foreign language examination, choice of language to be approved by the supervisory committee.

Program of Study: Doctor of Philosophy (Music)

This program of study leads to the following credentials:

- Doctor of Philosophy (Music)
- Doctor of Philosophy (Music: Ethnomusicology)
- Doctor of Philosophy (Music: Music Education)

- Doctor of Philosophy (Music: Music History)
- Doctor of Philosophy (Music: Music Theory)
- Doctor of Philosophy (Music: Textual Studies)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for specific requirements.

Doctor of Philosophy (Music)

Completion Requirements

Contact department for requirements.

Doctor of Philosophy (Music: Ethnomusicology)

Completion Requirements

90 credits

1. *Major Area (60-63 credits):*
 - a. AIS 503 OR other approved video documentation course
 - b. MUSED 552
 - c. Ethnography of Music or Selected Topics Courses (at least 3 credits): Course list maintained internally by the program.
 - d. MUSIC 512 (two courses for 6 credits)
 - e. MUSAP 589 (2 credits ea.) OR MUSEN 589, (1 credit ea.), for at least three quarters
 - f. Complete at least 9 credits of interdisciplinary electives at the 400- or 500-level from such disciplines/fields as Music History, Theory, Education, Anthropology, Area Studies, and/or other appropriate departments and

disciplines. Propose course to mentor / chair for pre-approval.

- g. MUSIC 599, 1 credit ea., every Autumn Quarter during coursework and General Exam preparation
 - h. Doctoral Examination preparation (3 credits): MUSIC 600
 - i. *Dissertation (27 credits):* MUSIC 800
2. *Electives (27-30 credits)*

Doctor of Philosophy (Music: Music Education)

Completion Requirements

90 credits

1. *Major Area (57 credits):*
 - a. MUSED 502 and MUSED 503
 - b. MUSED 575 (to be taken every quarter until General Examination, 1-3, max.6)
 - c. *Other Major Area Coursework (18 credits):* 500-level Music Education seminars
 - d. *Dissertation (27 credits):* MUSIC 800
2. *Other Studies in Music (9 credits):* Major Cognate Area: Music coursework at the 400-level and above
3. *Electives (24 credits):*
 - a. 6 credits from a minor cognate area
 - b. an additional 18 credits

Doctor of Philosophy (Music: Music History)

Completion Requirements

90 credits

1. *Major Area (57 credits):*
 - a. Music History seminars (12 credits): (MUHST 5xx)

- b. Doctoral Examination preparation (9-18 credits): MUSIC 600
- c. Dissertation (27 credits): MUSIC 800
2. *Other Studies in Music (10 credits)*:
 - a. Music Theory (at least 3 credits): 400- or 500-level
 - b. Ethnomusicology (at least 3 credits): 400- or 500-level
 - c. Additional courses or seminars (4 credits): 400- or 500-level MUHST
3. *Electives (23 credits)*:
 - a. At least 9 credits of General Education courses (outside music) at the 300-level or higher
 - b. 14 credits of free electives
4. *Language*: Doctoral students are required to pass graduate reading knowledge examinations in two foreign languages (as approved by the Supervisory Committee) before the General Examination is scheduled.

Doctor of Philosophy (Music: Music Theory)

Completion Requirements

1. *Major Area (27 credits)*:
 - a. Dissertation (27 credits): MUSIC 800
2. *Other Studies in Music (33 credits)*: Courses and/or seminars chosen by the Supervisory Committee from the 400- or 500-level of Music Theory, Music History and Ethnomusicology, and other courses in music or in other disciplines according to the needs and interests of the student.
3. *Electives (30 credits)*
4. *Language*: Doctoral students are required to pass graduate reading knowledge examinations in two foreign languages before the General Examination is scheduled.

Doctor of Philosophy (Music: Textual Studies)

Completion Requirements

Graduate Certificate in Music Theory

Completion Requirements

Contact department for requirements.

Program of Study: Master of Arts (Music)

This program of study leads to the following credentials:

- Master of Arts (Music)
- Master of Arts (Music: Ethnomusicology)
- Master of Arts (Music: Music Education)
- Master of Arts (Music: Music History)
- Master of Arts (Music: Music Theory)

Admission Requirements

Contact department for requirements.

Master of Arts (Music)**Completion Requirements**

Contact department for requirements.

**Master of Arts (Music:
Ethnomusicology)****Completion Requirements**

51 credits

1. *Major Area Requirements (48 credits):*
 - a. MUSIC 531
 - b. MUSIC 533 and MUSIC 534
 - c. MUSED 504
 - d. 400-level MUSIC coursework, at least 6 credits, selected from MUSIC 428, 433, 445, 446, 480
 - e. MUSIC 442
 - f. MUSIC 445 OR MUSIC 536
 - g. MUSIC 512
 - h. MUSAP 589 OR MUSEN 589 or other approved ensemble: take for 6 quarters
 - i. MUSIC 599 every autumn quarter during coursework or MA Exam preparation
 - j. *Master's Examination*
 - i. *Thesis Option:* Students must write a thesis approved by a supervisory committee and pass a comprehensive oral examination plus a thesis defense. Students *must* take at least 9 credits of MUSIC 700 to complete this option.
 - ii. *Non-Thesis Option:* Take MUSIC 600 for a total of 9 credits. Submit two major papers, which, once accepted

by the Supervisory Committee, must be defended in an oral examination.

2. *Interdisciplinary Studies (3 credits):* Complete 3 credits of an interdisciplinary elective at the 400- or 500-level from such disciplines/fields as Music History, Theory, Education, Anthropology, Area Studies, and/or other appropriate departments and disciplines. Propose course to mentor / chair for pre-approval.
3. *Master's Examination:* Pass a graduate reading-knowledge examination in French, German, or Spanish

**Master of Arts (Music: Music
Education)****Completion Requirements**

51 credits

1. *Major Area Requirements (24 credits):*
 - a. MUSED 501
 - b. *12 credits from the following:* MUSED 452, MUSED 522, MUSED 523, MUSED 524, MUSED 525, MUSED 530, MUSED 535, MUSED 540, MUSED 542, MUSED 550, MUSIC 523, MUSIC 530, MUSIC 599
 - c. *Master's Examination:*
 - i. *Thesis Option:* Students must write a thesis approved by a supervisory committee and pass a comprehensive oral examination plus a thesis defense. The thesis must be formatted according to the Graduate School Style & Policy Manual. Students must take at least 9 credits of MUSIC 700, Master's Thesis.
 - ii. *Non-Thesis Option:* Complete approved projects

(MUSIC 600, 9 credits) and a portfolio of papers accepted by a Supervisory Committee, plus pass a written and oral comprehensive.

2. *Major Cognate Area (18 credits)*: Music courses approved by the Chair of the Supervisory Committee at the 400-level and above, selected from among areas such as: music education, conducting, ethnomusicology, music history, music theory, and performance. Note: A maximum of 10 credits of MUSED 496 may be included.
3. *Minor Cognate (9 credits)*: Enroll in courses and/or seminars in a minor area of concentration outside the School of Music that may be selected from areas such as anthropology, education curriculum and instruction, educational psychology, philosophy, psychology, sociology, and special education. Approved 300-level and above courses can be applied to the minor area of concentration. 3 credits in a minor cognate area are required for the thesis option; 9 credits are required for the non-thesis option.

Master of Arts (Music: Music History)

Completion Requirements

48 credits total

1. *Major Area Requirements (30 credits)*:
 - a. MUHST 500
 - b. Minimum of 9 credits of approved 400- or 500-level courses
 - c. Minimum of 9 credits of approved 500-level seminars
 - d. *Master's Examination*:
 - i. Thesis Option: Students must write a thesis approved by a supervisory committee and pass a comprehensive oral examination plus a thesis defense. The thesis

must be formatted according to the Graduate School Style & Policy Manual. Students *must* take at least 9 credits of MUSIC 700 to complete this option.

- ii. Non-Thesis Option: All credits outlined above, except 9 credits of approved 500-level seminars, in lieu of 9 credits of Master's Thesis.
2. *Music Theory (9 credits)*: approved 400- or 500-level theory courses
3. *Music Electives (9 credits)*: approved 400- or 500-level Music courses
4. *Foreign Language Competency*: Pass graduate foreign language reading competency examination in German, French, or Italian

Master of Arts (Music: Music Theory)

Completion Requirements

45 credits

1. *Major Area (30 credits)*
 - a. MUSIC 470 AND MUSIC 471
 - b. *At least 12 credits from the following*: MUSIC 472, MUSIC 570, MUSIC 571, MUSIC 575, MUSIC 576
 - c. *At least 3 credits from the following*: MUSIC 489, MUSIC 526, MUSIC 527, MUSIC 528, MUSIC 573, MUSIC 574, MUSIC 577
 - d. *Master's Thesis (9 credits)*
2. *Other Studies (15 credits)*
 - a. *Music History*: At least two 500-level seminars
 - b. *Music Electives*: At least 9 credits of music courses at the 400- or 500-level
3. Pass a piano proficiency examination (MUSAP 235-level)
4. Pass a graduate reading-knowledge examination in French, German, Italian or Latin

Additional Information

- *Financial Aid:* A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for performance scholarships for new and returning students are held each year. See the school's Website (above) for more information about applications and audition dates.
- *Research Facilities:*
 - The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.
 - Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, Wind Ensemble, University Symphonic Band, Studio Jazz Ensemble, Baroque Ensemble and Chamber Singers, as well as non-Western ensembles with visiting artists from around the globe.

Program of Study: Master of Music

This program of study leads to the following credentials:

- Master of Music
- Master of Music (Accompanying)
- Master of Music (Brass)
- Master of Music (Choral Conducting)
- Master of Music (Composition)
- Master of Music (Harp)
- Master of Music (Harpsichord)

- Master of Music (Instrumental Conducting)
- Master of Music (Jazz Studies and Improvised Music)
- Master of Music (Opera Production)
- Master of Music (Organ)
- Master of Music (Percussion)
- Master of Music (Piano)
- Master of Music (Strings)
- Master of Music (Voice)
- Master of Music (Woodwinds)

Admission Requirements

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.
3. (Only if applying to Composition): Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants :International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores is 90.

Entrance Auditions: Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

Master of Music

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Master of Music (Accompanying)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*

- a. Coursework in music theory, music history, methods of musical research, music electives
- b. Additional option-specific requirements as specified

Master of Music (Brass)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

51 credits

1. *Major Area (27 credits):*
 - a. Performance study (private lessons) (18 credits or until performance requirements are satisfied): MUSICP 532, MUSICP 533, MUSICP 534, MUSICP 535
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed

- c. Enroll in an ensemble each quarter private lessons are taken (6 credits): MUSEN 500/501/502/546
 - d. Master's recital prior to the master's exam:
MUSIC 559 (3 credits)
2. *Other Studies (24 credits)*
 - a. Music Theory Electives: at least 9 credits of 400- or 500-level theory courses*
 - b. Seminar in Methods of Musical Research: MUHST 500
 - c. Music Electives (9 credits): Music History or Ethnomusicology courses at the 400- or 500-level
 - d. Free Music Elective (3 credits): at least 3 credits from any 400- or 500-level MUSIC course
 3. *Piano proficiency*: Complete MUSAP 235 (2 credits) or pass a piano proficiency exam
 4. *Master's Examination*: Pass a written and oral examination on approximately 10 topics approved by Supervisory Committee.

Master of Music (Choral Conducting)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits)*:
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*

- a. Coursework in music theory, music history, methods of musical research, music electives
- b. Additional option-specific requirements as specified

Additional Completion Requirements

70 credits

1. *Major Area (36 credits)*:
 - a. Enroll in conducting lessons each quarter until recital requirement is satisfied (12 credits):
MUSIC 583
 - b. Enroll in Advanced Choral Techniques, MUSIC 553, each term conducting lessons are taken (12 credits)
 - c. Ensemble (3 credits): MUSEN 550 or MUSEN 551
 - d. Choral Repertoire (6 credits): from MUSIC 481, 482, 483, or 484
 - e. Complete a master's recital prior to the master's exam (3 credits):
MUSIC 559
2. *Other Studies (33 credits)*
 - a. Music Theory Electives (9 credits): at least 9 credits of 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research: MUSHT 500
 - c. Music History Electives (6 credits): from Music History courses at the 400- or 500-level
 - d. Voice Lessons (6 credits total):
MUSAP 500 or MUSAP 520
 - e. Recital Choir (6 credits total):
MUSEN 507
 - f. Instrumental Conducting (3 credits): from MUSIC 580/581/582
3. *Piano proficiency*: Complete MUSAP 235 (2 credits) or pass a piano proficiency exam
4. *Master's Examination*: Pass a written and oral examination on approximately

10 topics approved by Supervisory Committee.

Master of Music (Composition)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits)*:
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

45 credits

1. *Major Area (27 credits)*:
 - a. Enroll in Graduate Composition each quarter until thesis (18 credits): MUSIC 591
 - b. Prepare a Thesis Composition approved by the supervisory committee and pass a comprehensive review (9 credits): MUSIC 700
2. *Other Studies (18 credits)*:
 - a. Music Theory (12 credits): At least 12 credits of 400- or 500-level theory* and computer music courses.

b. Music Electives (6 credits): Music History or Ethnomusicology courses at the 400- or 500-level

3. *Piano proficiency*: Complete MUSAP 235 or pass a piano proficiency exam

Master of Music (Harp)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits)*:
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

48 credits

1. *Major Area (27 credits)*
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied): from MUSICP 536, MUSICP 538
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed

- c. Enroll in an ensemble each quarter private lessons are taken (6 credits total):
MUSEN 500/501/502/504/508/568 (1 credit ea.)
 - d. Complete a master's recital prior to the master's exam (3 credits):
MUSIC 559 (A jury of divisional faculty must approve degree recitals.)
2. *Other Studies (21 credits):*
 - a. Music Theory Electives (9 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research, MUHST 500
 - c. Music History Electives (6 credits): Music History courses at the 400- or 500-level
 - d. Music Electives (3 credits): Music History or Ethnomusicology
 3. *Piano Proficiency:* Complete MUSAP 235 or pass a piano proficiency exam
 4. *Master's Examination:* Pass an oral master's examination conducted by Supervisory Committee.

Master of Music (Harpsichord)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

59 credits

1. *Major Area (29 credits):*
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied): MUSICP 523
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Additional Keyboard (2 credits total): MUSICP 501 or MUSICP 502
 - d. Enroll in an ensemble each quarter private lessons are taken (6 credits): Any Choral Ensemble or Studio Accompanying and 1 credit of MUSEN 569 or MUSEN 583
2. *Other Studies (30 credits):*
 - a. Music Theory (9 credits): at least 9 credits of 400- or 500-level theory courses*
 - b. Seminar in Methods of Musical Research (3 credits): MUHST 500
 - c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
 - d. Keyboard Harmony (6 credits): MUSIC 473 and MUSIC 474
 - e. Figured Bass Realization: MUSIC 475
3. *Foreign Language:* Pass a graduate foreign language competency examination in German, French, Italian or Latin
4. *Master's Examination:* Pass a written and oral examination on approximately 10 topics approved by Supervisory Committee.

Master of Music (Instrumental Conducting)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

51 credits

1. *Major Area (21 credits):*
 - a. Enroll in performance study each quarter until performance requirements are satisfied (18 credits total) from: MUSIC 580/581/582
 - b. Complete a master's recital prior to the master's exam (3 credits): MUSIC 559
2. *Other Studies (30 credits):*
 - a. Music Theory Electives (9 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research: MUHST 500

- c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
- d. Keyboard Harmony (6 credits): MUSIC 473/474
- e. Figured Bass Realization: MUSIC 475
3. *Piano Proficiency:* Complete MUSAP 235 (2 credits) or pass a piano proficiency exam
4. *Master's Examination:* Pass a written and oral examination on approximately 10 topics approved by Supervisory Committee

Master of Music (Jazz Studies and Improvised Music)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

49 credits

1. *Major Area (31 credits):*
 - a. Performance study (private lessons) (18 credits from the following or until performance requirements are satisfied): MUSICP 526, MUSICP 531, MUSICP 533, MUSICP 534, MUSICP 538, MUSICP 537, MUSICP 541
 - i. Note: Jazz percussion requirements may be satisfied as follows: MUSICP 537 (12 credits) and MUSICP 541 (6 credits) OR MUSICP 541 (15 credits) and MUSICP 537 (3 credits)
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Two ensembles each quarter private lessons are taken (10 credits): MUSEN 504, MUSEN 545, MUSEN 546, MUSEN 584
 - i. Note: Jazz percussion majors must take a minimum of 3 credits of MUSEN 504
 - d. Master's recital: MUSIC 599 (3 credits)
2. *Other studies (15 credits):*
 - a. Music Theory Electives (3 credits): List maintained by department
 - b. Seminar in Methods of Musical Research: MUHST 500
 - c. Music History Electives (3 credits): Music History courses at 400- or 500-level
 - d. Jazz area (6 credits): from 400- or 500-level Ethnomusicology or Jazz History courses
3. *Electives (3 credits):* At least 3 credits of approved electives at 400- or 500- level
4. *Piano Proficiency:* Complete MUSAP 235 or pass a piano proficiency exam
5. *Master's Examination:* oral master's examination conducted by supervisory committee

Master of Music (Opera Production)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

45 credits

1. *Major Area (23 credits):*
 - a. MUSIC 492 and 493
 - b. MUSIC 532 (12 credits total)
 - c. Complete a master's recital prior to the Master's Exam (3 credits): MUSIC 559
2. *Other Studies (22 credits):*
 - a. Music Theory (6 credits): 400- or 500-level theory courses*
 - b. Seminar in Methods of Musical Research: MUHST 500
 - c. History of Opera (9 credits): from MUHST 407, MUHST 413, MUHST 419, MUHST 537
 - d. Drama 502

3. *Piano Proficiency*: Complete MUSAP 235 (2 credits) or pass a piano proficiency exam
4. *Voice Proficiency*: Pass a voice proficiency exam or take on quarter of voice lessons at the 300-level
5. *Graduate Foreign Language Competency Examination*: In German, French, Italian or Latin
6. *Master's Examination (Choose one of the following)*:
 - a. Pass a written and oral examination on approximately 10 topics approved by your Supervisory Committee
 - b. Students may elect to write a thesis (in lieu of the topics) approved by a supervisory committee and pass a comprehensive oral examination plus a thesis defense. Students must take at least 9 credits of MUSIC 700 to complete this option

Master of Music (Organ)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits)*:
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

65 credits

1. *Major Area (35 credits)*:
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied): MUSICP 522
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Additional Keyboard: at least 2 credits of MUSICP 501 or MUSICP 503
 - d. Enroll in an ensemble each quarter private lessons are taken (6 credits): Any Choral Ensemble or Studio Accompanying and 1 credit each of MUSEN 569 or MUSEN 583
 - e. Organ Repertoire: MUSIC 458 and MUSIC 459
 - f. Complete a master's recital prior to the Master's Exam (3 credits): MUSIC 559
2. *Other Studies (30 credits)*:
 - a. Music Theory Electives (9 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research, MUSHT 500 (3 credits)
 - c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
 - d. Figured Bass Realization: MUSIC 475
 - e. Keyboard Harmony: MUSIC 473 and 474
3. *Foreign Language*: Pass a graduate foreign language competency examination in German, French, Italian or Latin
4. *Master's Examination*: Pass a written and oral examination on approximately 10 topics approved by Supervisory Committee.

Master of Music (Percussion)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

49 credits

1. *Major Area (26 credits):*
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied) from: MUSICP 537, MUSICP 540, or MUSICP 541
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Enroll in an ensemble each quarter private lessons are taken (5 credits): MUSEN 500/501/502/504/546
 - d. Complete a master's recital prior to the master's exam (3 credits): MUSIC 559

2. *Other Studies (18 credits):*
 - a. Music Theory Electives (9 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research, MUHST 500
 - c. Music History Electives (3 credits): Music History courses at the 400- or 500-level
 - d. Music Electives (3 credits): Ethnomusicology or Jazz History at the 400- or 500-level
 - e. Electives (5 credits): approved electives at the 400- or 500-level
3. *Piano Proficiency:* Complete MUSAP 235 (2 credits) or pass a piano proficiency exam at the equivalent level
4. *Master's Examination:* Pass an oral master's examination conducted by your Supervisory Committee.

Master of Music (Piano)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

52 credits

1. *Major Area (26 credits):*
 - a. Performance study (private lessons) (18 credits from the following or until performance requirements are satisfied): MUSICP 521
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Enroll in an ensemble each quarter private lessons are taken. (Students are exempt from the ensemble requirement during each quarter they are enrolled in MUSIC 559. TAs and GAs are exempt from the ensemble requirement each quarter they have an appointment.)
 - d. Complete a master's recital prior to the Master's Exam (3 credits): MUSIC 559
2. *Other Studies (26 credits):*
 - a. Music Theory Electives: at least 9 credits of 400- or 500-level theory courses*
 - b. Seminar in Methods of Musical Research: MUHST 500
 - c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
 - d. Free Music Electives (5 credits): approved 400- or 500- level Music courses
3. *Master's Examination:* Pass a written and oral examination on approximately 10 topics approved by your Supervisory Committee.

Master of Music (Strings)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by

degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

51 credits

1. *Major Area (27 credits)*
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied): from MUSICP 524, MUSICP 525, MUSICP 526, MUSICP 563
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Enroll in an ensemble each quarter private lessons are taken (6 credits total): MUSEN 500
 - d. Complete a master's recital prior to the master's exam (3 credits): MUSIC 559, Master's Recital (3 credits) (A jury of divisional faculty must approve degree recitals.)
2. *Other Studies (24 credits):*
 - a. Music Theory Electives (3 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research, MUSHT 500

- c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
 - d. Music Electives (9 credits): at least 9 credits of approved 400- or 500-level electives
3. *Piano Proficiency*: Complete MUSAP 235 or pass a piano proficiency exam
 4. *Master's Examination*: Pass an oral master's examination conducted by Supervisory Committee.

Master of Music (Voice)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits)*:
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

56 credits

1. *Major Area (44 credits)*
 - a. Enroll in performance study (private lessons) (18 credits or until

- performance requirements are satisfied): MUSICP 520
- b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
- c. Enroll in an ensemble each quarter private lessons are taken (4 credits total): MUSEN 507, 551, 569, 575, 580, 582, 583, 584
- d. Complete Vocal Repertoire: MUSIC 460, 461, 462, 476, 477, 478
- e. Complete Vocal Pedagogy: MUSIC 435, 436
- f. Complete two master's recitals prior to the Master's Exam, one solo and one chamber: MUSIC 559, Master's Recital (3 credits ea.) (A jury of divisional faculty must approve degree recitals.)

2. *Other Studies (12 credits)*:
 - a. Music Theory Electives (3 credits): 400- or 500-level theory courses
 - b. Seminar in Methods of Musical Research, MUHST 500
 - c. Music Electives (6 credits): MUHST, MUSIC, or MUSED courses at the 400- or 500-level
3. *Piano Proficiency*: Complete MUSAP 235 or pass a piano proficiency exam
4. *Foreign Language*: Pass a graduate foreign language competency examination in German, French, Italian or Latin
5. *Master's Examination*: Pass a written and oral master's examination on approximately 10 topics approved by Supervisory Committee.

Master of Music (Woodwinds)

Completion Requirements

Below are the common requirements applying to all options in the degree program. Specific requirements vary by

degree option, see additional requirements section for option-specific information.

1. *Major Area (21-36 credits):*
 - a. Performance study (private lessons) until all recital requirements are met
 - b. Enroll in an ensemble each quarter private lessons are taken
 - c. Master's culminating requirements (exams, recitals, thesis) vary by option chosen; see additional requirements section below
2. *Other Studies (18-33 credits)*
 - a. Coursework in music theory, music history, methods of musical research, music electives
 - b. Additional option-specific requirements as specified

Additional Completion Requirements

48 credits

1. *Major Area (27 credits)*
 - a. Enroll in performance study (private lessons) (18 credits or until performance requirements are satisfied): from MUSICP 527, MUSICP 528, MUSICP 529, MUSICP 530, or MUSICP 531
 - b. Pass a jury at the end of each year of private instruction unless a jury-approved recital has been completed
 - c. Enroll in an ensemble each quarter private lessons are taken (6 credits total): MUSEN 500/501/502 (1 credit ea.)
 - d. Complete a master's recital prior to the master's exam (3 credits): MUSIC 559(A jury of divisional faculty must approve degree recitals.)
2. *Other Studies (21 credits):*
 - a. Music Theory Electives (9 credits): 400- or 500-level theory courses

- b. Seminar in Methods of Musical Research, MUHST 500
- c. Music History Electives (9 credits): Music History courses at the 400- or 500-level
3. *Piano Proficiency:* Complete MUSAP 235 or pass a piano proficiency exam
4. *Master's Examination:* Pass a written and oral examination on approximately 10 topics approved by Supervisory Committee.

Additional Information

- *Financial Aid:* A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for performance scholarships for new and returning students are held each year. See the school's Website (above) for more information about applications and audition dates.
 - *Research Facilities*
 - The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.
 - Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, Wind Ensemble, University Symphonic Band, Studio Jazz Ensemble, Baroque Ensemble and Chamber Singers, as well as non-Western ensembles with visiting artists from around the globe.

neareast@uw.edu

The Department of Near Eastern Languages and Civilization (NELC) is devoted to the study of the principal cultures and languages of the Near and Middle East, including Central Eurasia. NELC explores the contemporary cultural diversity of the region, its ancient and medieval roots, and its relevance to modern civilizations. Our graduates acquire the knowledge and practical skills that prepare them to succeed in a variety of careers, including academia, diplomacy, technology, and business.

Program of Study: Major: Near Eastern Studies

Program Overview

The Department of Near Eastern Languages and Civilization provides a liberal arts education in new global realities and their connections specifically to history of culture in the Near East and Central Asia. A detailed and critical knowledge of ancient and modern languages of these regions is of utmost importance for a better understanding of their rich cultural

heritages, and development of language skills requires cultural-historical knowledge.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Near Eastern Studies: Biblical and Ancient Near Eastern Studies
- Bachelor of Arts degree with a major in Near Eastern Studies: Comparative Civilizations
- Bachelor of Arts degree with a major in Near Eastern Studies: Languages and Cultures

Recommended Preparation

Suggested First- and Second-Year College Courses: Courses in any discipline that deals with the Near East. Courses in writing, history, literature, comparative religion, French, and German are also recommended. Students should begin their studies of Near Eastern languages as soon as possible.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Near Eastern Studies: Biblical and Ancient Near Eastern Studies

Credential Overview

The Hebrew Bible and Ancient Near Eastern Studies Program offers a diverse array of topical courses in translation on biblical and other ancient Near Eastern topics. The Program also includes a two-year sequence in biblical Hebrew language. The inductive method that we employ allows students to read from the Hebrew Bible (Old Testament) by the end of the second quarter

of the first year. Thereafter students take courses on biblical Hebrew prose texts, biblical poetry, and ancient inscriptions. The final quarter of the second year we typically devote to biblical Aramaic for those who have taken the Hebrew sequence. Periodically we offer courses on hieroglyphic Egyptian, Ugaritic, and Akkadian (the latter two invariably for students who have had at least two years of biblical Hebrew).

Completion Requirements

72 credits

1. Gateway Course (5 credits): NEAR E 101
2. NEAR E 201 and NEAR E 202
3. Two years of Biblical Hebrew or its equivalent as evidenced by examination. Alternatively a student may satisfy this language requirement by combining a minimum four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, Ge'ez, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser and/or faculty (30 credits)
4. Senior Seminar (2 credits): NEAR E 491
5. Near East Electives (25 credits): Supporting coursework from the following categories: advanced literature - 300- or 400-level courses from NEAR E or language prefixes; second ancient Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
6. A senior essay on a topic in Biblical and ancient Near Eastern studies (5 credits)

7. At least 22 of the 72 required credits must be taken in residence through the department.

Bachelor of Arts degree with a major in Near Eastern Studies: Comparative Civilizations

Credential Overview

The Near Eastern Comparative Civilizations track offers a wide exposure to the languages, literature, and cultures of the Near East. The diverse languages available to students are Arabic, Persian, Turkish, Modern Hebrew, and Turkic, including Uzbek and Uighur. Language courses at the 100, 200, and 400 levels will develop student's linguistic skill in oral and written forms. In addition, Near Eastern elective courses on various levels in English introduce students to a wide range of ethnic and religious cultures from the Near East. Through a selection of courses students develop a firm knowledge of geographical, historical and modern cultures in a region or regions of their choice in Near East. As such, the Comparative Civilizations track places an emphasis on a depth of area knowledge of the Near East. One feature of this is that in their final year student works with a NELC faculty member to produce a Senior Essay.

Completion Requirements

72 credits

1. Gateway Course (5 credits): NEAR E 101
2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or its equivalent as evidenced by examination

4. Senior Seminar (2 credits): NEAR E 491
5. Senior essay on a topic of Near Eastern civilization (5 credits): NEAR E 498
6. Near East Electives (25 credits): Supporting coursework at the 300 level or above (maximum 15 credits of approved exceptions)
7. At least 22 of the 72 required credits must be taken in residence through the department.

Bachelor of Arts degree with a major in Near Eastern Studies: Languages and Cultures

Credential Overview

The Near Eastern Language and Cultures track offers a wide exposure to the languages, literature, and cultures of the Near East. The diverse languages available to students are Arabic, Persian, Turkish, Modern Hebrew, and Turkic, including Uzbek and Uighur. Language courses at the 100, 200, and 400 levels will develop students linguistic skill in oral and written forms. In addition, Near Eastern elective courses taught in English will also introduce students to a wide range of cultures from the Near East. Finally, the Languages and Civilizations track places an emphasis on real world language skills as well as classical forms of the languages. The program prepares students for eventual study and work in the Near East.

Completion Requirements

69 credits

1. Gateway Course (5 credits): NEAR E 101
2. One introductory (200 level) course on the Near East (5 credits)
3. Primary Language (30 credits): Two years of one Near Eastern language, or

its equivalent as evidenced by examination

4. Advanced level coursework in primary language (10 credits): Advanced literature or text courses in primary language
5. Senior Seminar (2 credits): NEAR E 491
6. Near East Electives (20 credits): Supporting coursework from the following categories: advanced literature: 300- or 400-level courses from NEAR E or language prefixes; second Near Eastern language (must not exceed 15 credits); approved relevant exceptions from other departments (must not exceed 15 credits). NEAR E 498 may be used toward this requirement.
7. At least 22 of the 72 required credits must be taken in residence through the department.

Program of Study: Minor: Near Eastern Languages and Civilization

Program Overview

The Department of Near Eastern Languages and Civilization provides a liberal arts education in new global realities and their connections specifically to history of culture in the Near East and Central Asia. A detailed and critical knowledge of ancient and modern languages of these regions is of utmost importance for a better understanding of their rich cultural heritages, and development of language skills requires cultural-historical knowledge.

This program of study leads to the following credentials:

- Minor in Arabic
- Minor in Modern Hebrew

- Minor in Near Eastern Languages and Civilization
- Minor in Persian
- Minor in Turkic Languages
- Minor in Turkish

Minor in Arabic

Credential Overview

The Arabic minor enriches students' education by providing advanced proficiency in language skills and by enhancing understanding of how people in the Near East, North Africa, the Horn of Africa, and Islamic cultures experience the world. This minor serves as an excellent complement for those studying in various fields, including business, political science, and international studies.

Recommended Preparation

ARAB 103 or equivalent

Completion Requirements

30 credits

1. 15 credits from one of the following: (1) ARAB 201, ARAB 202, ARAB 203; (2) ARAB 205
2. Upper-division courses with ARAB prefix (10 credits)
3. Elective coursework (5 credits): refer to department website for a list of approved courses
4. Minimum of 15 credits at the 300 or 400 level
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Minimum 15 credits taken in residence through UW

The requirement to complete one or more of the language courses ARAB 201, ARAB

202, ARAB 203, or ARAB 205 may be satisfied by taking a placement exam and testing out. A successful placement exam does not count towards the 30-credit requirement. Students entering the UW with proficiency in Arabic beyond the second year of language training must take 20 credits of upper-division courses with the ARAB prefix. In addition, they must earn 10 credits of electives; refer to department website for a list of approved courses.

Minor in Modern Hebrew

Credential Overview

The Modern Hebrew minor enriches students' education by providing advanced proficiency in language skills and by enhancing understanding of Jewish and Israeli culture. This minor serves as an excellent complement for those studying in various fields, including business, political science, and international studies.

Recommended Preparation

MODHEB 103 or equivalent

Completion Requirements

30 credits

1. MODHEB 201, MODHEB 202, MODHEB 203 (15 credits)
2. Upper-division courses with the MODHEB prefix (10 credits)
3. Elective coursework (5 credits): refer to department website for a list of approved courses.
4. Minimum of 15 credits at the 300 or 400 level
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Minimum 15 credits taken in residence through UW

The requirement to complete one or more of the language courses MODHEB 201, MODHEB 202, MODHEB 203 may be satisfied by taking a placement exam and testing out. A successful placement exam does not count towards the 30-credit requirement. Students entering the UW with proficiency in Hebrew beyond the second year of language training must take 20 credits of upper-division courses with the MODHEB prefix. In addition, they must earn 10 credits of electives; refer to department website for a list of approved courses.

Minor in Near Eastern Languages and Civilization

Credential Overview

The Department of Near Eastern Languages and Civilization provides a liberal arts education in new global realities and their connections specifically to history of culture in the Near East and Central Asia. A detailed and critical knowledge of ancient and modern languages of these regions is of utmost importance for a better understanding of their rich cultural heritages, and development of language skills requires cultural-historical knowledge.

Completion Requirements

30 credits

1. NEAR E 101 (5 credits)
2. Two introductory courses (200-level) on the Near East (10 credits)
3. 15 additional credits from Near Eastern civilization or advanced-level language courses (may not include language courses at the beginning or intermediate level).

Minor in Persian

Credential Overview

The Persian minor enriches students' education by providing advanced proficiency in language skills and by enhancing understanding of Iranian and Islamic cultures. This minor serves as an excellent complement for those studying in various fields, including business, political science, and international studies.

Recommended Preparation

PRSAN 103 or equivalent

Completion Requirements

30 credits

1. PRSAN 201, PRSAN 202, PRSAN 203 (15 credits)
2. Upper-division courses with the PRSAN prefix (10 credits)
3. Elective coursework (5 credits): refer to department website for a list of approved courses
4. Minimum of 15 credits at the 300 or 400 level
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Minimum 15 credits taken in residence through UW

The requirement to complete one or more of the language courses PRSAN 201, PRSAN 202, PRSAN 203 may be satisfied by taking a placement exam and testing out. A successful placement exam does not count towards the 30-credit requirement. Students entering the UW with proficiency in Persian beyond the second year of language training must take 20 credits of upper-division courses with the PRSAN prefix. In addition, they must earn 10 credits of electives; refer

to department website for a list of approved courses.

Minor in Turkic Languages

Credential Overview

The Turkic minor enriches students' education by providing advanced proficiency in language skills and by enhancing understanding of Central Asian cultures. This minor serves as an excellent complement for those studying in various fields, including business, political science, and international studies.

Recommended Preparation

Either KAZAKH 103, UYGUR 103, UZBEK 103, or equivalent.

Completion Requirements

30 credits

1. Language courses: 15 credits at the second-year level, chosen from one of the following: (1) KAZAKH 201, KAZAKH 202, KAZAKH 203; (2) UYGUR 201, UYGUR 202, UYGUR 203; (3) UZBEK 201, UZBEK 202, UZBEK 203
2. Upper-division courses with the TURKIC prefix (10 credits)
3. Elective coursework (5 credits): refer to department website for a list of approved courses
4. Minimum of 15 credits at the 300 or 400 level
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Minimum 15 credits taken in residence through UW

The requirement to complete one or more of the language courses may be satisfied by

taking a placement exam and testing out. A successful placement exam does not count towards the 30-credit requirement. Students entering the UW with proficiency in a Turkic language beyond the second year of language training must take 20 credits of upper-division courses with the TURKIC prefix. In addition, they must earn 10 credits of electives; refer to department website for a list of approved courses.

Minor in Turkish

Credential Overview

The Turkish minor enriches students' education by providing advanced proficiency in language skills and by enhancing understanding of Turkish and Ottoman cultures. This minor serves as an excellent complement for those studying in various fields, including business, political science, and international studies.

Recommended Preparation

TKISH 103 or equivalent

Completion Requirements

30 credits

1. TKISH 201, TKISH 202, TKISH 203 (15 credits)
2. Upper-division courses with the TKISH prefix (10 credits)
3. Elective coursework (5 credits): refer to department website for a list of approved courses.
4. Minimum of 15 credits at the 300 or 400 level
5. Minimum 2.00 cumulative GPA for courses applied to the minor
6. Minimum 15 credits taken in residence through UW

The requirement to complete one or more of the language courses TKISH 201, TKISH 202, TKISH 203 may be satisfied by taking a placement exam and testing out. A successful placement exam does not count towards the 30-credit requirement. Students entering the UW with proficiency in Turkish beyond the second year of language training must take 20 credits of upper-division courses with the TKISH prefix. In addition, they must earn 10 credits of electives; refer to department website for a list of approved courses.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through serious study of a language and literature other than one's own. Graduates from the BA degree

have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.

- *Instructional and Research Facilities:* The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department's language classes make use of the University's well-equipped Language Learning Center.
- *Honors Options Available:* With College Honors (Completion of Honors core curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduate research is carried out under the supervision of faculty members. Students can also undertake research and internship opportunities while studying abroad.
- *Department Scholarships:* See departmental website for most current information.
- *Student Organizations/Associations:* There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

Graduate Program

(206) 543-6033

neareast@uw.edu

Program of Study: Master of Arts (Near Eastern Languages and Civilization)

Program Overview

The department offers a graduate program of studies leading to the master of arts degree, designed to provide students advanced training in at least one Near Eastern language and in a field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended both for students who wish to continue their studies at the doctoral level and for students who wish to pursue careers in government or business.

This program of study leads to the following credential:

- Master of Arts (Near Eastern Languages and Civilization)

Admission Requirements

Contact department for requirements.

Master of Arts (Near Eastern Languages and Civilization)

Completion Requirements

36 credits

1. Coursework determined in consultation with M.A. committee to prepare for written examinations.
2. Reading knowledge of French or German; or, with the prior approval of the student's MA committee, any other language pertinent to the research in the student's field of study. Normally, to satisfy this requirement, the student must pass a reading exam before beginning the second year of study towards the M.A.
3. A seminar paper representing the student's best work OR a thesis
4. Written examinations including: (1) general culture of the Near East, (2) student's field of specialization, (3) student's language of concentration, (4) second Near Eastern language related to the language of concentration

Neuroscience

318 [Hitchcock Hall](#)

206-616-3982

[Website](#)

[Faculty Website](#)

Neuroscience offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Program of Study: Major: Neuroscience

Program Overview

The Neuroscience Major is a multidisciplinary program at the University of Washington that leads to a Bachelor of Science degree in Neuroscience. It is designed to take advantage of the depth of expertise in neurobiology among faculty in many departments at UW, which has been for many years one of the leading institutions in the world in neuroscience research. Neuroscience is the interdisciplinary study of the nervous system, whose ultimate goal is to understand higher brain function and neurological disease at the cellular and molecular level. Neurobiologists combine molecular, electrophysiological, computational, and behavioral approaches to achieve this goal. For most of us, the excitement of this field comes from the attempt to understand the organ that defines us as individual, conscious human beings. We want to bring that excitement to you as undergraduates.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Neuroscience

Admission Requirements

Applicants are considered in the following groups: Direct Freshman Admission and Regular Admission. Admission is capacity constrained; meeting minimum standards guarantees consideration but not acceptance. Application deadline is the second Friday in October each year except for Direct Freshman Admission.

Direct Freshman Admissions

The department enrolls up to 15 percent of its incoming class directly from high school. Students accepted to the UW who indicate neuroscience as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school and generally have received a minimum 1400 on the SAT (mathematics and verbal sections) or a minimum 30 on the ACT. Admission is for autumn quarter only.

Regular Admission

1. BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
2. Completion of most supporting coursework in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science degree with a major in Neuroscience

Credential Overview

Neuroscience offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single

nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Completion Requirements

Minimum 86 credits

1. *Supporting coursework (minimum 48 credits):*
 - a. *Chemistry:* One of the following three sequences: CHEM 120, CHEM 220, CHEM 221; CHEM 142, CHEM 152 (or CHEM 143, CHEM 153), CHEM 223 CHEM 224; CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239 (or CHEM 335, CHEM 336, CHEM 337). Third sequence recommended. Organic chemistry laboratories not required. (15-27 credits)
 - b. *Physics:* Pathway 1 - PHYS 114, PHYS 115; Pathway 2 (recommended) - PHYS 121, PHYS 122. (8 to 10 credits)
 - c. *Mathematics:* Two quarters of calculus (MATH 124, MATH 125, or Q SCI 291, Q SCI 292) (10 credits)
 - d. *Introductory Biology (minimum 15 credits):* BIOL 180, BIOL 200, BIOL 220 (15 credits)
2. *Introduction to Neuroscience (10 credits):* NEUSCI 301, NEUSCI 302.
3. *Advanced courses in neuroscience (12 credits):* NEUSCI 401, NEUSCI 402, NEUSCI 403, NEUSCI 404.
4. *Electives:* Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7

credits of undergraduate research toward the 16 elective credits.

5. Minimum cumulative 2.00 GPA for courses applied to the major.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Throughout the core sequence of neuroscience, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.
 - *Instructional and Research Facilities:* Laboratories are required with introductory courses. (NEUSCI 301 and NEUSCI 302). The program offers state-of-the-art facilities and equipment for each course.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Most neuroscience students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.
 - *Program Scholarships:* None offered.
 - *Student Organizations/Associations:* Neuroscience Student Club; Alpha Epsilon Delta, the national premedical honorary society.
-

Philosophy

361 [Savery Hall](#)

206-543-5855

[Website](#)

[Faculty Website](#)

philinfo@uw.edu

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Program of Study: Major: History and Philosophy of Science

Program Overview

History and Philosophy of Science (HPS) studies the theories, methods, practices, and institutions of science from historical and philosophical perspectives. It strives to provide a genuinely interdisciplinary structure for critical reflection on science in all its aspects.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in History and Philosophy of Science

Recommended Preparation

Suggested First- and Second-Year College Courses: PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

Admission Requirements

1. HSTCMP 311, HSTCMP 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum 2.0 grade
2. Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum 2.0 grade
3. Minimum UW 2.00 GPA
4. Completion of 10 credits of composition/writing courses with a minimum 2.0 grade for each course. This requirement may be met by freshman English composition courses, "W" courses, or any courses in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

Bachelor of Arts degree with a major in History and Philosophy of Science

Credential Overview

History and Philosophy of Science (HPS) studies the theories, methods, practices, and institutions of science from historical and philosophical perspectives. It strives to provide a genuinely interdisciplinary structure for critical reflection on science in all its aspects.

Completion Requirements

85 credits

1. *Core Courses (25 credits)*: HSTCMP 311, HSTCMP 312, HSTCMP 390; PHIL 160 or PHIL 460; PHIL 120. Minimum 2.0 grade in each course and overall minimum 2.50 GPA.
2. *Electives*: 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): ESS 404, HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317 (also MHE 422), HIST 318 (also MHE 424), HIST 412; PHIL 243, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. Minimum 2.0 grade in each class.
3. *Capstone (5 credits)*: Completion of HPS 400, with a minimum 2.0 grade
4. *Science Component*: 30 credits Natural Sciences (NSc) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum 2.50 GPA in these courses and a minimum 2.0 grade in each course. At least 15 of the credits must be outside mathematics.

Program of Study: Major: Philosophy

Program Overview

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value. Through the study of philosophy, students build skills of critical reflection, careful reading and writing, and

creative thinking—skills that will be invaluable throughout their lives as workers and citizens in a democratic society. A degree in philosophy is a wonderful compliment to any major, whether it is in the physical sciences, social sciences, arts, or humanities. Generally speaking, training in philosophy will be valuable in any occupation that requires examination and analysis of problems, critical evaluation of alternative solutions, and rational advocacy of one's conclusions.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Philosophy
- Bachelor of Arts degree with a major in Philosophy: Ethics

Recommended Preparation

Suggested First- and Second-Year College Courses: Introductory courses in symbolic logic, social philosophy, major problems of philosophy, and history of philosophy. Courses to develop writing, language, and analytic skills.

Admission Requirements

Minimum 2.00 cumulative GPA and completion of 10 credits of philosophy coursework

Bachelor of Arts degree with a major in Philosophy

Completion Requirements

50 credits

1. One course from PHIL 115, PHIL 120, or an upper-division course in logic

2. One course from PHIL 320, PHIL 330, PHIL 335, or PHIL 340 (undergraduate adviser must approve substitutions)
3. One course from PHIL 322, PHIL 332, PHIL 342, or 400-level courses in the same areas (undergraduate adviser must approve substitutions)
4. At least four UW philosophy courses at the 400 level, excluding PHIL 484
5. At least 25 credits through the UW
6. Minimum 2.00 cumulative GPA for all philosophy courses taken

Bachelor of Arts degree with a major in Philosophy: Ethics

Completion Requirements

Minimum 50 credits

1. Minimum 25 credits from approved list of ethics and justice-related courses. See department for approved course list.
2. One from PHIL 115, PHIL 120, or upper-division course in logic (5 credits)
3. One from PHIL 320, PHIL 330, PHIL 335, or PHIL 340. Adviser must approve substitutions (5 credits)
4. One from PHIL 322, PHIL 332, PHIL 342, or 400-level course in the same areas. Adviser must approve substitutions (5 credits)
5. Minimum four UW 400-level philosophy courses, excluding PHIL 484, two of which must be from approved list of ethics and justice-related courses (12-20 credits)
6. Minimum 25 credits taken through UW
7. Minimum 2.00 cumulative GPA for all philosophy courses taken

Program of Study: Minor: Ethics

Program Overview

This minor is intended to be an integrated component of a student's major studies and to provide interdisciplinary training in ethical reasoning. Students will complete the minor by taking select values courses in philosophy and their major. A rapidly changing world brings with it both benefits and problems. Thinking seriously about the problems requires students who have the ability to think across disciplinary boundaries. By encouraging students to recognize and analyze how the abstract terms of ethical theory play out in practice, as well as how the practical realities of work within various disciplines inform and constrain ethical argumentation, this minor enables students to make positive and informed contributions to their worlds.

This program of study leads to the following credential:

- Minor in Ethics

Thinking seriously about the problems requires students who have the ability to think across disciplinary boundaries. By encouraging students to recognize and analyze how the abstract terms of ethical theory play out in practice,

as well as how the practical realities of work within various disciplines inform and constrain ethical argumentation, this minor enables students to make positive and informed contributions to their worlds.

Completion Requirements

27 credits

1. Three courses from an approved list in which normative thinking and conceptual analysis of values and frameworks are central; at least one at the 300 level or above. See department website for approved list of courses.
2. Two courses from an approved list in which values-laden issues are central; at least one at the 300 level or above. See department website for approved list of courses.
3. ETHICS 495 (2-credit capstone).
4. Minimum 15 credits outside the student's major.
5. Minimum 15 credits completed through the UW.
6. Minimum 2.00 GPA in courses used for the minor.

Program of Study: Minor: Philosophy

Program Overview

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value. Through the study of philosophy, students build skills of critical reflection, careful reading and writing, and creative thinking. Generally speaking, training in philosophy will be valuable in any occupation that requires examination and analysis of problems, critical evaluation of alternative solutions, and rational advocacy of one's conclusions. A philosophy minor is a wonderful

compliment to any major, whether it is in the physical sciences, social sciences, arts, or humanities.

A philosophy minor is a wonderful compliment to any major, whether it is in the physical sciences, social sciences, arts, or humanities.

Completion Requirements

30 credits

1. PHIL 115 or PHIL 120, or an upper-division course in logic
2. At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.
3. 10 philosophy elective credits at any level

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the Department

of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and law. A few go on to graduate school and become professional philosophers.

Students' work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal profession. The history and philosophy of science major is of particular interest to those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major.

- *Instructional and Research Facilities:* The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department offers

internship credits for students participating in the philosophy of children program. Students may also arrange for internship credit with individual faculty. See adviser for details.

- *Department Scholarships:* The Kenneth Clatterbaugh scholarship acknowledges a student with financial need who has outstanding academic merit and commitment to philosophy. The Kenneth R. Parker Award for Excellence in Community Service honors an undergraduate philosophy major or minor who has blended her or his studies in philosophy with a volunteer-based community project. The recipient receives a \$500 scholarship. See adviser for details.
- *Student Organizations/Associations:* The undergraduate student club is dedicated to the informal discussion of philosophical issues.

Program of Study: Doctor of Philosophy (Philosophy)

This program of study leads to the following credentials:

- Doctor of Philosophy (Philosophy)
- Doctor of Philosophy (Philosophy: Ancient Philosophy)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Philosophy)

Completion Requirements

90-99 credits depending on option chosen

1. *Topics in Teaching Philosophy (2 credits)*: PHIL 504 and PHIL 505
2. *Pre-Dissertation Workshop (10 credits)*: PHIL 502 and PHIL 503
3. *12 Graduate Courses in Philosophy (48 minimum credits, must be completed at grade of 3.0 or higher)*:
 - a. *Distribution Area: History (2 courses)*: Choose from PHIL 422, PHIL 426, PHIL 430, PHIL 431, PHIL 433, PHIL 436, PHIL 437, PHIL 438, PHIL 520, PHIL 522, PHIL 526
 - b. *Distribution Area: Science, Epistemology, and Metaphysics (3 courses)*: Choose from PHIL 450, PHIL 453, PHIL 459, PHIL 460, PHIL 463, PHIL 464, PHIL 466, PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 479, PHIL 481, PHIL 482, PHIL 483, PHIL 490, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 566, PHIL 570, PHIL 587
 - c. *Distribution Area: Values (3 courses)*: Choose from PHIL 406, PHIL 407, PHIL 408, PHIL 409, PHIL 410, PHIL 411, PHIL 412, PHIL 413, PHIL 414, PHIL 415, PHIL 416, PHIL 417, PHIL 418, PHIL 440, PHIL 441, PHIL 442, PHIL 445, PHIL 446, PHIL 449, PHIL 465, PHIL 467, PHIL 510, PHIL 514, PHIL 538, PHIL 540, PHIL 545, PHIL 565
 - d. *Formal Methods (1 course)*: Choose from PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 483, PHIL 570
 - e. *Courses designated as seminars (6 courses)*: Choose from PHIL 510,

PHIL 514, PHIL 520, PHIL 522, PHIL 526, PHIL 540, PHIL 545, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 565, PHIL 566, PHIL 570

4. *Dissertation (27 credits)*: PHIL 800
5. Additional PHIL courses at the 400-level or above may be used to meet the required total.
6. *Master's Qualifying Papers*: Students submit a qualifying paper at the end of the second year which acts as the culmination of the Master's program as well as admission to the PhD program.
7. *Literature Review*: Students complete a literature review in the Autumn quarter of their 3rd year (graded pass/fail). Must pass the literature review.
8. *General Exam*
9. *Final Exam & Submission of Final Dissertation*
10. *Other Courses*: Students may use up to three approved courses outside philosophy. (Such courses do not automatically satisfy the twelve-course requirement.)

Doctor of Philosophy (Philosophy: Ancient Philosophy)

Completion Requirements

90-99 credits depending on option chosen

1. *Topics in Teaching Philosophy (2 credits)*: PHIL 504 and PHIL 505
2. *Pre-Dissertation Workshop (10 credits)*: PHIL 502 and PHIL 503
3. *12 Graduate Courses in Philosophy (48 minimum credits, must be completed at grade of 3.0 or higher)*:
 - a. *Distribution Area: History (2 courses)*: Choose from PHIL 422, PHIL 426, PHIL 430, PHIL 431, PHIL 433, PHIL 436, PHIL 437,

- PHIL 438, PHIL 520, PHIL 522, PHIL 526
- b. *Distribution Area: Science, Epistemology, and Metaphysics (3 courses)*: Choose from PHIL 450, PHIL 453, PHIL 459, PHIL 460, PHIL 463, PHIL 464, PHIL 466, PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 479, PHIL 481, PHIL 482, PHIL 483, PHIL 490, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 566, PHIL 570, PHIL 587
 - c. *Distribution Area: Values (3 courses)*: Choose from PHIL 406, PHIL 407, PHIL 408, PHIL 409, PHIL 410, PHIL 411, PHIL 412, PHIL 413, PHIL 414, PHIL 415, PHIL 416, PHIL 417, PHIL 418, PHIL 440, PHIL 441, PHIL 442, PHIL 445, PHIL 446, PHIL 449, PHIL 465, PHIL 467, PHIL 510, PHIL 514, PHIL 538, PHIL 540, PHIL 545, PHIL 565
 - d. *Formal Methods (1 course)*: Choose from PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 483, PHIL 570
 - e. *Courses designated as seminars (6 courses)*: Choose from PHIL 510, PHIL 514, PHIL 520, PHIL 522, PHIL 526, PHIL 540, PHIL 545, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 565, PHIL 566, PHIL 570
4. *Dissertation (27 credits)*: PHIL 800
 5. Additional PHIL courses at the 400-level or above may be used to meet the required total.
 6. *Master's Qualifying Papers*: Students submit a qualifying paper at the end of the second year which acts as the culmination of the Master's program as well as admission to the PhD program.
 7. *Literature Review*: Students complete a literature review in the Autumn quarter

of their 3rd year (graded pass/fail). Must pass the literature review.

8. *General Exam*
9. *Final Exam & Submission of Final Dissertation*
10. *Other Courses*: Students may use up to three approved courses outside philosophy. (Such courses do not automatically satisfy the twelve-course requirement.)

Additional Completion Requirements

In addition to all other requirements, the Ancient Philosophy option requires:

1. *4 graduate courses in Classics Department (12 credits)*: Students must complete four approved courses at the graduate level (400 or above) in the Classics department, at least one of which must be at the 500 level.

Additional Information

Financial Aid: Graduate students are admitted only if they can be offered some financial support. Typically students receive teaching assistantships, and the Graduate School makes some research assistantships available on a competitive basis. Funding packages are typically for five years and require satisfactory academic progress.

1. *Topics in Teaching Philosophy (1 credit): PHIL 504*
2. *11 Graduate Courses in Philosophy (41 minimum credits, must be completed at grade of 3.0 or higher):*
 - a. *Distribution Area: History (2 courses):* PHIL 422, PHIL 426, PHIL 430, PHIL 431, PHIL 433, PHIL 436, PHIL 437, PHIL 438, PHIL 520, PHIL 522, PHIL 526
 - b. *Distribution Area: Science, Epistemology, and Metaphysics (3 courses):* PHIL 450, PHIL 453, PHIL 459, PHIL 460, PHIL 463, PHIL 464, PHIL 466, PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 479, PHIL 481, PHIL 482, PHIL 483, PHIL 490, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 566, PHIL 570, PHIL 587

- c. *Distribution Area: Values (3 courses):* PHIL 406, PHIL 407, PHIL 408, PHIL 409, PHIL 410, PHIL 411, PHIL 412, PHIL 413, PHIL 414, PHIL 415, PHIL 416, PHIL 417, PHIL 418, PHIL 440, PHIL 441, PHIL 442, PHIL 445, PHIL 446, PHIL 449, PHIL 465, PHIL 467, PHIL 510, PHIL 514, PHIL 538, PHIL 540, PHIL 545, PHIL 565
 - d. *Formal Methods Course (1 course):* PHIL 470, PHIL 471, PHIL 472, PHIL 473, PHIL 474, PHIL 483, PHIL 570
 - e. *Courses designated as seminars (4 courses):* PHIL 510, PHIL 514, PHIL 520, PHIL 522, PHIL 526, PHIL 540, PHIL 545, PHIL 550, PHIL 556, PHIL 560, PHIL 563, PHIL 564, PHIL 565, PHIL 566, PHIL 570
3. *Master's Qualifying Papers:* Students submit a qualifying paper at the end of the second year. (Part-time students submit their paper for evaluation upon completion of 11 courses in philosophy.)
 4. *Evaluation:* Students completing the above requirements are (a) awarded an MA and admitted to the PhD program; (b) awarded an MA and invited to revise and resubmit a qualifying paper a second time, or prepare a new qualifying paper; (c) awarded a terminal MA; or (d) dropped from the program without a degree.
 5. *Satisfactory Progress:* Students not yet admitted to the PhD program must take at least two courses (10 credits) per quarter with a minimum 3.0 grade.
 6. *Other Courses:* Students may use up to three approved courses outside philosophy. (Such courses do not automatically satisfy the twelve-course requirement.)

Additional Information

Financial Aid: Graduate students are admitted only if they can be offered some financial support. Typically students receive teaching assistantships, and the Graduate School makes some research assistantships available on a competitive basis. Program of Study: Major: Physics

Program Overview

Physics is the study of the behavior of matter, space, time, and fields. Using highly sophisticated experimental and mathematical techniques, physicists gather detailed measurements of phenomena—from the largest scales involving the entire universe to the smallest scales involving the most fundamental particles—to construct theories that explain how the universe and the things in it behave. The Department of Physics at UW educates students at all levels from general education, through preparation for teaching and scientific careers, to doctoral and post-doctoral education. The department welcomes and encourages the involvement of undergraduates in research.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Physics: Applied Physics
- Bachelor of Science degree with a major in Physics: Biophysics
- Bachelor of Science degree with a major in Physics: Comprehensive Physics
- Bachelor of Science degree with a major in Physics: Teacher Preparation

Admission Requirements

Admission Pathways

Physics has two admissions pathways: Standard and Early. Most students join the major through the Standard Admission pathway, having completed a full year of college-level physics and calculus and continuing with 200-level courses. Early Admission is appropriate for transfer

applicants who are completing their physics series at the time of application to UW, or who have completed the introductory series but have no 200-level physics courses available at their institution, and wish to apply for direct admission to the physics major. It is also available to currently enrolled students with strong records who are certain they want to major in physics after completion of just the first two quarters of the introductory sequence. Since Early Admission applications contain less information on prerequisite coursework, academics are generally held to a higher standard for this pathway. Students admitted under Early Admission must register for a 200-level physics course in their first enrolled quarter as a major to maintain Satisfactory Progress in the major. Students whose admission is denied under Early Admission are encouraged to apply again under Standard Admission after they successfully complete additional physics and math courses.

Standard Admission Requirements

1. Completion of PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143); and MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136).
2. Enrollment in minimum one physics lecture course with course number higher than 220 during the application quarter. Completion of minimum one physics lecture course (any course number, either at UW or elsewhere) within the two quarters prior to application.
3. Standard Admission is twice a year. Application deadlines: April 5 for autumn quarter and October 5 for winter quarter.

Winter application window: Between January 1 and January 20, students who have completed both 105 credits and 5 post-high-school college quarters, or who are newly arrived transfer students, may apply for spring quarter admission.

4. Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - a. Personal Statement. The statement should discuss reasons for choosing a physics major and strategies for success in the major, including a discussion of lessons learned from previous successes and difficulties and plans for accessing support in the major. The statement should also address how the chosen degree option (applied, comprehensive, biophysics, teaching) and submitted graduation plan (see 4.c) are suited to life and career goals.
 - b. Academic performance. This is measured by: GPA; grades in courses required for admission; difficulty of other courses completed; frequency of incompletes, repeated courses, and withdrawals; relevant work and life experience.
 - c. Graduation plan. This should be completed in MyPlan and printed to a pdf file, submitted with the application. Preapproval of graduation plan by Physics Student Services is recommended; incoming majors must have their Graduation Plan approved no later than six weeks after acceptance into the major to avoid having a hold placed on registration.

See department website for a description of degree requirements for the four physics

degree options, sample graduation plans, and suggestions of topics to include in a personal statement. Successful applicants typically have over a minimum 2.60 cumulative GPA in physics and math courses, especially those taken recently.

Early Admission Requirements

1. Completion of PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142); and MATH 124, MATH 125 (or MATH 134, MATH 135). Transfer applicants should have completed the first two quarters or first semester of a year-long introductory series in both physics and calculus.
2. Current enrollment in PHYS 123 (or PHYS 143); and MATH 126 (or MATH 136). Transfer applicants should be enrolled in the final quarter or semester of a year-long introductory series in both physics and calculus. If the applicant has completed one year of introductory physics and/or calculus, they should be enrolled in a 200-level math course. (Applicants currently enrolled in a 200-level physics course should apply under the Standard pathway.)
3. Early Admission is open twice each year. Application deadlines: April 5 for autumn quarter and October 5 for winter quarter.
4. Meeting minimum requirements does not guarantee admission. Admission is capacity constrained, based on holistic review of a student's record as follows:
 - a. Personal Statement. The statement should discuss reasons for choosing a physics major and strategies for success in the major, including a discussion of lessons learned from previous successes and difficulties and plans for accessing support in the major. The statement should also address how the chosen degree option (applied, comprehensive,

biophysics, teaching) and submitted graduation plan (see 4.c) are suited to life and career goals.

- b. Academic performance. This is measured by: GPA; grades in courses required for admission; difficulty of other courses completed; frequency of incompletes, repeated courses, and withdrawals; relevant work and life experience.
- c. Graduation plan. This should be completed in MyPlan and printed to a pdf file that is submitted with the application. Students who are not currently enrolled (i.e., transfer applicants) may alternatively include the same information on the form found on the department website. Preapproval of graduation plan by Physics Student Services is recommended; incoming majors must have their Graduation Plan approved no later than six weeks after acceptance into the major to avoid having a hold placed on their ability to register for classes. Note that graduation plans are expected to change over time; this requirement is primarily for advising and planning purposes.

See department website for a description of the degree requirements for the four physics degree options, sample graduation plans, and suggestions of topics to include in a personal statement. Successful Early Admission applicants typically have over a minimum 3.20 cumulative GPA in physics and math courses, especially in those taken recently.

Bachelor of Science degree with a major in Physics: Applied Physics

Credential Overview

The Applied Physics degree option is aimed at students who plan to enter a technical job with their physics B.S. or pursue a masters degree in engineering or data science after a grounding in physics. The Applied option replaces some of the more mathematically-based required classes of the Comprehensive option with additional laboratory and computer programming requirements, and allows for breadth via selected introductory science and/or advanced laboratory classes as allowed electives. This is an excellent option for students interested in engineering or computers, but who seek a deeper understanding of the underlying phenomena and who prefer not to specialize in a particular branch of engineering at the undergraduate level.

Recommended Preparation

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, and one or more higher-level math or applied math courses; PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 208.)

These physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Completion Requirements

Minimum 89-113 credits, depending on credential/option

1. *Physics core courses (37 credits):* PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-20 credits):* one of the following options
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 209 (or AMATH 353), MATH 224, MATH 334, or AMATH 401
3. Additional completion requirements specified below

Additional Completion Requirements

Option specific credits (34-43 credits)

1. PHYS 231; one course from PHYS 226, PHYS 323, PHYS 324, PHYS 328, PHYS 329; and AMATH 301 (10-11 credits)
2. Two additional mathematical courses (6-10 credits) from PHYS 228, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, MATH 334, MATH 335, MATH 336, or AMATH 401
3. *Advanced laboratory (6-8 credits):* two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, ASTR 480 (or ASTR 481)
4. *Electives (minimum 9 credits):* See adviser for approved list of electives.

5. *Undergraduate capstone (3-5 credits):* minimum 3 credits from any combination of PHYS 401, PHYS 402, PHYS 403, PHYS 494, PHYS 495, PHYS 496, PHYS 498, PHYS 499, ASTR 481, or ASTR 499. (ASTR 481 may count as laboratory or research).

Bachelor of Science degree with a major in Physics: Biophysics

Credential Overview

The Biophysics Option is aimed at giving students a thorough grounding in physics, biology and chemistry, preparing them for medical school or graduate school in biophysics or bioengineering, or other careers that combine physical and biological sciences.

Recommended Preparation

Suggested First- and Second-Year College Courses: One year of introductory biology and/or chemistry; MATH 124, MATH 125, MATH 126, and one or more higher-level math or applied math courses; PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 208.)

The physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Completion Requirements

Minimum 89-113 credits, depending on credential/option

1. *Physics core courses (37 credits):* PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-20 credits):* one of the following options
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 209 (or AMATH 353), MATH 224, MATH 334, or AMATH 401
3. Additional completion requirements specified below

Additional Completion Requirements

Option specific credits (48-56 credits)

1. PHYS 228, PHYS 324, PHYS 328, PHYS 429; one course from PHYS 226, PHYS 323, PHYS 325, PHYS 329 (17-18 credits)
2. *Chemistry (12-15 credits from the following options):*
 - a. CHEM 142 (or CHEM 145), CHEM 152 (or CHEM 155), CHEM 162 (or CHEM 165)
 - b. CHEM 143 and CHEM 153
3. *Biology (10 credits):* BIOL 180 and BIOL 200
4. *Additional chemistry and biology (6-10 credits):* two courses from CHEM 223 (or CHEM 237 or CHEM 335), CHEM 224 (or CHEM 238 or CHEM 336),

CHEM 428, CHEM 452 (or CHEM 456), CHEM 453, CHEM 454, CHEM 455, BIOL 220, BIOL 340, BIOL 350, BIOL 355, BIOL 401, BIOL 404, BIOL 427, BIOL 461, BIOL 467, BIOC 405, BIOC 440

5. *Undergraduate capstone*: 3 credits from any combination of BIOC 499, BIOL 499, CHEM 499, GENOME 499, MICROM 499, NEUSCI 499, P BIO 499, BIOEN 499, biophysics-related projects in PHYS 498, or biophysics-related projects in PHYS 499.

Bachelor of Science degree with a major in Physics: Comprehensive Physics

Credential Overview

The Comprehensive Physics degree option is aimed at those wishing a thorough, mathematically-rigorous grounding in physics. This degree option will prepare students for a variety of technical careers. Students aiming at graduate school in physics, astronomy, or a related field should choose this degree option. Students wishing to be accepted at a top physics graduate school should take more than the minimum requirements, take advantage of research opportunities, and do well in their classes.

Recommended Preparation

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, and one or more higher-level math or applied math courses; PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 208.)

These physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Completion Requirements

Minimum 89-113 credits, depending on credential/option

1. *Physics core courses (37 credits)*: PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-20 credits)*: one of the following options
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 209 (or AMATH 353), MATH 224, MATH 334, or AMATH 401
3. Additional completion requirements specified below

Additional Completion Requirements

Option specific credits (38-46 credits)

1. 20-22 credits from PHYS 226, PHYS 228, PHYS 324; minimum three courses from PHYS 323, PHYS 325, PHYS 328, PHYS 329, ASTR 321 (or ASTR 323), ASTR 322

2. One additional mathematics course from the core list (3-5 credits): MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, MATH 334, MATH 335, MATH 336, or AMATH 401
3. *Advanced laboratory (6-8 credits)*: two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, ASTR 480 (or ASTR 481)
4. *Upper division lecture electives (minimum 6 credits)*: See adviser for approved list of electives.
5. *Undergraduate capstone (3 to 5 credits)*: minimum 3 credits from any combination of PHYS 401, PHYS 402, PHYS 403, PHYS 494, PHYS 495, PHYS 496, PHYS 498, PHYS 499, ASTR 481, or ASTR 499. (ASTR 481 may count as laboratory or research).

Bachelor of Science degree with a major in Physics: Teacher Preparation

Credential Overview

This option is aimed at those who plan to teach physics, math or other technical fields in secondary school. It is also appropriate for students aimed at a science journalism career, or other fields involving the communication of physics to a broader audience. Its distinguishing feature is the Physics 407-8-9 sequence, which is aimed at giving you the conceptual understanding and experience required to teach physics without college-level mathematics.

Recommended Preparation

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, and one or more higher-level math or applied math courses; PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225,

PHYS 227. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 208.)

These physics and mathematics courses are required prerequisites for junior-level work in physics, not only at the UW, but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college either need to take more than four years to earn a degree or be limited to a minimal course of study for graduation in four years.

Completion Requirements

Minimum 89-113 credits, depending on credential/option

1. *Physics core courses (37 credits)*: PHYS 121 (or PHYS 141), PHYS 122 (or PHYS 142), PHYS 123 (or PHYS 143), PHYS 224, PHYS 225, PHYS 227, PHYS 294, PHYS 321, PHYS 322, PHYS 334
2. *Mathematics core courses (18-20 credits)*: one of the following options
 - a. MATH 124, MATH 125, MATH 126, and one course from MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, or AMATH 401
 - b. MATH 134, MATH 135, MATH 136 and one course from MATH 209 (or AMATH 353), MATH 224, MATH 334, or AMATH 401
3. Additional completion requirements specified below

Additional Completion Requirements

Option specific credits (38-43 credits)

- 14-15 credits from PHYS 226, PHYS 228, PHYS 324; one course from PHYS 323, PHYS 328, PHYS 329
- Physics by inquiry (15 credits)*: PHYS 407, PHYS 408, and PHYS 409
- One additional mathematics course from the core list (3-5 credits): MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 209 (or AMATH 353), MATH 224, MATH 334, MATH 335, MATH 336, or AMATH 401
- Advanced laboratory (3-5 credits)*: One course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, PHYS 434, ASTR 480, or ASTR 481
- Teaching practicum (3 credits)*: PHYS 401, PHYS 402, PHYS 403, or PHYS 499, working on a project that involves teaching

Program of Study: Minor: Physics

Program Overview

Are you considering continuing your studies in Physics, but are not quite sure if you want to major in this field? Would you like to take a few more Physics classes but you worry about investing too much time on them without getting a degree? Are you a declared major in a college other than Arts and Sciences, but would like a credential that demonstrates knowledge of Physics without meeting all the A&S distribution requirements? The Minor in Physics allows you to pursue your interest by taking additional courses which are valid for the major, should you decide on that route, while achieving a benchmark which awards recognition for your effort. The minor provides a grounding in physics as it applies to interdisciplinary STEM fields such as engineering or environmental science, as well as to interdisciplinary careers such as teaching, journalism, medicine, or law.

This program of study leads to the following credential:

- Minor in Physics

Minor in Physics

Credential Overview

A physics minor includes a basic core of introductory classical mechanics, electricity and magnetism, waves, thermodynamics, and quantum mechanics plus three additional courses specializing in physics education, experimental physics, or mathematical physics. The minor provides a grounding in physics as it applies to interdisciplinary STEM fields such as engineering or environmental science, as well as to interdisciplinary careers such as teaching, journalism, medicine, or law.

Completion Requirements

30-36 physics credits (in addition to 15 credits of MATH 124, MATH 125, and MATH 126)

- Core courses*: PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
- One of the following options:
 - Physics Education*: PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits)
 - Experimental Physics*: PHYS 231, PHYS 334, and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)
 - Mathematical Physics*: PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)

3. Minimum grade of 2.0 required for each physics course counted toward the minor.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The program is one of the largest in the nation, with approximately 80-100 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue with further studies in physics or in other fields (such as astronomy, medicine, law, business, biology, or engineering).
- *Instructional and Research Facilities:* The Physics and Astronomy Departments share a modern building which contains excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with

Universität Justus-Leibig in Geissen, Germany.

- *Department Scholarships:* Select scholarships available every spring upon nomination by an instructor.
- *Student Organizations/Associations:* Society of Physics Students, Career Development Organization for Physicists and Astronomers

Of Special Note:

One year of high school physics is strongly recommended before taking PHYS 121.

Graduate Programs

Program of Study: Doctor of Philosophy (Physics)

This program of study leads to the following credentials:

- Doctor of Philosophy (Physics and Nanotechnology and Molecular Engineering)
- Doctor of Philosophy (Physics and Nanotechnology)
- Doctor of Philosophy (Physics)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Physics and Nanotechnology and Molecular Engineering)

Completion Requirements

90 credits

1. *Core/Foundation (35 credits):* PHYS 513, PHYS 514, PHYS 515, PHYS 517,

PHYS 518, PHYS 519, PHYS 524,
PHYS 525, PHYS 505, PHYS 528

2. *Dissertation (27 credits)*: PHYS 800
3. *Remaining credits (28 credits)*: Any 500-level or above course work as approved by Graduate Program Coordinator (GPC)
4. *Exams*: Written qualifying examination (typically completed before or during the second year), oral general examination for admission to candidacy, and oral final examination.
5. *Teaching experience*: Courses in teaching techniques in physics, PHYS 501 through PHYS 503, are required of students holding teaching assistantships.

Doctor of Philosophy (Physics and Nanotechnology)

Completion Requirements

90 credits

1. *Core/Foundation (35 credits)*: PHYS 513, PHYS 514, PHYS 515, PHYS 517, PHYS 518, PHYS 519, PHYS 524, PHYS 525, PHYS 505, PHYS 528
2. *Dissertation (27 credits)*: PHYS 800
3. *Remaining credits (28 credits)*: Any 500-level or above course work as approved by Graduate Program Coordinator (GPC)
4. *Exams*: Written qualifying examination (typically completed before or during the second year), oral general examination for admission to candidacy, and oral final examination.
5. *Teaching experience*: Courses in teaching techniques in physics, PHYS 501 through PHYS 503, are required of students holding teaching assistantships.

Doctor of Philosophy (Physics)

Completion Requirements

90 credits

1. *Core/Foundation (35 credits)*: PHYS 513, PHYS 514, PHYS 515, PHYS 517, PHYS 518, PHYS 519, PHYS 524, PHYS 525, PHYS 505, PHYS 528
2. *Dissertation (27 credits)*: PHYS 800
3. *Remaining credits (28 credits)*: Any 500-level or above course work as approved by Graduate Program Coordinator (GPC)
4. *Exams*: Written qualifying examination (typically completed before or during the second year), oral general examination for admission to candidacy, and oral final examination.
5. *Teaching experience*: Courses in teaching techniques in physics, PHYS 501 through PHYS 503, are required of students holding teaching assistantships.

Program of Study: Master of Science (Physics)

This program of study leads to the following credentials:

- Master of Science (Physics)
- Master of Science (Physics) (fee-based)

Admission Requirements

Contact department for requirements.

Master of Science (Physics)

Completion Requirements

36 credits

1. *Core/Foundation credits (23 credits)*: PHYS 513, PHYS 514, PHYS 517,

PHYS 518, PHYS 524, PHYS 505,
PHYS 528

2. *Remaining credits (13 credits):* PHYS 500-level or above course work as approved by Graduate Program Coordinator (GPC)
3. Pass department MS Review.

Master of Science (Physics) (fee-based)

Credential Overview

This option is designed for students who are currently employed and whose background is in physical science, engineering, mathematics, or computer science.

Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students are expected to have an undergraduate background equivalent to a BS degree in physical science, engineering, mathematics, or computer science. This program is part time, with classes offered evenings.

Completion Requirements

36 credits

1. *Core courses (12 credits):* Any 3 of the following: PHYS 441, PHYS 543, PHYS 541, PHYS 544
2. *Elective courses (to meet required total):*
 1. Any 400 or 500 level PHYS courses;
 2. PHYS 600 Independent study (6-25 credits)
3. *Final oral examination by a committee*
4. *Submission of a final project report*

Additional Information

Financial Aid: Most graduate students are supported by fellowships and assistantships. Applications for the PhD program are automatically considered for these fellowships and assistantships.

[Faculty Website](#)

polisci@uw.edu

The Political Science Department has a long history of teaching and research excellence reflecting our commitment to the study of politics and policy. The faculty features internationally renowned scholars who conduct path breaking and influential research. Politics and government are important and omnipresent in everyday life. From coursework to internships to research, the department provides undergraduates with a wide range of opportunities for hands-on learning, and our Writing Center is an important source of individualized help. Our Ph.D. program provides a supportive environment for students conducting a wide range of original research and provides both rigorous methodological training and deep knowledge of the discipline. Students take on large and important questions that often cross traditional subfield boundaries and employ multiple research methods. Our excellent job placement record is an important indicator of the success of our program.

Program of Study: Major: Political Science

Program Overview

Political science is the study of power and how political institutions and individuals engage in the public realm. In the major students explore concepts like freedom and justice; governmental structures; how law and courts function; how economics affects political behavior; international conflict and cooperation; media; and how traits like race, gender, and class are political and shape identity, institutions and policy. With guidance from outstanding faculty, students develop valuable analytical, critical thinking, research and communication skills. As they read, write and debate they learn to evaluate complicated issues and communicate effectively on controversial topics. Many graduates work in analytical, diplomatic, communications, administrative, and policy positions in government, business, education, and non-profits in the U.S. and abroad. Typical graduate degrees are the MA/PhD in political science plus law, public policy/administration, international affairs, and business.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Political Science
- Bachelor of Arts degree with a major in Political Science: International Security
- Bachelor of Arts degree with a major in Political Science: Political Economy

Recommended Preparation

Suggested First- and Second-Year College Courses: Courses that develop writing skills and breadth of knowledge. Introductory statistics.

Admission Requirements

1. Minimum 2.00 cumulative GPA
2. Three introductory political science courses (15 credits) with a minimum 2.0 grade in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
3. Students are admitted all quarters. Applications are due the second Friday of each quarter. Applications and additional information available from advisers in 215 Smith and on the Political Science Department website.
4. Applicants who meet the stated requirements are admitted in time to register for the following quarter as majors.

Bachelor of Arts degree with a major in Political Science

Credential Overview

Students have the opportunity to explore four different fields: Political Theory: Critical examination of values such as freedom, justice, democracy, and legitimacy using texts from ancient to contemporary writers. American Politics: Study of Congress and the presidency, media, law, the Constitution, civil liberty, race and ethnic politics. Comparative Politics: Comparative investigation of governments, ideologies, development, and in-depth study of specific regions such as China, the Middle East and Latin America. International Relations: Historical and theoretical approaches to study war and

other conflicts, trade, human rights, globalization. The major also features internships, including a quarter-long program with the Washington State Legislature in Olympia, an Honors Program, faculty-led talks on current issues, and two student organizations: the Political Science Student Organization (PSSO) and Pi Sigma Alpha, the Political Science Honors Society.

Completion Requirements

50 credits

1. *Introductory Requirement (15 credits)*: three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits)*: one course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a minimum grade of 2.0 in each
3. *Electives (20 credits)*: Four courses numbered POL S 210 or above with a minimum 2.0 grade in each
4. Additional requirements (if applicable) specified below
5. *GPA Requirement*: Minimum 2.25 cumulative GPA in political science courses at graduation and minimum 2.0 grade in each political science course taken to fulfill requirements for the major
6. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above through the UW.

Bachelor of Arts degree with a major in Political Science: International Security

Credential Overview

The study of international security focuses on the relationship between politics and security, and specifically on the causes of war and the use and control of force: threats, promises, and the tactics, techniques, and ethics of violence. It teaches the theories and the historical context for understanding contemporary security issues. The International Security Option gives students the opportunity to concentrate most of their coursework in this field. The option draws from courses in Political Science and other departments such as International Studies and History. Topics of study include war, terrorism, foreign policy of the U.S. and other nations, the military, weapons of mass destruction, and human rights.

Completion Requirements

50 credits

1. *Introductory Requirement (15 credits)*: three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits)*: one course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a minimum grade of 2.0 in each
3. *Electives (20 credits)*: Four courses numbered POL S 210 or above with a minimum 2.0 grade in each
4. Additional requirements (if applicable) specified below

5. *GPA Requirement:* Minimum 2.25 cumulative GPA in political science courses at graduation and minimum 2.0 grade in each political science course taken to fulfill requirements for the major
6. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above through the UW.

Additional Completion Requirements

Option specific credits (45 credits)

1. POL S 203, POL S 321, POL S 407 (15 credits)
2. 30 additional credits from an approved list of courses maintained in the department. At least 15 elective credits must be at the 300- or 400- level.

Option coursework is completed in addition to the requirements of the major, however, up to 25 credits from the option may also fulfill requirements for the political science major. A list of recommended coursework is available.

Bachelor of Arts degree with a major in Political Science: Political Economy

Credential Overview

Political economy is an interdisciplinary field that focuses on the relationship between politics and economics. It involves the application of economic theory to the analysis of non-market behavior and examination of the interplay between governmental and economic institutions. It teaches the use of theoretical tools for analyzing contemporary problems. The Political Economy Option gives students the opportunity to concentrate most of their

coursework in this field. The option draws from courses in Political Science and other departments such as Economics, International Studies, and Geography. Areas of study include rational choice theory, the international economic system, development, trade, labor, and global crime and corruption. Some courses focus on the political economy of a specific area such as Scandinavia, Latin America, and Africa.

Completion Requirements

50 credits

1. *Introductory Requirement (15 credits):* three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits):* one course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a minimum grade of 2.0 in each
3. *Electives (20 credits):* Four courses numbered POL S 210 or above with a minimum 2.0 grade in each
4. Additional requirements (if applicable) specified below
5. *GPA Requirement:* Minimum 2.25 cumulative GPA in political science courses at graduation and minimum 2.0 grade in each political science course taken to fulfill requirements for the major
6. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above through the UW.

Additional Completion Requirements

Students who wish to pursue this option should consult a political science adviser. A list of recommended coursework is available.

Program of Study: Minor: Political Science

Program Overview

The Political Science Department offers a minor in political science. Students of political science study power. They learn social science methods to understand how individuals, groups, institutions, governments, and nations function and relate to one another, within nations and internationally, theoretically and in practice. Students learn to think critically as they evaluate conflicting claims about human nature, ideology, and what political actors do and should do. Courses in political science help students develop sought-after analytical skills, including how to sort conflicting information about complex issues, how to understand and apply theories, how to analyze data, and how to write about and present effective arguments.

This program of study leads to the following credential:

- Minor in Political Science

Minor in Political Science

Credential Overview

Through the minor students have the opportunity to explore coursework in any of four different fields: Political Theory: Critical examination of values such as freedom, justice, democracy, and legitimacy using texts from ancient to contemporary

writers. American Politics: Study of Congress and the presidency, media, law, the Constitution, civil liberty, race and ethnic politics. Comparative Politics: Comparative investigation of governments, ideologies, development, and in-depth study of specific regions such as China, the Middle East and Latin America. International Relations: Historical and theoretical approaches to study war and other conflicts, trade, human rights, globalization.

Completion Requirements

30 credits

1. One introductory course chosen from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205
2. 25 elective credits numbered POL S 210 and above. (Internship and independent study courses such as POL S 496, POL S 498, POL S 499 do not count toward the minor)
3. Minimum 2.00 cumulative GPA for courses applied to the minor
4. Minimum 15 credits for the minor completed in residence through the UW

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills. Graduates of political science pursue careers in many fields, including government (federal,

state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- *Instructional and Research Facilities:*
 - *Political Science Laboratory:* This facility with 25 computer stations, functions as a computer classroom and also as a general laboratory.
 - *Center for Social Science Computation and Research* maintains an extensive data archive and offers many statistical and software consulting services.
 - *Political Science/Jackson School/Law, Societies, and Justice/Comparative History of Ideas Writing Center:* The Writing Center is staffed by peer tutors and provides free help to students seeking feedback about their writing. The Writing Center director works with instructors to design workshops to help students with assignments.
 - The Department of Political Science is affiliated with a number of research centers:
 - *The Center for American Politics and Public Policy* is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform, health care, environmental regulation, and building code enforcement.
 - *The Center for Communication and Civic Engagement* investigates how innovative communication can improve the

quality of civic life. The center's primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.

- *The University of Washington's Institute for the Study of Ethnicity, Race, and Sexuality* is an interdisciplinary research center dedicated to bringing the tools of contemporary social science inquiry to the careful examination of issues of social, economic, and political exclusion and disadvantage of marginalized minority populations in the United States, and their potential solutions.
- *Harry Bridges Center for Labor Studies* promotes the study of labor as a central concern in higher education and focuses on labor's contribution to society - locally, nationally, and worldwide. The center supports research, teaching, and community outreach.
- *The Comparative Law and Society Studies Center* is committed to promoting interdisciplinary research and teaching as well as community service regarding law, justice, and human rights throughout the world.
- *European Union Center* promotes the study of the European Union and trans-Atlantic relations.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of

Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* The department offers three internship programs that range from part-time to full-time programs. Students may work in local agencies (POL S 496), in the state legislature (POL S 497), and in Washington, D.C. (POL S 498). Listings of local internships and applications are available in 215 Smith.
 - The Washington State Legislative Internship Program is a winter-quarter program in Olympia and is open to students from all majors. Students earn 15 credits for the internship and attend a class taught by a political science faculty member. Applications are available from departmental advisers in 215 Smith and are due by the end of October.
 - Students in all majors may apply for The Washington Center, a comprehensive internship program that places students in Washington, D.C. Students earn 15 credits for the internship. Additional information is available from departmental advisers in 215 Smith.
- *Department Scholarships:*
 - *Hugh Bone Scholarship:* The endowed Hugh A. Bone Scholarship was established by the Department of Political Science in 1986 to recognize Professor Bone, a former department chair, and to continue his commitment to a "participative citizenry." Professor Bone founded the Washington State Legislative Internship Program and many students who studied with him continue active political lives because of his stewardship and interest. The scholarship was established in his name to help students with financial need study and intern away from the UW-Seattle campus.
 - *Agnes C. Nelson Memorial Scholarship:* The departments of Political Science and Economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. To apply for the scholarship, students must have completed a minimum 25 credits in political science and economics with at least 10 credits in each discipline. Deadlines are posted early in spring quarter.
- *Department Awards*
 - *The Robert A. Dahl Award:* The Department of Political Science recognizes an outstanding graduating senior with the Robert A. Dahl Award. To be eligible for consideration, a student must demonstrate scholarship excellence as well as interest in political science as a discipline.
 - *Daniel C. Lev Award:* The Department of Political Science created this award to recognize the contribution of Professor Dan Lev to the department's Honors program. The award recognizes an exceptional senior Honors thesis.
 - *Sharon S. Redeker Award for Public Service:* The Department of Political Science created this award in honor of Sharon Redeker, who served for many years as the department's Director of Academic Services. This award recognizes the exceptional public service of a political science senior while at the UW.
- *Student Organizations/Associations:* Pi Sigma Alpha (Political Science Honor

Society), Phi Alpha Delta (pre-law fraternity). See adviser for details.

Program of Study: Doctor of Philosophy (Political Science)

This program of study leads to the following credential:

- Doctor of Philosophy (Political Science)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Political Science)

Completion Requirements

92 credits

1. *Required Methods Courses (15 credits):* POL S 500, POL S 501, POL S 503, or any 400 or 500 graduate level Qualitative Methods course.
2. *Required Core Courses (10 credits):* POL S 505, POL S 509, POL S 521, POL S 550
3. *Elective Courses (To meet required total)* Approved elective courses 400 level or above.
 - a. Elective courses from at least one General field. (These include: American politics, political theory, comparative politics or international relations).
 - b. Elective courses from two additional fields.

1. Another General field
2. Specialized field (Public law, political communication, political economy, political methodology, minority and race politics)

4. *Doctoral Dissertation (27 credits):* POL S 800
5. *Exams:* Written Comprehensive exams in three fields, or two fields if political methodology is a chosen field. Students also must past an Oral exam.

Program of Study: Master of Arts (Political Science)

This program of study leads to the following credential:

- Master of Arts (Political Science)

Admission Requirements

Contact department for requirements.

Master of Arts (Political Science)

Completion Requirements

40 credits

1. *Required Methods Courses (15 credits)* POL S 500, POL S 501, POL S 503, or any 400 or 500 graduate level Qualitative Methods course.
2. *Required Core Courses (10 credits)* POL S 505, POL S 509, POL S 521, POL S 550
3. *Elective Courses (15 credits):* Any approved course numbered 400 level or above while in graduate student status at the UW.
4. *MA Paper:* Student must write an MA paper of publishable length and this must be accepted and passed by the student's advisers before earning the MA degree.

Psychology

119A [Guthrie Hall](#)

[Website](#)

[Faculty Website](#)

psyofc@uw.edu

Psychology is a broad and diverse discipline that integrates research at the interface of social and biological influences on behavior. Our faculty contribute to knowledge of human and animal behavior and have made major contributions to the scientific understanding of learning, perception, social influence, prejudice, human development, and mental disorders.

Undergraduate Program

119A [Guthrie Hall](#)

206-543-2698

psyadvis@uw.edu

Program of Study: Major: Psychology

Program Overview

The undergraduate Psychology major at the University of Washington offers students a broadly based introduction to human and animal behavior based on a curriculum that emphasizes current research and theory. The UW Psychology program for undergraduate majors stresses scientific and statistical reasoning skills that help students evaluate data, claims, and theories in both the academic and popular literatures. We provide undergraduates research participation, applied fieldwork and supervised teaching opportunities. Students make use of what they learn in various

career paths including areas such as counseling, education, and basic research. We also provide opportunities for a wide range of UW majors to include psychology as part of their general education.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Psychology
- Bachelor of Science degree with a major in Psychology

Recommended Preparation

Suggested First-Year College Courses: MATH 111, MATH 112, MATH 120, or MATH 124. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Admission Requirements

1. Minimum 2.00 cumulative UW GPA
2. Completion of one of the following math courses with a minimum 2.0 grade: MATH 111, MATH 112, MATH 120, or MATH 124.

3. Completion of the following psychology courses with a minimum 2.0 grade in each course and a cumulative 2.50 GPA in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.
4. Admission is competitive based on the following criteria:
 - a. Preparation for a major in psychology as indicated by the grades earned in courses required for admission
 - b. GPA, with an emphasis on grades earned in psychology courses
 - c. Other evidence of a commitment to becoming a psychology major
 - d. Personal statement reflecting an interest in and commitment to becoming a psychology major
 - e. Copies of unofficial transcripts from all schools attended (UW and transfer).

Meeting the above criteria does not guarantee admission to the department.

5. The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

Bachelor of Arts degree with a major in Psychology

Credential Overview

The BA program offers a strong foundation in general psychology and is appropriate for many of our students.

Completion Requirements

66 to 68 credits

1. PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)
2. One course from PSYCH 300, PSYCH 302, PSYCH 333, or PSYCH 355
3. One course from PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 345, or PSYCH 357
4. One additional course from PSYCH 300, PSYCH 302, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, PSYCH 355, or PSYCH 357
5. Three additional upper division PSYCH courses (9 - 15 credits) with at least two at the 400-level (excluding PSYCH 491 through PSYCH 499).
6. 3 credits from the following list: PSYCH 494, PSYCH 496, PSYCH 497, PSYCH 498, PSYCH 499; or credit from an approved Study Abroad program
7. Up to 6 credits of PSYCH 200- to 400-level electives to make a minimum total of 53 psychology credits
8. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
9. *Courses in related fields (13-15 credits):*
 - a. One MATH course from MATH 111, MATH 112, MATH 120, or MATH 124.
 - b. One biological science course from BIOL 118, BIOL 161, BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One social science course (3 to 5 credits) from anthropology or sociology
10. Minimum 2.50 cumulative GPA in all psychology courses applied toward the degree (UW and transfer), with a

minimum 2.0 grade in each course presented for the major

11. Transfer students must meet all the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Bachelor of Science degree with a major in Psychology

Credential Overview

The undergraduate Psychology major at the University of Washington offers students a broadly based introduction to human and animal behavior based on a curriculum that emphasizes current research and theory. The UW Psychology program for undergraduate majors stresses scientific and statistical reasoning skills that help students evaluate data, claims, and theories in both the academic and popular literatures. We provide undergraduates research participation, applied fieldwork and supervised teaching opportunities. Students make use of what they learn in various career paths including areas such as counseling, education, and basic research. We also provide opportunities for a wide range of UW majors to include psychology as part of their general education.

Completion Requirements

84-86 credits

1. PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
2. One laboratory course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 302, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 345, or PSYCH 357
5. One additional course from PSYCH 300, PSYCH 302, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, PSYCH 355, or PSYCH 357
6. Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. PSYCH 499 (3 credits)
8. PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
9. Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits
10. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
11. *Courses in related fields:*
 - a. MATH 120 and MATH 124.
Students may satisfy this requirement by testing out of MATH 124 or MATH 144
 - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - c. One of the following philosophy courses: PHIL 120, PHIL 160
 - d. One social science course (3 to 5 credits) from anthropology or sociology
12. Cumulative minimum 2.50 GPA in all PSYCH courses applied toward the degree (UW and transfer), with a minimum 2.0 grade in each course presented for the major. Note that a

grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.

13. Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- *Instructional and Research Facilities:* The psychology faculty have extensive research facilities and research laboratories on the UW campus and in nearby buildings. The Psychology Department offers academic credit for research experience that takes place under the supervision of our faculty.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Refer to department website for more information.
- *Research, Internships, and Service Learning:* The Department of Psychology offers academic credit for approved fieldwork experience.
- *Department Scholarships:* (1) Aric Chandler Scholarship offered each autumn quarter - eligible students must be current UW Seattle Psychology majors who transferred to UW from a

Washington State community college; (2) Ruth Hagenstein Research Travel Awards offered each winter quarter - eligible students must be current UW Seattle Psychology majors who plan to attend a psychology-related professional conference.

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Program of Study: Major: Danish

Program Overview

A major in Danish fosters excellent linguistic, analytical, and communication skills. Danish studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain advanced linguistic proficiency in Danish, and acquire cultural and historical knowledge of Denmark, Scandinavia and the Baltic. Denmark is the birthplace of world famous philosophers and writers, and a leader in international business and culture.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Danish

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Danish

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Danish

Credential Overview

By earning a B.A. in Danish, a student acquires advanced linguistic proficiency in Danish, excellent knowledge of Denmark in a broad perspective, as well as superb and practical communication skills.

Completion Requirements

60 credits

1. First- and second-year courses in Danish language (30 credits)
2. Upper-division courses in Danish language. See department for list of approved courses. (10 credits)
3. Upper-division SCAND courses. See department for list of approved courses. (15 credits)
4. SCAND 498 (5 credits)

Program of Study: Major: Finnish

Program Overview

A B.A. in Finnish Studies opens doors in architecture, technology, arts and culture, linguistics, education and business by fostering strong linguistic, analytical, and communication skills. Students gain advanced linguistic proficiency in Finnish, and acquire cultural and historical knowledge of Finland, Scandinavia and the Baltic. This innovative country is a center of business, education, and culture in Europe, and a gateway to Russia.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Finnish

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Finnish

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Finnish

Credential Overview

By earning a B.A. in Finnish, a student acquires advanced linguistic proficiency in Finnish, excellent knowledge of Finland in a broad perspective, as well as superb and practical communication skills.

Completion Requirements

4. SCAND 498 (5 credits)

Program of Study: Major: Norwegian

Program Overview

A Bachelor of Arts in Norwegian Studies fosters strong linguistic, analytical, and

communication skills. Norwegian studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain advanced linguistic proficiency in Norwegian, and acquire cultural and historical knowledge of Norway, Scandinavia and the Baltic. Norway is the birthplace of world famous modern artists and a leader in peace and conflict resolution and environmental philosophy.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Norwegian

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Norwegian

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Norwegian

Credential Overview

By earning a B.A. in Norwegian, a student acquires advanced linguistic proficiency in Norwegian, excellent knowledge of Norway in a broad perspective, as well as superb and practical communication skills.

4. SCAND 498 (5 credits)

Program of Study: Major: Scandinavian Area Studies

Program Overview

A Bachelor of Arts in Scandinavian Area Studies fosters advanced knowledge of the culture, politics, and history of Scandinavia. It also gives strong analytical, and communication skills. Scandinavian Area Studies can serve as a platform from which to explore politics, history, the environment, social democracy, and women's and gender studies. Students gain intermediate linguistic proficiency in a Scandinavian or Baltic language, or Finnish. Scandinavia is the birthplace of world famous modern artists, Social democracy, and innovative economic and cultural practices and institutions, and is a global leader in peacemaking, environmentalism, and gender equality.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Scandinavian Area Studies

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Scandinavian Area Studies

Credential Overview

By earning a B.A. in Scandinavian Area Studies, students acquire intermediate linguistic skill in Finnish, a Baltic language, or a Scandinavian language, as well as strong knowledge of an important economic and political region of northern Europe. It prepares students for international careers, as well as giving strong analytical and communication skills.

Completion Requirements

65 credits

1. First- and second-year courses in target Scandinavian or Baltic language (DANISH/ESTO/FINN/LATV/LITH/NORW/SWED) (30 credits)
2. Upper-division SCAND courses. See department for list of approved courses. (30 credits)
3. SCAND 498 (5 credits)

Program of Study: Major: Swedish

Program Overview

A B.A. in Swedish fosters strong linguistic, analytical, and communication skills. Swedish studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain

advanced linguistic proficiency in Sweden, and acquire cultural and historical knowledge of Sweden, Scandinavia and the Baltic. Sweden is the birthplace of world famous modern artists, Social democracy, and innovative economic and cultural practices and institutions.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Swedish

3. Upper-division SCAND courses. See department for list of approved courses. (15 credits)
4. SCAND 498 (5 credits)

Program of Study: Minor: Baltic Studies

Program Overview

A minor in Baltic Studies focuses on Estonia, Latvia, and Lithuania (the Baltic countries), including their current politics, history and culture (literature, film, art and music). Introductory competence in one of the three languages (Estonian, Latvian, Lithuanian) adds deeper understanding of European nations and identities.

This program of study leads to the following credential:

- Minor in Baltic Studies

Minor in Baltic Studies

Credential Overview

Students with a minor in Baltic Studies demonstrate excellent knowledge of three European Union countries and their people. They can communicate in one of the three national languages – Estonian, Latvian or Lithuanian. To their major degree they add a global perspective, and specialized knowledge about a complex region rich with creative arts and innovative technology.

Completion Requirements

35 credits

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 20 credits of upper-division Scandinavian coursework, including at

least one Baltic studies course from the following: SCAND 344, SCAND 345, SCAND 454, SCAND 455

3. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework

Program of Study: Minor: Danish

Program Overview

A minor in Danish fosters strong linguistic, analytical, and communication skills. Danish studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain intermediate linguistic proficiency in Danish, and acquire cultural and historical knowledge of Denmark, Scandinavia and the Baltic. Denmark is the birthplace of world famous philosophers and writers, and a leader in international business and culture.

This program of study leads to the following credential:

- Minor in Danish

Minor in Danish

Credential Overview

By earning a minor in Danish, a student acquires intermediate linguistic proficiency in Danish, excellent knowledge of Denmark in a broad perspective, as well as superb and practical communication skills.

Completion Requirements

35 credits

1. 15 credits of first year Danish
2. 15 credits of second year Danish
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Danish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Estonian

Program Overview

A minor in Estonian studies focuses on the north European country, Estonia, and its history, current politics, and culture (literature, film, art and music). Intermediate competence in the Estonian language adds deeper understanding of a country that is today a global leader in innovative information technology as well as music and literary arts, and a centuries-old meeting point of civilizations.

This program of study leads to the following credential:

- Minor in Estonian

Minor in Estonian

Credential Overview

Students with a minor in Estonian Studies demonstrate excellent knowledge of this European country and its people. They can communicate in the Estonian language. To

their major degree they add a global perspective, with specialized knowledge about a country rich in creative arts and innovative technology.

Completion Requirements

35 credits

1. 15 credits of first year Estonian
2. 15 credits of second year Estonian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper-division language course.
4. Students entering the UW with language proficiency in Estonian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Finnish

Program Overview

A minor in Finnish Studies opens doors in architecture, technology, arts and culture, linguistics, education and business by fostering strong linguistic, analytical, and communication skills. Students gain intermediate linguistic proficiency in Finnish, and acquire cultural and historical knowledge of Finland, Scandinavia and the Baltic. This innovative country is a center of business, education, and culture in Europe, and a gateway to Russia.

This program of study leads to the following credential:

- Minor in Finnish

Minor in Finnish

Credential Overview

By earning a minor in Finnish, a student acquires intermediate linguistic proficiency in Finnish, strong knowledge of Finland in a broad perspective, as well as superb and practical communication skills.

Completion Requirements

35 credits

1. 15 credits of first year Finnish
2. 15 credits of second year Finnish
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Finnish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Latvian

Program Overview

A minor in Latvian studies focuses on the north European country, Latvia, and its history, current politics, and culture (literature, film, art and music). Intermediate competence in the Latvian language adds deeper understanding of a country that is today a global leader in innovative technology as well as music and literary arts, and a centuries-old meeting point of civilizations.

This program of study leads to the following credential:

- Minor in Latvian

Minor in Latvian

Credential Overview

Students with a minor in Latvian Studies demonstrate excellent knowledge of this European country and its people. They can communicate in the Latvian language. To their major degree, they add a global perspective, with specialized knowledge about a country rich in creative arts and innovative technology.

Completion Requirements

35 credits

1. 15 credits of first year Latvian
2. 15 credits of second year Latvian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper-division language course.
4. Students entering the UW with language proficiency in Latvian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Lithuanian

Program Overview

A minor in Lithuanian studies focuses on the north European country, Lithuania, and its history, current politics, and culture (literature, film, art and music). Intermediate competence in the Lithuanian language adds deeper understanding of a country that is today a global leader in innovative technology as well as music and literary arts,

and a centuries-old meeting point of civilizations.

This program of study leads to the following credential:

- Minor in Lithuanian

Minor in Lithuanian

Credential Overview

Students with a minor in Lithuanian Studies demonstrate excellent knowledge of this European country and its people. They can communicate in the Lithuanian language. To their major degree, they add a global perspective, with specialized knowledge about a country rich in creative arts and innovative technology.

Completion Requirements

35 credits

1. 15 credits of first year Lithuanian
2. 15 credits of second year Lithuanian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper-division language course.
4. Students entering the UW with language proficiency in Lithuanian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Norwegian

Program Overview

A minor in Norwegian Studies fosters strong linguistic, analytical, and communication

skills. Norwegian studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain advanced linguistic proficiency in Norwegian, and acquire cultural and historical knowledge of Norway, Scandinavia and the Baltic. Norway is the birthplace of world famous modern artists and a leader in peace and conflict resolution and environmental philosophy.

This program of study leads to the following credential:

- Minor in Norwegian

Minor in Norwegian

Credential Overview

By earning a minor in Norwegian, a student acquires intermediate linguistic proficiency in Norwegian, strong knowledge of Norway in a broad perspective, as well as superb and practical communication skills.

Completion Requirements

35 credits

1. 15 credits of first year Norwegian
2. 15 credits of second year Norwegian
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Norwegian beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Scandinavian Area Studies

Program Overview

The minor in Scandinavian Area Studies fosters advanced knowledge of the culture, politics, and history of Scandinavia. It also gives strong analytical, and communication skills. Scandinavian Area Studies can serve as a platform from which to explore politics, history, the environment, social democracy, and women's and gender studies. Students gain intermediate linguistic proficiency in a Scandinavian or Baltic language, or Finnish. Scandinavia is the birthplace of world famous modern artists, Social democracy, and innovative economic and cultural practices and institutions, and is a global leader in peacemaking, environmentalism, and gender equality.

This program of study leads to the following credential:

- Minor in Scandinavian Area Studies

Minor in Scandinavian Area Studies

Credential Overview

By earning a minor in Scandinavian Area Studies, students acquire linguistic skill in Finnish, a Baltic language, or a Scandinavian language, as well as good knowledge of an important economic and political region of northern Europe. The minor gives good background for international careers, as well as giving strong analytical and communication skills.

Completion Requirements

35 credits

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 20 credits of upper-division Scandinavian coursework
3. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Program of Study: Minor: Swedish

Program Overview

A minor in Swedish fosters strong linguistic, analytical, and communication skills. Swedish studies can serve as a platform from which to explore art, literature and philosophy, history and politics, the environment, social democracy, and women's and gender studies. Students gain advanced linguistic proficiency in Sweden, and acquire cultural and historical knowledge of Sweden, Scandinavia and the Baltic. Sweden is the birthplace of world-famous modern artists, Social democracy, and innovative economic and cultural practices and institutions.

This program of study leads to the following credential:

- Minor in Swedish

Minor in Swedish

Credential Overview

1. 15 credits of first year Swedish
2. 15 credits of second year Swedish
3. 5 credits of upper-division Scandinavian coursework or 5 credits of an upper-division language course
4. Students entering the UW with language proficiency in Swedish beyond the first year of language training must take an additional 10 credits of upper-division language courses and must earn a minimum total of 25 credits in relevant coursework.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to

embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

- *Instructional and Research Facilities:* None
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities also exist.
- *Department Scholarships:* The department offers several scholarships for students of Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, and Swedish.
- *Student Organizations/Associations:* the Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

Program of Study: Major: Eastern European

Languages, Literature, and Culture

Program Overview

The Department of Slavic Languages and Literatures provides a well-rounded understanding of Russia, Eastern and Central Europe and the former Soviet Union through a study of their languages and an exploration of their literatures and cultures. The Department offers four years of Russian language instruction. Maintaining close ties with the Russian, East European and Central Asian Studies program in the Jackson School of International Studies, several faculty have joint and adjunct appointments in this and other departments and programs.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Eastern European Languages, Literature, and Culture

Recommended Preparation

Suggested First- and Second-Year College Courses: First- and second-year Russian. Courses that develop writing skills.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Eastern European Languages, Literature, and Culture

Credential Overview

The Department of Slavic Languages and Literatures provides a well-rounded

understanding of Russia, Eastern and Central Europe and the former Soviet Union through a study of their languages and an exploration of their literatures and cultures. The Department offers four years of Russian language instruction. Maintaining close ties with the Russian, East European and Central Asian Studies program in the Jackson School of International Studies, several faculty have joint and adjunct appointments in this and other departments and programs.

Completion Requirements

Minimum 50 credits

1. Principal Eastern European language to include one of the following: BCMS 406, BCMS 410, BULGR 406, CZECH 406, POLSH 406, ROMN 406, SLVN 406, UKR 406
2. SLAVIC 101, SLAVIC 320, SLAVIC 370, SLAVIC 425 (20 credits)
3. Courses selected from preceding principal Eastern European language courses or from an approved list of electives to reach 50 credits. See adviser for approved list. Maximum 5 credits at the 100-level.
4. Minimum 50% of credits applied to the major taken at the 300- or 400-level
5. Minimum 2.0 grade in each course and minimum 2.50 cumulative GPA for all UW and transfer courses presented for this major.
6. Minimum 15 graded credits presented for this major must be completed through the UW.

4. Minimum 15 graded credits presented for the minor must be completed through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduating majors in Slavic languages and literatures have a solid command of the Slavic language of focus, with speaking, listening, reading, writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students have a general knowledge of major periods and literature and detailed knowledge of two or three particular authors or genres. Students have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- *Instructional and Research Facilities:* UW Language Learning Center
- *Honors Options Available:* Dobro Slovo membership is available to qualifying students (see adviser for requirements). With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Undergraduates may present

their current research at the annual Slavic Student Symposium each spring. Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. The library subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.

- *Department Scholarships:* Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program; Asante Outstanding Paper Prize for the best undergraduate paper written in a Slavic Department course; Polish Studies Scholarship awarded for study in Poland of the Polish language and culture.
- *Student Organizations/Associations:* Rodnoi Ugolok, the Russian student society; Ukrainian Students United, the Ukrainian student society.

uwsoc@uw.edu

Sociology is the scientific study of people in groups - from friendship networks to communities to nations. Sociologists describe the characteristics of social groups and consider explanations for social stability and social change. They promote critical thinking on issues such as social stratification, racial and ethnic disparities, law and justice, social and political movements, immigration, education, health, the family, and the role of gender and sexuality. The undergraduate major in sociology provides students with knowledge of and a perspective on social life that transcends their personal experience and helps them develop a deep understanding of important trends in modern society.

Program of Study: Major: Sociology

Program Overview

Sociology is the scientific study of people in groups -- from friendship networks to communities to entire nations. Sociologists describe the characteristics of social groups and consider explanations for social stability and social change. They promote critical thinking on issues such as social inequality, racial and ethnic conflict, law and justice,

social and political movements, immigration, education, health, the family, and the role of gender and sexuality. The undergraduate major in sociology provides students with knowledge of and a perspective on social life that transcends their personal experience and helps them develop a deep understanding of important trends in modern society.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Sociology

Recommended Preparation

Suggested First- and Second-Year College Courses: SOC 110, SOC 212, SOC 240, SOC 270, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

Admission Requirements

1. Introductory courses (10 credits): SOC 300 (may be in progress at time of application). Any additional 5 credit sociology course.
2. Minimum 2.0 grade for completed course(s) required for admission. Minimum 2.00 cumulative UW GPA.
3. Application: See department website for information required as part of application packet. Exceptions based on special circumstances are reviewed on a case-by-case basis. Application deadlines are the first Friday of each quarter. All applicants who meet the qualifications stated above are admitted in time to register as sociology majors for the following quarter.

Bachelor of Arts degree with a major in Sociology

Credential Overview

The Department of Sociology has a strong commitment to undergraduate research, methodological training, and experiential learning, and is dedicated to providing a rich program of study, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Completion Requirements

50 credits

1. Introductory courses (10 credits): SOC 300 and any additional 5 credit sociology course
2. Statistics and theory (10 credits):
 - a. one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 290, or STAT 311 (5 credits)
 - b. SOC 316 (5 credits)
3. Upper-division sociology electives (20 credits): Any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, SOC 399, SOC 499
4. Sociology electives (10 credits): Any additional sociology courses, with a maximum 5 credits of either SOC 399 or SOC 499
5. Maximum 10 credits from sociology practicum coursework (SOC 402, SOC 403, SOC 404, or SOC 494) may apply to elective major requirements. Maximum 5 credits from sociology practicum coursework may apply toward the upper-division elective requirement.
6. Academic standards: Minimum 2.0 grade in any course applied to major requirements. Minimum cumulative 2.50 GPA for courses applied to major requirements. 25 of 50 required

sociology credits completed in residence through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The Department of Sociology's undergraduate degree is designed to teach majors to think systematically about the relationships among individuals, groups, organizations, and societies. Sociology majors engage current research in political sociology, social stratification, race and ethnicity, deviance and social control, demography and other areas, and develop quantitative and analytical skills in research methods and social theory courses.
- *Instructional and Research Facilities:* The Center for Social Science Computing and Research (CSSCR) maintains an extensive data archive, and offers consulting support and computer lab access to students in sociology courses. The Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS) provide interdisciplinary courses, seminars, and research opportunities for sociology students.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.

- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

[Website](#)

[Faculty Website](#)

spsuw@uw.edu

The University has been teaching Spanish to the citizens of Washington State since 1895. Changing demographics nationally and locally lend a new urgency to our mission to study the language, literatures, and cultures of Spain, Latin America, and U.S. Latinos. Our exploration recognizes cultural and historical context, with one eye to the national specificity and another to the commonality of the works being studied.

Program of Study: Major: Spanish

Program Overview

Undergraduates expand and refine their language skills while engaging in the study of literature written in Spanish, as well as Hispanic cultural studies and linguistics. The BA prepares graduates for advanced degrees

in education and doctoral programs, as well as careers in business, law, and medicine. In recognition of the growing importance of Spanish, many of our students are double majors.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Spanish

Recommended Preparation

Suggested First- and Second-Year College Courses: SPAN 101, SPAN 102, SPAN 103, or SPAN 121, SPAN 122, SPAN 123, or SPAN 134; SPAN 201, SPAN 202 (or SPAN 210), SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature.

Admission Requirements

1. Completion of SPAN 203, with a minimum cumulative 2.70 GPA for all Spanish coursework completed and a minimum 2.5 grade in each Spanish course
2. Completion of at least 5 credits of English composition with a minimum 2.5 grade
3. Change-of-major forms, available online and outside C-104F Padelford Hall, are processed autumn, winter, and spring quarters only. Forms and unofficial transcripts must be turned in by the end of the third week of the quarter to assure registration priority for the following quarter. Paperwork turned in after the third week of the quarter is processed during the following admission cycle.

Bachelor of Arts degree with a major in Spanish

Credential Overview

Undergraduates expand and refine their language skills while engaging in the study of literature written in Spanish, as well as Hispanic cultural studies and linguistics. The BA prepares graduates for advanced degrees in education and doctoral programs, as well as careers in business, law, and medicine. In recognition of the growing importance of Spanish, many of our students are double majors.

Completion Requirements

58 credits beyond SPAN 203

1. SPAN 301, SPAN 302, SPAN 303 (or equivalents, SPAN 314, SPAN 315, SPAN 316; SPAN 310; SPAN 330)
2. SPAN 321, SPAN 322, SPAN 323
3. One 300-level literature elective: See department website for list of eligible courses.
4. Five 400-level courses
5. Participation in an approved Study Abroad program (one quarter minimum, any level) or one or more experiential learning projects (minimum 2 credits of SPAN 392) which involve significant engagement with the Spanish-speaking community. Students are strongly encouraged to do both.
6. Other than SPAN 400 through SPAN 406, only one course whose instructional materials are primarily in English may apply to the major.

Program of Study: Minor: Spanish

Program Overview

Undergraduates expand and refine their language skills while engaging in the study of literature written in Spanish, as well as Hispanic cultural studies and linguistics.

This program of study leads to the following credential:

- Minor in Spanish

Minor in Spanish

Credential Overview

Undergraduates expand and refine their language skills while engaging in the study of literature written in Spanish, as well as Hispanic cultural studies and linguistics.

Completion Requirements

Minimum 27 credits above SPAN 203 level to include the following:

1. One of the following sequences: SPAN 301, SPAN 302, and either SPAN 303 or SPAN 330; SPAN 314, SPAN 315, and either SPAN 316 or SPAN 330; SPAN 310 and either SPAN 303, SPAN 316, or SPAN 330
2. Four 300- or 400-level electives
3. Only one course in which instructional materials are primarily in English may apply to the minor. SPAN 327 may not apply to the minor and is not open to heritage/native speakers.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.
 - *Instructional and Research Facilities:* Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish, sponsorship of cultural events, and a lending library of books as well as audio and visual materials. A branch of the Spanish government sponsored Cervantes Institute, also housed in the department, offers linguistic and cultural resources to the university and the general community as well.
- The department directs three study abroad programs. These programs are "living laboratories." Approximately 100 students participate each year.
- *Honors Options Available:* With College Honors (Completion of Honors Core

Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Experiential Learning:* Internship opportunities are posted on the department website as they become available. Also, students may participate in experiential learning (which may include service learning), in which they combine study with service to the community. Students must volunteer two-to-five hours per week (a minimum of 30 hours per quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People's Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community.
- *Department Scholarships:* An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.
- *Student Organizations/Associations:* None.

Of Special Note: 100- and 200-level Spanish courses do not count toward major/minor requirements.

Graduate Programs

206-543-2075

spsadv@uw.edu

Program of Study: Doctor of Philosophy (Hispanic Studies)

Program Overview

The Ph.D. program is designed to address the needs of a new generation of doctoral students and to provide a rigorous and comprehensive education in Spanish and Latin American literary and cultural studies. Its design allows for an engagement with larger issues relating to the role of the humanities in the contemporary world. The Graduate Certificate in Public Scholarship, granted in collaboration with the Simpson Center for the Humanities, will provide theoretical training and practical experience relevant to the larger issues surrounding the public role of specialized scholarship in the humanities. The dissertation project may take the traditional form of a scholarly monograph or a more non-traditional form, which may include a portfolio of scholarly and creative work, or digital publication.

This program of study leads to the following credential:

- Doctor of Philosophy (Hispanic Studies)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Hispanic Studies)

Completion Requirements

117 credits

1. SPAN 577 or one graduate seminar in the Comp. Lit. Theory and Criticism sequence (agreed upon in consultation with the Graduate Program Coordinator) is required of all students. SPAN 510 (Methodology of Spanish Language Teaching) is required of all Teaching Assistants regardless of prior teaching experience and is to be taken during or before a student's first quarter of teaching.
2. *Distribution requirement*: A minimum of 1 course in five of the seven following areas:
 - a. Medieval Spain: SPAN 591
 - b. "Golden Age" Spain: SPAN 593
 - c. Spain of the eighteenth and nineteenth centuries: SPAN 594, SPAN 595
 - d. Twentieth-century Spain: SPAN 572, SPAN 596
 - e. Colonial and nineteenth-century Latin America: SPAN 597
 - f. Twentieth-century Latin America: SPAN 561, SPAN 571, SPAN 573, SPAN 598
 - g. Spanish applied linguistics: SPAN 541, SPAN 542, SPAN 543
3. *M.A. Exam and Thesis*: Students enrolled in the Ph.D. program who do not already possess an M.A. in Hispanic Studies or an equivalent field (see Special Note in number 14 below) must fulfill the exam and thesis requirements for the M.A.
4. *Additional credit requirement (to meet overall required credit total)*: 500-level courses in the Division; 6 credits of the coursework required for the Graduate Certificate in Public Scholarship; those earned in courses cross-listed with another department; approved courses offered by the Division's adjunct faculty; up to ten credits of approved non-cross-listed courses; up to 30 credits if a student enters the PhD program with an MA degree. Non-cross-listed courses must be approved by the Graduate Program Coordinator at the time of registration, must be numbered 500 and above, and must be deemed relevant to the student's studies in this Division.
5. *Dissertation (27 credits)*: SPAN 800
6. *Proficiency in a language other than English and Spanish*: met via one of the following:
 - a. native status;
 - b. holding a university degree in the third language;
 - c. completing a course in the target language at the 201 level with a 3.0 or better;
 - d. passing an auxiliary language reading ability test, the Graduate Foreign Language Exam (GFLE). Students may not take the PhD exam without having first met this requirement.
7. *PhD examinations*: The exam portion of the PhD program will comprise three elements: a. The composition over several quarters of an annotated bibliography. b. The composition of a 10-15 page dissertation prospectus. c. A ninety-minute oral exam to be administered in the third quarter of the third year.
8. *Time Limit*: All work for the PhD degree, including credits transferred from other institutions, must be completed within ten years. However, PhD candidates subsidized by teaching assistantships, research assistantships, graduate staff assistantships, or comparable financial support, are

expected to complete their program within five years.

Program of Study: Master of Arts (Hispanic Studies)

Program Overview

The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods. Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the master's degree program. The degree is earned normally in six academic quarters.

This program of study leads to the following credential:

- Master of Arts (Hispanic Studies)

Admission Requirements

Contact department for requirements.

Master of Arts (Hispanic Studies)

Completion Requirements

60 credits (500 level and above). To remain in good standing the student must maintain a 3.00 cumulative GPA. The minimum acceptable grade for any given course is 2.7.

1. *Literary Theory*: Either SPAN 577, or an alternate graduate-level literary theory course or research methods course which must be pre-approved by the Graduate Program Coordinator
2. SPAN 510 is required of all teaching assistants and is taken during or before a student's first quarter of teaching.
3. *Distribution requirement (25 credits)*: Minimum 5 credits in five of the seven areas: Medieval Spain, "Golden Age" Spain; Spain of the eighteenth and nineteenth centuries; twentieth-century Spain; colonial and nineteenth-century Latin America; twentieth-century Latin America. Spanish applied linguistics
4. *Additional Credit Requirement (as needed to reach required total)*: Additional 500-level coursework in the Division. A maximum of two courses may come from outside the department when pre-approved by the GPC.
5. *MA Thesis (10 credits)*: SPAN 700
6. *MA Examination*
7. *Graduate Foreign Language Exam*: Students must demonstrate proficiency in a foreign language, beyond English and Spanish. Students demonstrate proficiency by passing the Graduate Foreign language Exam in the OEA office.

Additional Information

Financial Aid: The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

Speech and Hearing Sciences

210 [Eagleson Hall](#)

206-685-7400

[Website](#)

[Faculty Website](#)

The Department of Speech and Hearing Sciences is committed to understanding the fundamental mechanisms and processes involved in speech, language, hearing, swallowing, and their associated disorders. The Department faculty members play a national leadership role in research and education, carrying out investigations into all facets of human communication, including the underlying causes of communication and swallowing disorders across the lifespan as well as the interventions with which to improve the quality of life for individuals affected by these disorders.

Undergraduate Program

210 [Eagleson Hall](#)

206-685-7403

shugadv@uw.edu

Program of Study: Major: Speech and Hearing Sciences

Program Overview

The Bachelor of Science (B.S.) degree program in Speech and Hearing Sciences is offered through the College of Arts and Sciences. Speech and Hearing Sciences encompasses the study of human communication and its disorders, providing a research-based, academic foundation in the concepts and principles of speech, hearing, language, swallowing, and their associated

disorders across the life span. The program provides a foundation in the clinical processes used to identify, prevent, and treat individuals with communication and swallowing disorders, allowing students to develop critical thinking, problem-solving skills, and a broad understanding of the field.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Speech and Hearing Sciences
- Bachelor of Science degree with a major in Speech and Hearing Sciences (Fee-based)
- Bachelor of Science degree with a major in Speech and Hearing Sciences: Communication Disorders (not admitting)

Continuation Policy

All students must make satisfactory academic progress in the degree program. Failure to do so results in probation, which can lead to dismissal. For the complete continuation policy, contact the department adviser or refer to the department website.

Bachelor of Science degree with a major in Speech and Hearing Sciences

Credential Overview

The Bachelor of Science (B.S.) is for students interested in the scientific and theoretical frameworks for understanding human communication and its disorders, including the roles of biology, cognition, environment and culture. The B.S. degree provides an overview of the discipline, including the neurological, behavioral, physical, and anatomic-physiological bases of speech, language, hearing, and

swallowing as well as evaluation and treatment considerations for individuals with communication disorders across the lifespan. The B.S. program prepares students for paraprofessional employment, graduate study in speech, language or hearing science research, or a clinical career in speech-language pathology or audiology. Because it offers more flexibility than the Communication Disorders degree option, this program is appropriate for students with interests in other related fields such as education, linguistics, psychology, nursing, rehabilitation science, medicine, neuroscience, etc.

Recommended Preparation

Suggested First and Second-Year College Courses: Social/behavioral science: anthropology, public health, psychology, or sociology. Biological science: BIOL 118 or BIOL 180. Physics or chemistry: PHYS 107, PHYS 110, or CHEM 110, CHEM 220. Statistics: STAT 220 or EDPSY 490. Linguistics: LING 200 or LING 400.

Admission Requirements

1. Minimum 75 credits
2. Minimum 2.50 cumulative GPA
3. Completion of the following with a minimum 2.0 grade in each
 - a. *Social/Behavioral Science:* psychology, educational psychology, sociology, anthropology, or public health. See department for approved list. (3-5 credits)
 - b. *Biological Science:* human- or animal-based biological science, anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science. Laboratory component not required. See department for approved list. (3-5 credits)

- c. *Physical Science:* chemistry or physics. Laboratory component not required. See department for approved list. (3-5 credits)
 - d. *Statistics:* non-remedial, historical, or methodological. See department for approved list. (3-5 credits)
 - e. *Linguistics:* linguistics that provides introductory knowledge of phonology, phonetics, morphology, syntax, and semantics. See department for approved list. (3-5 credits) (Transfer students may apply with this course in progress or planned. See adviser.)
4. Admission is capacity constrained, based on the following criteria. Meeting the criteria guarantees consideration but not admission.
 - a. GPA
 - b. Preparation for major in speech and hearing sciences as indicated by grades earned in courses required for admission
 - c. Personal statement reflecting an interest in and commitment to speech and hearing science
 - d. Other evidence of a commitment to becoming a speech and hearing sciences major
 - e. Copies of unofficial transcripts from all colleges attended (UW and transfer)
 5. Admission is for autumn quarter only. Application deadline: for UW students - Monday of the third week of spring quarter; for transfer students - February 15. Transfer students may apply to the department (if they are at or near junior standing) and to the UW concurrently. Applicants are notified of the department's decision within four weeks. Applications and additional information available outside 210 Eagleson and on the department's website.

Completion Requirements

Minimum 50 credits

1. SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 305, SPHSC 306, SPHSC 320, SPHSC 371, SPHSC 405, SPHSC 425, SPHSC 461, SPHSC 481
2. Minimum 2.00 cumulative GPA for all courses applied to the major

Bachelor of Science degree with a major in Speech and Hearing Sciences (Fee-based)

Credential Overview

The post-baccalaureate Bachelor of Science (B.S.) program is for students seeking to pursue a clinical master's degree in speech-language pathology, who currently hold a bachelor's degree outside the speech, language and hearing sciences discipline. This structured and intensive program provides students from outside disciplines with the necessary academic foundation in normal hearing, speech, language, and swallowing development, speech acoustics, physiology and perception, and hearing. It also provides instruction as the nature of language, speech, hearing, and swallowing disorders in children and adults and the clinical processes involved in the identification, prevention and remediation of these disorders. The B.S. provides excellent preparation for graduate level study in a clinically oriented degree leading to professional certification in speech-language pathology.

Admission Requirements

1. Bachelor's degree or advanced degree outside the area of speech and hearing sciences

2. Minimum 2.50 cumulative GPA
3. Completion of the following with a minimum 2.0 grade in each
 - a. *Social/Behavioral Science*: psychology, educational psychology, sociology, anthropology, or public health. See department for approved list. (3-5 credits)
 - b. *Biological Science*: human- or animal-based biological science, anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science. Laboratory component not required. See department for approved list. (3-5 credits)
 - c. *Physical Science*: chemistry or physics. Laboratory component not required. See department for approved list. (3-5 credits)
 - d. *Statistics*: non-remedial, historical, or methodological. See department for approved list. (3-5 credits)
 - e. *Linguistics*: linguistics that provides introductory knowledge of phonology, phonetics, morphology, syntax, and semantics. See department for approved list. (3-5 credits)
4. Admission is capacity constrained, based on the following criteria. Meeting the criteria guarantees consideration but not admission.
 - a. Overall academic record and GPA from prior degree
 - b. Preparation for major in speech and hearing sciences as indicated by grades earned in courses required for admission
 - c. Personal statement reflecting an interest in and commitment to speech and hearing science
 - d. Other evidence of a commitment to becoming a speech and hearing sciences major

- e. Copies of unofficial transcripts from all college attended
 - f. Three letters of recommendation sent to the department. SPHSC recommendation form available on department website. However, a letter is acceptable.
5. Application deadline: February 15. Incomplete applications are not processed. Admission is contingent upon admission to UW. (See program website for details on the two-part admission process.)

Completion Requirements

Minimum 50 credits

1. SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 305, SPHSC 306, SPHSC 320, SPHSC 371, SPHSC 405, SPHSC 425, SPHSC 461, SPHSC 481
2. Minimum 2.00 cumulative GPA for all required courses

Bachelor of Science degree with a major in Speech and Hearing Sciences: Communication Disorders (not admitting)

Additional Information

Formerly Speech and Hearing Sciences offered two major options: (1) General Academic and (2) Communication Disorders. As of summer quarter, 2019, however, those two options have been replaced by a single major. Please refer to the [UW Seattle General Catalog Archive](#) for information about the options.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The graduate (1) has knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences; (2) understands the following: typical acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders; (3) has the following abilities: to analyze language in terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) has experience with a research project
- *Instructional and Research Facilities:* classrooms, research laboratories, computer laboratory, and clinic located in the department and in nearby campus buildings
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Faculty welcome

undergraduate students into their research labs, offering independent study research opportunities (SPHSC 499), in addition to mentored, year-long honors research projects (SPHSC 498). No formal internship programs offered. Clinical learning opportunities are available (SPHSC 491). See adviser for community-based service learning and internship opportunities.

- *Department Scholarships*: None offered
- *Student Organizations/Associations*: The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson Hall.

Program of Study: Doctor of Philosophy (Speech and Hearing Sciences)

This program of study leads to the following credential:

- Doctor of Philosophy (Speech and Hearing Sciences)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Speech and Hearing Sciences)

Completion Requirements

Minimum 90 credits

Includes 36 credits of graduate work at the 400 level or above and a minimum 18 of the 36 quarter credits in courses numbered 500 and above.

1. *Academic Coursework:* For students with a prior undergraduate or graduate degree in speech and hearing sciences (minimum 41 credits as follows):
 - a. SPHSC 560, SPHSC 561, and SPHSC 562 (minimum 9 credits)
 - b. SPHSC 504, SPHSC 506, or approved alternative (minimum 3 credits)
 - c. Four statistics courses (chosen in consultation with advisory committee). (minimum 14 credits)
 - d. SPHSC 568 (minimum 3 credits)
 - e. SPHSC 567; research seminar series (minimum 12 credits) Required autumn, winter, and spring quarters throughout the program
 - f. *Other Coursework:* Students with a degree in a field other than speech and hearing sciences complete the following: SPHSC 303; SPHSC 320; SPHSC 461; plus one of the following: SPHSC 250; SPHSC 305; SPHSC 371
2. *Research Coursework:* (minimum 43 credits). Pre-dissertation SPHSC 600 (16 credits) and dissertation SPHSC 800 (27 credits). All students conduct supervised research by the end of their first year.
3. *Teaching Experience:* (minimum 6 credits)
 - a. Instructional Development Forum (minimum 2 credits)
 - b. Teaching Practicum (minimum 1 credit) For students pursuing an academic career
 - c. Other Coursework: (3 credits)

Additional Information

- *Financial Aid:* PhD students are guaranteed financial support as teaching or research assistants as long as they make adequate progress in the program.. In addition, the department has traineeships/fellowships supported by the National Institutes of Health on a competitive basis. Students are strongly encouraged to apply to the National Institutes of Health or other funding agencies for individual fellowships to support dissertation work. Summer support, although not guaranteed, can also generally be arranged.
- *Research Facilities:* The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, the Institute for Learning and Brain Sciences, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

Program of Study: Master of Science (Speech-Language Pathology)

Program Overview

At the MS level, specific focus is on evidence-based clinical procedures involved in the identification, prevention, and remediation of communication disorders. Students meet all requirements of the Certificate of Clinical Competence (CCC) granted by the American Speech-Language-

Hearing Association (ASHA), the professional, scientific, and credentialing organization for speech-language pathology and audiology professionals.

This program of study leads to the following credentials:

- Master of Science (Speech and Hearing Sciences: Educational Speech-Language Pathology) (fee based)
- Master of Science (Speech and Hearing Sciences: Medical Speech-Language Pathology) (fee-based)
- Master of Science (Speech and Hearing Sciences: Speech Language Pathology)

Master of Science (Speech and Hearing Sciences: Educational Speech-Language Pathology) (fee based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

108-114 credits depending on option

1. *Foundational Didactic Coursework (57 credits):* SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPHSC 565
2. *Option-Specific Didactic Coursework (varies by option):* See additional requirements section for option-specific coursework
3. *Clinical Requirements (varies by option):* See additional requirements

section for option-specific clinical requirements

4. *Electives -Choose Pediatric Track or Adult Track:*
 - a. Pediatric Track (9 credits): SPHSC 526, SPHSC 543, SPHSC 550 plus one out-of-department elective
 - b. Adult Track (4 credits): Choose one from department list, plus two out-of-department electives
5. *Thesis (optional, 0-9 credits):* SPHSC 700

Master of Science (Speech and Hearing Sciences: Medical Speech-Language Pathology) (fee-based)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for current requirements.

Completion Requirements

108-114 credits depending on option

1. *Foundational Didactic Coursework (57 credits):* SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPHSC 565
2. *Option-Specific Didactic Coursework (varies by option):* See additional requirements section for option-specific coursework
3. *Clinical Requirements (varies by option):* See additional requirements section for option-specific clinical requirements
4. *Electives -Choose Pediatric Track or Adult Track:*
 - a. Pediatric Track (9 credits): SPHSC 526, SPHSC 543, SPHSC 550 plus one out-of-department elective

- b. Adult Track (4 credits): Choose one from department list, plus two out-of-department electives

5. *Thesis (optional, 0-9 credits):* SPHSC 700

Additional Completion Requirements

Option-specific requirements:

1. *Option-specific Didactic Coursework (12 credits):* SPHSC 541, SPHSC 543, SPHSC 545, SPHSC 546, SPHSC 548, SPHSC 549
2. *Option-specific Clinical Requirements (42 credits):* SPHSC 553 (12 credits), SPHSC 554 (30 credits)

Master of Science (Speech and Hearing Sciences: Speech Language Pathology)

Admission Requirements

Please see this program's [Graduate Admissions Page](#) for current requirements.

Completion Requirements

108-114 credits depending on option

1. *Foundational Didactic Coursework (57 credits):* SPHSC 500, SPHSC 501, SPHSC 506, SPHSC 529, SPHSC 531, SPHSC 532, SPHSC 533, SPHSC 534, SPHSC 535, SPHSC 536, SPHSC 537, SPHSC 538, SPHSC 539, SPHSC 540, SPHSC 565
2. *Option-Specific Didactic Coursework (varies by option):* See additional requirements section for option-specific coursework
3. *Clinical Requirements (varies by option):* See additional requirements section for option-specific clinical requirements

4. *Electives -Choose Pediatric Track or Adult Track:*
 - a. Pediatric Track (9 credits): SPHSC 526, SPHSC 543, SPHSC 550 plus one out-of-department elective
 - b. Adult Track (4 credits): Choose one from department list, plus two out-of-department electives
5. *Thesis (optional, 0-9 credits):* SPHSC 700

Additional Completion Requirements

Option-specific requirements

1. Option-specific Didactic Coursework: None
2. Option-specific Clinical Requirements (43 credits): SPHSC 591 (2 credits), SPHSC 551 (8 credits), SPHSC 552 (21 credits), SPHSC 555 (2 credits), either SPHSC 601 or SPHSC 602 (10 credits). Includes completion of a pre-internship and a full-time internship in a community-based clinical facility. Minimum 375 clock hours of supervised clinical experience in the practice of speech-language pathology.

Statistics

B313 [Padelford Hall](#)

Program of Study: Major: Statistics

Program Overview

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration and use of information, to learn from experience in situations of uncertainty, and to make decisions under risk. Statistical practice includes: design of experiments and of survey sampling; exploration, summarization and display of observational data; drawing inferences, and assessing their uncertainty; building mathematical models for systems with stochastic components.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Statistics
- Bachelor of Science degree with a major in Statistics: Data Science

Recommended Preparation

Suggested First-and Second-Year College Courses: MATH 224; one of CSE 122, CSE 123, CSE 142 or CSE 160; STAT 311. Additional courses in the sciences and quantitative methods add strength to this major.

Admission Requirements

Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered once each academic year and are due on the third Friday in April.

Minimum course requirements for admission applications as follows:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. One of STAT 311 (highly recommended), STAT 390, or an approved substitute.
3. MATH 224; one of CSE 122, CSE 123, CSE 142, or CSE 160 (highly recommended)
4. Factors in the admission decision include but are not limited to academic performance as measured by GPA in courses listed above and any additional advanced quantitative courses presented for application consideration.
5. Admission is competitive. Successful applicants typically have a cumulative GPA higher than 3.00 in courses listed above under course requirements, with no individual course grade lower than 2.5.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science degree with a major in Statistics

Credential Overview

The Bachelor of Science program in Statistics at the University of Washington offers broad based, flexible educational pathways emphasizing the theoretical, practical, or computational aspects of probability and statistics. The program serves the needs of future statisticians in science, industry, business, and government, as well as provides the necessary background and stimulation for graduate study; it also offers excellent opportunities for double-majoring in Statistics and either Mathematics or Computer Science.

Completion Requirements

68-89 credits

1. *Mathematics (28-30 credits)*: Complete one of the following:
 - a. MATH 124, MATH 125, MATH 126, MATH 208, MATH 224, MATH 300, MATH 318, MATH 327
 - b. MATH 134, MATH 135, MATH 136, MATH 318, MATH 334, MATH 335
2. *Computing (7-9 credits)*: For the major in statistics: One of CSE 122, CSE 123, CSE 142, or CSE 160; either STAT 302 (recommended), CSE 123, CSE 143, CSE 163, or an approved substitute. For the data science option: 9 credits from the following: CSE 122, CSE 123, CSE 142, CSE 143, STAT 302, CSE 160, or CSE 163.
3. *Statistics (24-27 credits)*: STAT 311 (highly recommended), or STAT 390, or an approved substitute (STAT 220, STAT 221, or STAT 301 is seldom allowed); either STAT 340 (highly

recommended) or both STAT 394/MATH 394 and STAT 395/MATH 395. (Note that both STAT 394/MATH 394 and STAT 395/MATH 395 are required to replace STAT 340 as a prerequisite for STAT 341.) STAT 341, STAT 342, STAT 421, STAT 423. (STAT 342 is required for enrollment in STAT 421 or STAT 423 by a statistics major; STAT 390 is not sufficient for a statistics major.)

4. Additional requirements specified below.
5. Minimum 2.0 grade in all courses used to satisfy major requirements.
6. Minimum 2.50 cumulative GPA for all courses used to satisfy major requirements.

A "Majors Factsheet" is available from the Statistics department.

Additional Completion Requirements

Minimum 9 credits

Electives: at least three upper-division courses for a minimum total of 9 credits. Refer to department website for list of approved courses. Elective choices require prior approval of the Statistics undergraduate adviser.

Bachelor of Science degree with a major in Statistics: Data Science

Credential Overview

The Bachelor of Science degree with a major in statistics that provides training in theoretical foundations of statistics, statistical modeling and methodology, and applied data analysis. The Data science option emphasizes computation and data management.

Admission Requirements

Contact department for requirements.

Completion Requirements

68-89 credits

1. *Mathematics (28-30 credits):* Complete one of the following:
 - a. MATH 124, MATH 125, MATH 126, MATH 208, MATH 224, MATH 300, MATH 318, MATH 327
 - b. MATH 134, MATH 135, MATH 136, MATH 318, MATH 334, MATH 335
2. *Computing (7-9 credits):* For the major in statistics: One of CSE 122, CSE 123, CSE 142, or CSE 160; either STAT 302 (recommended), CSE 123, CSE 143, CSE 163, or an approved substitute. For the data science option: 9 credits from the following: CSE 122, CSE 123, CSE 142, CSE 143, STAT 302, CSE 160, or CSE 163.
3. *Statistics (24-27 credits):* STAT 311 (highly recommended), or STAT 390, or an approved substitute (STAT 220, STAT 221, or STAT 301 is seldom allowed); either STAT 340 (highly recommended) or both STAT 394/MATH 394 and STAT 395/MATH 395. (Note that both STAT 394/MATH 394 and STAT 395/MATH 395 are required to replace STAT 340 as a prerequisite for STAT 341.) STAT 341, STAT 342, STAT 421, STAT 423. (STAT 342 is required for enrollment in STAT 421 or STAT 423 by a statistics major; STAT 390 is not sufficient for a statistics major.)
4. Additional requirements specified below.
5. Minimum 2.0 grade in all courses used to satisfy major requirements.

6. Minimum 2.50 cumulative GPA for all courses used to satisfy major requirements.

A "Majors Factsheet" is available from the Statistics department.

Additional Completion Requirements

Option specific credits (18-23 credits)

- *Visualization (4-5 credits)*: one of CSE 412, CSE 442, HCDE 411, or INFO 474
- *Database (4-5 credits)*: one of CSE 344, CSE 414, or INFO 330. CSE 344 recommended for students pursuing a double major with the Bachelor of Science degree in Computer Science.
- *Ethics (3-5 credits)*: one of SOC 225 or INFO 350
- *Machine Learning (4 credits)*: STAT 435
- *Statistics (3-4 credits)*: one course from approved list of elective courses. Refer to department website for approved list of courses.

Program of Study: Minor: Statistics

Program Overview

A minor in Statistics enhances a degree in any substantive field of application of statistics. The set of skills and understandings you gain could position you to be an especially valuable contributor in your chosen application field.

This program of study leads to the following credential:

- Minor in Statistics

Minor in Statistics

Completion Requirements

26 credits

1. MATH 126 or MATH 136 (5 credits)
2. STAT 302, STAT 390/MATH 390, STAT 394/MATH 394, STAT 395/MATH 395 (13 credits)
3. Either STAT 425/BIOST 425 or STAT 396/MATH 396 (3 credits)
4. Minimum 5 credits of approved electives. See adviser for approved list.
5. Minimum grade of 2.0 in each course used to satisfy minor requirements
6. Maximum 5 credits may be applied to a student's major.
7. At least 20 credits must be taken through the UW.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.
- *Instructional and Research Facilities*: Computer workstations are available on a drop-in basis through the College of Arts & Sciences Instructional Computing Laboratory. Tutoring in a set of introductory statistics courses is

currently available at the Statistics Tutor and Study Center.

- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* A special seminar series for undergraduates is offered in conjunction with the ACMS program.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* The Actuary Club at the University of Washington

College of Built Environments

[Website](#)

The College of Built Environments is home to five departments: Architecture, Construction Management, Landscape Architecture, Real Estate, and Urban Design and Planning. We offer a wide range of academic pathways. Through academic programs offered by the College, students have opportunities to participate in a number of studios, interdisciplinary courses, study abroad programs, internships, and service-learning projects. Our various graduate programs provide students with a rigorous and substantial curriculum. Students gain practical and theoretical experiences that will help them to meet the needs of a 21st century built environments professional. Graduate students are encouraged to collaborate with faculty on research projects, participate in competition, and travel.

Undergraduate Programs

For undergraduate program information, refer to the [UW degree program catalog](#).

[Website](#)

[Faculty Website](#)

archdept@uw.edu

Architecture includes the study of building design, representation, computing, structures, construction materials, environmental control systems, history, theory, and professional practice. In its teaching, research, practice, and community engagement, the department addresses the traditions of architecture within the context of social and technological change, a legacy of craft in the making of architecture, an activist and community-based design process, and the principles of ethical action to address human and environmental concerns.

Program of Study: Major: Architectural Design

Program Overview

The Department of Architecture offers two different options for undergraduate students interested in the field of architecture. The Architecture major is a seminar and research based (non-studio) degree that provides a liberal arts foundation. This program prepares students for further study and careers in architectural design and related disciplines. The Architectural Design major is a pre-professional studio based degree that prepares most students for graduate study in architecture and a professional career in the field. Both programs share a commitment to architecture and design as a field of knowledge that can have a profound impact on contemporary society. Non-majors interested in architecture are able to pursue a Minor in Architectural Design.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Architectural Design
- Bachelor of Arts degree with a major in Architectural Design (with Construction Management)

Bachelor of Arts degree with a major in Architectural Design

Credential Overview

The Architectural Design major is a pre-professional degree that prepares candidates for admission with advanced standing to professional M.Arch programs. It is also good preparation for other roles in society that benefit from an understanding of and exposure to architectural design and problem solving such as government, development, planning, art, graphic design, and digital arts. Students develop visual literacy and complex problem solving skills through the design process, including researching historical precedents, analyzing theoretical texts, and on-site understanding of the physical built and natural environment. The college also offers a Dual Degree-Bachelor of Arts with a major in Architectural Design and a BS in Construction Management. Students must first be admitted to the Architectural Design major.

Admission Requirements

1. 90 credits to include the following:
 - a. *Preparatory Architectural Coursework (19 credits)*: ARCH 350, ARCH 351, ARCH 352 (9 credits); ARCH 200, ARCH 201 (10 credits). *Note*: These courses can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.
 - b. *General Education Requirements (70 credits)*: English composition (5 credits); Arts & Humanities (A&H) (20 credits); Social Sciences (SSc) (20 credits); Natural Sciences (NSc) (20 credits, including MATH 112,

MATH 124, or MATH 145); additional Areas of Inquiry (5 credits).

- c. *Electives (1 credits)*
2. While the cumulative GPA is an important factor in the admission evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural coursework the student has completed. It is to the student's advantage to take as many of these courses as possible before applying.
 3. *Application deadline:* May 15 for autumn quarter only. Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

Completion Requirements

90 credits

1. *Preprofessional Coursework (69 credits):* ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431, CM 313. One selective course in each of the following areas: (1) graphics/media; (2) history/theory; (3) building science/materials. Selective courses to be chosen from approved lists maintained by the department.
2. 21 credits of approved upper-division electives.
3. The final 45 credits must be completed as a matriculated student in residence through the UW.
4. Minimum 2.50 cumulative GPA for all work done in residence.

Bachelor of Arts degree with a major in Architectural Design (with Construction Management)

Credential Overview

The Architectural Design major is a pre-professional degree that prepares candidates for admission with advanced standing to professional M.Arch programs. It is also good preparation for other roles in society that benefit from an understanding of and exposure to architectural design and problem solving such as government, development, planning, art, graphic design, and digital arts. Students develop visual literacy and complex problem solving skills through the design process, including researching historical precedents, analyzing theoretical texts, and on-site understanding of the physical built and natural environment. The college also offers a Dual Degree-Bachelor of Arts with a major in Architectural Design and a BS in Construction Management. Students must first be admitted to the Architectural Design major.

Admission Requirements

Dual-degree majors first apply to the architectural design program and must meet architectural design admission requirements. Admitted architectural design students apply to the construction management program during spring quarter of their junior year (first year in the architecture program). For architectural design students, construction management prerequisites are waived, but such students must take CM 313 and CM 323 prior to the construction management application deadline, April 1.

Completion Requirements

142 credits

1. *Architecture Foundation Courses (60 credits)*: ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 362, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431
2. *Architecture Selectives (6 credits)*: 3 credits of graphic/media selective chosen from among the following BIM-recommended courses: ARCH 316, ARCH 410, ARCH 412, ARCH 413, ARCH 415, ARCH 418, ARCH 478, ARCH 481, ARCH 482, ARCH 484, ARCH 485, ARCH 486, ARCH 498. 3 credits of history/theory selective from among the following courses: ARCH 441, ARCH 442, ARCH 450, ARCH 452, ARCH 455, ARCH 457
3. *Construction Management Courses (76 credits)*: CM 301; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 421, CM 422, CM 423, CM 426, CM 431 (capstone experience), CM 432, and CM 434
4. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division college courses completed in the College of Built Environments. Minimum 2.0 in CM 431

Note: A minimum of 225 credits is required to complete a dual degree.

Program of Study: Major: Architecture

Program Overview

The Department of Architecture offers two different options for undergraduate students interested in the field of architecture. The Architecture major is a seminar and research based (non-studio) degree that provides a

liberal arts foundation. This program prepares students for further study and careers in architectural design and related disciplines. The Architectural Design major is a pre-professional studio based degree that prepares most students for graduate study in architecture and a professional career in the field. Both programs share a commitment to architecture and design as a field of knowledge that can have a profound impact on contemporary society. Non-majors interested in architecture are able to pursue a Minor in Architectural Design.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Architecture

Admission Requirements

Applicants are considered for autumn admission only. Admission is competitive. Admission groups are freshmen/sophomore admission (F/S A) and upper-division admission (UA). Consult department website for more information and application form.

Freshman Admission

The department enrolls freshman-year students directly out of high school, prior to their completion of any university-level prerequisites. All freshmen indicating architecture on their UW application are considered for freshman admission to the BA (with a major in architecture) program; no additional application materials are required. Students admitted as freshmen must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Sophomore Admission

Application deadline is the first Monday of spring quarter. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Students admitted as sophomores must complete all preparatory and general education requirements listed under upper-division admission as well as all major requirements in order to earn a degree.

Transfer Admission

Transfer students may apply for admission at the beginning of the sophomore year or the beginning of the junior year. Application deadlines are the same as for sophomore or upper-division admission. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and personal motivation. Transfer students must also submit a separate application to the UW.

1. Sophomore-year transfer students must complete all preparatory architectural coursework and general education requirements listed under upper-division admission requirements, as well as all major requirements, in order to earn a degree.
2. Junior-year transfer students must complete all general education requirements and are strongly encouraged to complete all preparatory architectural coursework before entry into the program. These courses can be taken through UW Educational Outreach, on a non-matriculated basis, prior to admission to the UW. These, as well as all major requirements, must be

completed in order for a student to earn a degree.

Upper-Division Admission Requirements (UA)

1. Junior Standing (90 or more credits completed by the quarter of admission), to include the following:
 - a. Preparatory Architectural Coursework (19 credits): ARCH 200, ARCH 231, ARCH 350, ARCH 351, ARCH 352
 - b. General Education Requirements: minimum of 71 credits selected from Arts & Humanities (A&H) (20 credits); Social Sciences(SSc) (20 credits); Natural Sciences (NSc) (20 credits), including 5 credits of mathematics (MATH 112 or MATH 124); additional Areas of Inquiry (6 credits); electives (3 credits). Composition/writing (10 credits total) may be met by freshman English composition courses and/or other general education courses designated "W" with a minimum 2.0 grade for each course; diversity (3 credits) may be satisfied by general education courses designated DIV.
2. Minimum 2.80 college/university GPA
3. Department Application (See department website)
4. Transcripts of all college-level work. Unofficial transcripts are accepted.
5. Application Deadline: First Monday of spring quarter. For enrolled UW students, all prerequisite requirements must be completed or under way by the application deadline, and all prerequisite requirements must be completed by the time the student enters the program in autumn quarter. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, and

personal motivation. Completion of prerequisite requirements does not guarantee admission.

Bachelor of Arts degree with a major in Architecture

Credential Overview

The Architecture major is a four-year, Bachelor of Arts degree program in which students explore the many factors that shape our built environment. The program provides a liberal arts foundation in the discipline of architecture that covers spatial reasoning, aesthetics, political and economic structures, socio-cultural influences, urbanism, landscape, construction, building technologies, and ecology. Students have the opportunity to focus their studies through a sequence of courses that allows concentration in one of three areas: History and Theory; Materials and Fabrication; and Sustainable Technologies. This program prepares students for graduate study in the field of architectural design as well as architectural history, historic preservation, landscape architecture, urban planning or construction management. It also provides a foundation for careers in design, planning policy, law, community leadership, real estate, development or in related non-profit organizations.

Completion Requirements

1. Coursework (89 or more credits completed during years three and four): ARCH 332 (5 credits), ARCH 361, ARCH 362 (5 credits), ARCH 431, ARCH 468, ARCH 469. One history and theory selective course (3 credits), one craft and fabrication selective (3 credits), and one sustainable technologies selective (3 credits). Three Department of Architecture areas of concentration

courses (at least 9 credits), two approved electives offered with College of Built Environment programs (at least 6 credits), five approved Department of Architecture electives (at least 15 credits), and at least 23 credits of approved upper-division electives. Selective and concentration courses are chosen from approved lists maintained by the department.

2. Capstone (ARCH 469) completed in residence through the UW
3. Minimum 2.00 cumulative GPA for all courses presented for the major

Program of Study: Minor: Architecture

Program Overview

The Department of Architecture offers a Minor in Architecture. The Architecture minor is a good option for students to complement their major area of study and an opportunity for undergraduates to explore their interest in architecture related subjects such as: architectural history and theory; structures and building materials; graphic representation; digital design and computing; sustainable building technology; building and fabrication methods.

This program of study leads to the following credential:

- Minor in Architecture

Minor in Architecture

Credential Overview

The Department of Architecture offers a Minor in Architecture. The Architecture minor is a good option for students to complement their major area of study and an opportunity for undergraduates to explore

their interest in architecture related subjects such as: architectural history and theory; structures and building materials; graphic representation; digital design and computing; sustainable building technology; building and fabrication methods.

Completion Requirements

25 credits

1. Minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level)
2. 5 additional upper-division credits from courses in the College of Built Environments

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*
 - The architecture program emphasizes a broad liberal arts foundation followed by a focus on architectural history and theory, materials and making, and sustainable technologies. Specific goals for student learning include an understanding of the sequences and history of human building activities; social, political, legal, and economic influences on design and construction; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; relationships of buildings to their sites and ecological contexts; sustainable technologies used in building construction.
 - The architectural design program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to specific human needs; the sequences and history of human building activities; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available and vary according to individual interests within the program. See adviser for details.
- *Department Scholarships:* A limited number of department scholarships are available to eligible students entering their final year of the major.
- *Student Organizations/Associations:* AIAS (American Institute of Architectural Students)

Of Special Note:

The UW's four-year, Bachelor of Arts degree in architectural design is a pre-professional degree and is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six or seven years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of coursework with a pre-professional Bachelor of Arts degree (with a major in architectural design) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with the Bachelor of Arts in Architecture or bachelor's degrees in unrelated fields take an additional year of coursework).

Graduate Programs

MArchUW@uw.edu

Program of Study: Master of Architecture

Program Overview

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S.

regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards. Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree. The University of Washington Department of Architecture offers the following NAAB-accredited degree programs: M. Arch. (undergraduate degree with architecture major + 90 graduate quarter credits) M. Arch. (undergraduate degree with non-architecture major + 135 graduate quarter credits)

This program of study leads to the following credentials:

- Master of Architecture
- Master of Architecture (Advanced Standing)
- Master of Architecture (High-Performance Building)
- Master of Architecture (History, Theory, Criticism)

The PhD in Built Environment is a College-wide, interdisciplinary degree program housed within the College of Built Environments. The PhD program provides students a common core of substantial, integrated knowledge concerning the multi-faceted built environment and then offers areas of specialization in three discrete fields of knowledge and practice: Sustainable Systems and Prototypes (across a range of scales, from building elements and assemblages, to buildings, site, and neighborhood context, city, and region); Computational Design and Research (covering the spectrum of design, planning, and construction processes, practices, and pedagogy); History, Theory, and Representation studies (focusing on issues of regional-global modernity).

Program of Study: Major: Construction Management

Program Overview

Construction management is a diverse discipline focused on the coordination, planning, and delivery of projects that compose the world's built environment. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction managements' technical and business aspects make it an interesting and gratifying field of study.

This program of study leads to the following credentials:

- Bachelor of Science in Construction Management degree
- Bachelor of Science in Construction Management degree (w/Arch Design)

Bachelor of Science in Construction Management degree

Credential Overview

Construction management is a diverse discipline focused on the coordination, planning, and delivery of projects that compose the world's built environment. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction managements' technical and business aspects make it an interesting and gratifying field of study.

Recommended Preparation

Suggested First- and Second-Year Courses: ME 123; PHYS 114, PHYS 115, PHYS 117, and PHYS 118; 5 credits of economics; ENGL 131, ENGL 281; ESS 101; MATH 112 or MATH 124; ACCTG 215 and ACCTG 225, CM 250, COM 220, MGMT 200, QMETH 201; chemistry or environmental-science courses.

Admission Requirements

Admission is for autumn only, is capacity constrained, and is divided into three groups: Freshmen Direct (FA), Early Admission (EA), and Upper-Division Admission (UA). Consult department website for more information.

Freshman Direct Admission (FA)

The department enrolls a small number of students each year directly out of high school, prior to their completion of any university-level prerequisites. Freshman applicants to the University listing construction management as their intended

major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores. Freshman Direct students work with the construction management adviser to plan their first two years of coursework before beginning the standard curriculum. Such students are eligible to join the construction management student organizations, apply for scholarships, and participate in student competitions.

Students admitted under the Freshman Direct Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements to earn their degrees.

Early Admission (EA)

Students may also apply to the department in spring of their freshman year to enter as part of the Early Admission (EA) group in their sophomore year. This admission path is open to students who began their studies through UW as freshmen, have been enrolled no more than three quarters, and have completed at least 27 credits through UW (25 of the 27 UW credits must be numerically graded). Courses completed prior to applying must include: MATH 112 (or MATH 124 or Q SCI 291), PHYS 114 and PHYS 117 (or PHYS 121), and ECON 200. Other courses from the list of upper-division prerequisites may be taken to complete the minimum 27 credits.

Application deadline for Early Admission is April 1. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission

and all prerequisite requirements must be completed by the April 1 deadline.

Students admitted under the Early Admission program must complete all prerequisite course requirements listed under Upper-Division Admission as well as all major requirements in order to earn their degrees.

Upper-Division Admission (UA)

1. *Prerequisite Courses*: Minimum 88 credits in the following categories (courses must be completed by the beginning of autumn quarter for admission that quarter):
 - a. *Construction*: CM 260
 - b. *Business and Management*: ACCTG 215 and ACCTG 225; MGMT 200
 - c. *Social Sciences(SSc)*: 5 credits of economics; 5 additional SSc credits from UW Areas of Inquiry list (CM 250 recommended)
 - d. *Natural Sciences (NSc)*: PHYS 114 and PHYS 117 (or PHYS 121), and PHYS 115 and PHYS 118 (or PHYS 122); MATH 112 (or MATH 124 or Q SCI 291); ESS 101; QMETH 201 (or STAT 220 or STAT 311); 10 additional NSc credits from UW Areas of Inquiry list (chemistry or environmental studies recommended)
 - e. *Language Skills*: 5 credits from English composition list; 5 credits from "W" courses or English composition list (ENGL 131 and ENGL 281 recommended)
 - f. *Arts & Humanities (A&H)*: COM 220; 5 additional A&H credits (from UW Areas of Inquiry list)
 - g. *Diversity (DIV)*: 5 credits that meet UW's diversity requirement.
2. Admission to the major is capacity constrained. Admission decisions are

based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation.

Completion of prerequisite requirements does not guarantee admission.

Completion of prerequisite requirements is not required to apply, but is required prior to being admitted in autumn quarter.

3. Departmental application deadline: April 1, for the following autumn quarter. Selection for acceptance is made by early May, and all applicants are notified shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

Completion Requirements

92 credits:

1. *Foundation Courses (78 credits)*: ARCH 320, ARCH 321; MGMT 300; CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 330, CM 331, CM 332, CM 333, CM 334, CM 335, CM 410, CM 411, CM 412, CM 414, CM 420, CM 421, CM 422, CM 423, CM 432, and CM 434
2. *Construction Electives (minimum 6 credits)*: Two of the following: CM 415, CM 416, CM 425, CM 426, CM 428, CM 429, CM 430, or CM 433
3. *Capstone Experience (5 credits)*: Minimum 2.0 in CM 431
4. *Additional Writing Requirement (3 credits)*: CM 301
5. *Additional Major Requirement*: Minimum 2.50 cumulative GPA in upper-division courses completed in the College of Built Environments

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science in Construction Management degree (w/Arch Design)

Credential Overview

The Bachelor of Science in Construction Management is an intense business program with an in-depth focus on the construction industry. The BS provides a solid foundation for students entering the private and public sectors of the construction industry. The college also offers a Dual Degree-Bachelor of Arts with a major in Architectural Design and a BS in Construction Management. Students must first be admitted to the Architectural Design major.

Additional Information

For requirements of the dual-degree program in architectural design and construction management, refer to the [Architecture](#) catalog page.

Program of Study: Minor: Construction Management

Program Overview

The Construction Management minor is designed for students interested in professions related to the construction industry. The minor offers an academic foundation to be successful in careers in the construction industry.

This program of study leads to the following credential:

- Minor in Construction Management

Minor in Construction Management

Completion Requirements

Minimum 27 credits

1. Required courses (15 credits): CM 310, and CM 311 or CEE 307; CM 331; CM 333; CM 411
2. Electives (12 credits): four courses from the following: CM 321, CM 322, CM 332, CM 335, CM 414, CM 415, CM 421, CM 423, CM 428
3. Minimum 2.00 cumulative GPA in courses counted toward the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The study of construction management involves an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to provide graduates the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take

action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.

- *Instructional and Research Facilities:* The Built Environments Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include a 30-workstation computer laboratory in the basement of Gould Hall.
- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.
- *Department Scholarships:* A limited number of scholarships are available to eligible students.
- *Student Organizations/Associations:*
 - *Sigma Lambda Chi* is a national student honor society for recognition of outstanding students majoring in construction management. Membership is offered only to those students in the top twentieth percentile of their class. Each year

the student chapter conducts community service activities.

- *Associated Students in Construction (ASIC)* is an umbrella organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, Mechanical Contractors Association of America, and the National Electrical Contractors Association. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

Admission Requirements

Contact department for requirements.

Master of Science in Construction Management

Completion Requirements

42 credits

1. *Core Courses (9 credits):* CM 500, CM 535, CM 575

2. *Choose thesis, project, or course-only option (0-9 credits):*
 - a. Thesis option: CM 700 (9 credits)
 - b. Project option: CM 600 (3 credits)
 - c. Course-only option: 0 credits, complete only elective courses below
3. *Construction Management Elective Courses (24-33 credits to meet required total)*
4. *College of Built Environments Elective Courses: Max 9 credits non-CM coursework from within the college may apply.*
5. Required 3.3. cumulative GPA in courses applied to program requirements.

Master of Science in Construction Management (fee-based) (online)

Completion Requirements

42 credits

Required courses (42 credits): CESI 588, CESI 508, CESI 595, CESI 592, CESI 596, CESI 552, CESI 594, CM 500, CM 520, CM 525, CM 580, CM 582, CM 586, CM 588

Landscape Architecture

348 [Gould Hall](#)

206-543-9240

[Website](#)

[Faculty Website](#)

belarc@uw.edu

Landscape architecture is a professional design discipline that addresses both the built and natural environments. It focuses on

the design, analysis, and planning of outdoor spaces across a wide range of scales, with the intent of creating places that are both meaningful and functional. Landscape architects design everything from infrastructure elements, such as roadways, drainage systems, and parks, to prominent cultural monuments and gardens for public and private housing units. The education of a landscape architect includes aesthetic design skills, the development of social and environmental ethics, technical design skills, knowledge of a wide range of natural processes, an awareness of design history, and skills for working with other people. At the University of Washington, the focus is on urban ecological design education, which allows students to make a difference in the future of cities and urban regions all over the world.

Undergraduate Programs

348 [Gould Hall](#)

206-543-9240

belarc@uw.edu

Program of Study: Major: Landscape Architecture

Program Overview

Landscape Architecture is a professional degree that studies urban ecological design, design activism, ecological infrastructure, ecological learning and literacy, design for human and environmental health and social and environmental justice.

This program of study leads to the following credential:

- Bachelor of Landscape Architecture degree

Admission Requirements

Core courses within the department form a seven-quarter curriculum designed to start autumn quarter of the junior year. Students take a sequence of seven studios, other sequential skills-based courses, theory courses, and directed electives.

1. Admission is competitive. Completion of the requirements listed below does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Refer to department website for application materials and detailed information on admission, prerequisites, and required coursework.
2. Minimum 69 credits
 - a. *Departmental Pre-professional Requirements (12-16 credits):* L ARCH 300* (usually offered autumn and summer quarters) and two of the following: L ARCH 322 (spring quarter); L ARCH 341 (autumn quarter); L ARCH 352 (autumn quarter); L ARCH 353 (winter quarter); L ARCH 361 (winter quarter); L ARCH 363 (spring quarter). For transfer students, these seven courses may be taken through UW's Professional and Continuing Education as non-matriculated students prior to admission to the UW.
 - b. *General Education Coursework:* minimum 69 credits to include 5 credits of English composition; 4-5 credits of Reasoning; and 60 credits selected from the following Areas of Inquiry: Arts & Humanities (20 credits); Social Sciences (20 credits); Natural Sciences (20 credits), of which one course (usually ESS 101, or equivalent) is shown as the

prerequisite for ESS 315/ENVIR 313 or ESS 301

*L ARCH 300 can be counted toward general education requirements. Other L ARCH courses which are not required within the BLA program, or as admission requirements, may be counted for general education requirements. Students planning to complete the degree in seven quarters should finish all departmental general education requirements prior to starting major requirements.

3. *Application Deadline:* 5 p.m. the first day of spring quarter for the following autumn quarter. Admission is for autumn quarter only. Applications must include BLA application materials. Students should apply during their second college year to make satisfactory progress toward the degree.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Landscape Architecture degree

Credential Overview

Landscape Architecture is a professional degree that studies urban ecological design, design activism, ecological infrastructure, ecological learning & literacy, design for human & environmental health and social & environmental justice.

Completion Requirements

Minimum 180-194 credits

General Education Requirements (69-83 credits): L ARCH 300 and other L ARCH courses which are not requirements, either within the BLA program or as prerequisites, may count toward A&H/NSc/SSc requirements.

1. *Written and Oral Communication (5 credits)*: one 5-credit English composition course from the University list. 10 additional writing credits are required, but can be met by major core courses.
2. *Arts & Humanities (A&H) (20 credits)*: L ARCH 300; 14 additional A&H credits; drawing class recommended
3. *Social Sciences (SSc) (20 credits)*
4. *Natural Sciences (NSc) (20 credits)*: one course (usually ESS 101, or equivalent) shown as the prerequisite for either ESS 315/ENVIR 313 or ESS 301; additional NSc credits to total 20 credits
5. *Reasoning (RSN) (4-5 credits)*
6. *Diversity (DIV) (3 credits)*: Some courses may count for both DIV and SSc.

Major Requirements

Minimum 111 credits

1. *Studio Classes*: L ARCH 401, L ARCH 402, L ARCH 403, L ARCH 404 (6), L ARCH 405 (6), L ARCH 474 (6), L ARCH 475 (6)
2. *Planting Design*: L ARCH 424
3. *History*: L ARCH 352 and L ARCH 353
4. *Theory*: L ARCH 341, L ARCH 361, L ARCH 363
5. *Graphics*: L ARCH 411, L ARCH 440 (3), L ARCH 441
6. *Professional Practice*: L ARCH 473

7. *Construction*: L ARCH 431, L ARCH 432, L ARCH 433, L ARCH 434
8. *Plant Identification*: one of L ARCH 423, BIOL 331/ESRM 331, BIOL 317, or equivalent course approved by department
9. *Plants*: one course totaling at least 3 credits from list of approved courses maintained by the department
10. *Geology*: one of ESS 301, ESS 305, or ESS 315/ENVIR 313
11. *Directed Electives*: minimum 12 credits of upper-division electives from list of approved courses maintained by the department: two courses in ecology and forestry, totaling at least 6 credits; one course in environmental law and policy for at least 3 credits; one course in urban design and planning for at least 3 credits
12. Minimum 2.0 grade in each course applied to major requirements

Program of Study: Minor: Urban Ecological Design

Program Overview

Urban Ecological Design Minor studies urban ecological design, design activism, ecological infrastructure, ecological learning and literacy, design for human and environmental health and social and environmental justice.

This program of study leads to the following credential:

- Minor in Urban Ecological Design

Minor in Urban Ecological Design

Completion Requirements

Minimum 25 credits

1. L ARCH courses open to non-majors (20 credits)
2. Courses 200-level and above from within the College of Built Environments or from ESRM or GEOG courses (5 credits)
3. Minimum 2.0 grade in all courses counted toward the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BLA program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies. Building from a liberal arts foundation, the program focuses on developing design knowledge, skills, and abilities through a sequence of nine environmental- and community-based design studios.

The program are to provides students a broad academic and professional exposure to landscape architecture and design so their creative potential and professional growth are realized, and so they may become leaders in the field. Includes learning to conceptualize and design through practice on studio projects; fostering creativity; developing graphic, written, and verbal communication skills; facilitating cognitive abilities; and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills. Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture,

design theory, site planning, construction, and communications, as well as elective courses in allied disciplines. The studio sequence addresses projects from detailed to neighborhood scales, varied contexts, and with diverse cultures. Overall, the program focuses on the application of ecological design strategies to urban and urbanizing areas, which characterizes the department's focus on urban ecological design.

- *Instructional and Research Facilities:* The program affords some opportunities for independent study and work in professional settings, beyond minimum requirements for the major. Departmental courses are complemented by elective courses from other areas, including urban horticulture, soils, geology, urban design and planning, botany, and ecology.

Studio classes led by departmental faculty or members of the professional community. May be taught jointly with faculty from other disciplines. Such classes address specific areas of inquiry including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and civic-space design, urban landscape design, ecological restoration, and culturally-based design. A capstone studio requires students to integrate their knowledge of design theory, practice, and construction in a design-build project for a local community. The department regularly offers study abroad programs as well as opportunities to work with local communities and public agencies.

- *Honors Options Available:* Students may apply for admission to the Bachelor of Landscape Architecture Honors option. See departmental program coordinator.
- *Research, Internships, and Service Learning:* Lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession's work. Advanced studio courses, including the capstone studio, typically provide service learning experiences in a community context. In addition to required coursework, the program encourages students to pursue personal interests through directed and independent study within and beyond the department. Students are encouraged to gain real-world experience through a practicum with professional firms, organizations, or agencies.
- *Department Scholarships:* Limited availability.
- *Student Organizations/Associations:* Student chapter, Washington Chapter of the American Society of Landscape Architects

Graduate Program

Program of Study: Master of Landscape Architecture

This program of study leads to the following credentials:

- Master of Landscape Architecture
- Master of Landscape Architecture (Advanced Standing)

Admission Requirements

Contact department for requirements.

Master of Landscape Architecture

Completion Requirements

84-120 credits, depending on advanced or regular standing

1. *If regular standing (MLA I), foundational courses are required:* See additional requirements section for foundational coursework
2. *Advanced Studios (24 credits):* L ARCH 501, L ARCH 502, L ARCH 503, L ARCH 504 or Wildcard Studio L ARCH 507 or BE 505
3. *History & Theory (18 credits):*
 - a. Required: L ARCH 570, L ARCH 598
 - b. Built Environment History (5 credits): Course list maintained internally by the program.
 - c. Socio-Political Dimensions (3 credits): Course list maintained internally by the program.
 - d. Biophysical Ecology (3 credits): Course list maintained internally by the program.
 - e. Research Methods (3 credits): Course list maintained internally by the program.
4. *Media (6 credits):* L ARCH 441 and one additional course from list maintained internally by the program.
5. *Construction (3 credits):* Course from list maintained internally by the program.
6. *Plants (6-8 credits):* L ARCH 424 and one additional course from list maintained internally by the program.
7. *Professional Practice (3 credits):* L ARCH 473
8. *Law/Finance/Policy (3 credits):* Course list maintained internally by the program.
9. *Project Option (12 credits):* Choose from the following:

- a. Thesis: L ARCH 590 (3 credits total) and L ARCH 700 (9 credits total)
 - b. Group Project: L ARCH 590 (3 credits total) and L ARCH 703 (9 credits total)
 - c. Capstone Studio: L ARCH 702 (12 credits total)
10. *Electives (if necessary to meet required total)*

Additional Completion Requirements

Foundational coursework:

1. *Studios (18 credits)*: L ARCH 401, L ARCH 402, L ARCH 403
2. *Media (6 credits)*: L ARCH 411, L ARCH 440

Master of Landscape Architecture (Advanced Standing)

Completion Requirements

84-120 credits, depending on advanced or regular standing

1. *If regular standing (MLA I), foundational courses are required*: See additional requirements section for foundational coursework
2. *Advanced Studios (24 credits)*: L ARCH 501, L ARCH 502, L ARCH 503, L ARCH 504 or Wildcard Studio L ARCH 507 or BE 505
3. *History & Theory (18 credits)*:
 - a. Required: L ARCH 570, L ARCH 598
 - b. Built Environment History (5 credits): Course list maintained internally by the program.
 - c. Socio-Political Dimensions (3 credits): Course list maintained internally by the program.

- d. Biophysical Ecology (3 credits): Course list maintained internally by the program.
 - e. Research Methods (3 credits): Course list maintained internally by the program.
4. *Media (6 credits)*: L ARCH 441 and one additional course from list maintained internally by the program.
 5. *Construction (3 credits)*: Course from list maintained internally by the program.
 6. *Plants (6-8 credits)*: L ARCH 424 and one additional course from list maintained internally by the program.
 7. *Professional Practice (3 credits)*: L ARCH 473
 8. *Law/Finance/Policy (3 credits)*: Course list maintained internally by the program.
 9. *Project Option (12 credits)*: Choose from the following:
 - a. Thesis: L ARCH 590 (3 credits total) and L ARCH 700 (9 credits total)
 - b. Group Project: L ARCH 590 (3 credits total) and L ARCH 703 (9 credits total)
 - c. Capstone Studio: L ARCH 702 (12 credits total)
 10. *Electives (if necessary to meet required total)*

Real Estate

Program of Study: Major: Real Estate

Program Overview

The Bachelor of Science in Real Estate prepares students to contribute to the multiple facets of financing, developing, and operating real estate while placing real estate within the context of building cities and communities that are both equitable and sustainable. The major equips students with the skills needed to analyze market trends, identify innovative financing structures, contribute to the development process, understand and navigate the public policy process, and manage projects once they are developed and in high demand.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Real Estate

Admission Requirements

Minimum 2.0 grade in R E 250. Students in good academic standing, who meet this requirement may declare this major at any time. Transfer students may take R E 250 in

their first quarter to become eligible for the major in the following quarter.

Bachelor of Science degree with a major in Real Estate

Credential Overview

The Bachelor of Science in Real Estate prepares students to contribute to the multiple facets of financing, developing, and operating real estate while placing real estate within the context of building cities and communities that are both equitable and sustainable. The major equips students with the skills needed to analyze market trends, identify innovative financing structures, contribute to the development process, understand and navigate the public policy process, and manage projects once they are developed and in high demand. The real estate major includes courses in real estate finance, asset management, brokerage, urban and real estate development, and housing and requires courses that build analytic and business skills as well as an understanding of the built environment.

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (10 credits)
3. Reasoning (RSN) (4 or 5 credits): one course from approved list
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Science (SSc) (20 credits)
3. Natural Science (NSci) (20 credits)

Major Requirements

Minimum 50 credits:

1. *Introduction Course*: R E 250 (3 credits)
2. *Core Real Estate Courses* (28 credits):
 - a. R E 361, R E 397, R E 411, R E 413, R E 416, R E 480 (21 credits)
 - b. Minimum 7 credits in other 300-or 400-level real estate courses
3. *Analytic Skills Electives*: See website for approved list. Minimum 9 credits; at least 4 credits in upper-division courses.
4. *Built Environment Electives*: See website for approved list. Minimum 5 credits.
5. *Business Skills Electives*: See website for approved list. Minimum 5 credits.
6. Minimum 2.00 cumulative GPA for courses applied to the major

Program of Study: Minor: Real Estate

Program Overview

Real estate is central to both economic development and to society. The real estate minor provides students with comprehensive exposure to the field and covers areas such as market analysis, development, appraisal, finance and management. The program examines both residential and commercial real estate, as well as the development process. It provides coverage of issues of importance from a public policy perspective, such as housing affordability and supply. Studying real estate therefore provides a wide array of diverse career opportunities.

This program of study leads to the following credential:

- Minor in Real Estate

Minor in Real Estate

Completion Requirements

25 credits

1. R E 250
2. Electives: See department for approved list of courses. (22 credits)
 - a. Minimum 13 credits in 300-400 level R E courses
 - b. Maximum 9 credits of other approved electives
3. Minimum 2.00 cumulative GPA for courses applied to the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The study of real estate involves an interdisciplinary curriculum that contains a mix of technical, analytical, built environment, and business courses to provide graduates the essential skills needed to be successful in the real estate industry. Oral and written communication skills are strengthened through written requirements and oral presentations. The rigorous interdisciplinary coursework provides students with the ability to process complex data, produce sophisticated financial and market analysis, and understand the political, economic and social dimensions of urban development. Graduates can pursue careers with homebuilders, real estate services firms (e.g., brokerage, asset management), real estate developers, real estate investment firms, public agencies involved in residential and commercial development, and nonprofit organizations involved in

housing and community and economic development.

- *Instructional and Research Facilities:* The Built Environments Library (located on the third floor of Gould Hall) houses real estate books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include Digital Commons, a 30-work-station computer laboratory in the basement of Gould Hall.
- *Honors Options Available:* None
- *Department Scholarships:* A limited number of scholarships are available to eligible students.
- Student Organizations/Associations
 - Alpha Sigma Gamma is an international student honor society for recognition of the academic and scholarly achievements of real estate students. Membership is offered only to those students in good academic standing who have completed more than 75% of the credit hours required for their bachelor's degree with a GPA in the major above 3.5 and an overall GPA above 3.25.
 - The UW Real Estate Club provides opportunities for networking, career development, and property tours for students who have an interest in real estate. For more information, see department website.

Urban Design and Planning

410 [Gould Hall](#)

206-543-4190

[Website](#)

[Faculty Website](#)

udpinfo@uw.edu

Urban design and planning deals with critical issues of human settlement and urban development. The Department of Urban Design and Planning fosters an

integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision. Departmental faculty are active participants in interdisciplinary research units, including the Institute for Hazard Mitigation Planning and Research, the Urban Form Laboratory, the Urban Ecology Research Laboratory, the Runstad Center for Real Estate Studies, and the Northwest Center for Livable Communities.

Program of Study: Major: Community, Environment, and Planning

Program Overview

Community, Environment, and Planning (CEP) is a hands-on, interdisciplinary major. While housed in the Department of Urban Design and Planning, CEP does not provide a predefined educational path. CEP empowers students to pursue their own educational goals in the company of other self-directed individuals. The CEP core curriculum focuses on theory and practice applied to real-world settings while electives are satisfied by taking upper-level courses all across campus. Students participate in a

governance process that supports the major while teaching them how to be effective leaders and doers in the world through practice, personal formation, intentionality, communal learning, and stewardship. CEP students graduate to become urban planners, project managers, educators, entrepreneurs, communication experts, and professionals of all sorts.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Community, Environment, and Planning

Recommended Preparation

Suggested First- and Second-Year College Courses: CEP 200.

Admission Requirements

1. Minimum 90 credits completed when student begins the program and at least 80 percent of the general education requirements fulfilled, tracked by CEP's Academic Advisor.
2. Minimum 2.50 GPA with additional emphasis on a written essay and demonstration of relevant extracurricular activities.
3. Admission is once a year, for autumn quarter. Early admission deadline is February 15. Additional application dates vary each year. See CEP's website for specific dates.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the

departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Community, Environment, and Planning

Credential Overview

Community, Environment, and Planning (CEP) is a self-directed, interdisciplinary Bachelor of Arts degree housed in the Department of Urban Design and Planning. CEP empowers students to draw on the tools of planning - collaboration, leadership, intentionality, stewardship, and vision - to pursue their own educational goals in the company of other self-directed students in cohorts limited to 38 students. The CEP core curriculum focuses on theory and practice applied to real-world settings; electives are satisfied by taking courses anywhere on campus. Students also participate in a governance process that supports the major and teaches students how to be effective leaders and doers in the world. Our students graduate to become urban planners, educators, non-profit managers, entrepreneurs, communication experts, and professionals of all sorts, including doctors, lawyers, and engineers. Transfer students are welcomed. CEP: An education fully lived, not passively taken.

Completion Requirements

General Education Requirements

1. *Written Communication (15 credits)*: 5 credits English composition; 10 credits additional composition or W courses. W courses, if applicable, may also be counted toward Areas of Inquiry or major requirements.
2. *Reasoning (4-5 credits)*: The RSN course, if applicable, may also be counted toward an Area of Inquiry or major requirement.
3. *Areas of Inquiry (60 credits)*: 20 credits Arts & Humanities (A&H); 20 credits Social Sciences (SSc); 20 credits Natural Sciences (NSc). Required CEP courses and other non-CEP courses used to satisfy major requirements may also be counted toward Areas of Inquiry requirements, if applicable.

Major Requirements

77-82 credits

1. Core Seminars (30 credits): CEP 301, CEP 302, CEP 303, CEP 460, CEP 461, CEP 462.
2. Methods Courses (25 credits): Upper-division courses within the University, with no more than 15 credits from one department; chosen with guidance and approved by CEP staff and faculty.
3. Diversity Course (5 credits): One course that critically analyzes and addresses social constructs and/or issues from a different perspective than that of our dominant culture. Must be approved by the program adviser
4. Digital Skills Proficiency Course (3 credits): One course that enhances student's understanding of the creation, utilization, and implications of digital material. See department for list of approved courses (a course not on approved list must be approved by the program adviser). May count toward Methods Courses requirement if the Digital Skills Proficiency course is an upper-division course.
5. Leadership Retreats (4 credits): CEP 300, autumn and spring
6. Governance Practicum (6 credits): CEP 400, quarterly
7. Internship (5 credits): CEP 446, 120- to 150-hour internship

8. Senior Project Capstone (2-6 credits):
CEP 490 and CEP 491, autumn and winter

Electives to complete minimum 180 credits for degree; varies, depending on how many general education courses apply to more than one requirement.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A CEP education is founded on the following: students start where they are; articulate and embrace a vision of how they intend to make a difference in the world; construct a plan (with guidance from faculty and peers) of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with this plan in the final two years of undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. CEP class cohorts range from 25-30 students. This group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the

study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change.

CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

- *Instructional and Research Facilities:* Refer to department website for more information.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* Refer to department website for more information.
- *Department Scholarships:* Department and program offer specific scholarships. Contact program adviser for details.
- *Student Organizations/Associations:* Refer to department website for more information.

Program of Study: Minor: Urban Design and Planning

Program Overview

Urban planning supplements other studies by providing a holistic view of the human experience and how it influences and interacts with our natural and built environments. This urban planning minor puts professional skills into practice through urban leadership, applied research, and system-level thinking.

This program of study leads to the following credential:

- Minor in Urban Design and Planning

Minor in Urban Design and Planning

Credential Overview

Urban planning supplements other studies by providing a holistic view of the human experience and how it influences and interacts with our natural and built environments. This urban planning minor puts professional skills into practice through urban leadership, applied research, and system-level thinking. Students are able to choose many of the courses in the minor so they can complement a wide range of majors on campus. The urban planning minor offers classes in data analysis, planning theory, sustainable development, and community-based projects.

Completion Requirements

30 credits

1. URBDP 300
2. Minimum 13 additional credits in URBDP-prefix courses
3. 12 additional credits in planning-related courses with Urban Design and Planning adviser approval.
4. Minimum 2.0 grade required for each course counted toward the minor.

See departmental adviser for recommended courses.

Program of Study: Master of Urban Planning

Program Overview

Focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and

studies in one of the following specializations: 1. urban design dealing with physical form, character, and quality issues; 2. real estate, designed to provide students a deep foundation and specialized skills to help launch or enhance professional careers in real estate; 3. historic preservation, focusing on the specialized skills needed actively to protect historic districts, buildings, and landscapes; 4. land-use and infrastructure planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects; 5. environmental planning, addressing the interactions between urban systems and natural processes. This degree, a two-year (or six-quarter) program, is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms.

This program of study leads to the following credential:

- Master of Urban Planning

Admission Requirements

Contact department for requirements.

Master of Urban Planning

Completion Requirements

72 credits

1. *Core Curriculum (30 credits)*: Each core course must be numerically graded with a minimum grade of 3.0 or higher. URBBDP 500, URBBDP 501, URBBDP 503, URBBDP 505, URBBDP 506, URBBDP 510, URBBDP 512, URBBDP 520, URBBDP 580
 2. *Professional Project or Thesis (9 credits)*: URBBDP 547 or URBBDP 700
 3. *Restricted Electives (14 credits)*: Each restricted elective course must be numerically graded with a minimum grade of 3.0 or higher. One course from each of the following:
 - a. Advanced Methods - Course list maintained internally by the program.
 - b. Urban Development / Economics - Course list maintained internally by the program.
 - c. History/Theory/Ethics of Planning - Course list maintained internally by the program.
 - d. Urban Planning Studio - Course list maintained internally by the program.
 4. *Electives (to meet required credit total)*: Any coursework completed at the UW in courses numbered 400 - 600 (Excludes 499). No more than 12 credits of URBBDP 600 Independent Study can count towards the degree.
-

Foster School of Business

[Website](#)

Individuals embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today's world. The Foster School prepares students for professional careers in management and related disciplines in both the private and public sectors.

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the Association to Advance Collegiate Schools of Business) since 1921.

bizinfo@uw.edu

Program of Study: Major: Business Administration

Program Overview

A Business Administration degree provides a liberal arts curriculum along with a full spectrum of the many areas of business. Students can take a variety of upper division electives or choose to specialize in an area of business by declaring a major.

This program of study leads to the following credentials:

- Bachelor of Arts in Business Administration degree

- Bachelor of Arts in Business Administration degree with a major in Accounting
- Bachelor of Arts in Business Administration degree with a major in Accounting for Business Professionals
- Bachelor of Arts in Business Administration degree with a major in Entrepreneurship
- Bachelor of Arts in Business Administration degree with a major in Finance
- Bachelor of Arts in Business Administration degree with a major in Human Resources Management
- Bachelor of Arts in Business Administration degree with a major in Information Systems
- Bachelor of Arts in Business Administration degree with a major in Marketing
- Bachelor of Arts in Business Administration degree with a major in Operations and Supply Chain Management

Recommended Preparation

Suggested First- and Second-Year College Courses: English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong writing and analytic skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

Admission Requirements

The Foster School offers admission to upper division applicants for autumn and winter quarters. Students admitted for autumn may

elect to take classes during the prior summer quarter.

Applicants are considered in two admission groups: the Freshman Direct Admission Program and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Upper-Division Admission Group:

1. A minimum 2.00 cumulative GPA for all college coursework
2. A minimum 2.00 cumulative GPA for all required business courses
3. Since eligible applicants exceed the space available, acceptance is competitive. Admission is based on evaluation of four factors:
 - a. overall scholastic record
 - b. grades in pre-application courses, described below
 - c. written communication skills
 - d. evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, and exceptional extracurricular activities or work experience.

Admission for UAG is offered twice a year, for autumn and winter quarters. A Foster School application, together with all supporting materials, must be on file by April 5 for autumn quarter admission or October 5 for winter quarter admission. Records of all coursework completed by the deadline must be submitted at the time of application. Admission for Freshman Direct is offered once a year, for autumn quarter only.

Freshman Direct Admission Program

The Foster School enrolls a limited number of students each year directly out of high school, prior to completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records.

Upper-Division Admission Group (UAG)

Students must present a minimum of 60 graded academic credits at the time of application including the following course: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, or MATH 134; an approved English composition course, chosen from C LIT 240, ENGL 109-ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281, ENGL 297, ENGL 298, or ENGL 299. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Foster School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to

do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the School website.

Bachelor of Arts in Business Administration degree

Credential Overview

The Bachelor of Arts in Business Administration is a general business degree that allows students to customize their business specializations to fit their own interests. Students have the opportunity to choose upper-division business courses to complete the general version of the degree.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)

3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major requirements

71-73 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Business courses (16 credits):* 300- or 400-level business electives
3. *Other credit requirements and restrictions:*
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement.
4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.

- b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Accounting

Credential Overview

Accounting involves the development and communication of financial and operational information necessary for decision-making in both private industry and public sector organizations. Accounting practices are comprehensive, measuring the result of an organization's economic activities and conveying this information to others. The curriculum provides students with the tools to create and organize financial information, identify and apply accounting principles, and communicate the economic and legal implications of financial transactions. Utilizing research, interpersonal communication, and problem solving, accounting students will be equipped to think critically about financial transactions and the implications for an entire financial management system.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)
3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

87-89 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Accounting courses (32 credits):* ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 321, ACCTG 411, and at least one 400-level accounting elective course (excluding ACCTG 490, ACCTG 495, and ACCTG 499). At least five of these courses must be completed through the Foster School.
3. *Other credit requirements and restrictions:*

- a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement.
 - d. ACCTG 505 cannot be applied to the major or substitute for any coursework.
4. *Residency requirement:*
- a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Accounting for Business Professionals

Credential Overview

The Accounting for Business Professionals major provides a strong background in accounting for careers that are not focused solely on accounting. The design and application of accounting tools and methods play central roles in organizational planning, decision making, and control. This major provides the flexibility for students to choose a set of courses that focus on the elements of accounting most relevant to their specific career without meeting the entire set of requirements necessary for a career as a certified public accountant.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Knowledge

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)

3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

75-77 credits

1. *Core courses (55-57 credits)*: ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Major courses (20 credits)*: ACCTG 301; minimum three additional 300-or 400-level ACCTG courses; either one additional 300- or 400-level ACCTG course or one of FIN 450, FIN 453, FIN 454, FIN 457/ENTRE 457, FIN 458. May not count ACCTG 490, ACCTG 495, or ACCTG 499 toward this requirement.
3. *Other credit requirements and restrictions*:
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the

upper-division business elective requirement.

- d. ACCTG 505 will not be applied to the major or substitute for any coursework.
4. *Residency requirement*:
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements*: Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business

Administration degree with a major in Entrepreneurship

Credential Overview

Entrepreneurship focuses on entrepreneurial strategy, finance, management, and marketing. The curriculum offers real-world experience, with connections to Foster students, faculty, staff, and the greater UW and Seattle community. The Entrepreneurship major helps transform a vision of business ownership into a step-by-step achievable process. Students create business proposals, draft financial and marketing plans, and execute ideas through business clubs, case competitions, and real-world practice. Through a combination of hands-on learning, practical experience, and theory students gain valuable knowledge, skills, and connections.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)
3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

75-77 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Major courses (20 credits):* ENTRE 370, FIN 457/ENTRE 457, MKTG 455/ENTRE 455, and 8 credits from a

list of approved courses. Refer to department website for list of approved courses.

3. *Other credit requirements and restrictions:*
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement.
4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Finance

Credential Overview

Finance and business economics covers four interrelated areas: corporate finance, investments, financial markets, and international finance. The curriculum provides students with the mathematical and valuation skills to understand the economy's capital markets and investigate problems facing financial institutions. Finance studies the management of funds and how the flow of capital affects the management of firms and the decisions of investors. Through case studies and critical analysis, students utilize business economic theory and financial management tools to succeed in making key managerial decisions.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics

and macroeconomics (ECON 200 and ECON 201)

3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

79-81 credits

1. *Core courses (55-57 credits)*: ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Major requirements (minimum 24 credits)*: One course from FIN 450, FIN 453, FIN 454, or FIN 457/ENTRE 457; either FIN 460 or FIN 461; Four additional courses from any combination of B ECON 301 or ECON 301, 400-level FIN courses (excluding FIN 490, FIN 495, FIN 499), or 400-level B ECON courses (excluding B ECON 490, B ECON 499).
3. *Other credit requirements and restrictions*:
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is

applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement.

4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Human Resources Management

Credential Overview

Human Resource Management draws on the study and practice in psychology, sociology, and organizational behavior to thoughtfully examine human performance within organizations. Students gain skills in recruiting and retaining talented people, understanding corporate responsibility and ethics, and building effective negotiation and decision-making practices. The Human Resource Management major provides students with opportunities to explore the laws and regulations surrounding the employee structure and performance. Students learn to develop selection systems and criteria to recruit and retain successful hires. Human resources is a critical business function in managing people and work

satisfaction for employees in all types of organizations.

Completion Requirements

180 credits

2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)
3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

75-77 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.

2. *Major requirements (20 credits):* MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 407
3. *Other credit requirements and restrictions:*
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement.
4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Information Systems

Credential Overview

Information Systems provides students with coursework emphasizing technical tools to design, develop, and manage information technologies. Students learn to interact and interface with various business applications and assess which program or information technology meets the organization's tactical and strategic needs. Information Systems allows students to be innovative, assess information technology needs in an organization, and strategically plan and coordinate websites or new systems. The curriculum focuses on computer programming and database management as well as managing the development and use of information technology. Students learn database design and administration, examine data mining concepts and techniques, and develop solutions for problems in interactive business programs.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements
4. Diversity (DIV) (3 credits)

Areas of Inquiry

1. Arts & Humanities (A&H) (20 credits)
2. Social Sciences (SSc) (20 credits): includes 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201)
3. Natural Sciences (NSc) (19-20 credits): includes 5 credits in calculus (MATH 112, MATH 124, or MATH 134)

Additional Completion Requirements

Major Requirements

75-77 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Major requirements (20 credits):* I S 320, I S 410, I S 445, I S 451, I S 460
3. *Other credit requirements and restrictions:*
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the

upper-division business elective requirement.

4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Marketing

Credential Overview

Marketing studies advertising, consumer behavior, marketing management, product development, social media, and sales management. It focuses on the consumer and utilizes many creative skills in advertising, data collection, and communication. The curriculum is broad, providing opportunities for students to learn more about the buying and selling of products and services, learning how to think strategically and make a difference in any industry. Marketing students explore theory and concepts from economics, sociology, psychology, and statistics to critically analyze case studies and use research data to come up with an achievable solution.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):
 - a. one from B CMU 301, ENGL 281, or ENGL 381 (4-5 credits)
 - b. one additional composition or writing course from approved list
3. Reasoning (RSN) (5 credits): met by program requirements

5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Bachelor of Arts in Business Administration degree with a major in Operations and Supply Chain Management

Credential Overview

Operations and Supply Chain Management covers the design, planning, control, and improvement of manufacturing and service operations. It improves the efficiency and effectiveness of both large- and small-scale operations. Using analytical and empirical strategies, students gain skills in project and database management, managing logistical systems to control how goods and services are moved within an organization, and determine if these transactions add or subtract value. The curriculum highlights methods and tools to effectively plan and implement complex projects with operations research, programming, and analysis of production and inventory models in the U.S. and abroad.

Completion Requirements

180 credits

General Education Requirements

Basic Skills

1. English Composition (5 credits)
2. Additional Writing (8-10 credits):

Additional Completion Requirements

Major Requirements

71-73 credits

1. *Core courses (55-57 credits):* ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300, MGMT 320, MGMT 430. See adviser for list of approved courses which may substitute for QMETH 201.
2. *Major requirements (16 credits):* QMETH 450; OPMGT 443, OPMGT 450; I S 451
3. *Other credit requirements and restrictions:*
 - a. No more than 6 lower-division business elective credits in addition to lower division core requirements
 - b. No more than 15 credits of economics coursework may be applied to the degree
 - c. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the

- upper-division business elective requirement.
4. *Residency requirement:*
 - a. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits through the UW, Seattle.
 - b. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Foster School Undergraduate Program Office prior to applying.
 5. *Grade requirements:* Minimum 2.00 cumulative GPA for all courses applied to major requirements. Minimum 2.00 cumulative GPA in all business credits taken at the UW, Seattle.

Program of Study: Minor: Business

Program Overview

Open to all undergraduate students not majoring in business, the Minor in Business offers students the opportunity to build a diverse set of career and life skills. Students learn from Foster School of Business faculty members in courses related to financial literacy, accounting, management, entrepreneurship, marketing, sales, and information systems. Coursework for the Minor in Business is delivered mostly online with periodic in-person events.

This program of study leads to the following credential:

- Minor in Business

Minor in Business

Credential Overview

Open to all undergraduate students not majoring in business, the Minor in Business offers students the opportunity to build a diverse set of career and life skills. Students learn from Foster School of Business faculty members in courses related to financial literacy, accounting, management, entrepreneurship, marketing, sales, and information systems. Coursework for the Minor in Business is delivered mostly online with periodic in-person events.

Completion Requirements

Minimum 27 credits

1. *Core Courses (23-24 credits):* ACCTG 219 or ACCTG 225; FIN 205; MGMT 305; MKTG 305; I S 305
2. *Electives:* Refer to Foster School of Business website for list of approved courses (to reach minimum 27 credits)
3. Minimum 2.00 cumulative GPA in courses applied to the minor
4. Minimum of 15 credits at the 300-400 level
5. Minimum 15 credits completed in residence at UW Seattle

Program of Study: Minor: Business Administration

Program Overview

Entrepreneurship focuses on entrepreneurial strategy, finance, management, and marketing. The curriculum offers real-world experience, with connections to Foster students, faculty, staff, and the greater UW and Seattle community. Entrepreneurship is an all-encompassing option, transforming a vision of business ownership into a step-by-

step achievable process. Students create business proposals, draft financial and marketing plans, and execute ideas through business clubs, case competitions, and real-world practice. Students take the lead or partner with others to utilize expertise in finance, marketing, accounting, information systems, management, or operations. The combination of hands-on learning and practical experience ensures students in the Entrepreneurship option graduate with the knowledge, skills, and connections to achieve entrepreneurial goals.

This program of study leads to the following credential:

- Minor in Business Administration: Entrepreneurship

Admission Requirements

Admission is capacity constrained, based on evaluation of three factors: (1) overall scholastic record; (2) grades in lower division prerequisite coursework; (3) evidence of entrepreneurial activities or the promise of achievement in an entrepreneurial business career. Application deadlines and requirements are available in the Foster School Undergraduate Programs Office or at foster.washington.edu/undergrad.

**Minor in Business Administration:
Entrepreneurship**

Completion Requirements

Minimum 29 credits

1. ACCTG 219, or ACCTG 215 and ACCTG 225, or equivalent
2. ECON 200 or equivalent
3. ENTRE 370
4. ENTRE 472 and ENTRE 473

5. Additional ENTRE electives at 300-level or above, selected from a list maintained in the Foster Undergraduate Programs Office to achieve a minimum of 29 credits
6. Minimum 2.00 cumulative GPA in courses applied to the minor

Program of Study: Certificate: Business Administration

Program Overview

The nationally-ranked, award-winning Certificate of International Studies in Business Program (CISB) helps Foster students hone the competitive edge needed to succeed in the global marketplace. CISB, an intensive supplement to the BA BA, combines international business courses with advanced language training, study or work abroad, regional specialization and real-world experience. This package of knowledge and skills is ideal preparation for a career in global business. CISB graduates work in a wide range of fields, including international trade, logistics, global marketing, international finance, management consulting and public/nonprofit management in the U.S. and abroad.

This program of study leads to the following credential:

- Certificate in International Business

Admission Requirements

Contact department for requirements.

Certificate in International Business

Completion Requirements

Contact department for requirements.

Additional Information

Formerly the Foster School of Business offered seven option credentials: (1) Accounting; (2) Entrepreneurship; (3) Finance; (4) Human Resource Management; (5) Information Systems; (6) Marketing; and (7) Operations and Supply Chain Management. As of winter quarter 2022, however, these option credentials are no longer offered. Please refer to the [UW Seattle General Catalog Archive](#) for information about the option credentials.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Foster School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path - be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor - a business education helps immeasurably.
- *Instructional and Research Facilities:* Paccar and Dempsey Halls boast a wide range of technology enhancements including web-linked digital monitors and distance conference capabilities as well as 25 team rooms for student use,

and direct access to the library. The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. The Buerk Center Innovation Laboratory represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience.

- *Honors Options Available:* Honors students benefit from a sense of community generated by Honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree "With College Honors" or "With Honors."
- *Research, Internships, and Service Learning:* The Foster School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and a list of undergraduate internship opportunities, visit the School website
- *Department Scholarships:* The Foster School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Foster School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Foster School scholarship application is due April 5.

- *Student Organizations/Associations:* Chapters of Alpha Kappa Psi, Association of Black Business Students, Beta Alpha Psi, Business Ethics Association, Delta Sigma Pi, International Association of Students in Economics and Business (AIESEC), American Marketing Association, Business Information Technology Society, Hispanic Business Association, Husky Sales Club, Husky Traders, Latino Professional in Finance and Accounting, National Association of Black Accountants, Society for Human Resources Management, Startup UW, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Women in Business provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

Double Baccalaureate and Second Baccalaureate

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the Foster School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds available space, acceptance is competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Foster School uses the GPA for the last 90 credits earned.

Undergraduate Diversity Services

Recruitment, admission counseling, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Special scholarships are also available for underrepresented minority students. Academic advisers have information on this program.

School of Dentistry

[Website](#)

The University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (DDS) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, oral and maxillofacial radiology, orthodontics, pediatric dentistry, periodontics, or prosthodontics. Residency training is available in general practice dentistry, oral and maxillofacial radiology, oral and maxillofacial surgery, or pediatric dentistry. The Department of Oral Health Sciences offers a Master of Science (MS), an MS non-thesis degree for dental hygiene educators, and a doctoral degree (PhD). Postdoctoral study is available in various disciplines. Opportunities to earn other degrees concurrently (MS or PhD in the School of Dentistry's Department of Oral Health Sciences and other schools) may be arranged on an individual basis.

The primary mission of the School of Dentistry through educational, research, and service programs, is to prepare students to be competent oral health-care professionals. The School's research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty, and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and

the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth.

Doctor of Dental Surgery

[Website](#)

The Doctor of Dental Surgery (DDS) curriculum provides students opportunities to learn the fundamental principles significant to the entire body of oral health. Students learn the basic health sciences, attain competency in clinical skills, professional and ethical principles, and reasoning and critical decision-making skills that enable implementation of the dental knowledge base.

The DDS curriculum extends for 46 months or 16 quarters, including summer quarters. If needed, students may be allowed additional time to complete required coursework.

Admission

The School of Dentistry is a state-supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states.

Admission information, including how to apply and requirements, is available on the [DDS Admissions page](#).

Degree Requirements

Minimum 281-287 credits

1. *Year 1 (67 credits)*: DENTFN 500, DENTFN 501, DENTFN 510, DENTFN 511, DENTFN 512, DENTFN 513, DENTFN 520, DENTFN 521, DENTFN 522, DENTFN 523, DENTFN 530, DENTFN 531, DENTFN 533, DENTPC 510, DENTPC 511, DENTPC 520, DENTPC 523, DENTPC 531, DENTPC 532, DENTPC 533, DENTPC 534, DENTPC 565
2. *Year 2 (83 credits, includes one selective course)*: DENTFN 560, DENTFN 561, DENTFN 562, DENTPC 535, DENTPC 550, DENTPC 551, DENTPC 552, DENTPC 553, DENTPC 554, DENTPC 560, DENTPC 561, DENTPC 562, DENTPC 565, DENTPC 570, DENTPC 571, DENTPC 572, DENTPC 573, DENTPC 574, DENTPC 576, DENTPC 577, DENTPC 581, DENTPC 583, DENTPC 584, DENTPC 585, DENTPC 586, DENTPC 587, and DENTSL 550, or DENTSL 552, or departmental 550 research course
3. *Year 3 (74 credits)*: DENTCL 605, DENTCL 607, DENTCL 609, DENTCL 620, DENTCL 633, DENTCL 637, DENTCL 638, DENTCL 641, DENTCL 642, DENTCL 644, DENTCL 645, DENTCL 646, DENTCL 650, DENTCL 651, DENTCL 652, DENTCL 654, DENTCL 655, DENTCL 656, DENTCL 661, DENTCL 662, DENTCL 664, DENTCL 665, DENTCL 666
4. *Year 4 (63 - 68 credits, plus one selective course)*: DENTGP 650, DENTGP 652, DENTGP 653, DENTGP 654, DENTGP 655, DENTGP 660, DENTGP 662, DENTGP 663, DENTGP 664, DENTGP 670, DENTGP 672, DENTGP 673, DENTGP 674, DENTGP 680, DENTGP 682, DENTGP 683, DENTGP 684, DENTGP 685
 - a. RIDE students enroll in DENTGP 686 to replace DENTGP 682, DENTGP 683, and DENTGP 684
 - b. Research Track students enroll in a specialty-based research course in summer quarter of fourth year to replace DENTGP 652, DENTGP 653, and DENTGP 654
5. *Selective courses*: A minimum of one second year selective course must be taken during year two of the program. A minimum of one fourth year selective must be taken during year four of the program.
6. Successful completion of the Integrated National Board Dental Examination (INBDE) or National Board Dental Examination Parts I and II is required for graduation.

School Accreditation and Licensure

The program in dental education is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of "approval without reporting requirements". The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611. The Commission's web address is: www.ada.org/en/coda.

Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In the State of Washington, the requirements for dental licensure are determined by the Washington State Department of Health. Requirements

available at:

www.doh.wa.gov/LicensesPermitsandCertificates/ProfessionsNewReneworUpdate/Dentist/LicenseRequirements.

Immunization Policy

The UW Health Sciences Center requires that its students, staff, and faculty show documentation of immunization requirements in accordance with CDC guidelines for healthcare personnel and as outlined by the [Health Sciences Immunization Program](#). Exemptions are granted rarely and only in alignment with CDC recommendations.

Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs. For information about these programs, refer to the [UW degree program catalog](#).

Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the MSD programs include endodontics, oral pathology, oral medicine, oral and maxillofacial radiology, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, they may elect to pursue an MSD.

Postgraduate certificate programs are not administered by the Graduate School, and

no thesis is required. The course content may vary somewhat from the MSD program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

Residency Training

The School of Dentistry sponsors accredited Advanced Dental Education Training Programs in General Practice Residency (GPR), Oral & Maxillofacial Radiology, Oral & Maxillofacial Surgery, and Pediatric Dentistry through GME Residency positions. Prospective trainees should review the individual training programs' website for admissions and eligibility information, and the GME Prospective Resident/Fellow website for information regarding terms and conditions of employment, including but not limited to salary and fringe benefits.

Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public health research in dentistry in addition to those in oral biology. Programs vary in duration, and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, non-citizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Department of Oral Health Sciences.

The Department of Endodontics is both nationally and internationally recognized as one of the premier endodontics departments in the country, known for its exceptional quality of its predoctoral and advanced education programs. The department is blessed with dedicated and experienced faculty, both full and part-time, all of whom are committed to excellence in education, patient care, scholarly activity, and research. Faculty in the department are active in dental school and university-wide affairs as well as in the American Association of

Endodontics, the American Board of Endodontics, and the American Dental Education Association.

The mission of the Graduate Program in Oral Health Sciences is to foster academic and creative research excellence in the field of Oral Health Sciences. The program

provides advanced interdisciplinary training for graduate students to enable them to become academic and research leaders in the dental and craniofacial sciences, and to contribute to improved understanding of human oral and systemic health and disease. Major areas of study include microbiology, biochemistry, immunology, developmental biology and genetics, functional morphology and biomechanics, neurobiology, bioengineering, biomaterials, stem cell biology, dental hygiene, oral pathology and dental public health.

[Website](#)

[Faculty Website](#)

Oral Medicine is a unique discipline within dentistry that focuses on the diagnosis and non-surgical management of orofacial disease. The Department of Oral Medicine at the University of Washington strives to be a global leader in the diagnosis and management of disorders in the orofacial complex whose treatment may fall between medicine and dentistry. Training in oral medicine combines elements of both dental and medical education to enable graduates to provide holistic care for patients with orofacial disorders, oral manifestations of systemic disease, orofacial complications of

medical therapies, and other medical complexities that affect the delivery of traditional dental care.

[Website](#)

[Faculty Website](#)

The mission of the Department of Orthodontics is to train both pre-doctoral dental students and graduate students to be proficient in the clinical specialty of orthodontics, at their respective levels. The

pre-doctoral orthodontic experience includes various didactic and laboratory courses, as well as some opportunities to gain clinical experience. The graduate program consists of intensive didactic, clinical, and research components. An evidence-based approach to diagnosis and treatment planning is emphasized throughout the program, as are the highest ethical standards.

The Department of Periodontics provides didactic and clinic instruction in Periodontology at the predoctoral and postdoctoral levels. The department also provides instruction via continuing dental education courses to practicing dentists and hygienists. Training is adjusted to the level of competency of the student. Clinical areas of instruction include periodontal examination, diagnosis, treatment planning, case presentation and communication, therapies, and outcome assessments in otherwise healthy as well as medically compromised patients. Didactic areas of instruction include the normal periodontium at the macro and microscopic level, periodontal pathology including intra-oral lesions associated with periodontal conditions, periodontal microbiology and immunology, pain control and pharmacology applicable to periodontal treatments, cell biology, wound healing including periodontal regeneration, dental implantology, case management, epidemiology and statistics in Periodontology.

[Faculty Website](#)

The Department of Restorative Dentistry is responsible for teaching students how to plan to and treat damage inflicted by oral disease and trauma. The department uses an integrative approach to teach this complex, ever-changing, and exciting area of dentistry, asking students to draw on and apply their knowledge of basic and social sciences and other clinical disciplines in delivering restorative treatment. The Department of Restorative Dentistry is blessed with a talented faculty who are

wholly dedicated to these goals. Faculty seek to continually grow in their knowledge and skill as academicians, as clinicians, and as teachers. They also contribute to the dental knowledge base through research, continuing education, and publication. The faculty are internationally known for their skill as teachers and researchers, and serve numerous roles in local, state, and national organizations that promote the highest standards of dentistry and dental education.

College of Education

[Website](#) [Degree Programs](#)

The College of Education is dedicated to equity and excellence in education through preparation and renewal of education professionals, promotion of social justice, advancement of knowledge through research, and connection of research to inform policy and improve practice.

The College of Education at the UW believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

Undergraduate Programs

The College offers three programs of study: (1) Education, Communities, and Organizations; (2) Early Childhood and Family Studies; (3) Early Care and Education. For more information about these programs, refer to the [UW degree program catalog](#). In collaboration with the College of Arts and Sciences, the College also offers an undergraduate minor in [Education, Learning, and Society](#).

General Education Requirements

Each of the following undergraduate degree programs has different general education requirements. Refer to each degree program catalog listing for general education requirements.

- [Early Care and Education](#)
- [Early Childhood and Family Studies](#)
- [Education, Communities, and Organizations](#)

Graduate Programs

In its graduate programs the College has four broad curricular areas: Teaching, Learning, and Curriculum; Educational Foundations, Leadership, and Policy Studies; Learning Sciences and Human Development; and Special Education, School Psychology, and Statistics. Graduate degrees conferred include the MIT, MEd, EdS, EdD, and PhD. Certification can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology. For more information about these programs, refer to the [UW degree program catalog](#).

Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The School Psychology PhD program is accredited by the American

Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The School Psychology EdS program is also accredited by NASP and the Washington Professional Education Standards Board (PESB) for initial residency and continuing/professional certification.

Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

Program of Study: Major: Early Care and Education

Program Overview

The online Bachelor of Arts in Early Care and Education (ECE) program supports the belief that all young children, across diverse families and communities, should have equitable opportunities to learn and develop in a just and culturally-thriving society. This program seeks to transform inequitable systems that are barriers to this reality.

Focusing on young children from birth through age 8, students will be prepared to advance this mission through interdisciplinary coursework that brings together equity, child development, teaching interactions, research, advocacy, leadership, practice-based application of learning, and community-based learning with community partners. The program addresses common barriers to higher education, including affordability, access, relevance, and effectiveness. A flexible online model, real-world opportunities for applying learning, and a student-centered teaching and advising model support student success.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Early Care and Education (fee-based) (online)
- Bachelor of Arts degree with a major in Early Care and Education: Teaching and Learning (fee-based) (online) (not admitting)

Bachelor of Arts degree with a major in Early Care and Education (fee-based) (online)

Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Two-to-three page personal statement reflecting an interest in the Early Care & Education major and a commitment to learning about the field

- b. Overall academic performance reflected in copies of unofficial transcripts
 - c. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - d. Grades in any completed recommended courses and courses applied to major requirements
 - e. Completion of at least 45 transferable credits
3. Application deadlines are posted on the website. Applications may be considered after the deadline on a case-by-case basis, depending on program capacity.
 4. This is a limited admission program. Students admitted to the Early Care and Education online program are not allowed to transfer to another onsite or online major/degree program or complete a minor without reapplying to the UW through the normal admission review process.

Students accepted into the major typically have a minimum cumulative 2.00 GPA and a minimum grade of 2.0 for any prior college coursework that may be applied toward the major.

Information sessions are offered to learn more about the major and how to apply.

For more information, refer to College of Education website or inquire at 206 Miller.

Completion Requirements

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Reasoning (RSN) (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (DIV) (3 credits)

2. Areas of Inquiry
 - a. Arts & Humanities (A&H) and Natural Sciences (NSc) (30 credits, with a minimum of 10 credits in each)
 - b. Social Sciences (SSc) (30 credits)

Maximum 15 credits in ECFS-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirements.

Major Requirements

87 credits

1. *Early Care and Education Courses (87 credits)*: ECE 201, ECE 220, ECE 221, ECE 222, ECE 322, ECE 323, ECE 401, ECE 402, ECE 419, ECE 450, ECE 456; ECFS 301, ECFS 311, ECFS 312 (5), ECFS 400, ECFS 410, ECFS 411; EDPSY 305, EDPSY 406; EDSPE 304; NSG 432
2. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
3. Minimum 64 credits applied to the major taken through the UW Seattle campus

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives*: Upon successful completion of this degree, students will be able to:
 - Understand Children and Families
 - Apply neurological, behavioral, and sociocultural knowledge of developmental and family systems theories to create practical strategies that support the development of young children and families in multicultural contexts.

- Read, understand, and critically evaluate research that represents diverse family and community voices, while unpacking their identities within larger systems of power.
- Engage in family-centered practice that acknowledges the impact of biological, social, cultural, ethnic, socioeconomic, and linguistic factors on learning and development to meet the needs of students and families from diverse backgrounds.
- Engage in the process of impacting social policy and research by demonstrating a critical awareness of the assets and needs of families and communities.
- Gain pedagogical expertise
 - Demonstrate knowledge and skills needed to apply, translate, and expand upon research designs and findings to solve practical issues and advance educational equity in early childhood settings.
 - Describe factors affecting child development and recognize systemic inequities that create challenges for children and families.
 - Identify, evaluate, and create learning environments. While doing so, exhibit intergenerational interactions that support children's social relationships, emotional and behavioral health, and emotional regulation
 - Assess the form and function of children's behaviors that challenge educators and practice using data to develop behavior support plans that engage in ongoing formative assessment of children's progress.
- Enact and exhibit the use of evidence-based language and literacy practices. Recognize there are multiple ways of knowing, multilingual learners, multiple systems of mathematical/scientific thinking. Design and implement joint adult-child interactions in mathematical situations and scientific investigations, creating tasks that can enhance children's thinking and justify how these are grounded in evidence-based practices that support young children's mathematical, scientific, logical, and reasoning development.
- Become a professional in early childhood
 - Design and implement learning opportunities grounded in evidence-based practices that support young children's language and literacy, math, science, art/multi-arts and creativity, logic and reasoning, and learning and development.
 - Design learning environments that include accommodations and adaptations for young children with varying needs and abilities.
 - Demonstrate ethical and socially responsible professional characteristics and practices anchored in a culturally sustaining professional identity.
 - Discuss, apply, and teach the skills, routines, and daily habits of a resilient professional, supported through practices that are context-dependent and are culturally meaningful.

- Demonstrate learning about the selection and use of ongoing child observation and assessment to critically guide teaching and facilitate children's development and learning.
- *Community-Based Learning Experience:* A community-based learning experience emphasizes both learning and service to the community. Early childhood community-based learning experience opportunities address concerns and needs that are identified and articulated by the community of an early learning settings, such as a preschool or non-profit organization. Community-based learning experience combines these community-based service activities with structured preparation and reflection opportunities within the context of ECE courses.
- *Honors Options Available:* With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See department website for undergraduate scholarship information.
- *Student Organizations/Associations:* ECE Alumni & Student Leadership Council, Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Bachelor of Arts degree with a major in Early Care and Education: Teaching and Learning (fee-based) (online) (not admitting)

Additional Information

Formerly the College of Education offered two major options: (1) General Core and (2) Teaching and Learning. As of autumn quarter, 2020, however, those two options

have been replaced by a single major. Please refer to the [UW Seattle General Catalog Archive](#) for information about the options.

Program of Study: Major: Early Childhood and Family Studies

Program Overview

The Early Childhood and Family Studies (ECFS) major provides the opportunity to study early childhood development, early learning, and family studies from a variety of perspectives across a range of disciplines. The degree will prepare you for careers in early learning, childcare, policy, parent and family support and education, and social/mental health services. It is also a pathway to graduate studies in education, child and family studies, and other areas. The ECFS major has developed two pathways for students to pursue in their degree program. The first pathway, ECFS Core, allows for the flexibility of integrating other areas of interest with the coursework in child development and family studies. The second pathway, the Teaching and Learning Option, is intended for students who wish to pursue a teaching position in preschools and other childhood settings or for those who plan to apply to a master's in teaching or other teacher certification programs.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Early Childhood and Family Studies
- Bachelor of Arts degree with a major in Early Childhood and Family Studies: Teaching and Learning

Admission Requirements

1. Satisfactory progress toward completion of general education requirements
2. Admission is capacity constrained, based on the following criteria. Completion of requirements does not guarantee admission.
 - a. Minimum 2.0 grade in ECFS 200
 - b. Minimum 2.0 grade in English composition
 - c. Two-to-three page personal statement reflecting an interest in the early childhood and family studies major and a commitment to learning about the field
 - d. Overall academic performance reflected in copies of unofficial transcripts
 - e. Other evidence of interest in and commitment to the field (e.g., work experience, volunteer experience, or internships)
 - f. Grades in any completed recommended courses and courses applied to major requirements
3. Applications due October 15 for winter quarter start and April 15 for autumn quarter start. For current UW students, notification is sent two weeks later; for transfer students, notification is sent after applicants are admitted to the UW. Transfer students who have not completed ECFS 200 prior to admission must complete this course after matriculation to UW. Applications may be considered after the dates above on a case-by-case basis, depending on program capacity.

Students accepted typically have a minimum cumulative 2.50 GPA and a minimum grade of 2.0 for any prior college coursework that can be applied toward the major.

Information sessions are offered to learn more about the major and how to apply.

For more information, refer to College of Education website or inquire at 206 Miller.

Bachelor of Arts degree with a major in Early Childhood and Family Studies

Credential Overview

The Bachelor of Arts with a major in Early Childhood and Family Studies (ECFS) on-campus Core pathway allows for the flexibility of integrating other areas of interest with coursework in child development and family studies. Students in the major represent interests in a wide range of professions that include early childhood education, child development, family & community support, policy and advocacy, health related professions, and the pursuit of research activities related to the science of early learning and policy development. Many of these interests benefit from a double major (for example, ECFS and Public Health, Psychology, Social Work, Economics, American Ethnic Studies, Speech & Hearing Sciences, Political Science, and Communication) or by combining the ECFS major with a minor such as Diversity, Nutrition, Global Health, or a foreign language. In addition, many students earn course credits for admission requirements to Medical and/or Graduate School.

Completion Requirements

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Reasoning (RSN) (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (DIV) (3 credits)

2. Areas of Inquiry
 - a. Arts & Humanities (A&H) (15 credits)
 - b. Social Sciences (SSc) (15 credits)
 - c. Natural Sciences (NSc) (15 credits)
 - d. Areas of Inquiry (15 additional credits from any area)

Maximum 15 credits in ECFS-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirements.

Major Requirements

74-86 credits

1. *Early Childhood and Family Studies Core Courses (39 credits):*
 - a. Minimum 2.0 grade in ECFS 200
 - b. ECFS 303 (3), ECFS 311, ECFS 401, ECFS 402; EDPSY 302, EDPSY 406; EDUC 251; NSG 432
2. Additional requirements specified below
3. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
4. Minimum 40 credits applied to the major taken through the UW

Additional Completion Requirements

35-47 credits

1. One of ECFS 315, ECFS 320, or ECFS 419 (5 credits)
2. One of EDSPE 304, EDSPE 414, EDSPE 427, or EDSPE 435 (3-5 credits)
3. ECFS 403
4. *Electives:* see website for approved list of College of Education courses (25 credits)

Bachelor of Arts degree with a major in Early Childhood and Family Studies: Teaching and Learning

Credential Overview

The Bachelor of Arts with a major in Early Childhood and Family Studies, Teaching and Learning on-campus pathway is intended for students who are interested in working in early learning settings, or for those who plan to apply to a master's in teaching or other teaching certification programs. Current city, state, and national policy efforts are focused on equitable access to high quality early learning programs. Part of the measure of quality is having professionals prepared in content areas and pedagogical approaches to early childhood education. Courses include Language & Literacy, Mathematics, Science, Positive Behavioral Support, Engaging Interactions & Environments, and Individualized Instruction. You will also participate in service learning alongside teachers in preschool classrooms or childcare centers each quarter during your junior and senior years.

Completion Requirements

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Reasoning (RSN) (5 credits)
 - c. Writing Courses (10 credits)
 - d. Diversity Course (DIV) (3 credits)
2. Areas of Inquiry
 - a. Arts & Humanities (A&H) (15 credits)
 - b. Social Sciences (SSc) (15 credits)
 - c. Natural Sciences (NSc) (15 credits)
 - d. Areas of Inquiry (15 additional credits from any area)

Maximum 15 credits in ECFS-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirements.

Major Requirements

74-86 credits

1. *Early Childhood and Family Studies Core Courses (39 credits):*
 - a. Minimum 2.0 grade in ECFS 200
 - b. ECFS 303 (3), ECFS 311, ECFS 401, ECFS 402; EDPSY 302, EDPSY 406; EDUC 251; NSG 432
2. Additional requirements specified below
3. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
4. Minimum 40 credits applied to the major taken through the UW

Additional Completion Requirements

Option specific credits (45-47 credits):

1. One of ECFS 315, ECFS 320, or ECFS 419 (5 credits)
2. One of EDSPE 304, EDSPE 414, EDSPE 427, or EDSPE 435 (3-5 credits)
3. ECFS 301, ECFS 312 (3), ECFS 321, ECFS 400, ECFS 410, ECFS 411, ECFS 454, ECFS 455, ECFS 456; EDUC 170 (37 credits)

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives:* The early childhood and family studies major immerses students in the study of child and family development and education. Students learn about child development, early learning, and family studies from a variety of perspectives. They receive a

strong grounding in reading and understanding the theory and evidence that provide the foundation for the field and drive current research and policy efforts.

- *Expected Outcomes:* Students apply their knowledge and skill as they work alongside community-based teachers, community leaders, and care providers. The degree provides preparation for a wide variety of careers in early learning, childcare, parent and family support and education, child and community advocacy and organization, and social and mental health services. It also serves as a pathway for graduate studies in education, child and family studies, educational policy, special education, and other areas.
- *Service Learning and Research:* Two sequences of field-based experiences provide students with real life-learning opportunities in community-based early childhood or family support/education settings. Students participate in both an introductory seminar experience as well as a sequenced field experience during their first year in service learning. In the Teaching and Learning option, students participate in a three-quarter senior service learning, research, and senior project that provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs, and/or research settings. The seminar ties together research and practice, demonstrating how research informs evidence-based decision-making in programs and services. Students also receive guidance in career options and current events in the field, tying in major experiences with their own developmental and career goals. Learning objectives are outlined in class.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See department website for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International Educators of the College of Education (IECE).

Program of Study: Major: Education, Communities and Organizations

Program Overview

The Bachelor of Arts in Education, Communities and Organizations major provides students with a solid foundation in learning theory, human development, equity studies, organizational theory and community-based research and practice. Through elective courses, students will build on this knowledge to explore diverse areas of study. All students complete a community-based capstone internship.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Education, Communities and Organizations

Admission Requirements

Admission is capacity constrained. Completion of requirements does not guarantee admission.

1. Satisfactory progress toward completion of general education requirements; minimum 45 credits
2. Minimum 2.50 cumulative GPA
3. Minimum 2.5 grade in English composition course
4. Minimum 2.0 grade in EDUC 280
5. Submission of a personal statement indicating interest in the major
6. Application deadlines: April 15 for autumn admission; October 15 for winter admission. Depending on program capacity, applications may be considered after the deadlines.

Information sessions are offered to learn more about the major and how to apply.

Refer to College of Education website for more information.

Bachelor of Arts degree with a major in Education, Communities and Organizations

Credential Overview

The Bachelor of Arts in Education, Communities and Organizations major provides students with a solid foundation in learning theory, human development, equity studies, organizational theory and community-based research and practice. Through elective courses, students will build on this knowledge to explore diverse areas of study. All students complete a community-based capstone internship.

Completion Requirements

General Education Requirements

1. Language and Reasoning Skills
 - a. English Composition (5 credits)
 - b. Reasoning (RSN) (5 credits)
 - c. Writing Courses (10 credits)

- d. Diversity Course (DIV) (3 credits)
- 2. Areas of Inquiry
 - a. Arts & Humanities (A&H) (15 credits)
 - b. Social Sciences (SSc) (15 credits)
 - c. Natural Sciences (NSc) (15 credits)
 - d. Areas of Inquiry (15 additional credits from any area)

Major Requirements

68 credits

1. Minimum 2.0 grade in EDUC 280 (3 credits)
2. Core Courses (25 credits): EDUC 251, EDUC 370; one from EDPSY 302, EDPSY 380, EDPSY 404 (depending on life-span emphasis – child, adolescent, or adult development); EDUC 472, EDUC 473
3. Concentration Electives (25 credits): See adviser for current list
4. Major Capstone Courses (15 credits minimum): EDUC 481, EDUC 482, EDUC 483
5. Minimum 2.00 cumulative GPA in courses used to satisfy major requirements
6. Minimum 45 credits applied to the major taken through the UW

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives:* The student will be able to:
 - Support learning of others across a diverse society
 - Understand that development and learning happen in context and how to enter and engage with different contexts
 - Understand the structure, assets, and values of belonging and contributing

- to institutions, organizations, and communities
- Represent themselves, their stories, and their ideas orally, in writing, and in action
- Continuously self-reflect on their own positionality to engage respectfully with people who have the same and different identities, beliefs, experiences, and ideas
- Seek out learning and constructive feedback with an open mind
- Commit to the wholeness and wellness of all, especially those who have historically and continue to be targeted and marginalized
- *Service Learning and Research:* Community engagement is an integral part of the student experience. Students complete three hours per week of service learning with a community-based organization or school when they take EDUC 280 Introduction to Education, Communities, and Organizations. In their final year of the program all students complete a three-quarter internship working with a community-based organization or school. Students collaborate with their site supervisor and mentor to develop an internship project that both supports the work of the partner organization and furthers the student's learning objectives.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Department Scholarships:* See department website for undergraduate scholarship information.
- *Student Organizations/Associations:* Associated Students of the College of Education (ASCE) and International

Educators of the College of Education (IECE).

Program of Study: Master of Education (Curriculum and Instruction)

Program Overview

Explore the interaction of teaching, learning and curriculum through the UW's nationally-ranked graduate programs in education. With a shared commitment to equity, democracy and justice in education and society, we employ diverse disciplinary, theoretical and methodological approaches to the teaching and learning of powerful knowledge. Students and faculty partner with communities, educators and youth to engage in research throughout the Puget Sound and beyond. Together, we reimagine, implement and study approaches to curriculum and instruction, moving the field toward more equitable outcomes for youth and their communities. Our graduates pursue work in a range of public and private settings as educators, instructional leaders, curriculum developers and researchers.

This program of study leads to the following credentials:

- Master of Education (Curriculum and Instruction): Language, Literacy, and Culture
- Master of Education (Curriculum and Instruction): Mathematics Education

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Curriculum and Instruction program range between 45-48 credits. All credentials feature coursework in Foundations of Education, an area of specialization, a supporting area of study, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: this credential requires a total of 45 credits.

1. *Foundations of education (10 credits):*
 - a. EDC&I 503
 - b. EDPSY 501
 - c. EDLPS 520 or EDLPS 521 or EDLPS 530
2. *Area of specialization (9 credits):* EDC&I coursework at the 400-level and above. Course choices negotiated with adviser.
3. *Research inquiry (3 credits):* 500-level coursework from a list maintained by the program.
4. *Elective coursework (to meet required credit total):* Additional credit 400-level

or above. Course choices negotiated with adviser.

Master of Education (Curriculum and Instruction): Mathematics Education

Completion Requirements

Credentials in the overarching Curriculum and Instruction program range between 45-48 credits. All credentials feature coursework in Foundations of Education, an area of specialization, a supporting area of study, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: this credential requires a total of 45 credits.

1. *Area of Specialization (15 credits)*: EDC&I coursework at the 400-level and above. Course choices negotiated with adviser.
2. *Elective coursework (to meet required credit total)*: Additional credit 400-level or above. Course choices negotiated with adviser.

Master of Education (Curriculum and Instruction: Instructional Leadership)

Credential Overview

This unique masters degree prepares teachers for emerging and critical leadership positions in school and district settings. The degree serves teachers and coaches who want advanced knowledge of leadership and classroom practice, but do not currently aspire to become principals or administrators. Exercising equity-driven leadership, our graduates support and foster the professional development for teachers that can lead to improved student outcomes.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Curriculum and Instruction program range between 45-48 credits. All credentials feature coursework in Foundations of Education, an area of specialization, a supporting area of study, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 45 credits.

1. *Foundations of education (10 credits)*: EDC&I 503, EDLPS 520, EDPSY 501
2. *Area of specialization (15 credits)*: EDC&I 505, EDC&I 525, EDC&I 526, EDC&I 579, EDC&I 553
3. *Research inquiry (3 credits)*: 500-level coursework from a list maintained by the program.

4. *Culminating experience (8 credits):*
EDC&I 600
5. *Elective coursework (to meet required credit total):* 400-level or above courses in EDUC/EDLPS/EDC&I/EDPSY/EDSPE

Program of Study: Master of Education (Educational Leadership and Policy Studies)

Program Overview

Programs in the area of Educational Foundations, Leadership, and Policy inform and promote the transformation of education both within and beyond P-12 schools and postsecondary institutions, with the ultimate goal of creating powerful and equitable learning for all. We bring multiple disciplines, analytical tools, and bodies of knowledge to our work, including history, political science, economics, organizational studies, philosophy, and sociology; as well as the wisdom of applied practice in the fields of community organization, public/nonprofit leadership, and education, policy design, implementation, and evaluation.

This program of study leads to the following credentials:

- Master of Education (Educational Leadership and Policy Studies): Social and Cultural Foundations
- Master of Education (Educational Leadership and Policy Studies: Education Policy Cohort) (fee-based)
- Master of Education (Educational Leadership and Policy Studies: Intercollegiate Athletics Leadership) (fee-based)

Admission Requirements

Each credential in the overarching Educational Leadership and Policy studies program has its own admissions. Please see additional admission requirements section below.

Master of Education (Educational Leadership and Policy Studies): Danforth Principal Preparation Program (fee-based)

Credential Overview

A cohort-based program that prepares future leaders for initial principal and program administrator certification.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain core coursework in Educational Leadership and Policy Studies, elective coursework determined in consultation with an adviser, and a culminating experience. See additional

requirements section below for credential-specific requirements.

Additional Completion Requirements

45 credits

1. *Required Courses (27 credits):* EDLPS 501 (6 credits), EDLPS 502 (6 credits), EDLPS 503 (6 credits), EDLPS 504 (6 credits), EDLPS 505 (3 credits)
2. *Additional Coursework (to meet required credit total):* 400-level or above coursework in EDLPS/EDC&I/EDPSY/EDSPE/EDUC
3. *Internship:* See program website for details.

Master of Education (Educational Leadership and Policy Studies): Education Policy

Credential Overview

Learn about and improve the research and practice of education policy, organizations and leadership. Students learn to use rigorous and innovative research methods and develop strategic partnerships with educational practitioners and policymakers at multiple systems levels to realize systemic and continuous improvement of equity and excellence in education.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain core coursework in Educational Leadership and Policy Studies, elective coursework

determined in consultation with an adviser, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

45 credits

1. *Required Courses (10 credits):* EDLPS 565, EDLPS 560, EDLPS 550
2. *Foundation Course (3 credits):* 500-level EDLPS coursework, list maintained by the program
3. *Additional EDLPS Coursework (5 credits):* 400-level and above EDLPS coursework
4. *Additional Elective Coursework (to meet required credit total):* 400-level or above coursework, list maintained by the program.

Master of Education (Educational Leadership and Policy Studies): Higher Education

Credential Overview

A cohort-based program that prepares individuals for leadership roles at community colleges, universities and nonprofit organizations.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain core coursework in Educational Leadership and Policy Studies, elective coursework determined in consultation with an adviser,

and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

46 credits

1. *Required Higher Education Core (30 credits)*: EDLPS 563, EDLPS 580, EDLPS 586, EDLPS 588, EDLPS 590 (4 credits), EDLPS 594, EDLPS 598 (7 credits total over 3 quarters)
2. *Required Research Methods (7 credits)*: EDLPS 596 (4 credits), EDLPS 593
3. *Additional EDLPS Coursework (3 credits)*: Coursework in EDLPS at 400-level or above.
4. *Required Non-Thesis Internship (6 credits)*: EDLPS 601

Master of Education (Educational Leadership and Policy Studies): Social and Cultural Foundations

Credential Overview

Address fundamental questions about the meaning, purpose and significance of education in society. Students explore education from the perspective of the humanities and liberal arts, as well as from the perspectives of different stakeholders in society, using tools of analysis based in history and philosophy.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain

core coursework in Educational Leadership and Policy Studies, elective coursework determined in consultation with an adviser, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

45 credits

1. *Required Courses (12 credits)*: EDLPS 520, EDLPS 521, EDLPS 530 and at least one additional 500-level EDLPS course from a list maintained by the program
2. *Research Inquiry (6 credits)*: EDPSY 490 and at least one additional course from a list maintained by the program
3. *Additional Elective Coursework (to meet required credit total)*: Coursework at 400-level or above selected in consultation with adviser.
4. *Thesis (9 credits)*: EDUC 700

Master of Education (Educational Leadership and Policy Studies: Education Policy Cohort) (fee-based)

Credential Overview

An 11-month, cohort-based program designed to prepare students for leadership positions working in education policy within schools/districts, government, philanthropy, advocacy/non-profit and post-secondary education.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain core coursework in Educational Leadership and Policy Studies, elective coursework determined in consultation with an adviser, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

44 credits

1. *Core Requirements (19 credits):*
 - a. EDLPS 510, EDLPS 560, EDLPS 568, EDLPS 575,
 - b. Two additional policy electives, 400-level or above
2. *Supporting Coursework (6 credits):*
EDLPS 579 (6 credits)
3. *Methodological Foundations for Data Literacy and Use in Education Policy Systems (6 credits):*
 - a. EDLPS 549 (3 credits) or EDPSY 490
 - b. One additional methodological elective, 400-level or above
4. *Project or Internship (13 credits):*
EDLPS 599 (10 credits), EDLPS 601 (3 credits)

Master of Education (Educational Leadership and Policy Studies: Intercollegiate Athletics Leadership) (fee-based)

Credential Overview

A cohort-based program that prepares future leaders in administrative and coaching roles within collegiate athletic departments.

Additional Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Educational Leadership and Policy Studies program range between 44-48 credits. All contain core coursework in Educational Leadership and Policy Studies, elective coursework determined in consultation with an adviser, and a culminating experience. See additional requirements section below for credential-specific requirements.

Additional Completion Requirements

48 credits

1. *Required Courses (24 credits):*
 - a. Research/Inquiry: EDLPS 506
 - b. Social and Cultural Foundations: EDLPS 520, EDLPS 540
 - c. Organizations and Policy: EDLPS 515, EDLPS 583
 - d. EDLPS 586
 - e. Breadth: ACCTG 560, IMT 525
2. *Internship (9 credits):* EDLPS 601
3. *Electives (15 credits):* Graduate coursework in Education; elective course list maintained by the program.

Program of Study: Master of Education (Learning Sciences and Human Development)

This program of study leads to the following credential:

- Master of Education (Learning Sciences and Human Development)

Admission Requirements

Contact department for requirements.

Master of Education (Learning Sciences and Human Development)

Completion Requirements

Contact department for requirements.

Program of Study: Master of Education (Measurement and Statistics)

Program Overview

The UW COE Measurement & Statistics (M&S) graduate program, which began in the late 1960s, prepares students to become leaders in the research and practice of cutting-edge psychometrics and applied statistical modeling. Our collective expertise focuses on latent variable models and related quantitative methods, with a common mission to improve educational equity and quality.

This program of study leads to the following credential:

- Master of Education (Measurement and Statistics)

Admission Requirements

See this program's [Graduate Admissions page](#) for current requirements.

Master of Education (Measurement and Statistics)

Completion Requirements

45 credits

1. *Foundational Courses in Education (15 credits)*: Each of the following:
 - a. One course in Educational History or Philosophy, course list maintained by the program.
 - b. EDPSY 501
 - c. EDPSY 490
 - d. EDPSY 538
 - e. EDPSY 539
2. *Area of Specialization: Measurement & Statistics (13 credits)*: Each of the following:
 - a. EDPSY 591
 - b. At least one quarter participation in EDPSY 598 seminar
 - c. At least one advanced course in measurement theory. Course list maintained by the program.
 - d. EDPSY 575 or EDPSY 576
 - e. At least one advanced course in statistical modeling. Course list maintained by the program.
3. *Cognate in Education or Closely Related Field (6 credits)*: At least two courses outside area of specialization, preferably at 500-level or above.
4. *Master's Thesis (9 credits)*: EDUC 700
5. Additional elective credits as needed to meet required credit total, preferably at 500-level or above.

Program of Study: Master of Education (Special Education)

Program Overview

Working hand-in-hand with the UW College of Education's nationally-recognized faculty, our students develop the expertise to improve the lives and outcomes of students from birth through adulthood. With a shared commitment to making an excellent education a reality of all learners, our programs include a focus on applying current research knowledge and theory to educational services. Our graduates pursue work in a range of public and private settings as educators, school psychologists and researchers.

This program of study leads to the following credentials:

- Master of Education (Special Education): Applied Behavior Analysis
- Master of Education (Special Education): Applied Behavior Analysis (online) (fee-based)
- Master of Education (Special Education): Early Childhood
- Master of Education (Special Education): High Incidence Special Education
- Master of Education (Special Education): Severe Special Education
- Master of Education (Special Education): Special Education

Admission Requirements

Each credential in this program has a unique application for admission. See additional admission requirements section below for credential-specific information.

Master of Education (Special Education): Applied Behavior Analysis

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 61 credits.

1. *Required Courses (46 credits):* EDSPE 511, EDSPE 525, EDSPE 529, EDSPE 531, EDSPE 533, EDSPE 534, EDSPE 535, EDSPE 536, EDSPE 537, EDSPE 539, EDSPE 549, EDSPE 552, EDSPE 553, EDSPE 554, EDSPE 563, EDSPE 571
2. *Capstone (15 credits):* EDSPE 500
3. *Master's Examination*

Master of Education (Special Education): Applied Behavior Analysis (online) (fee-based)

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 45 credits.

1. *Required courses:* EDSPE 511, EDSPE 525, EDSPE 529, EDSPE 531, EDSPE 533, EDSPE 534, EDSPE 535, EDSPE 536, EDSPE 537, EDSPE 552, EDSPE 553, EDSPE 554, EDSPE 571, EDSPE 600 (4 credits)
2. *Master's Examination*

Master of Education (Special Education): Early Childhood

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 45 credits.

1. *Required Courses:* EDSPE 501, EDSPE 513, EDSPE 527, EDSPE 531, EDSPE 532, EDSPE 563, EDC&I 507
2. *Special Assignments in Special Education (e.g. practicum, internship) (9 credits):* Course list maintained by the program.
3. *Elective coursework (to meet required credit total):* Additional credit 400-level or above, courses selected in consultation with adviser.

Master of Education (Special Education): High Incidence Special Education

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 45 credits.

1. *Required Courses:* EDSPE 513, EDSPE 527, EDSPE 531, EDSPE 532, EDSPE 563, EDC&I 507

2. *Special Assignments in Special Education (e.g. practicum, internship) (12 credits)*: Course list maintained by the program.
3. *Elective coursework (to meet required credit total)*: Additional credit 400-level or above, courses selected in consultation with adviser.

Master of Education (Special Education): Severe Special Education

Additional Admission Requirements

See this credential's [Graduate Admissions page](#) for current requirements.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

Additional Completion Requirements

Credential-specific requirements: This credential requires a total of 45 credits.

1. *Required Courses*: EDSPE 501, EDSPE 513, EDSPE 527, EDSPE 531, EDSPE 532, EDSPE 563, EDC&I 507
2. *Special Assignments in Special Education (e.g. practicum, internship) (9 credits)*: Course list maintained by the program.
3. *Elective coursework (to meet required credit total)*: Additional credit 400-level or above, courses selected in consultation with adviser.

Completion Requirements

Credentials in the overarching Special Education program range from 45 to 61 total credits. All credentials include primarily 500-level EDSPE courses, which vary by specialization area, as well as a culminating experience. See additional completion requirements section below for credential-specific requirements.

College of Engineering

[Website](#)

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

Most degree programs are offered by engineering departments. The College of Engineering offers interdisciplinary programs at the undergraduate and master's level for students whose desired course of study does not fall within one engineering department.

Undergraduate Programs

The College of Engineering and its departments provide undergraduate programs that offer a variety of educational experiences to its students. The College offers established departmental degrees as well as interdisciplinary programs that culminate in a major and meaningful design experience. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Admission

Students follow one of three pathways to gain admission:

1. **Direct-to-College:** Freshman applicants indicate an engineering major as their first-choice on the University application. Students admitted through this pathway enter the UW with Engineering Undeclared status and usually place into an engineering major after completing freshman-level requirements. A majority of engineering students enter majors through this pathway. Computer Engineering is not part of Direct-to-College. Students who select Computer Engineering as their first choice major on their UW application will instead be considered for Direct Placement into the Paul G. Allen School of Computer Science and Engineering Program.
2. **Transfer Students:** Transfer applicants apply to the UW by the published deadline. They also submit an application to one or more engineering majors. Quarters of admission vary by

department. Admission is capacity constrained. See department websites for course requirements.

3. **Other Enrolled UW Students:** Those not admitted through the Direct-to-College pathway may also apply for admission to engineering majors. Admission through this pathway is limited and is capacity constrained. See department websites for course requirements.

Direct-to-College Admission

Freshmen admitted to the UW who indicate an engineering major as their preferred choice and who are admitted Direct-to-College enter the UW with Engineering Undeclared status and must complete requirements prior to requesting placement into a specific engineering major. This is the standard admission pathway for engineering students entering the UW as freshmen. The deadline to submit a request for placement in an engineering major occurs annually on July 1. Computer Engineering is not part of Direct-to-College. Students who select Computer Engineering as their first choice major on their UW application will instead be considered for Direct Placement into the Paul G. Allen School of Computer Science and Engineering Program.

Students submit a ranked list of majors along with supporting materials. Since some majors are not able to take all students who request admission, students must identify alternative majors to ensure placement.

Capacity-constrained departments review students' academic records and supporting materials to determine priority for admission. Department priority and student department ranking are both used to determine final placement.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students to support completion of placement requirements and degree course planning or advising on alternate major options outside of engineering.

Engineering Undeclared Placement Requirements

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering. Students requesting placement to Chemical Engineering must take CHEM 152 (or CHEM 153 or CHEM 155) from this list and they are also strongly encouraged to take CHEM 162 (or CHEM 165). Students requesting placement to Industrial Engineering must take AMATH 301, CSE 142, or CSE 160 from this list.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements

9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Continuation Policy for Engineering Undeclared Students

While the University has general regulations governing scholastic eligibility for continuation, the College of Engineering and the engineering departments have additional requirements in order to make the best use of limited facilities and resources. Criteria and procedures applied to Engineering Undeclared students for continuation in the College include:

1. Complete at least one required mathematics, science, computer programming, or engineering course at the UW each quarter. See College for approved list.
2. Maintain minimum 2.50 GPA across mathematics, science, English composition, computer programming, and engineering courses completed after matriculation at the UW. See College for list of courses that apply
3. Request placement by July 1 after matriculation at the UW.

Placement Policy

1. Eligible students will request placement into a major after completion of three quarters at the UW. See placement requirements to determine eligibility.
2. Students may only participate in placement once and placement is final.
3. Students who meet the continuation policy but who have not completed the placement requirements by July 1 may request placement into a major on a conditional basis pending completion of the placement requirements. If

remaining placement requirements are not met by the end of the 6th quarter at the UW (not including summer) students will be dropped from Engineering Undeclared status and transitioned to pre-major status.

4. Students who do not request placement after three quarters at the UW will be dropped from Engineering Undeclared status and transitioned to pre-major status.

Review and Notification of Progress

Student progress is reviewed each quarter. Students whose performance fails to meet the standards outlined above will be placed on Engineering Undeclared warning. Students on warning who fail to meet satisfactory progress requirements after one quarter will be placed on probation; a hold is placed on their registration, and they must meet with a College of Engineering adviser. Students on Engineering Undeclared probation who fail to meet satisfactory progress requirements after one quarter are dropped from Engineering Undeclared status. Such students may appeal for continuation of their Engineering Undeclared status by submitting a statement and an educational plan by the deadlines described on the website. Students may only appeal for continuation of their Engineering Undeclared status one time.

Engineering Undeclared Leave of Absence Policy

Students who need to take time away from the UW can request a Leave of Absence from the College of Engineering to maintain their Engineering Undeclared status for one to three quarters (not including summer). Leave of Absence requests must be submitted to Engineering Advising. If approved, students will maintain their

Engineering Undeclared program status upon their return.

College Policy on Double Degrees

Students may earn only one undergraduate degree from the College of Engineering; this includes degrees in aeronautical and astronautical engineering, bioengineering, chemical engineering, civil engineering, computer engineering, electrical engineering, environmental engineering, human centered design and engineering, industrial engineering, materials science and engineering, and mechanical engineering. Additionally, students majoring in computer engineering may not earn a double degree with computer science. Individual units within the College may adopt more restrictive policies relating to double degrees.

The STARS Program

The Washington State Academic RedShirt (STARS) program targets applicants who show promise of success in engineering but who will benefit from additional preparation for the demands of an engineering curriculum. Applicants considered for the STARS program will be from economically and educationally disadvantaged backgrounds as indicated by factors such as a high level of financial need, attendance at a high school with a high percentage of students receiving free or reduced-price lunch and status as a first-generation college student. The STARS program provides a specialized two-year curriculum, a supportive community, and comprehensive and individualized academic advising that lead to guaranteed placement into an engineering or computer science major. For information about the application process and program requirements please visit www.engr.washington.edu/stars.

General Education Requirements

All undergraduate degree programs in the College of Engineering require students to complete general education requirements.

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: refer to degree requirements for specific course(s)
2. *Reasoning (RSN) (5 credits)* : met by program requirements
3. *Diversity (DIV) (3 credits)* : courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (73-94 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24-30 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. 4-10 additional credits in A&H or SSc to bring total to required minimum for specific degree
2. *Natural Sciences (NSc) (49-70 credits)*
 - a. Mathematics: refer to degree requirements for specific courses
 - b. Sciences: refer to degree requirements for specific courses
 - c. Additional NSc credits as necessary to bring total to required minimum for specific degree

Program of Study: Major: Interdisciplinary Engineering

Program Overview

The Interdisciplinary Engineering Program is intended for students whose desired course of study does not fall within one of the established engineering departments. An interdisciplinary degree combines coursework from at least two departments or schools, with at least one from the College of Engineering, to allow students to create an individualized program of study not available through standard engineering degrees. Two undergraduate interdisciplinary degrees are available: a Bachelor of Science (BS) and a Bachelor of Science in Engineering (BSE). Unlike most other engineering degrees, the interdisciplinary BS and BSE degrees are not accredited by ABET.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Engineering
- Bachelor of Science in Engineering degree

Bachelor of Science degree with a major in Engineering

Credential Overview

The BS degree is suitable for students interested in taking non-STEM courses as part of their individualized degree plan. The BS degree requires fewer upper-division engineering and math/science credits than the BSE degree and therefore provides more flexibility in course selection during the junior and senior years to take non-STEM courses.

Admission Requirements

For detailed requirements, contact College of Engineering Academic Affairs at coeacaff@uw.edu.

Completion Requirements

For detailed requirements, contact College of Engineering Academic Affairs at coeacaff@uw.edu.

Bachelor of Science in Engineering degree

Credential Overview

The BSE degree is suitable for students interested in taking courses from multiple engineering departments or other STEM departments as part of their individualized degree plan.

Admission Requirements

Admission to this program (usually after completion of 90 credits) is competitive with a minimum 2.80 GPA in technical courses required for entry. For detailed requirements, contact College of Engineering Academic Affairs at coeacaff@uw.edu.

Completion Requirements

A minimum of 75 credits must be completed after entering the program before a BSE degree is awarded. Detailed information regarding the BSE degree can be obtained from an adviser in Student Academic Services. For detailed requirements, contact College of Engineering Academic Affairs at coeacaff@uw.edu.

ugadvising@aa.washington.edu

Program of Study: Major: Aeronautics and Astronautics

Program Overview

The Bachelor of Science in Aeronautical & Astronautical Engineering (BSAAE) provides students with a thorough understanding of how to design, develop, test, and build aircraft, rockets, spacecraft,

and satellites. Aerospace technology also has “earthbound” applications like making race cars more aerodynamic or designing autonomous underwater vehicles. The BSAAE degree provides a solid foundation in engineering fundamentals, lab work, and project experience with a real-world focus on teamwork, problem solving, leadership, and creativity.

This program of study leads to the following credential:

- Bachelor of Science in Aeronautical and Astronautical Engineering degree

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity-constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), CHEM 142 (or CHEM 143

or CHEM 145), PHYS 121, PHYS 122 (or PHYS 141, PHYS 142), A A 210, 5 credits English composition completed prior to application deadline. MATH 207 (unless MATH 135 was completed), MATH 208 (unless MATH 136 was completed), MATH 224, PHYS 123 (or PHYS 143), A A 260, CEE 220, ME 230, and AMATH 301 completed with a minimum 2.0 grades prior to autumn quarter.

3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, please contact the departmental adviser or see department website for more details.

Bachelor of Science in Aeronautical and Astronautical Engineering degree

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: 7 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: may also apply to an Areas of Inquiry requirement

Areas of Knowledge (73 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24
2. *Natural Sciences (NSc) (49 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208, MATH 224
 - ii. MATH 134, MATH 135, MATH 136, MATH 224
 - b. Sciences (20-21 credits): CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122, PHYS 123, (or PHYS 141, PHYS 142, PHYS 143)
 - c. Additional Natural Science courses (4-11 credits) to reach 49 credits (consult department for list of approved courses)

Major Requirements

89 credits

1. *Engineering Fundamentals (16 credits)*: A A 210, A A 260, CEE 220, M E 230.

2. *Departmental Core (73 credits):* A A 301, A A 302, A A 310, A A 311, A A 312, A A 320, A A 321, A A 322, A A 331, A A 332, A A 395; either A A 410 and A A 411 or A A 420 and A A 421; A A 447, A A 460, AMATH 301; 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
3. Minimum 1.7 grade in each 300- and 400-level A A course applied to major requirements
4. Minimum 2.00 cumulative GPA for courses applied to major requirements

Free Electives to reach 180

Program of Study: Minor: Aeronautics and Astronautics

Program Overview

The minor in Aeronautics & Astronautics provides opportunities to STEM students who want to learn about aerospace design, constraints, criteria, analysis, and synthesis. The A&A Minor helps students prepare for diverse career paths by strengthening problem solving skills and the ability to contribute in multidisciplinary team environments.

This program of study leads to the following credential:

- Minor in Aeronautics and Astronautics

Minor in Aeronautics and Astronautics

Completion Requirements

Minimum 32 credits to include:

1. *Core (24 credits):* A A 210; A A 260; A A 310; A A 311; CEE 220; M E 230
2. *Electives (minimum 8 credits):* Selected from an approved list of upper-division electives. Minimum one course taken at the 400 level. See adviser for approved list.
3. Minimum 16 credits taken in residence through the UW
4. Minimum 16 credits taken within the Aeronautics and Astronautics Department
5. Minimum 2.00 cumulative GPA in courses applied to the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronautics, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that

helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

- *Instructional and Research Facilities:* Visit the department web page to view current research activities. Undergraduates are encouraged to participate in research activities.
- *Honors Options Available:* With College Honors (completion of Honors core curriculum and Departmental Honors requirements). With Honors (completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.
- *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.
- *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

gradadvising@aa.washington.edu

Program of Study: Doctor of Philosophy (Aeronautics and Astronautics)

Program Overview

The Doctor of Philosophy (PhD) is a research-based engineering degree that prepares students to conduct advanced,

original research and to fill leadership roles in academia, industry, and research institutions specializing in aeronautics and astronautics. Expected Time to Degree: 4-6 years

This program of study leads to the following credentials:

- Doctor of Philosophy (Aeronautics and Astronautics and Astrobiology)
- Doctor of Philosophy (Aeronautics and Astronautics)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Aeronautics and Astronautics and Astrobiology)

Completion Requirements

90 credits

For students who are admitted after completing a bachelor's degree:

1. *Graduate Fundamentals (36 credits):*
 - a. Three Analytical Courses: 500-599 - level coursework in AMATH
 - b. Five Core Courses: 500-599-level coursework in A A department
 - c. Two Breadth Courses: 500-500-level coursework in A A department
2. *Qualifying Exam*
3. *Doctoral Coursework (9 credits):* selected in consultation with faculty supervisor
4. *General Exam*
5. *Dissertation*
 - a. A A 800 (minimum 27 credits)
 - b. Final Exam
6. *Additional coursework as needed to reach required total credits*

For students who are admitted after completing a relevant master's degree and who are explicitly granted "post-master" status:

1. *Graduate Residency Credits (minimum 9 credits)*: selected in consultation with faculty supervisor.
2. *Qualifying Exam*
3. *Doctoral Coursework (minimum 9 credits)*: selected in consultation with faculty supervisor.
4. *General Exam*
5. *Dissertation*
 - a. *A A 800 (minimum 27 credits)*
 - b. Final Exam

Additional Completion Requirements

Additional option-specific requirements:

Astrobiology Requirements: ASTBIO 501, ASTBIO 502, ASTBIO 550, ASTBIO 575 (2x 1 credit), ASTBIO 576 (2x 1 credit), ASTBIO 600 (3 credits, minimum), Electives Cognate Course outside the Aeronautics & Astronautics Department

Doctor of Philosophy (Aeronautics and Astronautics)

Completion Requirements

90 credits

For students who are admitted after completing a bachelor's degree:

1. *Graduate Fundamentals (36 credits)*:
 - a. Three Analytical Courses: 500-599 - level coursework in AMATH
 - b. Five Core Courses: 500-599-level coursework in A A department
 - c. Two Breadth Courses: 500-500-level coursework in A A department
2. *Qualifying Exam*

3. *Doctoral Coursework (9 credits)*: selected in consultation with faculty supervisor
4. *General Exam*
5. *Dissertation*
 - a. *A A 800 (minimum 27 credits)*
 - b. Final Exam
6. *Additional coursework as needed to reach required total credits*

For students who are admitted after completing a relevant master's degree and who are explicitly granted "post-master" status:

1. *Graduate Residency Credits (minimum 9 credits)*: selected in consultation with faculty supervisor.
2. *Qualifying Exam*
3. *Doctoral Coursework (minimum 9 credits)*: selected in consultation with faculty supervisor.
4. *General Exam*
5. *Dissertation*
 - a. *A A 800 (minimum 27 credits)*
 - b. Final Exam

Program of Study: Master of Aerospace Engineering

Program Overview

The MAE is a part-time degree program for working professionals seeking application-oriented engineering skills and experience to advance a career in the aerospace industry. Courses are offered in the evening with the option to participate completely online. Expected Time to Degree: 3 years

This program of study leads to the following credentials:

- Master of Aerospace Engineering
- Master of Aerospace Engineering (Composite Materials and Structures)

- Master of Aerospace Engineering (Composite Materials and Structures) (fee-based) (online)
- Master of Aerospace Engineering (Composites) (fee-based) (online)
- Master of Aerospace Engineering (Controls) (fee-based) (online)
- Master of Aerospace Engineering (fee-based) (Online)
- Master of Aerospace Engineering (fee-based) (Online)
- Master of Aerospace Engineering (Fluids) (fee-based) (online)
- Master of Aerospace Engineering (Propulsion and Plasma and Power) (fee-based) (online)
- Master of Aerospace Engineering (Structures) (fee-based) (online)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Master of Aerospace Engineering

Completion Requirements

45 credits

1. *Analytical Course Requirement (4 credits):* A E 501
2. *Professional Development Colloquium (9 credits):* A E 598
3. *Core Coursework (20 credits):* one of the following options - see additional requirements section for option-specific information.
 - a. Controls
 - b. Fluids
 - c. Structures
 - d. Composites
4. *Technical Breadth Coursework (12 credits):* Course list maintained internally by the program.

Master of Aerospace Engineering (Composite Materials and Structures)

Completion Requirements

45 credits

Core coursework (20 credits): A E 540, A E 541, A E 542, A E 543, A E 550

Program of Study: Master of Science in Aeronautics and Astronautics

Program Overview

The MSAA is a research-based degree intended to equip aerospace engineers with deep knowledge of fundamental science and advanced methods necessary for potential further study or for advancing a career in industry. Expected Time to Degree: 2 years

This program of study leads to the following credentials:

- Master of Science in Aeronautics & Astronautics (Controls)
- Master of Science in Aeronautics & Astronautics (Flight Sciences & Control)
- Master of Science in Aeronautics & Astronautics (Fluids)
- Master of Science in Aeronautics & Astronautics (Plasmas)
- Master of Science in Aeronautics & Astronautics (Structures)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Master of Science in Aeronautics & Astronautics (Controls)

Completion Requirements

45-48 credits, depending on option chosen.

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option; see additional requirements section for option-specific information.

1. Analytical Coursework (14-15 credits)
2. Core Coursework (14-25 credits)
3. Breadth Coursework (0-6 credits)
4. Thesis (minimum 9 credits)

Additional Completion Requirements

Option-specific requirements

1. *Analytical (14 credits):*
 - a. AMATH 510, AMATH 561, AMATH 582
2. *Core (13 credits):* AA 516, AA 547, AA 548, AA 583
3. *Core Selectives (3 credits):* Course list maintained internally by the program.
4. *Breadth Electives (6 credits):* Two AA classes from outside area, must be drawn from different AA options; course list maintained internally by the program.
5. *Thesis (9 credits):* AA 700

Master of Science in Aeronautics & Astronautics (Flight Sciences & Control)

Completion Requirements

45-48 credits, depending on option chosen.

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option; see additional requirements section for option-specific information.

1. Analytical Coursework (14-15 credits)
2. Core Coursework (14-25 credits)
3. Breadth Coursework (0-6 credits)
4. Thesis (minimum 9 credits)

Additional Completion Requirements

Option-specific requirements

1. *Analytical (14 credits):*
 - a. AMATH 510, AMATH 503, AMATH 561
2. *Core (25 credits):*
 - a. Aerodynamics: AA 507, AA 5XX
 - b. Structures: AA 538, AA 554, AA 553 OR ME 588
 - c. Controls: AA 516, AA 547, AA 548
3. *Thesis (9 credits):* AA 700

Master of Science in Aeronautics & Astronautics (Fluids)

Completion Requirements

45-48 credits, depending on option chosen.

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option; see additional requirements section for option-specific information.

1. Analytical Coursework (14-15 credits)
2. Core Coursework (14-25 credits)
3. Breadth Coursework (0-6 credits)
4. Thesis (minimum 9 credits)

Additional Completion Requirements

Option-specific requirements

1. *Analytical (15 credits):*
 - a. AMATH 501, AMATH 503
 - b. Choose one from AMATH 581, AMATH 582, AMATH 584
2. *Core (9 credits):* AA 504, AA 507, AA 543
3. *Core Selectives (6 credits):* Course list maintained internally by the program.
4. *Breadth Electives (6 credits):* Two AA classes from outside area, must be drawn

from different AA options; course list maintained internally by the program.

5. *Thesis (9 credits):* AA 700

Master of Science in Aeronautics & Astronautics (Plasmas)

Completion Requirements

45-48 credits, depending on option chosen.

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option; see additional requirements section for option-specific information.

1. Analytical Coursework (14-15 credits)
2. Core Coursework (14-25 credits)
3. Breadth Coursework (0-6 credits)
4. Thesis (minimum 9 credits)

Additional Completion Requirements

Option-specific requirements

1. *Analytical (15 credits):*
 - a. AMATH 501, AMATH 502, AMATH 503
OR
 - b. AMATH 581, AMATH 582, AMATH 584
2. *Core (16 credits):* AA 405, AA 556, AA 557, AA 558, PHYS 543
3. *Core Selectives (Permission required to replace any core requirement with a core selective):* Course list maintained internally by the program.
4. *Breadth Electives (6 credits):* Two AA classes from outside area, must be drawn from different AA options; course list maintained internally by the program.
5. *Thesis (9 credits):* AA 700

Master of Science in Aeronautics & Astronautics (Structures)

Completion Requirements

45-48 credits, depending on option chosen.

Below are the common requirements applying to all options in the degree program. Specific requirements vary by degree option; see additional requirements section for option-specific information.

1. Analytical Coursework (14-15 credits)
2. Core Coursework (14-25 credits)
3. Breadth Coursework (0-6 credits)
4. Thesis (minimum 9 credits)

Additional Completion Requirements

Option-specific requirements

1. *Analytical (15 credits)*: AMATH 501, AMATH 502, AMATH 503
2. *Core (12 credits)*: AA 530, AA 532, AA 540, AA 553 OR ME 588
3. *Core Selectives (3 credits)*: Course list maintained internally by the program.
4. *Breadth Electives (6 credits)*: Two AA classes from outside area, must be drawn from different AA options; course list maintained internally by the program.
5. *Thesis (9 credits)*: AA 700

Chemical Engineering

105 [Benson Hall](#)

206-543-2250

[Website](#)

[Faculty Website](#)

The chemical engineering profession is a close-knit group with a common background

in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. Chemical engineers study, design and operate processes to provide food, water, energy, clothing, medicine and materials. These processes transform raw materials from the environment into desired products. They also return spent products and by-products to the environment in an ecologically sustainable manner.

Undergraduate Program

105 [Benson Hall](#)

206-685-1634

chemadv@uw.edu

Program of Study: Major: Chemical Engineering

Program Overview

Chemical engineering is the study of transforming matter under constraint. Chemical engineers find industrial employment in areas of energy, the environment, biomedicine, electronics, food production, and materials. Chemical engineers also find careers in academia and government and military service. Students study chemical processes at the molecular level and the chemical plant level and gain an engineering education deeply grounded in mathematics, chemistry, physics, biology, and materials science.

This program of study leads to the following credentials:

- Bachelor of Science in Chemical Engineering degree

- Bachelor of Science in Chemical Engineering degree: Nanoscience and Molecular Engineering

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Core courses within the department form a seven-quarter curriculum designed to start spring quarter of the sophomore year. Because the curriculum is cohort-based and all students start and proceed at the same pace, Engineering Undeclared students admitted to Chemical Engineering after their first year are expected to start the curriculum in spring quarter of their second year.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition

3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering. Students requesting placement in Chemical Engineering must take CHEM 152 (or CHEM 153 or CHEM 155) from this list and they are also strongly recommended to complete CHEM 162 (or CHEM 165) prior to requesting placement.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Chemical Engineering is the only engineering major that requires students to complete CHEM 152 (or CHEM 153 or CHEM 155) to request placement because that course is required in order to complete the major in four years.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements and readiness to begin the chemical engineering core course sequence in the following spring quarter. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Current UW Students and Transfer Students

The department follows a cohort model beginning in spring quarter. Transfer students, current UW students without Engineering Undeclared status, and current UW students with Engineering Undeclared status who are eligible to begin the chemical engineering core sequence of courses in their first spring quarter may apply. Admission is competitive.

1. Admission is for spring quarter only.
Application deadline: January 15
2. Minimum course requirements: MATH 124, MATH 125, MATH 126, MATH 207 (or MATH 134, MATH 135, MATH 136; AMATH 351 may substitute for MATH 207); CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); 5 credits of English composition. Two required courses may be in progress during winter quarter. CHEM 237 (or CHEM 223 or CHEM 335) strongly recommended.
3. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

General Expectations of Academic Progress: Completion of all admission requirements listed for "Current UW Students and Transfer Students" as well as the following courses by the start of autumn quarter of the junior year: organic chemistry I and II (CHEM 237 and CHEM 238; or CHEM

223, CHEM 224; or CHEM 335 and CHEM 336), PHYS 123 (or PHYS 143), AMATH 301 (or CSE 122 or CSE 142 or CSE 160), MATH 208 (unless MATH 136 or AMATH 352 is taken), CHEM 310.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science in Chemical Engineering degree

Credential Overview

The Bachelor of Science in Chemical Engineering (BSCHE) is a highly marketable, professional degree that prepares undergraduate students for employment in industry or graduate study. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes and apply this knowledge to engineering solutions in a wide variety of areas.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 remaining credits met by coursework in the major
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses can also apply to an Areas of Inquiry requirement

Areas of Inquiry (80-90 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (56-66 credits)*
 - a. Mathematics (18-25 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, STAT 390, IND E 315, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, STAT 390, IND E 315, or AMATH 353
 - b. Chemistry (23-26 credits) complete one of the following:
 - i. CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237 (or CHEM 223 or CHEM 335), CHEM 238 (or CHEM 224 or CHEM 336), CHEM 455 (or CHEM E 456)

- ii. CHEM 143, CHEM 153, CHEM 237 (or CHEM 223 or CHEM 335), CHEM 238 (or CHEM 224 or CHEM 336), CHEM 455 (or CHEM E 456)
- c. Physics (15 credits): PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)

Major Requirements

74 to 77 credits, depending on credential/option

1. A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.
2. Additional requirements specified below.

Of Special Note:

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 485 and CHEM E 497 or faculty approved alternative) which involve the design of an integrated chemical system.

Additional Completion Requirements

74 credits

1. *Engineering Fundamentals (4 credits)*: one course from AMATH 301, CSE 122, CSE 142, or CSE 160
2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Molecular and Nanoscience Engineering (3 credits)*: CHEM E 455 or CHEM E 460
4. *Engineering Elective Courses (16 credits)*: Only one, 1-credit seminar allowed toward engineering electives. Maximum 9 credits undergraduate research (CHEM E 299, CHEM E 499, of which no more than 3 credits may be CHEM 299) may count toward engineering electives.

Unspecified Electives (9 credits): to reach 180 credits

Bachelor of Science in Chemical Engineering degree: Nanoscience and Molecular Engineering

Credential Overview

The Nanoscience and Molecular Engineering (NME) Option in the Bachelor of Science in Chemical Engineering is a transcriptable option focusing on nanoscale principles in molecular engineering that provides hands-on experience and stresses the interdisciplinary nature of the field. Students must indicate their plan to apply for the NME option in their Chemical Engineering application and discuss their interests and background in the essay.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 remaining credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses can also apply to an Areas of Inquiry requirement

Areas of Inquiry (80-90 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (56-66 credits)*
 - a. Mathematics (18-25 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, STAT 390, IND E 315, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, STAT 390, IND E 315, or AMATH 353
 - b. Chemistry (23-26 credits) complete one of the following:
 - i. CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237 (or CHEM 223 or CHEM 335), CHEM 238 (or CHEM 224 or CHEM 336), CHEM 455 (or CHEM E 456)

- ii. CHEM 143, CHEM 153, CHEM 237 (or CHEM 223 or CHEM 335), CHEM 238 (or CHEM 224 or CHEM 336), CHEM 455 (or CHEM E 456)
- c. Physics (15 credits): PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)

Major Requirements

74 to 77 credits, depending on credential/option

1. A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.
2. Additional requirements specified below.

Of Special Note:

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 485 and CHEM E 497 or faculty approved alternative) which involve the design of an integrated chemical system.

Additional Completion Requirements

Option specific credits (77 credits)

1. *Engineering Fundamentals (4 credits):* one course from AMATH 301, CSE 122, CSE 142, or CSE 160
2. *Chemical Engineering Core Courses (51 credits):* CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Nanoscience and Molecular Engineering Courses (22 credits):* CHEM E 299, CHEM E 455, CHEM E 499 (3-6 credits, maximum 3 credits from CHEM E 299), NME 220, NME 221, NME 321, NME 421; minimum two additional approved nanoscience and molecular engineering electives. See adviser for list of approved electives.

Unspecified Electives (6 credits): to reach 180 credits.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well

as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

- *Instructional and Research Facilities:* The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Laboratory holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of

Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the Engineering Co-op Office.
- *Department Scholarships:* The department awards 20-25 full-tuition scholarships per year. See departmental website for application procedures.
- *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

Of Special Note:

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and bioresource science and engineering. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

Civil and Environmental Engineering

201 [More Hall](#)

206-543-2390

[Website](#)

[Faculty Website](#)

ceadvice@uw.edu

Civil and environmental engineering deals with the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; hydrology and hydrodynamics; structures, mechanics, and geotechnical engineering; wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and air quality management. A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The department is organized into six academic areas: construction engineering; transportation engineering;

geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

ceadvice@uw.edu

Program of Study: Major: Civil Engineering

Program Overview

The Bachelor of Science in Civil Engineering degree provides students a broad-based educational experience, enabling them to address complex and multi-faceted civil engineering problems in construction, transportation, structural, transportation, water, and environmental engineering. After completing the required 300-level core curriculum, students may explore the areas of their interest with greater focus in their senior year or explore a variety of topics at the 400-level.

This program of study leads to the following credential:

- Bachelor of Science in Civil Engineering degree

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement

in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement

requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, AMATH 301 (or CSE 122 or CSE 142); MATH 208; CEE 220; and ME 230 completed with minimum 2.0 grades prior to autumn quarter.
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application.

Students are encouraged to complete the following courses prior to autumn quarter: MATH 207; CHEM 152 (or CHEM 153 or CHEM 155); PHYS 123 (or PHYS 143)

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities,

and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Bachelor of Science in Civil Engineering degree

Credential Overview

The Bachelor of Science in Civil Engineering (BSCE) degree is an ABET-accredited program that prepares students for civil and environmental engineering practice in industry, government, research, and academia. The program covers various areas of application, including construction, transportation, geotechnical, water and environmental engineering.

Completion Requirements

Minimum 180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 additional writing (W) credits
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses may also apply to an Areas of Inquiry requirement.

Areas of Inquiry (73-76 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (49-52 credits):*
 - a. Mathematics (15-21 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 134, MATH 135, MATH 136
 - b. Science (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Statistics (3-4 credits): IND E 315 or STAT 390
 - d. Additional NSc courses as necessary to reach 49 credits

Economics (4-5 credits)

1. ECON 200 or IND E 250 (or department-approved alternative). ECON 200 may also be applied toward the SSc requirement. IND E 250 may also be applied toward the Engineering Fundamentals requirement.

Major Requirements

93-96 credits

1. *Engineering Fundamentals (19-20 credits):*
 - a. One course from AMATH 301, CSE 122, CSE 142, or CSE 160

- b. A A 210, CEE 220, M E 230
- c. One course from A A 260, E E 215, IND E 250, M E 123, or MSE 170. Students who complete their statistics requirement with IND E 315 may instead complete MATH 209 or MATH 224 to fulfill this requirement.
2. *Civil Engineering Core (40 credits)*: CEE 307, CEE 317, CEE 327, CEE 337, CEE 347, CEE 357, CEE 367, CEE 377
3. *Professional Practice & Capstone Design (7 credits)*: CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445
4. *Civil Engineering Technical Electives (15 credits)*: Upper-division CEE coursework selected from an approved list (see adviser or department website for list). Students must complete at least one technical elective course from three separate areas of concentration within the department.
5. *Engineering & Science Electives (12-14 credits)*
 - a. *Basic Science Elective (3-5 credits)*: Complete one basic science course from approved departmental list.
 - b. *Engineering and Science Electives (7-9 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward engineering and science electives.
 - c. Additional credits as necessary to reach 12 credits.
6. *Grade Requirements*: Minimum 2.00 cumulative GPA in courses applied to the major.

Additional Information

The BSCE degree is appropriate for students interested in gaining a broad perspective of

civil and environmental engineering. Students take introductory courses in six areas (construction, transportation, geotechnical, structural, water and environmental engineering), gain expertise in at least four areas, and may focus their senior-year studies on a single area. The BSCE program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil and environmental engineering problems; demonstrate sufficient mastery of core civil and environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- *Instructional and Research Facilities*: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research

instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. In addition, the department has a 4000 square foot fluid mechanics teaching laboratory (in the Harris Hydraulics Laboratory), which houses seven dedicated teaching facilities including three large flumes, a wind tunnel, desk space and state-of-the-art laser imaging and measurement capabilities. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings

through the department and meet with students for on-campus recruiting sessions.

- *Department Scholarships:* The department offers numerous annual scholarships. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.
- *Student Organizations/Associations:* The department has over 20 active student organizations/associations, including American Society of Civil Engineers, Chi Epsilon, Engineers Without Borders, and many more.

Program of Study: Major: Environmental Engineering

Program Overview

The Environmental Engineering curriculum, which is designed to comply with ABET accreditation criteria, emphasizes the use of core knowledge in math, physics, biology, chemistry, and its application to environmental engineering and develops student understanding of natural processes in air, water, and soil during environmental engineering decision-making. The curriculum additionally provides opportunities for student to place their skill set within a greater social, cultural, and political context. The degree will complement the Bachelor of Science in Civil Engineering (BSCE) degree currently offered by the department by providing opportunities for inter-disciplinary interactions in upper-division course work, including in the capstone design course. Prerequisites may be met through coursework at the UW, another four-year institution, or a community college. Graduates will be prepared for a variety of

careers or for continuation of study at the graduate level.

This program of study leads to the following credential:

- Bachelor of Science in Environmental Engineering degree

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)

6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); AA 210; 5 credits English composition. All courses completed prior to April 5 application deadline. Following courses completed with minimum 2.0 grade prior to autumn quarter: AMATH 301, AMATH 351 (or MATH 207); BIOL

- 180; CHEM 162 (or CHEM 165); PHYS 123 (or PHYS 143); AA 260; CEE 220
3. Minimum 60 credits completed by April 5 application deadline.
 4. Grade requirements: Minimum 2.0 grade for each required course; minimum 2.50 cumulative GPA in required courses.

Students are also encouraged to complete AMATH 352 (or MATH 208) prior to autumn quarter.

Factors considered for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the department adviser or refer to the department website.

Bachelor of Science in Environmental Engineering degree

Completion Requirements

Minimum 180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list

- b. Writing: ENGR 231; 4 additional writing (W) credits
2. *Reasoning (RSN) (5 credits)*: met by program requirements
 3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement.

Areas of Knowledge (83-84 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (59-60 credits)*
 - a. Mathematics (15-21 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, AMATH 351 (or MATH 207), AMATH 352 (or MATH 208)
 - ii. MATH 134, MATH 135, MATH 136
 - b. Sciences (32-35 credits): CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165); BIOL 180; PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Statistics (3-4 credits): IND E 315 or STAT 390
 - d. Additional NSc courses as necessary to reach 59 credits

Major Requirements

85-89 credits

1. *Engineering Fundamentals (16-17 credits)*:
 - a. One course from AMATH 301, CSE 122, CSE 142, or CSE 160
 - b. A A 210, CEE 220

- c. One course from A A 260, M E 323
2. *Economics (4-5 credits)*: ECON 200 or IND E 250 (or department-approved alternative). ECON 200 may also be applied toward the SSc requirement.
3. *Environmental Engineering Core (30 credits)*: CEE 347, CEE 348, CEE 349, CEE 350, CEE 352, CEE 354, CEE 356
4. *Professional Practice & Capstone Design (7 credits)*: CEE 440 and either CEE 444 or CEE 445
5. *Environmental Engineering Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see department website for list).
6. *Engineering & Science Electives (13-15 credits)*
 - a. *Earth Science Elective (3-5 credits)*: Complete one earth science course from approved departmental list.
 - b. *Engineering and Science Electives (8-10 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward engineering and science electives.
 - c. Additional credits as necessary to reach 13 credits.
7. *Grade Requirements*: Minimum 2.00 cumulative GPA in courses applied to the major.

Additional Information

The BSENVE degree offers a specialized focus in environmental engineering. Students gain expertise in the fundamentals of environmental engineering, with specialization in areas including water and wastewater engineering, water resources management, hydrology, environmental fluid mechanics, climate science, sustainable design, resource recovery, environmental chemistry, and environmental microbiology.

The BSENVE program successfully completed the ABET accreditation review process during the 2019-2020 academic year.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving environmental engineering problems; demonstrate sufficient mastery of core environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- *Instructional and Research Facilities*: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental engineering and water program research laboratory facilities include more than 20,000 square feet of laboratory space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. A dedicated environmental engineering teaching laboratory comprising roughly 1200 square feet of space is equipped with a variety of standard lab equipment and analytical

tools, in addition to modern PCs and a teaching bench with whiteboard and overhead projector for demonstrations and general instructional purposes. In addition, the department has a 4000 square foot fluid mechanics teaching laboratory (in the Harris Hydraulics Laboratory), which houses seven dedicated teaching facilities including three large flumes, a wind tunnel, desk space and state-of-the art laser imaging and measurement capabilities.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.
- *Department Scholarships:* The department offers numerous annual scholarships. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.
- *Student Organizations/Associations:* The department has over 20 active student organizations/associations, including American Society of Civil Engineers, Engineers without Borders, American Water Works Association-Water Environment Federation, American Water Resources Association, American

Public Works Association. See adviser for details.

Graduate Programs

ceginfo@uw.edu

Program of Study: Doctor of Philosophy (Civil Engineering)

Program Overview

Students in the UW CEE Ph.D. program work closely with distinguished faculty on research and pursue their own innovative projects, preparing them to make a difference in the world. Students who pursue Ph.D. degrees often obtain high-level jobs in industry or go on to work in academia. The UW CEE Ph.D. program is intended for candidates who possess a high level of scholarship and are passionate about conducting independent and original research in their chosen field of interest. The academic standard is high for students admitted to the Ph.D. program.

This program of study leads to the following credential:

- Doctor of Philosophy (Civil Engineering)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Doctor of Philosophy (Civil Engineering)

Completion Requirements

90 credits

1. *Civil Engineering Coursework (54 credits)*: 400- and 500-level coursework, may include maximum of 3 CEE Seminar credits and maximum of 3 CEE 600 Independent Study credits.
2. *Dissertation (27 credits)*: CEE 800
3. *Qualifying Exam*
4. *Seminar*

Program of Study: Master of Science in Civil Engineering

Program Overview

The UW Master of Science in Civil Engineering (MSCE) program prepares students to enter the workforce with advanced skills or pursue further studies in a doctoral program. The MSCE degree can increase competitiveness in the job market, advance an existing career, or serve as a gateway to a Ph.D. degree. Master's degree students include recent undergraduates who seek a specialized focus, engineers who want to advance their career and people from other backgrounds who are looking for a new and rewarding career. The master's program offers two degree options, depending on whether students want to pursue research prior to doctorate studies or professional practice. All master's students receive a Master of Science in Civil Engineering degree regardless of which track they pursue.

This program of study leads to the following credentials:

- Master of Science in Civil Engineering
- Master of Science in Civil Engineering (fee-based)
- Master of Science in Civil Engineering (fee-based) (online)
- Master of Science in Civil Engineering: Energy Infrastructure (fee-based) (online)

Master of Science in Civil Engineering

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All degree options require 42 credits

Various options exist depending on thesis or non-thesis and area of focus. See option-specific requirements for each option below.

Additional Completion Requirements

Option-specific requirements:

Complete one of the following areas:

1. Transportation Engineering:
 - a. CET 502
 - b. CET 511
 - c. CET 512
 - d. CET 513
 - e. CET 521
 - f. CET 522
 - g. CET 599 Seminar (1 credit)
 - h. One non-CEE elective (min 3 credits)
 - i. Thesis: CEE 700 (9 credits)
 - j. Electives (to meet required credit total): Additional credits in CET coursework or approved alternative. Course list maintained by department.
2. Structural Engineering and Mechanics:
 - a. CESG 501
 - b. CESG 502
 - c. CESG 504
 - d. Structural Electives (12 credits): 500-level CESG coursework, list maintained internally by the program
 - e. One non-CEE elective (min 3 credits)

- f. Thesis: CEE 700 (9 credits)
 - g. CEE 500 (optional, up to 3 credits of seminar may apply)
 - h. Electives (to meet required credit total): Additional credits in CESG coursework or approved alternative. Course list maintained by department.
3. Hydrology & Hydrodynamics:
- a. CEE 475
 - b. CEWA 565
 - c. CEWA 574
 - d. CEWA 576
 - e. CEWA 596
 - f. CEWA 578 or 579
 - g. Thesis: CEE 700 (9 credits)
 - h. Electives (to meet required credit total): Additional 400/500 level credits in CEWA coursework or approved alternative. Course list maintained by department.
 - i. CEE 500 (optional, up to 2 credits)
4. Geotechnical Engineering:
- a. CESG 561
 - b. CESG 566
 - c. CESG 567
 - d. CESG 569
 - e. Geotechnical Electives (15 credits): 500-level CESG coursework - list maintained by the program
 - f. One non-CEE elective (min 3 credits)
 - g. Thesis: CEE 700 (9 credits)
 - h. Electives (to meet required credit total): Additional 500-level coursework in CESG or approved alternative. Course list maintained by department.
5. Environmental Engineering - Water:
- a. CEWA 540
 - b. CEWA 543
 - c. CEWA 545
 - d. Thesis: CEE 700 (9 credits)
- e. Electives (to meet required credit total): Additional 400/500 level CEWA coursework or approved alternative. Course list maintained by department.
 - f. CEE 500 (optional, max 2 credits)
6. Environmental Engineering - Air:
- a. CEWA coursework or approved alternative to meet required credit total. Course list maintained by department.
 - b. Thesis: CEE 700 (9 credits)
 - c. CEE 500 (optional, max 2 credits)
7. Construction Engineering:
- a. CIV E and CM coursework (18 credits): 400/500 level CM and CESI coursework selected with advisor.
 - b. One non-CEE elective (minimum 3 credits)
 - c. Thesis: CEE 700 (9 credits)
 - d. Electives: Additional 400/500 level CESI or CM coursework or approved alternative. Course lists maintained by department.
 - e. CEE (optional, max 1 credit)
 - f. Max 6 credits of 1-credit CESI online courses

Master of Science in Civil Engineering (fee-based)

- total. Course list maintained by department.
- b. Independent Study or Research (Max 3 credits): CEE 600
 - c. CEE 500 (optional, max 2 credits)
7. Construction Engineering:
- a. CIV E and CM coursework (18 credits): 400/500 level CM and CESI coursework selected with advisor.
 - b. One non-CEE elective (minimum 3 credits)
 - c. Independent Study or Research (Max 3 credits): CEE 600
 - d. Electives: Additional 400/500 level CESI or CM coursework or approved alternative. Course lists maintained by department.
 - e. CEE (optional, max 1 credit)
 - f. Max 6 credits of 1-credit CESI online courses

Master of Science in Civil Engineering (fee-based) (online)

Credential Overview

The University of Washington offers a unique master's degree for engineering professionals working in the heavy construction industry. The online Master of Science in Civil Engineering: Construction Engineering gives you the cutting-edge management skills and technical abilities required to lead major infrastructure projects.

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

All degree options require 42 credits

Various options exist depending on thesis or non-thesis and area of focus. See option-specific requirements for each option below.

Completion Requirements

Option-specific requirements:

Required courses (42 credits):

CESI 508, CESI 552, CESI 588, CESI 592, CESI 594, CESI 595, CESI 596, CM 500, CM 520, CM 525, CM 580, CM 582, CM 588

Master of Science in Civil Engineering: Energy Infrastructure (fee-based) (online)

Credential Overview

The energy infrastructure master's was created to address the rapidly changing energy landscape — including the growing importance of renewable energy sources and concerns over climate change — and the need for professionals with a background in this growing field. The knowledge and skillset developed in the program can be applied to many types of roles and on a diverse range of projects.

Admission Requirements

Completion Requirements

All degree options require 42 credits

Various options exist depending on thesis or non-thesis and area of focus. See option-specific requirements for each option below.

Additional Completion Requirements

Option-specific requirements:

1. Core courses (36 credits): CESI 501, CESI 502, CESI 503, CESI 504, CESI 505, CESI 508, CESI 552, CESI 586, CESI 588, CESI 594, CM 500, CM 520
2. Focus-topic courses (6 credits): 6 courses from a list of 500-level CESI courses. Course list maintained by department.

Program of Study: Master of Supply Chain Transportation and Logistics

Program Overview

The Department of Civil and Environmental Engineering, in partnership with UW Professional and Continuing Education, offers an online Master of Supply Chain Transportation and Logistics degree. Combining engineering and business principles with industry best practices, this program provides students with the knowledge needed to successfully design, implement, and manage complex supply chain transportation and logistics strategies. Students study cross-functional areas, such as operations, inventory management, and IT systems, to develop skills in the end-to-end management of transportation in a global supply chain. For more information on this program, see the Master of Supply Chain Transportation and Logistics website.

This program of study leads to the following credential:

- Master of Supply Chain Transportation and Logistics (fee-based) (online)

Admission Requirements

Graduate degree program admission requirements vary. Please see this program's [Graduate Admissions Page](#) for specific requirements.

Master of Supply Chain Transportation and Logistics (fee-based) (online)

Completion Requirements

43 credits

Required courses (43 credits): SCTL 501, SCTL 502, SCTL 503, SCTL 504, SCTL 505, SCTL 506, SCTL 507, SCTL 508, SCTL 510

Program of Study: Master of Sustainable Transportation

Program Overview

In partnership with UW Professional and Continuing Education, the department offers an online Master of Sustainable Transportation degree (MST). The program provides transportation engineers and planners the latest knowledge, skills, and tools needed to become leaders in developing and maintaining sustainable transportation practices. Students develop an awareness of green transportation strategies and gain a solid background with practical applications. In a part-time online format, the MST program covers three areas of concentration: planning and livable communities; environmental issues and impacts; and policy development, health, and economics. For more information, see the Master of Sustainable Transportation website.

This program of study leads to the following credential:

- Master of Sustainable Transportation (fee-based) (online)

Admission Requirements

Graduate degree program admission requirements vary. Please see this program's [Graduate Admissions Page](#) for specific requirements.

Master of Sustainable Transportation (fee-based) (online)

Completion Requirements

42 credits

1. *Required courses (42 credits):* CEE 561, CEE 562, CEE 563, CEE 564, CEE 565, CEE 566, CEE 567, CEE 568, CEE 569
2. *Capstone requirement:* Incorporated into the final three courses of the degree.

Computer Science and Engineering

AC 101 [Paul G. Allen Center for Computer Science & Engineering](#)

206-543-1695

[Website](#)

[Faculty Website](#)

Computer Science & Engineering (CSE) educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. Our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on

experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more. Computer scientists and computer engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Programs

101 [Paul G. Allen Center for Computer Science & Engineering](#)

206-543-1695

ugrad-advisor@cs.washington.edu

Program of Study: Major: Computer Engineering

Program Overview

CSE offers two undergraduate degrees: Computer Science (through the College of Arts and Sciences) and Computer Engineering (through the College of Engineering). Students working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. The Computer Engineering major may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

This program of study leads to the following credential:

- Bachelor of Science in Computer Engineering degree

Recommended Preparation

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); CSE 121, CSE 122, CSE 123; English composition.

Admission Requirements

Applicants are considered in three groups - Entering Freshmen, Currently Enrolled UW Students, and Entering Transfers. Admission is capacity constrained. Completion of minimum requirements does not guarantee admission.

1. *Entering Freshmen:* The largest pathway for admission to Computer Engineering is directly out of high school, prior to completion of university-level prerequisites. Freshman applicants listing Computer Engineering as their intended major are automatically considered. Competitive applicants have usually taken the equivalent of four years of high school mathematics and at least one year of high school laboratory science upon entering the University. Admission is for autumn quarter only.
2. *Currently Enrolled UW Students:* A portion of each year's class is admitted after matriculating to UW. Admission is for autumn or spring quarter. Application deadlines: July 1 for autumn quarter and January 15 for spring quarter. To be considered, applicants must complete the following course requirements before the Allen School application deadline:
 - a. Minimum 30 graded college credits completed.
3. *Entering Transfers:* A portion of each year's class is admitted from students transferring from another college or university. Admission is for autumn or spring quarter. Transfer applicants are considered based on their University transfer application and supplemental material provided to the Allen School. Application deadlines: April 5 for autumn quarter and January 15 for spring quarter. Applicants interested in transferring from an institution that does not offer equivalent coursework should reach out to the Allen School advising team before applying. Applicants must identify Computer Engineering as their intended major, and indicate they will begin the major immediately upon transferring. Entering transfer applicants must meet the following requirements:
 - a. Minimum 30 graded college credits completed by the University transfer application deadline.
 - b. Minimum course requirements needed for supplemental application: MATH 124, MATH 125, MATH 126; CSE 123 or CSE 143; PHYS 121 (or PHYS 141); and at least five credits of English composition. These courses must be completed by the supplemental Allen School application deadline.

Bachelor of Science in Computer Engineering degree

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*:
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 additional writing (W) credits
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (71 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (30 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 30 credits
2. *Natural Sciences (41 credits)*:
 - a. *Mathematics (15-18 credits) complete one of the following*:
 - i. MATH 124, MATH 125, MATH 126, MATH 208
 - ii. MATH 134, MATH 135, MATH 136
 - b. *Science (20 credits)*: PHYS 121, PHYS 122 (or PHYS 141, PHYS 142), and 10 credits from the list of approved natural science courses for Computer Engineering on the Allen School website.
 - c. *Additional Math or Science credits*: chosen from approved natural science courses for Computer Engineering on the Allen School website as well as STAT 391, MATH 394/STAT 394, MATH 207, MATH 209, MATH 318, MATH 334, MATH 335, AMATH 351, and

AMATH 353 to bring the total to 41 credits

Major Requirements (72-73 credits)

1. *Fundamental Courses (32-33 credits)*: CSE 123 (or CSE 143), CSE 311, CSE 312, CSE 332, CSE 351, CSE 369, E E 371/CSE 371, E E 215 (or E E 205)
2. *Core and Elective Courses (40 credits)*:
 - a. One course chosen from: CSE 403, CSE 474/E E 474, CSE 480 (2 credits), or CSE 484.
 - b. Three additional courses chosen from the Computer Engineering Systems Electives list on the Allen School website.
 - c. Two additional courses chosen from the CSE Core Courses list on the Allen School website.
 - d. One course from the CSE Capstone list on the Allen School website
 - e. Additional courses chosen from the CSE Electives list (which can include additional courses from the CSE Core Courses list), CSE 121, or CSE 122, to bring total CSE electives to 40 credits (including CSE 121 or CSE 122 if taken).
 - f. Additional Engineering or CSE credits, if needed, to bring the total Engineering and CSE credits to 40, not including any of the Fundamental courses.
3. Minimum 2.0 grade for any course applied to the major, Natural World, or Written and Oral Communications requirements. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.

Free Electives to bring total for the degree to 180 credits

Program of Study: Minor: Neural Computation and Engineering

Program Overview

The Minor in Neural Computation and Engineering is designed to provide students with a background in quantitative, mathematical, engineering, and computational approaches to problems in neuroscience.

This program of study leads to the following credential:

- Minor in Neural Computation and Engineering

Minor in Neural Computation and Engineering

Completion Requirements

30 credits

1. Either NBIO 405/BIOEN 466, or both NBIO 301 and NBIO 302
2. BIOEN 460
3. Either AMATH 342 or NBIO 303
4. One course from PHIL 442 (preferred), PHIL 242, or PHIL 409
5. Capstone: BIOEN 461
6. Electives At least 12 additional graded credits from the Neural Computation and Engineering elective list, available on the program website
7. Minimum cumulative 2.00 GPA for courses counted toward the minor
8. Minimum 18 credits outside the student's major
9. Students make a presentation during the Mary Gates Undergraduate Research Symposium or Computational Neuroscience Connection Program. With

approval, other presentations may satisfy this requirement.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*
 - *Engineering Quality:* Graduates engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.
 - *Leadership:* Graduates engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession, and community.
 - *Economic Impact:* Graduates enhance the economic well-being of Washington State through a combination of technical expertise, leadership, and entrepreneurship.
 - *Lifelong Learning:* Graduates adapt to new technologies, tools, and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, phone: (410) 347-7700. The Allen School has adopted the following student outcomes. Upon graduation from the computer engineering program, students will have:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
- *Instructional and Research Facilities:* The Allen School is housed in the state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

The Allen School general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. The special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center and Gates Center are two of the finest computer science and computer engineering facilities in the nation. All Allen School students have access to these resources.

- *Honors Options Available:* With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. Refer to department website for more information.
- *Departmental Scholarships:* The Allen School has a limited number of scholarships available to current Allen School majors. Refer to department website for more information.
- *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within the Allen School. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

[Website](#)

[Faculty Website](#)

recept@ece.uw.edu

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology. Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring.

Program of Study: Major: Electrical and Computer Engineering

Program Overview

Electrical and Computer Engineering students study the design, production, operation and application of devices and systems that use electricity, electronics, and electromagnetism. These devices and systems are used for sensing, processing, communicating, and visualizing information, as well as generating,

transmitting, distributing, and making use of electrical energy. Subjects of study include circuits; electromagnetics; electronic devices and photonics; signal and image processing; analog and digital communications; analog and digital electronics; computers; energy systems; control systems and robotics.

This program of study leads to the following credential:

- Bachelor of Science in Electrical and Computer Engineering degree

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition

3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department website for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5.
2. Course requirements: CSE 122 (or CSE 123 or CSE 142); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); and 5 credits English composition; all completed prior to application deadline.

3. Additional course requirements: CSE 123 (or CSE 143); MATH 207 (unless MATH 135 was completed); and two courses from the following list: BIOL 130, BIOL 220, CHEM 142 (or CHEM 143 or CHEM 145), MATH 224, PHYS 123; all completed prior to the start of autumn quarter
4. Grade requirements: Minimum 2.0 grade for each course required for application. Minimum 2.50 cumulative GPA across all courses required for application.

Factors considered for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science in Electrical and Computer Engineering degree

Credential Overview

Electrical and Computer Engineering students study the design, production, operation and application of devices and systems that use electricity, electronics, and electromagnetism. These devices and systems are used for sensing, processing, communicating, and visualizing information, as well as generating, transmitting, distributing, and making use of

electrical energy. Subjects of study include circuits; electromagnetics; electronic devices and photonics; signal and image processing; analog and digital communications; analog and digital electronics; computers; energy systems; control systems and robotics.

Completion Requirements

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231 (or department-approved alternative); remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (69 credits)

1. *Arts and Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (45 credits)*
 - a. Mathematics (15-21 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 134, MATH 135, MATH 136

- b. Physics (10 credits): PHYS 121, PHYS 122 (or PHYS 141, PHYS 142)
- c. Two courses from BIOL 130, BIOL 220, CHEM 142 (or CHEM 143 or CHEM 145), MATH 224, PHYS 123 (or PHYS 143)
- d. Statistics (3-4 credits): IND E 315 or STAT 390
- e. Additional NSc courses from approved list to reach 45 credits: See adviser for list of approved courses

Of Special Note:

The University of Washington formerly referred to Areas of Inquiry as Areas of Knowledge; Arts and Humanities (A&H) as Visual, Literary, and Performing Arts (VLPA); Natural Sciences (NSc) as Natural World (NW); Social Sciences (SSc) as Individuals and Societies (I&S); and Reasoning (RSN) as Quantitative and Symbolic Reasoning (QSR).

Major Requirements (65-66 credits)

1. *Computer Programming (4-5 credits)*: Minimum 2.0 grade in either CSE 123 or CSE 143.
2. *Electrical and Computer Engineering Core (21 credits)*: E E 201, E E 215, E E 241, E E 242, E E 271, E E 280. Minimum 2.0 grade in each course.
3. *Advanced Technical Communication (4 credits)*: E E 393 (or department-approved alternative)
4. *Advanced Electrical and Computer Engineering Electives (36 credits)*:
 - a. Professional issues (1-5 credits) See adviser for lists of approved courses
 - b. Capstone (4-8 credits) See adviser for lists of approved courses
 - c. Additional 300- and 400-level E E courses to reach 36 credits including a maximum of 2 credits of seminar courses (see advisor for list of

- approved seminar courses) and 10 credits of E E 499, E E 233, CSE 373, and CSE 374 may also apply.
- d. Minimum 20 credits at the 400-level.
5. Grade Requirements: Minimum 2.00 cumulative GPA in all courses applied to the major, with no grade below 1.0 in these courses.

Additional electives to reach 180 credits

Program of Study: Major: Electrical Engineering

Program Overview

Electrical Engineering students study the design, production, and operating devices of systems that use electric and electromagnetic energy for sensing, processing, visualizing and use of information. Subjects of study include circuits, systems and controls (robotics); signal and image processing; electronics, electronic devices, and photonics; computers; energy systems; electromagnetics and optics.

This program of study leads to the following credentials:

- Bachelor of Science in Electrical Engineering degree
- Bachelor of Science in Electrical Engineering degree: Nanoscience and Molecular Engineering

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The

deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis

pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); 5 credits English composition. All courses completed prior to application deadline. In addition, MATH 207 (unless MATH 135 was completed) and PHYS 123 (or PHYS 143) completed with minimum grades of 2.0 prior to autumn quarter
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade for each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Bachelor of Science in Electrical Engineering degree

Credential Overview

Electrical Engineering majors customize their major by completing one of fourteen undergraduate concentrations. Our concentration areas include: Analog Circuits; Bio-medical Instrumentation; Communications; Controls; Digital VLSI Circuits; Electromagnetics; Embedded Computing Systems; Large Scale Power Systems; Photonics; Power Electronics and Electric Drives; Sensors and Devices; Signal Processing; Sustainable Electric Energy; and, Synthetic Biology.

Completion Requirements

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; E E 393 (or department-approved alternative)
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (69-70 credits)

1. *Arts and Humanities (A&H) and Social Sciences (SSc) (25 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 25 credits
2. *Natural Sciences (NSc) (44-45 credits)*

- a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 224
 - ii. MATH 134, MATH 135, MATH 136, MATH 224
- b. Sciences (20-21 credits): CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
- c. Additional NSc courses as necessary to reach 44 credits

Of Special Note:

The University of Washington formerly referred to Areas of Inquiry as Areas of Knowledge; Arts and Humanities (A&H) as Visual, Literary, and Performing Arts (VLPA); Natural Sciences (NSc) as Natural World (NW); Social Sciences (SSc) as Individuals and Societies (I&S); and Reasoning (RSN) as Quantitative and Symbolic Reasoning (QSR).

Additional Completion Requirements

Major Requirements (85-87 credits)

1. *Computer Programming (4-5 credits):* CSE 123 or CSE 143
2. *Electrical Engineering Core (14 credits):* E E 215, E E 233, E E 242
3. *Electrical Engineering Major Concentration Area (24 credits minimum)*
4. *Electrical Engineering Electives (up to 20 credits):* See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
5. *Professional Issues:* One course. See adviser for list of acceptable courses. Course may also be counted toward

Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.

6. *Engineering Electives (10 credits):* See adviser for list of acceptable courses.
7. *Approved Non-Electrical Engineering Electives (10 credits):* Selected from courses listed in the departmental handbook.
8. *Statistics (3-4 credits):* Either STAT 390, STAT 391, MATH 394/STAT 394, or IND E 315
9. *Grade Requirements:* Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Additional Free Electives to reach 180 credits

Bachelor of Science in Electrical Engineering degree: Nanoscience and Molecular Engineering

Credential Overview

The Nanoscience and Molecular Engineering (NME) degree option integrates existing science and engineering undergraduate curricula with an early introduction to nanoscale principles in molecular engineering, hands-on experience, and a strong interdisciplinary network. Electrical Engineering students who declare the NME option must complete the undergraduate concentration in Advanced Electronic and Photonic Devices.

Additional Admission Requirements

Option specific admission

Admission is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all electrical engineering prerequisites and formal admission to the BS

electrical engineering major. Students who complete NME 220 with a minimum 2.0 grade are eligible. Such students indicate an interest in the NME option on their electrical engineering major application and discuss their interests/background in the application personal statement. To declare, they see an EE undergraduate adviser.

Completion Requirements

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; E E 393 (or department-approved alternative)
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (69-70 credits)

1. *Arts and Humanities (A&H) and Social Sciences (SSc) (25 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 25 credits
2. *Natural Sciences (NSc) (44-45 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352), MATH 224
 - ii. MATH 134, MATH 135, MATH 136, MATH 224
 - b. Sciences (20-21 credits): CHEM 142 (or CHEM 143 or CHEM 145);

PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)

- c. Additional NSc courses as necessary to reach 44 credits

Of Special Note:

The University of Washington formerly referred to Areas of Inquiry as Areas of Knowledge; Arts and Humanities (A&H) as Visual, Literary, and Performing Arts (VLPA); Natural Sciences (NSc) as Natural World (NW); Social Sciences (SSc) as Individuals and Societies (I&S); and Reasoning (RSN) as Quantitative and Symbolic Reasoning (QSR).

Additional Completion Requirements

Option Requirements (85-87 credits)

1. *Computer Programming (4-5 credits)*: CSE 123 or CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 242
3. *Nanoscience and Molecular Engineering Courses (6 credits)*: NME 220, NME 221, NME 421. Courses may also be counted towards the Engineering Electives or Approved Non-Electrical Engineering Electives requirement.
4. *Electrical Engineering Major Concentration Area (24 credits minimum)* See adviser for list of acceptable courses.
5. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
6. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area,

or Electrical Engineering Electives requirement.

7. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
8. *Approved Non-Electrical Engineering Electives (10 credits)*: Selected from courses listed in the departmental handbook.
9. *Statistics (3-4 credits)*: Either STAT 390, STAT 391, MATH 394/STAT 394, or IND E 315
10. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Additional Free Electives to reach 180 credits

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*
 - *Professional Opportunities*: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of new products; technical sales and marketing; business consulting; and even growing areas such as intellectual property.

The BSEE program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

- *Program Educational Objectives*: The program educational objectives

(PEOs) of the BSEE degree program are to serve the needs of our students, faculty, and regional industry by producing graduates who have acquired foundational knowledge and skills through a comprehensive curriculum and immersive educational and developmental experience. After a few years following graduation, we expect our graduates to:

1. **Contribute**: To have successfully and smoothly transitioned into a contributing member of the professional workforce
 2. **Master**: To have developed the skills, habits, and professional expertise which will carry them through their life and career
 3. **Evolve**: To rapidly grow and adapt to their fast changing world
 4. **Innovate**: To embrace change, challenge, growth, inquiry, creativity, and diversity
 5. **Lead**: To rise to levels of leadership and impact in their chosen specialties
 6. **Steward**: To responsibly apply their problem solving, critical thinking, communication, and management skills to the benefit of themselves, their communities, their region, and the world at large
- *Student Outcomes*: By graduation, we expect our graduates to have demonstrated abilities in:
 1. **Problems**: An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
 2. **Design**: An ability to apply engineering design to produce

- solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. **Communication:** An ability to communicate effectively with a range of audiences
 4. **Responsibility:** An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
 5. **Teams:** An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
 6. **Experiment:** An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
 7. **Learning:** An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
- *Instructional and Research Facilities:* The department maintains a number of instructional and research laboratories to support courses and independent study activities. There are three general-purpose computing laboratories. Instructional laboratories include a large instrumentation laboratory supporting numerous electronics courses; individual laboratories for digital design courses; a power laboratory to support the power/energy systems classes; an RF laboratory to support electromagnetics and communication systems; and laboratories that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research laboratories of their supervising faculty member.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. Career Center @ Engineering is one source for companies recruiting for internship and co-op students. The UW Career & Internship Centers also lists a variety of internship opportunities.
 - *Department Scholarships:* Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Director of Academic Services.
 - *Student Organizations/Associations:* The Institute of Electrical and Electronics Engineers (IEEE), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. Eta Kappa Nu (HKN) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

[Website](#)

[Faculty Website](#)

hcdehelp@uw.edu

In the department of Human Centered Design & Engineering (HCDE), students and faculty come together to design solutions for global challenges by tailoring technology to human needs and interests. By employing engineering approaches rooted in a broad range of disciplines, we investigate the interaction of people with technology and technical development. From user-centered design to human-computer interaction, we are designing the future. Students in HCDE build a strong foundation in designing user-experiences (UX) and -interfaces (UI), creating information visualizations, conducting usability research, designing for the web, and building web technologies. Students join research groups

and collaborate with faculty to address a wide range of research and design challenges. HCDE graduates find jobs as multimedia and web developers, usability engineers, interface designers, user experience researchers, and information architects at high-tech companies.

Undergraduate Program

Program of Study: Major: Human Centered Design and Engineering

Program Overview

Human Centered Design and Engineering (HCDE) undergraduate students learn design and engineering processes to solve problems through a deep understanding of people and their contexts. Students in the HCDE Bachelor of Science program graduate with an engineering degree and a strong foundation in designing user experiences and interfaces, creating information visualizations, conducting user research, designing for the web, and building web technologies. Upon graduation, students find jobs as user experience (UX) researchers and designers, multimedia and web developers, usability engineers, interface designers, and information architects at technology companies.

This program of study leads to the following credentials:

- Bachelor of Science in Human Centered Design and Engineering degree: Human-Computer Interaction

- Bachelor of Science in Human Centered Design and Engineering degree
- Bachelor of Science in Human Centered Design and Engineering degree: Data Science

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a

course required for graduation in the majors they are considering.

7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter. Application deadline: April 5.
2. Minimum course requirements for application: 10 credits from MATH 120, MATH 124, MATH 125, MATH 126, MATH 134, MATH 135, MATH 136; one course from CSE 121, CSE 122, CSE 123, CSE 142, or CSE 160; one course from STAT 220, STAT 221, STAT 290, STAT 311, IND E 315; three courses from CHEM 142, CHEM 143, CHEM 145, CHEM 152, CHEM 153, CHEM 155, CHEM 162, CHEM 165, PHYS 114, PHYS 115, PHYS 116, PHYS 121, PHYS 122, PHYS 123, PHYS 141, PHYS 142, PHYS 143, BIOL 118, BIOL 180, BIOL 200,

PSYCH 202; 5 credits English composition; all courses completed prior to application deadline.

3. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Factors evaluated include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science in Human Centered Design and Engineering degree: Human-Computer Interaction

Credential Overview

The Human-Computer Interaction (HCI) elective option in the Bachelor of Science in HCDE is a transcriptable option, focusing on the design, evaluation, and implementation of interactive computing systems for human use and with the study of major phenomena surrounding them. HCI is necessarily a multidisciplinary field, incorporating facets of information science, computer science, design, and technical communication. Students interested in HCI can complete the official HCI option with coursework from four participating

departments: Human Centered Design & Engineering, Computer Science & Engineering, the Division of Design within the School of Art, and The Information School. The HCI option replaces the electives in the standard option. Please refer to the HCDE website for a list of courses that meet this requirement.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 remaining credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Knowledge requirement

Areas of Inquiry (80 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (30 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 30 credits
2. *Natural Sciences (NSc) (50 credits)*
 - a. Mathematics (minimum 15 credits; see list of qualifying courses on HCDE website)
 - b. Sciences (minimum 15 credits; see list of qualifying courses on HCDE website)

Major Requirements

82 credits

1. *HCDE Core (41 credits)*: HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493
2. *Engineering Fundamentals (minimum 12 credits)*: one course from CSE 121, CSE 122, CSE 123, CSE 142, or CSE 160; see department website for approved list of additional courses
3. *Experiential Learning (4 credits)*: See department website for list of approved courses
4. Additional requirements specified below

Additional Completion Requirements

Option specific credits (25 credits): HCDE 419, and one course from at least three of the four HCI course areas - user interface, software, and technology; design; usability, and user research; and social and ethical dimensions. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements.

Bachelor of Science in Human Centered Design and Engineering degree

Credential Overview

The Bachelor of Science in HCDE prepares students with the tools and methods necessary to research, design, and build innovative products and interactive systems. Students tailor coursework to meet their academic and professional goals by selecting electives in the areas of information visualization, advanced usability and user research, human-computer interaction, physical computing, UX

prototyping techniques, and user interface design. In addition to traditional coursework, students join research groups and collaborate with our world-class faculty to examine a wide range of design challenges and emerging ideas.

Completion Requirements

General Education Requirements

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; 4 remaining credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Knowledge requirement

Areas of Inquiry (80 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (30 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 30 credits
2. *Natural Sciences (NSc) (50 credits)*
 - a. Mathematics (minimum 15 credits; see list of qualifying courses on HCDE website)
 - b. Sciences (minimum 15 credits; see list of qualifying courses on HCDE website)

Major Requirements

82 credits

1. *HCDE Core (41 credits)*: HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493
2. *Engineering Fundamentals (minimum 12 credits)*: one course from CSE 121, CSE 122, CSE 123, CSE 142, or CSE 160; see department website for approved list of additional courses
3. *Experiential Learning (4 credits)*: See department website for list of approved courses
4. Additional requirements specified below

Additional Completion Requirements

HCDE Electives (25 credits): See department for list of approved HCDE electives.

Bachelor of Science in Human Centered Design and Engineering degree: Data Science

Credential Overview

The emerging field of Data Science encompasses a broad set of interdisciplinary skills including data management, programming, statistics, machine learning, visualization, and human-centered design. In today's workforce there is increasing demand for a new class of data scientists with expertise in managing, modeling, and visualizing the massive, noisy, and heterogeneous datasets that arise across many areas of science and industry. The University of Washington has become a leader in the inclusion of human-centered skills in Data Science curriculum. The Data Science degree option in the Department of Human Centered Design & Engineering will

educate undergraduate students in all aspects of the field of Data Science, increase their marketability in the workplace, and enable them to contribute to solutions to the many critical data-intensive problems in the world today.

Completion Requirements

180 credits

General Education Requirements

General Education Requirements

Areas of Inquiry (80 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (30 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 30 credits
2. *Natural Sciences (NSc) (50 credits)*
 - a. Mathematics (minimum 15 credits; see list of qualifying courses on HCDE website)
 - b. Sciences (minimum 15 credits; see list of qualifying courses on HCDE website)

Major Requirements

82 credits

1. *HCDE Core (41 credits)*: HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493
2. *Engineering Fundamentals (minimum 12 credits)*: one course from CSE 121, CSE 122, CSE 123, CSE 142, or CSE 160; see department website for approved list of additional courses
3. *Experiential Learning (4 credits)*: See department website for list of approved courses
4. Additional requirements specified below

Additional Completion Requirements

Option specific credits (25 credits): CSE 123 (or CSE 143), HCDE 411, SOC 225, and at least one in each of the three course areas: machine learning; data management; and statistics. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements. CSE 123 (or CSE 143) satisfies the Engineering Fundamentals requirement and is not included in the minimum credit requirement.

Additional Information

Student Outcomes and Opportunities

- *Expected Outcomes*: HCDE BS graduates contribute to society by applying design and engineering processes to solve problems through a deep understanding of people and their contexts. In particular, they are leaders in:
 - Investigating people and systems, using quantitative and qualitative

- methods, to identify opportunities for new systems and strengths and weaknesses of existing systems.
- Designing, building, and evaluating systems according to a variety of perspectives, with an emphasis on understanding the relationships between social and technical elements of systems.
- Bringing ideas to actualization through expertise in design strategy and processes, effective communication and collaboration skills, and ethical perspectives.
- Identifying and learning new skills, perspectives, and tools that help them and others accomplish their goals.

The Department of Human Centered Design and Engineering prepares students to assume positions in industry, government, and non-profit organizations and to apply to graduate programs.

- *Instructional and Research Facilities*: Department facilities include the HCDE Design Laboratory and Laboratory for Usability Testing and Evaluation (LUTE).
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: HCDE undergraduates are required to complete at least one 3-credit internship. The supervised internship must be approved by the faculty internship adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program.

Additionally, undergraduates work in research groups with HCDE faculty and graduate students.

- *Department Scholarships:* HCDE selects one recipient of a College of Engineering Scholarship annually. The criteria for this scholarship are the applicant's academic history and likelihood for success in the technical communication field.
- *Student Organizations/Associations:* Students in the HCDE degree program participate in student activities such as the HCDE Student Association, the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

Of Special Note: The HCDE department is an inclusive, interdisciplinary academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by HCDE faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Graduate Programs

Program of Study: Doctor of Philosophy (Human Centered Design and Engineering)

Program Overview

An engineering degree. The program provides experience for students interested in studying the conception, design, implementation, use, evaluation, and effects of technologies. HCDE's interdisciplinary faculty hold graduate degrees from fields such as computer science, industrial

engineering, information studies, design, education, English, linguistics, public policy, and technology and society studies. The faculty's research and teaching focus on six areas of study: influencing awareness, thinking, and behavior; design for emergent collaborations and organizations; low resource and underserved populations; material and embodied technologies, and ubiquitous computing; data visualization and big data; and learning in professional and technical environments. Early in the program, students may explore different topics and research areas through directed research groups and other independent projects. Goals: Prepare graduates for a career as researchers, teachers, and intellectual leaders in the discipline of HCDE Enable graduates to develop theoretical frameworks, apply investigative methods, and translate theory and research findings into technical or strategic innovations in the field of HCDE Foster development and dissemination of new knowledge in HCDE Foster development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in HCDE

This program of study leads to the following credential:

- Doctor of Philosophy (Human Centered Design and Engineering)

Admission Requirements

Graduate degree program admission requirements vary. Please see this program's [Graduate Admissions Page](#) for specific requirements.

Doctor of Philosophy (Human Centered Design and Engineering)

Completion Requirements

90 credits

1. *Foundations (6 credits)*: HCDE 541, HCDE 543
2. *Theory (12 credits)*: HCDE 542, HCDE 546, one additional theory elective from course list maintained by the program
3. *Methods (12 credits)*: HCDE 544, HCDE 545, one additional methods elective from course list maintained by the program
4. *Concentration (12 credits)*: Identified between student and advisor
5. *Research Group (10 credits)*: HCDE 596
6. *Dissertation (27 credits)*: HCDE 800
7. *Electives (11 credits)*: To meet required credit total

Program of Study: Master of Science in Human Centered Design and Engineering

Program Overview

The department offers a Master of Science in Human Centered Design and Engineering (MS HCDE) - an engineering degree. An evening program is offered through UW Educational Outreach, serving full time and part time students. Upon completion of the HCDE MS degree, students assume leadership roles in human-centered design and engineering in academia, industry, government, and non-profits. HCDE MS graduates are able to: Evaluate and understand human needs as a basis for designing and engineering new technologies. Master conceptual frameworks that motivate interdisciplinary research and

design in HCDE. Select and critically evaluate user research methods for a variety of stakeholders and product contexts. Create visual, interactive, experience, and systems designs and prototypes. Translate organizational requirements into interface and product solutions, while accounting for all stakeholder perspectives and working ethically and collaboratively. Communicate effectively in oral, written, and visual forms, while scaling communications to audience needs and sociotechnical contexts.

This program of study leads to the following credentials:

- Master of Science in Human Centered Design and Engineering
- Master of Science in Human Centered Design and Engineering (fee-based)

Admission Requirements

Graduate degree program admission requirements vary. Please see this program's [Graduate Admissions Page](#) for specific requirements.

Master of Science in Human Centered Design and Engineering

Completion Requirements

50 credits

1. *Core courses (24 credits)*: HCDE 501, HCDE 516 OR HCDE 519, HCDE 517, HCDE 518, HCDE 592, HCDE 593
2. *Strategy (at least 4 credits)*: Course list maintained internally by the program.
3. *Design (at least 4 credits)*: Course list maintained internally by the program.
4. *Engineering (at least 4 credits)*: Course list maintained internally by the program.

5. *HCDE Electives (to meet required total credits)*: Course list maintained internally by the program.

Industrial and Systems Engineering

G6 [Mechanical Engineering Building](#)

206-543-1427

[Website](#)

[Faculty Website](#)

Industrial and systems engineering (ISE) prepares students for careers in an increasingly diverse, dynamic, and technological world. Industrial and systems engineers integrate a systems approach to design and engineering, by integrating people, materials, information, equipment and energy to design, implement, and improve systems. Industrial and systems

engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing. The most distinctive aspect of industrial engineering is the flexibility it offers. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

ieadvise@uw.edu

Program of Study: Major: Industrial Engineering

Program Overview

The Industrial & Systems Engineering curriculum focuses on system integration and methods to analyze, design, and improve manufacturing and service systems. The first two years include pre-engineering courses, basic mathematics, natural science, engineering fundamentals, humanities and social science. The last two years are devoted to studies in operations research, including optimization and stochastic models, manufacturing engineering, production planning and plant layout, human factors and human interface technology, statistics and design of experiments, quality and reliability engineering, and a comprehensive senior design experience. Industrial & Systems Engineering students are encouraged to take a systems view when solving problems, recognize the

organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative.

This program of study leads to the following credentials:

- Bachelor of Science in Industrial Engineering degree
- Bachelor of Science in Industrial Engineering degree: Data Science

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition

3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is competitive.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements for application: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); A A 210; 5 credits English composition. All courses completed prior to application deadline.

In addition, CHEM 152 (or CHEM 153 or CHEM 155); PHYS 123 (or PHYS 143); and CEE 220 or ME 230 completed with minimum 2.0 grades prior to autumn quarter

3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete MATH 207 (unless MATH 135 is completed), MATH 208 (unless MATH 136 is completed), and CSE 122 (or CSE 142) prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to complete a rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Bachelor of Science in Industrial Engineering degree

Credential Overview

The BSIE curriculum focuses on system integration and methods to analyze, design, and improve manufacturing and service systems. The first two years include pre-engineering classes such as basic mathematics, chemistry, physics, engineering fundamentals, technical writing, humanities and social science. The last two years are devoted to studies in operations research, including optimization and stochastic models, manufacturing engineering, production planning and plant layout, human factors and human interface technology, statistics and design of

experiments, quality and reliability engineering, and a comprehensive senior design experience.

Completion Requirements

180 credits

General Education Requirements

1. *Basic Skills* (20 credits)
 - a. *Written and Oral Communication* (12 credits)
 - i. English Composition: 5 credits from the University list
 - ii. Writing: ENGR 231; 4 remaining credits met by coursework in the major
 - b. *Reasoning (RSN)* (5 credits): met by program requirements
 - c. *Diversity (DIV)* (3 credits): courses may also apply to an Areas of Inquiry requirement
2. *Areas of Inquiry* (79-81 credits)
 - a. *Arts & Humanities (A&H) and Social Sciences (SSc)* (30 credits)
 - i. A&H(10 credits)
 - ii. SSc (10 credits)
 - iii. Additional credits in A&H or SSc to bring total to 30 credits
 - b. *Natural World (NSc)* (49-51 credits)
 - i. Mathematics (18-24 credits) complete one of the following:
 1. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208; IND E 315
 2. MATH 134, MATH 135, MATH 136, IND E 315
 - ii. Sciences (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - iii. Additional NSc credits as necessary to reach 49 credits

Major Requirements (87-93 credits)

1. *Engineering Fundamentals (28 credits)*: CSE 122 (or CSE 142); MSE 170; A A 210; E E 215; CEE 220; M E 230; IND E 250
2. *Industrial Engineering Core (37 credits)*: IND E 310, IND E 311, IND E 316/STAT 316, IND E 321, IND E 337, IND E 338, IND E 351, IND E 491, IND E 494, IND E 495
3. *Production Requirement (4 credits)*: IND E 430 or IND E 439
4. Additional requirements specified below
5. Grade Requirements: Minimum 2.00 cumulative GPA in all courses applied to the major, with no grade below 1.0 in these courses.

Additional electives to reach 180 credits

Additional Completion Requirements

20 credits

1. Advanced Industrial Engineering Topics (4 credits): one of IND E 412, IND E 427, or IND E 455/HCDE 455
2. Additional Technical Electives (16 credits): See adviser for approved list of additional technical electives.

Additional electives to reach 180 credits

Additional Completion Requirements

Option specific credits (18-24 credits)

1. Data Science Core (11-14 credits): one of CSE 123, CSE 143, CSE 160, or CSE

163; IND E 427; one of SOC 225, INFO 350, or HCDE 410

2. Data Science Technical Electives (7-10 credits): At least one class each from approved courses in two of the following three areas: data analytics, data management and data visualization. See adviser for approved list of data science electives.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Industrial and systems engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate, and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and

methods of engineering analysis and design.

- *Instructional and Research Facilities:* Industrial and systems engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and the Center for Engineering Learning and Teaching.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students have the opportunity to pursue cooperative and internship programs at the College level through the College's Engineering Co-op Program.
- *Department Scholarships:* ISE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.
- *Student Organizations/Associations:* Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the ISE National Honor Society, Alpha Pi Mu; and the IE Student Advisory Board.

[Faculty Website](#)

mse@u.washington.edu

Materials science and engineering (MSE) is an interdisciplinary field where the scientific fundamentals of materials, their structure and properties, and their design and processing for real world applications are explored. Developing new equipment for materials development, and exploring new uses for existing and new materials are also essential tasks of MSE, particularly to meet the needs of modern technology. Examples

of materials science research and applications development occurring in the MSE department include developing biomaterials for tissue engineering; composites and metals for aerospace; ceramics for energy applications; computational techniques for materials development; eco-materials for green technologies; genetically engineered molecules and semiconductors for electronics; magnetic materials for information storage/processing, biomedicine and energy conversion; and polymers for telecommunications and solar energy.

2. Minimum course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122 (or PHYS 141, PHYS

142); 5 credits English composition. All courses completed prior to application deadline. In addition, AMATH 301 (or CSE 122 or CSE 142); MATH 207 (unless MATH 135 is completed); and MSE 170 completed with minimum 2.0 grades prior to autumn quarter

3. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete A A 210, CEE 220, ENGR 231, MATH 208 (unless MATH 136 is completed), and PHYS 123 (or PHYS 143) prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall academic record, demonstrated ability to complete a rigorous courseload, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy contact the department adviser or refer to the department website.

Bachelor of Science in Materials Science and Engineering degree

Credential Overview

The Bachelor of Science in Materials Science and Engineering offers enrolled students exploration in the scientific fundamentals of materials, their structure and properties, and their design and

processing for real world applications. Students also study the development of new equipment for materials development, and exploration of new uses for existing and new materials. Students study the fundamentals of engineering and science, spend their Junior studying core MSE concepts, and spend their Senior year on research and electives in areas of interest. Preparing our students for the wide variety of jobs that await them is our highest priority. Our graduates find employment in the aerospace, automotive, biomedical, chemical, construction, electronics, energy and telecommunication industries. We are proud to lay the foundations for successful careers in many sectors of the economy, from academia to industry.

Completion Requirements

Minimum 180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communications (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (79-86 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)

- c. Additional credits in A&H or SSc to bring total to 24 credits
- 2. *Natural Sciences (NSc) (55-62 credits)*
 - a. Mathematics (24-25 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208; one from MATH 209, MATH 224, MATH 318, IND E 315, or STAT 390
 - ii. MATH 134, MATH 135, MATH 136; one from MATH 209, MATH 224, MATH 318, IND E 315; additional MATH, IND E, or STAT courses to reach 24 credits
 - b. Sciences (31-37 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153); or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); two additional natural science courses from the department's approved list

Additional Completion Requirements

Major Requirements (93 credits)

- 1. *Engineering Fundamentals (24 credits)*: one course from CSE 122, CSE 142, or AMATH 301; MSE 170; A A 210; CEE 220; 8 credits of additional engineering elective courses from the department's list of approved courses.
- 2. *Materials Science and Engineering Core (54 credits)*: MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499 (4)
- 3. *Technical Electives (15 credits)*: See department advising office for list of acceptable courses.

- 4. *Grade Requirement*: Minimum 2.00 departmental cumulative GPA

Bachelor of Science in Materials Science and Engineering degree: Nanoscience and Molecular Engineering

Credential Overview

The Bachelor of Science in Materials Science and Engineering, with an option in Nanoscience and Molecular Engineering (NME) offers enrolled students exploration in the scientific fundamentals of materials, their structure and properties, and their design and processing for real world applications. Students also study the development of new equipment for materials development, and exploration of new uses for existing and new materials. In this degree Option, students devote all of their MSE electives and their Senior Project to the subjects of nanoscience and molecular engineering. NME students study the fundamentals of engineering and science, spend their Junior studying core MSE concepts, and spend their Senior year on research and NME coursework. Our NME option students find employment in all areas of MSE, but are naturally focused on putting their NME skills to work. We are proud to lay the foundations for successful careers in many economic sectors, from academia to industry.

Additional Admission Requirements

Option specific admission

Admission is by self-selection and normally occurs after completion of NME 220 and NME 221, completion of the major prerequisite courses, and formal admission to the MSE major. Transfer students should

indicate an interest on their major application and discuss their interests/background in the application personal statement.

Completion Requirements

Minimum 180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communications (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (79-86 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (55-62 credits)*
 - a. Mathematics (24-25 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207, MATH 208; one from MATH 209, MATH 224, MATH 318, IND E 315, or STAT 390
 - ii. MATH 134, MATH 135, MATH 136; one from MATH 209, MATH 224, MATH 318, IND E 315; additional MATH, IND E,

or STAT courses to reach 24 credits

- b. Sciences (31-37 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); two additional natural science courses from the department's approved list

Additional Completion Requirements

Option Requirements (97 credits)

1. *Engineering Fundamentals (24 credits):* one course from CSE 122, CSE 142, or AMATH 301; MSE 170; A A 210; CEE 220; 8 credits of engineering elective courses from the department's list of approved courses.
2. *Materials Sciences and Engineering Core (54 credits):* MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499 (4). The senior project (MSE 499) must be in an NME area.
3. *Nanoscience and Molecular Engineering Courses (19 credits):* NME 220, NME 221, NME 321, NME 421; additional approved nanoscience and molecular engineering electives to reach 19 credits. See adviser for list of approved electives.
4. *Grade Requirements:* Minimum 2.00 departmental cumulative GPA

Program of Study: Minor: Materials Science and Engineering

Program Overview

Materials Science & Engineering offers a minor to provide enrolled students with the necessary fundamental materials science and engineering skills to enable specialized work with materials within their major discipline upon graduation, or to prepare for graduate studies in Materials Science & Engineering at the UW or elsewhere.

This program of study leads to the following credential:

- Minor in Materials Science and Engineering

Minor in Materials Science and Engineering

Credential Overview

The Materials Science & Engineering minor provides students with the necessary fundamental materials science and engineering skills to enable specialized work with materials within their major discipline upon graduation, or to prepare for graduate studies in Materials Science & Engineering at the UW or elsewhere. Courses for the MSE minor are particularly chemistry- and physics- intensive so foundational skills in these disciplines are essential for success.

Completion Requirements

30 credits

1. MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362

2. Minimum 2.0 grade required for each course

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 207, and MATH 208 (or MATH 134, MATH 135, MATH 136); CHEM 142, CHEM 152 (or CHEM 143, CHEM 153, or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); MSE 170; English composition. Students should take these courses before beginning the minor program.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands-on experience, oral and written communication, and teamwork, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, clean energy sector, electronic manufacturing, materials processing, and transportation. The Bachelor of Science in Materials Science and Engineering degree program is

accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Refer to department website for more information about MSE undergraduate program educational objectives and student outcomes.

- *Instructional and Research Facilities:* Department research facilities and labs are detailed on the department website.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Refer to department website for more information.
- *Research, Internships, and Service Learning:* All undergraduate students complete a research requirement for graduation. Refer to department website for more information. Students interested in earning credit for internships register for the Career Center @ Engineering Internship program.
- *Department Scholarships:* The department awards scholarships annually through the College of Engineering scholarship process. Refer to department website for more information.
- *Student Organizations/Associations:* Refer to department website for information.

Mechanical Engineering

143 [Mechanical Engineering Building](#)
206-543-5090

[Website](#)

[Faculty Website](#)

merecept@uw.edu

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non-technical professions.

Undergraduate Program

Program of Study: Major: Mechanical Engineering

Program Overview

Undergraduate programs in Mechanical Engineering explore fundamental principles of mechanical engineering and their application to modern technological problems. Students collaborate on interdisciplinary work where they research and design creative, leading-edge solutions to these problems. Our curriculum focuses on the study of dynamics, controls, and robotics; manufacturing processes and advanced materials; energy and environmentally-friendly "green" engineering; engineering for health with biotechnologies and biomechanics.

This program of study leads to the following credentials:

- Bachelor of Science in Mechanical Engineering degree
- Bachelor of Science in Mechanical Engineering degree: Biomechanics
- Bachelor of Science in Mechanical Engineering degree: Mechatronics
- Bachelor of Science in Mechanical Engineering degree: Nanoscience and Molecular Engineering

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-

to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Other Current UW Students and Transfer Students

Current UW students without Engineering Undeclared status and transfer students may apply. Admission is capacity constrained.

1. Admission is for autumn quarter only. Application deadline: April 5
2. Minimum course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142 (or CHEM 143 or CHEM 145); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); A A 210; 5 credits English composition. All courses completed prior to application deadline. In addition, CHEM 152 (or CHEM 153 or CHEM 155), CEE 220, and ME 230 completed with minimum 2.0 grades prior to autumn quarter.
3. Minimum 60 credits completed by application deadline
4. Grade requirements: Minimum 2.0 grade in each course required for application; minimum 2.50 cumulative GPA in courses required for application

Students are encouraged to complete MATH 207 (unless MATH 135 is completed), MATH 208 (unless MATH 136 is completed), PHYS 123 (or PHYS 143), and ME 123 prior to autumn quarter.

Factors considered include performance in prerequisite courses, quality of overall

academic record, demonstrated ability to handle rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Bachelor of Science in Mechanical Engineering degree

Credential Overview

The Mechanical Engineering bachelor of science degree provides students with background in energy and fluid mechanics, dynamics, combustion, vibration, design, manufacturing processes, systems modeling and simulation, mechatronics, robotics, mechanics of materials, rapid prototyping, and composites, providing the students the background needed to pursue careers in Mechanical Engineering or to enter into graduate studies.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (73-75 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (49-51 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, MATH 224, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, MATH 224, or AMATH 353
 - b. Sciences (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Additional NSc credits as necessary to reach 49 credits

Major Requirements

95-105 credits

1. *Engineering Fundamentals (31-33 credits)*: A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or STAT 290 or STAT 390); M E 123; M E 230; MSE 170
2. *Mechanical Engineering Core Courses (46 credits)*: M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 493 (or M E 414/E E 414), M E 494, M E 495
3. Additional requirements specified below
4. Minimum 2.00 cumulative GPA

Additional Completion Requirements

Electives (19 credits): See department for approved list of engineering electives.

Bachelor of Science in Mechanical Engineering degree: Biomechanics

Credential Overview

Biomechanics is the study of the mechanical laws relating to the movement or structure of living organisms. This field represents the broad interplay between mechanics and biological systems, from the nano scale to whole-body systems. Research in biomechanics enhances our understanding of health, function and disease in living systems and can also serve as inspiration for engineering innovations. Biomechanics can inform and improve the design of medical devices, robotics, athletic equipment, and other applications.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits):* met by program requirements
3. *Diversity (DIV) (3 credits):* courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (73-75 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)

 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (49-51 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, MATH 224, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, MATH 224, or AMATH 353
 - b. Sciences (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Additional NSc credits as necessary to reach 49 credits

Major Requirements

95-105 credits

1. *Engineering Fundamentals (31-33 credits):* A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or STAT 290 or STAT 390); M E 123; M E 230; MSE 170
2. *Mechanical Engineering Core Courses (46 credits):* M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 493 (or M E 414/E E 414), M E 494, M E 495
3. Additional requirements specified below
4. Minimum 2.00 cumulative GPA

Additional Completion Requirements

Option specific credits (19 credits): ME 411 and ME 419; 6+ credits of biomechanics electives and remaining credits of supporting electives. See department for approved lists.

Bachelor of Science in Mechanical Engineering degree: Mechatronics

Credential Overview

The Mechatronics option of the Mechanical Engineering bachelor of science degree focuses on the integration of mechanical, electrical, and computer technologies into the design of complex products.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (73-75 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)

- c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (49-51 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, MATH 224, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, MATH 224, or AMATH 353
 - b. Sciences (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Additional NSc credits as necessary to reach 49 credits

Major Requirements

95-105 credits

1. *Engineering Fundamentals (31-33 credits)*: A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or STAT 290 or STAT 390); M E 123; M E 230; MSE 170
2. *Mechanical Engineering Core Courses (46 credits)*: M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 493 (or M E 414/E E 414), M E 494, M E 495
3. Additional requirements specified below
4. Minimum 2.00 cumulative GPA

Additional Completion Requirements

Option specific credits (18-20 credits): ME 471, M E 473, M E 477; two of M E 469, M E 470, M E 478, M E 480, PHYS 334, PHYS 335

Bachelor of Science in Mechanical Engineering degree: Nanoscience and Molecular Engineering

Credential Overview

The Nanoscience and Molecular Engineering option of the Mechanical Engineering bachelor of science degree integrates nanoscience and molecular engineering into the mechanical engineering curricula via an interdisciplinary approach involving nanoscale principles.

Additional Admission Requirements

Option specific admission

Admission is by self-selection and normally occurs upon completion of NME 220, all mechanical engineering prerequisites, and formal admission to the mechanical engineering major. A small number of advanced students (either UW or transfer) may be admitted. Admission is based on academic record including grades in NME 220, mechanical engineering courses taken, and prior experience/work in the field of nanoscience or molecular engineering. Students indicate an interest on their application and discuss their interests and background in the essay.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list

- b. Writing: ENGR 231; remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (73-75 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24 credits
2. *Natural Sciences (NSc) (49-51 credits)*
 - a. Mathematics (18-24 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352); one of MATH 209, MATH 224, or AMATH 353
 - ii. MATH 134, MATH 135, MATH 136; one of MATH 209, MATH 224, or AMATH 353
 - b. Sciences (25-27 credits): CHEM 142, CHEM 152 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143)
 - c. Additional NSc credits as necessary to reach 49 credits

Major Requirements

95-105 credits

1. *Engineering Fundamentals (31-33 credits)*: A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or STAT 290 or STAT 390); M E 123; M E 230; MSE 170

2. *Mechanical Engineering Core Courses (46 credits)*: M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 493 (or M E 414/E E 414), M E 494, M E 495
3. Additional requirements specified below
4. Minimum 2.00 cumulative GPA

Additional Completion Requirements

Option specific credits (26 credits): NME 221, NME 321, and NME 421; M E 410, M E 411; 13 credits of approved nanoscience and molecular engineering electives. See department for approved list.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - *Success in the Profession*. The department's goal is success for its graduates in industry, research, and academic careers by virtue of skills and attributes learned in the program. Graduates succeed in their professional and academic positions by:
 - using fundamental science and analysis to solve engineering problems,
 - successfully executing engineering designs, and
 - performing effectively in design teams, in the use of management tools, and through effective oral, written, and graphical communication.
 - *Contribution to Society*. Graduates should be critical thinkers in the tradition of the broad liberal arts education. They succeed in this goal by being able to:
 - think critically, in the sense of broadly educated individuals (i.e., be informed evaluators/consumers of information),
 - perform independent, informed analysis on issues inside and outside of technology, and
 - continue lifelong learning.
- The BSME program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:
 - An ability to apply knowledge of mathematics, science, and engineering
 - An ability to design and conduct experiments, as well as to analyze and interpret data
 - An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
 - An ability to function on multi-disciplinary teams
 - An ability to identify, formulate, and solve engineering problems
 - An understanding of professional and ethical responsibilities
 - An ability to communicate effectively
 - The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

- A recognition of the need for, and an ability to engage in, life-long learning
- Knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
- Each student's success is measured by demonstration of the following learning outcomes:
 - Ability to apply this knowledge to the formulation and solution of mechanical engineering problems
 - Ability to design thermal and mechanical components to achieve a desired goal. Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.
 - An understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication
 - Ability to conduct computer-based design and analysis in engineering applications
 - Exposure to a general education program that aids in the understanding of and increases the appreciation for the "non-technical" world
 - Realization of the business environment in which engineering is practiced.
 - Awareness and necessity of continuing education, graduate study, and other lifelong learning experiences
 - Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; healthcare; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.
- *Instructional and Research Facilities:* The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of

- Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department participates in the College of Engineering Co-op Program. The Center for Career Services also lists internship opportunities.
 - *Department Scholarships:* The department offers approximately forty scholarships each year. Scholarship applications are available on the College of Engineering website. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.
 - *Student Organizations/Associations:*
 - American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE)
 - American Society of Mechanical Engineers (ASME)
 - Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
 - Society of Automotive Engineers (SAE)
 - Society of Manufacturing Engineers (SME)
 - Society of Naval Architects and Marine Engineers (SNAME)
 - Society of Women Engineers (SWE)

Master of Science in Engineering (Mechanical Engineering)

Completion Requirements

42 credits

May complete a thesis option or non-thesis option

Thesis option: 30 credits of numerically graded coursework. Minimum 12 credits of 500-level numerically graded M E coursework. Max 9 credits 400-level numerically graded coursework excluding 498, 499; M E 598, 600 not allowed.

1. *Required courses (6 credits):* M E 564, M E 565
2. *Computational or Numerical Analysis (3 credits):* Course list maintained internally by the program.
3. *Thesis (12 credits):* M E 700
4. *Additional courses (to meet required credit total):* 400- and/or 500-level courses in M E or other approved departments.

Non-Thesis option: Minimum 18 credits of 500-level numerically graded M E coursework. Max 12 credits 400-level numerically graded coursework excluding 498, 499; Max 9 credits M E 598, 600.

1. *Required courses (6 credits):* M E 564, M E 565
2. *Computational or Numerical Analysis (3 credits):* Course list maintained internally by the program.
3. *Additional courses (to meet required credit total):* 400- and/or 500-level courses in M E or other approved departments.

Master of Science in Engineering (Mechanical Engineering) (fee-based)

Completion Requirements

4. *Additional courses (to meet required credit total):* 400- and/or 500-level courses in M E or other approved departments.

Non-Thesis option: Minimum 18 credits of 500-level numerically graded M E coursework. Max 12 credits 400-level numerically graded coursework excluding 498, 499; Max 9 credits M E 598, 600.

1. *Required courses (6 credits):* M E 564, M E 565
2. *Computational or Numerical Analysis (3 credits):* Course list maintained internally by the program.
3. *Additional courses (to meet required credit total):* 400- and/or 500-level courses in M E or other approved departments.

Additional Completion Requirements

Option-specific requirements: in addition to the requirements above, students must complete the following

1. *One course from three out of the four following areas (9 credits):*
 - a. Software development for data science: Course list maintained internally by the program.
 - b. Statistics and machine learning: Course list maintained internally by the program.
 - c. Data management and data visualization: Course list maintained internally by the program.
 - d. Department specific requirement: Course list maintained internally by the program.
2. *Two quarters of eScience Community Seminar (2 credits):* CHEM E 599F
3. *One additional quantitative methods course (3 credits):* Course list maintained internally by the program.
4. *Additional courses (to meet required credit total):* 400- and/or 500-level courses in M E or other approved departments.

College of the Environment

[Website](#)

Rapidly changing interactions between the Earth's environment and human activities drive the research and teaching at the College of the Environment. By connecting some of the world's leading educators and researchers with students, practitioners, and citizens, the College cultivates communities that work with and learn from each other as they tackle the environmental challenges of the twenty-first century.

The College is home to one of the strongest constellations of environmental and intellectual talent in the world. The College fosters collaborations between faculty, staff, and students who are engaged in the study of the solar system and the Earth's dynamic land, water, and atmosphere; the development and application of engineering and technological advances; and the impact of policy and human dimensions on the environment and the management of natural resources.

Offering more than 20 degree programs, ranging from bachelor to doctoral, and granting more than 500 degrees annually, the College is comprised of the following core units:

- School of Aquatic and Fishery Sciences
- Department of Atmospheric Sciences
- Department of Earth and Space Sciences
- Program on the Environment
- School of Environmental and Forest Sciences
- Marine Biology
- School of Marine and Environmental Affairs
- School of Oceanography

- Center for Quantitative Science
- Climate Impacts Group
- Friday Harbor Laboratories
- Cooperative Institute for Climate, Ocean and Ecosystem Studies
- Quaternary Research Center
- Program on Climate Change
- UW Botanic Gardens
- Washington Sea Grant Program

Undergraduate Programs

The College offers eight undergraduate degree programs. For more information about these programs, refer to the [UW degree program catalog](#).

General Education Requirements

The following general education requirements apply to all undergraduate degree programs.

Minimum 85 credits

- *Written & Oral Communication*: One 5-credit English composition (C) course from the approved University list with a minimum 2.0 grade; 10 additional writing credits.
- *Reasoning (RSN)*: 10 credits. See departmental lists for specific reasoning requirements.
- *Diversity (DIV)*: 3 credits from the approved University list; may overlap with other Areas of Inquiry requirements.
- *Areas of Inquiry*

- *Arts & Humanities (A&H)*: 10 credits. Includes courses such as literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the A&H requirement. (May substitute first-year language courses for A&H requirements by completing a third quarter of a three-course sequence. Language courses at the second-year level and beyond may be counted toward the A&H requirement.)
- *Social Sciences (SSc)*: 20 credits, with at least 10 credits out of major*. Includes courses in subjects such as history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions.
- *Natural Sciences (NSc)*: 20 credits, with at least 10 credits out of major*. See departmental list for specific Natural Sciences requirements.
- *Additional Areas of Inquiry*: 10 credits

* Definition of "out of major": Course must have an out-of-major prefix and may not overlap with courses required for the major. This includes cross-listed courses.

Program of Study: Minor: Quantitative Science

Program Overview

Quantitative Science is the application of mathematics and statistics to answer questions in biological and environmental sciences. The Center for Quantitative Science is an interdisciplinary program administered by the College of Environment with cooperation from the School of Aquatic

and Fishery Sciences and the School of Environmental and Forest Sciences. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the School of Environmental and Forest Sciences and the School of Aquatic and Fishery Sciences.

This program of study leads to the following credential:

- Minor in Quantitative Science

Minor in Quantitative Science

Credential Overview

The Center for Quantitative Science offers a minor for undergraduate students who are interested in applications of statistical and mathematical tools to problems in ecology, biology, renewable resource management, and the environment. Building on a foundation of calculus and statistics, courses in the minor develop advanced skills in mathematics, statistical analysis of data, and sample and experimental designs in biology and ecology.

Completion Requirements

Minimum 27 credits

1. *Core courses (24-25 credits)*: Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482; Q SCI 483 (or Q SCI 403/STAT 403)

2. *Electives (3-5 credits)*: Selected from an approved list of electives, a partial list of which includes Q SCI 210/ENVIR 210, Q SCI 403/STAT 403 (if not taken as part of core courses, above), Q SCI 454/FISH 454, Q SCI 480/STAT 480, Q SCI 483 (if not taken as part of core courses, above), Q SCI 486/STAT486. See adviser for possible additional qualifying courses.
3. A minimum 2.0 grade is required in each course taken as part of the minor.

Graduate Programs

The College offers eight master's degree programs, seven doctoral degree programs, and three graduate certificate programs. For more information about these programs, refer to the [UW degree program catalog](#).

School of Aquatic and Fishery Sciences

Suite 116 [Fishery Sciences](#)

206-543-7457

[Website](#)

[Faculty Website](#)

safsdesk@uw.edu

The School of Aquatic and Fishery Sciences studies aquatic organisms, the rivers, lakes and oceans in which they live, and how we conserve them. The degree draws on the disciplines of natural history, physiology, ecology, evolution and quantitative sciences, and applies these principles to conservation and management of natural resources. Graduates of the School of Aquatic and

Fishery Sciences are uniquely qualified for careers in universities and other educational settings, management agencies at the local to international levels, environmental consulting, and non-profit organizations.

Program of Study: Major: Aquatic and Fishery Sciences

Program Overview

The School of Aquatic and Fishery Sciences studies aquatic organisms, the rivers, lakes and oceans in which they live, and how we conserve them. The degree draws on the disciplines of natural history, physiology, ecology, evolution and quantitative sciences, and applies these principles to conservation and management of natural resources. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities and other educational settings, management agencies at the local to international levels, environmental consulting, and non-profit organizations.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Aquatic and Fishery Sciences

Recommended Preparation

Suggested First- and Second-Year College Courses: Recommended courses for first year students: English composition; calculus; CHEM 120 or CHEM 142, and CHEM 220; BIOL 180; and FISH 250

and/or FISH 101. Recommended courses for second year students: BIOL 200 and BIOL 220; Q SCI 381; FISH 310 and/or FISH 311; and any additional courses that meet the College general education requirements. Students should start FISH core courses as soon as they meet the appropriate prerequisites.

Admission Requirements

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

Bachelor of Science degree with a major in Aquatic and Fishery Sciences

Credential Overview

The School of Aquatic and Fishery Sciences studies aquatic organisms, the rivers, lakes and oceans in which they live, and how we conserve them. The degree draws on the disciplines of natural history, physiology, ecology, evolution and quantitative sciences, and applies these principles to conservation and management of natural resources. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities and other educational settings, management agencies at the local to international levels, environmental consulting, and non-profit organizations.

Completion Requirements

1. *Foundation Courses (50-55 credits)*
 - a. *Mathematics (15 credits):* either MATH 124 and MATH 125, or Q SCI 291 and Q SCI 292; Q SCI 381

- b. *Chemistry (9-10 credits)*: either CHEM 120 or CHEM 142; either CHEM 152, CHEM 220, CHEM 223, or OCEAN 295
 - c. *Biology (15 credits)*: BIOL 180, BIOL 200; either BIOL 220 or FISH 270/OCEAN 270/MARBIO 270
 - d. *Physics (4-5 credits)*: either PHYS 114 or PHYS 121
 - e. *Two of the following (7-10 credits)*: either PHYS 115 or PHYS 122; either PHYS 116 or PHYS 123; OCEAN 210; GEOG 205; ATM S 211; OCEAN 230/ESS 230; OCEAN 285; FISH 330/ENVIR 330; ENVIR 313/ESS 315. See adviser for other acceptable courses in this category.
2. *Core (minimum 29 credits)*
 - a. FISH 290; FISH 300/OCEAN 300/MARBIO 300; FISH 310; FISH 311/BIOL 311
 - b. Minimum 15 credits from three of the following: FISH 312, FISH 323, FISH 324, and FISH 340/BIOL 340
 3. *Electives (minimum 16 credits, four courses)*: 400-level courses from within the School of Aquatic and Fishery Sciences for the major, excluding FISH 453/OCEAN 453, and FISH 477/BIOL 477/OCEAN 477
 - a. Maximum 3 credits total from FISH 479/BIOL 479/OCEAN 479, FISH 492/FHL 492/MARBIO 492, FISH 498, FISH 499
 - b. Maximum 5 credits from each of FISH 489 and FISH 491
 4. *Capstone (7-13 credits)*: FISH 493, FISH 494, FISH 495
 5. Minimum 2.00 cumulative GPA in all core, elective, and capstone courses applied to the major.

Program of Study: Minor: Aquatic and Fishery Sciences

Program Overview

The Minor in Aquatic and Fishery Sciences is designed for students with an interest in studying aquatic organisms and their habitats in conjunction with a general interest or other natural science major.

This program of study leads to the following credential:

- Minor in Aquatic and Fishery Sciences

Minor in Aquatic and Fishery Sciences

Credential Overview

The Minor in Aquatic and Fishery Sciences is designed for students with an interest in studying aquatic organisms and their habitats in conjunction with a general interest or other natural science major.

Completion Requirements

Minimum 28 credits

1. Three courses (two of which must be at least at the 300-level) from FISH 101, FISH 250, FISH 310, FISH 311, FISH 312, FISH 323, and FISH 324
2. Q SCI 381 or Q SCI 482
3. Minimum two upper-division FISH courses totaling at least 8 credits
4. Maximum 11 credits may overlap with a student's major

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Aquatic and fishery sciences is a life science major designed to provide students a broad framework of knowledge and sets of skills for employment in a variety of areas (e.g., natural resource management, environmental consulting, fish or aquatic wildlife biology, aquaculture). In addition, students receive excellent preparation for graduate study in a number of life science fields. Expected student outcomes include:
 - Skills in written and oral communication, data analysis, field and laboratory skills. Skill sets have been integrated into all core and flagship courses.
 - Exposure to career paths in the field and interaction with professionals. Skills gained allow students to obtain an entry-level aquatic scientist position or admission to graduate school.
 - Emphasis in one of three focus areas (aquatic ecology, conservation and management, aquatic biology and culture); students get a broad overview, then may specialize in one of the three areas.
 - Strong encouragement to pursue multiple internship and research experiences, including opportunities like FHL research apprenticeships and Alaska Ecological Research Program.
 - Understanding not only of the science, but also the socio-political-economic environment and its impact on the field of aquatic and fishery sciences.
 - All students participate in a capstone experience that requires them to demonstrate acquired skill sets (including public presentation in an undergraduate research symposium).
- SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs in either research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or for competitive entry into applicable graduate programs worldwide.
- *Instructional and Research Facilities:* The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the school maintains various facilities off campus, including field research stations in Washington State and Alaska.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).
 - *Research, Internships, and Service Learning:* SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies (NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium) come to the school to attend weekly SAFS departmental seminars; undergraduates are encouraged to attend. The School of Aquatic and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.

- *Department Scholarships:* Scholarships are awarded on the basis of academic merit, financial need, and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines. All undergraduates, both freshmen and transfers, are considered for recruitment scholarships if they have declared AFS as their major on their application to the University of Washington.
- *Student Organizations/Associations:* SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in aquatic and fishery sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

Of Special Note:

The School of Aquatic and Fishery Sciences has sent a small group of students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

Program of Study: Major: Atmospheric Sciences

Program Overview

Atmospheric sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Atmospheric Sciences: Chemistry
- Bachelor of Science degree with a major in Atmospheric Sciences: Climate
- Bachelor of Science degree with a major in Atmospheric Sciences: Data Science
- Bachelor of Science degree with a major in Atmospheric Sciences: Meteorology

Recommended Preparation

Suggested First- and Second-Year Courses: English composition; ATM S 220; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123. The first upper-division core course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses except ATM S 220 count as electives and not as part of the major.

Admission Requirements

1. Minimum course requirements: English composition; MATH 124, MATH 125,

MATH 126; PHYS 121, PHYS 122,
PHYS 123

- Grade requirements: Minimum 2.0 grade for each course required for admission; minimum 2.50 cumulative GPA in courses required for admission

Bachelor of Science degree with a major in Atmospheric Sciences: Chemistry

Credential Overview

The Atmospheric Chemistry and Air Quality option provides students with a strong background in environmental issues such as evolving atmospheric composition and air quality through coursework that focuses on chemistry and the environment.

Completion Requirements

Minimum 97-108 credits, depending on credential/option

- Foundation requirements* (30 credits): MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123
- Core requirements* (28-29 credits): STAT 390 (or Q SCI 381 for options in meteorology, climate, chemistry); ATM S 220 (2), ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
- Additional requirements specified below
- Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Additional Completion Requirements

Option specific credits (45-48 credits)

- Requirements (39 credits)*: ATM S 458/CHEM 458; CEE 480/ATM S 480; CHEM 142, CHEM 152, CHEM 162, CHEM 223, CHEM 224, CHEM 321; ATM S 310 or CSE 160
- Electives (6-9 credits)*: minimum two courses from an approved list. See adviser for approved list of electives.

Bachelor of Science degree with a major in Atmospheric Sciences: Climate

Credential Overview

The Climate Option provides students with a strong interdisciplinary ground in environmental change through the lens of atmospheric, ocean and earth sciences.

Completion Requirements

Minimum 97-108 credits, depending on credential/option

- Foundation requirements* (30 credits): MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123
- Core requirements* (28-29 credits): STAT 390 (or Q SCI 381 for options in meteorology, climate, chemistry); ATM S 220 (2), ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
- Additional requirements specified below
- Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Additional Completion Requirements

Option specific credits (39-49 credits)

1. *Requirements (27-29 credits):* AMATH 301; ATM S 350; ATM S 358, ATM S 380, ATM S 487; ATM S 310 or CSE 160; either ESS 431 or ESS 433; either OCEAN 423 or OCEAN 450
2. *Electives (12-20 credits):* minimum four courses from an approved list. See adviser for approved list of electives.

Bachelor of Science degree with a major in Atmospheric Sciences: Data Science

Credential Overview

The Data Science Option provides students with a strong foundation in data science skills with specific applications to meteorology-, climate-, and air pollution-related careers.

Completion Requirements

Minimum 97-108 credits, depending on credential/option

1. *Foundation requirements (30 credits):* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123
2. *Core requirements (28-29 credits):* STAT 390 (or Q SCI 381 for options in meteorology, climate, chemistry); ATM S 220 (2), ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
3. Additional requirements specified below

4. Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Additional Completion Requirements

Option specific credits (31-35 credits)

Requirements (31-35 credits): CSE 143 or CSE 163; one of CSE 416/STAT 416, STAT 435, or INFO 371; SOC 225 (3); ATM S 358; MATH 207, MATH 208, MATH 209; either CSE 414 or INFO 430; either CSE 412, HCDE 411, or INFO 474

Note: Prerequisites for option specific courses could add up to 4-30 credits. See adviser for list of prerequisites.

Bachelor of Science degree with a major in Atmospheric Sciences: Meteorology

Credential Overview

The meteorology option provides students with a strong background in atmospheric dynamics, synoptic meteorology and weather forecasting.

Completion Requirements

Minimum 97-108 credits, depending on credential/option

1. *Foundation requirements (30 credits):* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123

2. *Core requirements* (28-29 credits): STAT 390 (or Q SCI 381 for options in meteorology, climate, chemistry); ATM S 220 (2), ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
3. Additional requirements specified below
4. Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Additional Completion Requirements

Option specific credits (38-41 credits)

1. *Requirements (29 credits)*: AMATH 301; ATM S 358, ATM S 441, ATM S 442, ATM S 451, ATM S 452; ATM S 310 or CSE 160
2. *Advanced Mathematics (9-12 credits)*: MATH 224; either AMATH 351 and AMATH 353, or MATH 207, MATH 208, and MATH 209

Program of Study: Minor: Atmospheric Sciences

Program Overview

Atmospheric sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society.

These problems are addressed with theory, measurements, and computer simulations.

This program of study leads to the following credential:

- Minor in Atmospheric Science

Minor in Atmospheric Science

Completion Requirements

25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.
- *Instructional and Research Facilities*: Extensive computer resources are available in the departmental computer laboratory. The department also maintains an extensive collection of weather data in graphical and numerical electronic format. A study area is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop and an electronics laboratory.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

- *Department Scholarships:* The Mindlin-Reed-Caldwell Memorial is awarded annually, based on both academic excellence and financial need.
- *Student Organizations/Associations:* Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

Graduate Programs

Program of Study: Doctor of Philosophy (Atmospheric Sciences)

This program of study leads to the following credentials:

- Doctor of Philosophy (Atmospheric Sciences)
- Doctor of Philosophy (Atmospheric Sciences: Atmospheric Sciences and Astrobiology)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Atmospheric Sciences)

Completion Requirements

90 credits

1. *Atmospheric Sciences Core (25-28 credits)*
 - a. ATM S 501, ATM S 502
 - b. ATM S 505, ATM S 509, ATM S 542; OR ATM S 503 and ATM S 504
 - c. ATM S 532, ATM S 558
 - d. ATM S 535
2. *Approved Applied Math Courses (3 credits):* Course list maintained internally by the program
3. *Electives (varies by option, see additional requirements)*
4. *ATM S Graduate Seminar (varies by option, see additional requirements)*
5. *Dissertation (27 credits):* ATM S 800

Additional Completion Requirements

Option-specific requirements

1. *ATM S Electives (8-11 credits)*
2. *Non-ATM S Electives (3 credits)*
3. *ATM S Graduate Seminar classes (to reach required total credits)*

Doctor of Philosophy (Atmospheric Sciences: Atmospheric Sciences and Astrobiology)

Completion Requirements

90 credits

1. *Atmospheric Sciences Core (25-28 credits)*
 - a. ATM S 501, ATM S 502
 - b. ATM S 505, ATM S 509, ATM S 542; OR ATM S 503 and ATM S 504
 - c. ATM S 532, ATM S 558
 - d. ATM S 535
2. *Approved Applied Math Courses (3 credits):* Course list maintained internally by the program
3. *Electives (varies by option, see additional requirements)*
4. *ATM S Graduate Seminar (varies by option, see additional requirements)*
5. *Dissertation (27 credits):* ATM S 800

Program of Study: Master of Science (Atmospheric Sciences)

This program of study leads to the following credential:

- Master of Science (Atmospheric Sciences)

Admission Requirements

Contact department for requirements.

Master of Science (Atmospheric Sciences)

Completion Requirements

38 credits

1. *Core classes (25-28 credits):* ATM S 501, ATM S 502, ATM S 532, ATM S 535, ATM S 558
 - a. Dynamics sequence: ATM S 503 and ATM S 504 OR ATM S 505, ATM S 509, ATM S 542
2. *Seminars:* Students must register for 2 credits of seminar each quarter.
3. *Approved Applied Math Courses (3 credits):* Course list maintained internally by the department.
4. Master's Thesis (10 credits): ATM S 700
5. Minimum 27 credits from graded courses numbered 500 or above; including at least 3 credits in approved applied mathematics courses and 24 in core atmospheric sciences courses.

Program on Climate Change

339A [Ocean Sciences Building](#)

206-543-6521

[Website](#)

[Faculty Website](#)

uwpsc@uw.edu

Education and research are the foundations upon which the world-class reputation of the UW Program on Climate Change is built. Since its beginnings in 2001, the PCC has

fostered the development and teaching of integrated courses, grounded in the physical sciences, with the goal of exploring a holistic and dynamic understanding of climate. Building on a strong foundation in research and graduate education, the PCC is also involved in undergraduate and high school climate education, creating the climate science minor and associated capstone course, and hosting a small, volunteer driven, speaker request program, specializing in educational presentations on understanding the climate system.

Undergraduate Program

uwpsc@uw.edu

Program of Study: Minor: Climate Science

Program Overview

The Climate Science minor provides students an interdisciplinary and flexible climate sciences pathway as part of their collegiate studies, regardless of major. A climate science capstone course is required of all enrolled students and provides students an opportunity to integrate the core climate concepts from across the earth system with discussion of the interaction of climate change with society, ecosystems, and policy.

This program of study leads to the following credential:

- Minor in Climate Science

Minor in Climate Science

Credential Overview

The Climate Science minor provides students an interdisciplinary and flexible climate sciences pathway as part of their collegiate studies, regardless of major. The curriculum is well suited to students with a strong math and physics background who are also interested in studying the earth science in the context of climate change. A climate science capstone course is required of all enrolled students and provides students an opportunity to integrate the core climate concepts from across the earth system with discussion of the interaction of climate change with society, ecosystems, and policy.

Completion Requirements

Minimum 25 credits

1. One of ESS 201, ATM S 211, or ATM S 321 (3-5 credits)
2. One of CSE 160, Q SCI 291, Q SCI 381, OCEAN 215, ATM S 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, OCEAN 452/FISH 452, or AMATH 301 (3-5 credits)
3. Integrated Capstone Experience: OCEAN 475/ATM S 475/ESS 475 (3 credits)
4. Electives: At least one course from each of at least three of the four categories below to reach 25 credits. See adviser for approved list.
 - a. Atmosphere, Energy and Emissions
 - b. Land, Glaciology and Paleoclimate
 - c. Oceans and Fisheries
 - d. People and Impacts
5. Minimum 2.00 cumulative GPA in courses applied to the minor
6. Minimum 15 credits taken through the UW

7. Minimum 18 credits outside student's major
8. Minimum 15 upper division credits
9. Students are encouraged to see adviser for assistance with course selection.

Graduate Program

Program of Study: Graduate Certificate in Climate Science

This program of study leads to the following credential:

- Graduate Certificate in Climate Science

Admission Requirements

Contact department for requirements.

Graduate Certificate in Climate Science

Completion Requirements

Earth and Space Sciences

070 [Johnson Hall](#)

206-543-1190

[Website](#)

[Faculty Website](#)

essadv@uw.edu

Earth and Space Sciences seeks to further our understanding of the Earth, the solar system, and their histories. The scope

extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; the processes affecting its landscapes, including ice and climate; natural hazards; the surrounding space environment; planetary processes; and geobiology.

Program of Study: Major: Earth and Space Sciences

Program Overview

The Bachelor of Science in Earth and Space Sciences is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. Students pursuing the B.S. in Earth and Space Sciences choose from one of four options: Geology, Biology, Physics, or Environmental Earth Sciences. The Bachelor of Arts in Earth and Space Sciences enables students to obtain a broad understanding of earth sciences as a background for professional careers such as science journalism, environmental law, science education, and environmental policy.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Earth and Space Sciences

- Bachelor of Science degree with a major in Earth and Space Sciences: Biology
- Bachelor of Science degree with a major in Earth and Space Sciences: Geology
- Bachelor of Science degree with a major in Earth and Space Sciences: Geoscience
- Bachelor of Science degree with a major in Earth and Space Sciences: Physics

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Earth and Space Sciences

Credential Overview

The Bachelor of Arts in Earth and Space Sciences is designed for students who wish to obtain a broad understanding of earth sciences as a background for professional careers such as science journalism, environmental law, science education, and environmental policy.

Recommended Preparation

Suggested First- and Second-Year College Courses: Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

Completion Requirements

88-90 credits

1. *Supporting Science (30 credits):*
 - a. *Basic Supporting Science (20 credits):* CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121.
 - b. *Additional courses:* 10 credits from department's approved list of courses

in science and mathematics. See adviser for current list.

2. *ESS Courses (43-45 credits):*
 - a. *Required courses (18-20 credits):* Two of ESS 211, ESS 212, ESS 213. One additional course from ESS 201, ESS 205, ESS 210, ESS 211, ESS 212, or ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314, or ESS 316.
 - b. *Elective Courses:* 25 upper-division credits (300 and 400 level) with at least 10 credits at the 400 level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.)
3. *Concentration (15 credits):* 15 credits from one concentration area: business, education, interdisciplinary science, law and policy, or science communication (see department for approved list). Courses counted toward this requirement cannot be used for any other major requirements. Courses not on the approved list may count toward this requirement if approved in advance by ESS Advising.
4. Minimum 2.00 cumulative GPA for all ESS-prefix courses.

Bachelor of Science degree with a major in Earth and Space Sciences: Biology

Credential Overview

The Bachelor of Science in Earth and Space Sciences: Biology Option is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The Biology Option enables students interested in paleontology and paleobiology to emphasize biology courses.

Recommended Preparation

Suggested First- and Second-Year Courses: MATH 124, MATH 125, and MATH 126 or ESS 310; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Completion Requirements

93-103 credits

1. *Science Core (35 credits)*
 - a. *Basic Supporting Science (20 credits):* MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students pursuing the ESS physics option must take PHYS 121.)
 - b. *ESS Required 200-Level Core Courses (15 credits):* ESS 211, ESS 212, ESS 213. (Students in the ESS physics option may substitute ESS 205 for one of these.)
2. *Option (58-68 credits)*
 - a. *Supporting Science (24-25 credits):* CHEM 152, CHEM 162; either both BIOL 180 and BIOL 200 or BIOL 240; and one of BIOL 220 or BIOL 240, PHYS 115/PHYS 118, PHYS 122, MATH 126 or ESS 310, STAT 290, STAT 311 or STAT 390.
 - b. *ESS Required 300-Level Core Courses (15 credits):* three of ESS 311, ESS 312, ESS 313, ESS 314, ESS 316
 - c. *ESS Upper-Division Courses (19-28 credits):* ESS 400, ESS 401, or ESS 449/BIOL 475; ESS 418; 12 credits from ESS 400-level courses, 400-level BIOL or BIOC courses from approved list (see website for current list), or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not

include independent study or seminar courses numbered ESS 489 through ESS 499. At least 3 credits from ESS-prefix courses.

3. Minimum 2.00 cumulative GPA for all ESS-prefix courses

Bachelor of Science degree with a major in Earth and Space Sciences: Geology

Credential Overview

The Bachelor of Science in Earth and Space Sciences: Geology Option is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The Geology Option enables students interested in geology and surface processes to emphasize a traditional geology curriculum and prepares students to take the Association of State Boards of Geology (ASBOG) examination and pursue eventual licensure as a Professional Geologist.

Recommended Preparation

Suggested First- and Second-Year Courses: MATH 124, MATH 125, and MATH 126 or ESS 310; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Completion Requirements

99-106 credits

1. *Science Core (35 credits)*
 - a. *Basic Supporting Science (20 credits):* MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students

- pursuing the ESS physics option must take PHYS 121.)
- b. *ESS Required 200-Level Core Courses (15 credits)*: ESS 211, ESS 212, ESS 213. (Students in the ESS physics option may substitute ESS 205 for one of these.)
2. *Option (64-71 credits)*
 - a. *Supporting Science (16-20 credits)*: MATH 126 or ESS 310; PHYS 115/PHYS 118 or PHYS 122; and two from the following: PHYS 116/PHYS 119 or PHYS 123, CHEM 152, either AMATH 351 or MATH 307, MATH 308, and either STAT 290, STAT 311, or STAT 390
 - b. *ESS Required 300-Level Core Courses (15 credits)*: ESS 311, ESS 312, ESS 316
 - c. *ESS Geology Core (7-10 credits)*: one course from ESS 439, ESS 441, ESS 455, ESS 456, or ESS 463; and one course from ESS 425, ESS 426, ESS 427, ESS 447, ESS 454, ESS 457, or ESS 482
 - d. *ESS Upper-Division Courses (26 credits)*: ESS 400 or ESS 401; ESS 418; 10 credits from ESS 400-level courses, ESS 313, or ESS 314. May not include independent study or seminar courses numbered ESS 489 through ESS 499.
 3. Minimum 2.00 cumulative GPA for all ESS-prefix courses

Bachelor of Science degree with a major in Earth and Space Sciences: Geoscience

Credential Overview

The Bachelor of Science in Earth and Space Sciences: Geoscience Option is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field

and technology experiences and problem-solving skills are an important asset. The Geoscience Earth Sciences option enables students interested in geoscience-focused courses and careers to emphasize geoscience earth sciences courses.

Recommended Preparation

Suggested First- and Second-Year Courses: MATH 124, MATH 125, and MATH 126 or ESS 310; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Completion Requirements

94-99 credits

1. *Science Core (35 credits)*
 - a. *Basic Supporting Science (20 credits)*: MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students pursuing the ESS physics option must take PHYS 121.)
 - b. *ESS Required 200-Level Core Courses (15 credits)*: ESS 211, ESS 212, ESS 213. (Students in the ESS physics option may substitute ESS 205 for one of these.)
2. *Option (59-64 credits)*
 - a. *Quantitative Skills (4-5 credits)*: MATH 126, ESS 310, STAT 290, STAT 311, STAT 390, or Q SCI 381
 - b. *Supporting Science (8-10 credits)*: PHYS 115/PHYS 118 or PHYS 122; and one of CHEM 152, AMATH 351, MATH 307, MATH 308, PHYS 116/PHYS 119, or PHYS 123
 - c. *ESS Geoscience 200-level Core (3-5 credits)*: One of ESS 201, ESS 202, ESS 203, ESS 204, ESS 205, or ESS 230
 - d. *ESS Required 300-Level Core Courses (10 credits)*: two of ESS

- 311, ESS 312, ESS 313, ESS 314, ESS 316
- e. *ESS Upper-Division Courses (34 credits)*: ESS 400 or ESS 401; ESS 418; 18 credits from ESS 400-level courses, from an approved list of courses outside ESS, or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499
3. Minimum 2.00 cumulative GPA for all ESS-prefix courses

Bachelor of Science degree with a major in Earth and Space Sciences: Physics

Credential Overview

The Bachelor of Science in Earth and Space Sciences: Physics Option is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The Physics Option enables students interested in geophysics to emphasize space sciences, physics, and geophysics courses.

Recommended Preparation

Suggested First- and Second-Year Courses: MATH 124, MATH 125, and MATH 126 or ESS 310; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Completion Requirements

98-101 credits

1. *Science Core (35 credits)*

- a. *Basic Supporting Science (20 credits)*: MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students pursuing the ESS physics option must take PHYS 121.)
 - b. *ESS Required 200-Level Core Courses (15 credits)*: ESS 211, ESS 212, ESS 213. (Students in the ESS physics option may substitute ESS 205 for one of these.)
2. *Option (63-66 credits)*
 - a. *Supporting science (34-37 credits)*: MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.
 - b. *ESS required 300-Level Core Courses (10 credits)*: two of ESS 311, ESS 312, ESS 313, ESS 314, ESS 316
 - c. *ESS Upper-Division Courses (19 credits)*: ESS 418; 15 credits from ESS 400-level courses or any ESS 300-level core course (ESS 311, ESS 312, ESS 313, ESS 314, ESS 316) not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499
 3. Minimum 2.00 cumulative GPA for all ESS-prefix courses

Program of Study: Minor: Earth and Space Sciences

Program Overview

The Minor in Earth and Space Sciences provides students maximum flexibility and interest by allowing them to sample from the full range of Earth and Space Sciences courses, including undergraduate courses in both geological sciences and geophysics. Recommended for general interest or for

non-science majors intending to pursue graduate studies in a related field.

This program of study leads to the following credential:

- Minor in Earth and Space Sciences

Minor in Earth and Space Sciences

Credential Overview

The Minor in Earth and Space Sciences provides students maximum flexibility and interest by allowing them to sample from the full range of Earth and Space Sciences courses, including undergraduate courses in both geological sciences and geophysics. Recommended for general interest or for non-science majors intending to pursue graduate studies in a related field.

Completion Requirements

30 credits

1. 30 ESS credits with at least 15 at the upper-division level (300- or 400-level) of which at least 3 credits must be at the 400-level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.)
2. All courses must be completed with a minimum grade of 2.0.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students who graduate with an undergraduate degree in Earth and Space Sciences (ESS) have achieved these learning goals:
 - Have a general knowledge of the basic areas of solid earth geology

and geophysics, geobiology, surface processes, space physics, and analogues of processes within the solar system.

- Be proficient in one of the core disciplines through the completion of requirements in one of four options: standard (geology), (geo)biology, (geo)physics, or environmental.
- Think critically and obtain quantitative predictions using skill sets that involve multiple disciplines and all core sciences.
- Have obtained hands-on experience from extensive fieldwork and/or laboratory experience.
- Have the ability to communicate scientific information clearly and precisely, both orally and in writing.
- Have the ability to read, understand, and use scientific literature.
- *Instructional and Research Facilities:* See below, at end of graduate program requirements.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors in the major). See adviser or department website for requirements.
- *State Licensing Endorsement Available:* Students interested in pursuing State Licensing for Geologists can receive guidance in course selection that meets state requirements for the geologist licensing examination (see adviser for requirements or visit department website).
- *Research, Internships, and Service Learning:* Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
- *Department Scholarships:* A limited number of departmental scholarships are

available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.

- *Student Organizations/Associations:* Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.

Graduate Programs

Program of Study: Doctor of Philosophy (Earth and Space Sciences)

This program of study leads to the following credentials:

- Doctor of Philosophy (Earth and Space Sciences)
- Doctor of Philosophy (Earth and Space Sciences: Data Science)
- Doctor of Philosophy (Earth and Space Sciences: Earth and Space Sciences and Astrobiology)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Earth and Space Sciences)

Program on the Environment

012 [John M. Wallace Hall](#)

206-616-3310

[Website](#)

[Faculty Website](#)

enviradv@uw.edu

Environmental Studies at the Program on the Environment combines natural sciences, social sciences and humanities to provide students with a deep understanding of how humans interact with and influence the environment. Students learn to think critically, conduct research, apply sustainability frameworks, and communicate to diverse audiences.

Program of Study: Major: Environmental Studies

Program Overview

Environmental Studies focuses on the interactions between humans and the environment. Building on a foundation of natural science, social science and humanities, the major offers students a flexible curriculum that includes an internship or research experience as an integral part of the capstone sequence. Concentrations for the major include Environmental Justice; Sustainability; Climate Change; Conservation of Living

Systems; Policy and Planning; Education; Communication; and Food Studies.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Environmental Studies

Recommended Preparation

Suggested First and Second-Year College Courses: ENVIR 100.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Environmental Studies

Credential Overview

Environmental Studies focuses on the interactions between humans and the environment. Building on a foundation of natural science, social science and humanities, the major offers students a flexible curriculum that includes an internship or research experience as an integral part of the capstone sequence. Concentrations for the major include Climate and Society; Conservation of Living Systems; Education and Communication; Policy and Planning; Food Studies; and Sustainability.

Completion Requirements

64-76 credits

1. *Core Courses (21 credits):* ENVIR 100, ENVIR 101, ENVIR 301, ENVIR 302, ENVIR 401

2. *Integrating Disciplines: (28-40 credits).*

Courses listed in multiple categories may count towards only one category. No more than 6 of the 8 restricted electives may be at the lower division level (100 and/or 200 level). Relevant independent study courses, study abroad credits, and other courses not listed may count towards requirement areas if approved in advance by the Environmental Studies adviser.

- a. *Analytical Methods* (3-5 credits): one course from ARCHY 208, ENVIR 310, ESRM 250, ESRM 304, ESS 420, GEOG 258, GEOG 326, GEOG 360, OCEAN 452/FISH 452, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221
- b. *Biological Systems* (3-5 credits): one course from BIOL 180, BIOL 315, BIOL 476, ENVIR 240, ENVIR 280, ESRM 350, ESRM 362/ENVIR 362, ESRM 458, ESRM 473, FHL 275, FISH 250/OCEAN 250/BIOL 250, FISH 323
- c. *Earth Systems Literacy* (3-5 credits): one course from ATM S 211, ATM S 350, CEE 250, CHEM 120, ENVIR 240, ENVIR 280, ESS 201, ESS 203, ESS 230/OCEAN 230, GEOG 205, G H 220/ENV H 220, OCEAN 450
- d. *Economics/Business* (3-5 credits): one course from ECON 200, ENVIR 439, ESRM 235/ENVIR 235/ECON 235, ESRM 320, ESRM 321, ESRM 461, ESRM 465, FISH 230/ECON 230, JSIS B 352, PUBPOL 201, PUBPOL 313, CM 335
- e. *Environmental Justice* (5 credits): one course from AIS 380, AIS 385, ANTH 211/AES 211/ENVIR 211, ANTH 325/CHSTU 322, ANTH 361, ENGL 265, ENVIR 460/ESRM 460, ENVIR 439, GEOG 272, HSTAA 221/ENVIR 221, HSTAA

308/AIS 308/ENVIR 308, PHIL 243/ENVIR 243

- f. *Policy/Governance* (3-5 credits): one course from ARCTIC 400, ENV H 473, ENVIR 460/ESRM 460, ESRM 400, ESRM 470, FISH 323, G H 418/ENV H 418, JSIS B 455, JSIS B 350/SCAND 350/ENVIR 360, POL S 384/ENVIR 384, POL S 385/ENVIR 385, SMEA 201/ENVIR 201
 - g. *Sustainability* (3-5 credits): one course from COM 325, ENV H 306, ENVIR 239, ENVIR 420, ENVIR 431/ESRM 431/PSYCH 431, ENVIR 439, ENVIR 480, G H 220/ENV H 220, GEOG 473, JSIS B 352, M E 415/ENVIR 415/CEE 495, NUTR 312/ENVIR 312
 - h. *Values and Cultures* (5 credits): one course from ANTH 210, ANTH 458, ENGL 265, ENGL 365, ENVIR 315, ENVIR 400, ESRM 371/SOC 379/ENVIR 379, HSTAA 221/ENVIR 221, HSTAS 440/JSIS A 440, JSIS B 351, ARCTIC 391/JSIS B 391, PHIL 243/ENVIR 243
3. *Capstone Experience (15 credits):* minimum 15 credits from ENVIR 490, ENVIR 491, ENVIR 492
4. *GPA Requirements:* Minimum 2.00 cumulative GPA for courses applied towards the major.

Students electing to pursue either a double major or double degree are limited to a 15 credit overlap of credits between the two major/degree programs.

Program of Study: Minor: Environmental Studies

Program Overview

The Environmental Studies minor provides a broad understanding of the environment to include economic, historical, social and ethical issues surrounding current environmental challenges. Topics span human interaction with the environment, and how environmental decisions are made. The minor complements a wide variety of majors by providing an overview of how environmental topics interplay with policy, conservation, business and education.

This program of study leads to the following credential:

- Minor in Environmental Studies

Minor in Environmental Studies

Completion Requirements

30 credits

1. ENVIR 100
2. ENVIR 200 or ENVIR 250
3. 5 credits from among ECON 235/ENVIR/235/ESRM235, HSTAA 221/ENVIR 221, and PHIL 243/ENVIR 243
4. Remaining 15 credits drawn from the environmental perspectives course list (see program website adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e. natural sciences, human and social dimensions, and policy and decision making. 10 of these 15 credits must be at the 300- or 400-level.
5. Minimum 2.0 for each course presented for the minor

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways. Students completing the BA in environmental studies have developed skills in the following:
 - Earth Systems Knowledge: Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
 - Interdisciplinary Approach: Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
 - Experiential Learning: Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
 - Communication: Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).

- Public Policy and Decision Making: Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
- Teamwork: Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
- History of Environmental Inquiry: Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
- Temporal Scales: Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
- Spatial Scales: Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.
- Diversity: Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
- Technical Knowledge: Be familiar with some of the technological tools commonly used to address environmental challenges.
- Professional Development: Understand how their education will serve them as environmental professionals.
- *Instructional and Research Facilities:* The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad.
- *Student Organizations/Associations:* SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committed to community engagement and education and creating professional development opportunities for environmental studies students.

School of Environmental and Forest Science

107 [Anderson Hall](#)

206- 543-2730

[Website](#)

[Faculty Website](#)

sefsuw@uw.edu

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues. The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world.

Program of Study: Major: Bioresource Science and Engineering

Program Overview

The Bioresource Science and Engineering (BSE) major is designed for students seeking training in chemical and physical sciences and chemical engineering as applied to manufacturing fiber products, fuels, and chemicals from biomass resources. It emphasizes the application of mathematics, chemistry, and engineering to paper and related bioresources based industries. BSE is an engineering program accredited by the Engineering Accreditation

Commission of ABET. BSE provides extensive faculty contact, active student groups, and research opportunities.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Bioresource Science and Engineering
- Bachelor of Science degree with a major in Bioresource Science and Engineering: Business Option

Recommended Preparation

Suggested First- and Second-Year School Courses: CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); ENGR 231 or HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 207 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, BSE 450.

Admission Requirements

Students may apply for freshman admission or upper-division admission. Applications are available by visiting the school website. Prospective upper-division BSE applicants should have most pre-engineering coursework completed before applying (see department website for suggested sequencing), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College

of Engineering section for advanced admission entrance and continuation requirements).

Bachelor of Science degree with a major in Bioresource Science and Engineering

Completion Requirements

General Education Requirements

Basic Skills (25 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list (ENGL 131 preferred)
 - b. Writing: ENGR 231 or HCDE 231 (3 credits); remaining 4 credits met by coursework in the major
2. *Reasoning (RSN) (10 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (98 credits)

1. *Arts & Humanities (A&H) (10 credits)*: chosen from the University A&H list
2. *Social Sciences (SSc) (20 credits)*: ECON 200; 10 credits chosen from the University SSc list (outside the major); 5 credits met by coursework in the major
3. *Natural Sciences (NSc) (68 credits)*
 - a. Mathematics (10-16 credits) complete one of the following:
 - i. MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 135, MATH 136
 - b. Sciences (37-38 credits): CHEM 152 (or CHEM 153 or CHEM 155), CHEM 162 (or CHEM 165), CHEM

- 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); A A 260
- c. Statistics (3-5 credits): one of Q SCI 381, IND E 315, or STAT 390
- d. Additional NSc credits (10-18 credits): from the University NSc list (outside the major) to reach 68 NSc credits

Major Requirements (74 credits)

1. *Bioresource Science (63 credits)*: BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 410, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.
2. *Engineering Electives (11 credits minimum)*: Taken from a list of approved engineering electives.

Free electives to reach 180 credits

Bachelor of Science degree with a major in Bioresource Science and Engineering: Business Option

Credential Overview

The required core of the Business Option provides knowledge about common business practices, including marketing, management, finance and accounting. Students also choose a course from a list to focus further in an area of business.

Completion Requirements

General Education Requirements

Basic Skills (25 credits)

1. *Written and Oral Communication (12 credits)*

- a. English Composition: 5 credits from the University list (ENGL 131 preferred)
 - b. Writing: ENGR 231 or HCDE 231 (3 credits); remaining 4 credits met by coursework in the major
2. Reasoning (RSN) (10 credits): met by program requirements
 3. Diversity (DIV) (3 credits): courses may also apply to an Areas of Inquiry requirement

Areas of Inquiry (98 credits)

1. Arts & Humanities (A&H) (10 credits): chosen from the University A&H list
2. Social Sciences (SSc) (20 credits): ECON 200; 10 credits chosen from the University SSc list (outside the major); 5 credits met by coursework in the major
3. Natural Sciences (NSc) (68 credits)
 - a. Mathematics (10-16 credits) complete one of the following:
 - i. MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 135, MATH 136
 - b. Sciences (37-38 credits): CHEM 152 (or CHEM 153 or CHEM 155), CHEM 162 (or CHEM 165), CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123 (or PHYS 141, PHYS 142, PHYS 143); A A 260
 - c. Statistics (3-5 credits): one of Q SCI 381, IND E 315, or STAT 390
 - d. Additional NSc credits (10-18 credits): from the University NSc list (outside the major) to reach 68 NSc credits

Major Requirements (74 credits)

1. Bioresource Science (63 credits): BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 410, BSE 420, BSE 421, BSE 422, BSE 426, BSE

430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.

2. Engineering Electives (11 credits minimum): Taken from a list of approved engineering electives.

Free electives to reach 180 credits

Additional Completion Requirements

Option specific credits (additional 12 credits minimum): ESRM 320, ESRM 321, and one course from approved list.

Program of Study: Major: Environmental Science and Terrestrial Resource Management

Program Overview

Students in Environmental Science and Resource Management (ESRM) learn about natural and human-dominated landscapes and how to apply this knowledge to real-world problems. With a focus on sustainability, students work with professors and regional experts on environmental issues. Field work gives students enhanced opportunities for experiential learning and service in a rich contextual landscape.

This program of study leads to the following credentials:

- Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management
- Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Natural Resource and Environmental Management

- Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Restoration Ecology and Environmental Horticulture
- Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Sustainable Forest Management
- Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Wildlife Conservation

Recommended Preparation

Suggested First- and Second-Year School Courses: ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit A&H course; MATH 120 or Q SCI 291; ESRM 210.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management

Credential Overview

Students in Environmental Science and Resource Management (ESRM) learn about natural and human-dominated landscapes and how to apply this knowledge to real-world problems. With a focus on sustainability, students work with professors and regional experts on environmental issues. Fieldwork gives students enhanced opportunities for experiential learning and service in a rich contextual landscape.

Completion Requirements

180 credits

1. General Education Requirements (70 credits)
 - a. *Written Communication (12 credits):* 5 credits English composition (ENGL 131 preferred); and 7 additional credits.
 - b. *Reasoning (RSN) (20 credits):* Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural Sciences (NSc) (30 credits):* BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Arts & Humanities (A&H) (10 credits):* Any 200-level COM course; 5 additional credits from the University A&H list.
 - e. *Social Sciences (SSc) (10 credits):* ENVIR 235/ECON 235 or ECON 200 or ECON 201; and 5 additional credits, which are satisfied by core courses shown below.
2. Major Requirements (62 credits)
 - a. *Core Courses (17 credits):* ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives (minimum 45 credits):* 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; minimum 25 credits must be at the 400-level.
 - c. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
3. *Free electives:* As needed to bring minimum total to 180 credits.

Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Natural Resource and Environmental Management

Credential Overview

Natural Resources and Environmental Management (NREM) is an integrated approach to studying the interaction of physical, biological, and social processes on ecological systems at a wide range of spatial scales. The NREM option focuses on applied aspects of environmental management that create, sustain, and alter landscapes to achieve biological diversity and integrity as well as social purposes.

Completion Requirements

180 credits

1. General Education Requirements (70 credits)
 - a. *Written Communication* (12 credits): 5 credits English composition (ENGL 131 preferred); and 7 additional credits.
 - b. *Reasoning (RSN)* (20 credits): Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural Sciences (NSc)* (30 credits): BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Arts & Humanities (A&H)* (10 credits): Any 200-level COM course; 5 additional

credits from the University A&H list.

- e. *Social Sciences (SSc)* (10 credits): ENVIR 235/ECON 235 or ECON 200 or ECON 201; and 5 additional credits, which are satisfied by core courses shown below.
2. Major Requirements (62 credits)
 - a. *Core Courses* (17 credits): ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives* (minimum 45 credits): 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; minimum 25 credits must be at the 400-level.
 - c. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
 3. *Free electives*: As needed to bring minimum total to 180 credits.

Additional Completion Requirements

Option specific credits (minimum 45 credits): ESRM 323; ESRM 331, ESRM 350; ESRM 381; ESRM 400; ESRM 426; ESRM 470. Minimum one course each from three approved lists. See adviser for approved lists.

Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Restoration Ecology and Environmental Horticulture

Credential Overview

Students in the Restoration Ecology and Environmental Horticulture (REEH) option learn and apply fundamental concepts of biology, plant science, and ecology. This disciplinary knowledge, with supporting coursework and experience, allows students to become accomplished in producing plant materials, managing sustainable landscapes, repairing damaged ecosystems, and participating in large interdisciplinary projects.

Completion Requirements

180 credits

1. General Education Requirements (70 credits)
 - a. *Written Communication (12 credits)*: 5 credits English composition (ENGL 131 preferred); and 7 additional credits.
 - b. *Reasoning (RSN) (20 credits)*: Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural Sciences (NSc) (30 credits)*: BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Arts & Humanities (A&H) (10 credits)*: Any 200-level COM course; 5 additional credits from the University A&H list.

- e. *Social Sciences (SSc) (10 credits)*: ENVIR 235/ECON 235 or ECON 200 or ECON 201; and 5 additional credits, which are satisfied by core courses shown below.
2. *Free electives*: As needed to bring minimum total to 180 credits.

Additional Completion Requirements

Option specific credits (minimum 45 credits): Courses selected from an approved list. See adviser for approved list.

Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Sustainable Forest Management

Credential Overview

Students acquire the knowledge and skills to measure and assess natural resources in order to understand the ecology of forest systems; manage for environmental services; treat forest fuels; achieve sustainable harvest; market and sell forest products; and understand how social, economic, and ecologic forces impact the management of forests and their resources.

Completion Requirements

180 credits

1. General Education Requirements (70 credits)
 - a. *Written Communication (12 credits)*: 5 credits English composition (ENGL 131 preferred); and 7 additional credits.
 - b. *Reasoning (RSN) (20 credits)*: Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.

- c. *Natural Sciences (NSc) (30 credits)*: BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Arts & Humanities (A&H) (10 credits)*: Any 200-level COM course; 5 additional credits from the University A&H list.
 - e. *Social Sciences (SSc) (10 credits)*: ENVIR 235/ECON 235 or ECON 200 or ECON 201; and 5 additional credits, which are satisfied by core courses shown below.
2. Major Requirements (62 credits)
 - a. *Core Courses (17 credits)*: ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives (minimum 45 credits)*: 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; minimum 25 credits must be at the 400-level.
 - c. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
 3. *Free electives*: As needed to bring minimum total to 180 credits.

Additional Completion Requirements

Option specific credits (minimum 45 credits): ESRM 323; ESRM 331; ESRM 368; ESRM 400; ESRM 426 or ESRM 447; ESRM 428; ESRM 430; ESRM 461; ESRM 470. Minimum one course each from three approved lists. See adviser for approved lists.

Bachelor of Science degree with a major in Environmental Science and Terrestrial Resource Management: Wildlife Conservation

Credential Overview

Wildlife Conservation is the science and art of managing animal populations and their related resources. This option offers coursework in wildlife ecology, quantitative science, and the social and political aspects of wildlife conservation issues. Students can expect hands-on field experiences including how to identify, capture, and handle animals; and how to assess, map, and plan wildlife habitats. Instruction on writing technical reports and scientific papers, and presentation of findings and implementation of wildlife conservation plans will be covered.

Completion Requirements

180 credits

1. General Education Requirements (70 credits)
 - a. *Written Communication (12 credits)*: 5 credits English composition (ENGL 131 preferred); and 7 additional credits.
 - b. *Reasoning (RSN) (20 credits)*: Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural Sciences (NSc) (30 credits)*: BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Arts & Humanities (A&H) (10 credits)*: Any 200-level COM

- course; 5 additional credits from the University A&H list.
- e. *Social Sciences (SSc) (10 credits)*: ENVIR 235/ECON 235 or ECON 200 or ECON 201; and 5 additional credits, which are satisfied by core courses shown below.
2. Major Requirements (62 credits)
 - a. *Core Courses (17 credits)*: ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives (minimum 45 credits)*: 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; minimum 25 credits must be at the 400-level.
 - c. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
 3. *Free electives*: As needed to bring minimum total to 180 credits.

Additional Completion Requirements

Option specific credits (minimum 46 credits): ESRM 350; ESRM 351; ESRM 441; ESRM 450; ESRM451/Q SCI 451; ESRM 458; Q SCI 482; and one from ESRM 452, ESRM 453, ESRM 459. Capstone (10 credits): ESRM 462, ESRM 463, and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495.

Program of Study: Minor: Ecological Restoration

Program Overview

The minor in Ecological Restoration seeks to prepare students to address the complex relationships of human communities and ecological sustainability. The minor is a tri-campus initiative (UW Bothell, UW Seattle,

and UW Tacoma) offered by the UW Restoration Ecology Network. Students may, but are not required to, take courses from more than one campus in order to earn the minor.

This program of study leads to the following credential:

- Minor in Ecological Restoration

Minor in Ecological Restoration

Completion Requirements

25 credits

1. *Introduction to Restoration Ecology (5 credits)*: Either ESRM 362/ENVIR 362, BES 362, or TESC 362.
2. *Capstone (10 credits)*: One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.
3. *Electives*: 10 credits from approved list of electives maintained by each campus.
4. Minimum 2.00 cumulative GPA for courses presented for the minor.
5. Minimum 15 credits from outside the student's major.
6. Minimum 15 credits completed through the UW.

Program of Study: Minor: Environmental Science and Terrestrial Resource Management

Program Overview

The ESRM minor offers students majoring in a wide range of subjects exposure to the challenges facing terrestrial ecosystems,

including their conservation and restoration. Course work provides a solid foundation for links to other fields of biology, environmental education, journalism and public policy.

This program of study leads to the following credential:

- Minor in Environmental Science and Terrestrial Resource Management

Minor in Environmental Science and Terrestrial Resource Management

Completion Requirements

Minimum 25 credits

1. Minimum 25 ESRM credits, 20 of which must be upper-division
2. Maximum 5 credits from BSE courses allowed

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and terrestrial resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and terrestrial resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- *Instructional and Research Facilities:* See the main school page for details.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). Contact adviser for

requirements or visit the department website.

- *Research, Internships, and Service Learning:* The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- *Department Scholarships:* For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Please refer to the department website for application information.

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website.

- *Student Organizations/Associations:* The School has student organizations which organize student symposia, field trips,

parties, slide shows and talks, public service projects, and other social activities. Please refer to the department website for current SEFS student organizations.

Of Special Note: Some classes include field trips or require laboratory supplies or material duplication at student expense.

School of Marine and Environmental Affairs

[Marine Studies Building](#)

206-543-7004

[Website](#)

[Faculty Website](#)

uwsmea@uw.edu

The School of Marine and Environmental Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

Graduate Program

Program of Study: Master of Marine Affairs

Program Overview

Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water. The program prepares students for professional careers in policy making, management, teaching, and research. Students gain familiarity with relevant aspects of the social, technological, and environmental sciences. Completion of the MMA program normally requires two

academic years. In the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. In the second year, students develop competence in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and prepare a thesis, complete a capstone project, or complete additional coursework for the courses-only option. Studies may be adjusted to accommodate prior experience and academic background.

This program of study leads to the following credential:

- Master of Marine Affairs

Admission Requirements

Contact department for requirements.

Master of Marine Affairs

Completion Requirements

59 credits

Thesis Track

1. *Core Curriculum (32 credits depending on thesis or professional track)*
 - a. Introduction to Marine Affairs: SMEA 500 and SMEA 502
 - b. Marine Law: SMEA 515
 - c. Policy Analysis: SMEA 519
 - d. Economics: SMEA 536. If SMEA 536 is waived, students must still take at least one economics course at the 400 or 500 level.
 - e. Policy Processes: SMEA 507 or SMEA 521

- f. Environmental Equity and Justice (3 credits): Course list maintained internally by the program.
 - g. Marine Science: SMEA 591. If SMEA 591 is waived, students must still take at least one 400- or 500-level science course
 - h. Research Methods (6 credits): Course list maintained internally by the program.
 - i. Marine and Environmental Affairs Advising: SMEA 600 (1 credit in winter and spring required the first year.
2. *Thesis and Thesis Presentation (15 credits minimum)*: SMEA 700
 3. *Electives (to meet 59-credit total)*: To include at least 6 credits from a minimum two SMEA courses.

Professional Track

1. *Core Curriculum (29 credits)*:
 - a. Introduction to Marine Affairs: SMEA 500 and SMEA 502
 - b. Marine Law: SMEA 515
 - c. Policy Analysis: SMEA 519
 - d. Economics: SMEA 536. If SMEA 536 is waived, students must still take at least one economics course at the 400 or 500 level.
 - e. Policy Processes: SMEA 507 or SMEA 521
 - f. Environmental Equity and Justice (3 credits): Course list maintained internally by the program.
 - g. Marine Science: SMEA 591. If SMEA 591 is waived, students must still take at least one 400- or 500-level science course
 - h. Research Methods (3 credits): Course list maintained internally by the program.
 - i. Marine and Environmental Affairs Advising: SMEA 600 (1 credit in

winter and spring required the first year.

2. *Optional Capstone Credits and Presentation (9 credits)*: SMEA 650
3. *Electives (to meet 59-credit total)*: To include at least 6 credits from a minimum two SMEA courses.

Marine Biology

208 [Fishery Sciences](#)

206-543-7426

[Website](#)

[Faculty Website](#)

marbiol@uw.edu

Marine Biology is a program sponsored by the College of the Environment to immerse undergraduate students in the study of marine organisms and ecosystems. Drawing upon the courses, faculty expertise and fields of Aquatic & Fishery Sciences, Biology, Friday Harbor Laboratories and Oceanography, students enhance classroom learning with field and research experiences.

Undergraduate Program

208B [Fishery Sciences](#)

206-543-7426

marbiol@uw.edu

Program of Study: Major: Marine Biology

Program Overview

Marine biology involves the study of life processes of organisms inhabiting the ocean's environments, drawing on courses offered by Aquatic and Fishery Sciences, Oceanography and Friday Harbor Laboratories. The degree integrates core

materials on marine aspects of biodiversity, organismal processes, and ecology and ecosystems, examining their relationship with physical processes and ocean change. Graduates of Marine Biology are prepared for careers in management agencies at the local to international levels, environmental consulting, non-profit organizations and a range of educational settings.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Marine Biology

Recommended Preparation

Suggested First- and Second-Year College Courses: Recommended courses for first-year students: FISH 250/OCEAN 250/BIOL 250; English composition; calculus; CHEM 120 and OCEAN 295; BIOL 180. Recommended courses for second-year students: OCEAN 210, BIOL 200, and FISH 270/OCEAN 270/MARBIO 270; Q SCI 381, MARBIO 305.

Admission Requirements

Students in good academic standing may declare this major at any time, including on the application for admission to the UW. After notification of admission and before registration, new students should contact the Student Services Office for help in program planning.

Bachelor of Science degree with a major in Marine Biology

Credential Overview

Overview Marine biology involves the study of life processes of organisms inhabiting the ocean's environments, drawing on courses

offered by Aquatic and Fishery Sciences, Oceanography and Friday Harbor Laboratories. The degree integrates core materials on marine aspects of biodiversity, organismal processes, and ecology and ecosystems, examining their relationship with physical processes and ocean change. Graduates of Marine Biology are prepared for careers in management agencies at the local to international levels, environmental consulting, non-profit organizations and a range of educational settings.

Completion Requirements

106-113 credits

1. *Core STEM (43-50 credits)*
 - a. Biology(10 credits): BIOL 180, BIOL 200
 - b. Chemistry (10-15 credits): one of the following options: (1) CHEM 120, OCEAN 295; (2) CHEM 120, CHEM 220; (3) CHEM 142, CHEM 152, OCEAN 295; (4) CHEM 142, CHEM 152, CHEM 223
 - c. Physics (8-10 credits): one of the following options:(1) PHYS 114 or PHYS 121; OCEAN 285 and OCEAN 286; (2) PHYS 114 and PHYS 115; (3) PHYS 121 and PHYS 122
 - d. Calculus (10 credits): Q SCI 291 or MATH 124; Q SCI 292 or MATH 125
 - e. Statistics (5 credits): Q SCI 381 or STAT 311
2. *Introduction to Marine Environment (14 credits):* either FISH 250/OCEAN 250/BIOL 250 (5 credits) or OCEAN 200 and OCEAN 201; OCEAN 210; FISH 270/OCEAN 270/MARBIO 270 or BIOL 220
3. *Marine Biology Core (15 credits):* FISH 370/OCEAN 370/MARBIO 370; OCEAN 330; FISH 323

4. *Communications (3 credits)*: MARBIO 305 or FHL 333
 5. *Electives*: Minimum 25 credits from approved courses (see department website for list), meeting the following requirements
 - a. Minimum one course each in biodiversity, ecology and ecosystems, organismal processes
 - b. Minimum two courses from approved laboratory electives
 - c. Minimum three courses at the 400 level
 - d. Maximum 6 credits total from OCEAN 492, FHL 450/MARBIO 450, FHL 460/MARBIO 460, FHL 470/MARBIO 470, or FHL 492/MARBIO 492/FISH 492.
 6. *Integrative Field Experience (6 credits)*: One from MARBIO 488, FHL 450/MARBIO 450, FHL 460/MARBIO 460, FHL 470/MARBIO 470, or OCEAN 492. Students who take OCEAN 492 toward elective requirements in 5.d. above may apply an additional 6 credits in OCEAN 492 to the integrative field experience requirement.
 7. Minimum 2.00 cumulative GPA in courses presented for the major.
 8. Majors must satisfy the College of the Environment general education requirements.
- Basic biological science content, with a marine focus
 - Basic oceanography to understand influence of unique characteristics of marine environments on marine life
 - Mechanistic understanding of how processes occurring within organisms interact with higher-level organization. Contributes to students's ability to understand and test cause-and-effect and to use both reductionist and integrative approaches to solving marine biology problems
 - Integrated perspective on evolution and biodiversity of marine organisms, and relationship with changing marine environment. In depth for select taxa and trophic groups. Enhances advanced application of evolutionary theory and practice in the marine sciences.
 - Integrated approaches to studying population ecology, marine habitats, and ecosystems. In depth for select habitats or ecosystems. Contributes to student's ability to work in biology across scales, to use integrative skills to understanding the influence of the marine environment on population dynamics, and the influence of marine life on abiotic processes.
 - How and why oceans change. This area includes reciprocal connections between humans and the environment, in the context of other drivers and scales of variability. Provides students with not just a list of problems, but also empowers them to see

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*:
 - Content: Students will understand, apply, and evaluate:
 - Basic biological science content (Ecology, evolution, cell and molecular biology)

- how to create and implement solutions.
 - Skills: Students will demonstrate the ability to use:
 - Quantitative approaches to collecting and understanding information
 - Written and oral approaches to communicating information, in order to share one's work with a variety of audiences, including scientific community and general public
 - Collaboration to work together effectively in teams to solve problems
 - *Instructional and Research Facilities:* Marine Biology students study and research at labs and classrooms in the School of Aquatic and Fishery Sciences, the School of Oceanography, and marine field station the Friday Harbor Labs.
 - *Honors Options Available:* None
 - *Research, Internships, and Service Learning:* Opportunities for research, internships, and service learning are shared with all undergraduate students via departmental website and email lists.
 - *Department Scholarships:* Contact adviser for more information.
 - *Student Organizations/Associations:* The UW SeaDawgs are a registered student organization with the goal of building a community of students who are passionate about marine science through social events, volunteer-work, academic seminars/research, and other projects.

student@ocean.washington.edu

Oceanography - the study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. Oceanography integrates the basic principles of biology, chemistry, geology, and physics into scientific research in the marine environment. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. At the undergraduate level, Oceanography is presented as an integrated interdisciplinary science that prepares students for a broad range of careers. At the graduate level, Oceanography is specialized into four areas of emphasis: Biological, Chemical, Geology and Geophysics, and Physical.

Undergraduate Programs

108 [Oceanography Teaching Building](#)

Program of Study: Major: Oceanography

Program Overview

The undergraduate program in Oceanography provides students with an interdisciplinary science background that prepares them for a broad range of careers. Students can pursue a Bachelor of Science, Bachelor of Arts or a Minor in Oceanography. Oceanography partners with other departments to support interdisciplinary minors in Marine Biology, Climate and Arctic Studies.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Oceanography
- Bachelor of Science degree with a major in Oceanography

Recommended Preparation

Suggested Pre-College Courses: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, physics, and earth sciences recommended.

Suggested First- and Second-Year College Courses: MATH 124; CHEM 120 or CHEM 142 and CHEM 152; BIOL 180, BIOL 200; ESS 210 or ESS 211; PHYS 121; either OCEAN 215 or CSE 160; OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 285, OCEAN 286, and OCEAN 295; and English composition.

Admission Requirements

Students in good academic standing may declare this major at any time.

Bachelor of Arts degree with a major in Oceanography

Credential Overview

The Oceanography Bachelor of Arts degree provides a solid background in the basic principles of Oceanography using the same foundational core as the Bachelor of Science degree. The B. A. diverges from the B. S. during the senior year, with additional flexibility that allows students to tailor their course of study to their individual interest in other areas of the sciences or humanities.

Completion Requirements

General Education Requirements

All majors must satisfy the College of the Environment general education requirements. University-required additional writing credits may include OCEAN 220, OCEAN 443, and OCEAN 445.

Completion Requirements

Minimum 104 credits

1. Core requirements (79 credits): PHYS 121; MATH 124, MATH 125; CHEM 120 or CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 286, OCEAN 295, OCEAN 310, OCEAN 320, OCEAN 330, OCEAN 351
2. Elective foundational science (5 credits): one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270

3. 300- or 400-level oceanography coursework that may include the senior thesis sequence, selected in the student's area of specialization, in consultation with a faculty adviser (minimum 10 credits)
4. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (10 credits)

Bachelor of Science degree with a major in Oceanography

Credential Overview

The School of Oceanography offers a unique undergraduate major program leading to a Bachelor of Science in Oceanography that emphasizes a solid basic science training and interdisciplinary approach, and provides ample opportunities for field and research experience. The course of study integrates a foundation in biology, chemistry, physics and geology into science of the marine environment. Students conduct independent research in areas such as biological, chemical, physical oceanography, marine geology and geophysics, or ocean technology.

Completion Requirements

General Education Requirements

All majors must satisfy the College of the Environment general education requirements. University-required additional writing credits may include OCEAN 220, OCEAN 443, and OCEAN 445.

Completion Requirements

Minimum 116 credits

1. *Core requirements(79 credits):* PHYS 121 ; MATH 124, MATH 125; CHEM 120 or CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 286, OCEAN 295, OCEAN 310, OCEAN 320, OCEAN 330, OCEAN 351.
2. *Senior thesis sequence (8 credits):* OCEAN 443, OCEAN 444, OCEAN 445
3. *Elective foundational science (5 credits):* one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
4. 300- or 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (9 credits)
5. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (15 credits)

Students with introductory science and mathematics courses equivalent to those listed are encouraged to contact the Oceanography adviser.

Program of Study: Minor: Oceanography

Program Overview

The undergraduate program in Oceanography provides students with an interdisciplinary science background that prepares them for a broad range of careers. Students can pursue a Bachelor of Science, Bachelor of Arts or a Minor in Oceanography. Oceanography partners with other departments to support interdisciplinary minors in Marine Biology, Climate and Arctic Studies.

This program of study leads to the following credential:

- Minor in Oceanography

Minor in Oceanography

Credential Overview

The Oceanography minor is designed for students pursuing science degrees to tailor their studies to the marine environment. The minor could also serve as a background for a career in teaching, administration, marine affairs, environmental studies, production, inspection, ocean engineering, instrumentation development, and statistical analysis.

Completion Requirements

26 credits

1. OCEAN 200, OCEAN 210
2. One of the following sequences: OCEAN 285, OCEAN 286, and OCEAN 320; or OCEAN 295 and OCEAN 330; or one of ESS 210 or ESS 211 and OCEAN 310
3. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by

independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- *Instructional and Research Facilities:* The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V *Thomas G. Thompson*, used chiefly for open ocean research throughout the world, and the 65 foot R/V *Clifford A. Barnes*, used for

research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- *Department Scholarships:* See adviser for availability.
- *Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

The Information School

[Website](#)

The Information School (iSchool) is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The iSchool offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. Our approach to information instruction and scholarship examines information systems and technology from a user-centered perspective and through a lens of justice, equity, and inclusivity. By focusing on the human impact of information, the iSchool has become an important link between users of information and designers of information systems, connecting society with the information it needs.

Graduates of the iSchool assume a variety of professional roles in the public, private, and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information fields. Together, they are ambassadors for the transformative power of information when applied ethically and effectively.

The iSchool's research community is highly interdisciplinary and focused on significant, real-world challenges and efforts that make

a difference in the lives of individuals and communities. Ongoing work focuses in the following areas:

- Data Science
- Digital Youth
- Health and Well-Being
- Human-Computer Interaction
- Indigenous Knowledge
- Information and Society
- Learning Sciences
- Library and Information Science
- Sociotechnical Information Systems

The iSchool is working toward a more just world by dismantling institutional barriers through our research, education, and daily work. We create an environment that fosters appreciation, mutual respect and engagement among and between members of the iSchool, UW community and beyond, with special attention to the needs of vulnerable populations and minoritized and marginalized groups.

Program of Study: Major: Informatics

Program Overview

Informatics is the study of people, information, and technology. Students are prepared to design, build, manage, and secure information systems that make a difference in society, organizations, and

individual lives. The curriculum uses an experiential learning approach that emphasizes problem solving, group work, research, writing, oral presentations, and technology. Degree options in Biomedical & Health Informatics, Human-Computer Interaction, Information Assurance and Cybersecurity, Data Science, and Information Architecture are available.

This program of study leads to the following credentials:

- Bachelor of Science in Informatics degree
- Bachelor of Science in Informatics degree: Biomedical and Health Informatics
- Bachelor of Science in Informatics degree: Data Science
- Bachelor of Science in Informatics degree: Human-Computer Interaction
- Bachelor of Science in Informatics degree: Information Architecture
- Bachelor of Science in Informatics degree: Information Assurance and Cybersecurity

Recommended Preparation

Suggested First- and Second-Year College Courses: INFO 101, INFO 102, INFO 200, INFO 201; an English composition course (selected from the University list); CSE 121 and CSE 122; one of STAT 221, STAT 311, STAT 390, STAT 293, or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

Admission Requirements

Regular Admission

1. INFO 200*; either CSE 121, CSE 122, CSE 123, CSE 142, CSE 143, CSE 154, CSE 160, CSE 163, INFO 180/STAT 180/CSE 180, or INFO 201; either STAT 220, STAT 221, STAT 311, STAT 390, or QMETH 201; with a minimum 2.0 grade in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses.
2. Minimum 2.00 cumulative college GPA.
3. Admission is capacity constrained, based on the following criteria:
 - a. Overall academic performance
 - b. Grades in courses required for admission to the major
 - c. Personal statement reflecting an interest in and commitment to becoming a major in this field
 - d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

Meeting the above criteria does not guarantee admission.

4. Admission for current upper-division UW students and transfer students occurs twice a year for autumn and winter quarters. The application process begins prior to the admitted quarter. Application deadlines:
 - a. First Friday of spring quarter for admission the following autumn quarter.
 - b. First Friday of autumn quarter for admission winter quarter.

Students apply online at The Information School website.

*Since equivalents to INFO 200 are not common, students who have transferred or will transfer to the UW can apply to the program and be admitted with the provision that they complete INFO 200 with a minimum 2.0 grade before the end of their first year in the program.

Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students does not exceed 10 percent of the number of majors admitted each year.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the school website.

Bachelor of Science in Informatics degree

Credential Overview

Informatics is the study of people, information, and technology. Students are prepared to design, build, manage, and secure information systems that make a difference in society, organizations, and individual lives. The curriculum uses an experiential learning approach that emphasizes problem solving, group work, research, writing, oral presentations, and technology. Degree options in Human-Computer Interaction, Information Assurance and Cybersecurity, Data Science, and Information Architecture are available.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)
7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)

2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.
3. Additional requirements specified below

Additional Completion Requirements

16-20 credits

Students work with their adviser to select a minimum of four classes to create a customized program aligned with their personal interests or career goals.

**Bachelor of Science in Informatics
degree: Biomedical and Health
Informatics**

Credential Overview

The Biomedical and Health Informatics option leverages the strengths of the Information School and the Biomedical Informatics and Medical Education (BIME) department of UW Medicine. The option provides cross-training in informatics and healthcare with information technology training in biology, medicine, and health. The degree option provides preparation for pathways towards health IT employment and graduate studies.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)

7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)
2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.
3. Additional requirements specified below

Additional Completion Requirements

Option specific credits (20 credits): BIME 300, BIME 435, INFO 468, INFO 478

**Bachelor of Science in Informatics
degree: Data Science**

Credential Overview

Data science is an emerging interdisciplinary field that works to extract knowledge or insight from data. It combines fields such as information science, computer science, statistics, design, and social science. The data science degree option provides strong preparation for entry-level data science positions or for graduate studies providing more advanced training in data science methods and practices.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)
7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)
2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.
3. Additional requirements specified below

Additional Completion Requirements

Option specific credits (20 credits): INFO 370, INFO 371, INFO 445, INFO 474

Bachelor of Science in Informatics degree: Human-Computer Interaction

Credential Overview

The Human-Computer Interaction (HCI) option provides students with the knowledge

to make information and computing useful, usable, and accessible to all. The Informatics HCI option allows students to blend technical skills and expertise with a broader perspective on how design and development work impacts users. Courses explore the design, construction, and evaluation of interactive technologies for use by individuals, groups, and organizations, and the social implications of these systems. This work encompasses user interfaces, accessibility concerns, new design techniques and methods for interactive systems and collaboration. Coursework also examines the values implicit in the design and development of technology.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)
7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)
2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380,

INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.

3. Additional requirements specified below

Additional Completion Requirements

Option specific credits (16-20 credits):
Minimum four courses from an approved list. See department website for list of approved courses

Bachelor of Science in Informatics degree: Information Architecture

Credential Overview

Information Architecture (IA) is a critical component-- along with User Experience (UX) -- in the development of successful web sites, software apps, intranets, and online communities. Courses in the IA option allow students to develop the skills needed to organize and label information for improved navigation and search, and build frameworks to effectively collect, store and deliver information in conjunction with a strategic UX. Students also gain the knowledge to design the databases and XML storehouses that drive complex and interactive websites.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)
7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)
2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.
3. Additional requirements specified below

Additional Completion Requirements

Option specific credits (16-20 credits):
Minimum four courses from an approved list. See department website for list of approved courses

Bachelor of Science in Informatics degree: Information Assurance and Cybersecurity

Credential Overview

Information Assurance and Cybersecurity (IAC) is the practice of creating and managing safe and secure systems. It is crucial for organizations public and private, large and small. In the IAC option, you will be equipped with the knowledge to create, deploy, use, and manage systems that preserve individual and organizational privacy and security. This tri-campus concentration leverages the strengths of the Information School, the Computing and Software Systems program at UW Bothell,

and the Institute of Technology at UW Tacoma. After a course in the technical, policy, and management foundations of IAC, you may take electives at any campus to learn such specialties as information assurance policy, secure coding, or networking and systems administration.

Completion Requirements

General Education Requirements

1. English composition (5 credits)
2. Reasoning (RSN) (5 credits)
3. Writing courses (10 credits)
4. Natural Sciences (NSc) (20 credits)
5. Social Sciences (SSc) (20 credits)
6. Arts & Humanities (A&H) (20 credits)
7. Diversity (DIV) (3 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Inquiry list may be counted toward the UW Areas of Inquiry requirement (Natural Sciences; Social Sciences; Arts & Humanities).

Major Requirements

80-88 credits, depending on credential/option

1. Courses required for admission (13-15 credits, as shown above)
2. Core courses (51-53 credits): INFO 201, INFO 290, INFO 300, INFO 330, INFO 340, INFO 350, INFO 360, INFO 380, INFO 490, INFO 491; one of CSE 123, CSE 143, or CSE 163; one of CSE 373, INFO 442, or INFO 443.
3. Additional requirements specified below

Additional Completion Requirements

Option specific credits (16-20 credits):

1. *Foundation Course*: INFO 310 or equivalent
2. Minimum three additional courses from an approved list (11-15 credits). Includes courses at participating departments on all three UW campuses. See department website for list of approved courses. No more than one of these three may be a networking course (INFO 341, T INFO 250, or CSS 432).

Program of Study: Minor: Informatics

Program Overview

Informatics is a high-tech, high-touch field that uses information and technology (computers, the Internet, and devices) to make life better - at work, in society, and to improve our individual lives. Students who complete the Informatics Minor will have strong advantages in completing their education and launching their careers. Students will obtain knowledge of design thinking, how to work with others in teams, gaining insight into the complex technology policy issues of our time, and gain skills in using data and information in problem-solving and decision-making.

This program of study leads to the following credential:

- Minor in Informatics

Minor in Informatics

Completion Requirements

Minimum 25 credits

1. INFO 200, INFO 201 (10 credits)
2. INFO 300-/INFO 400-level courses, providing depth in data, design, or development. Minimum 3 credits

covering ethics, policy, and/or equity dimensions of information technology. See department for list of approved courses. (15 credits)

3. Minimum 2.00 cumulative GPA for courses applied to the minor.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science. Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, web developer, network manager, project manager, and information assurance professional. The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies

(e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- *Instructional and Research Facilities:* Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) laboratory, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- *Honors Options Available:* With College Honors; With College Honors (Completion of Honors Core Curriculum

and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.

- *Research, Internships, and Service Learning:* Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.
- Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).
- *School Scholarships:* The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
 - *Student Organizations/Associations:* Undergraduates participate in a number of the School's many student

organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

Of Special Note:

Capstone Projects: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

Information Sessions: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website.

Program of Study: Doctor of Philosophy (Information Science)

This program of study leads to the following credential:

- Doctor of Philosophy (Information Science)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Information Science)

Completion Requirements

90 credits minimum

1. *Required courses (24 credits):*
 - a. Core courses: INSC 500, INSC 501, INSC 570, INSC 571, INSC 572, INSC 573
 - b. Practica: INSC 565, INSC 566, INSC 575, INSC 576
2. *Additional elective coursework (credits vary, as needed to meet required total):* Graduate level coursework, selected in consultation with faculty advisers
3. *Dissertation (27 credits):* INSC 800
4. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
5. 60 credits taken prior to general examination
6. Preliminary review determined by a School-based advisory committee at the end of the required first year of full-time study
7. General examination
8. Dissertation proposal defense
9. Final examination

Program of Study: Master of Library and Information Science

This program of study leads to the following credentials:

- Master of Library and Information Science
- Master of Library and Information Science
- Master of Library and Information Science (evening)

- Master of Library and Information Science (fee-based)
- Master of Library and Information Science (fee-based) (online)
- Master of Library and Information Science (Law Librarianship)
- Master of Library and Information Science (Law Librarianship) (fee-based)

Master of Library and Information Science

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Master of Library and Information Science

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Master of Library and Information Science (evening)

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Master of Library and Information Science (fee-based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

This option requires 63 credits.

1. *Core Curriculum (31 credits):*
 - a. LIS 510 or LIS 547; LIS 520, LIS 530, LIS 570, LIS 580

- b. One information technology course (course list maintained by department)
 - c. One social/ethical course (course list maintained by department)
2. *Capstone (5 credits):* LIS 569; LIS 596 or IMT 596; LIS 597 or IMT 597
 3. *Electives (to meet required credit total):* LIS, IMT, INSC, INFO coursework at the graduate level.

Master of Library and Information Science (fee-based) (online)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

This option requires 63 credits.

1. *Core Curriculum (31 credits):*
 - a. LIS 510 or LIS 547; LIS 520, LIS 530, LIS 570, LIS 580
 - b. One information technology course (course list maintained by department)
 - c. One social/ethical course (course list maintained by department)
2. *Capstone (5 credits):* LIS 569; LIS 596 or IMT 596; LIS 597 or IMT 597

3. *Electives (to meet required credit total):* LIS, IMT, INSC, INFO coursework at the graduate level.

Master of Library and Information Science (Law Librarianship)

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.
2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Master of Library and Information Science (Law Librarianship) (fee-based)

Credential Overview

Designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

43-63 credits, depending on option

1. *Core Curriculum (credits vary depending on option):* LIS coursework. See additional requirements section below for option-specific courses.

2. *Additional Option-Specific Requirements:* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

This option requires 41-43 credits depending on elective courses chosen:

1. *Core Curriculum (20 credits):* LIS 520, LIS 530, LIS 547, LIS 549, LIS 572
2. *Law Librarianship Courses (14 credits):* LIS 579, LIS 592, LIS 594, LIS 595. The final degree project is completed as part of LIS 595.
3. *Internship (2 credits):* directed fieldwork (LIS 590)
4. *Electives (5-7 credits):* Complete one course from each of the following lists
 - a. LIS 545 or LIS 593
 - b. LIS 556 or LIS 584

Program of Study: Master of Science in Information Management

Program Overview

A master's in information management can specialize in data science, information security & other areas of expertise. Offered in Early-Career, Early-Career Accelerated and Mid-Career formats, both residential and online.

This program of study leads to the following credentials:

- Master of Science in Information Management
- Master of Science in Information Management (Early-Career Accelerated Online) (fee based)

- Master of Science in Information Management (Early-Career Accelerated Residential) (fee-based)
- Master of Science in Information Management (Early-Career Online) (fee based)
- Master of Science in Information Management (Early-Career Residential) (fee-based)
- Master of Science in Information Management (Mid-Career Online) (fee based)
- Master of Science in Information Management (Mid-Career Residential) (fee based)

Master of Science in Information Management

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits):* IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum:* Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement:* Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total):* Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Master of Science in Information Management (Early-Career Accelerated Online) (fee based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits):* IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum:* Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement:* Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total):* Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 40 credits. In addition to the above requirements, the following are option-specific requirements:

- *Additional Core Curriculum (3 credits):* IMT 500
- *Practicum (6 credits):* IMT 599

Master of Science in Information Management (Early-Career Accelerated Residential) (fee-based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits)*: IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum*: Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement*: Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 40 credits. In addition to the above requirements, the following are option-specific requirements:

- *Additional Core Curriculum (3 credits)*: IMT 500
- *Practicum (6 credits)*: IMT 599

Master of Science in Information Management (Early-Career Online) (fee based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits)*: IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum*: Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement*: Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 65 credits. In addition to the above requirements, the following are option-specific requirements:

- *Additional Core Curriculum (3 credits)*: IMT 500
- *Capstone (5 credits)*: IMT 569, IMT 596, IMT 597

Master of Science in Information Management (Early-Career Residential) (fee-based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits)*: IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum*: Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement*: Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 65 credits. In addition to the above requirements, the following are option-specific requirements:

- *Additional Core Curriculum (3 credits)*: IMT 500
- *Capstone (5 credits)*: IMT 569, IMT 596, IMT 597

Master of Science in Information Management (Mid-Career Online) (fee based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits)*: IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum*: Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement*: Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 36 credits. There are no additional option-specific requirements beyond those outlined above.

Master of Science in Information Management (Mid-Career Residential) (fee based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

36-65 credits, depending on option

1. *Core Curriculum (12 credits)*: IMT 550, IMT 570, IMT 580
2. *Additional Core Curriculum*: Some options require an additional core course. See additional requirements below for option-specific requirement.
3. *Capstone/Practicum Requirement*: Some options require a capstone or practicum. See additional requirements below for option-specific requirement.
4. *Electives (to meet required credit total)*: Students select a specialization specific to their interests and career goals, or choose more broadly from across specializations. LIS, IMT, INSC and INFO graduate level coursework. Course lists maintained by the program.

Additional Completion Requirements

This option requires a total of 36 credits. There are no additional option-specific requirements beyond those outlined above.

Additional Information

All students in the MSIM program may elect to complete one of the following specializations. Students in the Early-Career option may elect to complete a second specialization from the following:

1. *Data Science*: Methods, tools, and frameworks for analyzing and deriving insight from large-scale, heterogeneous data.
2. *Information Architecture*: Assessing existing information structures and creating new systems to effectively structure information.
3. *Program/Product Management and Consulting*: Developing and managing

information policies, strategies, innovations, projects, and initiatives in public, private, and non-profit institutions.

4. *Business Intelligence*: Building analytical, managerial and baseline technical skills will help you learn to manage the process of transforming data into information.
5. *Information and Cyber Security*: Quality, security, and appropriate use of information assets.
6. *User Experience*: Designing, prototyping, and formally evaluating interactive information interfaces, systems, and experiences from a user-centered perspective.

Interdisciplinary Data Science Group

[Website](#)

[Faculty Website](#)

The Master of Science in Data Science at the University of Washington gives current and aspiring data science professionals the technical skills to turn large, messy data sets - or big data - into insights people and organizations can use.

Graduate Program

Program of Study: Master of Science in Data Science

Program Overview

The MSDS program is a professional master's degree designed for students who want to begin or advance their careers in data science. The program is available full-time or part-time. The full-time program is 1.5 years. The part-time program is 2.5 years. The industry-relevant curriculum emphasizes practical proficiency in statistical modeling, data management, machine learning, data visualization, software engineering, research design, data ethics, and user experience. The final two quarters of the program include a capstone project where students work on a real-world challenge facing an external organization.

This program of study leads to the following credential:

- Master of Science in Data Science (fee-based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for requirements.

Master of Science in Data Science (fee-based)

Completion Requirements

45 credits

1. *Core courses (39 credits)*: DATA 511 or HCDE 511; DATA 512, DATA 514, DATA 515, DATA 516, DATA 556, DATA 557, and DATA 558
2. *Capstone courses (5 credits)*: DATA 590 and DATA 591
3. *Elective course (1 credit)*: DATA 598 or any 500-level course
4. *Alternate courses*: Students can petition to take up to 10 credits of alternate courses. Students cannot petition to replace DATA 512, DATA 558, DATA 590, and DATA 591.

Interdisciplinary Global Innovation Exchange Group

msti@uw.edu

The UW Master of Science in Technology Innovation (MSTI) program prepares the next generation of innovators in connected devices. Through courses in design thinking, technology development and entrepreneurship, students learn what it takes to deliver innovative connected device

solutions in a culture of rapid prototyping, critique and iteration, and preparing to launch a new venture. MSTI students join a community of innovators and work with outstanding UW faculty who are pioneering connected device solutions, and students are mentored by top technologists and entrepreneurs from Seattle's thriving tech scene.

Human-Computer Interaction and Design

[Website](#)

[Faculty Website](#)

By integrating several disciplines, the Master of Human-Computer Interaction and Design program brings together design, technology, and the study of human behavior, creating students who can work seamlessly across these fields to create innovative new products, technologies and services. In a year-long, project-based curriculum, students learn the latest tools and techniques in user experience and

interface design, prototyping, user research, and evaluation. Coursework consists of both hands-on studios, often focused on industry-sponsored projects, as well as cutting-edge lecture courses. The combination of theory and practice, with an emphasis on making and doing, provides a dynamic and intensive learning experience.

Interdisciplinary International Humanitarian Response Group

[Website](#)

[Faculty Website](#)

The Graduate Certificate in International Humanitarian Response, supported by the Population Health Initiative, trains an

interdisciplinary group of University of Washington graduate and professional students to become the next generation of leaders in international humanitarian response.

Graduate Program

Program of Study: Graduate Certificate in International Humanitarian Response

Program Overview

The frequency, duration, impact and costs of natural, technological and human-made disasters is increasing. The growing number of these emergencies creates a pressing need for a more broadly trained workforce of humanitarian professionals who are ready to respond. This certificate, which is offered through the University of Washington Graduate School, is intended to train an interdisciplinary group of UW graduate and professional students to become that next generation of leaders in international humanitarian response.

This program of study leads to the following credential:

- Graduate Certificate in International Humanitarian Response

Admission Requirements

Please visit this [program's website](#) for requirements.

Graduate Certificate in International Humanitarian Response

Completion Requirements

15 credits

1. GH 576
2. IPM 516/URBDP 596 or PUBPOL 533
3. Capstone (1 to 3 credits): one-, two- or three-credit independent study course (600) in the student's degree program.
4. Elective courses (to reach required credit total)

Additional Information

Learning objectives: Upon completion of the certificate, students will be able to:

- Describe disasters in terms of magnitude, people affected, time, and place, and the natural, political, and economic factors that put certain regions and populations at risk.
- Distinguish the legal status and understand the key legal issues faced by internally displaced persons, refugees, and asylum seekers and identify the major humanitarian organizations that are responsible for protection of these populations.
- List and explain the major causes of morbidity and mortality in disasters, the immediate priorities to be addressed, and emergency thresholds and benchmarks for response.
- Characterize key principles of the emergency response framework including the response cycle, stakeholders (i.e., national, international, United Nations, non-governmental organizations, and international organizations), and unique characteristics of an international disaster response system.

- Identify internal and external challenges that may affect the delivery of essential services in a humanitarian response.
- Understand how to develop interventions, programs, and strategies, based on best practices, responsive to the diverse cultural values and traditions of the community being served.
- Understand core concepts of building resilience or recovering from emergencies in communities that may be or have been affected by disasters.
- Use of interactive digital tools for the initial assessment, planning, and monitoring and evaluation of interventions across phases of humanitarian emergencies.

Measurement of the mastery of these learning objectives will occur during a student's final presentation for their capstone course. The assessment will be completed by certificate-affiliated faculty.

Successful completion of the certificate program will require a minimum cumulative GPA of 3.0 for courses required for the certificate and a "Pass" grade or grade of 2.7 or higher for each course counted toward the certificate. A minimum of nine student credit hours must be earned in graded classes.

Molecular and Cellular Biology

mcb@uw.edu

The Molecular and Cellular Biology program (MCB) applies the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The doctoral program trains students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is for students interested in research and teaching careers in academia as well as biotechnology and pharmaceutical companies. At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of basic sciences and molecular medicine participate in the joint Molecular and Cellular Biology graduate program. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide support for research effort.

Museology

Suite 308 [Alumni House](#)
206-616-1437

[Website](#)

[Faculty Website](#)

uwmuse@uw.edu

The museology graduate program inspires students to use museums to create strong communities. It is a two-year, interdisciplinary master's program centered on three core beliefs: museums can make the world a better place; the power of museums lies in the role they play in learning, well-being, community building, and social justice; and museum professionals are connectors – they are storytellers, dialogue facilitators, community liaisons, designers, evaluators, researchers, project managers, and more.

Graduate Program

Suite 308 [Alumni House](#)
206-616-1437

uwmuse@uw.edu

Program of Study: Master of Arts (Museology)

Program Overview

The two-year, full-time MA program attracts students from a wide range of backgrounds including, but not limited to, informal learning, technology, international studies, education, and science communication, art history, history and anthropology. Our core courses are designed to provide a strong cohort experience and a solid foundation for student exploration. Our curriculum is a balance of tried and true courses and new courses that address current and future trends in the field.

This program of study leads to the following credentials:

- Master of Arts (Museology) (fee-based)
- Master of Arts (Museology: Museum Evaluation) (fee-based)

Admission Requirements

Please visit this program's [Graduate Admissions page](#) for current requirements.

Master of Arts (Museology) (fee-based)

Completion Requirements

60 credits

1. *Core courses (28 credits):*
 - a. MUSEUM 500, MUSEUM 570, MUSEUM 599 (4), MUSEUM 601 (6)
 - b. Thesis Research or Project: MUSEUM 700/710/720 (10)
2. *Museum Evaluation Specialization:* Optional, see additional requirements below for option-specific information.

3. *Electives (To meet required total credits):* 500-level and above Museology coursework. Course list maintained by the program. Must include at least two courses outside of Museology.

Master of Arts (Museology: Museum Evaluation) (fee-based)

Credential Overview

The Museology Program offers an optional specialization in museum evaluation through which students gain a wide range of skills that prepare them to incorporate museum evaluation into their museum practice, as well as skills that are transferable to a range of positions within and outside of museums.

Completion Requirements

60 credits

1. *Core courses (28 credits):*
 - a. MUSEUM 500, MUSEUM 570, MUSEUM 599 (4), MUSEUM 601 (6)
 - b. Thesis Research or Project: MUSEUM 700/710/720 (10)
2. *Museum Evaluation Specialization:* Optional, see additional requirements below for option-specific information.
3. *Electives (To meet required total credits):* 500-level and above Museology coursework. Course list maintained by the program. Must include at least two courses outside of Museology.

Additional Completion Requirements

Option-specific requirements:

Museum Evaluation Specialization (9 credits): MUSEUM 576, MUSEUM 577, MUSEUM 578.

Second Language Studies

[Website](#)
[Faculty Website](#)

The Graduate Certificate in Second and Foreign Language Teaching prepares UW graduate students to use their foreign language expertise in careers involving modern foreign language teaching. The program will be of strongest interest to those interested in becoming university/college faculty. The certificate program offers training in language teaching methods, second language acquisition, and language analysis through a combination of coursework and a capstone project. The capstone project gives students the opportunity to further explore an area of academic interest or to complete a practical project related to teaching their language(s) of interest. Completion of the certificate will make graduates more effective instructors and administrators, providing a higher degree of professional preparation and marketability for positions involving modern language teaching or language program administration.

Textual and Digital Studies

206-543-7542

[Website](#)

[Faculty Website](#)

text@uw.edu

Textual studies encompasses a broad set of disciplines in the arts and humanities concerned with the production, circulation, and reception of texts in material form. From memory to written record, manuscript to book, cuneiform tablet to tablet PC, textual studies comprehends the products of literary and documentary culture in diachronic terms, and meaning as

inseparable from the medium of inscription. Its approaches, like texts themselves, cut across historical periods and geographical space. As a field of inquiry, it is at once theoretical and applied, uniting scholars and publics in critical reflection on matters fundamental to higher education: reading, writing, the library, the book.

Graduate Program

Program of Study: Graduate Certificate in Textual and Digital Studies

Program Overview

The Graduate Certificate in Textual and Digital Studies (TDS) covers a broad array of disciplinary practices whose central concern is the production, circulation, and reception of texts in material form. Scholars in textual studies include editors, philologists, historians of the book, manuscript and print culture specialists, comparative media historians, sociologists of literature, scholars of digital culture and digital humanists.

This program of study leads to the following credential:

- Graduate Certificate in Textual and Digital Studies

Admission Requirements

See [program website](#) for admission requirements.

Graduate Certificate in Textual and Digital Studies

Completion Requirements

16 credits

1. *Core Electives (10 credits)*: Choose two from a list of 500-level courses maintained by the program.
2. *Open Elective (5 credits)*: Choose an open elective in consultation with the Textual and Digital Studies advisor.
3. *Capstone (1 credit)*: Participate for one quarter in the Textual Studies Program Colloquium, including presenting a paper that builds on and unifies the work done in TDS courses.

Urban Design and Planning

[Website](#)
[Faculty Website](#)

The Urban Design and Planning Ph.D. program brings together faculty from disciplines ranging from Architecture to Sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical

environment, the built environment, and the social, economic and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource and engineering areas.

Bioengineering

N107 [William H. Foege Bioengineering](#)

206-685-2000

[Website](#)

[Faculty Website](#)

bioeng@uw.edu

Bioengineering encompasses a wide range of activities at the intersection of engineering and biomedical science. Such multidisciplinary endeavors yield discoveries and advances that are revolutionizing healthcare. The Department of Bioengineering, jointly in the School of Medicine and College of Engineering, provides an internationally recognized program of education and research. Focus areas include biomaterials and regenerative medicine, molecular and cellular engineering, imaging and image-guided therapy, neural engineering, synthetic biology, and global health.

Undergraduate Program

N107 [William H. Foege Bioengineering](#)

206-685-2000

bioeng@uw.edu

Program of Study: Major: Bioengineering

Program Overview

Bioengineering is the application of engineering principles to the fields of

biology, medicine and health care. Students will utilize knowledge from the biological sciences as well as mechanical, chemical, electrical, and computer engineering in order to invent the future of medicine through novel, innovative, and cost-effective solutions.

This program of study leads to the following credentials:

- Bachelor of Science in Bioengineering degree
- Bachelor of Science in Bioengineering degree: Data Science
- Bachelor of Science in Bioengineering degree: Nanoscience and Molecular Engineering

Admission Requirements

Engineering Undeclared Students

See section on College of Engineering Admission for additional details on Direct-to-College admission and placement process for Engineering Undeclared students. The deadline to submit a request for placement in an engineering major occurs annually on July 1.

If the number of Engineering Undeclared students requesting the major exceeds the department capacity for such students, a matching process is implemented. Factors considered include performance in prerequisite courses, quality of overall academic record, content of personal statement, applicable work or extracurricular

activities, and other special circumstances as disclosed by the applicant.

Core courses within the department form a seven-quarter curriculum designed to start spring quarter of the sophomore year. Because the curriculum is cohort-based and all students start and proceed at the same pace, Engineering Undeclared students admitted to Bioengineering after their first year are expected to start the curriculum in spring quarter of their second year.

Engineering Undeclared students in good standing with respect to the continuation criteria described below may request placement into an engineering major after completion of minimum requirements as specified below:

1. ENGR 101
2. English composition
3. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
4. CHEM 142 (or CHEM 143 or CHEM 145)
5. PHYS 121 (or PHYS 141)
6. One course from the list on this [website](#). Students are encouraged to choose a course required for graduation in the majors they are considering.
7. Minimum 2.0 grade in all courses used to satisfy placement requirements
8. Minimum 2.50 cumulative GPA in courses used to satisfy placement requirements
9. Minimum 12 credits as a matriculated UW student. Some departments require more credits. See department websites for details.

Students in good standing who do not meet the placement requirements by July 1 will be placed into a major on a conditional basis pending the completion of all placement requirements and readiness to begin the

bioengineering core sequence of courses in the following spring quarter. Additional advising resources will be available to these students. See section on College of Engineering Continuation Policy for Engineering Undeclared Students for additional details.

Current UW Students and Transfer Students

The department follows a cohort model beginning in spring quarter. Transfer students, current UW students without Engineering Undeclared status, and current UW students with Engineering Undeclared status who are eligible to begin the bioengineering core sequence of courses in their first spring quarter may apply. Admission is competitive.

Core courses within the department form a seven-quarter curriculum designed to start in the spring quarter. Because the curriculum is cohort-based and all students start and proceed at the same pace, students admitted to Bioengineering are expected to start the bioengineering curriculum in spring quarter immediately following admission.

1. Admission is for spring quarter only. Application deadline: January 15
2. Course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165); PHYS 121 (or PHYS 141); 5 credits English composition. All courses completed prior to application deadline.
3. Additional course requirements: AMATH 301 (or one course from CSE 121, CSE 122, CSE 123, CSE 142, or CSE 160; and BIOEN 217); BIOL 180; CHEM 223 or CHEM 237; PHYS 122 (or PHYS 142) - all completed or in

progress at time of application; all completed prior to beginning the Bioengineering curriculum in spring quarter

4. Grade requirements: Minimum 2.5 grade in CHEM 162 (or CHEM 153 or CHEM 165); minimum 2.50 cumulative GPA in courses required for application
5. Strongly recommended completed or in progress at time of application: BIOEN 215 or ENGR 115; and MATH 207

Factors evaluated for admission include performance in prerequisite courses, quality of overall academic record, demonstrated ability to handle a rigorous course load, record of honors, content of personal statement, applicable work or extracurricular activities, and other special circumstances as disclosed by the applicant.

Bachelor of Science in Bioengineering degree

Credential Overview

Bioengineering is the application of engineering principles to the fields of biology, medicine and health care. Students will utilize knowledge from the biological sciences as well as mechanical, chemical, electrical, and computer engineering in order to invent the future of medicine through novel, innovative, and cost-effective solutions.

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*

- a. English Composition: 5 credits from the University list
 - b. Writing: 7 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
 3. *Diversity (DIV) (3 credits)*: courses may also apply to an Area of Inquiry requirement

Areas of Inquiry (83-94 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24
2. *Natural Sciences (NSc) (59-70 credits)*
 - a. Mathematics (15-21 credits)
complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 134, MATH 135, MATH 136
 - b. Sciences (41-44 credits): CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165) and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); BIOL 180, BIOL 200, BIOL 220
 - c. Statistics (3-5 credits) one course from: STAT 390, INDE 315, STAT 311, or Q SCI 381

Additional Completion Requirements

Major Requirements (75-76 credits)

1. *Engineering Fundamentals (4-5 credits)*: One of the following options: (1) AMATH 301; (2) CSE 121 and BIOEN

- 217; (3) CSE 122 and BIOEN 217; (4) CSE 123 and BIOEN 217; (5) CSE 142 and BIOEN 217; (6) CSE 160 and BIOEN 217
2. *Bioengineering Core (37 credits)*: BIOEN 215 or ENGR 115; BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400
 3. *Bioengineering Capstone (7-10 credits)*: One of the following options: (1) BIOEN 401 plus 9 credits of BIOEN 402; (2) BIOEN 404 and BIOEN 405; students taking BIOEN 404 and BIOEN 405 take three additional engineering elective credits from a departmentally approved list (see 5, below).
 4. *Bioengineering Senior Electives (15 credits)*: from designated 400-level and above BIOEN-prefixed courses. Refer to departmental list.
 5. *Approved Engineering Electives (9-12 credits)*: Chosen from a departmentally approved list or from additional bioengineering senior elective credit. Students who take BIOEN 402 need 9 approved engineering elective credits; students who instead take BIOEN 404 and BIOEN 405 need 12.
 6. *Grade Requirements*: Minimum 2.0 grade in each BIOEN-prefixed course applied to the major

Bachelor of Science in Bioengineering degree: Data Science

Credential Overview

Bioengineering students who want to specialize in data-science-focused careers will need to take data science courses such as programming, machine learning, data visualization, data management, and societal implications of data science, along with the Bioengineering curriculum. Students who

complete all of the required coursework will have the Data Science option listed on their transcript upon graduation. This specialization will ensure that Bioengineering students interested in data science-related careers will acquire knowledge and skills to prepare for this fast-growing field.

Additional Admission Requirements

Option specific admission

By self-selection. Normally occurs winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to bioengineering major. Students declare the Data Science option with a department adviser.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: 7 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits)*: met by program requirements
3. *Diversity (DIV) (3 credits)*: courses may also apply to an Area of Inquiry requirement

Areas of Inquiry (83-94 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)

- c. Additional credits in A&H or SScto bring total to 24
- 2. *Natural Sciences (NSc) (59-70 credits)*
 - a. Mathematics (15-21 credits) complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 134, MATH 135, MATH 136
 - b. Sciences (41-44 credits): CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165) and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); BIOL 180, BIOL 200, BIOL 220
 - c. Statistics (3-5 credits) one course from: STAT 390, IND E 315, STAT 311, or Q SCI 381

Additional Completion Requirements

Option Requirements (82-86 credits)

- 1. *Engineering Fundamentals (4-5 credits):* One of the following options: (1) AMATH 301; (2) CSE 121 and BIOEN 217; (3) CSE 122 and BIOEN 217; (4) CSE 123 and BIOEN 217; (5) CSE 142 and BIOEN 217; (6) CSE 160 and BIOEN 217
- 2. *Bioengineering Core (37 credits):* BIOEN 215 or ENGR 115; BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400
- 3. *Bioengineering Capstone (7 to 10 credits):* One of the following options: (1) BIOEN 401 plus 9 credits of BIOEN 402; (2) BIOEN 404 and BIOEN 405
- 4. *Data Science Courses (minimum 23 credits):*

- a. *Introduction to Data Science:* STAT 180/CSE 180/INFO 180, INFO 201, or INFO 370
 - b. *Programming:* one course from CSE 123, CSE 143, or CSE 163
 - c. *Machine Learning:* CSE 416/STAT 416, STAT 435, or INFO 371
 - d. *Societal Implications of Data Science:* SOC 225, B H 201, B H 311, or B H 444
 - e. At least one course each in two of the following data science areas (refer to eScience Institute list):
 - i. *Data Management*
 - ii. *Data Visualization and Communication*
 - iii. *Data Science in Bioengineering:* BIOEN 420, BIOEN 423, BIOEN 424, BIOEN 436, BIOEN 447, BIOEN 449, BIOEN 451, BIOEN 466, BIOEN 485, BIOEN 488, or BIOEN 492
5. *Electives:* Data Science courses on approved list of engineering electives may be used to satisfy requirements 5.a. and 5.b., below. See department for approved list and for appropriate course combinations to satisfy minimum major requirements.
- a. *Bioengineering Senior Electives:* Designated 400-level and above BIOEN-prefixed courses (15 credits)
 - b. *Approved Engineering Electives:* Chosen from departmentally-approved list of additional bioengineering senior elective credits. Students who take BIOEN 402 need 9 approved engineering elective credits, and students who take BIOEN 404 and BIOEN 405 need 12 credits.
6. Minimum 2.0 grade in each bioengineering course applied to the major

Bachelor of Science in Bioengineering degree: Nanoscience and Molecular Engineering

Credential Overview

Bioengineering is the application of engineering principles to the fields of biology, medicine and health care. Students will apply knowledge from the biological sciences as well as mechanical, chemical, electrical, and computer engineering in order to invent the future of medicine through novel, innovative, and cost-effective solutions. This option allows students to focus on design at the nanomolecular level.

Additional Admission Requirements

Option specific admission

By self-selection. Normally occurs winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the bioengineering major. Students declare the NME option with a department adviser.

Completion Requirements

180 credits

General Education Requirements

Basic Skills (20 credits)

1. *Written and Oral Communication (12 credits)*
 - a. English Composition: 5 credits from the University list
 - b. Writing: 7 credits met by coursework in the major
2. *Reasoning (RSN) (5 credits):* met by program requirements

3. *Diversity (DIV) (3 credits):* courses may also apply to an Area of Inquiry requirement

Areas of Inquiry (83-94 credits)

1. *Arts & Humanities (A&H) and Social Sciences (SSc) (24 credits)*
 - a. A&H (10 credits)
 - b. SSc (10 credits)
 - c. Additional credits in A&H or SSc to bring total to 24
2. *Natural Sciences (NSc) (59-70 credits)*
 - a. Mathematics (15-21 credits)
complete one of the following:
 - i. MATH 124, MATH 125, MATH 126, MATH 207 (or AMATH 351), MATH 208 (or AMATH 352)
 - ii. MATH 134, MATH 135, MATH 136
 - b. Sciences (41-44 credits): CHEM 142, CHEM 152, CHEM 162 (or CHEM 143, CHEM 153; or CHEM 145, CHEM 155, CHEM 165) and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122 (or PHYS 141, PHYS 142); BIOL 180, BIOL 200, BIOL 220
 - c. Statistics (3-5 credits) one course from: STAT 390, IND E 315, STAT 311, or Q SCI 381

Additional Completion Requirements

Option Requirements (77-78 credits)

1. *Engineering Fundamentals (4-5 credits):*
One of the following options: (1) AMATH 301; (2) CSE 121 and BIOEN 217; (3) CSE 122 and BIOEN 217; (4) CSE 123 and BIOEN 217; (5) CSE 142 and BIOEN 217; (6) CSE 160 and BIOEN 217
2. *Bioengineering Core (37 credits):*
BIOEN 215 or ENGR 115; BIOEN 315,

BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 400

3. *Bioengineering Capstone (10 credits)*: BIOEN 401, plus 9 credits of BIOEN 402.
4. *Nanoscience and Molecular Engineering Courses (21 credits)*: NME 220, NME 321, NME 421; minimum 15 credits of designated 400-level and above BIOEN-prefixed nano-molecular engineering courses; refer to departmental list. The senior capstone (10 credits from BIOEN 401 and BIOEN 402) must be in an NME area.
5. *Approved Engineering Electives (5 credits)*
6. Minimum 2.0 grade in each bioengineering course applied to the major

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve clinical challenges and create biomedical devices and materials. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare, most commonly by entering graduate school, medical school, or the growing biomedical industry. The degree program culminates in the year-long senior capstone project, in which students develop their knowledge and skills by doing cutting-edge research in faculty labs working with clinical or industry mentors to generate devices that address medical challenges. The

Bachelor of Science in Bioengineering degree program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. This accreditation means the B.S. degree addresses specific learning outcomes and can be counted toward a Professional Engineer certification for certain industry careers. Associated learning outcomes include an ability to apply principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations), and statistics, to solve bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems, to analyze, model, design, and realize bio/biomedical devices, systems, components, or processes, and to make measurements on and interpret data from living systems. Additional learning objectives and other details can be found on the department website.

- *Instructional and Research Facilities*: The department is housed in the Foege North building. Amenities include instructional laboratories, computing laboratories for class instruction and student use, a student work room, a seminar room, and meeting space. Department administration, faculty offices, and many of the faculty research labs are also located in this building. Other laboratories are located in the School of Medicine and South Lake Union research facilities. The department also hosts UWEB (University of Washington Engineered Biomaterials) and collaborates in the UW Center for Neurotechnology, Center for Translational Muscle Research, Institute for Stem Cell and Regenerative Medicine, and other research centers in computational bioengineering, neural

engineering, biomaterials and regenerative medicine, molecular and cellular engineering, technology for expanding access to healthcare, bioinstrumentation, medical imaging and image-guided therapy, and systems, synthetic, and quantitative biology.

- *Honors Options Available:* Departmental Honors (see adviser for requirements), Interdisciplinary Honors (see University Honors Program), and College Honors (completion of both Interdisciplinary Honors and Departmental Honors).
- *Research, Internships, and Service Learning:* Many undergraduate bioengineering students participate in internships, including the College of Engineering Co-op Program. The BioEngage industry collaboration program provides networking opportunities to pursue internships and employment. Seniors are welcome to participate in the graduate technology commercialization courses and UW business competitions such as the Holloman Health Innovation Challenge.
- *Department Scholarships:* Contact adviser for more information.
- *Student Organizations/Associations:* Bioengineering students participate in many campus-wide organizations such as the UW chapter of iGEM (International Genetically Engineered Machine). The department hosts the UW chapter of the Biomedical Engineering Society (BMES), which organizes professional and social events that support student wellness and preparation for medical school, graduate school, and industry. The Bioengineers Without Borders (BWB) organization, which is unique to the UW, generates solutions for global health challenges.

[Website](#)

[Faculty Website](#)

For undergraduates, the department offers an undergraduate minor, and collaborates with the School of Public Health to support a Global Health Option within the Public Health-Global Health undergraduate major. For graduate and professional students, the department offers a Master of Public Health, a Doctor of Global Health Leadership & Practice (DrGH), and two PhD options:

Global Health Metrics & Implementation Science and Pathobiology. Three graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. The department applies a strong cross-cutting focus on social justice and equity to its current and emerging focus areas, including: global environmental change; health economics; health metrics and evaluation; health system strengthening and implementation science; infectious diseases; injury and violence prevention; laboratory sciences; medicines safety; mental health; and women's, adolescents' and children's health.

Program of Study: Minor: Global Health

Program Overview

The Global Health Minor provides undergraduate students with an overview of the major problems and policy issues in global health. Students are able to understand and discuss the determinants of global health and global responses to health problems, and to engage actively in efforts to improve health as global citizens. Students graduating with a Global Health Minor demonstrate a basic understanding of the following for both developing country and other low-resource settings: the burden of the most important health problems contributing to excess morbidity and mortality; major historical, political, social, environmental, and economic determinants of adverse health; the pathophysiology of

the most prevalent infectious and chronic diseases and medical and public health approaches for prevention and treatment; the current and historic health programs and policies designed to address major health problems; and how to critically analyze relevant topics in the literature and popular press.

This program of study leads to the following credential:

- Minor in Global Health

Completion Requirements

30 credits:

1. *Required courses (9 credits):* G H 101/GEOG 180/JSIS B 180; G H 201; and G H 210 or G H 410
2. *Perspectives in global health series (2 credits):* G H 401 and G H 402
3. *Electives (to bring total to 30 credits):* Minimum of one elective course from each of the four content areas selected from a list of approved courses available from the Department of Global Health website
4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed through the UW
6. Minimum 15 upper-division credits
7. Minimum 2.0 grade in courses applied to the minor

Program of Study: Doctor of Global Health (Leadership and Practice)

Program Overview

The DrGH addresses a documented need for advanced degree programs that generate practice-based leadership skills for global health settings as opposed to more commonly available programs that focus largely on research skills. The DrGH degree program will improve the skills of global health leaders in planning, catalyzing resources; motivating teams; strengthening national policy; and, implementing,

managing, and evaluating evidence-based programs in a variety of global health settings. DrGH graduates will gain the ability to understand and successfully navigate and work across diverse organizations and settings, including Ministries of Health (MOH), multilateral and bi-lateral agencies (e.g., the World Health Organization [WHO], the US Agency for International Development [USAID]), non-governmental organizations (NGOs), foundations, academic institutions, and private sector organizations.

This program of study leads to the following credential:

Doctor of Global Health (Leadership and Practice)

Completion Requirements

92 credits

1. *Foundational courses (19 credits):*
 - a. G H 511
 - b. G H 531
 - c. Qualitative & Quantitative Methods courses (12 credits): Course list maintained by the program.
2. *Leadership Policy Management Series & Implementation Science (13 credits):* G H 521, G H 522, G H 523, G H 541
3. *Year 1 Seminar (9 credits):* G H 585, G H 586, G H 587
4. *Year 2 Seminar (3 credits):* G H 588
5. *Areas of Emphasis (12 credits):* Choose six credits from two of the following

areas. Course lists maintained by the program. Students may complete alternate areas of emphasis with program approval.

- a. Health Economics
 - b. Health Promotion & Health Behavior
 - c. Monitoring & Evaluation (M&E)/"Data & Strategic Information"
 - d. Policy & Advocacy
6. *Mentored Leadership and Practice Experience (LPEs) (24 credits):* GH 610
 7. *Practice Doctorate "meta project" (12 credits):* GH 801

Program of Study: Doctor of Philosophy (Global Health: Global Health Metrics & Implementation Sciences)

Program Overview

The Department of Global Health, in collaboration with the Institute for Health Metrics and Evaluation and Health Alliance International, have developed a PhD program in Global Health that is the first of its kind, building on the expertise of our faculty in the areas of metrics and implementation science. The PhD program provides students with the latest and most innovative tools to advance global health solutions that are critical for decision-making and priority setting.

This program of study leads to the following credential:

- Doctor of Philosophy (Global Health: Global Health Metrics & Implementation Sciences)

Admission Requirements

See this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Global Health: Global Health Metrics & Implementation Sciences)

Completion Requirements

98 credits

1. *Core Credits (46 credits):*
 - a. Global Health: PABIO 550, GH 511, GH 535, GH 536, GH 537, GH 541
 - b. Seminar: GH 580 (4 credits)
 - c. Epidemiology: EPI 512, EPI 513
 - d. Quantitative Methods: 8 credits of coursework. Course list maintained by the program.
 - e. Leadership, Policy and Management: 1 course from a list maintained by the program.
2. *Areas of Emphasis (11 credits):*
 - a. Advanced Health System Research Methods: 8 credits of coursework. Course list maintained by the program.
 - b. Operations Research and Modeling: 3 credits of coursework. Course list maintained by the program.
3. *Dissertation (27 credits):* G H 800
4. *Electives (to meet required credit total):* 500- and/or 600-level coursework

Program of Study: Doctor of Philosophy (Pathobiology)

Program Overview

As a discipline, Pathobiology ties together the fundamental concepts of biology, medicine, and public health, particularly as applied to global health issues. The program

applies a multidisciplinary approach as well as the latest research technologies to the study of public health problems such as viral, bacterial and parasitic diseases, as well as other conditions such as cancer. By investigating the mechanisms underlying multifactorial diseases, our program emphasizes the preventive as well as the curative, and a broader view of disease etiology. The program applies the research tools of immunology, molecular biology, pathology, and genetics to the detection and characterization of cancer, sexually transmitted diseases, and respiratory and parasitic infections.

Program of Study: Master of Science (Pathobiology)

Program Overview

The Pathobiology Graduate Program is not currently accepting students directly into the MS program. However, the MS program remains an option under specific circumstances, such as failure to pass the General Examination or changes to academic goals.

This program of study leads to the following credential:

- Master of Science (Pathobiology)

Admission Requirements

Admission to this program is not available. Program is only available to students enrolled in the Doctor of Philosophy (Pathobiology) program.

Master of Science (Pathobiology)

Completion Requirements

60 credits

1. *Required Courses*: PABIO 551, PABIO 552, PABIO 553, PABIO 580 (1 credit), PABIO 581 (1 credit), PABIO 582 (1.5 credits), PABIO 590 (1 credit), PABIO 500 (3 credits)
 2. *Global Health Doctoral Seminar*: G H 580 (2 credits)
 3. *Epidemiology Course*: EPI 511
 4. *Electives (21.5 credits)*: PABIO coursework numbered 500 to 700
 5. *Thesis (9 credits)*: PABIO 700
-

School of Law

[Website](#)

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current *School of Law* catalog.

Juris Doctor Program

[Website](#)

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of eight quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, transnational law, perspectives on the law, and legal analysis, research and writing.

To graduate, a student must complete the following requirements during their second and third years of law school:

1. 87 more credit hours (assuming the completion of 48 credits during the first year), for a total of 135 credit hours

2. At least 5 more residence quarters of at least 12 credits per quarter, for a total of 8 or more residence quarters (including the first year)
3. Professional Responsibility (4 credits)
4. Administrative Law (4 credits) beginning with the 1L class entering in Autumn 2018
5. Business Organizations (4 credits) beginning with the 1L class entering in Autumn 2018
6. Evidence (4 credits) beginning with the 1L class entering in Autumn 2018
7. Public Service requirement
8. Experiential Coursework requirement
9. Advanced writing requirement

Admission

New students may enter the School of Law only in autumn quarter. To be considered for admission, applicants must follow the application instructions listed on the School of Law website, register with the Law School Admission Council (LSAC) and Credential Assembly Service (CAS), take the Law School Admission Test (LSAT) and demonstrate that they have earned a baccalaureate degree from a regionally accredited U.S. or Canadian university or the foreign equivalent whose program has been deemed comparable to that of a four-year baccalaureate degree prior to commencing the law program. Applications are due by March 15.

For those students who have carefully researched their law school options, the Early Decision Program provides an expeditious evaluation and decision by the Admissions Committee. The program is

designed for those applicants that are confident that the University of Washington School of Law is their clear first choice. Admission through the Early Decision Program is competitive, as applicants are evaluated under the same criteria as those who apply during the regular admissions cycle. In choosing this option, applicants are expected to commit to the University of Washington School of Law, if admitted, and may not apply Early Decision to any other law school in the same admissions cycle. Applications must be submitted by November 15 to be considered.

Transfer Applicants

A JD student who has completed their first-year JD curriculum at a member school of the Association of American Law Schools may apply for admission with advanced standing as a JD degree candidate.

An LLM student who is currently enrolled in an LLM program at an ABA-accredited law school may apply to transfer as a JD candidate with advanced standing provided the applicant has met all of the following criteria: (1) the applicant is a graduate of a law school in a country outside the United States; (2) the applicant successfully completed JD degree coursework while enrolled in the LLM program; and (3) the law school that the applicant enrolled at for their LLM degree has a grading system for LLM students in JD courses that is comparable to the grading system for JD degree students in the course.

Transfer students are accepted on a space-available basis only. Selection of applicants is based on evidence that: (1) the candidate can produce above-average work at the University of Washington School of Law and (2) the candidate will contribute to the diversity of the student body. Transfer

applications are accepted beginning May 1 through July 15.

Financial Aid

UW Law is dedicated to helping our students meet educational expenses through a variety of options, including scholarships, grants and federal loans. Each year, the law school and the University's Office of Student Financial Aid (OSFA) develop comprehensive financial aid packages to help students achieve their education goals while minimizing student educational debt.

Eligible students may submit a Free Application for Federal Student Aid (FAFSA) to apply for federal aid. The University's priority deadline is January 15. Additional information is available at www.law.uw.edu/admissions/financing.

Additional Information

For additional information, visit the School of Law website at www.law.uw.edu. To learn more about the services offered by the Law School Admission Council, visit www.lsac.org.

School of Medicine

[Website](#)

Established in 1946, the UW School of Medicine is the only medical school for the five-state WWAMI region, and the only five-state medical school in the country. Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, Northwest Hospital & Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Healthcare System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 270 medical students to its first-year class and has a total enrollment of over 1000 students pursuing the Doctor of Medicine degree. The full-time faculty has more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and/or graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, genetic counseling, and medical technology. The School is also

home for the Physician Assistant Training Program known as MEDEX.

Doctor of Medicine Program

[Website](#)

Upon completion of the medical student education program curriculum of the School of Medicine, the MD degree is awarded to those candidates who (1) have shown evidence of good moral and ethical character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University of Washington and WWAMI partner universities.

Admission

Procedures and policies are subject to change. The most current information about the admission process is available on the [School of Medicine Admissions page](#).

Medical School Curriculum (For students entering 2017 to 2020; in effect for these four cohorts from 2017 to 2024)

The four-year medical school curriculum consists of three phases, totaling 283 credits.

- Foundations Phase - 120 credits

- Patient Care Phase - 86 credits
- Explore and Focus Phase - 77 credits

An Ecology of Health and Medicine/Themes in Medicine course spans all three phases of the curriculum. Students gain familiarity and understanding of our healthcare system, including specifics about health policy, patient safety, social determinants of health, health equity, value-based care, population health, teamwork, medical informatics, and ethics/professionalism.

1. Foundations Phase

The first 18 months of the medical-student curriculum, starting with a two-week clinical immersion that introduces the medical profession and includes instruction and supervision related to basic clinical skills, is followed by eight integrated basic science blocks.

Pathology, Human Form and Function (anatomy and radiology), and Pharmacology are threaded throughout all blocks of the Foundations Phase. In the longitudinal Foundations of Clinical Medicine (FCM) course, which spans all 18 months of the Foundations Phase, students learn under supervision to perform a detailed medical history and physical examination, develop clinical reasoning skills, and communicate and establish rapport with patients from all backgrounds. They also spend one full day every other week working with patients and other health professionals in outpatient primary care clinics.

Foundations Phase Curriculum (120 credits)

Most students are also able to take elective courses.

a. Blocked Courses

- i. Molecular and Cellular Basis of Disease (11 credits)
 - ii. Invaders and Defenders (10 credits)
 - iii. Circulatory Systems (16 credits)
 - iv. Blood and Cancer and Musculoskeletal (8 credits)
 - v. Energetics and Homeostasis (10 credits)
 - vi. Mind, Brain, and Behavior (14 credits)
 - vii. Lifecycle (8 credits)
- b. **Longitudinal Courses**
- i. Foundations of Clinical medicine (15-16 credits)
 - ii. Ecology of Health and Medicine/Themes in Medicine (4 credits)
- c. **Scholarship Courses**
- i. Independent Investigative Inquiry (6-7 credits) - Conducted in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. Helps the student gain an understanding of the philosophy and methods of scientific investigation. Fosters skills of life-long learning.
 - ii. Research Methods, including Epidemiology and Biostatistics (6 credits)
- d. **Consolidation and Transition** (11 credits) - A transition period between the Foundation Phase and the Patient Care Phase. Preparation for U.S. Medical Licensing Examination (USMLE step 1), including a Foundations Capstone to review key concepts. Students complete the Independent Investigative Inquiry and the transition to clerkships.

2. Patient Care Phase

Students work as junior members of medical-care teams in medical-school-affiliated hospitals, clinics, or practices located in the five-state WWAMI region. Students learn and practice clinical skills, gain clinical experience, and increase clinical problem-solving abilities.

Patient Care Curriculum (86 credits)

- i. Family Medicine (12 credits)
- ii. Internal Medicine (24 credits)
- iii. Obstetrics/Gynecology (12 credits)
- iv. Pediatrics (12 credits)
- v. Psychiatry and Behavioral Sciences (12 credits)
- vi. Surgery (12 credits)
- vii. Ecology of Health and Medicine/Themes in Medicine (2 credits)

3. Explore and Focus Phase

Students continue to hone clinical skills and prepare for residency. Includes four required clerkships and 20 weeks of clinical electives.

Explore and Focus Curriculum (77 credits)

- i. Neurology/Neurosurgery (8 credits)
- ii. Emergency Medicine (8 credits)
- iii. Advanced Patient Care (16 credits)
- iv. Clinical electives (40 credits)*
- v. Ecology of Health and Medicine/Themes in Medicine (1 credit)
- vi. Transition to Residency (4 credits)

*Students in the Medical Scientist Training Program and the UW Pathology fellowship who enter the UWSOM prior to 2015 and who do not engage in the clinical curriculum immediately after completing pre-clinical coursework meet the clinical requirements as they exist at the time they enter, with the exception of 8 credits of clinical electives which are waived. These students enter the clinical curriculum in summer of their third year of MD courses after completion of the PhD or UW Pathology fellowship.

Medical School Curriculum (For students entering 2021 or after)

The four-year medical school curriculum consists of three phases, totaling 280 credits.

- Foundations Phase - 120 credits
- Patient Care Phase - 84 credits
- Explore and Focus Phase - 76 credits

A Themes in Medicine course spans all three phases of the curriculum. Students gain familiarity and understanding of our healthcare system, including specifics about health policy, patient safety, social determinants of health, health equity, value-based care, population health, teamwork, medical informatics, and ethics/professionalism.

1. Foundations Phase

The first 18 months of the medical-student curriculum, starting with a two-week clinical immersion that introduces the medical profession and includes instruction and supervision related to basic clinical skills, is followed by eight integrated basic science blocks. Pathology, Human Form and Function (anatomy and radiology), and

Pharmacology are threaded throughout all blocks of the Foundations Phase. In the longitudinal Foundations of Clinical Medicine (FCM) course, which spans all 18 months of the Foundations Phase, students learn under supervision to perform a detailed medical history and physical examination, develop clinical reasoning skills, and communicate and establish rapport with patients from all backgrounds. They also spend one full day every other week working with patients and other health professionals in outpatient primary care clinics.

Foundations Phase Curriculum (120 credits)

Most students are also able to take elective courses.

a. Blocked Courses

- i. Molecular and Cellular Basis of Disease (11 credits)
- ii. Invaders and Defenders (10 credits)
- iii. Circulatory Systems (16 credits)
- iv. Blood and Cancer and Musculoskeletal (8 credits)
- v. Energetics and Homeostasis (10 credits)
- vi. Mind, Brain, and Behavior (14 credits)
- vii. Lifecycle (8 credits)

b. Longitudinal Courses

- i. Foundations of Clinical medicine (15-16 credits)
- ii. Themes in Medicine (4 credits)

c. Scholarship Courses

- i. Independent Investigative Inquiry (6-7 credits) - Conducted in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written

paper. Helps the student gain an understanding of the philosophy and methods of scientific investigation. Fosters skills of life-long learning.

- ii. Research Methods, including Epidemiology and Biostatistics (6 credits)
- d. **Consolidation and Transition** (11 credits) - A transition period between the Foundation Phase and the Patient Care Phase. Preparation for U.S. Medical Licensing Examination (USMLE step 1), including a Foundations Capstone to review key concepts. Students complete the Independent Investigative Inquiry and the transition to clerkships.

2. Patient Care Phase

Students work as junior members of medical-care teams in medical-school-affiliated hospitals, clinics, or practices located in the five-state WWAMI region. Students learn and practice clinical skills, gain clinical experience, and increase clinical problem-solving abilities.

Patient Care Curriculum (84 credits)

- i. Family Medicine (12 credits)
- ii. Internal Medicine (24 credits)
- iii. Obstetrics/Gynecology (12 credits)
- iv. Pediatrics (12 credits)
- v. Psychiatry and Behavioral Sciences (12 credits)
- vi. Surgery (12 credits)

3. Explore and Focus Phase

Students continue to hone clinical skills and prepare for residency.

Includes four required clerkships and 20 weeks of clinical electives.

Explore and Focus Curriculum (76 credits)

- i. Neurology/Neurosurgery (8 credits)
- ii. Emergency Medicine (8 credits)
- iii. Advanced Patient Care (16 credits)
- iv. Clinical electives (40 credits)*
- v. Transition to Residency (4 credits)

*Students in the Medical Scientist Training Program and the UW Pathology fellowship who enter the UWSOM prior to 2015 and who do not engage in the clinical curriculum immediately after completing pre-clinical coursework meet the clinical requirements as they exist at the time they enter, with the exception of 8 credits of clinical electives which are waived. These students enter the clinical curriculum in summer of their third year of MD courses after completion of the PhD or UW Pathology fellowship.

Student Evaluation and Promotion

Students must complete all curricular, academic, and professional conduct requirements, which include meeting the Essential Requirements and Technical Standards and demonstrating attitudes and behavior appropriate to a career in medicine. Student evaluation is based on observation of the student's behavior and conduct by the faculty and others involved in teaching as well as on papers and examinations. Every student must pass all academic requirements, all School of Medicine examinations, Steps 1 and 2 of the United States Medical Licensing Examinations, and

an approved scholarly Independent Investigative Inquiry project, as well as demonstrating specific clinical skills developmental benchmarks before receiving the Doctor of Medicine degree. No exceptions are permitted. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of deficiencies and remedial requirements, if any, for these deficiencies.

A student may be dismissed from the School of Medicine if s/he does not meet the standards for graduation set by the School, to include failure to maintain an acceptable academic record, failure to follow academic directives provided by the School's committees, and/or failure to develop attitudes and behavioral patterns appropriate to a career in medicine. A pattern of documented concerns about a student's performance and professionalism may result in the student's being dismissed.

The Faculty Council on Academic Affairs (FCAA) reviews the School of Medicine's and Student Progress Committee's actions, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. Once dismissal or withdrawal from the School has occurred, the student may not petition for reinstatement, and must instead apply for readmission through the standard admission process and procedures.

Honor Societies

Alpha Omega Alpha (AOA), a national honor medical society, elects members on the basis of high scholarship and good moral character. AOA recognizes and perpetuates excellence in the medical profession, with goals to promote scholarship and research in medical school, encourage high standards

and conduct, and recognize high attainment in medical science, practice, and related fields.

Gold Humanism Honor Society (GHHS), a national honor medical society, elects members on the basis of high scholarship and good moral character. GHHS recognizes individuals who are exemplars of humanistic patient care and who can serve as role models, mentors, and leaders in medicine. Goals involve promoting humanism and patient-centered care throughout the medical profession.

Grading System

The Curriculum Office implements and manages guidelines governing the grading system. The Associate Dean for Curriculum collaborates with course and clerkship directors and regional Foundations and Clinical Assistant Deans. The Student Progress Committee reviews all fail grades and the performance of students whose evaluations include a pattern of evaluator or professional development concerns.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Concurrent Degrees and Oral Maxillofacial Surgery Program

Permission to pursue a concurrent degree is granted only if a student is progressing in a satisfactory manner in the medical school curriculum and shows evidence of being able to take on the additional workload. Participation in a concurrent degree program will delay the student's anticipated date of graduation.

Medical Scientist Training (MD/PhD) Program

Highly qualified candidates have a wide choice of research specializations. Participating graduate departments and interdepartmental disciplines include biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. Participating programs include neuroscience, molecular and cellular biology, and molecular medicine and mechanisms of disease. Students may also conduct research at the Fred Hutchinson Cancer Research Center.

Candidates submit an application and any supplemental material requested by January 1. Consideration is given to applicants with significant research experience and/or a minimum 3.50 cumulative GPA, or minimum MCAT scores of 10 in each category.

Applicants correspond directly with the administrator of the Medical Scientist Training

MD/Master of Health Administration (MD/MPH)

The MD/Master of Public Health (MPH) program allows students who are

particularly interested in public health policy, clinical epidemiology, or community-health prevention or health promotion to pursue both the MD and MPH degree concurrently. The program requires one additional full year of coursework dedicated to public health and the submission of a Master's thesis. Application to the [MD/MPH](#) occurs during the start of the third year and students would take time away from the medical school curriculum starting in the fourth year. Applicants to the concurrent [MD/Master of Public Health \(MD/MPH\) program](#) must be accepted by both the School of Medicine for the MD degree and by the department of the University of Washington.

MD/Master of Public Health (MD/MHA)

The MD/Master of Health Administration (MHA) allows students particularly interested in management, healthcare policy, or systems-based approach to health care delivery to pursue both the MD and MHA degrees concurrently. Application to the [MD/MHA](#) requires one additional full year of coursework and occurs during the start of the third year. Students would take time away from the medical school curriculum starting in the fourth year.

Oral and Maxillofacial Surgery (OMS)

The OMS program is a six-year education training program that certifies graduates to practice Oral and Maxillofacial Surgery. Application to the OMS Program is limited to DDS graduates and occurs prior to matriculation at the School of Medicine. Students admitted to the program have completed dental school and enter into MD

training with advance standing. They must meet all of the requirements for both the MD degree and the Oral and Maxillofacial Surgery residency in order to remain in the program.

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars, due at the time specified and subject to change without notice. See Financial Aid Budget Information for current tuition and fees at <https://education.uwmedicine.org/student-affairs/financial-aid/>

Financial Assistance

Financial aid awards are based on need. All aid applicants must submit the Free Application for Federal Student Aid (FAFSA). The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited grant funds are available to Washington State residents who meet specific funding criteria.

Scholarships are available through the School of Medicine. A separate application for a School of Medicine scholarship is due May 31.

February 28 is the financial aid application deadline for all available aid sources. Late applicants are awarded only Stafford and unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical school.

Undergraduate Programs

Graduate Programs

For graduate program information, refer to the [UW degree program catalog](#).

Anesthesiology

[Website](#)

[Faculty Website](#)

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars.

Biochemistry

The Department provides academic education and professional training in bioethics and humanities through an MA in Bioethics; an undergraduate Minor in Bioethics; curricula in clinical ethics & professionalism for medical students, residents, and fellows; and continuing education activities for practicing health care professionals. We are committed to excellence in teaching, scholarship, & community service, promoting diversity and making our programs attractive to traditionally under-represented individuals. Faculty represent diverse scholarly disciplines, including medicine, genetics, philosophy, health services, religious studies, education, pathology, history, and other areas. Publications explore areas, including ethical, legal & social implications of genetics & genomic research; community-based participatory research; social justice & access to health care; social inequalities in health & health disparities; medical error; and palliative & end of life care.

Program of Study: Minor: Bioethics

Program Overview

The Minor in Bioethics is designed for students aspiring toward careers in the health sciences and the health professions. Courses address ethical issues in health care, health policy, public health, and the conduct of health sciences research and provide students with an appreciation of the history, philosophy, and culture of medicine, public health, and the health sciences. Located in

the School of Medicine, the Department of Bioethics and Humanities is devoted to teaching and research in bioethics and the humanities. The Department offers the only minor program available for undergraduates in the School of Medicine.

This program of study leads to the following credential:

- Minor in Bioethics

Biomedical Informatics and Medical Education

206-616-0369

[Website](#)

[Faculty Website](#)

The Department of Biomedical Informatics and Medical Education is comprised of two units: (1) the Division of Medical Education and Evaluation and (2) the Division of Biomedical and Health Informatics. The Division of Medical Education and Evaluation provides training, research and service in educational areas central to medical education including faculty and course evaluation, construction and scoring exams, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation. The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students.

Undergraduate Program

Program of Study: Major: MEDEX Degree Program

Program Overview

MEDEX Northwest, the Physician Assistant Training Program at the University of Washington, School of Medicine is offering a Bachelors in Clinical Health Services degree and a Masters in Clinical Health Services degree.

This program of study leads to the following credential:

- Bachelor of Clinical Health Services degree

Admission Requirements

1. Clinical Experience: two years minimum (4,000 hours minimum)
2. Human Anatomy and Physiology: Minimum 10 quarter or 6 semester credits. Preferably these courses should

be completed within the past five years.
Minimum 2.7 grade in each class.

3. Other Medically Related Sciences (e.g., biology, microbiology, chemistry).
Minimum 5 quarter or 3 semester credits. Minimum 2.7 grade in each class.
4. English. Two college English courses at the 100 or higher level. At least one must be a composition course. Minimum 2.7 grade in each class.

Bachelor of Clinical Health Services degree

Credential Overview

MEDEX Northwest, the Physician Assistant Training Program at the University of Washington, School of Medicine is a offering a Bachelors in Clinical Health Services degree.

Completion Requirements

129 credits:

MEDEX 450, MEDEX 451, MEDEX 452, MEDEX 453, MEDEX 454, MEDEX 455, MEDEX 456, MEDEX 457, MEDEX 458, MEDEX 459, MEDEX 460, MEDEX 461, MEDEX 462, MEDEX 463, MEDEX 465, MEDEX 466, MEDEX 467, MEDEX 468, MEDEX 469, MEDEX 470, MEDEX 471, MEDEX 472, MEDEX 473 MEDEX 474, MEDEX 475. These courses are taken over eight quarters, not all in numerical order. (Although MEDEX 450 and MEDEX 451 must be taken the first summer quarter of the program, they do not count toward the 180 credits required for the Bachelor of Clinical Health Services degree. The remaining 129 credits shown in this paragraph constitute the major for this degree.)

Graduate Program

Health Metrics Sciences

206-897-2800

[Website](#)

[Faculty Website](#)

healthms@uw.edu

Department of Health Metrics Sciences (HMS) is the world's first academic department devoted to the science of health metrics. Health metrics sciences is an integrated scientific field that is interdisciplinary, bringing together notions, methods, and techniques from statistics, demography, epidemiology, economics, and other social sciences aimed at providing rigorous measurement, using tested and high-performing instruments, to produce indicators that provide the empirical basis to understand the levels, relationships, and trends amongst health outcomes, drivers, and systems. It is a field that relies upon specialized knowledge and is deeply driven by data analysis.

Immunology

[Website](#)
[Faculty Website](#)

The mission of the Department of Immunology is to advance understanding of the function of the immune system in order to enhance the ability to fight infectious disease, cancer, and autoimmune disease. Current focus areas of research include infectious disease, tolerance and autoimmunity, allergy, innate immunity, adaptive immune responses, cancer immunology, developmental immunology, molecular immunology, cell death, and mucosal immunology. The department holds diversity and inclusiveness as core values and emphasizes their importance throughout research, recruitment, education, and practice. The department strives to create a climate that fosters belonging, respect, and value for all.

Laboratory Medicine and Pathology

[Website](#)
[Faculty Website](#)

The Department of Laboratory Medicine & Pathology provides diagnostic services in several areas with the most common being clinical lab testing and anatomic pathology diagnostics, with a major focus currently on COVID-19 test development and

implementation. This department also has several educational programs ranging from undergraduate, to graduate (master's and PhD) to residency and fellowship programs.

Undergraduate Program

206-598-2162

medtech@uw.edu

Program of Study: Major: Medical Laboratory Science

Program Overview

Medical Laboratory Science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment and prevention of disease. The disciplines within Laboratory Medicine that students learn about and train in are: Clinical Chemistry, Hematology/Coagulation, Microbiology, Transfusion Medicine, Urinalysis and Clinical Research.

This program of study leads to the following credential:

- Bachelor of Science in Medical Laboratory Science degree

Recommended Preparation

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH

410, UCONJ 420. Begin taking admission requirements, shown below.

Admission Requirements

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237; one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or Q SCI 381.
2. Complete all general education requirements including 10 credits of Social Sciences, and 10 credits of Arts & Humanities, as well as all required English and writing courses.
3. Students admitted to the medical laboratory science program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

Bachelor of Science in Medical Laboratory Science degree

Credential Overview

Medical Laboratory Science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment and prevention of disease. The disciplines within Laboratory Medicine that students learn about and train in are: Clinical Chemistry, Hematology/Coagulation, Microbiology, Transfusion Medicine,

Urinalysis and Clinical Research. Students will earn a BS degree in MLS and will be eligible to take the national certification exam, required of this profession, through the American Society of Clinical Pathology.

Completion Requirements

149 credits

1. *Courses Required for Admission (44 credits)*: See list above.
2. *Didactic Courses (60 credits)*: BIOC 405; IMMUN 441; MICROM 442, MICROM 443, MICROM 445, MICROM 460, MICROM 461; LAB M 301, LAB M 302, LAB M 418, LAB M 419, LAB M 420, LAB M 421 (6 credits), LAB M 426 (6 credits), LAB M 430, LAB M 435
3. *Clinical Rotations (45 credits)*: LAB M 423 (9 credits), LAB M 424 (9 credits), LAB M 425 (9 credits), LAB M 431, LAB M 433, LAB M 436
4. Minimum 2.0 grade in all didactic and clinical rotation courses
5. Minimum 2.00 GPA, both cumulative and in required courses

Additional Information

The Medical Laboratory Science BS degree program is the only undergraduate program in the Department of Laboratory Medicine & Pathology and also in the School of Medicine. Medical Laboratory Science (MLS) is where basic laboratory science meets the practice of medicine. It is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on blood, other body fluids, or tissue samples. This is a critical part of health care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease. Approximately 70%

of information doctors use to diagnose and treat patients come from the information obtained from laboratory test results produced by Medical Laboratory Scientists. Upon graduation from this program students will qualify to take the national ASCP MLS certification exam, which provides the credentials to work in a clinical laboratory performing diagnostic testing and reporting.

Program Description

1. *Pre-professional Phase*. During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. *Professional Phase*. The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Graduates of the medical laboratory science program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the

performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical laboratory scientists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical laboratory scientist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical laboratory scientists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- *Instructional and Research Facilities:* The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's hospital, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care

System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington.

These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.

- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Internship Opportunities:* One or two internships per year in Japan available to graduates of the medical technology program.
- *Department Scholarships:* Several offered.
- *Student Organizations/Associations:* None currently active.

Of Special Note: The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naaccls.org, www.naaccls.org. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National

Credentialing Agency for Laboratory Personnel, Inc.

Graduate Programs

Program of Study: Doctor of Philosophy (Molecular Medicine and Mechanisms of Disease)

Program Overview

Students receive rigorous interdisciplinary training designed to prepare them for translational research. Three core courses focus on mechanisms of disease, the impact of basic science on medicine, and human genetics, providing a rigorous intellectual foundation. Students also participate in one or more courses designed to provide an interface with the clinic and clinical medicine; learn basic statistics; and choose additional electives from the deep and varied menu offered by UW basic science and engineering departments. The M3D Program is designed for students to complete PhD training in five years, ready to take the next step in diverse careers in academia, biotech, the pharmaceutical industry, education, publishing or public policy.

This program of study leads to the following credential:

- Doctor of Philosophy (Molecular Medicine and Mechanisms of Disease)

Admission Requirements

Contact department for requirements.

Doctor of Philosophy (Molecular Medicine and Mechanisms of Disease)

Neurological Surgery

[Website](#)

[Faculty Website](#)

The department is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction is provided for medical students and postgraduate physicians.

Medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, UW Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's hospital. The department also has several course offerings correlating research and clinical problems of the nervous system, including research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the department. Department research facilities are housed in the Medical Research Tower of the UW Medical Center, at Harborview Research and Training Building, and at Veterans' Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year

program emphasizes preparation for a career in academic neurosurgery.

Neurology

[Website](#)

[Faculty Website](#)

Neurology's four-year residency program (including an internship) offers training in all facets of neuroscience research. In addition, the department offers training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The department is active in teaching, research, and patient care at the UW Medical Center, Seattle Veterans' Affairs Medical Center, Harborview Medical Center, Seattle Children's hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Obstetrics and Gynecology

[Website](#)

[Faculty Website](#)

The department is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female

reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

Ophthalmology

[Website](#)

[Faculty Website](#)

The department is responsible for education and instruction in both clinical and research programs in diseases of the eye and visual system.

Medical student education is provided through multiple electives in Seattle and the WWAMI region during the clinical years (usually third and fourth years of medical school). Successful graduates of medical school interested in ophthalmology apply to residency, which includes three years of training beginning in their PGY-2/R-2 year at affiliated hospitals. A PGY-1R-1 year is required prior to ophthalmology residency, (applied for at the same time as ophthalmology residency). After residency, optional programs for further specialized training are available for application at the UW Ophthalmology Department, to include a two-year ophthalmic/plastics and orbit fellowship, a two-year surgical retina fellowship, a one-year uveitis fellowship, a one-year pediatrics fellowship, and a one-year cornea fellowship. Patient care is provided under supervision of faculty physicians at the UW Medical Center, Harborview Medical Center, Veterans' Affairs Medical Center, and Seattle Children's hospital.

Clinical research programs relate to eye diseases. Laboratory research encompasses

neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit.

Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact the department.

Orthopaedics

[Website](#)

[Faculty Website](#)

The department is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the master of science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

Otolaryngology — Head and Neck Surgery

[Website](#)

[Faculty Website](#)

The department provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

Pediatrics

[Website](#)

[Faculty Website](#)

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training

is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's Hospital, University of Washington Medical Center, and Harborview Medical Center.

Psychiatry and Behavioral Sciences

[Website](#)

[Faculty Website](#)

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

Radiation Oncology

[Website](#)

[Faculty Website](#)

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the

department are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work, particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

Radiology

[Website](#)

[Faculty Website](#)

Diagnostic radiology is that branch of clinical medicine that specializes in interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The department consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both are supported by technologists and faculty in radiation physics. Instruction is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each hospital affiliated with the University.

Rehabilitation Medicine

[Website](#)
[Faculty Website](#)

The department provides education for medical students, interns, residents, and health professional students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles; and advanced investigation of special problems. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation, two residency training programs in physical therapy for acute care and neurologic physical therapy, and an interdisciplinary PhD in Rehabilitation Science. The department offers curricula leading to the Master of Occupational Therapy, Doctor of Physical Therapy, Master of Prosthetics and Orthotics, and a PhD in Rehabilitation Science.

Program of Study: Master of Occupational Therapy

Program Overview

Occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who seek to help people across the lifespan participate in activities that are important in their daily lives. These life activities (occupations) span the areas of self-care, sleep, work, education, play, leisure, and social participation.

Occupational therapists provide services to people, organizations, and populations with the goal of promoting health, well-being, and full participation in society.

Occupational therapists use a holistic perspective to provide interventions that consider the fit between people, the environments around them, and tasks or occupations that people need and want to do.

They work in partnership with clients to adapt activities and environments, select and use therapeutic activities that are meaningful to clients, and provide client, family, caregiver and community education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, develop strategies for a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work. Occupational therapists may also work with community organizations to promote health in areas such as fall prevention and to develop services and environments that can improve accessibility for people with disabilities.

Today's occupational therapists work in diverse practice settings within health care, education, behavioral health, and community-based systems of care. Common work settings include rehabilitation centers, outpatient rehabilitation clinics, schools, early intervention programs, hospitals,

mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The current and future job outlook for occupational therapists is excellent. The program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), which can be contacted at ACOTE c/o Accreditation Department AOTA, 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929, phone (301) 652-2682, www.acoteonline.org. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates are eligible to sit for the national certification examination (NBCOT). All states require state licensure in order to practice.

This program of study leads to the following credential:

- Master of Occupational Therapy

Admission Requirements

Surgery

[Website](#)

[Faculty Website](#)

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

Urology

[Website](#)

[Faculty Website](#)

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses, and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator for further information.

School of Nursing

T301 [Magnuson Health Sciences Center T](#)

[Website](#)

[Faculty Website](#)

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical healthcare needs in both urban and rural settings, often for portions of the population who have not received adequate healthcare. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

sonas@uw.edu

Program of Study: Major: Nursing

Program Overview

An international leader, the UW School of Nursing is a vibrant center of teaching, research and clinical excellence. The UW School Nursing offers two undergraduate programs: the traditional 2-year full-time Bachelor of Science in Nursing program or the fast-track Accelerated Bachelor of Science in Nursing program for applicants

who have already earned a bachelor's degree and are looking for a second career in nursing. As a nursing student, you will learn from our nationally acclaimed faculty in class and using interactive scenarios in our Learning Lab, allowing you to practice nursing skills in a safe environment before performing them in a supervised clinical setting.

This program of study leads to the following credentials:

- Bachelor of Science in Nursing (ABSN) degree
- Bachelor of Science in Nursing degree

Recommended Preparation

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Bachelor of Science in Nursing (ABSN) degree

Credential Overview

The UW School of Nursing offers a fast-track professional program to applicants who have already earned a bachelor's degree and are looking for a second career in nursing. Our Accelerated Bachelor of Science in Nursing (ABSN) program allows you to complete our BSN curriculum in five back-to-back quarters through an academically-rigorous schedule—about half the time of our traditional two-year (six quarter) BSN program. Our five-quarter (summer-to-summer) full-time program is designed for students who are self-

motivated, detail-oriented, self-reflective and strongly committed. A solid foundation of science and humanities prerequisite coursework sets you up for success in our program. The Accelerated BSN program includes: • academic coursework focused on critical thinking, care and therapeutics, and health care resources • in-class lecture with experienced nurse practitioners and researchers • clinical simulation exercises in our Learning Lab • supervised direct patient care in the field

Admission Requirements

Admission occurs once a year, for autumn quarter, with application deadline the preceding autumn quarter. Selection is capacity constrained.

Application Requirements

1. Minimum 2.80 cumulative college-level GPA
2. Minimum four of the prerequisite science courses completed with a minimum 3.0 grade in each course, and a minimum 3.30 cumulative GPA in these courses. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two quarter sequence -- one general chemistry and one organic -- for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 200.
3. College transcript(s)
4. Resume: Outlining volunteer/paid healthcare experience, community service, and leadership
5. Personal statement: reflection of personal healthcare experience and fit in nursing role and cultural awareness
6. Letter of recommendation from a healthcare provider (employer or volunteer coordinator)
7. Applicants are expected to have 100 hours of healthcare experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application.
8. All applicants are asked to attend a proctored essay session.

Entrance Requirements

1. Bachelor's degree in a non-nursing field.
2. Lifespan growth and development course -- NURS 201 or equivalent.
3. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
4. Natural Sciences (NSc) courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants take a separate microbiology laboratory if laboratory not included in general microbiology course.); NUTR 200. Minimum 3.30 cumulative GPA in these courses.
5. Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.
6. Applicants must be exempt from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant must pay for a background

check run by a company specified by the School of Nursing,

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website. To contact the School of Nursing Office of Student and Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email asknursing@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, refer to the School of Nursing website.

Completion Requirements

79 credits (Courses from the prior earned degree may be used to satisfy general education, nursing prerequisites, and electives.)

1. *Nursing Foundations (40 credits)*: NURS 303, NURS 304, NURS 401, NURS 405, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420, NURS 431
2. *Clinical Nursing (32 credits)*: NCLIN 301, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418, NCLIN 475
3. *Nursing Research and Methods (7 credits)*: NMETH 403, NMETH 450

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Bachelor of Science in Nursing degree

Credential Overview

The Bachelor of Science in Nursing (BSN) program at the UW Seattle campus is a two-year professional program that prepares you for a career as a registered nurse. As a BSN student, you will learn from our nationally acclaimed faculty in class and using interactive scenarios in our Learning Lab, allowing you to practice nursing skills in a safe environment before performing them in a supervised clinical setting. A solid foundation of science and humanities prerequisite coursework sets you up for success in our program. The BSN is a full-time program, including: • academic coursework focused on critical thinking, care and therapeutics, and health care resources • in-class lecture with experienced nurse practitioners and researchers • clinical simulation exercises in our Learning Lab • supervised direct patient care in the field.

Admission Requirements

Admission occurs once a year, for autumn quarter. Application deadline: January 15. Selection is capacity constrained.

Application Requirements

1. Minimum cumulative 2.00 GPA
2. One of the following at time of application.
 - a. Three of the total prerequisite science courses completed with a minimum 3.00 GPA
 - b. Four of the total prerequisite science courses completed with a minimum 2.80 GPA

Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for

UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 200.

3. College transcript(s)
4. Resume: outlining volunteer/paid healthcare experience, community service, and leadership
5. Personal statement: reflection of personal healthcare experience and fit in nursing role and cultural awareness
6. Letter of recommendation from a healthcare provider (employer or volunteer coordinator)
7. 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application.
8. After initial review of all applications, some are asked to attend a proctored essay session. Dates are published in the admissions publication. Eligible applicants are invited via email. Those not invited to attend the proctored essay are no longer in consideration for admission.

Entrance Requirements: Before beginning the nursing program in autumn, students must meet the following requirements:

1. Minimum 90 credits to include the following:
 - a. *Written communication (10 credits):* English composition and W-courses
 - b. *Problem-solving (8 credits):* one RSN course, chosen from MATH

107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490

- c. *Arts and Humanities (A&H) (15 credits)*
- d. *Social Sciences (SSc) (15 credits):* to include NURS 201 or equivalent
- e. *Natural Sciences (NSc) (26-33 credits):* to include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; NURS 301/B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course); NUTR 200
 - f. *Electives to complete 90 credits*
2. Minimum 2.00 cumulative GPA, and minimum 2.0 grade for each prerequisite course. Because admission is capacity constrained, the GPA for admission is usually significantly higher.
3. All applicants must be exempt from all English language proficiency requirements at UW to start the program. If offered admission the applicant is required to pay for a background check run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website. To contact the School of Nursing Office of Student and Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or

email asknursing@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, refer to the School of Nursing website.

Completion Requirements

91 credits

1. *Nursing Foundations (47 credits)*: NURS 303, NURS 304, NURS 401, NURS 405, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420, NURS 425, NURS 431, NURS 445, NURS 452
2. *Clinical Nursing (37 credits)*: NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418, NCLIN 422, NCLIN 475
3. *Nursing Research and Methods (7 credits)*: NMETH 403, NMETH 450

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The BSN/ABSN undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and

acute care. For the ten goals of the BSN degree program, visit the School of Nursing website.

- *Instructional and Research Facilities*: Learning Laboratory
- *Honors Options Available*: With College Honors (Completion of Honors core curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research Internships and Service Learning*: Students complete eight clinical courses during the BSN program, beginning with the first quarter. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- *Department Scholarships*: Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- *Student Organizations/Associations*: Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

Graduate Programs

Program of Study: Doctor of Nursing Practice

This program of study leads to the following credentials:

- Doctor of Nursing Practice
- Doctor of Nursing Practice (Adult-Gerontology Acute Care Nurse Practitioner) (fee-based)
- Doctor of Nursing Practice (Adult-Gerontology Primary Care Nurse Practitioner) (fee-based)
- Doctor of Nursing Practice (Advanced Practice Pediatric Nurse)
- Doctor of Nursing Practice (Family Nurse Practitioner) (fee-based)
- Doctor of Nursing Practice (fee-based)
- Doctor of Nursing Practice (Neonatal Clinical Nurse Specialist) (fee-based)
- Doctor of Nursing Practice (Neonatal Nursing Practitioner) (fee-based)
- Doctor of Nursing Practice (Nurse-Midwifery) (fee-based)
- Doctor of Nursing Practice (Pediatric Acute Care Nurse Practitioner)
- Doctor of Nursing Practice (Pediatric Clinical Nurse Specialist)
- Doctor of Nursing Practice (Pediatric Nurse Practitioner- Primary Care)
- Doctor of Nursing Practice (Population Health & Systems Leadership)
- Doctor of Nursing Practice (Psychiatric Mental Health Nurse Practitioner)
- Doctor of Nursing Practice (Women's Health CNS) (fee-based)

School of Pharmacy

[Website](#)

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceutics, and Pharmacy - are located in the H-Wing and F-Wing of the Health Sciences Building. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

Doctor of Pharmacy Program

[Website](#)

The School of Pharmacy offers a four-year program leading to the Doctor of Pharmacy (PharmD) degree. The curriculum of the PharmD program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.

Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medication-related problems,

promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing health-care system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Admission

The School of Pharmacy admits students for autumn quarter entrance only. Admission is competitive and is based on a number of factors including cumulative and prerequisite grade point averages (GPAs), written communication skills as demonstrated in application essays, and interview performance. The level of competition varies from year to year depending on the size and strength of the applicant pool.

On average, we receive approximately 400 applications for 105 available positions. Due to limits on enrollment, the School of Pharmacy cannot admit all qualified applicants. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to become licensed as a Washington State pharmacy intern, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Admitted students are required to meet the University and Health Sciences immunization requirements.

All applicants are required to interview as part of the UW School of Pharmacy PharmD

Admissions process. Only applicants who have completed the entirety of the PharmCAS application will be considered for interview and admission. Applications are initially assessed on their essays, recommendations, prerequisite and cumulative GPAs with the most qualified candidates invited to interview. Offers of interview are dependent upon the size and competitiveness of the applicant pool. Interviews for Priority Consideration applicants will be conducted in October. Standard admissions interviews will be conducted November through March.

Further information on admission requirements, application procedures, and program content is available on the School of Pharmacy PharmD admissions page: www.sop.washington.edu/pharmd/admissions/

Degree Requirements

Current degree requirements for entering classes are reflected in the graduating class of 2023 and later. (Graduating classes of 2022 and earlier have different course sequences as a result of this revision.) Below are the current degree requirements:

1. *Year 1 (54 core credits):* MEDCH 500, MEDCH 501, MEDCH 561, PCEUT 531, PCEUT 532, PCEUT 534, PHRM CY 501, PHRM CY 502, PHRM CY 511, PHRM CY 512, PHRM CY 513, PHRM CY 514, PHRM CY 531, PHRM CY 532, PHRM CY 541, PHRM CY 542, PHRM CY 543, PHRM PR 511, PHRM PR 512, PHRM PR 513, PHRM PR 541
2. *Year 2 (44 core credits, 26 elective credits completed during the 2nd and 3rd years):* MEDCH 532, MEDCH 533, PCEUT 537, PHRM CY 533, PHRM CY 534, PHRM CY 535, PHRM CY 544, PHRM CY 545, PHRM CY 546, PHRM CY 580, PHRM PR 514, PHRM PR 515, PHRM PR 516, PHRM PR 517, PHRM PR 541, PHRM PR 542
3. *Year 3 (27 core credits, 26 elective credits completed during the 2nd and 3rd years):* MEDCH 580, PCEUT 580, PHRM CY 503, PHRM CY 515, PHRM CY 516, PHRM CY 536, PHRM CY 537, PHRM CY 547, PHRM CY 550, PHRM PR 517, PHRM PR 542
4. *Year 4 (57 core credits):* Students must complete 56 credits of APPEs as specified in the APPE syllabus between PY3 Spring and PY4 Spring, PHRM CY 551

PharmD/PhD Concurrent Program

The goal of the accelerated concurrent degree program is to attract outstanding students who are committed to earning the PharmD degree and a PhD degree in either Pharmaceutics or Medicinal Chemistry or a PharmD degree and a MS degree in Pharmaceutical Outcomes, Research and Policy.

These students are equipped to enter academic careers that require competence in both teaching and research. Graduates of a concurrent degree program will possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research.

Admission to the PharmD/PhD program is based on the recommendation of the admission committees of the professional

degree program, the graduate program, and the PharmD/PhD program. For additional admission criteria, see respective programs.

PharmD/PhD Concurrent Program Admission Requirements

Applicants must complete admission requirements of both the PharmD and PhD programs. Consideration for the PharmD/PhD program is contingent upon completion of a PharmD application, Graduate School application, and PharmD/PhD application (available at www.sop.washington.edu/pharmd/curriculum/concurrent-degree-info).

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

Graduate Programs

For graduate program information, refer to the [UW degree program catalog](#).

Medicinal Chemistry

[Website](#)

[Faculty Website](#)

Research in the Department of Medicinal Chemistry encompasses questions of drug metabolism and disposition, drug design and delivery, and disease mechanism. Broadly speaking, the department seeks to understand how drugs and toxins interact with their targets and with detoxifying enzymes and transporters, as well as to understand the chemical and biochemical bases of cardiovascular, degenerative, developmental, and infectious diseases. Students in the PhD program work closely with faculty and collaborators in academia and the biotech/pharma industry, and are positioned for success in industry, government (EPA, FDA, NIH) and academia.

Pharmaceutics

[Website](#)

[Faculty Website](#)

The Department of Pharmaceutics trains both Ph.D. and Master of Science students. These graduate students conduct research in precision medicine that is targeted towards improving patient therapy by maximizing drug efficacy while minimizing drug toxicity. This goal is achieved by understanding the processes, including drug delivery, that determine the exposure and pharmacological response to drugs. Areas of focus include genetic, environmental, physiological and disease processes that can alter metabolism, transport, distribution and absorption of drugs and endogenous compounds. The Department pursues these multidisciplinary and translational goals

through collaborative research within the school, and with other schools at the UW and with national and international institutions. Graduates are highly successful in securing employment in the pharmaceutical industry, academia or regulatory agencies (e.g. FDA).

Pharmacy

[Website](#)

[Faculty Website](#)

The Comparative Health Outcomes, Policy, and Economics (CHOICE) Institute, housed within the Department of Pharmacy, offers a distance learning certificate, Master's degree, and Doctoral degree program in Health Economics and Outcomes Research. The CHOICE graduate programs include preparation in the academic disciplines essential to assessment of the health, cost outcomes and comparative effectiveness of health policies and medical interventions. Students attend courses in the fields of biostatistics, clinical trial design and analysis, health economics, epidemiology, and health policy in order to gain an in-depth understanding of the complex and interdisciplinary environment of outcomes research. Didactic preparation is augmented with substantive involvement in the research and teaching programs of a world renowned graduate faculty.

Daniel J. Evans School of Public Policy and Governance

[Website](#)

The Daniel J. Evans School of Public Policy and Governance educates current and future leaders and generates knowledge to co-create solutions to pressing societal problems. The Evans School's expertise can be seen in practice throughout government, nonprofit and philanthropic organizations, and the private sector. Our academic programs extend from undergraduate to master's and doctoral programs, serving students across a wide spectrum of professional interests and at different stages in their educational and professional journeys.

Our undergraduate courses and the minor in Public Policy offer a relevant and exciting introduction to the field of public policy and frameworks leaders use to address complex 21st century public challenges. Students learn how to use data and evidence to make sound public decisions, design effective public policy responsive to human behavior, and grow leadership aptitude to navigate complex policy and policy environments.

In the Evans School's multiple master's-level public administration programs, students are equipped with a foundation of knowledge and skills key to success in mission-driven, public service careers. With coursework spanning core areas in management and leadership, policy analysis, quantitative methods, budgeting, and program evaluation, students develop keen problem-solving, analytic and leadership skills to launch and advance their careers across the

public, nonprofit, philanthropic, and private sectors.

The PhD in Public Policy and Management program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. It prepares students for successful careers in academic, and in research positions in the public and nonprofit sectors.

Undergraduate Program

Program of Study: Minor: Public Policy

Program Overview

The Public Policy minor, offered through the Evans School of Public Policy & Governance, introduces students to the field of public policy and frameworks for addressing public challenges. Students learn the scientific methods used to make evidence-based public decisions, design effective public policy in the context of human behavior, and implement sound public policy in a complex networked environment with competing stakeholder interests. Building upon skills developed in students' majors and other coursework, this minor will develop students' capacities to understand complex organizations, to gain leadership skills, and to broaden understanding of the role of the nonprofit and social sectors in achieving public goals.

This program of study leads to the following credential:

- Minor in Public Policy

Minor in Public Policy

Completion Requirements

25 credits

1. PUBPOL 201 (5 credits)
2. 20 credits of 300- or 400-level PUBPOL courses, or other courses approved by the Evans School of Public Policy and Governance
3. Minimum 15 credits taken in residence through the UW Seattle campus
4. Minimum 2.00 cumulative GPA for all courses applied to the minor

School of Public Health

[Website](#)

The UW School of Public Health is grounded in teaching, research, and service. Our graduates have gone on to transform communities, lead health organizations, and find solutions to emerging public health challenges. The school is accredited by the [Council on Education for Public Health \(CEPH\)](#).

The School has five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Systems and Population Health - plus interdisciplinary programs in Health Management and Informatics, Nutritional Sciences, Public Health Genetics, and Public Health-Global Health.

Our students benefit from more than 50 centers and institutes as well as our partnerships with many health organizations and local and regional health departments across a five-state region.

Undergraduate Programs

The School of Public Health offers bachelor's degrees across four programs (Environmental Health; Health Informatics & Health Information Management; Food Systems, Nutrition, and Health; and Public Health-Global Health), as well minors in environmental health, global health, and nutrition. For more information about these programs, refer to the [UW degree program catalog](#).

General Education Requirements

The following School of Public Health general education requirements apply to all undergraduate degree programs.

1. Basic Skills
 - a. English Composition (C) - 5 credits (minimum 2.0 grade)
 - b. Additional Writing (W) - 10 credits
 - c. Reasoning (RSN) - One course (minimum 4 credits)
 - d. Diversity (DIV) - 3 credits
2. Areas of Inquiry
 - a. Arts & Humanities (A&H) - 10 credits*
 - b. Social Sciences (SSc) - 10 credits
 - c. Natural Sciences (NSc) - 20 credits
 - d. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Program of Study: Major: Food Systems, Nutrition, and Health

Program Overview

The Food Systems, Nutrition, and Health Major, leading to a Bachelor of Arts, exposes students to the complex intersections and relationships among food, policy, labor, social justice, economics, the

environment, culture, and population health. Graduates will have competency in food systems, nutrition, public health, social and economic equity, and sustainability, as well as strong liberal arts preparation in intellectual and practical skills like inquiry, analysis, communication, critical thinking, and problem-solving all of which enables them to address issues such as domestic and global food and nutrition security.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Food Systems, Nutrition, and Health

Recommended Preparation

Suggested First-and Second-Year Courses: biology, chemistry, composition or writing, statistics, and courses that satisfy the interdisciplinary breadth requirement for the major.

Admission Requirements

1. NUTR 200
2. English composition (5 credits) with minimum 2.0 grade
3. Minimum 45 credits
4. Minimum 2.00 cumulative GPA
5. Upon completion of the above, students may declare the major every quarter.

Bachelor of Arts degree with a major in Food Systems, Nutrition, and Health

Completion Requirements

84-86 credits

1. Science Literacy (10-11 credits)

- a. One of BIOL 118 (preferred), BIOL 161, BIOL 162, or BIOL 180 (5 credits)
 - b. One of CHEM 120, CHEM 142, CHEM 143, or CHEM 145 (5-6 credits)
2. Interdisciplinary Breadth (15 credits)
 - a. One of ECON 200, FISH 230/ECON 230, or ESRM 235/ECON 235/ENVIR 235 (5 credits)
 - b. Approved courses representing areas that influence food systems. See adviser or website for current approved list. (10 credits)
 3. Research Methods and Technologies (9-10 credits)
 - a. *Statistics*: one of BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 290, or STAT 311 (4-5 credits)
 - b. *Methods*: one of ENVIR 301, GEOG 425, NUTR 202, or SOC 300 (5 credits)
 4. Food Systems Core (30 credits with a minimum 2.00 cumulative GPA): NUTR 200, NUTR 302, NUTR 303, NUTR 402, NUTR 412, NUTR 493
 5. Upper-Division Electives (20 credits): Organized around concentration areas. See adviser or website for current approved list.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Food Studies, Nutrition, and Health, an interdisciplinary liberal arts major, exposes students to a complex and comprehensive model of the intersections and relationships among food, policy, labor, social justice, economics, the environment, culture, and health to prepare them to address

issues such as domestic and global food and nutrition security.

- *Instructional and Research Facilities:* The School of Public Health includes over 30 research centers.
- *Honors Options Available:* See adviser for details.
- *Research, Internships, and Service Learning:* Experiential learning is available through service-learning, hands-on laboratories, and real world problem-solving activities throughout the core courses. See adviser for details.
- *Department Scholarships:* See adviser for details.
- *Student Organizations/Associations:* See adviser for details.

Program of Study: Major: Health Informatics and Health Information Management

Program Overview

The UW Bachelor of Science in Health Informatics and Health Information Management (HIHIME) program is designed to help you develop the knowledge and skills needed to govern and manage data and administer information technology systems in health care settings. Our multidisciplinary curriculum combines, management, IT, informatics, finance, law, medicine and health sciences – positioning you for a range of career possibilities. HIHIM graduates work in areas such as medical records administration, data analysis and informatics, coding and billing, and regulatory compliance. HIHIM is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), offered by the UW Dept. of Health Services in the SPH. HIHIM

undergraduates are eligible to take the AHIMA national certifying exam, to become a registered health information administrator. RHIA certification is an industry-recognized credential and a proof of expertise in the field.

This program of study leads to the following credential:

- Bachelor of Science in Health Informatics and Health Information Management

Recommended Preparation

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); statistics; medical terminology; English composition; technical writing; interpersonal communication; public speaking; and distribution of general education and Areas of Knowledge courses.

Admission Requirements

Admission is competitive. Admission is for autumn quarter.

Early Admission

1. Application for early admission submitted between November and February 15
2. All courses required for admission must be completed at the time of application:
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses
3. Minimum 90 transfer or UW credits completed at time of application

4. Transfer applicants apply to UW Admissions for autumn quarter and also submit the HIHIM application to the department.
5. Current UW students submit the HIHIM application to the department.
6. Returning UW students (one or more quarters of non-enrollment) submit the returning student application to the UW Registrar's Office and the HIHIM application to the department.
7. Acceptance to the two-year schedule is competitive.
8. Minimum 90 earned UW or transferable credits
9. Grades
 - a. Minimum cumulative 2.50 overall GPA
 - b. Minimum cumulative 2.50 GPA in courses required for admission
 - c. Minimum 2.0 grade in each course required for admission

Regular Admission

1. Application for regular admission submitted mid-January to May 1
2. Priority given to applicants with all courses completed at time of application:
 - a. Introductory statistics: see department website for list of approved courses
 - b. Human anatomy and physiology (laboratory preferred): see department website for list of approved courses
3. Minimum 90 transfer or UW credits completed at time of application
4. Transfer applicants apply to UW Admissions for autumn quarter and also submit the HIHIM application to the department.
5. Current UW students submit the HIHIM application to the department.
6. Returning UW students (one or more quarters of non-enrollment) submit the

- returning student application to the UW Registrar's Office and the HIHIM application to the department.
7. Acceptance to the two-year or three-year schedule is competitive.
8. Minimum 90 earned UW or transferable credits
9. Grades
 - a. Minimum cumulative 2.50 overall GPA
 - b. Minimum cumulative 2.50 GPA in courses required for admission
 - c. Minimum 2.0 grade in each course required for admission

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Science in Health Informatics and Health Information Management

Credential Overview

The UW Bachelor of Science in Health Informatics and Health Information Management program is designed to help you develop the knowledge and skills needed to govern and manage data and administer information technology systems in health care settings. Our multidisciplinary curriculum combines, management, IT, informatics, finance, law, medicine and health sciences – positioning you for a range of career possibilities. HIHIM graduates work in areas such as medical records administration, data analysis and informatics, coding and billing, and regulatory compliance. HIHIM is accredited

by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), offered by the UW Dept. of Health Services in the SPH. HIHIM undergraduates are eligible to take the AHIMA national certifying exam, to become a registered health information administrator. RHIA certification is an industry-recognized credential and a proof of expertise in the field.

Completion Requirements

78 credits

1. HIHIM 400, HIHIM 405, HIHIM 408, HIHIM 409, HIHIM 410, HIHIM 411, HIHIM 414, HIHIM 415, HIHIM 420, HIHIM 421, HIHIM 425, HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 456, HIHIM 460, HIHIM 461, HIHIM 462, HIHIM 470, HIHIM 480
2. Minimum 2.0 cumulative GPA and minimum 2.0 grade in all courses applied to the major

In addition to major requirements shown above, students complete the general education requirements for the School of Public Health.

For additional information on application and program completion requirements, visit the Health Informatics and Health Information Management program website.

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of healthcare information, and prepares students for

the Registered Health Information Administrator (RHIA) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of healthcare positions upon graduation, including health information management, health informatics with emphasis on electronic health records, healthcare quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.

- *Instructional and Research Facilities:* None
- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.
- *Department Scholarships:* None
- *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

Program of Study: Major: Public Health-Global Health

Program Overview

Public Health is a school-wide liberal arts major, leading to a Bachelor of Arts or Bachelor of Science, which uses public health questions, concepts, and tools to help students develop competencies in assessment and measurement, communication, environment, ethics and social justice, natural science, population health, policy and politics, and social science with particular emphasis on collaboration and critical thinking across

these domains. Graduates move on to a range of career and educational options in business, economics, education, health sciences, law, public health, and social and behavioral sciences.

This program of study leads to the following credentials:

- Bachelor of Arts degree with a major in Public Health-Global Health
- Bachelor of Arts degree with a major in Public Health-Global Health: Education and Promotion
- Bachelor of Arts degree with a major in Public Health-Global Health: Global Health
- Bachelor of Science degree with a major in Public Health-Global Health
- Bachelor of Science degree with a major in Public Health-Global Health: Global Health
- Bachelor of Science degree with a major in Public Health-Global Health: Nutritional Sciences

Recommended Preparation

Suggested First- and Second-Year Courses: anthropology, political science, psychology, sociology; distribution of general education and Areas of Knowledge courses as well as coursework that develops critical and analytical thinking, communication skills, and an understanding of public health.

Admission Requirements

1. Admission is capacity-constrained. Completing the prerequisites and submitting an application guarantees consideration but not admission.
2. Admission is twice a year, for autumn and winter quarters. Applications, due the first Friday of spring for autumn admission and the third Friday of

autumn for winter admission, are available from the public health-global health major website. Transfer students must also apply for admission to the UW (for admission process and deadlines, refer to the UW Office of Admissions website).

3. Evaluation of applications is based on overall academic record, grades in major relevant coursework, selection of and preparation for appropriate BA or BS path, ability to make satisfactory progress toward the degree, and understanding of and potential fit with the major as demonstrated in the personal statement.
4. Applicants are strongly encouraged to attend an information session before submitting an application.
5. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

Early Admission

Students apply to the early admission option during spring of their first year for entry in autumn of their second year or during autumn of their second year for entry in winter of their second year.

Applicants must complete the following by the application deadline:

1. Minimum 30 college credits
2. Minimum 3.00 cumulative GPA
3. Minimum 2.0 in English composition (5 credits)
4. Minimum 3.0 grade in one introductory public health course from the following: ENV H 111, ENV H 205, EPI 201, EPI 220, G H 101, HSERV 100, NUTR 200, PHG 200 (HSERV 100 required for BA Education and Promotion Option; NUTR

200 required for BS Nutritional Sciences Option)

5. Minimum 3.0 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302

Upper-Division Admission

Upper division admission is typical for most students either at the UW or transferring from other institutions.

Applicants must complete the following by the application deadline:

1. Minimum 60 college credits
2. Minimum 2.50 cumulative GPA
3. Minimum 2.0 in English composition (5 credits)
4. Minimum 2.5 grade in one introductory public health course from the following: ENV H 111, ENV H 205, EPI 201, EPI 220, G H 101, HSERV 100, NUTR 200, PHG 200, or one 5-credit course from Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), or Sociology (SOC)
5. For BA path students, minimum 2.5 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302
6. For BS path students, minimum 2.5 grades in at least two courses of a year-long sequence in introductory science, with laboratories, or mathematics, chosen from biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239; CHEM 241, CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119,

or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Bachelor of Arts degree with a major in Public Health-Global Health

Credential Overview

In the Bachelor of Arts or Bachelor of Science in Public Health, students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. The major provides undergraduates with competencies in assessment and measurement, communication, environment, ethics and social justice, natural science, population health, policy and politics, and social science with particular emphasis on collaboration and critical thinking across these domains. Empowered with problem-solving skills, graduates use the degree as a foundation for a range of career and educational options in business, economics, education, health sciences, law, public health, and social and behavioral sciences.

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C) - 5 credits (minimum 2.0 grade)
2. Additional Writing (W) - 10 credits
3. Reasoning (RSN) - One course (minimum 4 credits)
4. Diversity (DIV) - 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H) - 10 credits*
2. Social Sciences (SSc) - 10 credits
3. Natural Sciences (NSc) - 20 credits
4. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Additional Completion Requirements

Major Requirements

109-110 credits

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
3. *Diversity Seminar (1 credit)*: SPH 489

4. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
5. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
9. Minimum 2.00 cumulative GPA for courses applied to the major

Bachelor of Arts degree with a major in Public Health-Global Health: Education and Promotion

Credential Overview

In the PH Major, students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. This broad liberal-

arts degree uses public health questions, concepts, and tools to teach skills valuable for a range of career and educational options across multiple disciplines. The Education & Promotion Option will offer structure and direction for a student's area of focus within this liberal-arts public health framework. In this option, students explore the development of individual, group, institutional, community and systemic strategies to improve health knowledge, attitudes, skills and behaviors.

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C) - 5 credits (minimum 2.0 grade)
2. Additional Writing (W) - 10 credits
3. Reasoning (RSN) - One course (minimum 4 credits)
4. Diversity (DIV) - 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H) - 10 credits*
2. Social Sciences (SSc) - 10 credits
3. Natural Sciences (NSc) - 20 credits
4. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Additional Completion Requirements

Major Requirements

109-110 credits

1. HSERV 100 – Required for admission. (Counts toward the 20-credit selectives requirement shown in 7, below.)
2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489
5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing, including HSERV 100, HSERV 204. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health, including HSERV 343, HSERV 344, HSERV 345, and SPH 495 PH internship. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.

9. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
10. Minimum 2.00 cumulative GPA for courses applied to the major.

Bachelor of Arts degree with a major in Public Health-Global Health: Global Health

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C) - 5 credits (minimum 2.0 grade)
2. Additional Writing (W) - 10 credits
3. Reasoning (RSN) - One course (minimum 4 credits)
4. Diversity (DIV) - 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H) - 10 credits*
2. Social Sciences (SSc) - 10 credits
3. Natural Sciences (NSc) - 20 credits
4. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Additional Completion Requirements

Major Requirements

109-110 credits

1. GH 101 (admission requirement)

2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health and Global Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489
5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG) Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or higher
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302, and 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in key domains. See website or adviser for approved list. Courses not on the list must be approved by the adviser.
8. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in global health. Minimum 15 credits G H-prefix courses; all students required to take G H 305 (3 credits) and G H 401, G H 402 (3 credits each). See website or adviser for approved list. Any course not on the list must be approved by the adviser.
9. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
10. Minimum 2.00 cumulative GPA for courses applied to the major

Bachelor of Science degree with a major in Public Health-Global Health

Credential Overview

In the Bachelor of Arts or Bachelor of Science in Public Health, students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. The major provides undergraduates with competencies in assessment and measurement, communication, environment, ethics and social justice, natural science, population health, policy and politics, and social science with particular emphasis on collaboration and critical thinking across these domains. Empowered with problem-solving skills, graduates use the degree as a foundation for a range of career and educational options in business, economics, education, health sciences, law, public health, and social and behavioral sciences.

Completion Requirements

4. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
5. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Science (BS) Selectives (40 credits)*: Students taking BIOL 180 and CHEM 142 may count these two courses toward both the Natural Science and the BS Selectives: Two year-long sequences of introductory science, with laboratories: biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); remaining credits chosen from biochemistry (BIOC 405, BIOC 406), organic chemistry

(CHEM 237, CHEM 238, CHEM 239, CHEM 241 CHEM 242, or CHEM 223, CHEM 224); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
9. Minimum 2.00 cumulative GPA for courses applied to the major

Bachelor of Science degree with a major in Public Health-Global Health: Global Health

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C) - 5 credits (minimum 2.0 grade)
2. Additional Writing (W) - 10 credits
3. Reasoning (RSN) - One course (minimum 4 credits)
4. Diversity (DIV) - 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H) - 10 credits*
2. Social Sciences (SSc) - 10 credits
3. Natural Sciences (NSc) - 20 credits
4. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language,

they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Additional Completion Requirements

Major Requirements

119-130 credits

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
3. *Diversity Seminar (1 credit)*: SPH 489
4. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
5. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Science (BS) Selectives (40 credits)*: Students taking BIOL 180 and CHEM 142 may count these two courses toward both the Natural Science and the BS Selectives: Two year-long sequences of introductory science, with laboratories: biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); remaining credits chosen from biochemistry (BIOC 405, BIOC 406), organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241 CHEM 242, or CHEM 223,

CHEM 224); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in global health. Minimum 15 credits G H-prefix courses; all students required to take G H 305 (3 credits) and G H 401, G H 402 (3 credits each). See website or adviser for approved list. Any course not on the list must be approved by the adviser.
8. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
9. Minimum 2.00 cumulative GPA for courses applied to the major

Bachelor of Science degree with a major in Public Health-Global Health: Nutritional Sciences

Credential Overview

In the PH Major, students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. This broad liberal-arts degree uses public health questions, concepts, and tools to teach skills valuable for a range of career and educational options across multiple disciplines. The Nutritional Sciences Option will offer structure and direction for a student's area of focus within a liberal-arts public health framework. In this option, students will get a robust foundation in natural sciences along with their nutrition-focused public health fundamentals.

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C) - 5 credits (minimum 2.0 grade)
2. Additional Writing (W) - 10 credits
3. Reasoning (RSN) - One course (minimum 4 credits)
4. Diversity (DIV) - 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H) - 10 credits*
2. Social Sciences (SSc) - 10 credits
3. Natural Sciences (NSc) - 20 credits
4. Additional Areas of Inquiry - 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the A&H requirement. Completion through the third quarter is required for A&H credit.

Additional Completion Requirements

Major Requirements

119-130 credits

1. NUTR 200: Required for admission, but not counted toward the minimum 119-130 major credits required
2. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
3. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (4 credits), EPI 320
4. *Diversity Seminar (1 credit)*: SPH 489

5. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
6. *Natural Science (10 credits)*: 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302; 5 credits from CHEM 120, CHEM 142, CHEM 145
7. *Bachelor of Science (BS) Selectives (40 credits)*: Students taking BIOL 180 and CHEM 142 may count these two courses toward both the Natural Science and the BS Selectives: Two year-long sequences of introductory science with laboratories: biology (BIOL 180, BIOL 200, BIOL 220 and chemistry (CHEM 142, CHEM 152, CHEM 162). Remaining credits chosen from biochemistry (BIOC 405, BIOC 406); organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 223, CHEM 224
8. *Public Health Electives (20 credits)*: At least 9 credits from NUTR 310, NUTR 405, NUTR 406, NUTR 411, NUTR 420 or NUTR 446; balance of 15 credits from NUTR 302, NUTR 303, NUTR 400 (max. 2), NUTR 412 or NUTR 465; and remaining 5 credits, if necessary, of 300- and 400-level courses from approved list
9. *Public Health Capstone (5 credits)*: One of the following options: (1) minimum 2.0 grade in SPH 491 and SPH 492; (2) minimum 2.0 grade in SPH 496
10. Minimum 2.00 cumulative GPA for courses applied to the major

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Public Health is a school-wide liberal arts major, leading to a Bachelor of Arts or Bachelor of Science, which uses public health questions, concepts, and tools to teach critical thinking skills. Students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. By integrating the diverse areas of public health, students are introduced to the determinants of health, emerging diseases, access to health care and modes of health-care delivery, the geography of health, and the effects of environment on health and disease. The major provides undergraduates with competencies in health, ethics and social justice, social science, natural science, policy and politics, and environment with particular emphasis on collaboration, communication, and critical thinking across these domains. An undergraduate degree in public health provides a grounding in science, values, passion, and commitment which is valuable for a range of career and educational options across multiple disciplines.
- *Instructional and Research Facilities*: The School of Public Health has five departments -- Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- as well as interdisciplinary programs such as the Public Health major, Maternal and Child Health, Nutritional Sciences, Pathobiology, and Public Health Genetics. The School has over 30

research centers, including Institute for Public Health Genetics, Northwest Center for Public Health Practice, Center for Public Health Nutrition, Institute for Health Metrics and Evaluation, and the Health Promotion Research Center.

Administration and teaching are primarily in the Magnuson Health Sciences Center.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Majors are encouraged to engage in experiential learning. See adviser for details.
- *Department Scholarships:* See adviser for details.
- *Student Organizations/Associations:* Undergraduate Student Public Health Association (USPHA). Public Health Dawgs (PhDs).

Program of Study: Minor: Nutritional Sciences

Program Overview

The Nutrition minor provides students with a foundation of knowledge in nutritional sciences, food systems, food studies, and population health. Through an examination of food and nutrition policies and practices that affect sustainable diets and long-term health, students will gain a multidisciplinary perspective of the food environment, including the interplay of food and nutrition, human behavior, business, culture, and the environment.

This program of study leads to the following credential:

- Minor in Nutrition

Minor in Nutrition

Credential Overview

The Nutrition Minor provides students with a foundation of knowledge in nutritional sciences, food studies, food systems, and population health. Students examine food and nutrition practices and policies that affect sustainable diets and long-term health. The minor offers a multidisciplinary perspective of the food environment, including the interplay of food and nutrition, human behavior, business, culture, and the environment.

Completion Requirements

25 credits

1. Core (5 credits): NUTR 200, NUTR 400
2. Electives (20 credits): selected from an approved list. See department website for approved list.
3. Minimum 13 credits from School of Public Health
4. Minimum 15 credits upper-division courses
5. Minimum 15 credits outside student's major requirements
6. Minimum 15 credits in residence through the UW
7. Minimum 2.00 cumulative GPA for courses applied toward the minor

Graduate Programs

The School of Public Health offers graduate programs leading to the degrees of Master of Science, Master of Public Health, Master of Health Administration, Doctor of Philosophy, and Doctor of Global Health, as well as multiple Graduate Certificates. For

more information about these programs, refer to the [UW degree program catalog](#).

Program of Study: Doctor of Philosophy (Nutritional Sciences)

Program Overview

The doctoral program in Nutritional Sciences offers interdisciplinary training to prepare students to meet the needs for expanding the base of new knowledge in nutritional sciences and to apply this knowledge in public health and clinical health care settings. The PhD program is designed to assist students in gaining an advanced understanding of nutrition and metabolism, and of related biological, biochemical, molecular, and behavioral sciences, in acquiring skills in research methods, and in developing timely and original hypotheses in nutritional sciences.

This program of study leads to the following credential:

- Doctor of Philosophy (Nutritional Sciences)

Admission Requirements

Note: this program is currently only accepting applications from students currently enrolled in the Nutritional Sciences master's programs.

Doctor of Philosophy (Nutritional Sciences)

Completion Requirements

103 credits

1. *Nutritional Sciences Core (31 credits)*: NUTR 500, NUTR 512, NUTR 513, NUTR 514, NUTR 520, NUTR 521, NUTR 526, NUTR 531 (6 credits), NUTR 562
2. *Additional Nutrition (2 credits)*: Additional credits from NUTR 500+ courses
3. *Epidemiology (4-8 credits)*: EPI 511 OR EPI 512 AND EPI 513
4. *Biostatistics (8 credits)*: Select from among courses numbered 500 and above within BIOST prefix.
5. *Research Methods (8 credits)*: Select from among 500 and above Research Methods courses within EPI: Course list maintained internally by the program.
6. *Public Health Core (1 credit)*: HSERV 579
7. *Other Sciences (22 credits)*: Select from among 400 and 500 and above science courses within BIOC, BIOL, BIOST, GENOME, EPI, G H, HSERV, HUBIO, IMMUN, MICROM, NUTR, and PATH to address specific interests. Other courses as approved by adviser.
8. *Dissertation (27 credits)*: NUTR 800
9. Successful completion of the Nutritional Sciences Portfolio, completion to be verified by adviser
10. Successful completion of Graduate Coordinated Program in Dietetics requirements as applicable, completion to be verified by adviser
11. Teaching Experience, as Teaching Assistant or otherwise, completion to be verified by adviser

Program of Study: Master of Public Health (Public Health Nutrition)

Program Overview

The Master of Public Health in Nutritional Sciences provides interdisciplinary training with a strong grounding in research and evidence-based nutritional sciences and public health.

This program of study leads to the following credentials:

- Master of Public Health (Public Health Nutrition) (Capstone option)
- Master of Public Health (Public Health Nutrition) (Thesis option)

Admission Requirements

All applicants to an NSP graduate program must meet the following minimum requirements:

1. Bachelor's degree or higher in any discipline. Most applicants to the PhD program hold a master's degree in nutrition or a related discipline.
2. Completion of prerequisite coursework: nutrition (completed at time of application), general chemistry, organic chemistry, biochemistry (two quarters or 1 semester), physiology
3. A cumulative GPA of 3.00 or greater for the final 90 quarter credits or 60 semester hours completed is an expectation for the UW Graduate School. Applicants with a GPA below 3.0 may still be considered if their overall application has exceptional strengths. Financial ability requirements for international student

4. English Language Proficiency for Non-native English speakers.
5. Financial ability requirements for international student
6. Additional requirements for the GCPD program: Prerequisite courses - psychology, microbiology, food science (with laboratory), management of nutrition services; National Background Check; and ServSafe Manager Certificate. For GCPD prerequisites, appropriate professional use of each course may suffice as meeting the requirement.

Master of Public Health (Public Health Nutrition) (Capstone option)

Completion Requirements

64-67 credits, depending on option

1. *MPH Common Core (23 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516
2. *Nutritional Sciences Core (22 credits)*: NUTR 500, NUTR 512, NUTR 513, NUTR 520, NUTR 521, NUTR 526, NUTR 562,
3. *Additional MPH (credits vary depending on option)*: See additional requirements below for option-specific requirements.
4. *Culminating Project (credits vary depending on option)*: See additional requirements below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

- *Additional MPH (7 credits)*: NUTR 532 (1 credit), NUTR 595 (6 credits)
- *Electives (5 credits)*: Select from courses numbered 500 and above within School of Public Health prefixes: BHOST, ENV

- H, EPI, G H, HHHIM, HSERV, HSMGMT, NUTR, PABIO, PHG, SPH.
- *Culminating Project (4 credits)*: NUTR 596 Practice Capstone

Master of Public Health (Public Health Nutrition) (Thesis option)

Completion Requirements

64-67 credits, depending on option

1. *MPH Common Core (23 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516
2. *Nutritional Sciences Core (22 credits)*: NUTR 500, NUTR 512, NUTR 513, NUTR 520, NUTR 521, NUTR 526, NUTR 562,
3. *Additional MPH (credits vary depending on option)*: See additional requirements below for option-specific requirements.
4. *Culminating Project (credits vary depending on option)*: See additional requirements below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

- *Additional MPH (13 credits)*: NUTR 532 (1 credit), NUTR 595 (6 credits), NUTR 531 (6 credits)
- *Culminating Project (9 credits)*: NUTR 700 Master's Thesis

Program of Study: Master of Science (Nutritional Sciences)

Program Overview

The Master of Science in Nutritional Sciences provides students with advanced

understanding of human nutrition through a curriculum that includes skills with application in both research and community settings.

This program of study leads to the following credentials:

- Master of Science (Nutritional Sciences) (Capstone option)
- Master of Science (Nutritional Sciences) (Thesis option)

Admission Requirements

All applicants to an NSP graduate program must meet the following minimum requirements:

1. Bachelor's degree or higher in any discipline. Most applicants to the PhD program hold a master's degree in nutrition or a related discipline.
2. Completion of prerequisite coursework: nutrition (completed at time of application), general chemistry, organic chemistry, biochemistry (two quarters or 1 semester), physiology
3. A cumulative GPA of 3.00 or greater for the final 90 quarter credits or 60 semester hours completed is an expectation for the UW Graduate School. Applicants with a GPA below 3.0 may still be considered if their overall application has exceptional strengths. Financial ability requirements for international student
4. English Language Proficiency for Non-native English speakers.
5. Financial ability requirements for international student
6. Additional requirements for the GCPD program: Prerequisite courses - psychology, microbiology, food science (with laboratory), management of nutrition services; National Background

Check; and ServSafe Manager Certificate. For GCPD prerequisites, appropriate professional use of each course may suffice as meeting the requirement.

Master of Science (Nutritional Sciences) (Capstone option)

Completion Requirements

46-54 credits, depending on option

1. *Public Health Core (9 credits)*: BIOST 511, EPI 511, HSERV 579
2. *Nutritional Sciences Core (22 credits)*: NUTR 500, NUTR 512, NUTR 513, NUTR 520, NUTR 521, NUTR 526, NUTR 562
3. *Additional MS Coursework (credit total varies depending on option)*: See additional requirements below for option-specific requirements.
4. *Electives (5 credits)*: Select from courses numbered 500 and above within School of Public Health prefixes: BIOST, ENV H, EPI, G H, HIHIM, HSERV, HSMGMT, NUTR, PABIO, PHG, SPH.
5. *Culminating Project (credit total varies depending on option)*: See additional requirements below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements

- *Additional MS Coursework (6 credits)*: NUTR 514, NUTR 531 (3 credits)
- *Culminating Project (4 credits)*: NUTR 596 Practice Capstone

Master of Science (Nutritional Sciences) (Thesis option)

Completion Requirements

46-54 credits, depending on option

1. *Public Health Core (9 credits)*: BIOST 511, EPI 511, HSERV 579
2. *Nutritional Sciences Core (22 credits)*: NUTR 500, NUTR 512, NUTR 513, NUTR 520, NUTR 521, NUTR 526, NUTR 562
3. *Additional MS Coursework (credit total varies depending on option)*: See additional requirements below for option-specific requirements.
4. *Electives (5 credits)*: Select from courses numbered 500 and above within School of Public Health prefixes: BIOST, ENV H, EPI, G H, HIHIM, HSERV, HSMGMT, NUTR, PABIO, PHG, SPH.
5. *Culminating Project (credit total varies depending on option)*: See additional requirements below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements

- *Additional MS Coursework (9 credits)*: NUTR 514, NUTR 531 (6 credits)
- *Culminating Project (9 credits)*: NUTR 700 Master's Thesis

Founded in 1970, the Department of Biostatistics is a leader in statistical sciences. Its faculty include members of the United States National Academy of Sciences, the Institute of Medicine, and fellows of the American Statistical Association. Alumni hold leadership roles in academia, government, and industry worldwide. The department is a center for development and application of statistical methodology across the health sciences, and has collaborative partnerships with Fred Hutchinson Cancer Research Center, Seattle Children's hospital Research Institute, Group Health Cooperative, and the Veterans' Administration. To complement research, the department recently established the Center for Biomedical Statistics to provide consulting and collaborative services.

ehug@uw.edu

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and

understanding the effects of global changes in climate and the atmosphere on human health.

Program of Study: Major: Environmental Health

Program Overview

The Bachelor of Science in Environmental Health is a great fit for students who love science, and who are passionate about using their scientific skills to address human health issues related to the built and natural environments. From water quality to workplace safety, environmental health majors are engaged in problem solving to keep communities safe and healthy. In the Bachelor of Science in Environmental Health, students learn to identify, prevent, and control environmental factors that can threaten human health. The coursework introduces students to basic principles of environmental health regulation, environmental sampling, microbiology, epidemiology, toxicology and risk assessment.

This program of study leads to the following credential:

- Bachelor of Science degree with a major in Environmental Health

Recommended Preparation

Suggested First- and Second-Year College Courses: chemistry, organic chemistry,

biology, calculus, statistics, English composition

Admission Requirements

1. Minimum requirements major. First- and second-year students complete early admission prerequisites (shown below). Third-year students complete upper-division admission prerequisites (shown below). Prospective students apply the quarter they plan to complete prerequisites for entry the following quarter.
2. Students are admitted all quarters. Applications, due the second Friday of each quarter, may be downloaded from the Environmental Health website. Applicants who meet stated requirements are admitted in time to register the following quarter as majors.
3. Students should meet with an adviser before applying.
4. Transfer students may use transferable equivalent course(s) for prerequisite coursework.

Early Admission Prerequisites

1. Minimum cumulative 3.00 GPA, with a minimum 2.0 grade in each individual course below
2. 5 credits English composition
3. CHEM 142, CHEM 152
4. MATH 124 or Q SCI 291

Upper-Division Admission Prerequisites

1. Minimum cumulative 2.50 GPA, with a minimum 2.0 grade in each individual course below
2. 5 credits English composition
3. MATH 124 or Q SCI 291
4. BIOL 180, BIOL 200, BIOL 220
5. One of the following general and organic chemistry sequences

- a. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 241
- b. CHEM 142, CHEM 152, CHEM 223, CHEM 224, CHEM 241
- c. CHEM 142, CHEM 152, CHEM 220

Bachelor of Science degree with a major in Environmental Health

Credential Overview

The Bachelor of Science in Environmental Health is a great fit for students who love science, and who are passionate about using their scientific skills to address human health issues related to the built and natural environments. From water quality to workplace safety, environmental health majors are engaged in problem solving to keep communities safe and healthy. In the Bachelor of Science in Environmental Health, students learn to identify, prevent, and control environmental factors that can threaten human health. The coursework introduces students to basic principles of environmental health regulation, environmental sampling, microbiology, epidemiology, toxicology and risk assessment.

Completion Requirements

119-132 credits

1. *Environmental Health Supporting Science (49-61 credits):*
 - a. Either MATH 124 or Q SCI 291 (5 credits)
 - b. Either BIOST 310 (recommended), STAT 220, STAT 311, or Q SCI 381 (4-5 credits)
 - c. BIOL 180, BIOL 200, BIOL 220 (15 credits)
 - d. One of the following general and organic chemistry sequences

1. CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 241 (26 credits)
2. CHEM 142, CHEM 152, CHEM 223, CHEM 224, CHEM 241 (21 credits)
3. CHEM 142, CHEM 152, CHEM 220 (15 credits)
- e. PHYS 114/PHYS 117, PHYS 115/PHYS 118 (10 credits)
2. *Environmental Health Core (minimum 37 credits)*: ENV H 311, ENV H 320, ENV H 405, ENV H 432, ENV H 433, ENV H 472, ENV H 473, ENV H 480, ENV H 482 (2 credits minimum), EPI 320, MICROM 301, MICROM 302
3. *Environmental Health Selectives (12-13 credits)*: Minimum four courses chosen from ENV H 310, ENV H 406, ENV H 417, ENV H 418, ENV H 439, ENV 440, ENV H 441, ENV H 442, ENV H 443, ENV H 444, ENV H 445, ENV H 446, ENV H 447, ENV H 448, ENV H 451, ENV H 452, ENV H 453, ENV H 460, and ENV H 462
4. 21 additional credits of approved electives. See adviser for approved list.
5. Minimum 2.0 grade in each course required for the major

Program of Study: Minor: Environmental Health

Program Overview

The Environmental Health minor is designed to help students understand the influences and impact of environmental factors on human health. Students take one required introductory course and choose from a broad range of selectives and electives covering topics such as air pollution, hazardous waste, water quality, climate change, and green chemistry. Students can declare the Environmental Health Minor with their major adviser.

This program of study leads to the following credential:

- Minor in Environmental Health

Minor in Environmental Health

Credential Overview

The Environmental Health minor is designed to help students understand the influences and impact of environmental factors on human health. Students take one required introductory course and choose from a broad range of selectives and electives covering topics such as air pollution, hazardous waste, water quality, climate change, and green chemistry. Students can declare the Environmental Health Minor with their major adviser.

Completion Requirements

Minimum 27 credits

1. *Core (3 credits)*: either ENV H 111 or ENV H 311.
2. *Approved Selectives (9 credits)*: three courses chosen from ENV H 431, ENV H 440, ENV H 445, ENV H 448, ENV H 451, ENV H 453, ENV H 472
3. Minimum 15 credits of approved ENV H electives
4. Minimum 14 credits in upper-division courses

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: In the Bachelor of Science program in environmental health, students learn to utilize tools of scientific inquiry to identify, prevent, and control environmental factors that can damage

human health. As part of their training, students are introduced to basic principles of risk assessment, microbiology, epidemiology, sampling, and toxicology, and can choose to focus in one of three interest areas: biomedical sciences, health and environmental science, and environmental public health practice.

- *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* UW Student Environmental Health Association

Graduate Programs

Program of Study: Doctor of Philosophy (Environmental Health Sciences)

Program Overview

A research-based doctoral degree program for students who want advanced training in the practice of environmental public health,

environmental toxicology, exposure science/occupational hygiene, infectious diseases, One Health or our customizable individualized track.

This program of study leads to the following credentials:

- Doctor of Philosophy (Environmental Health Sciences)
- Doctor of Philosophy (Environmental Health: Environmental Toxicology) (not admitting)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Doctor of Philosophy (Environmental Health Sciences)

Admission Requirements

Contact department for requirements.

Completion Requirements

90 credits

1. *Environmental and Occupational Health Sciences Common Core Courses and Research Rotations (40 credits):* BIOST 511, BIOST 512, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 504, ENV H 580 (5 credits), ENV H 595 (6 credits), HSERV 579
2. *Choose an Area of Emphasis from the following list (credits vary):* Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science/Occupational Hygiene
 - d. Environmental Toxicology

- e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Dissertation (28 credits)*: ENV H 583, ENV H 800 (27 credits)
 4. *Electives (to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

Doctor of Philosophy (Environmental Health: Environmental Toxicology)
(not admitting)

Admission Requirements

This credential is no longer admitting students.

Completion Requirements

90 credits

1. *Environmental and Occupational Health Sciences Common Core Courses and Research Rotations (40 credits)*: BIOST 511, BIOST 512, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 504, ENV H 580 (5 credits), ENV H 595 (6 credits), HSERV 579
2. *Choose an Area of Emphasis from the following list (credits vary): Course lists for areas of emphasis maintained on program website.*
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science/Occupational Hygiene
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health

3. *Dissertation (28 credits)*: ENV H 583, ENV H 800 (27 credits)
4. *Electives (to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

Program of Study: Master of Public Health (Environmental Health Sciences)

Program Overview

A 24-month program that bridges the scientific and health policy worlds and provides a broad perspective on environmental and occupational health. Students gain the expertise and skills to solve environmental health problems in a variety of settings, including government agencies, private industry and nonprofits. Includes a 160-hour, field-based practicum experience conducted under the guidance of a faculty adviser and practicum site supervisor.

This program of study leads to the following credentials:

- Master of Public Health (Environmental and Occupational Health: One Health)
- Master of Public Health (Environmental Health Sciences)
- Master of Public Health (Environmental Health Sciences: Occupational and Environmental Medicine)

Master of Public Health (Environmental and Occupational Health: One Health)

Completion Requirements

65-68 credits, depending on option

1. *MPH Common Core (27 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, ENV H 599B (4 credits total)
2. *Environmental and Occupational Health Sciences Common Core (credits vary depending on option)*: See additional requirements below for option-specific requirements.
3. *Degree Option Requirements (credits vary depending on option)*: See additional requirements below for option-specific requirements.
4. *Culminating Experience*: Choose thesis or capstone option.
 - a. Thesis (10 credits): ENV H 700
 - b. Capstone (9 credits): ENV H 598
5. *Electives (to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

Master of Public Health (Environmental Health Sciences)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

65-68 credits, depending on option

1. *MPH Common Core (27 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, ENV H 599B (4 credits total)
2. *Environmental and Occupational Health Sciences Common Core (credits vary depending on option)*: See additional requirements below for option-specific requirements.
3. *Degree Option Requirements (credits vary depending on option)*: See additional requirements below for option-specific requirements.
4. *Culminating Experience*: Choose thesis or capstone option.
 - a. Thesis (10 credits): ENV H 700
 - b. Capstone (9 credits): ENV H 598
5. *Electives (to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

Additional Completion Requirements

Option-specific requirements - this option requires 65 total credits

- *Environmental and Occupational Health Sciences Common Core (14 credits)*: ENV H 501, ENV H 502, ENV H 503, ENV H 580 (3 credits total)
- *Degree Option Requirements (4 credits)*: ENV H 584

Master of Public Health (Environmental Health Sciences: Occupational and Environmental Medicine)

Credential Overview

Occupational and Environmental Medicine (OEM) is a wide-ranging preventive medicine specialty focused on the evaluation, treatment and prevention of disease related to environmental and occupational exposures. OEM physicians treat work-related injuries and diseases, recognize and resolve workplace and environmental hazards, conduct research to understand and prevent illnesses and injuries related to the workplace and the environment, and guide occupational and environmental health public policy.

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

65-68 credits, depending on option

1. *MPH Common Core (27 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, ENV H 599B (4 credits total)
2. *Environmental and Occupational Health Sciences Common Core (credits vary depending on option)*: See additional requirements below for option-specific requirements.
3. *Degree Option Requirements (credits vary depending on option)*: See additional requirements below for option-specific requirements.
4. *Culminating Experience*: Choose thesis or capstone option.

- a. Thesis (10 credits): ENV H 700
 - b. Capstone (9 credits): ENV H 598
5. *Electives (to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

Additional Completion Requirements

Option-specific requirements - this option requires 68 total credits

- *Environmental and Occupational Health Sciences Common Core (9 credits)*: ENV H 502, ENV H 503, ENV H 580 (1 credit)
- *Degree Option Requirements (22 credits)*:
 - *EPI 513 OR ENV H 597 (4 credits)*
 - *BIOST 512*
 - *BIOST 513 OR ENV H 596*
 - *ENV H 550*
 - *ENV H 564*
 - *ENV H 596*
 - *ENV H 597 (2 credits)*

Program of Study: Master of Science (Environmental Health Sciences)

This program of study leads to the following credentials:

- Master of Science (Environmental Health Sciences)
- Master of Science (Environmental Health Sciences: Applied)
- Master of Science (Environmental Health: Applied Occupational Hygiene)
- Master of Science (Environmental Health: Applied Toxicology)

- Master of Science (Environmental Health: Environmental Toxicology)
- Master of Science (Environmental Health: Exposure Science)
- Master of Science (Environmental Health: Occupational Hygiene)

Master of Science (Environmental Health Sciences)

Credential Overview

A 21-month, research-based degree program for students who want specialized training in the practice of environmental public health, environmental toxicology, exposure science, infectious diseases, occupational hygiene, One Health or our customizable individualized track.

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits)*: BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579
2. *Choose one area of emphasis from the following list (credits vary depending on area of emphasis)*: Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement.

Elective courses can be ENV H courses or courses from other prefixes.

4. *Culminating experience (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements - this credential requires a total of 62 credits

Culminating experience (10 credits): ENV H 583, ENV H 700 (9 credits)

Master of Science (Environmental Health Sciences: Applied)

Credential Overview

An accelerated, 15-month, 52-credit program for students who plan to pursue practice-based careers in private industry or federal, state or local government agencies and want specialized training in the practice of environmental public health, environmental toxicology, exposure science, infectious diseases, occupational hygiene, One Health or our customizable individualized track.

Admission Requirements

Visit this program's [Graduate Admissions page](#) for current requirements.

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits)*: BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579

2. *Choose one area of emphasis from the following list(credits vary depending on area of emphasis):* Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total):* Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.
4. *Culminating experience (credits vary depending on option):* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements - this credential requires a total of 52 credits.

Culminating experience (6 credits): ENV H 598 (3 credits), ENV H 599 (3 credits)

Master of Science (Environmental Health: Applied Occupational Hygiene)

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits):* BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579

2. *Choose one area of emphasis from the following list (credits vary depending on area of emphasis):* Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total):* Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.
4. *Culminating experience (credits vary depending on option):* See additional requirements section below for option-specific requirements.

Master of Science (Environmental Health: Applied Toxicology)

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits):* BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579
2. *Choose one area of emphasis from the following list(credits vary depending on area of emphasis):* Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease

- f. One Health
- g. Environmental Public Health
- 3. *Elective courses (as needed to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.
- 4. *Culminating experience (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Master of Science (Environmental Health: Environmental Toxicology)

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits)*: BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579
2. *Choose one area of emphasis from the following list (credits vary depending on area of emphasis)*: Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.

4. *Culminating experience (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Master of Science (Environmental Health: Exposure Science)

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits)*: BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579
2. *Choose one area of emphasis from the following list (credits vary depending on area of emphasis)*: Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.
4. *Culminating experience (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Master of Science (Environmental Health: Occupational Hygiene)

Completion Requirements

52-62 credits, depending on option

1. *Environmental and Occupational Health Sciences Common Core (23 credits)*: BIOST 511, EPI 511, ENV H 501, ENV H 502, ENV H 503, ENV H 580 (2 credits), HSERV 579
2. *Choose one area of emphasis from the following list (credits vary depending on area of emphasis)*: Course lists for areas of emphasis maintained on program website.
 - a. General Track
 - b. Occupational Hygiene
 - c. Exposure Science
 - d. Environmental Toxicology
 - e. Infectious Disease
 - f. One Health
 - g. Environmental Public Health
3. *Elective courses (as needed to meet required credit total)*: Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes.
4. *Culminating experience (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Epidemiology

[Faculty Website](#)

epi@uw.edu

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the master's degree programs, as well as several graduate certificates.

Graduate Programs

Program of Study: Doctor of Philosophy (Epidemiology)

Program Overview

Deepen your knowledge of epidemiologic methods and principles through a rigorous academic curriculum coupled with research skill development by working alongside renowned faculty and a talented and diverse student body. Graduates of our PhD program have found success improving public health through research in positions in academia, research institutes, government, and industry.

This program of study leads to the following credential:

- Doctor of Philosophy (Epidemiology)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for requirements.

Doctor of Philosophy (Epidemiology)

Completion Requirements

90 credits

1. *Required Epidemiology Courses*: EPI 510, EPI 512, EPI 513, EPI 514, EPI 515, EPI 516, EPI 536, EPI 537, EPI 583 (3 credits total), EPI 584 (2 credits total), EPI 588, EPI 591 (3 credits total)
2. *Dissertation (27 credits)*: EPI 800
3. *Required Biostatistics Series*: BIOST 511, BIOST 512, BIOST 513; or BIOST 517, BIOST 518
4. *Elective Epidemiology Courses*: One Infectious Disease Course, one Non-Infectious Disease Course, and one additional Disease/Exposure or Methods course. All course lists maintained by the program.
5. *Additional School of Public Health Courses*: Minimum of 3 graduate courses of 2 or more credits offered within the School of Public Health.

Program of Study: Graduate Certificate in Public Health Genetics

This program of study leads to the following credential:

- Graduate Certificate in Public Health Genetics

Admission Requirements

Contact department for requirements.

Graduate Certificate in Public Health Genetics

Completion Requirements

Contact department for requirements.

Program of Study: Master of Public Health (Epidemiology)

This program of study leads to the following credentials:

- Master of Public Health (Epidemiology)
- Master of Public Health (Epidemiology: Global Health)
- Master of Public Health (Epidemiology: Maternal and Child Health)

Master of Public Health (Epidemiology)

Admission Requirements

Visit this program's [Graduate Admissions Page](#) for requirements for this option.

Completion Requirements

All options in this program require 64 credits

1. *Epidemiology Core Courses (15 credits)*: EPI 510, EPI 513, EPI 514, EPI 583 (3 credits)
2. *Epidemiology Thesis or Capstone (9-18 credits)*: EPI 700 (Thesis) or EPI 599 (Capstone)
3. *Biostatistics Core Courses (8 credits)*: BIOST 512, BIOST 513
4. *MPH Requirements (27-29 credits)*: PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, EPI 595 (4-6 credits)
5. *Additional option-specific requirement (credits vary depending on option)*: See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

Electives (3 credits): 500-level Epidemiology coursework from a list maintained by the program

Master of Public Health (Epidemiology: Global Health)

Admission Requirements

Admission to this degree option is not available.

Completion Requirements

All options in this program require 64 credits

1. *Epidemiology Core Courses (15 credits):* EPI 510, EPI 513, EPI 514, EPI 583 (3 credits)
2. *Epidemiology Thesis or Capstone (9-18 credits):* EPI 700 (Thesis) or EPI 599 (Capstone)
3. *Biostatistics Core Courses (8 credits):* BIOST 512, BIOST 513
4. *MPH Requirements (27-29 credits):* PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, EPI 595 (4-6 credits)
5. *Additional option-specific requirement (credits vary depending on option):* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

Global Health Courses: G H 511 and a minimum of 2 credits of G H electives - course list maintained by the program.

Master of Public Health (Epidemiology: Maternal and Child Health)

Admission Requirements

Visit this program's [Graduate Admissions page](#) for requirements.

Completion Requirements

All options in this program require 64 credits

1. *Epidemiology Core Courses (15 credits):* EPI 510, EPI 513, EPI 514, EPI 583 (3 credits)
2. *Epidemiology Thesis or Capstone (9-18 credits):* EPI 700 (Thesis) or EPI 599 (Capstone)
3. *Biostatistics Core Courses (8 credits):* BIOST 512, BIOST 513
4. *MPH Requirements (27-29 credits):* PHI 511, PHI 512, PHI 513, PHI 514, PHI 515, PHI 516, EPI 595 (4-6 credits)
5. *Additional option-specific requirement (credits vary depending on option):* See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

Maternal and Child Health Courses: EPI 521 and EPI 592A (2 credits)

Program of Study: Master of Public Health (Public Health Genetics)

This program of study leads to the following credential:

- Master of Public Health (Public Health Genetics)

Admission Requirements

Contact department for requirements.

Master of Public Health (Public Health Genetics)

Completion Requirements

Contact department for requirements.

Program of Study: Master of Science (Epidemiology)

Program Overview

The MS program includes course work in epidemiology and biostatistics, epidemiology and public health electives, and a research-based master's thesis. This degree is appropriate for students with a bachelor's degree or a clinical doctorate who prefer a program more strictly focused on epidemiologic research methods training than the MPH to prepare for research and teaching careers.

This program of study leads to the following credentials:

- Master of Science (Epidemiology: Clinical & Translational Research)
- Master of Science (Epidemiology: Public Health)

Master of Science (Epidemiology: Clinical & Translational Research)

Credential Overview

The Clinical and Translational Research Methods track is a research training program

designed for clinicians who intend to conduct research with patients in clinical settings. Examples include clinical trials on the effectiveness and safety of new treatments, studies of new tools for diagnosis or for monitoring disease course, and studies of factors that influence the outcome of illness.

Admission Requirements

Visit this program option's [Graduate Admissions page](#) for requirements.

Completion Requirements

All options in this program require 60 credits

1. *Required Epidemiology Courses*: EPI 510, EPI 512, EPI 513, EPI 514, EPI 583 (3 credits)
2. *Epidemiology Thesis (9-18 credits)*: EP 700
3. *Required Biostatistics Series*: BIOST 511, BIOST 512, BIOST 513; OR BIOST 517, BIOST 518
4. *Additional Option-specific Requirement (Varies depending on option)*: See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

1. Additional Epidemiology Course Requirements: EPI 542, EPI 573
2. Additional Translational Research Course Requirement: Minimum of 2 credits from the approved list of Translational focus courses. Course list maintained by the program.
3. Additional Biostatistics Requirement: BIOST 524

4. Research Ethics Requirement: B H 536 or 6 hours of the UW BRI Lecture Series

Master of Science (Epidemiology: Public Health)

Credential Overview

The MS General Track offers in-depth training in epidemiologic methods for students preparing to pursue a research focused career. Students may tailor the degree to specific interests through elective coursework and the thesis.

Admission Requirements

Visit this program option's [Graduate Admissions page](#) for requirements.

Completion Requirements

All options in this program require 60 credits

1. *Required Epidemiology Courses*: EPI 510, EPI 512, EPI 513, EPI 514, EPI 583 (3 credits)
2. *Epidemiology Thesis (9-18 credits)*: EP 700
3. *Required Biostatistics Series*: BIOST 511, BIOST 512, BIOST 513; OR BIOST 517, BIOST 518
4. *Additional Option-specific Requirement (Varies depending on option)*: See additional requirements section below for option-specific requirements.

Additional Completion Requirements

Option-specific requirements:

1. Additional Epidemiology Course Requirement: Minimum 6 credits chosen from elective course lists maintained by

the program. At least one course chosen must be Disease/Exposure focus.

2. Additional School of Public Health Course Requirement: Minimum 2 graduate courses offered within the School of Public Health.

Program of Study: Master of Science (Genetic Epidemiology)

This program of study leads to the following credential:

- Master of Science (Genetic Epidemiology)

Admission Requirements

Contact department for requirements.

Master of Science (Genetic Epidemiology)

Completion Requirements

The mission of the Department of Health Systems and Population Health is to work with partners in public health and healthcare to prepare leaders, design solutions, and conduct innovative research that translates

into practice and policy. The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success. Bachelor's and master's degrees are available in public health, health services administration, health information management, and health services research. Additionally, doctorate and post-doctoral opportunities are available in health services research.

Reserve Officer Training Corps

Aerospace Studies

102 [Clark Hall](#)

206-543-2360

[Website](#)

afrotc@uw.edu

Air Force Reserve Officer Training Corps (AFROTC) instills college students with the leadership, interpersonal and critical thinking skills required to succeed as premiere leaders of character for the nation while working toward a baccalaureate degree. Students taking AFROTC apply their knowledge and experience in a practical military training environment of peers. The Aerospace Studies course offerings focus on educating students in four core areas: the profession of arms, the development of aerospace power, leadership and communication theories, and national defense. Successful completion of the AFROTC program leads to a commission as a military officer in the world's best Air Force or Space Force. Air and Space Force officers serve in a variety of specialties including aviation, intelligence, cyber security, logistics, finance, engineering, maintenance, scientific research, program management and medicine.

Program of Study: Minor: Aerospace Leadership Studies

Program Overview

A minor in Aerospace Studies provides a distinctive academic experience that affords students a strong understanding of aerospace power, leadership and national defense from the Air Force's perspective. Students participate in leadership academic courses designed to improve communication skills and provide a window into military life. Students may take the AFROTC academic courses offered without any military commitment. If students wish to be considered for entry into the AFROTC program, they must meet certain requirements to pursue a commission as a Second Lieutenant in the United States Air Force.

This program of study leads to the following credential:

- Minor in Aerospace Leadership Studies

Minor in Aerospace Leadership Studies

Credential Overview

Air Force Reserve Officer Training Corps (AFROTC) offers training in the principles of leadership, interpersonal and critical thinking skills. Those who complete the course of instruction and are otherwise eligible may be commissioned as a second lieutenant in the United States Air Force.

AFROTC offers opportunities for students to apply their knowledge and experience in a practical military training environment of peers in a variety of leadership experiences, academic challenges, and unique learning opportunities not available with any other department. Qualified students may receive scholarships, opportunities for study abroad in military exchange programs, adventure training or other leadership intern programs. Aerospace Studies courses and minor are open to all UW students to include those not desiring a commission in the United States Air Force.

Completion Requirements

29 credits

1. 24 credits of air and space studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in air and space studies coursework
4. Minimum 24 credits in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor.

Military Science

312 [Clark Hall](#)

206-543-9010

[Website](#)

armyrotc@uw.edu

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and

managing resources. The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces. Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

[Website](#)

navadmin@uw.edu

The Naval Science curriculum supports the Naval Reserve Officers Training Corps (NROTC) program at the University of Washington in preparing young men and women for service as commissioned officers in the United States Navy or Marine Corps. Naval Science courses focus on topics such as Navy and Marine Corps organization, at-sea navigation, leadership, naval history, amphibious warfare, engineering, and weapons systems. Courses emphasize development of professional knowledge and leadership skills, which are placed in the context of naval service immediately following graduation from the University of Washington. A student not participating in the NROTC program may take a Naval Science course with the permission of the instructor, or may complete a minor in Naval Science.

School of Social Work

[Website](#)

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of specialization; students earn a Master of Social Work degree. Both the BASW and MSW programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education.

Undergraduate Program

23 [Social Work/Speech and Hearing Sciences Building](#)
206-543-5676
sswadmis@uw.edu

Program of Study: Major: Social Welfare

Program Overview

The School of Social Work (nationally ranked #3) is seeking individuals who are interested in becoming social change agents in order to tackle complex social problems facing our society. We offer a professional degree with "hands on" training in the field designed to fully prepare you for a job and/or graduate school. Our Honors Program provides students with research

opportunities guided by faculty mentors. Join a major with a focus on social justice that has one of the most diverse student cohorts on campus. Demand is increasing for social workers, especially those with expertise in healthcare, children and family services, addiction counseling, eldercare, and community advocacy.

This program of study leads to the following credential:

- Bachelor of Arts degree with a major in Social Welfare

Recommended Preparation

Suggested First- and Second-Year College Courses: SOC WF 200; prerequisites in psychology and sociology; statistics; also, courses in American ethnic studies, disability studies; public health; communication; economics; political science; human biology; human development; American government; diversity studies; law, society, and justice; and gender, women, and sexuality studies.

Admission Requirements

Approximately 40 juniors are admitted each year. Admission, for autumn quarter only, is competitive and completion of requirements listed below does not guarantee acceptance. The application deadline is April 15. Applicants must meet the following criteria by the time they begin classes in the program:

1. Minimum 65 credits completed
2. One course in sociology and one course in psychology - both completed before

beginning the program. Minimum 2.0 grade in each. See website for approved courses.

3. Recommended: introductory statistics course
4. Minimum 2.00 cumulative GPA
5. Paid or volunteer social service experience
6. Completed application

Application forms and a detailed description of the social welfare major are available at the School's website. A student may discuss the program in person by contacting the Social Work Office of Admissions, (206) 543-5676, sswinfo@uw.edu. Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Continuation Policy

All students must make satisfactory academic progress in the major and meet outlined standards of professional behavior. Failure to do so may result in probation or referral to the student review committee, either of which could lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Completion Requirements

General Education Requirements

Basic Skills

1. English Composition (C): 5 credits (minimum 2.0 grade)
2. Additional Writing: 10 credits
3. Reasoning (RSN): 4 or 5 credits
4. Foreign Language: 0-15 credits, depending on placement or high school background
5. Diversity (DIV): 3 credits

Areas of Inquiry

1. Arts & Humanities (A&H): 20 credits
2. Social Sciences (SSc): 20 credits
3. Natural Sciences (NSc): 20 credits
4. Additional Areas of Inquiry: 15 credits

Major Requirements

67 credits

1. Core Courses (2.0 minimum grade required in each course): SOC WF 200; SOC WF 310; SOC WF 311; SOC WF 312; SOC WF 315; SOC WF 320; SOC WF 390; SOC WF 402; SOC WF 404;

SOC WF 405; SOC WF 410, SOC WF 415; SOC WF 460 or SOC WF 442 or SOC WF 443; SOC WF 465; and SOC WF 435

2. 2.00 cumulative UW GPA
3. 2.50 cumulative GPA in SOC WF required courses

Additional Information

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BASW program produces beginning-level social work practitioners and is accredited by the Council on Social Works Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the BASW program:

1. Preparation of entry-level baccalaureate social workers for

generalist practice in a multicultural context.

2. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
 3. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
 4. Preparation for graduate education.
- In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, see department website.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Contact the adviser for information.
 - *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the chair of the scholarship committee, School of Social Work.

- *Student Organizations/Associations:*
Organization of Student Social Workers (OSSW)

Program of Study: Master of Social Work

Program Overview

The School of Social Work offers a Master of Social Work degree with three options: a two-year full-time program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from a Council on Social Work Education accredited undergraduate program; and a three-year part-time extended degree program. All program options prepare students for advanced professional practice with a culturally

diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods. The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history. The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Check the School's website, socialwork.uw.edu for current information.

This program of study leads to the following credentials:

- Master of Social Work
- Master of Social Work (Administrative and Policy Practice)
- Master of Social Work (Administrative and Policy Practice) (advanced standing)
- Master of Social Work (Advanced Generalist Practice) (fee-based)
- Master of Social Work (advanced standing)
- Master of Social Work (Advanced: Clinical Social Work)
- Master of Social Work (Children, Youth and Families)
- Master of Social Work (Children, Youth and Families) (advanced standing)
- Master of Social Work (Clinical Social Work)
- Master of Social Work (Community-Centered Integrative Practice)
- Master of Social Work (Community-Centered Integrative Practice) (advanced standing)

Admission Requirements

Different credentials in this program have different admission requirements. See additional admission requirements below for credential-specific information.

Master of Social Work

Admission Requirements

Contact department for requirements.

Completion Requirements

Minimum 48 credits (advanced standing); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum

- credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements*: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
 3. *Basic Statistics Requirement*: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
 4. *Professional Foundation Curriculum or Bridge Curriculum (Credit total varies by credential)*: See additional requirements below for credential-specific courses.
 5. *Advanced Curriculum (9-12 credits depending on credential)*: Policy/services and methods coursework specific to the chosen credential/field of practice. See additional requirements below for credential-specific courses.
 6. *Advanced Practicum (17 credits)*: SOC W 525, aligns with the student's policy/services course and with the student's primary intervention method area.
 7. *MSW Electives (9-12 credits depending on credential)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program.

Master of Social Work (Clinical Social Work)

Admission Requirements

Contact department for requirements.

Completion Requirements

Minimum 48 credits (advanced standing); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements*: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the

advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.

3. *Basic Statistics Requirement*: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. *Professional Foundation Curriculum or Bridge Curriculum (Credit total varies by credential)*: See additional requirements below for credential-specific courses.
5. *Advanced Curriculum (9-12 credits depending on credential)*: Policy/services and methods coursework specific to the chosen credential/field of practice. See additional requirements below for credential-specific courses.
6. *Advanced Practicum (17 credits)*: SOC W 525, aligns with the student's policy/services course and with the student's primary intervention method area.
7. *MSW Electives (9-12 credits depending on credential)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program.

Master of Social Work (Community-Centered Integrative Practice)

Admission Requirements

Contact department for requirements.

Completion Requirements

Minimum 48 credits (advanced standing); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum

credits and demonstrated competence in both academic and field practicum work.

2. *Human Biology Requirements*: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. *Basic Statistics Requirement*: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. *Professional Foundation Curriculum or Bridge Curriculum (Credit total varies by credential)*: See additional requirements below for credential-specific courses.
5. *Advanced Curriculum (9-12 credits depending on credential)*: Policy/services and methods coursework specific to the chosen credential/field of practice. See additional requirements below for credential-specific courses.
6. *Advanced Practicum (17 credits)*: SOC W 525, aligns with the student's policy/services course and with the student's primary intervention method area.
7. *MSW Electives (9-12 credits depending on credential)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program.

6. *Advanced Practicum (17 credits)*: SOC W 525, aligns with the student's policy/services course and with the student's primary intervention method area.
7. *MSW Electives (9-12 credits depending on credential)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program.

Master of Social Work (Health Practice)

Additional Admission Requirements

Please visit this credential's [Graduate Admissions Page](#) for current requirements.

Completion Requirements

Minimum 48 credits (advanced standing); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements*: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. *Basic Statistics Requirement*: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.

4. *Professional Foundation Curriculum or Bridge Curriculum (Credit total varies by credential)*: See additional requirements below for credential-specific courses.
5. *Advanced Curriculum (9-12 credits depending on credential)*: Policy/services and methods coursework specific to the chosen credential/field of practice. See additional requirements below for credential-specific courses.
6. *Advanced Practicum (17 credits)*: SOC W 525, aligns with the student's policy/services course and with the student's primary intervention method area.
7. *MSW Electives (9-12 credits depending on credential)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program.

Additional Completion Requirements

Credential-specific requirements:

- *Professional Foundation Curriculum (37 credits)*:
 - Foundation Courses: SOC W 500, SOC W 501, SOC W 504, SOC W 510, SOC W 511, SOC W 512, SOC W 513, SOC W 505, SOC W 506
 - Foundation Practicum: SOC W 524 (10 credits)
- *Advanced Curriculum (12 credits)*: SOC W 528, SOC W 540, SOC W 541, SOC W 571, SOC W 525
- *MSW Electives (9 credits)*: SOC W 500- and/or 600-level Coursework, course list maintained by the program. Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area

and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

Master of Social Work (Health Practice) (advanced standing)

Admission Requirements

Contact department for requirements.

Completion Requirements

Minimum 48 credits (advanced standing); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.

Program of Study: Minor: Education, Learning, and Society

Program Overview

An interdisciplinary minor appropriate for any student at the UW, the Education, Learning and Society (ELS) minor provides a strong background in how humans learn and how society, environment, and culture

shape that learning across school, work, and play. The ELS minor is offered jointly by the College of Education and the College of Arts & Sciences. Students take core courses in development and schooling and then create an area of focusing using an approved list of electives. In addition, students engage in service learning and attend a colloquium in which they reflect on their courses and the influence of education on our learning and society.

This program of study leads to the following credential:

- Minor in Education, Learning, and Society

Minor in Education, Learning, and Society

Completion Requirements

31 credits

1. Learning and Development: one from PSYCH 206 (prerequisite, PSYCH 101), PSYCH 306, NURS 201, EDPSY 302, EDPSY 406 (5 credits)
2. Schooling and Society: one from AES 340, CHID 210, EDUC 305, EDUC 310, SOC 292 (5 credits).
3. Field Experience: any combination of EDUC 260, EDUC 360, EDUC 361, EDUC 369, GEN ST 346, and GEN ST 470 (with ELS adviser approval, student may substitute one of the following: GEN ST 350, ECFS 303, ECFS 304, ECFS 305, ECFS 454, ECFS 455, ECFS

- 456, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, or other related courses) (5 credits).
4. EDUC 299 (1 credit).
 5. Electives: 15 credits from an approved list. For list, see adviser or College website.
 6. Up to 15 credits of the minor may overlap with a student's major and up to 5 credits may overlap with another minor.

Undergraduate students from outside the College of Education may take courses offered to help them explore the field of education and prepare for graduate study. Fieldwork courses in local schools or social service agencies give students opportunities to make informed career and academic choices. Students may also complete prerequisites for graduate programs. Further, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed by undergraduates.

Honors

[Website](#)

[Faculty Website](#)

The four-year University Honors Program features an interdisciplinary Honors core curriculum with a focus on experiential learning and reflection, Honors academic advising, foreign study programs and exchanges, and opportunities for independent study. It provides an academic community and educational opportunities to those students who are willing to take academic risks, think across disciplinary boundaries, and engage in experiential learning (e.g., research, leadership, community and/or international engagement).

To be considered for admission to the University Honors Program at entrance, students must apply to the Honors Program when they submit their Application for Undergraduate Admission to the University. "Selection is based on a student's demonstrated engagement with interdisciplinary learning, high school record, essay responses, a letter of recommendation, and fit for the program." Students also may seek admission based on academic performance during spring quarter of their freshman year at the University via the late admission process.

Students who are accepted into the University Honors Program in their freshman year and complete the Honors Core Curriculum alone graduate "With Interdisciplinary Honors." When students complete both the Core Curriculum and the Departmental Honors requirements in their chosen major, they graduate "With College Honors in *Name of Major*." Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete the Honors Program in their chosen major will receive a degree "With Honors in *Name of Major* ." By special arrangement it may be possible for students to complete a degree "With College Honors" in departments, schools, or programs that do not offer a formal Departmental Honors option as well as Departmental Honors by itself.

Core Curriculum

47 credits as follows:

1. HONORS 100 (1 credit)
2. One Honors-prefix social science course (HONORS 23x) (SSc; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.

3. One Honors-prefix arts/humanities course (HONORS 21x/HONORS 24x) (A&H; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
4. One Honors-prefix science course (HONORS 22x) (NSc; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
5. One Honors-prefix interdisciplinary course (HONORS 205, HONORS 345, HONORS 38x, or HONORS 391, HONORS 392, HONORS 393, HONORS 394) (NSc; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
6. Combination of any five additional 4- or 5- credit HONORS courses. May be HONORS-prefix or non-HONORS-prefix courses. (A&H, SSc, NSc)
7. HONORS 496 (1 credit)
8. Courses applying towards Departmental Honors may not be applied toward the HONORS core curriculum.
9. Students may fulfill no more than 15 credits of HONORS core requirements by completing HONORS 499 (independent study), graduate-level courses, or ad hoc projects in non-HONORS courses or by way of a non-HONORS study abroad program. These credits may fulfill only a student's additional five HONORS courses requirement; they may not count towards HONORS-prefix social science, arts/humanities, science, or interdisciplinary requirements.
10. Minimum cumulative 3.30 GPA in all courses completed through the UW.

Departmental Honors

Students may apply to Departmental Honors in their major(s) after they have been admitted to the major, typically in their junior year. Each department at the UW has a unique set of Departmental Honors requirements. For links to specific information about each department, see the Honors Program website.

Leadership

Undergraduate Program

Program of Study: Minor: Leadership

Program Overview

The Minor in Leadership will provide a formalized pathway for students to study and develop competencies for leadership in their professional and public lives. Designed to make explicit the often implicit teaching and learning of leadership, this interdisciplinary minor offers a framework that combines explicit leadership teaching, practice and reflection. This minor will support students' unique leadership development paths through a combination of required and self-determined courses that leverage course offerings throughout the university community.

Minor in Leadership

Completion Requirements

25 credits

1. Core (9 credits): LEAD 100, LEAD 495, LEAD 499
2. Electives (minimum 16 credits): at least one course must be taken in each of these categories: (1) course with a group project; (2) course with a public presentation/peer education/peer facilitation component; (3) community-engaged course. Refer to website for list of approved courses.
3. Minimum 15 credits of upper-division courses
4. Minimum 15 credits taken in residence at UW Seattle
5. Minimum 15 credits taken outside student's major requirements.
6. Minimum 2.00 cumulative GPA for courses applied to the minor

Marine Biology

208 [Fishery Sciences](#)

206-543-7426

[Website](#)

[Faculty Website](#)

marbiol@uw.edu

Marine Biology is an interdisciplinary program sponsored jointly by the College of the Environment and the College of Arts and Sciences to immerse undergraduate students in the study of marine organisms and ecosystems. Drawing upon the courses, faculty expertise and fields of Aquatic & Fishery Sciences, Biology, Friday Harbor Laboratories and Oceanography, students enhance classroom learning with field and research experiences.

Undergraduate Program

208B [Fishery Sciences](#)

marbiol@uw.edu

Program of Study: Minor: Marine Biology

Program Overview

Marine Biology is the study of life in saltwater environments. This encompasses genetics, physiology and ecology of organisms such as plankton, marine plants, crustaceans, molluscs, fish, and marine mammals. Habitats including the rocky intertidal, estuaries, coasts and the deep sea are studied as is the influence of physical, geological and chemical processes and changing climate on marine life.

This program of study leads to the following credential:

- Minor in Marine Biology

Minor in Marine Biology

Credential Overview

The Undergraduate Minor in Marine Biology is designed to give students a foundation in the study of life in saltwater environments. The minor integrates coursework in Aquatic and Fishery Sciences, Biology, and Oceanography. Students are encouraged to complete some requirements for the minor at the UW's marine field station at Friday Harbor Labs. This minor can be completed by students pursuing any major.

Completion Requirements

35 credits

1. *Introductory Courses (19 credits)*: FISH 250/OCEAN 250/BIOL 250; OCEAN 210; BIOL 180; Q SCI 381.
 2. *Integrative Experience (3 credits)*: See adviser for approved list of courses.
 3. *Electives (13 credits)*: Selected from an approved list available from a program adviser. Additional courses may be approved by program adviser. (A minimum of one elective course must be taken from each of the following units: Aquatic and Fishery Sciences; Oceanography; and Biology or Friday Harbor Laboratories.)
 4. Up to 17 credits may overlap with credits applied to a student's major and up to 5 credits may overlap with credits applied to another minor.
 5. Minimum 15 credits in upper-division courses.
 6. Minimum 2.00 cumulative GPA in courses presented for the minor.

COURSE DESCRIPTIONS

COLLEGE OF ARTS AND SCIENCES

AMERICAN ETHNIC STUDIES

AFRICAN-AMERICAN STUDIES

AFRAM 101 Introduction to African American Studies (5) SSc, DIV History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a black perspective as illustrated in selected historical and contemporary writings.

AFRAM 150 Introduction to African American History (5) SSc Introductory survey of topics and problems in African American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in African American history. Offered: jointly with HSTAA 150.

AFRAM 214 Introduction African American Literature (5) A&H, DIV Introduction to various genres of African American literature from its beginnings to the present. Emphasizes the cultural and historical context of African American literary expression and its aesthetics criteria. Explores key issues and debates, such as race and racism, inequality, literary form, and canonical acceptance. Offered: jointly with ENGL 258.

AFRAM 220 African American Film Studies (5) A&H/SSc, DIV Examines the history and theory of African American filmmaking, introducing central political and aesthetic debates by way of different cinematic eras, genres, and filmmakers. Focuses primarily on black directors and producers independent and commercial contexts as they confront popular representations of U.S. blackness in their own cinematic practice.

AFRAM 246 African American Politics (5) SSc, DIV C. PARKER Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race's centrality to an African American politics. Offered: jointly with POL S 246.

AFRAM 260 African American Family (5) SSc, DIV Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with SOC 260.

AFRAM 261 The African American Experience through Literature (5) A&H/SSc Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with SOC 261.

AFRAM 270 The Jazz Age (5) SSc, DIV Walter Interdisciplinary study of period after World War I to Great Crash. African American and Anglo American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with HSTAA 270.

AFRAM 272 History of the South Since the Civil War (5) SSc, DIV Walter Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 315 Black Identities and Political Power (5) SSc Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Instructors: Rivers Offered: jointly with POL S 315.

AFRAM 318 Black Literary Genres (5) A&H, DIV Considers how generic forms and conventions have been discussed and distributed in the larger context of African American, or other African diasporic literary studies. Links the relationship between generic forms to questions of power within social, cultural, and historical contexts. Offered: jointly with ENGL 318; AWSp.

AFRAM 320 Black Women in Drama (5) A&H, DIV Character types of black women as represented in plays by black women. Some black male playwrights are juxtaposed with black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Chidress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones.

AFRAM 321 History of African American Women and the Feminist Movement (5) SSc, DIV "Feminist Movement" from early nineteenth century to present. Treats relationship between black and white women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: jointly with GWSS 321.

AFRAM 330 Music, Folklore, and Performance in Black Society (5) A&H Steptoe Focuses on cultural expressions created by people of African descent in the United States in the

twentieth century, with an emphasis on music, folklore, dance, and humor. Offered: WSp.

AFRAM 334 Civil Rights and Black Power in the United States (5) A&H/SSc, DIV *Steptoe* Examines the politics and culture of the modern African American freedom struggle, which began after WWII and continued into the 1970s. Interrogates political strategies associated with nonviolent direct action, armed self-reliance, and black nationalism, as well as the cultural expression that reflect these political currents. Offered: jointly with HSTAA 334.

AFRAM 337 Popular Music, Race, Identity, and Social Change (5) SSc/A&H, DIV Focuses on popular music, shifting formations of race and identity and social change in various cultural, historical, and political contexts. Explores popular music as a tool for social change, a vehicle for community-building and a form of political and aesthetic expression.

AFRAM 340 The Harlem Renaissance: A Literary Study (5) A&H, DIV Highlights Harlem Renaissance - 1912 through mid-1930s - as establishing a role for twentieth-century African American writer, encompassing literature, politics, and decolonization of the image of Africa, and solidifying integrationist and nationalist schools of thought. Examines images, themes, and characterizations in creating a literary aesthetic simultaneously American and African American.

AFRAM 350 Black Aesthetics (5) A&H/SSc Draws on both multi-media and print sources, including fiction, poetry, prose, films, polemics, historiography and speeches to explore the idea of a black aesthetic in various cultural, historical, and political contexts within the twentieth century.

AFRAM 358 African American Literature (5) A&H, DIV Selected writings, novels, short stories, plays, and poems by African American and African-descended writers in or from the United States. Study of the historical, cultural, and intellectual context for the development of literary work by such writers, including attention to identity, power, and inequality. Offered: jointly with ENGL 358.

AFRAM 360 Black Digital Studies (5) SSc, DIV *LaShawnDa L. Pittman* Bridges and intersects two interdisciplinary fields - black studies and digital humanities. Attention to knowledge production. Role of archives, collections, research centers, the black press, and digital technology. Ideas related to power, memory, resistance, perspective and respectability politics in storytelling and control of the vehicles used to do so. Recommended: introduction to sociology; and introductory courses in African American studies and communications. Offered: AWSpS.

AFRAM 370 African American Political Thought (5) SSc Political ideologies and philosophies of pivotal African American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of African American political problems.

AFRAM 404 Advanced African American Studies in Humanities (5, max. 15) A&H, DIV *Sonnet H. Retman*

Advanced and interdisciplinary engagement with racial formation, Black cultural production, and resistance among people of African descent throughout the Diaspora. Draws upon cultural studies perspectives with an emphasis on literature, film, music, performance, visual and material culture. Topics include art, labor, migration, politics; racial capitalism and political economy; social movements and cultural history; black intellectual traditions. Offered: AWSpS.

AFRAM 405 Advanced African American Studies in Social Science (5, max. 15) SSc, DIV *LaTasha Levy* Advanced study of racial formation, Black cultural production, and resistance among people of African descent throughout the Diaspora. Social science theories and methods used to examine various topics, including social scientific analysis of political history; social movements; intellectual traditions; theory; and intersections with urban, digital and legal studies; race, science, and biopolitics; public health and environmental studies. Offered: AWSpS.

AFRAM 437 Blacks in American Law (5) SSc *Walter* Historical continuity for changing relationship between American jurisprudence and black Americans, 1640-1986. Statutory and case law which determined role of blacks in American society, and use of law by blacks to gain civil and personal rights.

AFRAM 498 Special Topics in African American Studies (3-5, max. 15) SSc Topics in which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary.

AFRAM 499 Independent Study and Research (1-5, max. 10) Identification and investigation of the problems and needs of the black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving.

AMERICAN ETHNIC STUDIES

AES 150 In-Justice for All: Intersection of Race, Ethnicity, Class, and Gender in the United States (5) SSc, DIV *Gamboa, Salas* Focusing on pre-Columbus era to 1970, students develop an understanding of how race, ethnicity, nationality, class, and gender impact all Americans - especially those viewed as racial ethnic minorities.

AES 151 Identities, Cultures, and Power Across American Ethnic Groups (5) SSc, DIV Provides an introduction to the major theories, debates, and issues concerning the study of identities and cultures of American ethnic groups as they are constituted through relationships of power.

AES 211 Environmental Justice (5) SSc, DIV Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with ANTH 211/ENVIR 211.

AES 212 Comparative American Ethnic Literature (5) A&H/SSc, DIV *Butler* Reviews selected texts by African American, American Indian, Asian American, Chicano/Latino, and Euro American writers. Includes a comparison of how texts envision and interpret a diverse American culture and social, political relations among peoples of the United States. Explores the power of cultural agency in the creation of America's literature.

AES 250 Race in the American University (5) SSc Racial integration in American institutions of higher education. Entry to, and impact on, American universities by people of color. History of ethnic studies and its relation to other disciplines.

AES 322 Gender, Race, and Class in Social Stratification (5) SSc, DIV The intersection of race, class, and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, classism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Prerequisite: GWSS 200. Offered: jointly with GWSS 300.

AES 333 Race and Ethnicity in the U.S. Military (5) SSc *Salas* The experiences of racial minorities in the military. Topics include segregation of units, desegregation of military, career limitations and opportunities, minority women, military families, racism, and role of veterans in civil rights struggles after service.

AES 335 History of African Americans and Sports (5) SSc, DIV *J. WALTER* Development of sport in the US and its importance for US culture and society. Covers increased centrality of athletic competition as part of the new leisure time in the late - 19th century, revival of the Olympic movement, racial segregation/integration, today's American notions of celebrity and social style.

AES 340 Race, Ethnicity, and Education (5) SSc, DIV Focuses on critical social and political dimensions of race and ethnicity as they relate to issues and practices of pedagogy and power in American education. Considers schooling as sites at which contemporary politics of diversity play out amidst increasingly diverse demographics of students, teachers, and parents.

AES 345 Ethnographies of School Inequalities (5) SSc, DIV *Bonus* Explores various issues and practices of school inequalities through the methods of critical ethnography.

AES 361 Ethnicity, Business, Unions, and Society (5) SSc Interrelationships of ethnicity, business, unions, and the larger society. Examines financial and sociological structure of business and manufacturing sector, how this sector performs, and consequences of performance for selected ethnic groups in United States. Offered: jointly with SOC 363.

AES 380 Race, Ethnicity, and United States Public Policy (5) SSc Explores the causes of disproportionate representation for people of color among the country's impoverished population; drawing on analysis of race/ethnicity, poverty, public policy, (including competing theories), public policy approaches, and ethnographic work addressing the causes and perpetuation of poverty in America.

AES 389 Race, Gender, and Sexuality in the Media (5) SSc, DIV Introduction to media representations of gender, race, and sexuality. Offered: jointly with COM 389/GWSS 389.

AES 398 Human Trafficking in an Era of Globalization: Forced Labor, Involuntary Servitude and Corporate, Civic Responsibility (5) SSc, DIV *Sutapa Basu, Connie C. So, Alina R. Mendez* Examines the causes of the human trafficking industry and analyses possible strategies to prevent and minimize the trade. Highlights includes essays, speakers and films on forced migration and labor rights, international trade agreements, human rights, public health, how to improve survivor services, ethical sourcing and sustainable development, and humanizing the impacts of human trafficking. Recommended: any previous AES, AAS, AFRAM, AIS, or CHSTU course. Offered: Sp.

AES 404 Advanced American Ethnic Studies in Humanities (5, max. 15) A&H, DIV *Linh Thuy Nguyen, Alina R. Mendez, Vince Schleitwiler, LAURO H. FLORES, Sonnet H. Retman, Jang Wook Huh* Comparative interdisciplinary study of race and ethnicity. Examines experiences and cultural expressions of racialized communities in the U.S. and its diasporas from a cultural studies' perspective. Explores how expressive cultures engage and transform racial formations and their intersections, animating social relations of everyday life and reshaping structures of power. Offered: AWSpS.

AES 405 Advanced American Ethnic Studies in Social Science (5, max. 15) SSc, DIV *LaShawnDa L. Pittman* Advanced study of race and ethnicity in a critical and comparative context. Examines social, cultural, historical, political and economic experiences of racialized communities in AES major. Social science theories and methods used to study various topics, including education; migration, refugee, carceral and legal studies; politics and public policy, social movements, global health, and environment. Offered: AWSpS.

AES 440 History and Memory: Race, Archives, and Afterlives (5) SSc/A&H, DIV *L. Nguyen* What is memorialized and archived and what is forgotten? Who produces knowledge and what counts as knowledge? Through historical and cultural studies approaches, this course examines how official and unofficial discourses deal with memory, violence, silence, haunting, history, and subjectivity. Topics may include U.S. empire and war, slavery, and colonialism. Prerequisite: AES 150 or AES 151 Offered: WSp.

AES 442 Undocumented Immigrant Communities (5) SSc, DIV *Carolyn Pinedo-Turnovsky* Sociological examination of the concepts of undocumented, citizen, and the structuring of (il)legality as they are situated in axes of power, specifically in racialized and gendered contexts. Topics include identity formation and experiences across communities, i.e., UndocuLatino, UndocuBlack, UndocuAsian and Pacific Islander, and UndocuQueer. Institutional outcomes in migration, law, labor, education, carceral spaces, and health. Recommended: AES 150; AES 151; AES 322; AES 461; and AES 462. Fluency with discourses in race, ethnicity, and gender as well as a basic familiarity in studies of transnational migrations, inequality and globalization. Offered: AWSp.

AES 446 Music in American Cultures (3) A&H/SSc
Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with MUSIC 446.

AES 450 American Ethnic Health: Race, Gender, and Status Groups (5) SSc, DIV *Kashima* Introduces newer social science and health science related work on race, ethnicity, culture, socio-cultural, and environmental issues affecting American racial minorities. Considers differential rates of physical and medical problems such as cardiovascular disease rates, diabetes statistics, low birth weight children, etc. Offered: AWSp.

AES 461 Comparative Ethnic Race Relations in the Americas (5) SSc Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 461.

AES 462 Comparative Race and Ethnic Relations (5) SSc, DIV Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with SOC 462.

AES 487 Cultures and Politics of Environmental Justice (5) SSc, DIV *D. PENA* Comparative survey of environmental justice movements in the world with focus on critical studies of environmental racism, risk, and sustainable development. Provides theoretical knowledge and research methods incorporating the study of equity and autonomy in environmental impact and risk assessment and other aspects of environmental policy politics. Offered: jointly with ANTH 487.

AES 489 Black Cultural Studies (5) SSc, DIV Examines how images of blackness have been (re)constructed through identity formation and entrenched inequality. Topics include black women's bodies, black men's bodies, blackface minstrelsy, black queer studies, black power, and black hybridities. Offered: jointly with COM 489/GWSS 489.

AES 490 Representing Beyond the Binaries: Mixing Race, Gender, and Sexuality in the Media (5) SSc, DIV *Joeseeph* Cultural studies approach to examining the mixed formations that race, sexuality, and gender take in the contemporary United States media. Draws upon multi-disciplinary scholarship in examination of the media. Offered: jointly with COM 490/GWSS 486.

AES 494 Community Practicum and Internship (3-5, max. 10) Faculty supervised practicum and internship experience in variety of settings and agencies, e.g., ethnic specific agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no-credit only.

AES 496 Honors Senior Thesis (5-10, max. 10) Supervised individual and independent/tutorial study for AES Departmental Honors students involving research, writing, project completion, and completion of a major 30-page paper or commensurate project. Offered: AWSpS.

AES 498 Special Topics in American Ethnic Studies (1-5, max. 15) SSc Designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies through a comparative, interdisciplinary approach.

AES 499 Independent Study or Research (1-5, max. 10) Independent readings and/or research under the supervision of a faculty member.

ASIAN-AMERICAN STUDIES

AAS 101 Introduction to Asian American Studies (5) SSc, DIV Provides an introduction to the interdisciplinary study of Asian Americans and Pacific Islanders in the United States. Examines issues of race, class, gender, and sexuality, immigration/migration, citizenship, labor, racialization, exclusion, social and political activism and social movements, family, community-building, war, imperialism, sovereignty, (post) colonialisms, transnationalism, culture, and creative expressions.

AAS 206 Contemporary Issues of Asian and Pacific Islander Americans (5) SSc, DIV Critically examines contemporary Asian and Pacific Islander American issues, ranging from the Cold War era to the present-day America. Topics include ethnic enclaves, community-building, civil rights, identity problems, family conflict, social organizations, political movements, and immigration.

AAS 210 Asian American and Pacific Islander American Identity: Race, Ethnicity, and Culture (5) SSc, DIV Examines the interdisciplinary nature of Asian American and Pacific Islander American identity. Explores influences and manifestations of Asian and Pacific Islander ethnic identity, using literature, history, and social sciences. Topics include gender issues, socio-economic class, and mixed heritage in the United States.

AAS 220 Asian American Stereotypes in the Media (5) SSc Asian stereotypes popularized by American literature, film, radio, and television and their effects on Asian American history, psychology, and community.

AAS 250 Asian American Oral Histories (5) SSc, DIV *Nomura* Explores the intersection of race, class, gender, and sexuality in the lives of diverse Asian Americans through readings of oral histories narrating powerful stories including immigration, war, refugee flight, exclusion and discrimination, activism, community building, labor, race relations, family, generation gap, gender role changes, domestic violence, adoption, mixed race, religion, and culture.

AAS 300 U.S. Pacific Islander Contemporary Culture (5) SSc, DIV Examines United States Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the United States and other diaspora communities. Major themes

include post-colonialism, migration, family, religion, politics, gender, education, and transnational identity. Offered: jointly with ANTH 307; Sp.

AAS 310 Asian Americans and Pacific Islanders in the Pacific Northwest (5) SSc, DIV Examines the history and lives of Asian Americans and Pacific Islander communities in the Pacific Northwest from the eighteenth century. Topics include immigration, labor, gender, community building, challenges to racial discrimination and inequities, and activism to achieve social justice. Emphasizes Washington/Seattle with discussion of Oregon, Idaho, and British Columbia.

AAS 314 Ethnography, Transnationalism, and Community in Island Southeast Asia/Asian America (5) SSc, DIV Ethnographic exploration of the transformative processes of transnationalism in relation to identity and community formation in Southeast Asia and among Southeast Asian Americans. Experiential learning format concentrates on mini-ethnographic projects, field trips, and group presentations. Prerequisite: either one 200-level ANTH course or one AAS/AES course. Offered: jointly with ANTH 314.

AAS 320 Hawaii's Literatures (5) A&H, DIV *Sumida* Covers views by Native Hawaiian and multicultural writers and composers, studied within historical contexts ranging from the eighteenth century to the present. Examines how the colonization of a sovereign people redefines culture in ethnocentric, racist, Orientalist ways. Analyzes strategies of decolonization as presented and interpreted in works studied.

AAS 330 Asian American Theater (5) A&H, DIV Covers drama from the 1970's to now, in historical contexts. They study of drama is dialogical, through dialogue. Themes are contested among the characters. Our studies participate, with the plays, in questioning race, ethnicity, gender, sexuality, and class. Includes students' performances of dramatic readings. No prior experience in theater is required.

AAS 350 Critical Overseas Chinese/Chinese American Histories (5) SSc, DIV Explores the differences and similarities of race, class, gender, sexuality, and generation influence on the life experiences of the Chinese (among the most diasporic people in the world) in America

AAS 360 Critical Filipino American Histories (5) SSc, DIV *Revilla* Examines the diverse historical and contemporary experiences of Filipinas and Filipinos in the United States in order to critically understand their immigration patterns, colonial histories, practices of identity constructions, and interactions with other groups.
