DERM 634 Clinical Dermatology Clerkship - Spokane, WA (4/8, max. 8) Clerkship with participation in dermatology clinics and inpatient consultations to gain experience and confidence in description of skin findings and perform special dermatologic diagnostic procedures. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

DERM 654 Clinical Dermatology Clerkship - Alaska (8) Clinical clerkship. Participation in approach, diagnosis, and treatment of dermatological issues in outpatient dermatology clinics, as well as a continuing series of teaching seminars. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

DERM 664 Clinical Dermatology Clerkship - Billings, MT (8) Participation in

dermatology clinics and inpatient consultations. Includes a continuing series of teaching seminars, a dermatopathology conference, and a journal club. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

DERM 674 Clinical Dermatology Clerkship - Idaho (8) Clinical clerkship. Participation in dermatology clinics, as well as a continuing series of teaching seminars. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

DERM 697 Dermatology Special Electives - Away (2-24, max. 24) Special clerkship or externship opportunities made available at institutions other than University of Washington outside of the Washington, Wyoming, Montana, Alaska, Idaho (WWAMI) region. Offered: AWSpS.

DERM 699 Dermatology Special Electives - WWAMI (2-24, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the Washington, Wyoming, Alaska, Montana, Idaho (WWAMI) region. Offered: AWSpS.

DERM 744 Introduction to Clinical Dermatology Clerkship - Sheridan, WY (4) Participation in patient care in a busy rural dermatology practice under the direction of a board-certified dermatologist, experienced physician assistant (PA), or nurse practitioner (NP). Introduction to the role of dermatology in healthcare, including diagnosis and management of common skin cancers and conditions. (Two weeks). Prerequisite: completion of Foundations curriculum. Offered: AWSpS.

DERM 764 Introduction to Clinical Dermatology Clerkship - Bozeman, MT (4/8, max. 8) Clinical clerkship. Introduction to a variety of general-dermatologic clinic exposures and patient care, including surgical assist for cancer procedures. Shared time spent between surgical and general dermatology. Prerequisite: successful completion of Internal Medicine clerkship. Offered: AWSpS.

DERM 774 Introduction to Clinical Dermatology Clerkship - Boise, ID (4) Clinical rotation designed to help students develop a basic approach to the diagnosis and management of common skin conditions. (Two weeks). Offered: AWSpS.

FAMILY MEDICINE

FAMED 499 Undergraduate Research (*, max. 35) Research activities arranged with University or community-based physicians in diverse areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2, max. 12) Medical students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 12) Introduces medical students to continuity of care in family medical settings, especially regarding what it means to be someone's doctor and what it is like to work with individuals to help them achieve optimal health for a minimum of two quarters. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.

FAMED 516 Team Based Care in Rural/Underserved Settings (1) An interdisciplinary, non-clinical elective for all health profession students. Fulfills part of the didactic requirements for the AHEC Scholars Program. Prerequisite: CONJ 515. Credit/no-credit only. Offered: AWSpS.

FAMED 525 African American Health and Health Care Disparity (1) Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Prerequisite: current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: A.

FAMED 526 Community-Focused Urban Health: Determinants, Disparities, and Equity (1) Determinants, disparities, and approaches to health equity for

medically underserved urban communities. Credit/no-credit only. Offered: W.

FAMED 527 Community-Focused Urban Health: Inter-Professional Care of Urban Under-Resourced Patients (1) Interprofessional approaches to improving health for medically underserved urban communities. Credit/no-credit only. Offered: A.

FAMED 528 Strategies and Skills for Academic Success (1) Equips students with the skills needed to thrive in the Foundational medical school curriculum. Prepares students for medical licensure examination. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

FAMED 530 Primary Care (1) Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations, and practice observation. Prerequisite: permission of course coordinator. Offered: W.

FAMED 531 Introduction to Person Centered and Interprofessional Palliative Care (1-5) Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: jointly with B H 566/NSG 526; A.

FAMED 532 Advanced Topics in Person Centered and Interprofessional Palliative Care (1-5) Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Requires admissions into the Palliative Care Graduate Certificate Program. Prerequisite: NSG 526 Offered: jointly with B H 567/NSG 527; W.

FAMED 533 Palliative Care: Quality Metrics and System Integration (1-5) Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Requires admissions into the Palliative Care Graduate Certificate Program. Offered: jointly with B H 568/NSG 528; Sp.

FAMED 534 Primary Care Clinical Skills and Procedures Workshop (1) Explore and hone common diagnostic and therapeutic clinical skills/procedures. Workshops delivered by a local Family Medicine residency program. Hands-on learning in small groups. Examples: EKG, suturing, casting/splinting, OB ultrasound, osteopathic manipulation, musculoskeletal, IUD and miscarriage management.

FAMED 535 Medical Chinese Terminology (1) For healthcare professions students interested in expanding cultural understanding and improving communication with patients whose primary language is Mandarin Chinese. Includes common Mandarin Chinese medical terminology used during medical visits; Chinese culture and beliefs toward health and sickness; and cross cultural comparison of healthcare delivery in China and the United States. Recommended: Some conversational level Chinese will be helpful and basic training in medical history taking. Credit/no-credit only. Offered: Sp.

FAMED 540 Topics in Health and Human Services in Rural Communities (1) Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Offered: W.

FAMED 541 Targeted Rural Underserved Track: Interession 1 (3) First of four TRUST interessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A.

FAMED 542 Targeted Rural Underserved Track: Interession 2 (3) Second of four TRUST interessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: W.

FAMED 543 Targeted Rural Underserved Track: Interession 3 (4) Third of four TRUST interessions. Students will spend four days and three nights together at a

retreat center training to be leaders in their future practice communities. Students will discuss rural practice, leadership skills and other related topics. Regional clinical deans and other rural health leaders facilitate the retreat. Credit/no-credit only. Offered: Sp.

FAMED 544 Targeted Rural Underserved Track: Intersession 4 (3) Fourth of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A.

FAMED 547 Spirituality in Healthcare (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587; Sp.

FAMED 550 Critical Race Theory and Medicine (1) Understanding race and racism, their applicability to medicine, and their effects on marginalized communities. Explores the necessities of critiquing and bettering medicine through a Critical Race Theory lens in order to eliminate bias and decrease health disparities within marginalized communities. Offered: jointly with B H 550; Sp.

FAMED 556 Spanish for Health Professionals (1) Instruction in interviewing/history taking Spanish-speaking patient. Prerequisite: Spanish fluency at intermediate level; current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: Sp.

FAMED 561 LGBTQ Health and Health Disparities (1) Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: permission of course coordinator. Offered: W.

FAMED 598 P-Family Medicine Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Family Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

FAMED 623 P-Clinical Clerkship in Family Medicine - Idaho Falls (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: successful completion of the School of Medicine Foundations Phase. Offered: AWSpS.

FAMED 624 P-Clinical Clerkship in Family Medicine - Saint Luke's Boise (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 625 P-Clinical Clerkship in Family Medicine - Wasilla Valley Native Primary Care (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 626 P-Clinical Clerkship in Family Medicine - MultiCare Health System - Rockwood Clinic (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 627 P-Clinical Clerkship in Family Medicine - Miles City (12) *Misbah*

Keen Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 628 P-Clinical Clerkship in Family Medicine - Lewistown (12) *Misbah Keen* Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 629 P-Clinical Clerkship in Family Medicine-East Pierce Family Medicine (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

FAMED 631 P-LIC Family Medicine Clinical Clerkship - Olympia, WA (1-24, max. 25) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: permission of course coordinator.

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 633 P-Clinical Clerkship in Family Medicine - Leavenworth (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 634 P-Clinical Clerkship in Family Medicine - Sitka (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 635 P-Clinical Clerkship in Family Medicine - Cheyenne (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 636 P-Clinical Clerkship in Family Medicine - Wenatchee (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 638 P-Clinical Clerkship in Family Medicine - Othello (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 639 P-Clinical Clerkship in Family Medicine - Douglas WY (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Offered: AWSpS.

FAMED 640 P-Clinical Clerkship in Family Medicine - Boise (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 641 P-Clinical Clerkship in Family Medicine - Spokane (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine - Madigan (1-24, max. 25) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine - Tacoma (1-24, max. 25) For

description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine - University of Washington Medical Center (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 645 P-Clinical Clerkship in Family Medicine - Kaiser Permanente Seattle (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine - Swedish First Hill (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine - Swedish Cherry Hill (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 648 P-Clinical Clerkship in Family Medicine - Renton Valley (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 649 P-Clinical Clerkship in Family Medicine - Olympia (1-24, max. 25) For description and prerequisites, see FAMED 636. Offered: AWSpS.

FAMED 650 P-Clinical Clerkship in Family Medicine - Anacortes (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 651 P-Clinical Clerkship in Family Medicine - Omak (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 653 P-Clinical Clerkship in Family Medicine - Anchorage (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine - Whitefish (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine - Pocatello (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine - Sea Mar Clinic (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine - Country Doctor (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 660 P-Clinical Clerkship in Family Medicine - Yakima (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine - Bremerton (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 662 P-Clinical Clerkship in Family Medicine - Buffalo (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 663 P-Clinical Clerkship in Family Medicine - Petersburg (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 664 P-Clinical Clerkship in Family Medicine - Billings (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 665 P-Clinical Clerkship in Family Medicine - Missoula (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 666 P-Clinical Clerkship in Family Medicine - Torrington (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 667 P-Clinical Clerkship in Family Medicine-Northwest Family Medicine Residency-Bremerton (1-24, max. 25) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of

settings: office, hospital, home, community resources. Offered: AWSpS.

FAMED 669 P-Clinical Clerkship in Family Medicine - Coeur d'Alene (1-24, max. 25) For description and prerequisite, see FAMED 632.

FAMED 671 P-Social and Structural Determinates of Health (8) Students increase awareness of and begin to address the social and structural determinants of health impacting underserved populations. Time divided between community engagement and advocacy activities and advanced clinical clerkship in an underserved primary care setting. Credit/no-credit only.

FAMED 672 P-Advanced Preceptorship International (*, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on healthcare delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 673 P-Clinical Clerkship in Family Medicine - Spokane Sacred Heart (1-12, max. 12) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 676 P-Clinical Clerkship in Family Medicine - Libby (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 677 P-Clinical Clerkship in Family Medicine - Grand Coulee (1-24, max. 25) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 678 P-Clinical Clerkship in Family Medicine - Port Angeles (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 679 P-Clinical Clerkship in Family Medicine - Ferndale (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16) Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 681 P-Clinical Clerkship in Family Medicine - Bozeman Health (12) *Misbah Keen* Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 682 P-Clinical Clerkship in Family Medicine - Ellensburg (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 683 P-Clinical Clerkship in Family Medicine - Lewiston (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 684 P-Clinical Clerkship in Family Medicine - Butte, MT (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 685 P-Clinical Clerkship in Family Medicine - Valley - Juneau, AK (1-24, max. 25) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 686 P-Clinical Clerkship in Family Medicine - Port Townsend (12) For description and prerequisite, see FAMED 632.

FAMED 687 P-Clinical Clerkship in Family Medicine - While Salmon (1-24, max. 25) For description and prerequisite, see FAMED 632.

FAMED 688 P-Family Medicine Subinternship (*, max. 24) Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 689 P-Sports Medicine in Family Medicine- Spokane (4-8) Introduces medical students to treatment of sports related injuries in the non-operative, family medicine setting. Includes routine sports physicals, advanced musculoskeletal examination, and assessment of acutely injured athletes. Offered: AWSpS.

FAMED 690 One Health Clinical Elective (4-8) "One Health" recognizes the intricate links between the health of humans, animals and the environment. This elective provides an academic conceptual framework and clinical exposure through which to explore the multitude of applications of the "One Health" paradigm in a multidisciplinary context. Students will gain experience working with interdisciplinary teams including veterinarians and physicians on species-spanning approaches to health. Prerequisite: Permission of Course Instructor. Offered: AWSpS.

FAMED 691 Ambulatory Telehealth Elective (4) Elective clerkship focused on learning and practicing telehealth skills within the ambulatory care environment. Students work with multiple providers in synchronous outpatient settings expanding their understanding of the appropriate use of telehealth within the ambulatory care setting including communication, physical examination, and socialization while adhering to legal and regulatory aspects of documenting visits electronically. Prerequisite: successful completion of the Patient Care Phase clerkships. Offered: AWSpS.

FAMED 692 P-Clinical Clerkship in Family Medicine - Dillon (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 697 P-Family Medicine Special Electives (*, max. 24) Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the UW SOM family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (2-24, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 701 WRITE Advanced Outpatient Clerkship (8) This 4-week clinical outpatient experience takes place in WWAMI Rural Integrated Training Experience (WRITE) sites, where students function at the level of a beginning intern, taking primary responsibility for outpatient care, with appropriate supervision, to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Completion of core WWAMI Rural Integrated Training Experience (WRITE). Non-WRITE students may take this course if they have completed all of their Patient Care Phase Clerkships; recommended: None Offered: WS.

FAMED 702 Advanced Family Medicine Outpatient Clerkship (8-24, max. 24) This 4-week clinical outpatient experience takes place in WWAMI Family Medicine sites, where students may function at the level of a beginning intern, taking primary responsibility for outpatient care, with appropriate supervision, to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Students must have completed all of their Patient Care Phase Clerkships. Offered: AWSpS.

FAMED 703 Advanced LGBTQ Primary Care Clerkship (8) This 4 week clinical outpatient clerkship addresses health disparities and the unique health concerns that face the LGBTQ community. Students learn to be effective, multi-disciplinary advocates who provide non-judgmental, effective, and compassionate medical care for LGBTQ patients. Prerequisite: FAMED 561 and UCONJ 570 ;

recommended: UCONJ 624 Offered: AWSpS.

FAMED 704 Family Medicine Advanced InPatient Clerkship (8, max. 24) During this four-week clinical inpatient experience, students may function at the level of a beginning intern, taking primary responsibility mostly in the inpatient setting with appropriate supervision. Goals are to refine core clinical skills, expand medical knowledge, improve clinical reasoning, and work as an integral part of the clinical team. Prerequisite: Completion of Phase 2: Patient Care clerkships. Offered: AWSpS.

FAMED 705 P-Clinical Clerkship in Family Medicine - SeaMar Everett (12) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of all genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, and community. Prerequisite: medical students only. Offered: AWSpS.

FAMED 706 P-Clinical Clerkship in Family Medicine - Nampa ID (12) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of all genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, and community. Prerequisite: medical students only. Offered: AWSpS.

FAMED 707 P-Clinical Clerkship in Family Medicine - UW Medicine Primary Care South (12) Ambulatory primary care with emphasis on comprehensive, continuous, and integrated care to patients of all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: medical students only. Offered: AWSpS.

GENOME SCIENCES

GENOME 151 Human Genetics: The Individual and Society (4) NSc Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. For non-science majors only. Offered: Sp.

GENOME 261 Genomes and Society (4) NSc Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.

GENOME 361 Fundamentals of Genetics and Genomics (3) NSc Introduces fundamentals concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Cannot be taken for credit if credit received for GENOME 371. Prerequisite: a minimum grade of 1.5 in either BIOL 200 or BIOL 240. Offered: WSpS.

GENOME 371 Introductory Genetics (5) NSc Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. May not be repeated. Prerequisite: either a minimum grade of 2.0 in BIOL 180 and a minimum grade of 2.0 in BIOL 200, or a minimum grade of 2.0 in BIOL 240. Offered: A.

GENOME 372 Genomics and Proteomics (5) NSc Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes.

GENOME 373 Genomic Informatics (4) NSc Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.

GENOME 414 Molecular Evolution (5) NSc Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of

taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

GENOME 453 Genetics of the Evolutionary Process (3) NSc Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.

GENOME 454 The Origins of Genetics (4) NSc Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

GENOME 463 Hands-On Science for Elementary School Teachers (5) Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.

GENOME 465 Advanced Human Genetics (4) NSc Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.

GENOME 466 Cancer Genetics (3) NSc Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.

GENOME 475 Debates in Genetics (3) NSc Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NSc Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSp.

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5) Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Prerequisite: GENOME 371. Credit/no-credit only.

GENOME 499 Undergraduate Research (*, max. 30) Credit/no-credit only. Offered: AWSpS.

GENOME 501 Introduction to Research Materials (1-10, max. 10) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6) Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9) Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9) Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15) Provides secondary school teachers training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

GENOME 520 Seminar (1, max. 30) Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

GENOME 522 Journal Club (1, max. 30) Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

GENOME 523 Research Reports (1, max. 30) Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

GENOME 525 Current Literature in Human Genetics (1) Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Prerequisite: graduate or postdoctoral status. Credit/no-credit only. Offered: AWSp.

GENOME 531 Genetics of Human Disease (3) Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, nematodes, *Drosophila*, and yeast. Credit/no-credit only.

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4) Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4) Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Offered: Sp.

GENOME 545 Biostatistical Methods for Big Omics Data (3) This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with BIOST 545/PHG 545.

GENOME 547 Scientific Writing (1.5) For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications. Credit/no-credit only.

GENOME 550 Methods and Logic in Genetics (3) Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

GENOME 551 Principles of Gene Regulation (1.5) A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.

GENOME 552 Technologies for Genome Analysis (1.5) Discussion of current and newly-emerging technologies in genome analysis with regard to applications in

biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

GENOME 553 Advanced Genetic Analysis (1.5) Explores genetic analysis as a powerful approach for dissecting complex biological processes. Covers how scientists use selective removal, addition, or alteration of specific proteins to: identify and order genes in a pathway; define protein function; determine tissue, temporal, and sub-cellular requirements for activity; and distinguish among competing hypotheses to explain biological phenomena.

GENOME 554 Genomic Informatics (1.5) Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.

GENOME 555 Protein Technology (1.5) Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine.

GENOME 559 Introduction to Statistical and Computational Genomics (3) Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.

GENOME 560 Introduction to Statistical Genomics (3) An introduction to fundamental concepts necessary for the analysis of genetic and genomic data including, basic elements of probability theory, parameter estimation, and hypothesis testing. Prerequisite: first-year Genome Sciences graduate students or by permission of instructor. Offered: Sp.

GENOME 561 Molecular Population Genetics and Evolution (1.5) Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

GENOME 562 Population Genetics (4) Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: W, odd years.

GENOME 565 Advanced Human Genetics (4) Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.

GENOME 569 Bioinformatics Workflows for High-Throughput Sequencing Experiments (1.5) Programming skills and software tools for building automated bioinformatics pipelines and computational biology analyses. Emphasis on UNIX tools and R libraries for distilling raw sequencing data into interpretable results. For students familiar with UNIX and with some programming experience in Python, R, or C/C++.

GENOME 570 Phylogenetic Inference (3) Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: W, even years.

GENOME 573 Human Genomics: Science, Ethics, and Society (3) Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with B H 551; A.

GENOME 575 Fundamentals of Biomedical Instrumentation (3) Introduces

fundamentals of instrumentation commonly used in biomedical research settings including mass spectrometers, optical microscopes, and DNA sequencers. Emphasizes practical understanding of physical and chemical properties that underlie operation and sources of uncertainty, noise, and error.

GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5) In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

GENOME 580 Ethics in Biomedical Research and Teaching (1) Explores ethical issues in research and teaching and discusses avenues of responsible conduct. Credit/no-credit only.

GENOME 581 Seminar in Drosophila Genetics (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of Drosophila development. Credit/no-credit only. Offered: AWSp.

GENOME 582 Seminar in Mouse Genetics (1) Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.

GENOME 584 Seminar in DNA Replication (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no-credit only. Offered: AWSp.

GENOME 585 Seminar in Bacterial Genetics (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.

GENOME 586 Seminar in Mammalian Genetics (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no-credit only.

GENOME 587 Seminar in Nematode Genetics (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.

GENOME 590 Population Genetics Seminar (1) Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Prerequisite: GENOME 562 or permission of instructor. Credit/no-credit only.

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12) Prerequisite: permission of instructor. Offered: AWSp.

GENOME 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

GENOME 650 Genome Sciences Teaching Clerkship (1-6, max. 15) Direct experience teaching undergraduate Genome Sciences classes. Emphasis on pedagogy of educational experience, includes weekly meetings with instructors for training in teaching techniques, classroom management. Students develop as science educators under mentorship of course instructors. Involves attending class lectures, holding office hours, leading study sections, developing homework/quizzes, grading exams, management of course website. Prerequisite: PhD student standing. Credit/no-credit only. Offered: AWSpS.

GENOME 700 Master's Thesis (*-) Offered: AWSpS.

GENOME 800 Doctoral Dissertation (*-) Offered: AWSpS.

HEALTH METRICS SCIENCES

HMS 510 Principles of Health Metrics (3) Introduces methodological approaches and metrics to comprehensively measure health at the population level. Addresses the question, "What is health?", and provides an overview of the rationale, conceptual, and historical basis of population health measurement and health metrics sciences. Offered: A.

HMS 511 Problems in Global Health ([0-4]-, max. 4) Explores social, political, economic, and environmental determinants of health and societal responses to health problems globally. Covers impact of colonialism, equity strategies, Primary Health Care, neoliberalism, war, international agencies, the climate crisis, water, sanitation, and traditional health systems. Student groups develop proposals to improve health systems or address social determinants of health in a specific low-income country. Offered: jointly with G H 511; A.

HMS 512 Mortality Analysis for Health Metrics Sciences (3) Introduces students to the fundamentals of demographic analysis for mortality. Provides a thorough overview of the conceptual, methodological and empirical basis for quantifying health among individuals and populations. Students learn about the strengths and limitations of applying mortality analysis methods, especially in developing countries with limited empirical data. Offered: Sp.

HMS 520 Introduction to Programming, Version Control, and Data Wrangling for Health Metrics Sciences (3) Covers basics of programming, including communicating with machines, writing clean code, and collaborative programming. Students learn to build code base to deal with a series of tasks focused on data manipulation. Offered: A.

HMS 530 Global Burden of Disease: Methods and Results (3) Covers (1) the history and importance of the Global Burden of Disease Study (GBD), (2) the quantitative methods used by the GBD to develop estimates of mortality, morbidity, and risk factors from often sparse data, (3) major findings from the GBD, including leading causes of disease burden and the pattern and variability in burden globally, (4) implications and uses of GBD findings for global health policy. Offered: W.

HMS 535 Advanced Methods for Global Health I (4) Focuses on the advanced concepts, theories, and methods of implementation science in global health, with a specific focus on fidelity, adaptation, strategy selection, de-implementation, sustainability, scale-up, advanced trials designs, qualitative methods, and mixed methods. Assumes prior knowledge of the fundamentals of implementation science. Prerequisite: G H 541 or permission of instructor. Offered: jointly with G H 535/HSERV 526; A.

HMS 536 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 528/EPI 553/G H 536; W.

HMS 537 Advanced Methods for Global Health III (4) Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 525/EPI 556/G H 537; Sp.

HMS 539 Methods, Tools, and Data in Global Health (2) Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Credit/no-credit only. Offered: jointly with G H 530; A.

HMS 540 Health Economics and Health Systems in Low and Middle Income Countries (3) Explores applications of health economics in health systems in low and middle income. Students examine the drivers of differences in health across countries with different income groups. Highlights the challenges and peculiarities of addressing key questions about health care access, interventions, and systems in low and middle income settings. Recommended: previous college-level coursework in either economics or microeconomics; and previous college-level coursework in statistics; probability; and the fundamentals of calculus. Offered: Sp.

HMS 541 Fundamentals of Implementation Science in Global Health (4/5) Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: jointly with G H 541; Sp.

HMS 580 Global Health Doctoral Seminar (1/2, max. 4) Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of metrics and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Credit/no-credit only. Offered: jointly with G H 580; AWSp.

HMS 581 Infectious Disease Dynamics: Models and Data (4) Provides an overview of various infectious disease models as well as approaches to fit these models to data. Covers foundational underlying mathematics, issues with incomplete and biased data, as well as model selection considerations associated with spatial and temporal scale. Prerequisite: either a course in matrix algebra/linear algebra; a course in differential equations; and familiarity with Python or R programming languages, or permission of the instructor; recommended: either EPI 554, AMATH 502, AMATH 535, or MATH 491/STAT 491. Offered: Sp.

HMS 591 Measuring the Global Burden of Disease of Tuberculosis and HIV/AIDS (2) Introduces students to the measurement and estimation of trends in the global burden of disease of tuberculosis and HIV/AIDS as well as the burden due to co-infection. Students will learn about primary data sources to estimate the epidemiological burden of these diseases, limitations of data sources, and current modeling approaches. Online visualization tool will be used to analyze results from the Global Burden of Disease Study. Credit/no-credit only.

HMS 592 Health Metrics Sciences Seminar (1, max. 6) Designed to strengthen ability to critically assess, examine, and interpret research articles. Seeks to broaden understanding and knowledge about health metrics science. Three rotating topics: Health Metrics, Health Systems, and Global Institutions and Goal Setting. Credit/no-credit only. Offered: AWSp.

HMS 593 Didactic Teaching for Health Metrics Sciences (2/3) Students work with instructor to identify responsibilities in accordance with learning outcomes, providing opportunities to implement teaching ideas and techniques, and reflect on this experience. Develop portfolio of accomplishments, demonstrating achievement of learning outcomes. Prerequisite: PhD student standing; and permission of instructor. Offered: AW.

HMS 594 Capstone I (2) Focuses on project planning: students identify a project, select a faculty mentor, conduct a literature review, acquire and compile any necessary input data, develop an analysis plan, and finalize a project proposal and timeline. To be taken when all other program requirements are completed or in progress. Prerequisite: Master of Science in Health Metrics Sciences students only. Offered: Sp.

HMS 595 Capstone II (4) Focuses on implementation: students carry out their research and prepare a final product based on their analysis and research findings, as well as a short oral presentation. To be taken when all other program requirements are completed or in progress. Prerequisite: Master of Science in Health Metrics Sciences students only. Offered: S.

HMS 600 Independent Study or Research (0-10, max. 50) Independent study or research on Health Metrics Sciences topics conducted under the direction of one or more instructors. Prerequisite: permission of instructor. Offered: AWSpS.

HMS 800 Doctoral Dissertation (*-) Prerequisite: permission of Dissertation committee chair. Credit/no-credit only. Offered: AWSpS.

HUMAN BIOLOGY

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3)

Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

HUBIO 505 P-WWAMI Preceptorship (*, max. 6) Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: ASP.

HUBIO 510 P-Microscopic Anatomy: Histology (6) Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

HUBIO 511 P-Human Anatomy and Embryology (8/13) Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

HUBIO 512 P-Mechanisms in Cell Physiology (5) Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513 P-Introduction to Clinical Medicine (3-) Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

HUBIO 514 P-Biochemistry I-A (4-) Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: A.

HUBIO 516 P-Systems of Human Behavior (5) Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.

HUBIO 522 P-Introduction to Clinical Medicine (-4-) Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 523 P-Introduction to Immunology (2) Topics covered include: basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities,

autoimmunity, blood transfusion, and transplantation).

HUBIO 524 P-Biochemistry I-B (-4) Metabolism as integrated in the organs and tissue of the human body for the purpose of generating energy from food and converting small molecules to essential building block of our cells. Discusses principles of nutrition in the context of human health and disease. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: W.

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)

HUBIO 532 P-Nervous System (8) An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

HUBIO 534 P-Microbiology and Infectious Disease (9) An introduction to medical microbiology and infectious diseases. Emphasizes the biology of microbial pathogens and the mechanisms of pathogenesis. Covers clinical manifestations, epidemiology, general principles of diagnosis, therapy, and prevention of infectious disease. Offered: Sp.

HUBIO 535 P-Introduction to Clinical Medicine (-4) Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

HUBIO 540 P-Cardiovascular System (6) Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

HUBIO 541 P-Respiratory System (4) Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

HUBIO 542 P-Introduction to Clinical Medicine (4-) Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

HUBIO 543 P-Principles of Pharmacology I (5) Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

HUBIO 547 P- Pathology IIA (5) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

HUBIO 548 P-Cases in Clinical Ethics (1) Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students.

HUBIO 550 P-Introduction to Clinical Medicine (-4-) Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551 P-Gastro-Intestinal System (4) Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552 P-Hematology (3) Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553 P-Musculoskeletal System (4) Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem-based learning. Offered: W.

HUBIO 554 P-Genetics (2) Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 555 P-Medicine, Health, and Society (3) Interdisciplinary introduction to health services designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.

HUBIO 556 P-Hormones and Nutrients (4) Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

HUBIO 557 P-Pathology IIB (2-) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

HUBIO 558 P-Rheumatology (1) An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.

HUBIO 559 P-Problem Based Learning (3) Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by including medical, nursing, and physician assistant students in each group. Offered: W.

HUBIO 560 P-Introduction to Clinical Medicine (-5) Introduction to clinical and laboratory diagnosis. Offered: Sp.

HUBIO 562 P-Urinary System (4) Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 565 P-Reproduction (4) Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

HUBIO 566 P-Pathology IIC (-3) Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ

system including cardiovascular, renal, and respiratory.

HUBIO 567 P-Skin System (2) Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 569 P-Mind, Brain, and Behavior (6) Defines and describes major psychiatric disorders and presents a systematic approach to differential diagnosis. Discusses conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry; along with physiological and biochemical mechanisms, and therapeutic and adverse effects. Offered: Sp.

HUBIO 590 P-Medical Information for Decision Making (1) Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Offered: W.

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*, max. 30) Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*, max. 30) Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*, max. 30) Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage (*, max. 30) Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 595 P-Independent Investigative Inquiry, GHIP (8) With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: GHIP students only. Offered: S.

HUBIO 596 P-WWAMI Non-Clinical Selectives - Bozeman (*, max. 30) Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*, max. 30) Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

HUBIO 599 P-Independent Study in Medical Science (6) Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4) A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

IMMUNOLOGY

IMMUN 441 Introduction to Immunology (4) NSc General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated. Offered: A.

IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and

differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4)

Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in immunology; other graduate students with permission of instructor. Offered: W.

IMMUN 534 Central Issues in Immunology (3) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in immunology. Offered: Sp.

IMMUN 537 Immunological Methods (1.5) Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.

IMMUN 538 Immunological Based Diseases and Treatments (2) Addresses the mechanisms leading to the development of immunologically based diseases. In particular, covers immunological basis and treatment of infection, autoimmunity, and cancer. Offered: Sp.

IMMUN 540 Immunology Teaching Clerkship (2) The pedagogical requirement addressed by this course is direct experience in teaching undergraduate Introduction to Immunology classes under the direct oversight and mentorship of regular course instructors. By the end of this course, the graduate student will have developed skills, abilities and insights as a science educator and communicator through the sustained support and guidance of the instructor of record. Prerequisite: PhD student standing and permission of instructor; recommended: advanced Immunology course or equivalent. Credit/no-credit only. Offered: A.

IMMUN 550 Selected Topics in Immunology (1, max. 30) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Prerequisite: immunology graduate student; permission of instructor. Offered: AWSpS.

IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate student; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate students; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 565 Research Conference in Innate Immune Defenses against Virus Infection (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 566 Research Conference in the Studies of Lymphocyte Memory (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 567 Research Conference in the Role of miRNAs in Modulating the Immune System (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate

student and permission of instructor Credit/no-credit only. Offered: AWSpS.

IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor Credit/no-credit only. Offered: AWSpS.

IMMUN 570 Research Conference in Mucosal Immunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 572 Research Conference in Signal Transduction in B-Cells (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 573 Immunology Seminar Series (1, max. 30) Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Prerequisite: graduate standing in immunology; other graduate students with firm background in immunology and permission of instructor. Credit/no-credit only.

IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpes Virus: Interactions with B-Cells and Endothelial Cells (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 575 Research Conference in Infection and Immunity (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 576 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than once conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 579 Research Conference in Liver Immunology (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 580 Research Conference in Immune Imaging and Structure-Function Biology (1, max. 30) Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Offered: AWSpS.

IMMUN 581 Research Conference on the Initiation of Type 2 Immune Responses by Parasitic Worms and Allergens (1) Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 599 Introduction to Immunology Research (1-10, max. 40) Current problems in immunological research. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 600 Independent Study or Research (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 700 Master's Thesis (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 800 Doctoral Dissertation (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

LABORATORY MEDICINE AND PATHOLOGY

LABORATORY MEDICINE

LAB M 201 Medical Laboratory Science (2) Explores the field of Medical Laboratory Science covering the concepts and practices of this profession. Provides an overview of Laboratory Medicine disciplines and an examination of the impact of Medical Laboratory Science on patient care. Medical Microbiology, Forensics, Hematology, Genetics, Clinical Chemistry, and Immunochemistry will be discussed. Prerequisite: CHEM 152. Offered: A.

LAB M 301 Introduction to Medical Laboratory Science (4) Explores Medical Laboratory Science covering concepts and practices through lecture and laboratory practice. Provides an overview of Laboratory Medicine disciplines and an examination of the impact of Medical Laboratory Science on patient care. Medical Microbiology, Forensics, Hematology, Genetics, Clinical Chemistry, and Immunochemistry will be discussed. Recommended: MLS Student Offered: A.

LAB M 302 Introduction to Medical Laboratory Science Laboratory (2) Laboratory coverage of the theories, concepts, and practices defining medical laboratory science as a profession. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of laboratory services. Subjects include quality management, safety, regulatory and compliance, and overview laboratory techniques. Prerequisite: LAB M 201 and admission to the MLS major Offered: A.

LAB M 418 Introductory Clinical Chemistry (6) Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to medical laboratory science students. Offered: Sp.

LAB M 419 Clinical Coagulation (4) Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical laboratory science students. Offered: S.

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical laboratory science students. Offered: S.

LAB M 421 Medical Microbiology (1/6, max. 6) Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to medical laboratory science students. Offered: S.

LAB M 423 Clinical Chemistry (*-, max. 24) Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Limited to medical laboratory science students. Offered: AWSp.

LAB M 424 Clinical Microbiology (*-, max. 24) Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical laboratory science students. Offered: AWSp.

LAB M 425 Clinical Hematology (*-, max. 24) Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical laboratory science students. Offered: AWSp.

LAB M 426 Clinical Immunohematology ([1-7]-, max. 7) Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical laboratory science students. Offered: A.

LAB M 427 Selected Studies in Laboratory Medicine (*-, max. 24) Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Limited to medical laboratory science students. Credit/no-credit only. Offered: AWSpS.

LAB M 430 Medical Laboratory Science: Intro Clinical Hematology (5) Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical laboratory science students. Prerequisite: either LAB M 201, or LAB M 301 and LAB M 302. Offered: W.

LAB M 431 Clinical Immunohematology Rotation (7-) Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Limited to medical laboratory science students. Offered: AWSp.

LAB M 433 Enrichment Rotation (-9) Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Limited to medical laboratory science students. Offered: AWSp.

LAB M 435 Molecular Diagnostics for Medical Laboratory Science (3) Provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores its use in the diagnosis of disease. Topics include: nucleic acid structure and function, genetics, DNA chemistry, nucleic acid isolation, amplification techniques, components of a molecular laboratory, and evaluation of controls to validate results obtained. Limited to medical laboratory science students. Offered: W.

LAB M 436 Molecular Diagnostics Clinical Rotation (2) Provides technical expertise, proficient clinical judgment, and a broad cognitive understanding of current molecular diagnostic practices equivalent to that expected of a career entry-level medical laboratory scientist. Prerequisite: LAB M 435; recommended: Be admitted to the MLS major and take all didactic lecture and lab courses required for the major, but specifically LAB M 435. Offered: AWSp.

LAB M 499 Undergraduate Research (*, max. 35) Specific project in clinical laboratory investigation. Offered: AWSpS.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no-credit only. Offered: AWSp.

LAB M 510 Laboratory Medicine Research Conference (1, max. 6) Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Offered: Sp, odd years.

LAB M 521 Advanced Laboratory Hematology (1, max. 6) Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.

LAB M 549 Global Laboratory Systems (1) Provides an overview of the role of clinical and public health laboratories in a national public health system, both in US and globally. Covers the functional components of a laboratory system and the importance of quality laboratory information on public health policy making. Topics include disease diagnosis, surveillance, outbreak response, law and regulation and how laboratory information contributes to health policy development. Offered: jointly with G H 549; Sp.

LAB M 555 Critical Thinking and Research Design in Laboratory Medicine (2) Develops critical thinking skills. Offered: W.

LAB M 590 P-Research Projects in Laboratory Medicine (*) Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.

LAB M 600 Independent Study or Research (*-) Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 601 Internship (3-9, max. 9) Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*, max. 20) Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. Small group teaching using case material and actual clinical samples. (Two weeks, full time) Prerequisite: completion of Internal Medicine and Surgery Patient Care phase clerkships. Offered: AWSpS.

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4) Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Two weeks, full-time). Prerequisite: completion of required clerkships. Offered: W.

LAB M 686 Laboratory Case Studies for Clinical Diagnosis (4) Clerkship aimed at preparing senior medical students for the rigors of clinical residency by educating them in the efficient selection and rational interpretation of laboratory tests. Students engage in a combination of lectures and live case reviews to help develop cost- and time-effective strategies for diagnosing and managing clinical problems, reviewing appropriate tests, optimum clinical laboratory utilization, and limitations of tests. Prerequisite: completion of all third-year clerkship requirements. Offered: AWSpS.

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be

available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

LAB M 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

MEDICAL SCIENCES IN TRANSLATIONAL PATHOLOGY

MSTP 599 Independent Study or Research (2-10, max. 18) Students rotate through one or two research laboratories involved in the Medical Scientist Training Program per quarter. Individual projects will be designed and executed by the student and their faculty mentor. Open only to first-year and second-year students in the Medical Scientist Training Program. Credit/no-credit only. Offered: AWSpS.

PATHOLOGY

PATH 498 Undergraduate Thesis (*, max. 35) Elective.

PATH 499 Undergraduate Research (*, max. 35) Elective.

PATH 501 Pathology Proseminars (1, max. 9) Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 502 Inflammation and Repair (2) Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Prerequisite: permission of instructor. Credit/no-credit only. Offered: even years.

PATH 507 Introduction to Pathology Research (2) Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 510 Introduction to Pathology Methods (3) Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 511 Topics in Experimental Pathology (1-2, max. 10) Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 512 Molecular Basis of Disease: Death and Repair (1.5) First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

PATH 513 Mechanisms of Neurodegeneration (1.5) Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

PATH 516 Molecular Basis of Human Genetic Disease (3) Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

PATH 517 The Biology and Pathology of Aging (3/4) Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

PATH 518 Emerging Topics in Cancer (2) Science and translational advances in cancer and therapeutics, related to recent major technological progress in cancer research. Explores how knowledge of cancer genetics as well as new molecular discoveries are translated to clinical management and treatment options. Prerequisite: undergraduates by permission of instructor. ; recommended: introductory biology and/or genetics. Offered: W, odd years.

PATH 520 Experimental Pathology Seminar (1) Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only. Offered: AWSpS.

PATH 521 Anatomy and Autopsy (1) Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Offered: WSp.

PATH 530 Human Cytogenetics (*, max. 4) Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Offered: Sp.

PATH 535 Innate Immunity and Immunopathology (1.5) Explores the relationship between the innate immune system and disease processes, using a student-led seminar format. Students analyze, present, and critique primary research literature, and use the knowledge gained to develop a sophisticated insight into the mechanisms of immunopathology. Offered: Sp.

PATH 540 Translational Research Topics (1) First and second year students in the M.D./Ph.D. program present and discuss current papers from the biomedical literature in journal club format, and describe their own research in seminar format. Credit/no-credit only. Offered: AWSpS.

PATH 544 General and Systemic Pathology ([2-3]-, max. 5) Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite: for nondental students: permission of instructor.

PATH 550 Mechanisms of Disease (3) Examines the mechanisms of inflammation, cell injury, death, repair, immunity, and neoplasia as well as diseases of various organ systems. Systems covered include the cardiovascular, pulmonary, gastrointestinal, neurologic, endocrine, and genitourinary/renal systems. Topics presented through lecture, primary literature, and small-group discussion. Offered: A.

PATH 551 Experimental and Molecular Pathology (2-5, max. 20) Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: Pathology PhD student; permission of instructor. Credit/no-credit only. Offered: AWSpS.

PATH 555 Environmental Pathology (3) Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520. Offered: Sp, even years.

PATH 558 Integrative Omics (1.5) Explores how to integrate genomic, transcriptomic, and proteomic approaches with state-of-the-art genetic engineering strategies to uncover a systems-level understanding of pathway interactions that regulate disease pathogenesis and complex phenotypes. Recommended: undergraduate biology or cellular and molecular biology. Offered: jointly with MOLMED 558; Sp.

PATH 560 Molecular Analysis of Human Disease (*, max. 10) Review and discussion of contemporary research on molecular basis of human disease. Focus on

mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Credit/no-credit only. Offered: AWSp.

PATH 580 Mitochondria and Metabolism in the Pathogenesis of Human Disease (1.5) Explores the fundamentals of mitochondrial biology, bioenergetics, and cellular metabolism. Includes topical lectures and literature reviews introducing students to advanced metabolic concepts within the context of human disease. Offered: W, even years.

PATH 590 Patient-Centered Translational Research (1) MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house officer, preview the medical or surgical ward team environment, select a patient-focused translation research topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered: WSp.

PATH 600 Independent Study or Research (*-) Prerequisite: Pathology PhD student. Credit/no-credit only. Offered: AWSpS.

PATH 667 P-Renal Pathology Laboratory (*, max. 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

PATH 675 P-Diagnostic Pathology Clerkship - Missoula (4, max. 24) Medical student participation in microscopic examination, laboratory specimen processing and on occasion aid surgeons, endoscopists or radiologists with immediate evaluation of specimens.

PATH 676 P-Diagnostic Pathology Clerkship - Spokane (*, max. 24) Medical student participation in dissection and study of autopsy and surgical pathology cases at Sacred Heart Medical Center in Spokane. Can be taken for either two or four weeks.

PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16) Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff including dissection, microscopic examination, and literature review.

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24) Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner's Office.

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24) Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing.

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)

PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)

PATH 683 P-Forensic Pathology Clerkship - Medical Examiner's Office (*, max. 24)

PATH 686 P-Diagnostic Pathology Clerkship (4/8) Provides medical students an opportunity to improve on gross and microscopic diagnosis, and to experience what it is like to be a pathology resident at the University of Washington. Participants pair with a trainee and faculty mentors to serve as a source of information and guidance. Students attend resident didactics, tumor boards, daily signouts, discussion groups, and personalized slide sessions. Prerequisite: completion of the UW School of Medicine foundations and patient care phases. Offered: AWSpS.

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*,

max. 24)

PATH 697 P-Pathology Special Electives (*, max. 24) By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington. Prospective students obtain special assignment forms from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

PATH 700 Master's Thesis (*-)

PATH 800 Doctoral Dissertation (*-) Prerequisite: Pathology PhD student. Offered: AWSpS.

MEDEX

MEDEX 401 Introduction to Paramedicine (8) Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.

MEDEX 402 Airway Management (3) Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 403 Patient Assessment (4) Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 404 Medical Emergencies I (5) Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.

MEDEX 405 Trauma Emergencies (5) Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.

MEDEX 406 Medical Emergencies II (3) Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405. Offered: Sp.

MEDEX 407 Special Considerations for Paramedicine (4) Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

MEDEX 408 Advanced Certifications (5) Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Prerequisite: MEDEX 407. Credit/no-credit only. Offered: S.

MEDEX 414 Paramedic Clinical Practicum I (3) Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Credit/no-credit only. Offered: A.

MEDEX 415 Paramedic Field Practicum I (6) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated

by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Prerequisite: MEDEX 401 which may be taken concurrently. Credit/no-credit only. Offered: A.

MEDEX 424 Paramedic Clinical Practicum II (3) Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Prerequisite: MEDEX 414. Credit/no-credit only. Offered: W.

MEDEX 425 Paramedic Field Practicum II (7) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Prerequisite: MEDEX 415. Credit/no-credit only. Offered: W.

MEDEX 434 Paramedic Clinical Practicum III (4) Participation in patient care in the CHRC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Prerequisite: MEDEX 424. Credit/no-credit only. Offered: Sp.

MEDEX 435 Paramedic Field Practicum III (8) Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Prerequisite: MEDEX 425. Credit/no-credit only. Offered: Sp.

MEDEX 444 Paramedic Clinical Practicum IV (3) Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Prerequisite: MEDEX 434. Credit/no-credit only. Offered: S.

MEDEX 445 Paramedic Field Practicum IV (11) Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Prerequisite: MEDEX 435. Credit/no-credit only. Offered: S.

MEDEX 450 Basic Science in Clinical Medicine (6) Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.

MEDEX 451 Anatomy and Physiology in Clinical Medicine (6) Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.

MEDEX 452 Pathophysiology for Primary Care (6) Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

MEDEX 453 Basic Clinical Skills (5) Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.

MEDEX 454 Adult Medicine I (7) Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3) Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 457 Behavioral Medicine I (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.

MEDEX 458 Behavioral Medicine (2) Develops and demonstrates skills needed

for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.

MEDEX 459 Behavioral Medicine (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: Sp.

MEDEX 460 Principles of Patient Management (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.

MEDEX 461 Principles of Patient Management (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3) Continuation of MEDEX 456. Emphasis on diagnosis and treatment of common pediatric problems. Offered: Sp.

MEDEX 463 Clinical Clerkships I (7-19, max. 19) Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 465 Clinical Clerkships II (5-19, max. 19) Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (7-19, max. 19) Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (5-19, max. 19) Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: AWSpS.

MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2) Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Offered: W.

MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2) Continuation of MEDEX 468. Approach to diagnosis and management of common emergency conditions for primary-care physician assistant. Organ system approach. Offered: Sp.

MEDEX 470 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 471 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 472 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 473 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 474 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 475 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19) Clinical clerkships and independent study activities. Credit/no-credit only. Offered: A/WSpS.

MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

MEDEX 511 Healthcare Administration and Public Health (5) Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5) Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

MEDEX 513 Global Health for Practicing Clinicians (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

MEDEX 521 Capstone Project I (3) Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. (Two weeks on the Seattle campus, six weeks online). Prerequisite: EMCHS students only. Credit/no-credit only. Offered: S.

MEDEX 522 Capstone Project II (3) Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Prerequisite: MEDEX 521. Credit/no-credit only. Offered: A.

MEDEX 523 Capstone Project III (3) Students work on capstone projects. Prerequisite: MEDEX 522. Credit/no-credit only. Offered: W.

MEDEX 524 Capstone Project IV (3) Continuation of work on the capstone project. Prerequisite: MEDEX 523. Credit/no-credit only. Offered: Sp.

MEDEX 525 Capstone Project V (5) Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Prerequisite: MEDEX 524. Credit/no-credit only. Offered: S.

MEDEX 528 Investigative Skills for Practicing Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

MEDEX 531 Clinical Residencies I (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: A/WSpS.

MEDEX 532 Clinical Residencies II (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: A/WSpS.

MEDEX 533 Clinical Residencies III (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: A/WSpS.

MEDEX 536 Health Policy for Practicing Clinicians (4) Overview of United States health policy issues including payment structures, quality, disparities, workforce

and legislative impact. Prerequisite: EMCHS students only. Offered: W.

MEDEX 537 Leadership for Practicing Clinicians (4) Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.

MEDEX 538 The Physician Assistant Profession (4) Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

MEDEX 540 Healthcare for Rural and Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.

MEDEX 541 Healthcare Administration and Public Health (5) Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

MEDEX 542 Academic Medicine and Specialty Practice (5) Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.

MEDEX 543 Global Health (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.

MEDEX 550 Basic Science in Clinical Medicine (6) Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.

MEDEX 551 Anatomy and Physiology (6) Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.

MEDEX 552 Pathophysiology for Primary Care (6) Examines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.

MEDEX 553 Basic Clinical Skills (5) Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

MEDEX 554 Adult Medicine I (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: W.

MEDEX 555 Adults Medicine II (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.

MEDEX 556 Maternal Child Health I (3) Examines the principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 557 Behavioral Medicine I (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.

MEDEX 558 Behavioral Medicine II (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.

MEDEX 559 Behavioral Medicine III (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

MEDEX 560 Principles of Patient Management I (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.

MEDEX 561 Principles of Patient Management II (3) Provides systematic approach

to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.

MEDEX 562 Maternal Child Health II (3) Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.

MEDEX 563 Clinical Clerkships I (7-19, max. 19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 565 Clinical Clerkships II (5-19, max. 19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Prerequisite: MEDEX 563. Credit/no-credit only. Offered: AWSpS.

MEDEX 566 Family Practice Clerkship I (7-19, max. 19) Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

MEDEX 567 Family Practice Clerkship II (5-19, max. 19) Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Credit/no-credit only. Offered: AWSpS.

MEDEX 568 Emergency Medicine I (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: W.

MEDEX 569 Emergency Medicine II (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.

MEDEX 570 Professional Role Development I (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 571 Professional Role Development II (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 572 Professional Role Development III (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 573 Technical Skills I (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 574 Technical Skills II (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 575 Technical Skills III (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 580 Homelessness in Seattle (2) Multi-disciplinary course developing knowledge and skills in the area of acute and chronic homeless health problems, understanding the history and social constructs as well as the services and disparities facing this population.

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

MEDEX 599 Independent Study (1-19, max. 19) Supervised clinical clerkship or independent study activities to meet specific needs. Prerequisite: permission of the MEDEX program. Credit/no-credit only. Offered: AWSpS.

MEDICINE

EMERGENCY MEDICINE

MED EM 501 P-Emergency Medicine Preceptorship (1, max. 12) Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Prerequisite: permission of instructor. Credit/no-credit only.

MED EM 543 Point of Care Ultrasound (1) How to utilize point-of-care ultrasound (POCUS) to attain a better understanding of human anatomy and disease. Hands-on training with ultrasound to allow for integrated medical education. Credit/no-credit only. Offered: AWSpS.

MED EM 550 P-Introduction to Emergency Medicine (1) Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Credit/no-credit only.

MED EM 598 P-Emergency Medicine Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Emergency Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

MED EM 600 Independent Study/Research (*) Provides medical students the opportunity to participate in research as part of their medical education. Must obtain permission through submission of a proposal to department and securing a faculty sponsor.

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 606 P-Emergency Medicine - HMC/UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI, PEDS; and SURG required clerkships.

MED EM 607 P-Emergency Medicine - Madigan (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 608 P-Emergency Medicine - Swedish Cherry Hill (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI; PEDS; and SURG required clerkships.

MED EM 609 Emergency Medicine - Seattle Children's (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 610 Emergency Medicine - UW Medical Center Northwest (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 615 Emergency Medicine - VA (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 616 Emergency Medicine-Wenatchee, WA (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 617 P-Emergency Medicine - Olympia (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 618 P-Emergency Medicine - Olympia, WA (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 619 Emergency Medicine - Tacoma, WA (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 624 P-Emergency Medicine - Shelton (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 625 P-Emergency Medicine - Spokane (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 626 P-Emergency Medicine - Spokane Deaconess (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 627 Emergency Medicine - Spokane Valley (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 647 P-Emergency Medicine - Pocatello, ID (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 648 P-Emergency Medicine - Idaho Falls, ID (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 649 Emergency Medicine Clerkship - Kootenai Health, Coeur d'Alene, ID (8, max. 16) Clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. Offered: AWSpS.

MED EM 656 P-Emergency Medicine - Juneau, AK (8) Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 658 P-Emergency Medicine - Anchorage (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 659 Emergency Medicine Clerkship - Alaska Native Medical Center - Anchorage, AK (8, max. 16) Clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. Offered: AWSpS.

MED EM 662 P-Emergency Medicine - Bozeman, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 663 P-Emergency Medicine - Billings, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 664 P-Emergency Medicine - Great Falls, MT (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 665 Emergency Medicine - Missoula, MT (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 666 Emergency Medicine Clerkship - Community Medical Center - Missoula (8, max. 16) Clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships. Offered: AWSpS.

MED EM 667 Emergency Medicine - Riverton, WY (8, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 668 P-Emergency Medicine - Casper (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 669 P-Emergency Medicine - Cheyenne, WY (8) Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 681 P-Emergency Medicine Advanced Clinical Elective - Seattle, WA (*, max. 16) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: all third year required clerkships plus required fourth year EM clerkship; permission of department.

MED EM 683 Emergency Medicine Point-of-Care Ultrasound (4) Introduction to point-of-care ultrasound in an emergency department setting. Students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. Incorporates classroom didactics, procedure simulation and clinical application. Offered: WSp.

MED EM 697 P-Emergency Medicine Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least one month before preregistration. (Two, four, six, or twelve weeks). Prerequisite: required EM clerkship; permission of instructor at away site and department. Offered: AWSpS.

MED EM 699 P-WWAMI Emergency Medicine Special Elective (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.

GENETIC COUNSELING

GCNSL 511 Genetic Counseling Theory and Practice I (3) Introduces students to genetic counseling principles and techniques. Topics include eliciting and interpreting family history, contracting, risk communication, health literacy, and facilitated decision-making. Students will also begin to explore other cultural and psychosocial issues that impact the genetic counseling process. Offered: A.

GCNSL 512 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/LAW H 504/PHG 512; A.

GCNSL 513 Clinical Skills I (2) Familiarizes students with typical structure of a clinical genetics visit. Students practice chart review, basic pedigree construction, and genetics literature search. Also covers basic tenets of patient privacy, professional ethics, and self-care. Students attend observations in a medical genetics clinic and a clinical genetics laboratory. Observations take place outside of class time. Offered: A.

GCNSL 515 Principles of Human and Medical Genetics (5) Reintroduces and reinforces basic concepts in genetics, such as the cell cycle, DNA synthesis, and Mendelian inheritance. Provides instruction in the foundational principles of clinical human genetics including genetic mechanisms of disease, genetic testing technologies, genetic variation and population genetics. Teaches students to recognize cardinal features of common genetic disorders. Offered: A.

GCNSL 521 Genetic Counseling Theory and Practice II (3) Introduces students to counseling theories, models, and techniques. Topics include communication throughout the lifespan, disability and chronic illness, and grief and loss. Prerequisite: GCNSL 511. Offered: W.

GCNSL 522 Reproductive Genetics (3) Prepares students for clinical practice in reproductive genetic counseling. Topics include normal course of pregnancy, pregnancy management, evaluation for infertility, recurrent pregnancy loss, stillbirth, assisted reproductive technologies, pre-implantation genetic screening/testing, teratology, fetal treatment and intervention, perinatal loss and bereavement, ethical and legal considerations in reproductive genetics. Co-requisite: GCNSL 526. Prerequisite: GCNSL 515. Offered: W.

GCNSL 523 Clinical Skills II (2) Continues development of clinical skills. Students work on case presentation from chart review, more advanced pedigree construction, creation of a diagnostic differential, and documentation of a clinic visit. Students also spend part of a day observing in the Washington State Newborn Screening Laboratory. Prerequisite: GCNSL 513. Offered: W.

GCNSL 524 Biostatistics in Genetic Counseling (2) Introduction to statistical methods used to evaluate probability of a condition or carrier status with genetic data, integrating pedigrees, genetics principles, and probability. Students evaluate literature relevant to genetic counseling and genotype-phenotype relationships. Includes overview of probability, odds ratios and recurrence risk, penetrance and expressivity, Bayes' Theorem, kinship estimation, linkage analysis and association testing. Prerequisite: GCNSL 515. Offered: W.

GCNSL 525 Pediatric and Biochemical Genetics (3) Covers referral indications, history intake (medical, developmental, and family), diagnostic testing approaches, and resource identification in the context of pediatric and biochemical genetics clinics. Introduces students to dysmorphology and common genetic disorders, including inherited errors of metabolism and the biochemical systems involved. Offered: W.

GCNSL 526 Clinical Embryology (2) Basic foundation in human embryological development for students pursuing studies in biomedical science and in particular, genetic counseling. Using a combination of pre-class lecture videos, in-class lecture, animations, class discussion, and case-based learning, focuses on embryogenesis, organogenesis, underlying molecular mechanisms, abnormalities in development, and current applications to medicine. Recommended: knowledge of human anatomy. Offered: W.

GCNSL 531 Genetic Counseling Theory and Practice III (3) Culmination of Genetic Counseling Theory and Practice series. Students discuss and practice application of counseling theories, models, and techniques. Cases and topics drawn from instructors' and students' clinical experiences. Guest speakers address factors that impact counseling relationship, such as mental health issues, cultural differences, and language barriers. Prerequisite: GCNSL 521. Offered: Sp.

GCNSL 532 Cancer Genetics and Genomics (2) Focuses on approach to risk assessment for cancer, genetic evaluation and testing, and genetic counseling for familial and hereditary cancer syndromes. Reviews hereditary cancer syndromes. Emphasizes considerations for somatic and germline testing. Combines didactic lectures with class participation in case analysis. Prerequisite: GCNSL 511; GCNSL 515; GCNSL 521; and GCNSL 522. Offered: Sp.

GCNSL 533 Clinical Practicum I (1) Fieldwork rotations. Complements student's didactic training by providing hands-on experience in various genetic counseling roles spanning multiple clinical and non-clinical settings. Through these rotations, students build skills outlined in the American Board of Genetic Counseling's (ABGC's) Practice-Based Competencies and obtain logbook cases to fulfill ABGC certification requirements. Prerequisite: GCNSL 513 and GCNSL 523. Credit/no-credit only. Offered: Sp.

GCNSL 534 Research Methods and Design in Genetic Counseling (2) Explores how genetic counselors can be active leaders and interpreters of scientific research. Topics include research design ethics and Institutional Review Board research approval processes, conducting literature reviews, grantsmanship, building research teams, recruiting participants, collecting quantitative/qualitative data, communicating research results to patients, families, colleagues. Prerequisite: GCNSL 524. Offered: Sp.

GCNSL 535 Adult Genetics and Common Diseases (3) Utilizes a case-based approach to adult clinical genetics. Students work in small groups to research and present three cases. Content experts invited to speak about their areas of expertise related to some of the cases. Offered: Sp.

GCNSL 536 Applied Clinical and Laboratory Genetics (2) Introduces wet-lab methods; measures of analytic and clinical validity; results interpretation in cytogenetics, molecular genetics and biochemical genetic testing. Covers test selection/strategy, communicating test results, components of lab reports for cytogenetics and molecular genetics results; regulatory oversight of genetics labs, differences between research and clinical testing; role of genetic counselor within the laboratory setting. Offered: Sp.

GCNSL 543 Clinical Practicum II (5) Fieldwork rotations. Complements student's didactic training by providing hands-on experience in various genetic counseling roles spanning multiple clinical and non-clinical settings. Through these rotations, students build skills outlined in the American Board of Genetic Counseling's (ABGC's) Practice-Based Competencies and obtain logbook cases to fulfill ABGC certification requirements. Prerequisite: GCNSL 533. Credit/no-credit only. Offered: S.

GCNSL 551 Professional Issues in Genetic Counseling (3) Uses the National Society of Genetic Counselors (NSGC) Code of Ethics (COE) as a foundation to explore complex interfaces with conflict of interest, professional boundaries, resiliency and self-care, and social justice. Reviews developing practice guidelines, preparing for entry into the genetic counseling workforce, leadership, and continuing professional development. Explores readings in class discussions, small group work, and presentations. Offered: A.

GCNSL 553 Clinical Practicum III (4) Fieldwork rotations. Complements student's didactic training by providing hands-on experience in various genetic counseling roles spanning multiple clinical and non-clinical settings. Through these rotations, students build skills outlined in the American Board of Genetic Counseling's (ABGC's) Practice-Based Competencies and obtain logbook cases to fulfill ABGC certification requirements. Prerequisite: GCNSL 543. Credit/no-credit only. Offered: A.

GCNSL 554 Capstone Project In Genetic Counseling I (3) Continues development of research skills introduced in GCNSL 534. Culminates in written progress report on student's capstone project that contains a timeline for project completion. Prerequisite: GCNSL 534. Credit/no-credit only. Offered: A.

GCNSL 561 Advanced Concepts in Genetic Counseling (3) Prepares students for entry-level, independent practice in genetic counseling. Students analyze and

discuss challenging cases involving complex genetic indications and difficult psychosocial issues. Topics include use of alternative service delivery models, complex case management, family dynamics, referral and reimbursement in the U.S. healthcare system, barriers and inequities in healthcare, and patient follow-up and support. Offered: W.

GCNSL 563 Clinical Practicum IV (4) Fieldwork rotations. Complements student's didactic training by providing hands-on experience in various genetic counseling roles spanning multiple clinical and non-clinical settings. Through these rotations, students build skills outlined in the American Board of Genetic Counseling's (ABGC's) Practice-Based Competencies and obtain logbook cases to fulfill ABGC certification requirements. Prerequisite: GCNSL 553. Credit/no-credit only. Offered: W.

GCNSL 564 Capstone Project In Genetic Counseling II (3) Continuation of GCNSL 554. Findings from the capstone project are summarized in an abstract and presented in a scientific poster. Prerequisite: GCNSL 554. Credit/no-credit only. Offered: W.

MEDICINE

MED 490 Special Topics in Medicine (1-10, max. 20) In-depth study of current topics in medicine. Offered: AWSpS.

MED 498 Undergraduate Thesis (*)

MED 499 Undergraduate Research (1-10, max. 25) Laboratory research within the Department of Medicine. Available to undergraduate students. Must be supervised directly by UW faculty within UW PI lab, no remote labs. Offered: AWSpS.

MED 503 Cardiac Ultrasound (1) Instruction will be given in how to 1) acquire cardiac ultrasound images at three acoustic windows, 2) identify cardiac anatomy in standard views, and 3) recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator. Prerequisite: MED C standing or Undergraduate premedicine students with Senior status. Credit/no-credit only. Offered: AWSpS.

MED 505 P-Preceptorship in Medicine (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSpS.

MED 507 HIV in Latinos (1-, max. 12) Students shadow an attending physician, and participate in routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556. Credit/no-credit only.

MED 510 Health Issues of Sexual Minorities (1) Introduction to the special healthcare issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.

MED 515 Medicine as Culture (1) Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/no-credit only.

MED 522 Introduction to Human and Medical Genetics (2, max. 12) Provides in-depth examination of current topics in human and medical genetics with an emphasis on clinical and molecular diagnosis of genetic conditions, approaches to therapy, research, and molecular genetic technology. Credit/no-credit only. Offered: AWSp.

MED 525 Introduction to Gerontology and Geriatric Medicine (1) Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine

including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider. Credit/no-credit only.

MED 530 AIDS: A Multidisciplinary Approach (2) Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/G H 562.

MED 531 P-Human Genetics (*) Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

MED 533 P-Clinical Endocrinology (2) Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students.

MED 534 Wilderness Medicine (1) Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures. Offered: Sp.

MED 536 Introduction to Critical Care Medicine (1) Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W.

MED 540 Preventing Healthcare Associated Infections (1) Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505.

MED 546 Clinical Applications of Gene Therapy (2) Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.

MED 547 Quantitative Methods in Medical Genetics (2) Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

MED 549 Clinical Medical Genetics (1, max. 6) Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1) Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

MED 556 Visual Thinking and Medical Diagnosis (1) Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Credit/no-credit only. Offered: A.

MED 557 Hispanic Health and Healthcare Disparities (1) Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community. Credit/no-credit only.

MED 561 Tropical Medicine (1) Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with G H 561; Sp.

MED 566 Clinical Arts: Building Habits of Mind for Clinical Practice (1) Builds observation and communication skills while developing awareness of habits of mind and comfort with ambiguity. Builds skills through discussion-based observation of artworks and objects in the Anchorage Museum collection as well as reflective writing and art making.

MED 569 Addiction Medicine (1) Themes relevant to treatment of substance-using patients. Designed to build curiosity and increase familiarity with individual and societal factors that impact such patients, including various forms of bias and discrimination. Students develop and practice skills in order to become competent future providers for drug-using patients. Prerequisite: enrollment in graduate health science programs. Credit/no-credit only. Offered: A.

MED 573 Clinical Management of HIV (2) Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with clinician-educators from the UW Division of Infectious Diseases. Credit/no-credit only. Offered: A.

MED 598 P-Medicine Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Internal Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

MED 599 P-Transfusion Machine (3) Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

ELECTIVE CLERKSHIPS

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 602 P-Primary Care - Seattle (8/12) Four-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Roosevelt Clinic following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 605 P-Clinical Endocrinology and Metabolism - Seattle (*, max. 12) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 606 P-Clinical Gastroenterology - Seattle (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work. Students are scheduled at one of three sites: UWMC, Harborview Medical Center, and Veterans' Administration hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship.

Offered: AWSpS.

MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 608 P-Clinical Infectious Diseases - Seattle (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 610 P-Clinical Respiratory Disease (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 611 Advanced Inpatient Geriatrics (8) This is a unique intensive experience in geriatric and consultative medicine. The "Medicine G" service is a special inpatient service for elderly adults at a major trauma center with active geriatrics presence (outpatient, inpatient, and post-acute); the service provides consultative care with the goal of preventing and managing complications for elderly and often frail and/or medically complex patients. Prerequisite: Successful completion of the third year medicine clerkship. Offered: AWSpS.

MEDECK 612 P-Clinical HIV Care - Seattle (8) Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 613 Women's Primary Care (8) For students with strong interest in women's health care in the ambulatory setting. Educates students on the diagnosis, management, and treatment of medical and outpatient gynecological issues of adult women of all ages and life stages. Working alongside internal medicine trained women's health care specialists, students manage a panel of patients, working independently and taking on more responsibility when possible. Prerequisite: completion of Patient Care Phase Medicine Clerkship. Offered: AWSpS.

MEDECK 614 P-Oncology Subinternship (8) Students participate in the oncology service in the inpatient oncology consult service at UWMC hospital, obtaining exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 615 P-Rheumatology - Seattle (8) Full-time inpatient-outpatient clerkship in rheumatology. Includes diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the UW Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 617 P-Harborview Evening Clinic - Seattle (1/2, max. 8) A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students must apply to this program, and are expected to participate for the full academic year. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 618 P-Medical Consultation - Seattle (8) Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students.

Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2, max. 12) Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. (Two weeks). Prerequisite: third-year required Medicine, OB/GYN, and Surgery clerkships. Offered: AWSpS.

MEDECK 620 P-Critical Care Medicine Subinternship - Seattle (8) Participating students function at the sub-intern level on the MICU service at either Harborview Medical Center, UWMC, or VAMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 621 Advanced Outpatient Geriatrics (8) This is an advanced rotation in the care of older adults with an emphasis on age-related changes in physiology, pathophysiology, function, and quality of life. Students will prevent, diagnose and manage common geriatric syndromes; Identify available health and community services for older adults to address their care needs; and identify the complexity and uncertainty of many conditions and circumstances older adults experience. Prerequisite: Successful completion of the third year medicine clerkship Offered: AWSpS.

MEDECK 622 P-Clinical Medical Genetics (8) Students see outpatients and attend a variety of outpatient clinics including subspecialty clinics in cancer genetics, connective tissue genetics, neurogenetics, Turner syndrome and dermatologic genetics, and pediatric general genetics clinics with an emphasis on dysmorphology, developmental delay, disorders of sexual differentiation, skeletal dysplasia, craniofacial anomalies, and neurogenetics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 623 P-Clinical Wound Management (*) Opportunity for medical student to be exposed to and learn wound care management in clinical setting. At end of rotation students should be able to diagnose cause of chronic ulcer or wound, outline the approach to the management of diabetic foot ulcer, peripheral artery disease ulcer and VLU, and initiate treatments such as sharp debridement, VAC, dressing, and Unna Boot placement. (Two weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 624 Hospitalist Subinternship - Seattle, WA (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist.

MEDECK 625 Cardiology Subinternship - Seattle, WA (8) Students serve as intern on the cardiology service under the supervision of senior resident and cardiology attending physicians.

MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship.

MEDECK 627 Clinical Hematology - Seattle (8) Clerkship experience in hematology, focusing on blood and bone marrow morphology in an outpatient setting. Prerequisite: completion of Internal Medicine required clerkship. Offered: AWSpS.

MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8) Training in respiratory disease diagnosis and pulmonary therapy, with special

emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 631 P-Ward Medicine Subinternship - Spokane (8) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 632 APC Inpatient and Outpatient Cardiology-Spokane (8) This rotation provides opportunities in inpatient and outpatient settings. Students assume ownership of inpatients, rounding on patients, formulating treatment plans, and following them through their hospital course. Emphasis will be placed on physical examination, electrocardiogram interpretation, basics of echocardiographic imaging, and the management of patients with congestive heart failure, dysrhythmia, angina, and valvular heart disease. Prerequisite: Successful completion of required medicine clerkship. Offered: AWSpS.

MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 635 Advanced Hospital Inpatient - Missoula, MT (8) Intensive experience in hospital medicine. Students assume responsibility as the primary provider for a subset of the attending physician's panel of patients. Prerequisite: successful completion of required medicine clerkship. Offered: AWSpS.

MEDECK 636 P-Clinical Gastroenterology - Washington (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics at Sacred Heart Hospital in Spokane. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 637 Clinical Infectious Diseases - Yakima, WA (8) Students participate in the clinic and consulting service at area hospitals. Includes patients with a range of community acquired and hospital acquired infectious diseases. Students participate in antibiotic stewardship discussions and infection control meetings.

MEDECK 638 Clinical Infectious Diseases - Spokane (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 639 P-Nephrology and Fluid Balance - Washington (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 640 Critical Care Medicine Subinternship - Washington (8) Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 641 Hospitalist Subinternship-WY (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist. Prerequisite: Medicine Required Clerkship Offered: AWSpS.

MEDECK 643 P-Clinical Cardiology and Electrocardiography - WY (8) The student will spend time in a consultative cardiology clinic. They will see new patients independently and present to the attending cardiologist on a daily basis. They will perform inpatient consultations and follow in patients. They will see ED patients in

consultation. The student will spend time observing in the echocardiographic suite, the pacemaker clinic and the cardiac catheterization laboratory. Prerequisite: Successful completion of third year Medicine Clerkship Offered: AWSpS.

MEDECK 644 P-Clinical Dermatology - Wyoming (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 645 Advanced Outpatient Clerkship - Seattle Veterans Administration (8) Advanced outpatient clerkship with a unique focus on non-traditional modalities of primary care delivery, including home-based primary care, primary care for veterans experiencing homelessness, addiction medicine, and perioperative medicine. Students learn about careers in internal medicine and primary care. Increases clinical experience and skills in ambulatory internal medicine, with a focus on veterans with complex biopsychosocial needs. Prerequisite: completion of medicine required clerkship. Offered: AWSpS.

MEDECK 646 Gastroenterology Clerkship - Spokane, WA (8) Clerkship experience in gastroenterology in the inpatient and outpatient setting. Students participate in inpatient consults in the emergency department, intensive care unit, and acute care wards, and see patients with both new and chronic gastrointestinal problems in clinic. Prerequisite: completion of Internal Medicine required clerkship. Offered: AWSpS.

MEDECK 647 Clinical Hematology/Oncology - Idaho (8) Medicine elective clerkship designed to provide students with outpatient and inpatient experience with hematologic/oncologic disorders. Includes teaching rounds, conferences, and evaluation of laboratory work. Open to third- and fourth-year medical students. Offered: AWSpS.

MEDECK 648 Infectious Disease - Missoula, MT (8) Clerkship experience in infectious disease. Students participate in inpatient infectious disease service including consultative management of patients and in outpatient infectious disease clinic, including wound care. Prerequisite: completion of Internal Medicine required clerkship. Offered: AWSpS.

MEDECK 649 Geriatric Medicine and Palliative Care Consultation - Missoula, MT (8) Integrated clerkship experience in geriatric medicine and palliative care. Students participate in inpatient consultation service, ambulatory clinic, and see geriatric patients in both long-term care and on home visits. Prerequisite: completion of Internal Medicine required clerkship. Offered: AWSpS.

MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 652 P-Infectious Disease Consults - Alaska (8) Intensive four week experience caring for patients with complex infectious diseases and immune compromise. Outpatient management of HIV-infected patients, execution of antimicrobial stewardship program, and exposure to treatment of a wide range of infectious disease pathology seen in Alaska. Prerequisite: Required internal medicine clerkship.

MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8) Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 657 Clinical Hematology/Oncology (8) Work with patients with benign and malignant hematology disorders and patients with various solid tumors, with an emphasis on those with GI malignancies, breast, lung, and head/neck cancers. Procedures performed include bone marrow biopsy and aspirate and lumbar puncture with intrathecal chemotherapy. Learn about the diagnostic workup, staging, and treatment of such cancers. Learn about therapies to treat hematologic diseases and solid tumors. Prerequisite: Successful completion of third year required medicine clerkship Offered: AWSpS.

MEDECK 658 P-Clinical Infectious Diseases Alaska (8) Students participate in clinic and in the consulting service throughout the hospital, attend ICU, antimicrobial stewardship rounds, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship; fourth-year standing. Offered: AWSpS.

MEDECK 660 P-Critical Care - Alaska (8) Advanced patient care clerkship on the MICU service at Alaska Native Medical Center. Through direct patient care responsibilities, students learn about critical care illness and gain experience in application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 661 P-Ward Medicine Subinternship-Billings, MT (8) Students act in the capacity of interns on the medical wards under supervision of the house staff and visiting physicians. They attend all regular medicine rounds and conference as their schedules permit. Prerequisite: Third year required Medicine clerkship.

MEDECK 662 Outpatient Medicine - Montana (8) Advanced ambulatory medicine elective at the Bozeman Health Internal Medicine Clinic. Students spend the most time in the Bozeman Health Internal Med Clinic, a primary care clinic serving a series of complex patients in the outpatient setting. Students see 3-4 patients a half day with a high level of autonomy. Time is also spent in medicine specialty clinics, as developed or desired. Prerequisite: successful completion of Patient Care Phase. Offered: AWSpS.

MEDECK 663 Clinical Cardiology-Missoula (8) Experience in consultative cardiology clinic. Students see both new and returning outpatients presenting for routine clinic visits. Includes time in the hospital where the students gain exposure in evaluating acute cardiology problems including acute coronary syndromes, arrhythmias, heart failure, and more. Prerequisite: successful completion of Medicine Clerkship Offered: AWSpS.

MEDECK 665 P-Clinical Endocrinology- Bozeman (8) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals in Bozeman, MT. Prerequisite: Third-year required Medicine Clerkship Offered: AWSpS.

MEDECK 667 Hospitalist Medicine Subinternship-MT (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist. Prerequisite: Successful completion of required medicine clerkship. Offered: AWSpS.

MEDECK 668 Critical Care Medicine, Great Falls, MT (8) Students evaluate and manage critically ill patients in a mixed medical, surgical, cardiothoracic and neuro ICU. Students act as the primary provider and work closely with the intensivist and interprofessional team. Students will encounter a patient with septic shock on vasopressors, a patient with respiratory failure on mechanical ventilation, a post-cardiothoracic surgery patient, and a patient with a primary neurological insult. Prerequisite: Successful completion of the third year medicine clerkship Offered: AWSpS.

MEDECK 669 P-Nephrology and Fluid Balance - Montana (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Credit/no-credit only. Offered: AWSpS.

MEDECK 670 P-Clinical Medicine Critical Care - Idaho Falls (8) Inpatient critical care rotation in community hospital setting at Eastern Idaho Regional Medical Center in Idaho Falls. Assist in diagnosis and management of common ICU problems and major trauma resuscitation under supervision of critical care physicians. Exposure to common ICU problems, which may include sepsis, respiratory failure, hypotension, organ failure, and gastrointestinal hemorrhage. Students work as multidisciplinary team. (Four weeks) Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 671 P-Ward Medicine Subinternship - Idaho (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine

clerkship. Offered: AWSpS.

MEDECK 672 P-Clinical Endocrinology and Metabolism - Idaho Falls, ID (8)

Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: medicine required clerkship. Offered: AWSpS.

MEDECK 673 P-Clinical Cardiology and Electrocardiography - Idaho (8)

Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 675 P-Clinical Allergy and Immunology - Boise, ID (4)

Clinical experience seeing a combination of new and recheck patients with allergy, asthma and immunology disorders for example but not limited to, seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, and food allergy. Prerequisite: Medicine Clerkship and 4th year standing.

MEDECK 676 P-Critical Gastroenterology - Boise, ID (8)

Clerkship in clinical gastroenterology in Boise, ID. Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work.

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8)

Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8)

Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8)

Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8)

Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 682 P-critical Care Subinternship- Idaho (8)

Students function at the sub-intern level on the MICU service. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 683 P-Outpatient Clinical Cardiology Virginia Mason (8)

Four-week clerkship in clinical outpatient cardiology at Virginia Mason Heart Institute. Covers ECG interpretation, stress testing, coronary angiography, stenting EP procedures, and echo cardiography. Prerequisite: third-year required Internal Medicine clerkship. Offered: AWSpS.

MEDECK 684 Subinternship in Hospital Medicine and Hematology/Oncology - Seattle, WA (8)

Intensive experience in hospital medicine in which the student acts as an intern for the Medicine O service.

MEDECK 686 P-Advanced Clinical Dermatology Clinic - Idaho (8)

Advanced clinical dermatology clerkship. (Four weeks). Prerequisite: third-year required Medicine clerkship; either MEDECK 604, MEDECK 634, MEDECK 644, MEDECK 664, or MEDECK 674. Offered: AWSpS.

MEDECK 687 Advanced Outpatient Clerkship-Idaho (8) The advanced outpatient clerkship at the Boise Veterans Medical Center (VAMC) is designed for medical

students with an interest in solidifying ambulatory clinical knowledge and skills, with a unique focus on learning new models of primary care delivery. This four-week, full time clinical experience based in a primary care teaching clinic at the Boise VAMC will focus on inter-professional collaboration and the patient centered medical home model. Prerequisite: successful completion of the medicine clerkship. Offered: AWSpS.

MEDECK 690 P-General Internal Medicine - Shiprock (8)

Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 697 P-Medicine Special Electives - Away (*, max. 24)

Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. (Two, four, six, or twelve weeks). Prerequisite: permission of department.

MEDECK 701 P-Occupational and Environmental Medicine (8)

Overview of Occupation and Environmental Medicine subspecialty. Introduction to Washington Worker's Compensation system and diagnosis and treatment of occupational injuries and illness. Students complete special projects in OEM aligning with student interest, participate in worksite visits, and attend conferences.

MEDECK 702 Lifestyle Medicine (4)

Students gain the knowledge and skills to help achieve better overall health and greater quality of life. Working in an outpatient clinic with a multidisciplinary team, students learn how evidence-based lifestyle interventions such as nutrition, sleep management, physical activity, substance abuse mitigation, and stress management impact health status. Prerequisite: successful completion of UW School of Medicine Foundations curriculum. Offered: AWSpS.

MEDECK 703 Pediatric and Adult Sleep Medicine Clerkship - Bozeman (4)

Introductory clerkship experience in pediatric and adult sleep medicine in an outpatient clinic setting. Students integrate into sleep medicine team, see patients, and read sleep studies. Prerequisite: completion of required Internal Medicine clerkship. Offered: AWSpS.

MEDECK 704 P-Intro to Clinical Dermatology (2 Wks) (4)

Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology resident under the supervision of dermatology faculty. (2-weeks) Offered: AWSpS.

MEDECK 711 P-Introduction to Community Internal Medicine Subspecialty Practice (4)

Introduction to the outpatient Medicine specialty clinics of Endocrinology,

Gastroenterology (GI), and Rheumatology in the Olympia medical community. Two weeks. Offered: Sp.

MEDECK 713 Home Care Medicine (4) Introductory experience to home care medicine with a focus on longitudinal care for complex and frail patients. Students participate as a member of interdisciplinary teams at both the VA as well as a private home based care group under the direction of an attending physician from both programs. Clinically, consists of a mixture of home visits, virtual visits, and participation in interdisciplinary team rounds. Prerequisite: successful completion of UWSOM Foundations curriculum. Offered: AWSpS.

MEDECK 714 Intro to Opioid Use Disorder (4) Intensive experience in the clinical care of patients with opioid use disorder in the inpatient and outpatient settings. Students will evaluate inpatients with opioid use disorder, providing treatment recommendations and linkage to outpatient services with appropriate supervision. Will work with patients in outpatient settings including primary care-based and opioid treatment programs. Students will complete training for buprenorphine waiver. Prerequisite: successful completion of medicine clerkship. Offered: AWSpS.

MEDECK 724 P-Interprofessional Hospital Medicine (4) Introduction to inpatient internal medicine focusing on interprofessional hospital services. Students work as a member of Hospitalist service, managing 1-2 patients, under direction of an attending physician with afternoons dedicated to rounding with other interprofessional services.

REQUIRED CLERKSHIPS

MEDRCK 601 P-Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 606 Clinical Clerkship Seattle - Kaiser (24) Third-year medical students assume increasing responsibility for the care of adult patients in an inpatient and outpatient setting emphasizing continuity of care. Daily rounds with residents and attending physician, with lectures and conferences. Progress evaluated by supervising physicians. Prerequisite: completion of Foundations Phase curriculum. Offered: AWSpS.

MEDRCK 608 Clinical Clerkship Seattle-Tacoma (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a six-week outpatient experience emphasizing continuity of care. Inpatient daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Prerequisite: Successful completion of Foundations curriculum. Offered: AWSpS.

MEDRCK 610 P-Clinical Clerkship Seattle-Shelton, WA (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 612 P-Clinical Clerkship - Seattle-Madigan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 614 P-Clinical Clerkship - Seattle-Montesano (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

Offered: AWSpS.

MEDRCK 615 Clinical Clerkship Seattle-Longview (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of foundation years curriculum. Offered: AWSpS.

MEDRCK 616 P-Clinical Clerkship Seattle-Olympia (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 617 P-Clinical Clerkship Seattle-Port Townsend (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 618 P-LIC Clinical Clerkship (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (38-44 week integrated clerkship, full-time.) Offered: AWSpS.

MEDRCK 619 Clinical Clerkship Seattle - Vancouver (24) Third-year medical students assume increasing responsibility for the care of adult patients in an inpatient and outpatient setting emphasizing continuity of care. Daily rounds with residents and attending physician. Progress to be evaluated by lead preceptor and grading based on evaluations and a written examination. Six-week outpatient medicine in Vancouver and six-week inpatient medicine at various Seattle sites. Prerequisite: successful completion of Foundations curriculum. Offered: AWSpS.

MEDRCK 621 P-Clinical Clerkship - Spokane (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Some students can schedule outpatient time in Pullman, WA. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 623 Clinical Clerkship Seattle-Spokane (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: successful completion of foundation years curriculum. Offered: AWSpS.

MEDRCK 624 P-Clinical Clerkship - Seattle-Wenatchee (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 625 Clinical Clerkship Seattle - Moses Lake, WA (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

MEDRCK 630 Rural Longitudinal Integrated Clerkship - Inpatient Medicine (12, max. 24) Third-year medical students participate in the care of hospitalized adult patients, refining their skills in history-taking and physical examination, while

learning to care for a variety of illnesses. Designed for students enrolled in WWAMI Rural Integrated Training Experience. Didactic teaching highlights patient management in rural areas. Six-week clerkship. Prerequisite: completion of Foundations Phase curriculum; acceptance to the WRITE program. Offered: AWSpS.

MEDRCK 632 P-Clinical Clerkship - Seattle-Jackson (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 633 P-Clinical Clerkship Seattle- Gillette (1-24, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 634 P-Clinical Clerkship - Seattle-Sheridan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 635 Clinical Clerkship-Seattle-Casper-Cody (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

MEDRCK 636 P-Clinical Clerkship - Seattle-Douglas (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 638 P-Clinical Clerkship - Seattle-Lander (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 652 P-Clinical Clerkship - Seattle-Anchorage (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 653 P-Clinical Clerkship Seattle- ANMC (1-24, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 654 P-Clinical Clerkship - Seattle-Soldotna (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and

attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 656 Clinical Clerkship - Fairbanks, AK (24) Third-year medical students assume increasing responsibility for the care of adult patients in an inpatient and outpatient setting emphasizing continuity of care. Daily rounds with residents and attending physician, with lectures and conferences. Progress evaluated by supervising physicians. Prerequisite: completion of Foundations Phase curriculum. Offered: AWSpS.

MEDRCK 672 P-Clinical Clerkship - Seattle-Billings (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 673 P-Clinical Clerkship Seattle-Great Falls (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 674 P-Clinical Clerkship - Seattle-Dillon (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 675 P-Clinical Clerkship Boise- Billings (1-24, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 676 P-Clinical Clerkship - Seattle-Missoula (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 678 P-Clinical Clerkship - Seattle-Bozeman (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 680 Clinical Clerkship Seattle-Lewistown (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a six-week outpatient experience emphasizing continuity of care. Inpatient daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time.) Prerequisite: successful completion of Foundations curriculum. Offered: AWSpS.

MEDRCK 691 P-Clinical Clerkship - Boise (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 693 Clinical Clerkship Seattle-Twin Falls (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written

examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

MEDRCK 697 Clinical Clerkship Boise-Twin Falls (1-24, max. 25) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Prerequisite: Successful completion of Foundation years curriculum. Offered: AWSpS.

MEDICAL SCIENCE

MEDSCI 500 P-Foundations of Clinical Medicine (2-) Introduction to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Pass/Fail only. Offered: S.

MEDSCI 501 P-Independent Investigative Inquiry (6-) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: AWSpS.

MEDSCI 502 P-Foundations of Clinical Medicine (-3-) Introduction to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Pass/Fail only. Offered: A.

MEDSCI 503 P-Independent Investigative Inquiry Final Project (-1) Students will engage in a project with an in-depth focus on a health-related, thereby giving additional context to their training and career as a physician. In the process they will develop the skills to acquire and critically evaluate new information under the guidance of faculty mentorship. This will culminate in dissemination of their scholarly work through a poster presentation or a final paper depending on the type of scholarship chosen. Offered: AWSpS.

MEDSCI 504 P-Foundations of Clinical Medicine (-4-) Introduction to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Pass/Fail only. Offered: W.

MEDSCI 505 Introduction to Telemedicine (6) Gain knowledge of telemedicine and telemedicine technologies, and their practical applications to improve the health of rural and underserved populations. Offered: AWSpS.

MEDSCI 506 P-Foundations of Clinical Medicine (-4) Introduction to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Pass/Fail only. Offered: Sp.

MEDSCI 507 P-Independent Study Investigative Inquiry (2-24, max. 24) Designed for medical students required to complete additional study related to the required Independent Investigative Inquiry course series offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 508 P-Foundations of Clinical Medicine (4) Introduction to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Pass/Fail only. Offered: A.

MEDSCI 510 P-Fundamentals of Medical Science and Research (13)

Comprehensive introduction to foundational basic science and research concepts in medicine. Topics covered include molecular and cell biology; human physiology, genetics and biochemistry; community health and disease; clinical epidemiology, research study design and data analysis. Incorporates fundamental principles of anatomy, pathology, and pharmacology, and medicine in society. Pass/Fail only. Offered: S.

MEDSCI 511 P-Independent Study Molecular Cellular Basis of Disease Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Molecular and cellular Basis of Diseases block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission. Offered: AWSpS.

MEDSCI 512 P-Independent Study Fundamentals of Medical Science and Research (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Fundamentals of Medical Science and Research block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 515 Themes in Medicine- Foundations 1 (1-) Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSpS.

MEDSCI 516 P-Integration I (0.5) Promotes cognitive integration of basic science and clinical content. Students analyze and apply metacognitive skills to promote retention and better prepare for the USMLE Step 1 medical licensing exam. First in a sequence of three. Pass/Fail only. Offered: AWSpS.

MEDSCI 517 P-Integration II (0.5) Promotes cognitive integration of basic science and clinical content. Students analyze and apply metacognitive skills to promote retention and better prepare for the USMLE Step 1 medical licensing exam. Second in a sequence of three. Pass/Fail only. Offered: AWSpS.

MEDSCI 518 P-Integration III (0.5) Promotes cognitive integration of basic science and clinical content. Students analyze and apply metacognitive skills to promote retention and better prepare for the USMLE Step 1 medical licensing exam. Third in a sequence of three. Pass/Fail only. Offered: AWSpS.

MEDSCI 520 P-Cancer, Hormones, and Blood (10) Comprehensive introduction to the fundamentals of endocrinology, hematology, and oncology. Topics covered include endocrine regulation of metabolism; normal physiology and pathophysiologic mechanisms responsible for clinically important endocrine disorders; disturbances in red cell, white cell, and platelet production; abnormalities of hemostasis; and malignant neoplasia. Pass/Fail only. Offered: A.

MEDSCI 521 P-Independent Study Invaders and Defenders Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Invaders and Defenders block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund knowledge. Prerequisite: Department permission Offered: AWSpS.

MEDSCI 522 Independent Study Cancer, Hormones, and Blood (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Cancer, Hormones, and Blood block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 523 P-Medicine, Health, and Society I (1) Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of ethics, health systems, systems improvements, health equity, diversity, social determinants of health, and global population and public health. Pass/Fail only. Offered: W.

MEDSCI 524 P-Medicine, Health, and Society II (3) Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of ethics, health systems, systems improvements, health equity, diversity, social determinants of health, and global population and public health. Pass/Fail only. Offered: S.

MEDSCI 525 Themes in Medicine- Foundations 2 (-1-) Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: W.

MEDSCI 529 P-Independent Study Medicine, Health, and Society (1-24, max. 24) Designed for medical students required to complete additional study related to the required Introduction to Medicine, Health, and Society, and Medicine, Health, and Society blocks offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 530 P-Infections and Immunity (10) Comprehensive introduction to the fundamentals of the immune system; microbiology; infectious diseases; inflammation and repair. Topics covered include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, and the basis of immunologic diagnostics. Integrates relevant principles of anatomy, pathology, and pharmacology and medicine in society. Pass/Fail only. Offered: A.

MEDSCI 531 Independent Study Circulatory Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Circulatory block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 532 P-Independent Study Infections and Immunity (1-24, max. 24) Designed for medical students required to complete additional study related to the required Infections and Immunity block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 535 Themes in Medicine- Foundations 3 (-1) Integrates School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSpS.

MEDSCI 540 P-Muscles, Joints, Bones, and Skin (8) Comprehensive introduction to the fundamentals of the musculoskeletal system and dermatology. Topics covered include clinical manifestations in the skin, muscles, bones, and joints and the pathophysiology of trauma, aging, infection, and inflammation. Integrates relevant principles of anatomy, pathology, and pharmacology. Pass/Fail only. Offered: W.

MEDSCI 541 P-Independent Study Musculoskeletal Remediation (2-24, max. 24) Designed for medical students required to complete additional study related to the required musculoskeletal block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 542 P-Independent Study Muscle, Joints, Bones, and Skin (1-24, max. 24) Designed for medical students required to complete additional study related to the required Muscles, Joints, Bones, and Skin block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 543 P-Independent Study Blood and Cancer Remediation (2-24, max. 24) Designed for medical students required to complete additional study related to the required Blood and Cancer block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or

extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 545 Themes in Medicine- Foundations 4 (1) Applies School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSpS.

MEDSCI 550 P-Cardiovascular System (8) Comprehensive interdisciplinary introduction to cardiovascular biology and medicine, including thoracic anatomy, physiology, radiology, pathology, pharmacology, and surgery. Topics covered include cardiac electrophysiology, cardiac muscle mechanics, myocardial infarction, and cardiac repair. Pass/Fail only. Offered: W.

MEDSCI 551 P-Independent Study Energetics Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Energetics block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 552 P-Independent Study Cardiovascular System (1-24, max. 24) Designed for medical students required to complete additional study related to the required Cardiovascular System block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 553 P-Respiration and Regulation (10) Comprehensive interdisciplinary introduction to the respiratory and renal-urinary systems and medicine, including pulmonary and renal anatomy, physiology, radiology, pathology, and pharmacology. Topics covered include ventilation mechanics; obstructive, restrictive, and pulmonary-vascular diseases; renal function; and common kidney diseases. Pass/Fail only. Offered: Sp.

MEDSCI 554 P-Independent Study Respiration and Regulation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Respiration and Regulation block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 555 Themes in Medicine- Patient Care 1 (1) Applies School of Medicine thematic content with an emphasis on core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSpS.

MEDSCI 556 P-Head, Neck, and Gut (8) Comprehensive introduction to head and neck anatomy and the gastrointestinal system. Topics covered include gastrointestinal and liver physiology; pathophysiology of digestion and hepatic function; the principles and practice of clinical nutrition. Integrates the relevant anatomy, pathology, and pharmacology of the gastrointestinal system. Pass/Fail only. Offered: Sp.

MEDSCI 557 P-Independent Study Head, Neck, and Gut (1-24, max. 24) Designed for medical students required to complete additional study related to the required Head, Neck, and Gut block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remediation or extended programs to master identified areas of weakness in fundamental medical knowledge. Pass/Fail only. Offered: AWSpS.

MEDSCI 560 P-Mind, Brain, and Behavior (11) Comprehensive introduction to the organization and function of the central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Integrates relevant principles of anatomy, pathology and pharmacology. Pass/Fail only. Offered: A.

MEDSCI 561 P-Independent Study Mind, Brain and Behavior Remediation (1-24, max. 24) Designed for medical students required to complete additional study

related to the required Mind, Brain and Behavior block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 565 Themes in Medicine- Patient Care 2 (1) Core concepts for clinical practice in the changing healthcare environment. Students explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, and determinants of health. Pass/Fail only. Offered: AWSpS.

MEDSCI 570 P-Reproduction and Development (8) Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology. Offered: A.

MEDSCI 571 P-Independent Study Lifecycle Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Lifecycle block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 575 Themes in Medicine- Explore and Focus (1) Provides students with a deep understanding of systems that constitute health care and are fundamental to becoming a successful physician. Encourages reflections from clinical clerkships experiences and requires the completion of a capstone project. Pass/Fail only. Offered: AWSp.

MEDSCI 579 Advanced Study USMLE Step 1 Exam (8, max. 16) Provides enhanced academic and peer support to review foundational biomedical knowledge, integrate disparate areas of basic science for strengthening clinical reasoning skills, and optimize effective study strategies in anticipation of taking USMLE Step 1 medical student licensing exam. Pass/Fail only. Offered: AWSpS.

MEDSCI 580 P-Consolidation and Transition (11) Reinforces content in the UWSOM foundations phase. Learning experiences will address key content areas which need further review identified throughout terms 1 and 2, with specific sessions developed as indicated; faculty/staff and peer educators will provide sessions for this basic science review as well as preparation for clerkships. Offered: W.

MEDSCI 581 P-Foundations Capstone (4) Reinforces content in the UWSOM Foundations phase. Large-group activities address general principles in biomedical sciences and organ systems. Pass/Fail only. Offered: WSp.

MEDSCI 582 P-Consolidation (12) Focused course to prepare students for the USMLE Step 1 exam. Includes large group review of study strategies and approach to integration of foundational knowledge with clinical reasoning, as well as mentored self-assessment and formation of an individualized study plan for the USMLE Step 1 exam. Pass/Fail only. Offered: WSp.

MEDSCI 583 P-Transition to Clerkships (2) Comprehensive preparation for the clinical curriculum. Topics include clinical reasoning and requirements across specialties, management of common clinical scenarios, communication skills, interview techniques, and physical examination skills. Includes approaches for identifying academic resources enabling students to acquire and set learning goals for organizing and retaining information in the clinical phase of the curriculum. Pass/Fail only. Offered: WSp.

MEDSCI 584 P-Independent Study Foundations of Clinical Medicine Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Foundations of Clinical Medicine offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master knowledge & skills. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 585 Independent Study Research Methods (1-24, max. 24) Designed for medical students required to complete additional study related to the required

Research Methods Course offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 586 P-Independent Study Consolidation and Transition Remediation (1-24, max. 24) Designed for medical students required to complete additional study related to the required Consolidation and Transition course offered between the foundation and patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Pass/Fail only Offered: AWSpS.

MEDSCI 587 P-Independent Study Themes in Medicine (1-7, max. 7) Designed for medical students required to complete additional study related to the required Themes in Medicine offered throughout the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

MEDSCI 588 P-Independent Study Anatomy and Embryology Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Anatomy and Embryology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: permission of department. Offered: AWSpS.

MEDSCI 589 P-Independent Study Anatomy and Embryology Term 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Anatomy and Embryology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum during Term 2. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: permission of department. Offered: AWSpS.

MEDSCI 590 P-Independent Study Anatomy and Embryology Term 3 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Anatomy and Embryology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum during Term 3. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: permission of department. Offered: AWSpS.

MEDSCI 591 P-Independent Study Pathology Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 592 P-Independent Study Pathology Term 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 593 P-Independent Study Pathology Term 3 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. The course title includes terms to identify which quarter the course is being offered. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 594 P-Independent Study Pharmacology Term 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

MEDSCI 595 P-Independent Study Pharmacology Term 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 596 P-Independent Study Pharmacology Term 3 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 597 P-Independent Study USMLE Step 1 (1-24, max. 24) Designed for medical students required to complete additional study related to the required USMLE Step 1 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 598 P-Independent Study USMLE Step 2 (1-24, max. 24) Designed for medical students required to complete additional study related to the required USMLE Step 2 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 599 P-Independent Study or Research (1-24, max. 24) Designed for medical students who elect a special or research related to the required foundation phase pre-clinical courses. This course can also be used for a student who fails a thread remediation course. Prerequisite: Department Permission Offered: AWSpS.

MEDSCI 600 P-Transition to Residency (4) The Transition to Residency course will: 1. Prepare graduating 4th year medical students in the knowledge and skills necessary to perform expected intern duties in the first 3 months of residency. 2. Provide a forum for the academic, research and service accomplishments of the graduating students. 3. Incorporate sessions that create community and give students a platform to celebrate their experiences in medical school. Offered: Sp.

MEDSCI 602 Adolescent Health in Low-Resource Settings (1) Highlights issues for adolescents in resource limited settings with an initial focus on what makes adolescents unique. Topic-based seminars, readings, discussions, and cases will include: adolescent development; physical and psychological trauma; nutrition; illicit activities; adolescent-focused research; adolescent-friendly health services; and reproductive and sexual health.

MEDSCI 603 Introductory Hands-On Cardiac Ultrasound (1) Acquire cardiac ultrasound images at three acoustic windows, identify cardiac anatomy in standard views, and recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator.

MEDSCI 604 Introduction to Chronic Pain (1) Medical students will be paired with a pain specialist for three morning sessions in an outpatient chronic pain clinic. Students will be exposed to musculoskeletal, neuropathic, and visceral pain conditions while learning about various management options. A 1-2 page reflection on a patient or pain topic will be required. Offered: SpS.

MEDSCI 605 From Electrons to the Emergency Department: The Cell Biology of Poisons (1) This course will describe how various poisons (naturally occurring or following overdose) interrupt molecular pathways to produce toxicity. Concepts will be introduced in a base-based manner before describing in depth the metabolic pathway affected. Examples include electron transport chain poisons, sodium channel poisons, and free poisons (iron).

MEDSCI 606 Emergency Medicine Point-of-Care Ultrasound (1) Introduction to point-of-care ultrasound. This elective will help students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. The elective is designed to be interactive and will incorporate classroom didactic, procedure simulation and clinical application. Offered: WSp.

MEDSCI 607 Science and Practice of Empathy and Compassion Cultivation in Medicine (1) This course will aim at helping students develop the ability to face suffering and pain with empathy, kindness, and compassion. Emphasis will be on cultivating a non-judgmental and curious attitude, self-compassion, appreciation of common humanity and acknowledging that suffering is universal to the human condition, and the practice of compassion. Offered: AS.

MEDSCI 608 Ethical Issues in Solid Organ Transplantation and Allocation (1) Explore the ethical issues that underlie some of the major controversies in transplantation through brief readings (including selections from the press, canonic texts, and academic articles) and case-based discussion. Students will be evaluated based on participation and a written response to a case. Offered: W.

MEDSCI 609 Ethics in emergency Medicine Workshop (1) Learn how to consider and evaluate the ethical issues surrounding various real-life, frequently encountered medical situations. Discuss various approaches to ethical reasoning and decision-making, then implement in case evaluation. Students will be encouraged to both participate in and lead discussions of each case.

MEDSCI 610 Food, Health, and the Environment (1) A multi-modal session comprised of interactive presentations, documentaries, guest speakers, and small group discussions covering major nutrition topics, such as: nutrition and effects on health, the American food industry and the environment, changing eating behaviors on individual, community, and national levels, as well as food insecurities and health disparities.

MEDSCI 611 Intersection of Genetics with Patient Care (2) Create hypothesis-driven clinical inquiry in an interactive learning environment. Employ peer-review sessions and team-based analysis of genetics case scenarios. Apply your science and clinical knowledge towards solving your patient's specific healthcare need. A team experienced clinicians and researchers will give support and feedback.

MEDSCI 612 Introduction to Humanitarian Emergencies (1) The course provides an introduction to health related issues faced by acutely displaced populations, including refugees and internally displaced persons, in developing countries, in the setting of humanitarian emergencies. Challenges in planning, implementing, and evaluating health programs for these populations will be discussed through case studies of recent humanitarian emergencies.

MEDSCI 613 Mind Body Medicine: Mind Body Skills for Medical Students (2) This seminar course will provide scientific background and foundational self-care skills for stress management through mindfulness and mutual support. Students will be encouraged to develop self-care and related pt care philosophy statement. Includes highly interactive, short didactic sessions, practice with experiential activities, and sharing reflections with group members.

MEDSCI 614 Theoretical and Clinical Aspects of Pain (1) The course will introduce pain and pain neurobiology with a close look into nociceptive, neuropathic and visceral pain and treatments to pain and addiction. The course will be a combination of articles, lecture, videos of real patients with chronic pain, and discussion.

MEDSCI 615 Community Engagement and the School of Medicine Pathways (1) The interactive and engaging Pathways intersession will cover the following topic area: determinants of health, the built environment, health equity and advocacy, structural competency, narrative medicine and additional topics related to working effectively with underserved, vulnerable and marginalized communities. Open to all WWAMI medical students.

MEDSCI 616 The Physician Online: Mindful Use of Digital Media (1) This course explores the use of social media in medicine by exploring online identity, interactions, consumption and creation of content, and reflection. The goal is to equip students to use digital media mindfully while leveraging it to collaborate intelligently, teach more efficiently, and learn for a lifetime.

MEDSCI 617 Prison/Jail Health Care, Part 1 (1) This 2-day course serves as an introduction to correctional healthcare. The instructors will provide a short overview of the US correctional system and why and how health care is delivered in jails and prisons. The class will tour a busy county jail on Day 1 and a state prison on Day 2. Offered: AW.

MEDSCI 618 Prison/Jail Health Care, Part 2 (1) This course will explore the unique ethical challenges of correctional medicine through case-based discussions. There will be an opportunity to better understand some of those challenges first hand through a guided visit to a prison caring for the state's most seriously mentally ill. Offered: S.

MEDSCI 619 Refugee and Immigrant Health (1) This is a weeklong UWSOM intercession course familiarizing students with various aspects of immigrant and refugee health care. There will be an emphasis on the social context of clinical care and the importance of effective teamwork and collaboration.

MEDSCI 620 Rheumatology Foundations (1) This course reviews pathology, clinical presentation, initial evaluation and management of patients with musculoskeletal complaints and common rheumatologic disorders. The in-class sessions include interactive lectures, case-based small groups and a volunteer patient panel that allow students to synthesize knowledge from earlier Foundations blocks and prepare for transition into clinical clerkships. Offered: Sp.

MEDSCI 621 Basic Skills in Emergency Resuscitation (1) Impart the critical skills needed to evaluate and manage common emergencies that medical students will encounter during their clinical clerkships and internship.

MEDSCI 622 Topics in Global Infectious Diseases (1) This course will combine didactic sessions presented by local topic experts on global infectious diseases with interactive case-based learning. Small groups will tackle cases that explore epidemiology, diagnosis and management of significant global infections. The course will conclude with a career panel of speakers highlighting various global health career paths.

MEDSCI 623 Introduction to Toxicology: The Intersection of Natural Toxins and Human Physiology (1) This is a didactic-based course illustrating the pathophysiology of natural toxins. Toxins from multiple organ systems including central nervous system, hepatic, hematologic, immunologic, and renal toxins will be covered. Specific examples include: shellfish poisonings, plant and mushroom poisonings, and envenomations from jellyfish, snakes, scorpions, and spiders.

MEDSCI 624 Medical Students as Advocates: Practical Skills for Effective Advocacy (1) Students will develop tangible, hands on skills for moving beyond witnessing health disparities to upstream action that is rooted in effective and community-centered advocacy. Through a cycle of interactive learning, research, action and reflection, this course both explores and develops the role of medical students and future physicians as advocates. Credit/no-credit only.

MEDSCI 625 Building a Framework for Effective Service-Learning, Health Equity, and Leadership (1) This course hones student leadership skills for: cultivating strong teams, assessing community strengths and needs, building community partnerships, sustaining projects, transitioning leadership, and facilitating reflective practices rooted in an analysis of systemic inequalities and cultural humility. Students will emerge with renewed confidence and refined skills for developing or strengthening projects. Credit/no-credit only.

MEDSCI 626 Foundations of Scholarship: Discovery (1) Investigate different types of scholarship of discovery within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AW.

MEDSCI 627 Foundations of Scholarship: Integration (1) Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 628 Foundations of Scholarship: Engagement (1) Investigate different types of scholarship of integration within medicine. Apply the concepts of clear

goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 629 Foundations of Scholarship: Teaching (1) Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

MEDSCI 630 Procedures and Advanced Skills for Clinical Practice (1) Explore common diagnostic and therapeutic clinical procedures through a hands-on approach. Experience more advanced skills needed for clinical practice in a mentored environment. Credit/no-credit only. Offered: AWSp.

MEDSCI 631 Skills and Strategies for Personal and Professional Development (1) Teach skills and strategies required to sustain lifelong personal and professional growth. Equip students with resources and strategies that will improve their studying and learning skills. Topics will include time management, stress management, adult learning and organizational skills. Guest presenters will include professionals in the fields of health and education. Offered: W.

MEDSCI 632 Clinical Global Health and Social Medicine (1) Applying clinical global health and social medicine principles are critical to providing excellent medical care. In this intercession, students will learn and discuss elements of clinical global health and social medicine through interactive case-based lectures, group discussions, and independent reading. Students will be graded (pass/fail) on participation and an essay. Offered: W.

MEDSCI 699 Clinical Independent Study or Research (1-24, max. 24) Independent study course designed for medical students electing to complete a project or research related to clinical medicine or other clinical courses during the medical school Patient Care or Explore and Focus Phases. Offered: AWSpS.

MICROBIOLOGY

MICROM 101 Microbes and Society (5) Nsc Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts.

MICROM 301 General Microbiology (3) Nsc Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: ASpS.

MICROM 302 General Microbiology Laboratory (2) NSc Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Offered: ASpS.

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NSc Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200. Offered: ASp.

MICROM 410 Fundamentals of General Microbiology I (3) NSc Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

MICROM 411 Bacterial Genetics (4) Nsc Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

MICROM 412 Prokaryotic Diversity (3) NSc Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200. Offered: Sp.

MICROM 413 Special Topics in Microbiology (1, max. 3) Examines current subjects in microbiology. Credit/no-credit only.

MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NSc Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

MICROM 435 Microbial Ecology (3) NSc Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180.

MICROM 442 Medical Bacteriology (3) NSc Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200. Offered: W.

MICROM 443 Medical Bacteriology Laboratory (3) NSc Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200. Offered: AW.

MICROM 445 Medical Virology (3) NSc Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp.

MICROM 450 Molecular Biology of Viruses (3) NSc Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200. Offered: W.

MICROM 460 Medical Mycology and Parasitology (3) Examines medically important fungi and parasites in terms of the symptoms, diagnosis, epidemiology, and therapy of the diseases they cause as well as their mechanisms of pathogenesis. The laboratory course MICROM 461 complements this lecture course but is not required. Prerequisite: BIOL 200 or MICROM 301 Offered: Sp.

MICROM 461 Medical Mycology and Parasitology Laboratory (2) Hands-on practice to identify medically important fungi and parasites, using live, preserved, and stained samples. Demonstrations along with limited procedures are used to illustrate important features used to distinguish organisms. Prerequisite: Prerequisite: MICROM 460, which may be taken concurrently. Offered: Sp.

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10) Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Prerequisite: MICROM 402; MICROM 410. Credit/no-credit only. Offered: AWSpS.

MICROM 495 Honors Undergraduate Research (*-) Specific problems in microbiology or immunology. Offered: AWSpS.

MICROM 496 Undergraduate Library Research (2) An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

MICROM 499 Undergraduate Laboratory Research (*-, max. 35) Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.

MICROM 500 Introduction to Research (*, max. 20) Introduction to research areas of the faculty and the techniques employed in their investigations. Prerequisite: graduate standing in microbiology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 520 Seminar (1, max. 30) Credit/no-credit only. Offered: AWSp.

MICROM 522 Current Research in Microbiology (1, max. 30) Weekly student and faculty seminar presentations based on the current literature. Prerequisite: graduate standing in microbiology. Credit/no-credit only. Offered: AWSp.

MICROM 526 Research of Cell Surface Problems (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Prerequisite: permission of instructor. Credit/no-credit only.

MICROM 529 Mechanisms of Bacterial Pathogenesis (1, max. 30) Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Prerequisite: graduate standing in microbiology. Credit/no-credit only. Offered: AWSp.

MICROM 532 Methanogenesis Research Meeting (1, max. 30) Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Prerequisite: MICROM 410, permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 534 Research Seminar in Salmonella Pathogenesis (1, max. 30) Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.

MICROM 540 Virology (3) The molecular biology, transmission, and pathogenesis of human viruses will be explored. In addition to general principles of virology, lectures and paper discussions will focus on specific human pathogens including HIV, herpesviruses, ebolaviruses, alphaviruses, and adenoviruses, among others. Recommended: one year of undergraduate cellular and molecular biology Offered: A, even years.

MICROM 553 Molecular Interactions of Bacteria with their Hosts (3) The processes bacteria employ to shape interactions with their hosts will be explored in molecular detail through selected examples in the literature. Prerequisite: One year of undergraduate cellular and molecular biology. ; recommended: An introductory course in microbiology is recommended. Offered: Sp, odd years.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

MICROM 555 Advanced Clinical Microbiology (2.5) Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Prerequisite: MICROM 443 and permission of instructor. Credit/no-credit only. Offered: AWSp.

MICROM 560 Research and Journal Club in Retrovirology (1, max. 30) Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.

MICROM 562 Oncogene and Retrovirus Research Seminar (1, max. 30) Weekly discussions of ongoing research related to retroviral replication, retroviral oncogenes and pathology. Prerequisite: graduate standing or permission of

instructor. Offered: AWSpS.

MICROM 585 Research in Cell and Molecular Biology (1, max. 30) Weekly research seminar. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 588 Research in Applied Microbiology (1, max. 30) Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 588; AWSpS.

MICROM 599 Research Presentations (2) Current research review. Credit/no-credit only.

MICROM 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

MICROM 650 Microbiology Clerkship in Scientific Teaching ([1-6]-, max. 15) The pedagogical requirement addressed by this course is direct experience in teaching undergraduate microbiology classes under the direct oversight and mentorship of regular course instructors. By the end of this course, the graduate student will have developed skills, abilities and insights as a science educator and communicator through the sustained support and guidance of the instructor of record. Prerequisite: PhD student standing. Offered: AWSpS.

MICROM 700 Master's Thesis (*-) Credit/no-credit only.

MICROM 800 Doctoral Dissertation (*-) Credit/no-credit only. Offered: AWSpS.

NEUROLOGICAL SURGERY

NEUR S 498 Undergraduate Thesis (*, max. 35) Offered: AWSpS.

NEUR S 499 Undergraduate Research (*, max. 35) Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1, max. 12) Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 655 P-Clinical Neurosurgery Clerkship- Spokane WA (1-8, max. 8) Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students. Offered: AWSpS.

NEUR S 665 P-Clinical Neurosurgery Clerkship (8) Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students.

NEUR S 675 Clinical Neurosurgery Clerkship - Billings, MT (8) Introductory exposure to neurosurgery and neurology giving students an opportunity to integrate and perform all the elements of being a physician. Students learn a practical form of the neurological exam to be used during the rest of their careers. Students expand their understanding of the basic physiology of the nervous system and explore critical concepts in the diagnosis, pathophysiology, and treatment of neurological disorders. Offered: AWSpS.

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8) Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. (Four weeks). Prerequisite: HUBIO 563. Offered: AWSpS.

NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

NEUROLOGY

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*, max. 25) Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

NEURL 505 P-Preceptorship in Neurology (1, max. 12) Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.

NEURL 536 Topics in Clinical Neurology (1) Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Credit/no-credit only. Offered: S.

NEURL 555 Frontiers in Neuroimmunology (1) Current concepts and developments in neuroimmunology. Prerequisite: either NBIO 301 or IMMUN 441. Credit/no-credit only. Offered: AWSpS.

NEURL 559 Neurobiology of Disease (3) Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURO 559/P BIO 559.

NEURL 598 P-Neurology Independent Study and Radiation (1-8, max. 8) Designed for medical students required to complete additional study related to the required Neurology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Offered: AWSpS.

NEURL 600 P-Independent Study or Research (*) Prerequisite: Instructor permission.

NEURL 630 P-Introduction to Neurology- Helena (8) Provides the medical student with a general understanding of basic clinical neurology at a clinical site in Helena, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 631 P- Introduction to Neurology - Cheyenne (8) Provides the medical student with a general understanding of basic clinical neurology, at Cheyenne Regional Medical Center Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 632 P-Introduction to Neurology - Casper, WY (8) Provides the medical student with a general understanding of basic clinical neurology in Casper, WY. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 633 P-Introduction to Neurology - Anchorage - Alaska Neurology Clinic (8) Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 634 P-Introduction to Neurology - Anchorage - ANMC (8) Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 635 P-Introduction to Neurology- Great Falls - Atlas Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at a clinical site in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 636 P-Introduction to Neurology-Kalispell (8) Provides the medical student with a general understanding of basic clinical neurology, at kalispell Regional Medical Center. For third- or fourth-year students. Prerequisite: Medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 637 P-Introduction to Neurology-Missoula (8) Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 638 P-Introduction to Neurology - Great Falls (8) Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 639 P-Introduction to Neurology - Billings Regional Neuroscience Clinic (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 640 P-Introduction to Neurology - Billings Clinic (8) Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 641 P-Introduction to Neurology- Bozeman (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Joshua Knappenberger in Bozeman, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 642 P-Introduction to Neurology- St. Lukes Boise (8) Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 643 P-Introduction to Neurology - Dr. Lyons, Boise (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 644 P-Introduction to Neurology - Idaho Falls EINA (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 645 P-Introduction to Neurology - Idaho Falls Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 647 P-Introduction to Neurology - Boise St. Alphonsus (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 648 P-Introduction to Neurology - Coeur D' Alene (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d' Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 649 P-Introduction to Neurology - Tacoma St. Joseph (8) Provides the medical student with a general understanding of basic clinical neurology in Tacoma, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 650 P-Introduction to Neurology - Lacey, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Lacey, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 651 P-Introduction to Neurology - Kirkland, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Kirkland, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 652 P-Introduction to Neurology - Spokane Rockwood Clinic (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 653 P-Introduction to Neurology - Spokane CMA, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics.

NEURL 654 P-Introduction to Neurology - Selkirk (8) Provides the medical student with a general understanding of basic clinical neurology at Selkirk Neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 655 P-Introduction to Neurology - Spokane (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 656 P-Introduction to Neurology - Wenatchee- Confluence Health (8) Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 657 P-Introduction to Neurology - Yakima (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 658 P-Introduction to Neurology - Olympia Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewood (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 660 P-Introduction to Neurology - Madigan (8) Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 661 P-Introduction to Neurology - Tacoma/Puyallup Multicare (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8) Provides the medical student with a general understanding of basic clinical neurology at Group

Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 664 P-Introduction to Neurology - Burien (8) Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 665 P-Introduction to Neurology- UWMC (8) Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 666 P-Introduction to Neurology - HMC (8) Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 667 P-Introduction to Neurology - VA (8) Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 668 P-Introduction to Neurology - Northwest Hospital (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 669 P-Introduction to Neurology - Virginia Mason (8) Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 670 P-Introduction to Neurology - Minor and James (8) Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 671 P-Introduction to Neurology - Swedish (8) Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 673 P-Introduction to Neurology - Renton, Valley Medical Center (8) Provides the medical student with a general understanding of basic clinical neurology in Renton, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics.

NEURL 674 P-Introduction to Neurology- Bellingham (8) Provides the medical student with a general understanding of basic clinical neurology at Peace Health in Bellingham, Washington. Prerequisite: Completion of one required clerkship in medicine, family medicine, surgery or pediatrics. Offered: AWSpS.

NEURL 675 P-Introduction to Neurology- Vancouver (8) Provides the medical student with a general understanding of basic clinical neurology in Vancouver, Washington. For third- or fourth-year students. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 681 P-Seizure Clinic Clerkship (2.5) Evaluation and follow-up of patients

with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

NEURL 685 Epilepsy and Clinical Electroencephalography (4/8, max. 8) Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.

NEURL 686 P-Clinical Neurology (8) Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

NEURL 687 Advanced Clerkship in Child Neurology (4, max. 8) Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWSpS.

NEURL 688 Elective Clerkship in Child Neurology (8) Fundamentals of the neurological history and exam for children. As part of a team at Seattle Children's Hospital, students have opportunity for both outpatient and inpatient experiences. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 697 Neurology Away Elective (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean's office at least one month prior to preregistration. Prerequisite: permission of department adviser. Offered: AWSpS.

NEURL 699 WWAMI Neurology Special Assignment Elective (4/8, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of adviser. Offered: AWSpS.

OBSTETRICS AND GYNECOLOGY

OB GYN 498 Undergraduate Thesis (*, max. 30) By arrangement.

OB GYN 499 Undergraduate Research (*, max. 30)

OB GYN 505 P-OB GYN Preceptorship (1, max. 12) Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

OB GYN 551 Perinatal Care Elective (1) Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSpS.

OB GYN 579 P-Obstetric and Gynecologic Investigation (*) The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

OB GYN 598 P-OB/GYN Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Obstetrics and Gynecology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

OB GYN 610 P-Introduction to Obstetrics and Gynecology - Twin Falls, ID (1-12, max. 12) Provides experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. Offered: AWSpS.

OB GYN 618 P-Advanced Rural Obstetrics and Gynecology - Prosser, WA (8) Clerkship focused on the care of female patients in a rural setting, in which ancillary support is limited. Students have advanced responsibilities for patient care to function close to the level of an intern during this experience. Students learn how to facilitate care within the constraints of a rural environment and how to leverage available resources. Prerequisite: completion of all required patient care phase clerkships. Offered: AWSpS.

OB GYN 619 P-Advanced Gynecology - Spokane, WA (8) Multi-specialty advanced patient care clerkship designed for fourth-year obstetrics and gynecology residency-bound medical students. Immersive exposure to the subspecialties of minimally invasive gynecologic surgery, gynecologic oncology, reproductive endocrinology and infertility, complex family planning, and urogynecology. Prerequisite: completion of all required patient care phase clerkships. Offered: AWSpS.

OB GYN 620 P - Introduction to Obstetrics and Gynecology- Meridian, ID (12) This 6 week clerkship course is an introductory experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. The obstetrical conditions and gynecological problems commonly encountered by the physician provide the primary focus for this clerkship experience, but knowledge of serious, less common conditions, is also required.

OB GYN 621 Introduction to Obstetrics and Gynecology - Rexburg, ID (12) Introductory clerkship in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Prerequisite: successful completion of School of Medicine Foundations Phase. Offered: AWSpS.

OB GYN 622 Introduction to Obstetrics and Gynecology - Whitefish, MT (12) Introductory clerkship in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Prerequisite: successful completion of School of Medicine Foundations Phase. Offered: AWSpS.

OB GYN 624 P-Introduction to Obstetrics and Gynecology - ANMC, Anchorage AK (1-12, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Offered: AWSpS.

OB GYN 625 P-Introduction to Obstetrics and Gynecology - Rural Sites (1-12, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Offered: AWSpS.

OB GYN 626 Maternal Fetal Medicine Elective - Missoula, MT (4) Provides clinical training experiences and hands-on education within a Maternal Fetal Medicine (MFM) clinic serving non-urban areas throughout western Montana and eastern Idaho. Students integrate into the MFM service as a member of the team, participating in all aspects of the MFM practice, offering both inpatient and outpatient experiences. Rural outreach experiences may be available. Offered: AWSpS.

OB GYN 627 Reproductive Endocrinology and Infertility Elective (8) The rotation will provide the 4th year student clerk multidisciplinary exposure to the full spectrum of reproductive endocrinology and infertility in a variety of clinical settings including at comprehensive university-based IVF center, county hospital based clinic, cancer center and sub specialty clinic in pediatric and adolescent gynecology. Opportunity to participate on scheduled reproductive surgeries at

URC, UWMC, HMC, and SMH. Prerequisite: All required patient care phase electives.

OB GYN 628 P- Gynecology Elective (4) This elective is designed to introduce 4th year medical students to first trimester abortion care and family planning through direct involvement under the supervision of family medicine and OBGYN providers. Please contact obgyn administrator for more information and permission to take this elective. Prerequisite: OBGYN required clerkship. Offered: AWSpS.

OB GYN 629 P- Introduction to Obstetrics and Gynecology- Wasilla, AK (1-24, max. 25) Clerkship equivalent to OB GYN 649 Fairbanks, AK Offered: AWSpS.

OB GYN 630 P-WRITE Obstetrics and Gynecology Clinical Clerkship (6-12) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: Completion of Foundations Phase curriculum; acceptance to the WRITE program. Offered: AWSpS.

OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12) See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12) See OB GYN 665.

OB GYN 633 P-Introduction to Obstetrics and Gynecology- Spokane Rockwood (1-24, max. 25) Clerkship equivalent to OB GYN 665 offered in Spokane, WA. (Six weeks, full time) Offered: AWSpS.

OB GYN 634 P- Introduction to Obstetrics and Gynecology- Olympia LIC (1-12) Clerkship equivalent of OB GYN 665, but held in Olympia, WA Offered: AWSpS.

OB GYN 635 P-Introduction to Obstetrics and Gynecology - Great Falls, MT (1-12) Clerkship equivalent to OBGYN 665, but offered in Great Falls, MT. Offered: AWSpS.

OB GYN 636 P- Introduction to Obstetrics and Gynecology Clerkship - Butte, MT (1-12) Clerkship equivalent to OBGYN 650 on Kalispell, MT.

OB GYN 637 P- Introduction of Obstetrics and Gynecology - Hamilton, MT (1-12) Clerkship equivalent to OB GYN 665 offered in Hamilton, MT. Offered: AWSpS.

OB GYN 638 P-Gynecology Planned Parenthood - Washington (4) Clinical elective in family planning at a Planned Parenthood site in Spokane, Yakima, Ellensburg or Kennewick, WA. Exposure to contraceptive and options counseling. Experience in evaluating patients for sexually transmitted infections and appropriate therapies. May participate in first trimester ultrasound, medical and surgical abortions. Prerequisite: basic OB GYN clerkship. Offered: AWSpS.

OB GYN 639 P-Introduction to Obstetrics and Gynecology, St. Alphonsus (*, max. 12) See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

OB GYN 640 P- Introduction to Obstetrics and Gynecology- Pullman/Moscow (12) Clerkship equivalent to OB GY 668 Spokane, WA Offered: AWSpS.

OB GYN 641 P- Introduction to Obstetrics and Gynecology- Nampa, ID (1-24, max. 25) This 6 week clerkship course is an introductory experience in the provision of comprehensive medical care and counseling services to adult and adolescent female patients. The obstetrical conditions and gynecological problems commonly encountered by the physician provide the primary focus for this clerkship experience, but knowledge of serious, less common conditions, is also required. Offered: AWSpS.

OB GYN 642 P- Gynecology Elective (4) 4th year medical student OBGYN elective in Cody, WY. Students will be rotating in private physician office. Student's weeks will consist of a combination of clinic and doing surgeries. They will be learning how to care for women of all ages from young women - through menopause - into geriatric. Please contact OBGYN clerkship administrator for permission to take this course. Prerequisite: OBGYN required clerkship. Offered: AWSpS.

OB GYN 643 P-Introduction to Obstetrics and Gynecology- Powell WY (*, max. 12) See OB GYN 665. Offered in Powell, WY. (6 weeks, full time.)

OB GYN 644 P-Introduction to Obstetrics and Gynecology - Gillette, WY (12)

General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 645 P-Introduction to Obstetrics and Gynecology - Sheridan, WY (1-24, max. 25)

General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 646 Introduction to Obstetrics and Gynecology - Rock Springs, WY (12)

Clerkship equivalent to OB GYN 665 offered in Rock Springs, WY. (Six weeks, full-time).

OB GYN 647 Introduction to Obstetrics and Gynecology - Nampa, ID (*, max. 12)

General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Offered in Nampa, ID. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565. Offered: AWSpS.

OB GYN 648 P- Introduction to Obstetrics and Gynecology- Pocatelo, ID (12)

Clerkship equivalent to OBGYN 665 but offered in Pocatelo, ID. Offered: AWSpS.

OB GYN 649 P-Introduction to Obstetrics and Gynecology- Fairbanks,TVC (1-12)

Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Offered: AWSpS.

OB GYN 650 P-Introduction to Obstetrics and Gynecology - Kalispell, MT (1-24, max. 25)

General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 651 P-Introduction to Obstetrics and Gynecology - Helena, MT (1-24, max. 25)

General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 652 P-Introduction to Obstetrics and Gynecology - Bozeman, MT -

Deaconess Women's Specialists (1-24, max. 25) See OB GYN 665 for description. Located at Deaconess Women's Specialists in Bozeman, MT. (six weeks. Limit: one student).

OB GYN 653 Introduction to Obstetrics and Gynecology - Ellensburg, WA (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full-time). Prerequisite: HUBIO series; 3rd Year medical students.

OB GYN 654 Introduction to Obstetrics and Gynecology - Moses Lake, WA (12)

Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full time).

OB GYN 656 P-Introduction to Obstetrics and Gynecology - Wasilla (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Wasilla, AK. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 657 P-Introduction to Obstetrics and Gynecology - Lander (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Lander, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 659 P-Introduction to Obstetrics and Gynecology - Cody (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Cody, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 660 P-Introduction to Obstetrics and Gynecology - Billings, St. Vincent (*, max. 12)

Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private physicians' offices. Prerequisite: third- year medical student after completion of HUBIO series.

OB GYN 663 P-Introduction to Obstetrics and Gynecology - Wenatchee (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Wenatchee, WA. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 664 P-Introduction to Obstetrics and Gynecology - GH Tacoma (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Tacoma, WA. Includes experience in several private physicians' offices. (six weeks, full time) Prerequisite: HUBIO series; third-year medical student status.

OB GYN 665 P-Introduction to Obstetrics and Gynecology - Seattle WA (*, max. 25)

Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Prerequisite: HUBIO 565. Offered: AWSpS.

OB GYN 666 P-Introduction to Obstetrics and Gynecology - Boise (*, max. 12)

Clerkship equivalent to 665 offered in Boise, Idaho (WWAMI). Includes experience in several private physician offices. (Six weeks. Limit: one student. Not offered summer quarter). Prerequisite: HUBIO 565.

OB GYN 667 P-Introduction to Obstetrics and Gynecology - Madigan (*, max. 12)

Clerkship equivalent to OB GYN 665 offered at Madigan Army Medical Center, Tacoma. (Six weeks. Limit: three students). Prerequisite: HUBIO 565.

OB GYN 668 P-Introduction to Obstetrics and Gynecology - Spokane (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.

OB GYN 669 P-Introduction to Obstetrics and Gynecology - Swedish (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered at Swedish Hospital Medical Center. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 670 P-Introduction to Obstetrics and Gynecology - GH-Central (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.

OB GYN 671 P-Introduction to Obstetrics and Gynecology - Anchorage (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.

OB GYN 672 P-Introduction to Obstetrics and Gynecology - GH-East (1-24, max. 25)

Clerkship equivalent to OB GYN 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 676 P-Introduction to Obstetrics and Gynecology - Missoula (12)

Clerkship equivalent to OB GYN 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 677 P-Introduction to Obstetrics and Gynecology - Rock Springs (12)

Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.

OB GYN 678 P-Introduction to Obstetrics and Gynecology - Billings (*, max. 12)

Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 679 P-Introduction to Obstetrics and Gynecology - Cheyenne (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cheyenne, WY. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 681 P-Gynecological Oncology Subspecialty (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Limit: two students each four weeks). Prerequisite: basic OB GYN clerkship.

OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks).

OB GYN 683 P-Gynecological Oncology Subspecialty - Boise, ID (4/8, max. 8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Two- and four-week options). Prerequisite: basic OB GYN clerkship. Offered: AWSpS.

OB GYN 685 P-Subspecialty Gynecology - UWMC (8) Specialty areas in gynecology including urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Patients in both outpatient and inpatient setting, follow patients to operating room and fully participate in their hospital care. Consult on inpatients and emergency room visits. Exposes interested students to the breadth and depth of benign gynecologic subspecialty areas. (Limit: one student/four weeks.)

OB GYN 686 P-Introduction to Obstetrics and Gynecology - Yakima (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Yakima (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 687 P-Introduction to Obstetrics and Gynecology - Fairbanks (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 689 P-Introduction to Obstetrics and Gynecology - Havre (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Havre, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 690 P-Introduction to Obstetrics and Gynecology - Sandpoint (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Sandpoint, ID. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 691 P-Introduction to Obstetrics and Gynecology - Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 692 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Bozeman OB/GYN (*, max. 12) Clerkship equivalent to OB GYN 665 offered Bozeman, MT. Includes experience in several private physician offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 693 P-Introduction to Obstetrics and Gynecology - Valley Medical Center (*, max. 12) Clerkship equivalent to OB GYN 665 offered at Valley Medical Center. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.

OB GYN 695 P-Introduction to Obstetrics and Gynecology - Tri Cities (*, max. 12) Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite:

HUBIO 565.

OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24) By arrangement, for qualified students, special clerkship or research opportunities are sometimes made available at other institutions. Prospective students obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located inside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

OPHTHALMOLOGY

OPHTH 498 Undergraduate Thesis (*, max. 25) Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.

OPHTH 499 Undergraduate Research (*, max. 25) Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

OPHTH 501 P-Ophthalmology Preceptorship (1, max. 12) Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSpS.

OPHTH 600 Independent Study or Research (*) Prerequisite: Permission of instructor.

OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8, max. 12) Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4) Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of an ophthalmology clerkship. Offered: AWSpS.

OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4) Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 686 P-Ophthalmology Clerkship - Kaiser Permanente (4) Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Kaiser Permanente ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 688 P-Ophthalmology Clerkship - Anchorage (4-8) Two or four week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 690 P-Ophthalmology Clerkship - Missoula (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 691 P-Ophthalmology Clerkship - Nampa (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 692 P - Ophthalmology Clerkship - Bozeman (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Offered: AWSpS.

OPHTH 695 P-Ophthalmology Advanced Clerkship - HMC (4) Students gain advanced experience in the diagnosis, evaluation, and treatment of inpatient and emergency department ophthalmology consults, including emergency surgeries. Prerequisite: completion of human biology series; prior ophthalmology clerkship. Offered: AWSpS.

OPHTH 697 P-Ophthalmology Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

ORTHOPEDICS

ORTHP 498 Undergraduate Thesis (*, max. 30) Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

ORTHP 499 Undergraduate Research (*, max. 90) Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

ORTHP 585 P-Sports Medicine (2) Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Offered: AWSpS.

ORTHP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Offered: AWSpS.

ORTHP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8) Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students.

ORTHP 662 P-General Orthopaedic Surgery-Casper, WY (8) Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: Third or fourth year medical student.

ORTHP 668 P-Pediatric Orthopaedics - Spokane (*, max. 8) Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.

ORTHP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8) Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Offered: AWSpS.

ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4) Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. (Two weeks, full-time). Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 676 P-Pediatric Orthopaedics - Seattle Children's (*, max. 8) Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.

ORTHP 677 P-Musculoskeletal Trauma (*, max. 8) Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Offered: AWSpS.

ORTHP 678 P-Musculoskeletal Oncology (8/12) In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

ORTHP 680 P-General Orthopaedic Clerkship - VAMC (*, max. 8) Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

ORTHP 681 P- Sports Medicine Orthopaedic Clerkship (8) Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

ORTHP 682 P-Outpatient Orthopaedics (8) Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.

ORTHP 684 P-Disorders of the Spine (8) Evaluation and assessment strategies of spinal disorders for patients of all ages and wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Outpatient, surgical, and conference-based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management. Offered: AWSpS.

ORTHP 685 P-Adult Reconstruction: Total Joint Service (8) Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscope. Offered: AWSpS.

ORTHP 686 Orthopaedics: Lower Extremity/Foot and Ankle - Boise, ID (1-8, max. 8) Orthopaedic clinical clerkship in Boise, ID. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care focused on the treatment and rehabilitation of foot and ankle injuries. Students work primarily in one subspecialty area (foot and ankle) and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

ORTHP 687 P-Shoulder and Elbow (8) Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

ORTHP 688 P-Sports Medicine - Idaho (8) Orthopedic clinical clerkship in sports medicine. Students participate in care of patients with sports-related injuries. Emphasis on physical examination and determining appropriate operative interventions and rehabilitation. Offered: AWSpS.

ORTHP 697 P-Orthopaedic External Elective (*, max. 24) Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 699 P-WWAMI Orthopedics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

OTOLARYNGOLOGY -- HEAD & NECK SURGERY

OTOHN 498 Undergraduate Thesis (*, max. 35) Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*, max. 35) Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 501 P-Preceptorship in Otolaryngology - Head and Neck Surgery (1, max. 12) One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.

OTOHN 600 Independent Study or Research (1-3, max. 24) Independent study or research in otolaryngology conducted under the direction of one or more instructors. Prerequisite: permission of department and sponsoring faculty member. Offered: AWSpS.

OTOHN 670 Otolaryngology - Head and Neck Surgery - Subinternship (*, max. 16) Provides medical students exposure to an immersive educational experience in otolaryngology. Sub-interns function as members of the surgical team, participating in outpatient clinics, inpatient care, emergency procedures, and the operating room. Prerequisite: clinical rotations in General Surgery and Internal Medicine.

OTOHN 675 P-Otolaryngology Clerkship Bozeman, MT (4-8, max. 8) Surgical subspecialty of otolaryngology-head and neck surgery is structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: third or fourth year medical student; recommended: patient-care courses in internal medicine or surgery. Offered: AWSpS.

OTOHN 676 P-Otolaryngology Clerkship Jackson Hole WY (4-8, max. 8) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: Completion of Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 677 P-Otolaryngology Clerkship Harborview (4, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: Completion of Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 679 P-Otolaryngology - Head and Neck Surgery Clerkship - Missoula (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 680 P-Otolaryngology - Head and Neck Surgery Clerkship - UWMC (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Rotation at UWMC. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 681 APC -Otolaryngology Clerkship - Harborview (8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: Internal Medicine or Surgery required third year clerkship is strongly recommended, third or fourth year medical student standing. Offered: AWSpS.

OTOHN 682 P-Otolaryngology - Head and Neck Surgery Clerkship - VA (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 683 P-Otolaryngology - Head and Neck Surgery Clerkship - Madigan (*, max. 8) Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. (Two or four weeks, full-time). Prerequisite: completion of human biology series. Offered: AWSpS.

OTOHN 684 P-Otolaryngology - Head and Neck Surgery Clerkship - Seattle Children's (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 685 P-Otolaryngology - Head and Neck Surgery Clerkship - Boise (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 686 P-Otolaryngology - Head and Neck Surgery Clerkship - Greater Seattle Private Practice (4) Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of

course director. Offered: AWSpS.

OTOHN 687 P-Otolaryngology - Head and Neck Surgery Clerkship - Spokane (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 688 P-Otolaryngology - Head and Neck Surgery Clerkship - Anchorage (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 689 P-Otolaryngology - Head and Neck Surgery Clerkship - Laramie (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: Human biology series. Offered: AWSpS.

OTOHN 697 P-Otolaryngology - Head and Neck Surgery - Away Externship (*, max. 8) By specific arrangement. Special clerkship, externship, or research opportunities are at times made available at institutions other than the University of Washington. Prospective students obtain a special assignment form from the dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Offered: AWSpS.

OTOHN 699 P-Otolaryngology - Head and Neck Surgery Clerkship - WWAMI (4/8, max. 8) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

PEDIATRICS

PEDS 498 Undergraduate Thesis (*, max. 35) For medical students. Offered: AWSpS.

PEDS 499 Undergraduate Research (*, max. 35) Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

PEDS 505 P-Preceptorship in Pediatrics (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSpS.

PEDS 513 Scientific Investigation in Pediatric Medicine (1) Faculty Investigators in the Department of Pediatrics will lecture on the general biology of their research area and its relevance to understanding pediatric disease and developing therapies. Given the varied nature of research represented in the Department of Pediatrics, the course will be wide-ranging and include basic science and clinical/translational approaches. Each participating investigator will give one 1-hour presentation. Offered: AWSpS.

PEDS 530 P-Homeless Youth and Their Medical Care (1) Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no-credit only. Offered: W.

PEDS 562 Ethical Issues in Pediatrics (3) Provides a survey of contemporary ethical issues that arise in the clinical and research environment when children are involved, including the role of children and adolescents in decision-making, the limits of parental decision-making authority, and issues related to genetic testing, transplantation, research, and public health. Offered: jointly with B H 562; A.

PEDS 598 P-Pediatrics Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Pediatrics Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.

PEDS 600 Independent Study or Research (*) Facilitates and promotes mentored independent study/scholarship related to the care of children. Students participate in projects that promote individual, self-directed and creative scholarly activity with appropriate supervision, oversight, and mentorship with an emphasis on the process of scholarship.

PEDS 601 Rural Longitudinal Integrated Clerkship - Inpatient Pediatrics (6) Clerkship designed to provide a comprehensive overview of the approach to care of children and their families. Integrates care of patients across the lifecycle in rural practice environments. Offered: AWSpS.

PEDS 607 Pediatric Rheumatology Elective - Boise (4, max. 8) Clinical clerkship where students gain exposure to the work-up, diagnosis, and management of rheumatologic diseases under the supervision of a faculty member in an outpatient clinic and inpatient consult service. Exposure to a wide degree of pathology from inflammatory and non-inflammatory causes. Students develop familiarity with differentiating non-concerning from concerning symptoms. Offered: AWSpS.

PEDS 609 Indian Healthcare Clerkship (8, max. 16) Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

PEDS 610 Traditional Indian Medicine (8, max. 24) Students experience how Western physicians collaborate with traditional Indian healers (and vice versa) to best care for American Indian and Alaska Native patients. Prerequisite: UCONJ 530; Indian Health Pathway declaration; and advanced permission from Indian Health Pathway Program Manager. Offered: AWSpS.

PEDS 611 P-UW Youth Clinic (1, max. 2) Participation in a free clinic for out-of-home youth, at either the ROOTS Young Adult Shelter in the University District or Nexus Youth and Families in Auburn. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: one student.) Prerequisite: completion of Internal Medicine or Pediatrics Patient Care required clerkships. Offered: AWSpS.

PEDS 612 Pediatric Intensive Care - HMC (8) Elective in Pediatric Intensive Care at Harborview Medical Center. Open to Explore and Focus medical students who have completed their Core Pediatrics Rotation. Students will be expected to manage patients with the supervision of the Pediatric Critical Care attending or fellow. Students will have the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive care setting. Prerequisite: Explore and Focus standing, completion of Core Pediatrics Rotation. Offered: AWSpS.

PEDS 613 Pediatric Gastroenterology (8) Fourth-year medical students will see clinical pediatric gastrointestinal problems under close faculty supervision. They will participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. Prerequisite: Completion of Peds, IM and Surgery required clerkships Offered: AWSpS.

PEDS 614 Advocacy and Community Partnerships Elective (8) Month-long elective rotation that provides medical students the opportunity to learn about and practice health advocacy. Students develop a basic understanding of social determinants of health, learn about health policy, participate in legislative office visits, and work directly with community agencies on a mutually agreeable project. Offered: AWSpS.

PEDS 615 Child Abuse Pediatric Clerkship - Seattle, WA (8) Pediatric clerkship designed to prepare medical students entering pediatrics and other primary fields with the skills to manage pediatric child abuse cases. Course teaches medical students skills to address discomfort in diagnosing and managing child abuse in clinical practice. Prerequisite: Explore and Focus Phase (fourth-year) medical students who have completed their core pediatrics rotation. Offered: AWSpS.

PEDS 617 Advanced Inpatient Pediatrics- Coeur d'Alene (8, max. 16) During this four-week clinical inpatient experience, students function at the intern level, taking primary responsibility in the inpatient setting with attending supervision. Goals include refining core clinical skills, expanding medical knowledge, improving clinical reasoning, improving understanding of childhood growth and development, effective patient and family communication, and being an integral part of the clinical team. Offered: AWSpS.

PEDS 618 Advanced Pediatric Rheumatology - Boise (8, max. 16) Students gain exposure to the work-up, diagnosis, and management of rheumatologic diseases under the supervision of a faculty member in an outpatient clinic and inpatient consult service. Exposure to a wide degree of pathology from inflammatory and non-inflammatory causes. Students develop familiarity with differentiating non-concerning from concerning symptoms. Offered: AWSpS.

PEDS 620 Pediatric Sub-Specialty Clinics-Billings (4, max. 8) The student will choose 2 weeks of specialty clinics based on student interest and availability of faculty preceptors at the time of the rotation. Available clinics include: Pediatric Cardiology, Pulmonary, Gastroenterology and Neurology. The maximum time spent with one specialty is 2 weeks; the minimum is one week. Students will evaluate both patients seen in consultation and patients returning for on going care for existing problems. Prerequisite: completion of Pediatrics Clinical Clerkship. Offered: AWSpS.

PEDS 623 Pediatrics Child Abuse - Spokane, WA (4, max. 8) Exposes future clinicians to the most common issues relating to child abuse and neglect. (Limit: one student). Prerequisite: fourth-year medical students who have completed their core pediatrics rotation; permission of department. Offered: AWSpS.

PEDS 624 Pediatric Emergency Medicine - Spokane (8) Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; by departmental permission. Offered: AWSpS.

PEDS 625 Pediatric Emergency Medicine (8) Elective in Pediatric Emergency Department at Seattle Children's Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: fourth- year medical students. Offered: AWSpS.

PEDS 628 P-Pediatric Allergy and Immunology - Missoula (*, max. 24) The clinic involves seeing patients with allergy asthma and immunology disorders, such as seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, food allergies and more. Focus on obtaining a detailed history, physical exam and formulating a personalized management plan for patients. Training and interpretation of major procedures - allergen skin, patch and pulmonary function testing. Prerequisite: PEDS core clerkship; departmental permission Offered: AWSpS.

PEDS 629 Neonatal Pediatrics- Missoula, MT (4, max. 24) Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Offered: AWSpS.

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665 , inpatient only; acceptance in the WRITE program.

PEDS 631 LIC Pediatrics Clinical Clerkship (12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

PEDS 635 Pediatric Cardiology - Boise, ID (4/8, max. 24) Emphasis on physical examination skills. Application of fundamental anatomy and physiology to analyze a variety of cardiovascular situations, normal and abnormal, applicable to any medical field, including congenital heart disease. Independent reading and analysis of relevant anatomy and physiology for one-on-one discussion. Clinic and catheterization laboratory each week. (Two or four week rotation. Limit: one student). Prerequisite: permission of department. Offered: AWSpS.

PEDS 636 Pediatric Cardiology - Spokane (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 637 Pediatric Cardiology - Anchorage (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 638 Pediatric Cardiology - Missoula (4, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 640 Pediatric Gastroenterology - Boise (4, max. 24) Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. (Limit: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 641 Pediatric General Clerkship - Gillette, WY (12) Offers a comprehensive overview of the approach for providing care to children and their families. Explores the range of reasons children seek medical care, from well-child visits to acute medical problems. Students gain experience in inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 642 Pediatric Clinical Clerkship - Sheridan, WY (12) Offers a comprehensive overview of the approach for providing care to children and their families. Explores the range of reasons children seek medical care, from well-child visits to acute medical problems. Students gain experience in inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 643 Pediatric General Clerkship - Spokane Kaiser (1-24, max. 25) The core pediatric clerkship is designed to provide a comprehensive overview of the approach to the care of children and their families. In addition, explores the range of reasons children seek medical care, from well child visits to acute medical problems in both inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 644 Pediatric General Clerkship - Wasilla, AK (1-24, max. 25) General introductory pediatric clerkship. Student will split time in hospital setting, outpatient department, clinic, or private office. Open to all third-and fourth year students. (Six weeks, full-time. Limit per rotation: one student). Offered: AWSpS.

PEDS 645 Pediatric General Clerkship - Kalispell (1-24, max. 25) General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third and fourth year student. Offered: AWSpS.

PEDS 646 Pediatric General Clerkship - Walla Walla, WA (12) Offers a comprehensive overview of the approach for providing care to children and their families. Explores the range of reasons children seek medical care, from well-child visits to acute medical problems. Students gain experience in inpatient and outpatient settings and the ongoing management of chronic illnesses. Offered: AWSpS.

PEDS 647 Pediatric General Clerkship- Lewiston, ID (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time) Offered: AWSpS.

PEDS 648 Pediatric General Clerkship - Everett, WA (1-24, max. 25) General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full-time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 650 Pediatric General Clerkship - Moses Lake, WA (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 651 Pediatric General Clerkship - Bozeman, MT (1-24, max. 25) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 652 Pediatric General Clerkship - Idaho Falls, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 653 Pediatric General Clerkship - Helena, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in Helena, MT.

PEDS 655 Pediatric General Clerkship - Jackson, WY (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 656 Pediatric General Clerkship - Wenatchee (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 657 P-Pediatric General Clerkship - Missoula (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one or two students.) Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 658 Pediatric General Clerkship - Boise (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 659 Pediatric General Clerkship - Billings, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit: per rotation: one student.) Offered: AWSpS.

PEDS 660 Pediatric General Clerkship - Cheyenne, WY (*, max. 24) Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 661 Pediatric General Clerkship - Anchorage (*, max. 24) General

introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: ten students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 667 Pediatric General Clerkship - Madigan (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24) Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: one or two students). Prerequisite: PEDS and OB GYN core clerkships. Offered: AWSpS.

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.

PEDS 671 Pediatric Endocrinology (*, max. 24) Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, inpatient endocrine rounds, and a variety of conferences at Seattle Children's Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 672 P-Office Practice - Spokane (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 673 P-Office Practice (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24) Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 675 P-Clinical Complementary and Integrative Medicine (4/8, max. 8) Clinical rotation for students interested in Complementary and Integrative Medicine (CIM). Students arrange clinical placements with selected CIM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Students arrange their own schedules and must do so at least four weeks in advance of the rotation. (Limit per rotation: one or two students). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 677 P-Pediatric Intensive Care (8) Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive-care setting. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.

PEDS 679 P-Clinical Problems in Developmental Disabilities (4/8, max. 16) Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per rotation: one student). Offered: AWSpS.

PEDS 681 P-Medical Genetics Clerkship (8, max. 24) Clinical clerkship with a focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Limit per rotation: one student). Offered: AWSpS.

PEDS 683 P-Pediatric Nephrology (8) Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: one student). Prerequisite: third- or fourth-year medical student; PEDS and MED core clerkships; departmental permission. Offered: AWSpS.

PEDS 684 P-Pediatric Pulmonary Medicine (8) Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourth-year medical student standing. Offered: AWSpS.

PEDS 685 P-Pediatric Inpatient Hematology and Oncology (8, max. 24) Inpatient rotation with one-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 686 P-Pediatric Cardiology (*, max. 24) Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly

clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 687 Neonatal Pediatric Clerkship (4) Offered: AWSpS.

PEDS 688 Pediatric Rheumatology (8) Exposes students to a wide range of pediatric rheumatologic diseases and provides them with the opportunity to evaluate new patients, help work up and manage inpatients with complex multisystem disease, and learn key elements of evaluation and treatment of childhood rheumatic diseases. Open to 4th year medical students. Prerequisite: completion of core pediatrics rotation; interest in rheumatology.

PEDS 689 P-Advanced Rural Pediatrics - Ft. Washakie, WY (8) Student functions at the sub-intern level to care for patients with acute pediatric illness, provide well child care, and provide follow up care to patients seen in the newborn nursery, Level II Neonatal ICU, hospitalizations, and previous clinic visits. Students interested should make arrangements well in advance of registration. Prerequisite: required clerkship in Pediatrics, Obstetrics and Gynecology, Internal Medicine, and Surgery.

PEDS 690 Advanced Pediatric Clerkship - Boise (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at St. Lukes Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Seattle Children's. (Limit per rotation: three students). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Heart Children's Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 693 Advanced Pediatric Subinternship - Mary Bridge (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. (Limit per rotation: one student). Prerequisite: Core Clerkship in PEDS, OB/GYN, I-Med, Surgery; departmental permission.

PEDS 694 P-Pediatric Adolescent Medicine (8) Elective in Adolescent Medicine at Seattle Children's Hospital. Open to 4th year medical students who have completed their Core pediatrics Rotation. Students will be expected to manage patients with the supervision of attending physicians. Students will have the opportunity to manage adolescent patients in the outpatient setting and learn key elements of subspecialty care of adolescents.

PEDS 695 P-Pediatric Outpatient Hematology and Oncology (4) Outpatient rotation with one-on-one teaching plus two weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two weeks, full-time. Limit per rotation: one student). Offered: AWSpS.

PEDS 696 Pediatric Endocrinology (4) Offered: AWSpS.

PEDS 697 P-Pediatric Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from the Department of Pediatrics at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.

PEDS 698 Pediatric Boot Camp (4) Focuses on what is needed on day one of internship to care for children through hands-on experience, simulation, group problem solving, role-playing, didactics, and supplemental reading material. Emphasizes the acquisition and practice of core skills. Themes include communication, procedural competency, and medical decision making pertinent to both inpatient and outpatient pediatrics. (Two weeks.) Prerequisite: fourth-year standing; departmental approval. Offered: Sp.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.

PHARMACOLOGY

PHCOL 401 General Pharmacology I (2-4, max. 4) Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.

PHCOL 402 General Pharmacology II (3/4) General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

PHCOL 434 General Pharmacology (2) Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 435 General Pharmacology (2) Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

PHCOL 498 Undergraduate Thesis (*, max. 35) Offered: A.

PHCOL 499 Undergraduate Research (*, max. 35) Participation in departmental research projects. Offered: AWSpS.

PHCOL 501 Drug Discovery and Emerging Therapeutics (2) Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: A.

PHCOL 502 Signal Transduction from the Cell Membrane to the Nucleus (2) Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: jointly with CONJ 532; A.

PHCOL 503 Autonomic/Cardiovascular Pharmacology (2) Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

PHCOL 504 Neuropsychopharmacology (2) Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addiction. Lecture, group discussion, and analysis of recent research. Offered: W.

PHCOL 505 Endocrine Pharmacology (2) Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: Sp.

PHCOL 506 Immunopharmacology and Chemotherapeutics (2) Basic principles of immunology as applied to immunopharmacology. Current overview of cancer chemotherapy and antimicrobial chemotherapy. Lectures, group discussions, student presentations, and analysis of recent research. Prerequisite: coursework

in biochemistry and physiology. Offered: Sp.

PHCOL 507 Pharmacology Seminar (1, max. 30) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 514 Current Topics in Pharmacology (1, max. 30) Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 515 General Pharmacology Laboratory (*, max. 9) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4, max. 20) On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.

PHCOL 527 Advanced Drug Metabolism (2) Considerations of the enzymology and mechanisms of biotransformation and disposition of drugs and foreign compounds. Includes chemical and biochemical reaction mechanisms, enzyme induction mechanisms, kinetics of inhibition and activation, inter-individual differences in metabolism and bioactivation and toxicity. Prerequisite: MEDCH 529, PCEUT 502, or permission of instructor; recommended: knowledge of chemical and biochemical mechanisms; knowledge of enzyme kinetics; and knowledge of chemical and cellular toxicity. Offered: jointly with MEDCH 527; W.

PHCOL 529 Ion Channel Pharmacology (2) Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: A, odd years.

PHCOL 530 Neuronal Signaling Pathways (2) Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: W, even years.

PHCOL 531 Genetic Analysis of Signaling Systems (3) Introduction to classic model organisms including plants, yeast, slime mold, flies, worms, fish, mice, and humans and a discussion of their use in current signal transduction research. A major focus will also be on developing a research grant proposal culminating in a mock study section in which student proposals are evaluated by their peers. Prerequisite: permission of instructor; recommended: molecular and cellular biology; and genetics. Offered: Sp, odd years.

PHCOL 534 Molecular Basis of Addictive Drug Action (2) Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: A, even years.

PHCOL 535 Transcriptional Control in Human Disease (3) Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: Sp, even years.

PHCOL 550 An Overview of Faculty Research (1) Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Prerequisite: first-year student standing in pharmacology. Credit/no-credit only. Offered: A.

PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases

(1) Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research.

Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 561 Molecular Properties of Ion Channels (1) Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 562 Molecular Basis for Motivated Behavior (1) Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 564 Cellular Regulation by Protein Kinases (1) Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 565 Intercellular Signaling in Development (1) Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to *Drosophila* segment polarity genes. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokinin Receptors (1) Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinin receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 569 Molecular Genetics of Potassium Channel Function (1) Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 571 Molecular Mechanisms of Neurosecretion (1) Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only.

PHCOL 572 Transcriptional Regulation of Growth Control Genes (1) Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only.

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: AWPSP.

PHCOL 575 Structural Biology of Ubiquitination (1) Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1) Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1) Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWPSP.

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWPSP.

PHCOL 579 Genetic Regulation of Emotional Behavior (1) Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWPSP.

PHCOL 580 Proteomics for Cellular Systems (1) Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge from existing literature with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWPSP.

PHCOL 581 Mitochondrial Signaling and Metabolism (1, max. 35) Trains graduate students on mitochondrial biology, signaling and metabolism by literature review and data analysis. Focuses on effective experimental design, scientific presentation and writing. Introduces basic and advanced laboratory techniques commonly used in mitochondrial biology. Offered: AWPSP.

PHCOL 582 Nuclear Architecture and the Noncoding Transcriptome (1, max. 35) Examines the biogenesis, regulation, and functional impact of mammalian nuclear architecture during differentiation and disease, emphasizing the interplay between chromatin biology and noncoding RNAs. Trains graduate students in rigorous approaches to experimental design and data analysis, novel technology design and implementation, effective scientific communication and writing, and comprehensive command of the literature. Offered: AWPSP.

PHCOL 583 Kinase Signaling in Neurodevelopment and Disease (1, max. 35) Explores fundamental concepts in kinase mediated signaling pathways and their regulation of neuronal structure and function during development and disease. Current genetic and proteomic approaches to investigate kinase pathways will be examined. Principles of experimental design, data interpretation and analysis will be discussed as graduate students present key findings of their individual research projects. Offered: AWPSP.

PHCOL 600 Independent Study or Research (*-) Pharmacology graduate students only. Credit/no-credit only. Offered: AWPSP.

PHCOL 700 Master's Thesis (*-) Pharmacology graduate students only. Credit/no-credit only. Offered: AWPSP.

PHCOL 800 Doctoral Dissertation (*-) Pharmacology graduate students only. Credit/no-credit only. Offered: AWPSP.

PHYSIOLOGY & BIOPHYSICS

P BIO 375 Human Physiology in Health and Disease (4) NSc Structure and function of the human body with emphasis on pathophysiology and disease treatment. Introduces the basic concept of homeostasis and focuses on the nervous system, musculoskeletal system, endocrine system, and immune system. Prerequisite: BIOL 220; and either CHEM 155 or CHEM 162; recommended: knowledge of basic cell biology and biochemistry. Offered: A.

P BIO 376 Human Physiology in Health and Disease (4) NSc Structure and function of the human body with emphasis on pathophysiology and disease treatment. Focuses on the digestive system, cardiovascular system, respiratory system, renal system, and reproductive system. Prerequisite: P BIO 375; recommended: knowledge of basic cell biology and biochemistry. Offered: W.

P BIO 498 Undergraduate Thesis (*, max. 35) Offered: AWSpS.

P BIO 499 Undergraduate Research (*, max. 35) Offered: AWSpS.

P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEURO 504.

P BIO 505 Human Physiology (4-) Provides an introduction to the study of human physiology. Covers the physiology of excitable cells, muscle physiology, renal physiology, gastrointestinal physiology, and the physiology of the central nervous system. Offered: A.

P BIO 506 Human Physiology (-4) Provides an introduction to the study of human physiology. Covers cardiovascular physiology, respiratory physiology, acid base balance, neuroendocrinology, and reproductive physiology. Prerequisite: P BIO 505, or equivalent with permission of instructor. Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15) Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

P BIO 509 Neuroendocrinology (3) Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Offered: jointly with NEURO 541; W, even years.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4) Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.

P BIO 519 Membrane and Muscle Biophysics Seminar (1) Lectures on current research topics in cell membrane function and muscle contraction with emphasis on presentation skills. Prerequisite: permission of instructor. Credit/no-credit only. Offered: Sp.

P BIO 520 Physiology Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3) Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: AWSpS.

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5) Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of

instructor. Credit/no-credit only.

P BIO 525 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

P BIO 526 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

P BIO 540 Molecular Mechanisms of Cardiac Remodeling and Heart Failure (1) The mini-course discusses recent progress on novel molecular mechanisms underlying cardiac hypertrophy, myocardial remodeling, and heart failure development. Novel methodologies in basic and translational cardiovascular research will also be discussed.

P BIO 545 Quantitative Methods in Neuroscience (3) Provides exposure to a variety of quantitative methods that are applicable to the study of the nervous system, and an intensive tutorial on mathematical methods and their application to neuroscience research. Format revolves around computer exercises and discussion of journal papers. Topics may include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection theory, and information theory. Offered: jointly with NEURO 545.

P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEURO 548; Sp, even years.

P BIO 550 Biophysics of Calcium Signaling (1) Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Offered: jointly with NEURO 550; Sp, odd years.

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEURO 554.

P BIO 555 Sensory Receptors (1) Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEURO 555.

P BIO 556 Axon Pathfinding Mechanisms (1) Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEURO 556.

P BIO 557 Ion Channel Gating (1) Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEURO 557.

P BIO 558 Concepts and Mechanisms in Mitosis (2) Examines how the mitotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or

classic papers from the primary literature.

P BIO 559 Neurobiology of Disease (3) Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/NEURO 559.

P BIO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with NEURO 561; Sp.

P BIO 600 Independent Study or Research (*-) Offered: AWSp.

P BIO 700 Master's Thesis (*-) Offered: AWSpS.

P BIO 800 Doctoral Dissertation (*-) Offered: AWSpS.

PSYCHIATRY & BEHAVIORAL SCIENCES

PBSCI 498 Undergraduate Thesis (*, max. 15) Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Offered: AWSpS.

PBSCI 499 Undergraduate Research (*, max. 15) Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Offered: AWSpS.

PBSCI 505 P-Psychiatry Preceptorship (1, max. 12) Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Offered: AWSp.

PBSCI 525 P-Psychiatry and the Law (3) Explores issues at the interface of law and psychiatry through didactic curriculum and research. Trainees develop an individualized research project with the assistance of their faculty mentors. Covers topics in civil and criminal forensic psychiatry, research ethics, research design, grantsmanship, and mental health law. Offered: Sp.

PBSCI 546 Psychiatric Epidemiology (3) Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with EPI 546.

PBSCI 580 Applied Research in Behavioral Health and Justice Policy (2) Direct experience working with community agencies to build research capacity. Emphasized child welfare, children's mental/behavioral health, and juvenile justice. Seminars cover translational research, community-based research, and communicating research to program and policy audiences. For graduate students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and public health students. Offered: AW.

PBSCI 598 P-Psychiatry Independent Study and Remediation (*, max. 8) Designed for medical students required to complete additional study related to the required Psychiatry Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

PBSCI 600 Research in Psychiatry ([1-15]-) Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry

Department. Faculty permission required.

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

PBSCI 631 P-Basic Psychiatry Clerkship - Juneau, AK (1-24, max. 25) Basic psychiatry clerkship in Juneau, Alaska. Fulfills graduation requirements for clerkship in psychiatry.

PBSCI 632 P-LIC Psychiatry Clinical Clerkship (1-12, max. 12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

PBSCI 633 P-Basic Psychiatry Clerkship - Billings Clinic (1-24, max. 25) Rotations on inpatient adult, child, and adolescent psychiatry, consultations, electroconvulsive therapy (ECT), crisis stabilization units (CSU), psychiatry teleconsultation (project ECHO). Involves a range of psychiatric disorders and substance abuse. Professional experiences working with nurse practitioners, physician assistants, and social workers. Drug screening prior to student rotation. Prerequisite: successful completion of School of Medicine 1st and 2nd year foundation courses. Offered: AWSpS.

PBSCI 634 P - Basic Psychiatry Clerkship - Fairbanks (12) Rotations on inpatient adult, child, and adolescent psychiatry, consultations, electroconvulsive therapy (ECT), crisis stabilization units (CSU), psychiatry teleconsultation (project ECHO). Involves a range of psychiatric disorders and substance abuse. Professional experiences working with nurse practitioners, physician assistants, and social workers. Drug screening prior to student rotation. Prerequisite: successful completion of School of Medicine first- and second -year foundation courses. Offered: AWSpS.

PBSCI 635 P-Basic Psychiatry Clerkship - Kalispell (1-24, max. 24) Basic psychiatry clerkship in Kalispell, MT. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 637 P-Basic Psychiatry Clerkship - Fairfax - Kirkland, WA (12) Basic psychiatry clerkship in Kirkland, Washington. Fulfills graduation requirements for clerkship in psychiatry.

PBSCI 639 P-Basic Psychiatry Clerkship - Olympia (12) Basic psychiatry clerkship at Olympia, WA. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 640 P-Basic Psychiatry Clerkship - Pocatello (12) Basic psychiatry clerkship at Pocatello, ID. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 641 P-Basic Psychiatry Clerkship - Orofino, ID (12) Basic psychiatry clerkship in Orofino, ID. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

PBSCI 642 P-Basic Psychiatry Clerkship - Blackfoot ID (1-24, max. 25) Students will spend most of their time in a State hospital with 29 geriatric, 90 adult, and 16 adolescent beds. Students participate as a member of a multidisciplinary team and have exposure to a wide range of psychiatric illnesses including mood, anxiety, psychotic, personality and substance use disorders. They have the opportunity to spend time in the outpt setting at the Fort Hall Indian Reservation and spend time with a psychopharmacologist. Prerequisite: Successful completion of School of Medicine 1st and 2nd year foundation courses. Offered: AWSpS.

PBSCI 649 P-Basic Psychiatry Clerkship-Eastern State Hospital-Spokane (1-24, max. 25) Basic psychiatry clerkship at Eastern State Hospital in Spokane, WA. Fulfills graduation requirement for clerkship in Psychiatry. Offered: AWSpS.

PBSCI 652 P-Basic Psychiatry Clerkship - Sheridan, WY (12) Basic psychiatry clerkship in Sheridan, WY. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

PBSCI 655 P-Basic Psychiatry Clerkship - Cheyenne (1-24, max. 25) Basic psychiatry clerkship in Cheyenne, WY. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 659 Basic Psychiatry Clerkship - Anaconda, MT (12) Basic psychiatry clerkship in Anaconda, MT. Fulfills graduation requirement for clerkship psychiatry.

PBSCI 660 P-Basis Psychiatry Clerkship-Bozeman (1-24, max. 25) Basic psychiatry clerkship in Bozeman, MT. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

PBSCI 661 P-Basic Psychiatry Clerkship - Helena (1-24, max. 25) Basic psychiatry clerkship in Helena, MT. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 662 P- Basic Psychiatry Clerkship - Missoula (1-24, max. 25) Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 663 P- Basic Psychiatry Clerkship - Billings (1-24, max. 25) Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience including consultations at the community mental health center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 665 P-Basic Clinical Clerkship (*, max. 24) Inpatient clerkship in psychiatry. Students have primary responsibility under direction of attending psychiatrists and residents for diagnosis and care of patients at UW Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12) Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.

PBSCI 667 P-Basic Psychiatry Clerkship - Boise (1-24, max. 25) Basic psychiatry clerkship at Veterans' Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 668 P-Psychiatry Clerkship - Spokane (1-24, max. 25) Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourth-year medical students.

PBSCI 669 P-Basic Psychiatry Clerkship - Casper, Wyoming (12) Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24) Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24) Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Includes evaluation of (non-financial)

decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry - Boise, VAMC (8/12) Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four weeks; visiting students interested in the Boise Psych Residency Track allowed.)

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24) Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 674 P-Elective in Therapeutic Communication (4-8) Students participate in diverse, interdisciplinary clinical encounters while being supervised by advanced psychotherapists. Includes multidisciplinary chemical dependency evaluations, cognitive assessments, cognitive-behavioral training, and hypnosis. Students complete a holistic patient assessment and are introduced to the complexities of therapeutic communication and improvement methods.

PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12) For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 677 P-Alcohol and Drug Treatment Clerkship - American Lake VA (8/12) Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six weeks, full-time).

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12) Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship.

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24) Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 681 Advanced Clerkship Inpatient Geropsychiatry - Sheridan WY (8) Experiences that provide focused training in geropsychiatry to 4th year medical students. Students are assigned to the inpatient geropsychiatry unit where they are directly involved with the admission, assessment, and treatment planning of older patients with behavioral health issues. The student is involved in all aspects of care including medication management and recommendation for group/milieu therapy. Offered: AWSpS.

PBSCI 682 P-Addiction Medicine - Rock Spring WY (4) Students identify, assess, diagnose, and treat addiction disorders in inpatient and outpatient settings through hospital rounds, inpatient hospital consults, and observation of intensive outpatient groups. 2 weeks.

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12) Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a

variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16) Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.

PBSCI 689 P-Subinternship in General Psychiatry - Spokane, WA (8, max. 16) Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family interventions, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full time.) Prerequisite: Satisfactory completion of required psychiatry clerkship, instructor permission. Offered: AWSpS.

PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (*, max. 24) Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24) Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 697 P-Psychiatry Special Electives (*, max. 24) By special arrangement, clerkships, externships, and research opportunities can be taken at other institutions. Students obtain permission from Dr. Combs before contacting the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

RADIATION ONCOLOGY

R ONC 499 Undergraduate Research (*, max. 51) Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.

R ONC 505 P-Radiation Oncology Preceptorship (1, max. 12) Students choose either to follow an attending physician through all aspects of radiation oncology including consults, follow-up, and treatment planning; or to follow a small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no-credit only.

R ONC 600 Independent Study or Research (*) Prerequisite: permission of department and faculty sponsor. Offered: AWSpS.

R ONC 601 Multidisciplinary Oncology Clerkship (4) Introduces students to interdisciplinary oncology care. Students follow patients through multidisciplinary clinic visits, attend tumor boards, and spend dedicated time with specialties like medical oncology, radiation oncology, pediatric oncology, surgical oncology, pathology, and radiology. Students see patients at the Seattle Cancer Care Alliance, Seattle Children's Hospital, and University of Washington Medical Center. Prerequisite: UW School of Medicine students must have completed the Foundations phase of the curriculum. Visiting students must have completed their preclinical curriculum and be in the clerkship phase of medical school.

Credit/no-credit only. Offered: AWSpS.

R ONC 694 P-Clinical Cancer Management - SCCA (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 695 P-Clinical Cancer Management - UWMC (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 697 P-Radiation Oncology Special Elective (*, max. 24) By specific arrangement for qualified students, special clerkship, externship, or research opportunities are made available at institutions other than the University of Washington. Students obtain a "special assignment" form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region, other than the University of Washington. Prerequisite: permission of department.

RADIOLOGY

RADGY 498 Undergraduate Thesis (*, max. 30) Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

RADGY 499 Undergraduate Research (*, max. 35) Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

RADGY 505 P-Preceptorship in Radiology (1-, max. 24) Opportunity for medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of diagnostic radiology, interventional radiology, or nuclear medicine, including clinical problems, the different relationships in clinic between physician and patient, and research aspects of the department. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 508 Physical Aspects of Medical Imaging (4) Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.

RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5) Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

RADGY 600 Independent Study or Research (*) Prerequisite: permission faculty sponsor. Offered: AWSpS.

RADGY 684 Interventional Radiology (8) Advanced Patient Care (APC) clerkship in interventional radiology (IR) for third- or fourth-year medical students strongly considering application to IR residency. Sites include UWMC, HMC, VA, and SCH. Prerequisite: permission of clerkship coordinator and director; recommended: RADGY 694. Offered: AWSpS.

RADGY 685 P-Introduction to Diagnostic Radiology - Bozeman (4/8) Overview of the sub-specialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

RADGY 686 P-Introduction to Diagnostic Radiology - Idaho Falls (4) Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

RADGY 687 P-Introduction to Diagnostic Radiology - Casper (4) Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)

RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4) Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 691 P-Introduction to Diagnostic Radiology - Alaska (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4/8) Full-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 694 P-Advanced Radiology Clerkship (4/8) Clerkship for third- or fourth-year medical students providing a more in depth experience in diagnostic or interventional radiology. Offered: AWSpS.

RADGY 695 P-Radiology Elective Clerkship (4/8, max. 8) Provides third- and fourth-year medical students an overview of the fields of diagnostic radiology and nuclear medicine. Students remotely spend time on clinical service in multiple sub-specialty areas of radiology. Lectures focus on the core subjects of radiation safety, contrast materials, and imaging examinations where radiology plays a key role in diagnosis and treatment. Offered: AWSpS.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 697 P-Radiology Special Electives (*, max. 24) Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

PROSTHETICS & ORTHOTICS

RHB PO 501 Prosthetics and Orthotics Skills (1) Emphasizes the development of psychomotor skills for the application of contemporary technology uses. Practice and discussion of material and design theories related to durability, weight, and ease of fabrication to encourage problem-solving skills for independent practice. Credit/no-credit only. Offered: A.

RHB PO 502 Professional and Practice Issues (1) Provides an overview of professional and practice issues in prosthetics and orthotics. Includes discussion of healthcare, policy, and systems; introduction to reimbursement, Medicare and Medicaid rules and regulations; practice management; bioethics; professional organizations; legislative issues; and medical ethics and compliance. Offered: Sp.

RHB PO 511 Upper Limb Prosthetics I (4) Covers upper limb prosthetics providing students with background knowledge of rehabilitation planning and principles of below elbow prosthetic management and prescription consideration. With direct patient contact, students assess and then formulate, implement, and evaluate a prosthetic treatment plan. Offered: A.

RHB PO 512 Upper Limb Prosthetics II (4) Integrates principles from upper limb prosthetics I, focusing on above-elbow prosthetic management. Encourages critical thinking and appropriate clinical decision-making through discussions and case study exercises that include body-powered, externally-powered, and hybrid systems. Offered: Sp.

RHB PO 515 Upper Limb Orthotics (3) Focuses on the integration of information acquired in previous foundational courses in anatomy and patient evaluation procedures with knowledge and skills of orthotic principles and theories related to upper limb orthotic interventions and patient management.

RHB PO 521 Lower Limb Prosthetics and Orthotics I: Theory and Application (5) Integrates prior core foundational knowledge (anatomy, kinesiology, medical science, gait analysis, patient evaluation procedures, and functional skills) with new knowledge of prosthetic and orthotic theory, patient evaluation, and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in developing intervention plans for individuals with lower limb dysfunction or amputation. Offered: S.

RHB PO 522 Lower Limb Prosthetics I: Clinical Practice (4) Explains and applies biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations below the knee. Students develop individualized treatment plans that demonstrate analysis of client needs, application of transtibial socket design, prescription principles, and components. Integrates knowledge of available research and protocols into the planning process. Offered: S.

RHB PO 523 Lower Limb Orthotics I: Clinical Practice (4) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: S.

RHB PO 524 Lower Limb Prosthetics and Orthotics II: Theory and Application (5) Integrates prior foundational knowledge acquired in RHB PO 521 with new knowledge and skills of prosthetic and orthotic theory and practice. Students actively analyze, evaluate, and synthesize principles and theories in the development of prosthetics/orthotics intervention plans for individuals with lower limb dysfunction or amputation. Prerequisite: RHB PO 521. Offered: A.

RHB PO 525 Lower Limb Prosthetics II: Clinical Practice (3) Includes advanced instruction in concepts and skills developed in Lower Limb Prosthetics I. Offered: A.

RHB PO 526 Lower Limb Orthotics II: Clinical Practice (3) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate, develop, and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: A.

RHB PO 527 Pediatric Prosthetics and Orthotics (2) Focuses on the integration of

REHABILITATION MEDICINE

information from previous coursework focusing on specific pediatric medical conditions and interventions. Includes discussion of pathology/pathophysiology, etiology, clinical presentation, natural history, and surgical and medical management. Discusses implications of various medical interventions and their functional considerations based on the available literature. Offered: ASp.

RHB PO 528 Lower Limb Prosthetics III: Theory and Application (5) Develops individualized prosthetic treatment plans based on a comprehensive knowledge of prosthetic gait, alignment, transfemoral socket design, and component principles. Develops support treatment plans by integrating knowledge of available research and treatment protocols into the decision-making process. Offered: W.

RHB PO 529 Lower Limb Prosthetics III: Clinical Practice (6) Advanced instruction in application of biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations above the knee. Includes obtaining histories, assessing physical function, and taking residual limb impressions and measurements to prove prosthetic care. Offered: W.

RHB PO 530 Lower Limb Orthotics III: Theory and Application (4) Integrates knowledge and competencies from prior courses with new knowledge of orthotics management of the lower limb involving the knee and hip. Students acquire knowledge of components and design options for dysfunction of the hip and knee. Offered: WSp.

RHB PO 531 Lower Limb Orthotics III: Clinical Practice (4) Integrates prior knowledge of design principles, material science, and fabrication process; acquires knowledge of components and design options; and analyzes efficacy of orthotic treatment plans in achieving desired biomechanical goals and outcomes. Offered: WSp.

RHB PO 532 Spinal Orthotics (5) Integrates competencies gained from core foundational courses with additional theories and principles of orthotic management of spinal pathologies including scoliosis, trauma, and congenital and degenerative etiologies. Offered: Sp.

RHB PO 533 Spinal Orthotics I (2) Integrates prior knowledge (anatomy, physiology, patient evaluation skills) obtained in the foundational courses with knowledge and skills of orthotic theory and practice related to trauma and degenerative etiologies. Learning is achieved through lectures, discussion, and laboratory experiences. Offered: AWSp.

RHB PO 534 Spinal Orthotics II (3) Integrate prior knowledge of anatomy, physiology, and clinical evaluation with knowledge and skills of orthotic theory and practice related to scoliosis and kyphosis. Learning is achieved through lectures, discussion, and laboratory experiences.

RHB PO 541 Engineering Concepts (3) Students are introduced to principles of mechanics, strength of materials, force analyses, fatigue, materials science and related topics that are relevant to prosthetic and orthotic device design. These concepts are applied to component failure and are relevant to the overall curriculum's laboratory and clinical work. Engineering concepts are discussed for application in future courses. Offered: Sp.

RHB PO 561 Clinical Rotation I (2) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: S.

RHB PO 562 Clinical Rotation II (1) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: A.

RHB PO 563 Clinical Rotation III (1) Students actively participate in the provision of prosthetics and orthotics treatment services and develop clinical patient care skills under the mentorship of clinical preceptors. Offered: W.

RHB PO 564 Clinical Rotation IV (1) Students actively participate in the provision of prosthetics and orthotics treatment services and refine clinical patient care, decision-making, and problem-solving skills under the mentorship of clinical

preceptors. Offered: Sp.

RHB PO 581 Outcome Measures for the Prosthetics and Orthotics Clinic (2) Examines development and use of health-related outcome measures. Focuses on the relationship between measurement constructs and patient populations as well as psychometric properties. Students select, implement, and critically evaluate patient outcome measures. Offered: Sp.

RHB PO 582 Critical Evaluation of the Prosthetics and Orthotics Literature (1) Examines and applies appropriate methods of analyzing prosthetics/orthotics literature. Offered: A.

RHB PO 583 Evidence Based Practice I (3) Focuses on the use and critical evaluation of evidence to answer clinical problems. Encourages students to become consumer of evidence by developing an understanding of how to acquire and incorporate evidence into routine clinical practice. Offered: W.

RHB PO 584 Evidence Based Practice II (3) Covers developing a treatment plan based on theory, evidence, and experience; and proposing a quantitative and qualitative assessment strategy to evaluate the developed treatment. Encourages students to become consumers of evidence to answer clinically relevant questions. Offered: Sp.

REHABILITATION MEDICINE

REHAB 300 Introduction to Occupational Therapy (1) Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only.

REHAB 496 Special Topics in Rehabilitation (1-9, max. 14) Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

REHAB 498 Undergraduate Thesis (*, max. 15)

REHAB 499 Undergraduate Research (*, max. 15) Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.

REHAB 500 Clinical Clerkship in Physical Therapy (4) Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.

REHAB 502 Pediatric Physical Therapy (4-, max. 8) Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.

REHAB 503 Lifespan III: Geriatric Physical Therapy (3) Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

REHAB 504 Procedures I: Basic Physical Examination of the Extremities (2) Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Special emphasis on examination of the extremities, including applied anatomy, posture, screening tests, special tests, and scanning exams.

REHAB 505 Introduction to Pharmacology (2) Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies.

REHAB 506 Procedures II: Basic Physical Examination of the Spine (2) Develops technical skills and theoretical foundations in the examination of patients from a

neuromusculoskeletal perspective. Emphasizes examination of the spine including applied anatomy, posture, screening tests, special tests, and scanning exams.

REHAB 507 Physical Therapy Procedures III: Modalities (3-4) Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

REHAB 508 Principles of Therapeutic Exercise (5) Theory, principles, and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

REHAB 510 Rehabilitation Psychology (2) Focuses on understanding assimilation of disability, participation in rehabilitation, management of behavior, and maintenance of performance from both the practitioner and patient perspective. Focuses on the role of the psychologist in the rehabilitation team. Includes case study and case conference materials.

REHAB 511 Musculoskeletal IV: Clinical Management (4) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format. Offered: A.

REHAB 512 Musculoskeletal V: Clinical Management (3-4, max. 8) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper and lower extremity musculoskeletal conditions. Lecture, laboratory and simulation learning format.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no-credit only.

REHAB 514 Systems Review for Physical Therapists (3) Development of advanced physical assessment skills to provide students with the ability to determine if a patient's disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no-credit only.

REHAB 515 Advanced Neuromusculoskeletal Interventions in Physical Therapy (3) Advanced neuromusculoskeletal treatment techniques. Emphasis on review of manual therapy, exerciser and modality interventions in case studies across lifespan and continuum of care. Credit/no-credit only.

REHAB 516 Medical Information for Rehabilitation Counselors (3) Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

REHAB 517 Physical Therapy Seminar (2-, max. 12) Focuses on physical therapy topics pertaining to transcurricular and professional practice issues.

REHAB 518 PT Professional Series III: Diversity, Inclusion and Health Disparities (2) In-depth exploration of health disparities in the United States based on race, ethnicity, culture, social economic status, or sexual orientation. Covers roles of health status indicators, social determinants of health, cultural competency, and access to health services. Offered: ASp.

REHAB 519 P-Preceptorship in Rehab Medicine (1, max. 12) Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.

REHAB 520 Seminar (1-5, max. 12) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents, and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 521 Physiology and Pathophysiology for Rehabilitation (5) Uses a systems approach overview of the disease process and the impact it has on the rehabilitation process. Provides a foundation for understanding how dysfunction of major systems can influence a person's ability to move. Discusses risk reduction and prevention strategies surrounding diseases. Prerequisite: enrollment in the Doctor of Physical Therapy program. Offered: A.

REHAB 522 Physiological Topics in Rehabilitation Medicine (2) Reviews traditional physiological concepts related to the nervous, musculoskeletal, and cardiopulmonary systems as a foundation for rehabilitation practice. Includes recent advances in research and applicable case studies.

REHAB 523 Neuroscience III: Applied Neurology (4) Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 524 Cardiovascular and Pulmonary Practice in Physical Therapy (4) Provides students with a comprehensive approach to cardiac, vascular, and pulmonary systems in health and disease. Serves as basis for future coursework in cardiovascular and pulmonary examination, exercise testing, and physical therapy interventions. Prerequisite: enrollment in the Doctor of Physical Therapy program. Offered: W.

REHAB 525 Exercise Physiology for Rehabilitation (3) Provides systems approach to exercise physiology, including cardiovascular and musculoskeletal response to exercise training, and the impact it has on the rehabilitation process. Reviews common disease processes that effect ability and tolerance, and may benefit from rehabilitation interventions.

REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3) Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

REHAB 528 International Clinical Clerkship (2) Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their care-givers. Sponsored sites selected and screened by clinical coordinator. Students may choose area of clinical focus. Credit/no-credit only.

REHAB 529 PT Professional Series II: Professional and Practice Issues in Physical Therapy (2) Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Offered: W.

REHAB 530 Medical Aspects of Vocational Counseling (2-3) Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 531 PT Professional Series I: Critical Thinking Skills in Physical Therapy (2) Introduces students to structured critical thinking for discussion and analysis of selected musculoskeletal approaches. Interactive small groups explore key papers with controversial or novel assertions, or that address commonly used treatment techniques. Offered: A.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

REHAB 533 Diseases and Diagnosis in Rehabilitation (1/2, max. 4) Provides an

introduction to medical diagnoses and diseases having high rates of referral to rehabilitation services in order to promote comprehensive patient care. Offered: WSp.

REHAB 535 PT Professional Series IV: Administration Issues (2) In-depth discussion of administrative issues overarching physical therapy practice, including economic trends, operational policy, budgeting, reimbursement, staffing, business structure, and entrepreneurship. Required for physical therapy students. Offered: S.

REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max. 8) General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

REHAB 537 Functional Mobility Skills (2) Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

REHAB 538 Integumentary and Circulatory Management for Physical Therapy (1) Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format. Prerequisite: enrollment in the Doctor of Physical Therapy program. Offered: W.

REHAB 539 Communication Disorders in Rehabilitation Medicine (1) Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

REHAB 540 Acute Care Practice in Physical Therapy (3, max. 6) Provides an in-depth analysis of the role of the physical therapist in the acute care setting. Lectures frame care-based problem solving and experiential learning. Consequences of recumbent positioning and reduced activity examined using a systems-based approach. Develop entry-level knowledge for delivery of acute care PT services within a multidisciplinary team.

REHAB 541 Functional Skills I: Rehabilitation Procedures (1) Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques and transfers. Prerequisite: enrollment in the Doctor of Physical Therapy program or the Master of Prosthetics and Orthotics program. Offered: A.

REHAB 542 Functional Skills II: Rehabilitation Procedures (1) Students choose gait patterns, assess and select assistive devices for transfers and ambulation, and instruct in proper mobility using assistive devices. Covers management of the physical setting and creating a safe clinical care environment, including effective guarding techniques. Includes proper body mechanics and use of assistive aids for all functional procedures. Prerequisite: enrollment in the Doctor of Physical Therapy program or Master of Prosthetics and Orthotics program. Offered: Sp.

REHAB 543 Rehabilitation Kinesiology Laboratory (1) Provides instruction and focus on practical experience and clinical problem solving in kinesiology by exploring and developing proficiency in a framework for observation, analysis, and description of human movement on the normal pathological spectrum. Credit/no-credit only.

REHAB 544 Functional Anatomy for Rehabilitation of the Extremities (5-) Covers the functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on anatomy and of the upper and lower extremities, including associated peripheral-vascular and peripheral-nervous systems. Intended to enhance functional assessment and to improve diagnosis and treatment through greater understanding of underlying anatomy. Offered: A.

REHAB 545 Functional Anatomy for Rehabilitation of the Spine (-4) Covers functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on the anatomy of the spine, including associated vascular and nervous systems. Enhances functional assessments and

the improvement of diagnosis and treatment through greater understanding of underlying anatomy. Offered: W.

REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15) Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: permission of instructor.

REHAB 548 Kinesiology (4) Concepts for rehabilitation professionals in Physical Therapy, Occupational Therapy, and Prosthetics and Orthotics. Offered: Sp.

REHAB 550 Neuropsychology in Rehabilitation (2) Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 551 Neurobiology for Rehabilitation (5) In-depth analysis of human neuroanatomical structure and neurophysiological function as a basis for rehabilitation practice.

REHAB 552 Special Topics in Sports Physical Therapy (1, max. 3) Covers topics related to sports physical therapy. Explores sport-related injuries and how they are managed through sports medicine practice. Emphasizes clinical reasoning, evidence-based practice, sports biomechanics and kinesiology principles, and data-informed decision making. Prerequisite: either enrollment in Doctor of Physical Therapy program or permission of instructor. Offered: AWSp.

REHAB 554 Perspectives in Interprofessional Practice (1) Integrates diverse interprofessional perspectives to prepare graduate and professional students in rehabilitation-related fields for effective practice as collaborative team members. Credit/no-credit only. Offered: Sp.

REHAB 555 P-Neuromuscular Electrodiagnosis (2.5) Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: permission of instructor.

REHAB 556 Foundations of Rehabilitation Science (3) Overview of rehabilitation science and social constructs of disability emphasizing bio-psycho-social-environmental models of the enabling-disabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary thinking. Prerequisite: instructor permission.

REHAB 557 Evidence-Based Rehabilitation (3) Addresses frameworks for evaluating the evidence in rehabilitation science; asking answerable questions, using advanced search strategies; critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor.

REHAB 558 Rehabilitation Research Methods (3) Provides an orientation and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: permission of instructor.

REHAB 559 Introduction to Global Rehabilitation (3) Explores rehabilitation from a global perspective. Provides framework for students to develop proposals addressing current global rehabilitation issues. Offered: S, odd years.

REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3) Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor.

REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3) Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor.

REHAB 562 Neuroscience in Rehabilitation (3) Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor.

REHAB 564 Practice Skills for Occupational Therapy (1, max. 3) Provides an introduction to physical assessments and interventions with a focus on physical management of clients, management of medical and adaptive equipment, splint fabrication, and maintenance of therapist and client safety. The therapeutic skills covered serve as a foundation for more advanced technical and professional competencies in subsequent courses and fieldwork. Credit/no-credit only. Offered: AWSp.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 569 Prosthetics and Orthotics for Physical Therapists (1) Introduces the principles and designs of orthoses and prostheses, using a clinical problem-solving approach to determine functional deficits to create joint rehabilitation goals between physical therapy and prosthetics and orthotics in regards to the prosthesis and orthosis. Emphasizes team medicine and collaboration in rehabilitation. Credit/no-credit only. Offered: Sp.

REHAB 570 Foundations of Occupational Therapy (4) Provides a foundation for understanding occupational therapy practice: examining individuals as occupational beings; the scope and range of occupational behaviors; and various influences on occupational participation, including individual factors, and factors related to physical and socio-cultural environments. Offered: A.

REHAB 571 Occupational Therapy Professional Seminar ([0-1]-, max. 1) Provides a forum for developing a culture of occupational therapy graduate education that supports the development of reflective practices and professionalism. Credit/no-credit only. Offered: AWSpS.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7) An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences.

REHAB 573 Functional Movement for Occupational Therapy (2) Provides students with an understanding of human movement and skills in biomechanical activity analysis for everyday activities. Offered: Sp.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications

of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7) Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families.

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework.

REHAB 578 Occupational Therapy Domain and Process I (4) Skills in the analysis, adaptation, and sequencing of therapeutic occupations and activities to support occupational performance through the lifespan. The analysis process covers all aspects of the domain of occupational therapy including areas of occupation, client factors, performance skills, performance patterns, context, and environment.

REHAB 579 Occupational Therapy Domain and Process II (3) Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences.

REHAB 580 Introduction to Research in Rehabilitation (3) Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation.

REHAB 581 Application of Measurement Systems (3) Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy.

REHAB 582 Assistive Technology in Rehabilitation (3) Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements.

REHAB 583 Exploring Disability (1) Explores multiple aspects of disability including social, mental, physical, and financial factors. Provides skills for working with people with disabilities and exposure to a multidisciplinary team approach to overcoming healthcare barriers. Utilizes interactive didactic with patient participation and introduction to community resources for people with disabilities.

REHAB 585 Leadership and Management in Occupational Therapy (5) Focuses on occupational therapy leadership and management in healthcare delivery systems. Includes theoretical and professional competencies focuses on healthcare access, health policy laws, service delivery settings, reimbursement, regulation, political advocacy. Management topics include leadership, program planning, budgeting, personnel, and outcome measurement.

REHAB 588 Fieldwork II Seminar (1) Supports a successful transition from academic work to the full-time Fieldwork II clinical experiences by reinforcing the integration and application of acquired technical and professional competencies needed for REHAB 594, Fieldwork II. Credit/no-credit only. Offered: Sp.

REHAB 591 Graduate Project (1-4, max. 10) Graduate project focuses on practice, administration, education, policy, research, or other scholarly or creative work. Required of entry-level occupational therapy students.

REHAB 592 Principles of Orthotic Use in Rehabilitation (2) General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

REHAB 593 Principles of Prosthetic Use in Rehabilitation (2) General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

REHAB 594 Clinical Fieldwork in Occupational Therapy (5/10, max. 30) Full-time fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various settings reflective of current practice. Students must complete a minimum of 24 weeks of placements. Credit/no-credit only. Offered: AWSpS.

REHAB 595 Clinical Affiliation in Physical Therapy ([2-10]-, max. 30) Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no-credit only.

REHAB 596 Electromyography and Clinical Neurophysiology (4) Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 598 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 599 Electromyography and Electrodiagnosis Laboratory (1-) Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 600 Independent Study or Research (*-) Credit/no-credit only.

REHAB 684 Rehabilitation Medicine Clerkship - Boise, ID (8) Students work directly with the physician and as a member of a multidisciplinary rehab team, seeing a variety of patients with neurologic and musculoskeletal diagnoses. Observe procedures such as EMGs, nerve conduction studies, and a variety of peripheral and central injections. Participate in care of injured workers and their return to work. Primarily outpatient experience with some inpatient exposure. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 685 Rehabilitation Medicine Clerkship - Introduction to Physical Medicine and Rehabilitation (4) Introduction to care of patients with rehabilitation needs. Students are integrated into the rehabilitation team and participate in direct patient care in an interdisciplinary approach. Students learn the role of the different interdisciplinary members, including that of the physiatrist, and gain a basic understanding of the Physical Medicine & Rehabilitation (PM&R) specialty. Prerequisite: completion of Patient Care Phase. Offered: AWSpS.

REHAB 686 Rehabilitation Medicine Clerkship - Pediatrics - Seattle Children's Hospital - Seattle (8) Structured clinical experience on rehabilitation medicine services in pediatric setting. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. School planning, family counseling, community support services included. Inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics or rehabilitation. Prerequisite: completion of Patient Care Phase or equivalent Offered: AWSpS.

REHAB 687 Rehabilitation Medicine Clerkship - Harborview Medical Center -

Seattle (8) Focuses on neuro-rehabilitation and general rehabilitation. Intended for those interested in exploring a career in Physical Medicine and Rehabilitation or wishing to gain more experience working with patients with disability. Students primarily work on the inpatient rehabilitation unit. Some exposure to outpatient general rehabilitation and neuro-rehabilitation clinics. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 688 Rehabilitation Medicine Clerkship - VA Puget Sound Seattle DIV ision, Rehab Care Services (8) Focuses on providing medical and rehabilitative care to inpatients with a variety of diagnoses and functional limitations including, but not limited to, stroke, amputation, multiple sclerosis and motor neuron disease. Structured clinical experience on a general inpatient rehabilitation unit. Opportunities to participate at a variety of outpatient rehabilitation clinics. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 689 Rehabilitation Medicine Clerkship - VA Puget Sound Seattle DIV ision, Spinal Cord Injury (8) Introduction to diagnosis, management, and rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 690 Rehabilitation Medicine Clerkship - UW Medical Center - Seattle (8) Four-week clerkship on inpatient PM&R management of patients with disabilities and functional impairments due to disorders such as acquired brain injury, CNS disorders, spinal cord injury, and complex medical conditions. Recommended for careers in family medicine, internal medicine, neurology, geriatrics, orthopedic surgery, neurosurgery, rheumatology, and cardiology. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 691 Rehabilitation Medicine Clerkship - Community Medical Center - Missoula (4/8) Two or four week Physical Medicine and Rehabilitation (PM&R) clerkship at Community Medical Center in Missoula, Montana. Work in inpatient setting for patients in acute rehab, and see patients in outpatient clinic. Two week rotation for students desiring broad overview of PM&R, seeing variety of patients. Four week rotation for students desiring more exposure to neuromuscular anatomy, physical exam, and neuromuscular disorders. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 692 Rehabilitation Medicine Clerkship - St. Luke's Rehabilitation Institute - Spokane (8) Students provide medical and rehabilitative care to patients with variety of diagnoses and functional limitations including stroke, amputation, brain injury, motor neuron disease, and spinal cord injury. Rotations July through January are recommended for students seeking Physical Medicine and Rehabilitation (PM&R) career. February through June rotations recommended for students seeking PM&R exposure. Prerequisite: completion of Patient Care Phase or equivalent Offered: AWSpS.

REHAB 697 Rehabilitation Medicine Clerkship - Special Assignment Elective - Outside WWAMI (4/8, max. 24) Special clerkship, externship, or research opportunities at institutions other than the University of Washington located outside the WWAMI region. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 699 Rehabilitation Medicine Clerkship - Special Assignment Elective - WWAMI (4/8, max. 24) By special arrangement for qualified students, special clerkships or externships at institutions other than the University of Washington located within the WWAMI region. Prerequisite: completion of Patient Care Phase or equivalent. Offered: AWSpS.

REHAB 700 Master's Thesis (*-) Credit/no-credit only.

REHAB 800 Doctoral Dissertation in (*-) Offered: AWSpS.

REHAB 801 Practice Doctorate Project/Capstone ([1-4]-, max. 12) Credit/no-credit only. Offered: AWSpS.

SURGERY

HEALTHCARE SIMULATION SCIENCE

HCSS 501 Educational Concepts for Healthcare Simulation Science (3)

Introduces foundational concepts in education, including adult learning theory and educational design. Topics include psychological safety, the role of emotion in learning and engagement, fundamentals of curriculum development, and modalities for evaluating teaching. Credit/no-credit only. Offered: A.

HCSS 510 Fundamentals of Healthcare Simulation Science (3)

Provides background of the language and literature in the healthcare simulation science field. Focuses on the history of the field to build upon the past, assess progress, and accelerate innovation and research. Introduces students to academic and commercial healthcare simulation innovation. Credit/no-credit only. Offered: A.

HCSS 520 Introduction to Research in Healthcare Simulation Science (1)

Students gain fundamental research skills, conduct literature searches, meet with members of their research team, and access online learning materials to support development as a researcher. Students learn to communicate research ideas and findings effectively through writing, presentations, and discussions. Credit/no-credit only. Offered: A.

SURGERY

SURG 498 Undergraduate Thesis (*, max. 35) Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

SURG 499 Undergraduate Research (*, max. 35) Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505 P-Preceptorship in Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

SURG 600 Independent Study or Research (*-)**SURG 601 General Surgery Advanced Clerkship - Swedish Medical Center (8)**

Advanced clerkship at Swedish Medical Center/First Hill offering training in a 700-bed tertiary-care hospital. Emphasizes collegial relationships between attending surgeons, residents, and fourth year medical students considering a career in general surgery or one of its subspecialties. Prerequisite: required surgery clerkship. Offered: AWSpS.

SURG 602 P-Clinical Clerkship - Coeur D'Alene, ID (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 603 P-Clinical Clerkship - Spokane VAMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating room.

SURG 604 P-Clinical Clerkship - Bozeman, MT (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 605 P-Clinical Clerkship - Swedish Medical Center (1-24, max. 25)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 606 P-Clinical Clerkship - Anchorage, AK (1-24, max. 25) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 607 Colorectal Surgery - Boise, ID (8) Focus on benign and malignant diseases: colorectal carcinoma, colitis, inflammatory bowel disease, anorectal diseases such as anal fissure, anorectal abscess and fistula, hemorrhoids and pilonidal disease. Focus primarily on minimally invasive techniques with exposure to the OR, clinic, endoscopy unit, and da Vinci robotic surgical procedures. Practice of modern surgical techniques. Prerequisite: General Surgery clerkship. Offered: AWSpS.

SURG 608 General Surgery Advanced Clerkship - Virginia Mason (8) Advanced clerkship designed to give fourth year medical students direct exposure to defined categories of general surgery. Students participate in the pre-op, intra-op, and post-operative care of surgical patients. Students also participate in outpatient clinic and perform initial consults and post-operative visits. Students work closely with resident physicians to provide primary care for post-operative inpatients. Prerequisite: required Surgery clerkship.

SURG 609 Surgery Clerkship - Alaska Native Medical Center (12) Students participate in and contribute to the team approach to managing emergency general surgery conditions and oversight of management of complex trauma victims. Activities include patient care assessment in both inpatient and outpatient settings, observation and participation in the operating room, attendance of weekly conferences, and didactic experience with faculty. Offered: AWSpS.

SURG 610 Plastic Surgery Sub-Internship (8) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participants act in sub-intern capacity in all surgery-related activities and work towards essential skills necessary for surgical residency. Students rotate through Veterans Affairs Puget Sound (primary site), UW Medical Center Montlake, and UW Medical Center Northwest. Prerequisite: completion of required general surgery and medicine clerkships.

SURG 611 Surgical Oncology Elective (8) Surgical oncology rotation provides broad exposure to surgical management of complex cancer cases affecting breast, skin, soft tissue, endocrine system, gastrointestinal tract, liver, and pancreas. Students work with surgeons in preoperative workup and preparation of patients, the conduct of surgical procedures, and in postoperative care. Settings include clinic, operating room, and inpatient wards. Prerequisite: completion of required surgery and medicine clerkships. Offered: AWSpS.

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITEProgram. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

SURG 631 P-LIC Surgery Clinical Clerkship (12) Basic clinical clerkship for students enrolled in LIC program. Prerequisite: Acceptance into LIC program. Offered: AWSpS.

SURG 634 Surgery Clerkship - Twin Falls, ID (1-24, max. 25) Required surgery clerkship - Patient Care Phase; St. Luke's Magic Valley, Twin Falls ID Offered: AWSpS.

SURG 635 Surgery Clerkship - Boise, ID (12) Provides a method of focused evaluation for patients with surgical problems. Includes workup and preparation of patients for anesthesia and surgical intervention. Offered: AWSpS.

SURG 636 Surgery Clerkship - Spokane MultiCare Deaconess (12) Introductory surgery clerkship that provides a method of focused evaluation for patients with surgical problems. Includes workup and preparation of patients for anesthesia and surgical intervention. Offered: AWSpS.

SURG 642 P-Rural Surgery Clerkship - Pullman, WA (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students interested in rural practice in surgery or primary care. Prerequisite: required surgery clerkship; medicine clerkship.

SURG 647 P-Rural Surgery Clerkship - Powell (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 648 P-Rural Surgery Clerkship - Libby (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students interested in rural practice in surgery or primary care. Prerequisite: surgery and medicine required clerkships; and permission of department.

SURG 649 P-Rural Surgery Clerkship - Lewistown (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students interested in rural practice in surgery or primary care. Prerequisite: surgery and medicine required clerkships.

SURG 651 P-Community Surgery Clerkship - Rock Springs, WY (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students interested in rural practice in surgery or primary care. Prerequisite: completed required surgery and medicine clerkships.

SURG 653 P-Pediatric Surgery - Spokane (8) Student functions as an integral part of team directly assisting on services including diagnosis, preoperative, and postoperative care of pediatric patients. Exposure to surgical conditions peculiar to youth age groups with preponderance of various congenital and neoplastic conditions. Students develop knowledge of surgical disease and enhance ability to comprehensively manage problems in pediatric patients. Prerequisite: surgery; medicine; and pediatric required clerkships.

SURG 654 P-Cardiothoracic Surgery - Spokane (4) Opportunity to participate in the full spectrum of perioperative care for both cardiac and thoracic surgery patients, including end stage lung disease, heart failure, and transplantation patients. Emphasis on cardiopulmonary physiology and perioperative management. Prerequisite: surgery and medicine required clerkships.

SURG 655 Surgery Clerkship - Gillette, WY (12) Provides a method of focused evaluation for patients with surgical problems. Includes workup and preparation of patients for anesthesia and surgical intervention. Offered: AWSpS.

SURG 656 P-Trauma/Acute Care Surgery - Boise (8) Student directly assists as an integral part of the team in the systematic evaluation of trauma patients, initial trauma resuscitation, stabilization, and transfer of patients using emergency diagnostic techniques. Prerequisite: completion of required surgery and medicine clerkships.

SURG 658 P-Ambulatory Surgery Clerkship - Mary Bridge (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 659 P-Ambulatory Surgery Clerkship - Madigan (8) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Prerequisite: completion of all required patient care phase clerkships. Offered: AWSpS.

SURG 661 P-Surgical Intensive Care Unit Sub-Internship - VA (8) Designed to augment experience gained in surgery clerkship. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery and medicine required clerkships.

SURG 664 P-Subinternship in General Surgery - VAMC (*, max. 16) Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 665 P-Clinical Clerkship - UWMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 666 P-Clinical Clerkship - Boise (1-24, max. 25) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 667 P-Clinical Clerkship - Spokane (1-24, max. 25) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 668 P-Clinical Clerkship - Casper (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 669 P-Clinical Clerkship - Billings (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 670 P-Clinical Clerkship - Missoula (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 671 P-Clinical Clerkship - Madigan (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 672 P-Clinical Clerkship - HMC (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 673 P-Clinical Clerkship - VA (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 674 P-Clinical Clerkship - Virginia Mason (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 675 P-Clinical Clerkship - Caldwell, ID (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 676 P-Pediatric Cardiothoracic Surgery (8) Students will learn about the technical and physiological aspects of cardiopulmonary treatments. Prerequisite:

Surgery required clerkship Offered: AWSpS.

SURG 678 P-Clinical Clerkship - Kalispell, MT (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 679 P-Clinical Clerkship - Wenatchee, WA (1-24, max. 25) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 680 P-Clinical Clerkship - Northwest Hospital (1-12, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Offered: AWSpS.

SURG 682 P-Clinical Burn Care (*, max. 12) Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: surgery required clerkship.

SURG 683 P-Pediatric Surgery Externship (8/12) Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. Prerequisite: surgery required clerkship.

SURG 684 P-Pediatric Surgery Clerkship- Boise (8) Student functions as a subintern directly assisting on the services and is an integral part of the team. Held in Boise, ID. Prerequisite: PEDS and SURG clerkships. Offered: AWSpS.

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12) Serve as a subintern on the Cardiothoracic surgery service at the UWMC. Opportunity to participate in the full spectrum of perioperative care for both cardiac and thoracic surgery patients including end stage lung disease, heart failure and transplantation patients, with an emphasis on cardiopulmonary physiology and perioperative management.

SURG 686 Plastic Surgery Sub-Internship (8) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participants will act in sub-intern capacity in all surgery-related activities and will work towards essential skills necessary for surgical residency. Students will rotate through Harborview (primary site), Seattle Children's Hospital, and UW Medical Center Montlake. Prerequisite: surgery and medicine required clerkships.

SURG 687 P-Transplantation Surgery Clerkship (8) Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: surgery and medicine required clerkships.

SURG 688 P-Subinternship in General Surgery (*, max. 12) Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a specialized population of patients. Prerequisite: surgery and medicine required clerkships; and permission from department.

SURG 691 P-Surgical Intensive Care Unit Sub-Internship - HMC (8) Designed to

augment experience gained in surgery clerkship. Opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery and medicine required clerkships.

SURG 692 P-Ambulatory Surgery Clerkship - Seattle Children's (8) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 693 P-Rural Surgery Clerkship - Buffalo (8) Designed to supplement basics learned in the required surgery clerkship. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students interested in rural practice in surgery or primary care. Prerequisite: surgery and medicine required clerkships; and permission of department.

SURG 695 Vascular Surgery (8) The student spends four weeks on the vascular surgery at Harborview Medical Center. The student functions as a subintern and directly helps the residents manage all patients on the service and is an integral part of the OR team. Prerequisite: surgery and medicine required clerkships.

SURG 697 P-Surgery Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: surgery required clerkship and permission of department.

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

UROLOGY

UROL 498 Undergraduate Thesis (*, max. 35) Provides an opportunity for medical students to write in the area of urology.

UROL 499 Undergraduate Research (*, max. 35) The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1, max. 12) Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 600 Independent Study or Research (1-3, max. 16) Independent study or research in urology conducted under the direction of one or more instructors. Offered: AWSpS.

UROL 675 P-Urology Preceptorship (*, max. 8) Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. (Two or four weeks). Prerequisite: UROL 680, HUBIO 562.

UROL 678 P-Urology Clerkship - Idaho (4-8, max. 8) Medical clinical rotation. Involves participation in a standard urology clinic, as well as procedures and surgical cases. Prerequisite: completion of Internal Medicine or Surgery required third year clerkship is recommended. Offered: AWSpS.

UROL 679 P-Urology Clerkship - Boise VA (*, max. 8) Two or four week rotation. Full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

UROL 680 P-Urology Clerkship (*, max. 8) Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

UROL 681 P-Female Urology (4) Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and

multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.

UROL 682 P-Urology Clerkship - Spokane (4/8, max. 8) Clinical clerkship. Students learn principles of urology including pediatric urology and nephrology, and engage in full activities of clinical service. Offered: AWSpS.

UROL 683 P-Urology Clerkship - Boise (*, max. 8) Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

UROL 684 P-Urology Clerkship - Billings (*, max. 8) Two or four week rotation. Includes full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

UROL 685 P-Urology Sub-Internship (*, max. 12) Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor.

UROL 686 P-Urology Clerkship - Bozeman (4-8, max. 8) Medical clinical rotation. Involves participation in a standard urology clinic, as well as procedures and surgical cases. Prerequisite: completion of Internal Medicine or Surgery required third year clerkship is recommended. Offered: AWSpS.

UROL 687 P-Urology Clerkship - Northwest Hospital (4-8, max. 8) Rotation providing exposure to all aspects of patient care in urology, including exposure to outpatient clinic and operating room. Recommended: third-year clerkship and completion of Patient Care Phase courses in Internal Medicine or Surgery. Offered: AWSpS.

UROL 688 Advanced Patient Care -Urology Clerkship - Bozeman (8) Advanced patient care rotation provides exposure to all aspects of patient care in urology through a private practice setting. Students, as part of a primary or consultative team, are exposed to outpatient clinic and operating room procedures, with daily responsibilities. Four weeks. Prerequisite: third- or fourth-year medical student; recommended: Internal Medicine and/or Surgery clerkships. Offered: AWSpS.

UROL 690 P-Urology Specialties (*, max. 8) For those who wish further exposure to a specific aspect of urology. Students spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, or Veterans' Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

UROL 697 P-Urology Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor.

UROL 699 P-WWAMI Urology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

SCHOOL OF NURSING

INFANT & EARLY CHILDHOOD MENTAL HEALTH

IECMH 432 Introductions in Infant and Early Childhood Mental Health (5) SSc Provides a survey of infant and early childhood development, including prenatal and neonatal factors, and social/societal influences, using an Infant and Early Childhood Mental Health and Diversity, Equity and Inclusion informed framework. Emphasizes how risk and protective factors can impact social emotional, physical, and cognitive growth. Includes research based principles and approaches to supporting families and caregivers of young children. Offered: SpS.

IECMH 433 Trauma in Early Childhood: Resilience in Relationship (5) SSc Focuses on early childhood trauma and on resilience through relationships. Uses an infant and early childhood mental health lens to explore adversity, resilience, historical trauma, and trauma-informed care. Offered: ASp.

IECMH 537 Development and Psychopathology: Parents and Infants (3) Provides an overview of typical social and emotional development and psychopathology in children ages three and younger. Demonstrates attachment relationships with parents and family to infant's development and psychopathology. Core course of Infant Mental Health Certificate program. Recommended: IECMH 548 Offered: A.

IECMH 548 Frameworks in Infant and Early Childhood Mental Health (3) Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation. Offered: A.

IECMH 555 Relationship Based Mental Health Assessment of Young Children (3) Focuses on multi-disciplinary, diagnostic mental health observation and assessment of infants, toddlers, and preschoolers within the context of their primary relationships. Recommended: IECMH 548 Offered: Sp.

IECMH 569 Reflective Practice And Consultation (2) Focuses on reflective practice, consultation and supervision, distinct and core features of practice across disciplines providing infant mental health services to young children and families. Recommended: IECMH 548 Offered: S.

NURSING

NSG 505 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/IND E 567; Sp, even years.

NSG 506 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

NSG 507 Technical Aspects of Occupational Safety (3) Technical knowledge of safety equipment, hazard identification and control, understanding of regulations, and hands-on application of safety measures. Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on employers and employees in key industries. Offered: jointly with ENV H 562; Sp.

NSG 508 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

NSG 511 Prevention Issues in Community Health (3) An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.

NSG 512 Prevention Critique in Community Health (3) Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among U.S. racial and ethnic people of color, and how to be a critical program consumer, adopter, and adapter. Offered: A.

NSG 513 Psychopharmacology for Children and Adolescents (1) Reviews pertinent issues in prescribing psychoactive medications to children and adolescents.

Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescribing for children and adolescents. Credit/no-credit only. Offered: S.

NSG 516 Physiological Aspects of Aging (3) Focuses on biological theories of aging, major physiological and pathophysiological changes that occur in human body systems with aging. Also addresses health considerations and individual adaptations based on current research. Offered: A.

NSG 520 Pharmacotherapeutics for Advanced Nursing Practice (3) Application of principles of pharmacology as foundation for clinical decision making by advanced practice nurses for individuals and populations. Incorporates pharmacotherapy into advanced nursing therapeutics by addressing pharmacokinetics, pharmacodynamics, pharmacogenetics as well as patient-related factors that support selection of commonly used drugs. Selected drugs within categories are compared and contrasted. Prerequisite: enrollment in either Doctor of Nursing Practice or Graduate Certificate Program - Advanced Practice Nursing programs, or permission of instructor. Offered: W.

NSG 526 Introduction to Person Centered and Interprofessional Palliative Care (1-5) Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: jointly with B H 566/FAMED 531; A.

NSG 527 Advanced Topics in Person Centered and Interprofessional Palliative Care (1-5) Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Requires admissions into the Palliative Care Graduate Certificate Program. Prerequisite: NSG 526 Offered: jointly with B H 567/FAMED 532; W.

NSG 528 Palliative Care: Quality Metrics and System Integration (1-5) Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Requires admissions into the Palliative Care Graduate Certificate Program. Offered: jointly with B H 568/FAMED 533; Sp.

NSG 530 Leadership, Communication, and Professional Identity (3) Analyzes professional identity, transition to new roles and responsibilities, leadership approaches, and inter-professional teamwork skills needed to provide effective, efficient and patient/community-centered care. Covers advanced, multi-modal communication strategies specific to professional role certification, conflict resolution, professional communication, inter-professional teamwork and leadership using interactive, skills-based learning.

NSG 539 Management of Common Newborn Conditions (1-2, max. 2) Focuses on evidence-based clinical-decision making and management of common newborn health conditions. Emphasizes concepts of health promotion and patient/family centered care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Prerequisite: NCLIN 502 or equivalent, or permission of instructor.

NSG 540 Telehealth Systems and Applications (4) Introduces challenges for designers and managers of telehealth and remote healthcare networks. Develops abilities of managers, leaders, and researchers of telehealth systems through exploration into systems components. Activities range from research to implementation of system design for applications that bridge geographic distance to the development of practical applications. Offered: S.

NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiography

(ECG) interpretation, as well as selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.

NSG 550 Seminar on Professional Issues in Nursing Education (3) Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.

NSG 551 Health Politics and Policy (3) Critically analyzes the politics of health policy in the United States. Examines leadership and advocacy in influencing politics and policy to address and influence health outcomes. Offered: W.

NSG 552 Social Determinants of Health and Health Equity (3) Examines fundamental concepts, emerging theory, research, and intervention strategies regarding the influence and putative mechanisms of environment and societal factors on health at population, community, and individual levels. Emphasizes an interdisciplinary, multi-level socio-ecological perspective on health and illness with consideration of principles of equity and justice in societal contexts.

NSG 553 Foundations of Health Systems and Health Economics (3) Examines health systems and care delivery in the context of principles of business, finance, and economics. Concepts applied in the design of cost and care effectiveness system-level health improvements. Prerequisite: permission of instructor.

NSG 554 Population Health and the Environment (3) Introduces core concepts and principles related to the science and practice of environmental and occupational health. Examines historical cases and current issues to illustrate how environmental conditions contribute to injury and illness among human populations. Explores health professionals' roles in actions that protect and promote healthy environmental and workplace settings. Offered: Sp.

NSG 555 Perspectives on Implementing Research in Advanced Nursing Practice (3) Provides an overview of contemporary multidisciplinary perspectives, models and research approaches for advanced practice nursing. Focuses on understanding and applying science to practice, and practice to science. Emphasizes ethical practice, scientific responsibility, research curiosity and use.

NSG 556 Program Planning and Health Systems and Multicultural Communities (4) Explores culture as it related to the program planning process, methods, theories, attitudes, and skills in health promotion and disease prevention through community engagement. Offered: W.

NSG 557 Physiology and Pathophysiology Across the Life Span (4) Analyzes disordered physiologic responses in individuals within the context of lifespan physiology. Examines pathophysiologic principles and responses, using case studies as exemplars for selected concepts, and the relationship between physiologic and pathophysiologic principles and the evidence basis for current practice. Offered: A.

NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3) Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involving workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.

NSG 559 Prevention Effectiveness in Community Health (1) Focuses on increasing effectiveness of organization- and community-level health promotion and prevention programs with multicultural communities. Includes web-based tool-kits pertaining to: cross-cultural adaptations of health promotion programs; mental health promotion in communities; institutional readiness to sustain prevention policies; and community engagement in health promotion efforts. Credit/no-credit only.

NSG 560 Pediatric Case Studies (2) Focuses on integration and application of pediatric history-taking, diagnostic reasoning, behavioral and developmental assessment, health promotion, and management of common pediatric conditions in case-based scenarios. Prerequisite: NCLIN 502; NURS 518; NURS 529, any of which may be taken concurrently, or permission of instructor. Credit/no-credit only. Offered: W.

NSG 561 Community Health Systems for Equity (3) Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business, inhibit or promote communal health. Highlights advanced practice, practice inquiry, and leadership implications. Offered: A.

NSG 562 Management of Adults I (2-3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care.

NSG 563 Management of Adults II (3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Offered: Sp.

NSG 564 Management of the Adult III (3) Focuses on evidence-based patient-centered care of older adults with multiple chronic conditions across the continuum from outpatient to acutely or critically ill, including prevention and management of geriatric syndromes. Explores strategies for optimal transition across care settings and across the health continuum.

NSG 565 Primary Care Management Across the Lifespan (1) Clinical application of theories of health promotion and chronic disease management in complex patients across lifespan, utilizing evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision-making, considering the chronic care model, coordination of care, poly-drug therapy, and information systems. Prerequisite: NCLIN 518, which must be taken concurrently; permission of instructor. Credit/no-credit only. Offered: A.

NSG 566 Pediatric Pharmacology (1-2, max. 2) Focuses on clinical application of pharmacologic management in pediatric acute and chronic illnesses. Emphasizes pediatric pharmacotherapeutics including selection of therapeutic agents, indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles. Includes didactic as well as case-based learning strategies. Offered: Sp.

NSG 567 Advanced Pharmacotherapeutics in Complex Case Management (1) Uses a case-based method to examine an evidence-based approach to pharmacotherapeutic management of complex chronic conditions across the lifespan. Incorporates examination of both pharmacologic factors and patient-related factors, such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across multiple settings. Prerequisite: PHARM 514; permission of instructor. Offered: A.

NSG 568 Infant Observation (1-, max. 4) Includes observing an infant and parent in the first year of life and reflecting on observations. GCPAPN-IMH core course. Four quarter sequence begins each Autumn. Offered: AWSpS.

NSG 569 Pediatric Cardiac Anatomy, Physiology, Pathophysiology, and Management (2) Explores anatomy and physiology of the normal heart, transition from fetal circulation, and pathophysiology of congenital and acquired cardiac conditions common in pediatric patients. Comprehensive care from diagnosis through medical and surgical management as well as appropriate follow-up care and potential long-term sequelae. Content appropriate for both primary and acute-care providers. Prerequisite: NCLIN 502 or permission of the instructor. Offered: S.

NSG 570 Management of Substance Use Disorders and Other Addictions (2) Explores advanced concepts in prevention, diagnosis, and management of substance use disorders and other addictions, which include process addictions and common co-occurring conditions. Emphasizes care management across the lifespan for all people impacted by these disorders at individual, population, and system levels, as well as ethical and legal aspects of care. Offered: W.

NSG 571 Theory and Science of Population Health Nursing (3) Covers

foundational concepts, principles, and historical events related to population health. Examines the evolution and intersection of nursing and public health sciences as they shape contemporary nursing knowledge, competencies, practices, and roles. Considers multidisciplinary frameworks and perspectives to understand health needs and strategies for groups, communities, and populations. Offered: A.

NSG 572 Collaborating for Health Equity (3) Evaluates models and approaches to effective collaboration with communities and other stakeholders toward advancing health equity. Emphasizes application of cultural humility in working across sectors, leveraging existing assets and other resources, and developing collective impact. Develops approaches to build community and organizational capacity, rectify power asymmetries, and institutionalize supportive practices for sustainment. Offered: A.

NSG 573 Systems Thinking for Population Health (3) Develops systems-level thinking with emphasis on identifying, analyzing, and addressing factors relevant to improving population health. Reviews theories focused on approaches and actions to affect change for the utilization and delivery of health promoting services. Emphasis on developing a theory of action and multicultural considerations to transform the health status of underserved and marginalized communities. Prerequisite: either EPI 511; NSG 572; and NMETH 536, or permission of instructor. Offered: W.

NSG 574 Program Development and Evaluation to Improve Population Health (4) Steps in developing population health interventions and programs, including assessment, prioritization, planning, and evaluation. Appraise best practices and evidence to inform the execution of strategies that improve health. Makes use of reliable data sources and stakeholder engagement, while considering ethical, political, and socio-cultural contexts. Prerequisite: either EPI 511, NSG 572, NMETH 536, or permission of instructor. Offered: W.

NSG 575 Leadership for Population Health (3) Analyzes and applies leadership literature and models for advanced nursing practice in population health. Explores skills in organizational strategic planning and change, with emphasis on roles and responsibilities in advocacy, workforce development, operational management of organizations, and professional ethics. Emphasis on transforming organizations, communities, systems, and other contexts to advance the health of all populations. Prerequisite: NSG 571, or permission of instructor. Offered: Sp.

NURSING (NURS)

NURS 201 Growth and Development through the Life Span (5-6) SSc Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors. Offered: AWS.

NURS 204 The Science and Art of Wellness: Implementing Evidence-Based Principles to Enhance Wellness and Productivity (3) Examines physiological and psychological connections of body, mind and spirit, as well as the epidemic of stressors challenging our health. Provides an overview of methods to respond to stress in health-producing ways. Covers the physiological basis of the Substance Abuse and Mental Health Services Administration eight wellness dimensions. Applies these wellness principles using evidence-based responses to target stressors and increase wellness Offered: Sp.

NURS 205 Nursing as a Career in Contemporary Society (1) Introduces an accurate description of nursing career, educational requirements and rationale, including advanced degree career possibilities. Explores breadth of nursing roles in promoting health to individuals, groups, and populations. Links historical development with contemporary practice. Explores factors that promote student and professional success in nursing. Credit/no-credit only.

NURS 211 Power, Oppression, and Social Justice in Health and Healthcare (5) SSc, DIV Introduces concepts related to how social systems determine conditions that adversely impact wellness and result in illness. Critically examines historical and current examples to illustrate how societal inequities contribute to health inequalities. Students explore their intersectional identities and how this positions them to disrupt oppressive circumstances and work toward creating a just society that promotes positive health.

NURS 215 Disaster Management, Risk Reduction, and Health (5) SSc Explores how

disasters affect the health of individuals and populations both locally and globally. Covers common health problems associated with disasters and the health care provider's role during disasters. Topics include natural hazards, responses to disasters, communicable and non-communicable disease management, water, sanitation, and hygiene (WASH), nutrition, policy, and personal and community preparedness. Offered: Sp.

NURS 301 General Anatomy (4) NSc Introduces the student to general human anatomy, examining both cellular and gross anatomy. The relationship between structure and function is a central focus of course content. Offered: jointly with B STR 301.

NURS 303 Foundations of Professional Nursing Practice (4) Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking healthcare, and the U.S. healthcare system.

NURS 304 Foundations in Pharmacotherapeutics and Pathophysiology (5) Covers concepts of normal and pathophysiological responses to states of health and illness. Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are discussed. Offered: A.

NURS 308 Human Responses II (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

NURS 309 Pharmacotherapeutics in Nursing Practice I (2-) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a two-quarter sequence. Offered: A.

NURS 310 Pharmacotherapeutics in Nursing Practice II (-[2-3]) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.

NURS 401 Fundamentals of Nursing Practice for Illness Care I (6) Examines pathophysiological responses to illness. Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W.

NURS 404 Gerontological Nursing (2) Focuses on concepts and issues relevant to the nursing care of older adults across the care continuum. Major course themes include nursing assessment of the older adult, health promotion, patient safety, geriatric syndromes, gerontechnology and influence of payer systems on care for older adults. Prerequisite: NURS 310.

NURS 405 Fundamentals of Nursing Practice for Illness Care II (6) Examines pathophysiological responses to illness. Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. Second course of a two-quarter sequence.

NURS 407 Culture, Diversity, and Nursing Practice (3) Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the healthcare needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of healthcare analyzed using specific

moral-ethical perspectives. Offered: AW.

NURS 412 Healthcare Systems (3) Introduction to healthcare systems with emphasis on the political economy of health; access to, utilization and quality of healthcare services; health inequities and the social determinants of health; health insurance and reimbursement; global health issues and innovations; leadership and teamwork; and community-engagement/activism to ensure the best health outcomes for all.

NURS 413 Health in the Context of Culture (2-10, max. 24) SSc, DIV Provides basic overview of health and healthcare challenges and opportunities in the U.S. or other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Addresses responses to health issues both within and outside the health sector. May include study abroad.

NURS 415 Nursing Care of Childbearing Families (3) Apply family and cultural competency concepts to nursing of childbearing families. Focus on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental concepts for health promotion, disease prevention, and nursing therapeutics. Uses current evidence-based research to guide best practices related to childbearing families. Offered: A.

NURS 417 Psychosocial Nursing in Health and Illness (4) Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently.

NURS 419 Transition to Professional Practice (3-5) Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership, and nursing care of individual clients or groups of clients and populations. Offered: SpS.

NURS 420 Community and Public Health Nursing (3) DIV Community and public health nursing theory focused on populations. A synthesis of theory, practice, and research in relation to community/public health in informed by: 1) social justice framework, 2) social determinants of health, 3) community partnerships. and 4) culturally and linguistically appropriate population focused care. Theory class for NCLIN 420

NURS 422 Advanced Clinical Judgement (3) Provides opportunity to advance clinical judgment skills of individual patients and groups of patients in preparation for practice. Focuses on prioritizing patient care, critical thinking, and delegation. Prerequisite: NURS 401; NURS 405; and NCLIN 407.

NURS 425 Health Equity (3) This course focuses on understanding and addressing health inequities. Theoretical frameworks and the root causes for health disparity will be reviewed. Health inequities found among marginalized groups will be discussed. This course will also explore approaches, strategies and tools that can be used to address health inequity.

NURS 431 Child Health (2) Focuses on the core processes of growth and development from infancy to adolescence, highlighting the family as the context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics.

NURS 445 Special Topics in Nursing (1-10, max. 10) Guided seminar that focuses on selected professional nursing and patient care topics.

NURS 452 Care Coordination and Transition Management (3) Focuses on exploring the role, skills, and competencies related to care coordination and transition management across care continuum. Course themes include the role of the RN, models of care, evidence-based practice to support patient outcomes and cost savings, patient-centered care planning, collaboration and communication within and between settings/community, the role technology plays, and the structures for reimbursement for services. Prerequisite: NURS 412.

NURS 457 Seminar on Professional Nursing Topics in Research and Clinical Practice (3) Focuses on selected professional nursing and patient care topics from both a clinical and research lens, with emphasis on timely issues of public health importance. Prerequisite: NMETH 450. Offered: Sp.

NURS 499 Special Electives (1-4, max. 15) Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Credit/no-credit only. Offered: AWSps.

NURS 500 Child Management II: Chronic Conditions (3) Emphasizes health care approaches for the providers of children and adolescents with chronic physical, neuro-biological, developmental or psycho-social problems. Focuses on assessment and referral with select management strategies. Includes care coordination, culturally relevant, inclusive, family centered, and multidisciplinary approaches. Prerequisite: NURS 518. Offered: S.

NURS 501 Child Mental Health Assessment and Interventions (3) Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized.

NURS 505 Selected Topics in Child, Family, and Population Health Nursing (1-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and healthcare. Credit/no-credit only. Offered: AWSp.

NURS 507 Older Adult Mental Health Assessment and Intervention (3) Examines the dynamics of mental health research and practice in normal, optimal and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Major topics include: models of aging, cognitive impairment, depression, severe mental illness and successful strategies to enhance mental health in older adults. Prerequisite: graduate standing; and either NURS 547 or permission of instructor. Offered: A.

NURS 509 Issues in Violence and Aggression for Health Professionals (3) Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

NURS 514 Physiologic Adaptations During Pregnancy and Postpartum (1-3, max. 6) Analyzes the physiologic adaptations in the maternal-fetal-neonatal unit, fetal development, and developmental adaptations in children from infancy to adolescence. Implications of normal and altered physiologic functions for nursing practice and examination of the basis for selected nursing intervention strategies.

NURS 515 Common Adolescent Health Problems (2-3) Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

NURS 517 Pediatric Pulmonary Anatomy, Physiology, and Pathophysiology: Clinical Applications (2) Content includes normal pediatric lung development infancy through adolescence and explores evidence for diagnosis, management, and follow up of commonly encountered respiratory problems. Emphasizes coordination of care with multiple disciplines when diagnosing and treating children with special health care pulmonary needs and family centered care and professional leadership role. Prerequisite: permission of instructor. Offered: Sp.

NURS 518 Child Management I: Acute Conditions (3) Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.

NURS 520 Evaluation of Clinical Performance in Nursing (3) For graduate students preparing for faculty or staff development positions in nursing. Theory

and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 524 Conceptual Foundations for Healthcare Systems: Organizational Structure and Effectiveness (4) Examines the healthcare delivery system and systems of care within it, including evolution and structure of organized healthcare in the United States, key drivers of organizational effectiveness, components of care systems, and Innovations in care system design and adoption. Explores use of various types of information technology to monitor and increase organizational effectiveness. Prerequisite: graduate standing. Offered: A.

NURS 525 Managing Quality Improvement, Access and Utilization (5) Care-system practices for managing quality and process improvement, access, and utilization within health care systems. Emphasis on managing care systems with a focus on leadership, healthcare access and resource utilization among diverse populations, reimbursement models and team-based strategies, and impacts on healthcare delivery from policy, leadership, and practical perspectives.

NURS 529 Childhood Common Developmental and Behavior Issues (2) Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

NURS 534 Aging and Health in Contemporary Society (3) Explores demographic, cultural, psychological, theoretical, political, and ethical context of aging and health in contemporary society. Content is based on empirical data and policy statements on aging. Analyzes healthcare delivery at an individual, community, and systems level to support optimal functioning across the health continuum for older adults. Offered: Sp.

NURS 535 Pharmacotherapeutics for Acute/Critical Illness (3) Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimens for patients with acute/critical illness or injury. Current evidence together with pharmacotherapeutic principles are considered within the clinical context as the basis for decision-making in acute/critical care clinical practice. Prerequisite: PHARM 514 or equivalent Offered: Sp.

NURS 537 Symptom Science and Patient-reported Outcomes Research (3) Focuses on research to understand symptom development and trajectories, design of interventions to prevent and treat symptoms and improve function and quality of life across diverse populations. Recommended: Graduate Student Offered: Sp.

NURS 539 Management of Patients with Acute/Critical Illness and Injury I (4) Systematic inquiry into pathophysiology and management of the acute/critically ill or injured across the lifespan. Emphasizes evidence-based assessment, management, and evaluation strategies, including therapeutics and use of technology to support care. Highlights advanced practice provider role and multidisciplinary approach to management. Offered: W.

NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (1-6, max. 12) Guided seminar that focuses on selected biobehavioral and health system topics.

NURS 541 Sexual and Reproductive Healthcare (2/3) Examines advanced practice sexual and reproductive healthcare issues including health maintenance, contraceptive care, and diagnosis, and treatment of sexual and reproductive health problems across the lifespan. Prerequisite: permission of instructor. Offered: W.

NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (1-4, max. 4) Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to the normal childbearing client during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (3) Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to at-risk childbearing client during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural

environment, and healthcare system.

NURS 546 Interpersonal Therapeutics in Advanced Psychiatric Mental Health Nursing: Current Perspectives (3) Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Management of Psychiatric Disorders: Adult (3) Addresses existing and emerging knowledge of neuroscience regarding gene-environment interactions. Examines complex population-based mental health features, pathologies, development, and courses of psychiatric disorders. Applies diagnostic features and evidence-based management strategies among adults at the individual, family, population-based, and system levels. Prerequisite: graduate standing in nursing or permission of instructor; recommended: NURS 546; NURS 549; and NURS 564

NURS 549 Assessment in Psychosocial Nursing (3) Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners' cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

NURS 552 Wellness, Health Promotion, and Disease Prevention (3) Covers theoretical perspectives and evidence for wellness, health promotion, disease prevention, and risk reduction through the lifespan for advanced practice nursing. Examines issues impacting individual, family, population, and community health related to context and culture. Includes strategies for health promotion and behavior change at individual, family, population, and community levels.

NURS 554 Management of Psychiatric Disorders: Adult and Adolescent (3) Focuses on advanced nursing management strategies for psychiatric disorders and primary mental health conditions. Emphasizes the synthesis and integration of scientific evidence to formulate psychiatric diagnoses, and select appropriate interventions for individuals, families, and communities. Measures outcomes through practice inquiry at both system and policy levels. Prerequisite: NURS 549.

NURS 557 Health, Culture, and Community (3) A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.

NURS 560 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with HSERV 508.

NURS 561 Selected Topics in Comparative Nursing Care Systems (2/3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and healthcare systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and healthcare stressed.

NURS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of culturally relevant healthcare. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

NURS 564 Biological Intervention in Advanced Practice Psychiatric/Mental Health Nursing (4) Focuses on the current literature of biological interventions in advanced practice psychiatric/mental health nursing. Applies a lifespan perspective to management of biological interventions including pharmacotherapy and other biological interventions. Examines the role of the advanced practice psychiatric/mental health nurse, including ethical and legal issues. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

NURS 566 Work Stress and Health (3) Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job-stress are considered and methodological issues examined. Uses social justice framework to explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp.

NURS 568 History and Politics of Abortion and Family Planning (3) Uses equity-driven approach to explore the complexities of abortion and family planning as political issues within a historical context. Reviews the history of abortion, contraception, and family planning policies in the United States up to the Dobbs decision (2022), public health implications of family planning policies up to Dobbs, and potential areas of common ground to bring people with differing personal beliefs closer together.

NURS 569 Management of Patients with Acute/Critical Illness and Injury II (2/3) Continuing inquiry into pathophysiology and management of the acute/critically ill or injured patient across the lifespan. Emphasizes evidence-based assessment, management, and evaluation strategies, including therapeutics and use of technology to support care. The advanced practice provider role and multidisciplinary approach to management are emphasized. Prerequisite: NURS 539 or permission of instructor.

NURS 570 Systems Approach to Abortion Care (4) Using a trauma-informed perspective, examines the history and current legal landscape of abortion practice for advanced practice clinicians in the United States. Discusses strategies for practice management and wellness, and legislation/regulation in this specialty area.

NURS 572 Advanced Sexual and Reproductive Healthcare (3) Explores advanced issues within sexual and reproductive health care. Includes complex management of contraception, public health and community-based sexual and reproductive healthcare models, post-sexual assault care, advanced management of sexually transmitted infections and genital infections, gender-affirming care, and fertility care. Prerequisite: NURS 541 or permission of instructor.

NURS 573 Foundational Seminar in Advanced Practice Nursing (1) Explores specific advanced practice nursing roles and populations within the healthcare system. Links historical development and analysis of health care trends with contemporary specialty practice. Exploration of current issues and trends in the specialty. Credit/No Credit only. Credit/no-credit only.

NURS 576 Assessment and Collaboration with Communities and Systems (3) Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.

NURS 577 Management of Abortion and Early Pregnancy Loss (4) Covers diagnosis/assessment and management of medication and procedural abortion care for use with elective abortion and early pregnancy loss. Topics include values clarification; non-directive options counseling; trauma-informed care; pharmacology of abortion medications; and evidence-based management strategies of abortion and early pregnancy loss using medications, aspiration, dilation and evacuation, and induction. Prerequisite: either enrollment in the Graduate Certificate in Sexual and Reproductive Health, or by permission of Graduate Certificate lead.

NURS 579 TraNScultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

NURS 580 Current Issues in Occupational and Environmental Medicine (2/4, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Offered: jointly with ENV H 596; SpS.

NURS 581 Global Health Nursing (3) Reviews global health topics and the complex local and global conditions that affect the health and illness of individuals, communities, and populations. Emphasizes the multi-faceted roles of health care

providers. Offered: jointly with G H 574; A.

NURS 582 Culture, Society, and Genomics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521; Sp.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3-4) Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically analyze various public health policies from a social justice framework.

NURS 587 Leadership and Team Science Seminar (1.5, max. 3) Facilitates transition to graduate study and future professional roles. Addresses leadership and future roles, cross-disciplinary teamwork, positionality, diversity, equity, and inclusion, as well as communication competencies. Topics include collaboration and facilitation, giving and receiving feedback, leadership, team science, organizational culture, change management, and career development strategies. Recommended: graduate student standing. Credit/no-credit only. Offered: AW.

NURS 588 Philosophical Inquiry and Nursing Science (4) Focuses on the epistemological and ontological basis of forms of inquiry for generating knowledge in nursing. Emphasizes approaches to knowledge development as applied to phenomena in nursing. Includes critique of conceptual issues among schools of thought and how philosophical underpinnings influence the generation of research questions. Prerequisite: matriculated student in PhD in Nursing Science Program. Offered: A.

NURS 589 Application of Theory and Evidence in Nursing Science (4) Addresses the role of theory in guiding scientific inquiry in nursing. Concept and theory development, analysis, and critique are examined as foundational to the scientific evidence that informs nursing inquiry, practice, and systems/contexts of health. Distinct approaches for synthesizing and representing knowledge about health phenomena are reviewed for their theoretical elements and contributions to the quality of evidence in nursing science. Prerequisite: NURS 588, or permission of instructor; recommended: matriculation in the PhD in Nursing Science Program Offered: W.

NURS 590 Ecology of Human Health (5) Provides conceptual foundation for the study of human health ecology within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied. Provides the basis for evaluation and developing therapeutic approaches to improve health.

NURS 592 The Science of Therapeutics: Theoretical Foundations (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems. Prerequisite: NURS 590 or equivalent with permission of instructor.

NURS 595 Synthesis of Nursing Science (4) Provides a forum for the development of a grant proposal in a focused area of nursing science including development of specific aims, background and significance, choosing a research design and method to answer research questions, choosing outcomes and measures, constructing the analysis plan, and addressing important human subject issues. Practice and participation in the peer review process via mock scientific reviews and written critiques. Prerequisite: completion of the year 1 core PhD curriculum; successful completion of preliminary examination. Credit/no-credit only. Offered: W.

NURS 596 Colloquium, Scientific Conduct, and Dissertation Seminar (1, max. 6) Provides students in the nursing science doctoral program with opportunity to share and discuss dissertation progress and challenges, including insight, accountability, and support for finishing their dissertation, as well as defining and seeking out next career steps. Credit/no-credit only.

NURS 597 Health in the Context of Culture (5-6, max. 24) Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.

NURS 599 Selected Readings in Nursing Science (1-6, max. 18) Analysis of synthesis of selected readings with faculty mentor. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSps.

NURS 610 Teaching Practicum (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching/learning at the university level and designed to target specific teaching competencies enhancing the student's ability to make innovative contributions in teaching. Prerequisite: student in doctoral program; permission of faculty member Credit/no-credit only. Offered: AWSps.

NURSING CLINICAL

NCLIN 301 Practicum: Health Assessment and Foundational Skills for Nursing Practice (6) Focuses on foundational nursing skills including health assessment, interviewing and communication, as well as psychomotor skills and critical thinking in the context of nursing care to individuals across the lifespan. Person-centered care and patient safety are emphasized through use of simulation.

NCLIN 302 Practicum: Health Assessment (3) First in a series of clinical courses emphasizing beginning nursing skills. These skills will include health assessment of the individual and family, communication, and interviewing. Predominant themes include communication skills, physical and psychosocial assessment of the individual across the developmental life span. Offered: A.

NCLIN 306 Practicum: Foundational Skills for Professional Nurses ([1-3]-, max. 6) This laboratory-based course focuses on psychomotor skills and critical thinking in the context of nursing care to individuals across the lifespan. Patient safety and quality; person-centered care are emphasized through use of simulation. Prerequisite: NCLIN 302, which may be taken concurrently. Credit/no-credit only. Offered: AWSp.

NCLIN 403 Practicum: Pediatric Nursing (4) Provides supervised acute/chronic illness nursing care to pediatrics clients. Emphasizes beginning skills in systematic health and developmental assessment, including person/environment fit, basic competency in selected nursing therapies, and developing role as care agent for pediatrics clients and their families. Prerequisite: NURS 401, may be taken concurrently. Credit/no-credit only. Offered: WSp.

NCLIN 407 Practicum: Nursing Care of Ill Adults (5) Provides supervised nursing care to ill adults and their families. Emphasizes systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing a role as a professional nurse. Prerequisite: NURS 401, which may be taken concurrently. Credit/no-credit only.

NCLIN 409 Population Health Through Community Health Nursing Partnerships (4) Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health, and to promote health/prevention of injury and disease. Credit/no-credit only.

NCLIN 411 Transition to Clinical Practice (7) Capstone clinical in a specialty focusing on critical examination, synthesis, and evaluation of professional nursing care. Client populations include individuals and/or groups reflecting diverse settings, ages, and ethnic communities. Emphasis on mastering theoretical concepts, applying theory and research findings, improving skill competency, and developing leadership capabilities in the clinical setting. Credit/no-credit only.

NCLIN 416 Practicum: Care of Childbearing Families (2) Provides the opportunity for supervised nursing of childbearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing. Prerequisite: NURS 415, which may be taken concurrently. Credit/no-credit only. Offered: WSp.

NCLIN 418 Practicum: Psychosocial Nursing (3-4) Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Credit/no-credit only. Offered: AW.

NCLIN 422 Practicum: Ambulatory Care (3) Provides opportunity for simulated and supervised nursing of individuals in a variety of ambulatory care settings. Discussion of organization of ambulatory care within the health care system and role of professional nursing. Emphasizes concepts of episodic care, triage, health promotion and education, interdisciplinary communication, care coordination, and resource and environmental management. Prerequisite: NCLIN 407. Offered: A.

NCLIN 475 Foundations of Interprofessional Practice ([0-1]-, max. 3) Team-based training in healthcare team functioning for professional nursing students. Students work and co-learn with other health sciences students in applying knowledge of evidence-based practice, quality improvement principles, and informatics to patient-centered care situations. The course will provide careful attention to development of intra- and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSp.

NCLIN 490 Special Laboratory Elective (1-4, max. 4) Provides supervised laboratory experience to enhance and document clinical skills and decision making. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 499 Clinical Practicum Elective (1-5) Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.

NCLIN 500 Comprehensive Health Assessment (3) Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial, physiological, psychosocial, occupational, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWS.

NCLIN 501 Diagnostic Health Assessment (1-5, max. 5) Examines evidence-informed clinical decision-making in the advanced assessment of symptoms experienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Prerequisite: NCLIN 500, which may be taken concurrently. Credit/no-credit only. Offered: AWS.

NCLIN 502 Pediatric Diagnostic Health Assessment ([1-4]-, max. 4) Uses didactic and experimental learning to develop evidence informed advanced assessment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial, physiological, psychosocial, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

NCLIN 505 Diagnostic Management and Decision Making (2-5) Examines diagnostics pertinent to adult and geriatric illnesses from individual and population perspectives in the context of evidence, risk/benefits, equity, cost, access and care quality. Case analyses integrate health assessment and differential diagnoses into selection of appropriate tests. Includes didactic and laboratory/simulation components. Prerequisite: NCLIN 501 or equivalent. Offered: W.

NCLIN 508 Seminar in Group Treatment (1) Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

NCLIN 511 Introduction to Perinatal Care for Advanced Practice (1) Provides an introduction to women's health and prenatal care visit structure, documentation, and skill development necessary to be successful in advanced practice clinical practicum. Both didactic and experiential learning will be used to prepare students for the systematic collection of subjective and objective data and clinical decision-making in the clinical setting. Intended for NM and PNS students. Prerequisite: permission of track lead. Credit/no-credit only. Offered: W.

NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35) Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the collaboration of care with individuals and/or groups. Credit/no-credit only.

NCLIN 514 Seminar in Home Care for Chronic Illness (3) Home-care services as component of community health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

NCLIN 516 Advanced Clinical Practicum I (4-5) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals and groups. Credit/no-credit only. Offered: Sp.

NCLIN 517 Advanced Clinical Practicum II (5-7) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: S.

NCLIN 518 Advanced Clinical Practicum III (5-7) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: A.

NCLIN 519 Newborn Assessment for Advanced Practice (1) Credit/no-credit only.

NCLIN 520 Clinical Reasoning and Assessment Across the Lifespan (2) Provides the framework to begin evidence-informed clinical decision-making in the advanced assessment of patients across the lifespan. Includes didactic and experiential learning in systematic collection, integration, analysis, interpretation, and communication of focused subjective and objective data, including formulation of diagnostic hypotheses. Emphasizes a holistic approach. Credit/no-credit only. Offered: A.

NCLIN 521 Diagnostic Decision Making and Clinical Skills Laboratory (2) Designed to enhance student's knowledge, performance, and interpretation of various diagnostic tests and clinical procedures in multiple settings. Includes skills across the age span. Skill demonstration and validation occur in the lab classroom. Co-requisite: NCLIN 516; permission of instructor. Credit/no-credit only.

NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit

only. Offered: A.

NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: Sp.

NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to health-related organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to systems-level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention ([3-6]-, max. 18) Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. Prerequisite: admission to Infant Mental Health certificate program. Credit/no-credit only. Offered: AWSp.

NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues. Capstone experience for clinical practicum. Prerequisite: NCLIN 541. Credit/no-credit only.

NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Prerequisite: NCLIN 542. Credit/no-credit only.

NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Prerequisite: NCLIN 543. Credit/no-credit only.

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Prerequisite: permission of instructor, or NCLIN 501 or equivalent. Credit/no-credit only.

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 549 or permission of instructor. Credit/no-credit only.

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 550 or permission of instructor. Credit/no-credit only.

NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10) Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Prerequisite: NCLIN 551. Credit/no-credit only.

NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3) Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: DNP nursing student or permission of instructor. Credit/no-credit only.

NCLIN 567 Advanced Practice Clinical Practicum (1-6, max. 22) Practicum used to expand, deepen, or enrich advanced practice skills relevant to area of specialty preparation. Uses clinical activities to reflect an integration of advanced practice, leadership, and practice inquiry. Emphasizes self-directed learning, in-depth clinical skill building and decision-making, continuity of care, and inter professional collaboration. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 579 Clinical Practicum in Sexual and Reproductive Health (1/2, max. 2) Provides hands-on learning of medication and procedural abortion skills. Prepares students to independently perform both of these skill sets for abortion and/or early pregnancy loss, and manage most complications that may arise. Prerequisite: NURS 577 and permission of instructor. Credit/no-credit only.

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25) Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: matriculated MN, DNP students, or post-master's student, and permission of academic adviser and instructor. Credit/no-credit only. Offered: AWSpS.

NCLIN 798 Tripartite Immersion Practicum ([1-5]-, max. 5) Practicum to synthesize and expand knowledge and skills in application of tripartite role of advanced practice, inquiry, and leadership. Analysis of practice issues including reflective practice, collaboration, health systems, technology, ethics, and policy. Prerequisite: permission of instructor and Supervisory Committee. Credit/no-credit only.

NCLIN 801 Advanced Clinical Practicum Immersion (7-9) Immersion clinical practicum and seminar providing opportunities to integrate advanced nursing practice competencies, leadership, professional role, and collaboration with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Offered: AW.

NURSING METHODS

NMETH 210 Science, Evidence and Health: Mastering Health Information and Personal Health Technologies (4/5) SSc/NSc, DIV Provides foundations for becoming skilled consumers of health information and health technologies. Using current topics in health, students will learn to navigate the available health information, understand its quality, become familiar with personal health

technologies, and link information learned to their health and the health of their communities. Offered: W.

NMETH 403 Introduction to Research in Nursing (1/3, max. 3) Introduction to concepts and processes of research used in investigating nursing problems.

NMETH 416 Methods for Research and Inquiry in Nursing I (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on appraising literature and methods for generating evidence. Offered: A.

NMETH 417 Methods for Research and Inquiry in Nursing II (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on searching evidence, appraising evidence, and classifying different types/levels of evidence. Offered: W.

NMETH 418 Methods for Research and Inquiry in Nursing III (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on identifying gaps in the literature/evidence, and formulating a plan to conduct research. Offered: Sp.

NMETH 419 Application of Methods for Research and Inquiry in Nursing (2) Apply methods for contributing to evidence relevant to nursing. In small groups identify, implement, and disseminate a plan for generating, evaluating, synthesizing, or translating evidence around health, healthcare, and/or nursing practice. Offered: Sp.

NMETH 450 Informatics, Patient Safety, and Quality Improvement (3) Explores concepts of the patient safety, quality and cost-effectiveness of health care, root cause analysis, and use of information technologies that promote quality and safety. Culminates in the design, implementation and evaluation of a small test of change with presentation of findings. Prerequisite: NMETH 403 or ABSN status; recommended: NMETH 403 ABSN status

NMETH 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem. Credit/no-credit only.

NMETH 520 Scholarly Inquiry for Clinical Informatics Practice (4) Prepares students to evaluate completed research for scientific adequacy and applicability to clinical informatics practice. Students apply conceptual, theoretical, ethical, and empirical knowledge as a basis for posing clinical informatics research questions, identifying research designs, selecting sampling and data collection strategies and proposing analytic methods to answer a research question. Offered: Sp.

NMETH 522 Data Management for Research Professionals (4) Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no-credit only.

NMETH 523 Project Management and System Analysis for Health Informatics (3) Application of methods of inquiry to develop a scholarly proposal through faculty-guided individual composition. Students select the project topic and complete the conceptual phase of proposal development to fulfill their project plan. Offered: A.

NMETH 524 Healthcare Information Systems and the Electronic Health Records (3) Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in healthcare organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: W.

NMETH 526 Patient-Centered Technologies (3) Current and emerging consumer-centric eHealth technologies. Theories and principles of health, communication, information, cognitive processing, and human-technology interaction. Experts from multiple disciplines and patient/consumers lead seminar presentations and discussions on select topics. Addresses ethical implications of these tools, including health disparities. Offered: Sp.

NMETH 527 Introduction to Clinical Informatics (3) Overview of the history, current efforts, and future challenges in designing, developing, and implementing information and communication technologies for healthcare. Examines how these technologies fulfill the Quadruple Aim: enhancing the patient experience, improving population health, reducing the overall cost of care, and improving the work life of health care providers. Offered: A.

NMETH 528 Computing Fundamentals for Health Professionals (3) Survey of applied computing concepts, including computer algorithms, operating systems, networking, databases, digital privacy and security, applied programming principles to enhance productivity, and data science opportunities and pitfalls in healthcare. Offered: W.

NMETH 529 Database Concepts and Applications in Clinical Informatics (3) Introduction to relational database theory and technology from a clinical informatics perspective. Focuses on transactional database theory, architecture, and implementation in a socio-technical context and analyzes database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Offered: Sp.

NMETH 530 Scholarly Proposal Development (4) Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided individual composition. Students select a project topic and complete the conceptual phase of proposal development to fulfill their project plan. Prerequisite: NMETH 520. Offered: S.

NMETH 533 Appraisal and Translation of Evidence for Practice (5) Designed to enhance use of methods to critically appraise literature, design, and implement processes to evaluate outcomes of practice, and promote patient-centered care. Applies relevant findings to improve practice, develop guidelines, and use information technology and research methods. Includes dissemination of findings. Prerequisite: either NMETH 535 or permission of instructor.

NMETH 535 Nursing Inquiry to Support Evidence-Based Practice (4) Works to understand and apply conceptual, ethical, and practical aspects of quantitative and qualitative research methods by design, sampling, data collection, measurement, and analysis, as a basis for evaluating and generating evidence for nursing practice. Develops skills in data management and statistical analysis to utilize in practice-based inquiry. Prerequisite: either NGS 555 or permission of instructor.

NMETH 536 Methods of Program Evaluation and Quality Improvement (4) Teaches principles and practice of program evaluation and quality assurance. Emphasizes current practices in designing, managing, evaluating, and disseminating finding for use in a variety of healthcare contexts. Includes content on use of informatics to improve healthcare delivery effectiveness, efficiency, and safety. Prerequisite: either NMETH 535, which may be taken concurrently, or permission of instructor.

NMETH 570 Seminar in Clinical Research in Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.

NMETH 575 Methodological Issues in Family Research (3) Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to health situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

NMETH 579 Quantitative Research Methods (5) Provides the foundation for appraising and designing quantitative research (non-experimental, quasi-experimental, and experimental), including research questions, hypothesis testing, methodological and analytic approaches for nursing and health-related sciences. Prerequisite: matriculated student in PhD Nursing Science Program; recommended: epidemiology; and Advanced Nursing Science via Scholarly Inquiry, Translational methods. Offered: Sp.

NMETH 580 Methodological Perspectives in Nursing Inquiry (3) Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci include the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods. Prerequisite:

NURS 588 or permission of instructor.

NMETH 581 Observational Research Methods (2-6, max. 6) Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

NMETH 582 Qualitative Research Inquiry and Methods (4) An introductory seminar appraising multiple interpretive traditions, methodologies, and research questions, designs and methods for knowledge development about health related issues. Explores moral, ethical, and research consent issues. Prerequisite: graduate standing. Offered: Sp.

NMETH 583 Advanced Qualitative Research Methods (4) Advanced seminar and practicum focused on study design, analysis, and dissemination within a selected interpretive tradition. Demonstration of a selected research strategy and method is required. Prerequisite: prior introductory course about qualitative research; and completion of a pre-course survey to determine course preparation.

NMETH 584 Methods: Physiologic Measures (4) Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 588 Mixed Methods Research for Health Sciences (4) Focuses on understanding research designs that combine qualitative and quantitative data collection, analysis and integration to answer critical healthcare questions. Includes application of analysis and synthesis of selected design approaches using real data. Prerequisite: graduate student standing. Foundational graduate level quantitative and qualitative research courses. Permission of instructor. Offered: A.

NMETH 590 Special Topics in Nursing Research (2-5, max. 9) Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NMETH 591 The Science of Therapeutics: Design and Outcomes (4) Synthesizes advanced strategies to evaluate the short- and long-term outcomes of clinical therapeutics with special emphasis on feasibility, pilot studies, and randomized control trials. Includes analysis of completed studies as well as the design of a randomized control trial of a clinical therapeutic. Prerequisite: NMETH 579, NURS 592, or permission of instructor.

NMETH 592 Clinical Outcome Research II (2-4, max. 4) Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in NMETH 591. Two modules are offered: a) case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.

NMETH 594 Innovations in Health Systems Delivery: Implementation and Measurement (3) Overview of T3/T4 research focusing on translation of effective interventions into practice and the community. Innovations in health services research including frameworks, appropriate study designs, methods, modalities, strategies and tools (formative, implementation, dissemination and communication). Introduces basic cost/comparative effectiveness. Prerequisite: graduate standing. Offered: W, odd years.

NMETH 595 Designing a Theory-Driven Behavioral Intervention (3) Focuses on design and development of a theory- and population-informed behavioral intervention to enhance health behavior and outcomes. Examines selected theories of health behavior, including potential contribution to framing a behavioral intervention. Analytical process of "fitting" a theory onto an observed health related problem in a specific population is included as well as research designs and methods to evaluate interventions. Prerequisite: NURS 589 (or equivalent), or permission of instructor; recommended: graduate-level standing.

NMETH 596 Application of Methods in Conduct of Research (5) Develops knowledge and skills related to practical implementation of research projects for PhD students. Areas include protocol development, IRB procedures and applications, standard operating procedures, data management, study staff composition, community advisory boards, budget management, and study oversight. Prerequisite: graduate standing in Nursing, or permission of instructor. Offered: Sp.

NMETH 598 Special Projects ([1-12]-, max. 12) Fulfills the requirements of the non-thesis option for Master's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Prerequisite: NMETH 520 or permission of instructor. Credit/no-credit only.

NMETH 600 Independent Study or Research (*-) Credit/no-credit only.

NMETH 610 Research Practicum (2-4, max. 8) Hands-on, practical experience as a member of a research team, supervised by graduate faculty in Nursing or related disciplines. Students will participate in team meetings, complete reflection assignments, and contribute to study activities. Possible areas of contribution include subject recruitment and screening; instrument development; data collection, management or analysis, interpretation of results; and dissemination or report writing. Prerequisite: PhD students in Nursing Science. Credit/no-credit only. Offered: AWSpS.

NMETH 700 Master's Thesis (*-) Credit/no-credit only.

NMETH 800 Doctoral Dissertation (*-) Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator. Credit/no-credit only.

NMETH 801 Practice Doctorate Project (3-, max. 6) Addresses a clinical or systems problem using an evidence-based, practice relevant approach. Students engage in self-reflection, collaborative partnership building, and use of leadership strategies. Analyzes implications of project for future practice and practice inquiry activities. Culminates in written and oral reports for dissemination. Recommended: Student in final year of program Credit/no-credit only. Offered: AW.

SCHOOL OF PHARMACY

HEALTH ECONOMIC OUTCOMES RESEARCH

HEOR 500 Introduction to Pharmacoeconomics and Outcomes Research (2) Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.

HEOR 505 Managed Care Pharmacy: Principles and Practice (2) Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. Class 2, 3, and 4 PharmD students. Offered: A.

HEOR 510 Systematic Reviews and Meta-Analysis (2) Provides students an overview of best practices to conduct a systematic review of an intervention; then analyzing data through meta-analytic methods. Classroom activities solidify topics covered in lectures and readings. Collaboration with another student to complete a systematic review. Recommended: a basic understanding of statistics and a background in evidence-based medicine. Offered: Sp.

HEOR 520 Pharmacoepidemiology (3) Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with EPI 533.

HEOR 530 Economic Evaluation in Health and Medicine (3) Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and

pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: A.

HEOR 533 Advanced Methods in Economic and Outcomes Evaluation in Health and Medicine (3) Seminar course covering advanced methods and techniques for evaluating costs, outcomes, and cost-effectiveness of health, medical, and pharmaceutical interventions. Topics include: network meta-analysis, Markov modeling, probabilistic sensitivity analysis, value of information analysis, utility mapping, conjoint analysis, and budget impact analysis. Prerequisite: HEOR 530. Offered: WSp.

HEOR 534 Assessing Outcomes in Health and Medicine (3) Seminar course covering concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: HEOR 530; either BIOST 511; BIOST 512; and BIOST 513 (which may be taken concurrently), or BIOST 517 and BIOST 518; EPI 512 and EPI 513 (or equivalent); and permission of instructor. Offered: jointly with HSERV 584; Sp.

HEOR 540 Health Economics (3) Applies microeconomics principles and models to understand the nature of healthcare markets and systems. Includes a wide range of health sector activities and policy issues studied by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

HEOR 545 Methods in Pharmaceutical Policy Analysis (4) Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.

HEOR 550 Bayesian Biostatistics (3) Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor's permission. Offered: jointly with BIOST 526/EPI 540; Sp.

HEOR 551 Advanced Health Services Research Methods III: Causal Inference Using Observational Data ([4/5]-) Focuses on reviewing statistical methods developed for "micro" (individual-level) data on behavior (choices or exposures) and outcomes in order to make causal inference about the role of a choice or an exposure on outcomes. Prerequisite: either HSERV 523, BIOST 511, BIOST 512, BIOST 513, or permission of instructor. Offered: jointly with HSERV 525.

HEOR 552 Application of Machine Learning in Health Economics and Outcomes Research (3) Provides students with a general understanding of the application of machine learning methods to health economics and outcomes research (HEOR). Prerequisite: either PHRMCY 514, or BIOST 511; BIOST 512; and BIOST 513, or BIOST 517 and BIOST 518. Offered: Sp.

HEOR 597 Graduate Seminar (1, max. 24) Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Prerequisite: graduate program student. Credit/no-credit only.

HEOR 598 Program in Health Economics and Outcomes Research Methodologies Seminar (1, max. 12) Research seminar on topics in health economics and outcomes research methodologies Credit/no-credit only. Offered: AWSpS.

HEOR 599 Independent Research (1-6, max. 24) Provides for independent study or project-based learning in health economics and outcomes research undertaken under the individual direction of a faculty member Prerequisite: permission of instructor; recommended: PHARM 520 or PHRMCY 514. Credit/no-credit only. Offered: AWSpS.

HEOR 600 Independent Study or Research (*-) Credit/no-credit only.

HEOR 700 Master's Thesis (*-) Credit/no-credit only.

HEOR 800 Doctoral Dissertation (*-) Credit/no-credit only.

MEDICINAL CHEMISTRY

MEDCH 327 The Science of Drugs (3) NSc Introduces students to medicinal chemistry and pharmaceutical sciences. Recommended for sophomore, junior and senior students majoring in chemistry, biochemistry, bioengineering, chemical engineering, public health and other health sciences, and related fields. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; recommended: basic knowledge in general chemistry and organic chemistry. Offered: jointly with PCEUT 327; Sp.

MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 499 Independent Study/Research (*, max. 24) Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

MEDCH 500 Fundamental Medicinal Chemistry (2) Provides pharmacy students a working knowledge of different aspects of chemical and physical properties of drugs, such as chemical bonds, functional groups, acid and base properties, stereochemistry, ADME properties, and organic transformations in drug actions and metabolism. Recommended: completion of undergraduate organic chemistry series. Offered: A.

MEDCH 501 Medicinal Biochemistry (3) Provides a working knowledge of biochemistry directly related to understanding disease and drug therapy in pharmacy practice. Areas of study include drug metabolism, principles of enzyme kinetics and receptor theory, signal transduction, lipids and membrane transport, structure and function of antibodies, and regulation of protein expression and modification. Recommended: completion of undergraduate biochemistry series. Offered: W.

MEDCH 520 Seminar (1, max. 30) Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with PCEUT 520.

MEDCH 521 Advanced Medicinal Chemistry (3) Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Offered: Sp.

MEDCH 527 Advanced Drug Metabolism (2) Considerations of the enzymology and mechanisms of biotransformation and disposition of drugs and foreign compounds. Includes chemical and biochemical reaction mechanisms, enzyme induction mechanisms, kinetics of inhibition and activation, inter-individual differences in metabolism and bioactivation and toxicity. Prerequisite: MEDCH 529, PCEUT 502, or permission of instructor; recommended: knowledge of chemical and biochemical mechanisms; knowledge of enzyme kinetics; and knowledge of chemical and cellular toxicity. Offered: jointly with PHCOL 527; W.

MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (2) Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-protein-interactions and protein-lipid interactions, and methods for their study. Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W, even years.

MEDCH 529 Advanced Medicinal Chemistry (4) Covers the fundamental aspects of contemporary medicinal chemistry. Discusses the chemical characteristics of drugs and drug targets, pharmaceutical properties of drugs, drug metabolism, toxicology, and pharmacogenetics. Focuses on various drug classes; their biochemistry, pharmacology, mechanism of action, and toxicology. Offered: A.

MEDCH 530 Integrated Pharmacology (1) Students present and discuss primary literature that integrates aspects of medicinal chemistry and pharmacokinetics with the physiology, pharmacology, and genetics of therapeutic drug targets. Examples of targets discussed include ion channels and enzymes relevant to cardiovascular

disease, and neurodegenerative disease. Credit/no-credit only. Offered: Sp.

MEDCH 531 Laboratory Methods in Protein Therapeutics (3) Hands-on experience with laboratory methods and data analysis used to characterize biophysical properties of therapeutic antibodies. Students measure functional protein interactions and stability of constructs currently used for anti-body-based therapeutics. Background lectures from industry and government scientists highlight the role of these analyses in development of protein-based therapeutics.

MEDCH 532 Chemical and Molecular Pharmacology I: Autonomic and Cardiovascular Drugs (5) Chemical and molecular properties of drugs, their mechanism of action, and adverse effects. Drugs that act on the autonomic nervous system, used to treat endocrine disorders and pathologic conditions that disrupt pulmonary or cardiovascular function, including diabetes and dyslipidemia. Prerequisite: MEDCH 500 and MEDCH 501. Offered: A.

MEDCH 533 Chemical and Molecular Pharmacology II: Blood, CNS, Endocrine and GI Drugs (4) Chemical and molecular properties of drugs, their mechanism of action and adverse effects. Focuses on drugs that act on the blood, in the brain, and are used to treat hematological disorders, inflammation, pathologic conditions that disrupt central nervous system function, and gastrointestinal disorders. Prerequisite: MEDCH 500 and MEDCH 501. Offered: W.

MEDCH 535 Diagnostic Medicinal Chemistry (3) Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Offered: W.

MEDCH 541 Biological Mass Spectrometry (3) Covers the basics of modern ionization methods and mass analyzers; small molecule structure assignment, quantitative assay development by LC-MS and metabolomics; quantitative discovery-based proteomics and validation methods; and peptide sequence determination, post-translational modification mapping, and protein structure determination methods. Prerequisite: permission of instructor. Offered: Sp.

MEDCH 551 Flavin and Heme-Containing Monooxygenases (1) Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavin-containing monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 552 Computational Peptide Design (1) Discussion of computational and experimental strategies for the de novo design of peptide-based diagnostics and therapeutics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1) Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 554 Biophysical and Structural Virology (1) Discusses current topics in virus research and literature. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 555 Biophysics and Pharmacology of Dynamic Proteins (1) Discusses current topics in protein dynamics, focusing on intrinsically disordered proteins and drug-metabolizing enzymes. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1) Discussion of research methodologies and new approaches to elucidate chemical mechanisms and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity.

Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 557 Antibody-Antigen Interactions (1, max. 10) Discussion of research strategies, methods, and current literature in characterizing the structures of antibody-antigen interactions with an emphasis on carbohydrate interactions. Weekly sessions are led by all participating members of the research group. Prerequisite: Permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 558 Human Cytochrome P-450 Biochemistry (1) Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 559 Biosynthesis, Metabolism, and Analysis of Lipids (1) Covers recent advanced on oxidative metabolism of lipids, lipid biosynthesis, and application of advanced mass spectrometry to the analysis of lipids and oxidized lipids. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 561 Immunizing and Antimicrobial Agents (3) A course for pharmacy students focused on introducing the major classes of antimicrobial drugs for treatment of bacterial, viral, and fungal infections. For antimicrobial agents, the focus is on mechanisms of action and drug targets rather than for therapeutic applications. The course will also discuss the issue of antibiotic resistance. In the second half of the course the primary focus will be on vaccines for infectious disease. Prerequisite: MEDCH 501 or equivalent, PharmD major, or permission of instructor; recommended: completion of undergraduate Biochemistry series. Offered: Sp.

MEDCH 562 Medicinal Chemistry (3) Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 563 Medicinal Chemistry (3) Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

MEDCH 564 Medicinal Chemistry (3) Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.

MEDCH 580 Current Trends in Pharmacy Science and Practice (1, max. 2) Current topics in active research relevant to professional pharmacy practice. Topics include drug metabolism, molecular mechanisms of diseases progression, large molecule drug development and analysis, or related to research within the Department of Medicinal Chemistry. Prerequisite: School of Pharmacy professional or graduate student standing. Undergraduate students with permission of instructor. Credit/no-credit only. Offered: A.

MEDCH 582 Topics in Medicinal Chemistry (1, max. 30) Discussion of pertinent articles from current literature. Credit/no-credit only. Offered: AWSpS.

MEDCH 599 Cumulative Exams for Medicinal Chemistry (1) Quarterly cumulative examinations for graduate students. Credit/no-credit only. Offered: AWSpS.

MEDCH 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

MEDCH 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

MEDCH 800 Doctoral Dissertation (*-) Credit/no-credit only. Offered: AWSpS.

PHARMACEUTICS

PCEUT 201 Drug Discovery, Development and Beyond: Careers and Controversies (3) NSc Introduces students to drug development from discovery to drug approval with an emphasis on careers and the scientific and ethical issues at each stage. Recommended for undergraduate health science majors and non-science majors. Recommended: basic high school knowledge of general chemistry and biology. Offered: W.

PCEUT 327 The Science of Drugs (3) NSc Introduces students to medicinal chemistry and pharmaceutical sciences. Recommended for sophomore, junior and senior students majoring in chemistry, biochemistry, bioengineering, chemical engineering, public health and other health sciences, and related fields. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; recommended: basic knowledge in general chemistry and organic chemistry. Offered: jointly with MEDCH 327; Sp.

PCEUT 499 Undergraduate Research (1-6, max. 12) Research problems in drug disposition, drug targeting, and drug development. Prerequisite: cumulative GPA of 2.50 and permission of instructor.

PCEUT 501 Pharmacometrics (3) Compartmental (rich and sparse data) pharmacokinetic/pharmacodynamic and physiologically-based pharmacokinetic models. Evaluates how well models fit data. Advantages and disadvantages of various modeling and simulation approaches. Prerequisite: PCEUT 506 and PCEUT 532. Offered: Sp, even years.

PCEUT 502 Drug Disposition Science (2) Introduction to drug metabolism and transport pharmacokinetics. Topics include basic processes of drug absorption, distribution and elimination, enzyme/transporter kinetics, associated experimental methodologies for generating kinetic parameter estimates, and principles of drug-drug interactions and other sources of inter-individual variability. Covers experimental rigor and reproducibility and research ethics. Recommended: biochemistry. Offered: A.

PCEUT 503 Principles of Drug Transport (3) Provides an advanced understanding of major solute carrier (SLC) and ATP-binding cassette (ABC) drug transporters and their roles in drug absorption, distribution and excretion. Topics include major drug transporter families, transport processes in drug disposition organs, experimental approaches to study transporters, and application of drug transporter research in drug development and drug-drug interaction evaluation. Prerequisite: either PCEUT 502, PCEUT 532, or permission of the instructor. Offered: Sp, odd years.

PCEUT 505 Concepts in Pharmaceutical Sciences I (2) Provides the student with foundational knowledge of drug properties and interaction with physiology upon administration in vivo, and an understanding of pharmaceutical formulation which is a key disciplinary area within the pharmaceutical sciences and its application to small molecules and protein-based therapeutics. Offered: A.

PCEUT 506 Concepts in Pharmacokinetics (3) Theory and practice. Includes principles of physiological basis of pharmacokinetics, a mechanistic understanding of pharmacokinetic parameters, and the ability to derive basic pharmacokinetic equations and concepts. Prerequisite: PCEUT532, which may be taken concurrently. Offered: W.

PCEUT 507 Advanced Pharmacokinetics (3) Includes absorption kinetics, bioavailability, multi-compartment kinetics, non-linear clearance, pharmacokinetics of biologics, and animal and clinical study design. Prerequisite: either PCEUT 506 and PCEUT 532, or permission of instructor. Offered: Sp.

PCEUT 510 Drug Interactions (3) Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 558; PHARM 559; PHARM 560; PHARM 561; PHARM 563; PHARM 564, and PHARM 565.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and

epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PHG 513; W.

PCEUT 520 Seminar (1, max. 30) Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with MEDCH 520.

PCEUT 531 Pharmaceutical Formulation: Principles and Dosage Forms (4) Provides knowledge base for subsequent pharmacy courses and professional practice. Theory and problems involved in incorporating drugs into stable dosage forms suitable for human use and intended routes of drug administration. Fundamentals of safe and appropriate handling and use of dosage forms. Common dosage forms and basic compounding skills. Recommended: general chemistry. Offered: A.

PCEUT 532 Clinical Pharmacokinetics (4) Covers basic principles of pharmacokinetics and their application to the clinical setting. Includes the design of an appropriate dosing regimen, such as single-dose intravenous and oral administration, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacodynamics, inter-individual variability and the physiological basis of pharmacokinetics. Prerequisite: PCEUT 531. Offered: W.

PCEUT 534 Principles of Precision Medicine (2) Variation in drug absorption, distribution, elimination, and response, with emphasis on pharmacokinetic-pharmacodynamic relationships. Includes pharmacogenetics, drug-drug interactions, as well as ontogenic and disease state effects and associated precision testing platforms. Uses case studies to integrate possible sources of variation and impact on individual therapeutic decisions. Prerequisite: either MEDCH 501; PCEUT 531; and PCEUT 532, or permission of instructor; recommended: basic understanding of pharmacokinetics and principles of drug absorption, distribution and elimination and drug response. Offered: Sp.

PCEUT 537 Chemical and Molecular Pharmacology III: Cancer Treatments and Biotherapeutics (4) Cancer biology and agents used in cancer treatment and supportive care. Mechanisms of action and toxicities of agents. Formulating and optimizing dosage forms for small molecules and protein drugs. Major biopharmaceutical products (e.g., monoclonal antibodies, endogenous protein replacement) and their unique characteristics. Prerequisite: either PCEUT 531; PCEUT 532; and MEDCH 501, or permission of instructor. Offered: Sp.

PCEUT 570 Advanced Research Topics (1, max. 15) Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor. Credit/no-credit only.

PCEUT 580 Current Trends in Pharmacy Science and Practice (1, max. 2) Builds on fundamental and foundational knowledge of advanced professional pharmacy students. Research in pharmacy sciences: translational, clinical, outcomes, or related to scholarship within the School of Pharmacy, or related department and institutions. Prerequisite: School of Pharmacy professional or graduate student standing. Undergraduate students with permission of instructor. Credit/no-credit only. Offered: W.

PCEUT 583 Topics in Pharmaceutics (1, max. 30) Discussion of pertinent articles from current literature and recent laboratory results. Credit/no-credit only.

PCEUT 586 Biotechnology and Biopharmaceutics (2-3) Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses.

PCEUT 598 Independent Research (*, max. 24) Basic and clinical research problems in drug disposition and effect. Prerequisite: minimum grade of 2.50 GPA and permission of instructor.

PCEUT 600 Independent Study or Research (*-) Credit/no-credit only.

PCEUT 700 Master's Thesis (*-) Credit/no-credit only.

PCEUT 800 Doctoral Dissertation (*-) Credit/no-credit only.

PHARMACY

PHARM 301 Medications and Health: It's Not All About Drugs (3) SSc/NSc

Covers personal health promotion, treatment of illness, and health care. Explores several medication-related topics, provides insight on drug development and efficacy, and serves as introduction to students contemplating careers in health sciences, especially in pharmacy. Credit/no-credit only.

PHARM 451 Introduction to Drug Discovery and Development (4) Covers the process of drug discovery and development with a specific emphasis on current trends and hot topics in the pharmaceutical sciences. Recommended: coursework in biology and biochemistry. Offered: W.

PHARM 499 Undergraduate Research (1-6, max. 24) Research problems in clinical pharmacy or pharmaceutical sciences, including preclinical and/or clinical drug development and effectiveness research, and participate in departmental research projects. Prerequisite: permission of instructor Offered: AWSpS.

PHARM 501 Alternative and Complementary Medicines (2) Studies popular alternative and complementary medicines used in the United States. Focuses on herbal products with some coverage of other non-nutritional dietary supplements. Open to professional and graduate students in the Schools of Pharmacy, Nursing, Medicine, Dentistry, and Public Health, or by permission of instructor. Prerequisite: completion of first-professional year in PharmD program. Credit/no-credit only. Offered: AW.

PHARM 508 Philosophy of Drug Interactions (1) Draws on the wisdom of philosophers, scientists, and other thinkers, to discuss the nature and limitations of scientific truth, common reasoning errors in science, and the importance of a philosophical perspective in clinical decision making when science alone is insufficient to assess the clinical importance and management of drug interactions. Credit/no-credit only. Offered: Sp.

PHARM 510 Contemporary Concepts in Clinical Nutrition Support (2) Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Recommended: biochemistry, anatomy and physiology, or permission of instructor. Credit/no-credit only. Offered: A.

PHARM 512 Timely Topics for Health Professionals (1, max. 4) Explores timely and inter-professionally relevant topics on social justice, health disparities, and health care; including the annual UW Health Sciences "Common Book". Involves active learning methods and group discussions where students and faculty can share thoughts and perspectives. Credit/no-credit only. Offered: AWSpS.

PHARM 513 Medical Devices for Home Healthcare (3) Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

PHARM 516 Introduction to Biomedical Regulatory Affairs (3) Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.

PHARM 517 Product Development and Manufacturing Systems (3) Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production.

PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3) Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct, and follow-up actions; surveillance and studies, reimbursement, and economics.

PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2)

Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimens, and identifying judicious pharmacotherapeutic plans.

PHARM 522 Opportunities in Industry for Pharmacists (1) Introduces students to career opportunities for pharmacists in industry, including drug development, regulatory affairs, drug information, health economics, sales, and marketing. Recommended: PHARM 451 or PHARM 551; PHARM 520; and PHARM 542 or HEOR 505. Offered: A.

PHARM 523 Insights into Community Pharmacy Practice Transformation (1) Introduces student pharmacists to practice transformation concepts, innovative patient care services, and state and national leaders in community pharmacy practice. Credit/no-credit only. Offered: Sp.

PHARM 524 Topics in Infectious Disease Pharmacotherapy (2) Discussion of specialized topics in infectious disease pharmacotherapy not covered in the core pharmacotherapeutics series. Expansion of student knowledge regarding the role of pharmacists in antimicrobial stewardship. Prerequisite: PHARM 532; recommended: completion of the second year of the PharmD professional degree program. Offered: W.

PHARM 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/HSERV 529.

PHARM 531 Advances in the Diagnosis, Treatment and Management of Epilepsy (2) Complexity of epilepsy pathophysiology, classification, diagnosis, and treatment. Introduces principles of anti-seizure drug discovery and emerging opportunities for epilepsy research at UW. Five week condensed survey. Prerequisite: permission of Instructor. Offered: Sp.

PHARM 548 Current Topics in Geriatrics (1, max. 2) Case-based approach to principles of geriatric pharmacotherapy and medications commonly prescribed for older adults. Utilizes a "layered-learning model" in which more experienced students teach junior students under guidance of a faculty mentor. Credit/no-credit only. Offered: W.

PHARM 549 Pharmacotherapeutics for Older Adults (3-4) Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: either PHARM 561; PHARM 565 or permission of the School of Pharmacy. Offered: Sp.

PHARM 550 Seminar in Geriatrics ([0-1]-, max. 1) Students facilitate a discussion with students/faculty about the management of an older adult with complex medication regimen. In addition, students critically review and appraise primary literature relevant to contemporary issues related to geriatric pharmacotherapy. Credit/no-credit only. Offered: AW.

PHARM 551 Introduction to Drug Discovery and Development (4) Covers the process of drug discovery and development with a specific emphasis on current trends and hot topics in the pharmaceutical sciences. Recommended: coursework in biology and biochemistry. Offered: W.

PHARM 554 Peer Mentoring ([0-1]-, max. 3) Provides an opportunity for students to learn about mentoring, practice being a mentor, and receive faculty coaching and support in their mentoring experience and growth. Intended for Doctor of Pharmacy (PharmD) program students acting as mentors for first-year PharmD students. Credit/no-credit only. Offered: AW.

PHARM 556 Pain Management (1) Pain Management and opioid stewardship is a rapidly growing specialty for clinical pharmacy. Provides opportunities for pharmacy students to have more in-depth education regarding the management of acute, chronic, cancer or non-cancer pain. Prerequisite: third year professional Pharm D student. Credit/no-credit only. Offered: A.

PHARM 567 Cancer Pharmacotherapeutics (2) Pharmacotherapy of cancer, covering supportive care therapeutics (antibiotics, antiemetics, analgesics,) to the antineoplastic agents. The pathophysiology, staging, and treatment of different cancers is discussed. Specialists from the different oncology practice areas serve as guest lecturers. Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy. Offered: Sp.

PHARM 569 Fluid and Electrolytes and Parenteral Nutrition (2) Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro- and micro-nutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special populations (e.g., ICU). Prerequisite: PHRMCY 501; PHRMCY 502; and PHRMCY 531.

PHARM 570 Critical Care Pharmacotherapeutics (2) Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses, and other timely topics reflecting current clinical practice. Prerequisite: second-year PharmD student, or permission of instructor.

PHARM 571 Current Topics in Acute Care Pharmacotherapy (1) Increases understanding and stimulates discussion in current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by instructors. May be taken alone or concurrently with PHARM 570. Prerequisite: PHRMCY 535.

PHARM 572 Pharmacist Advocacy and Affairs I (1, max. 3) Increases student awareness and knowledge of local, state, and national healthcare issues that affect pharmacists and their patients. Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Credit/no-credit only. Offered: A.

PHARM 573 Pharmacist Advocacy II: Legislative and Grassroots Affairs (1, max. 3) Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Students actively participate in off-campus legislative and advocacy activities while the Washington State legislature is in session. Credit/no-credit only. Offered: W.

PHARM 579 Current Topics in Pharmacy (1, max. 3) Provides a forum for discussing late-breaking topics that impact current and future pharmacy research and practice. Credit/no-credit only. Offered: A.

PHARM 581 Global Health Pharmacy: Medicines, Practice, and Policy (2) Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Offered: jointly with G H 543.

PHARM 582 Special Topics in Global Health Pharmacy and Medical Products ([1-3]-, max. 6) Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no-credit only.

PHARM 587 Diabetes Prevention (2) Provides students with knowledge/skills to serve as Diabetes Prevention lifestyle coaches. The knowledge/skills developed can be applied to promote health/wellness in the community. Prerequisite: PHARM 563. Credit/no-credit only. Offered: A.

PHARM 588 Diabetes Care (2) Further develops foundations in the principles of

diabetes management and provides practice in application of diabetes-care principles. Develops knowledge and ability to assess, manage, educate, and monitor patients with diabetes. Prerequisite: either PHARM 560; PHARM 564, or permission of the School of Pharmacy. Credit/no-credit only. Offered: Sp.

PHARM 592 Pharmacy Practice IV: Design and Analysis of Medical Studies (3) Introduces the basic biostatistical concepts used in the medical literature, and the various study designs. Develops students' skills in critically evaluating the medical literature, with the goal of applying these skills to clinical practice. Prerequisite: PHARM 584; PHARM 585; PHARM 586. Offered: A.

PHARM 595 Special Studies in Pharmacy (1-6, max. 24) Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.

PHARM 596 Seminars in Pediatric Pharmacotherapy (2) Explores therapeutic topics pertinent to the pediatric population. Emphasizes ambulatory pediatrics. Prerequisite: third-year PharmD student or permission of instructor. Credit/no-credit only. Offered: W.

PHARM 598 Seminar in Current Pharmacy Practice Topics (2, max. 6) Provides a variety of current topics related to pharmacotherapy and pharmacy practice. Presenters include faculty, pharmacy practice residents, and other guest speakers. Credit/no-credit only. Offered: AWSp.

PHARM 599 Independent Study/Research (1-6, max. 24) Applied pharmaceutical research problems. Credit/no-credit only.

PHARMACY

PHRMCY 501 Foundations of Being a Pharmacist I (3) First course of a two-quarter series providing a foundation in the knowledge, skills, and attitudes to be an effective patient-centered pharmacist provider. Content is designed to facilitate the development of a student's professional identity and leadership abilities. Offered: A.

PHRMCY 502 Foundations of Being a Pharmacist II: Teams and Systems (3) Second course of a two-quarter series providing a foundation in the knowledge, skills, and attitudes to be an effective patient-centered pharmacist provider. Content is designed to facilitate the development of a student's professional identity and leadership abilities. Prerequisite: PHRMCY 501. Offered: W.

PHRMCY 503 Advanced Pharmacy Leadership (1) Provides a foundation in the knowledge, skills, and attitudes to be effective in creating and achieving shared goals through personal and professional leadership. Prerequisite: either PHRMCY 501 and PHRMCY 502, or permission of instructor.

PHRMCY 511 Introduction to Evidence-Based Practice (2) Introduces primary, secondary, and tertiary medical literature. Practiced skills include forming an answerable question, retrieving and summarizing credible biomedical literature, interpreting study results, and writing effectively for the public and for health professionals. Offered: A.

PHRMCY 512 Fundamentals of US Health Care, Pharmacy Safety and Law (3) Introduction to health care and pharmacy practice designed for future healthcare practitioners. Examines the organization and financing of the U.S. healthcare system, patient safety, and pharmacy law. Offered: A.

PHRMCY 513 Applied Patient Safety and Quality (2) Introduction to principles of patient safety and quality designed for future health care practitioners. Content is designed to facilitate the development of a student's ability to provide safe and quality care. Prerequisite: PHRMCY 511 and PHRMCY 512. Offered: Sp.

PHRMCY 514 Design and Analysis of Medical Studies (2) Provides basic understanding of the fundamental concepts of biostatistics and epidemiology as they relate to study designs and evaluation of the medical literature. Prerequisite: PHRMCY 511; recommended: undergraduate course in statistics. Offered: Sp.

PHRMCY 515 Population Health and Pharmacy Management (3) Examines the concept of population health and the pharmacist's role therein as well as pharmacy

management for future healthcare practitioners. Offered: A.

PHRMCY 516 Pharmacy Law and Ethics (2) Provides a review of current Washington State and Federal pharmacy law in preparation for Advanced Pharmacy Practice Experiences and the Multistate Pharmacy Jurisprudence Exam. Prerequisite: PHRMCY 513. Offered: W.

PHRMCY 531 Pharmacotherapeutics I (4) First course in a 7-course series providing a foundation in knowledge for patient-centered clinical case management. Includes introduction to pharmacotherapeutics and special populations, over-the-counter medications and self-care. Offered: W.

PHRMCY 532 Pharmacotherapeutics II (3) Second course in a 7-course series providing a foundation in knowledge for patient-centered clinical case management. Includes assessment and management of drug-related hypersensitivity and various bacterial, fungal, and viral infectious diseases. Prerequisite: PHRMCY 531. Offered: Sp.

PHRMCY 533 Pharmacotherapeutics III (4) Third course in a 7-course series providing a foundation in knowledge for patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of diseases affecting the cardiovascular, pulmonary, renal, and endocrine systems. Prerequisite: PHRMCY 532. Offered: A.

PHRMCY 534 Pharmacotherapeutics IV (4) Fourth in a seven-course series. Patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of diseases associated with hematological, neurological, psychiatric, and gastrointestinal systems. Prerequisite: PHRMCY 533. Offered: W.

PHRMCY 535 Pharmacotherapeutics V (3) Patient-centered clinical case management. Assessment and pharmacotherapeutic management of diseases associated with the hematological, gastrointestinal, and immune systems, as well as pharmacotherapeutics associated with cancer therapy, transplantation, and biological therapies. Prerequisite: PHRMCY 534. Offered: Sp.

PHRMCY 536 Pharmacotherapeutics VI (4) Provides a foundation in knowledge for patient-centered clinical case management. Includes assessment and pharmacotherapeutic management of issues related to gender-related health and care, reproductive health, geriatrics, rheumatological diseases, and diseases affecting the urological, dermatological and ophthalmic systems. Prerequisite: PHRMCY 535. Offered: A.

PHRMCY 537 Pharmacotherapeutics VII (4) Provides a foundation in knowledge for patient-centered clinical case management. Covers pharmacotherapeutics in special patient populations, including children, critically ill patients, obese patients, patients requiring nutrition support, and those with multiple comorbidities. Prerequisite: PHRMCY 536. Offered: W.

PHRMCY 541 Pharmacist Provider Readiness I (2) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: successful completion of on-boarding and compliance requirements for PharmD program. Credit/no-credit only. Offered: A.

PHRMCY 542 Pharmacist Provider Readiness II (2) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMPP 511 and PHRMCY 541. Credit/no-credit only. Offered: W.

PHRMCY 543 Introductory Pharmacist Provider Readiness III (3) Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for being successful in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMCY 531; PHRMCY 542; and PHRMPP 512. Offered: Sp.

PHRMCY 544 Pharmacist Provider Readiness IV (3) Delivery of care to patients with increasingly complex health care needs. Prepares students for practice as a pharmacist provider. Includes development and refinement of skills necessary for

success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Prerequisite: PHRMCY 532; PHRMCY 543; and PHRMPP 513. Credit/no-credit only. Offered: A.

PHRMCY 545 Pharmacist Provider Readiness V (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Emphasizes delivery of care to multiple patients with increasingly complex health care needs. Prerequisite: PHRMCY 533; PHRMCY 544; and PHRMPP 514. Credit/no-credit only. Offered: W.

PHRMCY 546 Pharmacist Provider Readiness VI (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series and Introductory Pharmacy Practice Experiences (IPPEs). Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMCY 534; PHRMCY 545; and PHRMPP 515. Credit/no-credit only. Offered: Sp.

PHRMCY 547 Pharmacist Provider Readiness VII (3) Development and refinement of skills necessary for success in the Pharmacist Provider Experience course series; and Introductory Pharmacy Practice Experiences (IPPEs); and Advanced Pharmacy Practice Experiences (APPEs). Prerequisite: PHRMCY 535; PHRMCY 546; and PHRMPP 516. Credit/no-credit only. Offered: A.

PHRMCY 550 Readiness for Advanced Pharmacy Practice Experiences (5) Capstone course preparing students for transition to Advanced Pharmacy Practice Experiences (APPE). Involves applying and integrating skills acquired from both the didactic courses and experiential training. Prerequisite: PHRMPP 517; PHRMPP 541; PHRMPP 542; PHRMCY 536; and PHRMCY 547. Credit/no-credit only. Offered: W.

PHRMCY 551 Case Conferences and Continuous Professional Development ([0/1]-, max. 1) Includes conferences and class meetings. Taken concurrently with Advanced Pharmacy Practice Experiences rotations during the fourth professional year. Prerequisite: fourth year professional PharmD student; successful completion of all pre-Advanced Pharmacy Practice Experiences requirements. Credit/no-credit only. Offered: AW.

PHRMCY 580 Current Trends in Pharmacy Science and Practice (1, max. 2) Current topic areas pertinent to professional pharmacy practice. Emphasizes use of applied knowledge in pharmaceutical sciences for professional development in critical thinking, data analysis, and in-depth expertise in pharmacy-related research sciences and practice areas. Prerequisite: open to undergraduates with permission of instructor; recommended: general undergraduate science background. Credit/no-credit only. Offered: Sp.

PHARMACY PRACTICE

PHARMPP 511 Introductory Pharmacy Practice Experience in Community Pharmacy I (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. First in a series of four. Prerequisite: PHARM 584. Credit/no-credit only. Offered: W.

PHARMPP 512 Introductory Pharmacy Practice Experience in Community Pharmacy II (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Second in a series of four. Prerequisite: PHARMPP 511. Credit/no-credit only. Offered: Sp.

PHARMPP 513 Introductory Pharmacy Practice Experience in Community Pharmacy III (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Third in a series of four. Prerequisite: PHARMPP 512 and PHARM 586. Credit/no-credit only. Offered: A.

PHARMP 514 Introductory Pharmacy Practice Experience in Community

Pharmacy IV (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Fourth in a series of four. Prerequisite: PHARMP 513. Credit/no-credit only. Offered: W.

PHARMP 521 Foundations of Interprofessional Practice I ([0-1]-, max. 1) Team-based training and experiential immersion in healthcare team functioning for PY2 pharmacy students. Work with medical, nursing, physician assistant, social work, dental and dietetics students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra- and inter-professional roles and professional identity. Credit/no-credit only.

PHARMP 522 Foundations of Interprofessional Practice II ([0-1]-, max. 1) Team-based training and experiential immersion in healthcare team functioning for PY3 pharmacy students. Work with medical, nursing, physician assistant, social work, dental, and dietetic students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSp.

PHARMP 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1) Introduces institutional pharmacy practice. The role of pharmacists in the inpatient settings, participation in product distribution, provision of drug information, and exposure to quality assurance activities in hospitals. Orients students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. First in a series of three. Prerequisite: PHARMP 514. Credit/no-credit only. Offered: AWSpS.

PHARMP 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1) Introduces institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Quality assurance in hospital practice, reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Second in a series of three. Prerequisite: PHARMP 531. Credit/no-credit only. Offered: AWSpS.

PHARMP 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (1) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient setting, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion, and progress assessment. Third in a three-part series. Prerequisite: PHARMP 532. Credit/no-credit only. Offered: AWSpS.

PHARMP 541 Introductory Pharmacy Practice Experience in Clinical Skills (1) Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Prerequisite: PHARMP 533. Credit/no-credit only. Offered: Sp.

PHARMP 580 Preparation for Global Health Experience in Low-resource Countries (3) Prepares students to safely and fully engage in clinical healthcare experiences in low-resource countries. Helps students understand common barriers to healthcare access and to appreciate the communicable and non-communicable health issues that individuals and communities experience in these countries. Credit/no-credit only. Offered: Sp.

PHARMACY PRACTICE

PHRMPr 511 Pharmacist Provider Experience I (2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the (WIP) Wednesdays in Practice course series. Prerequisite: successful completion of on-boarding and compliance requirements for PharmD program. Credit/no-credit only. Offered: A.

PHRMPr 512 Pharmacist Provider Experience II (2) Prepares students for

practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesdays in Practice course series. Prerequisite: PHRMPr 511 and PHRMPr 541. Credit/no-credit only. Offered: W.

PHRMPr 513 Pharmacist Provider Experience III (2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesday in Practice (WIP) course series. Prerequisite: PHRMPr 531; PHRMPr 542; and PHRMPr 512. Credit/no-credit only. Offered: Sp.

PHRMPr 514 Pharmacist Provider Experience IV (2) Delivery of care to patients with increasingly complex health care needs. Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient-care setting. Part of the Wednesday in Practice (WIP) course series. Prerequisite: PHRMPr 532; PHRMPr 543; and PHRMPr 513. Credit/no-credit only. Offered: A.

PHRMPr 515 Pharmacist Provider Experience V (2) Application of classroom learning in a patient-care setting. Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMPr 533; PHRMPr 544; and PHRMPr 514. Credit/no-credit only. Offered: W.

PHRMPr 516 Pharmacist Provider Experience VI (2) Application of classroom learning to a patient-care setting. Emphasizes delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMPr 534; PHRMPr 545; and PHRMPr 515. Credit/no-credit only.

PHRMPr 517 Pharmacist Provider Experience VII (1-, max. 2) Prepares students for practice as a pharmacist provider. Emphasizes application of classroom learning in a patient care setting. This is part of the Wednesday in Practice course series. Emphasizes the delivery of care to multiple patients with increasingly complex healthcare needs. Prerequisite: PHRMPr 535; PHRMPr 546; and PHRMPr 516. Credit/no-credit only. Offered: ASp.

PHRMPr 541 Introductory Pharmacy Practice Experience in Institutional Health-System Setting ([1-3]-, max. 3) Prepares students for practice in institutional health-system setting. Students learn about the role of pharmacists in inpatient setting; medication use and patient safety; pharmacists' patient care process; medication knowledge; calculations; ethical, legal and professional behavior; general communication; patient education; drug information; insurance/prescription drug coverage; quality improvement. Prerequisite: PHRMPr 542. Credit/no-credit only. Offered: ASp.

PHRMPr 542 Introductory Pharmacy Practice Experience in Community Practice Settings ([1-2]-, max. 3) Prepares students for practice in the community practice setting: medication use and patient safety; pharmacists' patient care process; medication knowledge; calculations; ethical, legal and professional behavior; general communication; patient education; drug information; insurance/prescription drug coverage; and health and wellness. Students will spend the majority of class time for this course at a practice site. Prerequisite: PHRMPr 545 and PHRMPr 515. Credit/no-credit only. Offered: ASp.

PHRMPr 561 Core Community Pharmacy Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a community pharmacy care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPr 562 Core Ambulatory Care Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a primary or specialty care clinic setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPr 563 Core General Medicine Acute Care Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine acute care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory

coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 564 Core Health System Pharmacy Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a health system acute care setting. Each experience will be six weeks in length and will primarily involve patient care activities. Prerequisite: successful completion of all didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 565 Elective Direct Patient Care Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focused on continued building of skills in providing care directly to patients within any practice setting. Each experience is six weeks in length and primarily involves patient care activities. Prerequisite: successful completion of all required didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 566 Elective Senior Care Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a geriatric care setting. Each experience is six weeks in length and primarily involves patient care activities. Prerequisite: successful completion of all required didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 567 Elective Non-Patient Care Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on settings that do not involve direct patient care such as pharmacy administration, safety or quality management, education, professional organizations. Each experience is six weeks in length. Prerequisite: successful completion of all required didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 568 Elective Advanced Pharmacy Practice Experience (1-6, max. 12) Allows students to complete elective experiences that are shorter than the standard 6-week Advanced Pharmacy Practice Experience. Prerequisite: successful completion of all required didactic and laboratory coursework in the UW School of Pharmacy professional curriculum. Credit/no-credit only. Offered: AWSpS.

PHRMPR 569 Research and Scholarship Advanced Pharmacy Practice Experience (7, max. 77) Advanced pharmacy practice experience focusing on the introduction to and/or continuation in training in the scientific method of research and other scholarly projects. Each experience will be six weeks in length. Prerequisite: successful completion of all required didactic and laboratory coursework in the UW School of Pharmacy professional curriculum; and permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHARMACY REGULATORY AFFAIRS

PHRMRA 524 Introduction to Clinical Trials (3) Introduces the major concepts under which clinical trials are designed to run. Focuses on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.

PHRMRA 525 Implementation and Conduct of Clinical Trials (3) Outlines the work of carrying out a clinical trial including the complex work of study initiation, issues of site and data managements, preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.

PHRMRA 526 Project Management and the Business of Clinical Trials (3) Addresses the business dimension of clinical trials, including the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

PHRMRA 527 International Regulatory Affairs (3) Develops an understanding of international differences in the regulation of design, manufacture, and post-marketing surveillance of medical products relative to U.S. Food and Drug

Administration requirements. Prerequisite: PHARM 504. Offered: A.

PHRMRA 528 Medical Risk Analysis and Management (3) Examines the principles and application of risk management methods in the design, manufacture, and marketing of medical products. Offered: A.

PHRMRA 536 Skills for the Regulatory Affairs Professional (2) Covers essential skills in regulatory affairs and includes an overview of local medical products companies. Offered: A.

PHRMRA 545 Statistical Topics for Biomedical Regulatory Affairs Professionals (3) Applies statistical techniques to meet medical product regulatory commitments including biosimilars, product comparability, design and continued process verification. Prerequisite: introductory statistics. Offered: W.

PHRMRA 546 Technical Writing for the Medical Products Industries (3) Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addresses the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.

PHRMRA 548 Biomedical Regulatory Affairs Practicum ([1-9]-, max. 9) Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulatory, clinical, and quality assurance aspects. Includes a project and final report. Offered: AWSpS.

PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2) Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Prerequisite: PHRMRA 546 or permission of instructor. Credit/no-credit only. Offered: Sp.

PHRMRA 554 Advanced Medical Products Regulation I (2) Provides an in-depth exploration of regulatory issues primarily related to non-clinical and clinical aspects of medical product development. Offered: W.

PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max. 30) Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization). Locale based on program impact, unique features, or recent or controversial regulatory issues.

PHRMRA 595 Special Topics in Regulation (1-6, max. 24) Offered: AWSpS.

EVANS SCHOOL OF PUBLIC POLICY AND GOVERNANCE

PUBLIC AFFAIRS EXECUTIVE MPA

PA EX 501 Strategic Leadership I (5) Explores public leadership at personal and institutional level. Examines institutional leadership in organizations, teams, and communities as well as personal leadership development.

PA EX 502 Organizational Leadership I (2-6, max. 6) Examines essential concepts and skills to lead and manage organizations in public service.

PA EX 503 Policy Leadership I (2-6, max. 6) Examines settings and processes for making public policies through fields of politics, economics, communications, policy studies, and related disciplines. Introduces core principles and tools of economic and behavioral analysis.

PA EX 504 Policy Leadership II (4) Introduces concepts, theories, frameworks, and practice to conduct policy analysis and communicate assessments to intended audiences.

PA EX 505 Organizational Leadership II (4) Introduces concepts and skills to assess and redesign implementation of public policies and programs. Examines use of participatory tools for analyzing and redesigning services, work flows, and delivery

systems.

PA EX 506 Policy Leadership III (2-6, max. 6) Provides concepts and skills to assess and advance a policy proposal's prospects for successful enactment and implementation. Examines legislative relations, budget processes, policy field analysis, and negotiations to practice tools for understanding and increasing the viability of policy recommendations.

PA EX 507 Organizational Leadership III (2-6, max. 6) Provides concepts and skills to measure, evaluate, and improve the performance of policies, programs, and organizations. Considers public value through the lenses of performance management and equity.

PA EX 508 Strategic Leadership II (2) Focuses on crafting strategies to leading change as well as building changes into organizational culture.

PA EX 509 Leading Across Boundaries (3) Examines the modern challenges of leading across complex networks of institutions and stakeholders, examining institutional, national, sectoral, and cultural boundaries. Examines these challenges in the context of globalization and the emergence of multi-sectoral and multi-cultural networks of governance.

PA EX 510 Strategic Negotiations (4) Explores a theoretical framework for negotiations with an equal emphasis on developing negotiation skills through role-plays. Focuses on techniques and nuances of negotiation that are most useful for a manager working in a complex, dynamic environment with multiple stakeholders.

PA EX 511 Strategic Communication (3) Focuses on effective communication, highlighting the advocacy and motivation facet of leadership. In order to understand elements of persuasive communication, emphasizes concepts of negotiation analysis; power and dependence, perceptions of conflict, and finding mutual gains.

PA EX 512 Strategic Policy-Making (4) Examines how managers can expertly function at the intersection of politics, policy, and the wishes of the public.

PA EX 513 Leading for a Legacy (3) Explores the nature of human culture and values and how they relate to human legacy by impacting the quality of humans in an organization and how legacy grows from the values of the trusteeship and stewardship.

PA EX 548 Leadership Salon (1) Provides opportunity and structure for students to engage in reflection on leadership growth.

PA EX 549 Racial Equity Skills Lab (1) Provides opportunity and structure for student reflection on racial equity and equity literacy.

PUBLIC POLICY

PUBPOL 101 Public Administration and Democracy (5) Provides overview of the role of public administration and public policy in American democratic institutions.

PUBPOL 201 Introduction to Public Policy and Governance (5) SSc Provides an introduction to policy analysis, governance, and public service. Students learn how individuals organize for common purposes, and design, implement, analyze, and evaluate policy. Students examine how policy decisions emerge and how the values of public, nonprofit, and private sector leaders and institutions affect decisions and implementation.

PUBPOL 299 Special Topics in Public Policy (5, max. 10) SSc Examines selected topics in public policy. Focuses on in-depth analysis of vital public policy issues and integration of economic, political, and administrative perspectives. Recommended: PUBPOL 201. Offered: SpS.

PUBPOL 301 Truth, Evidence, and Public Policy Analytics (5) SSc, RSN Sound public policy and governance decisions rely on having evidence to support conclusions, as well as having an understanding of the extent of certainty regarding the available evidence. Students will learn qualitative, statistical,

experimental, and mixed methods to evaluate: the origins of policy; the management, implementation, and administration of public programs; and the intended and unintended impacts of public policies. Prerequisite: either STAT 220, STAT 221/CS&SS 221/SOC 221, or STAT 311; recommended: PUBPOL 201.

PUBPOL 302 Public Service Leadership (5) Examines how communities work with governments, businesses, and nonprofits to solve complex problems. Explores ways to assess values trade-offs between profit, people, planet, and purpose. Recommended: PUBPOL 201. Offered: AWSpS.

PUBPOL 303 Methods of Policy Inquiry (5) SSc Examines how evidence is gathered in the public sector and used to generate policy research. Explores how research informs policy process. Recommended: PUBPOL 201.

PUBPOL 313 Evidence-Based Policy Implementation (5) SSc Explores the multidimensional challenge of turning policy and program intentions into valued results on the ground. Understanding why implementation can fall short of expectation requires an understanding of how public/nonprofit organizations work; including their mission, resources, collaborators, and results measurement. Examines the role that evidence can play in service of democratic governance and policy effectiveness. Recommended: PUBPOL 201

PUBPOL 321 Decision Making, Behavior, and Policy Design (5) SSc Provides a foundation in the application of decision theory and behavioral science to study public policy problems. Students learn how cognition, heuristics, biases, emotion, and social dynamics interact in decision-making, and how context and framing shape decisions. Students learn how decision making influences the effect of public policies on the equity and efficiency of the production and distribution of goods and resources. Recommended: PUBPOL 201.

PUBPOL 355 Special Topics in Nonprofits (5, max. 15) Covers various topics regarding nonprofit essentials. Recommended: PUBPOL 201.

PUBPOL 400 Public Policy and Governance Seminar (1, max. 4) Examines emerging issues in public policy, public service, administration, governance, democracy, and equity. Credit/no-credit only.

PUBPOL 402 Ethics, Leadership, and Policy Implementation (5) Examines complex ethical challenges and pressures facing public administrators in policy implementation and public service. Recommended: PUBPOL 201.

PUBPOL 403 Leadership in Action (5) Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.

PUBPOL 407 Negotiation Skills and Strategies for the Public Sector (5) SSc Builds conceptual skills to analyze negotiation situations. Explores psychological processes underlying the judgement of negotiators. Provides opportunities to engage in negotiation exercises and generalize interpersonal framework to large-scale policy agreements. Recommended: PUBPOL 201.

PUBPOL 480 Geographic Information Systems for Public Policy (5) Provides hands-on approach to ArcMAP software. Emphasizes the use of maps to describe spatial relationships and visualize geography-related statistical results. Examines combination of geographic and statistical analysis.

PUBPOL 481 Data Science, Economy, and Policy (5) Explores the use of data science as a tool for developing the economy and making public policy. Lays the foundation for understanding the role of data science in shaping and changing the economy and related public policy.

PUBPOL 496 Policy Lab (5) Provides support for undergraduate public policy research project. Students develop, implement, and deliver project for a professional client. Prerequisite: PUBPOL 201.

PUBPOL 497 Internship (1-5, max. 15) Enhances students career readiness through guided self-reflection, peer dialogue, and employer feedback. Recommended: PUBPOL 201. Credit/no-credit only.

PUBPOL 498 Undergraduate Research (1-5, max. 15) Independent research in selected areas of public policy and public management under faculty supervision. Recommended: PUBPOL 201. Credit/no-credit only. Offered: AWSpS.

PUBPOL 499 Topics in Public Policy (5, max. 15) SSc Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Recommended: PUBPOL 201.

PUBPOL 500 Public Policy and Governance Seminar (1, max. 4) Examines emerging issues in public policy, public service, administration, governance, democracy, and equity. Credit/no-credit only.

PUBPOL 501 Legislative Relations (4) Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

PUBPOL 502 Strategy for Public Leaders (4) Explores the design and execution of strategy in public life. Covers concepts and practical tools for making strategy, including situational assessment, strategy design, implementation, and reassessment and revision.

PUBPOL 503 Executive Leadership (4) Cultivate the practical skills required to lead within various operational contexts. Managerial strategies for addressing problems in public, not-for-profit and business organizations will be examined through case studies, general readings, class-exercises, presentations by practitioners, and self-reflection. Throughout this course, students will practice the core skills required for their success as future leaders.

PUBPOL 504 Leadership Ethics in the Public Interest (4) Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.

PUBPOL 505 The Law of Public Administration (3) Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

PUBPOL 506 Ethics and Public Policy (3/4) Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PUBPOL 507 Mediation and Negotiation (4) Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

PUBPOL 509 Managing People in Public and Nonprofit Agencies (4) Explore the fundamentals of managing people with a specific emphasis on managing people in nonprofit and public agencies. Covers theoretical and practical aspects of management such as: learning how to motivate a team for results; understanding key aspects of human resource law and practice; exploring how lean management can be utilized in nonprofit and government agencies; managing a diverse workforce, and managing in a union environment.

PUBPOL 510 Foundations of American Democracy (4) Examines the fundamental values such as equality, liberty, dignity, freedom, and autonomy that individuals justify and shape American political culture and institutions. Focuses upon the philosophical and religious foundations of these values and examines the relations among them as well as how they influence American political culture, institutions, and conflict.

PUBPOL 511 Managing Politics and the Policy Process (4) Examines broad aspects of organizational life and orients students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process.

PUBPOL 512 Managing Organizational Performance (4) Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership. Prerequisite: permission of instructor; recommended: PUBPOL 511

PUBPOL 513 Public Policy Analysis (4) Equips students to rigorously assess policy responses to public problems, through defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: permission of instructor; recommended: PUBPOL 516, PUBPOL 517

PUBPOL 514 Psychology for Policy Analysis (4) Examines basic concepts in social psychology, judgment and decision making, and behavioral economics. Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

PUBPOL 515 Leading for Equity (4) Introduces frameworks from organizational leadership research to provide a foundation for equity-centered leadership in the public sector. Critically examines normative organizational practices and provides foundational concepts about different types of diversity, ethical responsibilities of public leaders, and approaches to cultivating equitable and inclusive leadership practices.

PUBPOL 516 Economics for Policy Analysis and Management I (4) Examines the use of microeconomics in policy analysis. Includes a review of supply, demand, and how government actions (e.g., taxes, subsidies) affects economic efficiency in a competitive market. Develops a deeper understanding of consumer choice as a function of preferences and constraints - the building blocks of demand - and examine how changes in constraints or opportunities via public policy affects choices. Recommended: elementary economics

PUBPOL 517 Economics for Policy Analysis and Management II (4) Serves to deepen student understanding of microeconomic theory with a focus on understanding the economic analysis of market failures and on developing policies to address them. Prerequisite: PUBPOL 516 or permission of instructor.

PUBPOL 518 Applied Cost Benefit Analysis (4) Explores the use of benefit-cost techniques for analyzing policy, regulatory, and public investment decisions. Topics to include discounting, estimating demand in primary and secondary markets, risk and uncertainty, and nonmarket valuation. This widely-used applied economics tool will be mastered through lecture, applied problem-solving and a benefit-cost analysis project. Prerequisite: PUBPOL 516 and 517, or permission of instructor.

PUBPOL 519 Law and Economics (2-4, max. 4) Examines the applications of Law and Economics to: torts, property, contract, and criminal law; intellectual property, tobacco litigation, employment law, human organ sales, and U.S. regulatory design. Offered: jointly with LAW A 561.

PUBPOL 520 Intergovernmental Relations (4) Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

PUBPOL 521 Managing Public Grants and Contracts (4) Public organizations are increasingly reliant on partners and contractors for the delivery of public services, using a variety of means to engage these partners, including grants and contracts. This course explores how to best design, manage, and evaluate contracts/grants to improve performance, including the process through which contracts and grants are managed, and how to effectively evaluate performance to inform future partnerships.

PUBPOL 522 Financial Management and Budgeting (4) An introduction to financial and management accounting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

PUBPOL 523 Advanced Budgeting in the Public Sector (4) Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Recommended: PUBPOL 522, or instructor permission. Recommended: PUBPOL 522

PUBPOL 524 Public Sector Financing (4) Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PUBPOL 522, or instructor permission.

PUBPOL 525 Qualitative Field Methods and Analysis (4) Provides a review of qualitative field research methods, exposure to writing from the field, and opportunities to try practicing fieldwork. Emphasizes study design, case selection, interviewing techniques, survey design, and field notes. Addresses coding, analysis, writing, and presenting findings.

PUBPOL 526 Program Evaluation (4) Introduction to the theory, practice, and politics of program and policy evaluation. Covers the major types of evaluation, including theory of change, implementation and process evaluation, and impact evaluation, as well as quantitative and qualitative data collection techniques, the ethics of evaluation, and engaging stakeholders in evaluation.

PUBPOL 527 Quantitative Analysis I (4) Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals.

PUBPOL 528 Quantitative Analysis II (4) Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and causal inference methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: permission of instructor; recommended: PUBPOL 527

PUBPOL 529 Advanced Quantitative Methods for Policy Analysis (4) Teaches students more advanced quantitative methods applied to program evaluation and policy analysis. Students develop ability to do independent research by developing skills in assessing data qualities, research design, and appropriate application of a variety of quantitative methods. Prerequisite: permission of instructor; recommended: PUBPOL 527, PUBPOL 528

PUBPOL 531 Development Management and Governance (4) Addresses the connections linking governance systems, the management and implementation of public policies, and policy and program outcomes, with focus on capacities and strategies of a broad array of actors engaged in international development. Covers management challenges faced by government bureaucracies and civil society actors, the changing landscape of development assistance, public sector reforms, and human rights in development context.

PUBPOL 532 International Development Capstone (2) Provides students the opportunity to interact with professionals in the field during panel discussions. Students produce a short summative paper as a final project. Students will have completed the preceding International Development Certificate Program (IDCP) core courses: PUBPOL 531 and PUBPOL 533.

PUBPOL 533 Economics of International Development (4) Economics of International Development critically examines the validity and reliability of most common economic development indicators of poverty, growth and inequality, and provides an overview of, and basic literacy around, international macroeconomic topics including debt, aid, trade and financial markets.

PUBPOL 534 Food and Agricultural Policy in Developing Countries (4) Provides an understanding of the role of agriculture in economic development. Examines frontier policy issues in developing countries related to food security and agricultural production. The emphasis is on developing a nuanced understanding of contemporary food and agricultural policy issues, with a firm grounding in theory and history.

PUBPOL 535 American Foreign Policy (4) Examines how the U.S. foreign policy

process works, emphasizing formation, content, and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.

PUBPOL 536 Diagnosing and Reforming Corrupt Systems (4) Corruption - one of the greatest obstacles to social, economic, and political development around the world - has become a focal point for efforts to improve public sector performance. This course explores strategies for the prevention and mitigation of corruption across a range of contexts and takes an action-oriented approach, drawing lessons from corruption cases and focusing on what approaches might be undertaken under different circumstances.

PUBPOL 537 Topics in International Affairs (3-5, max. 20) Examines selected topics of interest and import in foreign policy and international affairs or development. Focuses on an in-depth analysis of policy issues considering economic, institutional, and political dimensions.

PUBPOL 538 International Organizations and Ocean Management (3) Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with SMEA 507.

PUBPOL 539 Values in International Development (4) Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

PUBPOL 540 Advanced Policy Analysis (4) Provides a more critical view of policy analysis by taking a deep dive into topics related to policy analysis and questioning underlying assumptions while conceptualizing policy analysis within societal structures. Recommended: PUBPOL 513.

PUBPOL 541 The Role of Nongovernmental Organizations in International Development (4) Explores issues faced by nongovernmental organizations (NGOs) working in developing and transition countries, including perspectives from international and indigenous NGOs and community-based organizations. Topics covered include relationships between NGOs and the state, the market, intended beneficiaries, and funder relationships. Key issues discussed include the challenges of funding, participation, advocacy humanitarianism, and social change.

PUBPOL 542 Computational Thinking for Governance Analytics (4) Combines data science and computational social science in a policy studies structure. Introduces algorithmic thinking and develops good practices in reproducibility for professional work in policy research.

PUBPOL 543 Visual Analytics for Policy and Management (4) Provides students with visualization tools to show insights to political or scientific communities, while presenting different strategies to avoid biased interpretations. Emphasis on the building of templates to produce information.

PUBPOL 544 Tax Policy and Analysis (4) Provides theoretical and empirical tools to analyze current tax policy and proposed tax reforms. Prerequisite: either PUBPOL 517 and PUBPOL 528, or permission of instructor

PUBPOL 545 Advocacy for Social Change (4) Examines different components of advocacy, including: role of and opportunities for advocacy in the policy process; relationship between advocacy, social movements, and public policy; organizations leading advocacy in the U.S. and their regulatory environment; and tactics and strategies used for advocacy. Offered: W.

PUBPOL 546 Geographic Information System for Public Policy (4) Focuses on use of geographic information systems in public policy analysis with particular attention to the tools widely used by social scientists, public policy scholars, urban planners, and environmental scientists. Offered: W.

PUBPOL 547 Water Resource Economics (4) Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on

water resources, and economic approaches to mitigate these effects.

PUBPOL 548 Public Policy and Program Implementation (4) Examines the implementation of public policy and programs. Introduces multi-level implementation analysis and focuses on understanding how the core policy or program is understood at the policy field, organizational, and frontline levels. Offered: Sp.

PUBPOL 549 Redesigning Public Services (5) Focuses on practices that support redesign of public services. Explores how public, nonprofit, and philanthropic structures create operational realities that must be navigated to lead change across institutional boundaries.

PUBPOL 550 Managing Nonprofit and Philanthropic Organizations (4) Focuses on the roles and practices of nonprofit and philanthropic organizations. Provides an overview of topics relevant to nonprofit and social sector organizations, including theoretical foundations, legal forms, governance and leadership, cross-sector relationships, revenue streams and fundraising, and policy advocacy.

PUBPOL 551 Impact Evaluation (4) Examines how to understand impact evaluations from both a methodological perspective and a body-of-evidence perspective. Offered: W.

PUBPOL 552 Philanthropy and Society (4) Provides students a holistic background of the philanthropic sector. Begins with an in-depth analysis of history and context and ends with a discussion of current strategies and approaches to giving by foundations. Builds in sequence: history, context, sub-sectors, accountability, and results.

PUBPOL 553 Nonprofit Financial Management (4) Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.

PUBPOL 554 Social Enterprise: New Models for Mission Based Business (4) Examines the changing landscape for social investments. Covers the tools to become an effective social entrepreneur or practitioner working in the social enterprise and mission-based business space with a focus on race and equity.

PUBPOL 555 Topics in Nonprofit Management, Philanthropy, and Social Enterprise (3-5, max. 20) Covers a range of topics applied to nonprofit, philanthropic, and social enterprise organizations.

PUBPOL 556 Public-Private Partnerships (4) Provides a comprehensive overview and examination of partnerships and their implications for public policy and nonprofit and public management. Examines the diverse array of partnerships in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

PUBPOL 557 Financial Modeling for the Public Sector (4) Covers financial modeling concepts at the core of public sector finance including: cash flow (or revenue) forecasting and proforma financial statements, capital life-cycle cost analysis, portfolio valuation and risk management, debt sizing, structure, and refinancing.

PUBPOL 558 Collaboration and Management Across Sectors (4) Organizations from different sectors (public, business, nonprofit) increasingly work together to achieve unique, collaborative outcomes. Managing cross-sector relationships presents dynamic process and governance challenges that go well beyond the difficulties of managing within an organization. Explores the opportunities and risks involved in working across organizational boundaries.

PUBPOL 559 Advanced Performance Management: Quadruple Bottom Line Lab (4) Examines the Quadruple Bottom Line as a conceptual framework and emerging set of tools for a more comprehensive and balanced accounting of organizational and institutional behavior and outcomes related to economic efficiency, social equity, environmental sustainability, and creative cultural vitality.

PUBPOL 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4) Explores national/local urban policy concerning the major problems

confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

PUBPOL 561 Urban Economics and Public Policy (4) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and growth management, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: successful completion of an introductory microeconomics course or permission of the instructor. Offered: jointly with URBDP 561.

PUBPOL 562 Immigration Policy (4) Builds foundational knowledge of American immigration policy, providing students with the conceptual and analytical tools required to critically evaluate any and all arguments made in current policy debates, and to move toward making unique and original contributions to those debates.

PUBPOL 563 Intergroup Relations and Public Policy (4) Explores how social psychological research on intergroup relations is pertinent to various aspects of public policy. Includes historical and current perspectives. Examines how the literature describes how individuals perceive, judge, and feel about individuals from various social groups. The groups discussed ranges from minimal groups to classic social groups.

PUBPOL 564 Housing and Social Policy (4) Provides an overview of the field of housing policy and its interrelationships with social problems in the United States. Explores various dimensions of housing problems with an emphasis on housing affordability and examines the primary policy tools used to respond to housing problems.

PUBPOL 565 Topics in Urban Affairs (3-5, max. 20) Examines various topics of public importance in urban policy. Integrates the political, managerial, economic, and technical dimensions of these issues.

PUBPOL 566 Community Economic Development (4) Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.

PUBPOL 567 Methods for Engaging Communities in Local Governments (4) Introduces conceptual frameworks and practical strategies to center equitable and inclusive stakeholder participation in local government. Students learn to analyze the context of engagement, select and deploy appropriate methods, and develop techniques for appropriate documentation to enable decision making.

PUBPOL 568 Values and Bias (4) Examines how behavior of non-elite political actors are shaped and guided by cognitive biases, emotions, and ideological motivations. Uses psychological and behavioral sciences perspective to illuminate what Americans think about topics of social and political importance, how opinions are formed, and how individuals transmit ideas to shape public policy.

PUBPOL 569 Race and Public Policy (3-4) Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

PUBPOL 570 Foundations of Social Policy (3) Examines major institutions and programs in social policy including: income maintenance, social services, education, and healthcare. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.

PUBPOL 571 Education, The Workforce, and Public Policy (4) Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, and among the various levels of the education system, underutilized workers, race and gender issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

PUBPOL 572 Race and Equity in Policy and Governance (2, max. 4) An introduction

for understanding race and equity in policy and governance. Power, privilege, and disadvantage are distributed based on race, skin color, and ethnicity. Develop the ability to identify and critique racist or racialized policies and management practices; examine your own experience of race, privilege, and oppression; and learn to use tools for increasing racial equity and inclusion in public, nonprofit, and private sectors. Credit/no-credit only.

PUBPOL 573 Topics in Education and Social Policy (3-5, max. 20) Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

PUBPOL 574 Economics of Race and Inequality in the United States (3/4) Covers the history of racial inequality over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.

PUBPOL 575 Taxes and Social Policy (4) Examines major areas of social policy that interact with the tax system. Prerequisite: either PUBPOL 517 and PUBPOL 528, or permission of instructor.

PUBPOL 576 Poverty and Anti-Poverty in the United States (4) Examines the nature and extent of poverty in the United States, its causes and consequences, and the antipoverty effects of public policies.

PUBPOL 577 Economics of Health Policy (4) Uses an economic perspective to examine a variety of issues related to the provision of medical care in the United States. Topics include medical care demand, the role of health insurance, the health and financial consequences of being without insurances, health care spending, and the Affordable Care Act. Prerequisite: instructor permission; recommended: PUBPOL 517

PUBPOL 578 Asset Building for Low Income Families (4) Explores assets and finances for low income families primarily in the United States. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.

PUBPOL 579 Child Well-being and Public Policy (4) Covers the contexts of child well-being, the arguments for government intervention during childhood, and 4-5 specific topics in child policy. Integrates theory and evidence from Developmental Psychology, Economics, Sociology, and Social Neuroscience. Focuses on US Federal, state, and local policies.

PUBPOL 581 Crime and Punishment Policy (4) Examines how the confluence of politics, culture, ideology, and empirics generates policy related to crime and punishment. Offered: A.

PUBPOL 582 Communicating Climate Change (4) Surveys climate change communications and their role in achieving climate change policy goals. Assesses the ethics and science of climate change communication. Explores theories and frameworks to evaluate and improve climate change communications. Examines the role of climate change communication as a policy tool.

PUBPOL 583 Science, Technology, and Public Policy (4) Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy, information technology, global warming, robotics, national security, homeland security, and space exploration.

PUBPOL 584 Local Government Management (4) Explores a wide range of local government topics. Topics include: inclusive community engagement practices; economic development strategies; current issues in policing; and applying an equity lens in local government decision making. Offered: W.

PUBPOL 585 Topics in Science, Technology, and Public Policy (3-5) Examines relationship between advancement of technical knowledge and pace of

technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

PUBPOL 586 Technology, Law, and Policy (4) Provides a case-based learning experience in the analysis and framing of technology and ethics challenges under debate in public and private sectors. Offered: Sp.

PUBPOL 587 Native Nations, Native Lands, Native Waters (4) Examines the ways that Native Nations in the US function as self-governing sovereigns and the ways that Native Nations govern their lands and waters. Considers how Native Nations interact with other governments and the consequences of those interactions.

PUBPOL 588 Data Science for Public Policy (4) Introduction to various data science methods and use of data science in public policy analysis. Topics include machine learning, network analysis, and numerical analysis. Offered: AW.

PUBPOL 589 Risk Assessment for Environmental Health Hazards (4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEWA 560/ENV H 577; A.

PUBPOL 590 Environmental Policy (4) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Explores different policy tools for environmental protection, including command-and-control regulation, market-based incentives, third-party certifications, and collaborative partnerships.

PUBPOL 592 Resource Policy and Administration (4) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with SEFS 571.

PUBPOL 593 Climate Change and Energy Policy (4) Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental, and equity considerations; government research and development programs.

PUBPOL 594 Economic Approaches to Environmental Management (4) Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples. Prerequisite: PUBPOL 516; PUBPOL 517; PUBPOL 527; PUBPOL 528

PUBPOL 595 Topics in Environmental Policy and Management (3-5, max. 20) Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

PUBPOL 596 Environmental Risks and Values (4) Explores a range of sources of risk to human health and the environment, and the values that color communication, perception, and decision making about risk. This topic lies at the core of an ongoing conversation between communities, governments, scientists, the media, and others. Topics include energy, climate, water supply, emerging technology, and environmental justice.

PUBPOL 597 Environmental Decision Analysis (4) Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.

PUBPOL 598 Administrative and Policy Professional Skills Workshop (1-3, max. 12) Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops

emphasize hands-on problem resolution, simulations, and actual practice. Credit/no-credit only.

PUBPOL 599 Special Topics (1-6, max. 28) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

PUBPOL 600 Independent Study or Research (*-) Evans School MPA students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School MPA Student Handbook for details.

PUBPOL 605 Degree Project ([1-8]-) Evans School MPA students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School MPA Student Handbook for details.

PUBPOL 608 Capstone Project Seminar ([4-8]-) Meets the capstone project requirements as part of the Evans School MPA curriculum. Students work in a supportive seminar environment facilitated by peers and faculty to complete team-based capstone degree projects.

PUBPOL 615 Project Leadership Skills Lab (2) Introduces concepts, frameworks, and practical skills around project management to address technical and adaptive challenges.

PUBPOL 616 Public Innovation Workshop (4) Focuses on developing strategic leadership development to alter organizational conditions and narrow disparities in public service outcomes.

PUBPOL 617 Simulation Capstone (3) Provides opportunity for students to engage in culminating capstone experience to engage in solving a real world problem.

PUBLIC POLICY AND MANAGEMENT

PPM 500 Proseminar in Public Policy and Management (1, max. 9) Engages students with faculty to discuss research in public policy and management. Provides an effective means to become familiar with research agendas and opportunities in this field, and other aspects of socialization into the academic process, including teaching, grant writing, and publishing. Credit/no-credit only.

PPM 502 Research Design (4) Provides a rigorous foundation for interdisciplinary research design. Introduces iconic types of theory (predictive, interpretive, and explanatory) and the philosophical foundations underlying these. Reviews a range of methodological approaches to research: experimental and quasi-experimental, ethnographic, comparative case-study, statistical, meta-analytic, simulations, and triangulation.

PPM 504 Perspectives on Institutions (4) Prepares doctoral students for careers in research and teaching public policy, management, and leadership by introducing foundational scholarship on the major institutional forces that influence the policy process. Examines key critiques as well as integration and application of the perspectives to public policy and management challenges.

PPM 506 Advanced Microeconomics for Policy Analysis (4) Introduction to advanced economic theory. Covers core models in consumer theory, producer theory, and public economics. Topics include: consumer choice, the theory of the firm, choice under uncertainty, neoclassical and behavioral models of inter-temporal choice, basic game theory, externalities, public goods, and an introduction to welfare economics. Recommended: multivariate calculus; intermediate microeconomic theory.

PPM 508 Public Policy Processes (4) Political science frameworks, approaches, and theories concerning development and implementation of public policies within American and other democratic political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and the role of institutions in constraining and enabling policy change.

PPM 510 Public Policy Analysis (4) Reviews public policy analysis and evaluation building on prior study of microeconomics, policy processes, research design, and

statistics. Covers theoretical and interdisciplinary frameworks and applications of empirical methods to policy problems and solutions, and considers regularities in incidence, and effects of the use of alternative policy tools.

PPM 512 Data Analysis Practicum (4) Develops the methodological capacity to undertake independent research. Includes reading, critiquing, and replicating portions of selected empirical papers from a range of scholarly areas. Provides opportunities to deal with issues of research design, data limitations, measurement, model specification, and interpretation.

PPM 514 Organizations, Management, and Theory (4) Explores key theories of organizations and management employing perspectives from sociology, political science, economics, and public management. Theories are applied in the context of private, nonprofit, and public sector organizations. The course builds on the required course PPM 504 Institutional Perspectives. Recommended: PPM 504

PPM 599 Topics in Public Policy and Management (1-6, max. 16) Examines various research topics of importance in public policy and management.

PPM 600 Independent Study or Research (*) Evans School PhD students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School PhD Student Handbook for details.

PPM 603 Teaching Mentorship (2, max. 50) Evans School PhD students only. By arrangement with instructor. See current Time Schedule for link to application. Refer to Evans School PhD Student Handbook for details. Credit/no-credit only.

PPM 800 Doctoral Dissertation (*) Evans School PhD students only. See current Time Schedule for link to application. By arrangement with doctoral dissertation supervisor. Refer to Evans School PhD Student Handbook for details.

SCHOOL OF PUBLIC HEALTH

BIOSTATISTICS

BIOST 111 Lectures in Applied Statistics (1) NSc Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no-credit only. Offered: jointly with STAT 111; Sp.

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NSc Introduces biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research. Includes biomedical study design, randomization, graphical data displays, control bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations.

BIOST 302 Forensic Genetics (3) NSc/SSc, RSN Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to understand calculations relevant for parentage determination; the identification of remains; the use of genetic genealogy, and to consider the implications of familial searching of DNA databases. Recommended: GENOME 371 or equivalent. Offered: jointly with PHG 302; Sp.

BIOST 310 Biostatistics for the Health Sciences (4) RSN Introduction to statistics for students who plan to major in health sciences. Uses case studies from popular and scientific literature to study topics such as data description, study design, estimation, hypothesis testing, regression. Emphasizes concepts and interpretation rather than computation. Students should be able to interpret graphs and use concepts covered in 2nd-year algebra, including linear equations, logarithms, summation notation. Offered: AWSp.

BIOST 311 Regression Methods in the Health Sciences (4) RSN Introduces regression methods for analysis of continuous, binary, and time-to-event (survival) data. Covers linear regression; logistic regression; and proportional hazards regression, all at an introductory level. Makes use of examples drawn from the biomedical and health sciences literature. Prerequisite: BIOST 310.

BIOST 401 Computational and Applied Genetic Epidemiology (5) RSN Advanced topics in genetic epidemiology for undergraduate students, focusing on hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students will investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: PHG 301 or prior background in basic genetics and statistics. Offered: jointly with EPI 410/PHG 401; Sp.

BIOST 405 Introduction to Health Data Analytics (3) Covers the process of and tools used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with HIHIM 405.

BIOST 406 Research Design and Statistics for HIHIM (3) Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with HIHIM 425/STAT 406.

BIOST 425 Introduction to Nonparametric Statistics (3) NSc Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: Either STAT 311 and STAT 340, STAT 390, or STAT 391. Offered: jointly with STAT 425.

BIOST 499 Undergraduate Research (1-10, max. 30) Supervised reading programs; library and field research; special projects.

BIOST 502 Introduction to Statistics in Health Sciences (4) Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Emphasizes applications in health sciences. Offered: W.

BIOST 503 Application of Statistics to Health Sciences ([0-3]-, max. 3) Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: Sp.

BIOST 504 Foundations of Public Health for Biostatistics (2) Introduces students to key foundational concepts in Public Health and highlights the role of biostatistical methods and applications. Prerequisite: BIOST 522 or STAT 512; and BIOST 514 or BIOST 517 (can be taken concurrently) Credit/no-credit only. Offered: A.

BIOST 505 Writing, Presentation, and Collaboration Skills for Biostatistics (2) Develops communication and collaboration skills for biostatisticians working as part of a biomedical research team. Topics include effective dialogue with collaborators; summarizing scientific ideas and questions and translating these to targets of inference; collaborating to develop appropriate study designs and statistical analyses; communicating statistical analysis methods and results in clear written summaries and graphical displays. Prerequisite: BIOST 514; and BIOST 515, which may be taken concurrently; recommended: at least one quarter of both mathematical statistics and applied Biostatistics at the graduate level. Credit/no-credit only. Offered: W.

BIOST 507 Health Data Analytics (3) Healthcare organizations generate a large number of clinical performance metrics. Extracted data from different data systems is used to display relevant metrics in dashboards that are meaningful to senior leadership. Statistical tools may determine if differences in performance are significant and what factors are associated with the differences. Predictive models may then be built and inputs varied to obtain performance improvements. Recommended: beginner Excel skills. Offered: jointly with HIHIM 524; Sp.

BIOST 508 Biostatistical Reasoning for the Health Sciences (4) Provides a broad overview of biostatistical methods. Students are introduced to the data summaries and presentation, statistical inference (including hypothesis testing, p-values, and confidence intervals), sample size calculation, and modeling approaches such as linear regression analysis. Includes hands-on data analysis.

Prerequisite: EPI 511 or instructor's permission Offered: W.

BIOST 509 Introduction to R for Data Analysis in the Health Sciences (2) Introduction to R for data analysis. Covers installing R; scripts; reading in data and writing output; using help files; using functions; writing functions; graphics; R packages; data manipulation; loops; permutation tests; bootstrapping; and fitting models. Prerequisite: upper-division course in statistics or permission of instructor.

BIOST 510 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with OHS 568; S.

BIOST 511 Medical Biometry I (4) Presents the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.

BIOST 512 Medical Biometry II (4) Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511, BIOST 517, PHI 512, or equivalent. Offered: W.

BIOST 513 Medical Biometry III (4) Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: Sp.

BIOST 514 Biostatistics I (4) Presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test. Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

BIOST 515 Biostatistics II (4) Introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons. Real biomedical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Offered: W.

BIOST 516 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with EPI 535/PHG 519.

BIOST 517 Applied Biostatistics I (4) Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right-censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

BIOST 518 Applied Biostatistics II (4) Multiple regression for continuous, discrete, and right-censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

BIOST 519 Advanced Epidemiologic Methods I (3) First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend

beyond the scope of traditional methods. Prerequisite: EPI 512 and EPI 513
Offered: jointly with EPI 515.

BIOST 520 Advanced Epidemiologic Methods II (4) Second of a series of 2 courses whose objective is to deepen students' knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with EPI 516.

BIOST 522 Statistical Inference for Biometry I (4) This is the first in a two-course sequence that introduces the theory of statistical inference that provides foundations to common biostatistical methods. Topics of the sequence include basic concepts of probability, parametric distributions, exact and asymptotic sampling distribution of statistics, maximum likelihood estimation, unbiased estimating equations, theory of hypothesis testing and Bayesian inference. Prerequisite: either STAT 395, STAT 421, STAT 423, STAT 504 or BIOST 514 (can be taken concurrently) Offered: A.

BIOST 523 Statistical Inference for Biometry II (4) This is the second in a two-course sequence that introduces the theory of statistical inference that provides foundations to common biostatistical methods. Topics of the sequence include basic concepts of probability, parametric distributions, exact and asymptotic sampling distribution of statistics, maximum likelihood estimation, unbiased estimating equations, theory of hypothesis testing and Bayesian inference. Prerequisite: BIOST 522, or permission of instructor. Offered: W.

BIOST 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

BIOST 525 Advanced Methods for Global Health III (4) Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with EPI 556/G H 537/HMS 537; Sp.

BIOST 526 Bayesian Biostatistics (3) Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor's permission. Offered: jointly with EPI 540/HEOR 550; Sp.

BIOST 527 Nonparametric Regression and Classification (3) Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Offered: jointly with STAT 527; Sp.

BIOST 528 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with EPI 553/G H 536/HMS 536; W.

BIOST 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance

estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

BIOST 531 Statistical Methods for Analysis with Missing Data (3) Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with EPI 531.

BIOST 532 Research Integrity in the Data Sciences (2) Considers research integrity in the conduct of biomedical research, particularly regarding analysis of data and the interpretation and communication of statistics. Provides knowledge and resources to facilitate upholding the highest standards of research integrity. Helps students formulate justified responses to challenges, and nurtures a sense of professional responsibility to take action. Credit/no-credit only. Offered: jointly with ENV H 537; Sp.

BIOST 533 Theory of Linear Models (3) Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423 or BIOST 515; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

BIOST 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

BIOST 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4) Univariate and multivariate analysis of right-censored survival data. Kaplan-Meier estimation of survival curves; proportional hazards regression; accelerated failure time models; parametric modeling of survival data; model diagnostics; time-varying covariates; delayed entry. Prerequisite: either BIOST 513, BIOST 515, BIOST 518, or permission of instructor. Offered: jointly with EPI 537; W.

BIOST 540 Longitudinal and Multilevel Data Analysis (3) Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with software gained by analysis of data and critiques of published analyses. Prerequisite: either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

BIOST 544 Introduction to Biomedical Data Science (3/4) Provides an introduction to biomedical data science with an emphasis on statistical perspectives, inducing the process of collecting, organizing, and integrating information toward extracting knowledge from data in public health, biology, and medicine. Prerequisite: either BIOST 511 or equivalent; either BIOST 509 or equivalent; or permission of instructor. Offered: A.

BIOST 545 Biostatistical Methods for Big Omics Data (3) This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with GENOME 545/PHG 545.

BIOST 546 Machine Learning for Biomedical and Public Health Big Data (3) Provides an introduction to statistical learning for biomedical and public health data. Intended for graduate students in SPH/SOM. Prerequisite: one of the following: (1) BIOST 511 and BIOST 512 (which may be taken concurrently); (2) BIOST 514 and BIOST 515 (which may be taken concurrently); or (3) BIOST 517 and BIOST 518

(which may be taken concurrently). Offered: W.

BIOST 550 Statistical Genetics I: Mendelian Traits (3) Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with STAT 550; Sp.

BIOST 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 551; A.

BIOST 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENOME 371; or permission of instructor. Offered: jointly with STAT 552; W.

BIOST 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555/G H 534.

BIOST 556 Introduction to Statistics and Probability (5) Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with DATA 556/STAT 556; A.

BIOST 557 Applied Statistics and Experimental Design (5) Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: either STAT 556/BIOST 556/DATA 556 or permission of instructor. Offered: jointly with DATA 557/STAT 557; W.

BIOST 558 Statistical Machine Learning for Data Scientists (5) Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with DATA 558/STAT 558; Sp.

BIOST 561 Computational Skills for Biostatistics I (2) Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: biostatistics graduate student. Credit/no-credit only. Offered: Sp.

BIOST 562 Computational Skills for Biostatistics II (1) Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 561 or permission of instructor. Credit/no-credit only.

BIOST 563 Computing and Research (2) Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 562 or permission of instructor. Credit/no-credit only.

BIOST 565 Statistical Evaluation of Biomarkers (3) Covers evaluation of biomarkers for diagnosis; decision-theoretic assessment tools; measures of the

incremental value of a new biomarker; evaluation of risk prediction models; evaluation of biomarkers for prognosis or for guiding therapy; statistical learning for developing a diagnostic/prognostic score; and clinical trial designs for biomarker guided decisions. Prerequisite: BIOST 515; either BIOST 518 or both BIOST 512 and BIOST 513; or equivalent.

BIOST 570 Advanced Regression Methods for Independent Data (4) Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelihood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: either STAT 512 and STAT 513, or BIOST 522 and BIOST 523; and either STAT 502 and STAT 504/CS&SS 504, or BIOST 514 and BIOST 515; recommended: matrix algebra from a course at the level of BIOST 533/STAT 533. Offered: jointly with STAT 570; A.

BIOST 571 Advanced Regression Methods for Dependent Data (4) Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST570/STAT 570. Offered: jointly with STAT 571; W.

BIOST 572 Preparation for Research Prelim (3) Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: BIOST 571/STAT 571. Offered: jointly with STAT 572; Sp.

BIOST 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 30) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

BIOST 579 Data Analysis and Reporting (2/3, max. 12) Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics. Credit/no-credit only. Offered: jointly with STAT 579; SpS.

BIOST 580 Seminar in Biostatistics (*, max. 30) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

BIOST 581 Statistical Genetics Seminar (1, max. 30) Presentations and discussion of special topics and research results in statistical genetics. Students, posdocs, and faculty present their work and papers from the literature. Credit/no-credit only. Offered: AWSp.

BIOST 582 Student Seminar (1, max. 30) Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, master's theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no-credit only. Offered: AWSp.

BIOST 583 Advanced Theory of Statistical Inference I (4) Foundations of parametric statistics: elementary decision theory, Bayesian methods, modes of convergence, central limit theorems, delta method, maximum likelihood estimation, regularity, hypothesis testing under fixed and local alternatives, parametric efficiency theory. Prerequisite: STAT 513. ; recommended: mathematical analysis from a course at the level of either MATH 426 or STAT 559. Offered: jointly with STAT 581; A.

BIOST 584 Advanced Theory of Statistical Inference II (4) Semiparametric and nonparametric estimation of irregular parameters: minimax rates of convergence, kernel methods, bias-variance tradeoff, concentration inequalities, empirical risk minimization, Rademacher complexity, Vapnik-Chervonenkis dimension, covering

and bracketing numbers, empirical process theory (Glivenko-Cantelli results). Prerequisite: STAT 581/BIOST 583. ; recommended: mathematical analysis from a course at the level of either MATH 426 or STAT 559. Offered: jointly with STAT 582; W.

BIOST 585 Advanced Theory of Statistical Inference III (4) Semiparametric and nonparametric estimation of regular parameters: weak convergence, empirical process theory (Donsker results), asymptotic linearity, estimating equations, U-statistics, functional delta method, efficiency theory, construction of efficient estimators. Prerequisite: STAT 582/BIOST 584. ; recommended: mathematical analysis from a course at the level of either MATH 426 or STAT 559. Offered: jointly with STAT 583; Sp.

BIOST 588 Special Topics in Biostatistical Practice (1-10, max. 30) Selected topics in biostatistical practice.

BIOST 590 Biostatistical Consulting (3, max. 6) Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, under the supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

BIOST 591 Applied Research Project (3) Project-based course. Fulfills applied requirement of Biostatistics PhD program. Prerequisite: permission of the Applied Requirement Committee (ARC). Credit/no-credit only. Offered: AWSpS.

BIOST 595 Biostatistics Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: BIOST 514; BIOST 515; BIOST 536; BIOST 537.

BIOST 596 Biostatistics Capstone I - Project Planning (3) Project sponsors introduce students to health data analytics challenges. Students form collaborative teams, each of which writes, presents and revises a project proposal that outlines the approach and methods the group plans to use. Prerequisite: BIOST 504; BIOST 514; BIOST 515; BIOST 522; BIOST 523; BIOST 561; and BIOST 579, or permission of instructor. Credit/no-credit only. Offered: A.

BIOST 597 Biostatistics Capstone II - Project Implementation (3) Student teams implement their project proposals. At the end of the course, teams share their results in oral and written form, and prepare materials for individual portfolios. Prerequisite: BIOST 596, or permission of instructor. Credit/no-credit only. Offered: W.

BIOST 598 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASp.

BIOST 600 Independent Study or Research (*-) Offered: AWSpS.

BIOST 700 Master's Thesis (*-) Offered: AWSpS.

BIOST 800 Doctoral Dissertation (*-) Offered: AWSpS.

ENVIRONMENTAL & OCCUPATIONAL HEALTH SCIENCES

ENV H 105 Toxic Tales: Building Skills for Academic Success through the Study of Poisons (2) Designed to help first-year undergraduate students develop the study skills necessary for success through an exploration of the environmental health sciences and toxicology. Through a series of lectures, readings, case studies, group discussions, and student presentations, students are introduced to, master, and demonstrate a variety of learning strategies. Offered: Sp.

ENV H 111 Exploring Environment and Health Connections (3) SSc/NSc

Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: AWSp.

ENV H 205 Environmental Health in Media (3) SSc Explores how the perspective of filmmakers and documentaries can influence the public's interpretation of environmental health issues, and examines the science and cultural norms that support both sides of the argument. Offered: Sp.

ENV H 220 Global Environmental Change and Public Health (3) SSc Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with G H 220; W.

ENV H 305 Environmental Poisons and Public Health (3) SSc/NSc Introduces concepts and tools that help students think critically about how environmental toxicants can impact human health. Covers basic principles and core concepts from toxicology, epidemiology, exposure assessment, risk assessment and risk management through a case-based approach that focuses on a selection of representative toxicants of current public health relevance. Offered: A.

ENV H 306 Health and Sustainability (3) NSc/SSc, DIV Focuses on the intersection of human health and environmental sustainability. Introduces core concepts of sustainability and public health, and explores the intersections of health and sustainability in specific domains including energy, transportation, the built environment, food systems, and chemicals. Emphasizes a systems thinking approach to formulating solutions. Offered: A.

ENV H 310 Green Chemicals, Green Products, Green Processes: Crafting a Less Toxic World (3) SSc/NSc Presents green chemistry in the context of social impact and public health. Focuses on the relationship between the science and application of chemistry, and the conditions of life that affect everyone's health, particularly in the developed world. Prerequisite: CHEM 142 or CHEM 120; recommended: either CHEM 220 or CHEM 237; either one ENV H or SPH course.

ENV H 311 Introduction to Environmental Health (3) SSc/NSc Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

ENV H 320 Introduction to Technical Communication in Environmental Health (5) Written and oral communication for environmental health professionals. Principles of effective writing for technical articles, proposals, and reports with attention to structure, clarity, style, and language usage. Students learn to translate complex technical information for broader audiences. Offered: W.

ENV H 405 Toxic Chemicals and Human Health (4) NSc Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing, disposition in the body; modifiers of response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: a minimum grade of 2.0 in BIOL 220; and a minimum grade of 2.0 in either CHEM 220, CHEM 224, CHEM 238, or CHEM 336. Offered: Sp.

ENV H 406 Disasters and Public Health (3) SSc/NSc Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

ENV H 409 Microbiome and Environmental Health (3) NSc Introduces the current science of microbiome impacts on environmental public health. Defines human, animal, and environmental microbiomes, describes the methods used to characterize these microbiomes, and discusses the impact of microbiomes on the health of human and animal populations. Factors that have been suggested to

modulate microbial populations, host-microbe interactions, and the dynamics of microbiome populations are also examined. Offered: Sp.

ENV H 417 Case Studies in Children's Environmental Health Disparities (3) DIV Introduces students to the ways in which children are disproportionately affected by environmental health hazards. Through a series of engaging case studies, student learn the core scientific concepts of children's environmental health while exploring the social, cultural, regulatory, political, and economic factors that lead to children's health disparities. Offered: Sp.

ENV H 418 Understanding and Managing the Health Risks of Climate Change (3) SSc Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 418; W.

ENV H 426 Leadership in Public Health I (1) SSc, DIV Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on development of personal leadership skills and acumen. Credit/no-credit only. Offered: A.

ENV H 427 Leadership in Public Health II (1) SSc, DIV Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in academic settings. Credit/no-credit only. Offered: W.

ENV H 428 Leadership in Public Health III (1) SSc, DIV Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in practice/community settings. Credit/no-credit only. Offered: Sp.

ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NSc Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 162 ; PHYS 114 ; and ENV H 311, may be taken concurrently. Offered: A.

ENV H 432 Chemical Sampling and Analysis (5) NSc Laboratory and lecture on chemical sampling and analysis. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 152 Offered: Sp.

ENV H 433 Microbiological Sampling and Analysis (5) NSc Laboratory and lecture on microbiological sampling and analysis. Field and laboratory analysis of microbiological agents found in the occupational and ambient environments (water, food and air). Prerequisite: MICROM 301 or MICROM 410; and MICROM 302 or MICROM 402. Offered: W.

ENV H 439 One Health: Human and Animal Health in a Changing Environment (3) NSc/SSc Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Prerequisite: BIOL 180. Offered: W.

ENV H 440 Water, Wastewater, and Health (3) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 441 Food Protection (3/4) NSc Explores preventative and responsive measures that can be taken so that food intended for human consumption is safe and does not cause illness or other adverse effects. Students learn about various food safety hazards, basic sanitation principles employed along the farm to fork continuum for controlling hazards, the regulatory environment that exists to minimize food safety risks, and potential career paths in the field of food safety. Offered: A.

ENV H 442 Zoonotic Diseases and Their Control (3) NSc Explores zoonotic diseases (zoonoses) and the role that animals play as reservoirs, hosts, and

vectors, locally and globally. Students learn about vector-borne diseases of public health significance and general strategies for identification, surveillance, and control of bats, rodents, flies, roaches, bedbugs, mosquitoes, and ticks. Covers the role of environmental health professionals and potential career paths in the field of zoonotic disease. Offered: Sp.

ENV H 443 Housing and Health (3) SSc/NSc Explores healthy and safe homes as a crucial element in public health. Review of federal, state and local approaches to housing-related programs under the banner of healthy homes. Students completing this course will understand the relationship between housing and human health and well-being. Offered: A.

ENV H 444 Antimicrobial Resistance Impact on the Environment and Public Health (4) Explores how the global emergence of antimicrobial resistance has profound consequences on the health of humans, animals, and the environment. Students learn about factors contributing to antimicrobial resistance around the world, mechanisms of resistance, risk communication, as well as mitigation strategies. Offered: A.

ENV H 445 Solid Waste Management (3) Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Offered: Sp.

ENV H 446 Hazardous Waste and Public Health (3) Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: CHEM 152 or CHEM 220; and MATH 124 or Q SCI 291. Offered: W.

ENV H 447 Environmental Change and Infectious Disease (3) Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

ENV H 448 Community Air Pollution (3) Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Offered: Sp.

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: W.

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Offered: Sp.

ENV H 453 Industrial Hygiene (3) Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Offered: A.

ENV H 460 Occupational Safety Management (3) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Offered: Sp.

ENV H 461 Air-Pollution Control (4) Fundamental concepts of air pollution Control

including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with CEE 490; ASp.

ENV H 462 Technical Aspects of Occupational Safety (3) Technical knowledge of safety equipment, hazard identification and control, understanding of regulations, and hands-on application of safety measures. Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on employers and employees in key industries. Offered: Sp.

ENV H 465 Geographic Information Systems (GIS) in Public Health (3) NSc/SSc Applications of Geographic Information Systems (GIS) in public health. Practical experience using the principles, methods, and techniques of spatial analysis to solve practical public health problems within a variety of sub-disciplines, focusing on environmental health, but also exploring infectious diseases, health services and community health. Spatial data representation and management, visualization of spatial data, and exploratory analyses. Offered: A.

ENV H 472 Environmental Risk and Society (3) SSc Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

ENV H 473 Environmental Health Policy and Practice (4) SSc Explores how environmental health problems are controlled in the United States. Examines both the policies and practices of environmental health. Looks at how various government programs are established, organized, and operated to prevent or control hazards in the community. Also examines the legal and regulatory framework. Offered: A.

ENV H 475 Environmental Justice and Population Health (3) SSc, DIV Critically examines environmental justice as a social movement, with a focus on environmental and occupational exposures and related health outcomes and health disparities. Students explore the ways in which environmental racism, inequality, and injustice lead to disproportionate impacts of pollution on Black, Indigenous, and people of color (BIPOC) communities and explore how environmental justice intersects with race, class, and health. Offered: Sp.

ENV H 479 Climate Change and Public Health Practice (3) SSc Covers material on climate change and health impacts, risk assessment and risk management, public health surveillance, climate and health research, public health administration and financing, early warning systems, community engagement, and scenario-based planning. Introduces theoretical frameworks for climate resilient health systems and explores how to develop, tailor, and maintain essential public health services to address climate change. Offered: jointly with G H 420; Sp.

ENV H 480 Undergraduate Seminar (1, max. 6) Covers career exploration and planning within the environmental health major through presentation of current environmental and occupational health issues. Offered: A.

ENV H 482 Environmental Health Internship (2-15, max. 15) Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning, and utilization of community resources. Prerequisite: minimum grade of 2.5 in ENV H 311. Credit/no-credit only. Offered: AWSpS.

ENV H 490 Selected Topics in Environmental Health (1-6, max. 20) In-depth study of a current environmental health topic. Offered: Sp.

ENV H 497 Environmental Health Special Electives (*, max. 35) Offered: Sp.

ENV H 499 Undergraduate Research (*, max. 35) Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

ENV H 501 Foundations of Environmental and Occupational Health (4) Covers the foundational environmental and occupational public health knowledge

domains. Provides a comprehensive overview of an environmental and occupational public health framework and a One Health systems model for assessing and managing environmental health risks on a local and global scale. Offered: A.

ENV H 502 Assessing and Managing Risks from Human Exposure to Environmental Contaminants (4) Exposure science provides quantitative data needed to inform risk assessments and apply regulatory standards to a wide range of hazards. Introduces techniques such as hazard identification, dose response estimation, fate and transport modeling, statistical exposure and dose estimation, exposure biomarkers and toxicological risk characterization as applied in both occupational and community environments. Offered: W.

ENV H 503 Adverse Health Effects of Environmental and Occupational Toxicants (4) Principles governing the effects of toxicants on health, including: acute, sub-acute and chronic toxicity; dose response modeling; derivation of potency; response modifiers; adverse health effects including cancer, birth defects and damage to major organ systems; regulation of toxicants in the home, workplace and general environment. Focus on human health impacts of toxicants in a public health context. For non-toxicology majors. Offered: A.

ENV H 504 Advanced Environmental Health Sciences Research Methods (4) Provides high level introduction to advanced research methods in environmental health sciences. Topics include: approaches to study environmental health, experimental design, sampling plan development, data analysis, and responsible conduct of research. Offered: Sp.

ENV H 506 Disasters and Public Health (3) SSc/NSc Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

ENV H 509 Microbiome and Environmental Health (3) Introduces the current science of microbiome impacts on environmental public health. Defines human, animal, and environmental microbiomes, describes the methods used to characterize these microbiomes, and discusses the impact of microbiomes on the health of human and animal populations. Factors that have been suggested to modulate microbial populations, host-microbe interactions, and the dynamics of microbiome populations are also examined. Offered: Sp.

ENV H 510 Global Environmental and Occupational Health (4) Provides an overview of environmental and occupational health, with major focus on developing countries. Examines a variety of environmental hazards and influential factors, interactions with human health and well-being, and relevance to public health. Considers workplace, community, home, regional, and global problems. Offered: W.

ENV H 511 Environmental and Occupational Health (4-) Provides a graduate-level overview of the multidisciplinary field of environmental and occupational health. Environmental, occupational, and nutritional problems in different settings (e. g. the workplace, community, and home) and at varying scaled (local, regional, and global) are considered, with special emphasis on considerations related to food systems and nutrition. Offered: Sp.

ENV H 512 Environmental and Occupational Health for Public Health Practitioners (3) Introduces students in professional degree programs in Public Health to basic concepts from environmental and occupational health sciences, to the methods used to study the links between the environment and health, to the health impacts of various environmental exposures, and to the environmental public health approach to controlling or managing risks and promoting health. Offered: W.

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with PCEUT 513/PHG 513; W.

ENV H 514 Fundamentals of Toxicology (3) Covers major fundamentals and core areas of toxicology, including dose response, absorption, distribution, metabolism, and excretion of toxicants, toxicity testing, interpretation of toxicological data; and

biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses. Also explores mechanisms and fate of chemical interaction with biological systems. Prerequisite: BIOL 212, BIOC 405, or permission of instructor. Offered: A.

ENV H 515 Organ System Toxicology (4) Focuses on organ system toxicology. Emphasizes the pathophysiology of toxicant-induced organ injury, including adaptive responses to toxicant exposure, inflammation, and tissue repair pathways. Offered: W.

ENV H 516 Toxic Agents: Effects and Mechanisms (4) Focuses on the toxic effects and the underlying mechanisms of the principal classes of toxicants: pesticides, metals, solvents, air pollutants, persistent organic pollutants, radiation, as well as on food safety and occupational/clinical/eco toxicology. Prerequisite: ENV H 515 or permission of instructor. Offered: Sp.

ENV H 517 Children's Environmental Health (3) Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and benefits of seafood consumption during pregnancy; use of pesticides on food and in the home; air pollution and childhood asthma, and childhood injuries and the built environment. Offered: Sp.

ENV H 518 Understanding and Managing the Health Risks of Climate Change (3) Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 518; W.

ENV H 520 Advanced Technical Communication in Public Health (3) Covers written and oral communication for environmental health and public health professionals, with particular emphasis on three main areas: conveying information more effectively to technical audiences, translating that information for general audiences in the public arena, and crafting effective commentary relating to topics of professional interest.

ENV H 521 Effective Communication Strategies for Environmental Public Health Professionals (2) Introduces students to the science of and best practices in science communication. Covers how and why to use narrative structure, how to identify and emphasize important messages, how to influence behavioral change, identifying common mistakes in messaging, and how to interact with the media. Prepares students to present at conferences, interact with the media, engage with diverse communities, and write high impact papers and competitive grants. Credit/no-credit only. Offered: Sp.

ENV H 526 Leadership in Public Health I (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on development of personal leadership skills and acumen. Credit/no-credit only. Offered: A.

ENV H 527 Leadership in Public Health II (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in academic settings. Credit/no-credit only. Offered: W.

ENV H 528 Leadership in Public Health III (1) Designed for students who are serving on the School of Public Health Dean's Advisory Council of Students (DACS). Focuses on leading others in practice/community settings. Credit/no-credit only. Offered: Sp.

ENV H 530 Research Proposal Preparation for Biological Sciences (3) Provides first-hand experience for doctoral students in the biological sciences on proposal writing and the review process. Focuses on hypothesis-driven, laboratory benchwork based research following the NIH pre-doctoral fellowship format, and aims to prepare students for their pre-doctoral fellowship submissions and general qualifying exams. Offered: A.

ENV H 531 Neurotoxicology (3) Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H

514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: W, even years.

ENV H 532 Reproductive and Developmental Toxicology (3) Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: W, odd years.

ENV H 533 Molecular Toxicology (3) Advanced discussion of molecular mechanisms whereby chemical and biological agents produce their harmful effects on biological tissues. Topics include the role of xenobiotic biotransformation enzyme expression in chemical susceptibility, toxicogenomics, chemical-induced oxidative stress, alternative models, species differences, and dietary anti-carcinogens. Prerequisite: prior coursework in toxicology and biochemistry, or permission of instructor. Offered: Sp, odd years.

ENV H 534 Biochemical Toxicology of the Puget Sound (3) Advanced discussion of effects of pollutants on aquatic organisms at the molecular, biochemical, and physiological levels, and in the context of Puget Sound case studies. Topics include assessing toxicant-induced cell injury in aquatic organisms, biotransformation and detoxification pathways, toxicogenomics, assessing chemical diseases in fish, biomarkers, and zebrafish models. Prerequisite: prior coursework in toxicology and biochemistry or permission of instructor. Offered: W, even years.

ENV H 536 Health Impact Assessment (2) Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with URBPD 536.

ENV H 537 Research Integrity in the Data Sciences (2) Considers research integrity in the conduct of biomedical research, particularly regarding analysis of data and the interpretation and communication of statistics. Provides knowledge and resources to facilitate upholding the highest standards of research integrity. Helps students formulate justified responses to challenges, and nurtures a sense of professional responsibility to take action. Credit/no-credit only. Offered: jointly with BIOST 532; Sp.

ENV H 538 Public Health and the Built Environment (2) Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with URBPD 538.

ENV H 539 One Health: Human and Animal Health in a Changing Environment (3) Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Offered: W.

ENV H 540 Water, Wastewater, and Health (4) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 541 Food Protection (3) Explores preventative and responsive measures that can be taken so that food intended for human consumption is safe and does not cause illness or other adverse effects. Students learn about various food safety hazards, basic sanitation principles employed along the farm to fork continuum for controlling hazards, the regulatory environment in the U.S. that exists to minimize food safety risks, and potential career paths in the food safety field. Offered: A.

ENV H 543 Quantitative Microbial Risk Assessment (3) Focuses on the principles of quantitative risk assessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communication. Offered: Sp, even years.

ENV H 544 Antimicrobial Resistance Impact on the Environment and Public Health (4) Explores how the global emergence of antimicrobial resistance has profound consequences on the health of humans, animals, and the environment. Students learn about factors contributing to antimicrobial resistance around the world, mechanisms of resistance, risk communication, as well as mitigation strategies. Offered: A.

ENV H 546 Hazardous Waste and Public Health (3) Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Offered: W.

ENV H 547 Environmental Change and Infectious Disease (3) Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

ENV H 548 Community Air Pollution (3) Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

ENV H 549 Research Methods in Human Factors (3) Includes fundamental guidelines for survey design, controlled experiments, quasi-experimental, and observational studies. Focus on safety, productivity, functionality, and usability. Review of journal articles on research methods and design issues, given functional, psychological, physiological, and environmental constraints. Recommended: introductory class in human factors. Offered: jointly with IND E 549; Sp.

ENV H 550 Occupational and Environmental Disease (3/4) A case-based introduction to occupational and environmental diseases, focusing on disease epidemiology, pathophysiology, diagnostic testing basics, and aspects of population management such as disease surveillance, policy development, and health protection programs. A four credit option offered to clinically-oriented students additionally covers diagnostic test interpretation, differential diagnosis, and clinical management. Offered: Sp.

ENV H 551 Ecology of Environmentally Transmitted Microbial Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: W.

ENV H 552 Detection and Control of Environmentally Transmitted Microbial Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

ENV H 553 Environmental Exposure Monitoring Methods (4) Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, and soil, and for biological markers of exposure and effect in humans and other biota. Offered: W.

ENV H 554 Environmental Chemistry of Pollution (4) Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements.

ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Utilizes typical instrumental techniques and analytical methods

for the evaluation of potential occupational exposures. Prerequisite: ENV H 553 or permission of instructor. Offered: Sp.

ENV H 556 Quantitative Exposure Assessment (3) Offers statistical skills and examples to conduct analysis of occupational and environmental exposure data in order to understand the nature of airborne exposures in the environment, and their interpretation for human health. Focuses on reading and discussion of primary exposure assessment literature and statistical analysis and interpretation of real datasets. Prerequisite: either BIOST 508, BIOST 511, or BIOST 517. Offered: W, odd years.

ENV H 557 Exposure Controls (3/4) Presents engineering concepts for selecting exposure controls for chemical, physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and biohazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

ENV H 559 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with IND E 567/NSG 505; Sp, even years.

ENV H 560 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

ENV H 562 Technical Aspects of Occupational Safety (3) Technical knowledge of safety equipment, hazard identification and control, understanding of regulations, and hands-on application of safety measures. Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on employers and employees in key industries. Offered: jointly with NSG 507; Sp.

ENV H 563 Health and Safety of Physical Agents in the Workplace (3) Evaluation and prevention of injuries due to physical hazards in the workplace. Hazards covered include noise, vibration, physical agents, ionizing and non-ionizing radiation and thermal stress. Addresses basic physical concepts, health risks, measurement techniques, interpretation of guidelines and standards, and control techniques for each hazard covered. Offered: Sp.

ENV H 564 Recognition of Health and Safety Problems in Industry (2) Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

ENV H 565 Geographic Information Systems (GIS) in Public Health (3) Applications of Geographic Information Systems (GIS) in public health. Practical experience using the principles, methods, and techniques of spatial analysis to solve practical public health problems within a variety of sub-disciplines, focusing on environmental health, but also exploring infectious diseases, health services and community health. Spatial data representation and management, visualization of spatial data, and exploratory analyses. Offered: A.

ENV H 566 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

ENV H 569 Occupational Biomechanics (4) Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; Sp, even years.

ENV H 570 Environmental and Occupational Epidemiology (3) Research approaches in environmental and occupational epidemiology via didactics and discussion, lab exercises, and paper critiques. Main topics: climate change, outdoor air pollution, metals, environmental justice, built environment, energy transition, and occupational health. Emphasizes study design, confounding, selection, and information biases; exposure and risk assessment; geospatial methods; social determinants; and the exposome. Prerequisite: either EPI 511, or EPI 512 and EPI 513, or permission of instructor. Offered: jointly with EPI 570.

ENV H 571 Neuroepidemiology and Environmental Risk Factors (3) Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with EPI 571.

ENV H 572 Environmental Risk and Society (3) Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: A.

ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573.

ENV H 574 Probabilistic Exposure Analysis (3) Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: Sp, odd years.

ENV H 575 Environmental Justice and Population Health (3) Critically examines environmental justice as a social movement, with a focus on environmental and occupational exposures and related health outcomes and health disparities. Students explore the ways in which environmental racism, inequality, and injustice lead to disproportionate impacts of pollution on Black, Indigenous, and people of color (BIPOC) communities and explore how environmental justice intersects with race, class, and health. Offered: Sp.

ENV H 576 Clinical Occupational Medicine (2) For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENV H 577 Risk Assessment for Environmental Health Hazards (4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEWA 560/PUBPOL 589; A.

ENV H 579 Climate Change and Public Health Practice (3) Covers material on climate change and health impacts, risk assessment and risk management, public health surveillance, climate and health research, public health administration and financing, early warning systems, community engagement, and scenario-based planning. Introduces theoretical frameworks for climate resilient health systems and explores how to develop, tailor, and maintain essential public health services to address climate change. Offered: jointly with G H 520; Sp.

ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max.

21) Presentation of current environmental and occupational health research and issues. Credit/no-credit only. Offered: AWSp.

ENV H 581 Environmental Health Reading (1) Critical reading of selected basic and applied research publications on environmental health problems and programs.

ENV H 583 Thesis Research Proposal Preparation (1) Includes reviewing components of research proposals and practicing writing and developing effective aims, hypotheses, background materials, and analytic strategies for writing theses and presenting at scientific meetings. Offered: Sp.

ENV H 584 Environmental Health Policy and Practice (4) Explores how environmental health problems are controlled in the United States by examining the policies and practices of environmental health. Covers how various government programs are established, organized, and operated to prevent or control hazards in the community, and the legal and regulatory framework behind them. Offered: A.

ENV H 586 Current Issues in Occupational Health at the Human Animal Interface (2, max. 8) Problem-based seminar about the occupational health issues faced by workers with animal contact, including animal agriculture workers, veterinary workers, wildlife workers, and laboratory animal workers. Anchoring course for trainees in the Occupational Health at the Human Animal Interface (OHHAI) training grant. Offered: Sp.

ENV H 590 Selected Topics (1-6, max. 20) In-depth study of a current environmental health topic.

ENV H 591 Current Topics in Toxicology (2, max. 12) Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

ENV H 592 Current topics in Occupational Health Sciences (1/3) Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no-credit only. Offered: A.

ENV H 593 Current Topics in Risk Assessment (2, max. 24) Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Offered: AWSp.

ENV H 594 Current Topics in Environmental Health (1, max. 2) Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no-credit only. Offered: W.

ENV H 595 Research Rotation (3, max. 9) Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.

ENV H 596 Current Issues in Occupational and Environmental Medicine (2/4, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Offered: jointly with NURS 580; SpS.

ENV H 597 Case Studies in Environmental and Occupational Health (1, max. 12) Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational health-related illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

ENV H 598 Degree Program Project/Portfolio ([1-9]-, max. 18) Supervised project

work on a topic related to student's concentration in graduate study that results in a project paper. Offered: AWSpS.

ENV H 599 Field Studies (2-6, max. 6) Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no-credit only. Offered: AWSpS.

ENV H 600 Independent Study or Research (*-) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 700 Master's Thesis (*-) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 800 Doctoral Dissertation (*-) Prerequisite: permission of departmental adviser. Credit/no-credit only. Offered: AWSpS.

EPIDEMIOLOGY

EPI 201 Outbreak Investigation and Response (5) SSc/NSc, RSN Provides an introduction to infectious disease outbreaks of both domestic and global significance. Students learn about outbreak detection, investigation and response activities and methodologies through a combination of lecture, case studies, homework, and popular media. Offered: Sp.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) NSc/SSc, RSN Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 221 Maternal and Child Health-a Population Health Approach (5) NSc Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

EPI 320 Introduction to Epidemiology (4) NSc For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Offered: AWSp.

EPI 330 Analyzing Epidemiologic Data: Basic Methods (4) SSc, RSN Application of concepts to real data using basic epidemiologic analysis methods. Prerequisite: EPI 320; and either BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 211, or STAT 311. Offered: Sp.

EPI 360 Exploring the HIV/AIDS Pandemic (5) SSc/NSc, RSN Presents a comprehensive overview of the historical, public health, clinical, and biological aspects of HIV infection. Covers impact of AIDS on community and global health care and prospects for prevention and control. Offered: jointly with G H 360; W.

EPI 410 Computational and Applied Genetic Epidemiology (5) RSN Advanced topics in genetic epidemiology for undergraduate students, focusing on hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students will investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: PHG 301 or prior background in basic genetics and statistics. Offered: jointly with BIOST 401/PHG 401; Sp.

EPI 499 Undergraduate Research (*) Offered: AWSpS.

EPI 502 Physical Activity in Health and Disease (3) Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Recommended: human physiology. Offered: jointly with NUTR 505.

EPI 505 Preventing Healthcare Associated Infections (1) Multidisciplinary

approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with MED 540.

EPI 506 Surveillance Systems and Decision Making in Public Health (2) Introduces students to public health surveillance systems and decision-making based on surveillance data with a focus on the Washington State public health system. Covers a range of surveillance system types (e.g., foodborne illness, newborn screening, lead, emerging infectious diseases). Credit/no-credit only.

EPI 508 Computational and Applied Genetic Epidemiology (5) Topics in genetic epidemiology and its application in public health practice. Provides hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: prior background in basic genetics and statistics. Offered: jointly with PHG 501; Sp.

EPI 510 Epidemiologic Data Analysis (3) Intended for students planning to take EPI 514. Introduces concepts and programming skills necessary to perform core data management, data cleaning and analysis tasks using the R statistical programming language. Provides students hands-on experience with developing analytic code and working with epidemiologic data sets in R. Co-requisite: either EPI 511, EPI 512, or PHI 512. Credit/no-credit only. Offered: A.

EPI 511 Introduction to Epidemiology (4) Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe distribution and determinants of disease and health events in populations; uses quantitative and biomedical information to infer whether causal relationships exist between potential causes and disease in populations. Offered: A.

EPI 512 Epidemiologic Methods I (4) Considers principles and methods of epidemiology. Covers measures of disease frequency, descriptive epidemiology, overview of study designs, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, and confounding. First in a two course sequence. Prerequisite: BIOST 511, which may be taken concurrently, or equivalent. Offered: A.

EPI 513 Epidemiologic Methods II (4) Considers how epidemiologic studies may be designed to maximize etiologic inference. Covers infectious disease epidemiologic studies, randomized controlled trials, cohort studies, case-control studies, cross-sectional studies, ecological and multilevel studies, and selected topics such as meta-analysis. Second in a two course sequence. Prerequisite: either EPI 512 or PHI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (5) Hands-on experience analyzing data to answer a specific research question. Each student works in a group on a separate project. Groups use data from the Behavioral Risk Factors Surveillance System, a national, state-based survey. Students work with a faculty preceptor, as assigned by the instructors. Prerequisite: EPI 513; and either EPI 510 or a passing score on the department's EPI 514 statistical programming screening examination. Credit/no-credit only. Offered: Sp.

EPI 515 Advanced Epidemiologic Methods I (3) First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 512 and EPI 513 Offered: jointly with BIOST 519.

EPI 516 Advanced Epidemiologic Methods II (4) Second of a series of 2 courses whose objective is to deepen students' knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with BIOST 520.

EPI 517 Genetic Epidemiology (3) Research methods for evaluating genetic influences on disease and risk factors and for assessing genetic-environment interactions. Study designs and statistical methods that are covered include twin studies, family-based studies, genome-wide association studies, rare variant association studies and Mendelian randomization studies. Prerequisite: either EPI 511 or equivalent; either BIOST 511 or equivalent; and either BIOST 509, experience with R programming language, or experience with other programming software; recommended: either GENOME 371 or equivalent. Offered: jointly with PHG 511; Sp.

EPI 519 Research Methods and Current Topics in Cardiovascular Epidemiology

(3) Overview of epidemiologic research methods applied to current topics in cardiovascular and cardiometabolic health and disease in human populations. Covers pathophysiology; molecular, clinical, behavioral, and social risk factors; burden and disparities across and within populations nationally and globally; and public health interventions. Prerequisite: EPI 511 or EPI 512; BIOST 508, BIOST 511 or BIOST 517; or permission Credit/no-credit only.

EPI 520 Epidemiology of Infectious Diseases (3) Focuses on infectious diseases from a public health perspective. Uses domestic and international case studies to apply traditional and contemporary epidemiologic principles and methods to infectious disease research and public health practice. Specific topics include: surveillance, program evaluation, outbreak investigation, transmission dynamics, and mathematical modeling. Prerequisite: either EPI 511, EPI 512, or permission of instructor.

EPI 521 Epidemiology of Maternal and Child Health Problems ([3-4]-)

Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542.

EPI 522 Reproductive Epidemiology (3) Focuses on female reproductive system conditions and diseases, non-birth pregnancy outcomes, and impact of pregnancy on later health. Presentation of current epidemiologic knowledge and discussion of methodologic issues on topics including the menstrual cycle; contraception; infertility; spontaneous and induced abortion; and uterine and ovarian disease. Prerequisite: either EPI 511, both EPI 512 and EPI 513, or permission of instructor.

EPI 524 Cancer: Epidemiology and Biology (3) Explores the epidemiology of major cancers (infection-related, breast, prostate, lung, colon, melanoma), with an emphasis on milestones in cancer mechanisms (such as tumor viruses, cell cycle, DNA repair, and metastasis). Integrates knowledge from different fields of cancer research, with guest lectures from experts in epidemiology and cancer biology. Prerequisite: either EPI 511 or EPI 512; either undergraduate biology coursework or instructor permission.

EPI 527 Vaccines (3) Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature.

EPI 529 Emerging Infections of International Public Health Importance (3-)

Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536.

EPI 530 AIDS: A Multidisciplinary Approach (2) Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with G H 562/MED 530.

EPI 531 Statistical Methods for Analysis with Missing Data (3) Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with BIOST 531.

EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3) A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies.

EPI 533 Pharmacoepidemiology (3) Overview of pharmacoepidemiology

including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with HEOR 520.

EPI 535 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

EPI 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

EPI 537 Survival Data Analysis in Epidemiology (4) Univariate and multivariate analysis of right-censored survival data. Kaplan-Meier estimation of survival curves; proportional hazards regression; accelerated failure time models; parametric modeling of survival data; model diagnostics; time-varying covariates; delayed entry. Prerequisite: either BIOST 513, BIOST 515, BIOST 518, or permission of instructor. Offered: jointly with BIOST 537; W.

EPI 538 Nutritional Epidemiology (3) Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with NUTR 538.

EPI 540 Bayesian Biostatistics (3) Introduction to Bayesian methods for data analysis; Bayesian reasoning, prior elicitation, inference and decision making, and computation applied to biomedical research. Prerequisite: any course in statistics at the 400-level or higher or instructor's permission. Offered: jointly with BIOST 526/HEOR 550; Sp.

EPI 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/HSERV 529/PHARM 529.

EPI 542 Clinical Epidemiology (2) Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513.

EPI 546 Psychiatric Epidemiology (3) Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with PBSCI 546.

EPI 547 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Offered: jointly with HSERV 514.

EPI 548 Research Methods for Social and Contextual Determinants of Health (3) Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of

epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: one of the following: (1) EPI 511 or EPI 512; and BIOST 511 or BIOST 517; (2) PHI 512; (3) permission of instructor. Credit/no-credit only. Offered: jointly with HSERV 548; W.

EPI 549 HIV/STI Prevention Research Methods (3) Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interventions, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with G H 563; Sp, even years.

EPI 553 Advanced Methods for Global Health II (4) Presents applications of the cluster-randomized trial design to estimate the impact of interventions for a global health and implementation science audience. Covers trial design and implementation, reviews methods commonly used for analysis. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 528/G H 536/HMS 536; W.

EPI 554 Introduction to Epidemic Modeling for Infectious Diseases (3) Covers the basic tools for building and analyzing mathematical models of infectious disease epidemics. Model types include deterministic and stochastic models, compartmental and individual-based models. Laboratory provides hands-on model building experience in Excel, Stella, and R.

EPI 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555/G H 534.

EPI 556 Advanced Methods for Global Health III (4) Focuses on applying advanced non-randomized methods to quantitatively evaluate global health implementation science questions, including a specific focus on applying difference-in-differences, interrupted time-series, and regression discontinuity designs. Assumes prior knowledge of generalized linear models and modern methods to analyze correlated data, including generalized estimating equations (GEE) and random-effects models. Prerequisite: either BIOST 540, CS&SS 560/SOC 560/STAT 560, or permission of instructor; recommended: EPI 512 and EPI 513. Offered: jointly with BIOST 525/G H 537/HMS 537; Sp.

EPI 560 Data Management for Public Health (3) Introduces principles and practice of data management for public health. Provides hands-on experience with key skills for data management in public health research and practice, including identifying and linking data sources, using and querying relational databases, understanding ethical issues raised by modern data management, and visualizing data.

EPI 570 Environmental and Occupational Epidemiology (3) Research approaches in environmental and occupational epidemiology via didactics and discussion, lab exercises, and paper critiques. Main topics: climate change, outdoor air pollution, metals, environmental justice, built environment, energy transition, and occupational health. Emphasizes study design, confounding, selection, and information biases; exposure and risk assessment; geospatial methods; social determinants; and the exposome. Prerequisite: either EPI 511, or EPI 512 and EPI 513, or permission of instructor. Offered: jointly with ENV H 570.

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with ENV H 571.

EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Introduction to use of measurements from biological specimens in

epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with ENV H 573.

EPI 575 Anti-Racism and Equity: An Epidemiologic Approach (1) Explores the role of epidemiology in promoting and hampering anti-racism and equity across public health and beyond. Focuses on foundational knowledge and theory related to race, racism and anti-racism. Presents methodological approaches that move toward anti-racism and health equity. Credit/no-credit only. Offered: A.

EPI 579 Maternal and Child Health Seminar (1, max. 2) Provides opportunity for students to develop Maternal and Child Health (MCH) knowledge, research interests and skills, and competencies. Students receive assistance for developing a feasible and acceptable thesis proposal. Students practice research presentation skills. Credit/no-credit only.

EPI 581 Clinician Seminar in Public Health (1, max. 6) Provides a forum for clinician students enrolled in School of Public Health master's degree programs to interact and pursue topics useful in completing their research. Exposes students to topics involving general strategies for success in graduate school and operational aspects of research and research methodologies that are not covered in other courses. Credit/no-credit only.

EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (2) Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Prerequisite: EPI 512 Credit/no-credit only.

EPI 583 Epidemiology Seminar (1, max. 12) Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

EPI 584 Doctoral Dissertation Seminar (1, max. 2) Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: EPI 512 and EPI 513, admission to the PhD program, successful completion of the preliminary examination, or second-year status. Credit/no-credit only.

EPI 585 Injury and Violence: A Public Health Approach (3) Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide.

EPI 586 Responsible Conduct of Research: Global and Local (3) Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with G H 532; A.

EPI 588 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3) Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with HSERV 578.

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6) Tutorials arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult department program adviser.

EPI 591 Current Literature in Epidemiology (1, max. 15) Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read.

Prerequisite: EPI 513. Credit/no-credit only. Offered: AWSp.

EPI 592 Program Seminars (1-6, max. 16) Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor.

EPI 593 Cancer Prevention Research Laboratory (3, max. 24) Research experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no-credit only. Offered: AWSpS.

EPI 594 Field Epidemiology: Student Epidemic Action Leaders Team (1-2, max. 8) Introduces applied epidemiology in public health practice, specifically in areas of outbreak investigation, public health preparedness and response. Includes fieldwork opportunities. Offered: AWSpS.

EPI 595 Epidemiology Master's Practicum (1-6, max. 6) Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

EPI 599 Capstone Project (1-10, max. 25) Supervised capstone experience providing students with an opportunity to apply epidemiology in an applied public health setting and to produce professional-quality deliverables as well as a written summary. Prerequisite: permission of faculty capstone project supervisor. Credit/no-credit only. Offered: AWSpS.

EPI 600 Independent Study or Research (*-) Prerequisite: permission of independent study supervisor. Credit/no-credit only. Offered: AWSpS.

EPI 700 Master's Thesis (*-) Prerequisite: permission of thesis chair. Credit/no-credit only. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*-) Prerequisite: permission of dissertation chair. Credit/no-credit only. Offered: AWSpS.

HEALTH SYSTEMS AND POPULATION HEALTH

HEALTH INFORMATICS & HEALTH INFORMATION MANAGEMENT

HIHIM 400 Health Care Language for Health Informatics and Information Management (3) Students compile a working vocabulary in health care and learn to explain clinical documentation. Strengthens student competence to read, write, comprehend, and speak the language used by health providers and administrators. Employs a variety of tools (reading, writing, and listening exercises; electronic health record documents and case studies; mini-lectures on body systems). Practices written and verbal communication to achieve proficiency. Prerequisite: BIOL 118 and BIOL 119. Offered: A.

HIHIM 405 Introduction to Health Data Analytics (3) Covers the process of and tools used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with BIOST 405.

HIHIM 407 Foundations for Healthcare Vocabularies (3) Focuses on health concepts, documentation, healthcare taxonomies, and clinical vocabularies, terminologies, classifications, and nomenclatures required for health data analysis, clinical coding, and clinical systems associated with the electronic health record.

HIHIM 408 Management Concepts with HIM Applications (4) Covers management principles from a health information management perspective and core management functions of planning, organizing, staffing, delegating, leading, and controlling; theories of management, both traditional and contemporary; leadership concepts in HIM; change management; human resource management;

employment law; performance management, and HIM organizational structure.

HIHIM 409 Disease Concepts for Managers (4) Develops clinical concepts in medicine for health care personnel who interact with medical information in the workplace. Presents methods of diagnosis and treatment, including pharmacology, with an emphasis on information management and health information systems. Prerequisite: HIHIM 400.

HIHIM 410 Foundations in Health Information Management (4) Focuses on the basic of health information through study of the creation and maintenance of health records, access to and retention of health information, accreditation, licensure and professional standards in acute care hospitals and alternate care facilities.

HIHIM 411 Health Data Management (3) Addresses the governance and management of healthcare data through exploration of data assets and linking the assets to standards and quality. Prerequisite: HIHIM 410 and HIHIM 450.

HIHIM 412 Healthcare Coding (5) Covers healthcare coding principles for International Classification of Diseases (ICD) and Current Procedural Terminology (CPT) code sets used in diagnosis and procedure code assignments for research and reimbursement by healthcare providers in all settings. Prerequisite: HIHIM 409.

HIHIM 413 Revenue Cycle Management (3) Covers the revenue cycle management of health information administration. Prerequisite: HIHIM 400.

HIHIM 414 International Classification of Diseases, Clinical Documentation, and Revenue Management (4) In-depth study of International Classification of Diseases (ICD) code sets for diagnosis and procedure coding, clinical documentation to support ICD code assignment, and reimbursement methodologies which use the ICD code set to determine payment models. Prerequisite: HIHIM 400; HIHIM 410; and HIHIM 413.

HIHIM 415 CPT/HCPCS, Clinical Documentation and Revenue Management (3) In-depth study of CPT/HCPCS code sets for procedure coding, clinical documentation to support CPT/HCPCS code assignment, and reimbursement methodologies which use the CPT/HCPCS code sets to determine payment models. Prerequisite: HIHIM 414.

HIHIM 420 Healthcare Computer Systems and Electronic Health Records (5) Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410 and HIHIM 450.

HIHIM 421 Health Information Systems Analysis (5) Examines lifestyle systems development process and tools, project management and team coordination, analysis of health information systems, and user requirements. Prerequisite: HIHIM 410.

HIHIM 425 Research Design and Statistics for HIHIM (3) Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with BIOST 406/STAT 406.

HIHIM 450 Healthcare Delivery and Policy (5) Organization of healthcare services across delivery systems - both governmental (federal, state, local) and private. Financing health care services and related policy issues. Competencies and content areas related to public health profession, science, and human health. Offered: A.

HIHIM 454 Finance Concepts for Healthcare Managers (3) Covers financial concepts applied to today's healthcare environment, financial management tools, and budgeting.

HIHIM 455 Leadership and Strategic Management (4) Focuses on leadership and strategic management for enterprise-wide health information and information governance initiatives; evaluates organizational ethics and culture for situations impacting HIM and health informatics; and analyze individual interpersonal skills and professional and personal goals. Prerequisite: HIHIM 408; HIHIM 410; HIHIM

450; HIHIM 460; and HIHIM 480.

HIHIM 456 Quality Improvement in Healthcare (4) Focuses on quality improvement, risk management, and utilization management; management of quality improvement systems; use of data systems in quality assurance; health data retrieval, analysis, and presentation. Prerequisite: HIHIM 400 and HIHIM 410; recommended: descriptive statistics; probability; random sampling; simple linear regression; correlation; and tests of hypotheses (either BIOST 310, EDPSY 490, QMETH 201, STAT 220, or equivalent).

HIHIM 460 Professional Pathways (3) Explores the development of management skills and competencies, and a seminar through site experience in healthcare facilities with campus and clinical faculty. Prerequisite: HIHIM 410

HIHIM 461 Professional Development and Networking (2) Addresses the professional portfolio and mentoring, and preparation for the national credentialing examination for Registered Health Information Administrator (RHIA).

HIHIM 462 Capstone Project (5) Explores applied management using a formal capstone project in a healthcare setting. Prerequisite: HIHIM 400; HIHIM 405/BIOST 405; HIHIM 408; HIHIM 409; HIHIM 410; HIHIM 411; HIHIM 413; HIHIM 414; HIHIM 415; HIHIM 420; HIHIM 421; HIHIM 425/BIOST 406/STAT 406; HIHIM 450; HIHIM 454; HIHIM 456; HIHIM 460; HIHIM 470; and HIHIM 480.

HIHIM 470 Legal Concepts for Health Fields (3) Examines principles of law as applied to the health field, with reference to health information management.

HIHIM 480 Health Information Management Operations and Project Management (4) Provides the tools and experiences useful for health informatics and information management professionals in the daily functions and activities of a Health Information Management (HIM) department, and in controlling the activities of a health care project. Prerequisite: HIHIM 408; HIHIM 410; HIHIM 450; and HIHIM 470.

HIHIM 490 Special Topics (1-5, max. 15)

HIHIM 499 Independent Study (1-5, max. 5)

HIHIM 508 Health Information Management systems and Leadership (3) Provides a high level framework of health informatics and health information management practice. Covers practice related systems with emphasis on enterprise information governance, patient record organization, content and structure, and associated enterprise business functions and processes to provide foundation for understanding the practice. Offered: A.

HIHIM 509 Introduction to Health Informatics (3) Healthcare is one of today's most information-intensive industries. Yet healthcare delivery organizations have been slow to adopt advanced health information technology (HIT). It is imperative that future health care leaders have a deep understanding of and belief in HIT spanning the spectrum of health delivery systems.

HIHIM 510 Enterprise Systems and Electronic Health Records (3) Covers industry drivers, development, compliance framework, and certification of electronic health record systems status and operations addressed through strategic decision making and leadership: data movement among enterprise clinical, business, administrative systems to legal health record; and barrier and benefit assessment within major institutional culture and technology initiative changes. Offered: A.

HIHIM 520 Law, Policy, and Ethics in Health Information (3) Explores the laws, policies, and issues involved in oversight and management of health data and health information systems. Defines the legal health record and the requirements, role, and uses. Covers the legal and ethical framework, issues and concepts, and the role of e-discovery on the emerging health data environment. Offered: W.

HIHIM 524 Health Data Analytics (3) Healthcare organizations generate a large number of clinical performance metrics. Extracted data from different data systems is used to display relevant metrics in dashboards that are meaningful to senior leadership. Statistical tools may determine if differences in performance

are significant and what factors are associated with the differences. Predictive models may then be built and inputs varied to obtain performance improvements. Recommended: beginner Excel skills. Offered: jointly with BIOST 507; Sp.

HIHIM 525 Healthcare Databases and Applications (3) Provides an overview of data models, architecture platforms, and relational database theory and technology. Covers design and uses of databases in patient record systems, registries and indexes, and health databases, security, privacy and ethical issues, database design, data integrity, field properties, tables, reports, queries, and data retrieval. Offered: Sp.

HIHIM 530 Healthcare Privacy and Security in the e-Environment (3) Covers the laws, regulations, policies, and practice related to the confidentiality, privacy, and security of health information in an electronic environment. Federal and state laws and regulations require specific performance in the acquisition, use, storage, and maintenance of health information. Examines systems and practices. Offered: Sp.

HIHIM 535 Clinical Vocabularies and Terminologies (3) Covers clinical terminologies, classifications, and mapping, which provides information on taxonomies and metadata, information objects, and classification theory in organizing information in an electronic system. Includes current initiatives in terminologies and data mapping in electronic health record systems.

HIHIM 540 Consumer Health Informatics (3) Covers community and consumer health informatics associated with health services provides; electronic health records that address internal and external standards; accreditation and regulatory requirements needed to provide quality care; and health information exchange from policy to implementation. Offered: A.

HIHIM 550 Health Care Information Governance (3) Covers the conceptualization, design, and management of data initiatives and knowledge needed by the healthcare enterprise. Reviews data integrity principles and guidelines to determine methodology for evaluation development and management of internal and external information requirements. Offered: W.

HIHIM 552 Healthcare Business Intelligence (3) Examines business and enterprise data used to inform enterprise healthcare business intelligence and decision making to underpin and meet strategic and operational business goals and objectives. Performance metrics, business data analytics, data mining, predictive modeling, business process modeling, data visualization and other tools used to enable healthcare program and product performance assessment are featured. Offered: A.

HIHIM 555 EHR/Hi Systems Operations and Improvement (3) Addresses leadership and management of an organization's health information assets that are required as the nation transitions to interoperable health information systems. Offered: A.

HIHIM 556 Healthcare Quality and Technology (3) Explores the current healthcare environment related to healthcare safety issues. Examines an overview of major health and safety challenges and responses; focusing on the impact of the issues in improving health and safety in healthcare and information resources needed. Offered: Sp.

HIHIM 560 Special Topics in Health Informatics (3) Presents problem solving opportunities on health industry information issues, strategies and unmet challenges. Topics reflect the current state, progress, and future expectations faced by healthcare and health information managers.

HIHIM 598 Project Management (3) Focuses on applying leadership readiness at the enterprise level; informatics and information governance challenges; research and project management resources; communication management strategies; and the impact of technology from management oversight to health services delivery. Offers an opportunity to practice a key role of leadership: transforming organizational culture by effective implementation of change. Offered: W.

HIHIM 599 Capstone Project (3) Provides a practice-based problem solving experience that draws on health informatics and information management; health industry knowledge; leadership and management strategies; and applies project management skills to design, plan, and implement a management project in healthcare and healthcare related organizations. Offered: S.

HEALTH SERVICES

HSERV 100 Personal and Public Health (3) SSc Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.

HSERV 204 Communicating about Health: Current Issues and Perspectives (3) Provides an overview of health communication topics and perspectives for students who are interested in pursuing careers in the health industry and those with a research interest in health communication such as caregivers, health care administrators, marketing and public relations professionals, media planners, public health promoters, and educators, researchers and others. Offered: WSp.

HSERV 230 Sleep and Population Health (3) SSc/Nsc Examines the role of sleep in population health, including risk factors and short and long-term consequences for inadequate sleep. Expands understanding of sleep science and how sleep can function as not only an outcome, but also as a predictor, mediator, confounder, and effect modifier of health outcomes and disparities. Also explores established and emerging sleep interventions and their potential to improve population health outcomes. Offered: W.

HSERV 290 Special Topics (1-6, max. 12) SSc Explores current or evolving areas of interest in public health.

HSERV 343 Health Behavior and Health Promotion (5) Introduction to health behavior change and health promotion. The course will cover theoretical foundations of health behavior and health promotion, as well as how to apply theory and evidence in health promotion practice. It will also introduce strategies for implementing and evaluating health promotion programs. Offered: A.

HSERV 344 Public Health and Health Systems Management (5) Introduces public health and health systems management concepts. Students learn key tenets of high-performing public health and healthcare organizations, and environments in which these organizations operate. Examines a variety of health system models, including governmental public health, healthcare delivery systems, accountable communities of health and other collaborative models. Offered: W.

HSERV 345 Community Health Assessment (5) Introduces role of assessment in planning for community health improvement through health promotion activities. Considers determinants of health; methods to find, collect, and analyze quantitative and qualitative data; interpret findings to describe the health resources, risks, and outcomes; role of assessment in identifying health disparities and patterns of health inequities. Offered: Sp.

HSERV 346 Using Economics to Solve Today's Healthcare Problems (4) SSc Health economics is a growing field and an important aspect of public policy. Introduces health economics and the tools economists use to analyze current issues in health care. Furthers the understanding of economics and how it is used in current debates. Prerequisite: ECON 200. Offered: jointly with ECON 346; A.

HSERV 415 War and Health (4) SSc Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 415; Sp.

HSERV 454 Homelessness in Seattle: Destitute Poverty in a City of Affluence (1/3, max. 3) SSc, DIV Covers the landscape and types of homelessness in Seattle and beyond. Topics include: causes and health consequences of homelessness, the role of destitute poverty in the loss of housing stability, history and politics of homelessness in Seattle, the effects of COVID-19 on homeless policy, hearing the voices of the unhoused, activism, shaming and saviorism, and solutions, big and small. May only be taken for credit once.

HSERV 473 Topics in Indigenous Health (2/3) SSc, DIV Covers the fundamentals of Indigenous health, including Indigenous conceptual frameworks specific to health, wellness, and resilience. Topics include Indigenous social determinants of health, Federal Indian health policy, and American Indian and Alaska Native trends in population health outcomes within the context of the socio-ecological model.

HSERV 475 Perspectives in Medical Anthropology (5) SSc Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

HSERV 476 Introduction to Applied Qualitative Methods in Public Health (4) Covers qualitative methods in public health research and practice, including exploratory and descriptive studies, human subjects and ethics review, frameworks, theory and hypothesis generation, content and thematic analysis, sampling approaches, and interviews, focus groups, document review, observations, and photovoice. Students apply practical skills to code, analyze, interpret, and visually present qualitative data.

HSERV 479 Black Lives and Police Violence: Racism and the Public's Health (4) SSc, DIV The effects of racism on health are profound and multi-dimensional. Critically analyzes theories of human behavior in relation to epidemiological concepts of race, against the backdrop of the current Black Lives Matter movement in the United States. Offered: Sp.

HSERV 482 The Health of Populations (4) SSc, DIV Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with G H 482; W.

HSERV 488 Dark Empire: Race, Health, and British Society - Abroad (6) SSc, DIV Explores factors responsible for the well-being and health of black and other racial/ethnic minorities in Britain. Addresses: the National Health Service; ethnic diaspora, anti-immigration laws; urban riots; inequality, and the rise of Muslim fundamentalism and Islamophobia. Conducted in Britain.

HSERV 490 Advanced Topics (1-6, max. 12) SSc Explores current or evolving public health problems. Offered: W.

HSERV 493 Public Health Uganda (2) DIV Prepares students to conduct a research project in Uganda. Students refine a research question, conduct a literature review, prepare data collection instruments, and make Institutional Review Board applications. Faculty recruit and cultivate the research project topics in advance from their contacts in Uganda. Offered: jointly with G H 493; W.

HSERV 499 Independent Study in Health Services (1-12, max. 12) Individual library or field study project selected in consultation with a faculty adviser.

HSERV 504 Health Promotion and Behavior Change Communication ([1-3]-, max. 3) Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

HSERV 507 Health Communication and Marketing for Health Promotion: Theory and Practice (3) Provides an introduction to the field of health communication and social marketing. Focuses on how persuasive communication and marketing are most effectively used to improve population health and reduce inequities. Students develop and present a health communication campaign proposal.

HSERV 508 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with NURS 560.

HSERV 509 Public Health and Informatics (3) Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with BIME 533; W.

HSERV 510 Social and Behavioral Sciences in Health Program Planning and Implementation (3) Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of

individual and population health, health promotion and disease prevention, and cultural competency and community collaboration. Offered: A.

HSERV 511 Introduction to Health Services and Public Health (3-4) History, organization, and effectiveness of U.S. healthcare and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

HSERV 512 Health Systems and Policy (3) Students review and examine selected topics from literature. Includes need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students.

HSERV 513 Health Policy Research (3) Extends students' understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students.

HSERV 514 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Offered: jointly with EPI 547.

HSERV 515 War and Health (4) Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 515; Sp.

HSERV 516 Introduction to Health Services ([3-4]-) Provides overview of healthcare system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended MPH degree program.

HSERV 517 Qualitative Research Methods for Health Systems and Population Health (3) Builds on introductory training in qualitative research methods by diving deeper into different frameworks, study designs, sampling approaches, and data collections tools. Covers various data analytic approaches, as well as data visualization, interpretation, writing and presenting qualitative research findings. Students learn to apply these concepts and execute a qualitative research project from start to finish.

HSERV 518 Social and Ethical Issues (2-4, max. 4) Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

HSERV 519 Study Design and Causal Inference (1) Increases depth of knowledge about causal inference in impact evaluation. Applies the elements of causal inference to impact study design and statistical analysis, including the concept of statistical conclusion validity, internal validity, construct validity, and external validity. Credit/no-credit only. Offered: A.

HSERV 520 Applied Research Methods in Public Health (4) Skills and knowledge necessary to conduct orderly investigation of specific problems in preparation for Master of Public Health thesis or Capstone project. Includes problem identification, posing research questions, literature review, consideration of theoretical and practical context, choosing study design, methods review and selection, protection of human subjects, and recognizing potential errors. Prerequisite: registration in Online Master of Public Health degree program.

HSERV 522 Health Program Evaluation (3/4) Focuses on the use of evaluations within health programs. Discusses how program evaluations utilize research

methods to answer questions concerning efficacy, implementation, and drivers of changes in health. It also looks at the reasons for creating program evaluations -- the drivers of evaluation, how results can be transformed into action, and the role of equity in formulating and implementing evaluation results.

HSERV 523 Advanced Health Services Research Methods I: Large Public Databases; Big Data (4-5) Introduces the new big data of health services research, health claims, and survey databases. Discusses the promises and pitfalls of the data and models for analyzing the correlates of health care costs and utilization. Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

HSERV 524 Advanced Health Services Research Methods II: Hierarchical and Incomplete Data (4-5) Introduces advanced biostatistical techniques for analyzing incomplete data in population health research. Examines a wide range of topics including: missing data and potential outcome framework for causal inference, propensity score and multiple imputation, multilevel random effect linear and logistic models, and empirical Bayes prediction. Prerequisite: either HSERV 523 or permission of instructor.

HSERV 525 Advanced Health Services Research Methods III: Causal Inference Using Observational Data ([4/5]-) Focuses on reviewing statistical methods developed for "micro" (individual-level) data on behavior (choices or exposures) and outcomes in order to make causal inference about the role of a choice or an exposure on outcomes. Prerequisite: either HSERV 523, BIOST 511, BIOST 512, BIOST 513, or permission of instructor. Offered: jointly with HEOR 551.

HSERV 526 Advanced Methods for Global Health I (4) Focuses on the advanced concepts, theories, and methods of implementation science in global health, with a specific focus on fidelity, adaptation, strategy selection, de-implementation, sustainability, scale-up, advanced trials designs, qualitative methods, and mixed methods. Assumes prior knowledge of the fundamentals of implementation science. Prerequisite: G H 541 or permission of instructor. Offered: jointly with G H 535/HMS 535; A.

HSERV 527 Survey Research Methods (4) Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/G H 533.

HSERV 528 Critically Appraising and Applying Evidence in Healthcare (3) Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with BIME 540.

HSERV 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/PHARM 529.

HSERV 531 COPHP Population Health and Community Development (6) Population Health considers social and other factors that determine health. The course challenges dominate views of health. We compare health in the United States with other countries. In Community Development, we learn asset-based community engagement. Students work directly with community members, advocates, and service organizations to address health issues. Offered: A.

HSERV 533 COPHP Quantitative Methods (6) Acquaints students with methods of epidemiology and biostatistics used in conceptualizing, collecting, analyzing, and interpreting quantitative data on health outcomes and risk factors with quantitative methods for evaluating programs or treatments that address health concerns in populations. Expands skills in communicating quantitative aspects of public health, using writing, tables, and graphs. Offered: W.

HSERV 534 COPHP Health Behavior and Health Promotion and Environmental Health (6) Environmental Health reviews scientific principles utilized in environmental public health and examines the occurrence of diseases resulting from environmental and occupational exposures. Health Behavior and Promotion reviews theory and practice of planning and evaluating public health promotion problems and applying sound judgment when deciding about identification, audience segmentation, and intervention selection. Offered: Sp.

HSERV 536 Emerging Infections of International Public Health Importance (3-) Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with EPI 529.

HSERV 537 COPHP Health Policy (6) Covers concepts and analytic tools for health policy analysis, development, and advocacy, while exploring factors affecting public health policy, including science and community values. Student write a policy statement for an advocacy organization, teach a lay audience about an issue, and arrive at policy conclusions based on quantitative data.

HSERV 538 Participatory Evaluation and Community Engagement (6) Covers concepts and approaches for program evaluation in public health. Uses one case, including a final assignment requiring students to work as a team to design an evaluation. Synthesizes accumulated skills and knowledge a public health professional uses to work with communities to advance public health. Integrates a broad array of skills to consolidate perspectives of the many players that interact in dynamic community settings. Offered: W.

HSERV 540 COPHP Management and Leadership (6) Explores the principles of leadership and management within the context of public health organizations. Explores the distinction between management and leadership and examines the management functions of planning, organizing, directing, and controlling the use of human and financial resources to accomplish the goals of the organization.

HSERV 541 Topics in Maternal and Child Health I (3-) Provides an overview of the historical and legislative basis for the major MCH health and social service policies and programs. Uses the life-course perspective to examine the social determinants of health and development of women, children, and adolescents. Pays special attention to racial inequities on the health of families.

HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-) Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with EPI 521.

HSERV 544 Maternal and Child Health in Low and Middle Income Countries (3) Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with G H 544; W.

HSERV 548 Research Methods for Social and Contextual Determinants of Health (3) Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: one of the following: (1) EPI 511 or EPI 512; and BIOST 511 or BIOST 517; (2) PHI 512; (3) permission of instructor. Credit/no-credit only. Offered: jointly with EPI 548; W.

HSERV 551 Public Health Law (2-4, max. 4) Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with LAW H 512; A.

HSERV 552 Health Policy Development (3-) Uses primarily case- and problem-based learning and small-group projects to focus on factors that influence public policy development concerning health services in the U.S., with some global health content. Examines the roles of science and stakeholder interests in the structure of and changes to a nation's health system. Offered: A.

HSERV 553 Health Policy Development and Advocacy in the United States (4) Practice-oriented course designed to enhance knowledge and cultivate skills for U.S. health policy development. Students learn effective policy analysis, research, and communications skills.

HSERV 554 Homelessness in Seattle: Destitute Poverty in a City of Affluence (1/3, max. 3) Covers the landscape and types of homelessness in Seattle and beyond. Topics include: causes and health consequences of homelessness, the role of destitute poverty in the loss of housing stability, history and politics of homelessness in Seattle, the effects of COVID-19 on homeless policy, hearing the voices of the unhoused, activism, shaming and saviorism, and solutions, big and small. May only be taken for credit once.

HSERV 555 Health Disparities (2) Focuses on health disparities and health inequity in the United States. Course will cover both theoretical and empirical approaches to understanding patterns of health across social groups, with a focus on designing research and public health programs to addressing health disparities. Offered: W.

HSERV 556 Tobacco-Related Health Disparities (1/2) Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics.

HSERV 558 Tobacco and Public Health: Prevention, Treatment, Policy, and Social Change (1-3, max. 3) Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilizes readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use.

HSERV 559 Health Policy and the Public's Health (4) Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through public health examples. Examines how science and community values intertwine in policy development, and how context influences the structure of and changes to a nation's health system.

HSERV 560 Adult Learning: Theory and Practice (3) Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

HSERV 561 Introduction to Health Promotion Planning and Evaluation ([0-3]-, max. 3) Links practice to theory between the planning, implementation, and evaluation of health promotion intervention and behavior change theory. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

HSERV 566 Public Health Leadership I: Organizational and Financial Management (5) Covers the organizational and financial management of public health organizations. Organizational management topics include decision making, managing employees, diversity, leadership, and strategic planning. Financial management topics include financial reports, determining program costs, budgeting, and financial program evaluation. Students work on case studies and a final project that integrate the two disciplines.

HSERV 567 Public Health Leadership II: Systems Thinking for Public Health Leaders (4) Explores leadership and systems thinking to address complex public health issues. Prepares students to partner with a variety of stakeholders and participate in community-based coalitions. Students create problem statements and systems maps, apply an equity lens to solving public health issues, set programmatic goals, develop strategies to improve health, and discuss financing strategies for sustainable change and resource management.

HSERV 568 Health Economics (3) Applies microeconomics principles and models to understand the nature of health care markets and systems. Includes a wide range of health sector activities and policy issues by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

HSERV 571 Cultural Competency for Public Health Practice ([1-4]-, max. 4) Application of cultural competency to clinical practice, healthcare management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology.

HSERV 572 Planning, Advocacy and Leadership Skills (4) An opportunity to master basic concepts, analytic tools, and skills for health program and policy planning, advocacy, evaluation and leadership skills under close mentorship of faculty and teaching staff in an interdisciplinary and applied setting. Engages MPH and other graduate students with real-world public health problems, partners with local community health organizations, builds skills and competencies in a number of topics and processes. Offered: Sp.

HSERV 573 Topics in Indigenous Health (2/3) Covers the fundamentals of Indigenous health, including Indigenous conceptual frameworks specific to health, wellness, and resilience. Topics include Indigenous social determinants of health, Federal Indian health policy, and American Indian and Alaska Native trends in population health outcomes within the context of the socio-ecological model.

HSERV 575 Cancer Prevention and Control (3) Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

HSERV 576 Health, Culture, and Community (3) A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with NURS 557; W.

HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4) Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of healthcare services; and clinic and community based applications.

HSERV 578 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3) Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with EPI 588.

HSERV 579 Structural Racism and Public Health (1) Introduces the concept of institutional racism and ways structural racism undermines public health. Discusses history of racism and intersections between structural racism and other systems of oppression. Explores relationship to racism and ways internalized racism acts as a barrier to health equity. Considers public health practitioners' role in addressing racism. Credit/no-credit only. Offered: AWSp.

HSERV 580 Foundations of Health Behavior and Social Determinants of Health (2) Provides an overview of core areas of health behavior and social determinates of health, including: social determinants of health; population health and health disparities; community engagement; and working effectively in diverse communities. Offered: A.

HSERV 581 Strategies of Health Promotion (4) Assessment of health promotion planning, implementation, and evaluation strategies for their strengths,

weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities.

HSERV 584 Assessing Outcomes in Health and Medicine (3) Seminar course covering concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: HEOR 530; either BOST 511; BOST 512; and BOST 513 (which may be taken concurrently), or BOST 517 and BOST 518; EPI 512 and EPI 513 (or equivalent); and permission of instructor. Offered: jointly with HEOR 534; Sp.

HSERV 585 Seminar in Medical Geography (5, max. 10) Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.

HSERV 586 Medical Geography (3) Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with GEOG 580.

HSERV 587 Health Policy Economics (3) Applies economic theory to selected topics in healthcare, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications. Offered: jointly with ECON 547.

HSERV 589 Community Based Participatory Research and Health (3) Begins with a research topic of importance to the community with the aim of combining knowledge and action for social change. Provides an understanding of principles and strategies, and appreciate of its advantages and limitations, and skills for participating effectively.

HSERV 590 Selected Topics in Health Services (*-, max. 30) Explores current or evolving public health problems. Prerequisite: permission of instructor.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42) Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

HSERV 592 Program Seminars (1-6, max. 20) Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 593 Public Health Uganda (2) Prepares students to conduct a research project in Uganda. Students refine a research question, conduct a literature review, prepare data collection instruments, and make Institutional Review Board applications. Faculty recruit and cultivate the research project topics in advance from their contacts in Uganda. Offered: jointly with G H 583; W.

HSERV 595 Practicum/Field Work in Community Medicine ([1-12]-, max. 12) Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.

HSERV 598 Public Health Integrative Learning Experience (4) Students create a culminating project for the Online Master of Public Health program, demonstrating extensive knowledge about a specific public health topic, synthesizing theory and knowledge acquired in prior coursework, the practicum, and other learning experiences. Students complete a project from start to finish and prepare a final report and an oral presentation. Prerequisite: enrollment in the Online Master of

Public Health program.

HSERV 599 Capstone Project (*-) Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

HSERV 600 Independent Study or Research (*-) Prerequisite: permission of instructor.

HSERV 700 Master's Thesis (*-) Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*-)

HEALTH SERVICES MANAGEMENT

HSMGMT 500 Risk and Insurance Seminar (3) Presents the principles and practices of health insurance and risk. Emphasizes healthcare financing arrangements in the United States, including both private and government-sponsored (public) programs. Discusses comparisons with other developed countries.

HSMGMT 501 Epidemiology/Critical Evidence Appraisal (2-4, max. 4) Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.

HSMGMT 503 Population Health Management (2/3) Provides health administration students with an introduction to managing the health of defined populations. Examples include: the population within the catchment area of a hospital, the members of a health maintenance organization, the persons served by an accountable care organization, and the population employed in a workplace. Offered: A.

HSMGMT 505 Managing Healthcare Organizations (2-4) Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.

HSMGMT 506 Introduction to Clinical Care (2) Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to healthcare administration.

HSMGMT 507 Group Dynamics and Team Leadership ([1-4]-, max. 4) Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no-credit only.

HSMGMT 510 Organizational Behavior (3-4) Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead healthcare organizations. Focuses on "best practices" for managing individuals, teams, and organizations.

HSMGMT 513 Seminar in Healthcare Finance (3-4) Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles.

HSMGMT 514 Health Economics (3/4) Uses economic concepts and tools to examine range of issues pertaining to healthcare, delivery of healthcare services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.

HSMGMT 515 Advanced Economics - Decision Analysis ([1-3]-, max. 3) Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.

HSMGMT 518 Ethical Issues in Health Services (2-3) Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.

HSMGMT 523 Informatics in Healthcare Management (3) Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its healthcare applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.

HSMGMT 531 Systems Modeling Frameworks for Healthcare (3) Focuses on methodologies to support strategic decision making in a systems context, considering the material, patients, providers, information, and resource dependencies of most healthcare organizations. Includes optimization models and basic alternative evaluation methods for the applications of capacity planning, policy investigation, and design and planning decisions. Offered: W.

HSMGMT 532 Quantitative Methods for Health Systems Design and Analysis (3) Focuses on the method and application of operations research in health systems design and analysis. Covers a variety of topics in healthcare management and decision making. Healthcare decision making touches areas in resource allocation, scheduling, staffing, capacity planning, cost-effectiveness analysis, and assessment of medical technologies. Offered: W.

HSMGMT 545 Capstone Integrative Seminar ([1-4]-, max. 4) Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies, team building exercises, and field projects. Prerequisite: second-year MHA students.

HSMGMT 550 Medical Practice Quality Measurement and Management (3) Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement, and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines, and pathway; and the evidence-based medicine movement interconnect. Utilizes examples of cutting edge programs to apply and promote improvement.

HSMGMT 552 Health Administration and Business Law (4) Studies numerous interrelated legal topics pertinent to healthcare organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemption, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.

HSMGMT 553 Healthcare Marketing Strategy (2) Provides an understanding of wholesale and retail markets in the healthcare sector. Examines market research and the application of marketing strategies and tactics to support an organization's core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.

HSMGMT 554 Entrepreneurship (2) Focuses on developing students' resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing, and growth strategies; and corporate venturing.

HSMGMT 562 Strategic Management of Healthcare Organizations (3-5) Management of goals, strategy, and structure in healthcare organizations. Design of external relationships and internal structures., strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

HSMGMT 563 Personnel Management for Health Professionals ([1-3]-, max. 3)

Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems-selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH degree program or permission of instructor; non-business majors.

HSMGMT 566 Decision Support Models for Health Services (3) Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program; non-business majors.

HSMGMT 567 Clinical Systems Management (3) Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance, and clinical leadership development of physician-administrator partnerships in complex medical care settings.

HSMGMT 568 Quality Process Management (3-4) Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to healthcare organizations.

HSMGMT 570 Quantitative Methods (3-4) Concentrates on fundamental concepts of statistics and their application to healthcare management. Approaches statistics from two different perspectives that benefit leaders in healthcare: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.

HSMGMT 571 Healthcare Financial Management (3) Focuses on the tools and analytic frameworks that healthcare managers use to make prospective forward-looking decisions. Problems worked in-class and assigned as homework to ensure that participants develop competencies and confidence in applying the analytic tools and frameworks. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor. Offered: W.

HSMGMT 574 Financial Management I (3-4) Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of healthcare organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.

HSMGMT 576 Capital Planning (2) Emphasizes preparing clinical executives for managerial and leadership in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.

HSMGMT 577 Environment of Care (2) Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.

HSMGMT 578 Project Management (2/3) Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects. Offered: W.

HSMGMT 579 Accounting for Health Service Managers (3) Emphasis on preparing graduate students for management and leadership roles in their healthcare organizations. Covers financial accounting including the accounting equation, journal entries, and processes of accounting.

HSMGMT 590 Select Topics (1-6, max. 12) By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. Topic chosen is within the special competence of the participating faculty member, in the area of health services management.

HSMGMT 592 Health Management Program Seminar (1-6, max. 6)

PATHOBIOLOGY

PABIO 498 Undergraduate Thesis (*)

PABIO 499 Undergraduate Research (*, max. 12)

PABIO 500 Introduction to Pathobiology Research (3-9, max. 15) Rotation through research laboratory. Credit/no-credit only. Offered: AWSpS.

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PHG 536; Sp.

PABIO 548 Molecular and Cellular Parasitology (3) Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor.

PABIO 550 Diseases and Issues in Global Health (2) Provides a broad perspective on global health issues; the biology and strategies for control of diseases of global importance; the global health landscape; and factors that influence global health. Recommended: Background in cellular and molecular biology, and microbiology recommended. This course is intended for students pursuing laboratory-based research in pathogen biology. Offered: jointly with G H 565; A.

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4) Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Offered: jointly with G H 566; A.

PABIO 552 Cell Biology of Human Pathogens and Disease (4) Cell biology and immunology explored through diseases of public health importance. Examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W.

PABIO 553 Survival Skills for Scientific Research (2) Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: W.

PABIO 580 Pathobiology Seminar (1, max. 21) Research from students, faculty members, and invited speakers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W.

PABIO 581 Current Literature in Pathobiology (1, max. 15) Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5, max. 12) Analysis of issues, hypothesis and experimental design and testing. Prerequisite: graduate standing in pathobiology. Credit/no-credit only. Offered: Sp.

PABIO 590 Selected Topics (1-20, max. 20) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Prerequisite: permission of instructor.

PABIO 591 Rotating Pathobiology Minicourses (1) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format with discussion. Offered: Sp.

PABIO 598 Didactic Pathobiology (*, max. 12) Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor.

PABIO 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 700 Master's Thesis (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 800 Doctoral Dissertation (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PUBLIC HEALTH GENETICS

PHG 200 Implications of Public Health Genomics for the Modern World (3) NSc/SSc Introduces the field of public health genomics through examples of genetic, ethical, political, and social issues emerging in the wake of the Human Genome Project. Students develop the skills to analyze and critique public health, clinical, personal, and social implications resulting from emerging genomic technologies. Offered: A.

PHG 301 Introduction to Genetic Epidemiology (5) NSc/SSc Explores basic approaches that are used to identify genetic and environmental factors in health and disease, and how application of this information can be used to improve population health. Discusses the relevant ethical, legal, and social implications that occur in research and translation to practice. Offered: Sp.

PHG 302 Forensic Genetics (3) NSc/SSc, RSN Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to understand calculations relevant for parentage determination; the identification of remains; the use of genetic genealogy, and to consider the implications of familial searching of DNA databases. Recommended: GENOME 371 or equivalent. Offered: jointly with BIOST 302; Sp.

PHG 303 Direct-to-Consumer Genetic Testing: Uses and Issues (5-) SSc/NSc Surveys current genetic tests offered directly to customers (including all types of genomic data generated, and interpretations in health and ancestry). Investigates current use of personal genomics in forensic and political realms, as well as marketing and regulation of these tests. Ethical, legal, and social implications covered in lectures, debates, and case studies. Recommended: prior exposure to basic genetics (at any level). Offered: Sp.

PHG 401 Computational and Applied Genetic Epidemiology (5) RSN Advanced topics in genetic epidemiology for undergraduate students, focusing on hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students will investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: PHG 301 or prior background in basic genetics and statistics. Offered: jointly with BIOST 401/EPI 410; Sp.

PHG 501 Computational and Applied Genetic Epidemiology (5) Topics in genetic epidemiology and its application in public health practice. Provides hands-on introduction to computational analysis of population genetics and individual health data using R programs. Students investigate how genes and environment interact to cause disease and health-states and to inform public health interventions. Recommended: prior background in basic genetics and statistics. Offered: jointly with EPI 508; Sp.

PHG 511 Genetic Epidemiology (3) Research methods for evaluating genetic influences on disease and risk factors and for assessing genetic-environment interactions. Study designs and statistical methods that are covered include twin studies, family-based studies, genome-wide association studies, rare variant association studies and Mendelian randomization studies. Prerequisite: either EPI 511 or equivalent; either BIOST 511 or equivalent; and either BIOST 509, experience with R programming language, or experience with other programming software; recommended: either GENOME 371 or equivalent. Offered: jointly with EPI 517; Sp.

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/GCNSL 512/LAW H 504; A.

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PCEUT 513; W.

PHG 519 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/EPI 535.

PHG 521 Culture, Society, and Genomics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/NURS 582; Sp.

PHG 523 Genetics and the Law (3) Explores legal issues arising from genetic and genomic research, practice and policy. Analyzes implications of constitutional, contract, tort, criminal, employment, insurance, intellectual property, and family law using multiple sources of law, including statutes, regulations, and cases. Offered: jointly with LAW H 520; W.

PHG 527 Social Science Research Methods (3) Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with B H 527; Sp.

PHG 536 Bioinformatics and Gene Sequence Analysis (3) Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; Sp.

PHG 544 Ethical Implications of Emerging Biotechnology (3) Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: jointly with B H 544; W.

PHG 545 Biostatistical Methods for Big Omics Data (3) This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BIOST 512, 514, or 517. Offered: jointly with BIOST 545/GENOME 545.

PHG 580 Interactive Seminar (1, max. 30) Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with LAW H 579; AWSp.

PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6) Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

PHG 595 Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: practicum agreement.

PHG 600 Independent Study or Research (*-) Credit/no-credit only.

PHG 700 Master's Thesis (*-) Credit/no-credit only.

PHG 800 Doctoral Dissertation (*-) Credit/no-credit only.

SCHOOL OF PUBLIC HEALTH

PUBLIC HEALTH INTERDISCIPLINARY

PHI 500 Public Health Practice, Science and Knowledge (1) Introduces the 12 foundational competency areas of public health endorsed by the Council on Education for Public Health (CEPH). Prepares School of Public Health students for further study and work in public health. Emphasis on science and practice of public health and factors related to public health, including environmental, biological, behavioral, psychological, social, political, economic, and more. Credit/no-credit only. Offered: AWSpS.

PHI 511 Foundations of Public Health (3) Examines public health and healthcare - U.S. and globally. Covers foundational elements of public health, including history and impact, importance of health equity and human rights, and how racism manifests and is perpetuated within public health/healthcare systems. Builds community and provides a foundation for students to work effectively as public health professionals on inter-professional teams.

PHI 512 Analytic Skills for Public Health I (7) Focuses on principles and methods of epidemiology and biostatistics, including: descriptive epidemiology, data summaries and presentation, study design, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, confounding, confidence intervals, hypothesis testing, p-values, sample size calculation, and linear regression analysis. Includes hands-on data analysis.

PHI 513 Analytic Skills for Public Health II (3) Introduces qualitative and mixed methods and relevance to rigorous public health research and practice. Places a strong emphasis on qualitative data analysis as an integral dimension of the mixed-methods approach. Focuses on contexts for and types of qualitative research questions, integration with quantitative measures of magnitude and frequency, and assessment of strength of evidence in the context of implementation science. Prerequisite: PHI 511 and PHI 512.

PHI 514 Determinants of Health (3) Describes and applies frameworks for understanding determinants of health at multiple levels and within different systems. Emphasizes individual- and family-level determinants, physical and social environments, population-level determinants, and systems dynamics. Students learn how to apply theory and to interpret and weigh evidence to identify and prioritize health determinants for public health research, practice, and policy. Prerequisite: PHI 511 and PHI 512. Offered: W.

PHI 515 Implementing Public Health Interventions (4) Students learn about the role of theory, evidence, community engagement, and ethics in health promotion intervention design, implementation, and evaluation. Focuses on identifying population needs, assets and capacities to inform intervention design; implementation of interventions and intervention strategies across the socio-ecological framework; and monitoring intervention implementation and evaluating intervention outcomes. Prerequisite: PHI 511; PHI 512; PHI 513; and PHI 514.

PHI 516 Public Health Practice (3) Students integrate and apply knowledge of health determinants and public health systems, analytic skills, and evidence-based approaches to real world public health problem solving. Helps develop system thinking skills and an understanding of the interrelationships between public health infrastructure, generation and evaluation of public health evidence, public health policy, leadership, management, communication and community engagement. Prerequisite: PHI 511; PHI 512; PHI 513; and PHI 514.

PHI 590 Public Health Interdisciplinary Selected Topics (1-10, max. 20) Topics vary.

PHI 700 Master's Thesis (3) Teaches introductory skills and content helpful to any Master in Public Health student at an early stage of working on their thesis.

Students identify thesis topic and primary faculty advisors prior to registering for thesis credits in their home department. Provides group mentoring and support. Students share work in-progress and receive feedback from other students. Recommended: PHI 511; PHI 512; PHI 513; PHI 514; PHI 515; and PHI 516. Credit/no-credit only. Offered: A.

PHI 701 Master's Capstone (3) Teaches introductory skills and content helpful to any Master in Public Health student at an early stage of working on their capstone. Students identify capstone topic and primary faculty advisors prior to registering for capstone credits in their home department. Provides group mentoring and support. Students share work in-progress and receive feedback from other students. Recommended: PHI 511; PHI 512; PHI 513; PHI 514; PHI 515; and PHI 516. Credit/no-credit only. Offered: A.

SCHOOL OF PUBLIC HEALTH

SPH 380 History and Practice of Public Health (5) Provides a historical overview of public health as a framework to understand organization of contemporary public health and key issues faced today. Offered: AWSp.

SPH 381 Science and Public Health (5) Provide an overview and introduction to the ways different scientific disciplines are used to address public health goals. Prerequisite: minimum grade of 1.7 in SPH 380; either BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or both MICROM 301 and MICROM 302. Offered: AWSp.

SPH 389 Race, Racism, and Public Health (5) DIV Introduction to race, racism, and structural oppression, and their impact on the health and wellness of populations. Offered: AWSp.

SPH 391 Public Health Service Learning I (3-) Service-learning experience where students work with community-facing organizations addressing health needs for a wide range of populations. Prerequisite: SPH 380. Offered: AW.

SPH 392 Public Health Service Learning II (-3) Service-learning experience where students work with community-facing organizations addressing health needs for a wide range of populations. Prerequisite: SPH 391. Offered: WSp.

SPH 396 Intensive Public Health Service Learning (6) Accelerated service-learning experience where students work with community-facing organizations addressing health needs for a wide range of populations. Prerequisite: SPH 380. Offered: AWSp.

SPH 480 Research Methods in Public Health (5) Applies concepts and research methods to real public health problems. Prerequisite: EPI 320; a minimum grade of 1.7 in SPH 381; and a minimum grade of 1.7 in SPH 389. Offered: AWSp.

SPH 481 Ethics, Social Justice, and Policy in Public Health (5) Integration of prior learning and consideration of public health decision from an ethics and justice perspective. Prerequisite: minimum grade of 1.7 in SPH 480. Offered: AWSp.

SPH 489 Structural Racism and Public Health (1) DIV Introduction to and exploration of institutional and structural racism in a public health context. Credit/no-credit only. Offered: AWSp.

SPH 490 Selected Topics in Public Health (1-5, max. 15) In depth study of current public health topics. Offered: AWSpS.

SPH 491 Public Health Capstone I (2-) Part one of integrative experience bringing together students' knowledge and skills acquired in the public health major. Prerequisite: SPH 380; SPH 381; and SPH 480, which may be taken concurrently. Offered: AWS.

SPH 492 Public Health Capstone II (-3) Part two of integrative experience bringing together students' knowledge and skills acquired in the public health major. Prerequisite: SPH 491. Offered: WSpS.

SPH 493 Public Health Portfolio (3) Culminating experience documenting student progress through the Public Health-Global Health Major. Prerequisite: either SPH 392 or SPH 396; and SPH 481, which may be taken concurrently. Offered: AWSp.

SPH 494 Honors Seminar in Public Health (2, max. 5) Skill-building, discussion-

based seminar designed to challenge ability to analyze issues in public health using topics raised in current media. Credit/no-credit only. Offered: AWSp.

SPH 495 Public Health Internship (1-5, max. 15) Internship in public health related area. Credit/no-credit only. Offered: AWSpS.

SPH 496 Public Health Capstone (5) An integrative experience bringing together students' knowledge and skills acquired in the Public Health-Global Health Major. Prerequisite: SPH 380; SPH 381; SPH 480; and SPH 481, which may be taken concurrently. Offered: AWSpS.

SPH 497 Public Health Special Electives (1-5, max. 15) Independent study of a current public health topic. Offered: AWSpS.

SPH 499 Undergraduate Research (1-5, max. 15) Individual research on a specific topic in public health. Offered: AWSpS.

SPH 589 Undoing Racism in Public Health (1) Introduction to and exploration of institutional and structural racism in a public health context. Credit/no-credit only. Offered: AWSp.

SPH 590 Selected Topics in Public Health (1-5, max. 15) In depth study of current public health topics.

RESERVE OFFICER TRAINING CORPS

AEROSPACE STUDIES

A S 101 Foundations of the United States Air Force I (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 102 Foundations in the United States Air Force II (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Foundations in the United States Air Force III (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

A S 211 The Evolution of Air and Space Power I (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: A.

A S 212 The Evolution of Air and Space Power II (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: W.

A S 213 The Evolution of Air and Space Power III (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution

of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: Sp.

A S 250 Aerospace Studies Leadership Laboratory (0-1, max. 10) Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Corequisite: any A S course. Credit/no-credit only. Offered: AWSp.

A S 331 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: A.

A S 332 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: W.

A S 333 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: Sp.

A S 431 Aerospace Studies 400 (3) SSc Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: A.

A S 432 Aerospace Studies 400 (3) SSc Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: W.

A S 433 Aerospace Studies 400 (3) SSc Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: Sp.

MILITARY SCIENCE

M SCI 101 Military Science and Leadership Development (3) Introduction to challenges and competences critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.

M SCI 102 Military Science and Introduction to Tactical Leadership (3) Overviews leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

M SCI 103 Military Science and Introduction to Applied Basic Leadership (3)

Final introductory series on leadership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously, considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

M SCI 110 Military Science Leadership Laboratory (0.5, max. 3) Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credits do not count toward graduation. Credit/no-credit only. Offered: AWSp.

M SCI 201 Military Science and Innovative Team Leadership (3) Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

M SCI 202 Military Science and Foundations of Tactical Leadership (3) Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders, and cultural awareness. Lessons include fundamentals of leadership, personal development, and tactics and techniques. Offered: W.

M SCI 203 Military Science and Transformational Leadership (3) Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

M SCI 301 Military Science and Tactical Leadership (3) Studies, practices, and evaluates adaptive leadership skills. Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: A.

M SCI 302 Military Science and Applied Leadership (3) Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 303 Military Science and Advanced Tactical Leadership (3) Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments. Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: AWSp.

M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3) Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher.

M SCI 310 Military Science Advanced Leadership Laboratory (1, max. 6)

Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios

related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Prerequisite: M SCI 110. Offered: AWSp.

M SCI 401 Military Science and Developmental Leadership (3) SSc Develops proficiency in planning, executing, and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing on advanced leadership development. Prerequisite: M SCI 301; M SCI 302. Offered: A.

M SCI 402 Military Science IV: Advanced (3) SSc Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 403 Military Science and Advanced Leadership (3) SSc Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: Sp.

NAVAL SCIENCE

N SCI 101 The Naval Service (3) General introduction to the U.S. Navy and Marine Corps, with emphasis on organization, missions, roles, tasks, assets, and operations. Offered: A.

N SCI 102 History of U.S. Sea Power I (3) SSc A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from the American Revolution to the outbreak of World War II. Prerequisite: N SCI 101. Offered: W.

N SCI 103 History of U.S. Sea Power II (3) SSc A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from World War II to the present day. Prerequisite: N SCI 102. Offered: Sp.

N SCI 110 Naval Science Laboratory (*, max. 12) Evaluates the challenges of leading teams in complex contemporary environments. Topics vary. Required each quarter for NROTC students. Credit/no-credit only. Offered: AWSp.

N SCI 115 Fundamentals of Marine Corps Organization, Training and Equipment (1, max. 12) SSc Provides hands-on instruction in the fundamentals of the United States Marine Corps organization, culture, training requirements, and common equipment operation. Offered: AWSp.

N SCI 201 Naval Leadership and Management (3) SSc Introduction of the theory and techniques of naval leadership based on principles of behavioral science pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Prerequisite: minimum 2.0 grade in N SCI 101. Offered: A.

N SCI 202 Navigation I (3) NSc The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Prerequisite: N SCI 101. Offered: W.

N SCI 203 Navigation II (3) NSc Basic theory and practice of celestial and electronic navigation. Relative motion theory and contact coordination practice in a multiple ship environment. Prerequisite: N SCI 202. Offered: Sp.

N SCI 301 Naval Ship Systems I (3) Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.

N SCI 302 Naval Ship Systems II (3) Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Prerequisite: N SCI 301. Offered: W.

N SCI 303 Naval Weapon Systems (3) Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Prerequisite: N SCI 302. Offered: Sp.

N SCI 321 Evolution of Warfare (3) SSc Focuses on how and why warfare has changed. Explores how warfare technology has evolved over time. Topics include military theory, fourth generation warfare, and Marine Corps doctrine. Designed for future Marine Corps Officers, but open to all students. Offered: A.

N SCI 325 Fundamentals of Maneuver Warfare (3) Introduces the foundational concepts and history of a Maneuver Warfighting Organization. Uses both historical examples from previous military operations as well as current doctrine to develop an individual who is a critical thinker and scholar in the profession of arms. Consists of three phases: warfighting concepts and themes; introduction to operations in the joint environment; and preparing future leaders. Prerequisite: N SCI 110 and N SCI 421. Offered: Sp.

N SCI 401 Naval Operations (3) Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Prerequisite: N SCI 101. Offered: A.

N SCI 402 Naval Leadership and Ethics (3) SSc Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Offered: W.

N SCI 403 Naval Organization and Management (3) Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis on the leadership and management role of the junior officer in the fleet. Prerequisite: minimum 2.0 grade in N SCI 402. Offered: Sp.

N SCI 421 Amphibious Warfare (3) SSc Provides basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic, operational, and tactical considerations in planning specific operations and amphibious landings. Prerequisite: either N SCI 321 or minimum two POL S or JSIS courses. Offered: A, even years.

SCHOOL OF SOCIAL WORK

SOCIAL WELFARE (BASW)

SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) SSc Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

SOC WF 120 International Responses to Human Needs: Social Welfare Policies and Services (5) Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.

SOC WF 200 Introduction to Social Welfare Practice (5) SSc Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises,

films, guest lectures, and class discussions. Offered: A.

SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5) SSc Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, includes dialogue about ways to enhance the exchange of ideas between research and practice communities, and explores implications for social policy.

SOC WF 215 Intergroup Dialogues (3) DIV Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.

SOC WF 250 Writing for Social Welfare (1-2, max. 2) Offers an engaging space for social welfare students to develop, practice, and strengthen college-level writing using exercises, discussion, and lecture. Covers summarizing and responding, critical thinking and argument, APA style and academic honesty, as well as language and the writing process. Review of punctuation and mechanics, grammar, and sentence style. Credit/no-credit only.

SOC WF 297 Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 310 Social Welfare Practice I (5) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

SOC WF 311 Social Welfare Practice II (5) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

SOC WF 312 Social Welfare Practice III (5) Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

SOC WF 315 Community Service Learning (1-5, max. 6) Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-based experience through the completion of community-based projects in social work-type agencies. Majors only. Offered: WSp.

SOC WF 320 Social Welfare Policy (5) SSc Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: Sp.

SOC WF 390 Introduction to Social Welfare Research (5) Introduction to logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either EDPSY 490, QMETH 201, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 290, STAT 390, or STAT 311. Offered: A.

SOC WF 402 Human Behavior and Social Environment I (5) SSc Focuses on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores the relationship between the person and the environment including families, groups, organizations, communities, and institutions.

SOC WF 404 Cultural Diversity and Justice (5) SSc, DIV History and culture of disadvantaged and oppressed groups served by social welfare generalist practitioners. Offered: W.

SOC WF 405 Fieldwork Seminar (3) Integrates social work practicum experiences

with prior and concurrent coursework in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: A.

SOC WF 410 Evidence-Based Practices in Social Welfare (3) Focuses on interface between social work research and practice, with attention to origins and defining features of evidence-based practice (EBP) and approaches to intervention consistent with EBP framework. Integrates content on research and practice priorities, and provides students with knowledge and skills to promote use of theory-driven, empirically-supported interventions.

SOC WF 415 Beginning Field Instruction (1-12, max. 12) Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no-credit only. Offered: AWSp.

SOC WF 435 Skills for Social Welfare Practice (1) Builds on first-year generalist practice content. Provides skill building in one or two areas of social work practice relevant to many practice settings. Topic chosen by students and faculty. Credit/no-credit only. Offered: W.

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5) A&H/SSc, DIV Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators.

SOC WF 443 Facilitating Intergroup Dialogue (5) A&H/SSc, DIV Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in SOC WF 442.

SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6) Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

SOC WF 450 Integrative Seminar: Poverty Analysis (5) Critical analysis of poverty both in the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.

SOC WF 460 Chemical Dependency: Assessment and Treatment (3) Provides students the knowledge and basic skills needed to recognize and understand the dynamics of chemical dependency in the lives of individuals. Students learn how to assess the presence of this disorder and what the issues are in referring individuals to treatment. Offered: Sp.

SOC WF 465 Social Welfare Capstone Seminar (1) Students demonstrate and reflect on mastery of core competencies and respective practice behaviors foundational to generalist practice. Studies analyze and synthesize data from their experiences in the BASW program and integrate this understanding with their new identity as a professional social worker. Credit/no-credit only. Offered: Sp.

SOC WF 490 Independent Research in Social Welfare (1-15, max. 15) Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no-credit only.

SOC WF 491 Honors Seminar (1, max. 3) Three quarter seminar for students admitted into the BASW Honors Program. Guides students through stages of

research conceptualization and proposal writing, literature review, IRB application, data collection and analysis, and dissemination. Includes feedback and discussion with instructor and peers. Offered: AWSp.

SOC WF 492 Honors Thesis I (3-) Part one of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data collection, management, and preliminary analysis.

SOC WF 493 Honors Thesis II (-3) Part two of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data analysis, research writing, and presentation of results.

SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers. Offered: AWSp.

SOC WF 497 Advanced Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 499 Independent Study in Social Welfare (1-15, max. 15) Independent reading or independent study. Includes written paper. Not open to graduate or non-matriculated students.

SOCIAL WELFARE

SOC WL 515 Community Service Practicum (3, max. 6) Development of skills on working in partnership with community institutions in the role of researcher or scholarly collaborator, through ongoing reflection and consultation with a faculty member. Uses a learning contract to focus specific activities. Credit/no-credit only. Offered: AWSpS.

SOC WL 552 Seminar in Contemporary Social Welfare Policy (3) Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to SOC WL 553.

SOC WL 553 Policy Implementation and Organizations (3) Examines diverse organization theories relevance to policy implementation, translational research, and practice interventions within health and human service settings. Emphasizes multilevel models and integrative frameworks that take into account individual, group, and organizational factors, recognizing outcomes as embedded phenomenon nested within organization, community, and societal contexts. Offered: Sp.

SOC WL 554 Analytical Perspectives on Social Welfare Policy (3) Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.

SOC WL 556 West Coast Poverty Center Seminar Series (1, max. 15) Presents cutting-edge research on poverty, inequality, and public policy. Offered: AWSp.

SOC WL 557 Dissertation and Career Seminar (1-, max. 3) Multi-quarter seminar intended to provide doctoral students in their last years of the social work doctoral program with information and support for finishing their dissertation, defining and seeking out next career steps, successfully graduating, and entering into teaching and research careers. Credit/no-credit only. Offered: AWSp.

SOC WL 558 Integrative Seminar (1, max. 6) Topic-driven seminar targeting professional development of the first and second years (scholarship, research, teaching). Active participation expected in discussions and reflective papers. May require preparation for presentation or demonstration. Credit/no-credit only. Offered: AWSp.

SOC WL 559 Preparing to Teach: Instructional Theory and Practice (3) Teaching

conceptualized as professional practice. Focuses on integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis, and experimentation.

SOC WL 573 Proseminar: Cross-Cohort Impact Science Career Development (1, max. 9) Year long course reserved for social welfare doctoral students toward building a cross-cohort collegial support community. Topical foci are broadly: (1) transdisciplinary collaboration skills; (2) translational dissemination and science communication skills; (3) social justice and equity driven aims in scholarship; and (4) stakeholder engagement, co-production of research models and strategies. Credit/no-credit only.

SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research (3) Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.

SOC WL 578 Seminar in Special Topics for Prevention Research (1, max. 30) Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Credit/no-credit only.

SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3) Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no-credit only.

SOC WL 580 Quantitative Research Methods and Design (3) Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating, and designing defensible quantitative research studies).

SOC WL 581 Qualitative Research Methods and Design (3) Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and community-based research with vulnerable populations.

SOC WL 582 Research Practicum (3-) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 583 Research Practicum (-3) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 584 Teaching Practicum (3) Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Credit/no-credit only. Offered: AWSpS.

SOC WL 585 Qualitative Methods in Social Work Research I (3) The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3) The second in a

two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) Multivariate analysis aims to summarize and describe patterns among multiple observed characteristics. Explores theoretical introduction and practical skills to carry out multivariate analysis methods such as cluster analysis, principal components, factor analysis, and latent class analysis. Prerequisite: SOC 504; SOC 505; and SOC 506/CS&SS 507. Offered: jointly with CS&SS 589; Sp.

SOC WL 590 Topics in Advanced Research Methods (3) Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

SOC WL 591 Seminar on Topics in Social Welfare (1-5, max. 15)

SOC WL 592 Applied Longitudinal Data Analysis For Social Sciences (4) Addresses statistical methodology for using longitudinal data to answer research questions about changes over time including exploratory analysis tools, and random coefficient, growth curve, multi-level and hierarchical models, and their extensions. Prerequisite: SOC 504; SOC 505; SOC 506/CS&SS 507; and a solid knowledge of linear regression. Offered: jointly with CS&SS 592; W.

SOC WL 594 The Embodiment of Risk, Health Disparities, and Stress Mechanisms (3) Interdisciplinary course focused on multi-level exposure to and impacts of stress, integrating social determinants and life course development perspectives. An overview of theory and research integrating biological and psychosocial processes with emphasis on vulnerable populations and disparities. Encourages interdisciplinary engagement and supporting students in articulating their research perspectives. Offered: A.

SOC WL 598 Theory and Metatheory in Social Research (3) Explores the nature and role of theory in social research, theoretical and metatheoretical foundations of major social science research paradigms, and interdisciplinary perspectives on the socially constructed nature of theory and definitions of social "problems." Encourages critical, collaborative reflection on the role of theory in contemporary interdisciplinary research environments.

SOC WL 599 Theory Development for Social Research (3) Assists students in applying theory in building an original conceptual model. Emphasizes critical and integrative thinking derived from a social justice framework. Encourages students to examine the ideological, political, methodological, and ethical principles shaping theories, models, and concepts in contemporary social science and social welfare research. Open to interdisciplinary students with instructor permission. Prerequisite: admission to social welfare PhD program or permission of instructor.

SOC WL 600 Independent Study or Research (*-) Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Credit/no-credit only. Offered: AWSpS.

SOC WL 800 Doctoral Dissertation (*-) Offered: AWSpS.

SOCIAL WORK (MSW)

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3) Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

SOC W 501 Poverty and Inequality (3) Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (1-4, max. 4) Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization. Credit/no-credit only.

SOC W 505 Foundations of Social Welfare Research (3) Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice.

SOC W 506 Social Welfare Research and Evaluation (3) Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis. Prerequisite: a minimum grade of 2.7 in SOC W 505.

SOC W 507 Advanced Standing Social Welfare Research and Evaluation (5) Introduces a range of methods for informing evidence-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and technique for conducting practice-relevant research, including data collection and analysis. Prerequisite: advanced standing students.

SOC W 510 Micro/Meso Social Work Practice 1: InDIV iduals (3) Foundation course in direct social work practice with individuals. Introduces knowledge and skills needed for effective and accountable person-centered and participant-directed practice. Students gain skills for engagement, relationship building, interviewing, assessment and collaborative intervention planning with individuals through an intersectional lens.

SOC W 511 Micro/Meso Social Work Practice 2: Families and Groups (3) Foundation course in direct practice with families and groups. Provides generalist practice knowledge and skills for social work practice with families, small groups and service delivery systems to promote maximum self-determination, functioning, and quality of life. Prepares students for assessment, intervention planning and decision making with families and groups within the context of social systems.

SOC W 512 Macro Social Work Practice 1: Community and Policy Practice (3) Foundation course in macro social work, focused on community-based social work and policy practice. Students develop skills in system-level assessment, intervention, and evaluation. Theories of social change are examined with examples drawn from community organizing and policy advocacy.

SOC W 513 Macro Social Work Practice 2: Organizational Practice (3) Foundation course in macro social work practice, focused on organizational change. Using an anti-oppression lens, students develop skills in assessment, intervention and evaluation with groups, organizations, and communities. Students examine ways to facilitate change within organizations and critically assess the cultural aspects of organizations.

SOC W 514 Clinical Social Work: Practice with Adults (3) Theory and practice of clinical social work, emphasizing social justice frameworks and life course perspectives. Emphasizes specialized, strengths-based approaches to all phases of social work practice. Students learn motivational interviewing, critically examining applications with clients of varying social identity categories, given intersectional identities.

SOC W 515 Clinical Social Work: Practice With Children, Youth, and Families (3) Builds on foundational frameworks/competencies applying strength-based, social-justice informed approaches including motivational interviewing to all phases of social work practice specific to children and families. Covers common child and family topics (historical trauma, child development, attachment, intersectionality and disability) focusing on assessment and intervention through a culturally responsive lens.

SOC W 516 Research Base for Prevention Science (3) Introduces the

transdisciplinary field of prevention science; enhances understanding of the developmental epidemiology of risk, protection and outcome and how prevention interventions are conceptualized and evaluated; critiques research on preventive interventions and practice; and outlines the role of prevention science in advancing health and well-being over the life course.

SOC W 517 Promoting InDIV idual, Family, School, and Community Risk Prevention (3) Covers existing evidence-based practices in prevention science that have demonstrated effects on reducing risks and promoting positive development in youth. Emphasizes practice skills, topic include promotion of healthy development in childhood/adolescence; prevention of child abuse and neglect, early pregnancy, violence and delinquency, substance abuse, school misbehavior, and mental health disorders.

SOC W 518 Macro Practice in Health and Prevention (3) Students engage in the translation of research, advocacy, and the sustainability and dissemination of prevention initiatives and programs. Includes skill development in policy analysis, community organizing, and media/legislative advocacy. Covers current issues in prevention, the policy context surrounding them, and skills to propel prevention forward as a priority in or society.

SOC W 519 Policy/Services: Health/Mental Health (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 520 Policy/Services: Multigenerational (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 521 Child and Family Inequalities: Policy/Services Platform (3) Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized populations. Examines social construction of policies in historical, political, and comparative context.

SOC W 522 Advanced Standing Integrative Seminar (5) Assists with transition to graduate study for students entering MSW Advanced Standing Program. Serves as bridge between students' BASW preparation and the advanced MSW curriculum; builds graduate-level critical analysis and writing skills, integrating MSW foundation course content in social justice principles, diversity, structural inequalities, anti-oppression work; and micro/mezzo/macro practice.

SOC W 523 Preparation for Specialized Professional Practice - Advanced Standing Students (3) Designed to prepare students in the Advanced Standing MSW program for field/practicum experience. Builds upon content and skills acquired through generalist (micro, mezzo, and macro levels) practice. Includes development of critical thinking skills, values, and knowledge to advance social justice, skills for advancing multiculturalism, intergroup collaboration, and empowerment. Credit/no-credit only.

SOC W 524 Generalist Practicum (0-10, max. 14) Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Prerequisite: social work major. Credit/no-credit only. Offered: AWSpS.

SOC W 525 Specialized Practicum (1-12, max. 24) Agency-based specialized practicum. Builds on previous fieldwork in the context of practice in an area of specialization. Prerequisite: completion of foundation courses and practicum. Credit/no-credit only. Offered: AWSpS.

SOC W 526 Social and Healthcare Policy in an Aging Society (3) Applies a multigenerational, social justice framework to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan, especially marginalized populations. Builds and applies skills to analyze, critique, and advocate for policies and services that support growing numbers of older adults and multigenerational families.

SOC W 527 Globalization and Transnational Practice (3) Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era, and their local impacts. Foci include international agreements, UN conventions, immigration, and refugee policies.

SOC W 528 Healthcare Inequalities: Policy/Services Platform (3) Examines the organization, policies, and services of U.S. healthcare system from a social justice framework. Topics include the U.S. healthcare system's historical development, differential access to health and healthcare, healthcare system reform, and the analysis of healthcare policy from contrasting ideological perspectives.

SOC W 529 Mental Health Inequalities: Policy/Services Platform (3) Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

SOC W 530 Advanced Practice with Diverse Children and Families (3) Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

SOC W 531 Practice with Diverse Children and Families: Focus on Child Mental Health (3) Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics include culture and mental health, system of care, psychotropic medication, ADHD, and depression.

SOC W 532 Practice with Diverse Children and Families: Focus on Child Welfare (3) Develops specialized knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.

SOC W 533 Practice with Diverse Children, Youth, and Families: Community Settings (3) Focuses on the critical role of neighborhoods and communities as settings for child and family social work intervention. Provides the theoretical, empirical, and practical foundations for engaging with, implementing, and designing effective programs and services with and for children, youth, and families in diverse community settings.

SOC W 534 Praxis of Intergroup Dialogue (3) Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.

SOC W 535 Special Topics in Interpersonal/Direct Practice (2-3, max. 9) Examines current substantive topics in direct/interpersonal practice.

SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3) Focuses on social, economic, and political problems from an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a good organizer.

SOC W 537 Critical Empowerment Practice with Refugees and Immigrants (3) Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.

SOC W 538 Critical Empowerment Practice with Multi-ethnic Communities (3) Principles of empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly

diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

SOC W 539 Breaking Down the Wall and Shifting the Paradigm: Engaged Practice with Latinas and Latinos (3) Provides advanced knowledge and skills for practice with diverse Latinx populations through 1) examination of structural and cultural factors, and 2) understanding of Latinx practice models to promote the well-being of Latinx communities at multiple levels and in local and global contexts in culturally responsive ways.

SOC W 540 Advanced Social Work Practice in Health Settings I (3) Teaches theory and strengths-based practice within interprofessional health care settings from biopsychosocial, family systems, multi-cultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

SOC W 541 Social Work Practice in Health Settings (3) Teaches health care theory and practice skills relevant to working with adults and children in a variety of health care settings, using biopsychosocial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

SOC W 542 Recovery-Oriented Social Work Practice in Community Mental Health (3) Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

SOC W 543 Social Work Practice in Community Mental Health II (3) Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Covers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and working with Social Security. Complements SOC W 542, but may be taken free-standing.

SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3) First quarter of a two-quarter sequence on the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, countertransference, psychological defenses, resistance, phases of treatment, transference, countertransference, and vicarious trauma.

SOC W 545 Evidence-Based Practices for Clinical Social Work (3) Continues knowledge building around the theory and practice of clinical social work with adults. Focuses on deeper application of theories and evidence-based practices for clinical social work. Emphasizes cognitive-behavioral approaches within the context of a social ecological framework and a recovery orientation.

SOC W 546 Addressing Trauma and Recovery in Multi-Generational Advanced Practice (3) Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the-art techniques for healing trauma.

SOC W 547 Multigenerational Integrative Seminar (1-3, max. 3) Designed to foster the integration of classroom learning and field education. Taken concurrently with advanced practicum, provides support for addressing challenges in professional settings, development of leadership skills, and preparing for future work in the field of multigenerational practice. Credit/no-credit only.

SOC W 548 Multigenerational Practice with Children, Families and Elders I (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 549 Multigenerational Practice with Children, Families and Elders I (3)

Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 550 Anti-Racist Program Management and Adaptive Leadership (3)

Examines tools and techniques required for adaptive leadership and anti-racist program management and organizational change. Focuses on anti-racist management and adaptive leadership practices that incorporate logic modeling, adaptive leadership theories, and promotes the development of anti-racist, multicultural organizations, led by anti-racist change makers.

SOC W 551 Human Resource Management in the Human Services (3) Theories and techniques for 1) designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.

SOC W 552 Financial Management of Human Services Programs (3) Covers key financial management components of human service programs, including development and use of business plans, budgets, and financial statements. Helps students to demonstrate an understanding of financial management through budget preparation, financial statement analysis, new project cost projections, audits, and presentations using computer-based spreadsheets and presentation software.

SOC W 554 People, Place, Equity (3) Introduces empirical, theoretical, and applied knowledge on place as a key dimension of social work practice. Examines how people-place relationships differentially affect social opportunities such as health and wellness, employment, and housing. Provides intellectual and practical foundations for incorporating spatial analyses and collaborative place-making interventions in practice.

SOC W 555 Global Perspectives in Social Work Practice (3) Focuses on contemporary social issues of global importance: poverty; HIV/AIDS; population growth; gender inequality; and war, conflict, and displacement, with specific focus on these issues in the global south. Examines sociocultural, economic, and political processes that shape these issues, and entwined perspective of human rights and development.

SOC W 556 Family Healing: A Cross-Generational Approach (3) Explores how to respond to multi-generational dynamics within the entire extended family and examines how both difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.

SOC W 557 Caring for Persons with Life-Limiting Illness: A Lifespan Approach (3)

Focuses on multi-systemic social work practice with seriously ill people with a life-limiting condition. Examines how families care for a critically ill loved one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.

SOC W 558 Gender, Gender Identity, and Sexuality (3) Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students' micro and macro practice skills.

SOC W 559 Child Development (3) Provides students with a basic understanding of child development theory and research as well as specific knowledge about the development of children from infancy through adolescence. Emphasizes developmental approach to assessment and intervention with children and families. Particular emphasis placed on developmentally-based child welfare practice.

SOC W 560 Policy Processes, Institutions, and Influences (3) Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy process, including social problem definition, policy design, policy adaptation, and

policy implementation.

SOC W 561 Concepts and Methods of Policy Analysis (3) Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.

SOC W 562 Integrative Health/Mental Health Practice I (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 563 Integrative Health/Mental Health Practice II (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 565 Special Topics in Policy Practice (2-3) Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.

SOC W 569 Community-Centered Integrative Practice (3) This interactive student-centered course shifts the paradigm from the binary of macro vs micro and elevates the importance of relationships, connectivity, and allyship as acts of love, justice and resistance. Provides advanced skill building in assessing and maximizing community strengths, empowering practices and coalition building.

SOC W 570 Anti-racist Organizing for Social and Economic Change (3) Applies an institutional analysis of racism and white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.

SOC W 571 Assessment of Mental Disorders (3) Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-V) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.

SOC W 572 Understanding Addiction, Pharmacology of Drugs, and Treatment

Methods (3) Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of individuals, how to assess the presence of this disorder, and what the issues are in referring individuals to treatment for this disorder.

SOC W 573 Child Welfare and Permanency Planning (3) Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.

SOC W 574 Collaborative Community-Based Program Evaluation (3) Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

SOC W 575 Domestic Violence Policy and Intervention (3, max. 6) Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

SOC W 576 Contexts of Disability and Anti-Ableist Practice (3) Engages several areas of social work practice where knowledge about disability as an element of human diversity is needed. Examines disability's recent socio-political history,

models of disability, disability rights and disability justice frameworks. Emphasizes how policies and their implications for practice affect peoples' daily lives and facilitates critical personal reflection.

SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2-3) Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.

SOC W 578 Evidence-Based Practice in Child Mental Health (3) Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a "systems care philosophy" and which offer alternatives to traditional services.

SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3) Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

SOC W 580 Grant Writing and Fund Development (3) Prepares students to participate and provide leadership in grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.

SOC W 581 Historical Trauma and Healing (3) Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.

SOC W 582 Interpersonal Violence and Trauma (3) Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference reactions. Includes lecture, discussion, case presentations, and presentations by community experts.

SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3) Uses critical analysis to expand Western symptom-oriented grief and loss theory to include multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.

SOC W 584 Multicultural Mental Health Practice (3) Advanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.

SOC W 585 Advanced Group Work (3) Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

SOC W 586 Policy Advocacy (1-3, max. 3) Focuses on involvement in the policy-making process. Students design projects to influence public policy in local, state, and federal levels. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no-credit only.

SOC W 587 Spirituality in Healthcare (2) Examination of the beliefs, values,

meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/FAMED 547; Sp.

SOC W 588 Social Work in Schools (3) Meets professional standards for Washington State Educational Staff Associate certification. Explores social work role within organizational and legal contexts of school systems. Addresses evidence-informed and multi-level social work practice relative to national, state and local trends in education. Examines school reform, truancy, homelessness, diversity, violence, student support and special education.

SOC W 589 Social Work Practice with Families (3) Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.

SOC W 590 Social Work Supervision and Consultation (3) Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staff-related performance problems.

SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3) Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.

SOC W 592 Social Work Practice with African-American Families (3) Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.

SOC W 593 Social Work Practice with Chemically Dependent Adults: Understanding Assessment, Evaluation, and Counseling (3) Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.

SOC W 594 Gender and Inequalities in the Global Context (3) Examines issues of gender, globalization, and inequality through a gender lens. Topics include global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public policies, international frames (human rights), resistance, and response.

SOC W 595 Co-Occurring Addiction and Mental Health Disorders (3) Provides students with the knowledge and skills to understand the dynamics of co-occurring addiction and mental health disorders (COD) in the lives of individuals. Students learn how to assess the presence of COD and what the issues are in referring individuals to treatment or providing them treatment for COD.

SOC W 596 Special Topics in Social Work (1-10, max. 15) Introduces and explores a specific area of social work, with specific focus on emerging methods of practice. Content varies according to recent developments in the field and the interests of the instructor.

SOC W 597 Graduate Study Abroad in Social Work (1-15, max. 15) For graduate students in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC W 598 Integrative Seminar (1-5, max. 12) Integrative, skill-based seminar that provides MSW students an opportunity to synthesize social work theory and practice through applied critical thinking, case presentations, skill-building, and professional development. Credit/no-credit only.

SOC W 599 Independent Study in Social Work (1-10, max. 10) Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities. Credit/no-credit only.

SOC W 600 Independent Study or Research (1-10, max. 10) An independent research project. Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities included on the SOC W 600 form.

SOC W 700 Master's Thesis (*-)

INTERDISCIPLINARY UNDERGRADUATE PROGRAMS

ARCTIC STUDIES

ARCTIC 101 Elementary Inuktitut: Inuit Language and Culture in Canada (5) Develops basic communication skills in both oral and written Inuktitut, the Inuit language spoken in Canada. Covers basic history and cultural context of Inuit in Inuit Nunangat, and Inuit communities outside the Arctic. Develops intercultural knowledge and understanding. First in a sequence of three. Offered: A.

ARCTIC 102 Elementary Inuktitut (Inuit Language) (3) Continues the process of laying the groundwork for communicative work in Inuktitut, begun in ARCTIC 101. Offered: W.

ARCTIC 103 Elementary Inuktitut (Inuit Language) (3) Continues the process of laying the groundwork for communicative work in Inuktitut, begun in ARCTIC 101 and ARCTIC 102. Prerequisite: ARCTIC 102. Offered: Sp.

ARCTIC 200 Indigenous Diplomacies and International Relations in the Arctic (5) SSc International relations in the Arctic. Emphasis on perspectives of the region's Indigenous peoples. The Arctic provides an important case study for understanding international relations, given the complexity of geopolitical issues and the strong presence of Indigenous peoples in the region. Introduces Indigenous peoples, languages, and ways of thinking.

ARCTIC 201 Intermediate Inuktitut (Inuit Language) (3) A&H First course in the second-year Inuktitut language sequence. Prerequisite: ARCTIC 103. Offered: A.

ARCTIC 202 Intermediate Inuktitut (Inuit Language) (3) A&H Second course in the second-year Inuktitut language sequence. Prerequisite: ARCTIC 201. Offered: W.

ARCTIC 203 Intermediate Inuktitut (Inuit Language) (3) A&H Third course in the second-year Inuktitut language sequence. Prerequisite: ARCTIC 202. Offered: Sp.

ARCTIC 301 Advanced Inuktitut (Inuit Language) (3) A&H First course in the third-year Inuktitut language sequence. Prerequisite: ARCTIC 203. Offered: A.

ARCTIC 302 Advanced Inuktitut (Inuit Language) (3) A&H Second course in the third-year Inuktitut language sequence. Prerequisite: ARCTIC 301. Offered: W.

ARCTIC 303 Advanced Inuktitut (Inuit Language) (3) A&H Third course in the third-year Inuktitut language sequence. Prerequisite: ARCTIC 302. Offered: Sp.

ARCTIC 308 Arctic Literature and Film (5) A&H How both northerners and "outsiders" to the region represent the Arctic in written work and film, including Arctic Indigenous authors/filmmakers. Cultural forces and ideas that shape the way different communities understand the Arctic and their place within it, along with imaginative tools to shape its future.

ARCTIC 321 At the Top of the World: Arctic Histories (5) SSc, DIV History of environmental, socio-political, cultural, and economic diversity of Arctic region from earliest times to present. Discusses power relations, inequality related to race, ethnicity, religion, gender, socioeconomic status, geography, colonization, indigenous rights movements, and intercultural interactions. Explores changing perceptions about nature, cultural heritage, and definitions of "indigenous" in Arctic and Circumpolar North. Offered: jointly with HSTCMP 321.

ARCTIC 387 Study Abroad: Arctic Studies (1-5, max. 15) Relates Arctic geopolitics, indigenous internationalism, the arts, and/or natural sciences to the regions and peoples of the circumpolar world. Equivalency for upper division Arctic minor of Jackson School course work taken on UW study abroad or direct exchange. Specific content varies and is evaluated on an individual basis.

ARCTIC 391 Climate Change - An International Perspective: Science, Art, and Activism (5) SSc/A&H Explores climate change science in the context of geographic, social, and political constraints, considering the role of art, activism, and Arctic indigenous peoples in communicating impacts and mitigation. Students gain knowledge in key atmospheric and ocean science principles along with the role of science in society. Offered: jointly with JSIS B 391; Sp.

ARCTIC 400 Integrating Policy and Science in Arctic Studies (3) SSc/NSc Introduces Arctic resources and access from physical, biological, and political perspectives, focusing on the latter. Emphasizes political alliances among nation states as well as initiatives by indigenous peoples that involve mutual needs for access to Arctic resources for mining, transport, and food. Offered: Sp.

ARCTIC 401 Current Issues in the Arctic Region (5, max. 10) SSc Addresses current challenges and opportunities in the circumpolar North, from the perspective of current cutting-edge research, fields of practice, and Arctic Indigenous peoples and communities. May include climate change, social well-being, education, governance, and more. Prerequisite: ARCTIC 200.

ARCTIC 498 Special Topics in Arctic Studies (1-5, max. 10) Content varies by instructor.

HONORS PROGRAM

HONORS 100 Introduction to Honors Education (1) Introduces students to the essential features of the Honors Program, including interdisciplinary thinking, experiential learning, and the Honors portfolio. For University Honors Program students only.

HONORS 205 What We Know and How We Know It (5) C Helps students to develop methods of researching and gaining knowledge through critical reading of texts, dialogue, reflective writing, and visiting faculty lecturers from different disciplines. For University Honors Program students only. Cannot be taken for credit if credit received for HONORS 345.

HONORS 210 Humanities for Honors Students I (5, max. 15) A&H Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 211 Humanities for Honors Students II (5, max. 15) A&H Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 212 Humanities for Honors Students III (5, max. 15) A&H Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 213 Honors Foreign Study I - Humanities (2-5, max. 15) A&H Coursework drawn from interdisciplinary groups in the arts and humanities. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSps.

HONORS 220 Science for Honors Students I (5, max. 15) NSc Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 221 Science for Honors Students II (5, max. 15) NSc Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 222 Science for Honors Students III (5, max. 15) NSc Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 223 Honors Foreign Study II - Natural Science (2-5, max. 15) NSc
Coursework drawn from interdisciplinary groups in the natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 230 Social Science for Honors Students I (5, max. 15) SSc Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 231 Social Science for Honors Students II (5, max. 15) SSc
Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 232 Social Science for Honors Students III (5, max. 15) SSc
Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 233 Honors Foreign Study III - Social Science (2-5, max. 15) SSc
Coursework drawn from interdisciplinary groups in the social sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 240 Fine Arts for Honors Students I (5, max. 15) A&H Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 241 Fine Arts for Honors Students II (5, max. 15) A&H Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 242 Fine Arts for Honors Students III (5, max. 15) A&H Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 345 Interdisciplinary Writing Seminar (5, max. 15) C Investigates emerging topics of interest in the arts and sciences and frames the investigation of subject matter through writing and dialogic inquiry within a particular field. Students discuss, revise, and reflect upon their work through peer review, in-class writing activities, and editorial feedback. For University Honors Program students only. Cannot be taken for credit if credit received for HONORS 205.

HONORS 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For University Honors Program students only. Credit/no-credit only.

HONORS 381 Honors Foreign Study IV (2-5, max. 15) NSc/SSc/A&H Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 382 Honors Foreign Study V (2-5, max. 15) SSc/NSc Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 383 Honors Foreign Study VI (2-5, max. 15) A&H/NSc Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 384 Honors Foreign Study VII (2-5, max. 15) A&H/SSc Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 391 Honors Interdisciplinary Study I (5, max. 15) NSc/A&H/SSc Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. For University Honors Program students only.

HONORS 392 Honors Interdisciplinary Study II (5, max. 15) NSc/SSc Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. For University Honors Program students only.

HONORS 393 Honors Interdisciplinary Study III (5, max. 15) A&H/NSc Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. For University Honors Program students only.

HONORS 394 Honors Interdisciplinary Study IV (5, max. 15) SSc/A&H Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. For University Honors Program students only.

HONORS 396 Interdisciplinary Special Topics-Natural Science (1-5, max. 10) NSc
Special courses drawn from interdisciplinary groups in the natural sciences. Content varies. For University Honors Program students only.

HONORS 397 Interdisciplinary Special Topics-Social Science (1-5, max. 10) SSc
Special courses drawn from interdisciplinary groups in the social sciences. Content varies. For University Honors Program students only.

HONORS 398 Interdisciplinary Special Topics-Humanities (1-5, max. 10) A&H
Special courses drawn from interdisciplinary groups in the humanities. Content varies. For University Honors Program students only.

HONORS 496 Integration of the Honors Core Curriculum (1) Allows students completing the Interdisciplinary Honors Program to reflect on and present to peers the intersection between their Interdisciplinary Honors core courses and experiential learning projects. For University Honors Program students only. Offered: WSp.

HONORS 499 Honors Independent Study or Research (1-5, max. 10) Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. For University Honors Program students only.

LEADERSHIP

LEAD 100 Learning Leadership in Theory and Practice (5) SSc Introduces students to contemporary leadership theories and frameworks. Emphasis on translating formal, academic study of leadership into practice. Highlights authentic leadership constructs and concepts that center the value of social justice and critical perspectives. Develops students' leadership identity and confidence and sets the stage for continued leadership development. Credit/no-credit only. Offered: AWSp.

LEAD 298 Special Topics in Leadership Studies (1-5, max. 5) Varied topics related to leadership studies taught at an introductory level. Credit/no-credit only. Offered: AWSpS.

LEAD 490 Leadership Certificate (2) Guides the creation of a leadership e-portfolio through a series of reflective exercises. Supports students in integrating learning and articulating connections between personal strengths, values, key learning experiences and future goals through a leadership development lens. For Husky Leadership Certificate students. Credit/no-credit only. Offered: W.

LEAD 495 Leadership E-Portfolio Capstone (3) Guides creation of a leadership e-portfolio through a series of reflective exercises. Supports students in integrating learning and articulating connections between personal strengths, values, key learning experiences and future goals through a leadership development lens. Prerequisite: LEAD 100. Credit/no-credit only. Offered: WSp.

LEAD 499 Leadership Practice (1) Supplements co-curricular and extra-curricular experiences including internships, research, field-based experiences, global engagements and extra-curricular involvement. Emphasis on development of leadership learning goals, reflection on leadership competency development and articulation of connections between theory and practice. Recommended: LEAD 100. Credit/no-credit only. Offered: AWSpS.

FACULTY

Entries include appointment to the Graduate School faculty (indicated by *); year of appointment to the University; graduate or professional degree(s), date(s) and institution(s) (or highest-known degree where graduate or professional degree was unavailable in the University's academic personnel database). Faculty are listed only under their primary appointing department. For complete degree information and affiliate/adjunct/clinical faculty appointments, please see the departmental faculty page listed at the beginning of the department's listing below.

Professors

DOBRA, ADRIAN * 2006; Doctorate, 2001, Carnegie Mellon University

EROSHEVA, ELENA A. * 2002; Doctorate, 2002, Carnegie Mellon University

HARCHAOUI, ZAID * 2016; Doctorate, 2008, Collège de France

MCCORMICK, TYLER HARRIS * 2011; Doctorate, 2011, Columbia University

MEILA-PREDOVICIU, MARINA * 2000; Doctorate, 1999, Massachusetts Institute of Technology

RICHARDSON, THOMAS S. * 1996; Doctorate, 1996, Carnegie Mellon University

RODRIGUEZ, ABEL * 2020; Doctorate, 2007, Duke University

WAKEFIELD, JONATHAN C * 1999; Doctorate, 1992, University of Nottingham

WITTEN, DANIELA * 2010; Doctorate, 2010, Stanford University

Associate Professors

CHEN, YEN-CHI * 2016; Doctorate, 2016, Carnegie Mellon University

GROVE, RANJINI 2011; Doctorate, 1995, Cornell University

HAN, FANG * 2016; Doctorate, 2015, Johns Hopkins University

LUEDTKE, ALEX * 2018; Doctorate, 2016, University of California-Berkeley

Assistant Professors

ALLOTEY, PRINCE 2022

FURFARO, EMANUELA 2023; Doctorate, 2017, Università degli Studi di Milano Bicocca

KULNIG CINELLI, CARLOS LEONARDO * 2021; Doctorate, 2021, University of California-Los Angeles

PERKOVIC, EMILIJA * 2018; Doctorate, 2018, ETH Zurich

TAEB, ARMEEN * 2022; Doctorate, 2019, California Institute of Technology

WAGNER, ANNELEISE MAVIS 2013; Doctorate, 2023, University of Washington-Seattle Campus

Lecturers

BROWN, WILLIAM A 2006; Doctorate, 2019, University of Washington-Seattle Campus

CARDOSO, TAMRE 1989; Doctorate, 2004, University of Washington-Seattle Campus

CHEN, ANDY WEI-RONG 2022

FARRIS, KATE 2024

HARMON, JAMES WARREN 2019

KANG, LI 2023

MANNHEIMER, NATHAN R 2017

MARZBAN, CAREN 2001; Doctorate, 1988, University of North Carolina

SHAFFER, MICHELE L. 2013; Doctorate, 2002,

Pennsylvania State University-College of Medicine

SKALLAND, TIMOTHY 2020

SODJA, COLE 2020

SVERDLOV, SERGE 2011; Doctorate, 2014, University of Washington-Seattle Campus

 KNIGHT, DAVID * 2019; Doctorate, 2015, University of Southern California
 LEWIS, KATHERINE * 2012; Doctorate, 2011, University of California-Berkeley
 MCDONALD, MORVA A 2006; Doctorate, 2003, Stanford University
 MEEKER, KATHLEEN * 2013; Doctorate, 2010, Vanderbilt University
 RIGBY, JESSICA * 2014; Doctorate, 2012, University of California-Berkeley
 ROBERTS, CARLY * 2015; Doctorate, 2013, University of Wisconsin-Madison
 ROSENBERG, NANCY E * 2003; Doctorate, 2008, University of Washington-Seattle Campus
 SANDERS, ELIZABETH * 2004; Doctorate, 2011, University of Washington-Seattle Campus
 SANTIAGO, MARIBEL * 2020; Doctorate, 2015, Stanford University
 SCHINDLER, HOLLY S * 2012; Doctorate, 2007, Boston College
 SHAH, NIRAL * 2019; Doctorate, 2013, University of California-Berkeley
 SPAULDING, SCOTT * 2009; Doctorate, 2001, West Virginia University
 TAYLOR, KATHERINE * 2015; Doctorate, 2013, Vanderbilt University

Assistant Professors

AGUILAR, EDMUNDO 2021; Doctorate, 2017, Washington State University
 ASTIVIA, OSCAR OLVERA * 2020; Doctorate, 2017, University of British Columbia

BAGLEY, SYLVIA * 2012; Doctorate, 2007, University of California-Los Angeles
 BRAVO, ALICE * 2018; Doctorate, 2022, University of Washington-Seattle Campus
 CHO, JAMIE 2022
 ELLIOTT-GROVES, EMMA * 2019; Doctorate, 2016, University of Washington-Seattle Campus
 LOTT, JOE * 2007; Doctorate, 2005, Louisiana State University
 MACHADO, EMILY 2018; Master's, 2011, American University
 MARTINEZ, CARLOS RICARDO * 2020; Doctorate, 2019, University of Pennsylvania
 MATLACK, ALEXA * 2013; Doctorate, 2019, University of Washington-Seattle Campus
 NICKSON, DANA * 2020; Doctorate, 2020, University of Michigan-Ann Arbor
 OLSON, HANNAH OWINGS * 2006; Doctorate, 2014, University of Washington-Seattle Campus
 OMOGUN, LAKEYA * 2021; Doctorate, 2021, The University of Texas at Austin
 PARK, SOOJIN OH * 2015; Doctorate, 2015, Harvard University
 ROCHA, TOMAS DE REZENDE * 2020
 SHEA, MOLLY VICTORIA * 2019; Doctorate, 2013, University of Colorado at Boulder
 WASHINGTON, SHANEE ADRIENNE * 2019; Doctorate, 2019, Boston College

Senior Lecturer

BRENNAN, CAROLYN 2008; Doctorate, 2013, University of Washington-Seattle Campus

Lecturers

IVES, CHARLES 2013; Doctorate, 2014, Concordia University
 MASSEY, DIXIE D 2004
 PARKIN, JASON R 2017

College of Engineering

Aeronautics and Astronautics

Professors

ACIKMESE, BEHCET * 2015; Doctorate, 2002, Purdue University-Main Campus
 BREIDENTHAL, ROBERT E * 1980; Doctorate, 1978, California Institute of Technology
 DABIRI, DANA * 2002; Doctorate, 1992, University of California-San Diego

FERRANTE, ANTONINO * 2008; Doctorate, 2004, University of California-Irvine
 HERMANSON, JAMES C. * 1986; Doctorate, 1985, California Institute of Technology
 HILL, KRISTI MORGANSEN * 2002; Doctorate, 1999, Harvard University
 LIVNE, ELI * 1990; Doctorate, 1990, University of California-Los Angeles
 MESBAHI, MEHRAN * 2002; Doctorate, 1996, University of Southern California
 SHUMLAK, URI * 1994; Doctorate, 1992, University of California-Berkeley
 YANG, JINKYU 2013; Doctorate, 2005, Stanford University

Associate Professors

HURLEN, ERIK 2020; Doctorate, 2006, University of California-San Diego
 KNOWLEN, CARL * 1983; Doctorate, 1991, University of Washington-Seattle Campus
 SALVIATO, MARCO * 2015; Doctorate, 2012, Università degli Studi di Padova
 SRINIVASAN, BHUVANA * 2022
 WILLIAMS, OWEN JAMES * 2016; Doctorate, 2014, Princeton University

Assistant Professors

HABTOUR, ED MANSOUR * 2020; Doctorate, 2015, University of Maryland-College Park
 LEUNG, KAREN YAN MING * 2021
 LITTLE, JUSTIN M * 2015; Doctorate, Princeton University
 NARANG, ANSHU 2013; Doctorate, 2012, The University of Texas
 NISSER, MARTIN ERIC WILLIAM 2024
 SAENZ OTERO, ALVAR * 2022; Doctorate, 2005, Massachusetts Institute of Technology
 TAGHVAEI, AMIRHOSSEIN * 2021; Doctorate, 2019, University of Illinois at Urbana-Champaign

Lecturers

BATH, ADRIENNE ANGELA 2023
 BOYACIOGLU, BURAK 2019
 CERRUTI, NINA M 2021
 CHAPMAN, BRANDON DOUGLAS 1992
 COOK, DANIEL PAUL 2017
 CREWS, DANIEL WILLIAM 2016
 HANSON, CHRISTOPHER T 2018
 HUSSAIN, HEATHER SYEDA 2019
 LEE, AUSTIN T 2020
 MABSON, GERALD E 2006
 NAGABHUSHAN, VIVEK 2018
 RICHARD, LUKE I 2008
 ROMANO, JOHN SALVATORE 2023
 SCHMERLING, EDWARD 2022
 SPETZLER, MAX GEORG 2011
 VAN AVERMAETE, BRANDON 2022
 VERHOFF, ASHLEY 2018
 WECKNER, OLAF 2013

WHITT, DANIEL R. 2023

WIDDLE, RICHARD 2023

WINTER, SCOTT W 1982

Chemical Engineering

Professors

BANEYX, FRANCOIS * 1992; Doctorate, 1991, The University of Texas

BERG, JOHN C * 1964; Doctorate, 1964, University of California-Berkeley

HILLHOUSE, HUGH * 1995; Doctorate, 2000, University of Massachusetts

JENEKHE, SAMSON A * 2000; Doctorate, 1985, University of Minnesota-Duluth

OVERNEY, RENE M * 1996; Doctorate, 1992, Universität Basel

POZZO, LILO D. * 2007; Doctorate, 2006, Carnegie Mellon University

SCHWARTZ, DANIEL T. * 1991; Doctorate, 1989, University of California-Davis

STUVE, ERIC M * 1985; Doctorate, 1983, Stanford University

Associate Professors

ADLER, STUART B. * 2001; Doctorate, 1993, University of California-Berkeley

BECK, DAVID * 2000; Doctorate, 2006, University of Washington-Seattle Campus

CAROTHERS, JAMES * 2012; Doctorate, 2005, Harvard University

DEFOREST, COLE ALEXANDER * 2013; Doctorate, 2011, University of Colorado at Boulder

NANCE, ELIZABETH * 2015; Doctorate, 2012, Johns Hopkins University

Assistant Professors

BERGSMAN, DAVID STEVENS * 2020; Doctorate, 2018, Stanford University

HOLMBERG, VINCENT * 2015; Doctorate, 2011, The University of Texas

MARCHAND, JORGE A * 2022; Doctorate, 2019, University of California-Berkeley

MITTAL, SHACHI * 2021; Doctorate, 2019, University of Illinois at Urbana-Champaign

PRYBUTOK, ALEXIS * 2022; Doctorate, 2022, Northeastern Illinois University

RORRER, JULIE ELAINE * 2023; Doctorate, 2019, University of California-Berkeley

RUTZ, BENJAMIN H 2017; Doctorate, 2014, University of Washington-Seattle Campus

SHERMAN, ZACHARY * 2023; Doctorate, 2019, Massachusetts Institute of Technology

VALLEAU, STEPHANIE 2019; Doctorate, 2016, Harvard University

Lecturers

CALDWELL, KYLE 2011; Doctorate, 2017, University of Washington-Seattle Campus

CURTIS, CHAD 2015; Doctorate, 2019, University of Washington-Seattle Campus

KIM, ANTHONY YOUNG 1987; Doctorate, 2002, University of Washington-Seattle Campus

MURBACH, MATTHEW 2013

Civil and Environmental Engineering

Professors

ARDUINO, PEDRO * 1997; Doctorate, 1996, Georgia Institute of Technology-Main Campus

BAN, XUEGANG * 2016; Doctorate, 2005, University of Wisconsin-Madison

BERMAN, JEFFREY WILLIAM * 2006; Doctorate, 2006, New York University

BRETT, MICHAEL T * 1997; Doctorate, 1990, Uppsala University

CHEN, QIUZI * 2009; Doctorate, 2001, University of California-Davis

EBERHARD, MARC O * 1989; Doctorate, 1989, University of Illinois at Urbana-Champaign

GOODCHILD, ANNE V. * 2005; Doctorate, 2005, University of California-Berkeley

HORNER-DEVINE, ALEXANDER * 2004; Doctorate, 2003, Stanford University

HOSSAIN, FAISAL * 2014; Doctorate, 2004, University of Connecticut

ISTANBULLUOGLU, ERKAN * 2009; Doctorate, 2003, Utah State University

KORSHIN, GREGORY * 1991; Doctorate, 1983, Mendeleev University of Chemical Technology of Russia

LEHMAN, DAWN E * 1998; Doctorate, 1998, University of California-Berkeley

LOWES, LAURA N * 1989; Doctorate, 1999, University of California-Berkeley

LUNDQUIST, JESSICA D * 2006; Doctorate, 2004, University of California-San Diego

MARSHALL, JULIAN * 2015; Doctorate, 2005, University of California-Berkeley

MUENCH, STEPHEN T * 1990; Doctorate, 2004, University of Washington-Seattle Campus

NIJSSEN, BART * 1994; Doctorate, 2000, University of Washington-Seattle Campus

REED, DOROTHY * 1983; Doctorate, 1980, Princeton University

RUTHERFORD, G. SCOTT 1981; Doctorate, 1974, Northwestern University

STANTON, JOHN * 1978; Doctorate, 1978, University of California-Berkeley

THOMSON, JAMES M. * 2006; Doctorate, 2008,

Massachusetts Institute of Technology
WANG, YINHAI * 1998; Doctorate, 1998, University of Tokyo
WARTMAN, JOSEPH * 2010; Doctorate, 1999, University of California-Berkeley

Associate Professors

CALVI, PAOLO * 2015; Doctorate, 2014, University of Toronto
DODD, MICHAEL * 2009; Doctorate, 2008, Swiss Federal Institute of Technology ETH Zürich
MACKENZIE, DONALD W * 2013; Doctorate, 2013, Massachusetts Institute of Technology
MACKENZIE-HELNWEIN, PETER * 2003; Doctorate, 1997, International University Vienna
MAURER, BRETT W * 2017; Doctorate, 2016, Virginia Polytechnic Institute and State University
MCCORMACK, EDWARD D * 1982; Doctorate, 1997, University of Washington-Seattle Campus
MOTLEY, MICHAEL * 2012; Doctorate, 2011, Princeton University
NEUMANN, REBECCA B * 2010; Doctorate, 2009, Massachusetts Institute of Technology
REGAN, AMELIA CLARE * 2022; Doctorate, 1997, The University of Texas at Austin
WIEBE, RICHARD * 2014; Doctorate, 2012, Duke University
WINKLER, MARIKAROLIINA H * 2015; Doctorate, 2012, Delft University of Technology

Assistant Professors

DERAKHTI, MORTEZA * 2018; Doctorate, 2016, University of Delaware
GOMEZ, MICHAEL GREGORY * 2017; Doctorate, 2017, University of California-Davis
HEGERMILLER, CHRISTIE * 2022; Doctorate, 2011, University of California-Santa Cruz
HOY, BETHANY MARIE GORDON * 2022; Doctorate, 2022, University of Virginia-Main Campus
NIRMIMESH KUMAR, UNKNOWN 2016; Doctorate, 2013, University of South Carolina-Columbia
RAY, JESSICA R. * 2019; Doctorate, 2015, Washington University in St Louis
SHEAN, DAVID E * 2011; Doctorate, 2016, University of Washington-Seattle Campus
THONSTAD, TRAVIS E. * 2020; Doctorate, 2016, University of Washington-Seattle Campus
YAMAURA, JULIAN TAKASHI * 2009; Doctorate, 2018, University of Washington-Seattle Campus

Lecturers

BAKER, CARSON 2019
BANKS, GREGORY AARON 2019; Master's, 2004, University of Washington-Seattle Campus
BRASE, KAYLEA LYN 2022
HALLENBECK, MARK E 1984; Master's, 1980, University of Washington-Seattle Campus
KUZNICKI, SCOTT 2022; Bachelor's, 2000, University of Wisconsin-Platteville

MEHRAEIN, MEHRDAD 2021; Doctorate, 2016, University of Nevada-Reno
POLLOCK, WILLIAM D 2015; Doctorate, 2020, University of Washington-Seattle Campus
WEIGAND, JONATHAN M. 2020; Doctorate, 2014, University of Washington-Seattle Campus
WHITMAN, ZACHARY 2024; Master's, 2015, University of Washington-Seattle Campus

Professors

ANDERSON, RICHARD J. * 1986; Doctorate, 1985, Stanford University
ANDERSON, THOMAS E. * 1987; Doctorate, 1991, University of Washington-Seattle Campus
BALAZINSKA, MAGDALENA * 2005; Doctorate, 2005, Massachusetts Institute of Technology
BEAME, PAUL W. * 1987; Doctorate, 1987, University of Toronto
BODIK, RASTISLAV * 2015; Doctorate, 1999, University of Pittsburgh-Bradford
CEZE, LUIS HENRIQUE DE BAR * 2007; Doctorate, 2007, University of Illinois at Urbana-Champaign
CHOI, YEJIN * 2014; Doctorate, 2010, Cornell University
CURLESS, BRIAN L. * 1997; Doctorate, 1997, Stanford University
ERNST, MICHAEL D * 1996; Doctorate, 2000, University of Washington-Seattle Campus
FARHADI, ALI * 2012; Doctorate, 2011, University of Illinois at Urbana-Champaign
FOGARTY, JAMES A * 2006; Doctorate, 2006, Carnegie Mellon University
FOX, DIETER * 2000; Doctorate, 1998, Rheinische Friedrich Wilhelms Universität Bonn
FROELICH, JON E * 2017; Doctorate, 2011, University of Washington-Seattle Campus
GOLLAKOTA, SHYAMNATH V * 2012; Doctorate, 2013, Massachusetts Institute of Technology
GROSSMAN, DANIEL JOSEPH * 2003; Doctorate, 2003, Cornell University
HEER, JEFFREY M * 2013; Doctorate, 2008, University of California-Berkeley
KARLIN, ANNA R. * 1994; Doctorate, 1987, Stanford University
KEMELMAHER, IRENA * 2009; Doctorate, 2009, Weizmann Institute of Science
KOHNO, TADAYOSHI * 2006; Doctorate, 2006, University of California-San Diego
KRISHNAMURTHY, ARVIND * 2005; Doctorate, 1999, University of California-Berkeley
LAZOWSKA, EDWARD D * 1977; Doctorate, 1977, University of Toronto

LEE, JAMES RUSSELL * 2006; Doctorate, 2005, University of California-Berkeley
 LEE, SU-IN * 2009; Doctorate, 2010, Stanford University
 LEVY, HENRY M * 1983; Master's, 1981, University of Washington-Seattle Campus
 MANKOFF, JENNIFER CAROLYN * 2017; Doctorate, 2001, Georgia Institute of Technology-Main Campus
 MONES, BARBARA ELLEN 1999; Master's, 1979, Rhode Island School of Design
 OH, SEWOONG * 2019
 OSKIN, MARK H. * 2001; Doctorate, 2001, University of California-Davis
 PATEL, SHWETAK NARAN * 2008; Doctorate, 2008, Georgia Institute of Technology-Main Campus
 POPOVIC, ZORAN * 1999; Doctorate, 1999, Carnegie Mellon University
 RAO, ANUP * 2010; Doctorate, 2007, The University of Texas
 RAO, RAJESH P.N. * 2000; Doctorate, 1998, University of Rochester
 REGES, STUART THOMAS 2004; Master's, 1982, Stanford University
 SEITZ, STEVEN M * 2000; Doctorate, 1997, University of Wisconsin-Madison
 SHAPIRO, LINDA G. * 1986; Doctorate, 1974, University of Iowa
 SMITH, JOSHUA R. * 2005; Doctorate, 1999, Massachusetts Institute of Technology
 SMITH, NOAH A * 2014; Doctorate, 2006, Johns Hopkins University
 SRINIVASA, SIDDHARTHA * 2017; Doctorate, 2005, Carnegie Mellon University
 SUCIU, DAN * 2000; Doctorate, 1995, University of Pennsylvania
 TANIMOTO, STEVEN L * 1977; Doctorate, 1975, Princeton University
 TAYLOR, MICHAEL BEDFORD * 2017; Doctorate, 2007, Massachusetts Institute of Technology
 ZETTLEMOYER, LUKE S * 2010; Doctorate, 2009, Massachusetts Institute of Technology

Associate Professors

ANDERSON, RUTH ELIZABETH 1991; Doctorate, 2006, University of Washington-Seattle Campus
 BOOTS, BYRON EMERETH * 2019; Doctorate, 2012, Carnegie Mellon University
 BRICKER, LAUREN J 2017; Doctorate, 1998, University of Washington-Seattle Campus
 BRUNELLE, NATHAN JAMES 2023
 CAKMAK, MAYA * 2013; Doctorate, 2012, Georgia Institute of Technology-Main Campus
 HAJISHIRZI, HANNANEH * 2012; Doctorate, 2011, University of Illinois at Urbana-Champaign
 HEIMERL, KURTIS L. * 2002; Doctorate, 2013, University of California-Berkeley
 HSIA, JUSTIN EZEKIEL 2016; Doctorate, 2015, University of California-Berkeley
 ICHIKAWA, SCOTT S 2019; Master's, 2015, University

of Washington-Seattle Campus
 JAMIESON, KEVIN G * 2017; Doctorate, 2015, University of Wisconsin-Madison
 JUST, RENE * 2018; Doctorate, 2013, Universität Ulm
 KASIKCI, BARIS 2022
 LEE, YIN TAT * 2017; Doctorate, 2016, Massachusetts Institute of Technology
 LIN, HUIJIA * 2019; Doctorate, 2012, Cornell University
 MAHAJAN, RATUL * 1999; Doctorate, 2005, University of Washington-Seattle Campus
 MOSTAFAVI, SARA * 2020
 OVEIS GHARAN, SHAYAN * 2015; Doctorate, 2013, Stanford University
 PERKINS, JOHN H. JR. 1998; Master's, 1982, Cornell University
 PETER, SIMON * 2022; Doctorate, 2012, ETH Zurich
 REINECKE, KATHARINA * 2015; Doctorate, 2010, Universität Zürich
 ROESNER, FRANZISKA * 2009; Doctorate, 2014, University of Washington-Seattle Campus
 SCHAFER, HUNTER A 2014; Master's, 2018, University of Washington-Seattle Campus
 SHAPIRO, R. BENJAMIN * 2022
 TATLOCK, ZACHARY L * 2013; Doctorate, 2013, University of California-San Diego
 TESSARO, STEFANO MASSIMO * 2019; Doctorate, 2010, ETH Zurich
 TORLAK, EMINA 2014; Doctorate, 2009, Massachusetts Institute of Technology
 TSVETKOV, YULIA * 2020; Doctorate, 2016, Carnegie Mellon University
 WANG, XI 2014; Doctorate, 2014, Massachusetts Institute of Technology
 WORTZMAN, BRETT G. B. 2017; Master's, 2012, University of Washington-Seattle Campus

Assistant Professors

ALTHOFF, CHRISTOPHER TIM * 2019; Doctorate, 2018, Stanford University
 BATTLE, LEILANI MARIE * 2006; Doctorate, 2017, Massachusetts Institute of Technology
 BERNSTEIN, GILBERT L * 2022
 COLADANGELO, ANDREA WEI * 2022
 DU, SIMON S * 2020; Doctorate, 2019, Carnegie Mellon University
 GARZA, ELBA 2022; Doctorate, 2022, Texas A & M University
 GOLUB, MATTHEW D. * 2022
 GUPTA, ABHISHEK * 2021; Doctorate, 2021, University of California-Berkeley
 IYER, VIKRAM SUBRAMANIAM * 2015; Doctorate, 2021, University of Washington-Seattle Campus
 JAQUES, NATASHA MARY * 2022
 KOH, PANG WEI * 2022; Doctorate, 2022, Stanford University
 KOHLBRENNER, DAVID WILLIAM * 2020; Doctorate, 2018, University of California-San Diego
 KRISHNA, RANJAY * 2021; Doctorate, 2021, Stanford

University

LIN, KEVIN 2019; Master's, 2019, University of California-Berkeley

University of Washington-Seattle Campus
 PORTER, RILEY MARGUERITE 2011; Master's, 2016, University of Washington-Seattle Campus
 REDMON, JOSEPH CHET 2013; Doctorate, 2021, University of Washington-Seattle Campus
 SANCHEZ-STERN, ALEXANDER 2024; Doctorate, 2021, University of California-San Diego
 SANKAR, ADITYA 2009; Doctorate, 2017, University of Washington-Seattle Campus
 SHAH, TANMAY 2022
 SKOTEINIOTIS, THERAPON 2018; Doctorate, 2009, Northeastern University
 SOBEL, RACHEL VICTORIA 2021; Master's, 2020, CUNY Hunter College
 STRONG, TERRELL ANTHONY 2019; Master's, 2021, University of Washington-Seattle Campus
 SWAMY, VINITRA 2020; Master's, 2018, University of California-Berkeley
 TANG, HANNAH C 2019; Bachelor's, 2002, University of Washington-Seattle Campus
 THOMPSON, ROBERT HAVEN 2007; Doctorate, 2019, University of Washington-Seattle Campus
 TSUN, ALEXANDER PING 2015; Master's, 2020, Stanford University
 VAN HORN, ROBERT BROOKS 2023; Doctorate, 2007, Georgia Institute of Technology-Main Campus
 WANG, SIYU 2017; Bachelor's, 2020, University of Washington-Seattle Campus
 WINSTANLEY, MELISSA R 2018; Master's, 2013, University of Washington-Seattle Campus
 WOLFSON, SAMUEL SEYMOUR 2017; Master's, 2020, University of Washington-Seattle Campus
 WOLMAN, TAL 2019; Master's, 2022, University of Washington-Seattle Campus
 WONG, KRISTOFER THOMAS 2019; Bachelor's, 2021, University of Washington-Seattle Campus
 ZATLOUKAL, KEVIN 1997; Doctorate, 2016, Massachusetts Institute of Technology
 ZAYAS, JASON 2019; Diploma, 1994, Joe Kubert School of Cartoon and Graphic Art

Electrical and Computer Engineering

Professors

ANANTRAM, MANJERI * 2008; Doctorate, 1995, Purdue University-Main Campus
 ARABSHAHI, PAYMAN * 1988; Doctorate, 1994, University of Washington-Seattle Campus
 ATLAS, LES EUGENE * 1983; Doctorate, 1984, Stanford University
 BILMES, JEFFREY A * 1999; Doctorate, 1999, University of California-Berkeley
 BOHRINGER, KARL F. * 1998; Doctorate, 1997, Cornell University

BUSHNELL, LINDA GRACE * 2000; Doctorate, 1994, University of California-Berkeley
 CHEN, TAI-CHANG 1991; Doctorate, 1997, University of Washington-Seattle Campus
 DUNHAM, SCOTT T. * 1999; Doctorate, 1985, Stanford University
 FAZEL SARJOU, MARYAM * 2007; Doctorate, 2002, Stanford University
 HANNAFORD, BLAKE * 1989; Doctorate, 1985, University of California-Berkeley
 HAUCK, SCOTT * 1990; Doctorate, 1995, University of Washington-Seattle Campus
 HWANG, JENQ-NENG * 1989; Doctorate, 1988, University of Southern California
 KIRCHHOFF, KATRIN 1999; Doctorate, 1999, Universität Bielefeld
 KIRSCHEN, DANIEL SADI * 2011; Doctorate, 1985, University of Wisconsin-Madison
 KLAVINS, ERIC * 2003; Doctorate, 2001, University of Michigan-Ann Arbor
 LI, MO * 2018; Doctorate, 2007, California Institute of Technology
 LIN, LIH-YUAN * 2003; Doctorate, 1996, University of California-Los Angeles
 MAMISHEV, ALEXANDER V * 1999; Doctorate, 1999, Massachusetts Institute of Technology
 MORITZ, CHET T * 1998; Doctorate, 2003, University of California-Berkeley
 OSTENDORF, MARI * 1999; Doctorate, 1985, Stanford University
 POOVENDRAN, RAADHAKRISHNAN * 2000; Doctorate, 1999, University of Maryland-Global Campus
 RITCEY, JAMES A * 1985; Doctorate, 1985, University of California-San Diego
 ROY, SUMIT * 1998; Doctorate, 1988, University of California-Santa Barbara
 SAHR, JOHN D. 1991; Doctorate, 1990, Cornell University
 SEELIG, GEORG * 2009; Doctorate, 2003, Switzerland University of Business and International Studies Geneva
 SHI, CHUAN-JIN RICHARD * 1998; Doctorate, 1994, University of Waterloo
 WILSON, DENISE M * 1999; Doctorate, 1995, Georgia Institute of Technology-Main Campus
 ZURK, LISA 2018; Doctorate, 1995, University of Washington-Seattle Campus

Associate Professors

BURDEN, SAMUEL A. * 2004; Doctorate, 2014, University of California-Berkeley
 HUSSEIN, RANIA * 2012; Doctorate, 2006, Old Dominion University
 MAJUMDAR, ARKA * 2013; Doctorate, 2012, Stanford University
 RAITI, JOHN GIULIAN * 2017; Doctorate, 2012, Brown University
 RATLIFF, LILLIAN JANE * 2015; Doctorate, 2015,

University of California-Berkeley
 REYNOLDS, MATTHEW STEPHEN * 2013; Doctorate, 2003, Massachusetts Institute of Technology
 RUDELL, JACQUES CHRISTOPHE * 2009; Doctorate, 2000, University of California-Berkeley
 ZHANG, BAOSEN * 2015; Doctorate, 2013, University of California-Berkeley

Assistant Professors

CHOI, JUNGWON * 2023; Doctorate, 2019, Stanford University
 ELEY, SERENA MERTEEN * 2022; Doctorate, 2012, University of Illinois at Urbana-Champaign
 GADRE, AKSHAY SANJAY * 2022; Doctorate, 2022, Carnegie Mellon University
 HAMEED, MAHMOOD ABDUL 2022; Doctorate, 2016, University of Kansas
 HINKE, PENNY ELIZABETH 2011; Master's, 2015, Goddard College
 INGRAHAM, KIMBERLY A * 2021; Doctorate, 2021, University of Michigan-Ann Arbor
 LUKUYU, JUNE * 2022; Master's, 2016, Loughborough University
 MAKHSOUS, SEPEHR * 2012; Doctorate, 2020, University of Washington-Seattle Campus
 MOAZENI, SAJJAD * 2019; Doctorate, 2018, University of California-Berkeley
 MOURADIAN, SARA * 2021; Doctorate, 2018, Massachusetts Institute of Technology
 NAGHAVI, SEYYEDMOHAMMADHO * 2023; Doctorate, 2023, University of Michigan-Ann Arbor
 ORSBORN, AMY * 2016; Doctorate, 2013, University of California-Berkeley
 PARSONS, MAXWELL F 2022; Doctorate, 2016, Harvard University
 TRIVEDI, RAHUL * 2021; Doctorate, 2020, Stanford University

Lecturer

BLOOM, BRANDON D 2022; Bachelor's, 2008, Drexel University
 BRASSELL, SHERI 2023
 CASSERLY, PADRAIC S 2018; Master's, 2019, Tsinghua University (清华大学)
 ECKER, ALLAN C. 2003
 GUSTAFSON, STEVEN M 2023; Doctorate, 2004, University of Nottingham
 HAMILTON, NICOLE 2013; Master's, 1987, Boston University
 PINTO, CHRISTINE 2020
 SILVER, JASON D. 2019; Doctorate, 2015, University of Washington-Seattle Campus
 STEVSON, DAVID SCOTT 2022; Bachelor's, 2002, Georgia State University
 VINING, JENNIFER GUINEVERE 2019; Doctorate, 2011, University of Wisconsin-Madison
 WENGER, MATTHEW 2016

Human Centered Design and Engineering

Professors

ARAGON, CECILIA * 2010; Doctorate, 2004, University of California-Berkeley
 ATMAN, CYNTHIA J. * 1998; Doctorate, 1990, Carnegie Mellon University
 HASELKORN, MARK P * 1985; Doctorate, 1977, University of Michigan-Ann Arbor
 KIENTZ, JULIE A * 2008; Doctorate, 2008, Georgia Institute of Technology-Main Campus
 KOLKO, BETH E * 2000; Doctorate, 1994, The University of Texas
 LEE, CHARLOTTE P * 2008; Doctorate, 2004, University of California-Los Angeles
 MCDONALD, DAVID W * 2002; Doctorate, 2000, University of California-Irvine
 MUNSON, SEAN A * 2010; Doctorate, 2012, University of Michigan-Ann Arbor
 TURNS, JENNIFER A. * 1999; Doctorate, 1998, Georgia Institute of Technology-Main Campus
 ZACHRY, MARK R * 2006; Doctorate, 1998, Iowa State University

Associate Professors

CRAFT, BROCK R * 2015; Doctorate, 2007, University College London
 FINDLATER, LEAH K * 2017; Doctorate, 2009, University of British Columbia
 FOX, TYLER STEVEN * 1998; Doctorate, 2015, Simon Fraser University
 HENDRICKS, DIANNE G. 2013; Doctorate, 2010, Duke University
 HSIEH, GARY * 2013; Doctorate, 2010, Carnegie Mellon University
 PINTO DA SILVA, ANA MARIA S.V. * 2022; Master's, 2005, Harvard University
 RIBES, DAVID * 2015; Doctorate, 2006, University of California-San Diego
 ROSNER, DANIELA K * 2013; Doctorate, 2012, University of California-Berkeley
 STARBIRD, CATHARINE E * 2012; Doctorate, 2012, University of Colorado at Boulder
 WAGNER, LINDA E * 2013; Master's, 1998, Illinois Institute of Technology

Assistant Professors

BHATTACHARYA, ARPITA * 2015; Doctorate, 2020, University of Washington-Seattle Campus
 CHERUKUMILLI, ARUNA KIRANI KATYAYANI 2018; Doctorate, 2017, University of California-Berkeley
 COPPOLA, SARAH MARIE * 2020; Doctorate, 2019, Harvard University
 DASGUPTA, SAYAMINDU * 2017; Doctorate, 2016,

Massachusetts Institute of Technology
 GHOSHAL, SUCHETA * 2021; Doctorate, 2020,
 Georgia Institute of Technology-Main Campus
 HIRSCH, SHANA L 2018; Doctorate, 2018, University
 of Idaho
 MARKS, ALAN L. * 2019; Master's, 1992, University of
 Washington-Seattle Campus
 PEEK, NADYA M * 2018; Doctorate, 2016,
 Massachusetts Institute of Technology
 SPYRIDAKIS, IRINI K 2007; Master's, 2010, University
 of Washington-Seattle Campus

Senior Lecturer

SANOCKI, ELIZABETH 1988; Doctorate, 1994,
 University of Washington-Seattle Campus

Lecturers

ANICELLO, ONA 2020; Master's, 2013, University of
 Washington-Seattle Campus
 BARBARIN, ANDREA 2021; Doctorate, 2017,
 University of Michigan-Ann Arbor
 BARBOZA, LAURA M 2017; Master's, 2011, University
 of Washington-Seattle Campus
 BERGER, BERNADETTE SUZANNE 2021; Bachelor's,
 2009, University of Washington-Seattle Campus
 BIPAT, TARYN S 2016; Doctorate, 2021, University of
 Washington-Seattle Campus
 BROOKSHIER, KATHRYN 2021; Master's, 2020,
 University of Washington-Seattle Campus
 BRUNDRETT, ALEXANDER 2018; Master's, University
 of Washington-Seattle Campus
 CALLISTER, COREEN 2016; Master's, 2019, University
 of Washington-Seattle Campus
 CAMPBELL, CAMERON 2022
 CAMPBELL, JASON 2006; Master's, 2007, University
 of Washington-Seattle Campus
 CHOW, ASTRID 2021; Master's, 2011, Bentley
 University
 CLARK, NEILS L. 2022; Master's, 2006, University of
 Hawaii at Manoa
 COLUSSO, LUCAS FRANCO 2014; Doctorate, 2020,
 University of Washington-Seattle Campus
 DYKEMA, JULIE 2006; Master's, 2007, University of
 Washington-Seattle Campus
 ENNIS, JOHN 2022; Bachelor's, 2013, University of
 Cincinnati-Main Campus
 FEENSTRA, EVAN WILLIAM 2017; Master's, 2019,
 University of Washington-Seattle Campus
 FISHER, DANYEL 2020; Doctorate, 2004, University of
 California-Irvine
 FLEISHER, JACOB 2017
 GILL, KATHY E 2017; Master's, 1979, Virginia
 Polytechnic Institute and State University
 GOTTLIEB, ALEXIS HOPE 2022; Doctorate, 2021,
 Massachusetts Institute of Technology
 GRUBER, DARA STEFANI 2021; Doctorate, 2018,
 University of Minnesota-Twin Cities
 HAMACHER, JUSTIN R 2014; Master's, 2013,

University of Washington-Seattle Campus
 HAMILTON, ALISTAIR 2023
 HILLMAN, SERENA 2018; Doctorate, 2014, Simon
 Fraser University
 HOVANESIAN, LEON PAUL 2022; Master's, Illinois
 Institute of Technology
 HUTCHINSON, BLAIR NEVILLE 2017; Bachelor's, 2015,
 University of Vermont
 IRANI, XERXES 2018; Bachelor's, 1998, Alberta
 Vocational College
 KAWAS, SABA 2014; Doctorate, 2022, University of
 Washington-Seattle Campus
 KAYES, JEREMY 2017; Bachelor's, 2000, Virginia
 Commonwealth University
 KOLOVSON, SAMANTHA R 2016
 KUEHNLE, HOLGER 2021; Master's, Carnegie Mellon
 University
 LOUCKS-JARET, CHRISTINE M 1997; Master's, 1999,
 University of Washington-Seattle Campus
 MARTIN-ANDERSON, BRANDON PHILLIP 2020;
 Master's, 2014, Massachusetts Institute of
 Technology
 MARX, JUSTIN ANDREW 2017; Bachelor's, 2003, New
 York University
 MATARRESE, JEFFREY R 2020; Master's, 2020,
 University of Washington-Seattle Campus
 MEHLMAN, GABRIELLE 2018; Master's, 2015,
 University of Washington-Seattle Campus
 MEJIA COBO, MARCELO ALONSO 2020; Master's,
 2016, School of Visual Arts
 MENKING, AMANDA 2012; Doctorate, 2019,
 University of Washington-Seattle Campus
 MICHAEL, JOHN W. 2021; Master's, University of
 Washington-Seattle Campus
 MILES, TAYLOR 2019
 MOBRAND, KATHRYN A 2005
 MURAKI, LEISHA 2022
 NEELY, TAMARA L 2018; Master's, 2000, American
 University
 NILSEN, TROND TAMAIO 2023; Doctorate, 2015,
 University of Washington-Seattle Campus
 OWEN, LISA A 2017; Master's, 1993, University of
 Washington-Seattle Campus
 PHILBIN, KEVIN P 2017; Master's, 2021, University of
 Washington-Seattle Campus
 PYLE, DOUGLAS M. 1995; Master's, 1998, University
 of Washington-Seattle Campus
 ROGERS, KELLIE A 2021; Master's, 2015, University of
 Washington-Seattle Campus
 SAKAGUCHI-TANG, DAWN K 2015; Doctorate, 2021,
 University of Washington-Seattle Campus
 SATTLER, BROOK A 2003; Doctorate, 2012, University
 of Washington-Seattle Campus
 SCALONE, GIOVANNA 2007; Doctorate, 2015,
 University of Washington-Seattle Campus
 SEIFERT, WILLIAM CHRISTOPHER 2023; Bachelor's,
 1994, Otterbein College
 SHI, KEVIN 2017; Master's, 2018, University of
 Washington-Seattle Campus

SLOTA, STEPHEN C 2017
 SMITH, JEFFREY EARL 2019; Bachelor's, 2000, James Madison University
 SMITH, MICHAEL P 2005; Master's, 2006, University of Washington-Seattle Campus
 SPENCE, JEANINE 2018; Master's, Rhode Island School of Design
 TESKA, DANIELLE P. 2019; Master's, University of Washington-Seattle Campus
 THYNES, GAIL HOLLY 2021; Bachelor's, 2015, University of Washington-Seattle Campus
 TIFFANY, BROOKS 2019; Master's, 2018, University of Washington-Seattle Campus
 WRENN, STEVEN C 2016; Master's, 1995, University of Virginia-Main Campus
 WU, THOMAS 2015; Associate, 2005, Bellingham Technical College
 ZEILER, TELLE L 2014; Master's, 2011, University of Washington-Seattle Campus
 ZOSHAK, JOHN 2021; Master's, 2020, University of Washington-Seattle Campus

Industrial and Systems Engineering

Professors

GHATE, ARCHIS VIJAY 2006; Doctorate, 2006, University of Michigan-Ann Arbor
 PARK, CHIWOO 2023; Doctorate, 2011, The Texas A&M University

Associate Professors

BANERJEE, ASHIS G * 2015; Doctorate, 2009, University of Maryland-Global Campus
 BUCHANAN, PATRICIA CECILIA 2016; Doctorate, 2014, University of Central Florida
 CHOE, JOHN YOUNGJUN * 2016; Doctorate, 2016, University of Michigan-Ann Arbor
 HUANG, SHUAI * 2014; Doctorate, 2012, Arizona State University
 LIU, SHAN * 2013; Doctorate, 2013, Stanford University
 MASTRANGELO, CHRISTINA M. * 2002; Doctorate, 1993, Arizona State University
 ZHAO, CHAOYUE * 2019; Doctorate, 2014, University of Florida

Assistant Professors

KIM, JI-EUN * 2017; Doctorate, 2017, Pennsylvania State University-Main Campus
 RAJIVAN, PRASHANTH * 2018; Doctorate, 2014, Arizona State University

Lecturers

BENGTSON, KRISTEN A 2022

CARSON, RONALD S 2016; Doctorate, 1983, University of Washington-Seattle Campus
 COKER, MARK HARRISON 2022
 DOENECKE, SCOTT 2023
 HUANG, YONGXI 2024
 KUMAR, PEEYUSH 2013; Doctorate, 2018, University of Washington-Seattle Campus
 LEWIS, RICHARD M 2018; Master's, 2007, Portland State University
 MANTEY, KRISTINE D 2009; Master's, 2002, Seattle University
 MARTZ, GARY 2023
 MONTGOMERY, STEPHEN W 2009; Doctorate, 2000, Purdue University-Main Campus
 ROSS, TAMAIRA 2009; Master's, 2008, University of Washington-Seattle Campus
 ROSS, TERRELL WAYNE 2011; Master's, 1991, Pacific Lutheran University
 SALMON, JAMES J 2013; Master's, 2005, University of Washington-Seattle Campus
 TERRY, NICK 2019
 TIDBALL, BRIAN ESLEY 2020
 VASUDEVAN, KARTHIK KRISHNA 2022
 WOODMAN, DANIEL 2020; Bachelor's, Marquette University

Materials Science and Engineering

Professors

CAO, GUOZHONG * 1996; Doctorate, 1991, Eindhoven University of Technology
 HINDS, BRUCE JACKSON III * 2014; Doctorate, 1996, Northwestern University
 KRISHNAN, KANNAN * 2001; Doctorate, 1984, University of California-Berkeley
 LIU, JUN * 2019; Doctorate, 1990, University of Washington-Seattle Campus
 MARCUS, CHARLES MASAMED 2021; Doctorate, 1990, Harvard University
 MAYER, GEORGE 1998; Doctorate, 1967, Massachusetts Institute of Technology
 SARIKAYA, MEHMET 1984; Doctorate, 1982, University of California-Berkeley
 XIAO, DI * 2021; Doctorate, 2007, The University of Texas at Austin
 YANG, JIHUI * 2011; Doctorate, 2000, University of Michigan-Ann Arbor
 ZHANG, MIQIN * 1999; Doctorate, 1999, University of California-Berkeley

Associate Professors

AROLA, DWAYNE D * 1991; Doctorate, 1996, University of Washington-Seattle Campus
 BRUSH, LUCIEN N * 1990; Doctorate, 1988, Carnegie

Mellon University

HUANG, YUE * 2017; Doctorate, 2006, University of Washington-Seattle Campus

IDROBO TAPIA, JUAN CARLOS * 2021; Doctorate, 2004, University of California-Davis

MACKENZIE, JOHN DEVIN * 2015; Doctorate, 1998, University of Florida

PAUZAUSKIE, PETER JOHN * 2010; Doctorate, 2007, University of California-Berkeley

Assistant Professors

CAO, TING * 2018; Doctorate, 2018, University of California-Berkeley

FONG, HANSON K. * 1996; Doctorate, 2003, University of Washington-Seattle Campus

ROUMELI, ELEFThERIA * 2019; Doctorate, 2014, Aristotle University of Thessaloniki

ZOBEIRY, NAVID * 2019; Doctorate, 2010, University of British Columbia

Lecturer

ADJORLOLO, ALAIN 2022

ROHATGI, AASHISH 2017

SEATON, CHARLES 2018; Master's, 1975, Stanford University

Mechanical Engineering

Professors

ALISEDA, ALBERTO * 2006; Doctorate, 2004, University of California-San Diego

BAILEY, MICHAEL R. * 1996; Doctorate, 1997, The University of Texas

BRUNTON, STEVEN L. * 2012; Doctorate, 2012, Princeton University

COBB, CORIE * 2016; Doctorate, 2008, University of California-Berkeley

DAHL, PETER H. * 1989; Doctorate, 1989, Massachusetts Institute of Technology

DEL ALAMO DE PEDRO, JUAN CARLOS * 2019; Doctorate, 2005, Universidad Politécnica de Madrid

DEVASIA, SANTOSH * 2000; Doctorate, 1993, University of California-Santa Barbara

EMERY, ASHLEY F 1961; Doctorate, 1961, University of California-Berkeley

GAO, DAYONG * 2004; Doctorate, 1991, Concordia College

GARBINI, JOSEPH * 1979; Doctorate, 1977, University of Washington-Seattle Campus

KRAMLICH, JOHN C. * 1991; Doctorate, 1980, Washington State University

LIU, JONATHAN * 2014; Doctorate, 2005, Stanford University

MAMIDALA, RAMULU * 1978; Doctorate, 1982, University of Washington-Seattle Campus

NOVOSSELOV, IGOR * 1999; Doctorate, 2006,

University of Washington-Seattle Campus

POLAGYE, BRIAN L * 2002; Doctorate, 2009, University of Washington-Seattle Campus

POSNER, JONATHAN D * 2011; Doctorate, 2001, University of California-Irvine

REINHALL, PER G * 1982; Doctorate, 1982, California Institute of Technology

SEIBEL, ERIC J. * 1988; Doctorate, 1996, University of Washington-Seattle Campus

SHEN, I-YEU * 1993; Doctorate, 1991, University of California-Berkeley

SNIADACKI, NATHAN JOHN * 2007; Doctorate, 2003, University of Maryland-Global Campus

STEELE, KATHERINE M. * 2012; Doctorate, 2012, Stanford University

STORTI, DUANE W * 1983; Doctorate, 1983, Cornell University

WANG, JUNLAN * 2008; Doctorate, 2002, University of Illinois at Urbana-Champaign

Associate Professors

CHEN, XU * 2019; Doctorate, 2013, University of California-Berkeley

CHUNG, JAEHYUN * 2005; Doctorate, 2004, Northwestern University

JONES, JULIA H 1983; Master's, 1991, University of Washington-Seattle Campus

KURT, MEHMET * 2021; Doctorate, 2014, University of Illinois at Urbana-Champaign

MESCHER, ANN M * 1996; Doctorate, 1995, Ohio State University Agricultural Technical Institute

Assistant Professors

DESING, RENEE 2023; Doctorate, 2020, Ohio State University-Main Campus

DIBENEDETTO, MICHELLE * 2019; Doctorate, 2019, Stanford University

FULLER, SAWYER BUCKMINSTER * 2015; Doctorate, 2011, California Institute of Technology

MALAKOOTI, MOHAMMAD H * 2019; Doctorate, 2015, University of Florida

MANOHAR, KRITHIKA * 2013; Doctorate, 2018, University of Washington-Seattle Campus

MEZA, LUCAS R. * 2018; Doctorate, 2016, California Institute of Technology

PALMORE, JOHN A * 2023; Doctorate, 2018, Cornell University

PATTEN, ELIAS * 2020; Doctorate, 2012, University of California-Berkeley

STEWART, ANDREW R 2011; Doctorate, 2012, Princeton University

SUN, SHIJING * 2023; Doctorate, 2017, Trinity College

VASHISTH, ANIRUDDH * 2020; Doctorate, 2018, Pennsylvania State University-Main Campus

Lecturer

MELAKU, TSEWONE GIRMA 2016; Master's, 2022, University of Washington-Seattle Campus

PRABHAKAR, RENUKA 2008

WOOD, DAVID LEVANGER 1983; Doctorate, 2008,
University of Washington-Seattle Campus

College of the Environment

Aquatic and Fishery Sciences

Professors

ANDERSON, CHRISTOPHER M. * 2012; Doctorate, 2001, California Institute of Technology
BRANCH, TREVOR * 2000; Doctorate, 2004, University of Washington-Seattle Campus
ESSINGTON, TIMOTHY E. * 2003; Doctorate, 1999, University of Wisconsin-Madison
GARZA, COREY * 2022; Doctorate, 2001, University of California-Santa Barbara
HAUSER, LORENZ * 2002; Doctorate, 1996, University of Wales
HILBORN, RAY * 1987; Doctorate, 1974, University of British Columbia
HORNE, JOHN K. * 1999; Doctorate, 1995, Memorial University of Newfoundland
LAIDRE, KRISTIN L. * 1997; Doctorate, 2003, University of Washington-Seattle Campus
NAISH, KERRY-ANN * 2000; Doctorate, 1993, University of Wales
OLDEN, JULIAN D. * 2006; Doctorate, 2004, Colorado State University
PARRISH, JULIA * 1990; Doctorate, 1988, Duke University
PUNT, ANDRE * 1992; Doctorate, 1991, University of Cape Town
ROBERTS, STEVEN * 2006; Doctorate, 2002, University of Notre Dame
SCHINDLER, DANIEL E. * 1997; Doctorate, 1995, University of Wisconsin-Madison
YOUNG, GRAHAM * 2004; Doctorate, 1980, University of Sheffield

Associate Professors

CONVERSE, SARAH J * 2017; Doctorate, 2005, Colorado State University
GUZMAN JIMENEZ, JOSE M * 2015; Doctorate, 2010, Universidad de Cádiz
HOLTGRIEVE, GORDON W. * 2003; Doctorate, 2009, University of Washington-Seattle Campus
MCDONALD, PATRICK S. * 1998; Doctorate, 2006, University of Washington-Seattle Campus
PADILLA GAMINO, JACQUELINE * 2016; Doctorate,

2011, University of Hawaii
SCHEUERELL, MARK D. * 1997; Doctorate, 2002, University of Washington-Seattle Campus
TORNABENE, LUKE M. * 2016; Doctorate, 2014, Texas A & M University-Corpus Christi
WONHAM, MARJORIE 2023; Doctorate, 2001, University of Washington-Seattle Campus
WOOD, CHELSEA L. * 2016; Doctorate, 2013, Stanford University

Assistant Professors

BERDAHL, ANDREW * 2017; Doctorate, 2014, Princeton University
BRAUN, CAMRIN 2018; Doctorate, 2018, Massachusetts Institute of Technology
GEPHART, JESSICA ANN 2024; Doctorate, 2016, University of Virginia-Main Campus
NEL, PETRONELLA 2023; Doctorate, 2002, University of Cape Town
VAN CISE, AMY * 2022; Doctorate, 2017, University of California-San Diego

Lecturers

ANDERSON, ERIC MARK 2017
BILLO, TIMOTHY 2001; Doctorate, 2011, University of Washington-Seattle Campus
CLARDY, TODD 2019
DENNY, MARK 2024; Doctorate, 1979, University of British Columbia
DOMENICI, PAOLO 2017
DWYER, TIMOTHY R 2017
EDSINGER, ERIC 2023; Doctorate, 2007, Utrecht University
FRESHWATER, DAVID W 2018; Doctorate, 1993, University of North Carolina at Chapel Hill
GILES, DEBORAH ANN 2009
JENSEN, GREGORY 1983; Doctorate, 1990, University of Washington-Seattle Campus
JOHANSEN, JACOB 2017; Doctorate, 2012, James Cook University
MARQUEZ, ISRAEL 2023
SCHERBA JR, STEPHEN 2012; Doctorate, 1978, University of Washington-Seattle Campus
TYLER, WILLIAM BRECK 2004; Master's, 1991, University of California-Santa Cruz
VARNEY, REBECCA 2023
WENG, YEN-CHU 2013; Doctorate, 2011, University of Wisconsin-Madison

Professors

BATTISTI, DAVID S * 1983; Doctorate, 1988, University of Washington-Seattle Campus
BITZ, CECILIA * 1988; Doctorate, 1997, University of

Washington-Seattle Campus

CHEN, SHUYI * 2001; Doctorate, 1990, Pennsylvania State University-Main Campus
 DURRAN, DALE R * 1987; Doctorate, 1981, Massachusetts Institute of Technology
 FU, QIANG * 2000; Doctorate, 1991, University of Utah
 HAKIM, GREGORY J * 1999; Doctorate, 1997, SUNY at Albany
 HARTMANN, DENNIS L * 1977; Doctorate, 1975, Princeton University
 JAEGLE, LYATT * 2000; Doctorate, 1996, California Institute of Technology
 MARCHAND, ROGER T * 2007; Doctorate, 1997, Virginia Polytechnic Institute and State University
 MASS, CLIFFORD F * 1981; Doctorate, 1978, University of Washington-Seattle Campus
 MC MURDIE, LYNN A * 1982; Doctorate, 1989, University of Washington-Seattle Campus
 SUESS, BECKY ALEXANDER * 2004; Doctorate, 2002, University of California-San Diego
 SWANN, ABIGAIL * 2012; Doctorate, 2010, University of California-Berkeley
 THORNTON, JOEL A. * 2004; Doctorate, 2002, University of California-Berkeley
 WOOD, ROBERT * 2001; Doctorate, 1997, University of Manchester

Associate Professors

ARMOUR, KYLE C. * 2004; Doctorate, 2012, University of Washington-Seattle Campus
 BLANCHARD, EDWARD * 2007; Doctorate, 2013, University of Washington-Seattle Campus
 BLOSSEY, PETER * 2000; Doctorate, 1999, Cornell University
 FRIERSON, DARGAN M * 2007; Doctorate, 2005, Princeton University

Assistant Professors

ANDERSON-FREY, ALEXANDRA * 2019; Doctorate, 2017, Pennsylvania State University-Main Campus
 TURNER, ALEXANDER JAY * 2020; Doctorate, 2017, Harvard University

Lecturers

ABRAMS, SHANNON 1992; Bachelor's, University of Washington-Seattle Campus
 HUYBERS, KATHLEEN MARIE 2018; Doctorate, 2014, University of Washington-Seattle Campus
 TWEDT, JUDY R 2012; Doctorate, 2023, University of Washington-Seattle Campus
 WARNER, MICHAEL DAVID 2006; Doctorate, 2014, University of Washington-Seattle Campus

Earth and Space Sciences

Professors

BUICK, ROGER * 2001; Doctorate, 1986, University of Western Australia
 CATLING, DAVID C. * 2001; Doctorate, 1994, University of Oxford
 HUNTINGTON, KATHARINE W * 2008; Doctorate, 2006, Massachusetts Institute of Technology
 MONTGOMERY, DAVID R * 1991; Doctorate, 1991, University of California-Berkeley
 RICHARDS, MARK ALAN 2018
 ROE, GERARD H * 1999; Doctorate, 1999, Massachusetts Institute of Technology
 SCHMIDT, DAVID A * 2012; Doctorate, 2002, University of California-Berkeley
 STEIG, ERIC J * 1989; Doctorate, 1996, University of Washington-Seattle Campus
 SWANSON, TERRY W * 1988; Doctorate, 1994, University of Washington-Seattle Campus
 TENG, FANGZHEN * 2012; Doctorate, 2005, University of Maryland-Global Campus
 TOBIN, HAROLD JAMES * 2018; Doctorate, 1995, University of California-Santa Cruz
 TROOST, KATHY G. * 1996; Doctorate, 2017, University of Washington-Seattle Campus
 WINGLEE, ROBERT M 1991; Doctorate, 1984, University of Sydney

Associate Professors

ABRAMSON, EVAN H. 1988; Doctorate, 1985, Massachusetts Institute of Technology
 CHRISTIANSON, KNUT * 2014; Doctorate, 2012, Pennsylvania State University-College of Medicine
 CRIDER, JULIET G * 1991; Doctorate, 1998, Stanford University
 DUVALL, ALISON R * 2012; Doctorate, 2011, University of Michigan-Ann Arbor
 FUDGE, TYLER JEFFREY * 2007; Doctorate, 2013, University of Washington-Seattle Campus
 GORMAN-LEWIS, DREW J * 2008; Doctorate, 2006, University of Notre Dame
 KOUTNIK, MICHELLE R * 2002; Doctorate, 2009, University of Washington-Seattle Campus
 MCCARTHY, MICHAEL P * 1978; Doctorate, 1988, University of Washington-Seattle Campus
 NESBITT, ELIZABETH A. 1993; Doctorate, 1982, University of California-Berkeley
 SLETTEN, RONALD S 1983; Doctorate, 1995, University of Washington-Seattle Campus
 STONE, JOHN O.H. * 1998; Doctorate, 1986, University of Cambridge
 WALTERS, STEVEN * 2006; Doctorate, 2002, University of Maryland-Global Campus

Assistant Professors

CANTINE, MARJORIE * 2022; Doctorate, 2021, Massachusetts Institute of Technology
 CONDIT, CAILEY * 2018; Doctorate, 2017, University of Colorado at Boulder

CROWELL, BRENDAN W * 2013; Doctorate, 2013, University of California-San Diego
 DENOLLE, MARINE * 2020; Doctorate, 2014, Stanford University
 JOURNAUX, BAPTISTE * 2016; Doctorate, 2013, École Normale Supérieure de Lyon
 KRISSANSEN-TOTTON, JOSHUA * 2013; Doctorate, 2019, University of Washington-Seattle Campus
 LIPOVSKY, BRADLEY PAUL * 2020; Doctorate, 2017, Stanford University
 MEHRA, AKSHAY * 2022; Doctorate, 2019, Princeton University
 MUTH, MICHELLE * 2022; Doctorate, 2021, University of Oregon
 WOOD, STEPHEN E. 1998

Lecturers

MARTIN, RUTH A. 2004
 REININK-SMITH, LINDA 2018; Doctorate, University of Alaska Fairbanks
 SCHOEPPER, SHANE D 2009; Doctorate, 2014, University of Washington-Seattle Campus
 VONDERAHE, MATTHEW 2002

Program on the Environment

Professors

ALLBRITTON, NANCY LYNN * 2019; Medical Doctorate, 1985, Johns Hopkins University

AVERKIOU, MICHALAKIS A * 1994; Doctorate, 1994, The University of Texas

BRYERS, JAMES D * 2004; Doctorate, 1980, Rice University

DAGGETT, VALERIE D. * 1993; Doctorate, 1990, University of California-San Francisco

FOLCH, ALBERT * 2000; Doctorate, 1994, Universitat de Barcelona

GAO, XIAOHU * 2005; Doctorate, 2004, Indiana University-Bloomington

GIACHELLI, CECILIA * 1982; Doctorate, 1987, University of Washington-Seattle Campus

IMOUKHUEDE, PRINCESS * 2022; Doctorate, 2008, California Institute of Technology

NEILS, CHRISTOPHER * 2001; Doctorate, 2000, The University of Texas

O'DONNELL, MATTHEW * 2006; Doctorate, 1976, University of Notre Dame

POLLACK, GERALD H * 1968; Doctorate, 1968, University of Pennsylvania

PUN, SUZIE H * 2003; Doctorate, 2000, California Institute of Technology

RATNER, BUDDY D * 1972; Doctorate, 1972, American Institute

RATNER, DANIEL M. * 1993; Doctorate, 2004, Massachusetts Institute of Technology

REGNIER, MICHAEL * 1995; Doctorate, 1991, University of Southern California

SAKIYAMA-ELBERT, SHELLY * 2022

SANDERS, JOAN ELIZABETH * 1985; Doctorate, 1991, University of Washington-Seattle Campus

SAURO, HERBERT M * 2007; Doctorate, 1986, University of Oxford

SIMS, CHRISTOPHER E 2020; Medical Doctorate, 1984, Johns Hopkins University

STAYTON, PATRICK * 1992; Doctorate, 1989,

University of Illinois at Urbana-Champaign
 THOMAS, WENDY * 1998; Doctorate, 2003,
 University of Washington-Seattle Campus
 WANG, RUIKANG * 2010; Doctorate, 1995, University
 of Glasgow
 WOODROW, KIM A. * 2009; Doctorate, 2006,
 Stanford University
 YAGER, PAUL * 1987; Doctorate, 1980, University of
 Oregon

Associate Professors

CHUDLER, ERIC H * 1982; Doctorate, 1985, University
 of Washington-Seattle Campus
 CONVERTINE, ANTHONY J 2006; Doctorate, 2006,
 University of Southern Mississippi
 GAMBLE, LARA J. * 1991; Doctorate, 1996, University
 of Washington-Seattle Campus
 KIM, DEOK-HO 2011
 KUEH, HAO YUAN * 2016; Doctorate, 2008, Harvard
 University
 LUTZ, BARRY R. * 1998; Doctorate, 2003, University
 of Washington-Seattle Campus
 PELIVANOV, IVAN * 2010; Doctorate, 2000, Moscow
 State Technical University
 SCATENA, MARTA * 1996; Doctorate, 1992,
 Università degli Studi di Padova
 SELLERS, DREW L. * 2002; Doctorate, 2001, Oregon
 State University
 STEVENS, KELLY R. * 2003; Doctorate, 2008,
 University of Washington-Seattle Campus

WINN, JANE K * 2002; Doctorate, 1987, Harvard University

Associate Professors

BOSCH, ANNA B. * 2007; Juris Doctor, 1999, Boston University
BUTLER, MIREILLE * 2020; Juris Doctor, 1996, Washington University in St Louis
CHAZARO, ANGELICA * 2013; Doctorate, 2006, Columbia University
COBB, THOMAS DILLON 2004; Doctorate, 2001, University of Minnesota-Duluth
HALASZ, BENJAMIN S * 2013; Doctorate, 2002, Harvard University
OLAZCON MOZO, GEORGINA 2022
ORTIZ-VELEZ, RAMON E. * 2021; Juris Doctor, 2006, Seattle University
PRICE, TERRY J. * 1998; Juris Doctor, 2021, University of Washington-Seattle Campus
RAIGRODSKI, DANA * 2004; Doctorate, 2002, Tulane University of Louisiana
SANCKEN, LAUREN ELIZABETH * 2008; Doctorate, 2010, University of Washington-Seattle Campus
SANFORD, CARROLL S 2014; Juris Doctor, 2005, DePaul University
SANFORD, SALLIE T * 2002; Doctorate, 1991, University of California-Los Angeles
TOWNSEND, MICHAEL E. * 1992; Doctorate, 1989, Yale University
WALSH, WALTER J * 1996; Master's, 1989, Yale University
WILDERMUTH, TODD * 2011; Doctorate, 2008, University of Illinois at Urbana-Champaign
ZANG, DONGSHENG * 2005; Doctorate, 2004, Harvard University
ZIFF, DAVID J * 2012; Doctorate, 2005, Columbia University

Assistant Professors

BAILEY, WILLIAM S * 1993; Doctorate, 1974, Northwestern University
CELEBREZZE, JACLYN * 2022; Juris Doctor, 2009, Ohio State University-Main Campus
CHIN, JEREMIAH 2024; Juris Doctor, 2017, Arizona State University
EVANS, DANIELI 2024; Juris Doctor, 2012, Yale University
GARAVITO, DAVID * 2023; Juris Doctor, 2020, Cornell University
GARDNER II, TREVOR G 2016; Doctorate, 2014, University of California-Berkeley
LARA, STACEY 1990; Juris Doctor, 2001, University of Washington-Seattle Campus
OWENS, DAVID B. 2021; Juris Doctor, 2010, Stanford University
STEPHEN, AMANDA K * 2022

Lecturers

ALT, JUSTIN D 2016
BEHNKE, LANCE WYRILL 2006; Doctorate, 1977, Georgetown University
BLANCHARD, TIMOTHY P 2017
DE SA E SILVA, MARCO 2016
EISENBERG, ADAM 1990; Juris Doctor, 1992, University of Washington-Seattle Campus
LEVEZU, ALICIA 2014
MANNING, MARGARET M 2017
MORENO, PETER SHAWN 2005
SHAW, MELISSA A 2014
SPITZER, HUGH D * 1986; Juris Doctor, 1974, University of Washington-Seattle Campus
WEST, JESSICA L 2016
WOOL, JEFFREY A. 1994

School of Medicine

Anesthesiology

Professors

ANDERSON, CORRIE 2001; Master's, 1985, Boston University
BARRINGTON, MICHAEL JOHN 2024
BHAGWANJEE, SATISH 2009; Medical Doctorate, 1983, University of South Africa
BHANANKER, SANJAY M. 2002; Medical Doctorate, 1992, Not Provided
BOLLAG, LAURENT A. 2008; Medical Doctorate, 1999, Universität Zürich
BOSENBERG, ADRIAN T 1983; Medical Doctorate, 1973, University of Cape Town
BOWDLE, T. ANDREW 1981; Medical Doctorate, 1980, University of Washington-Seattle Campus
BRUCHAS, MICHAEL R * 2018; Doctorate, 2004, Creighton University
CROWDER, CHARLES M * 1990; Medical Doctorate, 1989, Washington State University
CURATOLO, MICHELE 2013; Medical Doctorate, 1984, Università degli Studi di Messina
DAGAL, ARMAN 2008; Medical Doctorate, 1993, Dokuz Eylul University
DAVIES, JOANNA M. 2001; Medical Doctorate, 1991, University College London
DOMINO, KAREN B. 1986; Medical Doctorate, 1978, University of Michigan-Ann Arbor
FITZGIBBON, DERMOT R. 1992; Medical Doctorate, 1983, University College Dublin National University of Ireland
FLACK, SEAN H. 2004; Medical Doctorate, 1992, University of Cape Town
FUKAZAWA, KYOTA 2014; Medical Doctorate, 1999, Tokyo Medical and Dental University

GEIDUSCHEK, JEREMY M 1983; Medical Doctorate, 1983, Vanderbilt University
 HUNYADY, AGNES I. 2004; Medical Doctorate, 1993, Semmelweis University
 JIMENEZ, NATHALIA * 2002; Medical Doctorate, 1994, Pontificia Universidad Javeriana
 JOFFE, DENISE C 2006; Medical Doctorate, 1986, McGill University
 KASSEBAUM, NICHOLAS J. * 2008; Medical Doctorate, 2007, Vanderbilt University
 KENT, CHRISTOPHER D 2005; Medical Doctorate, 1988, University of Saskatchewan
 KIRSCH, JEFFREY 2022
 LANG, JOHN D 2006; Medical Doctorate, 1988, American University of the Caribbean
 LATHAM, GREGORY J. 2009; Medical Doctorate, 2000, University of Kansas
 LELE, ABHIJIT 2015; Medical Doctorate, 1998, Gujarat University
 LOLAND, VANESSA J 1997; Medical Doctorate, 2002, New York Medical College
 MACKENSEN, GEORG B 2012; Medical Doctorate, 1994, Universität Hamburg
 METZNER, IULIA IRINA 2003; Medical Doctorate, 1986, University of Medicine and Pharmacy Victor Babes Timisoara
 MORGAN, PHILIP G 2008; Medical Doctorate, 1980, University of Colorado Denver
 NANDATE, KOICHIRO 2008; Medical Doctorate, 1992, University of Occupational and Environmental Health
 O'REILLY-SHAH, VIKAS NAVIN 2019; Medical Doctorate, 2007, Vanderbilt University
 PALERMO, TONYA M 2010; Doctorate, 1998, Case Western Reserve University
 PATEL, KUSHANG V 2012; Doctorate, 2004, The University of Texas Medical Branch
 POLANER, DAVID 2019; Medical Doctorate, 1982, Mount Sinai School of Medicine
 RAFTERY, MICHAEL D 2012; Doctorate, 1991, University of California-Berkeley
 RAMPERSAD, SALLY E. 1996; Medical Doctorate, 1986, University of Southampton
 RICHARDS, MICHAEL J. 2003; Medical Doctorate, 1993, University of Southampton
 ROCHE, ANTHONY M 2011; Medical Doctorate, 1993, Stellenbosch University
 ROZET, IRENA 2002; Medical Doctorate, 1985, University of Latvia
 SHARMA, DEEPAK 2007; Medical Doctorate, 2003, University of Rajasthan
 SIVARAJAN, MURALI 1982; Medical Doctorate, 1967, Jawaharlal Nehru University
 SOUTER, KAREN J. 2002; Medical Doctorate, 1985, Queen Mary University of London
 SOUTER, MICHAEL J. 2001; Medical Doctorate, 1984, University of Edinburgh
 STACEY, BRETT R 2014; Medical Doctorate, 1986, University of Michigan-Ann Arbor
 STUBER, GARRET DANIEL * 2018; Doctorate, 2005,

University of North Carolina at Chapel Hill
 Terman, GREGORY W. * 1987; Medical Doctorate, 1987, University of Miami
 TIAN, RONG * 2009; Doctorate, 1992, Aarhus University
 TURK, DENNIS C 1996; Doctorate, 1978, University of Waterloo
 VAVILALA, MONICA S. * 1994; Medical Doctorate, 1991, The University of Texas Health Science Center at Houston
 WALCO, GARY 2009; Doctorate, 1984, Ohio State University Agricultural Technical Institute
 WRIGHT, DAVID R 2011; Medical Doctorate, 1990, University of Southampton

Associate Professors

ADAMS, TREVOR L 2013; Medical Doctorate, 2009, Eastern Virginia Medical School
 AJJAPPA, NAGANAGOWDA GOWDA 2012; Doctorate, 1999, Bangalore University
 BENTOV, ITAY 2007; Medical Doctorate, 1992, Hebrew University of Jerusalem
 BHALLA, PAUL I 2011; Medical Doctorate, 2001, University of Bristol
 DALE, REBECCA C 2012; Medical Doctorate, 2008, Edward Via Virginia College of Osteopathic Medicine
 DELGADO UPEGUI, CARLOS M 2014; Medical Doctorate, 2007, Universidad CES
 DEMBO, GREGORY 2000; Medical Doctorate, 1978, Saint Petersburg State Pavlov Medical University
 DINGES, EMILY 2008; Medical Doctorate, 2007, Oregon Health & Science University
 EISSES, MICHAEL J. 1992; Medical Doctorate, 1995, University of Washington-Seattle Campus
 FRANZ, AMBER MICHELE 2016; Medical Doctorate, 2012, University of North Carolina at Chapel Hill
 GEMMA, CARMELINA 2012; Doctorate, 1999, Università degli Studi di Milano
 GENTRY, KATHERINE 2003; Medical Doctorate, 2006, University of Washington-Seattle Campus

 GRIGG, ELIOT 2007; Medical Doctorate, 2007, George Washington University
 GROENEWALD, CORNELIUS B 2011; Medical Doctorate, 2002, Stellenbosch University
 GUPTA, KAPIL 2023
 HALL, MICHAEL L 2004; Medical Doctorate, 2007, University of Washington-Seattle Campus
 HALLMAN, MATTHEW R 2010; Medical Doctorate, 2005, University of Minnesota-Duluth
 HANSEN, ELIZABETH ERICA 2012; Medical Doctorate, 2012, Washington University in St Louis
 HORIBE, MAYUMI 2007; Medical Doctorate, 1984, Hiroshima University
 HSIEH, VINCENT C. 2010; Medical Doctorate, 2006, University of Pittsburgh-Bradford
 JELACIC, SRDJAN 1997; Medical Doctorate, 2006,

University of Washington-Seattle Campus
 KHANDELWAL, NITA 2010; Medical Doctorate, 2006, Loyola University Chicago
 KIM, JERRY HYUN 2006; Medical Doctorate, 2002, Thomas Jefferson University
 LAW, EMILY F 2012; Doctorate, 2010, University of Maryland-Baltimore
 LEE, ALEX T 2011; Medical Doctorate, 2006, Jefferson College
 LOW, DANIEL K W 2007; Medical Doctorate, 1997, University of Nottingham
 MARTAY, KENNETH 1999; Medical Doctorate, 1987, Universität Freiburg
 MARTIN, LIZABETH D. 2010; Medical Doctorate, 2006, Dartmouth College
 NG, ANN 2024
 NIKRAVAN, SARA 2020; Medical Doctorate, 2006, Texas Tech University
 NISHIO, ISUTA 2004; Medical Doctorate, 1986, Nara Medical University
 OBELCZ, YULIA 2006; Medical Doctorate, 1989, Russian University of Cooperation Far Eastern Branch
 OGANESIAN, ANUSH 1995; Doctorate, 1988, National University of Science and Technology MISIS (Moscow Institute of Steel and Alloys)
 OJO, BUKOLA 2016; Medical Doctorate, 2012, Mount Sinai School of Medicine
 PATAK, LANCE S. 2015; Medical Doctorate, 2008, University of California-Los Angeles
 PEPERZAK, KATHERIN A 2014; Medical Doctorate, 2009, University of Pittsburgh-Bradford
 PITTAWAY, ANDREW J 2002; Medical Doctorate, 1991, University of Nottingham
 RABBITTS, JENNIFER A 2011; Medical Doctorate, 2002, Stellenbosch University
 RAMAIAH, RAMESH 2006; Medical Doctorate, 1990, Jawaharlal Nehru University
 ROSS, FAITH E 2014; Medical Doctorate, 2010, University of Connecticut
 RUBENS, DANIEL D 1999; Medical Doctorate, 1992, University of New South Wales
 SARAH, GABRIEL 2023
 SHEINBERG, ROSANNE 2022
 SHEU, RICHARD D 2015; Medical Doctorate, 2010, New York Medical College
 SLADE, IAN 2003; Medical Doctorate, 2008, University of Washington-Seattle Campus
 SONG, PINGPING 2019
 SUHRE, WENDY M 2014; Medical Doctorate, 2009, University of Arizona
 SUNDER, RANI A 2015
 SUNSHINE, JACOB EUGENE 2006; Medical Doctorate, 2012, University of Washington-Seattle Campus
 THAM, SEE WAN 2009; Medical Doctorate, 2001, University of Sydney
 THEARD, MARIE ANGELE 2022; Medical Doctorate, 1989, University of Illinois at Chicago
 THILEN, STEPHAN R 2008; Medical Doctorate, 1981, Karolinska Institute

VAN CLEVE, WILLIAM C. 2006; Medical Doctorate, 2006, University of Chicago
 VATER, YOURI L. 1999; Medical Doctorate, 1977, Riga Medicine College
 VITIN, ALEXANDER A. 2003; Medical Doctorate, 1981, Kharkov State Medical University
 WANG, WANG * 2010; Doctorate, 2002, Peking University (北京大学)
 WEISS, KAREN E 2016; Doctorate, 2009, University of Maryland-Baltimore
 WU, JIANG 2015; Medical Doctorate, 1997, Jilin University (吉林大学)

Assistant Professors

ACCARDI-RAVID, MICHELLE C 2014; Doctorate, 2015, SUNY at Binghamton
 AICHHOLZ, PUDKRONG 2017; Medical Doctorate, 2010, Chulalongkorn University
 ALINANI, ANWAR UL HAQUE 2020
 AL-JUMAH, RANA 2024
 ANWAR, ANJUM * 2019; Medical Doctorate, 2002, King Edward Medical University
 ARORA, VIVEK 2015; Medical Doctorate, 2001, Guru Govind Singh Medical College
 BARNES, CHRISTOPHER 2010; Medical Doctorate, 2013, University of Washington-Seattle Campus
 BEHRENS, MARCUS AARON 2018
 BEN-ARI, ALON Y 2011; Medical Doctorate, 2000, Technion Israel Institute of Technology
 BHALLA, ARJUN 2020; Doctorate, 2020, University of Colorado Denver
 BROWN, SARAH E. 2018; Medical Doctorate, 2014, University of Michigan-Ann Arbor

Professors

DUBER, HERBERT CHAD 2011; Medical Doctorate,
2005, New York University
GALLAHUE, FIONA E 2008; Medical Doctorate, 1997,
Washington University in St Louis
GREENBERGER, SARAH MARCIA 2024; Medical
Doctorate, 2005, Case Western Reserve University
HESS, JEREMY JOHNSON * 2015; Medical Doctorate,
2003, Emory University
ILGEN, JONATHAN SETH 2010; Medical Doctorate,
2004, University of Southern California
SHAH, SACHITA P 2004; Medical Doctorate, 2004,
University of Washington-Seattle Campus
STROTE, JARED 2002; Medical Doctorate, 1999,
Harvard University
TOWNES, DAVID A. * 2001; Medical Doctorate, 1993,
University of Massachusetts
WHITE, NATHAN J * 2010; Medical Doctorate, 2003,
Wayne State University

Associate Professors

BACKLUND, BRANDON H 1992; Medical Doctorate,
2000, University of Iowa
BURESH, CHRISTOPHER THOMAS 2020; Medical
Doctorate, 2001, University of Iowa
FRANZEN, DOUGLAS 2013; Medical Doctorate, 2001,
University of Michigan-Ann Arbor
HALL, MICHAEL K 2015; Medical Doctorate, 2009,
Yeshiva University
JAUREGUI, JOSHUA 2013; Medical Doctorate, 2009,
Loma Linda University
JOHNSON, NICHOLAS J 2014; Medical Doctorate,
2010, University of California-San Francisco
KWOK, HEEMUN 2011; Medical Doctorate, 1999,
University of California-San Francisco
LATIMER, ANDREW 2005; Medical Doctorate, 2012,
University of Michigan-Ann Arbor
LU, DAVE W 2019; Medical Doctorate, 2006,
University of Pennsylvania
MITCHELL, STEVEN H. 1984; Medical Doctorate,
2002, University of Washington-Seattle Campus
MORRIS, STEPHEN C 2000; Medical Doctorate, 2005,
University of Washington-Seattle Campus
O'LAUGHLIN, KELLI NICOLE MCCARTAN * 2019;
Medical Doctorate, 2003, Oregon Health & Science
University
ROSENMAN, ELIZABETH 2011; Medical Doctorate,
2008, University of Michigan-Ann Arbor
SABBATINI, AMBER * 2014; Medical Doctorate, 2009,
Loma Linda University
VALENTO, BETTY CHEN 2013; Medical Doctorate,
2007, University of Connecticut
VALENTO, MATTHEW J 2012; Medical Doctorate,

2005, New York University
 VRABLIK, MARIE 2014; Medical Doctorate, 2009,
 University of Missouri-St Louis
 WHITESIDE, LAUREN K 2012; Medical Doctorate,
 2006, University of Illinois at Chicago
 YOUNG, SCOTT EDWIN 2019; Medical Doctorate,
 2003, University of North Texas Health Science
 Center

Assistant Professors

AKHAVAN, ARVIN 2015; Medical Doctorate, 2015,
 Northwestern University
 AMICK, ASHLEY 2019; Medical Doctorate, 2012,
 University of Michigan-Ann Arbor
 BADULAK, JENELLE H 2016; Medical Doctorate, 2012,
 University of Colorado
 CHIPMAN, ANNE 2014; Medical Doctorate, 2010,
 University of California-San Francisco
 KESSLER, ROSS A. 2019; Medical Doctorate, 2009,
 University of Chicago
 MA, ZHENG BEN 2024; Medical Doctorate, 2014,
 Baylor College of Medicine
 MCCOY, ANDREW M 2014; Medical Doctorate, 2011,
 Case Western Reserve University
 MURPHY, DAVID LEE 2015; Medical Doctorate, 2015,
 University of Colorado
 PAWA, SAPNA 2019
 SCHREPEL, CAITLIN P 2015; Doctorate, 2015, Albert
 Einstein College of Medicine
 SRINIVASAN, VASISHT 2020; Medical Doctorate,
 2009, University of Rochester
 ST. JOHN, ALEXANDER E. 2013; Medical Doctorate,
 2010, University of Arizona
 WATASE, TAKETO 2012; Medical Doctorate, 2003,
 Nagoya University
 WATSJOLD, BJORN K 2013; Medical Doctorate, 2013,
 Boston University
 WHEAT, STEFAN 2022; Medical Doctorate, 2018,
 University of Vermont

Family Medicine

Professors

BENNETT, IAN M * 2015; Medical Doctorate, 1998,
 Jefferson College
 CAWSE-LUCAS, JEANNE M. 2010; Medical Doctorate,
 2006, University of Massachusetts
 CHEN, FREDERICK 1996; Medical Doctorate, 1996,
 University of California-San Francisco
 COLE, ALLISON M * 2010; Medical Doctorate, 2002,
 University of Iowa
 DREZNER, JONATHAN 1999; Medical Doctorate,
 1996, University of California-Los Angeles
 EVANS, DAVID V 2012; Medical Doctorate, 1993,
 University of Pittsburgh-Bradford
 FAUSTO, JAMES 2015; Medical Doctorate, 2006,

Rutgers University-Newark
 FROGNER, BIANCA K * 2014; Doctorate, 2008, Johns
 Hopkins University
 GODFREY, EMILY M 2012; Medical Doctorate, 1997,
 Medical College of Wisconsin
 HARMON, KIMBERLY G 1988; Medical Doctorate,
 1993, Indiana University-Bloomington
 JAMES, PAUL A 2017; Medical Doctorate, 1984,
 University of North Carolina
 KEEN, MISBAH 2006; Medical Doctorate, 1993, Not
 Provided
 KOST, AMANDA 2005; Medical Doctorate, 2005,
 SUNY College at Buffalo
 O'KANE, JOHN 1993; Medical Doctorate, 1993,
 University of Vermont
 RAO, ASHWIN L. 2003; Medical Doctorate, 2003,
 Case Western Reserve University
 STEPHENS, KARI A 1993; Doctorate, 2008, University
 of Washington-Seattle Campus
 THOMPSON, MATTHEW J * 1999; Medical Doctorate,
 1989, University of Glasgow
 WALKER, LISA K 2023; Master's, 2002, University of
 Nebraska Medical Center

Associate Professors

AL ACHKAR, MORHAF 2017; Medical Doctorate,
 2006, University of Aleppo
 BEEBOUT, CARRIE 2024; Doctorate, 2019, California
 State University
 BENDER, MELISSA A 2012; Medical Doctorate, 2007,
 Indiana University-Bloomington
 COLLINS, KIMBERLY 2008; Medical Doctorate, 2008,
 Harvard University
 DE ROSA, MICHAEL J 2021
 FISCHER, JOSHUA LEE 2022; Medical Doctorate,
 2011, University of Iowa
 GRAVES, JANESEA M. * 2024; Doctorate, 2011,
 University of Washington-Seattle Campus
 HAHN, PATRICIA L 2013; Master's, 1995, Whitworth
 University
 KONG, NATALIE KEHAU 2020; Medical Doctorate,
 2010, University of Hawaii
 KUSSMAN, ANDREA LYNN 2023; Medical Doctorate,
 2012, University of Michigan-Ann Arbor
 LINDO, EDWIN G 2016; Juris Doctor, 2012, University
 of Washington-Seattle Campus
 MAJD, IMAN 2009; Medical Doctorate, 1996,
 University of Tehran
 MALMBERG, ERIK DAVIN 2023; Doctorate, 2008, The
 University of Texas at Austin
 NAGASAWA, PAMELA * 2000; Doctorate, 2010,
 University of Washington-Seattle Campus
 NAIDU, AMEE S. 2007; Master's, 1999, Midwestern
 University
 PATTERSON, DAVIS 1991; Doctorate, 2005, University
 of Washington-Seattle Campus
 PENTIN, PAMELA L. 2007; Medical Doctorate, 1996,
 Jefferson College
 RAETZ, JAQUELINE 2001; Medical Doctorate, 2001,

Duke University

SABINO, TASHA E 2023; Master's, 2008, University of Utah

SAIRENJI, TOMOKO 2015; Medical Doctorate, 2007, Okayama University

SCOTT, TERRY B 1983; Master's, 2011, University of Washington-Seattle Campus

SERPINAS, SARAH L 2014; Bachelor's, 2010,

University of Washington-Seattle Campus

SHERMAN, PATRICK A 2020

SHIH, GRACE 2013; Medical Doctorate, 2003, University of Florida

SIEBERT, DAVID 2013; Medical Doctorate, 2013, University of Chicago

SMITH, DARRON T 2023; Doctorate, 2010, University of Utah

SMITH, DONALD J 2014; Master's, 2014, University of Washington-Seattle Campus

STEWART, BETTY L. 1985; Master's, 2018, University of Nebraska Medical Center

STURGES, DAYTHEON D. 2019; Doctorate, 2021, Texas Woman's University

SYMINGTON, SUSAN L 2015; Master's, 1999, University of Nebraska at Omaha

VADER, KIRA S 2005; Master's, 2002, Duke University

WEIDNER, AMANDA K. HARRIS 2010; Master's, 2011, University of Washington-Seattle Campus

ZHANG, YING 2011; Medical Doctorate, 2011, East Carolina University

Assistant Professors

AUSTIN, ASHLEY VICTORIA 2018; Medical Doctorate, 2014, University of Georgia

BATTS, AVERY 2018; Doctorate, 2013, Northeastern University

BERNARD, KARI S 2014; Master's, 2004, University of Arizona

BESTER, VANESSA S 2012; Master's, 2003, University of Florida

BURK, MARIA O 2021; Master's, 2017, University of Texas Southwestern Medical Center at Dallas

CASEY, SHANNON M 2020; Master's, 2017, University of St Francis

ERICKSON, JENNIFER M 2016; Bachelor's, 2009, University of Washington-Seattle Campus

EVANS, DANIEL R 2016; Doctorate, 2014, University of Kentucky

FAHY, KATHERINE E 2021; Medical Doctorate, 2017, University of Florida

FARAH, SAMIRA 2018; Medical Doctorate, 2013, University of Washington-Seattle Campus

GAUTHIER, GAEL 2023; Doctorate, 2015, Baylor University

GENTILE, NICOLE 2016; Medical Doctorate, 2016, Tulane University of Louisiana

GREEN, KELLY A 2017; Master's, 2016, Stony Brook University

GUJJARLAPUDI, GEETHA 2023; Master's, 2011, Washington State University

GUTIERREZ, BRIANNA 2016; Master's, 2012, South University

HARRIS, BRENDA GAYLE 2024; Doctorate, 2006, University of Utah

HAWKINS, MARC ANTONIO 2013; Master's, 2000, University of Nebraska at Omaha

IMLACH, HOLLY A 2017; Medical Doctorate, 2002, University of Washington-Seattle Campus

KARR, MARGOT 2021; Master's, 2015, Western University of Health Sciences

KEMPE, CHRISTINE 2013; Master's, 2001, Brigham Young University

LAUFENBERG, MAGGIE R 2019; Master's, 2008, Arcadia University

LINDLEY, ALEXA R 2018; Medical Doctorate, 2012, University of Michigan-Ann Arbor

MABOTUWANA, VENUKA W 2022; Doctorate, 2010, University of Latvia

NELSON, JOSEPH J 2015; Medical Doctorate, 2019, University of Washington-Seattle Campus

NOEL, LUNA M 2021

ORCHARD, THEO RAY 2018; Master's, 2013, Duke University

ORLOWSKI, KRISSA JO 2022; Master's, 2012, University of Washington-Seattle Campus

OVERSTREET, FREDERICA C 1992; Medical Doctorate, 1996, University of Washington-Seattle Campus

PELTO, HENRY FRANCIS III 2009; Medical Doctorate, 2009, University of Missouri-St Louis

RAJAN, ADHITHI 2024; Doctorate, 2019, The Wright Institute

RIORDAN, BRENDAN M. 2016; Master's, 2013, Hofstra University

ROBERTSON, DALE 1994; Master's, 2014, University of Washington-Seattle Campus

SHAH, MANSI R 2021; Doctorate, 2016, Case Western Reserve University

SHIMKIN, GENYA N * 2012; Master's, 2013, University of Washington-Seattle Campus

SMITH, MICHAEL B 2014; Medical Doctorate, 2012, A T Still University of Health Sciences

TONG, SEBASTIAN T 2022; Medical Doctorate, 2012, Boston University

VIDE, KELLY R 2020; Master's, 2014, George Washington University

VON STIEGLITZ, JUTTA F 2023; Doctorate, 1995, Universität Hamburg

WEAVER, BRANDON S 2022; Master's, 2011, University of Nebraska Medical Center

YAMAMOTO, MARI E 2021; Doctorate, 2016, Seattle Pacific University

YUE, BETTY B 2022; Master's, 2017, Samuel Merritt University

Senior Lecturers

DAVIS, ARDIS 1982; Master's, 1979, University of Washington-Seattle Campus

HALPERIN, ABIGAIL CAROL 1990; Medical Doctorate, 1983, Yeshiva University

Lecturers

ADELMAN, TRAVIS B 2021; Master's, 2007, Loma Linda University
 ALBRIGHT, BRIDGET B 2023
 ANDERSON, JAMES E. 2004; Master's, 2013, The University of Texas
 BORDERS, ROSA M. 2001; Master's, 1987, American University of Health Sciences
 BUTLER, JESSICA C 2018; Master's, 2014, University of Washington-Seattle Campus
 BYRNE, THOMAS J 2020; Master's, 1983, Brigham Young University
 CHA, HANA 2017; Master's, 2007, Wichita State University
 CHASTAIN, HANNA 2021
 CHERKIN, DANIEL C 1978; Doctorate, 1978, University of Washington-Seattle Campus
 COOPER, SCOTT A 2019
 COPPS, KATIE M 2018
 DIAZ, LINDSEY 2022
 ENDSLEY, MEGHAN J 2021
 FARTHING, BRYAN CHRISTOPHER 2018
 FAYETTE, JENNIFER 2020
 FUKUJI, JANNELLE MARIE 2023
 GARZA, EDUARDO JR 2004
 GLICK, DEANA KATHERINE 2024; Master's, 2013, University of Alaska Anchorage
 GRIMM, PATRICK J 2016; Master's, 1998, University of Nebraska Medical Center
 HACKENBRUCH, GREGORY S 2017; Bachelor's, 2009, University of Alaska Anchorage
 HAVERKAMP, KENNETH 1996; Bachelor's, 1990, Whitman College
 HOOK, TARA R 2018; Master's, Saint Louis University-Main Campus
 HOWZE, STEVEN MATTHEW 2021; Master's, 2021, University of Washington-Seattle Campus
 HUYNH, CONSTANCE D 1999; Master's, 2012, University of Washington-Seattle Campus
 JAIN, ANJU 2014; Master's, 1997, Western Washington University
 JANORSCHKE, MEGAN 2023; Master's, 2022, University of Washington-Seattle Campus
 KELLY, KAIDEN G 2020
 LOWE, TERESA MARIE FLORES 2022
 LUEDKE, ALLISON 2023; Master's, 2023, University of Washington-Seattle Campus
 MAHDAVISAEDI, MARYAM 2023; Doctorate, 2008, Islamic Azad University, Tehran Medical Sciences
 MARTINEZ, GREG T 2023; Master's, University of St Francis
 MCCROSKEY, JEFFREY J 2017; Master's, 2007, University of Nebraska Medical Center
 MCINTYRE, SUSAN R 2010; Doctorate, 2001, Gonzaga University
 MILLER, KELSEY 2021
 OLSON, TIMOTHY C 2020; Master's, 2015, Rosalind Franklin University of Medicine and Science
 PATTON, SARAH B. W. 2019

PIERCE, BRIAN D 2018; Bachelor's, 2017, University of Washington-Seattle Campus
 RAGOSTA, RACHEL E 2017
 ROBINS, RACHAEL ELIZABETH 2024; Master's, 2018, University of Washington-Seattle Campus
 RODGERS, CARI R 2020; Diploma, 2010, University of Washington-Seattle Campus
 SIEGEL, MALINDA S 2007; Doctorate, 1989, University of Baltimore
 SMITH, COLLEEN E 2016; Master's, 2016, Touro College
 SMITH, RYAN L 2021
 SOLDERS, CODY ROBERT 2024; Master's, 2018, University of Washington-Seattle Campus
 VIETH, PATRICIA 2022
 WETZEL, LEE A 2023
 WHIPPLE, KATHERINE J 2016; Medical Doctorate, 1998, University of Minnesota-Duluth
 WHITAKER, STACEY L 2021
 WIEGAND, NEIL 2017; Master's, 2016, University of Washington-Seattle Campus
 WIESE, TRACEY L 2020

 GRENINGER, ALEX * 2015; Medical Doctorate, 2015,
 University of California-San Francisco
 HESS, JOHN R * 2012; Medical Doctorate, 1972,
 University of Washington-Seattle Campus
 HOOFNAGLE, ANDREW N * 2004; Medical Doctorate,
 2004, University of Colorado Denver
 HORWITZ, MARSHALL S * 1983; Medical Doctorate,
 1990, University of Washington-Seattle Campus
 HUANG, ERIC 2018; Medical Doctorate, 2005, Albany
 Medical College
 JEROME, KEITH R * 1993; Medical Doctorate, 1993,
 Duke University
 KAPUR, RAJ P. * 1988; Medical Doctorate, 1988,
 University of Southern California
 KEENE, CHRISTOPHER D * 2005; Medical Doctorate,
 2005, University of Minnesota-Duluth
 LIU, YAJUAN 1995; Doctorate, 1995, New York
 University
 LOCKWOOD, CHRISTINA M * 2014; Doctorate, 2007,
 University of Wisconsin-Madison
 LOEB, KEITH 1983; Medical Doctorate, 1995, Medical
 College of Wisconsin
 MONNAT, RAYMOND J * 1982; Medical Doctorate,
 1976, University of Chicago
 MORISHIMA, CHIHIRO * 1991; Medical Doctorate,
 1988, Washington State University
 MURPHY, SEAN C * 2008; Medical Doctorate, 2008,
 Northwestern University
 MURRY, CHARLES E. 1989; Medical Doctorate, 1989,
 Duke University
 NAJAFIAN, BEHZAD 2010; Medical Doctorate, 1996,
 University of Tehran
 NARESH, KIKKERI NARASIMHAMURTHY * 2020;

Medical Doctorate, 1980, Government Medical College and Research Institute, Mysore
 NESTER, THERESA * 2001; Medical Doctorate, 1994, University of Rochester
 PAGANO, MONICA BEATRIZ * 2009; Medical Doctorate, 1999, Universidad de Buenos Aires
 POLYAK, STEPHEN J. * 1993; Doctorate, 1993, McMaster University
 PRITCHARD, COLIN C. * 1996; Medical Doctorate, 2007, University of Washington-Seattle Campus
 QIN, XUAN 2005; Medical Doctorate, 1982, Nanjing University (南京大学)
 RAINES, ELAINE W 1975; Master's, 1975, University of California-San Francisco
 RUDZINSKI, ERIN R 2008; Medical Doctorate, 2003, Medical College of Georgia
 SABATH, DANIEL E. * 1989; Medical Doctorate, 1989, University of Pennsylvania
 SALIPANTE, STEPHEN * 2003; Medical Doctorate, 2011, University of Washington-Seattle Campus
 SCHWARTZ, STEPHEN MARK 1974; Medical Doctorate, 1967, Boston University
 SMITH, KELLY D. * 1996; Medical Doctorate, 1996, University of Iowa
 SWANSON, PAUL E 2001; Medical Doctorate, 1984, Oregon Health & Science University
 TRETIKOVA, MARIA S 2012; Medical Doctorate, 1994, Saint Petersburg State Medical Academy
 TSUCHIYA, KAREN D. 1990; Medical Doctorate, 1990, University of Michigan-Ann Arbor
 WENER, MARK H * 1980; Medical Doctorate, 1974, Washington University in St Louis
 WOOD, BRENT L. 1990; Medical Doctorate, 1990, Loma Linda University
 WU, DAVID * 2008; Medical Doctorate, 2003, Harvard University
 XU, HAODONG 2017; Medical Doctorate, 1987, Soochow University (苏州大学)
 YEUNG, CECILIA C S 2011; Medical Doctorate, 2005, University of Pennsylvania
 ZHANG, JING 2002; Doctorate, 1995, Duke University
 ZHU, JIA * 2003; Doctorate, 1994, Chinese Academy of Sciences

Associate Professors

AKILESH, SHREERAM * 2012; Medical Doctorate, 2009, Washington University in St Louis
 BOURASSA, LORI A. * 2014; Doctorate, 2009, Tufts University
 CHEN, ELEANOR Y * 1995; Medical Doctorate, 2006, University of Minnesota-Duluth
 CHEN, XUEYAN * 2011; Medical Doctorate, 1995, Peking University Health Science Center (北京大学医学部)
 CHISHOLM, KAREN M. 2001; Medical Doctorate, 2009, University of Washington-Seattle Campus
 COLE, BONNIE L 2005; Medical Doctorate, 2005, University of Utah
 DARVAS, MARTIN C * 2008; Doctorate, 2007,

Rheinische Friedrich Wilhelms Universität Bonn
 DAVIS, JENNIFER M * 2015; Doctorate, 2007, University of Michigan-Ann Arbor
 DENG, XINXIAN 2006; Doctorate, 2006, Tufts University
 DICKERSON, JANE A 2005; Doctorate, 2010, University of Washington-Seattle Campus
 EDLEFSEN, KERSTIN * 1998; Medical Doctorate, 2002, University of Washington-Seattle Campus
 FINK, SUSAN L * 1999; Medical Doctorate, 2009, University of Washington-Seattle Campus
 FROMM, JONATHAN R * 1998; Medical Doctorate, 1997, University of Iowa
 GONZALEZ-CUYAR, LUIS F. 2009; Medical Doctorate, 2005, American University of Puerto Rico
 HAFFNER, MICHAEL * 2019; Medical Doctorate, 2006, Innsbruck Medical University
 HERR, ALAN J 1992; Doctorate, 2000, University of Utah
 HOCH, BENJAMIN 2008; Medical Doctorate, 1999, Thomas Jefferson University
 HOFFMAN, NOAH G * 2005; Medical Doctorate, 2005, University of North Carolina
 KENNEDY, SCOTT * 2008; Doctorate, 2007, University of North Carolina at Chapel Hill
 KILGORE, MARK R. 2002; Medical Doctorate, 2010, Jefferson College
 KONNICK, ERIC Q * 2010; Medical Doctorate, 2010, University of Utah
 LI, KE 2019
 LIU, YONGJUN 2018; Medical Doctorate, 1993, Capital University of Medical Sciences (首都医科大学)
 LOUZON, MAX JOSEPH 2011; Master's, 2017, University of Washington-Seattle Campus
 MAHONEY, WILLIAM * 2004; Doctorate, 2004, University of Maryland-Global Campus
 MATHIAS, PATRICK C * 2012; Medical Doctorate, 2012, University of Illinois at Chicago
 MENDENHALL, ALEXANDER R * 2016; Doctorate, 2008, University of North Texas
 PACHECO, MARIA C 2017; Medical Doctorate, 2000, University of Cincinnati-Main Campus
 PAULSON, VERA 2018; Medical Doctorate, 2012, University of Texas Southwestern Medical Center at Dallas
 REA, SHANE LESLIE 2017; Doctorate, 1999, University of Queensland
 REED, ROBYN C 2020; Medical Doctorate, 2004, Duke University
 RICCIOTTI, ROBERT 2014; Medical Doctorate, 2010, University of Arizona
 RISQUES, ROSA ANA * 2003; Doctorate, 2001, Universitat Autònoma de Barcelona
 SCHMECHEL, STEPHEN C. 1998; Medical Doctorate, 1997, University of Minnesota-Duluth
 SCHWARZE, ULRICH 1993; Medical Doctorate, 1992, Technische Universität Berlin
 SHAMELI, AFSHIN 2023; Medical Doctorate, Mashhad

University of Medical Sciences
 SHI, MIN 2006; Doctorate, 2005, University of California-Riverside
 SHIRTS, BRIAN H * 2012; Medical Doctorate, 2008, University of Pittsburgh-Bradford
 SIDOROVA, JULIA M 2002; Doctorate, 1994, University of Russian Academy of Education
 SOMA, LORINDA A 2012; Medical Doctorate, 1998, University of Minnesota-Duluth
 TORABI, ALIREZA 2022; Medical Doctorate, 1997, Shahid Beheshti University of Medical Sciences
 TSANG, HAMILTON * 2017; Medical Doctorate, 2012, University of Southern California
 YOUNG, JESSICA E * 2003; Doctorate, 2009, University of Washington-Seattle Campus
 ZAFAR, NADEEM 2018; Medical Doctorate, 1985, Dow Medical College
 ZHU, TUOFU 1997; Medical Doctorate, 1984, Jiangxi Traditional Chinese Medicine University (江西中医药大学)

Assistant Professors

AHN, EUN HYUN 2011; Doctorate, 2003, Michigan State University
 ALLY, FERAS 2020; Medical Doctorate, 2011, University of Aleppo
 ALVAREZ, REBECA 2018; Medical Doctorate, 2011, University of Florida
 ASIF, MARYAM 2022; Bachelor's, 2011, Allama Iqbal Open University
 BANDHLISH, ANSHU 2015; Medical Doctorate, 2002, Guru Govind Singh Medical College
 BASHA, BASMA 2024; Medical Doctorate, 2012, Weill Cornell Medical College
 BELL, DREW TYLER 2021; Doctorate, 2019, Johns Hopkins University
 BERLETCH, JOEL B 2007; Doctorate, 2007, University of Alabama
 BRYAN, ANDREW BEVAN BRODY 2013; Medical Doctorate, 2013, University of Michigan-Ann Arbor
 BUCHAN, JILLIAN G 2020; Doctorate, 2014, Washington University in St Louis
 CHANG, OLIVER H 2010; Medical Doctorate, 2010, University of Illinois at Chicago
 CIMINO, PATRICK J. 2001; Medical Doctorate, 2011, University of Washington-Seattle Campus
 FRAZON, STEPHANIE 2024; Master's, 2012, University of Maryland-Baltimore
 GAJZER, DAVID 2021; Medical Doctorate, 2009, Ruprecht Karls Universität Heidelberg
 GLYNN, EMILY H. 2004; Medical Doctorate, 2011, University of Washington-Seattle Campus
 HASAN, RIDA ABID 2021; Medical Doctorate, 2014, Drexel University
 HOSNY, KAREEM 2022; Medical Doctorate, 2009, Cairo University
 HUDSON, KRYSTALYN E 2018; Doctorate, 2011, Emory University
 HUQ SAIFEE, NABIHA P. * 2003; Medical Doctorate,

2013, University of Washington-Seattle Campus
 HUTCHENS, TROY 2022; Medical Doctorate, 2017, Vanderbilt University
 JACKSON, NICOLE RENEE 2022; Medical Doctorate, 2014, Tulane University of Louisiana

Professors

ABKOWITZ, JANIS L * 1980; Medical Doctorate, 1977,
Harvard University
AKOUM, NAZEM 2015; Medical Doctorate, 2001,
American University of Beirut
ALTEMEIER, WILLIAM A. * 1992; Medical Doctorate,
1992, Vanderbilt University
AMORY, JOHN K. 1997; Medical Doctorate, 1994,
University of California-San Francisco
ANAWALT, BRADLEY D 1989; Medical Doctorate,
1989, University of California-Davis
APPELBAUM, FREDERICK R 1978; Medical Doctorate,
1972, Tufts University
AU, DAVID H. * 1996; Medical Doctorate, 1993,
University of Chicago
BACK, ANTHONY L. 1984; Medical Doctorate, 1984,
Harvard University
BANKS, WILLIAM A. 2010; Medical Doctorate, 1979,
University of Missouri
BANSAL, NISHA 2013; Medical Doctorate, 2003,
University of Connecticut
BEDALOV, ANTONIO * 1996; Medical Doctorate,
1989, University of Zagreb
BENDITT, JOSHUA O. 1994; Medical Doctorate, 1982,
University of Washington-Seattle Campus
BENNETT, ROBIN L. * 1984; Master's, 1984, Sarah
Lawrence College
BEST, JENNIFER ANN 1993; Medical Doctorate, 2000,
Northwestern University
BESTE, LAUREN A 2007; Medical Doctorate, 2004,
Johns Hopkins University
BHATIA, SHAILENDER 2004; Medical Doctorate, 2000,
All India Institute of Medical Sciences
BIGGINS, SCOTT W 2017; Medical Doctorate, 1999,
University of Southern California

BILLINGS, MARTHA 2006; Medical Doctorate, 2002,
University of California-San Francisco
BLOSSER, CHRISTOPHER D. 2013; Medical Doctorate,
2002, University of Kansas
BOECKH, MICHAEL J. J. 1994; Medical Doctorate,
1985, Freie Universität Berlin
BOMSZTYK, KAROL * 1983; Medical Doctorate, 1977,
University of Rochester
BORNFELDT, KARIN E * 1991; Doctorate, 1991,
Linköping University
BOYKO, EDWARD J. * 1982; Medical Doctorate, 1979,
University of Pittsburgh-Bradford
BRANCH, KELLEY R. 2001; Medical Doctorate, 1998,
Thomas Jefferson University
BRETNALL, TERESA A. 1984; Medical Doctorate,
1987, University of Washington-Seattle Campus
BROWNING, BRIAN LEE * 1992; Doctorate, 1999,
University of Washington-Seattle Campus
BUCKNER, FREDERICK S. 1992; Medical Doctorate,
1988, University of Washington-Seattle Campus
CARVALHO, PAULA G. 1984; Medical Doctorate,
1984, University of Washington-Seattle Campus
CHANDER, GEETANJALI * 2022; Medical Doctorate,
1997, Thomas Jefferson University
CHEEVER, MARTIN A 1982; Medical Doctorate, 1970,
University of Michigan-Ann Arbor
CHENG, HEATHER 1998; Medical Doctorate, 2007,
University of Washington-Seattle Campus
CHENG, RICHARD KAR-HANG 2013; Medical
Doctorate, 2005, Columbia University
CHEW, LISA D. 1993; Medical Doctorate, 1993,
University of California-San Francisco
CHIOREAN, ELENA G 2012; Medical Doctorate, 1993,
University of Medicine and Pharmacy Iuliu Hatieganu
Cluj Napoca
CHOW, LAURA QUAN MAN 2010; Medical Doctorate,
1999, University of British Columbia
CHU, HELEN Y. * 2009; Medical Doctorate, 2005,
Duke University
CLURMAN, BRUCE E. * 1991; Medical Doctorate,
1989, Cornell University
COLLISSON, ERIC A. 2024; Medical Doctorate, 2002,
University of California-Los Angeles
CORNIA, PAUL B. 1996; Medical Doctorate, 1996,
Case Western Reserve University
CRANE, HEIDI 1991; Medical Doctorate, 1998,
University of Washington-Seattle Campus
CRANE, PAUL K 1997; Medical Doctorate, 1997,
University of Washington-Seattle Campus
CRANMER, LEE DUNCAN 2015; Medical Doctorate,
1998, University of California-San Diego
CROTHERS, KRISTINA ANNE 2009; Medical Doctorate,
1997, Yale University
CUMMINGS, DAVID E. 1987; Medical Doctorate,
1987, Harvard University
CURTIS, JARED R. 1988; Medical Doctorate, 1988,
Johns Hopkins University
DALE, DAVID C 1974; Medical Doctorate, 1966,
Harvard University

DAVIDSON, NANCY E 2016; Medical Doctorate, 1979, Harvard University
 DE BOER, IAN H. * 2003; Medical Doctorate, 1999, Oregon Health & Science University
 DEL ZOPPO, GREGORY J. 2007; Medical Doctorate, 1977, University of Washington-Seattle Campus
 DELLIT, TIMOTHY H. 2001; Medical Doctorate, 1997, Cornell University
 DHANIREDDY, SHIREESHA 1999; Medical Doctorate, 1999, Georgetown University
 DISIS, MARY L. 1990; Medical Doctorate, 1986, University of Nebraska-Lincoln
 DOMBROWSKI, JULIA C. * 2007; Medical Doctorate, 2004, Duke University
 DOMINITZ, JASON A 1998; Medical Doctorate, 1991, University of Maryland-Global Campus
 DON, CREIGHTON W. 2004; Medical Doctorate, 2001, University of California-San Francisco
 DONEY, KRISTINE 1981; Medical Doctorate, 1972, University of Michigan-Ann Arbor
 DONG, JING-FEI 2011; Medical Doctorate, 1984, Lanzhou University (兰州大学)
 DUCHIN, JEFFREY S. 1995; Medical Doctorate, 1985, Rutgers University-Camden
 DUGDALE, DAVID C. 1982; Medical Doctorate, 1982, University of Pennsylvania
 EATON, KEITH D. 1998; Medical Doctorate, 1998, University of California-San Diego
 ENGELBERG, RUTH A. 1989; Doctorate, 1988, University of Washington-Seattle Campus
 ESTEY, ELIHU 2008; Medical Doctorate, 1972, Johns Hopkins University
 EVANS, LAURA ELISE 2019; Medical Doctorate, 1999, University of Michigan-Ann Arbor
 FAN, VINCENT S. * 1995; Medical Doctorate, 1995, University of Minnesota-Duluth
 FIHN, STEPHAN * 1982; Medical Doctorate, 1977, University of Missouri-St Louis
 FISHBEIN, DANIEL P 1981; Medical Doctorate, 1980, Yeshiva University
 FLECKMAN, PHILIP H 1982; Medical Doctorate, 1973, Washington University in St Louis
 FLOYD, JAMES * 2005; Medical Doctorate, 2005, Duke University
 FREDRICKS, DAVID N. * 2001; Medical Doctorate, 1990, Case Western Reserve University
 FREEMAN, ROSARIO 2001; Medical Doctorate, 1995, Loyola University Chicago
 FUJISE, KENICHI * 2020; Medical Doctorate, 1987, Kyoto University
 FURLONG, CLEMENT E. * 1977; Doctorate, 1968, University of California-Davis
 GALLAGHER, THOMAS H * 2002; Medical Doctorate, 1990, Harvard University
 GARCIA, DAVID A. 2012; Medical Doctorate, 1993, University of Alabama
 GARCIA, JOSE * 2016; Medical Doctorate, 1997, Universidad Nacional de Cordoba
 GASTER, BARAK 1993; Medical Doctorate, 1993,

University of California-San Francisco
 GEBALLE, ADAM PHILIP * 1988; Medical Doctorate, 1978, Duke University
 GHARIB, SINA A. 1996; Medical Doctorate, 1996, Harvard University
 GIACANI, LORENZO * 2002; Doctorate, 2005, Università di Bologna
 GILLILAND, DWIGHT GARY 2019
 GLENNY, ROBB * 1987; Medical Doctorate, 1984, Virginia University of Lynchburg
 GOLDEN, MATTHEW R * 1994; Medical Doctorate, 1994, Johns Hopkins University
 GOPAL, AJAY 1997; Medical Doctorate, 1993, Emory University
 GOSS, CHRISTOPHER HOOPER 1997; Medical Doctorate, 1992, University of Colorado Denver
 GOSS, J. RICHARD 1993; Medical Doctorate, 1987, Oregon Health & Science University
 GOTTLIEB, GEOFFREY S. 1998; Medical Doctorate, 1994, Chicago State University
 GRADY, WILLIAM M. 1990; Medical Doctorate, 1990, University of Michigan-Ann Arbor
 GREENBERG, PHILIP D * 1978; Medical Doctorate, 1971, New York University
 GRIVAS, PETROS 2018; Medical Doctorate, 2005, University of Patras
 HALL, YOSHIO N. 2007; Medical Doctorate, 1999, Baylor University
 HALLSTRAND, TEAL 1990; Medical Doctorate, 1993, University of Washington-Seattle Campus
 HARRINGTON, ROBERT D 1989; Medical Doctorate, 1983, Tufts University
 HAWKINS, RAYMOND DAVID * 2010; Doctorate, 2005, University of Texas Southwestern Medical Center at Dallas
 HAWN, THOMAS R. * 1995; Medical Doctorate, 1995, Johns Hopkins University
 HEINECKE, JAY W 1982; Medical Doctorate, 1981, Washington State University
 HIGANO, CELESTIA S. 1982; Medical Doctorate, 1979, University of Massachusetts
 HILL, GEOFFREY * 2018; Doctorate, 2001, University of Auckland
 HINGORANI, SUNIL 2006; Medical Doctorate, 1994, Yale University
 HIRSCH, IRL B. 1990; Medical Doctorate, 1984, University of Missouri
 HISAMA, FUKI MARIE 2009; Medical Doctorate, 1988, University of Chicago
 HOCKENBERY, DAVID M. 1994; Medical Doctorate, 1982, Washington State University
 HOLMBERG, LEONA A. 1987; Medical Doctorate, 1986, University of Miami
 HOUGHTON, ASHLEY M * 2012; Medical Doctorate, 1996, Georgetown University
 HURVITZ, SARA A. 2023; Medical Doctorate, 1999, University of Southern California
 INADOMI, JOHN M 2010; Medical Doctorate, 1988, University of California-San Francisco

IOANNOU, GEORGE 2000; Medical Doctorate, 1996, University of Oxford

JARVIK, GAIL P. 1991; Medical Doctorate, 1987, University of Iowa

JEFFERSON, JONATHAN ASHLEY 1997; Medical Doctorate, 1995, Queens University

JOHNSEN, JILL M. 2008; Medical Doctorate, 1998, Case Western Reserve University

JOHNSON, KAY M. 1991; Medical Doctorate, 1991, University of Minnesota-Duluth

JOHNSTON, CHRISTINE 1995; Medical Doctorate, 2001, University of Minnesota-Duluth

JUNG, BARBARA HEDWIG * 2019; Medical Doctorate, 1996, Ludwig Maximilians Universität München

KAHN, STEVEN EMANUEL * 1986; Medical Doctorate, 1978, University of Cape Town

KAMINETZKY, CATHERINE P. 2011; Medical Doctorate, 1998, Duke University

KAPUR, VISHESH 1993; Medical Doctorate, 1989, Yale University

KEEL, SIOBAN 2002; Medical Doctorate, 1999, University of Minnesota-Duluth

KESTENBAUM, BRYAN * 1999; Medical Doctorate, 1995, University of Massachusetts

KIEM, HANS-PETER * 1992; Medical Doctorate, 1987, Universität Ulm

KIM, FRANCIS 1992; Medical Doctorate, 1990, University of California-San Francisco

KIM, HYANG N * 1999; Medical Doctorate, 1999, University of California-San Francisco

KING, MARY-CLAIRE * 1995; Doctorate, 1973, University of California-Berkeley

KIRKPATRICK, JAMES N * 2015; Medical Doctorate, 1998, Loma Linda University

KITAHATA, MARI M. 1991; Medical Doctorate, 1987, University of Pennsylvania

KNIGHT, CHRISTOPHER 1993; Medical Doctorate, 1996, University of Washington-Seattle Campus

KO, CYNTHIA W. * 1994; Medical Doctorate, 1991, Stanford University

KOELLE, DAVID * 1988; Medical Doctorate, 1985, University of Washington-Seattle Campus

KRAEMER, BRIAN * 2000; Doctorate, 2000, University of Wisconsin-Madison

KRIEGER, ERIC V. 2006; Medical Doctorate, 2002, Mount Sinai School of Medicine

KRITEK, PATRICIA A 2010; Medical Doctorate, 1998, University of Connecticut

KROSS, ERIN K. 2005; Medical Doctorate, 2002, University of Iowa

KRUSE-JARRES, REBECCA 2014; Medical Doctorate, 1999, Tulane University of Louisiana

KUDENCHUK, PETER J 1982; Medical Doctorate, 1979, University of Washington-Seattle Campus

LEASE, ERIKA D. 1995; Medical Doctorate, 2004, University of Washington-Seattle Campus

LECA, NICOLAE 2005; Medical Doctorate, 1996, Carol Davila University of Medicine and Pharmacy

LEE, STEPHANIE J. 2006; Medical Doctorate, 1990,

Stanford University

LEMAITRE, ROZENN N. 1986; Doctorate, 1982, Montana State University

LEVY, WAYNE C. 1985; Medical Doctorate, 1985, Loma Linda University

LIEBER, ANDRE 1994; Medical Doctorate, 1987, Saint Petersburg State Pavlov Medical University

LILES, WAYNE CONRAD * 1982; Medical Doctorate, 1987, University of Washington-Seattle Campus

LIMAYE, ABHIJIT P. 1983; Medical Doctorate, 1992, University of Washington-Seattle Campus

Professors

FUTRAN, NEAL DAVID 1995; Medical Doctorate, 1987, New York University
 MERATI, ALBERT L 2007; Medical Doctorate, 1991, University of Washington-Seattle Campus
 MEYER, TANYA K 2009; Medical Doctorate, 1996, University of California-San Diego
 MOE, KRISTEN S 1984; Medical Doctorate, 1989, University of Washington-Seattle Campus
 PARIKH, SANJAY R 2011; Medical Doctorate, 1994, University of British Columbia
 PERKINS, JONATHAN A. 1994; Doctorate, 1987, Iowa State University
 PHILLIPS, JAMES O 1982; Doctorate, 1993, University of Washington-Seattle Campus
 RAIBLE, DAVID W. * 1995; Doctorate, 1989, University of Pennsylvania
 ROSKILL, JENNIFER SUSAN * 1993; Doctorate, 1993, Boston University
 RUBINSTEIN, JAY T. * 2004; Medical Doctorate, 1987, University of Washington-Seattle Campus
 SIE, KATHLEEN CY 1984; Medical Doctorate, 1984, University of Michigan-Ann Arbor
 TEMPEL, BRUCE L. 1988; Doctorate, 1983, Princeton University
 WEAVER, EDWARD M. 1998; Medical Doctorate,

1993, Yale University

WHIPPLE, MARK E. * 2001; Medical Doctorate, 1991,
University of Washington-Seattle Campus

Associate Professors

ABUZEID, AL WALEED 2020; Medical Doctorate,
2005, University College London
BARBER, BRITTANY 2018; Medical Doctorate, 2011,
University of Alberta
BLY, RANDALL 2009; Medical Doctorate, 2009, Loyola
University Chicago
DAHL, JOHN P. 2018; Medical Doctorate, 2009,
Pennsylvania State University-College of Medicine
DRENNAN, WARD R. 2004; Doctorate, 1998, Indiana
University-Bloomington
GILIBERTO, JOHN PAUL 2016; Medical Doctorate,
2010, Dartmouth College
HORN, DAVID L. * 2010; Medical Doctorate, 2002,
Medical College of Wisconsin
HOULTON, JEFFREY J 2014; Medical Doctorate, 2008,
The University of Texas Medical Branch
HUME, CLIFFORD * 1996; Medical Doctorate, 1996,
Cornell University
HUMPHREYS, IAN M 2015; Medical Doctorate, 2009,
Lake Erie College
JOHNSON, KAALAN E. 2013; Medical Doctorate,
2004, Loma Linda University
MENDEZ, EDUARDO 1999; Medical Doctorate, 1999,
University of Maryland-Global Campus
OU, HENRY 1998; Medical Doctorate, 1998,
Washington State University
SARDESAI, MAYA G. 2008; Medical Doctorate, 2002,
Queens University

Assistant Professors

BHATT, NEEL 2020
BONILLA VELEZ, JULIANA 2018; Medical Doctorate,
2011, Universidad del Valle
CHANG, JOSEPH 2023; Medical Doctorate, 2014,
University of California-San Francisco
JAFARI, ARIA 2020; Medical Doctorate, 2013,
Stanford University
KOHLEBERG, GAVRIEL 2019; Medical Doctorate, 2010,
Stanford University
KOJIMA, YOSHIKO 2006; Doctorate, 2006, University
of Tsukuba
LAU, BONNIE * 2009; Doctorate, 2014, University of
Washington-Seattle Campus
LU, GUANNING NINA 2019; Medical Doctorate, 2013,
Northwestern University
MARCHIANO, EMILY 2021
RIZVI, ZAIN 2019; Medical Doctorate, 2013, Wayne
State University

Pediatrics

Professors

ADAM, MARGARET P. 2009; Medical Doctorate,
1998, Stanford University
ADEREM, ALAN A. * 1996; Doctorate, 1979,
University of Cape Town
AHRENS, KYM 2002; Medical Doctorate, 2002,
University of Iowa
AITCHISON, JOHN * 2004; Doctorate, 1992,
McMaster University
BADEN, HARRIS P. 1992; Medical Doctorate, 1989,
The University of Texas Medical Branch
BAKER, KEVIN 2009; Medical Doctorate, 1988,
University of Nebraska at Omaha
BAMSHAD, MICHAEL J * 2005; Medical Doctorate,
1989, University of Missouri
BATRA, MANEESH 2000; Medical Doctorate, 2000,
Stanford University
BEIER, DAVID R 2012; Medical Doctorate, 1984,
University of Washington-Seattle Campus
BERKELHAMER, SARA K 2020; Medical Doctorate,
1999, University of Chicago
BERNSTEIN, IRWIN D 1980; Medical Doctorate, 1967,
New York University
BHAT, AARTI 2011; Medical Doctorate, 1997, Guru
Gobind Singh Indraprastha University
BJORNSON, KRISTIE F 1986; Doctorate, 2006,
University of Washington-Seattle Campus
BJORNSTAD, PETTER MATHIAS 2024; Medical
Doctorate, 2010, Royal College of Surgeons of Ireland
BLEAKLEY, MARIE 2002; Medical Doctorate, 1994,
Flinders University
BRANDLING-BENNETT, HEATHER 2009; Medical
Doctorate, 2004, Harvard University
BREI, TIMOTHY 2013; Medical Doctorate, 1984,
University of Nebraska at Omaha
BREUNER, CORA C. 1991; Medical Doctorate, 1982,
Thomas Jefferson University
BROGAN, THOMAS V 1993; Medical Doctorate, 1990,
University of California-Davis
BROWN, JULIE C 1996; Medical Doctorate, 1991,
McGill University
BURROUGHS, LAURI 2001; Medical Doctorate, 1998,
University of Wisconsin-Madison
CAGLAR, DERYA 2008; Medical Doctorate, 2001, New
York Medical College
CARPENTER, PAUL A. 1995; Medical Doctorate, 1988,
University of Sydney
CHABRA, SHILPI 2003; Medical Doctorate, 1985,
Mumbai University
CHEN, MAIDA L. * 2005; Medical Doctorate, 1998,
Northwestern University
CHOW, ERIC J. 2001; Medical Doctorate, 2001,
University of California-San Francisco
CHRISTAKIS, DIMITRI A. 1993; Medical Doctorate,
1993, University of Pennsylvania
CHUNG, ESTHER K. 2019; Medical Doctorate, 1991,
Columbia University
COKER, TUMAINI 2016; Medical Doctorate, 2001,
University of California-Los Angeles

COLER, RHEA N. * 1994; Doctorate, 1998, University of Washington-Seattle Campus
 COON, ERIC 2024; Medical Doctorate, 2010, University of Arizona
 COOPER, TODD 2015; Medical Doctorate, 1998, Nova Southeastern University
 COX, TIMOTHY C. 2006; Doctorate, 1994, University of Adelaide
 CUNNINGHAM, MICHAEL L. * 1988; Medical Doctorate, 1988, University of Vermont
 DE LA MORENA, MARIA TERESA 2018; Medical Doctorate, 1982, Universidad Complutense de Madrid
 DEBLEY, JASON S. 2000; Medical Doctorate, 1995, Northwestern University
 DEL BECCARO, MARK A. 1985; Medical Doctorate, 1985, University of Washington-Seattle Campus
 DENNO, DONNA M. * 1993; Medical Doctorate, 1991, University of Michigan-Ann Arbor
 DIEKEMA, DOUGLAS S. * 1990; Medical Doctorate, 1985, University of North Carolina
 DIPPLE, KATRINA M 2016; Medical Doctorate, 1995, Indiana University-Purdue University-Indianapolis
 DIVALL, SARA A 2014; Medical Doctorate, 1999, University of Wisconsin-Madison
 DOBYNS, WILLIAM B. 2010; Medical Doctorate, 1978, Mayo Graduate School
 DOHERTY, DANIEL A. * 1998; Medical Doctorate, 1998, University of California-San Francisco
 EBEL, BETH E. * 1999; Medical Doctorate, 1996, Harvard University
 ENGLUND, JANET A. 2002; Medical Doctorate, 1980, University of Michigan-Ann Arbor
 FECHNER, PATRICIA Y. 2006; Medical Doctorate, 1986, Northwestern University
 FLYNN, JOSEPH T 2007; Medical Doctorate, 1987, New York University
 FRENKEL, LISA M. * 1994; Medical Doctorate, 1981, University of Kansas
 GALLO, VITTORIO 2024; Doctorate, 1979, American University of Rome
 GEDDIS, AMY 1997; Medical Doctorate, 1994, Jefferson College
 GLASS, IAN 2000; Medical Doctorate, 1991, University of Otago
 GRILL, BROCK * 2020; Doctorate, 2003, University of British Columbia
 GROW, HELENE MOLLIE GREVES 2003; Medical Doctorate, 2003, University of Pennsylvania
 GRUNDNER, CHRISTOPH * 2010; Doctorate, 2003, University of Professional Education Heidelberg
 GUMBINER, BARRY M 2015; Doctorate, 1982, University of California-San Francisco
 HAHN, SIHOUN 2006; Medical Doctorate, 1983, Korea University
 HAMBLETT, NICOLE MAYER * 1994; Doctorate, 1999, University of Washington-Seattle Campus
 HANSEN, THOMAS N 2005; Medical Doctorate, 1973, Baylor University

HAWKINS, DOUGLAS S. 1990; Medical Doctorate, 1990, Harvard University
 HEIKE, CARRIE 1997; Medical Doctorate, 2000, University of Washington-Seattle Campus
 HING, ANNE V. 1999; Medical Doctorate, 1985, Washington State University
 HINGORANI, SANGEETA R. 1990; Medical Doctorate, 1993, Yeshiva University
 HOFFMAN, LUCAS * 1998; Medical Doctorate, 1998, University of California-San Francisco
 HORSLEN, SIMON PETER 2005; Medical Doctorate, 1984, University of Bristol
 HSU, EVELYN K. 2003; Medical Doctorate, 2003, University of Wisconsin Colleges
 JARVIS, JAMES 2024; Medical Doctorate, 1979, University of Vermont
 JASPAN, HEATHER B * 1999; Medical Doctorate, 1999, Tulane University of Louisiana
 JENSEN, MICHAEL C. 1984; Medical Doctorate, 1990, University of Pennsylvania
 JOHNSTON, BRIAN D. * 1990; Medical Doctorate, 1990, University of California-San Diego
 JOHNSTON, TROY 1999; Medical Doctorate, 1991, University of Virginia-Main Campus
 JUUL LEDBETTER, SANDRA * 1982; Medical Doctorate, 1981, University of Washington-Seattle Campus
 KAPLAN, RON L. 2003; Medical Doctorate, 1992, University of North Carolina
 KAPPE, STEFAN H. I. * 2004; Doctorate, 1998, University of Notre Dame
 KARR, CATHERINE * 1987; Medical Doctorate, 1999, University of Washington-Seattle Campus
 KAUSHANSKY, ALEXIS L * 2015; Doctorate, 2010, Harvard University
 KEMNA, MARISKA S 2008; Medical Doctorate, 1995, Erasmus University of Rotterdam
 KING, MARY ALICE 2001; Medical Doctorate, 2001, University of California-Irvine
 KLEIN, EILEEN J. * 1988; Medical Doctorate, 1988, Johns Hopkins University
 KRONMAN, MATTHEW P. 2003; Medical Doctorate, 2003, Yale University
 LAGUNA, THERESA A 2023; Medical Doctorate, 1999, University of California-San Francisco
 LAW, YUK M. 2006; Medical Doctorate, 1987, University of California-Los Angeles
 LAWLOR, ELIZABETH RACHEL * 2020; Medical Doctorate, 1989, McMaster University
 LEARY, SARAH E. 2009; Medical Doctorate, 2001, The University of Tennessee
 LEU, MICHAEL * 1984; Medical Doctorate, 2002, University of Washington-Seattle Campus
 LEWIN, MARK 2001; Medical Doctorate, 1991, University of Southern California
 LEWIS, CHARLOTTE * 1998; Medical Doctorate, 1994, University of California-San Francisco
 LEWIS-NEWBY, MITHYA 1996; Medical Doctorate, 2002, University of Washington-Seattle Campus

LIPTZIN, DEBORAH RACHEL 2021; Medical Doctorate, 2009, University of Massachusetts Medical School Worcester

LOH, MIGNON 2021; Medical Doctorate, 1991, Columbia University

MAGARET, AMALIA SOPHIA * 1997; Doctorate, 2001, University of Washington-Seattle Campus

MAJESKY, MARK W. * 1982; Doctorate, 1984, University of Washington-Seattle Campus

MARSHALL AARONSON, SUSAN 1979; Medical Doctorate, 1980, University of California-Los Angeles

MATTHEWS, DANA C. 1984; Medical Doctorate, 1981, University of Washington-Seattle Campus

MAZOR, SUZAN 2004; Medical Doctorate, 1995, University of Illinois at Urbana-Champaign

MAZWI, MJAYE L. 2023; Medical Doctorate, 2003, University of Zimbabwe

MCCARTY, CAROLYN A. * 1999; Doctorate, 2000, University of California-Los Angeles

MCDONALD, RUTH A. 1987; Medical Doctorate, 1987, University of Minnesota-Duluth

MCGUIRE, JOHN K 2004; Medical Doctorate, 1993, Northwestern University

MCPHILLIPS, HEATHER A. 1998; Medical Doctorate, 1994, University of Chicago

MELZER, SANFORD M. 1990; Medical Doctorate, 1982, Mount Sinai School of Medicine

MENDOZA, JASON A. * 2001; Medical Doctorate, 2001, Rush University

MESHINCHI, SOHEIL 1997; Medical Doctorate, 1994, Wayne State University

MIAO, CAROL H 1981; Doctorate, 1987, University of Washington-Seattle Campus

MILLEN, KATHLEEN J. * 2010; Doctorate, 1995, University of Toronto

MILLER, DANIEL G. 1989; Medical Doctorate, 1996, University of Washington-Seattle Campus

MORGAN, ESI 2021; Medical Doctorate, 1999, Washington University in St Louis

MUSA, NDIDIAMAKA L. 2013; Medical Doctorate, 1987, University of Liberia

MYLER, PETER J. 1993; Doctorate, 1982, University of Queensland

NANDA, KABITA 2012; Medical Doctorate, 2003, Ross University

OCHS, HANS D 1969; Medical Doctorate, 1969, Universität Freiburg

OKAMURA, DARYL M 1988; Medical Doctorate, 1998, University of Hawaii

OLSON, JAMES M. * 1991; Medical Doctorate, 1991, University of Michigan-Ann Arbor

OPEL, DOUGLAS J. 2002; Medical Doctorate, 2002, University of Chicago

ORENTAS, RIMAS 2018; Doctorate, 1991, Johns Hopkins University

PAGE, DAMON T 2023; Doctorate, 2012, University of Cambridge

PARISH, TANYA * 2007; Doctorate, 1993, Institute for System Level Integration

PARK, JULIE RUGGIERI 1988; Medical Doctorate, 1988, University of Vermont

PETROVIC, ALEKSANDRA 2016; Medical Doctorate, 1997, Oregon Health & Science University

PIHOKER, CATHERINE 1997; Medical Doctorate, 1987, Albany Medical College

PILIPONSKY, ADRIAN M. * 2011; Doctorate, 2003, Hebrew University of Jerusalem

PINTO, NELANGI M. 2022; Medical Doctorate, 2000, University of Michigan-Ann Arbor

PORTMAN, MICHAEL A. 1992; Medical Doctorate, 1980, University of Cincinnati-Clermont College

RAJAGOPAL, LAKSHMI * 1999; Doctorate, 1999, Jawaharlal Nehru University

RALSTON, SHAWN L. 2021; Medical Doctorate, 1997, The Texas A&M University

RAWLINGS, DAVID J * 2001; Medical Doctorate, 1984, University of North Carolina

REDDING, GREGORY J 1980; Medical Doctorate, 1974, Stanford University

REID, JENNIFER R 1989; Medical Doctorate, 1998, University of Washington-Seattle Campus

RICHARDSON, LAURA P. * 1998; Medical Doctorate, 1994, University of Michigan-Ann Arbor

RIVARA, FREDERICK P. * 1984; Medical Doctorate, 1974, University of Pennsylvania

ROBERTS, JOAN S. 1992; Medical Doctorate, 1992, Roseman University of Health Sciences

ROSENFELD, MARGARET 1988; Medical Doctorate, 1988, Harvard University

ROTH, CHRISTIAN L. 2007; Medical Doctorate, 1990, University of Professional Education Heidelberg

SAELENS, BRIAN E * 2006; Master's, 1996, New York University

SALERNO, JACK 2003; Medical Doctorate, 1996, University of California-San Diego

SATHER, DAVID NOAH * 2018

SATHYANARAYANA, SHEELA * 2002; Medical Doctorate, 2002, University of Southern California

SAWYER, TAYLOR L * 2012; Medical Doctorate, 2001, Purdue University Global-Des Moines Campus

SCHARENBERG, ANDREW M. 2000; Medical Doctorate, 1990, University of North Carolina

SCHENKMAN, KENNETH A. * 1990; Medical Doctorate, 1986, Indiana University-Bloomington

SESLAR, STEPHEN 2008; Medical Doctorate, 1996, Georgetown University

SHENOI, SUSAN 2008; Medical Doctorate, 1998, Mumbai University

SHIC, FREDERICK 2016; Doctorate, 2008, Yale University

SHIH, ANDY * 2018; Doctorate, 2006, University of British Columbia

SHUGERMAN, RICHARD P 1984; Medical Doctorate, 1984, University of Alabama

SIDBURY, ROBERT 2000; Medical Doctorate, 1993, Duke University

SMITH, CHARLES VINCENT 2007; Doctorate, 1974, Rice University

SMITH, JODI 1999; Medical Doctorate, 1995, McGill University
 SMITH, JOSEPH * 2003; Doctorate, 1994, Washington State University
 SMITH, LINCOLN S 2003; Medical Doctorate, 1999, University of Wisconsin Colleges
 SODORA, DONALD L * 2008; Doctorate, 1990, University of Pennsylvania
 STONE, KIMBERLY P 2007; Medical Doctorate, 2001, University of California-San Francisco
 STUART, KENNETH DANIEL * 1985; Doctorate, 1969, University of Iowa
 STUDHOLME, COLIN * 2011; Doctorate, 1997, University of London
 SUSKIND, DAVID 2003; Medical Doctorate, 1997, Louisiana State University
 SYMONS, JORDAN 1999; Medical Doctorate, 1992, Columbia University
 THAKAR, MONICA 2018; Medical Doctorate, 2001, Medical University of South Carolina
 TIEDER, JOEL S. 2004; Medical Doctorate, 1999, Medical College of Georgia
 TORBETT, BRUCE E * 2020; Doctorate, 1988, University of California-Los Angeles
 TREHAN, INDI * 2020; Medical Doctorate, 2004, Northwestern University
 URDAHL, KEVIN B. * 1995; Medical Doctorate, 1995, University of Minnesota-Duluth
 USPAL, NEIL G. 2011; Medical Doctorate, 2003, University of Pittsburgh-Bradford
 VERGANO, SAMANTHA A 2024; Medical Doctorate, 2006, Eastern Virginia Medical School
 WAHBEH, GHASSAN 2004; Medical Doctorate, 1990, University of Jordan
 WALKER-HARDING, LESLIE 2016; Medical Doctorate, 1990, University of Illinois at Chicago
 WARD-KOCH, TERESA M. * 2006; Doctorate, 2006, University of California-San Francisco
 WATSON, ROBERT SCOTT 1993; Medical Doctorate, 1993, University of Pennsylvania
 WEISSMAN, SCOTT 2000; Medical Doctorate, 1997, University of California-Irvine
 WELSH, JOHN P. * 2009; Doctorate, 1990, University of Iowa
 WENGER, TARA L 1998; Medical Doctorate, 2008, University of Rochester
 WILFOND, BENJAMIN S * 2006; Medical Doctorate, 1983, University of Medicine and Dentistry of New Jersey
 WOODWARD, GEORGE A. 2003; Medical Doctorate, 1983, Temple University
 YOUNG, LUCIANA T 2016; Medical Doctorate, 1989, Wayne State University
 YUNG, DELPHINE 1989; Medical Doctorate, 1997, Stanford University
 ZERR, DANIELLE M. 1993; Medical Doctorate, 1993, Temple University
 ZHOU, CHUAN 1998; Doctorate, 2003, University of Washington-Seattle Campus

ZIMMERMAN, JERRY J. 1998; Medical Doctorate, 1979, University of Wisconsin-Madison
 ZINNER, SAMUEL 2003; Medical Doctorate, 1994, University of California-Berkeley

Associate Professors

ALBERS, ERIN 2012; Medical Doctorate, 2004, Virginia University of Lynchburg
 ALBERT, CATHERINE M 2016; Medical Doctorate, 2008, George Washington University
 AMBARTSUMYAN, LUSINE 2013; Medical Doctorate, 2007, Drexel University
 ANNESLEY, COLLEEN E 2015; Medical Doctorate, 2006, Temple University
 ARYA, BHAWNA 2013; Medical Doctorate, 2006, University of Chicago
 BECK, ANITA E. 2005; Medical Doctorate, 1997, Washington State University
 BECK, JIMMY 2001; Medical Doctorate, 2004, University of Washington-Seattle Campus
 BENNETT, JAMES T. 2008; Medical Doctorate, 2008, New York University
 BERKMAN, EMILY 2011; Medical Doctorate, 2011, University of Rochester
 BILLIMORIA, ZEENIA C 2015; Medical Doctorate, 2008, Bharti Vidyapeeth University
 BOOS, MARKUS D 2015; Medical Doctorate, 2010, University of Chicago
 BUDDHE, SUJATHA 2013; Medical Doctorate, 2003, Osmania University
 BULL, MARTA 2006; Doctorate, 2002, North Carolina A & T State University
 BURNS, REBEKAH A. 2013; Medical Doctorate, 2007, University of California-San Francisco
 CHAN, TITUS 2013; Medical Doctorate, 2003, University of Alberta
 CHEN, KARIN 2020; Medical Doctorate, 2004, University of California-Irvine
 CHERRY, TIMOTHY J * 2017; Doctorate, 2009, Harvard University
 CHONG, JESSICA X. 2012; Doctorate, 2012, University of Chicago
 CHRISMAN, SARA P. D. 2003; Medical Doctorate, 2003, University of Pennsylvania
 CHUN, TERRENCE 2004; Medical Doctorate, 1997, American College
 CLARK, JONNA D. 2008; Medical Doctorate, 2003, Oregon Health & Science University
 COGEN, JONATHAN 2014; Medical Doctorate, 2011, George Washington University
 CROWELL, CLAUDIA S 2003; Medical Doctorate, 2006, University of Washington-Seattle Campus
 DAHLBERG, ANN E. R. 1995; Medical Doctorate, 2005, Harvard University
 DAVIZON-CASTILLO, PAVEL 2024; Medical Doctorate, 2007, Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)
 DEEN, JASON F 2010; Medical Doctorate, 2006, University of Minnesota-Duluth

DELROSSO, LOURDES 2018
 DERVAN, LESLIE ANN 2011; Medical Doctorate, 2008, Harvard University
 DESAI, ARTI 2012; Medical Doctorate, 2006, Wayne State University
 DI GENNARO, JANE L. 2001; Medical Doctorate, 2000, Louisiana State University
 DICHEK, A. K. HELEN L 2001; Medical Doctorate, 1980, Académie Universitaire Louvain
 EVANS, KELLY 2004; Medical Doctorate, 2004, University of Southern California
 EVANS, YOLANDA N 1999; Medical Doctorate, 2005, Oregon Health & Science University
